Traditional, modern and contemporary arts of Africa, as well as the impact of African culture on the Americas. Emphasis on global politics of intercultural contact between Africa and the West. Offered Fall.

Prerequisites: AH 1110 with a minimum grade of C- and AH 1120 with a minimum grade of C-

Restriction(s): Enrollment is limited to Undergraduate level students.

AH 3240 Mythology in Greek Art Cr. 3

The myths of the Greeks as they appeared on painted vases, and the strategies of visual storytelling employed. Offered Intermittently.

AH 3410 Medieval Art and Architecture Cr. 3

Monasticism as a driving force in medieval culture; art and architecture produced by and for Christian religious communities, A.D. 300-1400. Offered Intermittently.

Prerequisites: AH 1110

AH 3470 Islamic Art and Architecture Cr. 3

Satisfies General Education Requirement: Global Learning Inquiry
Survey of art and architecture of Islam from its origins in the seventh century to the Ottoman Empire. Offered Intermittently.

AH 3560 Special Topics Cr. 3

Students examine specific issues related to art history. Offered Intermittently.

Restriction(s): Enrollment is limited to Undergraduate level students.

Repeatable for 12 Credits

AH 3650 Nineteenth-Century European Art and Architecture Cr. 3

Introduction to European art and architecture from 1780 to 1900; survey of major developments in 19th century painting, sculpture, printmaking and photography. Offered Fall, Winter.

AH 3700 Contemporary Art Cr. 3

Introduction for studio art majors: ideas and styles of modern art. The gap between those who make art and those who write about it. Access to the discipline of art history through tracing the origins of a variety of contemporary art practices. Offered Yearly.

Prerequisites: AH 1000-1999

AH 3750 African American Art Cr. 3

Satisfies General Education Requirement: Diversity Equity Incl Inquiry
Historical inquiry of African American art from the eighteenth century to today. Offered Yearly.

Equivalent: AFS 3750

AH 3760 Art of the African Diaspora Cr. 3

Examines art of the African Diaspora and how this history of dissemination affected art making in various geographical, cultural, and sociopolitical paradigms. Offered Fall.

Equivalent: AFS 3760

AH 5210 Hellenistic Art Cr. 3

Sculpture, painting and architecture of the Greek world from Alexander the Great to Cleopatra. Offered Intermittently.

Prerequisites: AH 1110 with a minimum grade of C and AH 1120 with a minimum grade of C

AH 5250 Ancient Rome Cr. 3

Development of Rome into an imperial capital. Design, function and political significance of public monuments in the city. Offered Intermittently.

Prerequisites: AH 1110 with a minimum grade of C and AH 1120 with a minimum grade of C

AH 5260 Classical Greek Art Cr. 3

Greek painting, sculpture and architecture of the fifth and fourth centuries B.C. Emphasis on decorative programs of temples and cult statues. Offered Intermittently.

Prerequisites: AH 1110 with a minimum grade of C and AH 1120 with a minimum grade of C

AH 5270 Roman Painting and Sculpture Cr. 3

Painting and sculpture of the Roman Republic and Empire, and their cultural context. Offered Yearly.

Prerequisites: AH 1110 with a minimum grade of C and AH 1120 with a minimum grade of C

AH 5310 The Ancient City of Athens Cr. 3

The history of Athens as an urban center in antiquity. Public monuments, buildings and landscape as reflecting the city's aspirations and fortunes. Offered Intermittently.

Prerequisites: AH 1110 with a minimum grade of C and AH 1120 with a minimum grade of C

AH 5450 Art and Architecture in the High Middle Ages Cr. 3

Art and architecture in western Europe, 1050-1250. Development of Romanesque and Gothic styles in architecture, painting, and sculpture. Offered Intermittently.

Prerequisites: AH 1110 with a minimum grade of C and AH 1120 with a minimum grade of C

AH 5500 Early Renaissance in Italy Cr. 3

Art and architecture from Giotto to Botticelli; transformation of late medieval art prior to Black Death, classical revival in Florence; North Italian artists such as the Bellinis and Mantegna. Offered Every Other Year.

Prerequisites: AH 1110 with a minimum grade of C and AH 1120 with a minimum grade of C

AH 5510 High Renaissance and Mannerism in Italy Cr. 3

The art of Leonardo, Raphael, Michelangelo, Titian, and their contemporaries. Offered Intermittently.

Prerequisites: AH 1110 with a minimum grade of C and AH 1120 with a minimum grade of C

AH 5520 Art of Renaissance Venice Cr. 3

Art of fifteenth and sixteenth century Venice considered in its socio-political milieu. Offered Every Other Year.

Prerequisites: AH 1110 with a minimum grade of C and AH 1120 with a minimum grade of C

AH 5560 Special Topics Cr. 3

Students examine specific issues related to art history. Offered for undergraduate credit only. Offered Intermittently.

Restriction(s): Enrollment is limited to Undergraduate level students.

Repeatable for 12 Credits

AH 5570 Performance Art of the Americas Cr. 3

Explores Performance Art created in North, Central, and South America, as well as in the Caribbean. Performance Art is a Western visual art movement in which the artist's body is the primary medium of expression, and this art form's evolution will be examined from the late nineteenth to the twenty-first centuries. Offered Fall.

AH 5710 Trends in Nineteenth Century Art Cr. 3

Topics to be announced in Schedule of Classes. Offered Every Other Year.

Prerequisites: AH 1110 with a minimum grade of C and AH 1120 with a minimum grade of C

AH 5715 Modernism: Nineteenth and Twentieth Centuries Cr. 3

Origins of Modernism in the mid-nineteenth century; avant-garde art in Europe and the U.S. from 1850 to 1950; theories of Modernism in the visual arts. Offered Every Other Year.

Prerequisites: AH 1110 with a minimum grade of C and AH 1120 with a minimum grade of C

AH 5720 Twentieth Century Art Cr. 3

European and American paintings, sculpture, and new media surveyed from 1900 to present. Offered Every Other Year.

Prerequisites: AH 1110 with a minimum grade of C and AH 1120 with a minimum grade of C

AH 5735 Art 1900-1945 Cr. 3

European and American avant-garde art, Dada and Surrealism, the interwar period, and Abstract Expressionism. Offered Every Other Year.

Prerequisites: AH 1110 with a minimum grade of C and AH 1120 with a minimum grade of C

AH 5755 Gender and Race in Visual Culture Cr. 3

This course will interrogate the ways in which gendered and racialized bodies are epitomized in the myriad of form that comprise visual culture. Offered Fall.

AH 5780 Topics in Twentieth-Century Art Cr. 3

Topics to be announced in Schedule of Classes. Offered Yearly.

Prerequisites: AH 1110 with a minimum grade of C and AH 1120 with a minimum grade of C

Repeatable for 12 Credits

AH 5855 Museum Practicum Cr. 3

Cooperative arrangement between the art history program and the Detroit Institute of Arts, in which the student applies art historical training to a current project or exhibition in the museum. Offered Every Other Year.

Prerequisites: AH 1110 with a minimum grade of C and AH 1120 with a minimum grade of C

AH 5990 Directed Study Cr. 1-3

Supervised advanced reading and research in the history of art. Offered Fall, Winter.

Restriction(s): Enrollment is limited to students in the Department of Art and Art History; enrollment limited to students in a Bachelor of Arts or Master of Arts degrees.

Repeatable for 6 Credits

AH 5993 Writing Intensive Course in Fine Arts Cr. 0

Satisfies General Education Requirement: Writing Intensive Competency Required for all majors. Offered Fall, Winter.

Prerequisites: AH 1110 with a minimum grade of D- or AFS 2390 with a minimum grade of C or ENG 2390 with a minimum grade of C or ENG 3010 with a minimum grade of C or ENG 3020 with a minimum grade of C or ENG 3050 with a minimum grade of C and AH 1120 with a minimum grade of D- and AH 2000-6999 with a minimum grade of D- and May be taken concurrently: AH 3000-6999 with a minimum grade of D-

Restriction(s): Enrollment is limited to Undergraduate level students; enrollment is limited to students in the Department of Art and Art History; enrollment limited to students in a Bachelor of Arts or Bachelor of Fine Arts degrees.

AH 5997 Seminar Cr. 3

Readings, discussion, and research paper on special topics in art history; topics to be announced in Schedule of Classes. Graduate students undertake research paper in addition to other assignments. Offered Yearly.

Prerequisites: AH 1110 with a minimum grade of C and AH 1120 with a minimum grade of C

Restriction(s): Enrollment is limited to students in the Department of Art and Art History; enrollment limited to students in a Bachelor of Arts, Bachelor of Fine Arts, Master of Arts or Master of Fine Arts degrees.

Repeatable for 9 Credits

AH 5998 Honors Thesis Cr. 3

Students write a substantial research paper on subject determined by the student in collaboration with his/her professor. Offered for undergraduate credit only. Offered Intermittently.

Restriction(s): Enrollment is limited to Undergraduate level students; enrollment is limited to students with a major in Art History Honors.

AH 7200 Seminar in Greek and Roman Art Cr. 3-6

Topics to be announced in Schedule of Classes. Offered Every Other Year.

Restriction(s): Enrollment is limited to Graduate level students; enrollment is limited to students in the Department of Art and Art History; enrollment limited to students in a Master of Arts degree.

Repeatable for 9 Credits

AH 7300 Seminar in Medieval Art Cr. 3-6

Topics to be announced in Schedule of Classes. Offered Every Other Year.

Restriction(s): Enrollment is limited to Graduate level students; enrollment is limited to students in the Department of Art and Art History; enrollment limited to students in a Master of Arts degree.

Repeatable for 9 Credits

AH 7500 Seminar in Renaissance Art Cr. 3-6

Topics to be announced in Schedule of Classes. Offered Intermittently.

Restriction(s): Enrollment is limited to Graduate level students; enrollment is limited to students with a major in Art History; enrollment limited to students in a Master of Arts degree.

Repeatable for 9 Credits

AH 7700 Seminar in Modern Art Cr. 3

Topics to be announced in Schedule of Classes. Offered Fall, Winter.

Restriction(s): Enrollment is limited to Graduate level students; enrollment is limited to students in the Department of Art and Art History; enrollment limited to students in a Master of Arts degree.

Repeatable for 6 Credits

AH 7999 Master's Essay Direction Cr. 1-3

Offered Fall, Winter.

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students with a class of Candidate Masters; enrollment is limited to students with a major in Art History; enrollment limited to students in a Master of Arts degree.

AH 8999 Master's Thesis Research and Direction Cr. 1-8

Offered Fall, Winter.

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students with a class of Candidate Masters; enrollment is limited to students with a major in Art History; enrollment limited to students in a Master of Arts degree.

Repeatable for 8 Credits

AIA - ART: INTERIOR DESIGN

AIA 1610 Architectural Drafting and Perspective Drawing Cr. 3

Basic architectural drawings: plans, elevations, obliques, sections, details, dimensioning and lettering; hand-drawn and basic CAD techniques; development of perspective presentation drawings. Offered Winter.

Prerequisites: ADR 1050

Course Material Fees: \$45

AIA 2600 Interior Design: CAD I Cr. 3

Continuation of computer-aided design. Plans, elevations, sections, details, dimensioning and description. System furniture space planning; Windows-based auto CAD. Offered Fall.

Prerequisites: AIA 1610

Restriction(s): Enrollment is limited to students in the Department of Art and Art History; enrollment limited to students in a Bachelor of Arts or Bachelor of Fine Arts degrees.

Course Material Fees: \$45

AIA 2610 Interior Design Studio I Cr. 3

Single family residential/small-scale office. Presentation techniques; introduction to media and methods used in the preparation of presentation boards: layout, selection, rendering, plan, elevation, lettering and verbal presentation. Offered Fall.

Prerequisites: AIA 1610

Restriction(s): Enrollment is limited to students in the Department of Art and Art History; enrollment limited to students in a Bachelor of Arts or Bachelor of Fine Arts degrees.

Course Material Fees: \$45

AIA 3610 Interior Design Studio II Cr. 3

Hospitality/restaurant/health care. Continuation of graphic and presentation skill development incorporating plan, elevation, section, detailing, perspective, hand and CAD drawings. Experimentation with lighting, media, board, and verbal presentation. Offered Winter.

Prerequisites: AIA 2610

Restriction(s): Enrollment is limited to students in the Department of Art and Art History; enrollment limited to students in a Bachelor of Arts or Bachelor of Fine Arts degrees.

Course Material Fees: \$45

AIA 3620 Interior Design: CAD II Cr. 3

Intermediate-level CAD. Development and creation of construction documents, space planning of interior spaces, and systems layout, using autoCAD drafting techniques in two- and three-dimensional modes. Offered Winter.

Prerequisites: AIA 1610 and AIA 2600 and AIA 2610

Restriction(s): Enrollment is limited to students in the Department of Art and Art History; enrollment limited to students in a Bachelor of Arts or Bachelor of Fine Arts degrees.

Course Material Fees: \$50

Repeatable for 12 Credits

AIA 4600 Environmental Design Theory Cr. 3

History of interiors: ergonomic, environmental elements. Introduction to building and barrier-free design codes. Acoustical, HVAC and electrical systems. Offered Fall.

Prerequisites: AIA 2610

Restriction(s): Enrollment is limited to students in the Department of Art and Art History; enrollment limited to students in a Bachelor of Arts or Bachelor of Fine Arts degrees.

Course Material Fees: \$35

AIA 4610 Interior Design Studio III Cr. 3

Retail/contract open-office system, medium to large scale, new or adaptive reuse projects. Advanced hand and CAD graphic, presentation skill development, incorporating building and barrier-free codes, HVAC and lighting principles, furniture and equipment specification. Offered Fall.

Prerequisites: AIA 2600 and AIA 3610

Restriction(s): Enrollment is limited to students in the Department of Art and Art History; enrollment limited to students in a Bachelor of Arts or Bachelor of Fine Arts degrees.

Course Material Fees: \$40

AIA 4620 Interior Perspective and Illustration Cr. 3

Visual perspective presentation techniques, including selection, construction, illustration of interior designs. Basic mechanical perspective layout and delineation techniques: pencil, pen, color marker and color pencil to relate effects of texture, volume, and light of interior space. Offered Fall.

Prerequisites: AIA 1610 and AIA 2610

Restriction(s): Enrollment is limited to students in the Department of Art and Art History; enrollment limited to students in a Bachelor of Arts or Bachelor of Fine Arts degrees.

Course Material Fees: \$45

AIA 4990 Directed Study Cr. 2-4

Offered Fall, Winter.

Restriction(s): Enrollment is limited to students in the Department of Art and Art History; enrollment limited to students in a Bachelor of Arts or Bachelor of Fine Arts degrees.

Course Material Fees: \$45

Repeatable for 6 Credits

AIA 5010 Furniture/Product Workshop Cr. 3

History, ergonomic and design development of furniture and product design. Projects evolve from hand and CAD drawings to scaled models of furniture and product designs. Offered Fall.

Prerequisites: AIA 1610 and AIA 2610 and AIA 5610

Restriction(s): Enrollment is limited to students in the Department of Art and Art History; enrollment limited to students in a Bachelor of Arts, Bachelor of Fine Arts or Master of Arts degrees.

Course Material Fees: \$55

Repeatable for 9 Credits

AIA 5610 Interior Materials and Systems Cr. 3

Estimating, specifying, and the techniques used in the application of materials and systems used in interior design. Lectures, guest speakers, and field trips. Offered Winter.

Restriction(s): Enrollment is limited to students in the Department of Art and Art History; enrollment limited to students in a Bachelor of Arts, Bachelor of Fine Arts or Master of Arts degrees.

Course Material Fees: \$40

AIA 5620 Building Construction Systems in Architecture I Cr. 3

Residential and commercial construction systems incorporating governmental and building codes; site and foundation to roof systems; small-scale hand and CAD documentation of architectural details. Offered Fall.

Prerequisites: AIA 2610 and AIA 3610

Restriction(s): Enrollment is limited to students in the Department of Art and Art History; enrollment limited to students in a Bachelor of Arts, Bachelor of Fine Arts or Master of Arts degrees.

Course Material Fees: \$45

AIA 5630 Interior Lighting Design and Application Cr. 3

Lighting sources, fixtures, manufacturer's lighting system and application to interior spaces. Basic lighting footcandle calculations; layouts and psychology of lighting description to be applied in a final project. Offered Winter.

Prerequisites: AIA 3610 and AIA 4610

Restriction(s): Enrollment is limited to students in the Department of Art and Art History; enrollment limited to students in a Bachelor of Arts, Bachelor of Fine Arts or Master of Arts degrees.

Course Material Fees: \$40

AIA 5640 Building Construction Systems in Architecture II Cr. 3

Development of architectural construction documents: working drawings and written specifications of commercial interior space; plan, elevation, section, details and perspective through hand and CAD documentation. Offered Winter.

Prerequisites: AIA 2600 and AIA 4600 and AIA 4610 and AIA 5620

Restriction(s): Enrollment is limited to students in the Department of Art and Art History; enrollment limited to students in a Bachelor of Arts, Bachelor of Fine Arts or Master of Arts degrees.

Course Material Fees: \$60

AIA 5660 Supervised Field Experience Cr. 3

Supervised field study experience designed to correlate classroom theory with professional practice. Offered Every Term.

Restriction(s): Enrollment is limited to students with a major in Art or Art Honors; enrollment limited to students in a Bachelor of Arts, Bachelor of Fine Arts or Master of Arts degrees.

Course Material Fees: \$35

Repeatable for 6 Credits

AIA 5991 Directed Projects: Interior Design Cr. 3-6

Individual problems. Offered Fall, Winter.

Restriction(s): Enrollment is limited to students in the Department of Art and Art History; enrollment limited to students in a Bachelor of Arts, Bachelor of Fine Arts or Master of Arts degrees.

Course Material Fees: \$60

Repeatable for 9 Credits

AIA 5997 Senior Seminar Cr. 3

Satisfies General Education Requirement: Writing Intensive Competency

Investigation of designers, styles, and periods of interior design through charettes and documentation. Resume and portfolio development and review; writing of intensive research paper. Offered Winter.

Restriction(s): Enrollment is limited to students in the Department of Art and Art History; enrollment limited to students in a Bachelor of Arts, Bachelor of Fine Arts or Master of Arts degrees.

Course Material Fees: \$60

AIA 6610 Interior Design Studio IV Cr. 3

Large-scale new or adaptive re-use: office, hospitality, health-care or retail interior spaces. Professional hand and CAD graphic and skill development. Integration of codes, ADA, human factors, HVAC and lighting principles, furniture and equipment specification related to specific environment. Offered Winter.

Prerequisites: AIA 4610 and AIA 5640

Restriction(s): Enrollment is limited to students in the Department of Art and Art History; enrollment limited to students in a Bachelor of Arts, Bachelor of Fine Arts or Master of Arts degrees.

Course Material Fees: \$60

AIA 6650 Business Practicum Cr. 2

Examination of different types of business formations and their characteristics; professional practices and procedures, professional ethics, contemporary topics in interior design practice. Offered Fall.

Prerequisites: AIA 4610

Restriction(s): Enrollment is limited to students in the Department of Art and Art History; enrollment limited to students in a Bachelor of Arts, Bachelor of Fine Arts or Master of Arts degrees.

Course Material Fees: \$60

AIA 7990 Directed Study Cr. 1-4

Offered Yearly.

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students in a Master of Arts degree.

Course Material Fees: \$60

AID - ART: INDUSTRIAL DESIGN

AID 3200 Ethnographic Research Methods for Designers Cr. 3

Introduction to a set of theoretical and methodological approaches stemming from the field of anthropology. Students utilize these approaches to enrich and inform their design processes from conceptual creation, to ideation and design development, to user testing. Offered Fall, Winter.

Restriction(s): Enrollment is limited to Undergraduate level students.

AID 3300 Introduction to Industrial Design Cr. 3

Introduction to fundamental skills necessary for the practice of industrial design. Two-dimensional presentation techniques are developed in first half of semester; second portion consists of exercises in problem-solving methodology. Offered Fall, Winter.

Prerequisites: ACO 1200 and ADR 1050

Course Material Fees: \$20

Repeatable for 6 Credits

AID 3310 Presentation Cr. 3

Two dimensional visualization, monochromatic and polychromatic sketch techniques using a variety of traditional media. Offered Fall, Winter.

Prerequisites: ACO 1200 and ADR 1050

Repeatable for 9 Credits

AID 4300 Product Design Engineering Cr. 3

Students build on basic skills in projects exploring conceptual problem-solving in two dimensions. Offered Fall, Winter.

Restriction(s): Enrollment limited to students in the College of Engineering or Fine, Performing & Comm. Arts.

Repeatable for 6 Credits

AID 4600 Transportation Design/Engineering Cr. 3

Conceptual projects related to transportation design, utilizing skills developed in AID 4300. Offered Winter.

Prerequisites: AID 4300

Restriction(s): Enrollment limited to students in the College of Engineering.

Course Material Fees: \$20

AID 5300 Advanced Studio/Product Cr. 3

Advanced techniques in presentation of design solutions. Students build upon their ability to communicate two-dimensionally; introduction of digital manipulation and creation software. Offered Fall, Winter.

Prerequisites: AID 3300

Restriction(s): Enrollment is limited to students in the Department of Art and Art History; enrollment limited to students in a Bachelor of Arts, Bachelor of Fine Arts or Master of Arts degrees.

Course Material Fees: \$20

Repeatable for 15 Credits

AID 5302 Advanced Studio/Batch Production Cr. 3

In this studio class students will learn about techniques of batch limited production of design objects and aspects of entrepreneurship. Students will design, produce, package, and market a simple consumer object. Offered Fall, Winter.

Prerequisites: AID 3300

Course Material Fees: \$20

Repeatable for 6 Credits

AID 5310 Advanced Presentation Cr. 3

Advanced techniques in the presentation of design solutions. Students build on their ability to communicate two-dimensionally, with introduction of digital manipulation and creation software. Offered Fall.

Prerequisites: AID 3310

Restriction(s): Enrollment is limited to students in the Department of Art and Art History; enrollment limited to students in a Bachelor of Arts, Bachelor of Fine Arts or Master of Arts degrees.

Course Material Fees: \$100

Repeatable for 9 Credits

AID 5330 3-D Modeling Cr. 3

Principles of three-dimensional modeling. Surface development, rendering, and creation of virtual environments. Offered Fall.

Prerequisites: AID 3300

Restriction(s): Enrollment is limited to students in the Department of Art and Art History; enrollment limited to students in a Bachelor of Arts, Bachelor of Fine Arts or Master of Arts degrees.

Course Material Fees: \$100

Repeatable for 9 Credits

AID 5997 Senior Seminar Cr. 3

Satisfies General Education Requirement: Writing Intensive Competency Seminar on contemporary issues in industrial design including professional concerns in transportation and product design, presentation, and production. Satisfies the General Education Writing Intensive Course in the Major requirement. Offered Every Other Year.

Restriction(s): Enrollment limited to students with a class of Senior; enrollment is limited to students in the Department of Art and Art History; enrollment limited to students in a Bachelor of Arts, Bachelor of Fine Arts or Master of Arts degrees.

AID 6300 Advanced Studio: Transportation Cr. 3

Form and proportion studies. Development of sketch techniques for communicating the complex form of the automotive body. Taught by professional automotive designers. Offered Fall, Winter.

Prerequisites: AID 3300

Restriction(s): Enrollment is limited to students in the Department of Art and Art History; enrollment limited to students in a Bachelor of Arts, Bachelor of Fine Arts or Master of Arts degrees.

Course Material Fees: \$20

Repeatable for 9 Credits

AID 6301 Design for Urban Mobility Cr. 3

Considers broad questions of mobility and how design can enable and support mobility through urban space. Students will engage in projects that address these questions in different ways including products, spaces, experiences, and other forms of design interventions. Offered Fall, Winter.

Prerequisites: AID 3300

Course Material Fees: \$20

Repeatable for 6 Credits

AID 6310 Advanced Studio/Exhibit Cr. 3

Advanced design concepts in exhibit design. Project planning, ideas of brand imaging, phenomenological notions of the spatial experience. Offered Fall.

Prerequisites: AID 5300

Restriction(s): Enrollment is limited to students in the Department of Art and Art History; enrollment limited to students in a Bachelor of Arts, Bachelor of Fine Arts or Master of Arts degrees.

Course Material Fees: \$20

Repeatable for 9 Credits

AID 7300 Graduate Industrial Design Cr. 3-9

Individual problems in industrial design. Offered Fall, Winter.

Prerequisites: AID 5300 or AID 6300

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students in a Master of Arts degree.

Course Material Fees: \$20

Repeatable for 24 Credits

AME - ART: METALSMITHING

AME 2600 Introduction to Jewelry and Metalsmithing Cr. 3

Basic skills: sawing, filing, drilling, sanding, polishing, creating textures on metal, riveting, soldering, and bezel setting of stones. Creation of jewelry and small functional objects. Offered Every Term.

Course Material Fees: \$75

AME 2650 Blacksmithing I Cr. 3

This course is an introduction to blacksmithing skills and techniques. The history of blacksmithing and its contemporary practices will be covered as a way to understand different time periods and varying cultural approaches. Hands on applications and material usage will be covered to create objects, tools and artworks dependent on forging. Offered Every Other Year.

Course Material Fees: \$75

AME 3600 Intermediate Jewelry I Cr. 3

Lost-wax casting and mold-making. Creating, preparing and casting into metal of wax models. Vulcanized rubber mold-making. Commercial jewelry techniques. Offered Every Term.

Prerequisites: AME 2600

Restriction(s): Enrollment is limited to students in the Department of Art and Art History; enrollment limited to students in a Bachelor of Arts or Bachelor of Fine Arts degrees.

Course Material Fees: \$90

AME 3601 Intermediate Jewelry II Cr. 3

Advanced metal fabrication and surface treatment. Topics include: stone setting techniques, acid etching, granulation, keum boo, patination, hinge mechanisms and more complex soldering techniques. Offered Fall, Winter.

Prerequisites: AME 3600

Restriction(s): Enrollment is limited to students in the Department of Art and Art History; enrollment limited to students in a Bachelor of Arts or Bachelor of Fine Arts degrees.

Course Material Fees: \$90

AME 3650 Blacksmithing II Cr. 3

This course is intended for students who have already acquired basic blacksmithing skills for ferrous and non-ferrous metals. Using complex hand-skill techniques and applications of mechanical tooling to achieve predictable results, students will develop stronger visual literacy of blacksmithing of both its contemporary extensions of utility and conceptual work. Through exploring innovation in culture and its material usage for ornamentation, an ethos will be stressed. Tool creation and use through hot forging, forge welding, layering material, riveting and basic joinery will be emphasized. Offered Every Other Fall.

Prerequisite: AME 2600 or AME 2650

Course Material Fees: \$90

Repeatable for 6 Credits

AME 4600 Metalsmithing I Cr. 3

Utilizing plastic qualities of metal to generate high relief forms. Techniques include: raising and sinking, anticlastic and synclastic raising, nonferrous and ferrous forging. How metals may be stretched to create forms with a high degree of volume. Offered Fall, Winter.

Prerequisites: AME 2600

Restriction(s): Enrollment is limited to students in the Department of Art and Art History; enrollment limited to students in a Bachelor of Arts or Bachelor of Fine Arts degrees.

Course Material Fees: \$90

Repeatable for 6 Credits

AME 4601 Metalsmithing II Cr. 3

Utilizing plastic qualities of metal to generate high relief forms. Techniques include: raising and sinking, anticlastic and synclastic raising, nonferrous and ferrous forging. How metals may be stretched to create forms with a high degree of volume. Offered Fall, Winter.

Prerequisites: AME 4600

Restriction(s): Enrollment is limited to students in the Department of Art and Art History; enrollment limited to students in a Bachelor of Arts or Bachelor of Fine Arts degrees.

Course Material Fees: \$90

Repeatable for 6 Credits

AME 4650 Blacksmithing III Cr. 3

Builds upon technical and conceptual extensions of blacksmithing for commission work, art installations, decorative ornamentation and creative forms using ferrous and non-ferrous metals. Advanced blacksmithing processes will be emphasized through the use of a diverse cross-section of skills ranging from hand work, machine production and the use of digital applications. Processes and equipment learned include: CNC plasma cutter, laser cutters for creation of dies, milling machines, lathes, CNC milling, use of dies for hot forming with a hydraulic press and power hammer. Offered Every Other Winter.

Prerequisite: AME 2600 and AME 2650

Course Material Fees: \$90

Repeatable for 9 Credits

AME 5600 Advanced Jewelry and Metalsmithing Cr. 3

Intellectual and conceptual nature of student's artwork; discussion and analysis. Methods of criticism. Offered Fall, Winter.

Prerequisites: AME 3601

Restriction(s): Enrollment is limited to students in the Department of Art and Art History; enrollment limited to students in a Bachelor of Arts, Bachelor of Fine Arts, Master of Arts or Master of Fine Arts degrees.

Course Material Fees: \$90

Repeatable for 6 Credits

AME 5860 Directed Projects: Metalsmithing Cr. 3-6

Individual problems. Offered Fall, Winter.

Restriction(s): Enrollment is limited to students in the Department of Art and Art History; enrollment limited to students in a Bachelor of Arts, Bachelor of Fine Arts, Master of Arts or Master of Fine Arts degrees.

Repeatable for 998.99 Credits

AME 7600 Graduate Study in Metal Arts Cr. 3

Individual problems. Directed study and project development in metal arts. Offered Fall, Winter.

Prerequisites: AME 5600

Restriction(s): Enrollment is limited to Graduate level students; enrollment is limited to students in the Department of Art and Art History; enrollment limited to students in a Master of Arts or Master of Fine Arts degrees.

Course Material Fees: \$90

Repeatable for 9 Credits

AME 8860 MFA Studio: Metal Arts Cr. 6-9

Extended problems in metalsmithing; individual research with eighteen to twenty-seven hours of laboratory per week. Offered Fall, Winter.

Restriction(s): Enrollment is limited to Graduate level students; enrollment is limited to students in the Department of Art and Art History; enrollment limited to students in a Master of Fine Arts degree.

Repeatable for 36 Credits

AN - ANESTHESIA

AN 7010 Advanced Health Assessment and Clinical Diagnosis Cr. 3

Advanced systematic focus on health assessment, anatomical and physical limitations, and impact on anesthesia practice. Offered Fall.

Restriction(s): Enrollment is limited to Graduate level students; enrollment is limited to students with a major in Nurse Anesthesia Practice.

Course Material Fees: \$10

AN 7020 Clinical Anesthesia Practicum II Cr. 2

Continuation of AN 7010. Offered Winter.

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students in the Pharmacy and Health Sciences.

AN 7030 Clinical Anesthesia Practicum III Cr. 2

Continuation of AN 7020. Offered Spring/Summer.

Prerequisites: AN 7020

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students in the Pharmacy and Health Sciences.

AN 7040 Clinical Anesthesia Practicum IV Cr. 3

Continuation of AN 7030. Offered Fall.

Prerequisites: AN 7030

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students in the Pharmacy and Health Sciences.

AN 7050 Clinical Anesthesia Practicum V Cr. 3

Continuation of AN 7040. Offered Winter.

Prerequisites: AN 7040

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students in the Pharmacy and Health Sciences.

AN 7060 Clinical Anesthesia Practicum VI Cr. 2

Continuation of AN 7050. Offered Spring/Summer.

Prerequisites: AN 7050

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students in the Pharmacy and Health Sciences.

AN 7070 Clinical Practice I Cr. 2

Outpatient anesthesia practice; focus on airway management. Offered Fall.

Restriction(s): Enrollment is limited to Graduate level students.

AN 7080 Clinical Practicum VIII Cr. 3

Clinical experiences at diverse clinical settings and varying levels of patient acuity. Offered Winter.

Prerequisite: AN 7070 with a minimum grade of C

Restriction(s): Enrollment is limited to students with a major in Nurse Anesthesia Practice.

AN 7090 Clinical Practice III Cr. 1

Clinical experience with complex cardiac diseases requiring thoracic and cardiopulmonary bypass. Offered Spring/Summer.

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students in the Doctor of Nur Anesthesia Pract program.

AN 7100 Advanced Pharmacology I Cr. 3

Prepares students with in-depth knowledge and understanding of the Pharmacokinetics and Pharmacodynamics for the nurse anesthetist. Offered Fall.

Prerequisite: AN 7010 with a minimum grade of C

Restriction(s): Enrollment is limited to students with a major in Nurse Anesthesia Practice.

Course Material Fees: \$15

AN 7110 Advanced Pharmacology II Cr. 3

Prepares students with in-depth knowledge and understanding of the Pharmacokinetics and Pharmacodynamics for the anesthetist. Offered Winter.

Prerequisite: AN 7100 with a minimum grade of C

Restriction(s): Enrollment is limited to students with a major in Nurse Anesthesia Practice.

Course Material Fees: \$15

AN 7120 Advanced Pharmacology of Anesthesia Cr. 2

General qualitative and quantitative aspects of pharmacology. Interaction and kinetics of pharmacologic agents and their relationship to anesthetic practice. Offered Fall.

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students in the Pharmacy and Health Sciences.

AN 7150 Principles of Anesthesia I Cr. 4

Principles and usage of all anesthesia equipment including electronic instrumentation. Theoretical exploration of various techniques of anesthesia. Offered Fall.

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students in the Pharmacy and Health Sciences.

Course Material Fees: \$15

AN 7160 Principles of Anesthesia II Cr. 3

Advanced knowledge in application and use of modern anesthesia monitoring technology. Offered Winter.

Prerequisites: AN 7150

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students in the Pharmacy and Health Sciences.

Course Material Fees: \$15

AN 7170 Principles of Anesthesia III Cr. 2

Continuation of AN 7160. Offered Spring/Summer.

Prerequisites: AN 7150

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students in the Pharmacy and Health Sciences.

Course Material Fees: \$10

AN 7180 Electrocardiography in Anesthesia Practice Cr. 1

Background for monitoring, diagnosing, and treating cardiac arrhythmias in the perioperative period. Working background in fundamentals of 12-lead ECG interpretation; its application in the perioperative period. Offered Winter.

Prerequisites: AN 7150

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students in the Pharmacy and Health Sciences; enrollment limited to students in the MS in Anesthesia program.

Course Material Fees: \$12.5

AN 7181 Advanced Principles of Anesthesia IV Cr. 3

Continuation of previously learned concepts and principles of safe anesthesia practice in the treatment and management of multiple comorbidities and disease processes. Offered Winter.

Prerequisite: AN 7170 with a minimum grade of C

Restriction(s): Enrollment is limited to students with a major in Nurse Anesthesia Practice.

AN 7190 Advanced Cardiovascular Patho-physiology and EKG Cr. 1

Advanced cardiovascular pathophysiology, assessing and diagnosing cardiac dysfunctions, and integration of appropriate clinical interventions in the anesthetic management plan of care. Offered Fall.

Prerequisites: AN 7180 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students in the Pharmacy and Health Sciences.

Course Material Fees: \$12.5

AN 7220 Advanced Physiology Cr. 4

Examine normal physiology with emphasis on the respiratory, renal, cardiovascular, neurological, endocrine, liver functions and associated disease. Offered Winter.

Restriction(s): Enrollment is limited to students with a major in Nurse Anesthesia Practice.

AN 7230 Advanced Physiology II Cr. 3

Advanced knowledge in physiology and related physiological mechanisms governing, respiratory, cardiovascular, and the renal systems and as they relate to anesthesia. Offered Winter.

Prerequisite: AN 7220 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students; enrollment is limited to students with a major in Anesthesia or Nurse Anesthesia Practice.

AN 7240 Advanced Physiology and Pathophysiology I Cr. 3

Advanced knowledge in physiology; in-depth analysis of disease processes; correlation of pathophysiology, pharmacology, and advanced principles of anesthesia care. Offered Spring/Summer.

Restriction(s): Enrollment is limited to students with a major in Nurse Anesthesia Practice.

Course Material Fees: \$10

AN 7241 Advanced Physiology and Pathophysiology II Cr. 3

An in-depth assessment human physiology, and disease processes to include analysis of cellular structure and functions of the total body system. Offered Winter.

Prerequisite: AN 7240 with a minimum grade of C

Restriction(s): Enrollment is limited to students with a major in Nurse Anesthesia Practice.

AN 7500 Chemistry and Physics for the Anesthetist Cr. 2

Analysis and principles of chemistry and physics as applied to anesthesia. Offered Fall.

Restriction(s): Enrollment is limited to students with a major in Nurse Anesthesia Practice.

Course Material Fees: \$20

AN 7590 Advanced Anatomy for Nurse Anesthetists Cr. 4

Structural and functional aspects of the human body; relationships to nurse anesthesia practice. Study of regions in which anesthesia may be induced. Offered Spring/Summer.

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students in the Pharmacy and Health Sciences.

Course Material Fees: \$400

AN 7600 Regional Anesthesia Cr. 2

Review of the anatomy and physiology of the spinal cord and peripheral nerves and the pharmacology of local anesthetic agents. Techniques of pain management administration and management of spinal/epidural and peripheral regional anesthetics. Offered Spring/Summer.

Prerequisite: AN 7590 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students in the Pharmacy and Health Sciences.

Course Material Fees: \$20

AN 7620 Pulmonary Mechanics and Anesthesia Implications Cr. 2

Advanced evaluation of cardiopulmonary/respiratory complication. Clinical anesthesia care. Offered Fall.

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students in the Pharmacy and Health Sciences.

AN 7690 Advanced Clinical Anesthesia Practice Review I Cr. 1

Use of theoretical concepts and advanced clinical principles to develop the art and science of practice with emphasis on individualizing care, in addition to board preparation. Offered Winter.

Prerequisites: AN 7170 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students in the Pharmacy and Health Sciences.

Course Material Fees: \$15

AN 7700 Advanced Clinical Anesthesia Practice and Review II Cr. 1

Use of theoretical concepts and advanced clinical principles in perfecting the art and science of anesthesia practice with emphasis on preparation for board examination. Offered Winter.

Prerequisites: AN 7170 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students in the Pharmacy and Health Sciences.

Course Material Fees: \$10

AN 7730 Process of Teaching Cr. 2

Advanced teaching and learning concepts. Understanding diversity in the classroom, and learning styles. Offered Fall.

Restriction(s): Enrollment is limited to Graduate level students.

Course Material Fees: \$20

AN 7780 Professional Dimensions Cr. 3

Understanding the history and professional organization roles in ensuring standards of practice and commitment to society. Offered Fall.

Restriction(s): Enrollment is limited to students with a major in Nurse Anesthesia Practice.

Course Material Fees: \$15

AN 7800 Pain Management for Nurse Anesthetists Cr. 1

Regional techniques and pharmacological interventions to manage acute and chronic pain. Offered Spring/Summer.

Prerequisites: AN 7600 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

AN 7880 Anesthesia Seminar Cr. 1

Current developments in concepts and theories of nurse anesthesia. Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students in the Pharmacy and Health Sciences.

Repeatable for 5 Credits

AN 7885 Research Design for Anesthesia Cr. 1

Research methodologies, including quantitative and qualitative statistical techniques. Emphasis on designing, implementing, and evaluating health care research. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students in the Pharmacy and Health Sciences.

AN 7890 Terminal Project Cr. 1

Finalization of research; preparation for poster submission, publication and presentation of research. Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students in the Pharmacy and Health Sciences.

Course Material Fees: \$20

AN 7891 Advanced Clinical Application I Cr. 2

This is designed for comprehensive assessments of students learned scientific, practical and technical knowledge and readiness for the National Board Examination. Offered Winter.

Prerequisite: AN 7181 with a minimum grade of C and AN 7241 with a minimum grade of C

Restriction(s): Enrollment is limited to students with a major in Nurse Anesthesia Practice.

AN 7900 Advanced Pediatric Topics Cr. 2

Detailed advanced lectures in specific pediatric topics. Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students in the Pharmacy and Health Sciences.

AN 7910 Special Topics in Pediatric Anesthesia Cr. 2

Common pediatric problems; in-depth knowledge on neonatal anesthesia. Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students in the Pharmacy and Health Sciences.

AN 7920 Case Presentations Cr. 2

Anatomy and physiology of various diseases including principles of anesthetic management. Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students in the Pharmacy and Health Sciences.

AN 8000 Capstone Preparation I Cr. 1

Begin fundamental strategies for research development toward applicable clinical doctoral studies. Offered Winter.

Prerequisite: AN 7890 with a minimum grade of C

Restriction(s): Enrollment is limited to students with a major in Nurse Anesthesia Practice.

AN 8001 Capstone Preparation II Cr. 1

Develop and present appropriate protocol for timely research process. Offered Spring/Summer.

Prerequisite: AN 8000 with a minimum grade of C

Restriction(s): Enrollment is limited to students with a major, minor, or concentration in Nurse Anesthesia Practice.

AN 8002 Capstone Preparation III Cr. 1

Develop and present appropriate protocol for timely research. Offered Fall.

Prerequisite: AN 8001 with a minimum grade of C

Restriction(s): Enrollment is limited to students with a major, minor, or concentration in Nurse Anesthesia Practice.

AN 8003 Capstone Completion I Cr. 1

Strategies for data analysis and methodology of research findings. Offered Winter.

Prerequisite: AN 8002 with a minimum grade of C

Restriction(s): Enrollment is limited to students with a major, minor, or concentration in Nurse Anesthesia Practice.

AN 8004 Capstone Completion II Cr. 1

Strategies for data analysis and methodology to present findings. Offered Spring/Summer.

Prerequisite: AN 8003 with a minimum grade of C

Restriction(s): Enrollment is limited to students with a major, minor, or concentration in Nurse Anesthesia Practice.

ANA - ANATOMY AND CELL BIOLOGY

ANA 6050 Biology of the Eye Cr. 3

Introduction to biology of eye structure/function, and to causes and clinical treatments of eye-related disorders and diseases. Offered for undergraduate credit only. Offered Yearly.

Restriction(s): Enrollment is limited to Undergraduate level students.

Course Material Fees: \$25

Equivalent: BIO 6055, PYC 6050

ANA 7010 Human Gross Anatomy Cr. 8

Lectures and dissection of limbs, back, thorax, abdomen, head and neck, pelvis and perineum. Written and practical examinations. Offered Fall.

Restriction(s): Enrollment is limited to Graduate level students; enrollment is limited to students with a major in Anatomy & Cell Biology.

ANA 7030 Human Microscopic Anatomy Cr. 4

The microscopic structure of tissues and organs. Lectures and laboratory study. Offered Fall.

Restriction(s): Enrollment is limited to Graduate level students; enrollment is limited to students with a major in Anatomy & Cell Biology or Pathology.

ANA 7055 Biology of the Eye Cr. 3

Integrated introduction to basic biological structure/function of the eye; causes and clinical treatments of eye-related disorders and diseases. Offered Fall.

Restriction(s): Enrollment is limited to Graduate level students.

Equivalent: BIO 7055

ANA 7065 Mechanisms of Ocular Disease I Cr. 2

Lectures and readings on mechanisms and current treatments for diseases of the anterior segment of the eye. Offered Winter.

Prerequisite: ANA 7055 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

ANA 7075 Mechanisms of Ocular Disease II Cr. 2

Lectures and readings on mechanisms and current treatments for diseases of the posterior segment of the eye. Offered Fall.

Prerequisite: ANA 7055 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

ANA 7130 Neuroanatomy Cr. 4

Lecture and laboratory study of the nervous system. Offered Winter, Spring/Summer.

Restriction(s): Enrollment is limited to Graduate level students; enrollment is limited to students with a major in Anatomy & Cell Biology.

ANA 7260 Special Dissection Cr. 2-10

Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students; enrollment is limited to students with a major in Anatomy & Cell Biology.

Repeatable for 20 Credits

ANA 7270 Special Projects in Anatomy Cr. 2-10

Research rotations leading to selection of permanent advisor. Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students; enrollment is limited to students with a major in Anatomy & Cell Biology.

ANA 7890 Seminar Cr. 1

Biweekly departmental seminar. Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students; enrollment is limited to students with a major in Anatomy & Cell Biology.

Repeatable for 4 Credits

ANA 7996 Research Cr. 1-15

Research under direction of permanent advisor. Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students; enrollment is limited to students with a major in Anatomy & Cell Biology.

Repeatable for 30 Credits

ANA 8999 Master's Thesis Research and Direction Cr. 1-8

Original research leading to M.S. degree under Plan A. Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students with a class of Candidate Masters; enrollment is limited to students with a major in Anatomy & Cell Biology.

Repeatable for 8 Credits

ANA 9990 Pre-Doctoral Candidacy Research Cr. 1-8

Research in preparation for doctoral dissertation. Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students.

Repeatable for 12 Credits

ANA 9991 Doctoral Candidate Status I: Dissertation Research and Direction Cr. 7.5

Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students with a class of Doctoral Candidate.

ANA 9992 Doctoral Candidate Status II: Dissertation Research and Direction Cr. 7.5

Offered Every Term.

Prerequisite: ANA 9991 with a minimum grade of S

Restriction(s): Enrollment is limited to Graduate level students.

ANA 9993 Doctoral Candidate Status III: Dissertation Research and Direction Cr. 7.5

Offered Every Term.

Prerequisite: ANA 9992 with a minimum grade of S

Restriction(s): Enrollment is limited to Graduate level students.

ANA 9994 Doctoral Candidate Status IV: Dissertation Research and Direction Cr. 7.5

Offered Every Term.

Prerequisite: ANA 9993 with a minimum grade of S

Restriction(s): Enrollment is limited to Graduate level students.

ANA 9995 Candidate Maintenance Status: Doctoral Dissertation Research and Direction Cr. 0

Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students.

Course Material Fees: \$370.26

Repeatable for 0 Credits

ANT - ANTHROPOLOGY

ANT 1100 Introduction to Anthropology Cr. 3

Satisfies General Education Requirement: Social Inquiry, Social Sciences
Study of humanity, past and present: cultural diversity and change, human evolution, biological variability, archaeology, ethnography, language, and contemporary uses of anthropology. Offered Every Term.

ANT 2020 Global Detroit Cr. 3

Satisfies General Education Requirement: Diversity Equity Incl Inquiry
Detroit has been a meeting place for people from around the world for centuries. This course explores the global movements of peoples, ideas, and money that made the city what it is today. It will draw upon the tools and methods of anthropology to examine periods when the city's multicultural character has been viewed as a source of strength, and at other times when diversity has been perceived as source of discord and social problems. Students will be expected to participate in fieldtrips and other off campus activities. Offered Yearly.

ANT 2110 Introduction to Physical Anthropology Cr. 3

Satisfies General Education Requirement: Life Sciences, Natural Scientific Inquiry

Role of hereditary and environmental factors, human genetics, meaning of "race" and racial classifications, fossil records, non-human primate behavior and evolution. Offered Every Term.

ANT 2400 Food and Culture Cr. 3

Satisfies General Education Requirement: Cultural Inquiry, Global Learning Inquiry

Uses food and foodways as a lens to understand social, cultural, political, and economic issues around the world. Lectures draw from the interdisciplinary field of food studies that includes anthropological and historical texts and films. Topics include commensality, globalization, nationalism, food taboos, power, memory, etiquettes, food justice, and food and health. Includes field trips to local food places in Metro Detroit. Offered Intermittently.

ANT 2500 Archaeology of the Great Lakes Cr. 4

Introduction to Native cultures and archaeology of Michigan and the Great Lakes region, from the first peopling of the region through early historic times; changing patterns of adaptation to the ecology of the Great Lakes region; focus on ancient technologies and material culture, social organization, settlement patterns, economic strategies, and political formations. Offered Intermittently.

Course Material Fees: \$25

ANT 3020 Introduction to Archaeology Cr. 3

Introduction to the basic principles and science of archaeology. Case studies from all time periods and regions worldwide. Examination of the intersection of archaeology with other disciplines (history, geology, criminal justice, chemistry). Offered Fall.

Restriction(s): Enrollment is limited to Undergraduate level students.

ANT 3061 Oral History in Middle Eastern Tradition Cr. 3

Methodologies, techniques and applications of oral history used as tools to investigate modern social history of Middle Eastern societies. Offered Every Other Year.

Equivalent: NE 3061

ANT 3100 World Cultures Cr. 3

Satisfies General Education Requirement: Cultural Inquiry, Global Learning Inquiry

Human societies exhibit tremendous diversity. How and why do we differ? What do these differences mean in today's world? Explore, contrast, compare, and understand the differences between and within societies such as those of Amazon rain forest, China, Japan, Alaska, India, the United States, and France. Special attention will be focused on how anthropologists think about and represent cultural differences through ethnographic writing, film, and other media. Offered Fall.

ANT 3150 Anthropology of Business Cr. 3-4

Satisfies General Education Requirement: Foreign Culture, Global Learning Inquiry

Differences between American culture/business practice and the culture/business practice of other countries: assumptions, world view and family structure, organization and language. Offered Every Term.

ANT 3200 Lost Cities and Ancient Civilizations Cr. 3

Satisfies General Education Requirement: Global Learning Inquiry, Historical Studies, Social Inquiry

Early civilizations that developed in different parts of the world in comparative perspective. Hypotheses to explain rise and fall of civilizations, in context of ancient cultures. Basics of archaeology: how facts are formed; meaning of "civilization." How understanding of the past shapes understanding of the present. Geared toward the non-major. Offered Every Term.

ANT 3220 The Inca and their Ancestors Cr. 3

Introduction to precolumbian civilizations of South America. Archaeological and ethnohistorical data on ancient cultures; foundations of Inca civilization; major cultures from different regions and periods. Offered Intermittently.

Prerequisites: ANT 2100 with a minimum grade of D- or ANT 3200 with a minimum grade of D-

ANT 3310 Language and Culture Cr. 3

An introduction to linguistic anthropology. Using comparative approaches to language and culture across time and space, explore variation and change, cognitive dimensions of language, language evolution, linguistic myths, and the use of language in social practice. Offered Fall.

Prerequisites: ANT 2100 with a minimum grade of D- or LIN 2720 with a minimum grade of D-

Restriction(s): Enrollment is limited to Undergraduate level students.

Equivalent: LIN 3310

ANT 3400 Introduction to Medical Anthropology Cr. 3

Satisfies General Education Requirement: Social Inquiry

Introduction to Medical Anthropology uses a biosocial, cross-cultural approach to explore the complexities of health and medicine today – in the United States and elsewhere. It pays special attention to health disparities and how they are experienced by various social groups.

This course will expose students to a number of cultural systems of health and illness from around the world and, describe the behaviors, practices, institutions, and/or systems that define them. In keeping with an anthropological approach, it will treat western biomedicine as one of many cultural systems of explaining and addressing illness. Offered Intermittently.

ANT 3410 Global Health Cr. 3

Satisfies General Education Requirement: Global Learning Inquiry, Social Inquiry, Social Sciences

Introduces students to problems of disease and disorder worldwide and looks at various efforts to define and address these problems through a social science perspective. Offered Winter.

Equivalent: GLS 3410, PH 3410

ANT 3520 Understanding Africa: Past, Present and Future Cr. 3

Satisfies General Education Requirement: Diversity Equity Incl Inquiry, Foreign Culture, Global Learning Inquiry

In-depth knowledge of Africa through the study of its physiography, prehistory and history, social institutions, and social changes within a global context. Offered Intermittently.

ANT 3530 Native Americans Cr. 3

Satisfies General Education Requirement: Diversity Equity Incl Inquiry

Examines the way that academic disciplines and individual scholars have examined American Indian and Native cultures, traditions and histories. The course focuses on migration, colonization, warfare, Native sovereignty and the contemporary experience to learn about the distinctive perspectives of the indigenous peoples of North America. Examines (scientific and indigenous) accounts of the origin of Native American cultures, their interaction in pre-Contact times, survival and persistence during European conquest and colonization and the continuing struggle within dominant North American society for equity, justice and inclusion. Offered Intermittently.

ANT 3540 Cultures and Societies of Latin America Cr. 3

Satisfies General Education Requirement: Diversity Equity Incl Inquiry, Foreign Culture, Global Learning Inquiry

Latin American social structures and cultural variation, history, and relationship to the United States. Themes include class, race, ethnicity, gender, religion, globalization, and immigration to the United States. Offered Intermittently.

ANT 3550 Arab Society in Transition Cr. 3

Satisfies General Education Requirement: Diversity Equity Incl Inquiry, Foreign Culture, Global Learning Inquiry

Distinctive social and cultural institutions and processes of change in the Arab Middle East. Regional variations: background and discussion of current political and economic systems and their relationship to international systems. Offered Intermittently.

Equivalent: NE 3550

ANT 3560 World's Religions Cr. 3

Satisfies General Education Requirement: Diversity Equity Incl Inquiry, Global Learning Inquiry

Explores the nature, dynamism, similarities and differences of religions in an anthropological and cross-cultural perspective. Offered Intermittently.

Prerequisite: ANT 2100 with a minimum grade of D-

ANT 3600 Topics in Anthropology Cr. 3

Selected topics or emerging fields in any of the four anthropology subfields (cultural; physical; archaeology; linguistics). Topics to be announced in Schedule of Classes. Offered Intermittently.

Prerequisites: ANT 2100 with a minimum grade of D-

ANT 3700 Globalization: Theories, Practices, Implications Cr. 3

Satisfies General Education Requirement: Global Learning Inquiry, Social Inquiry, Social Sciences

Students develop analytical tools for appraising processes of globalization; acquire a familiarity with the current topical concerns of global studies; and examine economic, political, and cultural approaches to globalization. Offered Fall, Winter.

Equivalent: GLS 3700

ANT 3990 Directed Study Cr. 2-6

Offered Every Term.

Prerequisites: ANT 1000-6XXX with a minimum grade of B

Repeatable for 6 Credits

ANT 4993 History Communication Cr. 3

This course examines the challenges associated with communicating about the past in today's media-saturated environment. Case studies include analysis of communication surrounding controversial historical issues such as slavery and race, to the examination of successful history communicators operating in various media. An important sub-theme focuses on best practices and ethics when it comes to communicating history to non-experts through emerging media. Students also learn how to "economize" the history communicator skillset for the workplace. Offered Fall.

Equivalent: HIS 4993

ANT 4999 Honors Research and Thesis Cr. 3-6

Research and thesis to be completed under the direction of a faculty member whose expertise includes the student's area of interest. Advisor and a second reader will read the completed thesis. Offered Every Term.

ANT 5060 Urban Anthropology Cr. 3

Social-cultural effects of urbanization from a cross-cultural perspective with emphasis on the developing area of the world. The process of urbanization; the anthropological approach in the area of urban studies. Offered Yearly.

Prerequisites: ANT 2100 with a minimum grade of D-

ANT 5140 Biology and Culture Cr. 3

Interrelationships between the cultural and biological aspects of humans; human genetic variability, human physiological plasticity and culture as associated mechanisms by which humans adapt to environmental stress. Offered Fall.

Prerequisites: ANT 2100 with a minimum grade of D- or ANT 2110 with a minimum grade of D-

ANT 5165 Shop 'Til You Drop: Consumer Society and Culture Cr. 3

Why do we want things that we don't need? Are we bound to consumerism in the global age? This course offers an overview of consumer society and examines consumption practices cross-culturally from an anthropological perspective. Offered Every Other Year.

ANT 5170 Political Anthropology Cr. 3

Ethnographic and comparative study of power, politics, and political organizations in non-state and state societies and in the colonial encounter; evolutionary, functionalist, practice-oriented, Marxist, feminist, and Foucauldian approaches to the study of power. Offered Intermittently.

Prerequisites: ANT 2100 with a minimum grade of D-

ANT 5180 Forensic Anthropology Cr. 3

Introductory survey of the natural, medical, and behavioral sciences with regard to forensic applications. Topics may include: toxicology, forensic pathology, fingerprints, ballistics, analysis of the human skeleton, body fluid identification. Offered Intermittently.

Prerequisites: CRJ 1010 with a minimum grade of D- or ANT 2110 with a minimum grade of D-

ANT 5210 Anthropological Methods Cr. 4

Intensive introduction to research methods, techniques and issues in anthropology. Students engage in a research experience supervised by the instructor, write a field journal, and complete a final exam. Exercises focus on data collection, data management, and data analysis. Techniques include participant observation, fieldnotes, and interviewing. Students learn how to use software packages employed by anthropological researchers in the computer lab. Offered Fall, Winter.

Prerequisites: ANT 2100 with a minimum grade of D-

ANT 5240 Cross Cultural Study of Gender Cr. 3

Evolutionary and cultural bases of gender roles using a world sample; division of labor, marriage and sexual behavior, power and ideology. Offered Intermittently.

Prerequisites: ANT 2100 with a minimum grade of D-

ANT 5260 The African Religious Experience: A Triple Heritage Cr. 3

A triple heritage has contributed to the shaping of lives of African descent: the indigenous, Islamic and Christian religions. Analysis of these legacies, their specificity, interplay and significance in Africa, the Caribbean, South and North America. Offered Intermittently.

ANT 5270 Concepts and Techniques in Archaeology Cr. 3

Intensive introduction to archaeological interpretation, theory, and methods geared towards anthropology graduate students and advanced students from related fields. Examines intellectual history of archaeological ideas since mid-20th century and evaluates theoretical frameworks and techniques used to understand the archaeological record, material culture, past environments, social practices, political and economic organizations, and long term culture change. Also considers archaeology's relationships with anthropology and the world beyond academia. Offered Winter.

Prerequisites: ANT 2100 with a minimum grade of C, ANT 3020 with a minimum grade of C, and ANT 3200 with a minimum grade of C

ANT 5280 Field Work in Archaeology of the Americas Cr. 4

Introduction to the practice and process of archaeological fieldwork. Students participate in survey and/or excavation of an archaeological site to learn the methods of archaeological recovery and analysis. This class can be counted as a field school. Offered Every Other Fall.

Course Material Fees: \$50

ANT 5320 Language and Societies Cr. 3

For graduate students and advanced undergraduates with a background in linguistic anthropology. Students read classic and contemporary works of linguistic anthropology to expand knowledge of human language and sociality; conduct a major original research project. Offered Winter.

Prerequisites: ANT 3310 with a minimum grade of D- or LIN 3310 with a minimum grade of D-

Equivalent: LIN 5320

ANT 5370 Magic, Religion and Science Cr. 3

The nature and variety of religious belief and practice; theoretical interpretations. Offered Every Other Year.

Prerequisites: ANT 2100 with a minimum grade of D-

ANT 5380 History of Anthropology Cr. 3

Required for majors. History of ideas and explanatory theories in anthropology; continuities and disjunctures in British, French, American, German, Belgian, Russian, and Third World anthropologies. Offered Fall.

Prerequisites: ANT 2100 with a minimum grade of D- or ANT 7005 with a minimum grade of D-

ANT 5400 Anthropology of Health and Illness Cr. 3

Concepts and theory in medical anthropology from cultural and biological perspectives. Topics include: cross-cultural aspects of sex and gender in health and illness, life course, sexuality, birth and death, biocultural approaches to healing and treatment, international health and epidemiology. Offered Every Other Year.

Prerequisites: ANT 2100 with a minimum grade of D-

ANT 5410 Anthropology of Age Cr. 3

Cultural construction of the life course; age categories such as childhood and old age examined from cross-cultural, historical, political and economic perspectives. Special attention to women's aging; role of biology and ethnicity in aging and death and dying. Offered Every Other Year.

Prerequisites: ANT 2100 with a minimum grade of D-

ANT 5420 Anthropology Practicum Cr. 3

Field placement in a service agency or other organization. Students provide volunteer assistance to an agency while conducting participant observation research exercises. Utilization of field experience to learn about a variety of research issues and methodologies. Offered Yearly.

Restriction(s): Enrollment is limited to Undergraduate level students.

ANT 5450 Kinship and Social Relations Cr. 3

How are kinship relations created, transformed, reshaped, and unmade? How do people experience kinship, and what does it mean to be related? How do these processes, experiences, and imaginations vary across space and time? What is the role of kinship studies in anthropology, and how has this changed over the history of the discipline? This course explores these questions through a rigorous analysis of contemporary and historical readings in the anthropological study of kinship and social relations. This course will draw on case studies from the Americas, Europe, Africa, the Middle East, Asia (Central, East, Southeast), and Melanesia. Offered Intermittently.

ANT 5500 Historical Archaeology Cr. 3

Historical archaeology studies the emergence and transformations of the Modern World (post-1500 AD) through the convergence of material remains (artifacts), documentary sources, and oral histories left behind by past societies. Case studies focus on the period between the 16th-20th centuries and are drawn from local and global examples on major topics, such as capitalism, colonialism, race, inequality, gender, sexuality, age, politics, and heritage. Offered Every Other Year.

ANT 5510 Pre-Columbian and Mesoamerican Civilization Cr. 3

Survey of the history and characteristics of cultures in Mesoamerica prior to and after colonization, from the Olmec and Maya to the Aztec and their descendants. Offered Every Other Year.

Prerequisites: ANT 2100 with a minimum grade of D-

ANT 5565 Urban Archaeology Cr. 3

Urban archaeology in the modern and contemporary eras is introduced as an area of social and political engagement with the material remains of the past (ca. 1750 - present). Urban archaeology is entwined with issues of historic preservation, heritage management, city planning, and urban ecology. Class covers a variety of urban archaeology topics in modern and post-industrial Western societies, and involves interactions with Detroit's archaeological and heritage sites, digital humanities techniques, and other approaches that connect urban archaeology with the anthropology of the city. Offered Every Other Year.

ANT 5600 Museum Studies Cr. 3

Introduction to basics of museums, museum work, and museum theory. Topics include: collections management, data bases, interpretive exhibit methods, current issues in museum studies, legal concerns, role of museums as educational institutions. Offered Every Other Year.

ANT 5700 Applied Anthropology Cr. 3

The application of anthropological concepts and methods to contemporary issues of public concern in the United States and abroad. Offered Fall.

Prerequisites: ANT 2100 with a minimum grade of D- or ANT 7005 with a minimum grade of D-

ANT 5800 Anthropological Perspectives on Business Cr. 3

Implications of applying the term "business" to a field or activity. Anthropological approaches to the question of how business differs from other forms of authority and commerce, particularly outside the modern, Euro-American sphere. Offered Intermittently.

ANT 5900 Culture, Language and Cognition Cr. 3

Systematic investigation of the relationships among, language, cognition and culture, including issues relating to human universals, cross-cultural concept formation, metaphor, classification and the evolution of cognition and language. Offered Every Other Winter.

Prerequisites: ANT 3310 with a minimum grade of D- or ANT 5320 with a minimum grade of D- or LIN 3310 with a minimum grade of D- or LIN 5320 with a minimum grade of D- or LIN 3080 with a minimum grade of D- or PSY 3080 with a minimum grade of D-

Restriction(s): Enrollment is limited to Graduate or Undergraduate level students.

Equivalent: LIN 5900, PSY 5900

ANT 5993 Writing Intensive Course in Anthropology Cr. 0

Satisfies General Education Requirement: Writing Intensive Competency Disciplinary writing assignments under the direction of a faculty member. Must be selected in conjunction with a course designated as a corequisite. See section listing in Schedule of Classes for corequisites available each term. Satisfies the University General Education Writing-Intensive Course in the Major requirement. Within first three weeks of enrollment in corequisite course, student must notify instructor of enrollment in ANT 5993. Required for all majors. Offered Winter.

Prerequisites: May be taken concurrently: ANT 5310 or ANT 5996 or AFS 2390 with a minimum grade of C or ENG 2390 with a minimum grade of C or ENG 3010 with a minimum grade of C or ENG 3020 with a minimum grade of C or ENG 3050 with a minimum grade of C

Restriction(s): Enrollment is limited to Undergraduate level students.

ANT 5996 Capstone Seminar in Anthropology Cr. 3

Required for majors. Review and integrate central practices and theories in anthropology through discussion of the four major subfields and applied areas of anthropology. Special attention will be given to new developments in the different fields. Recommended for new graduate students without extensive background in anthropology; also open to those outside anthropology who desire a thorough view of research areas and theoretical perspectives in anthropology. Offered Winter.

ANT 6290 Culture Area Studies Cr. 3

Culture and social changes. Origins and functional relationships, regional variation in population, settlement, culture contact, religion, migration, social institutions. Topics to be announced in Schedule of Classes . Offered Intermittently.

Prerequisites: ANT 2100 with a minimum grade of D-
Repeatable for 9 Credits

ANT 6420 Economic Anthropology Cr. 3

Use of economic analysis in anthropology. Difference between Western and non-Western economies and economic models; methods of analysis of non-Western economies and non-rationalized sectors of Western economies. Offered Intermittently.

ANT 6510 The Inca and their Ancestors Cr. 3

Study of pre-Columbian cultures of South America. Archaeological and ethnohistorical data beginning with the Inca; foundations of Inca civilization; major cultures from different regions and periods in South American prehistory. Offered Every Other Year.

Prerequisites: ANT 2100 with a minimum grade of C, ANT 3020 with a minimum grade of C, and ANT 3200 with a minimum grade of C

ANT 6555 Cultural Resource Management and Public Archaeology Cr. 3

Practicum focuses on historical development of cultural resource management (CRM) in the U.S.; contemporary regulatory framework of CRM; practical experience in project planning, proposal writing, archival research, project management and the reporting process. Offered Every Other Year.

Prerequisites: ANT 5270 with a minimum grade of C or ANT 5280 with a minimum grade of C

ANT 6570 Archaeological Laboratory Analysis Cr. 3

Introduction to conventional and innovative laboratory methods used for the analysis of archaeological artifacts from both prehistoric and historic periods. Intensive hands-on class for advanced students using the collections of the Grosscup Museum of Anthropology. Offered Every Other Year.

Restriction(s): Enrollment is limited to Graduate level students.

ANT 6650 Studies in Physical Anthropology Cr. 2-4

Selected topics in physical anthropology. Topics to be announced in Schedule of Classes. Offered Intermittently.

Prerequisites: ANT 2110 with a minimum grade of D-
Repeatable for 12 Credits

ANT 6680 Studies in Cultural Anthropology Cr. 2-4

Selected topics in cultural anthropology. Topics to be announced in Schedule of Classes. Offered Intermittently.

Prerequisites: ANT 2100 with a minimum grade of D-
Repeatable for 12 Credits

ANT 6993 History Communication Cr. 3

This course examines the challenges associated with communicating about the past in today's media-saturated environment. Case studies include analysis of communication surrounding controversial historical issues such as slavery and race, to the examination of successful history communicators operating in various media. An important sub-theme focuses on best practices and ethics when it comes to communicating history to non-experts through emerging media. Students also learn how to "economize" the history communicator skillset for the workplace. Offered Every Other Fall.

Restriction(s): Enrollment is limited to Graduate level students.

Equivalent: HIS 6993

ANT 7005 Proseminar in Anthropology I Cr. 3

Introduction to anthropological theory including key figures and issues across the discipline. Offered Fall.

Restriction(s): Enrollment is limited to Graduate level students.

ANT 7010 Proseminar in Anthropology II Cr. 3

Examination of some major debates in anthropology in contemporary perspective; continuities and breakthroughs. Offered Winter.

Restriction(s): Enrollment is limited to Graduate level students.

ANT 7020 Anthropological Theory II Cr. 3

Continuation of ANT 7010. Offered Every Other Year.

Prerequisites: ANT 7010 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

ANT 7030 Debates in Anthropology Cr. 3

Advanced seminar on enduring questions and key debates in anthropological thought over its history, including different subfields and allied social sciences. Offered Winter.

Prerequisites: ANT 7020 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students;

enrollment is limited to students with a major in Anthropology; enrollment limited to students in a Doctor of Philosophy degree.

ANT 7200 Qualitative Research I Cr. 3

Qualitative methods techniques and research design. Students conduct independent field research and learn data collection methods. Offered Every Other Year.

Prerequisites: ANT 7010 with a minimum grade of C or ANT 7020 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

ANT 7210 Qualitative Research II Cr. 3

Students continue their field research and learn to analyze and draw theoretical conclusions from their data. Training in computer and other tools for data analysis and theory building. Offered Every Other Year.

Prerequisites: ANT 7200 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

ANT 7260 Urban Poverty and Racial Segregation Cr. 3

Review of theories of poverty from various economic/political perspectives; historical intervention policies; current literature on interplay of racial, economic, and spatial factors on growing economic inequality among urban whites and African-Americans. Political rationale and meaning of the underclass debate. Offered Every Other Year.

Restriction(s): Enrollment is limited to Graduate level students.

Equivalent: AFS 6600, PS 7260, SOC 7350, UP 7260

ANT 7420 Anthropology Practicum Cr. 3

Field placement in a service agency or other organization. Students provide volunteer assistance to an agency while conducting participant observation research exercises. Utilization of field experience to learn about a variety of research issues and methodologies. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate level students.

ANT 7430 End-of-Life Issues Cr. 3-4

Physical, spiritual, legal, economic, political, cultural, and ethical issues at the end of life, examined as stories about individuals, families, and communities. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate level students.

Equivalent: NUR 7515, SOC 7020

ANT 7450 Kinship and Social Relations Cr. 3

How are kinship relations created, transformed, reshaped, and unmade? How do people experience kinship, and what does it mean to be related? How do these processes, experiences, and imaginations vary across space and time? What is the role of kinship studies in anthropology, and how has this changed over the history of the discipline? This course explores these questions through a rigorous analysis of contemporary and historical readings in the anthropological study of kinship and social relations. This course will draw on case studies from the Americas, Europe, Africa, the Middle East, Asia (Central, East, Southeast), and Melanesia. Offered Intermittently.

Restriction(s): Enrollment is limited to Graduate level students.

ANT 7605 Seminar in Problems and Concepts in Medical Anthropology Cr. 1-9

Topics to be announced in Schedule of Classes. Offered Intermittently.

Restriction(s): Enrollment is limited to Graduate level students.

Repeatable for 9 Credits

ANT 7620 Seminar in Problems and Concepts in Archaeology Cr. 3

Central concepts and theories. Current developments, problems and contemporary research orientations. Topics to be announced in Schedule of Classes. Offered Every Other Year.

Restriction(s): Enrollment is limited to Graduate level students.

Repeatable for 15 Credits

ANT 7625 Material Culture and the Social Meaning of Things Cr. 3

Our relationship with objects, and various ways of looking at material culture as part of our social world. Understanding and appreciation of the materiality of our lives and the lives of peoples of different cultures. Offered Every Other Year.

Restriction(s): Enrollment is limited to Graduate level students.

ANT 7630 Seminar in Problems and Concepts in Cultural Anthropology Cr. 2-3

Central concepts and theories. Current developments, problems and contemporary research orientations. Topics to be announced in Schedule of Classes. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate level students.

Repeatable for 9 Credits

ANT 7635 Globalization and Culture Cr. 3

Focuses on the discourse, debates, and practices of globalization from an anthropological perspective. Fast-paced seminar course for graduate students. Topics include: globalization, localization, and anti-globalization; citizenship and belonging; modernity; transnationalism; migration and diaspora; global food systems; consumption and production; popular culture; religion; development; methodological issues in studying global phenomena. Offered Fall.

Restriction(s): Enrollment is limited to Graduate level students.

ANT 7665 Seminar in Linguistic Anthropology Cr. 3

Central concepts and theories. Current developments, problems and contemporary research orientations. Topics to be announced in Schedule of Classes. Offered Intermittently.

Prerequisites: ANT 5320 with a minimum grade of C or LIN 5320 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

Equivalent: LIN 7665

ANT 7680 Medical Anthropology I Cr. 3

Core concepts and theoretical approaches, including: aging, life course, childhood, old age, disability, chronic illness, infectious disease, international health, organization of health care institutions, health policy, political economy of health, women's health, reproduction, technology, the body, bioethics, culture and cognition, death and dying, race and ethnicity, violence, sex and sexuality. Offered Every Other Year.

Restriction(s): Enrollment is limited to Graduate level students.

Repeatable for 6 Credits

ANT 7690 Medical Anthropology II Cr. 3

Continuation of ANT 7680. Offered Every Other Year.

Restriction(s): Enrollment is limited to Graduate level students.

ANT 7777 Teaching Anthropology Cr. 1

Teaching anthropology at the college level, including pedagogical philosophies and practical strategies. Offered Intermittently.

Restriction(s): Enrollment is limited to Graduate level students;

enrollment is limited to students in the Department of Anthropology.

ANT 7780 Conceptualizing the Dissertation Cr. 3

Basic concepts, practices, and skills needed to develop and present a grant proposal for funding. Offered Every Other Year.

Restriction(s): Enrollment is limited to Graduate level students.

ANT 7900 Synthesis Cr. 3

Integrative, holistic, and comparative examination of anthropology as the synthesis of diverse analytic perspectives and methodologies. Offered Winter.

Prerequisites: ANT 7005 with a minimum grade of C and ANT 7010 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

ANT 7987 Directed Study in Business/Organizational Anthropology Cr. 1-9

Research problem which involves fieldwork or intensive and systematic reading of original technical literature. Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students.

Repeatable for 9 Credits

ANT 7990 Directed Study in Physical Anthropology Cr. 1-8

Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students.

Repeatable for 8 Credits

ANT 7991 Directed Study in Linguistics Cr. 1-9

A research problem which requires field work or intensive and systematic reading of original technical literature. Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students.

Equivalent: LIN 7991

Repeatable for 9 Credits

ANT 7992 Directed Study in Archaeology Cr. 1-9

A research problem which requires field work or intensive and systematic reading of original technical literature. Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students.

Repeatable for 9 Credits

ANT 7993 Directed Study in Cultural Anthropology Cr. 1-9

A research problem which requires field work or intensive and systematic reading of original technical literature. Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students.

Repeatable for 9 Credits

ANT 7994 Directed Study in Medical Anthropology Cr. 1-9

Research problem requiring intensive study of original documents, specialized literature, and/or field research with write-up. Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students.

Repeatable for 9 Credits

ANT 7995 Directed Study Cr. 1-9

Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students.

Repeatable for 9 Credits

ANT 7998 Field Problem Cr. 1-9

A research problem which requires field work or intensive and systematic reading of original technical literature. Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students.

Repeatable for 9 Credits

ANT 7999 Master's Essay Direction Cr. 3

Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students with a class of Candidate Masters.

ANT 8999 Master's Thesis Research and Direction Cr. 1-8

Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students with a class of Candidate Masters.

Repeatable for 8 Credits

ANT 9990 Pre-Doctoral Candidacy Research Cr. 1-8

Research in preparation for doctoral dissertation. Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students.

Repeatable for 12 Credits

ANT 9991 Doctoral Candidate Status I: Dissertation Research and Direction Cr. 7.5

Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students.

ANT 9992 Doctoral Candidate Status II: Dissertation Research and Direction Cr. 7.5

Offered Every Term.

Prerequisite: ANT 9991 with a minimum grade of S

Restriction(s): Enrollment is limited to Graduate level students.

ANT 9993 Doctoral Candidate Status III: Dissertation Research and Direction Cr. 7.5

Offered Every Term.

Prerequisite: ANT 9992 with a minimum grade of S

Restriction(s): Enrollment is limited to Graduate level students.

ANT 9994 Doctoral Candidate Status IV: Dissertation Research and Direction Cr. 7.5

Offered Every Term.

Prerequisite: ANT 9993 with a minimum grade of S

Restriction(s): Enrollment is limited to Graduate level students.

ANT 9995 Candidate Maintenance Status: Doctoral Dissertation Research and Direction Cr. 0

Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students.

Course Material Fees: \$370.26

Repeatable for 0 Credits

APA - ART: PAINTING

APA 2000 Oil Painting I Cr. 3

Traditional materials and methods of oil painting as a means of visual expression. Previous painting experience is not required. Painting from direct observation and imagination. Offered Every Term.

Prerequisite: ADR 1050 with a minimum grade of C- and ACO 1200 with a minimum grade of C-

Course Material Fees: \$30

APA 2110 Watercolor Painting I Cr. 3

Methods and materials of transparent watercolor painting. Previous experience with watercolor painting is not required. Compositions based on observation and imagination. Offered Fall, Winter.

Prerequisite: APA 2000 with a minimum grade of C-

Course Material Fees: \$30

APA 2130 Introduction to Alternative Painting Media Cr. 3

Survey of materials and methods of acrylic painting, encaustic painting, pastel painting, as well as collage and mixed media painting. Previous painting experience is not required. Compositions based on observation and imagination. Offered Yearly.

Prerequisite: ACO 1200 with a minimum grade of C-

Course Material Fees: \$80

APA 2200 Introduction to Mural Painting Cr. 3

Introduction to the methods and materials of traditional Buon Fresco painting as well as methods and materials for contemporary mural painting in the community arts context. Offered Fall.

Prerequisite: ACO 1200

Course Material Fees: \$65

APA 3000 Oil Painting II Cr. 3

Continued emphasis on structure of painting. Individual development of pictorial, emotional and conceptual aspects of image-making. Offered Every Term.

Prerequisite: APA 2000 with a minimum grade of C-

Course Material Fees: \$30

APA 3110 Watercolor Painting II Cr. 3

Continued experience with watermedia compositions based on observation and/or imagination. Offered Fall, Winter.

Prerequisite: APA 2110 with a minimum grade of C-

Restriction(s): Enrollment is limited to students in the Department of Art and Art History; enrollment limited to students in a Bachelor of Arts or Bachelor of Fine Arts degrees.

Course Material Fees: \$30

APA 3130 Figure Painting: Water Media Cr. 3

Spontaneous and sustained paintings from direct observation of the human figure. Inquiry into the effects of scale, space and emotional responses are encouraged. Offered Yearly.

Prerequisite: APA 2110 with a minimum grade of C-

Restriction(s): Enrollment is limited to students in the Department of Art and Art History; enrollment limited to students in a Bachelor of Arts or Bachelor of Fine Arts degrees.

Course Material Fees: \$90

APA 3140 Figure Painting: Oil and Other Media Cr. 3

Sustained and gestural studies of human figure. Individual responses to scale, space, emotional content. Offered Every Term.

Prerequisite: APA 3000 with a minimum grade of D-

Restriction(s): Enrollment is limited to students in the Department of Art and Art History; enrollment limited to students in a Bachelor of Arts or Bachelor of Fine Arts degrees.

Course Material Fees: \$90

APA 4000 Oil Painting III Cr. 3

Individual development of personal painting ideas through assigned projects and/or student initiative in consultation with instructor.

Continued emphasis on formal and expressive aspects of painting.

Offered Every Term.

Prerequisite: APA 3000 with a minimum grade of C-

Restriction(s): Enrollment is limited to students in the Department of Art and Art History.

Course Material Fees: \$30

APA 5000 Oil Painting IV Cr. 3

Individual development in painting. Offered Every Term.

Prerequisites: APA 4000

Restriction(s): Enrollment is limited to students in the Department of Art and Art History.

Course Material Fees: \$30

Repeatable for 6 Credits

APA 5060 Advanced Concepts in Drawing and Painting Cr. 3-6

Emphasis on individual projects using any appropriate medium. Students select subjects and approaches under faculty guidance; may include lectures, demonstrations, off-campus visits. Offered Yearly.

Prerequisites: ADR 3070 or APA 4000

Restriction(s): Enrollment is limited to students in the Department of Art and Art History; enrollment limited to students in a Bachelor of Arts, Bachelor of Fine Arts, Bachelor of Science, Master of Arts or Master of Fine Arts degrees.

Course Material Fees: \$30

Equivalent: APA 5700, APA 7060

Repeatable for 6 Credits

APA 5080 Landscape Painting Cr. 3

Painting or drawing, as appropriate, outdoors at various urban, suburban and rural sites in metropolitan Detroit area. Students are expected to drive or carpool to locations within an hour of Detroit. Interpretation of landscape subjects through observation and imagination. Offered for undergraduate credit only. Offered Spring/Summer.

Prerequisite: APA 2000 with a minimum grade of C-

Restriction(s): Enrollment is limited to Undergraduate level students; enrollment is limited to students in the Department of Art and Art History.

Course Material Fees: \$30

Repeatable for 6 Credits

APA 5100 Contexts of Studio Practice Cr. 3

Critical inquiry into art issues, past and present, and contemporary studio practices related to painting. Seminar based on visits to museums, galleries, private collections, artists' studios, and optional trips to major art centers such as New York and Chicago. Offered Yearly.

Restriction(s): Enrollment is limited to students in the Department of Art and Art History.

Equivalent: ADR 5100

Repeatable for 6 Credits

APA 5110 Watercolor Painting III Cr. 3

Individual work in transparent and/or opaque water-based media. Offered Fall, Winter.

Prerequisites: APA 3110 with a minimum grade of C-

Restriction(s): Enrollment is limited to students in the Department of Art and Art History; enrollment limited to students in a Bachelor of Arts, Bachelor of Fine Arts, Bachelor of Science, Master of Arts or Master of Fine Arts degrees.

Course Material Fees: \$30

Repeatable for 6 Credits

APA 5130 Figure Painting Advanced: Water Media Cr. 3

Individual development in water media based on observation of human figure. Offered Yearly.

Prerequisites: APA 3130 with a minimum grade of C-

Restriction(s): Enrollment is limited to students in the Department of Art and Art History; enrollment limited to students in a Bachelor of Arts, Bachelor of Fine Arts, Bachelor of Science, Master of Arts or Master of Fine Arts degrees.

Course Material Fees: \$90

Repeatable for 6 Credits

APA 5140 Figure Painting Advanced: Oil and Other Media Cr. 3

Individual development based on the human figure using any appropriate medium. Offered Yearly.

Prerequisites: APA 3140 with a minimum grade of C-

Restriction(s): Enrollment is limited to students in the Department of Art and Art History; enrollment limited to students in a Bachelor of Arts, Bachelor of Fine Arts, Bachelor of Science, Master of Arts or Master of Fine Arts degrees.

Course Material Fees: \$90

Repeatable for 6 Credits

APA 5160 Advanced Alternative Painting Media Cr. 3

Individual work in the materials and methods of acrylic painting, encaustic painting, pastel painting, as well as collage and mixed media painting. Offered Fall, Winter.

Prerequisite: APA 2130 with a minimum grade of C-

Course Material Fees: \$80

Repeatable for 6 Credits

APA 5200 Advanced Mural Painting Cr. 3

Individual work in the materials and methods of Buon Fresco painting and modern mural painting. Offered Fall.

Prerequisite: ACO 1200

APA 5700 Advanced Concepts in Drawing and Painting Cr. 3-6

Emphasis on individual projects using any appropriate medium. Students select subjects and approaches under faculty guidance; may include lectures, demonstrations, off-campus visits. Offered Yearly.

Prerequisites: APA 4000 with a minimum grade of C- or APA 3070 with a minimum grade of C-

Restriction(s): Enrollment is limited to Undergraduate level students; enrollment is limited to students in the Department of Art and Art History; enrollment limited to students in a Bachelor of Arts, Bachelor of Fine Arts or Bachelor of Science degrees.

Course Material Fees: \$30

Equivalent: APA 5060, APA 7060

Repeatable for 6 Credits

APA 5810 Directed Projects: Painting Cr. 3-6

Self-directed work in consultation with graduate faculty on an arranged basis. Offered Fall, Winter.

Restriction(s): Enrollment is limited to students in the Department of Art and Art History; enrollment limited to students in a Bachelor of Arts, Bachelor of Fine Arts, Bachelor of Science, Master of Arts or Master of Fine Arts degrees.

Repeatable for 998.99 Credits

APA 7000 Graduate Oil Painting Cr. 3

Individual work in oil painting, or other material as appropriate. Offered Every Term.

Prerequisite: APA 5000 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students; enrollment is limited to students in the Department of Art and Art History; enrollment limited to students in the MA in Fine Arts or Master of Fine Arts programs.

Course Material Fees: \$30

Repeatable for 9 Credits

APA 7060 Graduate Problems in Drawing and Painting Cr. 3-9

Emphasis on individual projects using any appropriate medium. Students select subjects and approaches under faculty guidance; may include lectures, demonstrations, off-campus visits. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate level students; enrollment is limited to students in the Department of Art and Art History; enrollment limited to students in a Master of Arts or Master of Fine Arts degrees.

Course Material Fees: \$30

Equivalent: APA 5060

Repeatable for 15 Credits

APA 7080 Landscape Painting Cr. 3

Painting or drawing, as appropriate, outdoors at various urban, suburban and rural sites in metropolitan Detroit area. Interpretation of landscape subjects through observation and imagination. Students are expected to drive or carpool to locations within an hour of Detroit. Offered Spring/Summer.

Restriction(s): Enrollment is limited to Graduate level students; enrollment is limited to students in the Department of Art and Art History; enrollment limited to students in a Master of Arts or Master of Fine Arts degrees.

Course Material Fees: \$30

Repeatable for 15 Credits

APA 7110 Graduate Watercolor Painting Cr. 3

Individual work in transparent and/or opaque water-based media. Offered Fall, Winter.

Prerequisite: APA 5110 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students; enrollment is limited to students in the Department of Art and Art History; enrollment limited to students in a Master of Arts or Master of Fine Arts degrees.

Course Material Fees: \$30

Repeatable for 9 Credits

APA 7130 Graduate Problems in Figure Painting: Water Media Cr. 3

Individual development of images based on the human figure. Offered Yearly.

Prerequisite: APA 5130 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students; enrollment is limited to students in the Department of Art and Art History; enrollment limited to students in a Master of Arts or Master of Fine Arts degrees.

Course Material Fees: \$90

Repeatable for 6 Credits

APA 7140 Graduate Problems in Figure Painting: Oil Media Cr. 3

Individual development of images based on the human figure. Offered Yearly.

Prerequisite: APA 5140 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students; enrollment is limited to students in the Department of Art and Art History; enrollment limited to students in a Master of Arts or Master of Fine Arts degrees.

Course Material Fees: \$90

Repeatable for 9 Credits

APA 8810 MFA Studio: Painting Cr. 3-9

Extended self-directed work in painting (eighteen to twenty-seven hours per week). Consultation with appropriate graduate faculty on an arranged basis. Offered Fall, Winter.

Restriction(s): Enrollment is limited to Graduate level students; enrollment is limited to students in the Department of Art and Art History; enrollment limited to students in a Master of Fine Arts degree.

Repeatable for 36 Credits

APH - ART: PHOTOGRAPHY

APH 2400 Introduction to Photography Cr. 3

Essential technical, conceptual, and artistic problems associated with photography. Exploration of how photography functions as visual language and how a camera works in order to use it as a tool for personal expression. Students must have own digital camera that has access to Aperture/ Shutter Speed/ Manual controls and shoots at least 10 megapixels image. Offered Every Term.

APH 2410 Black and White Darkroom Photography I Cr. 3

Introduces darkroom practices, including: black and white analog film processing, printing and presentation. Students must have own film 35 mm or 120 mm medium format film camera. Offered Every Term.

Prerequisite: APH 2400 with a minimum grade of C-

Course Material Fees: \$180

APH 2420 Digital Photography I Cr. 3

Introduces students to the underlying principles, languages and tools of electronic media in relationship to photographic imaging. Students will learn key concepts in digital imaging such as modes of data capture, file management, processing workflow, color management, resolution, non-destructive image processing, film scanning and inkjet printing. A digital camera that shoots RAW images and has access to manual controls is required for this course. Offered Every Term.

Prerequisite: APH 2400 with a minimum grade of C-

Course Material Fees: \$180

APH 3410 Black and White Darkroom Photography II Cr. 3

Furtheres an intermediate development of photographic darkroom practices from exposure and development of black and white film, to printing and presentation. Students must have their own film 35 mm or 120 mm medium format film camera. Offered Every Term.

Prerequisite: APH 2410 with a minimum grade of C-

Course Material Fees: \$180

APH 3420 Digital Photography II Cr. 3

Designed to give upper level photo concentrators a thorough understanding of the intermediate-level workflow for film-capture and scanning, and digital camera RAW file capture. Explores technical issues, including advanced tonal and color correction techniques, image sharpening, digital camera exposure and Raw file processing, inkjet printing and automated batch file processing; as well as the development of a conceptually rigorous portfolio. Students entering this course should be proficient in the use of the Macintosh platform and basic Photoshop operations. A digital camera that shoots RAW images and has access to manual controls is required for this course. Offered Every Term.

Prerequisite: APH 2420 with a minimum grade of C-

Course Material Fees: \$180

APH 4410 Advanced Photography Cr. 3

This course is for upper level photo concentrators in order to bring together advanced skills and ideas about image making. Students are expected to work independently on their individual projects with the expectation of a culminating body of work; they will refine their skills as photographers and learn how to verbally articulate issues in their own work as well as the work of others. Offered Yearly.

Prerequisite: APH 3410 with a minimum grade of C-

Restriction(s): Enrollment is limited to students in the Department of Art and Art History; enrollment limited to students in a Bachelor of Arts or Bachelor of Fine Arts degrees.

Course Material Fees: \$180

Repeatable for 6 Credits

APH 4420 View Camera Cr. 3

Basic view camera techniques. Sheet film processing and printing. Integration of digital technology. Offered Yearly.

Restriction(s): Enrollment is limited to students in the Department of Art and Art History; enrollment limited to students in a Bachelor of Arts or Bachelor of Fine Arts degrees.

Course Material Fees: \$180

APH 5440 Experimental Photography Cr. 3-6

Work in non-traditional processes including image and emulsion transfer, hand-applied emulsions, laser copy and xerographic transfer. Offered Every Other Year.

Prerequisite: APH 3410 with a minimum grade of C-

Restriction(s): Enrollment is limited to students in the Department of Art and Art History; enrollment limited to students in a Bachelor of Arts, Bachelor of Fine Arts, Master of Arts or Master of Fine Arts degrees.

Course Material Fees: \$180

Repeatable for 9 Credits

APH 5450 Selected Topics in Photography Cr. 3

Topics to be announced in Schedule of Classes . Offered Yearly.

Prerequisites: APH 4410

Restriction(s): Enrollment is limited to students in the Department of Art and Art History; enrollment limited to students in a Bachelor of Arts, Bachelor of Fine Arts, Master of Arts or Master of Fine Arts degrees.

Course Material Fees: \$180

Repeatable for 6 Credits

APH 5850 Directed Projects: Photography Cr. 3-9

Individual problems. Offered Fall, Winter.

Restriction(s): Enrollment is limited to students in the Department of Art and Art History; enrollment limited to students in a Bachelor of Arts, Bachelor of Fine Arts, Master of Arts or Master of Fine Arts degrees.

Course Material Fees: \$180

Repeatable for 998.99 Credits

APH 5860 Social Documentary: Community, Compassion, and Activism Cr. 3

Satisfies General Education Requirement: Diversity Equity Incl Inquiry
Photographic documentation applied to social cause, community representation, and visual/multicultural critical theory. Offered Intermittently.

Prerequisite: APH 2400 with a minimum grade of C-

Course Material Fees: \$180

APH 7400 Graduate Photography Cr. 3-9

Individual problems in advanced photography. Offered Fall, Winter.

Restriction(s): Enrollment is limited to Graduate level students; enrollment is limited to students in the Department of Art and Art History; enrollment limited to students in a Bachelor of Arts, Bachelor of Fine Arts, Master of Arts or Master of Fine Arts degrees.

Course Material Fees: \$180

Repeatable for 24 Credits

APH 8850 MFA Studio: Photography Cr. 3-9

Extended problems in photography; individual research with eighteen to twenty-seven hours of laboratory per week. Offered Fall, Winter.

Restriction(s): Enrollment is limited to Graduate level students; enrollment is limited to students in the Department of Art and Art History; enrollment limited to students in a Master of Fine Arts degree.

Course Material Fees: \$180

Repeatable for 36 Credits

APR - ART: PRINTMAKING

APR 2300 Printmaking Cr. 3

Introduction to a variety of printmaking processes may include the following: lithography, etching, monotype, screenprint, and relief. Offered Yearly.

Prerequisite: ADR 1050 or ACO 1200

Course Material Fees: \$90

APR 3470 Photo-Processes for Printmaking I Cr. 3

Light sensitive printmaking processes are explored, and may include photo-lithography, photo-etching, photo-screen printing, and cyanotypes. Students may create prints utilizing traditional or digital drawing, analog or digital photography, and hybrid techniques. Offered Winter.

Prerequisite: ADR 1050 or AGD 2240 or ADA 2220 or APH 2410

Course Material Fees: \$115

APR 3480 Intaglio I Cr. 3

Basic metal plate printing techniques: etching, aquatint, drypoint, soft ground, and lift ground. Offered Fall, Winter.

Prerequisite: ADR 1050 or ACO 1200

Course Material Fees: \$110

APR 3490 Lithography I Cr. 3

Fundamentals of stone and plate lithography applying traditional and contemporary techniques of crayon, tusche, and photolithography. Offered Spring/Summer.

Prerequisite: ADR 1050 or ACO 1200

Course Material Fees: \$110

APR 3500 Screen Printing I Cr. 3

Introduction to basic techniques of screen printing. Offered Yearly.

Prerequisite: ADR 1050 and ACO 1200 and APH 2400 and AGD 2240

Course Material Fees: \$110

APR 3510 Relief and Experimental Printmaking I Cr. 3

Traditional and contemporary methods of relief printmaking including woodcut and linoleum. Collograph, monoprint, monotype, and experimental methods may be included. Offered Every Term.

Prerequisite: ADR 1050 or ACO 1200

Course Material Fees: \$90

APR 5470 Photo-Processes for Printmaking II Cr. 3

Light sensitive printmaking processes are explored, and may include photo-lithography, photo-etching, photo-screen printing, and cyanotypes. Students may create prints utilizing traditional or digital drawing, analog or digital photography, and hybrid techniques. Emphasis on creating a conceptually focused body of work. Offered Winter.

Prerequisites: APR 3470

Course Material Fees: \$115

Repeatable for 9 Credits

APR 5480 Intaglio II Cr. 3

Further development of intaglio printmaking skills including: range of techniques, color methods, and printing. Emphasis on creating a conceptually focused body of work. Offered Fall, Winter.

Prerequisites: APR 3480

Course Material Fees: \$110

Repeatable for 9 Credits

APR 5490 Lithography II Cr. 3

Advanced problems in lithography. Black and white, multicolor, transfer methods. Offered Fall, Winter.

Prerequisites: APR 3490

Course Material Fees: \$110

Repeatable for 9 Credits

APR 5500 Screen Printing II Cr. 3

Further development of screen-printing techniques and printing. Emphasis on creating a conceptually focused body of work. Offered Yearly.

Prerequisites: APR 3500

Course Material Fees: \$110

Repeatable for 9 Credits

APR 5510 Relief and Experimental Printmaking II Cr. 3

Emphasis on creating a conceptually focused body of work and increased relief technical skills through the practice of multiple block/plate printing, color, large format, unique format, and hybrid techniques. Offered Spring/Summer.

Prerequisites: APR 3510

Course Material Fees: \$90

Repeatable for 9 Credits

APR 7470 Graduate Photo Processes for Printmaking Cr. 3

Exploration of non-traditional formats and print surfaces. Editioning optional. Offered Fall.

Restriction(s): Enrollment is limited to Graduate level students; enrollment is limited to students in the Department of Art and Art History; enrollment limited to students in a Master of Arts or Master of Fine Arts degrees.

Course Material Fees: \$115

Repeatable for 9 Credits

APR 7480 Graduate Intaglio Cr. 3

Advanced problems in intaglio. Multiplate and rollup color printing. Photo intaglio techniques, experimental media. Offered Fall, Winter.

Restriction(s): Enrollment is limited to Graduate level students; enrollment is limited to students in the Department of Art and Art History; enrollment limited to students in a Master of Arts or Master of Fine Arts degrees.

Course Material Fees: \$110

Repeatable for 9 Credits

APR 7490 Graduate Lithography Cr. 3

Advanced work in lithography. Offered Fall, Winter.

Restriction(s): Enrollment is limited to Graduate level students; enrollment is limited to students in the Department of Art and Art History; enrollment limited to students in a Master of Arts or Master of Fine Arts degrees.

Course Material Fees: \$110

Repeatable for 6 Credits

APR 7500 Graduate Serigraphy Cr. 3

Advanced work in serigraphy. Offered Intermittently.

Restriction(s): Enrollment is limited to Graduate level students; enrollment is limited to students in the Department of Art and Art History; enrollment limited to students in a Master of Arts or Master of Fine Arts degrees.

Course Material Fees: \$110

APR 7510 Graduate Relief and Experimental Printmaking Cr. 3

Traditional relief methods: woodcut, wood engraving, linocut; also monoprint and monotype, constructed prints, other experimental approaches. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate level students; enrollment is limited to students in the Department of Art and Art History; enrollment limited to students in a Master of Fine Arts degree.

Course Material Fees: \$90

Repeatable for 15 Credits

APR 8840 MFA Studio: Printmaking Cr. 3-9

Extended problems in printmaking; individual research with eighteen to twenty-seven hours of laboratory per week. Offered Fall, Winter.

Restriction(s): Enrollment is limited to Graduate level students; enrollment is limited to students in the Department of Art and Art History; enrollment limited to students in a Master of Fine Arts degree.

Course Material Fees: \$100

Repeatable for 36 Credits

APX - ACADEMIC PATHWAY EXCELLENCE

APX 0500 Foundations in Writing Cr. 3

Preliminary course designed to provide foundational work in writing, in preparation for ENG 1010. Basic writing; emphasis on grammar, vocabulary and paragraph development, and organization. No degree credit. Offered Yearly.

Restriction(s): Enrollment is limited to Undergraduate level students.

APX 0510 Practical Mathematics Cr. 3

Review of concepts involving arithmetic with fractions, decimals, and percent; units conversions; ratio and proportion; exponents and radicals; algebra and linear equations; with word problems emphasized. Some elementary geometry, interpretations of graphs, and probability included. This course prepares students for MAT 0993. Offered Yearly.

Restriction(s): Enrollment is limited to Undergraduate level students.

APX 0600 Learning Community Seminar Cr. 0

Students are involved in group learning, community service initiatives, and social development projects. Offered Every Term.

Restriction(s): Enrollment is limited to Undergraduate level students.

APX 1000 Learning Strategies for College Success Cr. 2

First-year seminar course designed to improve critical thinking, notetaking, and exam preparation strategies for application to college courses. Offered Every Term.

Restriction(s): Enrollment is limited to Undergraduate level students.

APX 1010 Seminar in Reading College Texts Cr. 2

Development and application of critical and analytical thinking skills to college-level texts and the process of developing new ideas. Offered Every Term.

Restriction(s): Enrollment is limited to Undergraduate level students.

ARB - ARABIC

ARB 1010 Elementary Arabic I Cr. 4

Vocabulary, forms, syntax, graded readings. Offered Every Term.

Course Material Fees: \$5

ARB 1020 Elementary Arabic II Cr. 4

Continuation of ARB 1010. Offered Every Term.

Prerequisites: ARB 1010 with a minimum grade of D-

Course Material Fees: \$5

ARB 2010 Intermediate Arabic I Cr. 4

Satisfies General Education Requirement: Foreign Culture, Global Learning Inquiry

Continuation of grammar, readings in classical and modern prose. Offered Every Term.

Prerequisites: ARB 1020 with a minimum grade of D-

Course Material Fees: \$5

ARB 2020 Intermediate Arabic II Cr. 4

Continuation of ARB 2010. Offered Winter.

Prerequisites: ARB 2010 with a minimum grade of D-

Course Material Fees: \$5

ARB 3010 Business Arabic Cr. 3

Introduces learners of Arabic to language functions associated with business and travel. Communication for immediate use; emphasis on educated spoken Arabic. Situational dialogues built around units to address topics related to business such as job interview, airplane ticket purchase, and the like. Offered Winter.

Prerequisites: ARB 2010 with a minimum grade of D-

ARB 3110 Advanced Arabic I Cr. 3

Third year Arabic language course: advanced Arabic grammar, complexities of sentence construction in various styles (literary, political, and scientific texts; written media; business correspondence). Offered Fall, Winter.

Prerequisites: ARB 2020 with a minimum grade of D-

ARB 3120 Advanced Arabic II Cr. 3

Completion of ARB 3110; variations between classical Arabic and modern standard Arabic. Offered Fall, Winter.

Prerequisites: ARB 3110 with a minimum grade of D-

ARB 3210 Spoken Arabic Cr. 3

Introduction to authentic spoken Arabic. Language of everyday life; phonology and script. Communication for immediate use. Offered Fall.

Prerequisites: ARB 1020 with a minimum grade of D-

Repeatable for 9 Credits

ARB 3300 Conversation and Composition Cr. 3

Functional usage of language and communication in context. Critical essays written about topics discussed in class to improve writing skills. Offered Fall, Winter.

Prerequisites: ARB 2010 with a minimum grade of D-

ARB 3990 Directed Study Cr. 3-6

Readings, periodic reports and consultations. Offered Every Term.

Repeatable for 9 Credits

ARB 5010 Medieval Arabic Texts Cr. 3

Reading and translation of Arabic Medieval texts. Literature, language, religion and biography. Offered Yearly.

Prerequisites: ARB 2010 with a minimum grade of D-

ARB 5020 Media Arabic Cr. 3

Language pertinent to media communications: written, visual and audio material. Background in origin and development of journalism in the Arab world. Current major newspapers and magazines used as basic reading materials. Offered Winter.

Prerequisites: ARB 2020 with a minimum grade of D-

ARB 5100 Teaching of Arabic as a Foreign/Second Language (TAFL) Cr. 3

Theoretical and conceptual framework of second language learning.

Proper training in pedagogy as related to learning Arabic as a foreign/second language. Offered Yearly.

Equivalent: LIN 5110, NE 5100

ARB 5130 Classical Arabic Literature in Translation Cr. 3

From pre-Islamic period (Jahiliya) to the downfall of the Umayyad dynasty in Andalusia (1492). Offered Winter.

ARB 5140 Modern Arabic Literature in Arabic and English Cr. 3

Literature and culture of Arab Nahda period (Renaissance beginning in nineteenth century), down to the present. Fiction, drama, biography, poetry. Course is offered in both Arabic and English. Offered Yearly.

ARB 5210 Arabic Sociolinguistics Cr. 3

Arabic dialectology; Arabic as a minority language in contact. Theories and techniques developed outside Arabic, and their applicability to Arabic situations. Offered Fall.

Equivalent: LIN 5210, NE 5210

ARB 5230 Structure of Arabic Cr. 3

Survey of historical constitution and theoretical structure of Arabic.

Offered Yearly.

Equivalent: LIN 5230, NE 5230

ARB 5240 Quranic Arabic Cr. 3

Structures and functions of the language of the Quran. It introduces linguistic, textual, cultural, and aesthetic aspects of this language from the perspective of medieval and modern scholars of Arabic. Offered Fall.

Restriction(s): Enrollment is limited to Graduate or Undergraduate level students.

ARB 5700 Medical Arabic Cr. 3

Students develop a medical Arabic lexicon through conversation, dialogues, role playing, mock medical situations, and writing medical reports. Offered Winter.

Prerequisites: ARB 2010 with a minimum grade of D-

ARB 5990 Directed Study Cr. 1-3

Readings; periodic consultations and reports. Offered Every Term.

Repeatable for 9 Credits

ARB 6700 History of Arabic Cr. 3

History of the evolution of Arabic. Data from phonetics/phonology and morpho-syntax will form the basis of study. Offered Fall.

Equivalent: LIN 6700

ARM - ARMENIAN

ARM 3410 New Soil, Old Roots: The Immigrant Experience Cr. 3

Satisfies General Education Requirement: Civ and Societies (CLAS only), Diversity Equity Incl Inquiry, Foreign Culture, Global Learning Inquiry
Armenian, German, Jewish, Polish, Russian and Ukrainian immigration to the United States, its effects on the cultures (language, literature, religion, politics, music, art and theatre) of these ethnic groups and its influence upon American life. Offered Fall.

Equivalent: GER 3410, POL 3410, RUS 3410, SLA 3410

ASL - ART: SCULPTURE

ASL 2150 Beginning Sculpture Cr. 3

Instruction in traditional techniques and concepts of sculpture including modeling the figure from observation using clay, moldmaking, carving, construction, and casting. Lectures, demonstrations, critiques. Offered Every Term.

Course Material Fees: \$115

ASL 3150 Intermediate Sculpture Cr. 3

Contemporary concerns in sculpture. Idea, scale, site, light, movement, and serial forms. Offered Every Term.

Prerequisites: ASL 2150 with a minimum grade of C- and ADR 1050 with a minimum grade of C- or ACO 1200 with a minimum grade of C- or ACO 1230 with a minimum grade of C- or ACO 1270 with a minimum grade of C-

Course Material Fees: \$90

ASL 3170 Figurative Sculpture I Cr. 3

Instruction in traditional, representational, figurative sculpture. Historical examples, concepts and techniques. Basic anatomy, observation, modeling, gesture, proportion, plane, volume, mass, texture, portraiture; use of calipers, armatures, and moldmaking. Carving, construction, and casting are optional. Offered Fall.

Prerequisites: ASL 2150 with a minimum grade of C- and ADR 1050 with a minimum grade of C- or ACO 1200 with a minimum grade of C- or ACO 1230 with a minimum grade of C- or ACO 1270 with a minimum grade of C-

Course Material Fees: \$90

ASL 3190 Sculpture Foundry I Cr. 3

Creation of sculpture using metal. Bonded-sand and investment casting using bronze and aluminum; chasing and patinas; oxy-acetylene, stick, mig, and tig welding; plasma cutting. Offered Yearly.

Prerequisites: ASL 2150 with a minimum grade of C- and ADR 1050 with a minimum grade of C- or ACO 1200 with a minimum grade of C- or ACO 1230 with a minimum grade of C- or ACO 1270 with a minimum grade of C-

Course Material Fees: \$115

ASL 5150 Advanced Sculpture Cr. 3

Development of personal and professional body of work. Discussions, lectures, assignments. Offered Every Term.

Prerequisites: ASL 3150 with a minimum grade of C-

Course Material Fees: \$90

Repeatable for 9 Credits

ASL 5170 Figurative Sculpture II Cr. 3

Emphasis on advanced and self-directed problems in figurative sculpture. Offered Yearly.

Prerequisites: ASL 3170 with a minimum grade of C-

Course Material Fees: \$90

Repeatable for 9 Credits

ASL 5180 Sculpture: Advanced Technology Cr. 3-6

One major project, which explores the application of non-traditional materials and technologies: research, industrial liaisons, equipment. Offered Intermittently.

Prerequisite: ASL 5170 with a minimum grade of C-

Restriction(s): Enrollment is limited to students in the Department of Art and Art History; enrollment limited to students in a Bachelor of Arts, Bachelor of Fine Arts, Master of Arts or Master of Fine Arts degrees.

Course Material Fees: \$200

Repeatable for 12 Credits

ASL 5190 Sculpture Foundry II Cr. 3

Development of ideas and skills using either casting or fabrication or both. Offered Yearly.

Prerequisites: ASL 3190 with a minimum grade of C-

Course Material Fees: \$115

Repeatable for 9 Credits

ASL 5810 Special Topics in Sculpture Cr. 3

Topics to be announced in Schedule of Classes. Offered Intermittently.

Prerequisites: ADR 1050 with a minimum grade of C- or ACO 1200 with a minimum grade of C- or ACO 1230 with a minimum grade of C- or ACO 1270 with a minimum grade of C-

Course Material Fees: \$90

Repeatable for 9 Credits

ASL 5820 Directed Projects Cr. 3-6

Independent projects done in consultation with instructor. Offered Fall, Winter.

Course Material Fees: \$90

Repeatable for 9 Credits

ASL 7150 Graduate Sculpture Cr. 3

Graduate-level problems. Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students; enrollment is limited to students in the Department of Art and Art History; enrollment limited to students in a Master of Arts or Master of Fine Arts degrees.

Course Material Fees: \$90

Repeatable for 9 Credits

ASL 8820 MFA Studio: Sculpture Cr. 3-9

Extended problems in sculpture; individual research with eighteen to twenty-seven hours of laboratory per week. Offered Fall, Winter.

Restriction(s): Enrollment is limited to Graduate level students; enrollment is limited to students in the Department of Art and Art History; enrollment limited to students in a Master of Fine Arts degree.

Course Material Fees: \$90

Repeatable for 36 Credits

ASN - ASIAN STUDIES

ASN 1700 East Asia to the 1700s Cr. 3

Satisfies General Education Requirement: Social Inquiry

From antiquity to the 1700s; emphasis on political, economic, social, and cultural developments in China, Japan, and Korea, and the nature and impact of their interactions. Offered Intermittently.

Equivalent: HIS 1700

ASN 1710 History of Modern East Asia Cr. 3

Satisfies General Education Requirement: Global Learning Inquiry, Historical Studies, Social Inquiry

From beginning of nineteenth century to the present; emphasis on political, social and economic developments in China, Japan and Korea. Offered Yearly.

Equivalent: HIS 1710

ASN 2800 Culture Studies in Japan (Homestay and Study Abroad Tour) Cr. 3

Satisfies General Education Requirement: Cultural Inquiry

Survey of Japanese culture taught in English. Introduction of family and group organization, customs, pop culture (fashion/music/films), aspects of daily lives (thought/religion/arts/society), and a brief modern history. Also, survival language practice. Offered Spring/Summer.

Prerequisites: JPN 1010 with a minimum grade of D-

Equivalent: JPN 2800

ASN 3770 Politics of East Asia Cr. 4

Survey of five major polities in East Asia: China, Taiwan, Japan, South Korea, and (more briefly) North Korea. Why some of them have undergone democratization and others have not; how political factors have affected their recent economic performance; what explains conflicts and cooperation among them, and what security implications they hold for the United States. Offered Every Other Year.

Restriction(s): Enrollment is limited to Undergraduate level students.

Equivalent: PS 3770

ASN 3870 History of Japanese Pop Culture Cr. 3

Explores the history of Japanese pop culture and its global spread, with both an emphasis on historical influences, intended messages, and appeal in Japan and around the world, and examination of manga, anime, video games, sports, fashion, literature, music, film, and food. Offered Every Other Year.

ASN 3995 Special Topics in East Asian Studies Cr. 3

Special topics in Asian Studies language, literature, or culture. Offered Yearly.

Repeatable for 6 Credits

ASN 5825 Readings in the History of Modern China Cr. 4

From early 1600s to the present; political, economic, and social changes. Offered Every Other Year.

Equivalent: HIS 5825

ASN 5855 Pre-Modern Japan Cr. 4

Japanese history from its mythical origins to early nineteenth century; political, economic, social, cultural developments. Offered Every Other Year.

Equivalent: HIS 5855

ASN 5865 Modern Japan Cr. 4

Japanese history from the early nineteenth century to the present; emphasis on political, economic, and social developments. Offered Yearly.

Equivalent: HIS 5865

ASN 5875 Gender in Modern East Asia Cr. 4

History of gender in China, Japan, and Korea, with topics to include Confucianism, the state's role in gender construction, nationalism, imperialism, marriage, family, labor, sexuality, and feminism. Offered Every Other Year.

Equivalent: GSW 5875, HIS 5875

ASN 5993 Writing Intensive Course in Asian Studies Cr. 0

Satisfies General Education Requirement: Writing Intensive Competency Disciplined writing assignments under the direction of a faculty member. Must be selected in conjunction with a designated corequisite. Satisfies the University General Education Writing Intensive Course in the Major requirement. Required for all majors. Offered Every Term.

Restriction(s): Enrollment is limited to Undergraduate level students.

AST - ASTRONOMY

AST 2010 Descriptive Astronomy Cr. 4

Satisfies General Education Requirement: Natural Scientific Inquiry, Physical Sciences

Lecture course that introduces the concepts and methods of modern astronomy, the solar system, stars, galaxies, and cosmology; recent discoveries about planets, moons, the sun, pulsars, quasars, and black holes. Meets General Education Laboratory requirement only when taken with Coreq: AST 2011. Offered Every Term.

AST 2011 Descriptive Astronomy Laboratory Cr. 1

Laboratory exercises and observations; includes two late evening viewing sessions. Satisfies General Education Laboratory requirement when taken concurrently with AST 2010. Offered Every Term.

Prerequisite: (AST 2010 (may be taken concurrently) with a minimum grade of C or AST 5010 (may be taken concurrently) with a minimum grade of C) or PHY 5010 (may be taken concurrently) with a minimum grade of C

Course Material Fees: \$25

AST 4100 Astronomical Techniques Cr. 3

Techniques of modern astrophysics. Detectors used in astronomy for optical and infrared photons, radio and microwaves, X- and gamma rays, and neutrinos. Techniques in imaging, photometry, spectroscopy, astrometry, polarimetry, and for analyzing public data available on the web. Offered Fall.

Prerequisites: PHY 2180 with a minimum grade of C- and PHY 2181 with a minimum grade of C-

Restriction(s): Enrollment is limited to Undergraduate level students.

AST 4200 Astronomical Laboratory Cr. 2

Satisfies General Education Requirement: Writing Intensive Competency
Introduction to laboratory techniques of modern astrophysics. Optical astronomy, including measurement of the quantum efficiency of a CCD-based astronomical digital camera; measurement of the throughput as a function of wavelength of a set of standard astronomical filters; measurement of the HR diagram of a star cluster using the calibrated camera and filters. Offered Fall.

Prerequisites: AST 4100 with a minimum grade of D-

Course Material Fees: \$25

AST 4300 Planetary Astronomy and Space Science Cr. 3

Formation and evolution of the solar system: planetary surfaces, interiors, atmospheres, and magnetospheres; asteroids, comets, planetary satellites, and ring systems. Emphasis on using basic physics to understand observed properties of the solar system. Offered Winter.

Prerequisites: PHY 2180 with a minimum grade of C- and PHY 2181 with a minimum grade of C-

AST 5010 Astrophysics and Stellar Astronomy Cr. 3

Electromagnetic radiation and matter; solar characteristics; stellar distances; magnitudes; spectral classification; celestial mechanics; binary stars; stellar motions, structure and evolution; compact and variable stars; Milky Way Galaxy and interstellar medium; galaxies and clusters of galaxies; quasars; Hubble's Law; cosmology. Offered Every Other Winter.

Prerequisites: PHY 2140 with a minimum grade of C- or PHY 2180 with a minimum grade of C- and MAT 2010-6XXX with a minimum grade of C-

Equivalent: PHY 5010

AST 5100 Galaxies and the Universe Cr. 3

Exploration of the world of galaxies, starting with the Milky Way and moving outward to larger scales. Basic properties of galaxies: galaxy classification, structure, evolution, observations of Active Galactic Nuclei (AGN), Quasar, and Seyfert galaxies. Discovery of dark matter and black holes. Cosmology: origins of the universe in a hot big bang; its expansion history including recent evidence that the cosmic expansion is accelerating; the cosmic microwave background, and the ultimate fate of the universe. Capstone course for astronomy majors. Offered Winter.

Prerequisites: PHY 3300 with a minimum grade of C-

ATR - ATHLETIC TRAINING

ATR 5110 Pathophysiology of Sports Injuries Cr. 3

Explores musculoskeletal sports injury from a pathophysiological and pathomechanical perspective. The effects of acute trauma and repetitive stress on the musculoskeletal system are examined. Additionally, the pathophysiology of sports related concussion is explored. Cumulative emphasis is placed on the evaluation process contributing to the foundational level of differential diagnosis. Offered Spring/Summer.

Restriction(s): Enrollment is limited to students with a major in Athletic Training.

ATR 5115 Acute Care of Athletic Injuries Cr. 3

Students will develop an understanding of fundamental clinical practice concepts utilized by athletic trainers in the prevention, recognition, treatment and disposition of acute athletics-related illnesses and injuries. Emphasis is placed on the implementation of the emergency action plan and on-field/on-site assessment. Students will cultivate practical skills necessary for emergent care while developing the foundational level of differential diagnosis for acute injury/and illness. Offered Spring/Summer.

Restriction(s): Enrollment is limited to students with a major in Athletic Training.

Course Material Fees: \$30

ATR 5125 Orthopedic Assessment Cr. 3

Addresses assessment of musculoskeletal and orthopedic related impairments and injury. Focuses on the evaluation process and diagnostic procedures associated with clinical reasoning and the development of differential diagnosis for clinical application. Offered Fall.

Prerequisite: ATR 5110 with a minimum grade of C and ATR 5115 with a minimum grade of C

ATR 5130 Therapeutic Interventions I Cr. 3

A lecture and lab experience, focused on the principles and procedures for the selection and application of physical agents and mechanical techniques, essential for the management of musculoskeletal injury and/or dysfunction. Evidence-based practice (EBP) will be integrated throughout the course to enhance the development of treatment plans and clinical application. Offered Fall.

ATR 5135 Evidence-Based Practice in Athletic Training Cr. 3

Introduces the concepts of evidence-based medicine and provides the student with information on how evidence-based medicine can affect the clinical practice of athletic training and enhance the care given to patients. Offered Fall.

Restriction(s): Enrollment is limited to students with a major in Athletic Training.

ATR 5140 Clinical Gross Anatomy Cr. 3

Comprehensive review of human anatomy as it pertains to athletic training clinical practice. Students will develop an understanding of human anatomy and its relationship to etiology, evaluation, diagnosis, treatment, and rehabilitation of various medical conditions. Course content will emphasize, but is not limited to, the muscular, skeletal, nervous, and vascular systems. Prosected human cadavers, plastinated specimens, anatomical models, and computerized software/imaging will be used as instructional methods. Offered Winter.

Course Material Fees: \$220

ATR 5145 Therapeutic Interventions II Cr. 3

Provides conceptual and practical application of therapeutic interventions addressing musculoskeletal and orthopedic related conditions. Students will determine therapeutic intervention care plans consistent with patient-centered functional outcomes. Specific emphasis will be placed on therapeutic and corrective exercise. Offered Winter.

ATR 5149 Pre-Season Integrative Experience I Cr. 1

Provides a supervised clinical experience emphasizing acute injury management, pathology, and prevention, designed to satisfy clinical education requirements for the professional athletic trainer. As a part of this experience, students will be assigned to a preceptor at an approved clinical site, which may include intercollegiate, interscholastic, recreational, or professional sports organizations and/or healthcare facilities. Offered Spring/Summer.

Restriction(s): Enrollment is limited to students with a major in Athletic Training.

Course Material Fees: \$50

ATR 5150 Integrative Experience in Athletic Training I Cr. 4

Provides a clinical experience designed to satisfy the clinical education requirements for a professional level AT curricular program. As a part of this experience, students will be supervised by a preceptor at an approved clinical site. Specific emphasis will be placed on taping and bracing techniques, acute care of athletic injuries and the injury evaluation process. Clinical skill integration and competency completion appropriate for current level of didactic coursework and clinical integration will be assessed. Offered Fall.

Prerequisite: ATR 5149 with a minimum grade of C

Course Material Fees: \$50

ATR 5151 Integrative Experience in Athletic Training II Cr. 4

Provides a clinical experience designed to satisfy the clinical education requirements for a professional level AT curricular program. As a part of this experience, students will be supervised by a preceptor at an approved clinical site. Specific emphasis will be placed on orthopedic evaluation, the clinical diagnosis process and the clinical application of therapeutic modalities. Clinical skill integration and competency completion will be assessed. Offered Winter.

Course Material Fees: \$50

ATR 5159 Pre-Season Integrative Experience II Cr. 1

Students will engage in a second-year clinical experience, participating in a pre-season training camp. The experience will be designed to increase clinical competence concurrent with didactic material. This course provides a clinical field experience emphasizing progressive athletic training skills and procedures. As part of this experience, students will be assigned to a preceptor at an appropriate clinical site. Students will be assigned to intercollegiate, interscholastic, or professional sports organizations, rehabilitation facilities, or other health care facilities. Offered Spring/Summer.

Restriction(s): Enrollment is limited to students with a major in Athletic Training.

Course Material Fees: \$50

ATR 5215 Medical and Pharmacologic Interventions Cr. 3

Presents the practical components of clinical medicine to include pathology and pharmacology management of acute and chronic illnesses and injuries seen in the physically active. Offered Spring/Summer.

Prerequisite: ATR 5130 with a minimum grade of C and ATR 5145 with a minimum grade of C

ATR 5225 Organization and Administration in Athletic Training Cr. 3

Students will be acquainted with the proper organization and management techniques utilized by certified athletic trainers in health care administration of athletic training programs. Offered Fall.

Prerequisite: ATR 5140 with a minimum grade of C and ATR 5145 with a minimum grade of C and ATR 5215 with a minimum grade of C

ATR 5230 Transition to Practice Cr. 3

Students will engage in cumulative curricular clinical based scenarios encompassing all the domains of practice to prepare for the BOC exam. Exam preparedness will be evaluated and concurrent study strategies will be explored. Students will gain an understanding of the history and rationale for a variety of contemporary approaches, treatments and therapies in athletic training, while developing critical thinking skills for application, consistent with evidence based practice. Final mastery of professional competencies will be completed, demonstrating clinical skill readiness for transition to practice. Offered Winter.

Prerequisite: ATR 5151 with a minimum grade of C

Corequisite: ATR 5252

ATR 5250 Interprofessional Practice Experience Cr. 2

Exposes students to the clinical practices of multiple medical and allied health professions in addition to the certified athletic trainer. A directed clinical/field experience under the supervision of a preceptor designed to satisfy the clinical education requirements for the entry-level athletic trainer. Also, will assess specific clinical proficiencies required for the practice of athletic training. Offered Spring/Summer.

Prerequisite: ATR 5151 with a minimum grade of C

Corequisite: ATR 5215

ATR 5251 Integrative Experience in Athletic Training III Cr. 4

Provides a field experience emphasizing therapeutic exercise prescription and techniques, general medical conditions, and pharmacologic interventions. A directed clinical/field experience designed to satisfy the clinical education requirements for the entry-level athletic trainer. As part of this experience, students will be assigned to a preceptor at an appropriate clinical site. Students will be assigned intercollegiate, interscholastic, or professional sports organizations, rehabilitation facilities, or other health care facilities. Course also will assess specific clinical proficiencies required for the practice of athletic training. Offered Fall.

Prerequisite: ATR 5140 with a minimum grade of C and ATR 5145 with a minimum grade of C and ATR 5215 with a minimum grade of C

Course Material Fees: \$50

ATR 5252 Clinical Immersion in Athletic Training Cr. 6

Provides a field experience emphasizing administrative and professional aspects of athletic training. A directed clinical/field experience designed to satisfy the clinical education requirements for the entry-level athletic trainer. As part of this experience, students will be assigned to a preceptor at an appropriate clinical site. Students will be assigned intercollegiate, interscholastic, or professional sports organizations, rehabilitation facilities, or other health care facilities. Course also will assess specific clinical proficiencies required for the practice of athletic training. Offered Winter.

Course Material Fees: \$50

AUD - AUDIOLOGY

AUD 5400 Introduction to Audiology Cr. 3

Introduction to physics of sound, anatomy of the hearing mechanism, audiometry, hearing aids, habilitation and rehabilitation of the hearing handicapped. Offered Fall, Winter.

AUD 5420 Introduction to Aural Rehabilitation Cr. 3

Principles and practices of aural rehabilitation including hearing aids. Offered Winter, Spring/Summer.

Prerequisites: AUD 5400 with a minimum grade of D-

AUD 6000 Electrophysiological Procedures Cr. 4

Two distinct electrophysiological procedures, auditory evoked potentials and otoacoustic emissions, are presented. Both procedures consist of several sub-tests used to assess the auditory system from the middle ear to the cortex, in normal and disordered ears. Offered for graduate credit only. Offered Spring/Summer.

Prerequisite: AUD 5400 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

AUD 6030 Instrumentation in Audiology Cr. 3

Operation, hook-up, scientific notation, systems of measurement, calibration and repair of instruments and software used in clinical audiology. Offered for graduate credit only. Offered Winter.

Restriction(s): Enrollment is limited to Graduate level students.

AUD 6040 Auditory and Vestibular Pathologies Cr. 4

Disorders of the auditory and vestibular systems. Etiology, pathological characteristics, medical and non-medical therapies. Offered for graduate credit only. Offered Winter.

Restriction(s): Enrollment is limited to Graduate level students.

AUD 6310 Audiology Clinical Practicum Series Cr. 3

Progression of knowledge and skill level, from introductory basic clinical skills through advanced clinical protocols for difficult to manage patients. Offered for graduate credit only. Offered Every Term.

Prerequisite: AUD 6410 with a minimum grade of C and AUD 6411 with a minimum grade of C and AUD 6412 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

Course Material Fees: \$10

Repeatable for 9 Credits

AUD 6400 Anatomy, Physiology, and Psychophysiology of Audition Cr. 4

Structure and function of the human auditory system. Psychophysical theories of hearing. Offered for graduate credit only. Offered Fall.

Restriction(s): Enrollment is limited to Graduate level students; enrollment is limited to students with a major in Audiology or Speech-Language Pathology; enrollment limited to students in a Doctor of Philosophy, Master of Arts or Master of Science degrees.

AUD 6410 Basic Audiologic Evaluation Cr. 3

Principles and application of pure-tone and speech audiometry, clinical masking, and impedance/immittance testing. Offered for graduate credit only. Offered Fall.

Restriction(s): Enrollment is limited to Graduate level students.

AUD 6411 Audiology Clinical Laboratory I Cr. 2

Development of basic competencies related to clinical procedures and methods for evaluation and treatment of clients; maintenance and use of technology in the university audiology clinic. Student will observe and begin to perform evaluations under faculty supervision. Offered for graduate credit only. Offered Fall.

Prerequisite: AUD 6410 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

Course Material Fees: \$135

AUD 6412 Audiology Clinical Laboratory II Cr. 2

Continuation of basic competency development related to clinical procedures and methods for evaluation and treatment of clients, maintenance and use of technology in an audiology clinical practice. Students perform evaluations under faculty supervision. Offered for graduate credit only. Offered Winter.

Prerequisite: AUD 6040 with a minimum grade of C and AUD 6411 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

Course Material Fees: \$135

AUD 6413 Audiology Clinical Laboratory III Cr. 2

Continuation of competency development related to clinical procedures and methods for evaluation and treatment of clients, including advanced testing procedures. Course includes a rotating placement at a local health system. Offered for graduate credit only. Offered Spring/Summer.

Prerequisites: AUD 6411 with a minimum grade of B- and AUD 6412 with a minimum grade of B-

Restriction(s): Enrollment is limited to Graduate level students; enrollment is limited to students with a major in Audiology; enrollment limited to students in the Doctor of Audiology or Doctor of Audiology programs.

Course Material Fees: \$135

AUD 6430 Principles of Amplification I Cr. 3

Electroacoustic and clinical aspects of acoustic amplifiers and developmental history of hearing aids. Offered for graduate credit only. Offered Winter.

Prerequisite: AUD 6410 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

AUD 6530 Principles of Amplification II Cr. 3

Fundamentals of digital technology, compression, channeling and programming, and applications to various hearing impairment parameters. Offered for graduate credit only. Offered Fall.

Prerequisite: AUD 6430 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

AUD 7300 Clinical Internship Cr. 3

Supervised observation, training and practice in audiological procedures. Placements in local audiology settings as assigned by clinical rotation coordinator. Offered Every Term.

Prerequisite: AUD 5400 with a minimum grade of C and AUD 6410 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

Repeatable for 12 Credits

AUD 7320 Issues, Ethics and Scope of Practice in Audiology Cr. 2

Code of Ethics and Scope of Practice as published by the professional organizations for audiology. Issues and case studies in ethical practice, malpractice, legal responsibilities, best practice, and counseling. Offered Spring/Summer.

Prerequisite: AUD 6000 with a minimum grade of C and AUD 6430 with a minimum grade of C and AUD 8430 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

Repeatable for 8 Credits

AUD 7350 Contemporary Issues in Audiology Cr. 1-4

Integrated seminar; topics announced in Schedule of Classes. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate level students.

Repeatable for 16 Credits

AUD 7420 Hearing Loss Prevention Programs Cr. 3

Assessment of damage risk criteria for noise-induced hearing loss. Implementation and management of hearing loss prevention programs in industry, schools, and community settings. Offered Winter.

Restriction(s): Enrollment is limited to Graduate level students.

AUD 7430 Pediatric Audiology Cr. 3

Introduction to embryology, tests, test procedures, and counseling of parents with hearing-handicapped children. Offered Spring/Summer.

Prerequisite: AUD 6410 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

AUD 7500 Aural Rehabilitation Cr. 3

Treatment procedures, measurement and electrophysiological instrumentation, ethical dilemmas. Offered Spring/Summer.

Prerequisite: AUD 5420 with a minimum grade of C and AUD 6430 with a minimum grade of C and AUD 6530 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

AUD 7520 Counseling in Audiology Cr. 1

Basic counseling principles and techniques applied to patients and their family members during evaluation and treatment of auditory and balance disorders. Offered Spring/Summer.

Prerequisite: AUD 6410 with a minimum grade of C and AUD 6411 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students; enrollment is limited to students in the Department of Communication Sci & Disorders.

AUD 7540 Genetic Auditory Disorders Cr. 3

Medical genetics and its application to hearing loss and craniofacial disorders; genetic etiology, diagnosis, therapeutic implications. Ethical, legal and social issues: cloning, gene therapy, and prevention. Offered Winter.

Restriction(s): Enrollment is limited to Graduate level students; enrollment is limited to students with a major, minor, or concentration in Audiology, Communication Sci & Disorders, Comm Sci & Disorders Honors or Speech-Language Pathology.

AUD 7550 Intra-operative Neurophysiologic Monitoring Cr. 2

Presentation of the techniques used to monitor neurological centers during head/neck surgery. Operating room observations required. Offered Spring/Summer.

Prerequisite: AUD 6000 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students; enrollment is limited to students with a major, minor, or concentration in Audiology, Communication Disorders&Sci or Commun Disorders&Sci Hon.

AUD 7990 Directed Study Cr. 1-3

Literature review of an approved topic in audiology under supervision of the graduate faculty. Course may include an experimental investigation. Comprehensive written report is required. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate level students.

Repeatable for 6 Credits

AUD 8300 Audiology Fellowship Cr. 8

Advanced supervised clinical practice in an off-campus setting over the final three semesters of professional study. Offered Every Term.

Prerequisite: AUD 7300

Restriction(s): Enrollment is limited to Graduate level students.

Repeatable for 24 Credits

AUD 8350 Research Seminar Cr. 3

Topics announced in Schedule of Classes. Emphasis on clinical research methods. Offered Yearly.

Prerequisite: SLP 7000 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

Repeatable for 15 Credits

AUD 8430 Equilibrium/Vestibular System Evaluation Cr. 4

Anatomy, physiology and functional assessment of the vestibular system including instrumentation, procedures, and interpretation of ENG, dynamic posturography, and rotational velocity testing recordings. Hands-on laboratory exercises included. Offered Fall.

Restriction(s): Enrollment is limited to Graduate level students.

AUD 8440 Medical Issues: Tinnitus, Central Auditory Processing and Auditory Neuropathy Cr. 3

Role of the audiologist in the medical setting; advanced clinical skills and knowledge; health care issues and professional interaction in the medical setting. Offered Fall.

Restriction(s): Enrollment is limited to Graduate level students.

AUD 8450 Advanced Auditory/Vestibular Electrodiagnosis for Balance Assessment and Treatment Cr. 4

Advanced evaluation of dizzy/balance patients; traditional test battery use with complex balance patients; recently developed electrophysiological techniques and computerized assessments; expansion of clinical and technical skills; walking and gait analysis. Offered Winter.

Restriction(s): Enrollment is limited to Graduate level students.

AUD 8460 Advanced Sensory Aids Cr. 3

New developments in assisted listening devices and cochlear implant protocols. Offered Winter.

Prerequisite: AUD 6530 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

BA - BUSINESS ADMINISTRATION

BA 1000 Student Success and Career Development for Business Students Cr. 1

Designed to assist all incoming Mike Ilitch School of Business students in a successful transition to Wayne State University through interactive exercises and engaging assignments, student will develop the insights, skills and attitudes necessary for becoming a successful student. Offered Fall, Winter.

Restriction(s): Enrollment limited to students in the School of Business.

BA 1010 Critical Thinking for Consumer Decisions Cr. 3

Satisfies General Education Requirement: Critical Thinking Competency Development of critical thinking skills and the application of these skills in evaluation and decisions for a broad range of consumer issues including advertising interpretations, purchase decisions, job applications, and consumer protection. Offered Every Term.

Restriction(s): Enrollment is limited to Undergraduate level students; enrollment limited to students in the Fine, Performing & Comm. Arts or School of Business.

BA 1040 Managing Diversity in the Workplace Cr. 3

Satisfies General Education Requirement: Diversity Equity Incl Inquiry This course prepares students to become effective coworkers and managers in today's diverse workplace. Traditional management theories are analyzed within a multicultural framework and students will be exposed to current diversity management practices in the field. Practical and experiential activities designed to help students understand the concepts are provided. Offered Yearly.

BA 1100 Warrior Success Cr. 1

Satisfies General Education Requirement: Wayne Experience Designed to assist newly admitted students in becoming socialized and acclimated to Wayne State University. Offered Fall, Winter.

Restriction(s): Enrollment limited to students with a class of Freshman.

BA 1200 Personal Finance Planning Cr. 3

Satisfies General Education Requirement: Quantitative Experience Comp Introductory course designed to help students become financially literate and make proper financial decisions encountered in everyday life. Topics covered will include income, money management, spending and credit, as well as saving and investing. No credit after former FIN 3050. Offered Fall, Winter.

BA 1500 Business Tools and Applications Cr. 3

Integrated business computer concepts and business applications and tools to solve business problems. Offered Every Term.

Corequisite: BA 2300

Restriction(s): Enrollment limited to students in the School of Business.

BA 2020 Introduction to Business Cr. 2

Introduction to each of the functional areas of business including marketing, accounting, finance operations and human resources management. Other topics considered include: the economic and legal environment of business, the globalization of markets, workforce diversity, leadership and entrepreneurship. Offered Every Term.

BA 2300 Quantitative Methods I: Probability and Statistical Inference Cr. 3

Satisfies General Education Requirement: Quantitative Experience Comp Measures of central tendency and dispersion. Introduction to probability; normal, binomial, uniform, and Poisson distributions. Statistical inference and sampling methods. Computer techniques. Offered Every Term.

Corequisite: BA 1500

Restriction(s): Enrollment limited to students in the School of Business.

BA 3400 Quantitative Methods II: Statistical Methods Cr. 3

Uses of statistical techniques in business. Topics include: sampling, hypothesis testing, confidence interval estimation, regression, analysis of variance and chi-square tests. Application to accounting, market research, finance, production and forecasting. Computer techniques. Offered Every Term.

Prerequisites: BA 2300 with a minimum grade of C

Restriction(s): Enrollment is limited to Undergraduate level students; enrollment limited to students in the School of Business.

BA 6000 Introduction to Accounting and Financial Reporting Cr. 2

Introduction to accounting principles and the understanding and analysis of financial statements. Offered for graduate credit only. Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students in the School of Business.

BA 6005 Basics of Financial Management Cr. 2

Basic aspects of finance: time value of money, financial markets, risk and return, valuation and basic capital budgeting. Required of all graduate students; may be waived only through waiver exam. Offered for graduate credit only Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students in the School of Business.

BA 6010 Basics of Business Economics Cr. 2

Survey course; fundamental principles that guide decision making in market-based economic systems. Offered for graduate credit only. Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students in the School of Business.

BA 6015 Marketing Foundations Cr. 2

Fundamental principles that guide decision making in market-based management systems. Offered for graduate credit only. Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students in the School of Business.

BA 6020 Contemporary Principles of Management Cr. 2

Basic principles of organization theory and behavior in contemporary organizational settings. Offered for graduate credit only. Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students in the School of Business.

BA 6025 Basics of Production/Operations Management Cr. 2

Overview of operations management from a strategic perspective. Emphasis on problems and their solutions. Offered for graduate credit only. Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students in the School of Business.

BA 6030 Budgeting, Operations and Grants Cr. 2

Introduction to accounting and financial reporting and understanding of budgeting, capital planning and grants management. Offered Intermittently.

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students in the School of Business.

BA 6090 Quantitative Analysis: Theory and Application Cr. 2

Statistics of association and statistical inference from samples. Correlation, analysis of variance, multivariate regression, non-parametric statistics. Offered for graduate credit only. Offered Every Term.

Prerequisites: MAT 1500-6XXX with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students in the School of Business.

BA 7000 Managerial Accounting Cr. 3

Fundamental principles; preparation and utilization of financial information for internal management purposes. No credit after ACC 6020. No credit for undergraduate accounting majors. Offered Every Term.

Prerequisites: BA 6000 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students in the School of Business.

BA 7020 Corporate Financial Management Cr. 3

Development of tools to evaluate investment and financial decisions in modern global organizations. Offered Every Term.

Prerequisites: BA 6005 with a minimum grade of C and BA 6010 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students in the School of Business.

BA 7040 Managing Organizational Behavior Cr. 3

Contemporary issues in managing and leading people and organizations. Topics include: creativity, culture change, leadership, teamwork, cross-cultural factors, performance management, and organizational change. No credit for undergraduate management majors. Offered Every Term.

Prerequisites: BA 6020 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students in the School of Business.

BA 7050 Marketing Strategy Cr. 3

Application of theory, concepts, and models to contemporary marketing issues and problems. Developing and evaluating successful marketing strategies through analysis of customers, competitors, the organization, and the external environment. No credit for undergraduate marketing majors. Offered Every Term.

Prerequisites: BA 6015 with a minimum grade of C and BA 6025 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students in the School of Business.

BA 7070 Social Perspectives on the Business Enterprise Cr. 3

Political, social, legal, ethical, regulatory, environmental, and global issues that interrelate with business decisions in the societal fabric. Offered Every Term.

Prerequisites: BA 6090 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students in the School of Business.

BA 7080 Strategic Management Cr. 3

Application of theory and concepts regarding strategic formulation and implementation from the perspective of senior management, to integrate the functional areas and provide a unified direction for the firm when it is operating in complex local and/or global environments. Offered Every Term.

Prerequisites: BA 7000 with a minimum grade of C and BA 7020 with a minimum grade of C and BA 7040 with a minimum grade of C and BA 7050 with a minimum grade of C and BA 7070 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students in the School of Business.

BA 7500 Topics in Business Administration Cr. 3

Selected topics in business administration. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students in the School of Business.

BA 7995 Directed Study Cr. 1-3

Advanced independent readings and research under supervision of a graduate faculty member, in areas of special interest to student and faculty member. Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students.

BA 8050 Seminar in Marketing Theory Cr. 3

Reading seminar; approaches to marketing and consumer behavior theory from historical and philosophy of science perspectives. Contributions from disciplines such as international business, economics, psychology, sociology, anthropology, operations research, and psychometrics. Publishable paper expected of students. Offered Every Other Year.

Prerequisites: BA 7050 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students in the PhD in Business Administration program.

BA 8054 Seminar in Marketing Strategy Cr. 3

Seminar focuses on strategic marketing issues, including marketing strategy theory; innovation theory; corporate, business, and marketing strategy; new product development strategy; industry structure, competition, and competitive advantage; market orientation; alliances and inter-organizational relationships; knowledge management and organizational learning; customer relationship management; and marketing organization. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate level students.

BA 8058 Advanced Topics in Consumer Behavior Cr. 3

Role of consumer in global economy; integrated marketing issues (IMC), movement toward relationship marketing (RM) across the value added chain to the development of consumer analysis. Conditions, issues, and practices; dimensions of strategic advertising. Offered Yearly.

Prerequisites: BA 8050 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students in the PhD in Business Administration program.

BA 8120 Theory of Finance Cr. 3

Modern corporate finance theory for finance doctoral students. Offered Yearly.

Prerequisites: FIN 7220 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

BA 8121 Seminar in Corporate Finance Cr. 3

Theoretical and empirical studies in corporate finance for finance doctoral students. Offered Yearly.

Prerequisites: BA 8120 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students in the PhD in Business Administration program.

BA 8122 Empirical Methods in Finance Cr. 3

Fundamental asset pricing theories and empirical methods used in modern financial economics for finance doctoral students. Offered Yearly.

Prerequisites: BA 8120 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students in the PhD in Business Administration program.

BA 8123 Seminar in Corporate Governance Cr. 3

Theories and empirical studies in corporate finance for finance doctoral students. Offered Yearly.

Prerequisites: BA 8120 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students in the School of Business.

BA 8129 Development of an Effective Research Program in Finance Cr. 3
The primary purpose of this doctoral research seminar is to facilitate the development of doctoral students' research ideas. One of these ideas should be developed into a full paper with the aim of submitting it to a peer-reviewed journal. Other aims of this seminar include: socializing students to the practices of the academy in the U.S., familiarizing students with major streams of research, preparing students for the dissertation process, and helping students to develop presentation skills. Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students.

BA 8220 Seminar in Organizational Behavior Cr. 3

Areas such as motivation, reward systems, leadership, organizational culture and performance, job design, groups and teams, and decision making. Concepts, theories and fundamentals of organizational behavior (OB); areas of current research, application in global business environment. Offered Yearly.

Prerequisites: BA 7040 with a minimum grade of C or MGT 7640 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students in the PhD in Business Administration program.

BA 8221 Seminar in Strategic Management Cr. 3

Theories and concepts in the strategic management literature including contemporary concepts that apply to the international context. Offered Yearly.

Prerequisites: BA 8220 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students in the PhD in Business Administration program.

BA 8420 Seminar in Organizational Theory Cr. 3

Theories of organization for doctoral students. Offered Yearly.

Prerequisites: BA 8220 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students in the PhD in Business Administration program.

BA 8777 Professional Development Seminar for Business Doctoral Students Cr. 1-3

Exposure to professional development areas in preparation for productive academic careers; teaching, research writing, and academic culture. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate level students.

Repeatable for 3 Credits

BA 8900 Development of Effective Research Programs in Business Cr. 3

For doctoral students with a major cognate in finance, management, or marketing. Development, design and execution of effective research projects. Offered Yearly.

Prerequisites: BA 8058 with a minimum grade of C and BA 8122 with a minimum grade of C and BA 8420 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students in the PhD in Business Administration program.

BA 8995 Special Research Topics in Business Cr. 1-3

Advanced research topics for business administration Ph.D. students. Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students in the PhD in Business Administration program.

Repeatable for 3 Credits

BA 9990 Pre-Doctoral Candidacy Research Cr. 1-8

Research in preparation for doctoral dissertation. Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students in the PhD in Business Administration program.

Repeatable for 12 Credits

BA 9991 Doctoral Candidate Status I: Dissertation Research and Direction Cr. 7.5

Dissertation research. Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students with a class of Doctoral Candidate; enrollment limited to students in the PhD in Business Administration program.

BA 9992 Dissertation II Cr. 7.5

Dissertation research. Offered Every Term.

Prerequisite: BA 9991 with a minimum grade of S

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students with a class of Doctoral Candidate; enrollment limited to students in the PhD in Business Administration program.

BA 9993 Dissertation III Cr. 7.5

Dissertation research. Offered Every Term.

Prerequisite: BA 9992 with a minimum grade of S

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students with a class of Doctoral Candidate; enrollment limited to students in the PhD in Business Administration program.

BA 9994 Doctoral Candidate Status IV: Dissertation Research and Direction Cr. 7.5

Dissertation research. Offered Every Term.

Prerequisite: BA 9993 with a minimum grade of S

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students with a class of Doctoral Candidate; enrollment limited to students in the PhD in Business Administration program.

BA 9995 Candidate Maintenance Status: Doctoral Dissertation Research and Direction Cr. 0

Offered Every Term.

Prerequisite: BA 9994 with a minimum grade of B

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students with a class of Doctoral Candidate; enrollment limited to students in the PhD in Business Administration program.

Course Material Fees: \$370.26

BBE - BILINGUAL/BICULTURAL EDUCATION

BBE 5000 Multicultural Education in Urban America Cr. 2

Cultural, social, political and economic realities of our complex, pluralistic society in relation to our education system. Development of analytical and evaluative abilities of teachers to deal with racism, sexism, value clarification and the parity of power. Strategies for multicultural education. Offered Every Term.

BBE 5500 Introduction to Bilingual/Bicultural Education Cr. 3

Survey of the history and legislative background of bilingual/bicultural education in the United States. Emphasis on the foundations, methods, concepts and theories of bilingual/bicultural education. Offered Intermittently.

BBE 6560 Teaching Methods in Bilingual/Bicultural Education Cr. 3

Utilization of traditional and innovative materials, techniques and methods in teaching elementary and secondary school subjects in a bilingual education program. Offered Intermittently.

BBE 6590 Culture and Language in Bilingual/Bicultural Education Cr. 1-3

Research and application of multicultural activities for designing processes to bring language and culture, and instruction in English, into the classroom. Offered Yearly.

Repeatable for 3 Credits

BBE 6600 Internship in Bilingual/Bicultural Teaching Cr. 2-12

Internship in a bilingual, multicultural setting; assessment of the cultural, educational, and linguistic needs of students of limited English-speaking ability. Offered Intermittently.

Repeatable for 12 Credits

BBE 6700 Seminar in Cultural Awareness Cr. 3

Understanding intergroup relations and the appreciation of cultural diversity in a multicultural society such as the United States. Selected topics offered on a semester or yearly basis. Offered Intermittently.

BBE 6850 Applied Linguistics: Issues in Bilingual Education Cr. 3

Current major models of applied English linguistics, contrasting linguistics with special reference to the comparison of English and linguistic minority languages. Offered Yearly.

BBE 9010 Theoretical Implications of Bilingual/Bicultural Education Cr. 3

Theoretical foundations for the development of bilingual/bicultural and multicultural education programs in our schools. Offered Intermittently.

Restriction(s): Enrollment is limited to Graduate level students.

BBE 9030 Advanced Seminar in Bilingual/Bicultural Education Cr. 2-4

Advanced seminar for doctoral students in the bilingual, multicultural education program. Topics to be announced in Schedule of Classes . Offered Intermittently.

Restriction(s): Enrollment is limited to Graduate level students.

Repeatable for 12 Credits

BE - BASIC ENGINEERING

BE 1001 Engineering Bridge Mentorship Program Participant I Cr. 1
Required peer mentorship program for Engineering Bridge students.
Offered Every Term.

Corequisite: BE 1060

Restriction(s): Enrollment is limited to students with a major in Engineering.

BE 1002 Engineering Bridge Mentorship Program Participant II Cr. 0
Required peer mentorship program for Engineering Bridge students.
Offered Winter.

Corequisite: BE 1060

BE 1050 Introduction to the Engineering Profession Cr. 2

This course introduces new engineering students to the profession and practice of engineering, the history of engineering, and its various disciplines. The importance of teams to the practice of engineering is demonstrated. Offered Fall.

BE 1060 Building a Foundation for College Success Cr. 1

Satisfies General Education Requirement: Wayne Experience

This course is designed to expose students to the Wayne State University undergraduate experience. Students will gain an understanding of campus resources, institutional values, and the merits of a liberal arts education from an urban research one university. This course will aid in the development of critical and analytical thinking skills necessary for college success while determining one's academic and professional goals. Offered Winter.

Restriction(s): Enrollment limited to students with a class of Freshman.

BE 1101 Introduction to Officership Cr. 1

Classroom introduction to leadership, and the experiential examination of leadership, followership, decision-making, and group accomplishment of tasks. Offered Every Other Year.

BE 1102 Introduction to Leadership Cr. 1

Continuation of B E 1101; focus on communications, leadership, and problem-solving. The light infantry platoon and the troop leading process. Offered Every Other Year.

Prerequisite: BE 1101 with a minimum grade of C-

BE 1200 Basic Engineering I: Design in Engineering Cr. 3

Core principles of engineering practice: design, teamwork, professional ethics. Offered Fall, Winter.

Prerequisite: MAT 1800 (may be taken concurrently) with a minimum grade of C or MAT 2020 (may be taken concurrently) with a minimum grade of C- or MAT 2030 (may be taken concurrently) with a minimum grade of C- or MAT 2010 (may be taken concurrently) with a minimum grade of C-

Course Material Fees: \$50

BE 1300 Basic Engineering II: Materials Science for Engineering Applications Cr. 3

Fundamentals of materials science; emphasis on how material properties and behavior affect engineering applications. Offered Every Term.

Prerequisites: CHM 1225 with a minimum grade of C- or CHM 1220 with a minimum grade of C- and CHM 1230 with a minimum grade of C- and May be taken concurrently; BE 1200 with a minimum grade of C- and May be taken concurrently; PHY 2170 with a minimum grade of C- or PHY 2175 with a minimum grade of C- and May be taken concurrently; MAT 2020 with a minimum grade of C-

Corequisite: BE 1310

BE 1310 Materials Science for Engineering: Laboratory Cr. 1

Laboratory component of B E 1300. Offered Every Term.

Corequisite: BE 1300

Course Material Fees: \$35

BE 1500 Introduction to Programming and Computation for Engineers Cr. 3

Use of computational tools, such as Excel and MATLAB, to solve engineering problems. Topics include general engineering problem solving, algorithm development, programming, and computational analysis. Offered Fall, Winter.

Prerequisites: MAT 2010 with a minimum grade of C-

Restriction(s): Enrollment is limited to Undergraduate level students.

BE 2100 Basic Engineering III: Probability and Statistics in Engineering Cr. 3

An introduction to application of probability theory and statistical methods in engineering, including design and manufacturing. Offered Every Term.

Prerequisite: MAT 2020 (may be taken concurrently) with a minimum grade of C-

BE 2201 Innovative Tactical Leadership Cr. 1

Military organizational leadership with focus on leadership development and interpersonal group dynamics. Offered Every Other Year.

Prerequisite: BE 1102 with a minimum grade of C-

BE 2202 Leadership in Changing Environments Cr. 2

Challenges of leading in complex contemporary operational environments. Cross-cultural challenges of leadership applied to practical Army leadership tasks and situations. Offered Every Other Year.

Prerequisite: BE 1102 with a minimum grade of C-

BE 3000 Engineering Bridge Mentorship Program Leader Cr. 0

Documentation of mentor participation in Engineering Bridge Program. Offered Every Term.

Restriction(s): Enrollment limited to students in the College of Engineering; enrollment limited to students in the following programs: BS in Chemical Engineering, BS in Civil Engineering, BS in Electrical Engineering, BS in Industrial Engineering, BS in Mechanical Engineering.

BE 3301 Leading Small Organizations I Cr. 2

Leadership development and interpersonal and group dynamics. Methods of visualizing, planning and leading organizations to achieve set goals. Offered Every Other Year.

BE 3302 Leading Small Organizations II Cr. 2

Offered Every Other Year.

Prerequisite: BE 3301 with a minimum grade of C-

BE 3500 Co-Op Record Cr. 0

Engineering practice under supervision in cooperative education program. Offered Every Term.

Restriction(s): Enrollment limited to students in the College of Engineering; enrollment limited to students in the following programs: BS in Chemical Engineering, BS in Civil Engineering, BS in Computer Science, BS in Electrical Engineering, BS in Industrial Engineering, BS in Mechanical Engineering.

BE 3510 Co-Op Experience Cr. 1

Engineering practice under supervision in cooperative education program. Written report required. Offered Every Term.

Restriction(s): Enrollment limited to students in the College of Engineering; enrollment limited to students in the following programs: BS in Chemical Engineering, BS in Civil Engineering, BS in Electrical Engineering, BS in Industrial Engineering, BS in Mechanical Engineering.

Repeatable for 4 Credits

BE 3900 National Design Competition Participant Cr. 0

For engineering undergraduates who are active team members in national engineering design competition projects. Satisfactory completion of this course will document active participation throughout the semester. Offered Every Term.

BE 4401 Leadership and Management Cr. 3

Multiple styles and theories of leadership; ethical decision making, especially as relating to changing organizational and individual behavior; accomplishing goals in resource-constrained environments. Offered Every Other Year.

Prerequisite: BE 3302 with a minimum grade of D-

BE 4402 Military Professionalism and Professional Ethics Cr. 3

Evaluation and assessment of needs of subordinate units and individuals; near-term and short-term plans to address these needs. Analysis of a historical battle as well as analysis of moral and leadership dilemmas in history. Offered Every Other Year.

Prerequisite: BE 4401 with a minimum grade of C-

BE 5900 National Design Competition Projects Cr. 1-4

Primarily for engineering undergraduates who are dedicating a substantial amount of effort towards college-sponsored national design competition projects. Offered Every Term.

Repeatable for 99 Credits

BE 5995 Special Topics in Engineering Cr. 4

Special topics not covered in other courses; topics announced in Schedule of Classes. Offered Every Term.

Repeatable for 99 Credits

BE 5998 Engineering Honors Thesis Cr. 1-4

Completion of required Honors Thesis. Offered for undergraduate credit only. Offered Every Term.

Restriction(s): Enrollment is limited to Undergraduate level students; enrollment limited to students in the College of Engineering; enrollment limited to students in the following programs: BS in Chemical Engineering, BS in Civil Engineering, BS in Electrical Engineering, BS in Industrial Engineering, BS in Mechanical Engineering.

Repeatable for 99 Credits

BIO - BIOLOGICAL SCIENCES

BIO 1030 Biology Today Cr. 3

Satisfies General Education Requirement: Life Sciences, Natural Scientific Inquiry

Challenges to modern society from population growth, new diseases, environmental degradation, urban pollution; medical advances and ethical dilemmas in decoding human genome; impact of biological findings on political and personal decisions; issues considered in context of principles and strategies of modern biological research. Not for biology major credit. Offered Fall, Winter.

BIO 1050 An Introduction to Life Cr. 4

Satisfies General Education Requirement: Life Sciences, Natural Scientific Inquiry

A factual and conceptual treatment of modern biology at the cell, organismal, and population levels of organization. Meets General Education Laboratory Requirement when elected for 4 credits. No credit after BIO 1500 or BIO 1510. Offered Every Term.

Course Material Fees: \$20

BIO 1500 Basic Life Diversity Cr. 4

Satisfies General Education Requirement: Natural Scientific Inquiry Physiology, ecology, evolution, and systematics, their principles, strategies and outcomes in both structure and function. No credit after former BIO 1520. Offered Every Term.

Prerequisites: BIO 1050 with a minimum grade of C- or BIO Permit to Reg ACT/SAT with a test score minimum of 2 or BIO Permit to Reg-L1-L2 BPE with a test score minimum of 2 or BIO 1510 with a minimum grade of C-

Course Material Fees: \$25

BIO 1510 Basic Life Mechanisms Cr. 4

Satisfies General Education Requirement: Life Sciences, Natural Scientific Inquiry

Factual and conceptual treatment of cell molecules, cell structure, metabolism, genetics, and development. For the science major and certain pre-professional programs. Meets General Education laboratory requirement. BIO 1500 and BIO 1510 required of all biological sciences majors. Only Engineering students may elect for three credits. Offered Every Term.

Prerequisites: BIO 1050 with a minimum grade of C- or BIO Permit to Reg ACT/SAT with a test score minimum of 2 or BIO Permit to Reg-L1-L2 BPE with a test score minimum of 2 or BIO 1500 with a minimum grade of C-

Course Material Fees: \$25

BIO 2200 Introductory Microbiology Cr. 5

Satisfies General Education Requirement: Life Sciences, Natural Scientific Inquiry

Bacteria and their basic biology; the relationship of microorganisms to man and other living forms, including their ecological importance and their role in the causation of disease; laboratory exercises paralleling the above principles. Offered Every Term.

Prerequisites: BIO 1510 with a minimum grade of C-

Course Material Fees: \$60

BIO 2550 Fundamentals of Cell Biology for Neuroscience Cr. 4

This course is designed for undergraduate students majoring in Neuroscience. It introduces the student to the structure and function of the cell, which is the fundamental unit of life, and underlies the functionality of neurons and glia, the cells that make up the brain. Offered Every Term.

Prerequisites: BIO 1510 with a minimum grade of C-

BIO 2600 Introduction to Cell Biology Cr. 3

An advanced introduction to the structural and functional biology of the eucaryotic cell. Molecular, biochemical, and functional material learned in other courses reviewed and synthesized as it related to the cell. Offered Every Term.

Prerequisites: BIO 1500 with a minimum grade of C- and BIO 1510 with a minimum grade of C-

BIO 2870 Anatomy and Physiology Cr. 5

Detailed study of structure and function of the major systems of the body: skeletal, nervous, muscular, endocrine, circulatory, respiratory, digestive, excretory, and reproductive. No major credit for Biological Sciences majors. Offered Every Term.

Prerequisites: BIO 1510 with a minimum grade of C-

Course Material Fees: \$30

BIO 3070 Genetics Cr. 5

Transmission, nature and action of genetic material in organisms. Laboratory experiments to demonstrate principles of genetics. Offered for five credits to Honors students only; includes lab experience. Offered Every Term.

Prerequisites: BIO 2600 with a minimum grade of C-

BIO 3100 Cellular Biochemistry Cr. 3

Biosynthesis and metabolism of proteins, carbohydrates, lipids, steroids, amino acids and nucleic acids. The basic principles of enzyme kinetics in living systems. Offered Every Term.

Prerequisites: BIO 2550 with a minimum grade of C- or BIO 2600 with a minimum grade of C- and CHM 1240 with a minimum grade of D- and CHM 1250 with a minimum grade of D-

BIO 3110 Biomolecules to Cell Biology: Mastering Concepts Through Teaching Cr. 2

Provide Honors students with a service learning opportunity (peer mentor/assistant in BIO 1510) that will enhance their knowledge of biology while engaging them with experiences in teaching and interacting with students. Offered Fall, Winter.

Prerequisites: BIO 1510 with a minimum grade of B and BIO 2600 with a minimum grade of B

Corequisite: HON 3000

Repeatable for 4 Credits

BIO 3200 Human Physiology Cr. 3

Basic principles of human physiology, including major systems from a cellular, molecular, and integrative approach. Offered Every Term.

Prerequisites: BIO 2550 with a minimum grade of C- or BIO 2600 with a minimum grade of C- or BIO 2870 with a minimum grade of C-

Restriction(s): Enrollment is limited to Undergraduate level students.

BIO 3500 Ecology and the Environment Cr. 3

Introduction to key ecological concepts illustrated with contemporary environmental issues; basic population, community, ecosystem, landscape, and global ecology. Offered Fall.

Prerequisites: BIO 1500 with a minimum grade of C- and BIO 2600 with a minimum grade of C- or EVS 1500 with a minimum grade of C-

Restriction(s): Enrollment is limited to Undergraduate level students.

BIO 3800 Botany Cr. 3

Introduction to plant morphology, systematics, development, and physiology. Lectures and hands-on laboratory, readings and discussions. Offered Every Other Year.

Prerequisites: BIO 3070 with a minimum grade of C-

Restriction(s): Enrollment is limited to Undergraduate level students.

Course Material Fees: \$40

BIO 3990 Directed Study Cr. 1-4

Primarily for biology majors who wish to continue in a field beyond that covered in regular courses; to be taken under direction of Biological Sciences faculty. Offered Every Term.

Repeatable for 8 Credits

BIO 4110 Biomedical Technology and Molecular Biology Cr. 4

Satisfies General Education Requirement: Writing Intensive Competency
General principles of molecular biology of prokaryotes and eukaryotes. Includes structures of DNA, RNA, and protein, DNA replication and repair, transcription and translation, gene regulation and gene expression. Emphasis on applications in medical biology and biotechnology. Fulfills General Education Writing Intensive Course in the Major requirement; each student writes reports and one long research paper on topic approved by instructor, in addition to other course writing requirements. Offered Fall.

Prerequisites: BIO 3070 with a minimum grade of C- and BIO 3100 with a minimum grade of C-

BIO 4120 Comparative Physiology Cr. 4

Satisfies General Education Requirement: Writing Intensive Competency
Physiological processes at the molecular, cellular, and organismal levels. Comparison of major physiological systems across groups of organisms. Lab consists of physiology exercises and lab reports that allow students to explore major conceptual themes in physiology. Fulfills General Education Writing Intensive Course in the Major requirement; each student writes reports, and one long research paper on topic approved by instructor, in addition to other course writing requirements. Offered Every Term.

Prerequisites: BIO 1500 with a minimum grade of C- and BIO 3070 with a minimum grade of C- and BIO 3200 with a minimum grade of C-
Course Material Fees: \$20

BIO 4130 General Ecology Cr. 4

Satisfies General Education Requirement: Writing Intensive Competency
Principles of population, community, ecosystem, and landscape ecology. Fulfills General Education Writing Intensive Course in the Major requirement; each student writes reports and one long research paper on topic approved by instructor, in addition to other course writing requirements. Offered Winter.

Prerequisites: BIO 3070 with a minimum grade of C- and BIO 3500 with a minimum grade of C-

Course Material Fees: \$20

BIO 4140 Hormones and Behavior Cr. 3

Examines the relationship between hormones and behavior, taking a biological approach to behavioral questions that have long been of interest to Psychologists, Biologists and Neuroscientists. Explores the research area of Behavioral Endocrinology, a field that seeks biologically (in particular hormone)-based explanations of behavior. Offered Winter.

Prerequisite: PSY 1010 with a minimum grade of C- or BIO 1020 with a minimum grade of C-

Equivalent: PSY 4140

BIO 4200 Evolution Cr. 3

Evidence for mechanisms of evolution at the molecular, organismal and population level. Offered Every Term.

Prerequisites: BIO 3070 with a minimum grade of C- and BIO 3100 with a minimum grade of C- or BIO 3200 with a minimum grade of C- or BIO 3500 with a minimum grade of C-

BIO 4340 Regenerative Biology and Medicine Cr. 4

Introduces students specializing in biomedical engineering and premedical students to the conceptual and methodological principles of modern regenerative biology and medicine. Includes a review of research methods and achievements in this field and the translational applications of regenerative biology to tissue engineering and the development of regenerative therapies. Offered Winter, Spring/Summer.

Prerequisite: BIO 2600 with a minimum grade of C-

BIO 4350 Laboratory Research Experience in Molecular Bacterial Genetics Cr. 3

Discovery-based laboratory research experience centered on identification of genes controlling bacterial behavior. Students will identify genes that control the developmental life cycle of a soil bacterium, design experiments to characterize any genes identified, and characterize their role in regulating bacterial behavior. Students will employ a series of common bacteriology and molecular biology techniques including bacterial transformation, phenotypic assays, PCR amplification, cloning, plasmid isolation, immunoblot, and web-based bioinformatic analyses. Offered Intermittently.

Prerequisite: BIO 2200 with a minimum grade of C- and BIO 3070 with a minimum grade of C-

Course Material Fees: \$60

BIO 4370 Microbial Communities Cr. 3

An introduction to the concept of microbial communities and their roles in health and the environment. The study of biofilms in disease, microbial communities in the environment, and human/animal microbiota will be covered. Offered Every Other Year.

Prerequisite: BIO 2200 with a minimum grade of C- and BIO 3070 with a minimum grade of C-

BIO 4420 Biogeography Cr. 3

An examination of current and past spatial distributions of biological diversity with an emphasis on the ecological, evolutionary, geological, and climatological processes underlying biogeographic variation. Offered Every Other Year.

Prerequisites: BIO 3500 with a minimum grade of C-

Restriction(s): Enrollment is limited to Undergraduate level students.

BIO 4630 Histology Cr. 4

Characteristics and identification of normal mammalian tissues. Micro-anatomy of the mammal. Functional interpretation of microstructure and fine structure. Offered Winter, Spring/Summer.

Prerequisites: BIO 2600 with a minimum grade of C- or BIO 2870 with a minimum grade of C-

Course Material Fees: \$20

BIO 4690 Molecular and Cellular Neurobiology Cr. 3

Focuses on the molecular and cellular aspects of neuronal function, from cellular signaling to sensory and motor function as well as behavior, learning and memory. Also covers the biological aspects of neuronal function, from molecules to cells to systems. Offered Fall.

Prerequisite: BIO 3200 with a minimum grade of C-

BIO 5020 Comprehensive Virology Cr. 3

Course provides students with a comprehensive knowledge of molecular virology, from viral classification, vital structures and life cycles, to host response and global health. Offered for undergraduate credit only. Offered Fall.

Prerequisites: BIO 2200 with a minimum grade of C- and BIO 2600 with a minimum grade of C- and BIO 3070 with a minimum grade of C-

Restriction(s): Enrollment is limited to Undergraduate level students.

BIO 5040 Biometry Cr. 4

Quantitative methods in biology. Statistical approach to data analysis and the design of experiments. Laboratory section permits actual analysis of selected statistical problems. Offered Intermittently.

Prerequisites: BIO 3070 with a minimum grade of C- or BIO 4130 with a minimum grade of C- and MAT 1800-6XXX with a minimum grade of C-

Course Material Fees: \$15

BIO 5060 Special Topics Cr. 6

Formalized treatment of the current state of knowledge in a significant area of biology. Topics to be announced in Schedule of Classes. Offered for undergraduate credit only. Offered Intermittently.

Prerequisites: BIO 1500 with a minimum grade of C- and BIO 1510 with a minimum grade of C-

Restriction(s): Enrollment is limited to Undergraduate level students.

Repeatable for 6 Credits

BIO 5080 Cellular Basis of Animal Behavior Cr. 3

Relationship between behavior and neuroscience using a variety of animal models, each examined from the level of natural behavior progressively to the cellular level. Topics include: sensory systems, motor behavior, and learning. Offered Winter.

Prerequisites: BIO 2600 with a minimum grade of C-

Equivalent: PSY 5080

BIO 5100 Aquatic Ecology Cr. 4

Physical, chemical and biological processes occurring in lakes, streams and wetlands. Offered for undergraduate credit only. Offered Every Other Year.

Prerequisites: BIO 1500 with a minimum grade of C- and BIO 3500 with a minimum grade of C-

Restriction(s): Enrollment is limited to Undergraduate level students.

Course Material Fees: \$67

BIO 5150 Genomics Cr. 3

Introduction to the theory and practice of genomics. Topics include sequencing and mapping, overview of genomes, comparative genomics, transcriptomes, population genetics and genomics, basic bioinformatics and statistics, population-level variation (SNPs, MNPs, indels), ethics, evolutionary genomics, and functional genomics. Offered for undergraduate credit only. Offered Fall.

Prerequisites: BIO 3070 with a minimum grade of C- and BIO 3100 with a minimum grade of C-

Restriction(s): Enrollment is limited to Undergraduate level students.

BIO 5180 Field Investigations in Biological Sciences Cr. 12

Field studies of one to fifteen weeks, emphasizing biological principles and techniques demonstrated in the field. Offered Intermittently.

Prerequisites: BIO 2200 with a minimum grade of C- or BIO 2600 with a minimum grade of C- and BIO 1500 with a minimum grade of C- and BIO 1510 with a minimum grade of C-

Course Material Fees: \$10

Repeatable for 20 Credits

BIO 5240 Molecular Systems Biology Cr. 3

Introduces the basic design principles of biological circuits and networks and their functional designs at the molecular, pathway, whole cell, and population levels. Students will perform a comprehensive group project to build a computational model of a simple biological network. Offered Every Other Year.

Prerequisites: BIO 3070 and PHY 2140

BIO 5280 Bioinformatics Cr. 3

Basic Linux commands and PERL programming skills, sequence comparison, phylogenetic analysis, gene/genome patterns. Offered for undergraduate credit only. Offered Winter.

Prerequisites: BIO 3070 with a minimum grade of C- and BIO 3100 with a minimum grade of C-

Restriction(s): Enrollment is limited to Undergraduate level students.

BIO 5330 Principles and Applications of Biotechnology I Cr. 3

Review of origins of molecular biotechnology and its characteristic technologies; survey of applications of biotechnology to problems in industries. Offered Fall.

Prerequisites: BIO 2200 with a minimum grade of C- and BIO 3070 with a minimum grade of C- and BIO 3100 with a minimum grade of C-

BIO 5440 Terrestrial Ecology Cr. 4

Ecology of forests and grasslands. Field study and interpretation of ecological processes. Importance of species-site relationships and disturbance history. Offered for undergraduate credit only. Offered Every Other Year.

Prerequisites: BIO 1500 with a minimum grade of C-

Restriction(s): Enrollment is limited to Undergraduate level students.

Course Material Fees: \$110

BIO 5490 Population and Community Ecology Cr. 3

Population dynamics of animals and plants. Life history theory. Species interactions. Structure and dynamics of communities. Offered for undergraduate credit only. Offered Every Other Year.

Prerequisites: BIO 1500 with a minimum grade of C- and BIO 4130 with a minimum grade of C-

Restriction(s): Enrollment is limited to Undergraduate level students.

BIO 5540 Landscape Ecology Cr. 3

Concepts, methods, and applications of landscape ecology; causes and implications of ecological patterns and heterogeneity on landscapes; interrelationships of patterns and ecological processes. Offered Every Other Year.

Prerequisites: BIO 1500 with a minimum grade of C- and BIO 3500 with a minimum grade of C-

Restriction(s): Enrollment is limited to Undergraduate level students.

BIO 5610 Developmental Biology Lab Cr. 1

Slides, models, and 4-D computer programs used to enable the student to know and recognize the cascade of structural changes that take place during the embryological developmental pathways. Offered Winter.

Prerequisites: May be taken concurrently: BIO 5620 with a minimum grade of C-

Course Material Fees: \$40

BIO 5620 Developmental Biology Cr. 3

An analytical and comparative study of genetic and cellular mechanisms and their interaction with environmental factors to effect the developmental mechanisms which produce the adult organism. Origin and unfolding of structural patterns characteristic of different species; their evolutionary origins. Offered Winter.

Prerequisites: BIO 3070 with a minimum grade of C-

BIO 5640 Cancer Biology Cr. 3

Introduction to integrated analysis of cancer and cell biology, pathology, etiology and therapy. Offered Intermittently.

Prerequisites: BIO 2600 with a minimum grade of C- and BIO 3070 with a minimum grade of C- and BIO 3100 with a minimum grade of C-

BIO 5660 Neural Signaling in Health and Disease Cr. 3

Addresses major principles of how various brain systems regulate physiological processes of the body function, both individually and as an integrated unit. Includes principles of physiological communication as it relates to homeostasis, metabolism, and both neural and endocrine communication; emphasis is given not only to major principles but also to how these principles were developed. Topics include (but are not limited to) dysfunction and disorders of the central nervous system (CNS) in the context of signaling pathways and hormonal systems, neurodegeneration, interaction between neurons and glia cells and neuroinflammation. Offered Fall.

Prerequisite: BIO 3200 with a minimum grade of C-

BIO 5680 Basic Endocrinology Cr. 3

Basic description of the human endocrine system, the endocrine control of several physiologic processes (growth, development, metabolism and reproduction), and a description of common endocrine disorders. Offered Fall.

Prerequisites: BIO 3200 with a minimum grade of C- or BIO 4120 with a minimum grade of C-

Equivalent: PSL 5680

BIO 5750 Biology of Longevity and Aging Cr. 3

Longevity, aging and senescence viewed as fundamental biological processes common to most organisms. Data-based discussion of investigative methods and accepted facts regarding the mechanisms underlying longevity and aging, coupled with critical discussion of behavioral and biological interventions known to retard or reverse the aging processes. Systems biology overview of the process, including societal parameters necessary to the maintenance of longevity. Offered for undergraduate credit only. Offered Winter.

Prerequisite(s): BIO 3070 with a minimum grade of C-

Restriction(s): Enrollment is limited to Undergraduate level students.

BIO 5996 Senior Research Cr. 1-2

Original research. To be taken under direction of Biological Sciences faculty. Offered for undergraduate credit only. Offered Every Term.

Restriction(s): Enrollment is limited to Undergraduate level students; enrollment limited to students with a class of Senior.

Repeatable for 3 Credits

BIO 6000 Molecular Cell Biology I Cr. 3

Analysis of cell structure at the molecular and cellular levels and the physiological consequences of these structures: isolation, physico-chemical properties, and biological attributes of cells, organelles, and biopolymers including nucleic acids, proteins, and lipids. Offered Fall.

Prerequisite: BIO 2600 (may be taken concurrently) with a minimum grade of C and BIO 3100 (may be taken concurrently) with a minimum grade of C

BIO 6010 Molecular Cell Biology II Cr. 3

Analysis of cell regulation at the molecular level. Cell development and differentiation. Genetic mechanisms including: DNA synthesis and repair, mechanism of gene expression and control. Offered Winter.

Prerequisite: BIO 6000 with a minimum grade of C-

BIO 6020 Methods of Analyses Cr. 4

Design and execution of experiments in molecular biology. Topics include: laboratory safety, scientific documentation, database searching, development of experimental protocols, error analysis, solutions and buffers, electrophoretic separation of proteins and nucleic acids, basic immunohistochemistry, bioimaging, and scientific ethics. Offered Fall.

Prerequisite(s): May be taken concurrently: BIO 4110 with a minimum grade of C- (must be taken at WSU) or BIO 5330 with a minimum grade of C- (must be taken at WSU)

Course Material Fees: \$50

BIO 6055 Biology of the Eye Cr. 3

Introduction to biology of eye structure/function, and to causes and clinical treatments of eye-related disorders and diseases. Offered for undergraduate credit only. Offered Fall.

Prerequisite: BIO 2600 with a minimum grade of C- and BIO 3100 with a minimum grade of C-

Restriction(s): Enrollment is limited to Undergraduate level students.

Course Material Fees: \$25

Equivalent: ANA 6050, PYC 6050

BIO 6060 Molecular Evolution Cr. 3

Patterns and processes of evolutionary change on the DNA sequence level. Emphasis on models of nucleotide substitutions, and genic evolution. Methods of phylogenetic inference. Offered Intermittently.

Prerequisite: BIO 3070 with a minimum grade of C- and (BIO 4200 (may be taken concurrently) with a minimum grade of C-

BIO 6070 Human Genetics Cr. 3

Principles of genetics as applied to humans. Topics include pedigree analysis, simple and complex inheritance patterns, cytogenetics, development and sex determination, role of mutations in disease, genes and cancer, genetic testing and forensics, genomics, linkage, genetics of behavior, and human evolution. Offered Intermittently.

Prerequisite: BIO 3070 with a minimum grade of C-

BIO 6090 Population Genetics Cr. 3

Theoretical bases for microevolutionary change in natural populations of organisms; basic to study of evolutionary genetics and evolutionary ecology. Offered Intermittently.

Prerequisite: BIO 3070 with a minimum grade of C-

BIO 6120 Molecular Biology Laboratory I Cr. 3

Laboratory exercises illustrate methods and concepts of molecular biology and recombinant DNA analysis. Offered Winter.

Course Material Fees: \$30

BIO 6160 Proteins and Proteomics Cr. 3

Structure and dynamics of proteins at the molecular level. Strategies used to biochemically purify, analyze, and characterize proteins. Offered Winter.

Prerequisite: BIO 3100 with a minimum grade of C- or CHM 5600 with a minimum grade of C- or CHM 6620 with a minimum grade of C-

BIO 6180 Membrane Biology Cr. 3

Comprehensive analysis of cellular and model membranes integrating molecular structure and physiological properties. Structural, dynamic, and physiological properties examined, including molecular and macromolecular assemblies, physical and chemical analysis of molecular motion, functional aspects including trans-membrane signaling. Offered Intermittently.

Prerequisite: BIO 6000 with a minimum grade of C

Restriction(s): Enrollment is limited to Undergraduate level students.

BIO 6190 Advanced Special Topics Cr. 6

Formalized treatment of current state of knowledge in a significant area of biology. Topics to be announced in Schedule of Classes. Offered Intermittently.

Repeatable for 6 Credits

BIO 6330 Principles and Applications of Biotechnology II Cr. 3

Application of molecular biology and recombinant DNA technology of contemporary eukaryotic systems. Topics include: specialized application of PCR for cloning, generation of antibodies, the expression of recombinant proteins in cultured cells and transgenic animal models. Offered Winter.

Prerequisite: BIO 5330 with a minimum grade of C-

BIO 6420 Ecotoxicology and Risk Assessment Cr. 3

Provides students with an overview of ecological and environmental aspects of toxicology and pollution biology. The course will emphasize population, community, and ecosystem responses to contaminants. General understanding of ecology, chemistry, and basic statistics is essential. Offered Every Other Winter.

Restriction(s): Enrollment is limited to Graduate level students.

BIO 6620 Advanced Evolution Cr. 3

Continuation of BIO 4130; emphasis on evolutionary biology. Topics include: history of evolutionary thought, origins of life, evolution of the cell, evolution of genes, evolution and behavior, evolution of life history traits, phylogenetics, historical biogeography, tempo and mode of evolution, species concepts and speciation, nature of adaptation and adaptive radiations. Offered Intermittently.

Prerequisite: BIO 4200 with a minimum grade of C-

BIO 6690 Neurobiology I Cr. 3

Electrical and chemical signal transmission and signal processing in the nervous system. Integration of these functions into complex sensory and control mechanisms. Molecular mechanisms of electrical excitability and ion channels, neurotransmitters and receptors, second messengers, and feedback circuits. Neurobiology of motor control, sensory and regulatory systems. Offered Winter.

Prerequisite: BIO 3100 with a minimum grade of C- and (BIO 4120 (may be taken concurrently) with a minimum grade of C-

BIO 6700 Responsible Conduct of Research Cr. 1

Fulfills federal requirements for in person faculty-led training in scientific ethics and responsible conduct of research. Offered Fall.

BIO 6990 Honors Directed Study in Biology Cr. 1-4

To be taken under direction of Biological Sciences faculty. Offered for undergraduate credit only Offered Every Term.

Restriction(s): Enrollment is limited to Undergraduate level students; enrollment is limited to students with a major in Biological Sciences Honors or Biological Sciences; enrollment limited to students in a BS in Biological Science or Bachelor of Arts degrees.

Repeatable for 99 Credits

BIO 6994 Technical Communication in Molecular Biotechnology Cr. 3

Methods of written and oral communication in the biotechnology field. Offered Winter.

BIO 6999 Terminal Essay: Honors Program Cr. 2

Preparation of a terminal essay, satisfactory completion of which assures Honors graduation, providing performance in preceding Honors courses has been at Honors level; to be taken under direction of Biological Sciences faculty. Offered for undergraduate credit only. Offered Every Term.

Prerequisite: BIO 6990 with a minimum grade of C-

Restriction(s): Enrollment is limited to Undergraduate level students; enrollment is limited to students with a major in Biological Sciences Honors.

BIO 7000 Recent Advances in Cellular and Developmental Biology Cr. 3

Formalized and in-depth treatment of the current state of knowledge in a significant area of cell and molecular biology. Topics to be announced in Schedule of Classes . Offered Intermittently.

Restriction(s): Enrollment is limited to Graduate level students.

Repeatable for 6 Credits

BIO 7011 Principles of Toxicology Cr. 3

Basic concepts and principles of toxicology, including toxicity of major classes of chemicals (pesticides, solvents, metals) and organ systems (renal, immune, digestive, neuro and respiratory) affected. Offered Fall.

Restriction(s): Enrollment is limited to Graduate level students.

Equivalent: PHC 7410

BIO 7020 Comprehensive Virology Cr. 3

Course provides students with a comprehensive knowledge of molecular virology, from viral classification, vital structures and life cycles, to host response and global health. Offered Fall.

Restriction(s): Enrollment is limited to Graduate level students.

BIO 7040 Signaling Transduction Mechanisms Cr. 3

Overview of signaling strategies and mechanisms used by prokaryotes and eukaryotes (including plants) to sense and respond to extracellular or intracellular stimuli. Additional study of bioinformatic, biochemical, and genetics approaches to characterization of signaling proteins, systems and networks. Offered Fall.

Restriction(s): Enrollment is limited to Graduate level students.

BIO 7045 Biometry Cr. 4

Provides practical tools for the design of experiments, data exploration and statistical analysis of data. Prepares students to begin to design scientific studies and experiments, critically evaluate data and test hypotheses via data analysis. While the course will delve into some underlying statistical theory, a major emphasis will be providing exposure to and hands-on experience with basic approaches to the analysis of univariate and multivariate data. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate level students.

BIO 7055 Biology of the Eye Cr. 3

Integrated introduction to basic biological structure/function of the eye; causes and clinical treatments of eye-related disorders and diseases.

Offered Fall.

Restriction(s): Enrollment is limited to Graduate level students.

Equivalent: ANA 7055

BIO 7060 Evolutionary and Developmental Biology Cr. 3

Introduction to animal diversity. Genetic pathways and networks in development; focus on limb and organ formation. Evolving developmental pathways: case studies. Genetic source materials for developmental evolution. Speciation and developmental evolution. Offered Every Other Year.

Prerequisite: BIO 5620 with a minimum grade of C-

Restriction(s): Enrollment is limited to Graduate level students.

BIO 7090 Molecular Genetics of Development Cr. 3

An examination of the current and classical research literature dealing with the role of gene action in development. Offered Intermittently.

Prerequisite: BIO 5620 with a minimum grade of C-

Restriction(s): Enrollment is limited to Graduate level students.

BIO 7110 Aquatic Ecology Cr. 4

Physical, chemical and biological processes occurring in lakes, streams, and wetlands. Offered Every Other Fall.

Restriction(s): Enrollment is limited to Graduate level students.

Course Material Fees: \$67

BIO 7150 Genomics Cr. 3

Introduction to the theory and practice of genomics. Topics include sequencing and mapping, overview of genomes, comparative genomics, transcriptomes, population genetics and genomics, basic bioinformatics and statistics, population-level variation (SNPs, MNPs, indels), ethics, evolutionary genomics, and functional genomics. Offered Fall.

Restriction(s): Enrollment is limited to Graduate level students.

BIO 7180 Membrane Biology Cr. 3

Comprehensive analysis of cellular and model membranes integrating molecular structure and physiological properties. Structural, dynamic, and physiological properties examined, including molecular and macromolecular assemblies, physical and chemical analysis of molecular motion, functional aspects including trans-membrane signaling. Offered Winter.

Restriction(s): Enrollment is limited to Graduate level students.

BIO 7240 Molecular Systems Biology Cr. 3

Introduces the basic design principles of biological circuits and networks and their functional designs at the molecular, pathway, whole cell, and population levels. Students will perform a comprehensive group project to build a computational model of a simple biological network. Offered Every Other Year.

Prerequisites: BIO 3070 and PHY 2140

Restriction(s): Enrollment is limited to Graduate level students.

BIO 7280 Bioinformatics Cr. 3

Basic Linux commands and PERL programming skills, sequence comparison, phylogenetic analysis, gene/genome patterns. Offered Winter.

Restriction(s): Enrollment is limited to Graduate level students.

BIO 7310 Sustainability of Urban Environmental Systems Cr. 2

Students will be introduced to topics in urban sustainability from multiple disciplinary perspectives such as: ecology, anthropology, communication, engineering, economics and urban planning. Questions in fostering a more sustainable urbanism will be introduced and evaluated. Offered Fall.

Restriction(s): Enrollment is limited to Graduate level students.

Equivalent: CE 7311

BIO 7440 Terrestrial Ecology Cr. 4

Ecology of forests and grasslands. Field study and interpretation of ecological processes. Importance of species-site relationships and disturbance history. Offered Every Other Year.

Prerequisite: BIO 1500 with a minimum grade of C- and BIO 4130 with a minimum grade of C-

Restriction(s): Enrollment is limited to Graduate level students.

Course Material Fees: \$110

BIO 7490 Population and Community Ecology Cr. 3

Population dynamics of animals and plants. Life history theory. Species interactions. Structure and dynamics of communities. Offered Every Other Year.

Prerequisite: BIO 1500 with a minimum grade of C- and BIO 4130 with a minimum grade of C-

Restriction(s): Enrollment is limited to Graduate level students.

BIO 7500 Prokaryotic Gene Structure and Function Cr. 4

Detailed analysis of structure, expression and replication of genes of prokaryotic cells and associated extrachromosomal elements. Critical discussion of studies establishing central concepts in prokaryotic gene regulation, DNA structure and dynamics transcription, translation and signal transduction systems. Offered Every Other Year.

Prerequisite: BIO 3070 with a minimum grade of C- and BIO 3100 with a minimum grade of C-

Restriction(s): Enrollment is limited to Graduate level students.

BIO 7510 Eukaryotic Gene Structure and Function Cr. 4

Knowledge of current molecular technology is absolute prerequisite for this course; prerequisite course must have been satisfied. Analysis of structure, replication, expression and regulation of eukaryotic genome. Experimental approaches to study eukaryotic gene expression, critical comprehension of current research, design of experiments in gene expression. Offered Every Other Year.

Prerequisite: BIO 6330 with a minimum grade of C- or BIO 7780 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

BIO 7540 Landscape Ecology Cr. 3

Concepts, methods, and applications of landscape ecology. Causes and implications of ecological patterns and heterogeneity on landscapes. Interrelationships of patterns and ecological processes. Offered Every Other Year.

Restriction(s): Enrollment is limited to Graduate level students.

BIO 7660 Neural Signaling in Health and Disease Cr. 3

Addresses major principles of how various brain systems regulate physiological processes of the body function, both individually and as an integrated unit. Includes principles of physiological communication as it relates to homeostasis, metabolism, and both neural and endocrine communication; emphasis is given not only to major principles but also to how these principles were developed. Topics include (but are not limited to) dysfunction and disorders of the central nervous system (CNS) in the context of signaling pathways and hormonal systems, neurodegeneration, interaction between neurons and glia cells and neuroinflammation. Offered Fall.

Restriction(s): Enrollment is limited to Graduate level students.

BIO 7750 Biology of Longevity Aging Cr. 3

Longevity, aging and senescence viewed as fundamental biological processes common to most organisms. Data-based discussion of investigative methods and accepted facts regarding the mechanisms underlying longevity and aging, coupled with critical discussion of behavioral and biological interventions known to retard or reverse the aging processes. Systems biology overview of the process, including societal parameters necessary to the maintenance of longevity. Offered for graduate credit only. Offered Winter.

Prerequisite: BIO 3070 with a minimum grade of C-

Restriction(s): Enrollment is limited to Graduate level students.

BIO 7780 Genetic Engineering Laboratory Cr. 2

Continuation of BIO 6120 laboratory experience; screening procedures and DNA sequencing methods. Offered Intermittently.

Prerequisite: BIO 6120 with a minimum grade of C and BIO 6330 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

Course Material Fees: \$30

BIO 7996 Research Problems Cr. 1-8

Original investigation. Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students.

Repeatable for 998.99 Credits

BIO 8000 Special Topics Cr. 1-6

Various frontier aspects of biology. Work may include lectures, laboratories or discussion. Topics to be announced in Schedule of Classes. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate level students.

Repeatable for 6 Credits

BIO 8995 Graduate Seminar in Biology Cr. 2

Presentations by graduate staff, advanced students, visiting lecturers. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate level students; enrollment is limited to students with a major in Biological Sciences; enrollment limited to students in a Doctor of Philosophy or Master of Science degrees.

Repeatable for 4 Credits

BIO 8996 Research in Molecular Biotechnology Cr. 1-4

Students spend two semesters doing research under the guidance of faculty associated with the Molecular Biotechnology Program and in other laboratories. Offered Winter, Spring/Summer.

Restriction(s): Enrollment is limited to Graduate level students.

Repeatable for 8 Credits

BIO 8999 Master's Thesis Research and Direction Cr. 1-8

Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students with a class of Candidate Masters.

Repeatable for 8 Credits

BIO 9990 Pre-Doctoral Candidacy Research Cr. 1-8

Research in preparation for doctoral dissertation. Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students.

Repeatable for 12 Credits

BIO 9991 Doctoral Candidate Status I: Dissertation Research and Direction Cr. 7.5

Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students.

BIO 9992 Doctoral Candidate Status II: Dissertation Research and Direction Cr. 7.5

Offered Every Term.

Prerequisite: BIO 9991 with a minimum grade of S

Restriction(s): Enrollment is limited to Graduate level students.

BIO 9993 Doctoral Candidate Status III: Dissertation Research and Direction Cr. 7.5

Offered Every Term.

Prerequisite: BIO 9992 with a minimum grade of S

Restriction(s): Enrollment is limited to Graduate level students.

BIO 9994 Doctoral Candidate Status IV: Dissertation Research and Direction Cr. 7.5

Offered Every Term.

Prerequisite: BIO 9993 with a minimum grade of S

Restriction(s): Enrollment is limited to Graduate level students.

BIO 9995 Candidate Maintenance Status: Doctoral Dissertation Research and Direction Cr. 0

Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students.

Course Material Fees: \$370.26

Repeatable for 0 Credits

BIO 9996 Lab Rotation Cr. 2

Research training in faculty laboratories on a rotating basis, up to two labs per semester. Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students.

Repeatable for 4 Credits

BLW - BUSINESS LAW

BLW 2510 Business Law I Cr. 3

Introduction to the domestic and international legal systems as they relate to business. Impact of the legal environment on management decision-making and the legal and ethical implications of contracts and sales, including product liability. No credit after ACC 2510. Offered Every Term.

Prerequisites: BA 2020 with a minimum grade of D-

Restriction(s): Enrollment is limited to Undergraduate level students.

BLW 5190 Business Law II Cr. 3

Legal, ethical and managerial implications of various forms of organizing and operating a business; corporations, partnerships, limited liability companies, sole proprietorships. Negotiable instruments and the banking system; agency and professional liability. Offered for undergraduate credit only. Offered Winter.

Prerequisites: BLW 2510 with a minimum grade of C

Restriction(s): Enrollment is limited to Undergraduate level students; enrollment limited to students in the School of Business.

BLW 7220 Business Law II Cr. 3

Law governing business corporations; fiduciary duties of managers and directors in situations such as mergers, acquisitions, securities offerings, market domination, litigation. No credit after ACC 7220. Offered Intermittently.

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students in the School of Business.

BMB - BIOCHEMISTRY AND MOLECULAR BIOLOGY

BMB 7010 General Biochemistry Lecture Cr. 4

Introduction to biochemistry: structure of biological molecules, enzymes, bioenergetics, intermediary metabolism. Biosynthesis of DNA, RNA, and proteins. Offered Fall.

Restriction(s): Enrollment is limited to Graduate level students.

BMB 7020 Biochemistry Laboratory Rotation Cr. 3

Research projects with various faculty. Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students.

BMB 7030 Core Concepts in Technologies in Biochemistry and Molecular Biology Cr. 4

Methods-based approach to understanding core concepts in biochemistry and biotechnology. Students acquire competence enabling them to explain and implement these approaches. Offered Fall.

Corequisite: BMB 7010

Restriction(s): Enrollment is limited to Graduate level students.

BMB 7140 Foundations of Data Science Cr. 3

Introduction to basic concepts of linear algebra and their application to data analysis. MATLAB and PYTHON programs are introduced and employed as tools for practical implementation of computational methods. Offered Fall.

Restriction(s): Enrollment is limited to Graduate level students.

Equivalent: IBS 7140

BMB 7320 Protein Structure and Function Cr. 3

Structure, function, and design of proteins: architecture, function, regulation, assembly and evolution of proteins and protein complexes; theory and techniques of kinetic analysis; newer techniques of protein design and engineering. Offered Winter.

Prerequisite: BMB 7010 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

BMB 7330 Advanced Molecular Biology Cr. 2

Modern topics in biochemistry, including nucleic acid dynamics, genomic structure, DNA replication and repair, transcription, RNA processing, translation and protein synthesis. Offered Winter.

Restriction(s): Enrollment is limited to Graduate level students.

Equivalent: IBS 7330

BMB 7360 Advanced Structural Biology Cr. 2

Determination of structure and dynamics of biological molecules by NMR and crystallography; emphasis on protein structure and function. Offered Winter.

Prerequisites: IBS 7015 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

BMB 7670 Advanced Biochemistry Laboratory Cr. 2-10

Advanced laboratory techniques as applied to investigations of biological materials. Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students.

BMB 7890 Journal Club Cr. 1

Student presentations of papers from recent biochemistry literature; recommended for graduate students in biochemistry only. Offered Fall, Winter.

Prerequisite: BMB 7010 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students; enrollment is limited to students with a major in Biochemistry&Molecular Biology.

Repeatable for 6 Credits

BMB 7996 Research Cr. 1-15

Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students.

Repeatable for 30 Credits

BMB 8999 Master's Thesis Research and Direction Cr. 1-8

Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students with a class of Candidate Masters.

Repeatable for 8 Credits

BMB 9990 Pre-Doctoral Candidacy Research Cr. 1-8

Research in preparation for doctoral dissertation. Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students.

Repeatable for 12 Credits

BMB 9991 Doctoral Candidate Status I: Dissertation Research and Direction Cr. 7.5

Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students.

BMB 9992 Doctoral Candidate Status II: Dissertation Research and Direction Cr. 7.5

Offered Every Term.

Prerequisite: BMB 9991 with a minimum grade of S

Restriction(s): Enrollment is limited to Graduate level students.

BMB 9993 Doctoral Candidate Status III: Dissertation Research and Direction Cr. 7.5

Offered Every Term.

Prerequisite: BMB 9992 with a minimum grade of S

Restriction(s): Enrollment is limited to Graduate level students.

BMB 9994 Doctoral Candidate Status IV: Dissertation Research and Direction Cr. 7.5

Offered Every Term.

Prerequisite: BMB 9993 with a minimum grade of S

Restriction(s): Enrollment is limited to Graduate level students.

BMB 9995 Candidate Maintenance Status: Doctoral Dissertation Research and Direction Cr. 0

Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students.

Course Material Fees: \$370.26

Repeatable for 0 Credits

BME - BIOMEDICAL ENGINEERING

BME 1910 Biomedical Engineering Design Lab I Cr. 1

Application of engineering principles to biomedical engineering problems through laboratory and design exercises. First of a six-semester sequence; work on a biomedical engineering team; basics of biomedical engineering design. Offered Fall.

Prerequisites: May be taken concurrently: BE 1500 with a minimum grade of C-

Restriction(s): Enrollment is limited to Undergraduate level students; enrollment is limited to students with a major in Biomedical Engineering or Biomedical Engg Honors.

Course Material Fees: \$25

BME 1920 Biomedical Engineering Design Lab II Cr. 1

Application of engineering principles to biomedical engineering problems through laboratory and design exercises. Second of a six-semester sequence; basic analysis of biomaterials and design importance of materials. Offered Winter.

Prerequisite: BE 1300 (may be taken concurrently) with a minimum grade of C-

Restriction(s): Enrollment is limited to Undergraduate level students; enrollment is limited to students with a major in Biomedical Engineering or Biomedical Engg Honors.

Course Material Fees: \$100

BME 1925 Biomedical Engineering Design Laboratory: Jump Start I Cr. 2

Laboratory and design exercises focusing on fundamental design processes for biomedical engineering and the application of materials science to BME. This course replaces the BME 1910 - BME 1920 sequence for students who transfer into the program in the second year. Offered Spring/Summer.

Restriction(s): Enrollment is limited to students with a major in Biomedical Engineering or Biomedical Engg Honors.

Course Material Fees: \$43

BME 2010 Introduction to Physiology for Engineers Cr. 2

Introduction to human physiological and pathophysiological processes. Offered Winter.

Prerequisite: BIO 1510 with a minimum grade of C- and CHM 1240 with a minimum grade of C-

Restriction(s): Enrollment is limited to Undergraduate level students.

BME 2070 Introduction to Anatomy for Engineers Cr. 2

A text and models based anatomy course for undergraduate students in biomedical engineering. This course is intended to give the students an introductory experience of the study of human anatomy in relation to engineering principles. Offered Fall.

Prerequisites: BIO 1510 with a minimum grade of C-

Restriction(s): Enrollment is limited to Undergraduate level students; enrollment is limited to students with a major in Biomedical Engineering or Biomedical Engg Honors.

Course Material Fees: \$25

BME 2910 Biomedical Engineering Design Lab III Cr. 1

Application of engineering principles to biomedical engineering problems through laboratory and design exercises. Third of a six-semester sequence; analysis of musculoskeletal forces biomechanics. Offered Fall.

Prerequisite: (BME 1920 with a minimum grade of C- or BME 1925 with a minimum grade of C-) and ME 2410 (may be taken concurrently) with a minimum grade of C-

Restriction(s): Enrollment is limited to Undergraduate level students; enrollment is limited to students with a major in Biomedical Engineering or Biomedical Engg Honors.

Course Material Fees: \$25

BME 2920 Biomedical Engineering Design Lab IV Cr. 1

Application of engineering principles to biomedical engineering problems through laboratory and design exercises involving tissue biomechanics. Introduction to finite element modeling. Fourth of a six-semester sequence. Offered Winter.

Prerequisite: BE 2100 (may be taken concurrently) with a minimum grade of C- and BME 2010 (may be taken concurrently) with a minimum grade of C- and ME 2420 (may be taken concurrently) with a minimum grade of C-

Restriction(s): Enrollment is limited to Undergraduate level students; enrollment is limited to students with a major in Biomedical Engineering or Biomedical Engg Honors.

Course Material Fees: \$25

BME 3470 Biomedical Signals and Systems Cr. 3

Mathematical, engineering and computer techniques for describing and analyzing biomedical signals, including ECG, EEG, EMG, blood pressure, and tomographic images. Offered Fall.

Prerequisites: May be taken concurrently: BME 3910 with a minimum grade of C- and ECE 3300 with a minimum grade of C-

Restriction(s): Enrollment is limited to Undergraduate level students; enrollment limited to students in the College of Engineering; enrollment is limited to students in the Department of Biomedical Engineering; enrollment is limited to students with a major in Biomedical Engineering or Biomedical Engg Honors; enrollment limited to students in the following programs: BS in Biomedical Engineering, BS in Chemical Engineering, BS in Civil Engineering, BS in Electrical Engineering, BS in Industrial Engineering, BS in Mechanical Engineering.

Course Material Fees: \$50

BME 3910 Biomedical Engineering Design Lab V Cr. 1

Application of engineering principles to biomedical engineering problems through laboratory and design exercises. Focus on measurement, analysis, modeling, and interaction with biomedical signals from living systems. Fifth of a six-semester sequence. Offered Fall.

Prerequisite: BE 1500 with a minimum grade of C- and MAT 2150 with a minimum grade of C- and ENG 3050 with a minimum grade of C- and BME 3470 (may be taken concurrently) with a minimum grade of C-

Restriction(s): Enrollment is limited to Undergraduate level students; enrollment is limited to students with a major in Biomedical Engineering or Biomedical Engg Honors.

Course Material Fees: \$25

BME 3920 Biomedical Engineering Design Lab VI Cr. 2

Application of engineering principles to biomedical engineering problems through laboratory and design exercises. Introduction to the capstone design process. Integration of the design process with the complete government regulation system for medical device design. Use of advanced CAE tools for analysis. Sixth of a six-semester sequence. Offered Winter.

Prerequisite: BME 3910 with a minimum grade of C-

Restriction(s): Enrollment is limited to Undergraduate level students; enrollment is limited to students with a major in Biomedical Engineering or Biomedical Engg Honors.

Course Material Fees: \$100

BME 4010 Engineering Physiology Laboratory Cr. 1

Measurement and analysis of physiological signals on living systems, with focus on neural, cardiovascular, respiratory and muscular systems. Includes a student-designed experiment on a physiological system. Offered Winter.

Prerequisites: BME 2010 with a minimum grade of C-

Restriction(s): Enrollment is limited to Undergraduate level students; enrollment is limited to students with a major in Biomedical Engineering or Biomedical Engg Honors.

Course Material Fees: \$30

BME 4210 Introduction to Biomechanics Cr. 3

Broad introduction to the application of mechanical engineering principles to biomedical engineering, including motion analysis, injury and forensic biomechanics, cardiovascular and pulmonary mechanics, and design of implants with mechanical functions. Offered Winter.

Prerequisite: CHE 3200 with a minimum grade of C- and ME 2420 with a minimum grade of C-

Restriction(s): Enrollment is limited to Undergraduate level students; enrollment limited to students in the College of Engineering; enrollment is limited to students in the Department of Biomedical Engineering; enrollment is limited to students with a major in Biomedical Engineering or Biomedical Engg Honors; enrollment limited to students in the following programs: BS in Biomedical Engineering, BS in Chemical Engineering, BS in Civil Engineering, BS in Electrical Engineering, BS in Industrial Engineering, BS in Mechanical Engineering.

BME 4310 Introduction to Biomaterials Cr. 3

Broad introduction to the field of biomaterials and its application to tissue engineering, implant design, controlled drug delivery, and designer materials for therapeutic use. Offered Winter.

Prerequisite: CHE 3200 with a minimum grade of C- and ME 2420 with a minimum grade of C-

Restriction(s): Enrollment is limited to Undergraduate level students; enrollment limited to students in the College of Engineering; enrollment is limited to students in the Department of Biomedical Engineering; enrollment is limited to students with a major in Biomedical Engineering or Biomedical Engg Honors; enrollment limited to students in the following programs: BS in Biomedical Engineering, BS in Chemical Engineering, BS in Civil Engineering, BS in Electrical Engineering, BS in Industrial Engineering, BS in Mechanical Engineering.

BME 4410 Introduction to Biomedical Instrumentation Cr. 3

Broad introduction to the use and design of instrumentation for biomedical applications, in both clinical and research use; includes filtering techniques, safety issues, and special concerns for implanted and external systems. Offered Winter.

Prerequisites: BME 3470 with a minimum grade of C- and ECE 3300 with a minimum grade of C-

Restriction(s): Enrollment is limited to Undergraduate level students; enrollment limited to students in the College of Engineering; enrollment is limited to students in the Department of Biomedical Engineering; enrollment is limited to students with a major in Biomedical Engineering or Biomedical Engg Honors; enrollment limited to students in the following programs: BS in Biomedical Engineering, BS in Chemical Engineering, BS in Civil Engineering, BS in Electrical Engineering, BS in Industrial Engineering, BS in Mechanical Engineering.

Course Material Fees: \$25

BME 4910 Biomedical Engineering Capstone Design I Cr. 3

Satisfies General Education Requirement: Writing Intensive Competency First in a two-semester sequence during which student teams develop a design to address a biomedical engineering challenge; includes discussions with clinical faculty, analysis of current solutions, and finalization of conceptual design. Offered Fall.

Prerequisite: BME 3920 with a minimum grade of C-

Restriction(s): Enrollment is limited to Undergraduate level students; enrollment limited to students with a class of Senior; enrollment is limited to students with a major in Biomedical Engineering or Biomedical Engg Honors.

Course Material Fees: \$50

BME 4920 Biomedical Engineering Capstone Design II Cr. 3

Second of a two-semester sequence. Students develop and test a prototype of their biomedical engineering design; culminates in a public design expo to exhibit student designs. Offered Winter.

Prerequisite: BME 4910 with a minimum grade of C-

Restriction(s): Enrollment is limited to Undergraduate level students; enrollment limited to students with a class of Senior; enrollment is limited to students with a major in Biomedical Engineering or Biomedical Engg Honors.

Course Material Fees: \$50

BME 5010 Quantitative Physiology Cr. 4

Basic principles of human physiology presented from the engineering perspective. Bodily functions, their regulation and control discussed in quantitative terms and illustrated by mathematical models where feasible. Offered Fall, Winter.

Equivalent: CHE 5100, ECE 5100, ME 5100

BME 5020 Computer and Mathematical Applications in Biomedical Engineering Cr. 4

Application of numerical methods in biomedical engineering. Programming algorithms and development of data analysis interfaces using Matlab and Excel. Development and refinement of mathematical models, binary data storage and round-off error, algorithm truncation error, and application of Taylor series for function approximation, error estimation, and algorithm development. Numerical methods for solving: roots of equations, systems of linear equations, system optimization, regression and interpolation, integration, differentiation, and ordinary and partial differential equations. Attention is focused on application of techniques within biomedical engineering. Offered Fall, Winter.

BME 5040 Fundamentals of Engineering Analysis Cr. 2

Intended to train biomedical engineering students, who have no engineering background, with fundamental principles of engineering and basics of an engineering programming language. It includes Matlab programming language and basics of engineering statics, dynamics, strength of materials, and electrical circuits. Offered Fall.

BME 5070 Engineering Anatomy Cr. 4

A cadaver based anatomy course for undergraduate students and MS-level students in biomedical engineering. This hands-on course is intended to give the students directed experience of the study of human anatomy in relation to engineering principles. The histological study of tissues in relation to mechanical function of the organism is included in this study. Offered Fall.

Prerequisites: BME 2070 with a minimum grade of C-

Restriction(s): Enrollment is limited to Graduate or Undergraduate level students; enrollment limited to students in a BS in Biomedical Engg degree.

Course Material Fees: \$225

BME 5130 Vehicle Safety Engineering Cr. 4

Role of vehicle in road safety, occupation and pedestrian injury mechanisms, measures of vehicle safety performance, driver behavior and vehicle interface. Use of new technology to improve vehicle safety. Offered Intermittently.

BME 5210 Musculoskeletal Biomechanics Cr. 4

Structure and properties of the major tissue components of the musculoskeletal system and evaluation of how tissues combine to provide support and motion to the body. Offered Fall.

Prerequisite: BME 5010 with a minimum grade of C or BMS 6550 with a minimum grade of C

Equivalent: ME 5160

BME 5220 Cellular and Tissue Biomechanics Cr. 3

Introduces biomechanics on the cellular to the tissue level. We will be studying mediators of cell mechanics such as the cytoskeleton, extracellular matrix and receptor-ligand interactions. Topics include cell adhesion, cell motility, and hemodynamics. Understanding of these topics will lead to discussion of translation of these forces up to the tissue level and subsequent tissue function. Offered Fall.

Prerequisites: MAT 2010 with a minimum grade of C- and MAT 2020 with a minimum grade of C-

BME 5310 Device and Drug Approval and the FDA Cr. 3

Government regulations and industrial procedures that lead to device/drug approval. Offered Spring/Summer.

BME 5350 Regenerative Biology and Medicine for Biomedical Engineers Cr. 4

Introduces students specializing in biomedical engineering and premedical students to the conceptual and methodological principles of modern regenerative biology and medicine. Includes a review of research methods and achievements in this field and the translational applications of regenerative biology to tissue engineering and the development of regenerative therapies. Offered Winter.

Prerequisites: BME 2070 with a minimum grade of C-

BME 5360 Histology and Embryology Cr. 4

Examines the normal structure and development of human tissues and organisms and the applications of this knowledge to biomedical engineering. Working with microscopes, students will study the molecular and cellular characteristics of different tissues and the lab procedures used for the analysis of tissue specimens. Particular attention is focused on technical principles of tissue engineering of human organs in experimental and clinical settings. Offered Every Other Fall.

Prerequisites: BME 2070 with a minimum grade of C-

BME 5370 Introduction to Biomaterials Cr. 4

Introduction to study of both biological materials (bone, muscle, etc.) and materials for medical applications. Topics include tissue properties and effects of pathology, biocompatibility, and design considerations. Offered Winter.

Prerequisites: BIO 1510 with a minimum grade of C- or May be taken concurrently: BMS 5010 with a minimum grade of B-

Equivalent: ME 5180

BME 5380 Biocompatibility Cr. 4

Wound healing and the tissue response to foreign materials. The organization, activation, and mechanisms of the immune system. Bioactive materials and the molecular basis for surface recognition and masking. Offered Intermittently.

Prerequisite: BME 5010 with a minimum grade of C or BMS 6550 with a minimum grade of C

Equivalent: MSE 5385

BME 5425 Robotic Systems I Cr. 4

Introduction to robot kinematics and control. Computational algorithms for robot movement, sensor fusion, and intelligent behavior, which are needed to build a system that performs actions and interacts with its environment. Offered Fall.

Prerequisites: BE 2550 with a minimum grade of C- or BE 1500 with a minimum grade of C- or BME 5020 with a minimum grade of C- or ECE 3040 with a minimum grade of C-

Equivalent: ECE 5425

BME 5450 Microscopic Analysis: Methods & Instrumentation Cr. 4

Provides the students specializing in biomedical engineering with a basis for understanding the modern methods of microscopic analysis and the design of different types of instrumentation used for microscopic analysis and imaging. Offered Winter.

Prerequisites: BME 2070 with a minimum grade of C-

BME 5460 Lasers for Medical Applications Cr. 3

Summarizes the wealth of recent research on the principles, technologies and application of lasers in diagnostics, therapy and surgery. Includes an overview of optics, optical components used in a typical laser, key principles of lasers and radiation interactions with tissue. The respective types of the laser (solid state, gas, dye, and semiconductor) are reviewed to provide an understanding of the wide diversity, and therefore, the large possible choice of these devices for a specific diagnosis, treatment, or surgery. Offered Winter.

Equivalent: ME 5465, PHY 5460

BME 5990 Directed Study Cr. 1-4

Independent projects on subjects in the field of biomedical engineering. Offered Every Term.

Repeatable for 4 Credits

BME 5995 Special Topics in Biomedical Engineering I Cr. 1-4

Topics as announced in Schedule of Classes. Offered Intermittently.

BME 6130 Accident Reconstruction Cr. 3

Passenger car and light truck behavior in collisions; recognition of roadway markings and vehicle damage used to analyze vehicle accidents and to use that evidence to reconstruct driver, vehicle and occupant dynamics at the time of the collision. Offered Spring/Summer.

BME 6470 Smart Sensor Technology I: Design Cr. 4

Introduction to various types of sensors and the design of basic analog VLSI circuit building blocks. Offered Winter.

Equivalent: ECE 6570, PHY 6570

BME 6480 Biomedical Instrumentation Cr. 4

Engineering principles of physiological measurements, signal conditioning equipment, amplifiers, recorders and transducers. Recent advances in instrumentation. Offered Winter.

Prerequisites: BME 5020 with a minimum grade of B- and ECE 3300 with a minimum grade of C- or BME 5040 with a minimum grade of B-

Equivalent: ECE 6180, ME 6180

BME 6991 Internship in Industry Cr. 1-4

Industrial internship in biomedical engineering. Offered Every Term.

Repeatable for 99 Credits

BME 7010 Functional Anatomy Cr. 4

Gross dissection-based course designed to introduce students to the anatomical structures associated with major physiological functions important to biomedical engineering. Offered Spring/Summer.

Prerequisite: BME 5010 with a minimum grade of B-

Restriction(s): Enrollment is limited to students with a major in Biomedical Engineering; enrollment limited to students in a Doctor of Philosophy degree.

Course Material Fees: \$100

BME 7020 Cardiovascular Systems Modeling Cr. 4

Application of engineering principals and mathematical and computational techniques to cardiovascular systems. Partial differential equations, signal transduction pathway and biotransport modeling, and introduction to systems biology approaches. Offered Winter.

Restriction(s): Enrollment is limited to Graduate level students.

BME 7030 Mechanisms and Models of Cellular Regulation for Engineering Cr. 3

Basic concepts of intracellular signaling pathways in response to environmental stimuli such as biomaterials and mechanical forces. Offered Intermittently.

Restriction(s): Enrollment is limited to Graduate level students.

BME 7100 Mathematical Modeling in Impact Biomechanics Cr. 4

Review of models created for impact simulations. Regional impact simulation models. Human and dummy models subject to various restraint systems. Offered Winter.

Prerequisite: BME 5010 with a minimum grade of B-

Restriction(s): Enrollment is limited to Graduate level students.

Equivalent: ECE 7100, IE 7100, ME 7100

BME 7120 Applied Finite Element Methods in Biomechanical Analysis Cr. 4

Structural, stress, and strain analysis of the human body and/or artificial implants, using realistic biomechanical data for relevant tissues and material. Theoretical background and applied analysis. Offered Intermittently.

Prerequisite: ME 5040 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

BME 7150 Biomechanics of Blast-Related Injuries Cr. 3

This course covers new and old information developed by military researchers on injuries sustained by military personnel due to explosions or blasts caused by a variety of weapon systems. Injuries to body regions from head to foot are discussed. Particular emphasis is placed on injuries to the spine and lower extremities for the mounted soldier and on brain injury for both the mounted and dismounted soldier. The course includes the modeling of blast and blast-related effects on selected body regions. Offered Fall.

Prerequisite: BME 7100 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

BME 7160 Impact Biomechanics Cr. 4

Biomechanical response of the body regions and the whole body to impact. Mechanisms of injury in blunt impact. Effects of restraints on injury reduction. Development of test surrogates such as dummies. Offered Fall.

Prerequisite: BME 5010 with a minimum grade of B-

Restriction(s): Enrollment is limited to Graduate level students.

Course Material Fees: \$10

Equivalent: ME 7160

BME 7170 Experimental Methods in Impact Biomechanics Cr. 4

Lecture and laboratory combined; principles of impact testing; hands-on experience in use of impact-test equipment, including sled, pendulum, other types of impactors, and drop-test techniques. Offered Every Other Winter.

Prerequisite: BME 6480 with a minimum grade of C and BME 7160 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

Course Material Fees: \$100

BME 7300 Advanced Topics in Biomaterials and Tissue Biomechanics Cr. 4

Seminar format: advanced topics presented to the class; lectures by the instructor and by the participants based on literature reviews. Topics determined by student interest. Offered Every Other Fall.

Prerequisite: BME 5210 with a minimum grade of C or BME 5370 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

Equivalent: ME 7180, MSE 7180

BME 7370 Biomaterial Interfaces Cr. 4

Effects of topography and texture on the performance of biomaterials. Self-organization of biomembranes and supramolecular systems. Offered Winter.

Prerequisite: BME 5370 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

BME 7390 Tissue Engineering and Hybrid Systems Cr. 4

Seminar and project based approach to the design, development, analysis and application of organ and tissue replacement systems which incorporate processed materials and living cells. Offered Fall.

Prerequisites: BME 5370 with a minimum grade of C and CHE 7100 with a minimum grade of C or BME 5020 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

Equivalent: CHE 7390

BME 7425 Robotics Systems II Cr. 4

Project-based class to understand technology that interfaces computer engineering, software design, electronics and sensors with robotics. Advanced application areas of robotics will be covered including medical, military, space, vehicle robotics. Offered Winter.

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students in the College of Engineering.

Equivalent: ECE 7425

BME 7470 Smart Sensor Technology II: Characterization and Fabrication Cr. 4

Integration of ongoing research in integrated technology of smart sensors. Design of smart sensor devices using computer simulation. Fabrication of smart sensor. Offered Spring/Summer.

Prerequisite: BME 6470 with a minimum grade of B- or ECE 6570 with a minimum grade of B- or PHY 6570 with a minimum grade of B-

Restriction(s): Enrollment is limited to Graduate level students.

Course Material Fees: \$50

Equivalent: ECE 7570, PHY 7580

BME 7490 Biomedical Microsystems Cr. 4

Biomedical microsystems, with a focus on microfluidics and lab-on-a-chip technologies for medical diagnostics and biological research. Broad coverage of microscale physics; microfabrication methods; separation, purification, and other on-chip processes; biosensing. Offered Fall.

Prerequisite: ECE 5575 with a minimum grade of C or ECE 6570 with a minimum grade of C or BME 6470 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

Equivalent: CHE 7490, ECE 7590

BME 7670 Experimental Methods in Physiology Cr. 3

Basic principles and techniques for monitoring and reading EMGs, EEGs, ECGs, respiratory cycle, pulmonary function, galvanic skin response and polygraph, human acceleration response. Designing and carrying out a project involving human body acceleration measures and EMG responses; a second project will be designed and carried out using measurement techniques chosen by the students. Offered Winter.

Prerequisite: BME 5010 with a minimum grade of B-

Restriction(s): Enrollment is limited to Graduate level students.

Course Material Fees: \$40

BME 7710 Magnetic Resonance Imaging Cr. 4

Science and engineering of magnetic resonance imaging; relaxation times, signal concepts, Fourier imaging, sampling, filtering, and sequence design. Offered Every Other Fall.

Prerequisite: BME 5020 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

BME 7720 MR Imaging of Neurovascular Disease Cr. 3

Recent advances in MRI technology applied to human brain vascular diseases. Methods include: 3D anatomical imaging, diffusion tensor imaging, functional brain imaging, perfusion imaging, and susceptibility weighted imaging. Offered Every Other Fall.

Prerequisite: BME 5010 with a minimum grade of B-

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students in the College of Engineering.

Equivalent: PYC 7320

BME 7730 Medical Imaging Systems Cr. 3

Exposes students to the world of medical and biomedical imaging with emphasis on principles, approaches and applications of each modern imaging modality. Basic knowledge of MATLAB programming language is required. Offered Fall.

Restriction(s): Enrollment is limited to Graduate level students.

Equivalent: ECE 7740

BME 7990 Directed Study Cr. 1-4

Independent projects on subjects of interest in the field of biomedical engineering. Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students.

Repeatable for 12 Credits

BME 7995 Special Topics in Biomedical Engineering II Cr. 1-4

Topics as announced in Schedule of Classes. Offered Intermittently.

Restriction(s): Enrollment is limited to Graduate level students.

BME 7996 Research Cr. 1-4

Combined experimental and analytical study of a problem in the field of biomedical engineering. Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students.

Repeatable for 998.99 Credits

BME 8070 Seminar in Biomedical Engineering Cr. 1

Lectures on biomedical engineering and related fields by guest speakers, faculty, and students. M. S. and Ph.D. students are required to take one semester. Offered Fall, Winter.

Restriction(s): Enrollment is limited to Graduate level students.

BME 8080 Doctoral Seminar in Biomedical Engineering Cr. 1

Seminar and research discussion based on research projects of BME doctoral students. Offered Every Term.

Restriction(s): Enrollment is limited to students with a major in Biomedical Engineering; enrollment limited to students in a Doctor of Philosophy degree.

BME 8999 Master's Thesis Research and Direction Cr. 1-8

Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students; enrollment is limited to students with a major in Biomedical Engineering.

Repeatable for 8 Credits

BME 9990 Pre-Doctoral Candidacy Research Cr. 1-8

Research in preparation for doctoral dissertation. Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students; enrollment is limited to students with a major in Biomedical Engineering.

Repeatable for 12 Credits

BME 9991 Doctoral Candidate Status I: Dissertation Research and Direction Cr. 7.5

Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students; enrollment is limited to students with a major in Biomedical Engineering.

BME 9992 Doctoral Candidate Status II: Dissertation Research and Direction Cr. 7.5

Offered Every Term.

Prerequisite: BME 9991 with a minimum grade of S

Restriction(s): Enrollment is limited to Graduate level students; enrollment is limited to students with a major in Biomedical Engineering.

BME 9993 Doctoral Candidate Status III: Dissertation Research and Direction Cr. 7.5

Offered Every Term.

Prerequisite: BME 9992 with a minimum grade of S

Restriction(s): Enrollment is limited to Graduate level students; enrollment is limited to students with a major in Biomedical Engineering.

BME 9994 Doctoral Candidate Status IV: Dissertation Research and Direction Cr. 7.5

Offered Every Term.

Prerequisite: BME 9993 with a minimum grade of S

Restriction(s): Enrollment is limited to Graduate level students; enrollment is limited to students with a major in Biomedical Engineering.

BME 9995 Candidate Maintenance Status: Doctoral Dissertation Research and Direction Cr. 0

Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students; enrollment is limited to students with a major in Biomedical Engineering.

Course Material Fees: \$370.26

Repeatable for 0 Credits

BMS - BASIC MEDICAL SCIENCE

BMS 6010 Responsible Conduct in Biomedical Research Cr. 1

Nature, motivation and ethics in biomedical science situations liable to fraud, misconduct, conflicts of interest, and plagiarism in research, in peer and editorial review, and in authorship. Methods of safe laboratory practice and ethical human and animal use as research subjects in science. Offered for graduate credit only. Offered Spring/Summer.

Restriction(s): Enrollment is limited to Graduate level students.

BMS 6550 Medical Anatomy for Health Professionals Cr. 4

Basics of human anatomy for BMS and selected graduate students.

Offered Spring/Summer.

Course Material Fees: \$15

BMS 7100 Introduction to the Business of Biotechnology Cr. 3

Translation of biomedical innovation from bench to bedside, with focus on interplay between healthcare needs, regulatory agencies, and commercialization pathways. Offered Winter.

Equivalent: IBS 7110

BMS 7115 Special Topics in Biotechnology Commercialization Cr. 1

Designed to provide practical experience in defining the relationships between academic discovery science and business development, with a focus on best practices for presenting basic research-commercial products to external, interested individuals. Offered Winter.

Restriction(s): Enrollment is limited to Graduate level students.

Equivalent: IBS 7115

BMS 7880 Special Topics/Projects Cr. 1-4

Up to four credits in research, laboratory, discussion, or field work, in any combination; for students in Basic Medical Sciences or Medical Research program. Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students.

BMS 7999 Essays in Basic Medical Science Cr. 3

Methodologies in library research and critical evaluation of current biomedical literature. Written summary and report on a specific topic in current biomedical literature. Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students with a class of Candidate Masters.

CB - CANCER BIOLOGY

CB 7130 Clinical Aspects of Cancer Biology Cr. 1

Cancer Biology Ph.D. students accompany clinicians during rounds in hospital and outpatient clinics, as well as attend clinical conferences and related sessions. Offered for S and U grades only. Offered Spring/Summer.

Restriction(s): Enrollment is limited to students with a major in Cancer Biology.

CB 7210 Fundamentals of Cancer Biology Cr. 3

The lectures are organized into three thematic blocks including cancer development and pathology, mechanisms of cancer development and progression, and principles of cancer prevention and therapy. Offered Winter.

Prerequisite: IBS 7015 with a minimum grade of C

Restriction(s): Enrollment is limited to students with a major in Cancer Biology.

CB 7220 Molecular Biology of Cancer Development Cr. 3

Topics covered include: genetics and molecular basis of normal cell transformation into malignant cancer cells; and molecular mechanisms that are fundamental to the regulation of cell growth, development, and differentiation. The students are expected to present and participate in discussions of one or more key recent papers that are relevant to the lectures. Students with a strong background in biology/molecular biology are encouraged to apply. Offered Every Other Year.

Prerequisite: IBS 7015 with a minimum grade of C and CB 7210 with a minimum grade of C

Restriction(s): Enrollment is limited to students with a major in Cancer Biology.

Equivalent: PHC 7220

CB 7240 Principles of Cancer Therapy Cr. 2

Continuation of the principles of cancer therapy taught in CB 7210. Concepts relating to tumor biology and the biochemistry and pharmacology of both classic and targeted agents are covered. Offered Every Other Winter.

Prerequisite: IBS 7015 with a minimum grade of C and CB 7210 with a minimum grade of C

Restriction(s): Enrollment is limited to students with a major in Cancer Biology.

Equivalent: PHC 7240

CB 7300 Special Topics in Cancer Biology Cr. 1-3

Designed to provide students exposure to emerging themes and technologies in the cancer field, as well as to cancer related topics that are not covered in detail in other courses. Offered Every Term.

Prerequisite: CB 7210 with a minimum grade of C

Restriction(s): Enrollment is limited to students with a major in Cancer Biology.

Repeatable for 3 Credits

CB 7410 Cancer Immunology and Immunotherapy Cr. 3

Cancer immunotherapy based on the molecular mechanisms of T-cell development, tolerance and activation. Topics include T-cell receptor and co-stimulatory signal-mediated regulation of T-cell activation, transcriptional regulation of T-cell differentiation, and T-cell effector function and regulatory mechanisms. Each week will consist of a one-hour lecture and a two-hour discussion. Offered Every Other Winter.

Prerequisite: IBS 7015 with a minimum grade of C

Restriction(s): Enrollment is limited to students with a major in Cancer Biology.

Equivalent: IM 7410

CB 7430 Cancer Epidemiology Cr. 2

Introduction to the principal concepts and methods used in cancer epidemiology. Important evaluations of cancer burden in the United States and worldwide, as well as the major causes of human cancer. Students will be required to review and provide critical appraisal of selected literature in innovative areas of cancer epidemiologic research. Offered Every Other Year.

Restriction(s): Enrollment is limited to students with a major in Cancer Biology; enrollment limited to students in a Master in Public Health degree.

CB 7460 Mechanisms of Neoplasia: Alterations to Cellular Signaling Cr. 3

Course covers cellular regulatory signal-transduction networks that are often activated inappropriately in malignant cells. Focus on the major principles of cancer cell biology including survival, apoptosis, adhesion, and cell cycle deregulation. Offered Every Other Fall.

Prerequisite: CB 7210 with a minimum grade of C and IBS 7015 with a minimum grade of C

Restriction(s): Enrollment is limited to students with a major in Cancer Biology.

CB 7600 Applied Cancer Biostatistics Cr. 2

Concepts and applications of statistical methods and data analysis as related to cancer research. Students will have hands-on experience in statistical thinking, analyzing, and interpreting through the interactive teaching modules. The course provides an opportunity for students to understand statistical analyses in the medical literature, as well as provide guidance for planning and analyzing their own research. Offered Every Other Fall.

Restriction(s): Enrollment is limited to students with a major in Cancer Biology.

CB 7700 Recent Developments in Cancer Biology Cr. 1

This course is Journal club format designed to develop proficiency in critically evaluating original scientific literature, to broaden knowledge of current cancer research, and to provide insight into different research strategies. Each student is expected to participate in class discussions. Offered Fall, Winter.

Restriction(s): Enrollment is limited to students with a major in Cancer Biology.

Repeatable for 6 Credits

CB 7710 Individual Studies in Cancer Biology Cr. 1-3

Cancer Biology graduate students pursue experimental research under the guidance of selected faculty. This is the research rotation through which students select their Ph.D. dissertation mentor. Offered Every Term.

Restriction(s): Enrollment is limited to students with a major in Cancer Biology.

Repeatable for 3 Credits

CB 7800 Rigor and Reproducibility in Cancer Biology Cr. 1

Provide students with the ability to understand and learn how to conduct rigorous and reproducible cancer research. This includes experimental design, data interpretation, publishing, animal and human research, and other topics relevant for the conduct of responsible research in Cancer Biology. Offered Winter.

Restriction(s): Enrollment is limited to students with a major in Cancer Biology.

CB 7890 Seminar in Cancer Biology Cr. 1

This course provides second year and above students with the opportunity to present their dissertation work to their peers. This class not only provides students with the opportunity to develop their oral presenting skills, but also gives the students a chance to critically evaluate their peers. Offered Fall, Winter.

Restriction(s): Enrollment is limited to students with a major in Cancer Biology.

Repeatable for 6 Credits

CB 7996 Research Cr. 1-15

Directed study and pre-dissertation research with faculty in the program.
Offered Every Term.

Restriction(s): Enrollment is limited to students with a major in Cancer Biology.

Repeatable for 15 Credits

CB 7999 Master's Essay Cr. 1-4

Research in the research literature, and writing of an essay on a topic area in contemporary cancer biology. Offered Every Term.

Restriction(s): Enrollment is limited to students with a major in Cancer Biology.

Repeatable for 4 Credits

CB 8999 Master's Thesis Research and Direction Cr. 1-8

Offered Every Term.

Restriction(s): Enrollment is limited to students with a major in Cancer Biology.

Repeatable for 8 Credits

CB 9991 Doctoral Candidate Status I: Dissertation Research and Direction Cr. 7.5

Offered Every Term.

Restriction(s): Enrollment is limited to students with a major in Cancer Biology.

CB 9992 Doctoral Candidate Status II: Dissertation Research and Direction Cr. 7.5

Offered Every Term.

Prerequisite: CB 9991 with a minimum grade of S

Restriction(s): Enrollment is limited to students with a major in Cancer Biology.

CB 9993 Doctoral Candidate Status III: Dissertation Research and Direction Cr. 7.5

Offered Every Term.

Prerequisite: CB 9992 with a minimum grade of S

Restriction(s): Enrollment is limited to Graduate level students; enrollment is limited to students with a major in Cancer Biology.

CB 9994 Doctoral Candidate Status IV: Dissertation Research and Direction Cr. 7.5

Offered Every Term.

Prerequisite: CB 9993 with a minimum grade of S

Restriction(s): Enrollment is limited to Graduate level students; enrollment is limited to students with a major in Cancer Biology.

CB 9995 Candidate Maintenance Status: Doctoral Dissertation Research and Direction Cr. 0

Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students; enrollment is limited to students with a major in Cancer Biology.

Course Material Fees: \$370.26

Repeatable for 0 Credits

CE - CIVIL ENGINEERING

CE 2410 Statics Cr. 3

Basic concepts and principles of statics with applications to Newton's Laws of Motion to engineering problems. Forces, moments, equilibrium, couples, free body diagrams, trusses, frames, fluid statics, friction, area and mass moment of inertia. Offered Every Term.

Prerequisites: MAT 2020 with a minimum grade of C- and PHY 2175 with a minimum grade of C- and BE 1500 with a minimum grade of C-

Equivalent: ME 2410

CE 2420 Elementary Mechanics of Materials Cr. 3

Elastic relationships between external forces acting on deformable bodies and the associated stresses and deformations; structural members subjected to axial load, torsion, and bending; column buckling; combined stresses; repeated loads; unsymmetrical bending. Offered Every Term.

Prerequisites: ME 2410 with a minimum grade of C- or CE 2410 with a minimum grade of C-

Equivalent: ME 2420

CE 3010 Introduction to CAD in Civil Engineering Cr. 3

Principles of computer graphics and utilization of computers in the design process. Civil engineering applications of AutoCAD. Offered Every Other Year.

Prerequisite: MAT 2020 with a minimum grade of C- and BE 1200 with a minimum grade of C-

Restriction(s): Enrollment limited to students in the College of Engineering; enrollment limited to students in the following programs: BS in Biomedical Engineering, BS in Chemical Engineering, BS in Civil Engineering, BS in Electrical Engineering, BS in Industrial Engineering, BS in Mechanical Engineering.

CE 3070 Surveying Cr. 3

Principles of plane surveying; measurement of horizontal and vertical distance, directions and angles, traverses, areas. Offered Intermittently.

Prerequisite: PHY 2185 with a minimum grade of C- or PHY 2180 with a minimum grade of C-

Restriction(s): Enrollment limited to students in the College of Engineering; enrollment limited to students in the following programs: BS in Biomedical Engineering, BS in Chemical Engineering, BS in Civil Engineering, BS in Electrical Engineering, BS in Industrial Engineering, BS in Mechanical Engineering.

Course Material Fees: \$20

CE 3250 Applied Fluid Mechanics Cr. 4

Application of theoretical fluid mechanics to problems of special interest to civil engineers including pipe flow, open channel flow, forces on submerged bodies, and flow measurement. Laboratory component of course provides experimental verification of theories and computer visualization. Offered Fall.

Prerequisite: MAT 2030 with a minimum grade of C-

Restriction(s): Enrollment limited to students in the College of Engineering; enrollment limited to students in the following programs: BS in Biomedical Engineering, BS in Chemical Engineering, BS in Civil Engineering, BS in Electrical Engineering, BS in Industrial Engineering, BS in Mechanical Engineering.

Course Material Fees: \$15

CE 3450 Civil Engineering Materials Cr. 4

Structure, composition and engineering properties of aggregates, cement concrete, asphalt, asphalt concrete, and other civil engineering materials. Mix design, testing, and quality control. Material Fee as indicated in the Schedule of Classes. Offered Winter.

Prerequisite: BE 2100 with a minimum grade of C- and CE 2420 (may be taken concurrently) with a minimum grade of C-

Restriction(s): Enrollment limited to students in the College of Engineering; enrollment limited to students in the following programs: BS in Biomedical Engineering, BS in Chemical Engineering, BS in Civil Engineering, BS in Electrical Engineering, BS in Industrial Engineering, BS in Mechanical Engineering.

Course Material Fees: \$35

CE 4210 Introduction to Environmental Engineering Cr. 3

Introduction to environmental laws; reaction kinetics; principles of mass balances; plug-flow and completely stirred tank reactors; Stoke's Law; Streeter-Phelps oxygen sag curves; water chemistry; hydrologic cycle; population growth models; elements of soil waste management and air pollution. Offered Winter.

Prerequisite: CE 3250 with a minimum grade of C-

Restriction(s): Enrollment limited to students in the College of Engineering; enrollment limited to students in the following programs: BS in Biomedical Engineering, BS in Chemical Engineering, BS in Civil Engineering, BS in Electrical Engineering, BS in Industrial Engineering, BS in Mechanical Engineering.

Course Material Fees: \$10

CE 4240 Environmental Engineering Design Cr. 3

Design of engineered environmental systems, including drinking water distribution systems, sanitary and storm water sewer systems, and municipal waste disposal sites. Offered Fall.

Prerequisite: CE 4210 with a minimum grade of C-

Restriction(s): Enrollment limited to students in the College of Engineering; enrollment limited to students in the following programs: BS in Biomedical Engineering, BS in Chemical Engineering, BS in Civil Engineering, BS in Electrical Engineering, BS in Industrial Engineering, BS in Mechanical Engineering.

CE 4400 Structural Analysis Cr. 4

Basic concepts of structural analysis; reactions, forces, and stresses in trusses and beams; influence lines; elastic deflections; introduction to indeterminate structures; computer applications. Offered Fall.

Prerequisites: CE 2410 with a minimum grade of C- and CE 2420 with a minimum grade of C-

Restriction(s): Enrollment limited to students in the College of Engineering; enrollment limited to students in the following programs: BS in Biomedical Engineering, BS in Chemical Engineering, BS in Civil Engineering, BS in Electrical Engineering, BS in Industrial Engineering, BS in Mechanical Engineering.

CE 4410 Steel Design Cr. 3

First course in design of steel structures. Introduction to the concepts, requirements, and fundamental skills for steel building structural design. Offered Winter.

Prerequisites: CE 4400 with a minimum grade of C-

Restriction(s): Enrollment limited to students in the College of Engineering; enrollment limited to students in the following programs: BS in Biomedical Engineering, BS in Chemical Engineering, BS in Civil Engineering, BS in Electrical Engineering, BS in Industrial Engineering, BS in Mechanical Engineering.

CE 4420 Reinforced Concrete Design Cr. 3

First course in design of concrete structures. Design and analysis of reinforced concrete beams, columns, and other structural members; ACI code requirements, cost concerns, safety, industry practices; introduction to prestressed concrete. Offered Fall.

Prerequisite: CE 4400 with a minimum grade of C-

Restriction(s): Enrollment limited to students in the College of Engineering; enrollment limited to students in the following programs: BS in Biomedical Engineering, BS in Chemical Engineering, BS in Civil Engineering, BS in Electrical Engineering, BS in Industrial Engineering, BS in Mechanical Engineering.

CE 4510 Introduction to Geotechnical Engineering Cr. 4

Composition, engineering properties and behavior of soils. Principles of soil mechanics. Experimental determination of engineering classification, strength and deformation characteristics of natural and artificially placed soils. Offered Fall.

Prerequisite: CE 3450 with a minimum grade of C- and CE 3250 (may be taken concurrently) with a minimum grade of C-

Restriction(s): Enrollment limited to students in the College of Engineering; enrollment limited to students in the following programs: BS in Biomedical Engineering, BS in Chemical Engineering, BS in Civil Engineering, BS in Electrical Engineering, BS in Industrial Engineering, BS in Mechanical Engineering.

Course Material Fees: \$30

CE 4600 Transportation Engineering Cr. 3

Transportation functions; transportation systems including highways, railways and airways. Techniques of transportation systems analysis including optimization, network flows and queueing theory. Offered Winter.

Prerequisite: BE 3220 with a minimum grade of C- or BE 2100 with a minimum grade of C-

Restriction(s): Enrollment limited to students in the College of Engineering; enrollment limited to students in the following programs: BS in Biomedical Engineering, BS in Chemical Engineering, BS in Civil Engineering, BS in Electrical Engineering, BS in Industrial Engineering, BS in Mechanical Engineering.

Course Material Fees: \$10

CE 4640 Transportation Design Cr. 3

A description of design elements of various system components of transportation; including the driver, vehicle and roadway. Traffic flow design elements including volume, density and speed; intersection design elements including delay, capacity and accident countermeasures and terminal design elements including inflow, outflow and circulation. Offered Fall.

Prerequisite: CE 4600 with a minimum grade of C-

Restriction(s): Enrollment limited to students in the College of Engineering; enrollment limited to students in the following programs: BS in Biomedical Engineering, BS in Chemical Engineering, BS in Civil Engineering, BS in Electrical Engineering, BS in Industrial Engineering, BS in Mechanical Engineering.

CE 4850 Engineering Economy Cr. 3

Economic analysis of engineering projects. Selection of appropriate interest rates and methods of analysis, analysis and evaluation of alternatives, depreciation and tax considerations, and use of accounting data in comparison of investment alternatives. Offered Fall.

Restriction(s): Enrollment limited to students in the College of Engineering; enrollment limited to students in the following programs: BS in Biomedical Engineering, BS in Chemical Engineering, BS in Civil Engineering, BS in Electrical Engineering, BS in Industrial Engineering, BS in Mechanical Engineering.

Course Material Fees: \$10

Equivalent: IE 4850

CE 4990 Directed Study Cr. 1-4

Supervised study and instruction in civil engineering. Written report required. Offered Every Term.

Restriction(s): Enrollment limited to students in the College of Engineering; enrollment limited to students in the following programs: BS in Biomedical Engineering, BS in Chemical Engineering, BS in Civil Engineering, BS in Electrical Engineering, BS in Industrial Engineering, BS in Mechanical Engineering.

Repeatable for 6 Credits

CE 4995 Senior Design Project Cr. 3

Satisfies General Education Requirement: Writing Intensive Competency Capstone design experience through civil engineering projects. Satisfies General Education Writing Intensive requirement. Offered Winter.

Restriction(s): Enrollment limited to students in the College of Engineering; enrollment limited to students in the following programs: BS in Biomedical Engineering, BS in Chemical Engineering, BS in Civil Engineering, BS in Electrical Engineering, BS in Industrial Engineering, BS in Mechanical Engineering.

CE 5220 Environmental Chemistry Cr. 3

Fundamentals of aqueous chemistry for environmental engineers and scientists. Basic chemistry, equilibria, kinetics and thermodynamics; includes acid/base reactions, precipitation/dissolution, oxidation/reduction reactions and partitioning. Offered Every Other Year.

Course Material Fees: \$5

CE 5230 Water Supply and Wastewater Engineering Cr. 3

Analysis and design of water supply and wastewater treatment systems; water distribution systems; treatment of municipal water supplies, including sedimentation, softening, filtration and disinfection; design of sanitary and storm sewers; primary, secondary and tertiary treatment plant design; sludge handling. Offered Yearly.

Prerequisite: CE 4210 with a minimum grade of C-

Course Material Fees: \$5

CE 5350 Introduction to Structural Dynamics Cr. 4

Dynamic properties of structures, Modeling of dynamic loads. Structural response to dynamic loading. Structural design requirements for dynamic loads. Fundamental techniques of dynamic system analysis. Offered Winter.

Prerequisite: ME 3400 with a minimum grade of C- and CE 4400 with a minimum grade of C-

CE 5370 Finite Element Analysis Fundamentals Cr. 3

Matrix structural analysis, discretization of continuous structural systems, stress analysis. Commercial finite element software preprocessing for developing finite element models; post-processing for evaluating analysis results. Offered Fall.

Prerequisites: CE 4400 with a minimum grade of C-

CE 5410 Energy, Emissions, Environment (E3) Design Cr. 3

Provides students the tools to uncover the relation between energy consumption and energy generation and optimize processes to take most advantage of low emitting energy options. Exposes students to design tools and methodologies from a diverse group of sources including US EPA, DOE, EIA, and the latest in emerging research. Offered Fall.

Equivalent: AET 5410, STE 5410

CE 5510 Geotechnical Engineering I Cr. 4

Site investigation, site improvement, bearing capacity and settlement of shallow foundations, axial capacity and lateral deflection of deep foundations, design of conventional earth retaining walls, and basics of slope stability analyses. Offered Fall.

Prerequisites: CE 4510 with a minimum grade of C-

CE 5520 Geotechnical Engineering II Cr. 3

Lateral earth pressure theories, design of conventional earth-retaining walls and of reinforced earth walls, anchored sheet-pile walls and cofferdams, fundamentals of soft-ground tunneling, two- and three-dimensional slope stability analyses, and static design of earth dams. Offered Every Other Year.

Prerequisites: CE 4510 with a minimum grade of C-

CE 5610 Highway Design Cr. 3

Application of standards, theory and practice in design of streets and highways. Design of streets and highways including cross section elements, shoulder and roadside features. Pavement design and rehabilitation work. Offered Yearly.

Prerequisites: CE 4640 with a minimum grade of C-

CE 5810 Legal Aspects of Engineering and Construction Cr. 3

Business of contracting, construction, liabilities of owner, architect, engineer and contractor. Rights in land, boundaries and foundations. Case studies. Offered Fall.

Course Material Fees: \$5

CE 5830 Business of Engineering Cr. 3

Defining the engineering company, creating the organization, support services, business development, project management, scheduling, budgeting and profitability, operations, financial management and risk management. Offered Every Term.

Prerequisites: CE 4850 with a minimum grade of C-

CE 5995 Special Topics in Civil Engineering I Cr. 1-3

Topics to be announced in Schedule of Classes. Offered Intermittently.

Repeatable for 12 Credits

CE 6010 Introduction to Construction Engineering and Management Cr. 3

An introduction to the organization and management of construction projects. Project lifecycle including engineering, procurement and construction phases. Fundamentals of cost estimating, scheduling, quality, safety and risk management, legal and ethical aspects, construction productivity and lean construction, building codes, and building information modeling. Offered Winter.

Prerequisites: CE 4850 with a minimum grade of C-

Course Material Fees: \$5

CE 6050 Construction Cost Estimating Cr. 3

Estimating construction costs of engineering projects including materials, man-hours, equipment and overhead. Emphasis on construction equipment, including productivity and planning. Bidding and bid documents. Offered Every Other Year.

Prerequisites: CE 4850 with a minimum grade of C-

CE 6060 Construction Techniques and Methods Cr. 3

Construction techniques and methods for excavation, foundations, concrete, wood, steel, masonry, heavy construction, wastewater treatment plants, highways and roads, high rise structures, bridges, and tunneling projects. Offered Every Other Year.

Prerequisites: CE 4450 with a minimum grade of C-

CE 6130 Open Channel Hydraulics Cr. 3

Theoretical development of equations governing flow in open channels. Application to real-world engineering problems involving water surface profiles, flood studies, and river. Offered Winter.

Prerequisites: CE 3250 with a minimum grade of C-

CE 6150 Hydrologic Analysis and Design Cr. 3

Principles of surface water hydrology and their application for evaluation of floods and the design of surface runoff control system; watershed characteristics; design storms and SCS methods; unit hydrographs; hydrologic models; application of computer methods. Offered Every Other Year.

Prerequisite: CE 6130

CE 6190 Groundwater Cr. 3

Historical background, aquifers and aquitards, saturated and unsaturated flow, sources of ground water contamination, artificial recharge of ground water, development of ground water basins and efficient use of ground water resources. Offered Yearly.

Prerequisites: CE 3250 with a minimum grade of C-

CE 6270 Sustainability Assessment and Management Cr. 3

Sustainability assessment and management for engineering design and development; theoretical, regulatory, and practical implications; Detroit and global applications. Offered Yearly.

Prerequisites: CE 4210 with a minimum grade of C-

Equivalent: STE 6270

CE 6330 Advanced Structural Analysis Cr. 3

Effect of axial loads on stiffness of flexural members. Buckling of trusses and rigid frames. Matrix method of analysis. Complex structures. Computer applications. Offered Fall.

Prerequisites: CE 4410 with a minimum grade of C-

CE 6340 Bridge Design and Evaluation Cr. 3

Concepts, procedures, methods of design and condition evaluation for modern highway bridges, according to current specifications. Entire system is covered, including superstructure, substructure, and their connections. Offered Every Other Year.

Prerequisites: CE 4420 with a minimum grade of C-

CE 6370 Advanced Reinforced Concrete Design Cr. 4

Theory and design of two-way slabs, footings, retaining walls, shear walls, and composite beams using ultimate strength design. Precast and prestressed concrete fundamentals. Offered Winter.

Prerequisites: CE 4420 with a minimum grade of C-

CE 6410 Advanced Steel Design Cr. 3

Advanced topics of structural steel design: thin walled rolled and built-up members, beam columns, lateral torsional buckling, steel fatigue design, connection details. Steel design project. Offered Every Other Year.

Prerequisites: CE 4420 with a minimum grade of C-

CE 6580 Geoenvironmental Engineering I Cr. 4

Properties and test methods for natural and synthetic materials used in landfills; analysis of chemical interactions, flow mechanisms, stability and settlement for the design of landfill components. Offered Yearly.

Prerequisites: CE 4510 with a minimum grade of C-

CE 6660 Pavement Asset Management Cr. 3

Principles and practices of pavement management at the network and project level: serviceability, pavement design models, economic analysis, and priority programming. Offered Yearly.

Prerequisites: CE 4640 with a minimum grade of C-

CE 6880 Building Information Modeling (BIM) Cr. 3

Lectures, hands-on demonstrations and lab exercises to familiarize students with concepts and tools in Revit Architecture 2010 software; how software integrates 3D and 2D modeling. Includes an overview of the Building Information Modeling (BIM) process; integration of designs from different disciplines (architectural, structural and MEP) in a BIM model; and use of BIM tools (including Revit and Navisworks) to create 2D, 3D, 4D (schedule) and 5D (cost) models for project control purposes, as well as clash detections. Offered Every Other Year.

Prerequisites: CE 3010 with a minimum grade of C-

CE 6910 Pharmaceutical Waste: Environmental Impact and Management Cr. 2-3

Course designed for advanced professional and graduate students with sufficient chemistry and/or biological sciences background who are interested in the environmental impact, management, and regulation of waste pharmaceuticals as emerging issues. Offered Spring/Summer.

Restriction(s): Enrollment is limited to Graduate or Professional level students.

Equivalent: PSC 6910

CE 6991 Internship in Industry Cr. 1-4

Written report describing internship experience. Offered Every Term.

Repeatable for 4 Credits

CE 7020 Construction Safety Cr. 3

Safety problems in the construction industry and their technical and managerial solutions, construction accident and failure analysis and control. Safety program design and implementation with TQM integration. Offered Yearly.

Prerequisite: CE 6010 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

CE 7070 Risk and Reliability in Civil Engineering Cr. 3

Uncertainty in civil engineering practice (e.g., loads, traffic, water demand, construction quality). Reliability theory based on probabilistic and statistical methods. Reliability-based engineering design and decision making. Offered Every Other Year.

Restriction(s): Enrollment is limited to Graduate level students.

CE 7080 Civil Engineering Research Methods Cr. 3

Methods of data collecting and statistical analysis in context of civil engineering. Applications of advanced statistical analysis techniques, theory, discussion of methodological limitations. Offered Every Other Year.

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students in the College of Engineering.

CE 7190 Groundwater Modeling Cr. 3

Analytical and numerical models of groundwater hydraulics and contaminant transport. Application of theoretical material developed in CE 6190. Case studies of model applications to real field problems. Offered Yearly.

Prerequisite: CE 6190 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

CE 7220 Industrial Waste Treatment Cr. 4

A study of the sources of specific industrial waste waters and their treatability by physical, chemical and biological processes, including the industries' obligation in the prevention of stream pollution. Problems and solutions involved in combined treatment of industrial and domestic waste waters. Offered Every Other Year.

Restriction(s): Enrollment is limited to Graduate level students.

Course Material Fees: \$10

CE 7260 Surface Water-Quality Modeling and Management Cr. 4

Principles and mechanisms governing the rate and transport of conventional and toxic pollutants in natural water; mathematical modeling of water quality in surface water systems; model applications for managing waste loads in lakes and rivers. Offered Intermittently.

Restriction(s): Enrollment is limited to Graduate level students.

CE 7280 Applied Environmental Microbiology Cr. 3

Provides knowledge of microbiology, roles and relations of microorganisms to the environment. Topics include practical applications of environmental microbiology to environmental issues including water treatment, biodegradation and bioremediation of environmental pollutants, production of alternative fuels, and emerging environmental concern. Special consideration will be given to water treatment and microbe-mediated cycling of organic materials (i.e. pollutants) in a variety of natural and engineered environment. Offered Winter.

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students in the College of Engineering.

CE 7300 Advanced Structural Mechanics Cr. 3

Theory of bending and torsion of bars, beams on elastic foundations. Introduction to theory of thin plates. Linear elastic fracture mechanics, application to brittle solids. Offered Fall.

Prerequisite: CE 6330 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

CE 7311 Sustainability of Urban Environmental Systems Cr. 2

Students will be introduced to topics in urban sustainability from multiple disciplinary perspectives such as: ecology, anthropology, communication, engineering, economics and urban planning. Questions in fostering a more sustainable urbanism will be introduced and evaluated. Offered Fall.

Restriction(s): Enrollment is limited to Graduate level students.

Equivalent: BIO 7310

CE 7370 Advanced Finite Element Analysis Cr. 3

Advanced topics in finite element analysis; stability analysis and vibrations of structural systems; modeling of complex structures, dynamic analysis, and nonlinear structural problems; and computer applications. Offered Every Other Year.

Prerequisite: CE 5370 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

CE 7380 Advanced Topics in Steel Design Cr. 3

Focuses on steel plasticity, plastic mechanism analysis, and the application of these concepts to design for strength and stability of steel structures. Offered Every Other Year.

Restriction(s): Enrollment is limited to Graduate level students.

CE 7385 Advanced Topics in Reinforced Concrete Design Cr. 3

Focuses on reinforced concrete plasticity, plastic mechanism analysis, and the application of these concepts to design for strength of reinforced concrete structures. Offered Every Other Year.

Restriction(s): Enrollment is limited to Graduate level students.

CE 7460 Advanced Composite Materials for Civil Infrastructure Cr. 3

Infrastructure problems. Advanced fiber reinforced plastics, including applications in primary/secondary and marine structures, and in rehabilitation. High performance fiber reinforced concrete. Controlled composite properties via composite design. Review of composite analysis and failure criteria based on micromechanics and laminate theory. Offered Every Other Year.

Restriction(s): Enrollment is limited to Graduate level students.

CE 7500 Engineering Properties of Soils Cr. 4

Overview of experimental methods in geotechnical engineering, instrumentation and data acquisition methods, statistical analysis of test data, tests and theories for settlement predictions, tests and theories for hydraulic conductivity determination, tests and theories for static and cyclic stress-strain-volume change behavior of soils. Offered Every Other Year.

Prerequisite: CE 5510 with a minimum grade of C and CE 5520 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

CE 7550 Geosynthetics Engineering Cr. 4

Fundamental principles for testing, design, and construction of geosynthetics in civil engineering applications. Offered Every Other Year.

Restriction(s): Enrollment is limited to Graduate level students.

CE 7580 Environmental Remediation Cr. 4

Site assessment; soil and groundwater investigation for remediation; application of remediation technologies; legislation related to remediation. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate level students.

CE 7600 Highway Safety and Risk Management Cr. 3

The focus of this course is on developing knowledge, skills, and abilities for planning, managing, and operating safe roadways for all users and modes of travel. It includes analysis of roadway design alternatives, statistical analysis of roadway safety issues, and crash countermeasure selection and evaluation. Students should have prior knowledge of the roadway geometric design process, traffic flow fundamentals (i.e., volume, density, speed, etc.), traffic control devices, and basic statistics (linear regression, t-tests, p-values, etc.). Offered Every Other Year.

Restriction(s): Enrollment is limited to Graduate level students.

CE 7620 Traffic Engineering Control and Operation Cr. 3

Traffic flow theories, macroscopic and microscopic models of traffic control, statistical analysis; design and application of intelligent transportation systems on traffic flow characteristics; evaluation. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate level students.

CE 7630 Urban Transportation Planning Cr. 4

Planning and analysis of urban transportation, travel demand models, land use planning and public transportation; household and origin-destination survey techniques; and demand elasticities multi-criteria evaluation. Offered Fall.

Restriction(s): Enrollment is limited to Graduate level students.

CE 7640 Economic Analysis in Transportation Systems Cr. 4

Application of engineering economy and price theory in optimization of transportation systems; analysis of congestion costs, externalities, primary and secondary costs and benefits; evaluation of alternatives and completed projects and programs. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate level students.

CE 7670 Advanced Traffic Signal Systems Cr. 3

Analysis and design of traffic signal systems. Hardware, communication and detection systems associated with microcomputer-based signal systems. Coordinated signal systems. Offered Every Other Year.

Prerequisite: CE 7620 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

CE 7830 Construction Planning and Scheduling Cr. 3

Planning and scheduling of construction projects, project networks and critical path methods, resource leveling, use of Primavera software. Offered Yearly.

Prerequisite: CE 6010 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

CE 7840 Facilities Management Cr. 3

Buildings and grounds operations and maintenance, planning design and construction, facilities economics and financing, real estate administration, environmental health and safety, health issues. Offered Winter.

Prerequisite: CE 6010 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

CE 7850 Construction Contract Administration Cr. 3

Project documentation; project setup and contract directory development; adding new contracts; purchase orders; recording materials deliveries; producing daily reports; preparing minutes of meetings; log submittals and handling correspondence; tracking contracts and costs, setup and preparing progress payment requisitions, managing claims and change orders. Offered Every Other Year.

Prerequisite: CE 6010 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

CE 7860 Construction Accounting and Financial Management Cr. 3

Construction financial management, construction accounting systems, analysis of financial statements, monitoring and controlling construction costs, managing overhead costs, markup, profit center analysis, cash flows for construction projects, financing, making financial decisions. Offered Every Other Year.

Prerequisite: CE 6010 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

CE 7890 Integrated Construction Project Management Cr. 3

Construction project management framework, construction project integration, project scope management, time management, cost management, quality management, procurement management, risk management, communication management. Offered Every Other Year.

Prerequisite: CE 7830 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

CE 7990 Directed Study Cr. 1-4

Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students.

Repeatable for 6 Credits

CE 7995 Special Topics in Civil Engineering II Cr. 1-3

A consideration of special subject matter in civil engineering. Topics to be announced in Schedule of Classes. Offered Intermittently.

Restriction(s): Enrollment is limited to Graduate level students.

Repeatable for 12 Credits

CE 7996 Research Cr. 1-4

Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students.

Repeatable for 6 Credits

CE 8999 Master's Thesis Research and Direction Cr. 1-8

Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students with a class of Candidate Masters.

Repeatable for 8 Credits

CE 9990 Pre-Doctoral Candidacy Research Cr. 1-8

Research in preparation for doctoral dissertation. Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students.

Repeatable for 12 Credits

CE 9991 Doctoral Candidate Status I: Dissertation Research and Direction Cr. 7.5

Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students.

CE 9992 Doctoral Candidate Status II: Dissertation Research and Direction Cr. 7.5

Offered Every Term.

Prerequisite: CE 9991 with a minimum grade of S

Restriction(s): Enrollment is limited to Graduate level students.

CE 9993 Doctoral Candidate Status III: Dissertation Research and Direction Cr. 7.5

Offered Every Term.

Prerequisite: CE 9992 with a minimum grade of S

Restriction(s): Enrollment is limited to Graduate level students.

CE 9994 Doctoral Candidate Status IV: Dissertation Research and Direction Cr. 7.5

Offered Every Term.

Prerequisite: CE 9993 with a minimum grade of S

Restriction(s): Enrollment is limited to Graduate level students.

CE 9995 Candidate Maintenance Status: Doctoral Dissertation Research and Direction Cr. 0

Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students.

Course Material Fees: \$370.26

Repeatable for 0 Credits

CED - COUNSELOR EDUCATION

CED 5030 Counseling Clients with Addictions Cr. 2

An introduction to assessing, diagnosing, conceptualizing, and treating counseling clients who have addictions. Offered for graduate credit only. Offered Fall.

Restriction(s): Enrollment is limited to Graduate level students.

CED 5090 Family Counseling and Substance Use Cr. 3

Conceptual and clinical foundations for counseling family systems in which one more members has a substance use disorder or addiction. Offered Intermittently.

Prerequisites: CED 5030

CED 6070 Introduction to Counseling Cr. 3

Overview of counseling profession, including: helping process, theories of counseling and consulting, training, credentialing, ethical and legal standards, professional organizations, history and trends of basic research. Offered Every Term.

CED 6080 Theories of Counseling Cr. 3

Major theories of counseling: client-centered, rational-emotive, Gestalt, Adlerian, reality, psychoanalytic, behavioral, cognitive. Ethical, legal, multicultural factors in conceptualization and delivery of counseling services in school, rehabilitation and community agency settings. Offered Every Term.

CED 6700 The Role of the Teacher in Guidance Cr. 2

Introduction to guidance principles, techniques and roles, with stress on classroom application. Experiential laboratory sessions required to sensitize educators to the basic ideas and skills involved in being a helper. Primarily for school personnel other than counselors. Offered Every Term.

Restriction(s): Enrollment limited to students in the College of Education.

CED 6710 Professional Seminar: Contemporary Issues Cr. 1-6

Principles, procedures and methods specific to a critical contemporary issue, such as: child abuse, sexual abuse, bereavement, stress management, infectious diseases, self-esteem, self-efficacy, conflict management, and trauma. Offered Every Term.

Repeatable for 6 Credits

CED 6720 Workshop in Counseling Cr. 2-4

For counselors, teachers, and pupil personnel workers. Consideration of counseling issues in school, agency and community settings. Counseling, consultation, and coordination dimensions of counseling in substance abuse, family groups, and human sexuality issues. Offered Every Term.

Repeatable for 18 Credits

CED 7000 Introduction to Group Work Cr. 2

Seminar in group counseling theories; basic elements of group process: stages of group development including group leadership styles, group dynamics, guidelines for multicultural and rehabilitation practice, ethical and professional issues in group practice, use of skills and techniques applicable to various counseling sessions. Offered Every Term.

Prerequisites: CED 6070 with a minimum grade of C or CED 6080 with a minimum grade of C

Corequisite: CED 7010

Restriction(s): Enrollment is limited to Graduate level students.

CED 7010 Group Counseling Participation Cr. 2

Group counseling sessions to experience counseling from the client's perspective and to become familiar with procedures and methods of group counseling in community agency, school, and rehabilitation settings. Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students.

CED 7020 Counseling Internship Cr. 1-12

Supervised field experience (100 clock hours per credit hour enrolled) designed to give students orientation to the responsibilities of a counselor at a cooperating agency or institution. Students attend on-campus seminars to discuss professional counseling and supervision issues. Offered Fall, Winter.

Restriction(s): Enrollment is limited to Graduate level students.

Equivalent: AED 7890, RCI 7460

Repeatable for 12 Credits

CED 7030 Counseling and Consulting Services in Community Agencies Cr. 3

Consultation theory and processes in agencies and post-secondary educational institutions. Roles and functions of counselors in program and proposal development; conflict management; organization; administration; and evaluation of services; public relations; knowledge of community referral resources and referral process. Offered Yearly.

Prerequisite: CED 6070 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

CED 7040 Techniques of Counseling Cr. 4

Techniques, ethics and process of counseling. Facilitative relationships, case conceptualization, goal setting, intervention, and outcome evaluation. Development of counseling skills to facilitate growth or change with respect to psychological, vocational and social concerns through self-advocacy, cognitive, affective, and behavioral interventions. Analysis and practice using simulated cognitive experiences. Offered Every Term.

Prerequisite: CED 6070 with a minimum grade of C or CED 6080 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

Equivalent: RCI 7110

CED 7055 School Counselor: Postsecondary Planning and College Counseling Cr. 2

Role of the School Counselor in relation to postsecondary planning and college counseling. The Eight Components of College and Career Readiness approach will be used to educate school counselors to prepare and inspire students for college success and opportunity. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate level students; enrollment is limited to students with a major, minor, or concentration in School Counseling.

CED 7070 School Guidance, Counseling, and Consulting Cr. 4

Principles and practices of counseling, guidance, and consulting in the K-12 school setting. Focus on individual and group approaches that facilitate student development and adjustment; staff, parental, and community resources and referral procedures; program development, operation, and evaluation. Offered Winter.

Prerequisite: CED 6070 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

CED 7080 Career Development and Counseling Cr. 3

Career development theories, career exploration and career preparation methods including: information, leisure, decision making, career-related assessment, use of non-traditional resources and computer-assisted guidance systems, use of occupational information and labor market surveys in career counseling, work-adjustment training, and strategies/skills for adapting vocational and educational resources for use in rehabilitation, school, business and community agency settings. Offered Every Term.

Prerequisite: CED 6070 with a minimum grade of C and RCI 7410 (may be taken concurrently) with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

Course Material Fees: \$30

CED 7090 Advanced School Guidance, Counseling and Consulting Cr. 3
Advanced principles and practices of counseling and consultation in school settings. The focus is on the holistic approach to enhance and facilitate student growth, development, and self-awareness as it relates to the demands of the School Counselor. Offered Yearly.
Prerequisites: CED 7070 with a minimum grade of C
Restriction(s): Enrollment is limited to Graduate level students; enrollment is limited to students with a major, minor, or concentration in School Counseling.

CED 7120 Assessment for Counselors and Rehabilitation Cr. 3
Overview of psychological, educational and vocational assessment techniques, including specific assessment applications such as clinical assessment, communicating assessment results, assessment with diverse populations, and ethical issues. Offered Winter.
Prerequisites: RCI 7410 with a minimum grade of C, RCI 7420 with a minimum grade of C, and RCI 7480 with a minimum grade of C or CED 6070 with a minimum grade of C and CED 6080 with a minimum grade of C
Restriction(s): Enrollment is limited to Graduate level students.
Course Material Fees: \$82
Equivalent: RCI 7120

CED 7150 Counseling Practicum Cr. 4
Course includes client contact and supervision seminar. Offered Fall.
Restriction(s): Enrollment is limited to Graduate level students.
Course Material Fees: \$25
Equivalent: AED 7380, RCI 7430

CED 7730 Cultural and Diversity Issues in Mental Health Treatment Research Cr. 3
Cognitive and experiential study of social and psychological variables that influence the cross-cultural counseling relationship. Emphasis on social identities of race, ethnicity, gender, age, ability, and sexual orientation. Offered Fall.
Prerequisite: CED 6080 with a minimum grade of C and RCI 7410 with a minimum grade of C
Restriction(s): Enrollment is limited to Graduate level students.

CED 8000 Seminar in Group Counseling Cr. 3
Students counsel groups which they have established. Tape and/or process recordings of counseling sessions analyzed to develop a theory and method of group counseling, group leadership, and techniques in the counseling of individuals in groups. Offered Every Other Year.
Prerequisite: CED 7000 with a minimum grade of C
Restriction(s): Enrollment is limited to Graduate level students.

CED 8020 Advanced Practicum Cr. 2-8
Supervised practice counseling in the counseling laboratory. Counseling competence evaluated. Offered Fall, Winter.
Restriction(s): Enrollment is limited to Graduate level students.

CED 8030 Advanced Consultation Theory and Methods Cr. 3
Advanced consultation theory and methods in agencies and educational institutions. Roles and functions of counselor educators and supervisors in program and proposal development; organization, administration, and evaluation of services; conflict management; third party intervention; legal and ethical issues; public relations. Offered Every Other Year.
Restriction(s): Enrollment is limited to Graduate level students.

CED 8040 Advanced Counseling Theory and Method Cr. 3
Theories of personality and learning applied to case diagnosis and projected remediation. Offered Every Other Year.
Prerequisite: CED 6080 with a minimum grade of C
Restriction(s): Enrollment is limited to Graduate level students.

CED 8080 Advanced Career Development and Counseling Cr. 2-4
For advanced students in guidance and counseling and related areas. Current trends and changes in career guidance and career education; their implications for guidance and counseling programs. Consideration of related topics. Offered Every Other Year.
Prerequisite: CED 7080 with a minimum grade of C
Restriction(s): Enrollment is limited to Graduate level students.
Repeatable for 8 Credits

CED 9020 Internship in Counseling/Counselor Education Cr. 1-6
Purposes, objectives, materials, techniques and practices in counselor education programs. Supervised experience in advanced counseling and in various phases of the counselor education program. Offered Every Term.
Restriction(s): Enrollment is limited to Graduate level students; enrollment is limited to students with a major in Counseling; enrollment limited to students in a Doctor of Education, Doctor of Philosophy or Education Specialist Cert degrees.
Repeatable for 24 Credits

CED 9120 Seminar and Internship Supervising Counselors Cr. 3
Theory and practice of supervision. Students supervise practicum counselors under staff guidance. Offered Fall, Winter.
Restriction(s): Enrollment is limited to Graduate level students; enrollment is limited to students with a major in Counseling; enrollment limited to students in a Doctor of Education, Doctor of Philosophy or Education Specialist Cert degrees.

CED 9520 Advanced Research on Disability and Human Behavior Cr. 3
Comprehensive knowledge in disability studies to inform research and teaching and to develop scholarly skills. Offered Every Other Year.
Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students in the College of Education; enrollment is limited to students with a major in Counseling; enrollment limited to students in the PhD in Education program.

CHE - CHEMICAL ENGINEERING

CHE 2800 Material and Energy Balances Cr. 4

Material balances, stoichiometry and simultaneous mass energy balances. Offered Winter.

Prerequisites: PHY 2170 with a minimum grade of C- or PHY 2175 with a minimum grade of C- and MAT 2020 with a minimum grade of C-

Course Material Fees: \$10

CHE 3100 Transport Phenomena I Cr. 3

Presents a practical introduction to the field of transport phenomena and its applications, with a primary focus on the transport of momentum and mechanical energy balances in engineering systems. Students will develop the mathematical tools and skills necessary to design and analyze chemical process systems involving the movement or transfer of fluids (i.e., momentum transport) and the interchange among forms of mechanical energy as fluids flow. Offered Winter.

Prerequisite: CHE 2800 with a minimum grade of C- and BE 1500 with a minimum grade of C-

Corequisite: MAT 2150

Restriction(s): Enrollment limited to students in the College of Engineering.

CHE 3220 Measurements Laboratory Cr. 2

Laboratory course in the principles and practice of measuring chemical, physical and thermodynamic properties of importance to chemical engineering problems. Technical reports. Offered Winter.

Prerequisites: BE 2100 with a minimum grade of C- and CHE 3200 with a minimum grade of C- or CHE 3600 with a minimum grade of C- and ENG 3050 with a minimum grade of C- and BE 1500 with a minimum grade of C-

Restriction(s): Enrollment limited to students in the College of Engineering; enrollment limited to students in the following programs: BS in Biomedical Engineering, BS in Chemical Engineering, BS in Civil Engineering, BS in Electrical Engineering, BS in Industrial Engineering, BS in Mechanical Engineering.

Course Material Fees: \$25

CHE 3300 Thermodynamics: Chemical Equilibria Cr. 4

Qualitative and quantitative treatment of homogeneous and heterogeneous phase and chemical equilibria. Use of chemical activities and activity coefficients relating ideal to actual systems. Use of reference states and excess properties of the prediction of equilibrium diagrams and the determination of feasibility of chemical reactions. Offered Fall.

Prerequisites: BE 1500 with a minimum grade of C- and CHE 2800 with a minimum grade of C- and MAT 2150 with a minimum grade of C-

Restriction(s): Enrollment limited to students in the College of Engineering; enrollment limited to students in the following programs: BS in Biomedical Engineering, BS in Chemical Engineering, BS in Civil Engineering, BS in Electrical Engineering, BS in Industrial Engineering, BS in Mechanical Engineering.

Course Material Fees: \$10

CHE 3400 Kinetics and Reactor Design Cr. 4

Quantitative treatment of complex homogeneous and heterogeneous chemical reactions and the design of batch, stirred and flow reactor systems. Offered Winter.

Prerequisites: BE 1500 with a minimum grade of C- and CHE 3300 with a minimum grade of C- and CHE 3600 with a minimum grade of C- and MAT 2150 with a minimum grade of C-

Restriction(s): Enrollment limited to students in the College of Engineering; enrollment limited to students in the following programs: BS in Biomedical Engineering, BS in Chemical Engineering, BS in Civil Engineering, BS in Electrical Engineering, BS in Industrial Engineering, BS in Mechanical Engineering.

Course Material Fees: \$10

CHE 3510 Co-op Experience Cr. 1-3

Presentation of oral and written report to peer group describing Co-op experience. Attendance required at the CHE and MSE seminar series for the semester. Offered Every Term.

Prerequisites: CHE 4260 with a minimum grade of C-

Restriction(s): Enrollment limited to students in the College of Engineering; enrollment limited to students in the following programs: BS in Biomedical Engineering, BS in Chemical Engineering, BS in Civil Engineering, BS in Electrical Engineering, BS in Industrial Engineering, BS in Mechanical Engineering.

Repeatable for 3 Credits

CHE 3600 Transport Phenomena II Cr. 3

Presents a practical introduction to the field of transport phenomena and its applications, with a primary focus on the transport of heat and mass of chemical species in engineering systems. Students will develop the mathematical tools and skills necessary to design and analyze chemical process systems involving the movement or transfer of thermal energy (i.e., heat transfer) and movement of a chemical species under a concentration gradient (i.e. mass transfer and diffusion). Offered Fall.

Prerequisite: BE 1500 with a minimum grade of C- and CHE 2800 with a minimum grade of C- and CHE 3100 with a minimum grade of C-

Restriction(s): Enrollment limited to students in the College of Engineering; enrollment limited to students in the following programs: BS in Biomedical Engineering, BS in Chemical Engineering, BS in Civil Engineering, BS in Electrical Engineering, BS in Industrial Engineering, BS in Mechanical Engineering.

CHE 3800 Separation Processes Cr. 3

Quantitative treatment of separation processes in which there is simultaneous heat and mass transfer. Offered Winter.

Prerequisite: BE 1500 with a minimum grade of C- and CHE 3100 with a minimum grade of C- and CHE 3300 with a minimum grade of C- and CHE 3600 with a minimum grade of C-

Restriction(s): Enrollment limited to students in the College of Engineering; enrollment limited to students in the following programs: BS in Biomedical Engineering, BS in Chemical Engineering, BS in Civil Engineering, BS in Electrical Engineering, BS in Industrial Engineering, BS in Mechanical Engineering.

Course Material Fees: \$10

CHE 3820 Chemical Engineering Laboratory Cr. 2

Experimental study of chemical equilibria, reaction kinetics and rate processes. Laboratory case studies. Offered Fall.

Prerequisites: CHE 3220 with a minimum grade of C- and CHE 3400 with a minimum grade of C- and CHE 3800 with a minimum grade of C- and BE 1500 with a minimum grade of C- and ENG 3060 with a minimum grade of C-

Restriction(s): Enrollment limited to students in the College of Engineering; enrollment limited to students in the following programs: BS in Biomedical Engineering, BS in Chemical Engineering, BS in Civil Engineering, BS in Electrical Engineering, BS in Industrial Engineering, BS in Mechanical Engineering.

Course Material Fees: \$25

CHE 4200 Product and Process Design Cr. 3

The overall design of chemical products, systems, and processes. Economic analysis, computational design calculations, and optimization of design based on factors such as economics, environmental protection and waste minimization, and safety. Offered Fall.

Prerequisite: CHE 3800 with a minimum grade of C- and CHE 3400 with a minimum grade of C-

Restriction(s): Enrollment limited to students in the College of Engineering; enrollment limited to students in the following programs: BS in Biomedical Engineering, BS in Chemical Engineering, BS in Civil Engineering, BS in Electrical Engineering, BS in Industrial Engineering, BS in Mechanical Engineering.

CHE 4260 Chemical Engineering Seminar I Cr. 0

Offered Fall, Winter.

Prerequisite: CHE 3200 with a minimum grade of C- or CHE 3600 with a minimum grade of C- and CHE 3300 with a minimum grade of C- and CHE 3220 (may be taken concurrently) with a minimum grade of C-

Restriction(s): Enrollment limited to students in the College of Engineering; enrollment limited to students in the following programs: BS in Biomedical Engineering, BS in Chemical Engineering, BS in Civil Engineering, BS in Electrical Engineering, BS in Industrial Engineering, BS in Mechanical Engineering.

CHE 4600 Process Dynamics and Simulation Cr. 3

Application of system dynamics and mathematical modeling to design and analysis of chemical processing systems. Offered Fall.

Prerequisite: CHE 3400 with a minimum grade of C- and CHE 3800 with a minimum grade of C-

Restriction(s): Enrollment limited to students in the College of Engineering; enrollment limited to students in the following programs: BS in Biomedical Engineering, BS in Chemical Engineering, BS in Civil Engineering, BS in Electrical Engineering, BS in Industrial Engineering, BS in Mechanical Engineering.

Course Material Fees: \$10

CHE 4800 Chemical Process Integration Cr. 3

Satisfies General Education Requirement: Writing Intensive Competency
Application of engineering and science background to the design of chemical processes. Comprehensive problems deal with sources of data, design principles and optimization techniques. Offered Fall.

Prerequisite: CHE 4200 with a minimum grade of C-

Restriction(s): Enrollment limited to students in the College of Engineering; enrollment limited to students in the following programs: BS in Biomedical Engineering, BS in Chemical Engineering, BS in Civil Engineering, BS in Electrical Engineering, BS in Industrial Engineering, BS in Mechanical Engineering.

CHE 4860 Chemical Engineering Seminar II Cr. 1

Offered Fall, Winter.

Prerequisite: CHE 4260 with a minimum grade of C-

Restriction(s): Enrollment limited to students in the College of Engineering; enrollment limited to students in the following programs: BS in Biomedical Engineering, BS in Chemical Engineering, BS in Civil Engineering, BS in Electrical Engineering, BS in Industrial Engineering, BS in Mechanical Engineering.

CHE 4990 Directed Study Cr. 1-9

Students select a field of chemical engineering for advanced study and instruction. Offered Every Term.

Restriction(s): Enrollment limited to students in the College of Engineering; enrollment limited to students in the following programs: BS in Biomedical Engineering, BS in Chemical Engineering, BS in Civil Engineering, BS in Electrical Engineering, BS in Industrial Engineering, BS in Mechanical Engineering.

Repeatable for 9 Credits

CHE 5050 Statistics and Design of Experiments Cr. 3

Application of modern statistical experimental design methods to improve effectiveness and success in experimental projects, in chemical industry manufacturing, and research and design. Offered Winter.

Prerequisites: BE 2100 with a minimum grade of C- and BE 1500 with a minimum grade of C- and CHE 3200 with a minimum grade of C- or CHE 3600 with a minimum grade of C- and CHE 3300 with a minimum grade of C-

CHE 5100 Quantitative Physiology Cr. 4

Basic principles of human physiology presented from the engineering perspective. Bodily functions, their regulation and control discussed in quantitative terms and illustrated by mathematical models where feasible. Offered Fall, Winter.

Equivalent: BME 5010, ECE 5100, ME 5100

CHE 5110 Fundamental Fuel Cell Systems Cr. 4

Introduce various types of fuel cells, materials properties of electrodes and polymeric membranes, and electrochemical mechanisms. Reforming of various types of hydrocarbon fuel to hydrogen, and reforming technology. Offered Fall.

Equivalent: AET 5110, EVE 5130, ME 5110

CHE 5120 Fundamentals of Battery Systems for Electric and Hybrid Vehicles Cr. 4

Fundamental electrochemistry and engineering aspects for electric propulsion batteries, including lead acid, nickel metal hydride, and lithium ion technologies. Offered Winter.

Equivalent: AET 5310, EVE 5120, ME 5215

CHE 5350 Polymer Science Cr. 3

Fundamental relationships between chemical structure and physical properties of high polymers. Basic structures, states and transitions of polymers. Polymerization reactions and processes. Molecular weight, viscous flow and mechanical properties of polymers. Offered Fall.

Prerequisites: May be taken concurrently: MAT 2150 with a minimum grade of C-

Course Material Fees: \$10

Equivalent: MSE 5350

CHE 5360 Polymer Processing Cr. 3

A detailed analysis of polymer processing. Rheology of polymers, flow in tubes, calendering, extrusion, coating and injection molding. Offered Winter.

Prerequisites: CHE 3200 with a minimum grade of C-

Course Material Fees: \$10

Equivalent: MSE 5360

CHE 5450 Nanocarrier-based Drug Delivery Systems Cr. 3

Fundamental concepts in nanotechnology as it relates to drug delivery, and some of the applications and breakthroughs in this area as it applies to medicine. Offered Fall.

Prerequisites: CHE 5420 with a minimum grade of C-

Restriction(s): Enrollment is limited to Graduate or Undergraduate level students; enrollment limited to students with a class of Unranked Undergrad, Junior or Senior.

CHE 5811 Research Preparation II Cr. 1

Preparation for Senior Research Project, CHE 6810. Offered Every Term.

Prerequisites: CHE 3200 with a minimum grade of C- and CHE 3300 with a minimum grade of C-

CHE 5995 Special Topics in Chemical Engineering I Cr. 1-4

A consideration of special subject matter in chemical engineering. Topics to be announced in Schedule of Classes. Offered Every Term.

Repeatable for 8 Credits

CHE 5996 Chemical Engineering Research Cr. 1-6

Research project. Offered Every Term.

Restriction(s): Enrollment limited to students in the College of Engineering; enrollment limited to students in the following programs: BS in Chemical Engineering, BS in Civil Engineering, BS in Electrical Engineering, BS in Industrial Engineering, BS in Mechanical Engineering.

CHE 6100 Introduction to Sustainable Engineering Cr. 3

Economic, environmental, social, and technological perspectives relevant to the design, operation and management of engineering activities.

Multiple perspectives addressed from a system sustainability view point. Offered Yearly.

Equivalent: STE 6100

CHE 6450 Biochemical Engineering Cr. 3

An introductory study of the principles of chemical engineering, biochemistry and biology which are essential for the design of industrial systems involving biological transformations. Offered Intermittently.

Prerequisites: CHE 3400 with a minimum grade of C- or CHE 3800 with a minimum grade of C-

CHE 6570 Safety in the Chemical Process Industry Cr. 3

Fundamental and practical experience necessary for safe operation of a chemical process plant. Actual industrial case studies conducted under industry supervision. Offered Winter.

Prerequisites: CHE 3400 with a minimum grade of C- or CHE 3800 with a minimum grade of C-

CHE 6610 Risk Assessment Cr. 3

Introduction to risk assessment in environmental hazard management with emphasis on the chemical industry, including hazard identification, exposure analysis and risk characterization. Offered Fall.

CHE 6810 Chemical Engineering Research Project Cr. 4

Satisfies General Education Requirement: Writing Intensive Competency Application of engineering and science background to the completion of a senior research project. Methods of research and analysis and interpretation of data. Preparation of a written research paper; oral presentation of research results. Offered Winter.

Prerequisite: CHE 4200 with a minimum grade of C- and CHE 5710 with a minimum grade of C-

CHE 7100 Advanced Engineering Mathematics Cr. 3

Presentation, evaluation and use of mathematical methods within the framework of engineering problems; including ordinary and partial differential equations, transforms and vector operations. Offered Fall.

Restriction(s): Enrollment is limited to Graduate level students.

Equivalent: MSE 7100

CHE 7200 Advanced Transport Phenomena Cr. 3

Basic properties of heat, mass and momentum transfer systems; fundamental equations, transforms and vector operations; includes independent study project. Offered Winter.

Prerequisite: CHE 7100 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

CHE 7300 Advanced Thermodynamics Cr. 3

Advanced presentation of the principles of thermodynamics; application to open systems, phase diagrams and chemical equilibria. Offered Fall.

Restriction(s): Enrollment is limited to Graduate level students.

Equivalent: MSE 7300

CHE 7350 Polymer Solutions Cr. 3

Solubility of polymers, configuration of chain molecules, colligative properties of dilute polymer solutions, spectroscopy, optical activity, light and x-ray scattering of polymer solutions, frictional properties of dissolved polymers, solution properties of polyelectrolytes. Offered Every Other Year.

Prerequisite: CHE 5350 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

CHE 7390 Tissue Engineering and Hybrid Systems Cr. 4

Seminar and project based approach to the design, development, analysis and application of organ and tissue replacement systems which incorporate processed materials and living cells. Offered Every Other Year.

Prerequisites: BME 5370 with a minimum grade of C and BME 5020 with a minimum grade of C or CHE 7100 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

Equivalent: BME 7390

CHE 7400 Advanced Kinetics and Reactor Design Cr. 3

Basic properties of reacting systems including the steady state approximation, the relationship of thermodynamics to kinetics, the treatment of coupled reaction problems and design of chemical reactors; includes independent study project. Offered Winter.

Restriction(s): Enrollment is limited to Graduate level students.

Course Material Fees: \$10

CHE 7490 Biomedical Microsystems Cr. 4

Biomedical microsystems, with a focus on microfluidics and lab-on-a-chip technologies for medical diagnostics and biological research. Broad coverage of microscale physics; microfabrication methods; separation, purification, and other on-chip processes; biosensing. Offered Fall.

Prerequisite: ECE 5575 with a minimum grade of C or ECE 6570 with a minimum grade of C or BME 6470 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

Equivalent: BME 7490, ECE 7590

CHE 7990 Directed Study Cr. 1-9

Library investigation of an approved project in chemical engineering. Independent study, conferences with supervisor and preparation of a comprehensive written and oral report. Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students.

CHE 7995 Special Topics in Chemical Engineering II Cr. 1-4

A consideration of special subject matter in chemical engineering. Topics to be announced in Schedule of Classes. Offered Fall, Winter.

Restriction(s): Enrollment is limited to Graduate level students.

CHE 8510 Graduate Co-op Experience Cr. 1-3

Presentation of oral and written reports to peer group describing co-op experience. Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students.

CHE 8996 Research Cr. 1-9

Library and laboratory investigation of an approved proposal for advanced research project. Conferences and periodic oral progress reports. Comprehensive report of entire project upon completion. Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students.

Repeatable for 30 Credits

CHE 8997 Chemical Engineering Graduate Seminar Cr. 0.5

Advanced concepts in chemical engineering; presentation of research results. Must attend and present evidence of attending 30 hours of seminar over two-year period, and present one seminar. Offered Every Term.

Prerequisite: CHE 7200 with a minimum grade of C and CHE 7400 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

CHE 8999 Master's Thesis Research and Direction Cr. 1-8

Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students with a class of Candidate Masters.

Repeatable for 8 Credits

CHE 9990 Pre-Doctoral Candidacy Research Cr. 1-8

Research in preparation for doctoral dissertation. Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students.

Repeatable for 12 Credits

CHE 9991 Doctoral Candidate Status I: Dissertation Research and Direction Cr. 7.5

Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students.

CHE 9992 Doctoral Candidate Status II: Dissertation Research and Direction Cr. 7.5

Offered Every Term.

Prerequisite: CHE 9991 with a minimum grade of S

Restriction(s): Enrollment is limited to Graduate level students.

CHE 9993 Doctoral Candidate Status III: Dissertation Research and Direction Cr. 7.5

Offered Every Term.

Prerequisite: CHE 9992 with a minimum grade of S

Restriction(s): Enrollment is limited to Graduate level students.

CHE 9994 Doctoral Candidate Status IV: Dissertation Research and Direction Cr. 7.5

Offered Every Term.

Prerequisite: CHE 9993 with a minimum grade of S

Restriction(s): Enrollment is limited to Graduate level students.

CHE 9995 Candidate Maintenance Status: Doctoral Dissertation Research and Direction Cr. 0

Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students.

Course Material Fees: \$370.26

Repeatable for 0 Credits

CHI - CHINESE

CHI 1005 Introduction to Chinese Culture and Language Cr. 3

Conversational Chinese, Chinese culture and customs, everyday Chinese street signs and symbols essential to travel and business in China. Offered for undergraduate credit only. Offered Every Term.

CHI 1006 Chinese Learning Community Cr. 1

Experiential learning course; participation in Chinese cultural events and supplemental Chinese language sessions. Students comment on a minimum of eight approved events via a discussion board, attend language sessions, and present a final project. Offered for undergraduate credit only. Offered Fall, Winter.

Prerequisite: CHI 1005 with a minimum grade of D-

CHI 1010 Elementary Chinese I Cr. 4

Introduction to the written and spoken forms of Chinese. Offered for undergraduate credit only. Offered Yearly.

Course Material Fees: \$5

CHI 1020 Elementary Chinese Cr. 4

Continuation of CHI 1010. Offered for undergraduate credit only. Offered Yearly.

Prerequisites: CHI 1010 with a minimum grade of D-

Course Material Fees: \$5

CHI 2000 Chinese Phonetics Cr. 1

Students will have the hands-on experience of learning Chinese sounds and tones with the intensive instruction and correction of the instructor. After studying the articulatory mechanisms for the Chinese phonetic inventory and system in theory, students will practice them in different combinations and contexts with that native accuracy as the target. Offered Winter.

Equivalent: LIN 2000

Repeatable for 2 Credits

CHI 2010 Intermediate Chinese Cr. 4

Satisfies General Education Requirement: Foreign Culture, Global Learning Inquiry

Completion of Chinese language sequence. Offered Yearly.

Prerequisite: CHI 1020 with a minimum grade of D-

Course Material Fees: \$5

CHI 2020 Intermediate Chinese II Cr. 4

Continuation of CHI 2010. Offered Winter.

Prerequisites: CHI 2010 with a minimum grade of D-

CHI 2030 Chinese Character Writing Cr. 3

The most difficult part of Chinese learning is character writing. Basic stroke orders, intermediate literacy level. Art of Chinese calligraphy. Offered Spring/Summer.

Prerequisites: CHI 1010 with a minimum grade of D-

CHI 2050 Gateway to Chinese Civilizations Cr. 3

Satisfies General Education Requirement: Cultural Inquiry, Global Learning Inquiry

Introduction to Chinese culture, society, and politics. Offered Every Term.

CHI 3000 Chinese Mythology and the Supernatural Cr. 3

Satisfies General Education Requirement: Cultural Inquiry

The study of Chinese mythical and supernatural literature from the late Zhou through the Qing dynasties (from around 10th century BCE to 18th century CE); the cultural functions of myth and the supernatural as they relate to nation, ethnic identities, social and political structures, as well as religious and philosophical ideals. Taught in English. Offered Fall, Winter.

CHI 3010 Contemporary Chinese Pop Culture Cr. 3

Introduction to Chinese pop culture: values, functions, and changes. Offered Winter.

CHI 3022 Introduction to Chinese Literature Cr. 3

Satisfies General Education Requirement: Cultural Inquiry

Genres and traditions of Chinese literature; influence on China of today.

Offered Every Term.

CHI 3100 Advanced Chinese I Cr. 4

Continuation of CHI 2020. Offered Fall.

Prerequisites: CHI 2020 with a minimum grade of D-

CHI 3200 Advanced Chinese II Cr. 4

Continuation of CHI 3100. Offered Winter.

Prerequisites: CHI 3100 with a minimum grade of D-

CHI 3990 Directed Study Cr. 1-6

Directed study tailored to student and faculty interests and specializations. Offered Every Term.

Repeatable for 9 Credits

CHI 4010 Business Chinese Cr. 3

Basic knowledge of business Chinese; basic abilities of listening, speaking, reading, writing, and translating in business Chinese. Offered Fall.

Prerequisites: CHI 3200 with a minimum grade of D-

Restriction(s): Enrollment is limited to Undergraduate level students.

CHI 5210 Introduction to Chinese Linguistics Cr. 3

Writing, sound and grammar systems of Chinese; interaction between Chinese language and Chinese society. Offered Fall.

Equivalent: LIN 5220

CHI 5220 Languages of Asia Cr. 3

Introduction to major language families in Asia; grammar, sounds, language contacts. Offered Winter.

Equivalent: JPN 5220, LIN 5100

CHI 5230 Grammar of Chinese Cr. 3

Chinese grammar from perspectives of negation, question formation, aspects and different parts of speech, and the like. Offered Fall.

Equivalent: LIN 5240

CHI 5300 Teaching Chinese as a Second Language Cr. 1-3

Introduction to basic teaching grammar and sound rules and general teaching methodology. Offered Winter.

Prerequisites: CHI 3100 with a minimum grade of D-

Equivalent: LED 5300

CHM - CHEMISTRY

CHM 1000 Chemistry and Your World Cr. 4

Satisfies General Education Requirement: Natural Scientific Inquiry, Physical Sciences

Facts and theories from analytical, inorganic, organic, and physical chemistry, and from biochemistry; their consequences in life processes and the environment. Meets General Education Laboratory Requirement when elected for 4 credits. Offered Fall, Winter.

Course Material Fees: \$110

CHM 1020 Survey of General Chemistry Cr. 4

Satisfies General Education Requirement: Natural Scientific Inquiry, Physical Sciences

High school chemistry not required. First course in the terminal sequence consisting of CHM 1020 and CHM 1030. Matter and energy in chemistry, chemical symbols and equations, structure and properties of atoms, introduction to chemical bonding; periodicity in chemistry, solids, liquids, gases, solutions, acids and bases, and equilibrium. Meets General Education Laboratory Requirement. Offered Fall, Winter.

Prerequisites: Math Permit to Reg - L1-L4 with a test score minimum of 2-4 or MAT 0993-6XXX with a minimum grade of C or MAT Permit to Reg ACT/SAT with a test score minimum of 2-4 or ACT Math with a test score minimum of 18-36 or SAT Mathematics with a test score minimum of 490-800 or SAT MATH POST-2016 with a test score minimum of 490-800

Course Material Fees: \$110

CHM 1030 Survey of Organic/Biochemistry Cr. 4

Organic and biological chemistry; brief introduction to organic chemistry, emphasizing classes of compounds important in biochemical processes; survey of biochemistry with applications to nutrition, physiology, and clinical chemistry; protein structure; intermediary metabolism; molecular biology; and metabolic regulation. Offered Winter.

Course Material Fees: \$110

CHM 1040 Chemistry Skills and Reasoning Cr. 4

Reasoning and mathematical skills needed for development of a scientific approach in chemistry. No credit if taken after any other chemistry course. Offered Fall, Winter.

Prerequisites: Math Permit to Reg - L1-L4 with a test score minimum of 2-4 or MAT 0993 with a minimum grade of C or MAT 1050-6XXX with a minimum grade of C or MAT Permit to Reg ACT/SAT with a test score minimum of 2-4 or ACT Math with a test score minimum of 21-36 or SAT Mathematics with a test score minimum of 530-800 or SAT MATH POST-2016 with a test score minimum of 530-800

CHM 1220 General Chemistry I Cr. 4

Satisfies General Education Requirement: Natural Scientific Inquiry, Physical Sciences

Introduction to the principles of chemistry for students with high school background in chemistry. Chemical structure, bonding, and reactivity. Satisfies General Education laboratory requirement upon completion of both CHM 1220 and 1230. Only two credits if taken after CHM 1020. No credit after if taken after CHM 1225. Offered Every Term.

Prerequisites: CHM 1040 with a minimum grade of C- or CHM Permit to Reg L1-L3 CPE with a test score minimum of 2-3 or CHM 1020 with a minimum grade of C- and Math Permit to Reg - L1-L4 with a test score minimum of 3-4 or MAT Permit to Reg ACT/SAT with a test score minimum of 3-4 or MAT 1050 with a minimum grade of C- or MAT 1800-6ZZZ

Equivalent: CHM 1225

CHM 1225 General Chemistry I for Engineers Cr. 3

Satisfies General Education Requirement: Natural Scientific Inquiry, Physical Sciences

Introduction to principles of chemistry for students with high school background in chemistry. Chemical structure, bonding, and reactivity. Satisfies General Education laboratory requirement upon completion of both CHM 1225 and 1230. Only one credit after CHM 1020. No credit after CHM 1220. Offered Every Term.

Prerequisites: CHM 1040 with a minimum grade of C- or CHM Permit to Reg L1-L3 CPE with a test score minimum of 2-4 or CHM 1020 with a minimum grade of C- and Math Permit to Reg - L1-L4 with a test score minimum of 3-4 or MAT Permit to Reg ACT/SAT with a test score minimum of 3-4 or May be taken concurrently: MAT 1800-6ZZZ with a minimum grade of C-

Restriction(s): Enrollment limited to students in the College of Engineering.

Equivalent: CHM 1220

CHM 1230 General Chemistry I Laboratory Cr. 1

Laboratory course to introduce the scientific method, properties of materials, the role of energy, structure and spectroscopy. Satisfaction of General Education lab requirement is awarded only upon successful completion of both the prereq./coreq. course and this lab course. Offered Every Term.

Prerequisites: May be taken concurrently: CHM 1220 with a minimum grade of C- or CHM 1225 with a minimum grade of C-

Course Material Fees: \$110

CHM 1240 Organic Chemistry I Cr. 4

Introductory organic chemistry combined with the general principles of chemistry. Carbon compounds and chemical bonding, acid-based chemistry, stereochemistry and introductory organic reactions. Offered Every Term.

Prerequisites: CHM 1050 with a minimum grade of C- or CHM 1070 with a minimum grade of C- or CHM 1220 with a minimum grade of C- and CHM 1230 with a minimum grade of C- or CHM 1225 with a minimum grade of C-

CHM 1250 Organic Chemistry I Laboratory Cr. 1

Integrated general/organic chemistry laboratory focusing on spectroscopy, acid-based chemistry, molecular modeling and organic reactions as well as some attention to chromatography. Offered Every Term.

Course Material Fees: \$110

CHM 2220 Organic Chemistry II Cr. 4

Organic reactions of functional groups such as aldehydes, ketones and related carbonyl compounds. Extensive discussion of the interface of organic/biochemistry and bioinorganic chemistry. No credit after if taken after CHM 2225. Offered Every Term.

Prerequisites: CHM 2240 with a minimum grade of C- or CHM 1240 with a minimum grade of C- and CHM 1250 with a minimum grade of C-

CHM 2225 Organic Chemistry II for Engineers Cr. 3

Organic reactions of functional groups such as aldehydes, ketones and related carbonyl compounds. Extensive discussion of the interface of organic/biochemistry and bioinorganic chemistry. No credit after if taken after CHM 2220. Offered Every Term.

Prerequisites: CHM 1240 with a minimum grade of C- and CHM 1250 with a minimum grade of C-

Restriction(s): Enrollment is limited to Undergraduate level students; enrollment limited to students in the College of Engineering.

CHM 2230 Organic Chemistry II Laboratory Cr. 1

Synthesis of organic and bio-organic compounds. Offered Every Term.

Prerequisites: May be taken concurrently: CHM 2220 with a minimum grade of C- or CHM 2225 with a minimum grade of C-

Course Material Fees: \$110

CHM 2280 General Chemistry II: Analytical Chemistry Cr. 3

Concepts and calculations regarding kinetics, equilibrium, thermodynamics for a variety of reaction types. Qualitative and quantitative examples and applications. Offered Every Term.

Prerequisites: CHM 1410 with a minimum grade of C- or CHM 2240 with a minimum grade of C- or CHM 1240 with a minimum grade of C- and CHM 1250 with a minimum grade of C-

CHM 2290 General Chemistry II: Analytical Chemistry Laboratory Cr. 2

Study and use of acid-base redox, solubility precipitation, and complex forming reactions and equilibria in qualitative and quantitative chemistry. Offered Every Term.

Prerequisites: May be taken concurrently: CHM 2280 with a minimum grade of C-

Course Material Fees: \$110

CHM 2999 Honors Research Problems in Chemistry Cr. 2-4

Research projects under the direction of a senior faculty member. Offered Every Term.

Prerequisites: CHM 1240 with a minimum grade of C and CHM 1250 with a minimum grade of C or CHM 1410 with a minimum grade of C

CHM 3000 Metals in Biology Cr. 3

Descriptive approach to metals involved in biological systems. Offered Fall.

Prerequisites: CHM 1240 with a minimum grade of C

CHM 3020 Intermediate Inorganic Chemistry I Cr. 3

Emphasizes chemistry of the main group elements and includes basic coordination chemistry of the transition metals. Offered Winter.

Prerequisites: CHM 1240 with a minimum grade of C

CHM 4850 Frontiers in Chemistry Cr. 1

Fields of fundamental chemistry now under investigation, presented by invited specialists actively engaged in research. Offered Fall, Winter.

Restriction(s): Enrollment is limited to students with a major in Chemistry or Chemistry Honors; enrollment limited to students in a BS in Chemistry or Bachelor of Arts degrees.

Repeatable for 2 Credits

CHM 5020 Intermediate Inorganic Chemistry II Cr. 3

Transition metal chemistry. Coordination compounds and organometallics. Bonding theories and reactivity. Synthesis, purification, and characterization of inorganic compounds with an emphasis on transition metal compounds. Offered Fall.

Prerequisites: CHM 6070 with a minimum grade of C or CHM 3020 with a minimum grade of C and CHM 5400-5440 with a minimum grade of C

Course Material Fees: \$110

CHM 5160 Instrumental Analytical Chemistry Cr. 3

Application of modern instrumental methods to quantitative analysis. Methods that relate instrumental response to chemical concentrations or content. Calibration, data handling, and data evaluation. Emission, flame, infrared, Raman, fluorescence, and magnetic resonance spectroscopy. Mass spectrometry. Electrochemical methods. Chromatography. Offered Fall.

Prerequisites: CHM 5400 with a minimum grade of C or CHM 5420 with a minimum grade of C or CHM 5440 with a minimum grade of C and PHY 2180 with a minimum grade of C

CHM 5400 Biological Physical Chemistry Cr. 4

Presentation of physical chemistry topics: thermodynamics, solution equilibria, chemical kinetics, quantum chemistry, spectroscopy, statistical mechanics, transport processes, and structure with biological applications. Offered Winter.

Prerequisites: CHM 2280 with a minimum grade of C and MAT 2020 with a minimum grade of C and May be taken concurrently: MAT 2030 with a minimum grade of C and May be taken concurrently: PHY 2170 with a minimum grade of C

CHM 5420 Physical Chemistry I Cr. 3

Chemical thermodynamics, phase equilibrium, solutions, surface chemistry, electrochemistry. Only two credits applicable toward degree after CHM 5400. Offered Fall.

Prerequisites: CHM 2280 with a minimum grade of C and MAT 2020 with a minimum grade of C and May be taken concurrently: MAT 2030 with a minimum grade of C and May be taken concurrently: PHY 2170 with a minimum grade of C

CHM 5440 Physical Chemistry II Cr. 4

Kinetic theory, empirical and theoretical kinetics, quantum theory, atomic and molecular structure, molecular spectroscopy, statistical mechanics. Only three credits applicable to degree after CHM 5400. Offered Winter.

Prerequisites: CHM 2280 with a minimum grade of C and MAT 2020 with a minimum grade of C and May be taken concurrently: MAT 2030 with a minimum grade of C and May be taken concurrently: PHY 2170 with a minimum grade of C

CHM 5510 Chemical Synthesis Laboratory Cr. 3

Advanced techniques for the synthesis, purification and characterization of organic compounds. Offered Fall.

Prerequisites: CHM 1420 with a minimum grade of C or CHM 2220 with a minimum grade of C and CHM 2230 with a minimum grade of C

Course Material Fees: \$110

CHM 5550 Physical Chemistry Laboratory Cr. 2

Satisfies General Education Requirement: Writing Intensive Competency Principles of measurement. Fundamental investigations of thermodynamics. Fundamental spectroscopic and kinetic measurements. Offered Fall, Winter.

Prerequisites: May be taken concurrently: CHM 5400 with a minimum grade of C or CHM 5420 with a minimum grade of C or CHM 5440 with a minimum grade of C and PHY 2180 with a minimum grade of C

Course Material Fees: \$110

CHM 5570 Instrumental Analytical Chemistry Laboratory Cr. 3

Lecture and laboratory experiments covering electronics, measurement, and instrumentation. Principles and analytical applications of electrochemistry, chromatography, and spectroscopy including UV-visible, IR, magnetic resonance, and mass spectroscopy. Offered Winter.

Prerequisites: CHM 5160 with a minimum grade of C

Course Material Fees: \$110

CHM 5600 Survey of Biochemistry Cr. 3

Protein structure and its relationship to function. Principles of enzyme catalysis. Allosteric regulation of protein function and enzyme catalysis. Pathways of carbohydrate, fat, and protein metabolism in eukaryotic organisms. Introduction to mechanisms of energy coupling and photosynthesis. Information transfer in living systems. Molecular biology. Offered Fall, Winter.

Prerequisites: CHM 1420 with a minimum grade of C or CHM 2220 with a minimum grade of C or CHM 2225 with a minimum grade of C

CHM 5900 Biomedical Research as Discovery Cr. 2

Solving biochemical research problems using laboratory research tools including computational methods. Offered Yearly.

Prerequisites: CHM 6610 with a minimum grade of C and CHM 6620 with a minimum grade of C

CHM 5998 Honors Thesis Research in Chemistry Cr. 2-4

Original investigation under direction of senior staff member. Submission of B.S. thesis or manuscript in publication format. Presentation of public lecture on B.S. research. Offered Every Term.

Restriction(s): Enrollment is limited to students with a major in Biochem & Chem Bio Honors or Chemistry Honors.

Repeatable for 8 Credits

CHM 5999 Research in Chemistry Cr. 2-4

Original investigation under the direction of a senior staff member. Submission of B.S. thesis or manuscript in publication format. Offered Every Term.

Restriction(s): Enrollment is limited to students with a major in Biochem & Chem Bio Honors, Biochem & Chemical Biology, Chemistry or Chemistry Honors.

Repeatable for 8 Credits

CHM 6060 Materials Chemistry and Engineering Cr. 3

Solid state structure and bonding. Crystallography, defects, and non-stoichiometry. Phase diagrams. Synthesis and properties of extended solids and nanomaterials. Molecular interactions and statistical physics of soft matter. Synthesis and characterization techniques of polymeric and colloidal material. Physical properties, phase behavior, self-assembly and ordering in synthetic and biological soft matter. Offered Intermittently.

Prerequisites: CHM 3020 with a minimum grade of C

CHM 6070 Advanced Bioinorganic Chemistry Cr. 3

Applications of inorganic chemistry principles to understanding biological systems including metalloenzymes. Offered Winter.

Prerequisite: CHM 3000 with a minimum grade of C

CHM 6090 Organometallic Chemistry Cr. 3

Models and Applications of the Organometallic Chemistry of the Transition Metals including Activation of Small Molecules and Bioorganometallics. Offered Winter.

Prerequisite: CHM 5020 with a minimum grade of C

CHM 6170 Advances in Bioanalytical Chemistry Cr. 3

How analytical methods are used to obtain information regarding biological systems. Offered Intermittently.

Prerequisite: CHM 5160 with a minimum grade of C

CHM 6240 Organic Spectroscopy Cr. 3

Application of IR, NMR, UV, and mass spectrometry to the identification of organic compounds. Emphasis on interpretation of spectra, especially NMR. Recommended for students intending to do graduate or industrial work in organic chemistry. Offered Winter.

Prerequisite: CHM 1420 with a minimum grade of C or CHM 2220 with a minimum grade of C

CHM 6270 Advanced Bioorganic Chemistry and Drug Design Cr. 3

Studies of biological problems using organic synthetic methods and applications to drug design. Offered Fall.

Prerequisite: CHM 6620 with a minimum grade of C

CHM 6440 Computational Chemistry Cr. 3

Aspects of computational chemistry pertinent to effective use of molecular modeling techniques. Molecular mechanics, semi-empirical and ab initio calculations, molecular dynamics. Offered Intermittently.

Prerequisite: CHM 5440 with a minimum grade of C

Course Material Fees: \$95

CHM 6570 Computational Biochemistry and Bioinformatics Cr. 3

Application of computational and molecular modeling software tools to biochemical problems. Offered Intermittently.

Prerequisite: CHM 5400 with a minimum grade of C

CHM 6610 Biological Chemistry Laboratory Cr. 3

Satisfies General Education Requirement: Writing Intensive Competency
Basic experiments in isolation, purification, and analysis of biomolecules. Techniques currently used in molecular biology and recombinant DNA procedures stressed. Offered Fall, Winter.

Prerequisite: CHM 6620 with a minimum grade of C

Restriction(s): Enrollment is limited to students with a major in Biochem & Chem Bio Honors, Biochem & Chemical Biology, Chemistry or Chemistry Honors.

Course Material Fees: \$110

CHM 6620 Metabolism: Pathways and Regulation Cr. 3

Major metabolic pathways of carbohydrate, fatty acid, amino acid, and nucleotide synthesis and degradation. Pathways and mechanisms of energy generation. Hormonal and allosteric regulation of enzyme activity. Offered Fall.

Prerequisites: CHM 2220 with a minimum grade of C

CHM 6635 Tools of Molecular Biology Cr. 3

Principles underlying genetic and biochemical methods; complements work in lab CHM 6610. Offered Winter.

Prerequisite: CHM 6620 with a minimum grade of C

CHM 6640 Molecular Biology Cr. 3

Nucleic acid structure and function. Mechanism and control of replication, transcription, and translation. Mutation, genetic recombination, and recombinant DNA. Membranes and organelles. Offered Winter.

Prerequisite: CHM 6620 with a minimum grade of C

CHM 6740 Laboratory Safety Cr. 1-2

Discussion and demonstration of safe laboratory practice. Use, storage and disposal of ordinary and hazardous substances; personal protection devices; regulations and codes. Required for all graduate degrees in chemistry. Not for chemistry major credit Offered Fall, Winter.

CHM 6990 Directed Study Cr. 1-4

Offered Every Term.

Repeatable for 8 Credits

CHM 6991 Internship in Chemistry Cr. 1

Practical research experience through visiting a university, industry, or national laboratory. Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students; enrollment is limited to students with a major in Chemistry.

Repeatable for 2 Credits

CHM 7010 Descriptive Inorganic Chemistry Cr. 3

Reactions and reactivity of inorganic compounds. Emphasizes mechanistic and synthetic approaches to transition metal, organometallic, main group chemistry. Offered Fall.

Restriction(s): Enrollment is limited to Graduate level students.

CHM 7060 Materials Chemistry and Engineering Cr. 3

Solid state structure and bonding. Crystallography, defects, and non-stoichiometry. Phase diagrams. Synthesis and properties of extended solids and nanomaterials. Molecular interactions and statistical physics of soft matter. Synthesis and characterization techniques of polymeric and colloidal material. Physical properties, phase behavior, self-assembly and ordering in synthetic and biological soft matter. Offered Winter.

Restriction(s): Enrollment is limited to Graduate level students.

CHM 7070 Advanced Bioinorganic Chemistry Cr. 3

Applications of inorganic chemistry principles to understanding biological systems including metalloenzymes. Offered Intermittently.

Prerequisite: CHM 3000 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

CHM 7080 Electron Microscopy Cr. 3

Basics of electron microscopy and its applications. The theory and practice of transmission and scanning electron microscopies, along with associated spectroscopies, will be presented. Offered Intermittently.

Restriction(s): Enrollment is limited to Graduate level students.

CHM 7090 Organometallic Chemistry Cr. 3

Models and Applications of the Organometallic Chemistry of the Transition Metals including Activation of Small Molecules and Bioorganometallics. Offered Winter.

Restriction(s): Enrollment is limited to Graduate level students.

CHM 7100 Theory of Analytical Chemistry Cr. 3

Physicochemical principles applied to reaction equilibria and kinetics of analytical importance. Approaches to problem solving in complex systems, principally in the solution phase. Offered Fall.

Restriction(s): Enrollment is limited to Graduate level students.

CHM 7120 Electroanalytical Chemistry Cr. 3

The theory and practice of modern voltammetric methods as applied to analytical, kinetic, and mechanistic studies. Offered Every Other Year.

Restriction(s): Enrollment is limited to Graduate level students.

CHM 7142 Data Analysis Cr. 3

Application of statistics, chemometrics, and experimental design to the interpretation of chemical measurements; validation of analytical methods; practice and theory of sampling for chemical measurements. Offered Every Other Fall.

Restriction(s): Enrollment is limited to Graduate level students.

CHM 7170 Advances in Bioanalytical Chemistry Cr. 3

How analytical methods are used to obtain information regarding biological systems. Offered Intermittently.

Prerequisite: CHM 5160 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

CHM 7180 Mass Spectrometry Cr. 3

Topics will include ICP, ICP-MS, AA, LIBX, MIPS, etc. Instrumentation concepts. Review of contemporary literature. Offered Winter.

Restriction(s): Enrollment is limited to Graduate level students.

CHM 7200 Organic Structures and Mechanisms Cr. 3

Structure and stereochemistry of organic molecules. Correlations between structure and chemical and physical properties. Reaction mechanisms. Offered Fall.

Restriction(s): Enrollment is limited to Graduate level students.

CHM 7220 Organic Reactions and Synthesis Cr. 3

Alkylation, condensation, and Grignard reactions; synthesis of acid derivatives; cycloadditions and unimolecular rearrangements. Scope and limitations of important synthetic methods of organic chemistry. Offered Winter.

Prerequisite: CHM 7200 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

CHM 7240 Organic Spectroscopy Cr. 3

Application of IR, NMR, UV, and mass spectrometry to the identification of organic compounds. Emphasis on interpretation of spectra, especially NMR. Recommended for students intending to do graduate or industrial work in organic chemistry. Offered Winter.

Restriction(s): Enrollment is limited to Graduate level students.

CHM 7270 Advanced Bioorganic Chemistry and Drug Design Cr. 3

Studies of biological problems using organic synthetic methods and applications to drug design. Offered Intermittently.

Prerequisite: CHM 6620 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

CHM 7430 Chemical Kinetics Cr. 3

Empirical analysis of reaction rates, theories of chemical kinetics, gas phase reactions, molecular collisions and non-thermal reactions, and kinetics in liquids. Offered Every Other Year.

Restriction(s): Enrollment is limited to Graduate level students.

CHM 7440 Computational Chemistry Cr. 3

Aspects of computational chemistry pertinent to effective use of molecular modeling techniques. Molecular mechanics, semi-empirical and ab initio calculations, molecular dynamics. Offered Winter.

Restriction(s): Enrollment is limited to Graduate level students.

Course Material Fees: \$15

CHM 7470 Quantum Chemistry Cr. 3

Theorems of quantum mechanics, approximation methods, solutions to simple atomic and molecular systems, electronic structure of many-electron atoms and molecules, chemical bonding. Offered Every Other Year.

Restriction(s): Enrollment is limited to Graduate level students.

CHM 7480 Molecular Spectroscopy Cr. 3

Basic theory of interaction of molecules with the electromagnetic field. Rotational, vibrational, and electronic spectra of molecules; elements of lasers, multiphoton spectroscopy. Offered Every Other Year.

Prerequisite: CHM 7470 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

CHM 7500 Modern Methods in Experimental Chemistry Cr. 3

Survey of modern methods for performing experiments in chemistry, including: laser techniques, high vacuum methods, time-resolved techniques, surface characterization, electronics and optics, and computer interfacing. Offered Every Other Year.

Restriction(s): Enrollment is limited to Graduate level students.

CHM 7570 Computational Biochemistry and Bioinformatics Cr. 3

Application of computational and molecular modeling software tools to biochemical problems. Offered Intermittently.

Prerequisite: CHM 5400 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

CHM 7600 Structure and Function of Biomolecules Cr. 3

Introduction to the structure and function of macromolecules of biological importance. Emphasis on bioenergetics, nucleic acid and protein structure and chemical reactivities, enzyme catalysis, enzyme kinetics, carbohydrate and lipid structure and function, and membrane structure. Offered Fall.

Restriction(s): Enrollment is limited to Graduate level students.

CHM 7620 Metabolism: Pathways and Regulation Cr. 3

Major metabolic pathways of carbohydrate, fatty acid, amino acid, and nucleotide synthesis and degradation. Pathways and mechanisms of energy generation. Hormonal and allosteric regulation of enzyme activity. Offered Fall.

Prerequisite: CHM 7600 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

CHM 7635 Tools of Molecular Biology Cr. 3

Principles underlying genetic and biochemical methods; complements work in lab CHM 6610. Offered Yearly.

Prerequisite: CHM 7620 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

CHM 7640 Molecular Biology Cr. 3

Nucleic acid structure and function. Mechanism and control of replication, transcription, and translation. Mutation, genetic recombination, recombinant DNA. Membranes and organelles. Offered Winter.

Prerequisite: CHM 7600 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

CHM 7740 Responsible Conduct of Research Cr. 1

Recognition of and approach to ethical issues that chemistry students may confront during their careers; the tools for dealing with these quandaries; procedures for reporting and resolving such conflicts. Offered Fall.

Restriction(s): Enrollment is limited to Graduate level students; enrollment is limited to students in the Department of Chemistry.

CHM 7770 Proposals in Chemical Research Cr. 2

This course is writing-intensive and based on hands-on exercises aiming to conceive and articulate novel scientific ideas in an effective way.

Strategies will be taught on how to extract information from peer-reviewed papers, how to develop concise and descriptive research aims, and how to defend their ideas in written and oral formats. Topics in this course include hypothesis-driven research, basics of extramural funding, literature search, the meaning of "Intellectual Merit & Broader Impacts", designing experiments, reporting results, tutorials on relevant scientific software, and the criteria for peer-review. The development of personal statements and biosketches will also be covered. Offered Fall.

Prerequisite: CHM 7100 with a minimum grade of B or CHM 7600 with a minimum grade of B or CHM 7010 with a minimum grade of B or CHM 7200 with a minimum grade of B or CHM 7470 with a minimum grade of B

Restriction(s): Enrollment is limited to Graduate level students.

CHM 7990 Directed Study Cr. 1-4

Offered Intermittently.

Restriction(s): Enrollment is limited to Graduate level students.

Repeatable for 12 Credits

CHM 8090 Advanced Topics in Inorganic Chemistry Cr. 1-3

Topics offered in different semesters: inorganic synthesis and reactions; organometallic chemistry; bioinorganic chemistry; spectroscopy and stereochemistry of inorganic compounds; inorganic reaction mechanisms; photochemistry. Offered Intermittently.

Restriction(s): Enrollment is limited to Graduate level students.

Repeatable for 12 Credits

CHM 8190 Advanced Topics in Analytical Chemistry Cr. 1-3

The following topics offered in different semesters: sample preparation, surface analysis, analytical mechanisms, advanced instrumentation, computer interfacing. Offered Intermittently.

Prerequisite: CHM 7100 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

Repeatable for 12 Credits

CHM 8290 Advanced Topics in Organic Chemistry Cr. 1-3

The following topics offered in different semesters: physical-organic chemistry; kinetics of organic reactions; structure-reactivity correlations; reaction mechanisms; molecular orbital theory in organic chemistry; photochemistry; free radical chemistry; polymer chemistry; recent developments in organic chemistry; synthetic strategy; chemistry of natural products including steroids, terpenes, alkaloids, carbohydrates, and proteins. Offered Intermittently.

Prerequisite: CHM 7200 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

Repeatable for 12 Credits

CHM 8420 X-Ray Crystallography Cr. 3

Theoretical and practical aspects of modern x-ray crystallography. Training and practice in determination of crystal structure. Offered Intermittently.

Prerequisite: CHM 7010 with a minimum grade of C or CHM 7240 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

CHM 8490 Advanced Topics in Physical Chemistry Cr. 1-3

The following topics offered in different semesters: chemistry of the solid state; electron spin resonance; lasers and nonlinear spectroscopy; molecular dynamics; molecular quantum mechanics; particle and photon scattering; photophysics and photochemistry; radiation and nuclear chemistry; theory of gas phase kinetics. Offered Intermittently.

Prerequisite: CHM 7410 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

Repeatable for 12 Credits

CHM 8690 Advanced Topics in Biochemistry Cr. 1-3

Topics offered in different semesters: applications of spectroscopy to biochemical systems; chemical carcinogenesis; DNA repair; enzyme chemistry; experimental methods in molecular biology; hormone biochemistry; mechanisms of oxygen metabolism; membrane chemistry. Offered Intermittently.

Prerequisite: CHM 7410 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

Repeatable for 12 Credits

CHM 8700 Research in Chemistry Cr. 1-16

Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students.

Repeatable for 40 Credits

CHM 8800 Seminar in Analytical Chemistry Cr. 1

Required of all graduate students in analytical chemistry. Weekly meetings of staff, invited guests, and qualified students to study recent developments. Each seminar member presents papers and enters into the discussion that follows. Offered Fall, Winter.

Restriction(s): Enrollment is limited to Graduate level students.

Repeatable for 4 Credits

CHM 8810 Seminar in Organic Chemistry Cr. 1

Required of all graduate students in organic chemistry. Weekly meetings of staff, invited guests, and qualified students to study recent developments. Each seminar member presents papers and enters into the discussion that follows. Offered Fall, Winter.

Restriction(s): Enrollment is limited to Graduate level students.

Repeatable for 4 Credits

CHM 8820 Seminar in Inorganic Chemistry Cr. 1

Required of all graduate students in inorganic chemistry. Weekly meeting of staff, invited guests, and qualified students to study recent developments. Each seminar member presents papers and enters into the discussion that follows. Offered Fall, Winter.

Restriction(s): Enrollment is limited to Graduate level students.

Repeatable for 4 Credits

CHM 8830 Seminar in Physical Chemistry Cr. 1

Required of all graduate students in physical chemistry. Weekly meetings of staff, invited guests, and qualified students to study recent developments. Each seminar member presents papers and enters into the discussion that follows. Offered Fall, Winter.

Restriction(s): Enrollment is limited to Graduate level students.

Repeatable for 4 Credits

CHM 8840 Seminar in Biochemistry Cr. 1

Required of all graduate students in biochemistry. Weekly meetings of staff, invited guests, and qualified students to study recent developments. Each seminar member presents papers and participates in discussions. Offered Fall, Winter.

Restriction(s): Enrollment is limited to Graduate level students; enrollment is limited to students with a major in Chemistry; enrollment limited to students in a Doctor of Philosophy or Master of Science degrees.

Repeatable for 4 Credits

CHM 8850 Frontiers in Chemistry Cr. 1

Fields of fundamental chemistry now under investigation, presented by invited specialists actively engaged in research. Offered Fall, Winter.

Restriction(s): Enrollment is limited to Graduate level students.

Repeatable for 3 Credits

CHM 8999 Master's Thesis Research and Direction Cr. 1-8

Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students with a class of Candidate Masters.

Repeatable for 8 Credits

CHM 9990 Pre-Doctoral Candidacy Research Cr. 1-8

Research in preparation for doctoral dissertation. Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students.

Repeatable for 12 Credits

CHM 9991 Doctoral Candidate Status I: Dissertation Research and Direction Cr. 7.5

Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students.

Repeatable for 998.99 Credits

CHM 9992 Doctoral Candidate Status II: Dissertation Research and Direction Cr. 7.5

Offered Every Term.

Prerequisite: CHM 9991 with a minimum grade of S

Restriction(s): Enrollment is limited to Graduate level students.

Repeatable for 998.99 Credits

CHM 9993 Doctoral Candidate Status III: Dissertation Research and Direction Cr. 7.5

Offered Every Term.

Prerequisite: CHM 9992 with a minimum grade of S

Restriction(s): Enrollment is limited to Graduate level students.

Repeatable for 998.99 Credits

CHM 9994 Doctoral Candidate Status IV: Dissertation Research and Direction Cr. 7.5

Offered Every Term.

Prerequisite: CHM 9993 with a minimum grade of S

Restriction(s): Enrollment is limited to Graduate level students.

Repeatable for 998.99 Credits

CHM 9995 Candidate Maintenance Status: Doctoral Dissertation Research and Direction Cr. 0

Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students.

Course Material Fees: \$370.26

Repeatable for 998.99 Credits

CLA - CLASSICS

CLA 1010 Classical Civilization Cr. 3-4

Satisfies General Education Requirement: Cultural Inquiry, Philosophy Letters

Survey of the culture and civilization of Ancient Greece and Rome, in particular those aspects that laid the political, social, and cultural framework of the modern world. Offered Every Term.

CLA 1230 Word Origins: English Words from Greek and Latin Cr. 3-4

Vocabulary-building course designed to enlarge English vocabulary and increase understanding and spelling proficiency through a study of Greek and Latin roots of English words; aspects of interpreting and remembering legal, medical, and scientific vocabularies included. Offered Every Term.

CLA 2000 Greek Mythology Cr. 3-4

Satisfies General Education Requirement: Cultural Inquiry, Civ and Societies (CLAS only)

Typical myths related to religion, custom, ethics, philosophy, art, literature. Offered Every Term.

CLA 2200 Introduction to Greek Tragedy Cr. 3-4

Satisfies General Education Requirement: Cultural Inquiry, Philosophy Letters

Dramatic and literary qualities of representative plays of Aeschylus, Sophocles and Euripides. The origin and development of Greek tragedy related to the enduring quality and contemporary relevance of these dramas. Offered Every Term.

CLA 2300 Ancient Comedy Cr. 3

Satisfies General Education Requirement: Cultural Inquiry, Philosophy Letters

Dramatic and literary qualities of representative plays of Aristophanes, Menander, Plautus and Terence. Origins and development of Greek Comedy related to the enduring quality and contemporary relevance of these dramas and their influence on later literature. Offered Intermittently.

CLA 3050 Cleopatra Cr. 3

Cleopatra as a figure of history and of myth, using sources ranging from ancient texts to contemporary websites, literature, history, art and film. Use of methodologies that classicists employ to focus on this single aspect of the ancient world; study of a historical problem that is plagued with biases. Offered Intermittently.

CLA 3060 Medea in African American Literature Cr. 3

Ancient sources about Medea; her presence in work of four African American authors: W.E.B. DuBois, Countee Cullen, Toni Morrison, and Percival Everett. Offered Intermittently.

CLA 3150 Athens and the Ancient Greek World Cr. 3-4

Cultural history of ancient Greece from the time of the first Olympic games (776 BCE) to the reign of Alexander the Great and the advent of the Hellenistic kingdoms (336 BCE); focus on the greatest of the Greek city-states, Athens. Offered Every Other Year.

CLA 3190 Topics on Women in Antiquity Cr. 3

Topics on roles of women and views of gender and sexuality in ancient Greece and Rome, drawn from fields such as literature, art, drama, and law. Offered Intermittently.

Repeatable for 6 Credits

CLA 3300 Coins and Coinage of the Greeks and Romans Cr. 1-3

Origin and uses of coined money in the Greco-Roman world; economic, social, political, cultural impact of coinage on Greek and Roman civilization from the Sixth Century B.C.E. to end of Second Century C.E. Offered Intermittently.

Repeatable for 3 Credits

CLA 3350 Plutarch's Lives of the Noble Greeks and Romans Cr. 3

Structured reading of one of the formative works in the Western canon, which has had lasting influence on biography as a genre and upon individuals such as William Shakespeare, Jean-Jacques Rousseau, Ralph Waldo Emerson, William Wordsworth, George Bernard Shaw, Harry Truman, Robert Lowell, Barbara Chase-Riboud, and many others. Offered Intermittently.

CLA 3530 The World of Early Christianity Cr. 3

A historical survey of the cultural, social, and literary world of early Christianity. Offered Every Other Year.

Equivalent: GKM 3530

CLA 3590 Byzantine Civilization Cr. 3

Satisfies General Education Requirement: Historical Studies, Social Inquiry

Survey of Byzantine culture, religion, society, and literature from late Antiquity to 1453, through secondary and primary sources in translation. Offered Yearly.

Equivalent: GKM 3590

CLA 3700 The Golden Age of Rome Cr. 3-4

Interdisciplinary approach to the most important period of Roman history: the beginning of The Roman Empire under Augustus; history, politics, literature, art. Offered Every Other Year.

CLA 3720 Greek Identity from Antiquity to Modernity Cr. 3

Satisfies General Education Requirement: Cultural Inquiry, Historical Studies

Explores what it meant to be Greek from Archaic Greece to the modern era. Offered Yearly.

Equivalent: GKM 3720

CLA 3800 Survey of Greek Literature Cr. 3-4

Representative sampling of important Greek literary texts in English translation. Offered Every Other Year.

CLA 3825 Survey of Latin Literature Cr. 3-4

Representative sampling of important Latin literary texts in English translation. Offered Every Other Year.

CLA 3999 Further Studies in Mythology Cr. 3

A more in-depth study of mythology with special reference to particular classical myths or theories. Offered Intermittently.

Prerequisites: CLA 2000 with a minimum grade of D-

CLA 4998 Honor's Thesis Cr. 3

Completion of an extended examination of a topic or research question in Classics, under the direction of one or more members of the departmental faculty. Offered Every Term.

Restriction(s): Enrollment is limited to students with a major, minor, or concentration in Classics Honors.

CLA 5050 Cleopatra Cr. 3

Cleopatra as a figure of history and of myth, using sources ranging from ancient texts to contemporary websites, literature, history, art and film. Use of methodologies that classicists employ to focus on this single aspect of the ancient world; study of a historical problem that is plagued with biases. Offered Intermittently.

CLA 5150 Athens and the Ancient Greek World Cr. 3-4

Cultural history of ancient Greece from the time of the first Olympic games (776 BCE) to the reign of Alexander the Great and the advent of the Hellenistic kingdoms (336 BCE); focus on the greatest of the Greek city-states, Athens. Offered Every Other Year.

CLA 5190 Topics on Women in Antiquity Cr. 3

Topics on roles of women and views of gender and sexuality in ancient Greece and Rome, drawn from literature, art, drama, and law. Offered Intermittently.

Repeatable for 6 Credits

CLA 5200 Special Studies Cr. 1-4

In-depth study of some aspect of Greek and Roman civilization. Topics may be drawn from the fields of literature, archaeology, art and history, and will be announced in Schedule of Classes . All readings in English. Offered Intermittently.

Repeatable for 8 Credits

CLA 5300 Methods and Materials in Classical Studies Cr. 3-6

Introduction to various aspects of the material culture of Greek and Roman antiquity and to methods for approaching its study. Offered Intermittently.

Prerequisites: CLA 1010 with a minimum grade of D-

Repeatable for 6 Credits

CLA 5350 Plutarch's Lives of the Noble Greeks and Romans Cr. 3

Structured reading of one of the formative works in the Western canon, which has had lasting influence on biography as a genre and upon individuals such as William Shakespeare, Jean-Jacques Rousseau, Ralph Waldo Emerson, William Wordsworth, George Bernard Shaw, Harry Truman, Robert Lowell, Barbara Chase-Riboud, and many others. Offered Intermittently.

CLA 5530 The World of Early Christianity Cr. 3

A historical survey of the cultural, social, and literary world of early Christianity. Offered Every Other Year.

Equivalent: GKM 5530

CLA 5590 Byzantine Civilization Cr. 3

Survey of Byzantine culture, religion, society, and literature from late Antiquity to 1453, through secondary and primary sources in translation. Offered Yearly.

Equivalent: GKM 5590

CLA 5700 The Golden Age of Rome Cr. 3-4

Interdisciplinary approach to the most important period of Roman history: the beginning of The Roman Empire under Augustus; history, politics, literature, art. Offered Every Other Year.

CLA 5720 Greek Identity from Antiquity to Modernity Cr. 3

Satisfies General Education Requirement: Historical Studies
Explores what it meant to be Greek from Archaic Greece to the modern era. Offered Yearly.

Equivalent: GKM 5720

CLA 5800 Survey of Greek Literature Cr. 3-4

Representative sampling of important Greek literary texts in English translation. Offered Every Other Year.

CLA 5825 Survey of Latin Literature Cr. 3-4

Representative sampling of important Latin literary texts in English translation. Offered Every Other Year.

CLA 5990 Directed Study Cr. 1-4

Directed independent research in depth on a topic or author not treated in the regular classics offerings, culminating in a course paper. Offered Every Term.

Repeatable for 8 Credits

CLA 5993 Writing Intensive Course in Classical Civilization Cr. 0

Satisfies General Education Requirement: Writing Intensive Competency
Disciplined writing assignments under the direction of a faculty member. Must be selected in conjunction with a designated corequisite; see section listing in Schedule of Classes for corequisites available each term. Satisfies the University General Education Writing Intensive Course in the Major requirement. Required for all majors. Grade in CLA 5993 is independent of grade in corequisite course. Offered Every Term.

Prerequisites: AFS 2390 with a minimum grade of C or ENG 2390 with a minimum grade of C or ENG 3010 with a minimum grade of C or ENG 3020 with a minimum grade of C or ENG 3050 with a minimum grade of C

Restriction(s): Enrollment is limited to Undergraduate level students.

CLA 6260 Further Studies in Mythology Cr. 3

An in-depth study of mythology with special reference to particular classical myths or theories of myth. Offered Intermittently.

Prerequisites: CLA 2000 with a minimum grade of D-

Repeatable for 6 Credits

CLA 7010 Introduction to Literary Theory Cr. 3

Graduate-level introduction to key critical perspectives, theories, problems, and questions that have informed the discussions and analyses of twentieth- and twenty-first-century literary and cultural scholars. Specific theoretical paradigms used to determine the task of textual interpretation, locate the limits of each approach, trace the emergence of subsequent theoretical paradigms, and think about how such theories might or might not be relevant in the study of specific texts. Offered Every Other Year.

Restriction(s): Enrollment is limited to Graduate level students.

Equivalent: FRE 7010, GER 7010, ITA 7010, NE 7010, SLA 7010, SPA 7010

CLS - CLINICAL LABORATORY SCIENCE

CLS 2080 Clinical Laboratory Science Seminar Cr. 1

Introduction to clinical laboratory sciences. Opportunities and responsibilities. Offered Fall, Winter.

CLS 2990 Pre-professional Directed Study Cr. 1-3

Independent study under faculty supervision. Offered Fall, Spring/Summer.

Restriction(s): Enrollment limited to students in the Pharmacy and Health Sciences.

CLS 3020 Hematology Lecture and Laboratory Cr. 4

Basic study of blood-forming organs and components of blood; explanation of basic hematological procedures. Offered Yearly.

Restriction(s): Enrollment limited to students in the Pharmacy and Health Sciences.

Course Material Fees: \$75

CLS 3040 Immunohematology Lecture and Laboratory Cr. 4

Principles of immunology and theory of procedures employed in the clinical blood bank. Survey of the organization and operation of a blood bank. Offered Yearly.

Restriction(s): Enrollment limited to students in the Pharmacy and Health Sciences.

Course Material Fees: \$130

CLS 3080 Instrumentation Lecture and Laboratory Cr. 4

Introduction to fundamental laws of electronics, the theoretical basis of instrument design, and quality control in laboratory testing. Application of instrumental methods, including spectrophotometric, fluorometric, electroanalytical, and chromatographic methods to the clinical laboratory. Offered Fall.

Restriction(s): Enrollment limited to students in the Pharmacy and Health Sciences.

Course Material Fees: \$85

CLS 3090 Introduction to Professional Practice Cr. 1

Introduction to pre-professional and professional practice, education methodologies for the lab, intro to research in the field, ethics, and critical thinking in the lab. Offered Fall.

Restriction(s): Enrollment limited to students with a class of Junior or Senior; enrollment limited to students in the Pharmacy and Health Sciences; enrollment limited to students in the BS in Clinical Lab Sciences or Bachelor of Health Science programs.

CLS 3100 Basic Techniques: Microscopy Cr. 3

Specimen collection, preparation, and examination of urine and other body fluids such as spinal fluid, semen, and synovial fluid. Offered Yearly.

Restriction(s): Enrollment limited to students in the Pharmacy and Health Sciences.

Course Material Fees: \$85

CLS 3280 Clinical Chemistry Lecture and Laboratory Cr. 4

Methodologies and interpretations of results of clinical chemistry diagnostic tests. Offered Yearly.

Restriction(s): Enrollment limited to students in the Pharmacy and Health Sciences.

Course Material Fees: \$85

CLS 3330 Medical Terminology Cr. 1

Study of medical terms in a body system approach. Review of anatomy and physiology. Offered Every Term.

CLS 4000 Clinical Hematology Cr. 5

Theory and principles for evaluation of the quantity, morphology and function of cellular components of blood. Offered Every Term.

Restriction(s): Enrollment limited to students in the Pharmacy and Health Sciences.

Course Material Fees: \$14

CLS 4010 Clinical Chemistry Cr. 3

Biochemical analysis of blood and other body fluids to determine values of various chemical substances, using routine methods and automation. Offered Every Term.

Restriction(s): Enrollment limited to students in the Pharmacy and Health Sciences.

Course Material Fees: \$14

CLS 4020 Clinical Blood Bank Cr. 2

Theory and principles involving antigen-antibody reactions of blood.

Obtaining, storage and preparation of whole blood or blood components for infusion. Offered Every Term.

Restriction(s): Enrollment limited to students in the Pharmacy and Health Sciences.

Course Material Fees: \$14

CLS 4030 Clinical Microbiology Cr. 5-6

Obtaining, culturing, identification and antibiotic sensitivity of microorganisms causing infection or infestation. Offered Every Term.

Restriction(s): Enrollment limited to students in the Pharmacy and Health Sciences.

Course Material Fees: \$14

CLS 4040 Laboratory Operations Cr. 3

Laboratory management issues and problems, with emphasis on the hospital setting. Includes management theory, interpersonal and technical skills, legal and regulatory issues, computers in laboratories, quality assessment and improvement, and healthcare marketing. Offered Yearly.

Restriction(s): Enrollment limited to students with a class of Junior or Senior; enrollment limited to students in the Pharmacy and Health Sciences; enrollment limited to students in the BS in Clinical Lab Sciences or Bachelor of Health Science programs.

CLS 4050 Clinical Immunology Cr. 1

Study of diseases related to diagnostic immunology. Offered Every Term.

Restriction(s): Enrollment limited to students in the Pharmacy and Health Sciences.

Course Material Fees: \$14

CLS 4210 Hemostasis Lecture and Laboratory Cr. 2

Lecture and laboratory course covering principles of hemostasis and assessment of hemostasis status. Performance and interpretation of diagnostic tests, along with problem solving and correlation of laboratory findings with disease states. Offered Fall.

Course Material Fees: \$75

CLS 4230 Hematology II Cr. 3

Continuation of Hematology I. Introduction to hematologic neoplasms. Application of laboratory methods for diagnosis and treatment. Offered Yearly.

Restriction(s): Enrollment limited to students in the Pharmacy and Health Sciences.

Course Material Fees: \$85

CLS 4990 Professional Directed Study Cr. 1-8

Independent study under faculty supervision. Offered Every Term.

Restriction(s): Enrollment limited to students in the Pharmacy and Health Sciences.

CLS 5020 Pathophysiology for the Clinical Laboratory Cr. 3

Advanced pathophysiologic concepts including etiology, pathogenesis, and clinical manifestations, of commonly encountered altered health states in the adult human. Offered Fall.

Restriction(s): Enrollment limited to students in a BS in Clinical Lab Science or Bachelor of Health Science degrees.

CLS 5070 Clinical Pathology Correlation Cr. 2

Correlation of laboratory data and clinical history through the analysis of case studies. Offered Every Term.

Restriction(s): Enrollment limited to students in the Pharmacy and Health Sciences.

CLS 5500 Immunology and Serology Cr. 3

Lectures and studies; applications of immunology and serology in a lab setting, including relevance to human medicine. Offered Yearly.

Restriction(s): Enrollment limited to students in the Pharmacy and Health Sciences.

Course Material Fees: \$140

CLS 5510 Diagnostic Microbiology I Cr. 4

Lectures and laboratory course in diagnostic microbiology, with a focus on the fundamentals of clinical bacteriology, and human infectious diseases. Offered Winter.

Restriction(s): Enrollment limited to students in the Pharmacy and Health Sciences; enrollment limited to students in the BS in Clinical Lab Sciences or Bachelor of Health Science programs.

Course Material Fees: \$140

CLS 5520 Diagnostic Microbiology II Cr. 4

Lecture and laboratory course in diagnostic microbiology with a focus on clinical virology, mycology, and parasitology. Offered Fall.

Restriction(s): Enrollment limited to students in the Pharmacy and Health Sciences; enrollment limited to students in the BS in Clinical Lab Sciences or Bachelor of Health Science programs.

Course Material Fees: \$140

CLS 5530 Microbiology Simulation Laboratory Cr. 3

Application of previously acquired theory and techniques in a simulated clinical microbiology laboratory, with emphasis on work organization, correlation of results, management, decision-making, and quality assurance. Offered Fall, Spring/Summer.

Prerequisites: CLS 5510 with a minimum grade of C and CLS 5520 with a minimum grade of C

Restriction(s): Enrollment limited to students in the Pharmacy and Health Sciences; enrollment limited to students in the BS in Clinical Lab Sciences or Bachelor of Health Science programs.

Course Material Fees: \$100

CLS 5550 Molecular Diagnostics Cr. 2

Review of molecular biology applicable to current testing systems. Laboratory techniques to elucidate molecular structure and disease states; DNA hybridization, agarose gel electrophoresis; southern and western blot techniques; DNA sequencing; PCR. Offered Yearly.

Restriction(s): Enrollment limited to students in the Pharmacy and Health Sciences.

Course Material Fees: \$140

CLS 5993 Writing Intensive Course in Clinical Laboratory Science Cr. 0

Satisfies General Education Requirement: Writing Intensive Competency Disciplinary writing assignments under the direction of a faculty member.

Course must be elected in conjunction with designated corequisite; see Schedule of Classes for corequisites available each term. Satisfies University General Education Writing Intensive Course in the Major requirement. Required for all majors. Offered Every Term.

Prerequisites: AFS 2390 with a minimum grade of C or ENG 2390 with a minimum grade of C or ENG 3010 with a minimum grade of C or ENG 3020 with a minimum grade of C or ENG 3050 with a minimum grade of C

Restriction(s): Enrollment limited to students in the Pharmacy and Health Sciences.

CMT - CONSTRUCTION MANAGEMENT TECHNOLOGY

CMT 3000 Construction Estimating and Bidding Cr. 3

Fundamental cost estimating principles, processes and methods used in residential and commercial construction. Offered Fall.

Restriction(s): Enrollment is limited to Undergraduate level students; enrollment limited to students in the College of Engineering.

CMT 3010 Introduction to Construction Management Cr. 3

Overview of construction industry; processes involved in construction projects from conception to final delivery. Offered Fall.

Prerequisites: CMT 21X0 with a minimum grade of C

Restriction(s): Enrollment is limited to Undergraduate level students; enrollment limited to students in the College of Engineering.

CMT 3020 Residential and Commercial Land Development and Design Cr. 3

Role and responsibilities of a developer; financing strategies and new trends in lending; forming an effective partnership. Technical processes: from undeveloped land to surveying, conceptual drawing, site planning process, engineering and design, permits, and construction. Offered Winter.

Prerequisites: CMT 2X20 with a minimum grade of C

Restriction(s): Enrollment is limited to Undergraduate level students; enrollment limited to students in the College of Engineering.

CMT 3030 Construction Safety Management Cr. 3

Construction safety and health management as applicable to contractors, owners, and designers. Construction injury and fatality statistics; humanitarian, legal and economic justification for safety; accident causation and control theories; OSHA standards and safe construction procedures. Safety policy, project safety rules, communications network, accident investigation and record keeping, worker orientation and training, and safety program evaluation and audits. Offered Fall.

Restriction(s): Enrollment is limited to Undergraduate level students; enrollment limited to students in the College of Engineering.

CMT 3040 Building Codes Cr. 3

Requirements by regulatory agencies pertaining to the construction industry; current International Building Code and other regulations; emphasis on Michigan applications. Offered Winter.

Prerequisites: CMT 21X0 with a minimum grade of C

Restriction(s): Enrollment is limited to Undergraduate level students; enrollment limited to students in the College of Engineering.

CMT 3050 Construction Accounting and Financial Management Cr. 3

Successful management of finances of the construction project and companies. Accounting systems, financial statements, overhead and profits, cash flows for construction projects and companies, project financing, and financial decision making. Offered Fall.

Prerequisites: ECO 2020 with a minimum grade of C

Restriction(s): Enrollment is limited to Undergraduate level students; enrollment limited to students in the College of Engineering.

CMT 3060 Planning and Scheduling Cr. 3

Principles and use of Primavera Project Planner scheduling software: project planning, scheduling, control, and analysis. Project scheduling methods and construction activity analysis, including Critical Path Method (CPM) and networking techniques. Offered Winter.

Prerequisites: ET 5870 with a minimum grade of C

CMT 3070 Introduction to Green Construction Cr. 3

Sustainable or green-building design and construction: efficient use of resources to create healthier and more energy-efficient buildings. Motivations for green construction projects, technical aspects of their design, obstacles, future directions. Knowledge and capabilities to project-manage a green building. Offered Fall.

Prerequisites: BIO 1030 with a minimum grade of C

Restriction(s): Enrollment is limited to Undergraduate level students; enrollment limited to students in the College of Engineering.

CMT 3080 Advanced Computers in Construction Cr. 3

Advanced applications of MS Excel software in estimating and financial management of construction projects; making effective project presentations using MS PowerPoint. Field applications of computers; use of PDAs and handheld devices in data acquisition and management. Use of REVIT software in Building Information Modeling (BIM). Offered Winter.

Prerequisites: CE 3010 with a minimum grade of C or ET 2140 with a minimum grade of C

Restriction(s): Enrollment is limited to Undergraduate level students; enrollment limited to students in the College of Engineering.

CMT 4030 Facilities Management Principles Cr. 3

Aspects of facilities management: buildings and grounds, custodial services, design and construction, operations and maintenance management. Offered Fall.

Prerequisites: CMT 21X0 with a minimum grade of C

Restriction(s): Enrollment is limited to Undergraduate level students; enrollment limited to students in the College of Engineering.

CMT 4050 Construction Methods Cr. 3

Overview of construction practices in industry; processes and equipment involved in construction projects from conception to final delivery. Offered Fall.

Prerequisites: CMT 21X0 with a minimum grade of C

Restriction(s): Enrollment is limited to Undergraduate level students; enrollment limited to students in the College of Engineering.

CMT 4070 Mechanical and Electrical Systems in Buildings Cr. 3

Principles and applications of basic mechanical and electrical systems; design examples; emerging technology and environmental issues; essential engineering calculations and data. Offered Fall.

Prerequisites: PHY 2130 with a minimum grade of C

Restriction(s): Enrollment is limited to Undergraduate level students; enrollment limited to students in the College of Engineering.

CMT 4140 Project Administration Cr. 3

Overview of construction project and contract administration and management. Use of Excel, Expedition, and Prolog software. Offered Winter.

Prerequisites: CMT 2X00 with a minimum grade of C

Restriction(s): Enrollment is limited to Undergraduate level students; enrollment limited to students in the College of Engineering.

CMT 4200 Senior Project Cr. 3

Satisfies General Education Requirement: Writing Intensive Competency Capstone project; senior students work in teams; application of skills, knowledge, techniques and concepts. Satisfies the University General Education Writing Intensive Course in the Major requirement. Offered Winter.

Restriction(s): Enrollment is limited to Undergraduate level students; enrollment limited to students with a class of Senior; enrollment limited to students in the College of Engineering.

COM - COMMUNICATION

COM 1010 Oral Communication: Basic Speech Cr. 3

Satisfies General Education Requirement: Oral Communication Competency

Beginning course emphasizing fundamentals of speech preparation. Development of poise and confidence in speaking. Offered Every Term.

COM 1500 Survey of Mass Communication Cr. 3

Introductory course in understanding communication theory and effects and the communication industry in the United States. Offered Every Term.

COM 1600 Introduction to Audio-Television-Film Production Cr. 3

Introduction to production techniques and processes; hands-on use of image and sound recording and editing equipment; creation of dramatic and non-fiction studio and location-based projects. Offered Every Term.

Course Material Fees: \$90

COM 1610 Fundamentals of New Media Production Cr. 3

Critical introduction to the emerging landscape of producing original digital content for information and communication technology. Students will develop a critical perspective and the skills needed to engage in new media culture. Offered Winter.

Prerequisites: COM 1600 with a minimum grade of C

Restriction(s): Enrollment is limited to Undergraduate level students.

Course Material Fees: \$70

COM 1700 Media Literacy Cr. 3

Satisfies General Education Requirement: Social Inquiry

Explores the goals and methods of various media industries, identify the influence media has on us, understand benefits and potential negative consequences of media, while identifying specific techniques for becoming media literate. Offered Every Term.

COM 2000 Introduction to Communication Studies Cr. 3

Introduction to the discipline of communication studies. Survey of theory, research, and practice. Offered Yearly.

COM 2010 Introduction to Film Cr. 4

Satisfies General Education Requirement: Cultural Inquiry, Visual Performing Arts

Examination of film techniques and basic methods of film analysis. Offered Every Term.

Course Material Fees: \$15

Equivalent: ENG 2450

COM 2020 History of Film Cr. 3

Satisfies General Education Requirement: Cultural Inquiry, Visual Performing Arts

Critical study of the motion picture as a modern visual art; screening and analysis of representative fiction films to illustrate historical periods and genres. Offered Every Term.

Course Material Fees: \$15

COM 2030 Journalistic Grammar and Style Cr. 3

Grammar use in journalism; Associated Press Style Book. Offered Every Term.

COM 2100 News Reporting Cr. 3

Basic news reporting; gathering the facts and writing them well. Journalism skills course. Offered Every Term.

Prerequisites: COM 1500 with a minimum grade of C and COM 2030 with a minimum grade of C

Course Material Fees: \$30

COM 2110 Argumentation and Debate Cr. 3

Satisfies General Education Requirement: Critical Thinking Competency
Logical and legal foundation of the argumentation process; practical experience in analysis, reasoning, case-building, evaluation of evidence, refutation and cross-examination. Offered Every Term.

COM 2160 Campaigns and Social Movements Cr. 3

Satisfies General Education Requirement: Cultural Inquiry, Philosophy Letters

Critical discussion of the social foundations and values underlying human persuasion. Analysis of persuasive strategies and techniques used in contemporary society: political campaigns, social movements, advertising and consumerism in the U.S. Offered Every Term.

COM 2170 Persuasive Speaking Cr. 3

Advanced public speaking; emphasis on persuasive speeches. Application of social psychology to audience analysis, to speech construction and presentation, and to critical analysis of persuasive public discourse. Offered Every Term.

Prerequisites: COM 1010 with a minimum grade of C or Oral Communication P=100/F=000 with a test score minimum of 100

COM 2200 Interpersonal Communication Cr. 3

Introduction to theory and research on interpersonal communication; analysis of everyday communication situations. Offered Yearly.

COM 2210 Media Writing and Storytelling Cr. 3

Application of writing principles to various forms of copy; continuity, commercials, public service announcements, features, documentary, drama. Offered Every Term.

Prerequisites: ENG 1020 with a minimum grade of C or ENG 1050 with a minimum grade of C or College Level Exam Program with a test score minimum of BC-BD or AA Exempt from Gen Ed MACRAO with a test score minimum of 100 or Michigan Transfer Agreement with a test score minimum of 100 or BA Competencies Waiver with a test score minimum of 100

COM 2230 Broadcast News Writing and Digital Editing Cr. 3

Satisfies General Education Requirement: Writing Intensive Competency
Theory and practice in broadcast news-writing, reporting, performing and editing. Writing Intensive course for broadcasting sequence in Journalism major. Offered Fall, Winter.

Prerequisites: COM 1500 with a minimum grade of C

Course Material Fees: \$50

COM 2240 Forensics Practicum Cr. 1-2

Training and participation in debate and contest speaking. Offered Every Term.

Repeatable for 6 Credits

COM 2250 South End Workshop Cr. 3

Students work in various editing, reporting, and photographic positions at student newspaper. Offered Every Term.

Prerequisites: COM 2100 with a minimum grade of C

COM 2260 Digital Writing and Research Methods Cr. 3

This course prepares students to participate intelligently and critically in the production and consumption of digital media. The course emphasizes fundamental writing and research skills. Offered Fall.

Restriction(s): Enrollment is limited to Undergraduate level students.

COM 2280 Digital Photojournalism Cr. 3

Theory and practical application of photojournalism. Emphasis on journalistic visual storytelling, use of digital camera equipment, theory of photography, and presentation through social media. Students must provide a 35mm DSLR or mirrorless camera with manual capabilities. Offered Fall, Winter.

Course Material Fees: \$50

COM 2290 Fundamentals of New Media Communication Cr. 3

Interdisciplinary introduction to the study of new media by way of an investigation of both theories and applications of emerging forms of communication. Offered Fall.

Restriction(s): Enrollment is limited to Undergraduate level students.

COM 2300 Intercultural Communication Cr. 3

Satisfies General Education Requirement: Diversity Equity Incl Inquiry
The purpose of this course is to engage students in an in-depth exploration of culture within and among different social groups, from a communicative perspective. Discussions and readings will include communication as an element of culture, key concepts and terms that ground our understandings of cross-cultural interactions, a history of the discipline and relevant theories and research in this area. Offered Yearly.
Equivalent: COM 4300

COM 2310 Introduction to Web Design Cr. 3

Introduces students to the current methods and procedures utilized to effectively design and maintain web pages and websites using various CMS (content management system) platforms. Offered Fall.
Course Material Fees: \$35

COM 3010 Media Analysis and Criticism Cr. 3

Satisfies General Education Requirement: Writing Intensive Competency
Formal properties and aesthetic considerations in media, especially film, television and interactive media. Offered Every Term.
Prerequisites: COM 1500 with a minimum grade of C
Restriction(s): Enrollment is limited to students in the Department of Communication.
Course Material Fees: \$10

COM 3100 Public Affairs Reporting Cr. 3

Advanced news reporting, focusing on governmental stories. Offered Fall, Winter.
Prerequisites: COM 2100 with a minimum grade of C
Course Material Fees: \$30

COM 3170 Fundamentals of Public Relations Cr. 3

Historical background of the profession of public relations; communication variables in public relations; emphasis on presentational techniques, publicity preparation and development of special events. Offered Fall, Spring/Summer.
Prerequisites: COM 1010 with a minimum grade of C or COM 2170 with a minimum grade of C or Oral Communication P=100/F=000 with a test score minimum of 100

COM 3210 News Editing Cr. 3

Copy editing, headline writing, AP style, online and print news presentation, preparation for different news platforms. Journalism skills course. Offered Every Term.
Prerequisites: COM 2100 with a minimum grade of C
Course Material Fees: \$15

COM 3230 The African-American Film Experience Cr. 4

Historical and contemporary portrayals of African American people in narrative and documentary film. Emphasis on filmic approaches to race relations, cinematic elaboration of racial stereotypes, and legitimation functions of film. Offered Yearly.
Restriction(s): Enrollment is limited to Undergraduate level students.
Equivalent: AFS 3200

COM 3250 Introduction to Organizational Communication Cr. 3

Introduction to major theories and principles used to guide the effective practice of communication within organizations. Offered Fall, Winter.

COM 3300 Business and Professional Presentations Cr. 3

Satisfies General Education Requirement: Writing Intensive Competency
Review and practice of various oral communication forms used in modern organizations. Topics include persuasive speaking, informative speaking, speech writing, multi-media presentations and business and report writing. Offered Every Term.
Prerequisites: COM 1010 with a minimum grade of C and ENG 2100 with a minimum grade of C or ENG 2110 with a minimum grade of C or ENG 2120 with a minimum grade of C or ENG 2210 with a minimum grade of C or ENG 2310 with a minimum grade of C or ENG 2390 with a minimum grade of C or ENG 2420 with a minimum grade of C or ENG 2560 with a minimum grade of C or ENG 2570 with a minimum grade of C or ENG 3010 or ENG 3020 or ENG 3050
Course Material Fees: \$10

COM 3380 Editing and Field Production Cr. 3

Theoretical, technical and creative storytelling processes of editing; development of technical competency in skills required for location production (camera, lighting, and sound). Offered Every Term.
Prerequisites: COM 1600 with a minimum grade of C
Restriction(s): Enrollment is limited to students with a major, minor, or concentration in Film, Film Honors, Film Studies, Journalism, Journalism Honors, Media Arts and Studies or Media Arts and Studies Honors.
Course Material Fees: \$130

COM 3400 Theories of Communication Cr. 3

Satisfies General Education Requirement: Writing Intensive Competency
Exploration of the role of theory in describing, explaining and predicting human communication behavior in face-to-face and mediated contexts. Offered Every Term.

COM 3990 Directed Study Cr. 1-4

Offered Every Term.
Repeatable for 4 Credits

COM 4041 Rhetoric and the Body Cr. 3

Humanistic analysis, research, and theory in how rhetoric of/about the human body intersects with broader social concerns (e.g., consumerism, gender, disease and health, and race). Offered Every Other Year.

COM 4100 Feature Writing Cr. 3

Satisfies General Education Requirement: Writing Intensive Competency
Advanced news reporting, focusing on feature writing. Offered Fall, Winter.
Prerequisites: COM 2100 with a minimum grade of C
Course Material Fees: \$30

COM 4110 Studies of Legal Argument Cr. 3

Uses of legal argument in a variety of fields and contexts. Different methods of studying argument will be examined. Offered Every Other Year.
Restriction(s): Enrollment limited to students with a class of Junior or Senior.

COM 4130 Communication Ethics Cr. 3

Issues of responsible communication in a variety of contexts including mass, organizational, and interpersonal communication. Offered Every Other Year.
Restriction(s): Enrollment limited to students with a class of Junior or Senior.

COM 4140 Popular and Celebrity Culture Cr. 3

Increasing significance of pop and celebrity culture in shaping cultural and political affairs. Modes of production and consumption of pop culture; understanding pop culture and its effects. Offered Yearly.
Restriction(s): Enrollment limited to students with a class of Junior or Senior.

COM 4150 Communication and Conflict Cr. 3

Examination of the dynamics and processes of conflict across contexts with a focus on communicative theories and practices. Focus on developing and applying assessment and management knowledge and skills to real-world situations. Offered Every Other Year.

Restriction(s): Enrollment limited to students with a class of Junior or Senior.

COM 4170 Public Relations Writing Cr. 3

Satisfies General Education Requirement: Writing Intensive Competency Writing for public relations purposes: backgrounders, fact sheets, press releases; brochures and newsletters. Offered Fall, Winter.

Prerequisites: COM 2030 with a minimum grade of C and COM 3170 with a minimum grade of C

COM 4190 Rhetorical Criticism Cr. 3

An introduction to various methods of rhetorical criticism through analysis of texts and artifacts in terms of persuasion and adaptation to audiences. Offered Fall.

Prerequisites: COM 2000 with a minimum grade of C or COM 3400 with a minimum grade of C

Restriction(s): Enrollment is limited to Undergraduate level students.

COM 4200 Nonverbal Communication Cr. 3

Channels and functions of nonverbal communication; contexts include: gender, culture, adult-infant interaction, therapy. Methods of study. Offered Every Other Year.

Restriction(s): Enrollment limited to students with a class of Junior or Senior.

COM 4210 Research Methods in Communication Cr. 3

Quantitative and qualitative research methods designed to advance knowledge about human communication across applied settings and diverse contexts. Offered Every Term.

Prerequisites: COM 1500 with a minimum grade of C or COM 2000 with a minimum grade of C

Repeatable for 9 Credits

COM 4240 African Americans in Television Cr. 4

Historical overview of African Americans in radio and television with emphasis on three areas of study: news and documentary; entertainment and advertising; and ownership, employment and access. Offered Yearly.

Equivalent: AFS 4240

COM 4250 Reporting Race, Gender, and Culture Cr. 3

Issues of gender, culture and race in media coverage with emphasis on neutral writing and some content analysis. Preparation for students to report on this content with sensitivity and accuracy. Offered Fall, Winter.

Prerequisites: COM 2100 with a minimum grade of C

COM 4270 Group Communication Cr. 3

Theory, research, and practice in group processes and problem-solving in small groups within professional contexts. Offered Every Other Year.

Restriction(s): Enrollment limited to students with a class of Junior or Senior.

COM 4300 Intercultural Communication Cr. 3

Satisfies General Education Requirement: Diversity Equity Incl Inquiry, Global Learning Inquiry

Culture-general instruction in intercultural communication skills and theory. Offered Yearly.

Prerequisites: COM 2000 with a minimum grade of C or COM 3400 with a minimum grade of C

Equivalent: COM 2300

COM 4310 Audio Production Cr. 3

Theory and practice in sound production techniques and experimentation with creative audio production. Offered Every Term.

Prerequisites: COM 1600 with a minimum grade of C and COM 2210 with a minimum grade of C or COM 2230 with a minimum grade of C

Restriction(s): Enrollment is limited to students in the Department of Communication.

Course Material Fees: \$90

COM 4410 Television Production Cr. 4

Theory and practical application of techniques used in television production; use of graphic materials, design and staging concepts, lighting techniques and studio operation; the role of the television producer-director. Offered Every Term.

Prerequisites: COM 1600 with a minimum grade of C and COM 2210 with a minimum grade of C or COM 2230 with a minimum grade of C

Restriction(s): Enrollment is limited to students in the Department of Communication.

Course Material Fees: \$90

COM 4500 Leadership Communication Cr. 3

Theory and application of leadership processes in for-profit and nonprofit organizations. Offered Every Other Year.

Restriction(s): Enrollment limited to students with a class of Junior or Senior.

COM 4560 Telecommunications Policy: A Political Economy Approach Cr. 3

Satisfies General Education Requirement: Writing Intensive Competency Introduction to both the process of developing telecommunications policies and the impact of these policies with particular reference to the United States. Offered Winter.

Prerequisites: COM 1500 with a minimum grade of C

Restriction(s): Enrollment is limited to Undergraduate level students.

COM 4680 WAYN Radio Cr. 2

Participation in WAYN on-line radio. Offered Fall, Winter.

Restriction(s): Enrollment is limited to Undergraduate level students.

COM 4990 Directed Study Cr. 1-3

Supervised individual research. Offered Every Term.

Prerequisite: COM 2100 with a minimum grade of C

Repeatable for 4 Credits

COM 4996 Senior Honors Thesis Cr. 3

Overview of theory and research in communication; closely supervised research project that results in a paper of approximately twenty pages. Offered Yearly.

Restriction(s): Enrollment limited to students with a class of Senior.

COM 4997 Senior Assessment Essay in Film Studies Cr. 1

Preparation of formal paper demonstrating knowledge of methods of film analysis, film history, and film theory. Offered Every Term.

Restriction(s): Enrollment limited to students with a class of Senior; enrollment is limited to students with a major in Interdisciplinary Film Studies.

COM 5010 History of Communication Technologies Cr. 3

Traces the historical development of communication technologies, industry players and government policies, and assesses impact of the technologies in their historical context. Offered Yearly.

Prerequisites: COM 1500 with a minimum grade of C

Restriction(s): Enrollment is limited to students with a major in Communication Studies, Communication, Film, Film Honors, Journalism, Journalism Honors, Media Arts and Studies, Media Arts and Studies Honors, Public Relations, Public Relations Honors or Radio and Television.

COM 5020 Studies in Film History Cr. 3

Analysis of the development of a specific film genre, a director, or other historical aspect of the motion picture. Topics to be announced in Schedule of Classes. Offered Yearly.

Prerequisite: COM 2010 with a minimum grade of C or ENG 2450 with a minimum grade of C

Restriction(s): Enrollment is limited to students with a major in Communication Studies, Communication, Film, Film Honors, Journalism, Journalism Honors, Media Arts and Studies, Media Arts and Studies Honors, Public Relations, Public Relations Honors or Radio and Television.

Course Material Fees: \$20

Repeatable for 12 Credits

COM 5050 Special Topics Cr. 3

Selected topics in communication to be announced in the Schedule of Classes. No more than six credits may be elected in this special topics course in any graduate degree program Offered Intermittently.

Repeatable for 9 Credits

COM 5060 Documentary and Non-Fiction Film and Television Cr. 4

Study of the non-fiction film made for a social, cultural, or political purpose; screening and analysis of selected films. Offered Yearly.

Prerequisites: COM 2010 with a minimum grade of C or COM 2450 with a minimum grade of C

Restriction(s): Enrollment is limited to students in the Department of Communication.

Course Material Fees: \$20

COM 5070 Culture, Communication, and Media Cr. 3

The purpose of this course is to engage students in an in-depth exploration of culture, communication, and media technologies and practices in everyday life. In essence, we will study how understandings of culture shape the world around us, even as it is shaped and mediated by everyday communication, often taken for granted. The course challenges students to rethink everyday representations of culture and social groups, unpack how power relations permeate cultural contexts, and identify alternative frames and openings through emerging media technologies. Offered Every Other Fall.

Restriction(s): Enrollment limited to students with a class of Senior.

COM 5080 History and Law of American Journalism Cr. 3

History of journalism and the structure of the industry in America, including all media; emphasis on development of law relating to communication and changing understanding of the First Amendment. Offered Fall, Winter.

COM 5120 Public Address Cr. 3

Landmark moments of public address. What constitutes public address; relevance of public address studies. Offered Every Other Year.

Restriction(s): Enrollment limited to students with a class of Junior or Senior.

COM 5130 Communication and Social Marketing Cr. 3

Principles of social marketing; student-driven group project. Offered Fall, Spring/Summer.

Prerequisites: COM 4210

COM 5140 Public Relations and Social Media Cr. 3

Examines social media strategies and how they can be constructed, implemented and evaluated in the context of public relations planning. Offered for undergraduate credit only. Offered Winter.

Prerequisites: COM 3170 with a minimum grade of C and COM 4210 with a minimum grade of C

COM 5160 Public Relations Campaigns and Issues Management Cr. 3

Capstone course for public relations majors. Management functions of public campaigns: developing objectives, strategic planning, issues management, budgeting. Blends theoretical concepts with their professional and practical applications; emphasis on public relations planning and evaluation. Offered for undergraduate credit only. Offered Winter.

Prerequisites: COM 3170 with a minimum grade of D- and COM 4170 with a minimum grade of D-

Restriction(s): Enrollment is limited to Undergraduate level students.

COM 5190 Senior Seminar in Communication Cr. 3

Advanced study of theory and research in communication studies. Topics to be announced in schedule of classes. Offered Winter.

Prerequisite: COM 2000 with a minimum grade of C or COM 3400 with a minimum grade of C

Restriction(s): Enrollment limited to students with a class of Senior; enrollment is limited to students in the Department of Communication.

Repeatable for 6 Credits

COM 5200 Special Topics in Advanced Reporting Cr. 3

Special areas of interest, such as sports writing, business writing, columns and editorials. Offered Yearly.

Prerequisites: COM 2100 with a minimum grade of C-

Repeatable for 9 Credits

COM 5250 Professional Issues in News Media Management Cr. 3

Capstone course for journalism majors; must elect in last 21 credits before graduation. Ethics and management structure and practices of media organizations. Individual research projects. Offered Fall, Winter.

Prerequisite: COM 2230 with a minimum grade of C or COM 4100 with a minimum grade of C

COM 5270 Screenwriting Cr. 4

Satisfies General Education Requirement: Writing Intensive Competency Principles and techniques of writing for motion pictures. Analysis and study of professionally written scripts. Exercises in writing dramatic and non-fiction screenplays. This course fulfills the Writing Intensive Requirement for the Film major. Offered Yearly.

Prerequisite: COM 2210 with a minimum grade of C

Restriction(s): Enrollment is limited to students in the Department of Communication.

Course Material Fees: \$10

Repeatable for 8 Credits

COM 5300 Layout and Design Cr. 3

Practical skills course in publishing newsletters, magazines, newspapers and books; emphasis on new computer technology, desktop publishing; business aspects of publishing, including printing, promotion and marketing; skills in use of personal computer for publishing. Offered Intermittently.

Course Material Fees: \$30

COM 5310 Investigative Reporting Cr. 3

Advanced reporting techniques involving use of Freedom of Information Act and computer-assisted data base searches; accessing public records. Offered Intermittently.

Prerequisite: COM 4410 with a minimum grade of C or COM 5381 with a minimum grade of C

COM 5320 Health Communication Cr. 3

Communication demands of health care and health promotion; current communication issues and problems in modern health care systems; identification of communication strategies for health care consumers and providers. Offered for undergraduate credit only. Offered Every Other Year.

Prerequisites: COM 2000 with a minimum grade of C or COM 3400 with a minimum grade of C

COM 5330 Rhetoric of Visual Culture Cr. 3

Influence that vision and visual texts have in our culture. Critical examination of such texts, including photography, museums, monuments, the fashion industry, tattoos and body marking. Offered for undergraduate credit only. Offered Every Other Year.

Prerequisites: COM 2000 with a minimum grade of C or COM 3400 with a minimum grade of C

COM 5350 Media Arts Production Cr. 3

Key components of production for electronic media (field, audio, and television production). Production techniques, aesthetic understanding, directing skills. No credit after COM 5380 or COM 5400. Offered for graduate credit only. Offered Fall.

Course Material Fees: \$100

COM 5360 Gender and Communication Cr. 3

Analysis of gender communication issues within interpersonal, group, organizational, intercultural, public, and mass mediated contexts. Offered for undergraduate credit only. Offered Every Other Year.

Prerequisites: COM 2000 with a minimum grade of D-

COM 5380 Video Field Production and Editing Cr. 3

Theory and practical application of video location production and post-production techniques. Digital non-linear editing and post-production software as used in creative development of original content. Offered Winter.

Prerequisites: May be taken concurrently: COM 1600 with a minimum grade of C or COM 5350 with a minimum grade of C and May be taken concurrently: COM 2210 with a minimum grade of C

Restriction(s): Enrollment is limited to students in the Department of Communication.

Course Material Fees: \$100

COM 5381 TV News Reporting and Digital Editing Cr. 3

Theory and practical application of aesthetics and journalistic values of TV news and feature storytelling. Emphasis on planning, location video and sound protection, editing, interviewing, writing skills, on-camera presentation. Offered Fall, Winter.

Prerequisite: COM 2230 with a minimum grade of C

Restriction(s): Enrollment is limited to students with a major in Journalism, Journalism Honors, Media Arts and Studies or Media Arts and Studies Honors.

Course Material Fees: \$125

COM 5384 Topics in Production Design and Theory Cr. 3

Theory and practical application in the aesthetic and technical considerations of production design. Topics may include: cinematography/lighting, sound design/mixing, experimental film/video, performance production, documentary preproduction, film/video graphic design. Offered Spring/Summer.

Prerequisite: COM 5380 with a minimum grade of C or COM 4310 with a minimum grade of C or COM 5350 with a minimum grade of C

Course Material Fees: \$100

Repeatable for 6 Credits

COM 5390 Digital Animation Cr. 3

Introduction to animation techniques, 2D to 2-1/2D to 3D; includes use of Adobe products such as After Effects. Discussion of alpha channels, masks, rotoscoping, layering, keyframe and behavioral-based animation. Offered Winter.

Prerequisites: COM 1600 with a minimum grade of C or COM 5350 with a minimum grade of C

COM 5400 Techniques of Film and Video Production Cr. 4

Capstone course option for majors in Media Arts and Studies; should be taken in last 21 credits of program. Experience with the preparation, shooting and editing of video projects in film-style production. Offered Every Term.

Prerequisite: COM 3380 with a minimum grade of D- or COM 5380 with a minimum grade of C

Restriction(s): Enrollment is limited to students in the Department of Communication.

Course Material Fees: \$150

COM 5410 Producer's Workshop Cr. 3

Examination of the business, managerial, and creative considerations and process of producing media programming from conception through distribution. Offered Yearly.

Prerequisites: COM 3380 with a minimum grade of C or COM 3390 with a minimum grade of C or COM 5380 with a minimum grade of C or COM 5381 with a minimum grade of C or AIN 3220 with a minimum grade of C

Restriction(s): Enrollment is limited to students with a major in Communication Studies, Communication, Film, Film Honors, Journalism, Journalism Honors, Media Arts and Studies, Media Arts and Studies Honors, Public Relations, Public Relations Honors or Radio and Television.

Course Material Fees: \$35

COM 5420 Director's Workshop Cr. 3

Organization and execution of the film and video director's tasks through production of a major creative project. Offered Yearly.

Prerequisite: COM 5400 with a minimum grade of C

Course Material Fees: \$125

Repeatable for 6 Credits

COM 5440 Film, Cinematography and Lighting Cr. 4

An immersion into the cinematic practices and applied theory of film and digital cinema including the art and technology of cinematography, lighting design, and non-linear post-production. Students will apply an understanding of exposure and color temperature control, workflow management, NLE systems and color grading to the creation of short cinematic works designed for their portfolios and for exhibition. Offered Every Other Year.

Prerequisite: COM 5400 with a minimum grade of C

Restriction(s): Enrollment is limited to students with a major in Communication Studies, Communication, Film, Film Honors, Journalism, Journalism Honors, Media Arts and Studies, Media Arts and Studies Honors, Public Relations, Public Relations Honors or Radio and Television.

Course Material Fees: \$125

COM 5460 Magazine Writing Cr. 3

Advanced feature writing: preparation of magazine features. Students focus on limited number of in-depth articles. Research, structure and writing techniques to produce publishable magazine-length articles. Offered Yearly.

Prerequisite: COM 4100 with a minimum grade of C

COM 5500 Journalism and New Media Cr. 3

Theory and practical application of publishing journalistic works via new media. Emphasis on best practices and techniques of using social media for news coverage. Offered Fall, Winter.

Prerequisite: COM 2100 with a minimum grade of C

Course Material Fees: \$30

COM 5510 Societal Effects of New Technologies Cr. 3

Capstone course; must elect in last 21 credits prior to graduation. Discusses the societal impact of traditional mass media and the evolving interactive technologies of computers and mobile networks as well as emerging technologies such as robotics. Offered Yearly.

Prerequisite: COM 1500 with a minimum grade of C

Restriction(s): Enrollment is limited to students with a major in Communication, Journalism, Journalism Honors, Media Arts and Studies, Media Arts and Studies Honors or Radio and Television.

COM 5520 International Communications Cr. 3

Examination of the complex issues pertaining to international telecommunication, broadcasting and satellite systems within the broader political, economic and sociocultural contexts of globalization. Offered Winter.

COM 5540 Film Criticism and Theory Cr. 3

Introduction to the major classical and contemporary theoretical and critical approaches to the study of film and screen arts, inclusive of Third Cinema theory, in a globalized, multi-screen media environment. Offered Fall.

Prerequisites: 2 of COM 2020, COM 3010, COM 3230, AFS 3200, COM 3400

COM 5600 Strategic Communication in Nonprofit and the Arts Organizations Cr. 3

An introduction to strategic communication theory and practice as it applies to non-profit organizations. Includes working with arts organizations to determine their public relations needs and developing a strategic communication campaign that addresses those objectives. Offered Winter.

Restriction(s): Enrollment is limited to Graduate level students.

COM 5610 Advanced TV Production Cr. 3

Students work on producing live, recorded TV programs and work on a professional-style TV production crew. Positions include technical director, teleprompter operator, producers, audio, lighting, staging/set construction personnel, camera operators, editors. Offered Fall, Winter.

Prerequisite: COM 4410 with a minimum grade of C or COM 5381 with a minimum grade of C

Course Material Fees: \$135

Repeatable for 6 Credits

COM 5900 Senior Project in Communication Studies Cr. 3

Combination of lectures and workshops to assist students in carrying out a service learning or individual research project. Offered for undergraduate credit only. Offered Winter.

Restriction(s): Enrollment is limited to Undergraduate level students; enrollment is limited to students with a major in Communication Studies or Communication Studies Honors; enrollment limited to students in a Bachelor of Arts degree.

COM 5993 Writing Intensive Course Cr. 0

Satisfies General Education Requirement: Writing Intensive Competency Disciplinary writing assignments under the direction of a faculty member. Must be selected in conjunction with a designated corequisite; see section listing in Schedule of Classes for corequisites available each term. Satisfies the University General Education Writing Intensive Course in the Major requirement. No degree credit. Required for all Film Studies majors. Offered Every Term.

Prerequisites: AFS 2390 with a minimum grade of C or ENG 2390 with a minimum grade of C or ENG 3010 with a minimum grade of C or ENG 3020 with a minimum grade of C or ENG 3050 with a minimum grade of C

Restriction(s): Enrollment is limited to Undergraduate level students.

COM 6050 New Media Practices Cr. 3

Principles and practices of new media and interactive communication. Integrative applications include social networking, wikis, blogs, podcasting, websites and file sharing. Offered Fall.

COM 6060 Teaching Communication at the Secondary Level Cr. 3

Philosophy, pedagogical issues, and methods for teaching speech in secondary schools. Offered Every Other Year.

COM 6070 Directing Forensics Cr. 3

Philosophy and methods of directing high school and college forensics programs; techniques of coaching for debate, oratory, extempore speaking and other reading and speaking contests. Offered Every Other Year.

COM 6090 Digital Screen Media Cr. 3

Foundational techniques of creating transmedia content. Students explore basic interactivity, and gain experience designing and implementing sites for multimedia platforms. Offered Winter.

Restriction(s): Enrollment is limited to Graduate level students.

Course Material Fees: \$85

COM 6100 Speech Writing Cr. 3

Preparation and presentation of speech manuscripts. Emphasis on style of writing, use of supporting materials and factors of interest. Special problems of ghost-writing considered. Offered Every Other Year.

COM 6140 Public Relations Theory Cr. 3

This course provides a foundational grounding in public relations theories and examines them in different communication contexts, including mediated, crisis, and international. Offered Fall.

Restriction(s): Enrollment is limited to Graduate level students.

COM 6180 Principles of Health Communication Cr. 3

Graduate survey of theory, research and practice in communication; emphasis on collaborative patient-provider interactions and health campaigns. Offered for graduate credit only. Offered Fall.

Restriction(s): Enrollment is limited to Graduate level students.

COM 6190 Internship Cr. 1-3

On-the-job observations and work experience in business, service, social, governmental, and industrial organizations. Emphasis on journalism, public relations, and organizational communication. Offered Every Term.

Repeatable for 6 Credits

COM 6220 Dispute Resolution and Communication Technology Cr. 3

Conflict in online environments; development of Online Dispute Resolution (ODR). Hands-on work with state-of-the-art ODR technologies via several simulations. Offered Every Other Year.

COM 6250 Organizational Communication Cr. 3

Theoretical review of the structure process and function of communication within and between organizations. Analysis of current and emerging issues in the theory and research of organizational communication. Offered Fall.

COM 6270 New Media Theory Cr. 3

Analysis of new media and interactive communication processes. Emphasis on critical theory and cultural studies in relation to interpersonal, group and organizational contexts. Research projects. Offered Yearly.

COM 6280 Reporting on Diversity Cr. 3

Recognition and understanding of differences in culture, ethnicity, gender, and alternative lifestyles; sensitivities in writing and reporting; for students intending careers in the news media. Offered for graduate credit only. Offered Fall, Winter.

COM 6310 Allesee Lectures in Media Cr. 1

Through public lectures, screenings and discussion sessions, this course provides critical and analytical approaches to the study of work by leading artists, professionals and/or scholars in the fields of film, media arts, or broadcast journalism. Offered Yearly.

Restriction(s): Enrollment limited to students with a class of Unranked Grad, Junior or Senior; enrollment limited to students in the Fine, Performing & Comm. Arts.

Repeatable for 3 Credits

COM 6350 Communication, Culture, and Conflict Cr. 3

Overview of communication theory and practice as it relates to issues of culture, conflict and dispute resolution. Offered Fall.

COM 6390 Documentary Storytelling I Cr. 3

Research practices, production techniques and ethical considerations vital to documentary storytelling; camera, sound recording and digital workflow techniques employed in small-crew documentary production; interview and narrative construction techniques. Emphasis on the development of research, conceptualization, visualization, and preproduction skills required for documentary filmmaking. For graduate students, this is the first of a two-semester sequence in documentary filmmaking. Graduate students should plan to register for COM 7390 upon successful completion of this course. Offered Winter.

Prerequisites: May be taken concurrently: COM 5060 with a minimum grade of C and COM 3380 with a minimum grade of B+ or COM 5380 with a minimum grade of B+ or COM 5381 with a minimum grade of B+ or COM 6090 with a minimum grade of B+

Course Material Fees: \$125

COM 6410 Allesee Master Class Cr. 1-3

The Allesee Master Class provides students the opportunity to work with leading artists, professionals, and/or scholars in the fields of film, media arts, or broadcast journalism develop and refine professional and creative skills in a production environment. Offered Yearly.

Repeatable for 6 Credits

COM 6530 Audience Measurement and Survey Techniques Cr. 3

Theory and application of quantitative and qualitative research techniques in surveying audiences for electronic media. Offered for graduate credit only. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate level students.

COM 6680 Directed Projects in Film and Media Cr. 1-3

Advanced individual projects. Offered Every Term.

Prerequisite: COM 5400 with a minimum grade of C

Repeatable for 3 Credits

COM 7000 Introduction to MA Studies in Communication Cr. 3

Fundamentals of scholarly research and writing at the graduate level. Offered Fall, Spring/Summer.

Restriction(s): Enrollment is limited to Graduate level students.

COM 7010 Special Topics Cr. 3

Selected topics in communication to be announced in the Schedule of Classes. Offered Every Other Year.

Restriction(s): Enrollment is limited to Graduate level students.

Repeatable for 9 Credits

COM 7011 Intro: Professional Practices in Media Cr. 3

Bridge course for new MA students who do not have a professional background or undergraduate degree in journalism or public relations. Offered Fall.

Restriction(s): Enrollment is limited to Graduate level students.

COM 7040 Language and Power Cr. 3

Ways in which language is used as a device of oppression and liberation. Offered Every Other Year.

Restriction(s): Enrollment is limited to Graduate level students.

COM 7110 Theory of Argument Cr. 3

Advanced studies in argumentation, including the structure of reasoning, the organization of arguments, strategies of argument, and the nature of proof. Offered Every Other Year.

Restriction(s): Enrollment is limited to Graduate level students.

COM 7120 Contemporary Political Campaigns Cr. 3

Study of methods for analyzing political campaigns; a critical evaluation of presidential campaigns from 1960 to the present. Offered Every Other Year.

Restriction(s): Enrollment is limited to Graduate level students.

Repeatable for 6 Credits

COM 7140 Public Relations Campaigns and Issues Management Cr. 3

Management functions of public relations campaigns: developing objectives, strategic planning, issues management, budgeting. Blends theoretical concepts with their professional and practical applications; emphasis on prominent critical rhetorical approaches to public relations planning and evaluations. Offered Winter.

Restriction(s): Enrollment is limited to Graduate level students.

COM 7150 Micro-Level Organizational Communication Cr. 3

Communicative processes and behaviors that affect individuals in organizations; quality and quantity of workplace communication at dyadic and group levels. Offered Every Other Year.

Restriction(s): Enrollment is limited to Graduate level students.

COM 7155 Theories of Interpersonal Communication Cr. 3

Survey of theory and research on interpersonal interaction, with special emphasis on social perception, self-presentation, and the formation of relationships in interaction. Offered Every Other Year.

Restriction(s): Enrollment is limited to Graduate level students.

COM 7160 Crisis Communication Cr. 3

Theoretical and case-study approach to communicative aspects of organizational crisis management. Topics include post-crisis response, crisis sensing, crisis planning. Offered Every Other Year.

Prerequisite: COM 6250 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

COM 7162 Risk Communication: Theoretical and Practical Approaches Cr. 3

Introduces students to the theoretical approaches to risk communication. In addition, students will be introduced to research methods that may be used to conduct evaluation research on the impact of mediated risk communication. Offered Fall.

Restriction(s): Enrollment is limited to Graduate level students.

COM 7165 Communication and Issue Management Cr. 3

Theoretical and case study approach to management of public policy issues facing organizations. Topics include: public relations, issue monitoring, environmental uncertainty. Offered Every Other Year.

Prerequisite: COM 6250 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

COM 7170 Health and Risk Communication Cr. 3

Theory and research in health and risk communication. Role of communication in hindering and promoting health under situations of health risk such as disasters and other public health emergencies. Offered Winter.

Restriction(s): Enrollment is limited to Graduate level students.

COM 7172 Risk Communication: Disasters, Hazards, and the Media Cr. 3

Introduces students to the role of mass media in communicating about disasters and hazards, public opinion and cultural understanding of risk as expressed through popular culture, individual and public policy response to risk messages, and some introduction to the ethical issues embedded in the concept of risk. Offered Fall.

Restriction(s): Enrollment is limited to Graduate level students.

COM 7200 Rhetoric of Visual Culture Cr. 3

Critical analysis of symbolic and performative dimensions of visual culture. Theoretical and material force of photography, architecture, landscape, museums, public memorials, and others. Offered Every Other Year.

Restriction(s): Enrollment is limited to Graduate level students.

COM 7210 New Media and Strategic Communication Cr. 3

Fundamental theories and practical applications of social media, and its strategic use in public relations and professional communication. Offered Every Other Year.

Restriction(s): Enrollment is limited to Graduate level students.

COM 7220 Professional Issues in Applied Communication Cr. 3

Offered Winter.

Restriction(s): Enrollment is limited to Graduate level students.

COM 7240 Communication Consulting and Training Cr. 3

Theoretical and pragmatic approaches to the design and implementation of strategic communication changes in organizations. Topics: role of change, change strategies, behavioral and structural change, design of communication audits, communication training methods, and relations with client organizations. Offered Every Other Year.

Prerequisite: COM 6250 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

COM 7250 Rhetorical Criticism Cr. 3

Principles of criticism as applied to public address; analysis of standards and methods of evaluation; readings in modern criticism of public address. Research project. Offered Fall.

Restriction(s): Enrollment is limited to Graduate level students.

COM 7260 Quantitative Research Methods in Communication Cr. 3

Methods of data collection and analysis in communication research, approaches to measurement, research design, and other quantitative methods of communication research. Offered Fall.

Restriction(s): Enrollment is limited to Graduate level students.

COM 7270 Advanced Screenwriting Cr. 4

Research and writing for creation of full-length dramatic or documentary film and television scripts. Offered Yearly.

Prerequisite: COM 5270 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

Course Material Fees: \$10

COM 7290 Contemporary Rhetorical Theory Cr. 3

Exploratory analysis of a broad spectrum of recent works relevant to the art of discourse. Offered Every Other Year.

Restriction(s): Enrollment is limited to Graduate level students.

COM 7300 Feminist Rhetorical Criticism Cr. 3

Investigation of philosophical and practical issues inherent in feminist approaches to rhetorical theory and criticism. Offered Every Other Year.

Prerequisite: COM 7250 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

COM 7340 Interviewing Cr. 3

Theory and research on interviewing across a range of contexts. Topics include: constructing questions and protocols, listening, role, self-presentation, social understanding. Contexts may include screening, counseling, legal, journalism and research. Offered Every Other Year.

Restriction(s): Enrollment is limited to Graduate level students.

COM 7360 Qualitative Research Methods in Communication Cr. 3

Theoretical bases of qualitative research in communication and the development of skills in conceptualizing/designing qualitative research projects in communication, gathering data, analyzing data (using online software), and writing qualitative research. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate level students.

COM 7365 Ethnographic Methods for Communication Research Cr. 3

Design, implementation and evaluation of ethnographic and participant/observation research studies in communication. Offered Every Other Year.

Restriction(s): Enrollment is limited to Graduate level students.

COM 7380 Advanced Media Editing Cr. 3

Principles of video and film editing; exercises and assignments covering pace, meaning, special effects; styles of editing related to genres; non-linear editing software programs. Offered Fall, Winter.

Restriction(s): Enrollment is limited to Graduate level students.

Course Material Fees: \$30

COM 7390 Documentary Storytelling II Cr. 3

Second-semester of a two-semester graduate sequence on documentary storytelling. Advanced principles of writing, producing, directing and editing the documentary. Special emphasis on advanced location production and post-production visual storytelling techniques including character development, continuity, and narrative story structure. Graduate students should plan to enroll in this course in the regular semester immediately following their completion of COM 6390. Offered Fall.

Prerequisite: COM 6390 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

Course Material Fees: \$125

COM 7410 Communication Theory Cr. 3

Systematic analysis of major twentieth century theories of communication, with a discussion of their historical and philosophical foundations. Discussion and critical review of recent developments in communication theory. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate level students.

COM 7420 Seminar in Directing Cr. 3

Provides the advanced media production student the opportunity to devote an entire semester to producing, directing, and editing a significant cinematic or interactive work. It focuses on creative approaches to cinematic visualization, character development, dramatic structure, scene construction, sound design and the direction of performances (actors, talent and production teams) in the crafting of compelling motion picture stories. Students work to establish their artistic voices as they create significant films or interactive digital media projects for professional exhibition and distribution. A completed script or detailed treatment is required prior to registration. Offered Fall, Winter.

Restriction(s): Enrollment is limited to Graduate level students.

Course Material Fees: \$125

Repeatable for 6 Credits

COM 7500 Seminar in Mass Media Cr. 3

Advanced topics in mass communication theory and research. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate level students.

Repeatable for 9 Credits

COM 7510 Seminar in Research Methods Cr. 3

Advanced and focused methods of research in communication, journalism and media studies. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate level students.

Repeatable for 9 Credits

COM 7520 Theories of Media Effects Cr. 3

Survey of research and theory in mass communication effects on individuals and social systems. Processes of mass media influence; role of mass communications in society. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate level students.

Repeatable for 998.99 Credits

COM 7530 Critical Mass Communication Theory Cr. 3

Foundational readings and concepts; theoretical perspectives of critical theory and cultural studies. Offered Every Other Year.

Restriction(s): Enrollment is limited to Graduate level students.

COM 7580 Content Analysis Cr. 3

Theory and practice in quantitative techniques for analyzing texts. Offered Every Other Year.

Restriction(s): Enrollment is limited to Graduate level students.

COM 7610 Feminist Media Theory and Criticism Cr. 3

History of feminist film and television theory and criticism since the 1970s; methods for textual analysis, the theories that inform these methods, and media scholarship other than textual analysis. Offered Every Other Year.

Restriction(s): Enrollment is limited to Graduate level students.

COM 7700 Mass Media and Political Communication Cr. 3

Mass media research methods for political communication studied and applied. Offered Every Other Year.

Restriction(s): Enrollment is limited to Graduate level students.

COM 7810 Seminar in Communication Education Cr. 3

Philosophy and approaches to teaching communication on the college level. Topics include objectives, evaluation, motivation and teaching strategies. Offered Fall.

Restriction(s): Enrollment is limited to Graduate level students.

COM 7840 Studies in Communication Education Cr. 3

Research in communication education: issues, trends and controversies as reflected in major journals. Offered Intermittently.

Prerequisite: COM 7810 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

COM 7990 Directed Study: MA Cr. 1-4

Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students.

Repeatable for 6 Credits

COM 7991 Directed Study: PhD Cr. 1-4

Research in major field for advanced graduate students. Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students.

Repeatable for 6 Credits

COM 7999 Master's Essay Direction Cr. 1-3

Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students.

COM 8000 Introduction to PhD Studies Cr. 3

Introduction to perspectives, approaches and methods of communication research. Required during first term of Ph.D. study in the Communication Department. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate level students.

COM 8170 Seminar in Interpersonal Communication Cr. 3

Various topics in interpersonal communication. Taught on a term-specific basis; see Schedule of Classes for current offerings. Offered Intermittently.

Restriction(s): Enrollment is limited to Graduate level students.

COM 8290 Seminar in Communication Studies Cr. 3

Advanced topics in communication and rhetorical theory. Offered Intermittently.

Restriction(s): Enrollment is limited to Graduate level students.

Repeatable for 9 Credits

COM 8350 Advanced Study in Rhetorical Criticism Cr. 3

Study of important decisions in rhetorical criticism; two critical projects refined throughout the term in context of critical process, perspectives and approaches. Offered Every Other Year.

Prerequisite: COM 7250 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

COM 8999 Master's Thesis Research and Direction Cr. 1-8

Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students.

Repeatable for 8 Credits

COM 9990 Pre-Doctoral Candidacy Research Cr. 1-8

Research in preparation for doctoral dissertation. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate level students.

Repeatable for 12 Credits

COM 9991 Doctoral Candidate Status I: Dissertation Research and Direction Cr. 7.5

Offered Yearly.

Restriction(s): Enrollment is limited to Graduate level students.

COM 9992 Doctoral Candidate Status II: Dissertation Research and Direction Cr. 7.5

Offered Yearly.

Prerequisite: COM 9991 with a minimum grade of S

Restriction(s): Enrollment is limited to Graduate level students.

COM 9993 Doctoral Candidate Status III: Dissertation Research and Direction Cr. 7.5

Offered Yearly.

Prerequisite: COM 9992 with a minimum grade of S

Restriction(s): Enrollment is limited to Graduate level students.

COM 9994 Doctoral Candidate Status IV: Dissertation Research and Direction Cr. 7.5

Offered Yearly.

Prerequisite: COM 9993 with a minimum grade of S

Restriction(s): Enrollment is limited to Graduate level students.

COM 9995 Candidate Maintenance Status: Doctoral Dissertation Research and Direction Cr. 0

Offered Yearly.

Restriction(s): Enrollment is limited to Graduate level students.

Course Material Fees: \$370.26

Repeatable for 0 Credits

CRJ - CRIMINAL JUSTICE

CRJ 1010 Introduction to Criminal Justice Cr. 3

Satisfies General Education Requirement: Social Inquiry

Scientific method and multidisciplinary approach to administration, procedures, and policies of agencies of government charged with enforcing the law, adjudicating crime, and correcting criminal and deviant conduct. Response of justice system to social norms and trends; reciprocal relationship to social behaviors and values. No credit after former CRJ 2000. Offered Every Term.

CRJ 2204 Outsiders and Deviants Cr. 3

Provides an overview of the sociological student social deviance, emphasizing crime and other deviant behaviors and conditions Offered Every Term.

Equivalent: SOC 2204

CRJ 2550 Race, Crime and Justice Cr. 3

Satisfies General Education Requirement: Diversity Equity Incl Inquiry
Introduces students to sociological and legal analysis of the American justice system as a form of race based social control. The class will discuss data, theoretical approaches, and current research about the ways in which race and ethnicity are connected with criminal involvement and criminal justice processing. In doing so, we will learn about the complex ways in which the race-crime-criminal justice connection is both a product of societal forces and affects broader social relations. Offered Yearly.

CRJ 2650 Gender and Crime Cr. 3

Satisfies General Education Requirement: Diversity Equity Incl Inquiry
Critical examination of gender-related issues in criminal justice; impact on defendants, inmates, victims, and criminal justice personnel; relation to policy issues. Offered Yearly.

Equivalent: GSW 2650

CRJ 2750 Diversity Issues in Criminal Justice Cr. 3

Satisfies General Education Requirement: Diversity Equity Incl Inquiry
Critical examination of gender, race, class, and ethnicity issues in criminal justice; impact on defendants, inmates, victims, and criminal justice personnel; relation to policy issues. No credit after CRJ/GSW 3750. Offered Yearly.

Equivalent: GSW 2750

CRJ 3050 Mental Health and Crime Cr. 3

Provides a comprehensive overview of the issues and challenges located at the intersection of mental health/illness and the criminal justice system. Attention will be focused on a range of topics, including, but not limited to, the definition of mental illness, deinstitutionalization and criminalization of the mentally ill, the impact of mental illness on criminal proceedings, treatment/intervention effectiveness, and the reentry/reintegration of mentally ill individuals. Offered Fall.

Equivalent: PH 3050

CRJ 3110 Domestic Violence and Criminal Justice Cr. 4

Emotional, physical, and sexual abuse in domestic relationships. Topics include: theories of violence, law, and the response of the justice system. No credit after former CRJ 4750. Offered Fall.

Restriction(s): Enrollment is limited to Undergraduate level students.

CRJ 3120 Politics of the Criminal Justice Process Cr. 3

Satisfies General Education Requirement: Civic Literacy

Political aspects of criminal justice; politics of crime legislation, police function, prosecution, adjudication, and corrections; Federal role in criminal justice. Offered Intermittently.

Equivalent: PS 3120

CRJ 3200 Police and Society Cr. 4

Overview of policing. Topics include: social and historical origins of policing, police culture, organizational structure of policing, future of policing. No credit after former CRJ 4600. Offered Every Term.

Prerequisite: CRJ 1010 with a minimum grade of D-

CRJ 3260 Investigation Cr. 3

Overview of the history of criminal investigation, the functions of police investigators, crime scene search and evidence processing, an introduction to criminalistics, locating and interviewing witnesses, examining the elements of proof required in specific criminal offenses and interrogation techniques (pre- and post-Miranda). Offered Every Term.

Prerequisites: CRJ 1010 with a minimum grade of D-

CRJ 3350 Corrections Cr. 4

Description and analysis of legal, social and political issues affecting contemporary correctional theory and practice. Topics include: history of corrections, function and social structure of correctional institutions, institutional alternatives including diversion, probation and parole. Field trips to institutions and community correctional settings normally required. Offered Every Term.

Restriction(s): Enrollment is limited to Undergraduate level students.

Equivalent: SOC 3840

CRJ 3400 Juvenile Delinquency and Justice Cr. 4

Overview of the theoretical background, structure, and processes of contemporary juvenile justice, as well as the correlates and characteristics of delinquency. No credit after former CRJ 4410. Offered Every Term.

Prerequisite: CRJ 1010 with a minimum grade of D-

Restriction(s): Enrollment is limited to Undergraduate level students.

CRJ 3550 Research Methods in Criminal Justice Cr. 4

Overview of research design and methodology; criminal justice data sources; designs for research; and introduction to descriptive and inferential statistics in criminal justice. No credit after former CRJ 4860. Offered Every Term.

Prerequisite: CRJ 1010 with a minimum grade of D-

Restriction(s): Enrollment is limited to Undergraduate level students.

CRJ 3700 The Judicial Process Cr. 4

Structure, powers, doctrines and judicial processes including origin, nature and functions of judicial review in the criminal justice system. Offered Every Term.

Prerequisite: CRJ 1010 with a minimum grade of D-

Restriction(s): Enrollment is limited to Undergraduate level students.

CRJ 3710 Legal Writing for Criminal Justice Cr. 4

Basic elements of legal research; the law library and finding the law; case analysis; statutory analysis; constitutional analysis; writing legal memorandums; writing legal briefs; persuasive writing. Offered Every Term.

CRJ 3800 Criminological Theories Cr. 4

Delineation, review, and critical analysis of major explanations of criminality including biological, psychological, deterrence, rational choice, learning and integrated theories. Offered Fall, Winter.

Prerequisite: CRJ 1010 with a minimum grade of D-

Restriction(s): Enrollment is limited to Undergraduate level students.

CRJ 3900 Comparative Criminal Justice Cr. 3

Satisfies General Education Requirement: Global Learning Inquiry

Topics include: the foundation of criminal justice system, crime on the world scene, legal traditions, law enforcement, courts and criminal procedure, corrections, and juvenile justice around the world. Offered Yearly.

CRJ 4050 Crime and Public Health Cr. 3

Introduces students to the interface between public health and criminal justice in the United States, focusing on different aspects of the relationship. It will first describe the newly emerged epidemiological criminology, and then analyze a variety of topics on crime and public health, including, but not limited to, the health of incarcerated populations, the health of criminal justice professionals, health consequences of crime and risk behaviors, public health and law, gangs and gang violence, mental health and substance abuse, environmental justice, and public health interventions with criminal justice populations. Offered Winter.

Equivalent: PH 4050

CRJ 4220 Criminalistics Cr. 4

Application of the physical and biological sciences to criminal investigation; ballistics, fingerprints, DNA, trace evidence, drugs, arson and explosives, questioned documents, introduction to forensic anthropology, courtroom testimony, ethics. Offered Every Term.

Restriction(s): Enrollment is limited to Graduate or Undergraduate level students.

CRJ 4310 Correctional Counseling Methods Cr. 3

Application of causal theories to counseling strategies. Models for offender classification and treatment. Counselor attitudes and styles. Special issues in the treatment of delinquents. Individual and group models for counseling. Evaluation models to assess counseling effectiveness. Offered Winter.

Prerequisite: CRJ 3400 with a minimum grade of D-

Restriction(s): Enrollment is limited to Undergraduate level students.

CRJ 4740 Constitutional Criminal Procedure Cr. 4

Topics include: constitutional safeguards, role of the Supreme Court, due process, search and seizure of persons and property, self-incrimination and confessions, right to counsel, and pre-trial and trial processes. Offered Every Term.

Prerequisite: CRJ 1010 with a minimum grade of D-

Restriction(s): Enrollment limited to students with a class of Junior or Senior.

CRJ 4970 Internship in Criminal Justice Cr. 3

A program of participation and study designed to give students the opportunity to interact with criminal justice professionals in the workplace. Internship opportunities are available in the courts, corrections, law enforcement, and other agencies. Offered Every Term.

Prerequisites: CRJ 1010 with a minimum grade of D-

Restriction(s): Enrollment is limited to Undergraduate level students; enrollment limited to students with a class of Junior or Senior; enrollment is limited to students with a major in Criminal Justice.

Equivalent: US 6000

CRJ 4990 Directed Study Cr. 1-3

Independent reading or research in a particular facet of criminal justice, culminating in an extended paper or research report prepared under direct supervision of faculty. Offered Every Term.

Restriction(s): Enrollment is limited to Undergraduate level students.

Repeatable for 3 Credits

CRJ 4998 Honors Thesis in Criminal Justice Cr. 3-6

Research problem to be completed under the direction of a faculty member. Offered Every Term.

Restriction(s): Enrollment is limited to Undergraduate level students; enrollment is limited to students with a major in Criminal Justice or Criminal Justice Honors.

CRJ 5500 Child Abuse and Neglect Cr. 3

Dynamics and psychopathology of child abuse: its incidence and impact on delinquent/criminal behavior, family, community, and the criminal justice system. Offered Fall.

Prerequisites: CRJ 4410 with a minimum grade of D-

CRJ 5810 Law in Human Society Cr. 3

Law and the legal structure in its social context. The development, enforcement and interpretation of law; emphasis on the American system of government. Reciprocal effects of law and the society in which it develops; comparative analysis. Designed for pre-law, criminal justice, and political science students, as well as for sociology majors. Offered Yearly.

Equivalent: SOC 5810

CRJ 5993 Writing Intensive Course in Criminal Justice Cr. 0

Satisfies General Education Requirement: Writing Intensive Competency Disciplinary writing assignments under the direction of the instructor for CRJ 3800. Satisfies the University General Education Writing Intensive Course in the Major requirement. Students must submit and endorse the Writing Intensive (CRJ 5993) Contract stating the departmentally-approved requirements of the research writing project. Offered Every Term.

Prerequisites: May be taken concurrently: CRJ 3800 with a minimum grade of D- or AFS 2390 with a minimum grade of C or ENG 2390 with a minimum grade of C or ENG 3010 with a minimum grade of C or ENG 3020 with a minimum grade of C or ENG 3050 with a minimum grade of C

Restriction(s): Enrollment is limited to Undergraduate level students.

CRJ 5994 Dispute Resolution Cr. 3

Overview of the processes and actors in the field of dispute resolution including negotiation, mediation, arbitration, and conciliation. Offered Yearly.

Equivalent: PCS 5000, PS 5890, PSY 5710

CRJ 5995 Special Topics in Criminal Justice Cr. 3

Selected topics in criminal justice issues. Offered Every Term.

Repeatable for 9 Credits

CRJ 5996 Special Topics in Criminology Cr. 3

Special criminology topics. Offered Every Term.

Prerequisites: CRJ 1010 with a minimum grade of D-

Restriction(s): Enrollment is limited to Undergraduate level students.

Repeatable for 9 Credits

CRJ 5997 Special Topics in Law and the Legal System Cr. 3

Analysis of selected topics in the law and the legal system. Offered Intermittently.

Prerequisite: CRJ 1010 with a minimum grade of D-

Restriction(s): Enrollment is limited to Undergraduate level students.

Repeatable for 9 Credits

CRJ 7010 Contemporary Criminal Justice Cr. 3

Survey of classic literature and important contemporary studies of all major facets of criminal justice system, including law, police, prosecution, defense, judiciary, probation, corrections, and parole. Offered Fall.

Restriction(s): Enrollment is limited to Graduate level students.

CRJ 7020 The Nature of Crime Cr. 3

Definition and measure of crime, crime statistics, types of criminal behavior; focus on causes of crime in context of various theoretical perspectives. Offered Winter.

Restriction(s): Enrollment is limited to Graduate level students.

CRJ 7200 Public Policy and Criminal Justice Cr. 3

Analysis of interrelationship of criminal justice system components and the political setting surrounding the formulation and administration of public policies for crime control. Offered Intermittently.

Restriction(s): Enrollment is limited to Graduate level students.

CRJ 7220 Delinquency and Justice Cr. 3

Empirical research on institutions which influence delinquency, including families, peers, and schools. Empirical and conceptual evaluation of delinquency theories; focus on their relationship to juvenile justice and policy. Offered Every Other Winter.

Restriction(s): Enrollment is limited to Graduate level students.

CRJ 7230 Policing and Society Cr. 3

Critical examination of role of police in contemporary society. Seminar topics include: history, culture, and social and organizational context of policing; current issues and future directions. Offered Winter.

Restriction(s): Enrollment is limited to Graduate level students.

CRJ 7240 Corrections Cr. 3

Legal, social, and political issues in both institutional and community corrections. Topics may include incarceration trends, penal philosophy, sanctions, community-based corrections, overcrowding, and related issues. Offered Winter.

Restriction(s): Enrollment is limited to Graduate level students.

CRJ 7400 Data Management and Analysis for Criminal Justice Cr. 3

Basic techniques for accessing and managing criminal justice-related data, introduction to quantitative analysis, and introduction to program evaluation. Contemporary data analysis tools in criminal justice. Offered Winter.

Prerequisite: CRJ 7860

Restriction(s): Enrollment is limited to Graduate level students.

CRJ 7405 Wrongful Conviction Cr. 3

Causes and incidence of wrongful convictions; innocence movement; psychological and social consequences for exonerees and crime victims; exoneree compensation; legal and policy reforms to reduce wrongful convictions in policing, forensic science, prosecution, and adjudication. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate level students.

CRJ 7860 Research Methods in Criminal Justice Cr. 3

Focus on logic of research designs, sampling techniques, data collection, instrument construction, available data sources in the field of criminal justice. Offered Fall.

Restriction(s): Enrollment is limited to Graduate level students.

CRJ 7870 Master's Capstone Seminar in Criminal Justice Cr. 3

Students write essays demonstrating their knowledge and critical analysis of criminological and criminal justice theory, research methods, and public policy issues. Offered Fall, Winter.

Prerequisite: CRJ 7010 with a minimum grade of B- and CRJ 7020 with a minimum grade of B- and CRJ 7860 with a minimum grade of B-

Restriction(s): Enrollment is limited to Graduate level students.

CRJ 7990 Directed Study Cr. 1-3

Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students.

Repeatable for 3 Credits

CRJ 7995 Special Topics in Criminal Justice and Criminology Cr. 3

Specialized topics in criminal justice. Topics may vary from semester to semester. Offered Intermittently.

Restriction(s): Enrollment is limited to Graduate level students.

Repeatable for 9 Credits

CRJ 7999 Master's Essay Direction Cr. 3

Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students.

CRJ 8999 Master's Thesis Research and Direction Cr. 3,6

Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students with a class of Candidate Masters.

Repeatable for 6 Credits

CSC - COMPUTER SCIENCE

CSC 0900 Office Applications Cr. 0

Self-paced course provides instruction in the Microsoft Office Application software at both introductory and advanced levels; software covered includes Word, Excel, and Power Point. Offered Every Term.

Course Material Fees: \$25

CSC 0995 Co-op or Internship in Computer Science Cr. 0

Review of computer science practical experiences resulting from participation in coop/internship program. Offered Every Term.

CSC 1000 Introduction to Computer Science Cr. 3

Provides an overview of current computing technology, organization, and use. Topics surveyed include data representation and storage, hardware and software organization, communications technologies, ethical and security issues. Provides hands-on training in common application software, such as word processing, spreadsheets, presentation, as well as in electronic telecommunications, such as e-mail, Internet and database searches. The University database and Internet pages are emphasized. Offered Every Term.

Course Material Fees: \$35

CSC 1002 Personal Digital Security Cr. 3

Students learn how to reduce exposure to risks and how to identify, assess and repair infected devices. Offered Every Term.

CSC 1050 Introduction to C and Unix Cr. 2

Introduction to Unix, Unix editor, and C Programming Language. Unix development tools and fundamentals of C language discussed. No credit for computer science students after CSC 1100. Offered Every Term.

Prerequisite: MAT 1800 with a minimum grade of C

Course Material Fees: \$35

CSC 1100 Problem Solving and Programming Cr. 3

Problem solving with algorithms, and their realization as computer programs using a structured, general purpose programming language; data types, operators, expressions, assignment, input and output, selection and repetition control structures; modularity and procedural abstraction using functions with parameters; structured data types, arrays, pointers and strings. Offered Every Term.

Corequisite: CSC 1101

CSC 1101 Problem Solving and Programming Laboratory Cr. 1

Mandatory two-hour closed laboratory; discussion of lecture materials and completion of hands-on exercises. Implementing programs using a general purpose programming language; software resulting from this can be used in more advanced computer science courses. Offered Every Term.

Corequisite: CSC 1100

Course Material Fees: \$35

CSC 1500 Fundamental Structures in Computer Science Cr. 3

Introduction to fundamental control and data structures in computer science such as algorithms and complexity; recursive algorithms; program correctness using the predicate calculus; reasoning about algorithms using mathematical induction; divide and conquer algorithms; recurrence relations; set properties and their computation; and computing with relations. Graph properties and their computation, and tree properties and their computation, will be covered if time permits. Offered Every Term.

Prerequisites: CSC 1100 with a minimum grade of C and CSC 1101 with a minimum grade of C and MAT 2010 with a minimum grade of C-

Corequisite: CSC 1501

CSC 1501 Fundamental Structures in Computer Science Lab Cr. 1

Discussion and supervised hands-on exercises to complement CSC 1500. Offered Every Term.

Corequisite: CSC 1500

Course Material Fees: \$35

CSC 2000 Introduction to C++ Programming Language Cr. 3

Elements of C++; arrays, pointers and references; operators; classes and objects. No credit for Computer Science majors. Offered Every Term.

Prerequisites: MAT 1800 with a minimum grade of C- or MAT Permit to Reg ACT/SAT with a test score minimum of 4 or Math Permit to Reg - L1-L4 with a test score minimum of 4 or MAT 2010 with a minimum grade of C-

Course Material Fees: \$35

CSC 2110 Computer Science I Cr. 3

Rigorous introduction to fundamental object-oriented concepts and techniques of computer programming using an object-oriented language. Introduction to data abstraction; design of abstract data types. Introduction to recursion; programming with generic data types; inheritance; polymorphism; and exception handlers. Concepts applied to console programs and event-driven programming using a simple graphics API. Offered Every Term.

Prerequisites: CSC 1100 with a minimum grade of C and CSC 1101 with a minimum grade of C and MAT 2010 with a minimum grade of C-

Corequisite: CSC 2111

CSC 2111 Computer Science I Lab Cr. 1

Mandatory two-hour supervised lab; hands-on exercises to complement CSC 2110. Object-oriented techniques in a general-purpose object-oriented programming language. Resulting software may be used in more advanced computer science courses. Offered Every Term.

Corequisite: CSC 2110

Course Material Fees: \$35

CSC 2200 Computer Science II Cr. 3

Design and implementation of fundamental abstract data types of computer science (such as stacks, queues, trees, lists, hashing, and graphs), using an object-oriented language. Programming requirements include the implementation of abstract data types using arrays and dynamic links; recursion; sorting and searching; hashing; and string processing. Introduction to algorithm analysis. Offered Every Term.

Prerequisites: CSC 1500 with a minimum grade of C and CSC 1501 with a minimum grade of C and CSC 2110 with a minimum grade of C and CSC 2111 with a minimum grade of C and MAT 2010 with a minimum grade of C-

Corequisite: CSC 2201

CSC 2201 Computer Science II: Lab Cr. 1

Hands-on lab which complements lecture material in CSC 2200. Lab attendance is mandatory. Implementing data structures and algorithms using object-oriented techniques; techniques of analysis of algorithms; resulting implementations are working pieces of software that can be used in more advanced computer science courses. Offered Every Term.

Corequisite: CSC 2200

Course Material Fees: \$35

CSC 3010 Ethics in Computer Science Cr. 3

Students will study the ethical and legal issues that arise with the usage and development of computing technology. Students will learn the responsibilities of the computer professionals and how to make appropriate decisions when faced with legal and ethical issues in computing. Offered Every Term.

Prerequisites: CSC 2110 with a minimum grade of C and CSC 2111 with a minimum grade of C

CSC 3020 Java Programming Cr. 3

Introduction to the fundamentals of programming using Java. Topics include: object-oriented programming, classes, constructors, flow control statements, data types, methods, inheritance, data hiding, abstraction, exceptions, file I/O, Java GUI, and Java packages. Offered Fall, Winter.

Prerequisites: MAT 1800 with a minimum grade of C- or MAT 2010 with a minimum grade of C- or MAT 2020 with a minimum grade of C- and CSC 1100 with a minimum grade of C and CSC 1101 with a minimum grade of C

CSC 3100 Computer Architecture and Organization Cr. 3

Organization and architecture of computer systems. Topics include: digital logic and digital systems; machine-level representation of data and programs; assembly level machine organization and programming; register-level description of computer execution and the functional organization of a computer; role and function of programming languages, libraries and operating systems; performance evaluation; systems programming. Offered Every Term.

Prerequisites: CSC 2200 with a minimum grade of C and CSC 2201 with a minimum grade of C and MAT 2010 with a minimum grade of C-

Corequisite: CSC 3101

CSC 3101 Computer Architecture and Organization: Lab Cr. 1

Two-hour closed lab; students explore and experiment with assembly language programming, data representation, and simple circuit design. Lab attendance is mandatory. Offered Every Term.

Corequisite: CSC 3100

Course Material Fees: \$35

CSC 3110 Algorithm Design and Analysis Cr. 3

Formal techniques to support design and analysis of algorithms: underlying mathematical theory and practical considerations of efficiency. Topics include asymptotic complexity bounds, techniques of analysis, algorithmic strategies, advanced data and file structures, and introduction to automata theory and its application to language translation. Offered Fall, Winter.

Prerequisites: BE 2100 with a minimum grade of C- and CSC 2200 with a minimum grade of C and CSC 2201 with a minimum grade of C and MAT 2250 with a minimum grade of C- and MAT 2020 with a minimum grade of C-

CSC 3200 Programming Languages Cr. 3

History and overview of programming languages, virtual machines, representation of data types; sequence control; data control, sharing and type checking; run-time storage management; language translation systems; programming language semantics; programming paradigms. Offered Yearly.

Prerequisites: CSC 2200 with a minimum grade of C- and CSC 2201 with a minimum grade of C- and MAT 2010 with a minimum grade of C-

CSC 3400 Human-Computer Interaction Cr. 3

User interface design, usability, evaluation, user-centered design. Offered Intermittently.

Prerequisites: CSC 2110 with a minimum grade of C and CSC 2111 with a minimum grade of C

Course Material Fees: \$10

CSC 3750 Introduction to Web Technology Cr. 3

Understanding the Internet using several access methods; required software and tools. Topics include: e-mail, FTP, Telnet, Gopher, Archie, Newsgroups, WWW, HTML, CGI and PHP scripting and how to create an active web site. Laboratory exercises required. No credit after CSC 5750. Offered Fall, Winter.

Prerequisites: CSC 1100 with a minimum grade of C and CSC 1101 with a minimum grade of C

CSC 4110 Software Engineering Cr. 3

Software life cycle; software requirement analysis; software system design; software implementation and testing; software maintenance; team programming; ethics and programmers. Offered Fall, Winter.

Prerequisites: CSC 2200 with a minimum grade of C and CSC 2201 with a minimum grade of C and MAT 2010 with a minimum grade of C- or MAT 3430 with a minimum grade of C-

Corequisite: CSC 4111

Course Material Fees: \$10

CSC 4111 Software Engineering: Lab Cr. 1

Mandatory two-hour closed lab; lecture materials and hands-on exercises which complement CSC 4110. Offered Fall, Winter.

Corequisite: CSC 4110

Restriction(s): Enrollment is limited to Undergraduate level students.

Course Material Fees: \$35

CSC 4290 Introduction to Computer Networking Cr. 3

Introduction of topics such as network architecture, multiple access control, packet switching, routing and flow control, congestion control and quality-of-service, Internet protocols, and elements of distributed computing. Offered Yearly.

Prerequisites: CSC 2200 with a minimum grade of C- and CSC 2201 with a minimum grade of C- and CSC 3100 with a minimum grade of C- and CSC 3101 with a minimum grade of C-

Restriction(s): Enrollment is limited to Undergraduate level students.

CSC 4420 Computer Operating Systems Cr. 3

Operating system services; file systems; CPU scheduling; memory management; virtual memory; disk scheduling; deadlocks; concurrent processes. Offered for undergraduate major credit only. Offered Fall, Winter.

Prerequisites: CSC 2200 with a minimum grade of C and CSC 2201 with a minimum grade of C and CSC 3100 with a minimum grade of C- and CSC 3101 with a minimum grade of C-

Corequisite: CSC 4421

CSC 4421 Computer Operating Systems: Lab Cr. 1

Mandatory two-hour closed lab; lecture materials and hands-on exercises which complement CSC 4420. System call interface; introduction to operating systems programming; use of simulation to better understand operating systems behavior. Offered Fall, Winter.

Corequisite: CSC 4420

Course Material Fees: \$35

CSC 4500 Introduction to Theoretical Computer Science Cr. 3

Finite automata and regular expressions; context-free grammars; pushdown automata; Turing machines; hierarchy of formal languages and automata; computability and decidability. Offered Fall, Winter.

Prerequisite: (CSC 2200 with a minimum grade of C and CSC 2201 with a minimum grade of C and MAT 2010 with a minimum grade of C-) or (CSC 5050 with a minimum grade of C and MAT 2010 with a minimum grade of C-)

CSC 4710 Introduction to Database Management Systems Cr. 3

Topics include: database concepts, ER modeling, schemas and constraints, SQL and relational algebra, web-based database applications, triggers and views, physical organization and indexing, query processing, query optimization, NoSQL databases. Offered Yearly.

Prerequisites: CSC 2200 with a minimum grade of C and CSC 2201 with a minimum grade of C

CSC 4990 Directed Study Cr. 1-4

Individual study as agreed on by student and supervising faculty. Primarily for material not covered in regular courses. Offered Every Term.

Restriction(s): Enrollment is limited to Undergraduate level students.

Repeatable for 8 Credits

CSC 4992 Special Topics in Computer Science Cr. 1-3

Topics to be announced in the Schedule of Classes. Maximum of six credits may be applied toward satisfying the computer science elective, in any computer science degree program. Offered Yearly.

Prerequisite: CSC 2110 with a minimum grade of C and CSC 2111 with a minimum grade of C

Course Material Fees: \$35

Repeatable for 12 Credits

CSC 4995 Professional Practice in Computer Science Cr. 1

Review of computer science practical experiences resulting from participation in the cooperative work-study program. Offered Every Term.

Restriction(s): Enrollment limited to students with a class of Junior or Senior.

Repeatable for 4 Credits

CSC 4996 Senior Project and Computer Ethics Cr. 3

Satisfies General Education Requirement: Writing Intensive Competency
Development of skills for planning, managing, implementing, and documenting complex software projects; legal, social and ethical issues in software development and computer use. Project management techniques; professional conduct, social responsibility, liability, ownership of information, privacy, security and crime. Offered Fall, Winter.

Prerequisites: CSC 4110 with a minimum grade of C- and CSC 4111 with a minimum grade of C- and CSC 4710 with a minimum grade of C-

Corequisite: CSC 4997

Restriction(s): Enrollment limited to students with a class of Senior; enrollment is limited to students with a major in Computer Science, Computer Science Honors or Information Systems Technology.

CSC 4997 Senior Project Lab Cr. 1

Development of project management skills while managing, implementing and documenting a real-world project from initial idea to final implementation. Theory, software engineering techniques, group activities, and computer tools such as Microsoft Project. Mandatory lab. Offered Fall, Winter.

Prerequisites: CSC 4110 with a minimum grade of C- and CSC 4111 with a minimum grade of C- and CSC 4710 with a minimum grade of C-

Corequisite: CSC 4996

Restriction(s): Enrollment limited to students with a class of Senior; enrollment is limited to students with a major in Computer Science, Computer Science Honors or Information Systems Technology.

Course Material Fees: \$35

CSC 4999 Honors Thesis Cr. 3-6

Independent study under supervision. Offered Every Term.

Restriction(s): Enrollment limited to students with a class of Senior.

CSC 5050 Algorithms and Data Structures Cr. 4

Introduction to problem solving methods and algorithm development; data abstraction for structures such as stacks, queues, linked lists, trees, and graphs; searching and sorting algorithms and their analysis. Not for CSC major credit. Offered for graduate credit only. Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students.

Equivalent: ECE 4050

CSC 5250 Network, Distributed, and Concurrent Programming Cr. 3

Fundamental concepts and skills of developing networked, distributed, and concurrent applications. Topics include: inter-process communication, TCP/IP sockets programming, remote method invocation, multithreading, concurrency and synchronization. Offered Yearly.

Prerequisites: CSC 4420 with a minimum grade of C- and CSC 4421 with a minimum grade of C-

CSC 5270 Computer Systems Security Cr. 3

Fundamental technologies for enabling an e-society which is more predictable, more accountable, and less vulnerable to attacks. Covers three components: security requirements and protocols, cryptography algorithms, and case studies. Offered Fall.

Prerequisites: CSC 5250

CSC 5280 Introduction to Cyber-Physical Systems Cr. 3

Topics include: modeling, design, analysis, and implementation of cyber-physical systems; dynamic behavior modeling, state machine composition, and concurrent computation; sensors and actuators; embedded systems and networks; feedback control systems; temporal logic and model checking. Offered Fall, Winter.

Prerequisites: CSC 3100 with a minimum grade of C- and CSC 3110 with a minimum grade of C-

Restriction(s): Enrollment limited to students in the College of Engineering.

Equivalent: ECE 5280

CSC 5290 Cyber Security Practice Cr. 3

Provides hands-on experience in playing with security software and network systems in a live laboratory environment, with the purpose of understating real-world threats. Focus will be on attacks (e.g., buffer overflow, heap spray, kernel rootkits, and denial of service), hacking fundamentals (e.g., scanning and reconnaissance), and defenses (e.g., intrusion detection systems and firewalls). Offered Winter.

Prerequisites: CSC 4420 with a minimum grade of C-

CSC 5430 Game Programming and Design I Cr. 3

Fundamentals of game programming and game design using C++, DirectX, Windows, and C#. Offered Fall.

Prerequisites: CSC 2200 with a minimum grade of C and CSC 2201 with a minimum grade of C or CSC 5250 with a minimum grade of C-

Corequisite: CSC 5431

CSC 5431 Game Programming and Design I: Lab Cr. 1

Laboratory for CSC 5430. Focus on modding, or making changes to existing programs to achieve specific results. Offered Fall.

Corequisite: CSC 5430

Course Material Fees: \$25

CSC 5710 Design of Intelligent Information Retrieval Systems Cr. 3

Indexing retrieval models (vector space, probabilistic and language models); document classification models (Naive Bayes and SVM); topic models (PLSA and LDA) and learning-to-rank methods; course includes practical assignments and a team-based final project. Offered Yearly.

Prerequisites: CSC 5800 with a minimum grade of C-

CSC 5750 Principles of Web Technology Cr. 3

History and development of the world-wide web. Techniques for authoring static and dynamic content for the world-wide web. Web security techniques. Electronic commerce on the web. Lab exercises required. Offered Fall, Winter.

Prerequisites: CSC 3750 with a minimum grade of C- and MAT 2010 with a minimum grade of C-

CSC 5800 Intelligent Systems: Algorithms and Tools Cr. 3

Introduction to basic algorithms and software tools for intelligent data representation and analysis, including: data pre-processing, data exploration and visualization, model evaluation, predictive modeling, classification methods, association analysis, clustering, anomaly detection, representing extracted patterns as expertise, tools for data mining and intelligent systems such as WEKA, CLIPS, and MATLAB. Offered Intermittently.

Prerequisites: CSC 2200 with a minimum grade of C, CSC 2201 with a minimum grade of C, and MAT 2010 with a minimum grade of C- or CSC 5050 with a minimum grade of C- and MAT 2010 with a minimum grade of C-

CSC 5825 Introduction to Machine Learning and Applications Cr. 3

Through algorithmic investigation, brainstorming, and case analysis, students develop the skills and strategies that are necessary for effective learning from data, including Big Data emerging from science and engineering. Offered Winter.

Prerequisites: CSC 3110 with a minimum grade of C-

CSC 5830 Computational Modeling of Complex Systems Cr. 3

Introduction to computer methods useful for modeling complex systems which are refractory to traditional methods of analysis. Emphasis on problem formulation and concrete examples drawn from computer science, engineering, chemistry, and biology. Offered Yearly.

Prerequisites: CSC 2200 with a minimum grade of C and CSC 2201 with a minimum grade of C or CSC 5050 with a minimum grade of C-

CSC 5870 Computer Graphics I Cr. 3

Graphics devices, graphics primitives, 2-D transformations, windowing and clipping, modeling 3-D objects, 3-D viewing transformations, hidden surface removal, shading and color. Offered Yearly.

Prerequisites: CSC 2200 with a minimum grade of C, CSC 2201 with a minimum grade of C, and MAT 2250 with a minimum grade of C- or CSC 5050 with a minimum grade of C- and MAT 2250 with a minimum grade of C-

CSC 5991 Special Topics in Computer Science Cr. 1-4

Topics to be announced in the Schedule of Classes. Offered Intermittently.

Prerequisites: CSC 2200 with a minimum grade of C and CSC 2201 with a minimum grade of C

Repeatable for 9 Credits

CSC 6110 Software Engineering Cr. 3

Software process models; advanced software system design; software project management; software analysis; testing and performance analysis; software maintenance; reverse engineering; software reuse; software metrics; object-oriented development. Offered Yearly.

Prerequisites: CSC 2200 with a minimum grade of C, CSC 2201 with a minimum grade of C, and MAT 2010 with a minimum grade of C- or CSC 5050 with a minimum grade of C- and MAT 2010 with a minimum grade of C-

CSC 6220 Parallel Computing I: Programming Cr. 4

Parallel computing concepts, examples of parallel computers, parallelism in algorithms / data / programs, experiences with state of the art parallel computers. Offered Yearly.

Prerequisites: 2 of CSC 2200 with a minimum grade of C, CSC 2201 with a minimum grade of C and 3 of CSC 3100 with a minimum grade of C-, CSC 3101 with a minimum grade of C-, CSC 5050 with a minimum grade of C-

CSC 6280 Real-Time and Embedded Operating Systems Cr. 3

Operating system design for real-time and embedded systems. Focus on scheduling, synchronization, communication, and process and memory management for time-critical and resource-constrained applications. Offered Every Other Year.

Prerequisites: CSC 4420 with a minimum grade of C- and CSC 4421 with a minimum grade of C-

CSC 6290 Data Communication and Computer Networks Cr. 3

Data communication fundamentals and principles governing computer communication networks. Components of networks, how they are connected; basics of design and implementation of network protocols. Offered Yearly.

Prerequisites: CSC 5250

CSC 6430 Game Programming and Design II Cr. 3

Game design methods, team development, languages for game design, debugging and testing, game platforms, memory management and I/O, game physics, character animation, AI agents, AI path programming, networking, online and multiplayer gaming. Offered Yearly.

Prerequisites: CSC 5430 with a minimum grade of C- and CSC 5431 with a minimum grade of C-

Corequisite: CSC 6431

CSC 6431 Game Programming and Design II: Lab Cr. 1

Architecture and tools for modern game platforms. Game development environment; basic aspects of game engine design, graphics engine design, use of shaders. Offered Yearly.

Course Material Fees: \$25

CSC 6500 Theory of Languages and Automata Cr. 3

Recursive and recursively enumerable languages; decidability and computability; Rice's theorem; time complexity; space complexity. Offered Fall, Winter.

Prerequisites: CSC 4500 with a minimum grade of C-

CSC 6580 Design and Analysis of Algorithms Cr. 3

Best case, worst case, and expected case complexity analysis; asymptotic approximations; solutions of recurrence equations; probabilistic techniques; divide-and-conquer; the greedy approach; dynamic programming; branch and bound; NP-completeness; parallel algorithms. Offered Fall, Winter.

Prerequisites: CSC 3110 with a minimum grade of C-

CSC 6620 Matrix Computation I Cr. 4

Background matrix algebra; linear system sensitivity; basic transformations; Gaussian elimination; symmetric systems; positive definite systems; Householder method for least squares problems; unsymmetric eigenvalue problems; the QR algorithm. Offered Yearly.

Prerequisites: 3 of CSC 2200 with a minimum grade of C, CSC 2201 with a minimum grade of C, MAT 2250 with a minimum grade of C- and 1 of ECE 3040 with a minimum grade of C-, BE 2550 with a minimum grade of C-

Equivalent: ECE 5020

CSC 6710 Database Management Systems I Cr. 3

Data models, normal forms, relational systems and SQL, query optimization, object-oriented systems, object-relational systems, student Oracle project. Offered Yearly.

Prerequisites: CSC 4710 with a minimum grade of C-

CSC 6720 Data Science Applications Development Cr. 3

Background of SQL and NoSQL databases is necessary. This course focuses on the system development life cycle of a comprehensive data science application. Students will first choose a particular domain and problem to address one of the big data challenges: volume, velocity, or variety. Students will then choose a scalable distributed computing environment to design analytical models to solve business problems. Students will finally develop their data science application using agile methodologies to plan, analyze, design, implement, and operationalize their application. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate level students.

CSC 6800 Artificial Intelligence I Cr. 3

Basic concepts; topics include: recursive problem solving, knowledge representation using semantic networks and frames, state space search methods, planning and problem solving, game playing and adversarial search methods, rules and production systems (RETE networks), constraint satisfaction techniques and applications, optimization algorithms including genetic algorithms, logic programming. Implementation in Lisp and Prolog. Offered Yearly.

Prerequisites: CSC 3110 with a minimum grade of C-

CSC 6860 Digital Image Processing and Analysis Cr. 3

Review of image formation and acquisition; image transformation; image enhancement and restoration; image compression; morphological image processing; edge detection and segmentation; architecture for image processing. Offered Intermittently.

Prerequisites: CSC 3110 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate or Undergraduate level students.

CSC 6870 Computer Graphics II Cr. 3

Representing curves and surfaces; solid modeling; fractal geometry; camera models; illumination models; ray tracing; radiosity methods; transparency; texture; graphics packages. Offered Yearly.

Prerequisites: CSC 5870 with a minimum grade of C-

Course Material Fees: \$20

CSC 6991 Topics in Computer Science Cr. 1-4

Current topics to be announced in the Schedule of Classes. Offered Intermittently.

Prerequisites: CSC 2200 with a minimum grade of C and CSC 2201 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate or Undergraduate level students.

Repeatable for 9 Credits

CSC 6995 Internship in Computer Science Cr. 1-3

Experience in industry using tools from the computer science curriculum. Students provide a written report based on the internship experience. Offered Every Term.

Repeatable for 3 Credits

CSC 7110 Software Engineering Environments Cr. 3

Architecture of software engineering environments; syntax directed editors; CASE tools; tools for software maintenance; expert systems for software maintenance. Offered Yearly.

Prerequisite: CSC 6110 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

CSC 7220 Parallel Computing II: Algorithms and Applications Cr. 4

Problems in parallel algorithms: design, analysis, complexity. Cluster and grid computing: tools, programming, and applications. Offered Yearly.

Prerequisite: CSC 6220 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

CSC 7260 Distributed Systems Cr. 3

Models of distributed systems, distributed synchronization, algorithms, consistency and replication models and algorithms, fault-tolerance in distributed systems. Offered Every Other Year.

Prerequisite: CSC 5250 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

CSC 7270 Advanced Computer Security Cr. 3

Advanced topics in protecting information computer systems and data. Topics include, but are not limited to, crypto-algorithms and protocols (e.g., IDEA, Elliptic Curve Cryptosystems, and the Byzantine Generals Problem), and secure system design principles. Hands-on design project will reinforce the material. Offered Winter.

Prerequisite: CSC 5270 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students in the College of Engineering.

CSC 7290 Advanced Computer Networking Cr. 3

Foundations of computer networking (e.g., performance evaluation and analysis, protocol specification and verification), latest development in network architecture and technology (e.g., wireless networks, sensor networks, peer-to-peer networks, vehicular networks). Offered Yearly.

Prerequisite: CSC 6290 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

Course Material Fees: \$25

CSC 7300 Bioinformatics I: Biological Databases and Data Analysis Cr. 3

Concepts of bioinformatics; tools for storing and analysis of bioinformatics data. Offered Winter.

Restriction(s): Enrollment is limited to Graduate level students.

CSC 7301 Bioinformatics I: Programming Lab Cr. 1

Hands-on experience and exercises for CSC 7300/MBG 7300 lectures. Offered Fall.

Restriction(s): Enrollment is limited to Graduate level students.

Course Material Fees: \$25

CSC 7410 Bioinformatics II Cr. 4

Biology of bioinformatics, DNA and protein sequencing, introduction of systems biology, mRNA expressions analysis, pathway and molecular machines analysis. Offered Winter.

Prerequisite: CSC 7300 with a minimum grade of C and CSC 7301 with a minimum grade of C and MGG 7010 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

CSC 7430 Electronic Commerce Cr. 3

Introduction to design and analysis of internet commerce systems. Protocols for electronic transactions; online payments and exchanges e-cash; game theory and mechanism design; online auction design; sponsored search auctions, combinatorial auctions. Offered Fall.

Restriction(s): Enrollment is limited to Graduate level students.

CSC 7710 Database Management Systems II Cr. 3

Concurrency control, transaction processing, crash recovery, security, distributed and heterogeneous databases, data warehousing, data mining, multimedia systems, student Oracle project. Offered Yearly.

Prerequisite: CSC 6710 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

CSC 7800 Artificial Intelligence II Cr. 3

Advanced topics from these areas: machine learning techniques (inductive and deductive), neural networks and perceptrons, genetic algorithms, advanced concepts in knowledge-based system design, inexact inference, constraint satisfaction techniques and applications, object-oriented programming. Implementation in Lisp and Prolog. Offered Yearly.

Prerequisite: CSC 6800 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

CSC 7810 Data Mining: Algorithms and Applications Cr. 3

Application of various basic/advanced data mining techniques to real-world problems. Offered Winter.

Prerequisite: CSC 5800 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

Equivalent: IE 7811

CSC 7825 Machine Learning Cr. 3

Supervised learning including regression, kernel-based, tree-based, probability model based and ensemble learning; unsupervised learning including distance based and model based; Markov Chain Monte Carlo (MCMC) methods; graphical models; current topics from literature. Offered Fall.

Prerequisite: CSC 5825 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

CSC 7860 Computer Vision Cr. 3

Low-level vision processing, use of constraints in visual processing, three-dimensional object recognition, dynamic scene analysis, model-based vision systems, use of neural and fuzzy logic methods in vision. Offered Yearly.

Prerequisite: CSC 6860 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

CSC 7990 Directed Study Cr. 1-5

Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students.

Repeatable for 9 Credits

CSC 7991 Advanced Topics in Computer Science Cr. 1-4

Topics to be announced in the Schedule of Classes. Offered Every Other Year.

Restriction(s): Enrollment is limited to Graduate level students.

Repeatable for 9 Credits

CSC 8110 Seminar in Software Engineering and Environments Cr. 3

Discussion of current papers in the field. Offered Every Other Year.

Prerequisite: CSC 7110 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

CSC 8260 Seminar in Networking, Distributed Systems and Parallel Systems Cr. 3

Discussion of current research papers in the fields. Offered Every Other Year.

Restriction(s): Enrollment is limited to Graduate level students.

CSC 8710 Seminar in Database Management Systems Cr. 3

Discussion of current papers in the field. Offered Every Other Year.

Prerequisite: CSC 6710

Restriction(s): Enrollment is limited to Graduate level students.

CSC 8860 Seminar Topics in Computer Vision and Pattern Recognition Cr. 3

Discussion of current papers in the field. Offered Every Other Year.

Prerequisite: CSC 7860 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

CSC 8990 Graduate Seminar Cr. 1

Discussion of current research by faculty and visitors. Offered Fall, Winter.

Restriction(s): Enrollment is limited to Graduate level students.

Repeatable for 8 Credits

CSC 8999 Master's Thesis Research and Direction Cr. 1-8

Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students.

Repeatable for 8 Credits

CSC 9990 Pre-Doctoral Candidacy Research Cr. 1-8

Research in preparation for doctoral dissertation. Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students.

Repeatable for 12 Credits

CSC 9991 Doctoral Candidate Status I: Dissertation Research and Direction Cr. 7.5

Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students.

CSC 9992 Doctoral Candidate Status II: Dissertation Research and Direction Cr. 7.5

Offered Every Term.

Prerequisite: CSC 9991 with a minimum grade of S

Restriction(s): Enrollment is limited to Graduate level students.

CSC 9993 Doctoral Candidate Status III: Dissertation Research and Direction Cr. 7.5

Offered Every Term.

Prerequisite: CSC 9992 with a minimum grade of S

Restriction(s): Enrollment is limited to Graduate level students.

CSC 9994 Doctoral Candidate Status IV: Dissertation Research and Direction Cr. 7.5

Offered Every Term.

Prerequisite: CSC 9993 with a minimum grade of S

Restriction(s): Enrollment is limited to Graduate level students.

CSC 9995 Candidate Maintenance Status: Doctoral Dissertation Research and Direction Cr. 0

Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students.

Course Material Fees: \$370.26

Repeatable for 0 Credits

CTE - CAREER AND TECHNICAL EDUCATION

CTE 5401 Instructional Practices for the Career and Technical Education Classroom: Module 1 Cr. 1

The series is specifically for students seeking a vocational endorsement to teach in federally funded, secondary CTE classrooms. This module reviews the history of CTE and its impact on industry. Offered Every Term.

CTE 5402 Instructional Practices for the Career and Technical Education Classroom: Module 2 Cr. 1

This is Module Two of a six (6) module series. The series is specifically for students seeking a vocational endorsement to teach in federally funded, secondary CTE classrooms. This module reviews MCCTE Navigator standards and their relationship to industry expectations. Offered Every Term.

CTE 5403 Instructional Practices for the Career and Technical Education Classroom: Module 3 Cr. 1

This is Module Three of a six (6) module series. The series is specifically for students seeking a vocational endorsement to teach in federally funded, secondary CTE classrooms. This module reviews mastery-learning, performance-based and project-based instructional strategies in the CTE classroom. Offered Every Term.

CTE 5404 Instructional Practices for the Career and Technical Education Classroom: Module 4 Cr. 1

This is Module four of a six (6) module series. The series is specifically for students seeking a vocational endorsement to teach in federally funded, secondary CTE classrooms. This module reviews assessment strategies in the CTE classroom. Offered Every Term.

CTE 5405 Instructional Practices for the Career and Technical Education Classroom: Module 5 Cr. 1

This is Module five of a six (6) module series. The series is specifically for students seeking a vocational endorsement to teach in federally funded, secondary CTE classrooms. This module reviews Career Technical Student Organization (CTSO) and industry partner relationships. Offered Every Term.

CTE 5406 Instructional Practices for the Career and Technical Education Classroom: Module 6 Cr. 1

This is Module six of a six (6) module series. The series is specifically for students seeking a vocational endorsement to teach in federally funded, secondary CTE classrooms. This module reviews strategies for remaining current with industry and teaching profession trends. Offered Every Term.

CTE 5501 Instructional Practices for the Teacher Cadet Classroom - Module 1 Cr. 1

This is Module one of a six (6) module series. The series provides a review of teaching/learning concepts as required for the Teacher Cadet (VG) vocational endorsement. This module reviews early childhood concepts and related classroom and parent practices. Offered Every Other Year.

CTE 5502 Instructional Practices for the Teacher Cadet Classroom - Module 2 Cr. 1

This is Module two of a six (6) module series. The series provides a review of teaching/learning concepts as required for the Teacher Cadet (VG) vocational endorsement. This module reviews education concepts for preschoolers and related classroom and parent practices. Offered Every Other Year.

CTE 5503 Instructional Practices for the Teacher Cadet Classroom - Module 3 Cr. 1

This is Module three of a six (6) module series. The series provides a review of teaching/learning concepts as required for the Teacher Cadet (VG) vocational endorsement. This module reviews brain-based learning theory and its impact in the preschool classroom. Offered Every Other Year.

CTE 5504 Instructional Practices for the Teacher Cadet Classroom - Module 4 Cr. 1

This is Module four of a six (6) module series. The series provides a review of teaching/learning concepts as required for the Teacher Cadet (VG) vocational endorsement. This module reviews education concepts for primary students and related classroom and parent practices. Offered Every Other Year.

CTE 5505 Instructional Practices for the Teacher Cadet Classroom - Module 5 Cr. 1

This is Module five of a six (6) module series. The series provides a review of teaching/learning concepts as required for the Teacher Cadet (VG) vocational endorsement. This module reviews enhancing the instructional delivery system to accommodate special needs learners in the primary and early elementary classroom. Offered Every Other Year.

CTE 5506 Instructional Practices for the Teacher Cadet Classroom - Module 6 Cr. 1

This is Module six of a six (6) module series. The series provides a review of teaching/learning concepts as required for the Teacher Cadet (VG) vocational endorsement. This module reviews family and parent involvement best practices in school settings. Offered Every Other Year.

CTE 6010 History and Principles of Career and Technical Education Cr. 3

Overview of organization and administration at the federal, state, and local levels. Recent developments and their significance for school reform and improvement; business and industry linkages. Offered Yearly.

CTE 6999 Coordination of Cooperative Occupational Education Cr. 3

Philosophy and objectives of educational programs that provide for work experience. Student selection, on-the-job and in-school instruction, placement, coordination, advisory committees, and administration of such programs. Offered Yearly.

CTE 7820 Planning and Organizing Instruction in Career and Technical Education Cr. 3

Planning and organizing instruction for a competency based program: justification, approaches for content, performance objectives, instructional resources, planning and evaluating units. Should be taken in first two semesters of admission to career and technical education master's program. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate level students.

CTE 8998 Current Issues and Trends Cr. 3

Place, function, and evolving concepts of career and technical education. Economic, sociological, psychological, and technical factors. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate level students.

Repeatable for 6 Credits

DNC - DANCE

DNC 0512 Pilates Equipment Lab Cr. 0

Individual study in Pilates lab. Offered Fall, Winter.

Prerequisites: DNC 5110 or DNC 1305

Restriction(s): Enrollment is limited to students with a major in 2nd Dance, Dance or Dance Honors.

DNC 1010 Introduction to Modern Dance Cr. 2

Basic movement techniques and improvisational experiences in concert dance; films and concert viewing. Offered Every Term.

Course Material Fees: \$85

DNC 1020 Modern Dance I Cr. 2

Continuation of DNC 1010 on an intermediate level. Offered Every Term.

Course Material Fees: \$60

Repeatable for 6 Credits

DNC 1210 Fundamentals of Classic Ballet I Cr. 2

Introduction to the fundamentals of classical ballet; emphasis on vocabulary, theory and practice, including films and concert viewing. Offered Every Term.

Course Material Fees: \$60

Repeatable for 8 Credits

DNC 1220 Fundamentals of Classic Ballet II Cr. 2

Continuation of DNC 1210. Offered Every Term.

Course Material Fees: \$60

Repeatable for 8 Credits

DNC 1260 Introduction to the Philosophy and Practice of Iyengar Yoga Cr. 3

Yoga philosophy and practice is presented in a format to enrich appreciation for the art of Yoga as both a belief system and as a physical art form through in-depth study and discussion of its philosophical principles and daily practice of asana (postures) with attention to balance, precision and alignment. Offered Every Term.

Course Material Fees: \$30

DNC 1300 Pilates Mat for Performing Artists Cr. 1

Introduction to Stott Pilates conditioning for dance and theatre artists. Offered Fall, Winter.

Restriction(s): Enrollment is limited to students with a major, minor, or concentration in Dance, Dance Honors, Theatre or Theatre Honors.

Course Material Fees: \$40

DNC 1305 Pilates Reformer for Dancers Cr. 1

Continuation of DNC 1300; Pilates equipment training specifically for dancers. Offered Winter.

Prerequisites: DNC 1300 with a minimum grade of D-

Restriction(s): Enrollment is limited to students with a major, minor, or concentration in Dance or Dance Honors.

Course Material Fees: \$60

DNC 1330 Production Practicum Cr. 1

Introductory technical production experience supporting concert dance performances; skill development in stage management, lighting and sound operation, videography, and stage crew responsibilities; part of Digital Dance Literacy curriculum. Offered Every Term.

Restriction(s): Enrollment is limited to students with a major in Dance or Dance Honors.

Course Material Fees: \$85

Repeatable for 99 Credits

DNC 1810 Introduction to Dance Professions Cr. 3

Survey of dance professions in administration, teaching, arts management and advocacy, dance production and commercial sector.

Offered Winter.

Restriction(s): Enrollment is limited to students with a major in Dance or Dance Honors.

Course Material Fees: \$30

DNC 2000 Introduction to World Dance Cr. 3

Satisfies General Education Requirement: Cultural Inquiry, Global Learning Inquiry, Visual Performing Arts

Global perspective on and definition of dance, through assigned readings, writing, field trips, and laboratory experience. Focus on multicultural diversity, interdependent nature of dance. Offered Every Term.

Course Material Fees: \$50

DNC 2010 Modern Dance II: Part I Cr. 2

Modern dance technique of increasing difficulty and complexity; experiences in improvisation, problem solving, and compositional studies in dance. Offered Fall, Winter.

Prerequisite: DNC 1020 with a minimum grade of C-

Restriction(s): Enrollment is limited to students with a major in Dance or Dance Honors.

Course Material Fees: \$60

Repeatable for 12 Credits

DNC 2020 Modern Dance II: Part II Cr. 2

Continuation of DNC 2010. Modern dance technique of advancing difficulty; further experiences in improvisation, problem solving and composition; analysis and refinement of technique and performance skills. Offered Winter.

Prerequisite: DNC 2010 with a minimum grade of C

Restriction(s): Enrollment is limited to students with a major in Dance or Dance Honors.

Course Material Fees: \$60

Repeatable for 12 Credits

DNC 2225 Contemporary Ballet Cr. 1

Investigation of movement, styles and technical foundations of Contemporary Ballet. Offered Winter.

Restriction(s): Enrollment is limited to students with a major, minor, or concentration in Dance, Dance Honors, Theatre or Theatre Honors.

Course Material Fees: \$60

Repeatable for 3 Credits

DNC 2250 Men's Ballet Cr. 1

Introduction to men's ballet including terminology, movement vocabulary, aesthetics and classroom etiquette. Offered Yearly.

Prerequisites: DNC 1220 with a minimum grade of D-

Restriction(s): Enrollment is limited to Undergraduate level students; enrollment is limited to students with a major, minor, or concentration in Dance or Dance Honors.

Course Material Fees: \$60

Repeatable for 6 Credits

DNC 2260 Yoga Cr. 1

Investigation of breath, movement and increased awareness of the body/mind for dance and theatre artists through yoga postures and Vedanta philosophy. Offered Winter.

Restriction(s): Enrollment is limited to students with a major, minor, or concentration in Dance, Dance Honors, Theatre or Theatre Honors.

Course Material Fees: \$50

Repeatable for 3 Credits

DNC 2300 History of Dance to 1800 Cr. 3

Survey of dance in western civilization from pre-historic times through the eighteenth century; how dance evolved from expression of primitive cultures to independent theatrical entertainment in western Europe. Offered Every Other Winter.

Course Material Fees: \$30

DNC 2310 History of Dance from 1800 to the Present Cr. 3

Satisfies General Education Requirement: Cultural Inquiry, Visual Performing Arts

Introduction to critical dance studies and dance history from 1800-present. Impact of vernacular dance and historical ballet and modern concert dance on contemporary dance, examined formally and socio-culturally. How dance circulates globally as mediated and embodied history. Offered Fall, Winter.

Course Material Fees: \$30

DNC 2311 Issues and Trends in Contemporary Dance Cr. 2

Discussion of current events, trends and issues; includes technology component as part of Digital Dance Literacy curriculum. Offered Every Other Fall.

Restriction(s): Enrollment is limited to students with a major in Dance or Dance Honors.

Course Material Fees: \$30

DNC 2400 Introduction to African Dance Cr. 3

Satisfies General Education Requirement: Foreign Culture, Global Learning Inquiry

Exploration of African and African derived dance forms, together with their integrated philosophy, music, art and theatre forms. Lectures, videos, concert attendance and reading assignments to learn and perform dances from selected African societies. Offered Every Term.

Course Material Fees: \$60

DNC 2410 Music and Dance Relationships Cr. 3

Study of the basic elements common to dance and music including rhythm, dynamics, and form. Examples of music especially composed for dance will be examined along with dance styles of historical periods; includes technology component as part of Digital Dance Literacy curriculum. Offered Winter.

Restriction(s): Enrollment is limited to students with a major in Dance or Dance Honors.

Course Material Fees: \$30

DNC 2460 Dance Improvisation Cr. 2

Introduction to dance improvisational techniques and performance skills as applied to movement invention, performance, and choreography. Offered Fall.

Restriction(s): Enrollment is limited to Undergraduate level students; enrollment limited to students in the Fine, Performing & Comm. Arts; enrollment is limited to students with a major in Dance or Dance Honors.

DNC 2500 Choreography I Cr. 2

Construction of motifs and dance studies based on nonliteral and literal thematic materials; emphasis on form and structural concepts. Offered Winter.

Prerequisites: DNC 2460 with a minimum grade of C

Restriction(s): Enrollment is limited to students with a major in Dance or Dance Honors.

DNC 2600 African Dance II Cr. 2

Intermediate technique and theory. Offered Fall, Winter.

Prerequisite: DNC 2400 with a minimum grade of C-

Course Material Fees: \$60

Repeatable for 8 Credits

DNC 2610 Jazz I Cr. 2

Introduction to jazz dance technique; emphasis on alignment, movement isolation, rhythmic awareness, basic dance vocabulary, historical development. Offered Fall, Winter.

Repeatable for 8 Credits

DNC 2620 Tap Dance Cr. 1

Study and practice of tap dance technique and choreography. Offered Yearly.

Course Material Fees: \$50

Repeatable for 3 Credits

DNC 2630 Hip Hop Dance Styles Cr. 1

Study and practice of hip hop dance styles. Offered Yearly.

Course Material Fees: \$50

Repeatable for 2 Credits

DNC 3010 Modern Dance III Cr. 2

Continuation of DNC 2020; modern dance technique at the intermediate level. Offered Fall, Winter.

Prerequisites: DNC 2010 with a minimum grade of C or DNC 2020 with a minimum grade of C

Restriction(s): Enrollment is limited to students with a major in Dance or Dance Honors.

Course Material Fees: \$60

Repeatable for 8 Credits

DNC 3180 Dance Kinesiology Cr. 3

Introduction to analysis of dance movement from an anatomical and mechanical point of view. Relationships between neuromuscular retraining, alignment and technique. Offered Every Other Fall.

Restriction(s): Enrollment is limited to students with a major in Dance or Dance Honors.

DNC 3190 Movement Analysis Cr. 3

Continuation of anatomical and mechanical analyses of dance; emphasis on somatic and dance science approaches. Offered Every Other Winter.

Prerequisites: DNC 3180 with a minimum grade of D-

DNC 3200 Ballet III Cr. 2

Continuation of DNC 1220 on a more advanced technical level with emphasis on complex movement phrases and selections from classical repertory. Offered Fall, Winter.

Restriction(s): Enrollment is limited to students with a major in Dance or Dance Honors.

Course Material Fees: \$60

Repeatable for 16 Credits

DNC 3220 Ballet Pointe Technique Cr. 1

Technical skill development on pointe. Offered Fall.

Prerequisite: DNC 1220 with a minimum grade of C

Restriction(s): Enrollment is limited to students with a major in Dance or Dance Honors.

Course Material Fees: \$60

Repeatable for 4 Credits

DNC 3310 Dance Production Cr. 3

Concentration on selected types of dance production including an examination of purpose and content; technical considerations such as costumes, makeup, lighting and decor; the management of performance-related matters, and the use of technology, computer and video to support production work; part of Digital Dance Literacy curriculum. Offered Fall.

Restriction(s): Enrollment is limited to students with a major in Dance or Dance Honors.

Course Material Fees: \$30

DNC 3410 Jazz II Cr. 2

Continuation of DNC 2610 on a more advanced level. Offered Every Term.

Prerequisite: DNC 2610 with a minimum grade of C

Course Material Fees: \$50

Repeatable for 4 Credits

DNC 3500 Choreography II Cr. 2

Exploration of time, space, and design tools for choreography; focus on formal construction of small group studies and dances. Offered Fall.

Prerequisites: DNC 2410 with a minimum grade of C and DNC 2500 with a minimum grade of C

Restriction(s): Enrollment is limited to students with a major in Dance or Dance Honors.

Course Material Fees: \$50

DNC 3600 Dance for Camera Cr. 2

Study and practice of making dance on film; development of basic film theory and screen dance skills and aesthetics. Open to junior and senior dance majors. Offered Fall.

Prerequisites: DNC 3500 with a minimum grade of D-

Restriction(s): Enrollment limited to students with a class of Junior or Senior; enrollment is limited to students with a major, minor, or concentration in Dance.

Course Material Fees: \$30

DNC 3810 Dance Pedagogy Cr. 3

Theory and practice of dance teaching in arts education; foundational emphasis on social and cultural aspects of pedagogical theory in multiple settings. Offered Winter.

Prerequisites: AFS 2390 with a minimum grade of C or ENG 2390 with a minimum grade of C or ENG 3010 with a minimum grade of C or ENG 3020 with a minimum grade of C or ENG 3050 with a minimum grade of C

Restriction(s): Enrollment is limited to students with a major in Dance or Dance Honors.

Course Material Fees: \$30

DNC 4010 Modern Dance IV Cr. 2

Continuation of DNC 3010. Modern dance technique, advanced level. Offered Fall, Winter.

Prerequisites: DNC 3010 with a minimum grade of C

Restriction(s): Enrollment is limited to students with a major in Dance or Dance Honors.

Course Material Fees: \$60

Repeatable for 16 Credits

DNC 4200 Ballet IV Cr. 2

Continuation of DNC 3200 with emphasis on advanced knowledge of classical ballet vocabulary. Offered Every Term.

Prerequisite: DNC 3200 with a minimum grade of C or DNC 2210 with a minimum grade of C

Restriction(s): Enrollment is limited to students with a major in Dance or Dance Honors.

Course Material Fees: \$60

Repeatable for 16 Credits

DNC 4410 Student Teaching and Seminar I Cr. 2-6

First experience in student teaching. Offered Fall, Winter.

Restriction(s): Enrollment is limited to Undergraduate level students.

DNC 4420 Student Teaching and Seminar II Cr. 2-6

Second experience in student teaching. Offered Fall, Winter.

Prerequisite: DNC 4410 with a minimum grade of C

Restriction(s): Enrollment is limited to Undergraduate level students.

DNC 4601 Problems in Choreography Cr. 2

Seminar discussion and applied experiences in choreographic problems; intensive study of choreographic structure, content and intention. Offered Fall, Winter.

Prerequisite: DNC 2500 with a minimum grade of C

Restriction(s): Enrollment is limited to students with a major in Dance or Dance Honors.

DNC 4610 Jazz III Cr. 2

Continuation of DNC 3410 with advanced training in jazz technique and styles. Offered Fall, Winter.

Prerequisite: DNC 2500 with a minimum grade of D-

Restriction(s): Enrollment is limited to students with a major in Dance or Dance Honors.

Course Material Fees: \$50

DNC 4810 Dance Teaching Methods Cr. 3

Analysis of instructional methods and materials in dance teaching including

creative movement, western concert dance, social and urban dance forms; special attention to community, recreational, private studio settings, and classroom management. Offered Every Other Winter.

Restriction(s): Enrollment is limited to students with a major, minor, or concentration in Dance or Dance Honors.

DNC 4820 Assisting in Dance Cr. 1

Assigned field work in assisting under faculty supervision. Offered Fall, Winter.

Restriction(s): Enrollment is limited to Undergraduate level students.

Repeatable for 4 Credits

DNC 4910 Dance in Community Cr. 3

Survey of dance in community settings, with emphasis on sociocultural aspects and social inclusion of disenfranchised or underrepresented populations; includes theoretical and applied experience in community dance practice. Offered Fall.

Prerequisite: DNC 3810 with a minimum grade of D-

Restriction(s): Enrollment is limited to students with a major, minor, or concentration in Dance or Dance Honors.

DNC 5000 Performance Tour Cr. 2

Development and performance of touring dance performances off campus including regional, national, and international festivals; productions for elementary, middle and secondary school audiences. Offered Winter.

Prerequisite: DNC 5610 with a minimum grade of C or DNC 6610 with a minimum grade of C

Repeatable for 8 Credits

DNC 5560 Choreography III Cr. 2

Continuation of DNC 3500; more advanced experience in choreographic forms and exploration of collaborative and technological approaches to choreography; part of Digital Dance Literacy curriculum. Offered Fall.

Prerequisite: DNC 2500 with a minimum grade of C and DNC 3500 with a minimum grade of C

Restriction(s): Enrollment is limited to students with a major in Dance or Dance Honors.

Course Material Fees: \$30

Repeatable for 6 Credits

DNC 5600 Improvisation Cr. 2

Spontaneous movement exploration in response to a variety of stimuli: literal, visual, kinesthetic, auditory, verbal, and tactile. Offered Fall.

Course Material Fees: \$50

DNC 5610 Dance Company I Cr. 1

Performing company. Open to students interested in performing and/or choreographing. Offered Fall, Winter.

Prerequisite: DNC 2010 (may be taken concurrently) with a minimum grade of C or DNC 3010 (may be taken concurrently) with a minimum grade of C or DNC 4010 (may be taken concurrently) with a minimum grade of C or DNC 6010 (may be taken concurrently) with a minimum grade of C

Course Material Fees: \$60

Repeatable for 8 Credits

DNC 5710 Dance Techniques Cr. 1-6

A concentrated period of advanced dance study in technique, composition and repertory, often with a visiting artist. Offered Fall, Winter.

Repeatable for 12 Credits

DNC 5800 Repertory Cr. 1

Learning, for performance, of dance repertory, dances previously choreographed by faculty, Labanotated dance, or work of artist-in-residence. Offered Fall, Winter.

Course Material Fees: \$60

Repeatable for 12 Credits

DNC 5810 Teaching Creative Dance for Children Cr. 3

Approaches to creative dance experiences for children stressing the development of aesthetic and kinesthetic awareness. Focus on comprehensive arts and curriculum related materials. Offered Fall.

DNC 5830 Field Work in Creative Dance Cr. 2-8

Supervised professional study in field settings. Offered Every Term.

Prerequisite: DNC 5810 with a minimum grade of C

DNC 5910 Dance Professions Seminar Cr. 3

Advanced inquiry and study of dance professions in applied settings. Offered Every Other Year.

Prerequisite: DNC 4910 with a minimum grade of C-

Restriction(s): Enrollment is limited to students with a major in Dance or Dance Honors.

DNC 5990 Independent Study in Dance Cr. 1-4

Independent work in dance under faculty guidance. Offered Every Term.

Restriction(s): Enrollment is limited to students with a major in Dance or Dance Honors.

Repeatable for 12 Credits

DNC 5993 Writing Intensive Course in Dance Cr. 0

Satisfies General Education Requirement: Writing Intensive Competency
Disciplinary writing assignments under the direction of a faculty member. Must be selected in conjunction with a course designated as a corequisite. See Schedule of Classes for corequisites available each term. Satisfies the University General Education Writing Intensive Course in the Major requirement. Required of all majors. Offered Every Term.

Prerequisites: May be taken concurrently: DNC 2300 or DNC 2310 or DNC 3310 or DNC 3810 or DNC 4910 or AFS 2390 with a minimum grade of C or ENG 2390 with a minimum grade of C or ENG 3010 with a minimum grade of C or ENG 3020 with a minimum grade of C or ENG 3050 with a minimum grade of C

Restriction(s): Enrollment is limited to Undergraduate level students.

DNC 5995 Dance Education Teacher Standards Cr. 3

Study of Professional Teaching Standards in Dance Arts (PTSDA), culminating in student documentation in evidence-based portfolio. Offered Winter.

Prerequisites: DNC 4910 with a minimum grade of C

DNC 5996 Senior Capstone Research Cr. 3

Group and solo choreography, concert production, publicity and promotion; research component includes digital dance portfolio. Offered Winter.

Prerequisite: DNC 3500 with a minimum grade of C

Course Material Fees: \$50

Equivalent: DNC 5560

Repeatable for 6 Credits

DNC 5997 Departmental Honors Thesis Cr. 3

Satisfies General Education Requirement: Honors Section
Group and solo choreography, concert production, publicity and promotion; research component includes digital dance portfolio. Offered Winter.

Prerequisite: DNC 3500 with a minimum grade of D-

Restriction(s): Enrollment is limited to Undergraduate level students; enrollment is limited to students in the Department of Theatre and Dance; enrollment is limited to students with a major in Dance Honors.

DNC 5998 Professions Capstone Research Cr. 3

Advanced inquiry and study of dance professions in applied settings within an approved internship or fieldwork context. Serves as capstone experience for BS dance majors. Offered Winter.

Prerequisite: DNC 5910 with a minimum grade of C

Restriction(s): Enrollment is limited to students with a major in Dance or Dance Honors; enrollment limited to students in a Bachelor of Science degree.

DNC 6010 Technique Laboratory III Cr. 1

Modern Dance technique, advanced level. Offered Fall, Winter.

Prerequisite: DNC 4010 with a minimum grade of C

Repeatable for 8 Credits

DNC 6610 Dance Company II Cr. 1

Performing company. Performing, choreographic and/or production responsibilities. Offered Fall, Winter.

Prerequisite: DNC 5610 with a minimum grade of C

Repeatable for 8 Credits

DR - DISPUTE RESOLUTION

DR 6120 Human Diversity and Human Conflict Cr. 3

Relationship of human differences and conflict, and ways to nonviolently confront and work with them; differences as defined by ethnicity, race, gender, class, age, etc. Offered Winter.

DR 7100 Roots of Social Conflict Cr. 3

Background and immediate causes of social conflict, from interpersonal to national to international settings, from ethnic to gender conflict; review of destructive and constructive aspects of conflict. Offered Fall.

Restriction(s): Enrollment is limited to Graduate level students.

DR 7210 Concepts and Processes of Dispute Resolution I: Negotiating Theory and Practice Cr. 3

Theoretical foundations of processes of negotiation and multi-party collaborative problem solving. Skill building simulation to integrate theory and practice. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate level students.

Equivalent: MGT 7780

DR 7220 Concepts and Processes of Dispute Resolution II: Neutral Intervention Theory and Practice Cr. 3

Dispute resolution growth and methods; mediation, facilitation, conciliation, fact-finding, arbitration; hybrids; dispute resolution institutions and practitioners. Offered Winter.

Prerequisite: MGT 7780 with a minimum grade of C or DR 7210 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

DR 7310 Practicum in Dispute Resolution Cr. 3

Training in facilitative mediation with opportunity to practice skills in a variety of settings. Offered Fall.

Prerequisite: DR 7210 with a minimum grade of C and DR 7220 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

Course Material Fees: \$225

Equivalent: LEX 7660

DR 7890 Final Seminar in Dispute Resolution Cr. 3

Capstone seminar for Dispute Resolution program. Critical issues and assumptions in the practice and research spheres. Offered Winter.

Restriction(s): Enrollment is limited to Graduate level students.

DR 7990 Directed Study in Dispute Resolution Cr. 1-4

Advanced independent readings and writing under supervision of graduate faculty member, in areas of special interest. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate level students.

DSA - DATA SCIENCE AND ANALYTICS

DSA 6000 Data Science and Analytics Cr. 3

Basic data science and analytics concepts covered through case studies, success stories, and a semester project that cuts across all course modules. Offered Yearly.

Restriction(s): Enrollment is limited to students with a major in Data Sci & Business Analytics.

DSA 6100 Statistical Methods for Data Science & Analytics Cr. 3

Statistical methods and techniques required for data science and analytics applications covered through case studies, success stories, and a semester project that cuts across all course modules. Offered Yearly.

Restriction(s): Enrollment is limited to students with a major in Data Sci & Business Analytics.

Course Material Fees: \$50

DSA 6200 Operations Research Cr. 3

Mathematical optimization models that come into play in data science and analytics applications covered through case studies and a semester project. Heuristic solution approaches will also be addressed along with sensitivity analysis techniques. Offered Yearly.

Restriction(s): Enrollment is limited to students with a major in Data Sci & Business Analytics.

DSA 6300 Decision Analysis and Simulation Cr. 3

Coherent approach to decision making, developing rules of thought to transform complex decisions into simpler decision situations covered through case studies, success stories, and a semester project that cuts across all course modules. Discusses role of discrete-event simulation for improving decision support. Offered Yearly.

Restriction(s): Enrollment is limited to students with a major in Data Sci & Business Analytics.

DSA 7500 Practicum Cr. 6

Apply theoretical knowledge acquired throughout the Big Data & Business Analytics MS program to a challenging project involving real-world business problems/opportunities and data analytics in a reliable, scalable, distributed computing environment. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate level students; enrollment is limited to students with a major in Data Sci & Business Analytics.

Course Material Fees: \$50

Equivalent: DSB 7500, DSE 7500

DSB - DATA SCIENCE FOR BUSINESS

DSB 6000 Data Science Strategy & Leadership Cr. 3

Provides an understanding of how organizations can leverage data science and analytics to gain competitive advantage and how to use the data to align with a company's mission and goals. Students will learn how organizations derive business value/impact, and return on investment, and the importance of interpreting and communicating the business case. Offered Yearly.

DSB 6100 Marketing Analytics Cr. 3

Application and synthesis of marketing methods and modeling approaches to design, analyze, and optimize digital marketing campaigns and to understand customer segments, customer life cycles, and lifetime values. Offered Yearly.

Restriction(s): Enrollment is limited to students with a major in Data Sci & Business Analytics.

DSB 6200 Manufacturing & Supply Chain Analytics Cr. 3

Discussion of the strategic and tactical issues surrounding the design and operation of supply chains through effective information collection, sharing, and collaboration, an understanding of applied analytical tools and methods that can be used to make better supply chain decisions and practical application of supply chain advanced planning and optimization solutions. Offered Yearly.

DSB 6300 Social and Collaboration Networks Cr. 3

Leveraging data science tools & technologies for network analysis with practical applications to support and provide a structure for fact-based decision making for individuals working to gain insight into complex organizational problems. Offered Yearly.

Restriction(s): Enrollment is limited to students with a major in Data Sci & Business Analytics.

DSB 7500 Practicum Cr. 6

Apply theoretical knowledge acquired throughout the Big Data & Business Analytics MS program to a challenging project involving real-world business problems/opportunities and data analytics in a reliable, scalable, distributed computing environment. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate level students; enrollment is limited to students with a major in Data Sci & Business Analytics.

Equivalent: DSA 7500, DSE 7500

DSE - DATA SCIENCE FOR ENGINEERING

DSE 5070 Introduction to Data Computing and Programming Cr. 3

Not for CSC major credit. Offered for graduate credit only. Background in calculus and linear algebra is necessary. This course introduces students to the foundation of data computing problem solving using programming languages of Python and R. It provides students with skills that will enable them to make productive use of “data science” techniques to model and interpret data. The course covers the following topics: 1) Basic concepts of probability and statistics; 2) Python and R basics; 3) Data pre-processing, modeling, and visualizing with Python/R. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate level students.

DSE 6000 Computing Platforms for Data Science Cr. 3

Covers an overview of various computing platforms for developing, deploying, configuring a wide range of data science applications for different domains. The programming models, characteristics of supported workload, and management of performance, cost and scalability will be compared side by side. Offered Yearly.

Restriction(s): Enrollment is limited to students with a major in Data Sci & Business Analytics.

DSE 6100 Data Modeling and Management Cr. 3

Covers both traditional data modeling and big data modeling from conceptual design, logical-to-physical mapping, to physical schema optimization. Provenance management, which concerns about the lineage and history of a data product, is important for the repeatability of data analysis. The course will present various concepts of provenance and its relationships to data quality and trust. Offered Yearly.

Restriction(s): Enrollment is limited to students with a major in Data Sci & Business Analytics.

DSE 6200 Modern Databases Cr. 3

Covers an overview of databases, tools, and computing platforms. One focus is basic SQL, NoSQL, and NewSQL programming skills and a comparison of their cons and pros. In particular, the students will learn the criteria to choose a database system, either SQL or NoSQL, based on the requirements of an application domain. Offered Yearly.

Restriction(s): Enrollment is limited to students with a major in Data Sci & Business Analytics.

DSE 6300 Data Science Applications Development Cr. 3

Focuses on the software engineering cycle of developing a comprehensive data science application. Students will have the freedom to choose a computing platform, or a NoSQL database as the underlying infrastructure for developing a data science application. Students will also choose a particular domain and problem in which one needs to address one of the big data challenges: volume, velocity, or variety. Offered Yearly.

DSE 7500 Practicum Cr. 6

Apply theoretical knowledge acquired throughout the Big Data & Business Analytics MS program to a challenging project involving real-world business problems/opportunities and data analytics in a reliable, scalable, distributed computing environment. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate level students; enrollment is limited to students with a major in Data Sci & Business Analytics.

Equivalent: DSA 7500, DSB 7500

ECE - ELECTRICAL AND COMPUTER ENGINEERING

ECE 2610 Digital Logic I Cr. 4

Introduction to Boolean algebra; Logic Gates; Minimization of Boolean Functions; K-Map of up to 4 variables; Basic digital circuits like adder, subtractor, multiplexers, decoders etc.; Sequential circuits; Memories; PLAs; Counters using different flip-flops such as D, T, R-S and J-K; Design of simple computer; Introduction to Verilog and FPGAs. Offered Every Term.

Prerequisites: May be taken concurrently: CSC 2000 with a minimum grade of C- and May be taken concurrently: PHY 2185 with a minimum grade of C- or PHY 2180 with a minimum grade of C-

Restriction(s): Enrollment is limited to Undergraduate level students.

Course Material Fees: \$10

ECE 3040 Numerical Methods for Engineers Cr. 3

Developing numerical algorithms to provide solutions to engineering problems. Derivation of numerical algorithms and investigation of their stability, accuracy, efficiency and scalability. Programming numerical algorithms in Matlab. Topics include: Machine Round-off error, truncation error, root finding, solution of systems of linear and nonlinear algebraic equations, Taylor and Chebyshev series and rational function approximation, interpolation, regression, numerical differentiation, numerical integration, numerical solution of ordinary differential equations, and Monte Carlo methods. Offered Every Term.

Prerequisites: BE 1200 with a minimum grade of C- and MAT 2030 with a minimum grade of C- and May be taken concurrently: MAT 2150 with a minimum grade of C- or MAT 2250 with a minimum grade of C- and MAT 2350 with a minimum grade of C-

Restriction(s): Enrollment limited to students in the following programs: BS in Biomedical Engineering, BS in Chemical Engineering, BS in Civil Engineering, BS in Electrical Engineering, BS in Industrial Engineering, BS in Mechanical Engineering.

Course Material Fees: \$15

ECE 3300 Introduction to Electrical Circuits Cr. 4

Electrical quantities and waveforms; resistance and Ohm's law; networks and Kirchhoff's laws; network equivalents; nodal and mesh analysis; Thevenin's theorem and other network theorems. First- and second-order systems. Offered Every Term.

Prerequisites: PHY 2185 with a minimum grade of C- or PHY 2180 with a minimum grade of C- and May be taken concurrently: MAT 2150 with a minimum grade of C- or MAT 2250 with a minimum grade of C- and MAT 2350 with a minimum grade of C-

Restriction(s): Enrollment limited to students in the College of Engineering; enrollment limited to students in the following programs: BS in Biomedical Engineering, BS in Chemical Engineering, BS in Civil Engineering, BS in Electrical Engineering, BS in Industrial Engineering, BS in Mechanical Engineering.

Course Material Fees: \$25

ECE 3320 Introduction to Electrical Circuits Cr. 4

Electrical signals and waveforms; resistance and Ohm's law; networks and Kirchhoff's laws; network equivalents; nodal and mesh analysis; Thevenin's theorem; energy storage systems; Introduction to sinusoidal steady-state response; complex frequency concepts; Frequency responses. No credit towards B.S. EE degree. Offered Yearly.

Prerequisites: PHY 2185 with a minimum grade of C- or PHY 2180 with a minimum grade of C- and May be taken concurrently: MAT 2150 with a minimum grade of C-

ECE 3330 Electrical Circuits II Cr. 4

Sinusoidal steady-state response; three-phase systems; complex frequency concepts; frequency responses; resonant and coupled circuits; application of Fourier transforms and Laplace transform to electrical circuits. Offered Every Term.

Prerequisites: MAT 2150 with a minimum grade of C- or MAT 2250 with a minimum grade of C- and MAT 2350 with a minimum grade of C- and ECE 3300 with a minimum grade of C-

Restriction(s): Enrollment limited to students in the College of Engineering; enrollment limited to students in the following programs: BS in Biomedical Engineering, BS in Chemical Engineering, BS in Civil Engineering, BS in Electrical Engineering, BS in Industrial Engineering, BS in Mechanical Engineering.

ECE 3570 Electronics Cr. 4

DC and small signal analysis of diodes, MOSFETs, and BJTs circuits; operational amplifiers, single-stage amplifiers, differential pair, gain, input resistance, output resistance, and bandwidth of amplifiers. Offered Every Term.

Prerequisite: ECE 3330 (may be taken concurrently) with a minimum grade of C- and ECE 3300 with a minimum grade of C-

Restriction(s): Enrollment limited to students in the College of Engineering; enrollment limited to students in the following programs: BS in Biomedical Engineering, BS in Chemical Engineering, BS in Civil Engineering, BS in Electrical Engineering, BS in Industrial Engineering, BS in Mechanical Engineering.

Course Material Fees: \$15

ECE 3620 Introduction to Microcomputers Cr. 4

Basics of digital systems, number systems, functional blocks of microcomputers, assembly language and machine code, applications of microcomputers and experimental demonstrations. Introduction to digital logic. Offered Every Term.

Prerequisites: BE 1200 with a minimum grade of C- and ECE 2610 with a minimum grade of C- or ECE 3610 with a minimum grade of C-

Restriction(s): Enrollment limited to students in the following programs: BS in Biomedical Engineering, BS in Chemical Engineering, BS in Civil Engineering, BS in Electrical Engineering, BS in Industrial Engineering, BS in Mechanical Engineering.

Course Material Fees: \$25

ECE 4050 Algorithms and Data Structures Cr. 4

Introduction to problem solving methods and algorithm development; data abstraction for structures such as stacks, queues, linked lists, trees, and graphs; searching and sorting algorithms and their analysis. Offered Yearly.

Prerequisite: CSC 2000 with a minimum grade of C-

Restriction(s): Enrollment limited to students in the College of Engineering; enrollment limited to students in the following programs: BS in Biomedical Engineering, BS in Chemical Engineering, BS in Civil Engineering, BS in Electrical Engineering, BS in Industrial Engineering, BS in Mechanical Engineering.

Equivalent: CSC 5050

ECE 4330 Linear Systems and Signals Cr. 4

Content includes: continuous-time and discrete-time linear systems and signals; properties of linear systems; classical analysis methods and convolution; system analysis method for zero-state and zero-input response; Laplace transform and its application to linear system analysis; Fourier series expansion of periodic signals; Fourier transform and the steady-state response; application to analog filters, control and communication systems; solution of linear difference equations; z-transform analysis method; sampling theory; discrete-time Fourier transform and its application in digital filter design. Offered Every Term.

Prerequisites: ECE 3330 with a minimum grade of C- and May be taken concurrently: ECE 3040 with a minimum grade of C- or BE 2550 with a minimum grade of C-

Restriction(s): Enrollment limited to students in the College of Engineering; enrollment limited to students in the following programs: BS in Biomedical Engineering, BS in Chemical Engineering, BS in Civil Engineering, BS in Electrical Engineering, BS in Industrial Engineering, BS in Mechanical Engineering.

ECE 4331 Systems and Signals Laboratory Cr. 2

Experiments cover signal generation, signal manipulations and signal measurements, electronic oscillators, steady-state, zero-state and zero-input responses of linear circuits, harmonic sinusoidal content (Fourier Series) of periodic signals, low-pass, high-pass, band-pass and notch filter circuits, network functions, solution of differential equations using operational amplifier circuits, amplitude modulation and demodulation of speech signals, signal sampling and reconstruction. Offered Fall, Winter.

Prerequisite: ECE 4330 (may be taken concurrently) with a minimum grade of C-

Restriction(s): Enrollment limited to students in the following programs: BS in Biomedical Engineering, BS in Chemical Engineering, BS in Civil Engineering, BS in Electrical Engineering, BS in Industrial Engineering, BS in Mechanical Engineering.

ECE 4340 Microcomputer-Based Instrumentation Laboratory Cr. 2

Multipurpose personal-computer-based approach to real time instrumentation. Current interfacing and software used for data acquisition, transmission, analysis and report writing. Offered Every Term.

Prerequisites: ECE 2610 with a minimum grade of C- or ECE 3610 with a minimum grade of C- and ECE 3570 with a minimum grade of C- and ECE 3330 with a minimum grade of C-

Restriction(s): Enrollment limited to students in the College of Engineering; enrollment limited to students in the following programs: BS in Biomedical Engineering, BS in Chemical Engineering, BS in Civil Engineering, BS in Electrical Engineering, BS in Industrial Engineering, BS in Mechanical Engineering.

Course Material Fees: \$10

ECE 4470 Control Systems I Cr. 4

System representations; feedback characteristics; time-domain characteristics; signal flow graph, Routh-Hurwitz criteria; Root Locus Plots; Nyquist criteria, Bode plots; PID, phase-lead and phase-lag controller design. Offered Every Term.

Prerequisite: ECE 4330 with a minimum grade of C-

Restriction(s): Enrollment limited to students in the College of Engineering; enrollment limited to students in the following programs: BS in Biomedical Engineering, BS in Chemical Engineering, BS in Civil Engineering, BS in Electrical Engineering, BS in Industrial Engineering, BS in Mechanical Engineering.

ECE 4570 Fundamentals of Microelectronic Devices Cr. 4

Aspects of electrical properties of semiconductors, the physical electronics of P-N junction, bipolar, field effect transistors, and device fabrication technology essential to understanding semiconductor active devices and integrated circuits. Introduction to the behavior of semiconductor and electronics devices. Offered Every Term.

Prerequisites: ECE 3300 with a minimum grade of C- and MAT 2150 with a minimum grade of C-

Restriction(s): Enrollment limited to students in the College of Engineering; enrollment limited to students in the following programs: BS in Biomedical Engineering, BS in Chemical Engineering, BS in Civil Engineering, BS in Electrical Engineering, BS in Industrial Engineering, BS in Mechanical Engineering.

ECE 4600 Capstone Design I Cr. 4

Satisfies General Education Requirement: Writing Intensive Competency Design principles, subsystems of microcontrollers; designing products using microcontrollers, sensors and actuators. Offered Every Term.

Prerequisite: ENG 3050 with a minimum grade of C- and ECE 3620 with a minimum grade of C-

Restriction(s): Enrollment limited to students with a class of Senior; enrollment limited to students in the College of Engineering; enrollment limited to students in the following programs: BS in Biomedical Engineering, BS in Chemical Engineering, BS in Civil Engineering, BS in Electrical Engineering, BS in Industrial Engineering, BS in Mechanical Engineering.

ECE 4680 Computer Architecture Cr. 4

An introduction to computer architecture. Instruction set architecture; performance analysis of computer systems; basic processor design and implementation techniques; pipelined processor design; design of the control unit, memory hierarchy and cache design; I/O. Offered Yearly.

Prerequisites: BE 2100 with a minimum grade of C- and ECE 2610 with a minimum grade of C- and ECE 3620 with a minimum grade of C-

Restriction(s): Enrollment limited to students in the College of Engineering; enrollment limited to students in the following programs: BS in Biomedical Engineering, BS in Chemical Engineering, BS in Civil Engineering, BS in Electrical Engineering, BS in Industrial Engineering, BS in Mechanical Engineering.

ECE 4700 Introduction to Communication Theory Cr. 4

Basic information transmission concepts. Spectral analysis. Transmission through linear networks. Sampling principles. Digital and analog communication signals and systems. The effect of noise in communication systems. Elementary decision theory. Offered Every Term.

Prerequisite: (BE 2100 with a minimum grade of C- or BE 3220 with a minimum grade of C-) and ECE 4330 with a minimum grade of C-

Restriction(s): Enrollment limited to students in the College of Engineering; enrollment limited to students in the following programs: BS in Biomedical Engineering, BS in Chemical Engineering, BS in Civil Engineering, BS in Electrical Engineering, BS in Industrial Engineering, BS in Mechanical Engineering.

ECE 4800 Electromagnetic Fields and Waves I Cr. 4

Fundamentals of electromagnetic engineering, static electric and magnetic fields using vector analysis and fields of steady currents, Maxwell's equations and boundary value problems. Basic principles of plane waves, transmission lines and radiation. Offered Every Term.

Prerequisite: ECE 3330 with a minimum grade of C-

Restriction(s): Enrollment limited to students in the College of Engineering; enrollment limited to students in the following programs: BS in Biomedical Engineering, BS in Chemical Engineering, BS in Civil Engineering, BS in Electrical Engineering, BS in Industrial Engineering, BS in Mechanical Engineering.

ECE 4850 Engineering Optics Cr. 4

Topics include: lightwave fundamentals, optical sources and detectors, optical fibers and waveguides, optical instrumentation, optical sensors for self-driving vehicles and robotics, applications optical devices and systems. Offered Yearly.

Prerequisite: ECE 3330 with a minimum grade of C-

Restriction(s): Enrollment limited to students in the College of Engineering; enrollment limited to students in the following programs: BS in Biomedical Engineering, BS in Chemical Engineering, BS in Civil Engineering, BS in Electrical Engineering, BS in Industrial Engineering, BS in Mechanical Engineering.

ECE 4990 Directed Study Cr. 1-4

Supervised study and instruction in a field selected by the student. Offered Every Term.

Restriction(s): Enrollment limited to students with a class of Senior; enrollment limited to students in the College of Engineering; enrollment limited to students in the following programs: BS in Biomedical Engineering, BS in Chemical Engineering, BS in Civil Engineering, BS in Electrical Engineering, BS in Industrial Engineering, BS in Mechanical Engineering.

Repeatable for 4 Credits

ECE 5020 Matrix Computation I Cr. 4

Background matrix algebra; linear system sensitivity; basic transformations; Gaussian elimination; symmetric systems; positive definite systems; Householder method for least squares problems; unsymmetric eigenvalue problems; the QR algorithm. Offered Yearly.

Prerequisites: 3 of CSC 2200 with a minimum grade of C, CSC 2201 with a minimum grade of C, MAT 2250 with a minimum grade of C- and 1 of ECE 3040 with a minimum grade of C-, BE 2550 with a minimum grade of C-

Equivalent: CSC 6620

ECE 5100 Quantitative Physiology Cr. 4

Basic principles of human physiology presented from the engineering perspective. Bodily functions, their regulation and control discussed in quantitative terms and illustrated by mathematical models where feasible. Offered Fall, Winter.

Equivalent: BME 5010, CHE 5100, ME 5100

ECE 5280 Introduction to Cyber-Physical Systems Cr. 3

Topics include: modeling, design, analysis, and implementation of cyber-physical systems; dynamic behavior modeling, state machine composition, and concurrent computation; sensors and actuators; embedded systems and networks; feedback control systems; temporal logic and model checking. Offered Fall, Winter.

Prerequisites: CSC 3100 with a minimum grade of C- and CSC 3110 with a minimum grade of C-

Restriction(s): Enrollment limited to students in the College of Engineering.

Equivalent: CSC 5280

ECE 5330 Modeling and Control of Power Electronics and Electric Vehicle Powertrains Cr. 4

Basic methodologies for modeling, control system design of renewable power sources and power electronics systems. Offered Fall.

Restriction(s): Enrollment is limited to Graduate or Undergraduate level students; enrollment limited to students in the College of Engineering.

Equivalent: AET 5330, EVE 5430

ECE 5340 Advanced Energy Storage Systems for Electrification of Vehicles Cr. 4

The objective of this course is to learn fundamentals of energy storage systems for electric-based transportation and to provide basic knowledge in the multidisciplinary field of energy storage devices and their applications for land, space and marine vehicles. The focus of the course will be on advanced batteries, supercapacitors, and fuel cells for transportation applications; battery sizing and integration to various land-marine-space vehicles; and the fundamentals of battery management systems including various methodologies in electrical control and thermal management modes. Offered Intermittently.

ECE 5350 Alternative Energy Sources and Conversions Cr. 4

Covers the fundamentals of alternative energy sources and conversion of these sources to electrical energy. The focus will be on solar and wind energy sources, covering design and operation of photovoltaic cells, solar thermal technologies, and design and operation of wind towers and wind farms. Other topics include: principle operations of geothermal energy, nuclear power plants, hydro-power, tidal and ocean waves and various methods of capturing and transforming these energy resources to electricity. Offered Intermittently.

ECE 5410 Power Electronics and Control Cr. 4

Control of electric energy using power electronic semiconductor devices; mathematical analysis of circuits containing these devices; design, modeling and control of power converters; applications of power electronic converters. Offered Spring/Summer.

Prerequisites: ECE 4330 with a minimum grade of C-

Restriction(s): Enrollment limited to students in the College of Engineering.

Equivalent: EVE 5410

ECE 5425 Robotic Systems I Cr. 4

Introduction to robot kinematics and control. Computational algorithms for robot movement, sensor fusion, and intelligent behavior, which are needed to build a system that performs actions and interacts with its environment. Offered Fall.

Prerequisites: BE 2550 with a minimum grade of C- or BE 1500 with a minimum grade of C- or BME 5020 with a minimum grade of C- or ECE 3040 with a minimum grade of C-

Equivalent: BME 5425

ECE 5430 Electric Energy Systems Engineering Cr. 4

Transmission capacity, load characteristics, power frequency control. Energy system component analysis and modeling. Steady-state analysis, load-flow problem and algorithms, optimal dispatch. Transient stability by simulation and direct methods. Offered Intermittently.

Prerequisites: ECE 4330 with a minimum grade of C-

ECE 5440 Computer-Controlled Systems Cr. 4

Introduction to z-transform and sampling theory. Digital controller design using both transfer function techniques and state space methods.

Implementation aspects of computer-controlled systems. Offered Yearly.

Prerequisites: ECE 4470 with a minimum grade of C- or CHE 4600 with a minimum grade of C- or ME 5540 with a minimum grade of C-

ECE 5460 Stochastic Processes in Engineering Cr. 4

Elements of probability theory. Random variables. Random sequences. Convergence concepts, limit theorems and sampling. Gaussian processes and Brownian motion. Martingales and Markov Processes. Frequency-domain analysis. White noise representations. Sampling Theorem. Wiener Filtering. Recursive Filtering. Linear and nonlinear differential systems. Likelihood ratios and applications. Offered Every Other Year.

Prerequisites: 1 of ECE 4330, ME 5000 and IE 3220 with a minimum grade of C-

ECE 5470 Control Systems II Cr. 4

State space representation of systems; stability and Liapunov methods, controllability and observability, pole placement design using state feedback, observer design, optimal control, linear quadratic regulators, Kalman filter. Offered Yearly.

Prerequisites: ECE 4470 with a minimum grade of C-

ECE 5550 Solid State Electronics Cr. 4

Physical basis for the opto-electric properties of solids with particular emphasis on semiconductors. Basic principles associated with solid-state devices. Extrinsic and intrinsic semiconductors. Behavior of P-N junctions, bi-polar and field-effect transistors. PC-based simulation of device characteristics using the PC1D simulator. Offered Every Term.

Prerequisites: ECE 4570 with a minimum grade of C- and ECE 4800 with a minimum grade of C-

ECE 5575 Introduction to Micro and Nano Electro Mechanical Systems (MEMS/NEMS) Cr. 4

General and specialized micro/nanofabrication techniques; basic sensing and actuating mechanisms (piezoresistive, piezoelectric, capacitive, electrostatic, thermal pneumatic, etc.); and design and operation of various MEMS/NEMS devices for automotive and biomedical applications; fabrication and characterization of basic MEMS structures. Offered Winter.

ECE 5610 Introduction to Parallel and Distributed Systems Cr. 4

Fundamentals of parallel and distributed systems. Programming experience in both computing environments. Offered Yearly.

ECE 5620 Embedded System Design Cr. 4

Microcontroller architecture and its subsystems. Wired and wireless protocols for vehicular networking applications. Design and implementation of real-time embedded systems. Offered Every Term.

Prerequisites: ECE 4600 with a minimum grade of C-

ECE 5650 Computer Networking and Network Programming Cr. 4

Overview of networks and the Internet, the application layer, socket programming, the transport Layer, the network Layer, the link Layer: links, access networks, and LANs. Introduction to Software-Defined networking, OpenFlow, and wireless and mobile networks. Projects provide students with hands-on experience in developing network applications. Labs provides students with hands-on experience with network layers and protocols. Offered Every Term.

Prerequisites: ECE 4050 with a minimum grade of C-

ECE 5680 Computer-Aided Logical Design and FPGAs Cr. 4

Topics include: review of digital design; advanced applications of Boolean algebra techniques; Computer-Aided Logical Design for large Boolean functions and simplification; threshold function; linear sequential machines; design using Verilog and FPGAs; introduction to cadence. Offered Winter.

Prerequisites: ECE 4680 with a minimum grade of C-

ECE 5690 Introduction to Digital Image Processing Cr. 4

Provide college engineering seniors and first-year graduate students with introductory preparation in mathematical analysis, vectors, matrices, probability, statistics, sequences and series, and computer programming. Includes concepts of digital image processing from an operational perspective with good exposure to theory, accessibility of DIP to engineering, and a detailed review of current techniques. Offered Fall.

Prerequisites: BE 2100 with a minimum grade of C-, ECE 4050 with a minimum grade of C-, and ECE 4330 with a minimum grade of C-

ECE 5700 Digital Communications Cr. 4

Digital modulators and demodulators, M-ary PSK, M-ary FSK, optimal receiver for AWGN channel. correlator receiver, matched filter receiver, analysis of probability of bit errors for digital communication systems, Shannon limit, simulation of digital communication system. Offered Intermittently.

Prerequisites: ECE 4700 with a minimum grade of C-

ECE 5770 Digital Signal Processing Cr. 4

Analysis of discrete signals and systems. Applications to digital filtering, active filters, digital communication and encoding. Offered Yearly.

Prerequisites: ECE 4700 with a minimum grade of C-

ECE 5870 Optical Communication Networks Cr. 4

Laser and detectors; modulation and demodulation; optical transmitters and receivers; optical filters; optical amplifiers; architecture and network control; multi-access networks; FDDI networks, SONET/SDH, ATM, system performance. Offered Yearly.

Prerequisites: ECE 4700 with a minimum grade of C- and ECE 4850 with a minimum grade of C-

ECE 5990 Directed Study Cr. 1-4

Supervised study and instruction in the field selected by the student. Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students; enrollment is limited to students in the Department of Electrical & Computer Engineer.

Repeatable for 4 Credits

ECE 5995 Special Topics in Electrical and Computer Engineering I Cr. 1-4

Special subject matter in electrical and computer engineering. Topics to be announced in Schedule of Classes . Offered Every Term.

Repeatable for 8 Credits

ECE 6180 Biomedical Instrumentation Cr. 4

Engineering principles of physiological measurements, signal conditioning equipment, amplifiers, recorders and transducers. Recent advances in instrumentation. Offered Winter.

Prerequisites: BME 5020 with a minimum grade of B- and ECE 3300 with a minimum grade of C- or BME 5040 with a minimum grade of B-

Equivalent: BME 6480, ME 6180

ECE 6570 Smart Sensor Technology I: Design Cr. 4

Introduction to various types of sensors and the design of basic analog VLSI circuit building blocks. Offered Winter.

Equivalent: BME 6470, PHY 6570

ECE 6660 Introduction to VLSI Systems Cr. 4

Survey of very large scale integrated circuit components and design procedures. MOS fabrication, MOS gates, circuit architecture, device design, manufacturing and interface techniques. Offered Yearly.

Prerequisite: ECE 4680 with a minimum grade of C-

Course Material Fees: \$30

ECE 6991 Industrial Internship Cr. 1-4

Internship experience that satisfies the curricular practical training requirements. Offered for graduate credit only. Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students.

Repeatable for 4 Credits

ECE 7030 Mathematical Methods in Engineering I Cr. 4

Introduction to functional analysis. Banach and Hilbert spaces. Fixed-point and projection theorem techniques. Approximation, estimation, and optimization theory. Applications to numerical and error analysis, non-linear equations, and modeling system identification. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate level students.

ECE 7100 Mathematical Modeling in Impact Biomechanics Cr. 4

Review of models created for impact simulations. Regional impact simulation models. Human and dummy models subject to various restraint systems. Offered Winter.

Prerequisite: BME 5010 with a minimum grade of B-

Restriction(s): Enrollment is limited to Graduate level students.

Equivalent: BME 7100, IE 7100, ME 7100

ECE 7420 Nonlinear Control Systems Cr. 4

Provide examples of nonlinear dynamical control systems, perform system analysis using phase-portrait, and examine stability using Lyapunov's direct method and invariant set theorems (local and global stability). Introduce describing function method, feedback linearization technique, internal dynamics, and zero-dynamics. Design nonlinear robust controllers. Offered Fall.

Prerequisite: ME 6550 with a minimum grade of C or ECE 5470 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students in the College of Engineering.

Equivalent: ME 7590

ECE 7425 Robotics Systems II Cr. 4

Project-based class to understand technology that interfaces computer engineering, software design, electronics and sensors with robotics. Advanced application areas of robotics will be covered including medical, military, space, vehicle robotics. Offered Winter.

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students in the College of Engineering.

Equivalent: BME 7425

ECE 7430 Control of Discrete Event Systems Cr. 4

Automation model of discrete event systems; formal languages and regular expressions; supervisory control; controllability and observability; decentralized control and co-observability; timed discrete event systems; performance analysis; applications to manufacturing systems and power systems. Offered Every Other Year.

Prerequisite: ECE 5440 with a minimum grade of C or ECE 5470 with a minimum grade of C or ME 5550 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

ECE 7440 Dynamic Systems and Optimal Control Cr. 4

Formulation of optimal control problems. Pontryagin's maximum principle and necessary conditions for optimality, with applications. Dynamic programming; Hamilton-Jacobi equation; optimal feedback control. Offered Intermittently.

Prerequisite: ECE 5440 with a minimum grade of C or ECE 5470 with a minimum grade of C or ME 5550 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

ECE 7530 Advanced Digital VLSI Design Cr. 4

Topics include: review of VLSI Design processes; CADENCE tools used to simulate and generate the schematic and layout of the synthesized hardware description language codes; and chip fabrication. Offered Winter.

Prerequisite: ECE 5680 with a minimum grade of C and ECE 6660 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

ECE 7570 Smart Sensor Technology II: Characterization and Fabrication Cr. 4

Integration of ongoing research in integrated technology of smart sensors. Design of smart sensor devices using computer simulation. Fabrication of smart sensor. Offered Spring/Summer.

Prerequisite: ECE 6570 with a minimum grade of B- or BME 6470 with a minimum grade of B- or PHY 6570 with a minimum grade of B-

Restriction(s): Enrollment is limited to Graduate level students.

Course Material Fees: \$50

Equivalent: BME 7470, PHY 7580

ECE 7590 Biomedical Microsystems Cr. 4

Biomedical microsystems, with a focus on microfluidics and lab-on-a-chip technologies for medical diagnostics and biological research. Broad coverage of microscale physics; microfabrication methods; separation, purification, and other on-chip processes; biosensing. Offered Fall.

Prerequisite: ECE 5575 with a minimum grade of C or ECE 6570 with a minimum grade of C or BME 6470 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

Equivalent: BME 7490, CHE 7490

ECE 7610 Advanced Parallel and Distributed Systems Cr. 4

Advanced topics in parallel and distributed computing, multicore and parallel architecture, communication, synchronization, parallel algorithms and programming, load balancing and scheduling, security. Offered Winter.

Prerequisite: ECE 5610 or ECE 5650

Restriction(s): Enrollment is limited to Graduate level students.

ECE 7650 Scalable and Secure Internet Services and Architecture Cr. 4

Advanced principles of distributed and cloud computing systems, Internet servers and data centers, content delivery networks, software-defined networking, Internet of things, multimedia networking, performance scalability, energy-aware resource management, security, cost-effective engineering design. Offered Winter.

Prerequisite: ECE 5610 with a minimum grade of C or ECE 5650 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

ECE 7660 Parallel Computer Architecture Cr. 4

Review of parallel computer architectures, including symmetric multiprocessors and scalable machines. Parallel software basics for various architectures. Fundamental issues including cache coherence, interconnection network, and synchronization; influence of these on performance of applications. Offered Yearly.

Prerequisite: ECE 5610 with a minimum grade of C and ECE 5620 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

ECE 7680 Advanced Digital Image Processing and Applications Cr. 4

Advanced aspects, algorithms, methods in digital image processing and their corresponding applications in different fields. Students develop comprehensive skills and knowledge in digital image processing. Offered Yearly.

Prerequisite: ECE 5690 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

ECE 7690 Fuzzy Systems Cr. 4

From basic fuzzy set theory to advanced topics such as neuro-fuzzy systems. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate level students.

ECE 7700 Statistical Communication Theory Cr. 4

Decision theory, binary decisions with single and multiple observations, signals in additive Gaussian noise, sequential decision theory, estimation theory, Kalman filtering. Offered Yearly.

Prerequisite: ECE 5700 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

ECE 7730 Telematics Cr. 4

Introduction to automotive telematics, mobile communication channels, error correction, automatic crash response, vehicle diagnostics, vehicle tracking, vehicle safety, navigation, and current topics in telematics. Offered Winter.

Prerequisites: ECE 5700 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

ECE 7740 Medical Imaging Systems Cr. 3

Exposes students to the world of medical and biomedical imaging with emphasis on principles, approaches and applications of each modern imaging modality. Basic knowledge of MATLAB programming language is required. Offered Fall.

Restriction(s): Enrollment is limited to Graduate level students.

Equivalent: BME 7730

ECE 7850 Fiber and Integrated Optics Cr. 4

Discussion of geometric optics and ray propagation in optical fibers. Extension to physical optics and Maxwell's equations. Analysis of mode coupling and graded index fibers. Integrated optical waveguides: dielectric slabs and integrated optic networks. Coupling phenomenon, light sources, and detectors. Photon statistics and their relation to bit error rates. Power budgets, fan-in, and fan-out as applied to data link design. Offered Yearly.

Prerequisite: ECE 5870 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

ECE 7860 Operation and Control of Modern Power Systems Cr. 4

Topics include power system optimal dispatch; power system stability analysis and control; smart grid technologies and applications, covering modeling and control of renewable energy systems; distributed generation; microgrid architecture and control; demand response; energy storage for power grids; grid interface and integration of renewable sources; and electricity market fundamentals. Offered Fall.

Prerequisite: ECE 5430 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

ECE 7990 Directed Study Cr. 1-8

Supervised study and instruction in an advanced topic. Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students.

Repeatable for 12 Credits

ECE 7995 Special Topics in Electrical and Computer Engineering II Cr. 1-4

A consideration of special subject matter in electrical and computer engineering. Topics to be announced in Schedule of Classes . Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students.

Repeatable for 12 Credits

ECE 7996 Research Cr. 1-8

Design, investigation and experimental work on some phase of electrical and computer engineering. Written report required. Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students.

Repeatable for 8 Credits

ECE 8999 Master's Thesis Research and Direction Cr. 1-8

Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students with a class of Candidate Masters.

Repeatable for 8 Credits

ECE 9990 Pre-Doctoral Candidacy Research Cr. 1-8

Research in preparation for doctoral dissertation. Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students.

Repeatable for 12 Credits

ECE 9991 Doctoral Candidate Status I: Dissertation Research and Direction Cr. 7.5

Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students.

ECE 9992 Doctoral Candidate Status II: Dissertation Research and Direction Cr. 7.5

Offered Every Term.

Prerequisite: ECE 9991 with a minimum grade of S

Restriction(s): Enrollment is limited to Graduate level students.

ECE 9993 Doctoral Candidate Status III: Dissertation Research and Direction Cr. 7.5

Offered Every Term.

Prerequisite: ECE 9992 with a minimum grade of S

Restriction(s): Enrollment is limited to Graduate level students.

ECE 9994 Doctoral Candidate Status IV: Dissertation Research and Direction Cr. 7.5

Offered Every Term.

Prerequisite: ECE 9993 with a minimum grade of S

Restriction(s): Enrollment is limited to Graduate level students.

ECE 9995 Candidate Maintenance Status: Doctoral Dissertation Research and Direction Cr. 0

Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students.

Course Material Fees: \$370.26

Repeatable for 0 Credits

ECE 9997 Doctoral Seminar Cr. 1-4

Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students.

Repeatable for 4 Credits

ECO - ECONOMICS

ECO 1000 Survey of Economics Cr. 4

Satisfies General Education Requirement: Social Inquiry, Social Sciences
Scope of economics and the task of the economist in modern society; the market economy, its evolution and development; non-market economies; economic problems and prospects in the contemporary world. Not for ECO major or minor credit. Offered Every Term.

ECO 1400 Economic Inequality Cr. 4

Provides students with a broad survey of economic inequality. Covers conceptual debates on inequality, starting with varying theories that explain inequality. A unit will focus on inequality in the United States and in industrially developed nations, and a unit will focus on the tension between global inequalities as well as the emerging global middle class. Examines the divergent outcomes for the middle and working class in industrially developed (wealthy) nations as well as the growing global middle class, especially from emerging nations such as China and India. Offered Fall, Winter.

ECO 1600 Introduction to Economic Thought Cr. 4

Provides students with a broad historical survey of the field of economics, starting from the pre-industrial era. The course looks at economic ideas starting from the classical thinkers (Smith, Bentham, Malthus, Ricardo, Mill, and Marx) to the emergence of modern classical economics and institutional (Marshall and Veblen). It completes the survey by examining the development of macroeconomics of Keynes and his critics (Hayek, Schumpeter, and Friedman) and presents the modern contest of ideas, culminating with the economic consequences of the 2008 Financial Crisis. Offered Fall, Winter.

ECO 2010 Principles of Microeconomics Cr. 4

Satisfies General Education Requirement: Social Inquiry, Social Sciences
Supply, demand, price at the level of the firm and industry; business institutions and their operation; determinants of wage and salary levels, interest rates, rent, profits, income distribution; public policy in relation to business and labor. Offered Every Term.

ECO 2020 Principles of Macroeconomics Cr. 4

Satisfies General Education Requirement: Social Inquiry, Social Sciences
Determination of national income, consumption and saving, and investment; money, banking and the Federal Reserve; inflation and unemployment; monetary and fiscal policy; economic growth and productivity; the international sector. Offered Every Term.

ECO 2550 U.S. Health Care: Policy and Economics Cr. 4

Provide students with a basic understanding of economics as applied to health, health care, and health policy. Covers economic factors relating to consumer, producer, and government behavior. Emphasis will be placed on analyzing issues currently affecting the U.S. health care system, using an international perspective to inform policy recommendations. Offered Fall, Winter.

ECO 3990 Directed Study Cr. 1

For the student who shows evidence of ability and interest in economic study and who desires opportunity for advanced reading in a special field. Arrange with advisor. Offered Every Term.

Prerequisites: ECO 1000-ZZZZ with a minimum grade of B or ECO 1000-ZZZZ with a minimum grade of B or ECO 1000-ZZZZ with a minimum grade of B

Restriction(s): Enrollment limited to students with a class of Senior; enrollment is limited to students in the Department of Economics; enrollment is limited to students with a major in Economics or Economics Honors.

Repeatable for 2 Credits

ECO 4991 Research in Economics Cr. 3-12

Economic research on an appropriate topic of the student's choice, conducted under faculty supervision. Does not count toward 32-credit requirement for the ECO major. Offered Every Term.

Prerequisites: ECO 1000-ZZZZ with a minimum grade of B or ECO 1000-ZZZZ with a minimum grade of B or ECO 1000-ZZZZ with a minimum grade of B

Restriction(s): Enrollment limited to students with a class of Senior; enrollment is limited to students in the Department of Economics; enrollment is limited to students with a major in Economics or Economics Honors.

Repeatable for 12 Credits

ECO 4995 Venture Capital, Entrepreneurship and Impact Investing Cr. 1

Provides an insider's look at the venture capital industry, entrepreneurship, and social impact investing. Presents a broad overview of the types of background knowledge needed to launch a company, engage in social impact investing, and/or to become a venture capitalist. Participation in this course will help students develop their analytical and decision making skills as well as their presentation skills. The final class project will be an investor pitch contest presented during the last week of class. Offered Yearly.

ECO 4997 Senior Honors Research Cr. 4

Individually arranged meetings with faculty member to discuss research methodology and readings in areas of research selected by instructor. A senior honors essay of a length proportionate to the selected topic will be required. Offered Every Term.

Restriction(s): Enrollment is limited to Undergraduate level students; enrollment limited to students with a class of Senior; enrollment is limited to students in the Department of Economics; enrollment is limited to students with a major in Economics Honors; enrollment limited to students in a Bachelor of Arts degree.

ECO 5000 Intermediate Microeconomics Cr. 4

Theory of the firm and consumer. Analysis of a price system as a means to efficient allocation of productive resources. Offered for undergraduate credit only. Offered Every Term.

Prerequisites: ECO 2010 with a minimum grade of C and MAT 1500-6XXX with a minimum grade of C

ECO 5020 Fundamentals of Economic Analysis I Cr. 4

This course assumes good knowledge of first semester calculus, and teaches additional mathematics necessary for Ph.D. study in economics, and (to a lesser extent) teaches some economic implications; course content includes: matrices, vectors and linear algebra; partial and total derivatives; scalar and vector functions; Jacobian derivative matrices and determinants; implicit function theorem; derivatives of implicit functions with one or more endogenous variables; unconstrained maximization with two or more variables; Lagrangians and constrained maximization; envelope theorem; differential and difference equations, and systems of differential and difference equations. Offered for undergraduate credit only. Offered Fall.

Prerequisites: ECO 5000 with a minimum grade of C and MAT 2010-6XXX with a minimum grade of C

Restriction(s): Enrollment is limited to Undergraduate level students.

ECO 5030 Microeconomic Theory Cr. 4

Theory of choice, theory of cost and production, theory of the competitive form. Price and output in non-competitive markets, general competitive equilibrium and welfare economics. Offered Yearly.

Prerequisites: MAT 2010 with a minimum grade of C- or MAT 5010 with a minimum grade of C- and MAT 2020 with a minimum grade of C- and ECO 5000 with a minimum grade of C- and ECO 5020 with a minimum grade of C-

Restriction(s): Enrollment is limited to Undergraduate level students.

ECO 5050 Intermediate Macroeconomics Cr. 4

Theory of national income determination. National output and income, saving and capital formation. Offered for undergraduate credit only.

Offered Every Term.

Prerequisites: MAT 1500-6XXX with a minimum grade of C and ECO 2020 with a minimum grade of C

Restriction(s): Enrollment is limited to Undergraduate level students.

ECO 5100 Introductory Statistics and Econometrics Cr. 4

Elementary probability theory, discrete and continuous probability distribution, sampling distribution, interval estimation, hypothesis testing, and estimation and inference in simple and multiple regression models. Offered for undergraduate credit only. Offered Every Term.

Prerequisites: ECO 2010 with a minimum grade of C and ECO 2020 with a minimum grade of C and MAT 1500-6XXX with a minimum grade of C

Restriction(s): Enrollment is limited to Undergraduate level students.

ECO 5200 Regulation and Regulated Industries Cr. 4

Transportation economics. Regulation of transportation as an example of public control of business; the rationale for having public regulation, and the analysis of its economic effects; reform of the scope and practice of regulation; public ownership; regulation of occupational and product safety standards and environmental standards. Offered for undergraduate credit only. Offered Yearly.

Prerequisites: ECO 2010 with a minimum grade of C

Restriction(s): Enrollment is limited to Undergraduate level students.

ECO 5210 Market Power and Economic Welfare Cr. 4

Monopoly, oligopoly, and competition in U.S. industry; sources of market power and their effect on prices, profits, and technological progress. Case studies. Selected topics in antitrust policy. Offered for undergraduate credit only. Offered Yearly.

Prerequisites: MAT 1500 with a minimum grade of C or MAT 1800 with a minimum grade of C or MAT 2010 with a minimum grade of C and ECO 2010 with a minimum grade of C and ECO 5000 with a minimum grade of C

Restriction(s): Enrollment is limited to Undergraduate level students.

ECO 5230 Environmental Economics Cr. 4

Externalities as the cause of environmental degradation and climate change. Externality in turn results from the failure of the market to develop prices that reflect the full global cost of production and consumption. The course also pays attention to normative issues.

The population over which the normative issues are defined may include animals, plants and inanimate objects. Behavioral economics, in particular, will be brought to bear on the discussion throughout the course. Offered Fall, Winter.

Prerequisites: ECO 1000 with a minimum grade of D- or ECO 2010 with a minimum grade of D-

ECO 5250 Economic Analysis of Law Cr. 4

Economic analysis of property rights, torts, contracts, criminal law, the law of business organizations and financial markets, and the law of taxation. Economic analysis of litigation; the use of economics and statistics in litigation. Offered for undergraduate credit only. Offered Yearly.

Prerequisites: ECO 2010 with a minimum grade of C

Restriction(s): Enrollment is limited to Undergraduate level students.

ECO 5270 Games of Strategy Cr. 4

Game theory studies how individuals, groups and firms make their decisions strategically when their actions affect each other. Introductory course with emphasis on applications to firms and markets. Standard concepts such as games with sequential moves, simultaneous moves, pure and mixed strategies, uncertainty, and repetition. Special topics include bargaining, strategic innovation, cooperative pricing, contract designs, incentive mechanisms, bidding, and auctions. Students do not need to know calculus to follow the lectures. Offered for undergraduate credit only. Offered Yearly.

Prerequisites: MAT 1500 with a minimum grade of C or MAT 1800 with a minimum grade of C or MAT 2010 with a minimum grade of C and ECO 2010 with a minimum grade of C and ECO 5000 with a minimum grade of C

Restriction(s): Enrollment is limited to Undergraduate level students.

ECO 5300 International Trade Cr. 4

Factors in international relations; patterns of international specialization; balance of international payments; foreign exchange; commercial policy of United States and other countries; foreign investment and economic development; international economic cooperation. Offered for undergraduate credit only. Offered Fall.

Prerequisites: ECO 5000 with a minimum grade of C and ECO 2010 with a minimum grade of C

Restriction(s): Enrollment is limited to Undergraduate level students.

ECO 5310 International Finance Cr. 4

Major policy issues in the field of international finance with emphasis on open economy macroeconomics. Topics include the balance of payments and the foreign exchange market; monetary and fiscal policies in open economies; the floating exchange rate system; international financial markets; and European monetary integration. Offered for undergraduate credit only. Offered Winter.

Prerequisites: MAT 1500 with a minimum grade of C or MAT 1800 with a minimum grade of C and ECO 2020 with a minimum grade of C and ECO 5050 with a minimum grade of C

Restriction(s): Enrollment is limited to Undergraduate level students.

ECO 5400 Labor Economics Cr. 4

Economics of labor markets. Determinants of earnings and methods of compensation, labor supply and demand, effects of taxes and subsidies on labor supply, choices of occupation and level of schooling, promotion and turnover, employment discrimination, economics of crime and punishment, regulation of professions, unions. Offered for undergraduate credit only. Offered Fall, Winter.

Prerequisites: ECO 2010 with a minimum grade of C

Restriction(s): Enrollment is limited to Undergraduate level students; enrollment is limited to students with a major in Labor Studies.

ECO 5480 Economics of Work Cr. 3

Theoretical and empirical treatment of: labor market characteristics; labor demand and supply; issues of race, gender, and age; compensation and pay; issues of health and productivity; bargaining processes and the effects of unions; unemployment and job search; globalization. No economics major or minor credit. Offered Yearly.

Prerequisites: ECO 2010 with a minimum grade of C or ECO 2020 with a minimum grade of C or ECO 1000 with a minimum grade of C

Restriction(s): Enrollment is limited to Undergraduate level students; enrollment limited to students in the BA in Labor Studies program.

ECO 5490 American Labor History Cr. 4

Development of the American labor movement; its behavior in the contemporary scene. Labor's experiments with social, political, legal, and economic institutions. Comparisons with foreign labor movements. Offered for undergraduate credit only. Offered Every Other Year.

Prerequisites: ECO 2010 with a minimum grade of C

Restriction(s): Enrollment is limited to Undergraduate level students.

Equivalent: HIS 5290

ECO 5500 Public Finance Cr. 4

Role of government in a market economy: sources of market failure; public goods and externalities; principles of taxation and expenditures; tax incidence; federal tax structure; selected government expenditure programs. Offered for undergraduate credit only. Offered Fall, Spring/Summer.

Prerequisites: ECO 2010 with a minimum grade of C

Restriction(s): Enrollment is limited to Undergraduate level students.

ECO 5520 State and Local Public Finance Cr. 4

Theory and practice of state and local government taxation and expenditure. Attention devoted to State of Michigan and municipalities in Detroit metropolitan area. Topics include: government organization, voting and mobility models, property and sales taxes, user charges, grants, education expenditure, and economic development. Offered for undergraduate credit only. Offered Yearly.

Prerequisites: ECO 2010 with a minimum grade of C

Restriction(s): Enrollment is limited to Undergraduate level students.

ECO 5550 Economics of Health Care Cr. 4

Allocation of health care resources, with respect to demand and supply of health care. Role of hospitals, physicians, and health insurance; market imperfections and their role in the economics of health care. Offered for undergraduate credit only. Offered Yearly.

Prerequisites: ECO 2010 with a minimum grade of C

ECO 5600 Introduction to Development Economics Cr. 4

National poverty and economic growth viewed from a historical and theoretical perspective; particular emphasis on national and international policies. Offered for undergraduate credit only. Offered Yearly.

Prerequisites: ECO 2010 with a minimum grade of C

Restriction(s): Enrollment is limited to Undergraduate level students.

ECO 5700 Money and Banking Cr. 4

Role of the Federal Reserve System, the commercial banks, and the non-bank public (including financial intermediaries) in determining the money supply; central banking and techniques of monetary control; indicators and targets of monetary policy; and how money affects economic activity. Offered Fall, Winter.

Prerequisites: MAT 1500 with a minimum grade of C or MAT 1800 with a minimum grade of C and ECO 2020 with a minimum grade of C and ECO 5050 with a minimum grade of C

Restriction(s): Enrollment is limited to Undergraduate level students.

ECO 5720 Financial Economics Cr. 4

Fundamentals of investments: investment and financial markets, theoretical models of investment theory including efficient market hypothesis (EMH) and capital asset pricing model (CAPM); characteristics and analysis of stocks, bonds, and portfolios; equity evaluation through financial statements, industry analysis, and macroeconomic analysis; and advanced topics in either derivative assets (futures and options) or international investments. Offered for undergraduate credit only. Offered Winter.

Prerequisites: ECO 2010 with a minimum grade of C and ECO 2020 with a minimum grade of C and ECO 5050 with a minimum grade of C and MAT 1500-6XXX with a minimum grade of C

Restriction(s): Enrollment is limited to Undergraduate level students.

ECO 5800 Urban and Regional Economics Cr. 4

Introduction to the economic foundations of urban problems; land use, housing, poverty, transportation, local public finance; regional industry mix, income, growth and development; the national system of cities and location of firms. Offered for undergraduate credit only. Offered Yearly.

Prerequisites: ECO 2010 with a minimum grade of C

Restriction(s): Enrollment is limited to Undergraduate level students.

Equivalent: UP 5820

ECO 5993 Writing Intensive Course in Economics Cr. 0

Satisfies General Education Requirement: Writing Intensive Competency Disciplinary writing assignments under the direction of a faculty member. Satisfies the University General Education Writing Intensive Course in the Major requirement. Required for all majors. Offered Every Term.

Prerequisites: May be taken concurrently: ECO 5000-9999 with a minimum grade of C-

Restriction(s): Enrollment is limited to Undergraduate level students.

ECO 6000 Price and Allocation Theory Cr. 4

Introduction to the theory of consumer choice and the theory of production, and other selected topics. Primarily for M.A. students and for Ph.D. students who want to review. Offered Fall.

Prerequisite: ECO 5000 with a minimum grade of C and MAT 2010 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate or Undergraduate level students; enrollment limited to students with a class of Junior or Senior.

ECO 6050 Macroeconomics Cr. 4

Determination of national income, unemployment and interest rates; theories of inflation; effectiveness of macroeconomic public policies. Primarily for M.A. students and for Ph.D. students who want to review. No credit after ECO 7050. Offered Winter.

Prerequisite: ECO 5050 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

ECO 6100 Introduction to Econometrics Cr. 4

Basic statistics, basic probability, hypothesis testing, and bivariate and multivariate regression analysis. Estimators studied are least squares, maximum likelihood and generalized least squares. Various model specification issues addressed: omitted variables, extraneous variables, category variables, multicollinearity, heteroscedasticity, and autocorrelation. Offered Fall.

Prerequisite: ECO 5100 and MAT 2010

Restriction(s): Enrollment is limited to Graduate or Undergraduate level students.

ECO 6200 Advanced Regulation and Regulated Industries Cr. 4

Transportation economics. Regulation of transportation as an example of public control of business; the rationale for having public regulation, and the analysis of its economic effects; reform of the scope and practice of regulation; public ownership; regulation of occupational and product safety standards and environmental standards. No credit after ECO 5200. Offered for graduate credit only. Offered Yearly.

Prerequisite: ECO 5000 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

ECO 6210 Advanced Market Power and Economic Welfare Cr. 4

Monopoly, oligopoly, and competition in U.S. industry; sources of market power and their effect on prices, profits, and technological progress. Case studies. Selected topics in antitrust policy. No credit after ECO 5210. Offered for graduate credit only. Offered Yearly.

Prerequisite: ECO 5000 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

ECO 6250 Advanced Economic Analysis of Law Cr. 4

Economic analysis of property rights, torts, contracts, criminal law, the law of business organizations and financial markets, and the law of taxation. Economic analysis of litigation; the use of economics and statistics in litigation. Advanced mathematical analysis of selected topics. No credit after ECO 5250. Offered for graduate credit only. Offered Yearly.

Prerequisite: ECO 5000 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

ECO 6300 Advanced International Trade Cr. 4

Factors in international relations; patterns of international specialization; balance of international payments; foreign exchange; commercial policy of United States and other countries; foreign investment and economic development; international economic cooperation. Advanced mathematical analysis of selected topics. No credit after ECO 5300. Offered for graduate credit only. Offered Yearly.

Prerequisite: ECO 5000 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

ECO 6310 Advanced International Finance Cr. 4

Major policy issues in the field of international finance with emphasis on open economy macroeconomics. Topics include the balance of payments and the foreign exchange market; monetary and fiscal policies in open economies; the floating exchange rate system; international financial markets; and European monetary integration. Advanced mathematical analysis of selected topics. No credit after ECO 5310. Offered for graduate credit only. Offered Yearly.

Prerequisite: ECO 5000 with a minimum grade of C and ECO 5050 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

ECO 6400 Advanced Labor Economics Cr. 4

Economics of labor markets. Determinants of earnings and methods of compensation, labor supply and demand, effects of taxes and subsidies on labor supply, choices of occupation and level of schooling, promotion and turnover, employment discrimination, economics of crime and punishment, regulation of professions, unions. Advanced mathematical analysis of selected topics. No credit after ECO 5400. Offered for graduate credit only. Offered Yearly.

Prerequisite: ECO 5000 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

ECO 6415 Advanced Economics of Race and Gender Cr. 4

Theory and empirical evidence of race and gender differentials in the labor market. Topics include the difference in occupations and earnings, discrimination, poverty, and public policies. Advanced mathematical analysis of selected topics. No credit after ECO 5410. Offered for graduate credit only. Offered Yearly.

Prerequisite: ECO 5000 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

ECO 6420 Labor Relations and Public Policy Cr. 3

Overview of labor force trends; U.S. unionism; management of labor relations; collective bargaining: procedure and substance; bargaining power in the private and public sectors. Comparative trends and principles in industrial relations systems of other societies also examined. Offered for graduate credit only. Offered Fall, Spring/Summer.

Prerequisite: ECO 2010 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

ECO 6455 Discrimination and Fair Housing Cr. 3

Multidisciplinary investigation into the nature, motivations, consequences, and legal/public policy implications of racial/ethnic discrimination in housing and related markets in U.S. metropolitan areas. Offered Intermittently.

Equivalent: AFS 6455, PS 6455, SOC 6455, UP 6455, US 6455

ECO 6480 Advanced Economics of Work Cr. 3

Theoretical and empirical treatment of: labor market characteristics; labor demand and supply; issues of race, gender, and age; compensation and pay; issues of health and productivity; bargaining processes and the effects of unions; unemployment and job search; globalization. Offered for graduate credit only. Offered Yearly.

Prerequisite: ECO 2010 with a minimum grade of C

Restriction(s): Enrollment limited to students in the MA in Employ & Labor Relations program.

ECO 6510 Advanced Public Finance Cr. 4

Role of government in a market economy: sources of market failure—public goods and externalities; principles of taxation and expenditures; tax incidence; federal tax structure; selected government expenditure programs. Advanced mathematical analysis of selected topics. No credit after ECO 5500. Offered for graduate credit only. Offered Yearly.

Prerequisite: ECO 5000 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

ECO 6520 Advanced State and Local Public Finance Cr. 4

Theory and practice of state and local government taxation and expenditure. Attention devoted to State of Michigan and municipalities in Detroit metropolitan area. Topics include: government organization, voting and mobility models, property and sales taxes, user charges, grants, education expenditure, and economic development. Advanced mathematical analysis of selected topics. No credit after ECO 5520. Offered for graduate credit only. Offered Yearly.

Prerequisite: ECO 5000 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

Equivalent: UP 6750

ECO 6550 Advanced Economics of Health Care Cr. 4

Allocation of health care resources, with respect to demand and supply of health care. Roles of hospitals, physicians, and health insurance; market imperfections and their role in the economics of health care. Advanced mathematical analysis of selected topics. No credit after ECO 5550. Offered for graduate credit only. Offered Yearly.

Prerequisite: ECO 5000 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

ECO 6600 Advanced Development Economics Cr. 4

National poverty and economic growth viewed from a historical and theoretical perspective; particular emphasis on national and international policies. Advanced mathematical analysis of selected topics. No credit after ECO 5600. Offered for graduate credit only. Offered Yearly.

Prerequisite: ECO 5000 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

ECO 6650 Regional, State, and Urban Economic Development: Policy and Administration Cr. 3

Examination of regional, state, and local economic development theory, analysis, policy and administration. Offered for graduate credit only. Offered Every Other Year.

Restriction(s): Enrollment is limited to Graduate level students.

Equivalent: PS 6440, UP 6550

ECO 6700 Advanced Money and Banking Cr. 4

Role of the Federal Reserve System, the commercial banks, and the non-bank public (including financial intermediaries) in determining the money supply; central banking and techniques of monetary control; indicators and targets of monetary policy; and how money affects economic activity. Advanced mathematical analysis of selected topics. Offered for graduate credit only. Offered Yearly.

Prerequisite: ECO 2020 with a minimum grade of C and ECO 5050 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

ECO 6800 Advanced Urban and Regional Economics Cr. 4

Introduction to the economic foundations of urban problems; land use, housing, poverty, transportation, local public finance; regional industry mix, income, growth and development; the national system of cities and location of firms. Advanced mathematical analysis of selected topics. No credit after ECO 5800. Offered for graduate credit only. Offered Yearly.

Prerequisite: ECO 5000 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

ECO 7000 Microeconomic Theory I Cr. 4

Theory of choice; theory of cost and production; theory of the competitive firm. Price and output in non-competitive markets. General competitive equilibrium and welfare economics. Offered Winter.

Prerequisite: ECO 5000 with a minimum grade of C and ECO 7020 with a minimum grade of C and MAT 2010 with a minimum grade of C and MAT 2020 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students; enrollment is limited to students with a major in Economics.

ECO 7010 Microeconomic Theory II Cr. 4

Continuation of ECO 7000. Includes general equilibrium analysis and game theory. Offered Fall.

Prerequisite: ECO 7000 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students; enrollment is limited to students with a major in Economics.

ECO 7020 Fundamentals of Economic Analysis I Cr. 4

This course assumes sound knowledge of first and second semester calculus, and teaches additional mathematics necessary for Ph.D. study in economics, and covers additional mathematics necessary for Ph.D. study in mathematics, and to a lesser extent some economic implications. Course content includes: matrices, vectors and linear algebra; partial and total derivatives; scalar and vector functions; Jacobian derivative matrices and determinants; implicit function theorem; derivatives of implicit functions with one or more endogenous variables; unconstrained maximization with two or more variables; Lagrangians and constrained maximization; envelope theorem; differential and difference equations, and systems of differential and difference equations. Offered for graduate credit only. Offered Fall.

Prerequisite: MAT 2010 with a minimum grade of C and ECO 5000 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students; enrollment is limited to students with a major in Economics.

ECO 7021 Fundamentals of Economic Analysis II Cr. 4

Mathematical methods specific to macroeconomics and econometrics. Applications of matrix operations, distribution functions, estimation methods, difference equations, differential equations, inter-temporal optimization, calculus of variations, control theory. Offered Fall.

Prerequisite: MAT 2020 with a minimum grade of C and ECO 5000 with a minimum grade of C

Corequisite: ECO 7020

Restriction(s): Enrollment is limited to Graduate level students; enrollment is limited to students with a major in Economics.

ECO 7050 Macroeconomic Theory I Cr. 4

Determination of national income, employment, interest rates and the price level; static and dynamic models; cycle and growth models; classic, Keynesian and neo-Keynesian models. Offered Winter.

Prerequisite: ECO 5050 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students; enrollment is limited to students with a major in Economics.

ECO 7060 Macroeconomic Theory II Cr. 4

Mathematical and statistical methods: differential and difference analysis. Intertemporal economic theory: the household, the firm, and economic growth. Overlapping generations models and the Ricardian theory of government finance. Theories of the business cycle: real business cycle models, Keynesian and New Classical theories of the business cycle. Offered Fall.

Prerequisite: ECO 7050 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students; enrollment is limited to students with a major in Economics.

ECO 7100 Econometrics I Cr. 4

Probability and statistics: moment generating functions, common families of statistical distributions, multiple random variables and properties of a random sample. Estimation and hypothesis testing: method of moments, generalized method of moments, maximum likelihood estimators, instrumental variable estimators, Bayes estimators, likelihood ratio tests, finite sample properties and asymptotic properties of OLS. Offered Fall.

Prerequisite: ECO 6100 with a minimum grade of C and ECO 7020 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students; enrollment is limited to students with a major in Economics.

ECO 7110 Econometrics II Cr. 4

Modeling and estimation: generalized least squares, panel data models (fixed effects and random effects), system of equations (endogeneity, identification), models with discrete dependent variables (probit, logit), models with limited dependent variables (truncation, censoring), stationary time-series (ARMA), vector-autoregression (VAR, VMA), non-stationary time-series (unit roots, cointegration). Offered Winter.

Prerequisite: ECO 7100 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students; enrollment is limited to students with a major in Economics.

ECO 7120 Econometrics III Cr. 4

Advanced economic techniques in microeconomics and macroeconomics. In the first half of the course, emphasis on specification, estimation, interpretation, and testing of microeconomic models. The second half will cover statistical models for the analysis of economic time series data, with applications in macroeconomics and finance. Offered Yearly.

Prerequisite: ECO 7100 with a minimum grade of C and ECO 7110 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students; enrollment is limited to students with a major in Economics.

ECO 7200 Industrial Organization I Cr. 4

Theories of competition and market power. Topics include concentration, scale economies, product differentiation, entry barriers, collusion, mergers, price discrimination, information, and advertising. Offered Every Other Year.

Prerequisite: ECO 6000 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students; enrollment is limited to students with a major in Economics.

ECO 7210 Industrial Organization II Cr. 4

Economic analysis of antitrust policy and public regulation of industry. Rationale for regulation and mandates of various regulatory agencies. Problems in public utility rate-making. Misallocations induced by regulation. Role of competition in regulated industries. Offered Every Other Year.

Prerequisite: ECO 6000 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students; enrollment is limited to students with a major in Economics.

ECO 7300 International Trade Theory Cr. 4

Classical and modern models of the determinants of international trade and their empirical verification; impact of trade on earnings of production factors; economic analysis of various trade policy instruments; strategic trade policy; economic analysis of international trade rules and institutions; political economy of trade policy. Offered Every Other Year.

Prerequisite: ECO 6000 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students; enrollment is limited to students with a major in Economics.

ECO 7310 International Monetary Theory Cr. 4

Foreign exchange rate and balance of payments adjustment theory under alternative exchange rate regimes; stabilization policies in open economies; financial capital movements; monetary unions; economic growth and the balance of payments. Offered Every Other Year.

Prerequisite: ECO 6050 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students; enrollment is limited to students with a major in Economics.

ECO 7400 Labor Economics and Human Resources Cr. 4

Labor force participation and composition; factors affecting wage levels (money and real) and wage structure. Theoretical and empirical analyses of occupational choice, labor mobility, promotion, turnover, unemployment, the effects of taxation, retirement and income inequality. Offered Every Other Year.

Prerequisite: ECO 6000 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students; enrollment is limited to students with a major in Economics.

ECO 7410 Economics of Human Resources Cr. 4

Theoretical and empirical analyses of labor supply and family allocation of time; the return to education; role of general and firm-specific human capital and job mobility in wage growth over a career; race and gender differences in the labor market; intergenerational transfers and mobility. Offered Every Other Year.

Prerequisite: ECO 6000 with a minimum grade of C and ECO 6100 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students; enrollment is limited to students with a major in Economics.

ECO 7550 Economics of Health Care I Cr. 4

Basic introduction to health care economics including allocation of health care resources, economics of information, and the role of advertising. No credit after ECO 5550. Offered Every Other Winter.

Prerequisite: ECO 6000 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students; enrollment is limited to students with a major in Economics.

ECO 7560 Economics of Health Care II Cr. 4

Particular roles of hospitals, physicians, and health insurance in the economy. Analysis of government policies. No credit after ECO 5550. Offered Every Other Year.

Prerequisite: ECO 6000 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students; enrollment is limited to students with a major in Economics.

ECO 7996 Research in Economics Cr. 2-8

Open to qualified students who desire opportunity for research and directed study. May be conducted as seminar. Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students; enrollment is limited to students with a major in Economics.

Repeatable for 16 Credits

ECO 9990 Pre-Doctoral Candidacy Research Cr. 1-8

Research in preparation for doctoral dissertation. Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students.

Repeatable for 12 Credits

ECO 9991 Doctoral Candidate Status I: Dissertation Research and Direction Cr. 7.5

Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students.

ECO 9992 Doctoral Candidate Status II: Dissertation Research and Direction Cr. 7.5

Offered Every Term.

Prerequisite: ECO 9991 with a minimum grade of S

Restriction(s): Enrollment is limited to Graduate level students.

ECO 9993 Doctoral Candidate Status III: Dissertation Research and Direction Cr. 7.5

Offered Every Term.

Prerequisite: ECO 9992 with a minimum grade of S

Restriction(s): Enrollment is limited to Graduate level students.

ECO 9994 Doctoral Candidate Status IV: Dissertation Research and Direction Cr. 7.5

Offered Every Term.

Prerequisite: ECO 9993 with a minimum grade of S

Restriction(s): Enrollment is limited to Graduate level students.

ECO 9995 Candidate Maintenance Status: Doctoral Dissertation Research and Direction Cr. 0

Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students.

Course Material Fees: \$370.26

Repeatable for 0 Credits

ED - EDUCATION

ED 3990 Directed Study Cr. 1-6

Offered Every Term.

Repeatable for 6 Credits

ED 5998 Field Studies Cr. 1-8

Supervised professional study in field settings. Offered Every Term.

Repeatable for 8 Credits

ED 7990 Directed Study Cr. 1-8

Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students.

Repeatable for 8 Credits

ED 7996 Directed Research Cr. 1-8

Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students.

Repeatable for 16 Credits

ED 7998 Field Studies Cr. 1-8

Supervised professional study in field situations. Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students.

Repeatable for 16 Credits

ED 7999 Terminal Master's Seminar and Essay or Project Cr. 3

Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students with a class of Candidate Masters.

ED 8999 Master's Thesis Research and Seminar Cr. 1-8

Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students with a class of Candidate Masters.

Repeatable for 8 Credits

ED 9989 Doctoral Dissertation Research and Direction Cr. 1-16

Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students.

Repeatable for 30 Credits

ED 9990 Pre-Doctoral Candidacy Research Cr. 1-8

Research in preparation for doctoral dissertation. Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students.

Repeatable for 12 Credits

ED 9991 Doctoral Candidate Status I: Dissertation Research and Direction Cr. 7.5

Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students with a class of Doctoral Candidate.

ED 9992 Doctoral Candidate Status II: Dissertation Research and Direction Cr. 7.5

Offered Every Term.

Prerequisite: ED 9991 with a minimum grade of S

Restriction(s): Enrollment is limited to Graduate level students.

ED 9993 Doctoral Candidate Status III: Dissertation Research and Direction Cr. 7.5

Offered Every Term.

Prerequisite: ED 9992 with a minimum grade of S

Restriction(s): Enrollment is limited to Graduate level students.

ED 9994 Doctoral Candidate Status IV: Dissertation Research and Direction Cr. 7.5

Offered Every Term.

Prerequisite: ED 9993 with a minimum grade of S

Restriction(s): Enrollment is limited to Graduate level students.

ED 9995 Candidate Maintenance Status: Doctoral Dissertation Research and Direction Cr. 0

Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students.

Course Material Fees: \$370.26

Repeatable for 0 Credits

EDA - EDUCATIONAL ADMINISTRATION

EDA 7600 The Structure of American Education Cr. 2

Major organizational, financial, administrative, legal and extra-legal problems affecting public education in the United States. Role of the educator in effecting change. Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students.

EDA 7625 Leadership, Administration and the Principalship Cr. 4

Provides a conceptual framework of the administrative process; examines interrelationships between the person, the job, the organizational setting, and the wider social context of education; examines the ways in which political, social and economic factors influence administrative decision making and leadership. Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students.

EDA 7640 The Elementary School Principalship Cr. 4

For experienced teachers and administrators entering the field of elementary school administration. Research findings and sources of information in the field. The principal's role in instructional leadership. A concurrent field experience is required with the lecture component of this course; specifications are provided in the course syllabus. Offered Winter, Spring/Summer.

Restriction(s): Enrollment is limited to Graduate level students.

EDA 7650 Secondary School Administration Cr. 4

Organization and administration of middle, junior and senior high schools. Analysis of administrative problems relating to curriculum improvement, staff personnel, guidance, instruction, school-community relations, and student activities. A concurrent field experience is required with the lecture component of this course; specifications are provided in the course syllabus. Offered Fall, Spring/Summer.

Restriction(s): Enrollment is limited to Graduate level students.

EDA 7660 Administrative Leadership in School-Community Relations and Public Relations Cr. 3

Relationships between the school and the community; special reference to social change, community needs and the total school program; demographic and public relations techniques for school improvement, program development in special area, and millage campaigns in the context of the structure, function, and organization of the total educational system in a multicultural and pluralistic society. Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students.

EDA 7670 Economic Issues in Education Cr. 4

Economic issues in education at the local, intermediate, state, and federal levels. Offered Winter, Spring/Summer.

Restriction(s): Enrollment is limited to Graduate level students.

EDA 7675 Public School Finance and Budgeting Cr. 4

Elementary and secondary public school finance and budgeting: legal foundations of school funding, how revenue is raised and distributed by states, the ways resources are allocated at the local district and school levels. Offered Fall, Winter.

Restriction(s): Enrollment is limited to Graduate level students.

EDA 7690 Introduction to Michigan School Law Cr. 4

Constitutional and legal factors affecting Michigan public education. Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students.

EDA 7800 Administration and Supervision of Special Education Cr. 4

Professional problems; standards and procedures; references to history, development, philosophy, legal provisions, rules and regulations; major developments and trends at federal, state and local levels; services of other organizations and agencies. Offered Fall.

Restriction(s): Enrollment is limited to Graduate level students.

EDA 7810 Michigan Special Education Law Cr. 4

Implications of statutes and regulations undergirding the education of the handicapped; educator's role in implementing, monitoring and influencing state and federal mandates for special education. Offered Winter.

Prerequisite: EDA 7800 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

EDA 7820 Emergent Policies in Special Education Administration Cr. 2

Discussion of research and literature relating to changing and emergent policies. Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students.

EDA 7830 Practicum in Special Education Administration and Supervision Cr. 3-6

Supervised field-based experiences or individualized and contracted plan of supervised field study for special education administrators, curriculum resource consultants, supervisors, administrative consultants, and project directors. Multi-level practicum sites arranged. Offered Every Term.

Prerequisite: EDA 7800 with a minimum grade of C and EDA 7810 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

Repeatable for 6 Credits

EDA 8620 School Personnel Administration Cr. 4

Analysis of the personnel function in educational administration. Offered Fall, Spring/Summer.

Restriction(s): Enrollment is limited to Graduate level students.

EDA 8630 Supervision Cr. 4

Basic issues in motivation, job satisfaction, and goal attainment in educational and human service organizations. Establishing productive supervisor/staff relations. Monitoring employee performance. Offered Fall, Winter.

Restriction(s): Enrollment is limited to Graduate level students.

EDA 8650 Staff Development and School Improvement Cr. 2-6

A clinical experience in planning, design, and implementation of in-service and of staff development programs. Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students.

Repeatable for 6 Credits

EDA 8710 Readings in General Administration Cr. 4

Directed readings in the principles underlying administration in education, government, business and social agencies and other major areas. Offered Winter.

Restriction(s): Enrollment is limited to Graduate level students.

EDA 8990 Internship in Administration Cr. 1-8

Supervised experience in administration of public education, government, business, and social agencies. Internship in cooperating school system. Includes seminar. Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students.

Repeatable for 8 Credits

EDA 9790 Doctoral Seminar in Educational Administration Cr. 3

Seminar, lecture, discussion. Purposes of education as defined in federal and state constitutions, statutes and administrative rules; interpretation of policy statements of organizations and commissions. Role of the educational leader in our society. Offered Winter.

Restriction(s): Enrollment is limited to Graduate level students.

EDP - EDUCATIONAL PSYCHOLOGY

EDP 1000 Psychology of Human Happiness Cr. 3

Teaches students the underlying science and psychology of living a more satisfying and fulfilling life. This includes teaching students how to apply cutting edge findings in psychological science in their own personal and professional lives. Offered Every Term.

EDP 3101 Introduction to Applied Behavior Analysis Cr. 4

Students will become familiar with techniques used in implementing Applied Behavior Analysis with people with special needs including Autism. Offered Fall.

Prerequisites: May be taken concurrently: EDP 3104

EDP 3102 Techniques of Applied Behavior Analysis Cr. 4

Students will expand their knowledge of techniques used in implementing Applied Behavior Analysis with people with special needs including Autism. Advanced topics of Behavior Analysis will be taught. Offered Winter.

Prerequisites: May be taken concurrently: EDP 3105 and EDP 3101 with a minimum grade of D-

EDP 3103 Applied Behavior Analysis Assessment and Treatment Planning Cr. 4

Students will learn various assessment and treatment planning techniques utilized in Applied Behavior Analysis. Offered Spring/Summer.

Prerequisites: EDP 3102 with a minimum grade of D- and May be taken concurrently: EDP 3106

EDP 3104 Field Experience in Applied Behavior Analysis I Cr. 2

Accompanies in EDP 3101 - Introduction to Applied Behavior Analysis and exposes students to observation experiences of working with persons with Autism. Offered Fall.

Prerequisites: May be taken concurrently: EDP 3101

EDP 3105 Field Experience in Applied Behavior Analysis II Cr. 2

Accompanies EDP 3102 - Applied Behavior Analysis 2 and provides students beginning opportunities to work within the ABA model with persons with Autism. Offered Winter.

Prerequisites: May be taken concurrently: EDP 3102

EDP 3106 Field Experience in Applied Behavior Analysis III Cr. 2

Accompanies EDP 3103 - Applied Behavior Analysis Assessment and Treatment Planning and provides students increasing independence in assessing and treating persons with Autism within the ABA model. Offered Spring/Summer.

Prerequisites: May be taken concurrently: EDP 3103

EDP 3310 Educational Psychology Cr. 3

Introductory course in educational psychology. Topics include, but are not limited to: child and adolescent development, cognitive and behavioral learning theories, information processing, motivation and evaluation. Includes study of exceptional children and those with cultural differences. Offered Yearly.

Restriction(s): Enrollment limited to students in the College of Education.

EDP 5450 Child Psychology Cr. 2-3

Basic concepts, research findings and problems regarding child, pre-adolescent and early adolescent developmental needs as they apply to school and home environments; includes study of exceptional children and those with cultural differences. Offered Every Term.

Restriction(s): Enrollment limited to students in the College of Education.

EDP 5480 Adolescent Psychology Cr. 2-3

Basic concepts, research findings and problems regarding early adolescent and adolescent developmental needs as they apply to school and home environments; includes study of exceptional children and those with cultural differences. Offered Every Term.

Restriction(s): Enrollment limited to students in the College of Education.

EDP 6210 Foundations of Educational Psychology Cr. 3

Introduction to current issues in educational psychology. Topics include, but are not limited to: child and adolescent development, learning, motivation, information processing and evaluation. Includes study of the exceptional child and those with cultural differences. Offered Fall, Winter.

EDP 7101 Foundations of Applied Behavior Analysis Cr. 4

Principles and concepts of Applied Behavior Analysis (ABA); historical perspectives, fundamental vocabulary, philosophy, and methodology of the science of behavior management. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate level students.

EDP 7102 Assessment Techniques in Applied Behavior Analysis Cr. 4

Overview of assessment techniques used in behavioral intervention planning, functional assessments, functional assessment interview, descriptive and functional analysis, data collection and interpretation, preference assessment, and interpretation of evaluation tools. Offered Yearly.

Prerequisite: EDP 7101 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

EDP 7103 Applied Behavior Analysis Treatment Planning Cr. 4

Techniques used in behavioral intervention planning, data collection, interpretation of assessments, development of goals and objectives, overview and application of treatment interventions, management, supervision, and team planning. Offered Yearly.

Prerequisite: EDP 7102 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

EDP 7104 Research Methods in Applied Behavior Analysis Cr. 3

Overview of research method techniques, theoretical foundations of empirical research, principles of the scientific method, experimental designs, analysis of research designs, research protocol, and formation of research hypothesis. Primary focus on single-case designs. Offered Yearly.

Prerequisite: EDP 7102 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

EDP 7105 Ethical Practice in Applied Behavior Analysis Cr. 3

Responsibility, values, ethics, and practice principles of the field of behavior analysis. Offered Yearly.

Prerequisite: EDP 7102 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

EDP 7106 Field Experience in Applied Behavior Analysis I Cr. 2

Students spend supervised time in the field practicing skills learned in the Board Certified Behavior Analyst (BCBA) course sequence. Students work directly with multiple children using a variety of applied behavior analysis techniques. Offered Yearly.

Prerequisite: EDP 7101 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

EDP 7107 Field Experience in Applied Behavior Analysis II Cr. 2

Students will spend supervised time in the field practicing skills learned in the BCBA (Board Certified Behavior Analyst) course sequence. Students will work directly with multiple clients using a variety of Applied Behavior Analysis techniques. Specific focus on supervised one on one behavioral intervention work with children. Offered Spring/Summer.

Prerequisite: EDP 7102 (may be taken concurrently) with a minimum grade of C and EDP 7104 (may be taken concurrently) with a minimum grade of C and EDP 7106 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

EDP 7108 Field Experience in Applied Behavior Analysis III Cr. 2

Students will spend supervised time in the field practicing skills learned in the BCBA (Board Certified Behavior Analyst) course sequence. Students will work directly with multiple clients using a variety of Applied Behavior Analysis techniques. Specific focus on supervised one on one behavioral intervention work with children. Offered Fall.

Prerequisite: EDP 7107 with a minimum grade of C

Corequisite: EDP 7103

Restriction(s): Enrollment is limited to Graduate level students.

EDP 7109 Field Experience in Applied Behavior Analysis IV Cr. 2

Students will spend supervised time in the field practicing skills learned in the BCBA (Board Certified Behavior Analyst) course sequence. Students will work directly with multiple clients and staff using a variety of Applied Behavior Analysis techniques. Students will begin to be independent in their training and provide supervision to parents and technicians with feedback from their site supervisor. They also begin to focus on behavior analytic techniques targeted toward the caregivers and coordination of care with outside providers. Offered Winter.

Prerequisite: EDP 7108 with a minimum grade of C

Corequisite: EDP 7111

Restriction(s): Enrollment is limited to Graduate level students.

EDP 7110 Field Experience in Applied Behavior Analysis V Cr. 2

Students will spend supervised time in the field practicing skills learned in the BCBA (Board Certified Behavior Analyst) course sequence. Students will work directly with multiple clients and staff using a variety of Applied Behavior Analysis techniques. The highest level of independent behavioral intervention work including managing all necessary assessment, treatment, case management, and intervention training and supervision of parents and technicians is expected in this semester. Offered Winter.

Prerequisite: EDP 7109 with a minimum grade of C

Corequisite: EDP 7105

Restriction(s): Enrollment is limited to Graduate level students.

EDP 7111 Advanced Applied Behavior Analysis Treatment Planning Cr. 4

Overview of research method techniques, theoretical foundations of empirical research, principles of the scientific method, experimental designs, analysis of research designs, research protocol, and formation of research hypothesis. Primary focus on single-case designs. Offered Spring/Summer.

Prerequisite: EDP 7103 with a minimum grade of C

Corequisite: EDP 7109

Restriction(s): Enrollment is limited to Graduate level students.

EDP 7190 Couples Therapy Cr. 3

An introduction to the research, theories, skills and assessments related to couples therapy. Offered Fall.

Restriction(s): Enrollment is limited to Graduate level students; enrollment is limited to students with a major in Counseling Psychology or School and Community Psychologist; enrollment limited to students in a Education Specialist Cert or Master of Arts degrees.

EDP 7200 Systemic Theories and Family Therapy Cr. 3

Survey of systemic theories and family systems therapy. Offered Winter.

Restriction(s): Enrollment is limited to Graduate level students.

EDP 7220 Psychotherapy with Children and Adolescents Cr. 4

Theory of psychotherapy, including stages of therapy, issues of therapy, and techniques of therapy with children and adolescents. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate level students; enrollment is limited to students with a major in Counseling Psychology or School and Community Psychologist; enrollment limited to students in a Education Specialist Cert or Master of Arts degrees.

EDP 7240 Systems of Psychotherapy Cr. 3

Survey and synthesis of leading systems of psychotherapies and interventions. Offered Winter.

Restriction(s): Enrollment is limited to Graduate level students; enrollment is limited to students with a major in Counseling Psychology or School and Community Psychologist; enrollment limited to students in a Education Specialist Cert or Master of Arts degrees.

EDP 7260 School-Based Consultation and Intervention Cr. 3

Consultation; academic and psychotherapeutic interventions. Emphasis on practical skills needed to work directly or indirectly with individuals and groups in the school setting. Offered Winter.

Prerequisite: EDP 7220 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

EDP 7300 Ethics, Standards, and the Practice of Psychology Cr. 4

Legal, ethical, and professional issues confronting the practitioner. Offered Fall.

Restriction(s): Enrollment is limited to Graduate level students; enrollment is limited to students with a major in School and Community Psychologist; enrollment limited to students in a Education Specialist Cert or Master of Arts degrees.

EDP 7310 Psychology of Learning Across Development Cr. 3

Course blends a selection of human development and learning theories and concepts; emphasizes application to various professional contexts, e.g., community, health, business, school, and other organizational settings; focus is on late adolescence (ages 18-22) and adulthood. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate level students.

Equivalent: HE 7310

EDP 7350 The Learning Process Cr. 2-3

Substantive issues involved in learning as they relate to school practice. Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students.

EDP 7370 Adult Psychopathology Cr. 3

Psychopathology of adulthood; mental disorders, treatment and diagnosis. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate level students.

EDP 7400 Foundations of Social Psychology Cr. 3

Systematic study of social psychology; implications for research and applied settings. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate level students.

EDP 7410 Human Developmental Psychology Cr. 3-4

Survey of research from psychoanalytic and learning viewpoints on human development from birth to adulthood. Emphasis on school environment and community psychology practice. Offered Fall, Winter.

Restriction(s): Enrollment is limited to Graduate level students.

EDP 7420 Introduction to Behavioral Psychology Cr. 4

Basic principles and theories of behavioral psychology. Theoretical aspects of both operant and respondent conditioning. Offered Fall.

Restriction(s): Enrollment is limited to Graduate level students.

EDP 7430 Applications I: Behavioral Psychology and Social Learning Cr. 4

Behavioral techniques used in dealing with the social behavior of both groups and individuals. Offered Winter.

Restriction(s): Enrollment is limited to Graduate level students.

EDP 7480 Psychological Tests and Measurement Cr. 3

Overview of psychometric theory and test construction. Methods of assessing various areas of psychological functioning including intelligence or cognitive abilities, achievement, aptitude, personality functioning and vocational interests. No credit after EDP 7490. Offered Fall, Spring/Summer.

Restriction(s): Enrollment is limited to Graduate level students.

Course Material Fees: \$25

EDP 7490 Psychological Evaluation I Cr. 1-3

History of testing, psychometric theory, and test construction concepts in depth. Students apply these concepts in administration, scoring, and interpretation of standardized measures of academic functioning. No credit after EDP 7480. Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students; enrollment is limited to students with a major in Counseling Psychology or School and Community Psycholog.

Course Material Fees: \$100

EDP 7520 Professional Ethics and Standards for Psychologists Cr. 3

An overview of scientific and professional ethics and standards related to the practice of psychology. Offered Winter.

Restriction(s): Enrollment is limited to Graduate level students; enrollment is limited to students with a major in Counseling Psychology or School and Community Psycholog; enrollment limited to students in a Education Specialist Cert or Master of Arts degrees.

EDP 7561 Assessment of Cognitive Functioning Cr. 4

Theory, administration, scoring use, and interpretation of objective assessments of intelligence, achievement, perceptual function, and personality. Eight full administrations of one of the assessments: Binet, Wechsler, Bayley or McCarthy Scales. Offered Winter.

Restriction(s): Enrollment is limited to Graduate level students; enrollment is limited to students with a major, minor, or concentration in Counseling Psychology or School and Community Psycholog; enrollment limited to students in a Education Specialist Cert or Master of Arts degrees.

Course Material Fees: \$180

EDP 7562 Assessment of Personality and Social-emotional Functioning Cr. 4

Theory of personality development; administration, scoring, and interpretation of personality and social-emotional assessments; data integration and report writing. Offered Fall.

Prerequisite: EDP 7490 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students; enrollment is limited to students with a major, minor, or concentration in Counseling Psychology or School and Community Psycholog.

Course Material Fees: \$75

EDP 7563 Assessment of Academic Achievement Cr. 3

Students will administer, score, and interpret various academic achievement measures, integrate data and write instruction-driven reports, and communicate test results verbally. Offered Spring/Summer.

Restriction(s): Enrollment is limited to Graduate level students; enrollment is limited to students with a major in School and Community Psycholog.

EDP 7564 Assessment and Intervention for Academic Learning Difficulties Cr. 4

Students will learn about typical development of academic skills, historical and current methods of Specific Learning Disabilities evaluation, and linking academic assessment data to academic interventions for all levels of learning difficulties; emphasis on reading. Offered Fall.

Restriction(s): Enrollment is limited to Graduate level students.

Course Material Fees: \$125

EDP 7610 Child and Adolescent Psychopathology Cr. 3

Study of theories of psychopathology in children and adolescents and the application to these theories to practice. Differential diagnosis using currently acceptable classification systems. Offered Winter.

Restriction(s): Enrollment is limited to Graduate level students; enrollment is limited to students with a major in Counseling Psychology or School and Community Psycholog; enrollment limited to students in a Education Specialist Cert or Master of Arts degrees.

EDP 7996 Research in Educational Psychology Cr. 1-8

Offered Yearly.

Restriction(s): Enrollment is limited to Graduate level students.

Repeatable for 8 Credits

EDP 8210 Fundamental Studies in Educational Psychology I: Learning Cr. 3

Issues and theories relevant to learning, perception, cognition, and motivation, as well as trends in research pertinent to the application of learning theory in education and in clinical practice. Offered Fall.

Restriction(s): Enrollment is limited to Graduate level students; enrollment is limited to students with a major in Educational Psychology; enrollment limited to students in a Doctor of Education or Doctor of Philosophy degrees.

EDP 8230 Fundamental Studies in Educational Psychology II: Development Cr. 3

Contemporary theories and research in developmental psychology pertaining to research and practice in clinical and educational settings. Offered Fall.

Restriction(s): Enrollment is limited to Graduate level students; enrollment is limited to students with a major in Educational Psychology; enrollment limited to students in a Doctor of Education or Doctor of Philosophy degrees.

EDP 8250 Fundamental Studies in Educational Psychology IV Cr. 3-9

Advanced study of a specific area in psychology with application to educational practice. Topics to be announced in Schedule of Classes . Offered Winter.

Restriction(s): Enrollment is limited to Graduate level students; enrollment is limited to students with a major in Educational Psychology; enrollment limited to students in a Doctor of Education or Doctor of Philosophy degrees.

Repeatable for 9 Credits

EDP 8318 Integrated Assessment Practicum Cr. 3

Building on prior assessment courses, in this practicum experience students will learn to integrate across assessment practices in the cognitive, visual-motor, adaptive behavior, academic achievement, and social-emotional-behavioral and personality domains. Emphasis will be on conceptualizing and conducting individual cases involving a variety of psycho-educational difficulties. Offered Fall.

Prerequisite: EDP 7563 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

Course Material Fees: \$100

EDP 8319 Pre-practicum in Clinical Procedures Cr. 1-8

Opportunity to provide psychological services (e.g., psychotherapy) to clients under supervision. Offered Winter.

Prerequisite: EDP 7240 (may be taken concurrently) with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students; enrollment is limited to students with a major in Counseling Psychology.

Repeatable for 8 Credits

EDP 8320 Internship in Clinical Procedures I Cr. 1-8

Practicum in one of the organized health care settings cooperating with the University. Psychotherapy and psychological assessment with supervision of not less than two hours per week by a licensed psychologist at the cooperating site. Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students; enrollment is limited to students with a major in Counseling Psychology or School and Community Psycholog; enrollment limited to students in a Education Specialist Cert or Master of Arts degrees.

Repeatable for 8 Credits

EDP 8330 Practicum/Field Experience in School Psychology Cr. 1-8

Internship as a school psychologist in an approved school with school-age pupils. Interns under supervision of person holding Michigan School Psychologist Certificate. Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students; enrollment is limited to students with a major in School and Community Psychology; enrollment limited to students in a Education Specialist Cert or Master of Arts degrees.

Repeatable for 8 Credits

EDP 8360 Internship in School Psychology Cr. 1-8

Advanced internship as school psychologist for those holding a Preliminary School Psychologist Certificate. Internship in an approved school with school-age pupils; supervision by University faculty and person with Michigan School Psychologist Certificate. Offered Every Term.

Prerequisite: EDP 8330 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

Repeatable for 8 Credits

EDP 9000 Doctoral Seminar in Counseling Psychology Cr. 3

The primary aim of this course is to offer a comprehensive review of counseling psychology as it relates to clinical practice, training and supervision, research, and advocacy. Offered Fall.

Restriction(s): Enrollment is limited to Graduate level students.

EDP 9310 Doctoral Seminar in Educational Psychology Cr. 3

An examination of psychological concepts relevant to the development and carrying forward of the work of the schools. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate level students.

EDP 9319 Advanced Practicum in Clinical Procedures Cr. 1-8

Practicum on campus or with a cooperating sites emphasizing advanced level skills in psychotherapy and psychological assessment, supervised a Licensed Psychologist and/or university faculty/staff. Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students; enrollment is limited to students with a major, minor, or concentration in Educational Psychology; enrollment limited to students in a Doctor of Education or Doctor of Philosophy degrees.

Repeatable for 8 Credits

EDP 9320 Internship in Clinical Procedures Cr. 1-8

Placement as a pre-doctoral psychology intern in appropriate organized health care setting under the supervision of a licensed psychologist. Offered Every Term.

Prerequisite: EDP 8320 with a minimum grade of C or EDP 8330 with a minimum grade of C or EDP 8340 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

Repeatable for 8 Credits

EDS - EDUCATIONAL SOCIOLOGY

EDS 9620 Doctoral Seminar in Educational Sociology Cr. 3

Basic concepts of sociology applied to contemporary education. Offered
Yearly.

Restriction(s): Enrollment is limited to Graduate level students.

EED - ENGLISH EDUCATION

EED 5200 Methods of Teaching English: Grades 7-12 Cr. 3

Introduction to the purposes and methods of teaching English composition and literature in grades seven through twelve. Offered Every Term.

Restriction(s): Enrollment limited to students in the College of Education.

EED 6120 English Composition in Secondary Schools Cr. 3

Analysis of modes of writing; relationship of grammar and composition; integration with literature and reading; approaches to group and individualized instruction; relation of composition to perception, cognition, critical thinking, motivation, and self-awareness. Offered Fall, Winter.

Restriction(s): Enrollment limited to students in the College of Education.

EED 6210 Language, Literacy, and Learning Cr. 3

Teaching of language, grammar, and usage in English language arts classrooms, based in sociocultural and sociolinguistic approaches to teaching literacy and language. Offered Fall, Winter.

Restriction(s): Enrollment limited to students in the College of Education.

EED 6310 Young Adult Literature Cr. 3

Standards for evaluating young adult literature. Selection of literature for individual students in relation to interest and reading ability. Use of classroom collections. Techniques for helping students read poetry, drama and fiction. Offered Every Term.

Equivalent: INF 6530

EED 6330 Teaching Literature in Secondary Schools Cr. 3

Structure of poetry, fiction and drama in relation to aesthetic, social, and psychological needs of secondary school students. Relationship of teaching methods to curriculum patterns. Offered Every Term.

Restriction(s): Enrollment limited to students in the College of Education.

EER - EDUCATIONAL EVALUATION AND RESEARCH

EER 1501 Quantitative and Qualitative Methodology Cr. 3

The rationale of quantitative methods applied to research design, sampling, instruments, and descriptive and inferential statistics via university supplied software; and qualitative methods for categorical data including nonrandom sampling, coding, and networks/displays. Applicable to all majors for solving real-world problems and defending the results. Offered Fall, Winter.

EER 4501 Quantitative and Qualitative Research, Measurement, and Program Evaluation Cr. 3

Provides an introduction to systematic disciplined inquiry and program evaluation. Topics in quantitative methods to be covered include : experimental, quasi-experimental, and survey research; instrument reliability and validity; descriptive and inferential statistics. Topics in qualitative methods to be covered include: grounded theory, ethnography, case study; trustworthiness, coding, and data networks/displays. Offered Fall, Winter.

EER 7610 Evaluation and Measurement Cr. 2-3

Principles and practices of evaluation and measurement with special focus on behavioral goals. Informal and formal evaluational strategies. Problems of self-evaluation. Logical, philosophical, and linguistic problems of evaluational methods and devices. Metrical analyses and standards. Innovations in educational assessment and accountability. Teacher-made tests. Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students.

EER 7630 Fundamentals of Statistics Cr. 3

Review of mathematics essential for statistics, sampling, computer use. Basic patterns of statistical inference, confidence estimation and significance testing regarding measures of averages, dispersion, correlation, and selected non-parametric statistics. One-way and two-way analysis of variance. Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students.

EER 7640 Fundamentals of Quantitative Research Cr. 3

Basic skills in educational research; nomenclature, problem, theory, hypothesis formulation; bibliographical and documentary techniques; retrieval systems; development of data-gathering instrumentation; computer orientation and research uses; collection and organization of data; manuscript development; report writing; techniques, methodologies for descriptive and experimental inquiry. Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students.

EER 7650 Computer Use in Research Cr. 3

Introduction to computer use in educational research with emphasis on using statistical packages (MIDAS and SPSS, BASIC programming language); writing statistical programs. Offered Every Term.

Prerequisite: EER 7630 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

EER 7870 Qualitative Research I: Introduction Cr. 3

Explores frameworks that inform what knowledge is and how it is produced. Review of validity, reliability, positionality, and ethics in qualitative research. Overview of major research designs (ethnography, grounded theory, phenomenology, case study, and narrative analysis). Offered Fall, Winter.

Restriction(s): Enrollment is limited to Graduate level students.

EER 7880 Fundamentals of Ethnographic Research Cr. 3

Collecting, analyzing, and writing up findings from ethnographic data (participant-observation field notes, interviews, and artifacts); issues of rigor in naturalistic research in education. Offered Fall, Winter.

Prerequisite: EER 7870 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

EER 7910 Qualitative Methods for Diversity and Inclusion Cr. 3

Explores qualitative methodologies at the intersection of diversity and inclusion. Includes readings that address qualitative methodologies and theories that relate to race, ethnicity, gender, sexuality, dis/ability, age, class, language, and other aspects of diversity and inclusion. Examines the role of global communities in qualitative research. Offered Fall.

Prerequisite: EER 7870 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

EER 7920 Qualitative Methods for Community and Classroom Research Cr. 3

Explores qualitative methodologies for community research in local contexts. Examines principles of, and considerations for, place-based research in nearby communities. Designs a community-based research project, includes a focus on participatory action research, and examines the role of local communities in qualitative research. Offered Winter.

Prerequisite: EER 7870 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

EER 8520 Qualitative Research II: Design and Data Collection Cr. 3

Examines approaches to qualitative data collection (interviews, focus groups, observations, documents, text, sound, video, and images). Readings in, and applications of, major qualitative research designs (ethnography, grounded theory, phenomenology, case study, narrative, and visual analysis). Offered Fall.

Prerequisite: EER 7870 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

EER 8530 Qualitative Research III: Data Analysis and Reporting Cr. 3

Examines approaches to qualitative data analysis and computer assisted qualitative data analysis software (CAQDAS). Readings in, and applications of, major forms of qualitative data analysis (ethnography, grounded theory, phenomenology, case study, narrative, and visual analysis). Also addresses discourse analysis and theoretical analysis. Offered Winter.

Prerequisite: EER 8520 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

EER 8550 Advanced Qualitative Inquiry: Innovations in Theory Cr. 3

Explores contemporary developments in theories of qualitative research. Examines recent theories in education and social sciences research and connects theory with methodological practice. Develops approaches to research design that are grounded in theoretical frameworks. Offered Fall.

Prerequisite: EER 8530 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

EER 8560 Advanced Qualitative Inquiry: Innovations in Practice Cr. 3

Explores contemporary developments in the practice of qualitative research, and situates recent trends within historical developments in the field. Offered Winter.

Prerequisite: EER 8550 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

EER 8700 Advanced Qualitative Evaluation: Theory and Practice Cr. 4

Major paradigms of qualitative evaluation, strategies of inquiry, methods of collecting and analyzing materials, the art of interpretation. analysis of real data, including pattern coding, data displays, checklist matrices, transcription, explanation prediction within-case vs cross-case displays, ethical issues in evaluation. Computer use in qualitative evaluation. Offered Winter.

Prerequisite: EER 7870 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

EER 8710 Advanced Ethnographic Research Cr. 4

Use of fieldwork to learn group interview, video collection and analysis, ethnographic survey, narrative and poetic analysis; deepening the understandings about culturally-sensitive research, rigor, and the politics of representation. Offered Winter.

Prerequisite: EER 7880 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

EER 8720 Advanced Quantitative Program Evaluation Cr. 3

Educational and school program evaluation: alternative approaches; students propose theory-based designs and strategies. Offered Winter.

Restriction(s): Enrollment is limited to Graduate level students.

EER 8760 Advanced Measurement I Cr. 3

Classical measurement theory including scaling, measurement error, reliability, validity. Review of strong statistics versus weak measurement debate. Empirical methods of psychometric applications in education and educational psychology. Offered Yearly.

Prerequisite: EER 7610 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

EER 8770 Advanced Measurement II Cr. 4

Modern measurement theory. Item response theory, including one and three parameter models, detecting item bias, multi-dimensional scaling. Offered Winter.

Prerequisite: EER 8760 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

EER 8800 Variance and Covariance Analysis Cr. 4

Multiple, partial, canonical correlation: variance and covariance analysis; Models I and II. Statistical analysis in experimental designs; Random Blocks, Latin Squares, Greco-Latin Squares, simple and complex factorials, confounding, fractional and split-plot designs. Supporting topics and techniques; missing observations; adjustment of means; probing the homogeneity of means and variances; study of contrasts; orthogonal polynomials and computer usage. Offered Yearly.

Prerequisite: EER 7630 with a minimum grade of B

Restriction(s): Enrollment is limited to Graduate level students.

EER 8820 Multivariate Analysis Cr. 4

Discriminant analysis, profile analysis; placement and classification problems; component and factor analysis. Supporting topics and techniques; transformation of variables, computer usage. Offered Yearly.

Prerequisite: EER 8800 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

EER 8840 Structural Equation Modeling Cr. 4

Application of structural equation methods to applied educational psychology research. Model specification, estimation, and fit. Confirmatory factor analysis and correlation. Offered Yearly.

Prerequisite: EER 8820 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

EER 8860 Nonparametric, Permutation, Exact, and Robust Methods Cr. 4

Application of nonparametric, permutation, exact and robust methods to social and behavioral science data. Techniques of estimation, location, and association for discrete and continuous data. Offered Fall, Winter.

Prerequisite: EER 7630 with a minimum grade of C and EER 8800 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

EER 8880 Monte Carlo Methods Cr. 1

FORTRAN 77/90/95 applied to Monte Carlo Methods for the development of new statistics and procedures and the comparison of existing methodologies. Solving data analysis problems via simulation techniques. Offered Fall, Winter.

Prerequisite: EER 7630 with a minimum grade of C and EER 8800 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

EER 8900 Qualitative Design for School Research Cr. 3

Field Placement. Integration of theory with practice for conducting, analyzing, and reporting qualitative research or evaluation in the schools. Offered Fall.

Prerequisite: EER 8700 with a minimum grade of C or EER 8710 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

EER 8910 Practicum in Evaluation Cr. 2-6

Qualitative methods for action research in schools, including interviewing, field observation, life histories, visual records, and document analysis. Offered Every Term.

Prerequisite: EER 8700 with a minimum grade of C and EER 8710 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students; enrollment is limited to students with a major in Education Evaluation&Research.

EER 8992 Research and Experimental Design Cr. 3-4

Design of empirical research for students possessing basic knowledge of statistics. Topics include hypothesis construction, sampling theory, experimental and quasi-experimental designs, selection of statistical procedure, and construction of data gathering instruments. Offered Fall, Winter.

Prerequisite: EER 7630 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

EET - ELECTRICAL/ ELECTRONIC ENGINEERING TECHNOLOGY

EET 2000 Electrical Principles Cr. 3

Kirchhoff's laws, D.C. and A.C. circuit analysis, impedance, phasors, power and power factor correction, mutual coupling. Power transformers, D.C. and A.C. generators and motors, motor controls. Offered Yearly.

Prerequisites: MAT 1800 with a minimum grade of C-

EET 2100 Principles of Digital Design Cr. 3

Applied Boolean algebra and number systems. Logic families, K-mapping; combinational logic, multiplexers and demultiplexers, readouts and displays, flip flops. Offered Yearly.

EET 2720 Microprocessor Fundamentals Cr. 3

Use of microprocessors as interface devices, including software, interfaces, memory, registers, and microcomputer system architecture, computer programming design projects. Offered Yearly.

Prerequisites: CSC 1050 with a minimum grade of C-

Course Material Fees: \$25

EET 3100 Advanced Digital Design Cr. 3

System level design of digital logic circuits using hardwired and programmable logic devices. ROMs, PROMs, and PLAs. Synchronous and asynchronous circuit design and analysis. Offered Fall, Winter.

Prerequisites: EET 2100 with a minimum grade of C-

EET 3150 Network Analysis Cr. 4

Analysis of circuits with dependent sources, RL, RC, and RLC circuit transient and sinusoidal response, network functions, frequency response, and power analysis. Offered Fall, Winter.

Prerequisites: EET 2000 with a minimum grade of C- and May be taken concurrently: ET 3450 with a minimum grade of C- and PHY 2140 with a minimum grade of C-

EET 3180 Analog Electronics Cr. 4

Operational amplifiers, circuit and applications; summing and subtracting amplifiers; integrating and differentiating amplifiers; comparators. Design of active filters, oscillators and waveform generating circuits, and audio integrated circuits. Offered Fall, Winter.

Prerequisites: CHM 1020 with a minimum grade of C- and EET 2000 with a minimum grade of C-

Course Material Fees: \$20

EET 3300 Applied Signal Processing Cr. 3

Continuous-time and discrete-time signals, frequency response and impulse response; transfer function of linear systems, data acquisition and sampling, continuous and discrete Fourier transform; spectrum analysis and filtering; digital filter design. Offered Fall, Winter.

Prerequisites: May be taken concurrently: EET 3150 with a minimum grade of C-

EET 3500 Electrical Machines and Power Systems Cr. 3

Energy fundamentals. Physical and operating characteristics of D.C. and A.C. generators and motors, transformers. Electric power network. Transmission line stability. Power factor correction. Load sharing by transformers and generators. Per unit notation. Environmental impact of electric power generation. Offered Intermittently.

Prerequisites: EET 2000 with a minimum grade of C- and ET 3430 with a minimum grade of C-

EET 3720 Micro and Programmable Controllers Cr. 3

Microprocessors and Programmable logic controllers; on-chip I/O resources, interfacing; controls, instrumentation, and communication; data manipulation and sequencer instruction set; development and debugging tools. Offered Fall, Winter.

Prerequisites: CSC 1050 with a minimum grade of C- and EET 2720 with a minimum grade of C-

Course Material Fees: \$20

EET 4100 Computer Hardware Design Cr. 3

Structural organization and hardware design of digital computers. Register transfer, micro-operations, and microprogram control. Processing and control units, arithmetic algorithms, input-output systems, and memory systems. Offered Yearly.

Prerequisites: EET 2720 with a minimum grade of C- and EET 3100 with a minimum grade of C-

EET 4200 Control Systems Cr. 4

Feedback control systems with topics in time response, stability criteria, system representation, frequency response, compensation. PID controller; simulation of electrical and mechanical systems. Offered Fall, Winter.

Prerequisites: ET 3450 with a minimum grade of C- and EET 3150 with a minimum grade of C- or MCT 3010 with a minimum grade of C-

Course Material Fees: \$10

EET 4600 Power Electronics Cr. 3

Understanding different types of power semiconductor devices; analysis of typologies of uncontrolled and controlled converters, dc-dc converters. Simulation of power converters and application of power converter technologies in industrial and utility applications. Offered Yearly.

Prerequisites: EET 3150 with a minimum grade of C- and ET 3450 with a minimum grade of C-

Restriction(s): Enrollment is limited to Undergraduate level students.

EET 4990 Guided Study Cr. 1-6

Supervised study and instruction in field selected by student. Offered Intermittently.

Repeatable for 6 Credits

EET 5720 Computer Networking Applications Cr. 4

Networking protocols, components, architecture, and standards. Data communication, data packet structure, data transmission methods and techniques, network topologies, and media access control methods. Offered Yearly.

Prerequisites: EET 3100 with a minimum grade of C- and EET 3720 with a minimum grade of C-

Course Material Fees: \$25

EET 5730 Embedded Systems Networking Cr. 3

Principles of data communications and real-time wired and wireless embedded systems networking. State of the art embedded networks including Controller Area Networks (CAN), internet connectivity and other embedded standards will be utilized in this project based class. Offered Fall.

Prerequisites: EET 3100 with a minimum grade of C- and EET 3720 with a minimum grade of C-

EET 7720 Advanced Computer Networking Cr. 4

Latest advances in networking; internetworking with bridges, routers, and switches. LAN and WAN protocols, high speed networks. Offered Yearly.

Prerequisite: EET 5720 with a minimum grade of C

Corequisite: EET 7430

Restriction(s): Enrollment is limited to Graduate level students.

EGR - ENGINEERING: SPECIAL TOPICS

EGR 5655 Innovation & Entrepreneurship I Cr. 3

Provides education and hands-on experience in innovation and entrepreneurship applied to enterprise, product and service design and delivery. The first of a 2-semester sequence, this course teaches methods and tools to find, formulate, and develop engineering innovation and entrepreneurship, leading to practical, relevant, and productive new commercial and social enterprises. Offered Fall.

Restriction(s): Enrollment limited to students in the College of Engineering.

EGR 5656 Innovation & Entrepreneurship II Cr. 3

Provides education and hands-on experience in innovation and entrepreneurship applied to enterprise, product and service design and delivery. This course is the second of a 2-semester sequence. This course teaches methods and tools to find, formulate and develop engineering innovation and entrepreneurship, leading to practical, relevant, and productive new commercial and social enterprises. Offered Winter.

Restriction(s): Enrollment limited to students in the College of Engineering.

EGR 5657 Innovation & Entrepreneurship Lab Cr. 1

Provides hands-on application of Lean LaunchPad principles in innovation and entrepreneurship applied to enterprise, product and service and delivery. Offered Every Term.

Restriction(s): Enrollment limited to students in the College of Engineering.

Repeatable for 2 Credits

EGR 5995 Special Topics in Engineering Cr. 1-4

State of the art research, development and practice topics from across the fields of engineering; emphasis on interdisciplinary topics. Offered Every Term.

Restriction(s): Enrollment limited to students in the College of Engineering.

Repeatable for 4 Credits

EGR 7995 Special Topics in Engineering Cr. 1-4

State of the art research, development and practice topics from across the fields of engineering; emphasis on interdisciplinary topics. Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students in the College of Engineering.

Repeatable for 4 Credits

EGR 7999 Elements of Graduate Research Cr. 2

Key elements of graduate research. Topics covered include developing research ideas and library search skills, constructing a research proposal/prospectus, identifying research funding and fellowship opportunities, interdisciplinary research, and research ethics. Offered Winter.

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students in a Doctor of Philosophy degree.

EHP - EDUCATIONAL HISTORY AND PHILOSOPHY

EHP 3600 Introduction to the Philosophy of Education Cr. 3

Leading philosophies of education as they bear upon education as a profession and as a discipline. Offered Every Term.

Restriction(s): Enrollment limited to students in the College of Education.

EHP 7600 Philosophy of Education Cr. 2-3

Philosophic inquiry into educational theory and practice. For teachers, counselors, curriculum directors, administrators, and those in related professions. Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students.

EHP 9600 Doctoral Seminar in Philosophy of Education Cr. 3

Systematic study of the field of philosophy of education. Offered Winter.

Restriction(s): Enrollment is limited to Graduate level students.

EI - ENTREPRENEURSHIP AND INNOVATION

EI 1000 Entrepreneurial Explorations Cr. 1

Seminar series designed to expose students to entrepreneurship and innovation through exercises and interaction with experienced entrepreneurs and innovators. Offered Every Term.

EI 5000 Introduction to Entrepreneurship and Innovation Cr. 3

Introduces the integrative new venture development framework, processes and tools applied throughout the program, and explores opportunities, resources available and the local entrepreneurial ecosystem. Offered Every Term.

Restriction(s): Enrollment is limited to Undergraduate level students.

EI 5200 Startup Funding and Profitability Cr. 3

Introduces students to basic accounting and financial information and the tools necessary to understand the workings and prospects a new venture; explore funding options for new ventures and develop financial projections required in a business plan. Offered Yearly.

Restriction(s): Enrollment is limited to Undergraduate level students.

EI 5400 Management and Leadership for Entrepreneurs Cr. 3

Topics include: the essential attributes of a successful entrepreneur and innovation; development of effective networks and personal relationships; working with and blending the strengths and talents of others, group and team dynamics; effective leadership and management; the everyday challenges of creating, owning and running a new venture, and exploring the differences which arise due to the type and size of the new venture. Offered Yearly.

Restriction(s): Enrollment is limited to Undergraduate level students.

EI 5600 Marketing New Ventures Cr. 3

Topics include: product development vs. customer development; market types; customer types; diffusion and adoption life cycle theories and concepts; market opportunity analysis and product/ market fit, estimation of market size; value proposition; positioning statement; marketing strategy and plan to launch and sustain a new venture. Offered Yearly.

Restriction(s): Enrollment is limited to Undergraduate level students.

EI 5900 Special Topics in Entrepreneurship and Innovation Cr. 3

Topics to be announced in the schedule of classes. Offered Yearly.

Restriction(s): Enrollment is limited to Undergraduate level students.

Repeatable for 6 Credits

EI 5950 Directed Study in Entrepreneurship and Innovation Cr. 3

Offered Every Term.

Restriction(s): Enrollment is limited to Undergraduate level students.

EI 6000 Entrepreneurship and Innovation Capstone Cr. 3

Combines seminars with a project-intensive learning experience situated in the Detroit entrepreneurial ecosystem. Integrate and apply accumulated learning experiences from previous courses to the creation of a viable new venture and reach a decision whether or not to proceed, pivot, or terminate a new venture, and plan how to take these next steps. Offered Every Term.

Prerequisites: 3 of EI 5200, EI 5400, EI 5600, EI 5900, EI 5950, FPC 5010, FPC 5660 and EI 5000

Restriction(s): Enrollment is limited to Undergraduate level students.

EI 7000 Introduction to Entrepreneurship and Innovation Cr. 3

Exploration of entrepreneurship and innovation, introduces an integrative new venture development framework along with processes and tools applied throughout the certificate program; explores opportunities, resources available and the regional entrepreneurial ecosystem. Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students.

EI 7200 Startup Financing and Profitability Cr. 3

Introduces students to basic accounting and financial information and the tools necessary to understand the workings and prospects for a new venture; explore funding options for new ventures and develop financial projections required in a business plan. Offered Yearly.

Prerequisites: EI 7000 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

EI 7400 Management and Leadership for Entrepreneurs Cr. 3

Topics include: the essential attributes of a successful entrepreneur and innovation; development of effective networks and personal relationships; working with and blending the strengths and talents of others, group and team dynamics; effective leadership and management; the everyday challenges of creating, owning and running a new venture, and exploring the differences which arise due to the type and size of the new venture. Offered Yearly.

Prerequisites: EI 7000 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

EI 7600 Marketing New Ventures Cr. 3

Topics include: product development vs. customer development; market types; customer types; diffusion and adoption life cycle theories and concepts; market opportunity analysis and product/ market fit, estimation of market size; value proposition; positioning statement; marketing strategy and plan to launch and sustain a new venture. Offered Yearly.

Prerequisites: EI 7000 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

EI 7800 Special Topics in Entrepreneurship and Innovation Cr. 3

Offered Yearly.

Prerequisites: EI 7000 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

EI 7850 Directed Study in Entrepreneurship and Innovation Cr. 3

Offered Every Term.

Prerequisites: EI 7000 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

EI 7900 Entrepreneurship and Innovation Capstone Cr. 3

Combines seminars and discussions with a project-intensive learning experience situated in the Detroit entrepreneurial ecosystem. Integrate and apply accumulated learning experiences from previous courses to the creation of a viable new venture; reach a decision whether or not to proceed, pivot, or terminate a new venture; plan how to take the next steps and/or continue to pursue funding and achieve venture success. Offered Every Term.

Prerequisite: EI 7000 with a minimum grade of B

Restriction(s): Enrollment is limited to Graduate level students.

ELE - ELEMENTARY EDUCATION

Challenges and resources of teaching diverse populations in metropolitan schools. Offered Intermittently.

Restriction(s): Enrollment is limited to Graduate level students.

ELE 7850 Current Issues in Elementary Education Cr. 1-9

Current developments and issues of concern and debate in education at the international, national, state and local level. Offered Intermittently.

Restriction(s): Enrollment is limited to Graduate level students.

Repeatable for 9 Credits

ELI - ENGLISH LANGUAGE INSTITUTE

ELI 0100 Level 1: Oral Integrated Cr. 2,4

The focus of this course is to develop students' basic listening and speaking skills necessary for everyday life. They will learn basic listening strategies, interact with others about simple topics, and produce simple sentences and questions with target vocabulary. Students will practice articulating consonant and vowel sounds correctly and produce accurate stress and intonation patterns. Offered Every Term.

Restriction(s): Enrollment is limited to English Language Institute level students.

Repeatable for 4 Credits

ELI 0110 Level 1: Written Integrated Cr. 2,4

The focus of this course is to introduce basic writing and grammar skills. Students will produce simple sentences on topics related to their personal needs. Timed and multi-draft writings will include simple sentences, correct use of capital and lower case letters, legible handwritten letters, and appropriate vocabulary. Basic grammatical structures will be introduced. Offered Every Term.

Restriction(s): Enrollment is limited to English Language Institute level students.

Repeatable for 4 Credits

ELI 0120 Level 1: Reading and Vocabulary Cr. 2,4

The focus of this course is to increase students' ability to read and comprehend simple material and to increase their ability to recognize familiar words in everyday contexts. Students will use a picture dictionary and develop vocabulary associated with simple topics. Students will read short texts from basic readers and ELI library books. Offered Every Term.

Restriction(s): Enrollment is limited to English Language Institute level students.

Repeatable for 4 Credits

ELI 0200 Level 2: Oral Integrated Cr. 2,4

The focus of this course is to develop students' abilities to carry on short, sustained conversation. They will apply listening strategies to discuss simple passages. They will interact with classmates. Students will use high-frequency vocabulary to produce simple and compound sentences with correct verb tenses. Students will use connected and reduced speech. Offered Every Term.

Restriction(s): Enrollment is limited to English Language Institute level students.

Repeatable for 4 Credits

ELI 0210 Level 2: Written Integrated Cr. 2,4

The focus of this course is to introduce paragraph writing and to develop basic grammatical understanding. Students will produce paragraphs in a variety of rhetorical modes. Timed and multi-draft paragraphs will include a topic sentence, simple transitions, three main points with some supporting details, and a concluding sentence. Basic grammatical structures will be introduced. Offered Every Term.

Restriction(s): Enrollment is limited to English Language Institute level students.

Repeatable for 4 Credits

ELI 0215 Level 2: Intensive Reading and Vocabulary Cr. 1,2

The focus of this course is to increase students' comprehension of printed material and acquire high-frequency vocabulary. Students will read simplified texts and apply reading skills, such as identifying main ideas and details, inferencing, and understanding sequence. Students will acquire vocabulary by using definitions from the text, interpreting from the context, and using dictionary skills. Offered Every Term.

Restriction(s): Enrollment is limited to English Language Institute level students.

Repeatable for 2 Credits

ELI 0220 Level 2: Communicative Grammar Cr. 1,2

The focus of this course is to build students' communicative competence, or their ability to communicate effectively and appropriately. To that end, basic grammar points will be studied and practiced in ways that simulate everyday conversations and scenarios. Students will engage in a variety of communicative activities that focus on speaking and writing. Offered Every Term.

Restriction(s): Enrollment is limited to English Language Institute level students.

Repeatable for 2 Credits

ELI 0300 Level 3: Oral Integrated Cr. 2,4

The focus of this course is to develop students' emerging academic listening and speaking skills. Students will apply listening and speaking strategies. They will also give short presentations. Emphasis will be on generating compound and complex sentences using simple academic vocabulary. Students will pronounce English sounds accurately and follow intonation and stress patterns appropriately. Offered Every Term.

Restriction(s): Enrollment is limited to English Language Institute level students.

Repeatable for 2 Credits

ELI 0310 Level 3: Written Integrated Cr. 2,4

The focus of this course is to produce well-developed paragraphs in a variety of rhetorical modes on academic topics. This course will culminate in an introduction to essay writing. Intermediate grammatical structures, such as complex sentences, adjective clauses, and the present perfect, will be introduced. Error-correction tasks, peer evaluations, and self-evaluations will develop self-editing skills. Offered Every Term.

Restriction(s): Enrollment is limited to English Language Institute level students.

Repeatable for 2 Credits

ELI 0315 Level 3: Intensive Reading and Vocabulary Cr. 1,2

The focus of this course is to increase students' vocabulary and comprehension of longer and varied reading passages. Students will also be able to understand the structure of a text with transition words and the relationship between the main point(s) and supporting examples. Strategies to discern meaning of words from context will also be practiced. Offered Every Term.

Restriction(s): Enrollment is limited to English Language Institute level students.

Repeatable for 2 Credits

ELI 0320 Level 3: Extensive Reading Cr. 1,2

The focus of this course is to increase students' reading fluency by reading large quantities of texts. Class Readers will give the teacher the opportunity to help the students acquire the art of extensive reading, to improve their skills, and to monitor their progress closely. Students will choose their own texts for independent reading. Offered Every Term.

Restriction(s): Enrollment is limited to English Language Institute level students.

ELI 0400 Level 4: Oral Integrated Cr. 2,4

The focus of this course is to develop students' academic listening and speaking skills needed for successful extended academic discourse. Students will demonstrate detailed understanding of academic listening passages. Students will use speaking strategies for academic discussions and to summarize information. They will give speeches using visuals, transitions, and grammatically-correct sentences with academic vocabulary. Offered Every Term.

Restriction(s): Enrollment is limited to English Language Institute level students.

Repeatable for 4 Credits

ELI 0410 Level 4: Written Integrated Cr. 2,4

The focus of this course is to develop students' essay writing skills and improve accuracy in grammar, mechanics, and spelling. Essays will be produced in a variety of rhetorical modes on academic topics that include some authentic sources. Students will also be introduced to summarizing and citing authentic sources. Complex grammatical structures will be introduced. Offered Every Term.

Restriction(s): Enrollment is limited to English Language Institute level students.

Repeatable for 4 Credits

ELI 0415 Level 4: Intensive Reading and Vocabulary Cr. 1,2

The focus of this course is to increase students' academic vocabulary and comprehension of academic reading passages. Students will identify the structure, purpose, and connection between ideas in texts. Students will use strategies to discern meaning of words from context. They will acquire knowledge of word forms and will use dictionary skills to build vocabulary. Offered Every Term.

Restriction(s): Enrollment is limited to English Language Institute level students.

Repeatable for 2 Credits

ELI 0420 Level 4: Extensive Reading Cr. 1,2

The focus of this course is to increase students' reading fluency by reading large quantities of texts. Class Readers will give the teacher the opportunity to help the students acquire the art of extensive reading, to improve their skills, and to monitor their progress closely. Students will choose their own texts for independent reading. Offered Every Term.

Restriction(s): Enrollment is limited to English Language Institute level students.

Repeatable for 2 Credits

ELI 0500 Level 5: Oral Integrated Cr. 2,4

The focus of this course is to develop students' academic listening and speaking skills needed for successful extended academic discourse. Students will use listening strategies to show detailed understanding of lengthy academic listening passages. They will apply speaking strategies to share information and communicate with automaticity. Concentration will be on consistently speaking intelligibly and fluently. Offered Every Term.

Restriction(s): Enrollment is limited to English Language Institute level students.

Repeatable for 4 Credits

ELI 0510 Level 5: Written Integrated Cr. 2,4

Students will develop critical thinking skills through reading, writing, and classroom discussion. Students will write well-developed five- to eight-paragraph essays and relate assigned readings to their own experience. Students will learn how to incorporate outside sources into their essays and use appropriate citations. Advanced grammatical structures will be reviewed and expanded as necessary Offered Every Term.

Restriction(s): Enrollment is limited to English Language Institute level students; enrollment is limited to students with a major, minor, or concentration in English Language Institute.

Repeatable for 4 Credits

ELI 0515 Level 5: Research Skills Cr. 1,2

The focus of this course is to introduce skills essential to conduct academic research at the university level. Students will learn how to search for and evaluate academic sources in the library and online databases as well as how to read, analyze, and use the information gathered. The course also focuses on paraphrasing and summarizing. Offered Every Term.

Restriction(s): Enrollment is limited to English Language Institute level students.

Repeatable for 2 Credits

ELI 0520 English for Teaching Assistants Cr. 2

American English language skills to improve teaching effectiveness of non-native speakers of English. Pronunciation, stress, intonation, speaking rate; oral presentation practice; cultural factors in U.S. university classroom. Not offered for degree credit. Offered Every Term.

Repeatable for 4 Credits

ELI 0530 TOEFL/Timed Essay Writing Preparation Cr. 1-2

Class designed to enhance student's ability to understand and perform on the Test of English as a Foreign Language (TOEFL) for the paper-based and iBT(Internet)-based formats. Offered Yearly.

Restriction(s): Enrollment is limited to English Language Institute level students; enrollment is limited to students with a major, minor, or concentration in English Language Institute.

ELI 0540 Level 5: Media & Culture Cr. 1,2

The focus of this course is to gain a greater understanding of American culture and current events via extensive reading from print and digital media, leading to written assignments, oral presentations, and discussions. In addition, TV and radio programs, as well as podcasts and documentaries, will provide input for written and oral assignments. Offered Every Term.

Restriction(s): Enrollment is limited to English Language Institute level students.

Repeatable for 6 Credits

ELI 0699 Directed Study Cr. 1-4

Meets the needs of English as a Second Language (ESL) students in their last stages of preparation for matriculation. Based on students' particular needs, instruction will be provided to strengthen various academic preparation skills, including listening and note-taking practice in an academic context, extensive and intensive reading, and expository and research paper writing. Offered Every Term.

Restriction(s): Enrollment is limited to English Language Institute level students; enrollment is limited to students with a major, minor, or concentration in English Language Institute.

Repeatable for 8 Credits

ELI 0700 Written Communication Cr. 1,2

Through reading and writing of complex texts, students improve their understanding and use of American English grammar and mechanics (punctuation and capitalization) for academic and professional settings. Offered Every Term.

Restriction(s): Enrollment is limited to English Language Institute level students.

Repeatable for 2 Credits

ELI 0705 American Pronunciation and Clear Communication Cr. 1,2

Course addresses the communication needs of advanced-level, non-native English speakers who want to reduce the amount of pronunciation errors produced in their speech. Offered Winter.

Restriction(s): Enrollment is limited to English Language Institute level students.

Repeatable for 2 Credits

ELI 0800 Writing Skills I Cr. 3

This course integrates reading, writing, and grammar and focuses on comprehending main ideas and details, inferencing in simplified reading texts, and understanding This course integrates reading, writing, and grammar and focuses on comprehending main ideas and details, inferencing in simplified texts, and understanding vocabulary in context. Students will learn to organize and write paragraphs with simple grammatically correct sentences. Offered Spring/Summer.

Restriction(s): Enrollment is limited to English Language Institute level students.

ELI 0810 Oral Skills I Cr. 3

This course integrates listening and speaking in English and introduces culturally appropriate interaction in speech. Students listen to dialogues, newscasts, and short lectures; give presentations on a variety of topics; and receive individualized feedback on pronunciation. Offered Spring/Summer.

Restriction(s): Enrollment is limited to Undergraduate level students.

ENG 2435 Introduction to Digital Humanities Cr. 3

Digital humanities scholarship has exploded over the last ten years. Early DH scholarship represented a niche in humanities fields like English and History, dominated by unique individuals who had both technical programming skills and experience in humanities research. Since its early days, the field of digital humanities has expanded significantly. New tools and platforms make DH research more accessible. Today, DH scholars work in a highly collaborative, interdisciplinary environment that place programmers and developers, information science specialists, and humanities scholars in active conversation. In this course, students will be introduced to these different elements – tools, methods, theories, and critical analysis – of the digital humanities in order to learn new ways to interpret artistic or cultural objects or ideas, social relationships, and historical processes. Offered Fall.

Equivalent: HIS 2435

ENG 2440 Introduction to Visual Culture Cr. 3

Satisfies General Education Requirement: Cultural Inquiry, Visual Performing Arts

Introductory course in the reading of images from the perspective of literary and cultural studies. Attention to basic concepts, terms, and theories in the study of visual culture. Offered Yearly.

Repeatable for 9 Credits

ENG 5500 Topics in English and American Literature Cr. 3

Generic, historical or thematic perspectives. Topics to be announced in the Schedule of Classes. Offered Every Other Year.

Prerequisites: AFS 2390 with a minimum grade of C or ENG 2390 with a minimum grade of C or ENG 3010 with a minimum grade of C or ENG 3020 with a minimum grade of C or ENG 3050 with a minimum grade of C

Repeatable for 9 Credits

ENG 5510 Major Authors Cr. 3

Advanced study of one author, a pair of related authors, or a coterie of authors. Topics to be announced in the Schedule of Classes. Offered Intermittently.

Prerequisites: AFS 2390 with a minimum grade of C or ENG 2390 with a minimum grade of C or ENG 3010 with a minimum grade of C or ENG 3020 with a minimum grade of C or ENG 3050 with a minimum grade of C

Repeatable for 9 Credits

ENG 5520 Irish Literature Cr. 3

Major twentieth century Irish writers in the context of Irish history and politics, such as W.B. Yeats, James Joyce, major dramatists. Offered Intermittently.

Prerequisites: AFS 2390 with a minimum grade of C or ENG 2390 with a minimum grade of C or ENG 3010 with a minimum grade of C or ENG 3020 with a minimum grade of C or ENG 3050 with a minimum grade of C

ENG 5565 Postmodernism Cr. 3

Advanced study of postmodern literature and culture, with attention to its international development and to critical theory. Possible authors: Beckett, Calvino, Nabokov, Acker, DeLillo, Pynchon. Offered Every Other Year.

Prerequisites: AFS 2390 with a minimum grade of C or ENG 2390 with a minimum grade of C or ENG 3010 with a minimum grade of C or ENG 3020 with a minimum grade of C or ENG 3050 with a minimum grade of C

ENG 5595 World Literature in English Cr. 3

Advanced course in the study of literatures written in English beyond the United States and Great Britain. Attention to globalization, post-colonialism, and transnationalism. Authors may include: Rushdie, Coetzee, Kincaid, Kureishi, Ondaatje, Achebe, and Gordimer. Offered Yearly.

Prerequisites: AFS 2390 with a minimum grade of C or ENG 2390 with a minimum grade of C or ENG 3010 with a minimum grade of C or ENG 3020 with a minimum grade of C or ENG 3050 with a minimum grade of C

ENG 5680 Children's Literature Cr. 3

Study of children's literature from a literary perspective. Attention to the place of children's literature in literary history, its relationship to canonical literary works, and the development of its specific literary forms and genres. Offered Intermittently.

Prerequisites: AFS 2390 with a minimum grade of C or ENG 2390 with a minimum grade of C or ENG 3010 with a minimum grade of C or ENG 3020 with a minimum grade of C or ENG 3050 with a minimum grade of C

ENG 5690 History and Future of the Book Cr. 3

Study of significant moments in the history of reading, writing, and the production and dissemination of texts. Attention to orality and literacy, authorship and originality, publishing and economics, as well as writing technologies past and present. Offered Intermittently.

Prerequisites: AFS 2390 with a minimum grade of C or ENG 2390 with a minimum grade of C or ENG 3010 with a minimum grade of C or ENG 3020 with a minimum grade of C or ENG 3050 with a minimum grade of C

ENG 5695 Topics in Writing and Publishing Cr. 3

Study of recent trends and issues within the publishing industry, textual editing, scholarly publishing, print and electronic publication formats, and history and future of publishing. Topics to be announced in Schedule of Classes. Offered Every Other Year.

Prerequisites: AFS 2390 with a minimum grade of C or ENG 2390 with a minimum grade of C or ENG 3010 with a minimum grade of C or ENG 3020 with a minimum grade of C or ENG 3050 with a minimum grade of C

Repeatable for 9 Credits

ENG 5700 Introduction to Linguistic Theory Cr. 3

Introduction to the scientific study of language and methodologies of linguistic analysis: phonetics and phonology, morphology, syntax and semantics. Offered Yearly.

Equivalent: LIN 5700

ENG 5710 Phonology Cr. 3

The sound systems of a variety of human languages compared and contrasted in an introduction to the diversity and similarities in human sound systems. Theories of the nature of sound systems and methods of analysis in phonology and morphophonology will be presented. Offered Yearly.

Prerequisites: LIN 5700 with a minimum grade of D- or ENG 5700 with a minimum grade of D- or LIN 2720 with a minimum grade of D- or ENG 2720 with a minimum grade of D-

Equivalent: LIN 5290

ENG 5715 Morphology Cr. 3

Morphology is a core area of Linguistics. The course will introduce the basic issues in the study of the internal structure of words, as well as the analytical techniques applied to morphological analysis. Students will learn how to analyze words of various (Indo-European and non-Indo-European) languages into morphemes, as well as to recognize morphological patterns and to utilize theoretical concepts in order to describe and analyze such patterns. In particular, the course will develop a theory of morphology in generative grammar, paying special attention to the question of whether particular morphological phenomena are primarily syntactic or primarily phonological in nature. Offered Fall.

Prerequisites: ENG 5700 with a minimum grade of D- or ENG 2720 with a minimum grade of D- or LIN 2720 with a minimum grade of D- or LIN 5700 with a minimum grade of D-

Equivalent: LIN 5715

ENG 5720 Linguistics and Education Cr. 3

Introduction to linguistics with emphasis on applications to education. Offered Yearly.

Equivalent: LIN 5720

ENG 5730 English Grammar Cr. 3

Comprehensive analysis of English sentence structure and parts of speech using the terminology and descriptive approach of traditional grammar. Offered Yearly.

Equivalent: LIN 5730

ENG 5740 Syntax Cr. 3

The theory of grammatical systems examined through analysis of sentence formation in a variety of human languages, diversity and universals in grammar, and theories of syntax. Offered Yearly.

Prerequisites: LIN 5700 with a minimum grade of D- or ENG 5700 with a minimum grade of D- or LIN 2720 with a minimum grade of D- or ENG 2720 with a minimum grade of D-

Equivalent: LIN 5300

ENG 5745 Semantics Cr. 3

Semantics is a core area of Linguistics. This course investigates meaning in natural language. It examines two foundational assumptions of natural language semantics: (i) that the meaning of a declarative sentence is its truth conditions and (ii) that the truth conditions of an expression are determined compositionally (that is, they are determined as a function of its parts and how they are put together). Students will then learn to distinguish between the entailments, implicatures, and presuppositions of an expression, where only the first are part of the expression's truth conditions. Offered Winter.

Prerequisites: ENG 5700 with a minimum grade of D- or ENG 2720 with a minimum grade of D- or LIN 2720 with a minimum grade of D- or LIN 5700 with a minimum grade of D-

Equivalent: LIN 5745

ENG 5750 Theories of Second Language Acquisition Cr. 3

The complex processes involved in learning a foreign/second language, including the nature of inter language and the individual and collective factors influencing learner success and the effectiveness of instruction. Offered Yearly.

Equivalent: LGL 5750, LIN 5750

ENG 5760 American Dialects Cr. 3

Survey of chief social and geographic dialects of American English and introduction to theory of language variation. Offered Intermittently.

Equivalent: LIN 5760

ENG 5770 Sociolinguistics Cr. 3

Identification of sociolinguistic principles used by English speakers and writers in choosing among the different English codes, styles, registers and social dialects in American and other communities. Offered Every Other Year.

Equivalent: LIN 5770

ENG 5785 Academic Writing for Graduate Students Cr. 3

Emphasis on learning and executing written genres common to research and presentation activities in graduate school. Offered Intermittently.

Restriction(s): Enrollment is limited to Graduate level students.

Equivalent: GS 5785

Repeatable for 9 Credits

ENG 5790 Writing Theory Cr. 3

Review of linguistic, rhetorical, and/or literary theories of written language. Analysis of the principles, purposes, types, and modes of written discourse. Offered Yearly.

Prerequisites: AFS 2390 with a minimum grade of C or ENG 2390 with a minimum grade of C or ENG 3010 with a minimum grade of C or ENG 3020 with a minimum grade of C or ENG 3050 with a minimum grade of C

ENG 5795 Topics in Rhetoric and Writing Cr. 3

Advanced course in rhetoric and writing. Attention to recent work in composition studies, rhetorical theory, and writing. Topics to be announced in Schedule of Classes. Offered Intermittently.

Prerequisites: AFS 2390 with a minimum grade of C or ENG 2390 with a minimum grade of C or ENG 3010 with a minimum grade of C or ENG 3020 with a minimum grade of C or ENG 3050 with a minimum grade of C

Repeatable for 9 Credits

ENG 5820 Internship Practicum Cr. 3

Students work 8-20 hours per week as tutors, writers, editors or researchers in publishing firms, businesses, government, and community organizations. Classroom sessions focus on reading and writing analytical texts related to workplace experience, and creating a portfolio of works created from the internship. Offered Every Term.

Prerequisites: AFS 2390 with a minimum grade of C or ENG 2390 with a minimum grade of C or ENG 3010 with a minimum grade of C or ENG 3020 with a minimum grade of C or ENG 3050 with a minimum grade of C

Repeatable for 6 Credits

ENG 5830 Introduction to Technical and Professional Writing Practices Cr. 3

Intensive writing course that develops communication skills used in the workplace. Designed for students preparing to become technical writers/editors and students who will write as part of their professional work. Offered Every Other Year.

Prerequisites: AFS 2390 with a minimum grade of C or ENG 2390 with a minimum grade of C or ENG 3010 with a minimum grade of C or ENG 3020 with a minimum grade of C or ENG 3050 with a minimum grade of C

ENG 5840 Theoretical Approaches to Technical and Professional Writing Cr. 3

Survey of the theory and practice of technical and professional communication. Topics include the rhetoric and teaching of technical communication, analysis of on-the-job writing and rhetorical situations, and use of new communications technology. Some technical report writing, a research paper, and extensive reading and writing. Offered Every Other Year.

Prerequisites: AFS 2390 with a minimum grade of C or ENG 2390 with a minimum grade of C or ENG 3010 with a minimum grade of C or ENG 3020 with a minimum grade of C or ENG 3050 with a minimum grade of C

ENG 5850 Introduction to Scholarly Writing for Non-native English Speakers Cr. 2

Intensive practice in writing at the graduate level for non-native speakers of English. Offered Fall, Winter.

Restriction(s): Enrollment is limited to Graduate level students.

ENG 5860 Topics in Creative Writing Cr. 3

Topics include new genres, new media, and writing for public audiences. Models drawn from works written in diverse communities and cultures. Frequent individual conferences. Offered Yearly.

Prerequisites: AFS 2390 with a minimum grade of C or ENG 2390 with a minimum grade of C or ENG 3010 with a minimum grade of C or ENG 3020 with a minimum grade of C or ENG 3050 with a minimum grade of C or ENG 3800 with a minimum grade of B

Repeatable for 9 Credits

ENG 5870 Poetry Writing Workshop Cr. 3

The writing of poetry, conducted on a seminar basis; discussion and criticism of the work of students in the course. Frequent individual conferences. Offered Yearly.

Prerequisites: AFS 2390 with a minimum grade of C or ENG 2390 with a minimum grade of C or ENG 3010 with a minimum grade of C or ENG 3020 with a minimum grade of C or ENG 3050 with a minimum grade of C or ENG 3800 with a minimum grade of B

Repeatable for 6 Credits

ENG 5880 Fiction Writing Workshop Cr. 3

The writing of fiction, conducted on a seminar basis; discussion and criticism of the work of students in the course. Frequent individual conferences. Offered Yearly.

Prerequisites: AFS 2390 with a minimum grade of C or ENG 2390 with a minimum grade of C or ENG 3010 with a minimum grade of C or ENG 3020 with a minimum grade of C or ENG 3050 with a minimum grade of C or ENG 3800 with a minimum grade of B

Repeatable for 6 Credits

ENG 5885 Topics in Creative Non-Fiction Writing Cr. 3

Study and practice of hybrid forms that blend reportage and imaginative writing. Attention to essays, memoir, and personal writing. Frequent individual conferences. Offered Yearly.

Prerequisites: AFS 2390 with a minimum grade of C or ENG 2390 with a minimum grade of C or ENG 3010 with a minimum grade of C or ENG 3020 with a minimum grade of C or ENG 3050 with a minimum grade of C or ENG 3800 with a minimum grade of B

Repeatable for 9 Credits

ENG 5990 Directed Study in English Cr. 1-3

Advanced work for superior students whose program cannot be adequately met by scheduled classes. Course requires substantial written work. Offered Every Term.

Prerequisites: AFS 2390 with a minimum grade of C or ENG 2390 with a minimum grade of C or ENG 3010 with a minimum grade of C or ENG 3020 with a minimum grade of C or ENG 3050 with a minimum grade of C

Repeatable for 6 Credits

ENG 5992 Senior Seminar Cr. 3

In-depth study and discussion of topics to be announced in the Schedule of Classes. Attention to the use of primary and secondary sources in research and writing. Each student produces a substantial research project. Offered for undergraduate credit only. Offered Fall, Winter.

Prerequisites: AFS 2390 with a minimum grade of C or ENG 2390 with a minimum grade of C or ENG 3010 with a minimum grade of C or ENG 3020 with a minimum grade of C or ENG 3050 with a minimum grade of C

Restriction(s): Enrollment is limited to Undergraduate level students; enrollment is limited to students with a major in 2nd English or English.

Repeatable for 6 Credits

ENG 5993 Writing Intensive Course in English Cr. 0

Satisfies General Education Requirement: Writing Intensive Competency Disciplinary writing assignments under the direction of a faculty member. Satisfies the University General Education Writing Intensive Course in the Major requirement. Required for all majors. Offered Every Term.

Prerequisites: AFS 2390 with a minimum grade of C or ENG 2390 with a minimum grade of C or ENG 3010 with a minimum grade of C or ENG 3020 with a minimum grade of C or ENG 3050 with a minimum grade of C

Restriction(s): Enrollment is limited to Undergraduate level students.

ENG 6001 Pedagogical Practicum I Cr. 3

Instruction and resources to prepare newly-appointed graduate teaching assistants for teaching in the Wayne State composition program. Offered for graduate credit only. Offered Fall.

Restriction(s): Enrollment is limited to Graduate level students; enrollment is limited to students in the Department of English.

Advanced study of topics in African-American literature. Offered Every Other Year.

Restriction(s): Enrollment is limited to Graduate level students.

Repeatable for 6 Credits

ENG 7045 Ethnic American Literatures and Cultures Cr. 3

Study of the varieties of ethnic literature and culture in the Americas. Offered Every Other Year.

Restriction(s): Enrollment is limited to Graduate level students.

Repeatable for 6 Credits

ENG 7046 Comparative American Literatures and Cultures Cr. 3

Stud of the literatures and cultures of the Americas from a comparative perspective. Offered Every Other Year.

Restriction(s): Enrollment is limited to Graduate level students.

Repeatable for 6 Credits

ENG 7051 Introduction to Film and Media Studies Cr. 4

Historical and theoretical introduction to film and media studies. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate level students.

Repeatable for 8 Credits

ENG 7053 Film and Media Genres Cr. 4

Survey of the genres of film and media studies. Offered Every Other Year.

Restriction(s): Enrollment is limited to Graduate level students.

Repeatable for 8 Credits

ENG 7056 Comparative Media Cr. 3

Instruction in media from a comparative perspective, including but not limited to film, digital, visual, and auditory media. Offered Every Other Year.

Restriction(s): Enrollment is limited to Graduate level students.

Repeatable for 6 Credits

ENG 7061 Rhetorical Theory Cr. 3

Survey of major rhetorical theories. Offered Every Other Year.

Restriction(s): Enrollment is limited to Graduate level students.

Repeatable for 6 Credits

ENG 7062 Designing Research in Composition and Rhetoric Cr. 3

Survey of major research methodologies in rhetoric and composition. Offered Every Other Year.

Restriction(s): Enrollment is limited to Graduate level students.

Repeatable for 6 Credits

ENG 7063 Historical Studies in Composition and Rhetoric Cr. 3

Survey of historical approaches to rhetoric and composition. Offered Every Other Year.

Restriction(s): Enrollment is limited to Graduate level students.

Repeatable for 6 Credits

ENG 7064 The Teaching of Writing Cr. 3

Survey of major pedagogical theories in composition studies. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate level students.

Repeatable for 6 Credits

ENG 7065 Writing Technologies Cr. 3

Study of rhetorical and pedagogical issues related to writing and technology. Offered Every Other Year.

Restriction(s): Enrollment is limited to Graduate level students.

Repeatable for 6 Credits

ENG 7066 Writing in Multiple Settings Cr. 3

Survey of research into writing in specific settings such as urban and/or rural sites, workplaces, communities and organizations, or classrooms. Offered Every Other Year.

Restriction(s): Enrollment is limited to Graduate level students.

Repeatable for 6 Credits

ENG 7710 Advanced Studies in Linguistic Structure Cr. 3

Current issues in linguistic theory, including but not limited to topics in phonology, morphology, syntax, semantics. Topics to be announced in the Schedule of Classes. Offered Intermittently.

Restriction(s): Enrollment is limited to Graduate level students.

Equivalent: LIN 7710

Repeatable for 9 Credits

ENG 7720 Advanced Studies in Language Use Cr. 3

Current problems in language use, including issues in language variation, pidgins and creoles, first language acquisition, perception and production, and linguistic stylistics. Topics to be announced in the Schedule of Classes. Offered Intermittently.

Restriction(s): Enrollment is limited to Graduate level students.

Equivalent: LIN 7720

Repeatable for 9 Credits

ENG 7770 Discourse Analysis Cr. 3

Analysis of inter-sentential relationships and of larger patterns. Implied and actual exchanges. Information ordering. Multi-level and intersectional analysis of expository prose. Topics to be announced in the Schedule of Classes. Offered Every Other Year.

Restriction(s): Enrollment is limited to Graduate level students.

Equivalent: LIN 7770

Repeatable for 9 Credits

ENG 7800 Seminar in Creative Writing Cr. 3

Intensive advanced study in creative writing and/or relevant critical theory. Topics such as: Writing the Novel, Narrative Perspective, Creative Text and Reader Response, to be announced in Schedule of Classes. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate level students.

Repeatable for 9 Credits

ENG 7840 Technical and Professional Communication Cr. 3

Survey of contemporary research in technical and professional communication. Offered Every Other Year.

Restriction(s): Enrollment is limited to Graduate level students.

Repeatable for 6 Credits

ENG 7990 Directed Study in English Cr. 1-8

Advanced work for English majors whose program of study cannot be adequately met by scheduled classes. Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students.

Repeatable for 8 Credits

ENG 7999 Master's Essay Direction Cr. 1-3

Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students with a class of Candidate Masters.

ENG 8001 Seminar in Literary and Cultural Studies Cr. 3

Advanced special topics in literary and cultural studies. Topics to be announced in Schedule of Classes. Offered Every Other Year.

Restriction(s): Enrollment is limited to Graduate level students.

Repeatable for 6 Credits

ENG 8002 Seminar in Literary and Cultural Studies Before 1700 Cr. 3

Advanced special topics in literary and cultural studies before 1700. Topics to be announced in Schedule of Classes. Offered Every Other Year.

Restriction(s): Enrollment is limited to Graduate level students.

Repeatable for 6 Credits

ENG 8003 Seminar in Literary and Cultural Studies: 1660-1914 Cr. 3

Advanced special topics in literary and cultural studies between 1660 and 1914. Topics to be announced in Schedule of Classes. Offered Every Other Year.

Restriction(s): Enrollment is limited to Graduate level students.

Repeatable for 6 Credits

ENG 8004 Seminar in Literary and Cultural Studies After 1870 Cr. 3

Advanced special topics in literary and cultural studies after 1870. Topics to be announced in Schedule of Classes. Offered Every Other Year.

Restriction(s): Enrollment is limited to Graduate level students.

Repeatable for 6 Credits

ENG 8005 Seminar in American Literatures and Cultures Cr. 3

Advanced special topics in American literatures and cultures. Topics to be announced in Schedule of Classes. Offered Every Other Year.

Restriction(s): Enrollment is limited to Graduate level students.

Repeatable for 6 Credits

ENG 8006 Seminar in Film and Media Studies Cr. 4

Advanced special topics in film and media studies. Topics to be announced in Schedule of Classes. Offered Every Other Year.

Restriction(s): Enrollment is limited to Graduate level students.

Repeatable for 8 Credits

ENG 8007 Seminar in Rhetoric and Composition Studies Cr. 3

Advanced special topics in rhetoric and composition studies to be announced in Schedule of Classes. Offered Every Other Year.

Restriction(s): Enrollment is limited to Graduate level students.

Repeatable for 6 Credits

ENG 8008 Seminar in Theory Cr. 3

Advanced special topics in theory to be announced in Schedule of Classes. Offered Every Other Year.

Restriction(s): Enrollment is limited to Graduate level students.

Repeatable for 6 Credits

ENG 8998 Prospectus and Dissertation Chapter Workshop Cr. 3

Intensive workshop in creating a dissertation prospectus and/or dissertation chapter. Attention to invention, development, peer support, and developing material for academic publishing audiences. Offered Winter.

Restriction(s): Enrollment is limited to Graduate level students.

Repeatable for 9 Credits

ENG 8999 Master's Thesis Research and Direction Cr. 1-6

Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students with a class of Candidate Masters.

Repeatable for 6 Credits

ENG 9990 Pre-Doctoral Candidacy Research Cr. 1-8

Research in preparation for doctoral dissertation. Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students.

Repeatable for 12 Credits

ENG 9991 Doctoral Candidate Status I: Dissertation Research and Direction Cr. 7.5

Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students.

ENG 9992 Doctoral Candidate Status II: Dissertation Research and Direction Cr. 7.5

Offered Every Term.

Prerequisite: ENG 9991 with a minimum grade of S

Restriction(s): Enrollment is limited to Graduate level students.

ENG 9993 Doctoral Candidate Status III: Dissertation Research and Direction Cr. 7.5

Offered Every Term.

Prerequisite: ENG 9992 with a minimum grade of S

Restriction(s): Enrollment is limited to Graduate level students.

ENG 9994 Doctoral Candidate Status IV: Dissertation Research and Direction Cr. 7.5

Offered Every Term.

Prerequisite: ENG 9993 with a minimum grade of S

Restriction(s): Enrollment is limited to Graduate level students.

ENG 9995 Candidate Maintenance Status: Doctoral Dissertation Research and Direction Cr. 0

Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students.

Course Material Fees: \$370.26

Repeatable for 0 Credits

EPS - EDUCATIONAL LEADERSHIP AND POLICY STUDIES

EPS 8180 Research Seminar Cr. 2-6

Students develop research proposals, evaluate each other's research designs, and conduct any necessary pilot studies. Offered Intermittently.

Restriction(s): Enrollment is limited to Graduate level students.

Repeatable for 8 Credits

EPS 8530 Seminar in the History of Education Cr. 4

The growth and development of American education K-16, including events, circumstances, and influential ideas. Emphasis on the relationship between social, political, and economic change and the evolution of education. Offered Intermittently.

Restriction(s): Enrollment is limited to Graduate level students.

EPS 8560 Administration in Higher Education Cr. 4

Examination of alternative theories of organizational and administrative behavior as these relate to colleges and universities. Consideration of the issues of academic governance and college bargaining as they impact on the role of the administrator. Special projects according to positions held and particular interests of students. Offered Intermittently.

Restriction(s): Enrollment is limited to Graduate level students.

EPS 8570 Contemporary Issues in Higher Education Cr. 4

Intensive exploration of major issues and problems confronting higher education. Offered Intermittently.

Restriction(s): Enrollment is limited to Graduate level students.

EPS 8710 Readings in General Administration Cr. 4

Directed readings in the principles underlying administration in education, government, business and social agencies and other major areas. Offered Winter.

Restriction(s): Enrollment is limited to Graduate level students.

Equivalent: EDA 8710

EPS 8880 Workshop in Administrative and Organizational Studies Cr. 1-10

Practicum in the study of current problems affecting administrative and organizational studies. Offered Intermittently.

Restriction(s): Enrollment is limited to Graduate level students.

Repeatable for 10 Credits

EPS 9600 Seminar in Research and Theory of Administration Cr. 3

Research and theory relating to administration. Examination of textbooks, journals, and associations which promote educational administration research; review of the focus of inquiry and methodology for research in educational administration. Offered Intermittently.

Restriction(s): Enrollment is limited to Graduate level students.

EPS 9610 Seminar in Educational Policy Development Cr. 4

Role and nature of educational policies; observation, assessment, reporting, and discussion of policy-making bodies; review of policy research method; relationship of public values and public school policy. Offered Winter.

Restriction(s): Enrollment is limited to Graduate level students.

EPS 9620 Seminar in Educational Policy Initiatives Cr. 4

Recent policy initiatives in elementary and secondary education, with some attention to higher education. Techniques of policy analysis are utilized. Offered Fall.

Prerequisite: EPS 9610 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

ET - ENGINEERING TECHNOLOGY

ET 1500 Engineering Technology Trades Internship Cr. 1-6

Industrial practice dealing with specific skill trades in engineering technology, under supervision in cooperative internship program. Offered Intermittently.

ET 2140 Computer Graphics Cr. 3

Solution of drafting problems and development of graphic presentations using computer-assisted drafting techniques. Use of programming techniques for direct solution of drafting/graphic problems and available software routines. Introduction to the use of computer plotters, CRTs, digitizers. Offered Fall, Winter.

Prerequisites: CSC 1050 with a minimum grade of D-
Course Material Fees: \$15

ET 2160 Computer Applications for Engineering Technology Cr. 2

Various software programming environments and programming skills for engineering technology applications, including programming logic, file IO, data acquisition and processing, computer simulation, and communication protocols. Offered Fall, Winter.

Prerequisites: EET 2000 with a minimum grade of C- or ET 2140 with a minimum grade of C-

Restriction(s): Enrollment is limited to Undergraduate level students.

ET 2200 Engineering Materials Cr. 3

Application and characteristics, both physical and chemical, of metallic and nonmetallic materials, polymers, and composites used in industry. The primary process involved in producing these materials. Offered Yearly.

Prerequisites: CHM 1020 with a minimum grade of C-

ET 2500 Co-op Experience Cr. 1-4

Industrial practice under supervision in cooperative education. Work-study program. Report required. Offered Every Term.

Repeatable for 4 Credits

ET 3030 Statics Cr. 3

The objective of this course is to provide the student with a basic understanding of the analytical and graphical techniques that are used to determine the forces acting upon and within a body or structural component under static load. This course provides the necessary foundation for later studies in the analysis and design of structures as well as mechanical and electrical equipment. Offered Fall, Winter.

Prerequisite: ET 2140 with a minimum grade of C- and PHY 2130 with a minimum grade of C- and ET 3430 (may be taken concurrently) with a minimum grade of C-

ET 3050 Dynamics Cr. 3

Kinematics; kinetics of particles; kinetics of translation and rotation of a rigid body; relative motion; use of equations of plane motion. Application of impulse and momentum principles; work and efficiency. Offered Yearly.

Prerequisites: ET 3030 with a minimum grade of C- and MAT 3430 with a minimum grade of C-

ET 3430 Applied Differential and Integral Calculus Cr. 4

Limits, derivatives, applications of derivatives, definite integrals and their applications, and trigonometric functions. No degree credit in College of Liberal Arts and Sciences. Offered Every Term.

Prerequisites: MAT 1800 with a minimum grade of C-
Equivalent: MAT 3430

ET 3450 Applied Calculus and Differential Equations Cr. 4

Continuation of MAT/ET 3430, including logarithmic and exponential functions, first and second order ordinary differential equations, vectors, polar coordinates, Laplace transforms, Taylor series, and Fourier series. No degree credit in College of Liberal Arts and Sciences. Offered Every Term.

Prerequisites: ET 3430 with a minimum grade of C- or MAT 3430 with a minimum grade of C-

Equivalent: MAT 3450

ET 3850 Reliability and Engineering Statistics Cr. 3

Probability, hypergeometric, binomial, Poisson, and normal probability distribution; confidence intervals; inferences concerning means; linear regression; introduction to statistical quality control and reliability; use of computers. Offered Fall, Winter.

Prerequisites: MAT 1800 with a minimum grade of C-

ET 3870 Engineering Economic Analysis Cr. 3

Techniques to economically evaluate major technical projects, rate of return and present worth, interest formulae, federal taxes, risk, inflation, and non-economic constraints. Offered Every Term.

Prerequisites: MAT 1800 with a minimum grade of C-

ET 4990 Guided Study Cr. 1-6

Supervised study and instruction in field selected by student. Offered Intermittently.

Repeatable for 6 Credits

ET 4999 Senior Project Cr. 3

Satisfies General Education Requirement: Writing Intensive Competency Student designs, builds, and tests product; philosophy of design. Project proposal to be submitted by second week, final outcome to be completed by thirteenth week; progress reports, and oral presentation required. Offered Fall, Winter.

Prerequisites: ENG 3050 with a minimum grade of C

ET 5100 Fundamentals of Mechatronics and Industrial Applications Cr. 3

Fundamentals of mechatronics and their applications in industry; building blocks of mechatronic products including sensors, proximity, displacement and rotational measurement sensors, force and torque measurement sensors, pressure sensors, accelerometers, and actuators; introduction of closed-loop control, electrohydraulic motion control, PLC mechatronics design by embedding sensors, actuators and controllers into mechanical components. Offered Winter.

Prerequisites: EET 3180 with a minimum grade of C- or MCT 3010 with a minimum grade of C-

ET 5110 Advanced Programmable Controllers and Industrial Applications Cr. 3

Introduces basic concepts and architecture of industrial control systems, sensors, measurement devices, PID controllers, and operating principles of PLCs. Students will learn how to operate the PLC programming software. Ladder logic programs are the main language, and functions and function blocks will also be taught for students to grasp high-level PLC-programming skills. Offered Fall, Winter.

Prerequisite: EET 3720 with a minimum grade of C-

ET 5500 Graduate Industrial Internship Cr. 1-4

Industrial practice under supervision in cooperative education. Oral presentation and written report describing professional experience required. Offered for graduate credit only. Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students.

Repeatable for 4 Credits

ET 5600 Python: Industrial Applications Cr. 3

Provides a combination of lectures and hands-on projects on how computer programming is applied in various industrial applications including robotics, automation and visualization applications. After an introduction to the basics of Python programming, students will then be provided with the opportunity to perform industrial projects using Python. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate or Undergraduate level students; enrollment limited to students with a class of Senior.

ET 5800 Industrial Robots Programming Cr. 3

Provides an understanding of basic robotic theory (direct kinematics, inverse kinematics, links, joints, coordinates systems, and robotic vision theory) and applications. Students will program and maintain an R-J or higher robot controller with a standard application software package; identify the components of a vision system; install vision hardware; develop an application; perform error recovery procedures; and follow recommended safety practices. Labs, assignments and projects will be done using industrial robots: FANUC S 430 iw, FANUC LR Mate 200 iC, FANUC LR Mate 200 iD, and FANUC CR 4iA collaborative robot. Simulation and off-line programming will be done using Visual Components and ROBOGUIDE simulation software packages. Students will have the opportunity to receive an industrial certificate if they successfully complete the required test. Offered Fall.

ET 5870 Engineering Project Management Cr. 3

Provides the student with insights into human and organizational behavior affecting projects, in addition to the quantitative tools for the successful management of engineering projects. The course addresses a variety of project types and deals with how to select, initiate, operate and control as well as terminate a project. The role of project managers and their interaction with the rest of the organization is highlighted. Offered Fall, Winter.

Prerequisites: MAT 1800 with a minimum grade of C-

ET 5995 Special Topics in Engineering Technology I Cr. 1-4

Topics to be announced in Schedule of Classes. Offered Intermittently.

Repeatable for 8 Credits

ET 7300 Advanced Battery Systems for Electric-drive Vehicles Cr. 4

Aims to familiarize students with advanced battery technologies and their applications in hybrid and electric vehicles. Contents include: a descriptive overview of energy sources and conversions, HEV/PHEV/EV technology, hybrid powertrain configuration and components, in-vehicle energy storage systems, electrochemistry fundamentals, battery power and capacity/energy, battery system design (cell, module and pack), Battery Management System (BMS), cell monitoring and balancing, thermal management, on-board diagnostics, battery charging schemes and systems. Offered Fall.

Restriction(s): Enrollment is limited to Graduate level students.

Equivalent: EVE 7300

ET 7430 Methods of Engineering Analysis Cr. 4

This course aims to provide the theory and computer applications of differential equations, partial derivatives, Laplace transforms, Fourier series, matrices, and vectors. It also encourages students to use software programming environments to solve numerical problems. Offered Fall, Winter.

Restriction(s): Enrollment is limited to Graduate level students.

ET 7800 Industrial Robots Dynamics and Control Cr. 3

Covers the direct and inverse dynamic problem for industrial robots; Newton-Euler and Lagrange-Euler equations of robot arm motion; a new automatic separation method (ASM) for automatic generation of dynamic equations; robot trajectory generation; control of Robot Manipulators (PID control, design of control systems in State-Space and computed torque technique); sensing (range sensing, proximity sensing, touch sensing, force and torque sensing) using available Robots and Collaborative robots; current trends and research in Industrial Robotics and Cobotics. Offered Winter.

Prerequisite: MIT 5700 with a minimum grade of C or ET 5800 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

ET 7990 Directed Study Cr. 1-8

Supervised study and instruction in an advanced topic. Outline of proposed study and petition must be submitted to graduate committee in advance of registration for approval. Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students.

Repeatable for 8 Credits

ET 7995 Special Topics in Engineering Technology II Cr. 1-4

Topics to be announced in Schedule of Classes. Offered Intermittently.

Restriction(s): Enrollment is limited to Graduate level students.

Repeatable for 8 Credits

ET 7999 Master's Project Cr. 1-6

Design, fabrication, system optimization, and applications of graduate level material. Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students with a class of Candidate Masters.

Repeatable for 6 Credits

ETT - ELECTRICAL TRANSPORTATION TECHNOLOGY

ETT 3190 Fundamentals of Automotive Electrical and Electronic Systems Cr. 3

Foundations in contemporary automotive electronic systems. Topics include: review of automotive electronics, basic circuit building blocks, vehicle controllers, networking, diagnostics, sensors, actuators, and power electronics. Offered Fall.

Prerequisites: EET 2000 with a minimum grade of C- and PHY 2140 with a minimum grade of C-

Restriction(s): Enrollment is limited to Undergraduate level students.

ETT 4150 Fundamentals of Hybrid and Electric Vehicles Cr. 3

Hybrid and electric vehicle technologies: concepts and design, energy analysis, unified model approach, hybridization, hybrid powertrain architectures, IC engines for HEVs, transmissions used in HEVs, on-board energy storages. Offered Winter.

Prerequisites: ET 3430 with a minimum grade of C- and PHY 2140 with a minimum grade of C-

Restriction(s): Enrollment is limited to Undergraduate level students.

ETT 4310 Energy Storage Systems for Hybrid and Electric Vehicles Cr. 3

Overview of advanced battery technologies and applications in EV/HEV, hybrid powertrain configuration and requirements, in-vehicle energy storage systems, battery development, thermal management, control systems, cell monitoring, balancing, and on-board diagnostics. Offered Winter.

Prerequisites: ET 3430 with a minimum grade of C- and PHY 2140 with a minimum grade of C-

Restriction(s): Enrollment is limited to Undergraduate level students.

ETT 4410 Introduction to Advanced Energy Storage Cr. 3

Comprehensive coverage of energy storage for automotive and renewable energy; battery technology; hydrogen electrochemical cells and regenerative fuel cells; mechanical energy storage; thermal and chemical storage; superconductor. Offered Fall.

Prerequisites: ET 3430 with a minimum grade of C- and PHY 2140 with a minimum grade of C-

Restriction(s): Enrollment is limited to Undergraduate level students.

ETT 4650 Power Electronics and Charging Infrastructure for Hybrid and Electric Drive Vehicles Cr. 3

Principles of power systems, distribution systems, and ac/dc charging systems; applications of power electronic technologies in traction control, battery management, and regenerative braking for electric drive vehicles. Offered Winter.

Prerequisites: EET 3150 with a minimum grade of C-

Restriction(s): Enrollment is limited to Undergraduate level students.

ETT 4740 In-Vehicle Networking and Embedded Systems Cr. 3

Principles of data communications and real time embedded systems networking, with emphasis on in-vehicle networking. Controller Area Networks and FlexRay are covered. Project-oriented course utilizing various hardware/software. Offered Yearly.

Prerequisites: EET 3100 with a minimum grade of C-

Restriction(s): Enrollment is limited to Undergraduate level students.

EVE - ELECTRONIC-DRIVE VEHICLE ENGINEERING

EVE 5110 Fundamentals of Electric-drive Vehicle Engineering Cr. 4

Cover engineering fundamentals and basic design of electric-drive vehicle powertrains by understanding and analyzing the relevant multi-physics and applying the associated equations and simple models. Offered Fall.

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students in the College of Engineering.

Equivalent: ME 5115

EVE 5115 Fundamentals of Electric-drive Vehicle Modeling Cr. 4

Covers engineering and modeling fundamentals and basic design of electric-drive vehicle powertrains by understanding and analyzing the relevant multi-physics and applying the associated equations and simple models. MATLAB script m-file is required for all assignments. Offered Fall.

Restriction(s): Enrollment is limited to Graduate or Undergraduate level students; enrollment limited to students with a class of Senior; enrollment limited to students in the College of Engineering.

Equivalent: EVE 5110, ME 5115

EVE 5120 Fundamentals of Battery Systems for Electric and Hybrid Vehicles Cr. 4

Fundamental electrochemistry and engineering aspects for electric propulsion batteries, including lead acid, nickel metal hydride, and lithium ion technologies. Offered Winter.

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students in the College of Engineering.

Equivalent: AET 5310, CHE 5120, ME 5215

EVE 5130 Fundamental Fuel Cell Systems Cr. 4

Introduce various types of fuel cells, materials properties of electrodes and polymeric membranes, and electrochemical mechanisms. Reforming of various types of hydrocarbon fuel to hydrogen, and reforming technology. Offered Fall.

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students in the College of Engineering.

Equivalent: AET 5110, CHE 5110, ME 5110

EVE 5410 Power Electronics and Control Cr. 4

Control of electric energy using power electronic semiconductor devices; mathematical analysis of circuits containing these devices; design, modeling and control of power converters; applications of power electronic converters. Offered Spring/Summer.

Prerequisites: ECE 4330 with a minimum grade of C-

Restriction(s): Enrollment limited to students in the College of Engineering.

Equivalent: ECE 5410

EVE 5430 Modeling and Control of Power Electronics and Electric Vehicle Powertrains Cr. 4

Basic methodologies for modeling, control system design of renewable power sources and power electronics systems. Offered Fall.

Restriction(s): Enrollment is limited to Graduate or Undergraduate level students; enrollment limited to students in the College of Engineering.

Equivalent: AET 5330, ECE 5330

EVE 5450 Control and Optimization for Integrated Electric-drive Vehicle Systems Cr. 4

Understanding of how to control a system using modern control theory, how to optimize the performance of a system using various optimization technologies, and how to apply the control and optimization technologies to EDV systems. Offered Winter.

Prerequisite: EVE 5430

Restriction(s): Enrollment limited to students with a class of Applicant Masters, Candidate Masters, Unranked Grad, Graduate Certificate or Senior; enrollment limited to students in the College of Engineering.

EVE 5600 Integrated Product Development Cr. 3

Product development process: product architectures, concurrent engineering. Integration of marketing, design, and manufacturing functions for product development. How such processes are designed to account for various manufacturing and other business constraints to ensure that customer needs are met. Offered Fall.

Restriction(s): Enrollment limited to students in the College of Engineering.

Equivalent: AET 5600, IE 6405

EVE 5700 Electric-drive Vehicle Capstone Design Cr. 4

The class is divided into teams competing on same or similar Electric-Drive Vehicle (EDV) system design project on contemporary EDV issues with relevant vehicle powertrain and energy system contents, involving energy, environmental, safety and economic analyses. Offered Winter.

Prerequisites: EVE 5110 and EVE 5310 or EVE 5430

Restriction(s): Enrollment limited to students with a class of Applicant Masters, Candidate Masters, Unranked Grad, Graduate Certificate or Senior; enrollment limited to students in the College of Engineering.

EVE 5810 Power Management for Advanced Energy Storage Systems and its Applications Cr. 4

Operating principles and modeling of energy storage techniques; control and power management, power electronic converters, electric machines, and power systems; power management strategies of hybrid energy systems including HEV and alternative energy systems. Offered Fall, Winter.

Prerequisites: ECE 4470

Restriction(s): Enrollment limited to students in the College of Engineering.

Equivalent: AET 5810

EVE 7300 Advanced Battery Systems for Electric-drive Vehicles Cr. 4

Aims to familiarize students with advanced battery technologies and their applications in hybrid and electric vehicles. Contents include: a descriptive overview of energy sources and conversions, HEV/PHEV/ EV technology, hybrid powertrain configuration and components, in-vehicle energy storage systems, electrochemistry fundamentals, battery power and capacity/energy, battery system design (cell, module and pack), Battery Management System (BMS), cell monitoring and balancing, thermal management, on-board diagnostics, battery charging schemes and systems. Offered Fall.

Restriction(s): Enrollment is limited to Graduate level students.

Equivalent: ET 7300

EVE 7310 Electric-drive Vehicle Simulation and Control Cr. 4

Cover modeling, simulation and control of electric-drive vehicle powertrain including plant modeling, controls model development, and in-the-loop controls testing. Proficiency in MATLAB/Simulink is required. Offered Winter.

Prerequisites: EVE 5115 with a minimum grade of B- or ME 5115 with a minimum grade of B-

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students in the College of Engineering.

Equivalent: ME 7315

EVE 7450 Embedded Systems for Vehicles Cr. 4

Advanced embedded processors and operating systems, power modules, auxiliary execution engine, display interface, memory controller, USB controller, DMA, I/O, initialization and configuration, programmable serial controller, serial audio interface, and video input. Offered Fall.

Prerequisite: EVE 5430 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students with a class of Applicant Masters, Candidate Masters, Unranked Grad or Graduate Certificate; enrollment limited to students in the College of Engineering.

EVE 7990 Directed Study Cr. 1-4

Independent projects on subjects of interest in electric-drive vehicle engineering. Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students with a class of Applicant Masters, Candidate Masters, Unranked Grad or Graduate Certificate; enrollment limited to students in the College of Engineering.

Repeatable for 4 Credits

EVE 7995 Special Topics in Electric-drive Vehicle Engineering Cr. 1-4

A consideration of special subject matter in electric-drive vehicle engineering. Topics to be announced in Schedule of Classes. Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students with a class of Applicant Masters, Candidate Masters, Unranked Grad or Graduate Certificate; enrollment limited to students in the College of Engineering.

Repeatable for 4 Credits

EVE 8999 Master's Thesis Research and Direction Cr. 1-8

Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students with a class of Applicant Masters, Candidate Masters, Unranked Grad or Graduate Certificate; enrollment limited to students in the College of Engineering.

Repeatable for 8 Credits

FIN - FINANCE

FIN 3050 Personal Financial Planning Cr. 3

Principles of finance applied to personal financial affairs. Topics include: goal formation, cash budgeting, time value of money, insurance, real estate, banking, investments, tax planning, pensions, estate planning. Offered Intermittently.

FIN 3290 Business Finance Cr. 3

Principles of financial administration, with applications to problems of financial analysis, control, and planning by firms under changing economic conditions. Offered Every Term.

Prerequisites: May be taken concurrently: BA 2300 with a minimum grade of C

FIN 4500 Business Co-op Assignment Cr. 0

Must be elected by Professional Development Co-operative Program students during work semester. Offered for S and U grades only. No credit toward degree. Opportunity to put theory into practice on the job. Students will normally be assigned to cooperating business organizations for internship periods of one semester. Offered Every Term.

Restriction(s): Enrollment limited to students in the School of Business.

Equivalent: ACC 4500, MGT 4500, MKT 4500

FIN 4990 Directed Study in Finance Cr. 1-3

Advanced readings and research or tutorial under the supervision of a faculty member in areas of special interest to student and faculty member. Offered Every Term.

Prerequisites: ACC 5100 with a minimum grade of D- and FIN 5210 with a minimum grade of D-

Restriction(s): Enrollment is limited to Undergraduate level students; enrollment limited to students in the School of Business.

Repeatable for 6 Credits

FIN 5000 Financial Statement - Analysis & Modeling Cr. 3

Tools and techniques necessary to build dynamic cash flow models. Advanced discussion on the relationship between the financial statements, modeling techniques to professionally present forecasts, valuations and transactional analyses. Successful completion of introductory courses in accounting and finance is required for this class and a basic working knowledge of Microsoft Excel is strongly recommended. Replaces ACC 5000 for finance majors. Offered for undergraduate credit only. Offered Fall, Winter.

Prerequisites: ACC 3010 with a minimum grade of C and FIN 3290 with a minimum grade of C

Restriction(s): Enrollment is limited to Undergraduate level students; enrollment limited to students in the School of Business.

FIN 5090 Capital Markets Cr. 3

Detailed discussion of financial intermediaries; the capital markets; money markets, macroeconomics policies and interest rates. Offered for undergraduate credit only. Offered Fall, Winter.

Prerequisites: May be taken concurrently: FIN 3290 with a minimum grade of B

Restriction(s): Enrollment is limited to Undergraduate level students.

FIN 5215 Security Analysis and Portfolio Management Cr. 3

Focus on modern portfolio analysis; how characteristics of a portfolio differ significantly from those of the securities from which they are formed; investigation of the Capital Asset Pricing Model (CAPM) and Arbitrage Pricing Theory (APT). Tools to manage investment risks, detect mispriced securities, and measure performance of investment managers. Offered for undergraduate credit only. Offered Fall, Winter.

Prerequisites: May be taken concurrently: FIN 5000 with a minimum grade of C and BA 3400 with a minimum grade of C and FIN 3290 with a minimum grade of C

Restriction(s): Enrollment is limited to Undergraduate level students; enrollment limited to students in the School of Business.

FIN 5220 Portfolio Management Cr. 3

Principles of portfolio construction and administration applicable to various institutions including banks, insurance companies, mutual funds, and pension trusts. Offered for undergraduate credit only. Offered Fall, Winter.

Prerequisites: FIN 5215 with a minimum grade of D-

Restriction(s): Enrollment is limited to Undergraduate level students; enrollment limited to students in the School of Business.

FIN 5270 Advanced Business Finance Cr. 3

Risk analysis, working capital management, capital budgeting and valuation theories. Role of financial management in maximizing value of the firm. Offered for undergraduate credit only. Offered Fall, Winter.

Prerequisites: FIN 3290 with a minimum grade of C and BA 2300 with a minimum grade of C and May be taken concurrently: FIN 5000

Restriction(s): Enrollment is limited to Undergraduate level students; enrollment limited to students in the School of Business.

FIN 5280 Entrepreneurs' Ecosystem Cr. 3

Focuses on resources available to the entrepreneur. Exposes the students to angel and superangel funding, microloans, crowdfunding, and various types of the venture capital funding avenues. Examines the challenges of financing and structuring a deal with financiers. Provides experience in pitching a business idea and understanding the anatomy of a successful business plan. Offered Winter.

Prerequisite: FIN 3290 with a minimum grade of C and FIN 5270 with a minimum grade of C

FIN 5320 Principles of International Finance Cr. 3

Financial management in an international context. Determination of exchange rates; their effect on the economy and financial securities; operation of multinational firms (MNCs) in this environment. Measurement and management of MNC exchange-rate exposures; tax regulatory arbitrage; international portfolio investment; determination of cost of capital for a foreign direct investment project and construction of its capital budget. Offered for undergraduate credit only. Offered Fall, Winter.

Prerequisites: FIN 3290 with a minimum grade of C

Restriction(s): Enrollment is limited to Undergraduate level students; enrollment limited to students in the School of Business.

FIN 5330 Bank Management Cr. 3

Analysis of the functional areas of management of banks and related financial institutions, including deposits, cash, loans and asset accounts. Discussion of current topics including liquidity, capital adequacy, electronic fund transfers and mortgages. Offered for undergraduate credit only. Offered Intermittently.

Prerequisites: FIN 3290 with a minimum grade of C

Restriction(s): Enrollment is limited to Undergraduate level students; enrollment limited to students in the School of Business.

FIN 5340 Valuation Cr. 3

Asset valuation is at the heart of intelligent financial decision-making, whether that takes the form of portfolio allocation, in deciding the appropriate price to pay or receive in a corporate merger or acquisition, investing in publicly traded securities or private firms, valuation of real estate, even valuing intangible assets such as brands. This course will provide you with the necessary tools, techniques, and models to address almost any valuation problem in finance. Offered Yearly.

Prerequisites: FIN 5270 with a minimum grade of C-

FIN 5890 Internship in Finance Cr. 3

Minimum ten-page paper (excluding exhibits) discussing a problem or opportunity facing the sponsor organization, application of financial concepts, and outcomes relative to the problem or opportunity; summary presentation to department chairperson. Offered for undergraduate credit only. Offered Intermittently.

Restriction(s): Enrollment is limited to Undergraduate level students; enrollment limited to students in the School of Business.

FIN 6240 Financial Management for Engineers Cr. 4

Principles of financial reporting, financial analysis, and cost accounting relevant to effective engineering project management. Offered for undergraduate credit only. Offered Fall.

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students in the MS in Industrial Engineering program.

FIN 6996 Corporate Financial Strategies Cr. 3

Advanced financial strategies dealing with cost of capital, mergers and other corporate reorganizations, investment banking and capital acquisition, dividend policy, lease financing, pension funds, convertible securities, international perspectives. Offered for undergraduate credit only. Offered Fall, Winter.

Prerequisites: FIN 5000 with a minimum grade of C and FIN 5215 with a minimum grade of C and FIN 5270 with a minimum grade of C

Restriction(s): Enrollment is limited to Undergraduate level students; enrollment limited to students in the School of Business.

FIN 6997 Derivative Securities Cr. 3

Valuation of options, futures and swaps contracts on equities, fixed instrument securities and foreign exchange; use of these derivatives for risk management; brief review of empirical evidence. Offered for undergraduate credit only. Offered Fall, Winter.

Prerequisites: FIN 5215 with a minimum grade of C

Restriction(s): Enrollment is limited to Undergraduate level students; enrollment limited to students in the School of Business.

FIN 7000 Applied Financial Analysis Cr. 3

This course will bridge the gap between the study of financial theory in the classroom and the practical application of financial analysis in the home or workplace. A laptop with the most recent version of Excel will be required in every class session. Offered Intermittently.

Prerequisite: BA 7020

Restriction(s): Enrollment is limited to Graduate level students.

FIN 7015 Managerial Economics and Quantitative Methods Cr. 3

Key concepts such as economic efficiency, cost-benefit analysis, break-even analysis and opportunity cost. Salient macroeconomics concepts including money supply, interest rate determination, employment growth rate and how they affect firm-level decision making. Offered Fall.

Restriction(s): Enrollment is limited to Graduate level students.

FIN 7090 Money and Capital Markets Cr. 3

Financial intermediaries; the capital markets; the money market and interest rates. Offered Fall, Winter.

Prerequisites: BA 7020 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

FIN 7220 Advanced Managerial Finance Cr. 3

Advanced topics in managerial finance, including leasing, merger valuation, reorganization, interactions of investment and financing decisions, and critical evaluation of alternative firm valuation theories. Offered Fall, Winter.

Prerequisites: BA 7020 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

FIN 7229 Corporate Valuation: Techniques, Models and Strategic Applications Cr. 3

Tools, techniques and models used to address valuation problems in finance; emphasis on corporate strategic valuation. Offered Yearly.

Prerequisites: BA 7020 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

FIN 7230 Investment Policies Cr. 3

The key determinants of security prices under changing economic conditions. Theories, strategies and techniques for selection, timing, and diversification; methods of portfolio construction and administration. Offered Fall, Winter.

Prerequisites: BA 7020 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

FIN 7270 Entrepreneurs' Ecosystem Cr. 3

The course focuses on resources available to the entrepreneur, such as incubators and accelerators as well as on the various forms of financing the entrepreneur can access at different stages of growth. While examining the unique financial issues start-ups face, students are exposed to angel and superangel funding, microloans, crowdfunding, and various types of the venture capital funding avenues. From the entrepreneur's point of view, students gain experience in pitching a business idea and learn the anatomy of a successful business plan. Offered Spring/Summer.

Prerequisite: BA 7020 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

FIN 7280 Entrepreneurial Finance and Venture Capital Cr. 3

Focuses on the venture capital (VC) cycle and understanding and analyzing the unique financial issues which entrepreneurial start-up firms face. Two distinct perspectives are provided: (a) issues that relate to the venture capitalist and (b) issues that relate to the entrepreneur. As a result, the course should be of interest to those pursuing careers in an entrepreneurial setting as well as those who are interested in a career in venture capital firm, management buyouts or private equity firm. Offered Fall, Winter.

Prerequisites: BA 7020 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

FIN 7290 Topics in Finance Cr. 3

Current developments in such areas as: working capital management, mergers and acquisitions, pension fund management, use of options and futures, high-risk debt management, hybrid securities, management of financial institutions, international financial issues, or market microstructure. Offered Yearly.

Prerequisites: BA 7020 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

Repeatable for 6 Credits

FIN 7330 Fixed Income Securities Cr. 3

Covers the pricing of fixed income securities, examining topics such as bond mathematics, term structure of interest rates, measurement of interest rate risk using duration and convexity, yield spreads, spot and forward rates, and fixed income portfolio management. Offered Yearly.

Prerequisite: BA 7020 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

FIN 7340 Futures and Options Cr. 3

Valuation of options, futures and swaps contracts on equities, fixed instrument securities and foreign exchange; use of these derivatives for risk management. Offered Yearly.

Prerequisites: FIN 7230 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

FIN 7777 Corporate Financial Consulting Cr. 3

Provides an overview of the largest and most common categories of business consultancies, examples of the tools and techniques used to solve corporate finance problems, and group projects to address case study problems based on real world fact patterns. Offered Intermittently.

Prerequisite: FIN 7220 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

FIN 7870 International Finance Cr. 3

Identification of basic factors affecting exchange rates; roles of central banks and international monetary system. Exchange-rate forecasting, balance of payments, international economic linkages. Management of foreign exchange risk (translation, transaction, and economic exposure) by hedging with financial derivative securities and using operational hedges that deal with marketing and production strategies. In-depth analysis of multinational companies' investment in foreign countries; cost-of-capital and capital-budgeting issues. Offered Yearly.

Prerequisites: BA 7020 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

FIN 7890 Internship in Finance Cr. 3

Students work a minimum of 160 hours for fifteen weeks in an entry-level management position in finance. Offered Intermittently.

Prerequisites: BA 7020 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

FIN 7900 Mergers and Acquisitions Cr. 3

An in depth examination of the valuation complexities encountered in corporate restructuring and corporate change of control. The primary topics covered include the Mergers and Acquisitions (M&A) process, valuation using methods of comparables, precedent transactions, and Discounted Cash Flow (DCF) analysis. Financing M&A transactions, particularly using different kinds of debt used in leveraged buyouts will be discussed. Offered Intermittently.

Prerequisites: BA 7020 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

FIN 7990 Portfolio Management/Student Managed Investment Fund (SMIF) Cr. 3

Exposes business students to practical security analysis techniques and investing approaches employed by professional investment managers. Recommended for those students seeking careers in investing, portfolio management, financial analysis, and related financial service industries. Offered Intermittently.

Prerequisites: BA 7020 with a minimum grade of C

FIN 7995 Directed Study Cr. 1-3

Advanced independent readings and research under the supervision of a graduate faculty member in areas of special interest to student and faculty member. Offered Every Term.

Prerequisites: BA 7000 with a minimum grade of C and BA 7020 with a minimum grade of C and BA 7040 with a minimum grade of C and BA 7050 with a minimum grade of C and BA 7070 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

Repeatable for 5 Credits

FPC - FINE ARTS: INTERDISCIPLINARY

FPC 1010 Math for the Arts Cr. 3

Satisfies General Education Requirement: Quantitative Experience Comp

An introduction to quantitative reasoning, with the aim of developing the capacity to comprehend and analyze the quantitative information that is prevalent in daily life, with a particular focus on the arts. Topics include problem solving with shape and form and mathematical modeling of consumer finance. Offered Every Term.

FPC 1020 Wayne Experience: Building a Foundation for College Success Cr. 1

Satisfies General Education Requirement: Wayne Experience

This course is designed to expose students to the Wayne State University undergraduate experience. Students will gain an understanding of campus resources, institutional values, and the merits of a liberal arts education from an urban research one university. This course will aid in the development of critical and analytical thinking skills necessary for college success while determining one's academic and professional goals. Offered Fall, Winter.

Restriction(s): Enrollment limited to students with a class of Freshman.

FPC 1100 Computing in the Arts Cr. 2

Practical experience in web design, digital imaging and digital audio manipulation and discussion of relationship between digital arts and culture. Offered Intermittently.

Restriction(s): Enrollment is limited to Undergraduate level students.

Course Material Fees: \$10

FPC 5010 Special Topics Cr. 1-3

Offered Yearly.

Repeatable for 6 Credits

FPC 5025 Entrepreneurship in the Arts Cr. 3

Explores the possibilities of entrepreneurship as a career/life option.

Students will identify the intersection of the arts, arts culture, entrepreneurship and the individual to provide a practical and meaningful guide to creating a professional career in the arts. Offered Winter.

FPC 5660 Creativity Cr. 3

Theoretical and experiential exploration in creativity and its relation to individuals, organizations, and the entrepreneurial process. Offered Fall.

FPC 5990 CFPCA Service-Learning Cr. 0

Corequisite course used to designate the service-learning component of specified CFPCA courses. Maximum of three registrations allowed. Offered Intermittently.

FPH - FAMILY PUBLIC HEALTH

FPH 7010 Urban Community Assessment and Planning Cr. 1

Designed to provide students an introduction to the public health landscape of an urban community. Students will be traveling around an assigned community in which they will observe, assess, analyze and prioritize needs and goals, which promote public health. A group community assessment along with a presentation will include data collection, an analysis of data and prioritization of health objectives. Required of all MPH students in the Public Health Practice concentration. Offered Fall, Spring/Summer.

Restriction(s): Enrollment is limited to Graduate level students.

FPH 7015 Biostatistics I Cr. 3

Descriptive statistics; elementary probability; measures of central tendency and of dispersion; random samples; probability distributions including the binomial, the Poisson, the normal, the t, the chi-square, and the F; introduction to estimation and hypothesis testing; rates and vital statistics. Online version is offered for non-M.P.H. students only during winter semesters. Offered Fall, Winter.

Restriction(s): Enrollment is limited to Graduate level students.

FPH 7020 Biostatistics II Cr. 3

Statistical models for health-related fields. Analysis of variance, experimental design, linear regression, logistic regression and proportional hazards models. Topic include simple and multivariable models, model fitting procedures, model diagnostics and multiple comparisons procedures. Application of these methods to health-related data. Offered Winter.

Prerequisites: FPH 7015 with a minimum grade of B

Restriction(s): Enrollment is limited to Graduate level students.

FPH 7100 Health Care Organization and Administration Cr. 3

General overview of the U.S. health care system; social and organizational aspects of the delivery, financing, utilization, planning, and development of health care systems. Offered Winter, Spring/Summer.

Restriction(s): Enrollment is limited to Graduate level students.

FPH 7120 Global Public Health Cr. 3

Addresses global public health issues that impact populations, with the major objective of health equity. Public health principles and techniques are applied using a multidisciplinary approach to prevention and risk reduction strategies. Offered Spring/Summer.

Restriction(s): Enrollment is limited to Graduate level students.

FPH 7150 Probability and Inference Cr. 4

Mathematical foundation of statistics based on principle of probability. It covers notions of probability, conditional probability, Bayes' theorem, random variables discrete/continuous, expectation and standard deviation, moment generating function, bivariate distribution, special sampling distribution (e.g. chi-square, t, F-distribution etc.), CLT, sufficiency, completeness, point estimation, MLE, unbiased and UMVUE, testing of hypothesis, UMP test, LRT, confidence interval, etc. Offered Intermittently.

Restriction(s): Enrollment is limited to Graduate or Professional level students; enrollment is limited to students with a major, minor, or concentration in Biostatistics, Public Health or Public Health Practice.

FPH 7160 Linear Regression and ANOVA Cr. 3

Statistical methods utilized in linear regression and analysis of variance (ANOVA). Theoretical underpinnings of linear model techniques are emphasized with a focus on gaining practical knowledge in linear model data analysis in public health. Topics will include model building strategies, assumption checking and the theoretical aspects of general hypothesis testing. Offered Intermittently.

Restriction(s): Enrollment is limited to Graduate level students.

FPH 7210 Research Methods for Public Health Professionals Cr. 3

Logic of research design, formulation of public health research problems and objectives; development of hypotheses, specification of variables; sampling; random assignment; issues in measurement, qualitative and quantitative data collection; error; analyses. Required of all MPH students in the Public Health Practice concentration. Offered Fall.

Prerequisites: May be taken concurrently: FPH 7015 with a minimum grade of B and May be taken concurrently: FPH 7240 with a minimum grade of B

Restriction(s): Enrollment is limited to Graduate level students.

FPH 7230 Health Program Evaluation Cr. 3

Principles and application of program evaluation in health care fields. Design, implementation, and management of evaluations in health environments. Offered Fall, Spring/Summer.

Restriction(s): Enrollment is limited to Graduate level students.

FPH 7240 Epidemiology Cr. 3

Epidemiologist's task list; research of problems without known etiology; infectious and non-infectious models; examination of current problems. Offered Fall.

Restriction(s): Enrollment is limited to Graduate level students.

FPH 7250 Applied Epidemiology Cr. 3

Epidemiological principles, practice, and methodology as applied to researchable health delivery or health questions. Emphasis on design, conduct and analysis of non-experimental studies; student design of epidemiological study. Offered Winter.

Prerequisites: FPH 7015 with a minimum grade of B and FPH 7240 with a minimum grade of B

Restriction(s): Enrollment is limited to Graduate level students.

FPH 7260 Epidemiologic Methods Cr. 2

Methodologic concepts underlying the science of epidemiology; conduct and interpretation of epidemiologic studies. Emphasis on elements of observational study design, data analysis, and inference, including issues related to causation, bias, and confounding. Offered Intermittently.

Prerequisites: FPH 7015 with a minimum grade of B and FPH 7240 with a minimum grade of B

Restriction(s): Enrollment is limited to Graduate level students.

FPH 7270 Applied Research Methods in Urban Public Health Cr. 3

Focuses on applying quantitative methods to multiple data sets to answer analytic questions, completion of an individualized small project from hypothesis to methods to analysis and discussion that utilizes urban health focused data provided to students. Qualitative methods will be included. Offered Fall.

Prerequisites: FPH 7010 with a minimum grade of B- and FPH 7020 with a minimum grade of B- and FPH 7100 with a minimum grade of B- and FPH 7240 with a minimum grade of B- and FPH 7250 with a minimum grade of B- and FPH 7320 with a minimum grade of B- and FPH 7350 with a minimum grade of B- and FPH 7420 with a minimum grade of B-

Restriction(s): Enrollment is limited to Graduate level students.

FPH 7280 Public Health Community Level Intervention Science Cr. 3

Focuses on intervention science as it pertains to improving public health, with an emphasis on intervening at the community and institutional rather than individual level. The course focuses on systematic, theoretical, and model-driven approaches for developing, implementing, and evaluating evidence-based public health interventions in community settings. Offered Fall.

Prerequisites: FPH 7010 with a minimum grade of B- and FPH 7020 with a minimum grade of B- and FPH 7100 with a minimum grade of B- and FPH 7240 with a minimum grade of B- and FPH 7250 with a minimum grade of B- and FPH 7320 with a minimum grade of B- and FPH 7350 with a minimum grade of B- and FPH 7420 with a minimum grade of B-

Restriction(s): Enrollment limited to students in a Master in Public Health degree.

FPH 7300 Health Care Policy Cr. 3

Concepts, issues, and problems in health care policy; substantive information regarding policy formulation and content. Offered Intermittently.

Restriction(s): Enrollment is limited to Graduate level students.

FPH 7320 The Social Basis of Health and Health Care Cr. 3

Social, cultural, and psychological aspects of health and health-related behavior. Topics include: health prevention and promotion, relationship between stress and illness, health services utilization, patient-practitioner interactions, and coping with chronic illness. Offered Fall, Spring/Summer.

Restriction(s): Enrollment is limited to Graduate level students.

FPH 7340 Generalized Linear Models and Categorical Data Cr. 4

Statistical analysis of categorical and non-normal data, with an emphasis on the cohesive approach of generalized linear models. Specific types of models to be examined include logistic regression, probit regression, and log-linear models. Offered Intermittently.

Prerequisites: FPH 7150 with a minimum grade of B and FPH 7160 with a minimum grade of B

Restriction(s): Enrollment is limited to Graduate level students.

FPH 7350 Statistical Programming for Public Health Practice Cr. 2-3

Statistical programming using R and SAS in public health. SAS topics include error checking, reading datasets, coding and formatting variables, writing reports, tables, and graphs. R topics include data visualization and analysis, numeric optimization and bootstrapping. Offered Spring/Summer.

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students in the School of Medicine.

FPH 7370 Health, Disease, and Aging Cr. 3

Study of health, health problems, and medical care of aging populations. Biomedical, psychosocial and public health aspects of later life illness; family, community, and societal response to health problems; hospital and longterm care; disparities in health and medical care. Offered Intermittently.

Restriction(s): Enrollment is limited to Graduate level students.

FPH 7390 Biostatistical Methods in Epidemiology Cr. 4

Application and interpretation of biostatistical methods used in epidemiologic studies. Topics include: approaches to missing data, sensitivity analysis, bootstrap methods, statistical power, sample size estimation, and analysis of ordinal exposures and outcomes. Offered Intermittently.

Prerequisites: FPH 7020 with a minimum grade of B and FPH 7260 with a minimum grade of B

Restriction(s): Enrollment is limited to Graduate level students.

FPH 7420 Principles of Environmental Health Cr. 3

Current environmental health issues that affect individuals at work and in their communities. Sources of chemical, physical, and biological agents; their associated health effects. Air pollution, exposure prevention, water and solid waste management, and occupational health and safety. Impact of environmental exposures on human health; case studies. Offered Fall, Winter.

Restriction(s): Enrollment is limited to Graduate level students.

FPH 7430 Application of Public Health Principles Cr. 2

Provides exposure and skill development in a broad and diverse range of public health projects and associated methods while working to develop an applied learning project proposal including grant development and budgeting. Offered Fall.

Prerequisites: FPH 7015 with a minimum grade of B- and FPH 7100 with a minimum grade of B- and FPH 7240 with a minimum grade of B- and FPH 7320 with a minimum grade of B- and FPH 7420 with a minimum grade of B-

Restriction(s): Enrollment limited to students in a Master in Public Health degree.

FPH 7440 Practicum in Public Health Cr. 3

Individual field experience in public health setting. Integration and synthesis of content and experiences of the public health courses; direct hands-on experience, with appropriate reporting mechanism. Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students.

FPH 7460 Linear Mixed Models Cr. 3

Statistical modeling to incorporate random effects. Topics will include clustered-data analysis, longitudinal data analysis, hierarchical linear models, correlated data, and covariance structure. Offered Intermittently.

Prerequisites: FPH 7150 with a minimum grade of B or FPH 7160 with a minimum grade of B

Restriction(s): Enrollment is limited to Graduate level students.

FPH 7480 Design of Experiments and Clinical Trials Cr. 3

Introduction to five different types of experimental designs and design and analytic issues that arise in each of the study designs. Extension of the designs to clinical trials and microarray experiments are discussed. Offered Intermittently.

Restriction(s): Enrollment is limited to Graduate level students.

FPH 7500 Survival Analysis Cr. 3

Statistical methods for analyzing survival data, including parametric and nonparametric approaches. Topics include Kaplan-Meier estimation, log rank test, and proportional hazards regression analysis. Offered Intermittently.

Prerequisites: FPH 7150 with a minimum grade of B or FPH 7160 with a minimum grade of B

Restriction(s): Enrollment is limited to Graduate level students.

FPH 7510 Community Health: Detroit Initiatives Cr. 2-3

Current urban health initiatives examined using a range of social science frames; focus on field work skills, perspectives, and methodologies useful for working with ongoing community-based initiatives and grass-roots organizations. Includes optional field experience for 1 credit. Offered Intermittently.

Restriction(s): Enrollment is limited to Graduate level students.

FPH 7760 Community Health Education Cr. 3

Analysis of community health problems and change strategies for health promotion; application of principles and techniques of community health education to multiple ethnic groups and diverse health problems. Offered Spring/Summer.

Restriction(s): Enrollment is limited to Graduate level students.

FPH 7780 Emergent Topics in Public Health Cr. 3

Selected public health topics or emerging fields in public health practice, including environmental health, social behavioral health, epidemiology, biostatistics, and healthcare leadership and management. Offered Intermittently.

Restriction(s): Enrollment is limited to Graduate level students.

FPH 7860 Principles of Occupational Health Cr. 3

Current occupational health issues; interplay between work environment and worker health. Through case studies, students employ integrative approaches to ensure worker safety and to optimize worker health, well-being and performance. Offered Winter.

Restriction(s): Enrollment is limited to Graduate level students.

FPH 7870 Occupational Health Psychology Cr. 3

Theory and research on relationships between the work environment and employee health and well-being; development and maintenance of health people within healthy organizations and the prevention of illness and injuries. Offered Intermittently.

Restriction(s): Enrollment is limited to Graduate level students.

FPH 7880 Organizational Determinants of Employee Health and Productivity Cr. 3

Organizational and leadership theories, research and practical applications of practices and processes contributing to employee health and productivity; emphasis on service and knowledge workers, that make up 80 percent of the workforce. Offered Intermittently.

Restriction(s): Enrollment is limited to Graduate level students.

FPH 7990 Directed Studies in Community Health Services Cr. 1-6

Studies dealing with the public health practice and research to supplement regular course offerings. An approved directed study proposal is required prior to registration. Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students.

FPH 8990 Master's Project Cr. 1-3

Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students.

FPH 8991 Master's Project Seminar Cr. 3

This is a seminar in which faculty and students interact in a variety of in-class writing activities to support development of individually prepared scholarly products. This course fulfills the Master's Project requirements for completion of the MPH degree. Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students.

FPH 8999 Master's Thesis Research and Direction Cr. 2-8

Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students.

Repeatable for 8 Credits

FRE - FRENCH

FRE 1010 Beginning French I Cr. 4

Introduction to the French language and Francophone cultures through interactive and communicative reading, writing, listening, and speaking activities to develop language and cultural proficiency. No experience with French is needed. Offered Every Term.

Course Material Fees: \$5

FRE 1020 Beginning French II Cr. 4

Continuing development of French language and Francophone cultural proficiency through interactive and communicative reading, writing, listening and speaking activities. Offered Every Term.

Prerequisites: FRE 1010 with a minimum grade of D-

Course Material Fees: \$5

FRE 2010 Intermediate French Cr. 4

Satisfies General Education Requirement: Foreign Culture, Global Learning Inquiry

Continuing development of French language and Francophone cultural proficiency through interactive and communicative reading, writing, listening and speaking activities. Completion of this course fulfills the General education requirement for foreign language and culture. Offered Every Term.

Prerequisites: FRE 1020 with a minimum grade of D-

Course Material Fees: \$5

FRE 2100 French through Film I Cr. 4

Increased mastery in French and Francophone linguistic and cultural proficiency through film and interactive and communicative reading, writing, listening and speaking activities. Offered Fall.

Prerequisites: FRE 2010 with a minimum grade of D-

FRE 2110 French through Film II Cr. 4

Increased mastery in French and Francophone linguistic and cultural proficiency through film and interactive and communicative reading, writing, listening and speaking activities. Offered Winter.

Prerequisites: FRE 2010 with a minimum grade of D-

FRE 2700 Anguish and Commitment: European Existentialist Literature Cr. 3-4

Satisfies General Education Requirement: Cultural Inquiry, Philosophy Letters

A team-taught interdisciplinary study in English of representative works by European existentialist writers: Dostoevsky, Hesse, Kafka, Pirandello, Sartre, Camus and Unamuno. Offered Every Other Year.

Equivalent: GER 2700, ITA 2700, SPA 2700

FRE 2710 Introduction to French Civilization I Cr. 3

Satisfies General Education Requirement: Civ and Societies (CLAS only), Foreign Culture, Global Learning Inquiry

An overview of France's great contributions to world culture, from the time of the Gauls to the French Revolution. French history, thought, art, architecture, society, geography, and institutions; illustrated with slides and films; includes visits to Detroit Institute of Arts. Offered Every Term.

FRE 2720 Introduction to French Civilization II Cr. 3

Satisfies General Education Requirement: Civ and Societies (CLAS only), Foreign Culture, Global Learning Inquiry

From the French Revolution to contemporary times. French way of life, its moral and intellectual foundations, its culture and institutions; their transformation under the stress of the twentieth century. Offered Every Other Year.

FRE 2991 Understanding the Fairy Tale Cr. 3

Satisfies General Education Requirement: Cultural Inquiry, Philosophy Letters

Fairy tale's meaning and role in Western society from the Brothers Grimm to Walt Disney. Methods of fairy-tale interpretation. All lectures and reading in English. Offered Every Other Year.

Equivalent: GER 2991

FRE 3200 French Cafe Cr. 3

Students hone their speaking skills through discussions and debates about French and Francophone culture (film, television, graphic novels, podcasts) and current events. Offered Winter.

Prerequisites: FRE 2100 with a minimum grade of D- or FRE 2110 with a minimum grade of D-

FRE 3300 Prose, Poetry, and Performance Cr. 3

An initiation into the reading of various literary genres. Study of methods and vocabulary to enable students to discuss and analyze essays, poems, short novels, and plays. Offered Winter.

Prerequisites: FRE 2100 with a minimum grade of D- or FRE 2110 with a minimum grade of D-

FRE 4620 Topics in Sociocultural Analysis Cr. 3

Initiation into reading a range of different media, verbal and visual, in French and francophone cultural texts, from poetry to prose (fictional and non-fictional), to painting, photography, architecture, and other media. Offered Winter.

Prerequisites: 2 of FRE 2100, FRE 2110, FRE 3200, FRE 3300

FRE 5000 Minor Language Practicum Cr. 3

Controlled application of active language skills for students electing a Ph.D. minor in French. No degree credit toward Ph.D. Offered for graduate credit only. Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students.

Repeatable for 9 Credits

FRE 5100 Advanced Composition Cr. 4

Satisfies General Education Requirement: Writing Intensive Competency Focus on advanced composition skills through a close analysis of different types of texts with the goal of developing vocabulary and advanced writing and speaking abilities. Offered Winter.

Prerequisites: 2 of FRE 2100, FRE 2110, FRE 3200, FRE 3300

FRE 5200 French Phonetics and Pronunciation Cr. 3

Systematic study of French sounds and their relation to orthography, morphology, and grammar; syllable structure and phonetic transcription; prosody and intonation; intensive oral, aural, and written practice Offered Winter.

Prerequisites: 2 of FRE 2100, FRE 2110, FRE 3200, FRE 3300

FRE 5410 Topics in French and Francophone Culture Cr. 3

Students will explore French and Francophone culture from the perspective of political, cultural, and/or social history. Topics could include war, women, popular culture, childhood, colonialism and postcolonialism; the course may focus on a single period or provide a diachronic overview. Topics to be announced in the Schedule of Classes. Offered Every Other Fall.

Restriction(s): Enrollment is limited to Undergraduate level students.

FRE 5415 Topics in French and Francophone Literature Cr. 3

Students will explore French and Francophone literature from the perspective of political history, aesthetic history, cultural history, and/or social history. Topics might include: the diachronic study of a genre like theater or the fairy tale; themes such as gender, travel, the Other; a geographical focus such as North African or Quebecois and Franco-Canadian literature. Topics to be announced in the Schedule of Classes. Offered Every Other Fall.

Restriction(s): Enrollment is limited to Undergraduate level students.

FRE 5600 Translation Studies Cr. 3

Introduces students to the study of translation, both as theory and practice, through the discussion of key texts in translation theory, and weekly practice focused on the acquisition of different translation techniques and improving students' idiomatic French. Students will polish their language skills while exercising their creative faculties through translations of various texts from different genres: newspaper articles, graphic novels, poems, diaries, song lyrics, print ads, etc. Offered Fall.

Prerequisites: 2 of FRE 3300, FRE 4620, FRE 5100

FRE 5990 Directed Study Cr. 1-4

Offered Every Term.

Repeatable for 8 Credits

FRE 5999 Internship in French Studies Cr. 3

Internship in a public or private organization related to French Studies. Offered for undergraduate credit only. Offered Every Term.

Prerequisite: FRE 3200 with a minimum grade of C- or FRE 3300 with a minimum grade of C-

Restriction(s): Enrollment is limited to students with a major, minor, or concentration in French or French Honors.

FRE 6200 Renaissance to Revolution Cr. 3

Offers a panoramic view of the literary and cultural landscape from the French Renaissance to the Revolution through the study of influential texts of prose, poetry, and theater. The texts studied will range from the early sixteenth century and the period of the Sun King to the philosophes. Offered Every Other Fall.

Prerequisites: 2 of FRE 3300, FRE 4620, FRE 5100, FRE 5600

FRE 6300 Modernity, Postmodernity, and Extreme Contemporain Cr. 3

Offers a panoramic view of the modern, postmodern, and contemporary periods through the study of influential texts of prose, poetry, and theater. The texts studied will range from the early nineteenth century and la Belle Epoque to the two World Wars and the contemporary period. Offered Every Other Fall.

Prerequisites: 2 of FRE 3300, FRE 4620, FRE 5100, FRE 5600

FRE 6400 Introduction to French Linguistics Cr. 3

Study of the historical development of French language standardization, language varieties, and various linguistic systems at work in the French language (e.g., phonology, morphology, syntax, semantics). Offered Every Other Year.

Prerequisites: FRE 5200 with a minimum grade of D-

FRE 6620 Topics in Sociocultural Analysis Cr. 3

Initiation into reading a range of different media, verbal and visual, in French and francophone cultural texts, from poetry to prose (fictional and non-fictional), to painting, photography, architecture, and other media. Offered Winter.

Restriction(s): Enrollment is limited to Graduate level students.

Repeatable for 9 Credits

FRE 6770 Studies in French Literature Cr. 3

Study of one of the major literary genres: prose, poetry or drama; its development from origins to present time. Emphasis on textual analysis. Topics to be announced in Schedule of Classes. Offered Every Other Year.

Prerequisites: 2 of FRE 3300, FRE 4620, FRE 5100, FRE 5600

FRE 7010 Introduction to Literary Theory Cr. 3

Graduate-level introduction to key critical perspectives, theories, problems, and questions that have informed the discussions and analyses of twentieth- and twenty-first-century literary and cultural scholars. Specific theoretical paradigms used to determine the task of textual interpretation, locate the limits of each approach, trace the emergence of subsequent theoretical paradigms, and think about how such theories might or might not be relevant in the study of specific texts. Offered Every Other Year.

Restriction(s): Enrollment is limited to Graduate level students.

Equivalent: CLA 7010, GER 7010, ITA 7010, NE 7010, SLA 7010, SPA 7010

FRE 7770 Special Studies in French Literature Cr. 3-4

Works of an outstanding writer, a literary genre, or of literary trends. Offered Intermittently.

Restriction(s): Enrollment is limited to Graduate level students.

Repeatable for 8 Credits

FRE 7996 Research Project Cr. 1-4

Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students.

Repeatable for 12 Credits

FRE 7999 Master's Essay Direction Cr. 1-3

Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students with a class of Candidate Masters.

FRE 8410 Topics in French and Francophone Culture Cr. 3

In this course, students will explore French and Francophone culture from the perspective of political, cultural, and/or social history. Topics could include war, women, popular culture, childhood, colonialism and postcolonialism; the course may focus on a single period or provide a diachronic overview. Topics to be announced in the Schedule of Classes. Offered Every Other Fall.

Restriction(s): Enrollment is limited to Graduate level students.

Repeatable for 9 Credits

FRE 8415 Topics in French and Francophone Literature Cr. 3

In this course students will explore French and Francophone literature from the perspective of political history, aesthetic history, cultural history, and/or social history. Topics might include: the diachronic study of a genre like theater or the fairy tale; themes such as gender, travel, the Other; a geographical focus such as North African or Quebecois and Franco-Canadian literature. Topics to be announced in the Schedule of Classes. Offered Every Other Fall.

Restriction(s): Enrollment is limited to Graduate level students.

Repeatable for 9 Credits

FRE 8600 Seminar in Early Modern Studies Cr. 3

Advanced special topics on early modern literature and culture. Topics to be announced in the Schedule of Classes. Offered Every Other Winter.

Restriction(s): Enrollment is limited to Graduate level students.

Repeatable for 9 Credits

FRE 8610 Seminar in Modernity, Postmodernity, and Extreme Contemporain Cr. 3

Advanced special topics on modern, postmodern, and contemporary French and Francophone literatures and cultures. Topics to be announced in the Schedule of Classes. Offered Every Other Winter.

Restriction(s): Enrollment is limited to Graduate level students.

Repeatable for 9 Credits

FRE 8999 Master's Thesis Research and Direction Cr. 1-8

Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students with a class of Candidate Masters.

Repeatable for 8 Credits

FRE 9990 Pre-Doctoral Candidacy Research Cr. 1-8

Research in preparation for doctoral dissertation. Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students.

Repeatable for 12 Credits

FRE 9991 Doctoral Candidate Status I: Dissertation Research and Direction Cr. 7.5

Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students.

FRE 9992 Doctoral Candidate Status II: Dissertation Research and Direction Cr. 7.5

Offered Every Term.

Prerequisite: FRE 9991 with a minimum grade of S

Restriction(s): Enrollment is limited to Graduate level students.

FRE 9993 Doctoral Candidate Status III: Dissertation Research and Direction Cr. 7.5

Offered Every Term.

Prerequisite: FRE 9992 with a minimum grade of S

Restriction(s): Enrollment is limited to Graduate level students.

FRE 9994 Doctoral Candidate Status IV: Dissertation Research and Direction Cr. 7.5

Offered Every Term.

Prerequisite: FRE 9993 with a minimum grade of S

Restriction(s): Enrollment is limited to Graduate level students.

FRE 9995 Candidate Maintenance Status: Doctoral Dissertation Research and Direction Cr. 0

Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students.

Course Material Fees: \$370.26

Repeatable for 0 Credits

FYS - FIRST YEAR SEMINAR

FYS 1010 Learning with the Brain in Mind Cr. 1

Satisfies General Education Requirement: Wayne Experience

This is an interactive, collaborative course designed to provide students with the tools needed to simplify for success. The curriculum is holistic in nature as it addresses not only evidence-based learning strategies, but also academic performance enhancing topics such as time-management, stress-management, diversity, wellness, and successfully transitioning from high school to Wayne State University. Offered Fall, Winter.

Restriction(s): Enrollment limited to students with a class of Freshman.

FYS 1020 Preparing for Academic Success and Career Exploration Cr. 2

Through a process of introspection and interactive experiences, this course will improve your writing; enhance your decision making and critical thinking skills and expose you to university resources and to multiple career paths in throughout the university. Offered Fall, Winter.

GEL - GEOLOGY

GEL 1010 Geology: The Science of the Earth Cr. 3

Satisfies General Education Requirement: Natural Scientific Inquiry, Physical Sciences

Introduction to continental drift and plate tectonic theory, geophysics and structure of earth's crust and interior; rocks and minerals; igneous and volcanic geology; work of running water, glaciers and ground water; geologic time; oceanography. One day field trip. Offered Every Term.

GEL 1011 Geology: The Science of the Earth Laboratory Cr. 1

Introduction to continental drift and plate tectonic theory, geophysics and structure of earth's crust and interior; rocks and minerals; igneous and volcanic geology; work of running water, glaciers and ground water; geologic time; oceanography Offered Every Term.

Corequisite: GEL 1010

Course Material Fees: \$15

GEL 1020 Interpreting the Earth Cr. 4

Sedimentary rocks, sedimentary structures and fossils as tools for interpreting the history of the earth. Paleocology of the geologic past and the structure of the earth are emphasized. Offered Fall, Winter.

Prerequisites: GEL 1010 with a minimum grade of C

GEL 1050 Oceanography Cr. 4

Introductory course in oceanography; includes origin of the ocean basins; ocean currents, waves and tides; life in the oceans and marine ecology; food, mineral and energy resources of the sea. Offered Intermittently.

GEL 1370 Meteorology: The Study of Weather Cr. 3

Weather theory including cloud types, cloud formation; types and formation of winds; rain, snow, other precipitation. Storm theory: formation of and dangers in thunderstorms, hurricanes and tornadoes. Atmospheric phenomena: aurora, rainbows, the mirage, twinkling of stars, twilight crepuscular rays; weather forecasting, instruments, maps. Offered Winter.

GEL 2130 Mineralogy Cr. 4

Mineral identification using physical and optical properties. Introduction to petrographic microscope and electron microscope/microprobe. Properties and occurrences of major mineral groups and their environmental significance. Check with instructor for field trip destination; field trip to Canada frequently part of course. Offered Fall.

Course Material Fees: \$125

GEL 3100 Air and Water in Environmental Systems Cr. 3

Development of quantitative skills related to applying an understanding of the basic properties of air and water, and the dynamics of these fluids at rest and in motion, critical to addressing almost any environmental issue. Applications will include the role of air and water in environmental problems at multiple scales (and in both urban and natural settings) and integrating a systems approach. Offered Fall.

Prerequisites: GEL 1010 with a minimum grade of D- and MAT 1800-6ZZZ with a minimum grade of D-

Course Material Fees: \$40

Equivalent: EVS 3100

GEL 3160 Petrology Cr. 4

Classification of igneous and metamorphic rocks using macroscopic and microscopic material and textural characteristics. Occurrence and alteration of each major rock type related to tectonic settings. Mandatory four-day field trip. Offered Winter.

Prerequisites: GEL 1020 with a minimum grade of D- and GEL 2130 with a minimum grade of D-

Course Material Fees: \$125

GEL 3300 Structural Geology Cr. 4

Description and interpretation of features which result from the origin or deformation of rock masses. Offered Winter.

Prerequisites: GEL 1020 with a minimum grade of D-

Course Material Fees: \$125

GEL 3400 Principles of Sedimentology and Stratigraphy Cr. 4

Processes which produce sediments, environments of deposition, changes after deposition. Relationship between tectonics and sedimentation. Origin of sedimentary strata. Facies and correlations. Offered Fall.

Prerequisites: GEL 1020 with a minimum grade of D- and GEL 2130 with a minimum grade of D-

Course Material Fees: \$20

GEL 3450 Principles of Paleontology Cr. 4

The history of life on earth as recorded in the fossil record. Using fossils to document the evolutionary history of plants, animals and ecosystems through geological time, as well as the practical applications of fossil material in stratigraphic correlation, basin analysis and resource exploration. Offered Fall.

Prerequisite: GEL 1010

GEL 3600 Special Topics in Geology Cr. 2-3

Subjects of general interest to geology majors. Topics may include: soil and groundwater pollution; petroleum geology; engineering geology; geochronology; gems and minerals. Offered Intermittently.

Prerequisites: GEL 1010 with a minimum grade of D-

Repeatable for 16 Credits

GEL 3650 Field Geology Cr. 1-10

Field studies involving problems in individual geologic mapping and related techniques. Offered Intermittently.

Repeatable for 16 Credits

GEL 3800 Team Research Cr. 2

Students work in teams to design and implement a fieldwork based geologic research project. Students develop hypotheses, tests, and fieldwork plans, and they make thin sections and collect data on the scanning electron microscope, finishing with poster presentations. Offered Fall.

Prerequisite: GEL 1010 with a minimum grade of D-

GEL 3990 Directed Study Cr. 1-6

Offered Every Term.

Repeatable for 10 Credits

GEL 4200 Geomorphology Cr. 4

Principles underlying development of landforms by geologic agents. Offered Every Other Year.

Prerequisites: GEL 1020 with a minimum grade of D-

Course Material Fees: \$15

GEL 4400 40-Hour HAZWOPER Training Cr. 2

Forty-hour responder-level Hazardous Waste Operations and Emergency Response (HAZWOPER) Training, including safe work practices and regulations, identification and classification of hazardous materials, emergency response, use of PPE and respirators. Offered Winter.

Restriction(s): Enrollment limited to students with a class of Junior or Senior.

Course Material Fees: \$40

GEL 4860 Research Cr. 3-4

Primarily for honors students. Independent laboratory and field work. Offered Every Term.

Repeatable for 8 Credits

GEL 4998 Honors Thesis Cr. 3

Preparation of an Honors thesis on a subject of general interest to geology majors. Satisfactory completion assures Honors graduation, providing performance in preceding Honors courses has been at Honors level; to be taken under direction of Geology faculty. Offered Every Term.
Restriction(s): Enrollment limited to students with a class of Senior.

GEL 5000 Geological Site Assessment Cr. 4

Geologic methods for Phase I Environmental Site Assessments. Application of geostatistics to site characterization. Offered Every Other Year.

Prerequisites: GEL 1010 with a minimum grade of D- or GEL 1000 with a minimum grade of D-

GEL 5120 Environmental Geochemistry Cr. 4

Survey of some of the geochemical interactions which take place in Earth environments (water, soils, atmosphere, etc.) brought about by natural and human-induced chemical processes. Offered Every Other Year.

Prerequisites: CHM 1000-6XXX with a minimum grade of D- and GEL 1010 with a minimum grade of D-

Course Material Fees: \$20

GEL 5150 Soils and Soil Pollution Cr. 4

Physical, chemical and mineralogical properties and classification of soils. Behavior of pollutants in soils and methods for reclamation. Offered Spring/Summer.

Prerequisites: CHM 1220 with a minimum grade of D- and CHM 1230 with a minimum grade of D-

GEL 5210 Applied Geophysics Cr. 4

Introduction to applied geophysical methods used in subsurface exploration. Students will learn the basics of near-surface seismic, gravity, magnetic, electrical resistivity, and electromagnetic methods and data analysis. Offered Every Other Year.

Prerequisites: GEL 1010 with a minimum grade of D-, PHY 2130 with a minimum grade of D-, and PHY 2140 with a minimum grade of D- or PHY 2170 with a minimum grade of D- and PHY 2180 with a minimum grade of D- and MAT 2010 with a minimum grade of D-

Course Material Fees: \$40

GEL 5360 Hydrology of Natural and Urban Environments Cr. 4

Focuses on surface water processes including how water movement, storage and transformation on the Earth's surface is influenced by landscape characteristics, including human modifications of those characteristics, and weather. Offered Every Other Year.

Prerequisites: MAT 1800 with a minimum grade of D-

Course Material Fees: \$55

GEL 5420 Mathematical Methods in Earth Science Cr. 4

An introduction to mathematical methods in Earth Science focusing on an introduction to programming in Matlab, using statistical methods, Monte Carlo, and building towards finite difference numerical methods. Offered Every Other Year.

GEL 5450 Hydrogeology Cr. 4

Characteristics and behavior of groundwater in earth materials. Principles of groundwater flow and solute transport. Introduction to numerical models and methods. Offered Every Other Year.

Prerequisites: GEL 1010 with a minimum grade of D- and MAT 2010-6XXX with a minimum grade of D-

GEL 5510 Environmental Fate and Transport of Pollutants Cr. 4

Basic principles of chemical behavior in the environment; sources, fate, and transport of contaminants. Offered Winter.

Prerequisites: CHM 1220 with a minimum grade of D- or CHM 1240 with a minimum grade of D- or CHM 1230 with a minimum grade of D- or CHM 1250 with a minimum grade of D- and MAT 2010-6XXX with a minimum grade of D-

GEL 5600 Special Topics in Geology Cr. 4

Subjects of general interest to geology majors. Topics may include: mapping; soil and groundwater pollution; petroleum geology; engineering geology; mathematical methods in Earth Science; or others. Offered Intermittently.

Repeatable for 4 Credits

GEL 5610 Special Topics in Geology Cr. 1

Topics may be related themes such as current events, a specific area of geology or the Earth Sciences, or the development of professional skills relevant to careers in the Earth Sciences. Offered Every Other Year.

Repeatable for 3 Credits

GEL 5650 Applied Geological Mapping Cr. 4

Geographic Information Systems (GIS) is a powerful tool for analyzing spatial datasets, and for this reason it can be applied to many geological problems. This course will provide students the necessary skills to use GIS with an emphasis on geological applications. It will focus on geologic aspects of GIS analysis such as spatial analysis, geologic mapping, topographic analysis, and the importation and interpolation of aerial photos/satellite images and field data. Offered Winter.

Prerequisite: GEL 1010 with a minimum grade of C

GEL 5993 Writing Intensive Course in Geology Cr. 0

Satisfies General Education Requirement: Writing Intensive Competency Disciplinary writing assignments under the direction of faculty member. Must be selected in conjunction with course designated as corequisite. See section listing in Schedule of Classes for corequisites available each term. Satisfies the University General Education Writing Intensive Course in the Major requirement. Required for all majors. Offered Every Term.

Prerequisites: May be taken concurrently: GEL 3160 with a minimum grade of D- or GEL 3300 with a minimum grade of D- or GEL 3400 with a minimum grade of D- or GEL 3540 with a minimum grade of D- or AFS 2390 with a minimum grade of C or ENG 2390 with a minimum grade of C or ENG 3010 with a minimum grade of C or ENG 3020 with a minimum grade of C or ENG 3050 with a minimum grade of C

Restriction(s): Enrollment is limited to Undergraduate level students.

GEL 6400 Nuclear Geology Cr. 4

Introduction to various physical and chemical age-dating methods applied to geological and cosmological objects. Offered Every Other Year.

Prerequisites: PHY 2130 with a minimum grade of D- and PHY 2140 with a minimum grade of D- or PHY 2170 with a minimum grade of D- and PHY 2180 with a minimum grade of D- and CHM 1220 with a minimum grade of D- and CHM 1230 with a minimum grade of D- and GEL 1010 with a minimum grade of D-

GEL 6500 Earth Resources and the Environment Cr. 3

Examines the nature of Earth resources, as well as critical issues surrounding these resources. Analyzes the impacts of resource usage on the Earth environment. Covers all major types of Earth resources—energy, metallic, nonmetallic, water, soil. Offered Every Other Year.

Prerequisites: GEL 1010 with a minimum grade of C

GEL 7990 Directed Study in Geology Cr. 2-8

Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students.

Repeatable for 8 Credits

GEL 7997 Research in Geology Cr. 3-4

Independent work in laboratory or field. Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students.

Repeatable for 8 Credits

GEL 8999 Master's Thesis Research and Direction Cr. 1-8

Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students with a class of Candidate Masters.

Repeatable for 8 Credits

GER - GERMAN

GER 1010 Elementary German I Cr. 4

Development of ability to speak and read German. Offered Every Term.
Course Material Fees: \$5

GER 1020 Elementary German II Cr. 4

Continuation of GER 1010. Offered Every Term.
Prerequisites: GER 1010 with a minimum grade of C
Course Material Fees: \$5

GER 2010 Intermediate German Cr. 4

Satisfies General Education Requirement: Foreign Culture, Global Learning Inquiry
Continuation of GER 1020. Reading of graded German literature and grammar review. Offered Every Term.
Prerequisites: GER 1020 with a minimum grade of C
Course Material Fees: \$5

GER 2020 Everyday Encounters in Language and Culture Cr. 4

Solidifies students' ability to express themselves in German with increased clarity and grammatical accuracy when writing and speaking about topics of personal experience (studies, work, family, daily life, leisure time), current events, and issues of general interest. Offered Every Term.
Prerequisites: May be taken concurrently: GER 2010 with a minimum grade of C
Course Material Fees: \$5

GER 2310 Short Fiction from Central Europe and Russia Cr. 3

Satisfies General Education Requirement: Cultural Inquiry, Philosophy Letters
Explores how writers use short fictional forms, such as parable, short story, fairy tale, and satire, to express important themes in the Central European experience, including violence and cruelty, freedom and imprisonment, utopian visions, and urban life. Offered Fall.
Equivalent: SLA 2310

GER 2700 Anguish and Commitment: European Existentialist Literature Cr. 3-4

Satisfies General Education Requirement: Cultural Inquiry, Philosophy Letters
A team-taught interdisciplinary study in English of representative works by European existentialist writers: Dostoevsky, Hesse, Kafka, Pirandello, Sartre, Camus and Unamuno. Offered Every Other Year.
Equivalent: FRE 2700, ITA 2700, SPA 2700

GER 2710 Resistance, Rebellion, Revolution: Transitional Moments in German Culture and History Cr. 3

Satisfies General Education Requirement: Civ and Societies (CLAS only), Foreign Culture, Global Learning Inquiry
Transitional moments in German culture and history from the Middle Ages to the present are examined through literary and non-literary texts and cultural artifacts. Taught in English. Offered Fall.

GER 2991 Understanding the Fairy Tale Cr. 3

Satisfies General Education Requirement: Cultural Inquiry, Philosophy Letters
Fairy tale's meaning and role in Western society from the Brothers Grimm to Walt Disney. Methods of fairy-tale interpretation. All lectures and reading in English. Offered Every Other Year.
Equivalent: FRE 2991

GER 3100 Engaging Historical Moments Cr. 3

Further developing intermediate skills in language and cultural competency, the course explores core moments in German history through a wide range of primary sources, such as print and online journalism, new media, television, as well as popular and canonical literature and film. It may explore a particular moment in detail or examine several core moments in thematic units. Offered Yearly.
Prerequisites: GER 2020 with a minimum grade of C

GER 3200 Exploring Modern Identities Cr. 3

Focuses on contemporary texts from various German language media that reflect the diversity of perspectives and identities in Germany-speaking countries. Consolidates intermediate proficiency skills, particularly in writing and speaking, by exploring language as it is embedded in German culture. Offered Yearly.
Prerequisites: GER 2020 with a minimum grade of C

GER 3410 New Soil, Old Roots: The Immigrant Experience Cr. 3

Satisfies General Education Requirement: Civ and Societies (CLAS only), Diversity Equity Incl Inquiry, Foreign Culture, Global Learning Inquiry
Armenian, German, Jewish, Polish, Russian and Ukrainian immigration to the United States, its effects on the cultures (language, literature, religion, politics, music, art and theatre) of these ethnic groups and its influence upon American life. Offered Fall.
Equivalent: ARM 3410, POL 3410, RUS 3410, SLA 3410

GER 3700 The Changing Face of Europe Cr. 1-2

Special topics relating to Central, Eastern and Western Europe. Offered Intermittently.
Equivalent: POL 3700, RUS 3700, SLA 3700

GER 4600 Products, Perspectives, and Practices of Culture Cr. 3

Introductory seminar in German Studies, designed to build skills in critical reading, research and writing. Focus is on a selected literary or cultural topic. Offered Intermittently.
Prerequisites: GER 3100 with a minimum grade of C and GER 3200 with a minimum grade of C

GER 5000 German Practicum Cr. 3

Controlled application of active language skills for students electing a Ph.D. minor in German, or German as a graduate reading language. No Ph.D. degree credit. Offered for graduate credit only. Offered Every Term.
Restriction(s): Enrollment is limited to Graduate level students.
Repeatable for 9 Credits

GER 5100 Advanced Rhetoric and Composition Cr. 3

This course expands and refines students German communication skills with a special emphasis on communicating in oral and written discourse in both academic and professional contexts. Offered Every Other Year.
Prerequisites: GER 3100 with a minimum grade of C and GER 3200 with a minimum grade of C

GER 5210 German Translation Studies Cr. 3

Introduces students to the study of translation, both as theory and practice, through the discussion of key texts in translation theory, and weekly practice focused on the acquisition of different translation techniques and improving students' understanding of the subtleties of the German language. Students will polish their language skills while exercising their creative faculties through translations of various texts from different genres and media. Offered Every Other Year.
Prerequisites: GER 3100 with a minimum grade of C and GER 3200 with a minimum grade of C

GER 5350 German Film Cr. 3

Film as a new medium in late 19th century and early 20th century Germany; films produced during the Weimar Republic and under fascism; post-war West and East German cinema; German film since unification. Taught in English. Offered Fall.

GER 5390 Holocaust Studies Cr. 3-4

Interdisciplinary approach to studying the Holocaust that includes history, literature, film, aesthetics, presentation and reception, and other areas that encourage a broad and deep understanding of Holocaust Studies. Offered Intermittently.

GER 5400 Cultural Studies and Criticism Cr. 3-4

Exploration of key concepts and major figures for scholarship in literary and cultural studies. Readings and class in English. Open to students from diverse disciplines. Offered for undergraduate credit only. Offered Intermittently.

Restriction(s): Enrollment is limited to Undergraduate level students.

GER 5600 Research in German Studies Cr. 3-4

Introductory seminar for graduate students in German studies that will prepare them to write graduate research papers. Focus on a particular topic of current relevance in German studies to help participants develop skills as critical readers, researchers, and writers of scholarship-based textual analysis. Offered Fall.

Prerequisites: GER 4600 with a minimum grade of D-

Restriction(s): Enrollment is limited to Graduate level students.

GER 5770 Modernism Cr. 3-4

Fin-de-siecle Germany and Austria, modernism and the metropolis, modernism and the new media (film, radio), art and politics of the Weimar Republic. Offered Intermittently.

Repeatable for 8 Credits

GER 5780 Texts and Contexts Since 1945 Cr. 3-4

Recent and contemporary literary and cultural works in context of the political, social and intellectual developments since 1945. Offered Intermittently.

Repeatable for 8 Credits

GER 5790 Topics in German Studies Cr. 1-4

Special topics in German studies, focusing on culture, literature, language, or area studies. Topics to be announced in Schedule of classes. Offered Intermittently.

Repeatable for 12 Credits

GER 5800 Literature and Cultures of Minorities Cr. 3-4

Focuses on literature by and about marginalized groups and on their cultures in postwar Germany. Offered Intermittently.

GER 5990 Directed Study Cr. 1-4

Offered Every Term.

Repeatable for 8 Credits

GER 5993 Writing Intensive Course in German Cr. 0

Satisfies General Education Requirement: Writing Intensive Competency Disciplinary writing assignments under the direction of a faculty member. Must be selected in conjunction with a course designated as a corequisite; see section listing in Schedule of Classes for corequisites available each term. Satisfies the University General Education Writing Intensive Course in the Major requirement. Required for all majors. Offered Fall, Winter.

Prerequisites: May be taken concurrently: GER 4600 or GER 5000-5999 or AFS 2390 with a minimum grade of C or ENG 2390 with a minimum grade of C or ENG 3010 with a minimum grade of C or ENG 3020 with a minimum grade of C or ENG 3050 with a minimum grade of C

Restriction(s): Enrollment is limited to Undergraduate level students.

GER 5999 Internship in German Studies Cr. 3

Internship in a public or private organization related to German studies. Offered for undergraduate credit only. Offered Every Term.

Prerequisite: GER 3100 with a minimum grade of C- or GER 3200 with a minimum grade of C-

Restriction(s): Enrollment is limited to students with a major, minor, or concentration in German or German Honors.

GER 7010 Introduction to Literary Theory Cr. 3

Graduate-level introduction to key critical perspectives, theories, problems, and questions that have informed the discussions and analyses of twentieth- and twenty-first-century literary and cultural scholars. Specific theoretical paradigms used to determine the task of textual interpretation, locate the limits of each approach, trace the emergence of subsequent theoretical paradigms, and think about how such theories might or might not be relevant in the study of specific texts. Offered Every Other Year.

Restriction(s): Enrollment is limited to Graduate level students.

Equivalent: CLA 7010, FRE 7010, ITA 7010, NE 7010, SLA 7010, SPA 7010

GER 7390 Holocaust Studies Cr. 3-4

Interdisciplinary approach to studying the Holocaust that includes history, literature, film, aesthetics, presentation and reception, and other areas that encourage a broad and deep understanding of Holocaust Studies. Offered Intermittently.

Restriction(s): Enrollment is limited to Graduate level students.

GER 7400 Cultural Studies and Criticism Cr. 3-4

Exploration of key concepts and major figures for scholarship in literary and cultural studies. Readings and class in English. Open to students from diverse disciplines. Offered Intermittently.

Restriction(s): Enrollment is limited to Graduate level students.

GER 7770 Modernism Cr. 3-4

Fin-de-siecle Germany and Austria, modernism and the metropolis, modernism and new media (film, radio), art and politics of the Weimar Republic. Offered Intermittently.

Restriction(s): Enrollment is limited to Graduate level students.

Repeatable for 8 Credits

GER 7780 Texts and Contexts Since 1945 Cr. 3-4

Recent and contemporary literary and cultural works in context of the political, social and intellectual developments since 1945. Offered Intermittently.

Restriction(s): Enrollment is limited to Graduate level students.

Repeatable for 8 Credits

GER 7790 Topics in German Studies Cr. 1-4

Special topics in German studies, focusing on culture, literature, language, or area studies. Topics to be announced in Schedule of Classes. Offered Intermittently.

Restriction(s): Enrollment is limited to Graduate level students.

Repeatable for 12 Credits

GER 7800 Literatures and Cultures of Minorities Cr. 3-4

Focuses on literature by and about marginalized groups and on their cultures in postwar Germany. Offered Intermittently.

Restriction(s): Enrollment is limited to Graduate level students.

GER 7996 Research Project Cr. 1-4

Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students.

Repeatable for 12 Credits

GER 7999 Master's Essay Direction Cr. 1-3

Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students with a class of Candidate Masters.

GER 8999 Master's Thesis Research and Direction Cr. 1-8

Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students with a class of Candidate Masters.

Repeatable for 8 Credits

GER 9990 Pre-Doctoral Candidacy Research Cr. 1-8

Research in preparation for doctoral dissertation. Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students.

Repeatable for 12 Credits

GER 9991 Doctoral Candidate Status I: Dissertation Research and Direction Cr. 7.5

Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students.

GER 9992 Doctoral Candidate Status II: Dissertation Research and Direction Cr. 7.5

Offered Every Term.

Prerequisite: GER 9991 with a minimum grade of S

Restriction(s): Enrollment is limited to Graduate level students.

GER 9993 Doctoral Candidate Status III: Dissertation Research and Direction Cr. 7.5

Offered Every Term.

Prerequisite: GER 9992 with a minimum grade of S

Restriction(s): Enrollment is limited to Graduate level students.

GER 9994 Doctoral Candidate Status IV: Dissertation Research and Direction Cr. 7.5

Offered Every Term.

Prerequisite: GER 9993 with a minimum grade of S

Restriction(s): Enrollment is limited to Graduate level students.

GER 9995 Candidate Maintenance Status: Doctoral Dissertation Research and Direction Cr. 0

Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students.

Course Material Fees: \$370.26

Repeatable for 0 Credits

GKA - GREEK: ANCIENT

GKA 1010 Elementary Ancient Greek I Cr. 4

Basic vocabulary, forms, grammar, and introduction to ancient Greek culture. Offered Every Other Fall.

Course Material Fees: \$5

GKA 1020 Elementary Ancient Greek II Cr. 4

Continuation of GRK 1010 with increasing emphasis on reading ability. Offered Every Other Winter.

Prerequisites: GKA 1010 with a minimum grade of D-

Course Material Fees: \$5

GKA 2010 Intermediate Ancient Greek I Cr. 4

Satisfies General Education Requirement: Foreign Culture, Global Learning Inquiry

Review of Greek grammar, and readings from selected Greek prose authors such as Plato and Lysias. Offered Every Other Fall.

Prerequisites: GKA 1020 with a minimum grade of D-

Course Material Fees: \$5

GKA 2020 Intermediate Ancient Greek II Cr. 4

Introduction to genre; poetic language, meters, sociological and historical context; reading of selected passages from the Iliad or the Odyssey; study of the fundamentals of Homeric Greek. Offered Every Other Winter.

Prerequisites: GKA 2010 with a minimum grade of D-

GKA 3300 Greek Tragedy Cr. 4

One tragedy of Euripides, Sophocles, or Aeschylus, supplemented by selections from the dramas of the other two playwrights. Offered Intermittently.

Prerequisites: GKA 2020 with a minimum grade of D-

GKA 5000 Ancient Greek for Graduate Students Cr. 1-4

Basic grammar and vocabulary of Greek; leads to reading of continuous passages of poetry and prose in Greek. No credit applicable to M.A. in classics degree. Offered for graduate credit only. Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students.

Repeatable for 4 Credits

GKA 5200 Ancient Greek Lyric Poetry Cr. 4

Personal lyric poetry as a reflection of individual and society in the culture of the post-Homeric Greek world. Offered Intermittently.

Prerequisites: GKA 2020 with a minimum grade of D-

GKA 5350 Readings in Ancient Greek History and Culture Cr. 1-3

Readings in Greek primary sources relevant to the associated CLA course (which is taught in English). Offered Every Term.

Prerequisites: GKA 3000-3999 with a minimum grade of D- or GKM 3000-3999 with a minimum grade of D- and May be taken concurrently. CLA 5000-5999 with a minimum grade of D-

Repeatable for 6 Credits

GKA 5400 Ancient Greek Philosophy Cr. 4

The origin and development of Greek philosophy as seen through representative selections from prominent philosophers such as the Presocratics, Plato, Aristotle, Epicurus, and the Stoics. Offered Intermittently.

GKA 5500 Ancient Greek Historians Cr. 4

Prose style and historiographic techniques of ancient historians; selections from Herodotus, Thucydides, Xenophon, and Polybius. Offered Intermittently.

Prerequisites: GKA 2020 with a minimum grade of D-

GKA 5600 Ancient Greek Epic Poetry Cr. 4

Study in ancient Greek of Homer, Hesiod, Apollonius Rhodius and others. Theory of oral vs. literary composition, the Homeric question, metrics. Offered Intermittently.

Prerequisites: GKA 2020 with a minimum grade of D-

GKA 5840 Ancient Greek: Attic Orators Cr. 4

Evolution of Greek prose style and historical context of the development of rhetoric in selected works of Attic orators. Offered Intermittently.

Prerequisites: GKA 2020 with a minimum grade of D-

GKA 5990 Directed Study Cr. 1-4

Offered Every Term.

Repeatable for 8 Credits

GKA 6250 Ancient Greek Drama Cr. 4-8

Selected readings from the plays of Aeschylus, Sophocles, or Euripides or from the plays of Aristophanes or Menander. History and theory of the development of Greek drama and its subsequent influence on world literature. Offered Intermittently.

Prerequisites: GKA 2020 with a minimum grade of D-

Repeatable for 8 Credits

GKA 7810 Studies in Ancient Greek Poetry Cr. 4

A major poet or genre. Topics to be announced in Schedule of Classes . Offered Yearly.

Restriction(s): Enrollment is limited to Graduate level students.

Repeatable for 12 Credits

GKA 7820 Studies in Ancient Greek Prose Cr. 4

Study of a major prose author or genre. Topics to be announced in Schedule of Classes . Offered Yearly.

Restriction(s): Enrollment is limited to Graduate level students.

Repeatable for 12 Credits

GKA 7999 Ancient Greek: Master's Essay Direction Cr. 1-4

Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students with a class of Candidate Masters.

GKA 8999 Ancient Greek: Master's Thesis Research and Direction Cr. 1-8

Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students with a class of Candidate Masters.

Repeatable for 8 Credits

GKM - GREEK: MODERN

GKM 1010 Elementary Modern Greek I Cr. 4

Training in pronunciation, conversation and reading; introduction to the culture of Greece today. Offered Every Other Fall.

Course Material Fees: \$5

GKM 1020 Elementary Modern Greek II Cr. 4

Continuation of GKM 1010. Offered Every Other Winter.

Prerequisites: GKM 1010 with a minimum grade of D-

Course Material Fees: \$5

GKM 2010 Intermediate Modern Greek I Cr. 4

Satisfies General Education Requirement: Foreign Culture, Global Learning Inquiry

Review of grammar, practice in oral and written modern Greek, based on readings in modern Greek literature. Offered Every Other Fall.

Prerequisites: GKM 1020 with a minimum grade of D-

Course Material Fees: \$5

GKM 2020 Intermediate Modern Greek II Cr. 4

Special attention to vocabulary enrichment and writing compositions.

Class conversation based on reading of cultural materials and short stories. Translation exercises from English to Greek; study of appropriate grammar rules. Offered Every Other Winter.

Prerequisites: GKM 2010 with a minimum grade of D-

Course Material Fees: \$5

GKM 3530 The World of Early Christianity Cr. 3

A historical survey of the cultural, social, and literary world of early Christianity. Offered Every Other Year.

Equivalent: CLA 3530

GKM 3590 Byzantine Civilization Cr. 3

Satisfies General Education Requirement: Historical Studies, Social Inquiry

Survey of Byzantine culture, religion, society, and literature from late Antiquity to 1453, through secondary and primary sources in translation. Offered Yearly.

Equivalent: CLA 3590

GKM 3710 Modern Greek Literature and Culture in English Cr. 3-4

Satisfies General Education Requirement: Civ and Societies (CLAS only), Foreign Culture, Global Learning Inquiry

Survey of the culture and civilization of modern Greece through a study of modern Greek history, religion, and literary traditions. Offered Every Term.

GKM 3720 Greek Identity from Antiquity to Modernity Cr. 3

Satisfies General Education Requirement: Cultural Inquiry, Historical Studies

Explores what it meant to be Greek from Archaic Greece to the modern era. Offered Yearly.

Equivalent: CLA 3720

GKM 3930 Topics in Byzantine and Modern Greek Studies Cr. 3

In-depth study of aspects of Byzantine and Modern Greek history, society, literature, and culture. Topics to be announced in Schedule of Classes. All readings in English. Offered Intermittently.

Repeatable for 9 Credits

GKM 3990 Directed Study Cr. 1-4

For students desiring additional work in the language at the intermediate level; for programs of work not included in scheduled courses, either in language or literature. Offered Every Term.

Prerequisites: GKM 2020 with a minimum grade of D-

Repeatable for 8 Credits

GKM 5000 Modern Greek for Graduate Students Cr. 1-4

Basic grammar and vocabulary of modern Greek. Emphasis on conversation, reading and writing. Offered for graduate credit only.

Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students.

Repeatable for 4 Credits

GKM 5530 The World of Early Christianity Cr. 3

A historical survey of the cultural, social, and literary world of early Christianity. Offered Every Other Year.

Equivalent: CLA 5530

GKM 5590 Byzantine Civilization Cr. 3

Survey of Byzantine culture, religion, society, and literature from late Antiquity to 1453, through secondary and primary sources in translation. Offered Yearly.

Equivalent: CLA 5590

GKM 5720 Greek Identity from Antiquity to Modernity Cr. 3

Satisfies General Education Requirement: Historical Studies

Explores what it meant to be Greek from Archaic Greece to the modern era. Offered Yearly.

Equivalent: CLA 5720

GKM 5930 Topics in Byzantine and Modern Greek Studies Cr. 3

In-depth study of aspects of Byzantine and Modern Greek history, society, literature, and culture. Topics to be announced in Schedule of Classes. All readings in English. Offered Intermittently.

Repeatable for 9 Credits

GKM 5990 Directed Study Cr. 1-4

Offered Every Term.

Repeatable for 8 Credits

GLS - GLOBAL STUDIES

GLS 2700 Introduction to Global Stories Cr. 3

Satisfies General Education Requirement: Cultural Inquiry, Global Learning Inquiry, Philosophy Letters

Provides students with an introductory understanding of constructions and representations of global issues and globalization in literature, film, media and the visual arts and of the ways in which human stories contribute to complex matrices of representation. Offered Fall, Winter.

GLS 2800 Introduction to Global Issues and Institutions Cr. 3

Satisfies General Education Requirement: Global Learning Inquiry, Social Inquiry, Social Sciences

Provides a broad overview of some of the big and controversial questions facing our increasingly globalized world today and introduces some of the tools we have to confront these issues. Topics include the conflict and security threats, protection of human rights, global warming, and resource management. Offered Fall, Winter.

Equivalent: HIS 2800

GLS 2900 Intercultural Competence for a Global World Cr. 3

The objectives of this course are to explore cultures via characteristics of intra-cultural communication (varieties of language marked by history and region, gender, and migration); to acknowledge regional and ethnic variations of cultural value systems as expressed in everyday interactions as well as cultural products; to learn to reflect on one's own cultural "branding" or vantage point as determined by ethnicity, region, and language(s) as well as within the context of lifelong learning at home and abroad. Offered Winter.

GLS 3410 Global Health Cr. 3

Satisfies General Education Requirement: Global Learning Inquiry, Social Inquiry, Social Sciences

Introduces students to problems of disease and disorder worldwide and looks at various efforts to define and address these problems through a social science perspective. Offered Winter.

Equivalent: ANT 3410, PH 3410

GLS 3700 Globalization: Theories, Practices, Implications Cr. 3

Satisfies General Education Requirement: Global Learning Inquiry, Social Inquiry, Social Sciences

Students develop analytical tools for appraising processes of globalization; acquire a familiarity with the current topical concerns of global studies; and examine economic, political, and cultural approaches to globalization. Offered Fall, Winter.

Equivalent: ANT 3700

GLS 3810 Topics in Global Studies Cr. 1

Special topics in global history, politics, culture, science, health, law, philosophy, language, and other fields and issues. Topics to be announced in the class schedule. Offered Every Term.

Repeatable for 6 Credits

GLS 3830 Topics in Global Studies Cr. 3

Special topics in global history, politics, culture, science, health, law, philosophy, language, and other fields and issues. Topics to be announced in the class schedule. Offered Every Term.

Repeatable for 6 Credits

GLS 5500 Internship in Global Studies Cr. 3

Offered for undergraduate credit only. Internship in a public or private organization related to global studies. Offered Every Term.

Prerequisite: GLS 3700 with a minimum grade of C-

GLS 5540 World Environmental History since 1900 Cr. 4

This course examines the transformation of the relationship between human society and the natural environment in global context since 1900. Available for undergraduate credit only. Offered Fall.

Equivalent: HIS 5540

GLS 5993 Writing Intensive Course in Global Studies Cr. 0

Satisfies General Education Requirement: Writing Intensive Competency
Offered for S and U grades only. No degree credit. Required for all majors. Disciplinary writing assignments under the direction of a faculty member. Must be selected in conjunction with a course designated as a corequisite. Satisfies the University General Education Writing Intensive Course in the Major requirement. Offered Every Term.

Prerequisites: AFS 2390 with a minimum grade of C or ENG 2390 with a minimum grade of C or ENG 3010 with a minimum grade of C or ENG 3020 with a minimum grade of C or ENG 3050 with a minimum grade of C

Restriction(s): Enrollment is limited to Undergraduate level students.

GPH - GEOGRAPHY

GPH 1100 World Regional Patterns Cr. 4

Satisfies General Education Requirement: Social Inquiry, Social Sciences
Concepts and theory in analyzing areal relationships and distinguishing regional patterns of human activity; cultural factors and physical conditions (climate, landforms) as factors in regional delineations; comparisons and contrasts in regional economic development; analysis of concentrations/dispersals of human activity; local, national and regional phenomena in the interpretation of global patterns. Offered Every Term.

GPH 2000 Introduction to Urban Studies Cr. 3

Satisfies General Education Requirement: Social Inquiry, Social Sciences
Urban phenomena both past and present, including the quality and nature of urban life; major concerns of urban areas; perspectives and techniques of various urban-related disciplines. Offered Every Term.

Equivalent: HIS 2000, PS 2000, SOC 2500, US 2000

GPH 2200 Geography of Michigan Cr. 3

The spatial physical, social, environmental, settlement and developmental patterns and problems of the State of Michigan. Offered Intermittently.

GPH 2700 Introduction to Canadian Studies Cr. 3

Satisfies General Education Requirement: Foreign Culture, Global Learning Inquiry

Survey of Canada in its cultural, literary, historical, geographical and political aspects; key concepts and social patterns that define the Canadian experience. Offered Yearly.

Equivalent: ENG 2670, HIS 2700, PS 2700

GPH 3130 Introductory Urban Geography Cr. 4

Satisfies General Education Requirement: Social Inquiry, Social Sciences
An introduction to the geographer's view of cities, with emphasis on the North American city. Topics include the pre-industrial city, migration, evolution of the American urban pattern, city classification, city-regional relationships, and the city's internal structure (ethnic, residential, commercial, and industrial). Offered Yearly.

GPH 3200 Europe Cr. 3

Satisfies General Education Requirement: Social Inquiry, Social Sciences
Analysis of European countries. Emphasis on population changes resource problems, industrial location, urbanization, regional development, and emerging economic and political unities. Offered Intermittently.

GPH 3600 Introduction to Geographic Information Systems Cr. 4

Theory and application of computer-based systems for the analysis and representation of spatial data. Offered Yearly.

GPH 3900 Topics in Geography Cr. 3

Offered Every Other Year.

Repeatable for 6 Credits

GPH 3990 Directed Study Cr. 1-3

Readings and research. Offered Every Term.

Repeatable for 9 Credits

GPH 4600 Advanced Geographic Information Systems Cr. 4

Application of GIS to analyses of spatially-referenced data. Offered Yearly.

Prerequisites: GPH 3600 with a minimum grade of D-

Repeatable for 998.99 Credits

GPH 5650 Metropolitan Detroit Cr. 3

Comprehensive analysis of metropolitan Detroit: city, suburbs and surrounding region. Historical development, physical foundations, economic and political expansion, ethnic and cultural areas, geopolitical infrastructure, social change, present-day problems and current events shaping the area's spatial structure. Offered Yearly.

Equivalent: UP 5650

GPH 6420 Quantitative Techniques I Cr. 4

Statistical inference with emphasis on applications including central tendency, dispersion, hypothesis testing, correlation and regression.

Offered for undergraduate credit only. Offered Yearly.

Restriction(s): Enrollment is limited to Undergraduate level students.

Equivalent: UP 6320

GPH 7990 Directed Study Cr. 2-3

Readings and research. Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students.

Repeatable for 8 Credits

GPH 7999 Master's Essay Direction Cr. 1-3

Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students.

GPH 8999 Master's Thesis Research and Direction Cr. 1-8

Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students.

Repeatable for 8 Credits

GS - GRADUATE SCHOOL

GS 0900 Essential Research Practices: Responsible Conduct of Research Cr. 0

This course presents both general and directed instruction/discussion in topics related to Responsible Conduct of Research (RCR). Available for S/U grading only. Offered Fall, Winter.

GS 5785 Academic Writing for Graduate Students Cr. 3

Emphasis on learning and executing written genres common to research and presentation activities in graduate school. Offered Intermittently.

Restriction(s): Enrollment is limited to Graduate level students.

Equivalent: ENG 5785

Repeatable for 9 Credits

GS 7890 Preparing Doctoral Trainees for Multiple Careers Cr. 1

Offered by the Graduate School for doctoral students who wish to better prepare for various professional careers. Focuses on enhancing students' skill sets for navigating the job market. This course is open to doctoral students who have completed at least one year of coursework and who have not yet entered maintenance status. Offered Spring/Summer.

Restriction(s): Enrollment is limited to Graduate level students.

Repeatable for 2 Credits

GS 7900 Introduction to College Teaching and Learning Cr. 1

Provides an introduction to the principles and performance of college teaching through an examination of current research and best practices related to teaching and learning in a range of higher education settings and contexts (i.e., traditional, hybrid and online). It offers opportunities for the development and improvement of participants' instructional skills from both a theoretical and a practice-based understanding of excellence in teaching. Offered Winter.

Restriction(s): Enrollment is limited to Graduate level students.

Repeatable for 2 Credits

GS 7991 Doctoral Program Internship Course Cr. 1-2

Practical training experience in industry, government offices/labs or other professional settings. Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students.

Repeatable for 2 Credits

GSC - GLOBAL SUPPLY CHAIN MANAGEMENT

GSC 3600 Operations and Supply Chain Management Cr. 3

Analysis of production and supply chain systems. Topics include forecasting, production planning and scheduling, quality control, cost control, inventory control, capacity planning, purchasing, logistics, risk management, and other related subjects. Extensive coverage of SCM strategy, manufacturing, and general SCM strategy related to purchasing and logistics. Offered Every Term.

Restriction(s): Enrollment is limited to Undergraduate level students.

GSC 4500 Business Co-op Assignment Cr. 0

Opportunity to put theory into practice on the job. Students will normally be assigned to cooperating business organizations for internship periods of one semester. No credit toward degree. Offered Every Term.

Restriction(s): Enrollment is limited to Undergraduate level students; enrollment limited to students in the BA in Business Administration or BS in Business Administration programs.

Equivalent: ACC 4500, FIN 4500, MGT 4500, MKT 4500

GSC 4990 Directed Study in Global Supply Chain Management Cr. 1-3

Advanced readings and research or tutorial under supervision of faculty member. Offered Every Term.

Prerequisites: GSC 5620 with a minimum grade of C or BLG 5620 with a minimum grade of C

Restriction(s): Enrollment is limited to Undergraduate level students; enrollment limited to students in the BA in Business Administration or BS in Business Administration programs.

Repeatable for 3 Credits

GSC 4991 Study Abroad in Supply Chain Management Cr. 3

Study abroad programs in various countries. Programs run 10-15 days in length. Recent country programs in China, Poland, and Italy. Travel within a given country with visits to various companies and cultural attractions. Traveling costs are over and above tuition and vary by country. Various reading and assignments required. Offered Winter, Spring/Summer.

Equivalent: MGT 4991, MKT 4991

Repeatable for 6 Credits

GSC 5600 Logistics and Transportation Strategy Cr. 3

An overview of logistics strategy with an emphasis on transportation. Study of the management of the movement of raw materials and finished products including the development of transportation strategies and objectives, and the selection of modes and carriers. Offered for undergraduate credit only. Offered Every Term.

Prerequisites: GSC 3600 with a minimum grade of D-

Restriction(s): Enrollment is limited to Undergraduate level students; enrollment limited to students in the School of Business; enrollment limited to students in the BA in Business Administration or BS in Business Administration programs.

GSC 5620 Global Supply Chain Management Cr. 3

Concepts of managing operations and supply chains that span multiple countries. Topics covered include, Sourcing in International Settings, Global Logistics and Trade Management, Global Plant Location and Manufacturing Network Design, and Managing International Production Operations. Emerging concepts in the discipline will also be discussed. Offered for undergraduate credit only. Offered Every Term.

Restriction(s): Enrollment is limited to Undergraduate level students; enrollment limited to students in the School of Business; enrollment limited to students in the BA in Business Administration or BS in Business Administration programs.

GSC 5650 Strategic Procurement Cr. 3

Principles of the purchasing function with topics including sourcing decisions, negotiations, buyer/seller relationships in the supply chain, supplier quality issues, supplier selection, price determination, ethical issues, legal issues, and international issues. Extensive coverage of automotive industry topics and perspectives. Offered for undergraduate credit only. Offered Fall, Winter.

Restriction(s): Enrollment is limited to Undergraduate level students; enrollment limited to students in the School of Business; enrollment limited to students in the BA in Business Administration or BS in Business Administration programs.

GSC 5670 Special Topics in Supply Chain Management Cr. 3

Offered Intermittently.

Restriction(s): Enrollment is limited to Undergraduate level students; enrollment limited to students in the School of Business.

Repeatable for 6 Credits

GSC 5680 Production Planning and Control Cr. 3

Concepts for planning and management of production resources in manufacturing organizations. Topics covered include: Demand Management, Sales and Operations Planning, Master Production Scheduling, Materials Requirement Planning, and Capacity Planning in a manufacturing environment. Emerging concepts in the discipline will also be covered. Offered for undergraduate credit only. Offered Fall.

Prerequisites: ISM 3600 with a minimum grade of D- or BA 3600 with a minimum grade of D- or ISM 4600 with a minimum grade of D-

Restriction(s): Enrollment is limited to Undergraduate level students; enrollment limited to students in the School of Business.

GSC 5690 Principles of Quality Management Cr. 3

Quality control overview with a focus on auto industry processes and including Advanced Product Quality Planning (APQP) processes for new product development in the auto industry, Six Sigma processes, statistical quality control including process capability, control charts, and acceptance sampling procedures. Offered for undergraduate credit only. Offered Fall, Winter.

Prerequisites: GSC 3600 with a minimum grade of D-

Restriction(s): Enrollment is limited to Undergraduate level students; enrollment limited to students in the School of Business; enrollment limited to students in the BA in Business Administration or BS in Business Administration programs.

GSC 5890 Internship in Global Supply Chain Management Cr. 3

Student works a minimum of 160 hours. Offered for undergraduate credit only. Offered Every Term.

Restriction(s): Enrollment is limited to Undergraduate level students; enrollment limited to students in the School of Business; enrollment limited to students in the BA in Business Administration or BS in Business Administration programs.

GSC 5996 Process Analysis and Cost Estimating for Buyers Cr. 3

Focused on providing future buyers and SCM professionals an understanding of basic production processes and the cost and quality drivers that impact supplier performance. Helps buyers learn what to look for when visiting suppliers. Teaches students how to identify and evaluate supplier cost and quality drivers. There will be multiple supplier visits during class hours. Offered for undergraduate credit only. Offered Winter.

Prerequisites: GSC 3600 with a minimum grade of D-

Restriction(s): Enrollment is limited to Undergraduate level students; enrollment limited to students in the School of Business.

GSC 6997 Global Supply Chain Analysis and Planning Cr. 3

Capstone course in Global Supply Chain Management major. An emphasis on analysis, planning and strategy. Use of supply chain simulation games and/or cases to provide students with a comprehensive view of supply chain issues, and an experience running a simulated supply chain, and/or addressing critical problems from a case perspective. Offered for undergraduate credit only. Offered Every Term.

Prerequisites: GSC 3600 with a minimum grade of D- and GSC 5620 with a minimum grade of D- and GSC 5650 with a minimum grade of D-

Restriction(s): Enrollment is limited to Undergraduate level students; enrollment limited to students in the School of Business; enrollment limited to students in the BA in Business Administration or BS in Business Administration programs.

GSC 7010 Supply Chain Decision Tools Cr. 3

Provides hands-on familiarity with supply chain decision tools and fundamental approaches to supply chain decision making. examples of topics covered include multi criteria decision making, efficiency analysis, cost-benefit analysis, decision analysis with simulations, etc. Capabilities of state of the art decision tools available to managers will also be discussed. Offered Fall.

Restriction(s): Enrollment is limited to Graduate level students.

GSC 7260 Theory of Constraints: Breakthrough Solutions Cr. 3

Problem solving based on Theory of Constraints logic process. Use of cause-effect logic diagrams to identify root cause of problems, discover breakthrough solutions, specify expected results of these solutions (including negative side effects which can thus be avoided), overcome obstacles to implementation, and construct a detailed plan for implementation of solutions. Applications to management of business and other operations. Offered Spring/Summer.

Prerequisites: May be taken concurrently: BA 6025 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

GSC 7620 Global Supply Chain Management Cr. 3

Introduction to global supply chain management, integrating materials management and physical distribution through the investigation of transportation, inventory, handling and storage, acquisition, order processing and facility location subsystems. Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students.

GSC 7650 Strategic Procurement Cr. 3

Creation of competitive advantage with superior procurement management. Topics include: negotiating, relationship to the supply chain, quality issues, supplier selection and management, quantity and delivery, and price determination. Strategic, ethical, legal and international issues. Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students.

GSC 7670 Special Topics in Supply Chain Management Cr. 3

Topics range from automotive supply chain management to international supply chain management fields and countries. Offered Intermittently.

Restriction(s): Enrollment is limited to Graduate level students.

Repeatable for 6 Credits

GSC 7680 Manufacturing Planning and Control Cr. 3

Covers concepts for management of production resources in manufacturing organizations. Topics covered include demand management, sales & operations planning, master production scheduling, material requirement planning, capacity planning & management and production activity control. Emerging concepts in the discipline will also be discussed. Offered Fall.

Restriction(s): Enrollment is limited to Graduate level students.

GSC 7890 Internship in Global Supply Chain Cr. 3

Student works a minimum 160 hours for fifteen weeks in an entry-level management position in global supply chain. Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students in the School of Business.

GSC 7910 Managing Automotive Supply Chains Sustainability Cr. 3

Covers concepts for sustainable management of supply chains taking a holistic view of the interaction between firms, environment and society. Topics covered include: supplier management for sustainability, measurement of environmental and social impact, Life Cycle Analysis (LCA), conflict minerals reporting, automotive industry guiding principles for sustainability, lean and green interface, product design for sustainability, recycling, reusing, and reverse logistics. Emerging concepts in the discipline will also be discussed. Offered Winter.

Restriction(s): Enrollment is limited to Graduate level students.

GSC 7920 Supply Chain Process Analysis and Costing Cr. 3

Develops understanding about manufacturing processes in a wide range of products. The class will also help develop skills for cost estimating and managing sourcing in manufacturing environments. Topic covered include, how to conduct supplier site visits, viewing sales pitches, learn different types of manufacturing processes for metals, plastic and electronics and how to estimate their costs. Travel in the Detroit area will be required for the class. Offered Winter.

Restriction(s): Enrollment is limited to Graduate level students.

GSC 7930 Managing Risk in Automotive Supply Chains Cr. 3

Explores the area of risk management spanning aspects of strategic, operating, compliance and financial risks in automotive supply chains. Topics discussed include: risk identification, assessment and response, risk analysis tools (e.g. Process FEMA), risk mitigation, risk recovery and evaluation of control alternatives, crisis management and business continuity planning. Emphasis is placed on managing risk in internal operations as well as the supply network. Offered Winter.

Restriction(s): Enrollment is limited to Graduate level students.

GSC 7940 Buyer Supplier Relationships in the Auto Industry Cr. 3

Provides a study of issues in managing supplier relationships in the automotive. Topics such as supplier development, supplier performance assessment, monitoring and improvement, and OEM-supplier relationships will be discussed along with emerging trends in the industry. Offered Fall.

Restriction(s): Enrollment is limited to Graduate level students.

GSC 7950 Auto Industry SCM Capstone Cr. 3

Provides a study of issues in managing automotive supply chains such as: supply chain strategy, managing global manufacturing networks, logistics and trade management in auto networks, make-buy decisions, total cost of ownership, global automotive component sourcing and logistics, managing quality and risk, etc. Case situations of real companies facing these issues will be analyzed. Offered Winter.

Prerequisite: GSC 7620 with a minimum grade of C and GSC 7650 with a minimum grade of C and GSC 7680 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

GSC 7960 Lean Six Sigma Cr. 3

All organizations strive to improve efficiency and reduce waste, i.e. become lean enterprises. This course provides students with the core concepts related to managing lean organizations and implementing six sigma. Topics covered include, lean principles, process capability, value stream mapping, process improvement, and six sigma implementation. Offered Winter, Spring/Summer.

Restriction(s): Enrollment is limited to Graduate level students.

GSC 7991 Principles of Quality Management Cr. 3

Introduction to philosophies of quality management and quality certification standards such as ISO 9000. System analysis, business process design, leadership, benchmarking, quality standards, performance standards, customer focus. Offered Fall, Winter.

Restriction(s): Enrollment is limited to Graduate level students.

GSC 7992 Methods of Quality Management Cr. 3

Selection, implementation and applications of the most commonly-used quality methods: statistical process control, design of experiments, process analysis, error proofing, decision analysis, and response surface methods. Offered Spring/Summer.

Restriction(s): Enrollment is limited to Graduate level students.

GSC 7995 Directed Study in Global Supply Chain Cr. 1-3

Advanced independent readings and research under supervision of a graduate faculty member, in areas of special interest to student and faculty member. Offered Every Term.

Prerequisites: GSC 7620 with a minimum grade of C or GSC 7650 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students in the School of Business.

Repeatable for 3 Credits

GSW - GENDER SEXUALITY AND WOMEN'S STUDIES

GSW 2500 Humanities Perspectives on Gender, Sexuality, and Women Cr. 3

Satisfies General Education Requirement: Cultural Inquiry, Diversity Equity Incl Inquiry, Philosophy Letters

Questions surrounding gender and sexuality, focusing on the ways in which they have been constructed and represented in different historical periods and geographical location through literature, film, visual objects, the media, and other texts. Offered Fall, Winter.

Restriction(s): Enrollment is limited to Undergraduate level students.

GSW 2600 History of Women, Gender and Sexuality in the Modern World Cr. 3

Satisfies General Education Requirement: Diversity Equity Incl Inquiry, Global Learning Inquiry, Historical Studies

Examination of change over time, using different historical approaches to try to account for change as specifically applicable from a comparative perspective to the experiences of women and constructions of gender and sexual identity. Offered Every Term.

Restriction(s): Enrollment is limited to Undergraduate level students.

Equivalent: HIS 2605

GSW 2650 Gender and Crime Cr. 3

Satisfies General Education Requirement: Diversity Equity Incl Inquiry
Critical examination of gender-related issues in criminal justice; impact on defendants, inmates, victims, and criminal justice personnel; relation to policy issues. Offered Yearly.

Equivalent: CRJ 2650

GSW 2700 Social Science Perspectives on Gender, Sexuality, and Women Cr. 3

Satisfies General Education Requirement: Diversity Equity Incl Inquiry, Social Inquiry, Social Sciences

Understanding the ways in which political, social and cultural institutions shape gender, sexuality, and women's experiences within a local and global context. Offered Fall, Winter.

GSW 2750 Diversity Issues in Criminal Justice Cr. 3

Satisfies General Education Requirement: Diversity Equity Incl Inquiry
Critical examination of gender, race, class, and ethnicity issues in criminal justice; impact on defendants, inmates, victims, and criminal justice personnel; relation to policy issues. No credit after CRJ/GSW 3750. Offered Yearly.

Equivalent: CRJ 2750

GSW 3520 Women and Gender in Middle East History Cr. 3

Women's role in Middle East history; impact of religion, culture, social and economic change on construction of gender in the Middle East. Offered Intermittently.

Equivalent: NE 3520

GSW 3990 Directed Studies Cr. 1-3

Individually-designed research projects, developed with a supervising professor and approved by program director. Offered Every Term.

GSW 5030 Topics in Women's Studies Cr. 3

Thematic, critical or generic study of women and literature. Topics to be announced in Schedule of Classes. Offered Yearly.

Prerequisites: AFS 2390 with a minimum grade of C or ENG 2390 with a minimum grade of C or ENG 3010 with a minimum grade of C or ENG 3020 with a minimum grade of C or ENG 3050 with a minimum grade of C

Equivalent: ENG 5030

Repeatable for 9 Credits

GSW 5035 Topics in Gender and Sexuality Studies Cr. 3

Advanced course on issues of sexuality and gender as mediated through literary and cultural study. Attention to critical theory as well as various literary and cultural forms. Topics to be announced in Schedule of Classes. Offered Yearly.

Prerequisites: AFS 2390 with a minimum grade of C or ENG 2390 with a minimum grade of C or ENG 3010 with a minimum grade of C or ENG 3020 with a minimum grade of C or ENG 3050 with a minimum grade of C

Equivalent: ENG 5035

Repeatable for 9 Credits

GSW 5110 Black Women in America Cr. 3

Satisfies General Education Requirement: Writing Intensive Competency
Social, cultural, artistic and economic development of Black women in America; topics include: racism, sexism, marriage, motherhood, feminism, and the welfare system. Offered Yearly.

Equivalent: AFS 5110

GSW 5200 Feminist, Gender, and Queer Theory Cr. 3

Overview of feminist, gender and queer theory, focusing on the three "waves" and the social, political, and cultural construction of femininities, masculinities, and sexualities. Offered for undergraduate credit only. Offered Yearly.

Prerequisites: GSW 2500 with a minimum grade of D- or GSW 2600 with a minimum grade of D- or GSW 2700 with a minimum grade of D-

Restriction(s): Enrollment is limited to Undergraduate level students.

GSW 5300 Topics in LGBTQ Studies Cr. 3

Focused examinations of LGBTQ studies from different disciplinary perspectives, including but not limited to literary, historical, and media studies; social sciences; and philosophy. Topics to be announced in Schedule of Classes. Offered for undergraduate credit only. Offered Fall, Winter.

Prerequisites: GSW 2500 with a minimum grade of D- or GSW 2600 with a minimum grade of D- or GSW 2700 with a minimum grade of D-

Restriction(s): Enrollment is limited to Undergraduate level students.

GSW 5400 Topics in Gender and Women's Studies Cr. 3

Focused examination of gender and women from different disciplinary perspectives, including but not limited to literary, historical, and media studies; social sciences; and philosophy. Topics to be announced in schedule of classes. Offered for undergraduate credit only. Offered Fall, Winter.

Prerequisites: GSW 2500 with a minimum grade of D- or GSW 2600 with a minimum grade of D- or GSW 2700 with a minimum grade of D-

Restriction(s): Enrollment is limited to Undergraduate level students.

GSW 5500 Internship in Gender, Sexuality, and Women's Studies Cr. 3

Internship in a public or private organization related to gender, sexuality, or women's studies. Offered for undergraduate credit only. Offered Every Term.

Restriction(s): Enrollment is limited to Undergraduate level students.

GSW 5875 Gender in Modern East Asia Cr. 4

History of gender in China, Japan, and Korea, with topics to include Confucianism, the state's role in gender construction, nationalism, imperialism, marriage, family, labor, sexuality, and feminism. Offered Every Other Year.

Equivalent: ASN 5875, HIS 5875

GSW 5990 Senior Project Seminar Cr. 4

Scholarly research project or internship combined with scholarship, resulting in substantial paper. Students meet with instructor several times during semester. Offered Yearly.

Prerequisite: GSW 5200

GSW 7200 Feminist, Gender, and Queer Theory Cr. 3

Overview of feminist, gender and queer theory, focusing on the three "waves" and the social, political, and cultural construction of femininities, masculinities, and sexualities. Offered Winter.

Restriction(s): Enrollment is limited to Graduate level students.

GSW 8150 Seminar in the History of Gender, Women and Sexuality Cr. 3

Research seminar in the History of Gender, Women, and Sexuality. Topics vary by Term. Offered Yearly.

Prerequisites: HIS 7830 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

Equivalent: HIS 8150

Repeatable for 6 Credits

HE- HEALTH EDUCATION

HE 1010 Foundations of Health and Health Promotion Cr. 3

Foundations of the community health education profession and practice, including history, settings, organizations, ethics and employment. Offered Yearly.

Restriction(s): Enrollment is limited to Undergraduate level students.

HE 2310 Dynamics of Personal Health Cr. 3

Critical health issues relevant to both traditional and non-traditional college students today. In-depth study of varied health issues and applications to personal, family and community needs. Offered Every Term.

HE 2320 Advancing Policy in Community Health Education Cr. 3

Provides an overview of the community health policy process, advocacy and social, political and environmental issues affecting urban populations. Offered Every Other Year.

HE 3300 Health of the School Child Cr. 3

Health status and problems of school-age children. Role of teacher and schools in promoting healthy behavior. Emphasis on impact of institutional forces (e.g., family, media) on development of children's health beliefs and behavior. Offered Every Term.

HE 3330 Methods in Teaching Health Cr. 3-4

Principles, curriculum development, and techniques in teaching health at elementary and secondary school levels. Offered Fall.

Prerequisites: HE 3300 with a minimum grade of D- and HE 3440 with a minimum grade of D- and HE 4340 with a minimum grade of D- and HE 5440 with a minimum grade of D- and HEA 2310 with a minimum grade of D-

Restriction(s): Enrollment limited to students in the College of Education.

HE 3344 Methods and Materials in Community Health Education Cr. 3

Frameworks, practical applications and mechanics of conducting health interventions in community settings. Offered Every Other Year.

Prerequisites: HE 1010 with a minimum grade of D-

Restriction(s): Enrollment is limited to Undergraduate level students.

HE 3440 Nutrition and Health Education Cr. 3

Relationships between dietary intake and health status in various populations. Role and responsibilities of health educators in nutrition programs. Concepts from health psychology applied to school and community approaches. Offered Fall, Winter.

Prerequisites: HEA 2310 with a minimum grade of D- or HE 2310 with a minimum grade of D- or HE 3300 with a minimum grade of D-

HE 3500 Human Disease Cr. 3

Body system impairments from disease, injury or congenital abnormalities that relate to morbidity and mortality in the U.S. Signs, symptoms, causes, prevention, and treatment. Offered Fall, Winter.

Restriction(s): Enrollment is limited to students with a major in Health Education, Health Education Honors, Kinesiology or Kinesiology Honors.

HE 3990 Individual Problems in Health Cr. 1-3

Solving a specific personal health problem or studying a specific community health problem under the guidance of divisional staff. Offered Every Term.

Prerequisite: HE 2310 with a minimum grade of C or HE 2320 with a minimum grade of C

Repeatable for 3 Credits

HE 4010 Foundations of Community Health Program Planning Cr. 3

Introduction and practical application of health promotion program planning, including: developing a need assessment, recruiting community support, writing program goals and objectives, developing a program plan, identifying existing interventions and/or designing new intervention activities to address program objectives, using theory to enhance effective programming, program implementation, budgeting and measurement. Offered Fall.

Prerequisites: HE 1010 with a minimum grade of C

HE 4340 Family and Reproductive Health Cr. 3

Program planning, curriculum development and classroom teaching strategies in the areas of human sexuality, reproductive health and venereal disease, family planning and family health. Course will satisfy Michigan Department of Education requirements for teaching in these areas. Offered Fall.

HE 4902 Health Education Internship Cr. 5-6

Students contribute expertise and enthusiasm to their host agency and demonstrate their ability to perform the duties of a community health professional. Offered Every Term.

Prerequisites: May be taken concurrently: HE 4010 with a minimum grade of D- and HE 5220 with a minimum grade of D- and HE 5993 with a minimum grade of D- or KHS 5522 with a minimum grade of D-

Restriction(s): Enrollment is limited to Undergraduate level students.

Course Material Fees: \$16

Repeatable for 6 Credits

HE 5220 Health Behavior Change Cr. 3

Principles of behavior modification; theories of health behavior and program planning as they relate to health promotion and wellness. Offered Every Other Year.

Prerequisites: PSY 1010-6999 or AFS 2390 with a minimum grade of C or ENG 2390 with a minimum grade of C or ENG 3010 with a minimum grade of C or ENG 3020 with a minimum grade of C or ENG 3050 with a minimum grade of C

HE 5440 Mental Health and Substance Abuse Cr. 3

Identification, treatment, and prevention of mental health/substance abuse problems. How school-age children and their families are affected by these problems; role of the teacher. Offered Fall, Winter.

Restriction(s): Enrollment limited to students in the College of Education.

HE 5522 Health Psychology Cr. 3

Foundations of health, research methods, biological foundations of health/illness, stress, nutrition, obesity, eating disorders, substance abuse and health, cardiovascular disease, diabetes and health, exercise and cancer; HIV, AIDS, and health; pain management and patient behavior, complementary and alternative medicine, health psychology across the life span. Offered Fall.

Prerequisites: PSY 1010-6999

HE 5620 Performance Based Assessment in Health Education Cr. 3

Assessment and evaluative techniques applied to health education, including test construction and performance-based assessment.

Designed to meet assessment and evaluative competencies required for entry-level health teachers in Michigan. Offered Spring/Summer.

Restriction(s): Enrollment limited to students in the College of Education.

HE 5780 Directed Student Teaching Cr. 10

Secondary school teaching experience. Offered Fall, Winter.

Restriction(s): Enrollment limited to students in the College of Education.

HE 5993 Writing Intensive Course in Health Education Cr. 0

Satisfies General Education Requirement: Writing Intensive Competency Disciplined writing assignments under direction of a faculty member. Satisfies University General Education Writing Intensive Course in the Major requirement. Offered Fall.

Prerequisites: PSY 1010-6999 or AFS 2390 with a minimum grade of C or ENG 2390 with a minimum grade of C or ENG 3010 with a minimum grade of C or ENG 3020 with a minimum grade of C or ENG 3050 with a minimum grade of C

Corequisite: HE 5522

Restriction(s): Enrollment is limited to students with a major, minor, or concentration in Health Education or Health Education Honors.

HE 6350 Health Education and the Nation's Health Cr. 3

Introductory course for graduate health program. Current national health status; contributory factors including: behaviors linked to disease, policies, problems in the health care system and delivery of health care. Offered Every Other Year.

HE 6420 Introduction to Health Education Program Design Cr. 3

Overview of health education program process in all practice settings. Introduction to needs assessment, objective writing, staff training, and evaluation in health education. Offered Every Other Year.

Restriction(s): Enrollment is limited to Graduate level students; enrollment is limited to students with a major in Health Education.

HE 6430 School Health Curriculum Cr. 3

Satisfies General Education Requirement: Writing Intensive Competency Principles and application of school health programming. Philosophy and foundations of health education, conducting a needs assessment and design instruction based on the assessment, implementing and evaluating the instruction, implementation of skills in a secondary classroom, assessment of the process. Satisfies General Education program Writing Intensive requirement for health teaching majors. Offered Winter.

Prerequisite: HE 3330 with a minimum grade of D- or HE 6500 with a minimum grade of D-

Restriction(s): Enrollment limited to students in the College of Education.

HE 6500 Comprehensive School Health Education Cr. 3

Overview of comprehensive school health education. Study of major comprehensive health curricula with intensive training in the Michigan Model. This class leads to certification to teach the Michigan Model in public schools. Offered Fall.

Prerequisite: HEA 2310 with a minimum grade of D- and HE 3300 with a minimum grade of D- and HE 3440 with a minimum grade of D- and HE 4340 with a minimum grade of D- and HE 5440 with a minimum grade of D-

Restriction(s): Enrollment limited to students in the College of Education.

HE 6501 Measurement and Evaluation in Community Health Education Cr. 3

Frameworks, principles, models and strategies for evaluating health education programs. Offered Every Other Year.

Prerequisites: HE 6420 with a minimum grade of C or HE 4010 with a minimum grade of C

HE 6530 Principles and Practice of Health Education and Health Promotion Cr. 3

Principles, resources and practical application of community health education in various settings, with emphasis on the role of the community health education specialist. Offered Every Other Year.

HE 6550 Teaching Methods and Techniques in Health Education Cr. 3

Strategies employed in dissemination of health information in the community and school system. Integration of cognitive skills, behavior change theory, and materials used to produce effective health instruction. Offered Every Other Year.

HE 7200 Grant Writing and Management in Health Sciences Cr. 3

Provides a hands-on approach to grant writing for health sciences programs. Strategies and tactics for seeking out, developing and managing proposals for health programs will be discussed. Offered Every Other Year.

Restriction(s): Enrollment is limited to Graduate level students.

HE 7310 Psychology of Learning Across Development Cr. 3

Course blends a selection of human development and learning theories and concepts; emphasizes application to various professional contexts, e.g., community, health, business, school, and other organizational settings; focus is on late adolescence (ages 18-22) and adulthood. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate level students.

Equivalent: EDP 7310

HEB - HEBREW

HEB 1010 Elementary Hebrew I Cr. 4

Reading, writing, and speaking. Emphasis on Modern Hebrew. Offered Fall.

Course Material Fees: \$5

HEB 1020 Elementary Hebrew II Cr. 4

Continuation of HEB 1010. Offered Winter.

Prerequisites: HEB 1010 with a minimum grade of D-

Course Material Fees: \$5

HEB 2010 Intermediate Hebrew I Cr. 4

Satisfies General Education Requirement: Foreign Culture, Global Learning Inquiry

Reading of additional cultural texts. Offered Fall.

Prerequisites: HEB 1020 with a minimum grade of D-

Course Material Fees: \$5

HEB 2020 Intermediate Hebrew II Cr. 4

Reading, writing, and conversational texts. Offered Winter.

Prerequisites: HEB 2010 with a minimum grade of D-

Course Material Fees: \$5

HEB 3990 Directed Study Cr. 1-4

Assigned readings of intermediate and advanced texts. Offered Every Term.

Repeatable for 4 Credits

HEB 5990 Directed Study Cr. 3-6

Assigned readings of advanced texts; guided texts. Offered Every Term.

Repeatable for 9 Credits

HIS - HISTORY

HIS 1000 World Civilization to 1500 Cr. 4

Satisfies General Education Requirement: Global Learning Inquiry, Historical Studies, Social Inquiry
Survey of ancient and medieval history from the Neolithic Revolution to 1500. Offered Every Term.

HIS 1050 History of the Headlines: United States Since World War II Cr. 3

Satisfies General Education Requirement: American Society Institution, Civic Literacy, Social Inquiry
Recent American social issues, political movements, institutions, and policy developments within the broad context of global change and conflict. Offered Every Term.

HIS 1060 Law, Citizenship, and American Culture Cr. 3

Satisfies General Education Requirement: Civic Literacy
Explores the foundations, development, and evolution of relations among law, constitutionalism, and American society from early England into the late 20th century. Emphasis on the emergence and expansion first of a republic and then of republican citizenship with its incidents and privileges. Offered Every Other Year.

Satisfies General Education Requirement: Civic Literacy, Social Inquiry
A survey of America's experience with colonialism, revolution, and nation building, with special attention paid to freedom and slavery, democracy and citizenship, social and cultural change, American identity, and institutional responses to political, social, and economic issues. Offered Every Term.

HIS 2050 Modern America: Since 1877 Cr. 3-4

Satisfies General Education Requirement: Civic Literacy, Social Inquiry
A survey of America's modern experience, with a focus on industrialization, urbanization, social change, cultural development, and political life during the emergence and evolution of the United States as a world power. Offered Every Term.

HIS 2240 History of Michigan Cr. 3-4

Social and economic development of the state, from French explorations to the present. Offered Every Term.

HIS 2350 Black Detroit Cr. 3

Satisfies General Education Requirement: Diversity Equity Incl Inquiry
Explores the historical, cultural and structural aspects of the Black urban experience in Detroit from the late 19th Century to the present, including the role that racism, urbanization and suburbanization have played in shaping racial, spatial and economic inequality in the Detroit Metropolitan area. Utilizes an interdisciplinary approach: to interrogate the social and cultural history of Black Detroit, to examine the various forms of Black social movement activism used by Black Detroiters in the 20th Century, and to analyze ways the shifting economic and political currents shaped, and reshaped racism, class, space, and resistance in the Detroit metropolitan area. Offered Fall, Winter.

Equivalent: AFS 2350, US 2350

HIS 2430 History of Latino/as in the United States Cr. 3

Historical development of people of Hispanic descent in the United States from the early nineteenth century to the present. Cultural conflict, and interaction of political, social, and economic forces. Offered Yearly.

Equivalent: LAS 2430

HIS 2435 Introduction to Digital Humanities Cr. 3

Digital humanities scholarship has exploded over the last ten years. Early DH scholarship represented a niche in humanities fields like English and History, dominated by unique individuals who had both technical programming skills and experience in humanities research. Since its early days, the field of digital humanities has expanded significantly. New tools and platforms make DH research more accessible. Today, DH scholars work in a highly collaborative, interdisciplinary environment that place programmers and developers, information science specialists, and humanities scholars in active conversation. In this course, students will be introduced to these different elements – tools, methods, theories, and critical analysis – of the digital humanities in order to learn new ways to interpret artistic or cultural objects or ideas, social relationships, and historical processes. Offered Fall.

Equivalent: ENG 2435

HIS 2440 History of Mexico Cr. 3

Satisfies General Education Requirement: Foreign Culture, Global Learning Inquiry

Historical development of Mexico and the Mexican people from the Spanish conquest to the present. Interaction of political, social, economic and cultural influences. Offered Yearly.

Equivalent: LAS 2410

HIS 2500 Introduction to Peace and Conflict Studies Cr. 3

Introduction to the peace and conflict studies co-major. Survey, ranging from biology and conflict among animals to disputes involving the individual, the family, the neighborhood and region, the nation and global or international community. Definitions and approaches to peace. (Some sections linked to Peace and Justice Learning Community.) Offered Yearly.

Equivalent: PCS 2000, PS 2820

HIS 2510 Science, Technology, and War Cr. 4

Modern weapons, nuclear and otherwise are becoming increasingly available and dangerous; people with grievances seem eager to use them. Science and technology, as well as constraints of bureaucracy and society underpin weapons development and use, as technologies affect prospects and results of war and peace. History of humanity and its tools of war. Offered Yearly.

Equivalent: PCS 2020, PHY 2020, PS 2440

HIS 2520 Topics in Peace and Conflict Studies Cr. 1-4

Special topics relating to peace and conflict studies. Offered Every Term.

Equivalent: PCS 2010, PS 2830

Repeatable for 12 Credits

HIS 2530 The Study of Non-Violence Cr. 3

Satisfies General Education Requirement: Diversity Equity Incl Inquiry
Intellectual and social roots of non-violence and the practice of non-violence in different people's life styles. Historical and political forces and movements related to non-violence. (Some sections linked to Peace and Justice Learning Community.) Offered Every Term.

Equivalent: PCS 2050, PS 2550, SOC 2050

HIS 2605 History of Women, Gender and Sexuality in the Modern World Cr. 3

Satisfies General Education Requirement: Diversity Equity Incl Inquiry, Global Learning Inquiry, Historical Studies
Examination of change over time, using different historical approaches to try to account for change as specifically applicable from a comparative perspective to the experiences of women and constructions of gender and sexual identity. Offered Every Term.

Restriction(s): Enrollment is limited to Undergraduate level students.

Equivalent: GSW 2600

HIS 2700 Introduction to Canadian Studies Cr. 3

Satisfies General Education Requirement: Foreign Culture, Global Learning Inquiry

Survey of Canada in its cultural, literary, historical, geographical and political aspects; key concepts and social patterns that define the Canadian experience. Offered Yearly.

Equivalent: ENG 2670, GPH 2700, PS 2700

HIS 2800 Introduction to Global Issues and Institutions Cr. 3

Satisfies General Education Requirement: Global Learning Inquiry, Social Inquiry, Social Sciences

Provides a broad overview of some of the big and controversial questions facing our increasingly globalized world today and introduces some of the tools we have to confront these issues. Topics include the conflict and security threats, protection of human rights, global warming, and resource management. Offered Fall, Winter.

Equivalent: GLS 2800

HIS 3000 The Historian's Craft Cr. 3

Provides an introduction to the discipline of history and the methodological skills that historians need to explore their areas of interest. Offered Fall, Winter.

HIS 3010 Jewish History from the Bible to 1492 Cr. 4

Survey the history of the Jews from biblical antiquity until the Expulsion from Spain. Special attention will be paid to the world of the Hebrew Bible, the Jewish encounter with Hellenistic Civilization, the creation and triumph of Rabbinic Judaism, and Jewish life under Christian and Muslim Rule. Offered Intermittently.

Restriction(s): Enrollment is limited to Undergraduate level students.

Equivalent: NE 3010

HIS 3011 Jewish History since 1492 Cr. 3

Major developments in Jewish History since the expulsion of the Jews from Spain in 1492. Specific topics include the impact of the Spanish expulsion, the Jews of the Ottoman Empire, Jews and the Italian Renaissance, Martin Luther and the Jews, the golden age of Polish Jewry, 1648, Shabbetai Tzvi, Hassidic Judaism, the Court Jews and Age of Absolutism, the impact of the Enlightenment, the French Revolution and the Age of Emancipation, the twin birth of Reform and Orthodox Judaism, Anti-Semitism and the Dreyfus Affair, Zionism and other forms of Jewish Nationalism, Hitler and the Final Solution, the creation of the State of Israel, and Jews in Post-World War II America, Israel, Europe, and the Soviet Union. Offered Intermittently.

Restriction(s): Enrollment is limited to Undergraduate level students.

Equivalent: NE 3011

HIS 3015 History of Judaism and Jewish Thought Cr. 4

Development of Judaism and Jewish thought from early beginnings in the Hebrew Bible to contemporary American Jewish religious developments. Offered Intermittently.

Equivalent: NE 3015

HIS 3140 African American History I: 1400-1865 Cr. 3-4

Satisfies General Education Requirement: Diversity Equity Incl Inquiry African origins of African Americans; transition from freedom to slavery; status of African Americans under slavery. Offered Yearly.

Equivalent: AFS 3140

HIS 3150 African American History II: 1865-1968 Cr. 3-4

Satisfies General Education Requirement: Diversity Equity Incl Inquiry African American history from Reconstruction through the Civil Rights Movement. Offered Yearly.

Equivalent: AFS 3150

HIS 3155 African American History III: 1968 - Present Cr. 3-4

Satisfies General Education Requirement: Diversity Equity Incl Inquiry History of African Americans' struggle against persistent and stubborn racism, efforts to achieve full citizenship, and legal and economic justice after 1968. Offered Intermittently.

Restriction(s): Enrollment is limited to Undergraduate level students.

Equivalent: AFS 3155

HIS 3160 Black Urban History Cr. 4

Satisfies General Education Requirement: Diversity Equity Incl Inquiry Historical experience of African Americans in urban areas; impact of their communities on urban development from 1860 to contemporary times. Offered Fall, Winter.

Equivalent: AFS 3160

HIS 3170 Ethnicity and Race in American Life Cr. 3-4

Satisfies General Education Requirement: Diversity Equity Incl Inquiry Exploration of complicated relationship between ethnic and racial diversity and the making of America. Using historical, literary, and cultural readings and sources to examine key themes: Who was the "Other"? What is an "American"? Offered Yearly.

Equivalent: AFS 3170

HIS 3180 Black Social Movements Cr. 4

Satisfies General Education Requirement: Diversity Equity Incl Inquiry Survey of mass or popular Black movements with emphasis on their political and cultural impact, historical continuity and organization. Offered Yearly.

Equivalent: AFS 3180

HIS 3230 The Civil Rights Movement Cr. 3

Historically-driven survey of the Civil Rights Movement; focus on African Americans' efforts to enjoy the full benefits of American citizenship. Offered Yearly.

Restriction(s): Enrollment is limited to Undergraduate level students.

Equivalent: AFS 3230

HIS 3240 Detroit Politics: Continuity and Change in City and Suburbs Cr. 4

Satisfies General Education Requirement: Diversity Equity Incl Inquiry Detroit area political systems and processes; historical, economic, and social influences on local politics. Traditions, changes, and future challenges in Detroit and metropolitan area. Offered Every Other Year.

Equivalent: PS 3250

HIS 3250 The Family in History Cr. 3-4

Satisfies General Education Requirement: Social Inquiry Comparative survey emphasizing the transformation from traditional patterns of family life to family and kin in modern industrial society; students research their own family histories. Offered Every Other Year.

HIS 3320 Twentieth Century Middle East Cr. 3

The contemporary Middle East; emphasis on social and economic development. Investigation of issues that identify the region, such as oil, gender issues, fundamentalism, and regional conflicts. Offered Every Term.

Equivalent: NE 3040

HIS 3330 Civilizations of the Nile Valley: Egypt and Nubia Cr. 4

From Neolithic era to the seventh century of our era. Offered Every Other Year.

HIS 3345 Christianity in Africa Cr. 4

This course explores the history of missionization on the African continent; its role in furthering the colonial project and the changes it brought for African societies; and the role of Africans in shaping Christian practice. Offered Fall.

HIS 3360 Black Workers in American History Cr. 4

Satisfies General Education Requirement: Social Inquiry Survey course. Slave and free workers during antebellum period; skill trades, sharecropping, menial labor, and coal mining during Reconstruction; labor struggles and job discrimination in the twentieth century. Offered Fall, Winter.

Equivalent: AFS 3360

HIS 3440 American Medicine in the Twentieth Century Cr. 3

Major historical benchmarks in the making of the medical system in the U.S., including developments in medicine and medical knowledge, as well as social and political factors that influenced their reception and implementation. Offered Winter.

Restriction(s): Enrollment is limited to Undergraduate level students.

Equivalent: SOC 3440

HIS 3445 History of the Future Cr. 3

Explores how writers, politicians, historians, and ordinary people think about time—how we think about history and how we imagine the past and future in time travel stories, science fiction, scientific research, and public predictions about the future. It uses the history of technologies—and technological changes—as a means of anchoring our discussion of how writings (and visual media such as film and television) view past and future work, war and conflict, environmental change, reproduction, and human community. Offered Every Other Year.

HIS 3490 History of Russia and Eurasia to 1917 Cr. 4

Interaction of cultures, politics and societies of Russia and Eurasia to the Russian Revolution of 1917. Offered Yearly.

Restriction(s): Enrollment is limited to Undergraduate level students.

HIS 3585 Science, Technology, and Society Cr. 3

Introduction to the field of Science and Technology Studies; how conflicts about science and technology are generated and resolved; how broader societal institutions help shape, and are shaped by, science and technology. Offered Winter.

Restriction(s): Enrollment is limited to Undergraduate level students.

HIS 3650 History of Detroit Cr. 3

Satisfies General Education Requirement: Diversity Equity Incl Inquiry
History of Detroit from European contact to the present, with emphasis on the late-19th and 20th centuries. Offered Fall, Winter.

Equivalent: US 3650

HIS 3991 Directed Study: Salford - WSU Exchange Cr. 3-9

Directed study at University of Salford, England. Offered Fall, Winter.

Repeatable for 9 Credits

HIS 3995 Special Topics in History Cr. 1-4

Specialized and topical studies in historical events, personalities and themes. Topics to be announced in Schedule of Classes . Offered Every Term.

Repeatable for 8 Credits

HIS 3996 Topics in African History Cr. 1-4

Topics to be announced in Schedule of Classes . Offered Intermittently.

Repeatable for 8 Credits

HIS 3998 Topics in American History Cr. 1-4

Topics to be announced in Schedule of Classes . Offered Intermittently.

Repeatable for 8 Credits

HIS 4990 Directed Study Cr. 1-6

Offered Every Term.

Repeatable for 6 Credits

HIS 4993 History Communication Cr. 3

This course examines the challenges associated with communicating about the past in today's media-saturated environment. Case studies include analysis of communication surrounding controversial historical issues such as slavery and race, to the examination of successful history communicators operating in various media. An important sub-theme focuses on best practices and ethics when it comes to communicating history to non-experts through emerging media. Students also learn how to "economize" the history communicator skillset for the workplace. Offered Fall.

Equivalent: ANT 4993

HIS 4994 Digital History Seminar Cr. 3

Explores both the opportunities and the challenges of digital history. Throughout the semester, students work in groups to construct a digital project for the Reuther Archive in which they will digitize sources and create content based on distinct parts of the Reuther's collection. The end goal is a digital exhibit that will both make these materials more accessible and help communicate their significance for the general public. Offered Every Other Fall.

HIS 4997 Internship in Public History Cr. 3

Professional experience in public history under the supervision of a public history practitioner and a departmental advisor. Offered Every Term.

Restriction(s): Enrollment is limited to students with a major in History or History Honors.

HIS 5010 Colonial North America Cr. 4

European expansion to North America, interaction among European, Native American, and African peoples, and imperial competition over the New World through the Seven Years' War. Offered Intermittently.

HIS 5020 Revolutionary America Cr. 4

Social, political, and cultural background to America's independence movement; development of American national identity, social relations, and early politics through the election of 1800. Offered Intermittently.

HIS 5030 Early American Republic: 1789-1850 Cr. 4

Emphasis on the political culture with special attention to the founding of the American Republic, the emergence of a modern economy, slavery, social reform, and the sectional crisis. Offered Every Other Year.

HIS 5040 Civil War and Reconstruction: 1850-1877 Cr. 3

Emphasis on the coming of the Civil War, the war's impact on American society, and the reconstruction of the United States after the war. Offered Every Other Year.

Social, political, intellectual, economic, diplomatic, and cultural trends in the United States since World War II. Offered Yearly.

HIS 5110 Class, Race, and Politics in America Cr. 3

Historical and analytic investigation into the role of class and race in American politics. Offered Intermittently.

Equivalent: AFS 6100, PS 6050, SOC 7330, UP 7030

HIS 5130 American Foreign Relations Since 1933 Cr. 4

United States involvement in the international system from the twenties to the present. Emphasis on World War II to Vietnam and the role of the United States in the Cold War and the Third World. Offered Every Other Year.

HIS 5160 American Legal Culture to 1857 Cr. 4

The emergence of distinctively Anglo-American legal cultures in the Atlantic basin and then in North America, from early exploration and settlement until the early stages of Civil War. Special attention is paid to law's ongoing relationship to state making, the shifting terrain of citizenship, the emergence of capitalism, and the construction within society of racial, gendered, and class distinctions. Not a prerequisite for HIS 5170. Offered Every Other Year.

HIS 5170 American Legal Culture after 1857 Cr. 4

The post-Civil War development of legal-cultural constructs as Americans industrialized, modernized, globalized, and centralized public life. Special attention will be paid to law's ongoing relationship to state-making, the shifting terrain of citizenship, the emergence of the modern welfare state, economic regulation and de-regulation, and the construction of racial, gendered, and class distinctions. Offered Every Other Year.

HIS 5200 Women, Gender, and Sexuality in US History Cr. 3

the history of women in the United States and the role of gender and sexuality in shaping women/qs and men/qs experience and identity. Offered Every Other Year.

HIS 5210 The Peopling of Modern America, 1790-1914: A History of Immigration Cr. 3-4

Causes and consequences of immigration; immigrants and labor; immigrant culture and institutions; relationship between immigration, industrialization, and urbanization; racism, nativism, and immigration restriction. Offered Every Other Year.

HIS 5220 The Changing Shape of Ethnic America: World War I to the Present Cr. 3-4

Assimilation, cultural pluralism and the ""melting pot""; persistence of ethnic cultures; class and ethnicity; internal migrations; America's recent immigrants; race and ethnic relations in the city; the ""new ethnicity."" Offered Every Other Year.

HIS 5230 History Of South Cr. 3

Equivalent: HIS 7230

HIS 5231 The Conquest in Latin America Cr. 3

Varying perspectives on European conquests in Latin America. Offered Intermittently.

Equivalent: LAS 5231

HIS 5234 Race in Colonial Latin America Cr. 3

Use of race to organize colonial society in Latin America. Offered Intermittently.

Equivalent: LAS 5234

HIS 5235 The Civil Rights Movement Cr. 3

Historically-driven survey of the Civil Rights Movement; focus on African Americans' efforts to enjoy the full benefits of American citizenship.

Offered Yearly.

Equivalent: AFS 5230

HIS 5240 Michigan History in Perspective Cr. 3

Social, economic, environmental, and political history of Michigan from prehistory to the present. Offered Winter.

Restriction(s): Enrollment is limited to Graduate or Undergraduate level students.

HIS 5251 History of Feminism Cr. 4

An upper-division/graduate-level course on the main ideological, intellectual, and political sources and developments in the history of feminism in the United States. Offered Every Other Year.

Restriction(s): Enrollment is limited to Graduate or Undergraduate level students; enrollment limited to students with a class of Unranked Grad, Junior or Senior.

HIS 5261 African American History and Memory Cr. 3

An examination of the ways different groups and institutions remember and forget African American history. Each term the course will have a specific focus that will be advertised in advance. Offered Fall.

Equivalent: AFS 5261

Repeatable for 6 Credits

HIS 5290 American Labor History Cr. 4

Analysis of American workers and unions in the nineteenth and twentieth centuries. Offered Every Other Year.

Equivalent: ECO 5490

HIS 5300 History of American Capitalism Cr. 4

History and development of American capitalism from the colonial period through the 2008 financial crisis. Offered Every Other Year.

HIS 5330 History of Ancient Greece Cr. 3

Ancient Greek culture, emphasizing political events, social and economic institutions, and cultural achievements. Offered Every Other Year.

HIS 5335 History of the Hellenistic Age Cr. 3

The History of Greece and the Eastern Mediterranean world from Alexander the Great to the Roman conquest: 323 B.C. to 30 B.C. Offered Every Other Year.

HIS 5340 History of Ancient Rome Cr. 3

Institutional and cultural development. Offered Every Other Year.

Equivalent: HIS 7340

HIS 5345 Rome and the Barbarians Cr. 3

The relationship between ancient Rome and the pre-state societies that existed beyond its frontiers from about 300 B.C.E to about 500 C.E. Offered Every Other Year.

HIS 5360 The Early Middle Ages: 300-1000 Cr. 3

Interaction of Roman, Christian, and barbarian elements in the emergence of Europe as a cultural entity between the fourth and tenth centuries. Offered Every Other Year.

HIS 5370 The High Middle Ages: 1000-1300 Cr. 3

Economic, social, and cultural developments that transformed Western European civilization during the eleventh, twelfth and thirteenth centuries. Offered Every Other Year.

HIS 5385 History of Christianity to the Reformation Cr. 3

Survey of Christianity from Jesus to the Reformation. Balanced coverage of Christianity in Europe, Asia, and Africa. Offered Yearly.

HIS 5386 The History of Christianity from the Reformation to the Present Cr. 3

Examines the Reformation, the export of Christianity to the New World, Africa, and Asia; and the challenges posed to Christian cultural hegemony in the west by science and modernism. Offered Intermittently.

HIS 5395 Social History of the Roman Empire Cr. 3-4

Social institutions of the Roman empire, including the family, patronage, slavery, economy, and religion. Offered Yearly.

HIS 5400 Early Modern Europe Cr. 4

Development of modern centralized state; social and cultural changes, including the Enlightenment. Offered Every Other Year.

HIS 5407 The Scientific Revolution Cr. 3

Rise of modern science; major changes in study of astronomy, medicine, physics, mathematics, and other sciences from 1500 to 1700. Offered Intermittently.

HIS 5410 The French Revolution and Napoleon Cr. 4

The dramatic changes of the late eighteenth and early nineteenth century that altered the course of French and European development and laid the basis for political modernization. Offered Every Other Year.

HIS 5425 American Environmental History Cr. 3

From the pre-Columbian period to the present day; emphasis on twentieth-century urban history, using Detroit as a model for the changing human/environment relationship over the past three centuries. Offered for undergraduate credit only. Offered Fall.

Restriction(s): Enrollment is limited to Graduate or Undergraduate level students.

HIS 5440 Twentieth Century Europe Cr. 4

Total war and disillusionment, attempts to restore stability and security, totalitarianism as an answer, more war and reconstruction, a divided Europe, and the search for Europe's place in the world. Offered Every Other Year.

HIS 5450 Europe, 1918-1939: Mass Politics and Culture in the Age of Hitler, Stalin, and Mussolini Cr. 4

Social and cultural trends in modern European society; ideological struggles of interwar period. Topics include: impact of World War I; development of communism, fascism, Nazism; Freud and the liberal defense; existentialism; postwar disillusionment. Offered Yearly.

HIS 5460 History of the Holocaust Cr. 4

Holocaust as a tragic juncture of general European and Jewish history. Topics include: development of anti-Semitism in Europe and the rise of Nazism; European Jewry in the interwar period; the Third Reich's treatment of the "Jewish Question" in the 1930s; Jewish resistance; fate of the survivors; implications of the Holocaust for contemporary society. Offered Yearly.

HIS 5480 Nazi Germany Cr. 3-4

Hitler and Nazi Germany. Topics include: impact of World War I, the Weimar Republic, the growth of the Nazi party, the seizure of power, internal and foreign policies, and the war experience. Offered Every Other Year.

Equivalent: HIS 7480

HIS 5490 His: Russia & Eurasia to 1917 Cr. 4

Offered Yearly.

HIS 5495 History of the Russian Revolution Cr. 3-4

The Russian Revolution, including fall of tsarist Russia, reign of the Provisional Government, and establishment of power by the Communist Party. Offered Yearly.

HIS 5500 The Soviet Union Cr. 4

Bolshevik seizure of power, collectivization of agriculture and forced-draft industrialization, Nazi German invasion, Khrushchev and deStalinization, predominance of the new middle class, nationality problems, and problems of detente. Offered Every Other Year.

HIS 5530 History of World War I and II: A Social and Political History of Two World Wars Cr. 4

Provides an in-depth and truly global look at the history of both wars. Topics will include the political events leading up to the wars and their political aftermath, as well as their short- and long-term effects on societies. Offered Every Other Year.

Equivalent: HIS 7530

HIS 5535 History of Terrorism Cr. 3

Examines terrorism from its beginnings until its most recent manifestations. It starts with a critical examination of the term terrorism itself, but the main focus of this course will not be on discussions about the concept and its various meanings, but rather on high profile instances of what is commonly referred to as terrorism. The course will take a transnational approach and engage in comparative history. Offered Every Other Year.

HIS 5540 World Environmental History since 1900 Cr. 4

This course examines the transformation of the relationship between human society and the natural environment in global context since 1900. Available for undergraduate credit only. Offered Fall.

Equivalent: GLS 5540

HIS 5550 Britain 1485-1714 Cr. 4

Impact of religious, political and social change on British people during sixteenth, seventeenth, and early eighteenth centuries. Offered Every Other Year.

HIS 5555 Britain in the Age of Empire Cr. 4

History of Britain and the rise of the British Empire, 1700-1800, focusing on political, economic, intellectual, and social developments. Special emphasis on shifting notions of what it meant to be "British" during the period. Offered Every Other Year.

HIS 5556 History of Modern Britain Cr. 4

Modern British history from 1815 to the present day: political, economic, intellectual, and social developments, in Britain itself and across the Empire. Offered Every Other Year.

HIS 5585 Studies in Science, Technology, and Society Cr. 3

Introduction to the field of Science and Technology Studies; how conflicts about science and technology are generated and resolved; how broader societal institutions help shape, and are shaped by, science and technology. Offered for graduate credit only. Offered Winter.

Restriction(s): Enrollment is limited to Graduate level students.

HIS 5660 France Since 1815 Cr. 4

Struggle between old and new political forces, impact of industrialization, search for freedom with order, effect of total war, problems of decolonization and European integration, and cultural transformations. Offered Every Other Year.

HIS 5665 Global Cities Cr. 3

Social, political, economic, and cultural history of cities around the world, with an emphasis on the 19th and 20th centuries. Offered Intermittently.

HIS 5670 Modern American Cities Cr. 3

History of U.S. cities since World War II. Topics include suburbanization, deindustrialization, gentrification, and globalization. Offered Intermittently.

Equivalent: UP 5670

HIS 5715 Everyday Africa Cr. 4

Moving beyond the conventional narrative; an alternative history based on the everyday lives of individuals and communities, challenging the way we understand Africa's past and present. Offered Fall.

HIS 5725 African Cities Cr. 4

An exploration of the emergence of cities in sub-Saharan Africa and major themes in the history of urban Africa: work, leisure, popular culture, politics, conflict, gender, generation, ethnicity, and race. Offered Winter.

HIS 5825 Readings in the History of Modern China Cr. 4

From early 1600s to the present; political, economic, and social changes. Offered Every Other Year.

Equivalent: ASN 5825

HIS 5855 Pre-Modern Japan Cr. 4

Japanese history from its mythical origins to early nineteenth century; political, economic, social, cultural developments. Offered Every Other Year.

Equivalent: ASN 5855

HIS 5865 Modern Japan Cr. 4

Japanese history from the early nineteenth century to the present; emphasis on political, economic, and social developments. Offered Yearly.

Equivalent: ASN 5865

HIS 5875 Gender in Modern East Asia Cr. 4

History of gender in China, Japan, and Korea, with topics to include Confucianism, the state's role in gender construction, nationalism, imperialism, marriage, family, labor, sexuality, and feminism. Offered Every Other Year.

Equivalent: ASN 5875, GSW 5875

HIS 5960 Globalization, Social History and Gender in the Arabian Gulf Cr. 3

Social history of the Arabian Gulf (especially Bahrain, Qatar, and the UAE) in the age of globalization. Contemporary history with special emphasis on gender relations as an index of current social developments in the region. Offered Every Other Year.

Equivalent: NE 5000

HIS 5991 Directed Study: Salford - WSU Exchange Cr. 3-9

Directed study at University of Salford, England. Offered for undergraduate credit only. Offered Fall, Winter.

Restriction(s): Enrollment is limited to Undergraduate level students.

HIS 5993 Writing Intensive Course in History Cr. 0

Satisfies General Education Requirement: Writing Intensive Competency Must be selected in conjunction with HIS 5996: Junior/Senior Research Seminar. For HIS 5996, students write a research paper of approximately twenty typed pages, including footnotes and a bibliography, and using primary sources. A C or higher on that paper is required to earn a Satisfactory for HIS 5993 and to fulfill the University General Education Writing Intensive requirement for the History major and History Honors major. Offered Fall, Winter.

Prerequisites: AFS 2390 with a minimum grade of C or ENG 2390 with a minimum grade of C or ENG 3010 with a minimum grade of C or ENG 3020 with a minimum grade of C or ENG 3050 with a minimum grade of C

Restriction(s): Enrollment limited to students with a class of Junior or Senior; enrollment is limited to students with a major in History or History Honors.

HIS 5995 Honors Seminar Cr. 3

Offered Every Term.

Restriction(s): Enrollment is limited to students with a major in History Honors; enrollment limited to students in a Bachelor of Arts degree.

HIS 5996 Junior or Senior Research Seminar Cr. 3

Examines what historians have written about a particular topic, theme, or period, along with what has shaped their interpretations. Students will also conduct independent research on a self-chosen aspect of that topic, theme, or period using primary sources and construct a paper based on that research. Offered for undergraduate credit only. Offered Intermittently.

Prerequisites: HIS 3000 with a minimum grade of C and HIS 3001-6999 with a minimum grade of C

Restriction(s): Enrollment limited to students with a class of Junior or Senior.

HIS 6000 Studies in Comparative History Cr. 2-4

Topics to be announced in Schedule of Classes. Offered Every Other Year.

HIS 6010 Studies in American History Cr. 2-4

Topics to be announced in Schedule of Classes. Offered Yearly.

Repeatable for 9 Credits

HIS 6170 Studies in Ethnicity and Race in American Life Cr. 3-4

Exploration of complicated relationship between ethnic and racial diversity and the making of America. Using historical, literary, and cultural readings and sources to examine key themes: Who was the "Other"? What is an "American"? Offered Every Other Year.

Equivalent: AFS 6170

HIS 6440 Studies in American Medicine in the Twentieth Century Cr. 3

Major historical benchmarks in the making of the medical system in the U.S., including developments in medicine and medical knowledge, as well as social and political factors that influenced their reception and implementation. Offered for graduate credit only. Offered Winter.

Restriction(s): Enrollment is limited to Graduate level students.

HIS 6780 Introduction to Records and Information Management Cr. 3

Management of information, including records creation, records inventory and appraisal, retention/disposition scheduling, filing systems, maintenance of inactive records, micrographics, vital records protection, and electronic impact on records management. Offered for graduate credit only. Offered Fall.

Restriction(s): Enrollment is limited to Graduate level students.

Equivalent: INF 6780

HIS 6993 History Communication Cr. 3

This course examines the challenges associated with communicating about the past in today's media-saturated environment. Case studies include analysis of communication surrounding controversial historical issues such as slavery and race, to the examination of successful history communicators operating in various media. An important sub-theme focuses on best practices and ethics when it comes to communicating history to non-experts through emerging media. Students also learn how to "economize" the history communicator skillset for the workplace. Offered Every Other Fall.

Restriction(s): Enrollment is limited to Graduate level students.

Equivalent: ANT 6993

HIS 7010 Readings in Colonial North America Cr. 4

Offered Intermittently.

Restriction(s): Enrollment is limited to Graduate level students.

HIS 7020 Readings in Revolutionary America Cr. 4

Offered Intermittently.

Restriction(s): Enrollment is limited to Graduate level students.

HIS 7030 Readings in the Early American Republic: 1789-1850 Cr. 4

Offered Every Other Year.

Restriction(s): Enrollment is limited to Graduate level students.

HIS 7040 Readings in the Civil War and Reconstruction: 1850-1877 Cr. 3

Offered Every Other Year.

Restriction(s): Enrollment is limited to Graduate level students.

HIS 7070 Readings in Contemporary American History: 1945 to the Present Cr. 4

Offered Yearly.

Restriction(s): Enrollment is limited to Graduate level students.

HIS 7130 Readings in American Foreign Relations Since 1933 Cr. 4

Offered Yearly.

Restriction(s): Enrollment is limited to Graduate level students.

HIS 7160 Readings in American Legal Culture to 1857 Cr. 4

The emergence of distinctively Anglo-American legal cultures in the Atlantic basin and then in North America, from early exploration and settlement until the early stages of Civil War. Special attention is paid to law's ongoing relationship to state making, the shifting terrain of citizenship, the emergence of capitalism, and the construction within society of racial, gendered, and class distinctions. Not a pre-requisite for HIS 7170. Offered Every Other Year.

Restriction(s): Enrollment is limited to Graduate or Law level students.

HIS 7170 Readings in American Legal Culture after 1857 Cr. 4

The post-Civil War development of legal-cultural constructs as Americans industrialized, modernized, globalized, and centralized public life. Special attention will be paid to law's ongoing relationship to state-making, the shifting terrain of citizenship, the emergence of the modern welfare state, economic regulation and de-regulation, and the construction of racial, gendered, and class distinctions. Offered Winter.

Restriction(s): Enrollment is limited to Graduate or Law level students.

HIS 7200 Readings in Women, Gender, and Sexuality in US History Cr. 3

An advanced graduate course that explores the history of women in the United States and the role of gender and sexuality in shaping women's and men's experience and identity and the approaches to its study. Offered Every Other Year.

Restriction(s): Enrollment is limited to Graduate level students.

HIS 7210 Readings in the Peopling of Modern America, 1790-1914: A History of Immigration Cr. 3-4

Offered Yearly.

Restriction(s): Enrollment is limited to Graduate level students.

HIS 7220 Readings in the Changing Shape of Ethnic America: World War I to the Present Cr. 3-4

Offered Yearly.

Restriction(s): Enrollment is limited to Graduate level students.

HIS 7230 Rdg: His Of South Cr. 3

Restriction(s): Enrollment is limited to Graduate level students.

Equivalent: HIS 5230

HIS 7231 The Conquest in Latin America Cr. 3

Varying perspectives on European conquests in Latin America. Offered Intermittently.

Restriction(s): Enrollment is limited to Graduate level students.

HIS 7234 Readings in Race in Colonial Latin America Cr. 3

Use of race to organize colonial society in Latin America. Offered Intermittently.

Restriction(s): Enrollment is limited to Graduate level students.

HIS 7240 English Legal History Cr. 3

Survey course: 1066 CE to present. Areas of private law: real property, contracts, torts, and family law; criminal law; development of the court system; labor law and rise of modern administrative state. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate level students.

HIS 7251 History of Feminism Cr. 4

Offered Every Other Year.

Restriction(s): Enrollment is limited to Graduate level students.

HIS 7261 African American History and Memory Cr. 3

An examination of the ways different groups and institutions remember and forget African American history. Each term the course will have a specific focus that will be advertised in advance. Offered Fall.

Restriction(s): Enrollment is limited to Graduate level students.

Repeatable for 6 Credits

HIS 7290 Readings in American Labor History Cr. 4

Offered Yearly.

Restriction(s): Enrollment is limited to Graduate level students.

HIS 7300 Readings in the History of American Capitalism Cr. 4

Advanced graduate course in the history and development of American capitalism from the colonial period through the 2008 financial crisis.

Offered Yearly.

Restriction(s): Enrollment is limited to Graduate level students.

HIS 7330 Readings in the History of Ancient Greece Cr. 3

Offered Every Other Year.

Restriction(s): Enrollment is limited to Graduate level students.

HIS 7335 Readings in the History of the Hellenistic Age Cr. 3

The History of Greece and the Eastern Mediterranean world from Alexander the Great to the Roman conquest: 323 B.C. to 30 B.C. Offered Every Other Year.

Restriction(s): Enrollment is limited to Graduate level students.

HIS 7340 Readings in the History of Ancient Rome Cr. 3

Offered Every Other Year.

Restriction(s): Enrollment is limited to Graduate level students.

HIS 7345 Readings in Rome and the Barbarian Cr. 3

The relationship between ancient Rome and the pre-state societies that existed beyond its frontiers from about 300 B.C.E to about 500 C.E.

Offered Every Other Year.

Restriction(s): Enrollment is limited to Graduate level students.

HIS 7360 Readings in the Early Middle Ages: 300-1000 Cr. 3

Offered Every Other Year.

Restriction(s): Enrollment is limited to Graduate level students.

HIS 7370 Readings in the High Middle Ages: 1000-1300 Cr. 3

Offered Every Other Year.

Restriction(s): Enrollment is limited to Graduate level students.

HIS 7385 Readings in the History of Christianity to the Reformation Cr. 3

Survey of Christianity from Jesus to the Reformation. Balanced coverage of Christianity in Europe, Asia, and Africa. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate level students.

HIS 7386 Readings in the History of Christianity from the Reformation to the Present Cr. 3

Students will read primary and secondary literature relating to the Reformation, the export of Christianity to the New World, Africa, and Asia; and the challenges posed to Christian cultural hegemony in the west by science and modernism. Offered Intermittently.

HIS 7395 Readings in the Social History of the Roman Empire Cr. 3-4

Offered Yearly.

Restriction(s): Enrollment is limited to Graduate level students.

HIS 7400 Readings in Early Modern Europe Cr. 4

Offered Every Other Year.

Restriction(s): Enrollment is limited to Graduate level students.

HIS 7407 Readings in The Scientific Revolution Cr. 3

Offered Intermittently.

Restriction(s): Enrollment is limited to Graduate level students.

HIS 7410 Readings in the French Revolution and Napoleon Cr. 4

Offered Every Other Year.

Restriction(s): Enrollment is limited to Graduate level students.

HIS 7425 Studies in American Environmental History Cr. 3

From the pre-Columbian period to the present day; emphasis on twentieth century urban history, using Detroit as a model for the changing human/environment relationship over the past three centuries. Offered for graduate credit only. Offered Fall.

Restriction(s): Enrollment is limited to Graduate level students.

HIS 7440 Readings in Twentieth Century Europe Cr. 4

Offered Every Other Year.

Restriction(s): Enrollment is limited to Graduate level students.

HIS 7450 Readings on Europe, 1918-1939: Mass Politics and Culture in the Age of Hitler, Stalin, and Mussolini Cr. 4

Offered Yearly.

Restriction(s): Enrollment is limited to Graduate level students.

HIS 7465 Readings in the History of the Holocaust Cr. 4

Offered Yearly.

Restriction(s): Enrollment is limited to Graduate level students.

HIS 7480 Readings in Nazi Germany Cr. 3-4

Offered Yearly.

Restriction(s): Enrollment is limited to Graduate level students.

HIS 7495 Readings in the History of the Russian Revolution Cr. 3-4

The Russian Revolution, including fall of tsarist Russia, reign of the Provisional Government, and establishment of power by the Communist Party. Offered for graduate credit only. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate level students.

HIS 7500 Readings in the Soviet Union Cr. 4

Offered Every Other Year.

Restriction(s): Enrollment is limited to Graduate level students.

HIS 7530 Readings in the History of World War I and II: A Social and Political History of Two World Wars Cr. 4

Provides an in-depth and truly global look at the history of both wars. Topics will include the political events leading up to the wars and their political aftermath, as well as their short- and long-term effects on societies. Offered Every Other Year.

Restriction(s): Enrollment is limited to Graduate level students.

HIS 7535 Readings in the History of Terrorism Cr. 3

Examines terrorism from its beginnings until its most recent manifestations. It starts with a critical examination of the term terrorism itself, but the main focus of this course will not be on discussions about the concept and its various meanings, but rather on high profile instances of what is commonly referred to as terrorism. The course will take a transnational approach and engage in comparative history. Offered Every Other Year.

HIS 7540 Readings in World Environmental History Cr. 4

This course examines the transformation of the relationship between human society and the natural environment in global context since 1900. Offered Fall.

Restriction(s): Enrollment is limited to Graduate level students.

HIS 7550 Readings in Britain: 1485-1714 Cr. 4

Offered Every Other Year.

Restriction(s): Enrollment is limited to Graduate level students.

HIS 7555 Readings in Britain in the Age of Empire Cr. 4

Readings in the history of Britain and the rise of the British Empire, 1700-1880, focusing on political, economic, intellectual, and social developments. Special emphasis on shifting notions of what it meant to be "British" during the period. Offered Every Other Year.

HIS 7556 Readings in the History of Modern Britain Cr. 4

Readings in modern British history from 1815 to the present day: political, economic, intellectual, and social developments, in Britain itself and across the empire. Offered Every Other Year.

Restriction(s): Enrollment is limited to Graduate level students.

HIS 7660 Readings in France Since 1815 Cr. 4

Offered Every Other Year.

Restriction(s): Enrollment is limited to Graduate level students.

HIS 7665 Global Cities Cr. 3

Social, political, economic, and cultural history of cities around the world, with an emphasis on the 19th and 20th centuries. Offered for graduate credit only. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate level students.

HIS 7670 Modern American Cities Cr. 3

History of U.S. cities since World War II. Topics include suburbanization, deindustrialization, gentrification, and globalization. Offered Intermittently.

Restriction(s): Enrollment is limited to Graduate level students.

HIS 7685 Practicum: Archives Cr. 3

Planned on-site experience in an archives under the direction of a professional archivist/librarian and under the supervision of a member of the faculty. Theory and competencies relevant to the environment. Recommended for students without experience in archives. Offered Every Term.

Prerequisite: INF 6010 with a minimum grade of C and INF 6080 with a minimum grade of C and INF 6120 with a minimum grade of C and INF 6210 with a minimum grade of C and INF 7040 with a minimum grade of C and INF 7710 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

Equivalent: INF 7970

HIS 7715 Readings in Everyday Africa: Life Between the Historical Lines Cr. 4

Moving beyond the conventional narrative; an alternative history based on the everyday lives of individuals and communities, challenging the way we understand Africa's past and present. Offered Fall.

Restriction(s): Enrollment is limited to Graduate level students.

HIS 7725 Readings in African Cities Cr. 4

An exploration of the emergence of cities in sub-Saharan Africa and major themes in the history of urban Africa: work, leisure, popular culture, politics, conflict, gender, generation, ethnicity, and race. Offered Winter.

Restriction(s): Enrollment is limited to Graduate level students.

HIS 7740 Readings in the History of South Africa Cr. 4

Offered Every Other Year.

Restriction(s): Enrollment is limited to Graduate level students.

HIS 7745 Archives and Libraries in the Digital World Cr. 3

Overview of electronic tools and the role of digital process in libraries and archives. Offered Spring/Summer.

Prerequisite: INF 6010 with a minimum grade of C or INF 7710 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

Equivalent: INF 7740

HIS 7810 Introduction to Archival and Library Conservation Cr. 3

Basic course in the fundamentals of archival and library conservation problems and methods essential for effective preservation management of paper and associated materials. Offered Spring/Summer.

Prerequisite: INF 6010 with a minimum grade of C or INF 7710 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

Equivalent: INF 7750

HIS 7820 Description and Access for Archives Cr. 3

Investigation of description of archival materials emphasizing the electronic technologies and standard practices. Offered Yearly.

Prerequisites: May be taken concurrently: INF 7710 with a minimum grade of C or HIS 7840 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

Equivalent: INF 7780

HIS 7830 Methods and Research in History Cr. 3

Methods and tools of research and documentation. Use of aids and guides. Offered Fall.

Restriction(s): Enrollment is limited to Graduate level students.

HIS 7832 History Practicum Cr. 3

Enables career exploration for graduate students, facilitates professional development, and introduces students to the basics of teaching history.

Offered Winter.

Restriction(s): Enrollment is limited to Graduate level students.

HIS 7835 Public History: Theory and Method Cr. 3

Theory and practice of public history, including research and interpretation for popular audiences. Offered Every Other Year.

Restriction(s): Enrollment is limited to Graduate level students.

HIS 7840 Archival Administration Cr. 3

Basic training in archival methods. Offered Fall.

Restriction(s): Enrollment is limited to Graduate level students.

Equivalent: INF 7710

HIS 7855 Memory and History Cr. 3

Introduction to the study of collective and public memory in history; interdisciplinary theories and approaches; case studies. Offered Every Other Year.

Restriction(s): Enrollment is limited to Graduate level students.

HIS 7860 Oral History: A Methodology for Research Cr. 3

Techniques of gathering data from individuals for use in research, classroom teaching, in historical, cultural or other contexts. Offered Spring/Summer.

Restriction(s): Enrollment is limited to Graduate level students.

Equivalent: INF 7770

HIS 7880 Administration of Historical Agencies Cr. 3

The operation of public and private historical agencies, archives and museums. Determination of agency priorities, problems of staffing and finance, governmental regulations, community relations, and professional ethics. Offered Fall.

Restriction(s): Enrollment is limited to Graduate level students.

Equivalent: INF 7885

HIS 7890 Administration and Preservation of Visual Collections Cr. 3

Basic course in the fundamentals of administering a visual collection: evaluation, organization, and control of visual collections in archives, librarians, historical agencies, and museums. Offered Winter.

Prerequisite: HIS 7840 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

Equivalent: INF 7730

HIS 7960 Readings in Globalization, Social History and Gender in the Arabian Gulf Cr. 3

Social history of the Arabian Gulf (especially Bahrain, Qatar, and the UAE) in the age of globalization. Contemporary history with special emphasis on gender relations as an index of current social developments in the region. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate level students.

HIS 7990 Directed Study Cr. 1-4

Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students.

Repeatable for 12 Credits

HIS 7994 Digital History Seminar Cr. 3

Explores both the opportunities and the challenges of digital history. Throughout the semester, students work in groups to construct a digital project for the Reuther Archive in which they will digitize sources and create content based on distinct parts of the Reuther's collection. The end goal is a digital exhibit that will both make these materials more accessible and help communicate their significance for the general public. Offered Every Other Fall.

Restriction(s): Enrollment is limited to Graduate level students.

HIS 7998 Internship in Public History Cr. 1-3

Professional experience in public history under the supervision of a public history practitioner and departmental advisor. Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students.

Repeatable for 6 Credits

HIS 7999 Master's Essay Direction Cr. 1-3

Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students with a class of Candidate Masters.

HIS 8005 Seminar in American Historiography Cr. 3

Past and present practices of American historians: their methods and arguments, their choice of chronology, approach and subject. Offered Every Other Year.

Restriction(s): Enrollment is limited to Graduate level students.

HIS 8010 Seminar in Early American History Cr. 3

From first contact between Europeans and Native Americans through the American Revolution. Offered Every Other Year.

Restriction(s): Enrollment is limited to Graduate level students.

Repeatable for 12 Credits

HIS 8030 Seminar in Modern American History Cr. 3

Offered Intermittently.

Restriction(s): Enrollment is limited to Graduate level students.

Repeatable for 12 Credits

HIS 8050 Seminar in the Constitutional and Legal History of the United States Cr. 3

Offered Intermittently.

Restriction(s): Enrollment is limited to Graduate level students.

Repeatable for 12 Credits

HIS 8060 Seminar in North American Labor History Cr. 3

Offered Every Other Year.

Restriction(s): Enrollment is limited to Graduate level students.

Repeatable for 12 Credits

HIS 8150 Seminar in the History of Gender, Women and Sexuality Cr. 3

Research seminar in the History of Gender, Women, and Sexuality. Topics vary by Term. Offered Yearly.

Prerequisites: HIS 7830 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

Equivalent: GSW 8150

Repeatable for 6 Credits

HIS 8180 Seminar in Immigration History Cr. 3

Offered Intermittently.

Restriction(s): Enrollment is limited to Graduate level students.

Repeatable for 12 Credits

HIS 8235 Seminar in Early Modern European History Cr. 3

Historiographical, methodological and epistemological issues in doing research in early modern European history. Readings, discussions, focused research. Offered Intermittently.

Restriction(s): Enrollment is limited to Graduate level students.

Repeatable for 12 Credits

HIS 8240 Seminar in Modern European History Cr. 3

Offered Every Other Year.

Prerequisite: HIS 7830 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

Repeatable for 12 Credits

HIS 8310 Seminar in World History Cr. 3

Concepts, methodologies and theories of world history; readings, discussions, and written critiques of various schools in the field. Offered Every Other Year.

Restriction(s): Enrollment is limited to Graduate level students.

Repeatable for 12 Credits

HIS 8999 Master's Thesis Research and Direction Cr. 1-8

Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students with a class of Candidate Masters.

Repeatable for 8 Credits

HIS 9900 Teaching History at the College Level Cr. 1

Students meet with graduate director to consider teaching philosophies and strategies; preparation and delivery of a lecture. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students with a class of Doctoral Candidate.

HIS 9990 Pre-Doctoral Candidacy Research Cr. 1-8

Research in preparation for doctoral dissertation. Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students.

Repeatable for 12 Credits

HIS 9991 Doctoral Candidate Status I: Dissertation Research and Direction Cr. 7.5

Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students.

HIS 9992 Doctoral Candidate Status II: Dissertation Research and Direction Cr. 7.5

Offered Every Term.

Prerequisite: HIS 9991 with a minimum grade of S

Restriction(s): Enrollment is limited to Graduate level students.

HIS 9993 Doctoral Candidate Status III: Dissertation Research and Direction Cr. 7.5

Offered Every Term.

Prerequisite: HIS 9992 with a minimum grade of S

Restriction(s): Enrollment is limited to Graduate level students.

HIS 9994 Doctoral Candidate Status IV: Dissertation Research and Direction Cr. 7.5

Offered Every Term.

Prerequisite: HIS 9993 with a minimum grade of S

Restriction(s): Enrollment is limited to Graduate level students.

HIS 9995 Candidate Maintenance Status: Doctoral Dissertation Research and Direction Cr. 0

Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students.

Course Material Fees: \$370.26

Repeatable for 0 Credits

HON - HONORS

HON 1000 The City: Changing Detroit Cr. 4

Satisfies General Education Requirement: Civic Literacy, Diversity Equity Incl Inquiry, Social Sciences

Honors 1000 is the first half of the Honors Foundation Sequence. The course explores the history and development of the city of Detroit, including the challenges of de-industrialization and segregation, and guides students through the steps of civic engagement including how to identify and specify social problems, formulate workable solutions and advocate effectively for their implementation. Offered Fall.

HON 1110 Passport to Detroit Cr. 1

Satisfies General Education Requirement: Wayne Experience

Passport to Detroit is a participatory-learning course designed to prepare students for life in college and life in Detroit designed to use the personal exploration of Detroit's geography and history as a frame through which incoming students develop (or improve) essential college-level skills. Offered Fall.

Restriction(s): Enrollment limited to students with a class of Freshman.

HON 3000 Field Learning Cr. 0

Required for all students graduating with University Honors. Students are involved in community-based education and promotion of civic engagement. Offered Every Term.

Restriction(s): Enrollment is limited to Undergraduate level students.

HON 4200 Seminar in Philosophy and Letters Cr. 3

Satisfies General Education Requirement: Cultural Inquiry, Philosophy Letters

Analysis of meanings given to human experience through study of philosophy or letters. Offered Yearly.

Repeatable for 9 Credits

HON 4220 Seminar in Life Science Cr. 3

Satisfies General Education Requirement: Life Sciences, Natural Scientific Inquiry

Analysis of aspects, methods, and important issues in various areas of the life sciences. Offered Yearly.

Repeatable for 9 Credits

HON 4230 Seminar in Physical Science Cr. 3

Satisfies General Education Requirement: Natural Scientific Inquiry, Physical Sciences

Analysis of modern theory and data, implications and possibilities in the physical sciences. Offered Yearly.

Repeatable for 9 Credits

HON 4250 Seminar: Global Perspectives on Historical Studies Cr. 3

Satisfies General Education Requirement: Global Learning Inquiry, Historical Studies

Studies of periods of history in which there has been major transition or change. Offered Yearly.

Repeatable for 9 Credits

HON 4260 Seminar in Foreign Culture Cr. 3

Satisfies General Education Requirement: Foreign Culture, Global Learning Inquiry

Humanistic or social science investigation of peoples and institutions in other cultures. Offered Yearly.

Repeatable for 9 Credits

HON 4280 General Honors Seminar Cr. 3

In-depth exploration of important concepts and approaches in liberal studies. Topics to be announced in Schedule of Classes. Offered Yearly.

Repeatable for 9 Credits

HON 4930 Detroit Fellows Tutoring Project Cr. 2-4

Community-based service-learning project designed to improve the reading skills of elementary school students through one-on-one mentoring. Monthly seminar sessions to discuss progress and techniques required. Offered Fall, Winter.

Restriction(s): Enrollment is limited to Undergraduate level students.

Repeatable for 16 Credits

HON 4940 Service-Learning Internship Cr. 1-3

Service-learning project with a local community partner. Collateral reading, written work, arranged conferences with faculty supervisor. Offered Every Term.

Restriction(s): Enrollment is limited to Undergraduate level students.

Repeatable for 6 Credits

HON 4950 MedStart Seminar Cr. 2

Explorations of various dimensions of health care through shadowing, service, and attendance at the monthly seminars at the Wayne State University School of Medicine. Offered Fall, Winter.

Restriction(s): Enrollment is limited to Undergraduate level students.

Repeatable for 16 Credits

HON 4970 BStart Seminar Cr. 1

Training of future leaders in business by emphasizing mentoring and research opportunities with business school faculty. Offered Fall, Winter.

Restriction(s): Enrollment is limited to Undergraduate level students.

Repeatable for 8 Credits

HON 4980 University Scholars Seminar Cr. 1

International learning and experiences of designated scholarship students in the Honors College. Reflection and presentation on specific topics related to the local, regional, national and international landscapes. Offered Fall, Winter.

Restriction(s): Enrollment is limited to Undergraduate level students.

Repeatable for 8 Credits

HON 4990 Honors Directed Study Cr. 1-4

Offered Yearly.

Repeatable for 8 Credits

HON 4998 University Honors Thesis Cr. 3-6

Independent research project, essay, or creative project. Students are responsible for identifying their own research project and full-time faculty member. At the end of the first semester a deferred grade of Y will be assigned, with a grade change processed at the completion of the thesis in a subsequent semester. Offered Every Term.

IBS - INTERDISCIPLINARY BIOMEDICAL SCIENCES

IBS 7015 Interdisciplinary Cell and Molecular Biology Cr. 6

The fundamental biochemistry, molecular biology, and function of eukaryotic cells. Includes study of the structure and purpose of the basic components of eukaryotic cells; how eukaryotic cells obtain and utilize energy, process information, and replicate or self-destruct; and examples of how specific cell types contribute to multicellular biological processes and systems in normal and disease states. Offered Fall.

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students in the School of Medicine; enrollment limited to students in a Doctor of Philosophy degree.

IBS 7030 Functional Genomics and Systems Biology Cr. 2

Exploration of several new technologies for determining gene function on a genome-wide scale and for integrating information into a systems-level view of biological processes. Offered Winter.

Prerequisite: IBS 7015 with a minimum grade of C or MGG 7010 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students in the School of Medicine; enrollment limited to students in a Doctor of Philosophy degree.

Equivalent: MGG 7030

IBS 7050 Biomedical Neurobiology Cr. 2

Sensory, motor, and integration of nervous systems, including anatomic and cellular organization, systemic and cellular-molecular functions, and diseases. Offered Winter.

Prerequisites: IBS 7015 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students in the School of Medicine; enrollment limited to students in a Doctor of Philosophy degree.

IBS 7090 Biomedical Immunology Cr. 2

Cellular-molecular and systemic functions, and diseases of the immune system. Offered Winter.

Prerequisites: IBS 7015 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students in the School of Medicine; enrollment limited to students in a Doctor of Philosophy degree.

IBS 7100 Biomedical Neuropharmacology Cr. 2

General principles, including cellular and molecular basis of drug action with special emphasis on neuronal systems. Offered Winter.

Prerequisites: IBS 7015 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate or Medical level students; enrollment limited to students in the School of Medicine.

IBS 7110 Introduction to the Business of Biotechnology Cr. 3

Translation of biomedical innovation from bench to bedside, with focus on interplay between healthcare needs, regulatory agencies, and commercialization pathways. Offered Winter.

Restriction(s): Enrollment is limited to Graduate level students.

Equivalent: BMS 7100

IBS 7115 Special Topics in Biotechnology Commercialization Cr. 1

Designed to provide practical experience in defining the relationships between academic discovery science and business development, with a focus on best practices for presenting basic research-commercial products to external, interested individuals. Offered Winter.

Restriction(s): Enrollment is limited to Graduate level students.

Equivalent: BMS 7115

IBS 7130 Systems Neuroscience: Structure and Function of the Nervous System Cr. 2

Basic principles of neural science through examination of structure and function of the major physiological systems within the brain and spinal cord. Offered Winter.

Prerequisites: IBS 7015 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate or Medical level students; enrollment limited to students in the School of Medicine.

IBS 7140 Foundations of Data Science Cr. 3

Introduction to basic concepts of linear algebra and their application to data analysis. MATLAB and PYTHON programs are introduced and employed as tools for practical implementation of computational methods. Offered Fall.

Restriction(s): Enrollment is limited to Graduate level students.

Equivalent: BMB 7140

IBS 7330 Advanced Molecular Biology Cr. 2

Modern topics in biochemistry, including nucleic acid dynamics, genomic structure, DNA replication and repair, transcription, RNA processing, translation and protein synthesis. Offered Winter.

Restriction(s): Enrollment is limited to Graduate level students.

IE - INDUSTRIAL ENGINEERING

IE 1560 Operations Research: Deterministic Mathematical Models Cr. 2

Introduction to mathematics of decision making in industry and government. Offered Every Term.

Restriction(s): Enrollment is limited to Undergraduate level students.

IE 3120 Work Design Cr. 3

Role of the human as an element of the work environment. Traditional issues of work standards, productivity analysis and occupational safety are introduced. Examination of functional and organizational role of the worker; impact of emerging computer-based technologies on work design and implementation strategies is discussed. Offered Fall.

Prerequisite: BE 2100 with a minimum grade of C-

Restriction(s): Enrollment limited to students in the College of Engineering; enrollment limited to students in the following programs: BS in Biomedical Engineering, BS in Chemical Engineering, BS in Civil Engineering, BS in Electrical Engineering, BS in Industrial Engineering, BS in Mechanical Engineering.

IE 3450 Manufacturing Processes I Cr. 3

A study of the field of manufacturing processes from a mechanical engineering design standpoint. Topics include: processing of metals, polymers and ceramics, and computer-aided manufacturing. Offered Fall, Winter.

Prerequisites: BE 1500 with a minimum grade of C- and ME 2420 with a minimum grade of C- and BE 1300 with a minimum grade of C- and BE 1310 with a minimum grade of C-

Restriction(s): Enrollment limited to students in the College of Engineering; enrollment limited to students in the following programs: BS in Biomedical Engineering, BS in Chemical Engineering, BS in Civil Engineering, BS in Electrical Engineering, BS in Industrial Engineering, BS in Mechanical Engineering.

Course Material Fees: \$25

Equivalent: ME 3450

IE 3460 Manufacturing Processes Lab Cr. 1

Laboratory to accompany I E 3450. Offered Fall.

Restriction(s): Enrollment limited to students in the following programs: BS in Biomedical Engineering, BS in Chemical Engineering, BS in Civil Engineering, BS in Electrical Engineering, BS in Industrial Engineering, BS in Mechanical Engineering.

IE 4120 Introduction to Human Factors Engineering Cr. 4

Current practice perspective on human capabilities and limitations as a component in engineering systems. Analysis and design of human-centered systems, with emphasis on applications. Offered Winter.

Prerequisite: BE 2100 with a minimum grade of C-

Restriction(s): Enrollment is limited to Undergraduate level students; enrollment limited to students in the following programs: BS in Biomedical Engineering, BS in Chemical Engineering, BS in Civil Engineering, BS in Electrical Engineering, BS in Industrial Engineering, BS in Mechanical Engineering.

IE 4250 Engineering Data Analysis Cr. 3

Advanced concepts for the analysis of variability in engineering problems, multivariate distributions, hypothesis testing, non-parametric statistics, point and interval estimation, fitting straight lines, goodness of fit tests, contingency tables and introduction to the analysis of variance. Offered Winter.

Prerequisite: BE 3220 with a minimum grade of C- or BE 2100 with a minimum grade of C-

Restriction(s): Enrollment limited to students in the College of Engineering; enrollment limited to students in the following programs: BS in Biomedical Engineering, BS in Chemical Engineering, BS in Civil Engineering, BS in Electrical Engineering, BS in Industrial Engineering, BS in Mechanical Engineering.

IE 4260 Principles of Quality Control Cr. 3

Statistical quality control including process capability, control charts, and acceptance sampling procedures. Procedures for measurement of dimensional tolerance are introduced. Computer-based data collection and analysis. Offered Yearly.

Prerequisite: BE 2100 with a minimum grade of C-

Restriction(s): Enrollment limited to students in the College of Engineering; enrollment limited to students in the following programs: BS in Biomedical Engineering, BS in Chemical Engineering, BS in Civil Engineering, BS in Electrical Engineering, BS in Industrial Engineering, BS in Mechanical Engineering.

IE 4310 Production Control Cr. 3

Satisfies General Education Requirement: Writing Intensive Competency

The design of production planning and control systems. Materials management, forecasting, planning, scheduling of production systems, the planning and scheduling for large scale projects and introduction to the design of computerized materials management systems. Applications of operations research models to production control problems. Offered Winter.

Prerequisite: IE 4560 with a minimum grade of C- and ENG 3050 with a minimum grade of C-

Restriction(s): Enrollment limited to students in the College of Engineering; enrollment limited to students in the following programs: BS in Biomedical Engineering, BS in Chemical Engineering, BS in Civil Engineering, BS in Electrical Engineering, BS in Industrial Engineering, BS in Mechanical Engineering.

IE 4330 Facilities Design Cr. 3

Design of manufacturing, warehouse and material handling facilities. Use of analytic and computer-aided methods in the facilities design process. Offered Winter.

Restriction(s): Enrollment limited to students in the College of Engineering; enrollment limited to students in the following programs: BS in Biomedical Engineering, BS in Chemical Engineering, BS in Civil Engineering, BS in Electrical Engineering, BS in Industrial Engineering, BS in Mechanical Engineering.

IE 4355 Product Engineering Cr. 3

Current principles and processes of product engineering. Use of integrated product engineering processes and methods. Offered Winter.

Prerequisite: BE 2100 with a minimum grade of C-

Restriction(s): Enrollment limited to students in the College of Engineering.

IE 4420 Systems Simulation Cr. 3

Systems modeling and discrete event simulation. Methodology applied to analysis and design of a broad range of systems including both production and service systems. Computer assignments and a term project are required. Offered Yearly.

Prerequisites: BE 1200 with a minimum grade of C- and BE 2100 with a minimum grade of C- and BE 2550 with a minimum grade of C-

Restriction(s): Enrollment limited to students in the College of Engineering; enrollment limited to students in the following programs: BS in Biomedical Engineering, BS in Chemical Engineering, BS in Civil Engineering, BS in Electrical Engineering, BS in Industrial Engineering, BS in Mechanical Engineering.

IE 4560 Operations Research Cr. 3

An introduction to the philosophy of operations research. Formulation of linear programming models and their solution. Duality and sensitivity analysis. The transportation model. Introduction to probabilistic modeling and applications of queueing models. Offered Fall.

Prerequisite: BE 2100 with a minimum grade of C- and MAT 2150 with a minimum grade of C-

Restriction(s): Enrollment limited to students in the College of Engineering; enrollment limited to students in the following programs: BS in Biomedical Engineering, BS in Chemical Engineering, BS in Civil Engineering, BS in Electrical Engineering, BS in Industrial Engineering, BS in Mechanical Engineering.

IE 4700 Leadership in Manufacturing Cr. 3

Leadership of individuals and teams in a unionized manufacturing environment. Technical elective for Production Leadership Management Program (PMPL) students. Offered Fall.

Restriction(s): Enrollment limited to students in the following programs: BS in Biomedical Engineering, BS in Chemical Engineering, BS in Civil Engineering, BS in Electrical Engineering, BS in Industrial Engineering, BS in Mechanical Engineering.

IE 4710 Labor Relations in Manufacturing Cr. 3

Knowledge and skills in administering labor agreements. Technical elective for Production Leadership Management Program (PMLP) students. Offered Winter.

Restriction(s): Enrollment is limited to Undergraduate level students; enrollment limited to students in the following programs: BS in Biomedical Engineering, BS in Chemical Engineering, BS in Civil Engineering, BS in Electrical Engineering, BS in Industrial Engineering, BS in Mechanical Engineering.

IE 4800 Engineering Design I: Project Management Cr. 2

Project selection, team building, and methodological preparation required for Engineering Design Project II. Offered Yearly.

Prerequisites: 2 of IE 4420 with a minimum grade of C-, IE 4330 with a minimum grade of C-, IE 4560 with a minimum grade of C- and IE 3120 with a minimum grade of C- and IE 4250 with a minimum grade of C- and IE 4850 with a minimum grade of C-

Restriction(s): Enrollment limited to students in the College of Engineering; enrollment limited to students in the following programs: BS in Biomedical Engineering, BS in Chemical Engineering, BS in Civil Engineering, BS in Electrical Engineering, BS in Industrial Engineering, BS in Mechanical Engineering.

IE 4850 Engineering Economy Cr. 3

Economic analysis of engineering projects. Selection of appropriate interest rates and methods of analysis, depreciation, tax considerations, and use of accounting data in comparison of investment alternatives. Offered Yearly.

Prerequisite: BE 2100 with a minimum grade of C-

Restriction(s): Enrollment limited to students in the College of Engineering; enrollment limited to students in the following programs: BS in Biomedical Engineering, BS in Chemical Engineering, BS in Civil Engineering, BS in Electrical Engineering, BS in Industrial Engineering, BS in Mechanical Engineering.

Course Material Fees: \$10

Equivalent: CE 4850

IE 4880 Engineering Design II Cr. 2

Intensive design experience defined and executed by the student. Requires synthesis and application of skills and knowledge gained in the program. Offered Winter.

Prerequisites: May be taken concurrently: IE 4260 with a minimum grade of C- and May be taken concurrently: IE 4310 with a minimum grade of C- and May be taken concurrently: IE 4330 with a minimum grade of C- and May be taken concurrently: IE 4420 with a minimum grade of C- and May be taken concurrently: IE 4560 with a minimum grade of C- and IE 4800 with a minimum grade of C-

Restriction(s): Enrollment limited to students in the following programs: BS in Biomedical Engineering, BS in Chemical Engineering, BS in Civil Engineering, BS in Electrical Engineering, BS in Industrial Engineering, BS in Mechanical Engineering.

IE 4990 Directed Study Cr. 1-6

Supervised study and instruction in a field selected by the student.

Offered Intermittently.

Restriction(s): Enrollment limited to students in the College of Engineering; enrollment limited to students in the following programs: BS in Biomedical Engineering, BS in Chemical Engineering, BS in Civil Engineering, BS in Electrical Engineering, BS in Industrial Engineering, BS in Mechanical Engineering.

IE 5490 Creative Problem Solving in Design and Manufacturing Cr. 3

Concepts of laws of natural development of engineering systems. Algorithm for inventive (creative) problem-solving (AIPS-85). Creative use of physical and geometrical effects in design of mechanical and manufacturing systems. Concepts of strength, stiffness, vibratory effects, reliability in mechanical design. Offered Yearly.

Equivalent: ME 5470, SYE 5470

IE 5780 Products Liability Introduction for Engineers Cr. 1

Application of engineering practice to minimize products liability exposure. Stages of a products liability lawsuit; how engineers may be involved at different stages of the process. Offered Yearly.

Restriction(s): Enrollment limited to students with a class of Applicant Masters, Candidate Masters or Senior; enrollment limited to students in the College of Engineering.

Equivalent: ME 5780

IE 5995 Special Topics in Industrial Engineering Cr. 1-4

Special subject matter in industrial engineering. Topics to be announced in Schedule of Classes. Offered Intermittently.

IE 6000 Digital Automation Cr. 3

Fundamentals of digital control and logic; integration and automation solution technologies (barcode systems, vision systems, etc.); data acquisition. Offered Fall, Spring/Summer.

IE 6005 Automotive Engineering Statistics Cr. 3

Introduction to probability and statistics for engineering students: analysis of random component in problems, understanding probability and statistics, opportunities for application, analysis of data using statistical software. Offered for graduate credit only. Offered Winter.

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students in the College of Engineering.

IE 6210 Applied Engineering Statistics Cr. 3

An applied statistics course for students in engineering that will build upon introductory statistical knowledge. Students will learn to identify the phenomena they would like to study, design, and run experiments; collect data and analyze it by applying statistical tools such as multiple regression, ANOVA, and non-parametric statistical tools; and report on the statistical results and their implication to engineering phenomena. No credit for AGRADE undergraduates after taking IE 4250. Offered Fall, Winter.

IE 6220 Value Engineering Cr. 3

Resource management; systematic approach to solving problems and making decisions; forcing latent capabilities to be applied to challenging assumptions; application of unbiased logic techniques to produce superior results. Offered Spring/Summer.

IE 6240 Quality Management Systems Cr. 3

Design of quality management systems. Topics include: QFD, quality planning, business operating systems, TQM, standards, and auditing. Quality management tools such as PDCA and root cause analysis. Offered Winter.

IE 6255 Quality Engineering Cr. 3

Quality Engineering means achieving quality by design, so this course covers several important methods in supporting engineering design activities. These methods include quality function deployment, axiomatic design, Theory of Inventive Problem Solving (TRIZ), Taguchi method (robust design) and tolerance design. Offered Fall, Winter.

Prerequisite: IE 6210 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

IE 6270 Engineering Experimental Design Cr. 3

The design of engineering experiments for manufacturing process analysis, human factors experimentation, societal systems analysis and life testing; basic experimental design models, blocking, factorial experiments, nested designs, covariance analysis, response surface analysis, estimation of effects. Offered Fall.

Prerequisite: IE 6210 with a minimum grade of C or IE 4250 with a minimum grade of C-

IE 6275 Reliability Estimation Cr. 3

The course is designed for graduate students specializing in quality engineering. These individuals play a significant role in designing and developing new products and manufacturing systems and processes. Topics include: reliability measures, failure distributions, reliability block diagrams, reliability estimation using exponential and Weibull distributions, sequential life testing, test planning, and Bayesian reliability. Offered Fall.

Prerequisite: IE 4250 with a minimum grade of C- or IE 6210 with a minimum grade of C

IE 6310 Lean Operations and Manufacturing Cr. 3

Fundamental theories and concepts in lean manufacturing, six-sigma, mistake proofing, problem solving, process management. Students develop competency in identifying causes and sources of waste in manufacturing, industrial, and business operations. Offered Fall, Winter.

Prerequisite: IE 4250 with a minimum grade of C- or IE 6210 with a minimum grade of C

IE 6315 Production and Service Systems Cr. 3

Fundamental theories and concepts in the design and operation of production systems for manufacturing and service organizations. Topics may include: Inventory Management, Production Planning (MRP, JIT, ERP), Factory Physics, Production Control, Introduction to Supply Chain Management Offered Winter.

Prerequisite: IE 6210 with a minimum grade of C and IE 6560 with a minimum grade of C

IE 6325 Supply Chain Management Cr. 3

Supply chain management and logistics is unique and, to some degree, represents a paradox because it is concerned with one of the oldest and also the most newly discovered activities of business. Supply chain system activities - communication, inventory management, warehousing, transportation, facility location, and production - have been performed since the start of commercial activity. It is difficult to visualize any product that could reach a customer without logistical support. Yet, it is only over the last decade that firms have started focusing on logistics and supply chain management as a source of competitive advantage. Logistics and supply chain management today represents a great challenge as well as a tremendous opportunity for most firms. Another term that has appeared in business jargon recently is demand chain. From our perspective, we will use the phrases logistics management, supply chain management, and demand chain management interchangeably. Offered Fall.

Restriction(s): Enrollment is limited to Graduate level students.

IE 6405 Integrated Product Development Cr. 3

Product development process: product architectures, concurrent engineering. Integration of marketing, design, and manufacturing functions for product development. How such processes are designed to account for various manufacturing and other business constraints to ensure that customer needs are met. Offered Fall.

Restriction(s): Enrollment limited to students in the College of Engineering.

Equivalent: AET 5600, EVE 5600

IE 6420 Computer Aided Manufacturing and Lab Cr. 3

Develops students into competent engineers capable of managing the process of product and service realization. Provides an understanding of product, service and workflow realization process from conception through market research and validation, to product/service design and production, and then distribution. Topics covered include business context, innovation and entrepreneurship, process planning, computer-aided manufacturing (CAM), integration of manufacturing equipment and material handling systems, manufacturing execution systems, manufacturing planning and control, and logistics and distribution. Offered Winter.

IE 6422 Flexible Manufacturing Systems Cr. 3

Flexible manufacturing systems are a highly automated group technology machine cell, consisting of a group of processing stations, interconnected by an automated material handling and storage system, and controlled by an integrated computer system. The analysis and design of flexible manufacturing systems will be covered, including: FMS control and communication architecture, FMS material handling architecture, flexibility analysis, and computer-integrated manufacturing (CIM). Offered Winter.

Restriction(s): Enrollment is limited to Graduate level students.

IE 6425 Product Lifecycle Management and Sustainable Design Cr. 3

The aim of this class is to familiarize the current principles, practices, and applications of Product Lifecycle Management (PLM). The sustainable design of products and processes, as well as the early consideration of constraints and factors, are important in the successful development of competitive products. PLM is an integrated, information driven approach to all aspects of a products life from its design inception, through its manufacture, deployment and maintenance, culminating in its removal from service and final disposal. PLM technology plays a critical role in most modern industries including aerospace, automobile, and medical. Effective integration of PLM technologies into the product development process can put the industry at a competitive advantage to deliver innovative products. Offered Winter.

IE 6430 Computer Simulation Methods Cr. 3

The application of discrete, continuous and combined simulation methods to the solution of a variety of production and service systems problems. Computer simulation and a term project involving an application are required. No credit after IE 4420. Offered Fall, Winter.

Prerequisite: IE 6210 with a minimum grade of C

IE 6435 Fundamentals of Sustainable Manufacturing Cr. 3

Sustainable manufacturing, as defined by the U.S.A. Department of Commerce, is “the creation of manufactured products that use processes that minimize negative environmental impacts, conserve energy and natural resources, are safe for employees, communities, and consumers and are economically sound.” This course is designed to introduce the fundamental concepts of sustainable manufacturing. While the focus will be on sustainable manufacturing, topics will also include connections of sustainable design, environmental sciences, and the social sciences with sustainable manufacturing. Offered Every Other Fall.

IE 6442 Facilities Design and Materials Flow Cr. 3

Presents the fundamental concepts, theory and procedures required for effective facilities design and planning. Includes models for determining plant size and time phasing; design of manufacturing, warehouse and material handling facilities; and use of analytic and computer-aided methods in the facilities design process. No credit after IE 4330. Offered Fall, Winter.

IE 6470 Stochastic System Modeling: Queuing and Simulation Cr. 2

Description of queuing systems; analytical solutions; discrete events systems; modeling framework and object models; terminating and non-terminating systems; statistical analysis; case studies. Offered Yearly.

IE 6490 Introduction to Systems Engineering in Design Cr. 3

Provides an introduction to the engineering and analysis of human-made systems with an emphasis on the process of bringing systems into being. Includes an introduction to systems sciences and engineering and will follow the engineering process from conceptual systems design through concept selection, concept validation, life-cycle acquisition, life-cycle costing, software development, system architecture, and risk management. Addresses system engineering program evaluation including: evaluation requirements, evaluation of the system engineering organization, and program reporting, feedback, and control. Offered Fall.

Restriction(s): Enrollment limited to students in the College of Engineering.

IE 6510 Information Systems for the Manufacturing Enterprise Cr. 3

Information systems are used to make organizations leaner and more integrated across the entire Manufacturing Enterprise. A suite of information systems is to provide an environment that allows an engineer to consider both product and manufacturing requirements throughout the design, development, manufacturing cycle, resulting in a single unified concurrent engineering process, an integral knowledge management process, and rapid response to market changes. This course will teach information technologies and applications in the manufacturing industry. Offered Fall.

IE 6520 Negotiating in an IE Environment Cr. 3

Analytic and interpersonal skills needed to negotiate effectively. Students integrate the analytic and interpersonal skills necessary to be an effective negotiator in a rapidly-changing technical environment. Offered for graduate credit only. Offered Every Other Winter.

Restriction(s): Enrollment is limited to Graduate level students.

IE 6560 Deterministic Optimization Cr. 3

The primary goals are to develop the ability to formulate fairly complex optimization problems, provide an appreciation of the main classes of problems that are practically solvable, describe the available solution methods, and build an understanding of the qualitative properties of the solutions they provide. The class participant will develop skills in recognizing and formulating deterministic optimization models and gain an appreciation for the role of sensitivity analysis in analyzing a problem. Covers methods for quantifying the impact of specific constraints on the overall performance of the system. Application areas include production scheduling, product mix planning, manpower planning, routing and scheduling, financial planning, and prototype builds. Offered Fall, Winter.

IE 6580 Engineering Financial Practice Cr. 3

Combines the central concepts of engineering financial and engineering managerial economics. Demonstrates, from an engineering financial perspective, how engineering decisions can impact the economic goals of the company. Offered Every Other Winter.

Restriction(s): Enrollment is limited to Graduate level students.

IE 6590 Engineering Leadership: Strategic Communications Cr. 3

Leaders in an engineering work environment face unique team and organizational communication challenges. Strong and precise communication is key to effective leadership and organizational efficiency. Participants in this course will engage in the practical and theoretical aspects of verbal and nonverbal communications in leadership and in the workplace. Offered Every Other Winter.

Restriction(s): Enrollment is limited to Graduate level students.

IE 6611 Fundamentals of Six Sigma Cr. 3

The attraction of Lean Six Sigma is obvious — designs that work, fewer defects and wastes in manufacturing, faster processes, lowered production costs, and greater customer satisfaction. With these pluses, it's no wonder the world's leading companies are adopting the Six Sigma approach to product development in ever-growing numbers. This comprehensive course covers the fundamental aspects of Lean and Six Sigma, Lean operation principles and tools, and the Six Sigma process improvement, that is Define-Measure-Analyze-Improve-Control (DMAIC). Offered Winter, Spring/Summer.

IE 6720 Engineering Risk and Decision Analysis Cr. 3

Structure, modeling and analysis of technical management decisions with emphasis on multiple objectives and trade-offs, and significant uncertainty. Explores barriers to rational decision making. Offered Spring/Summer.

Prerequisite: IE 6210 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

IE 6830 Management of Technology Change Cr. 3

Focuses on technology change and use of systems approach to plan for, manage and implement the diffusion and dynamics of product, process and business model innovation. Offered Fall.

Restriction(s): Enrollment is limited to Graduate level students.

IE 6840 Project Management Cr. 3

Provides an appreciation for the role and importance that project management has in delivering complex engineering projects on time, within budget, within performance specifications, and satisfying the customer. Reviews the fundamental content of the nine knowledge areas and five process groups included in the PMI's Project Management Body of Knowledge and how they apply to the general stages of a product development project with a look at some basic techniques and tools. Offered Winter.

IE 6850 Manufacturing Strategies Cr. 3

Manufacturing strategy is one aspect of a company's business strategy that also includes marketing, finance, and research and development. Each strategy development must coexist to achieve the company's goal, meet customer demands, and stay competitive. The objective of this course is to introduce and discuss key components of manufacturing strategy and how this fits within an overall business strategy. Offered Intermittently.

IE 6991 Industrial Internship Cr. 1-3

Offered Fall, Winter.

Repeatable for 99 Credits

IE 7100 Mathematical Modeling in Impact Biomechanics Cr. 4

Review of models created for impact simulations. Regional impact simulation models. Human and dummy models subject to various restraint systems. Offered Winter.

Prerequisite: BME 5010 with a minimum grade of B-

Restriction(s): Enrollment is limited to Graduate level students.

Equivalent: BME 7100, ECE 7100, ME 7100

IE 7125 Human Factors Engineering Cr. 4

Current methods and topics in engineering research on human capabilities and limitations as a system component. Advanced analysis, modeling and design of human-centered systems. Offered Winter.

Prerequisite: BE 2100 with a minimum grade of C-

Restriction(s): Enrollment is limited to Graduate level students.

IE 7220 Advanced Statistical Methods Cr. 3

Statistics is the science to collect, describe, analyze, interpret, and draw conclusions on data. This course introduces students to the conceptual underpinnings of statistical methods and how to apply them to address more advanced statistical questions than are covered in an introductory statistics course. The statistical methods covered in this course are useful for many types of questions that relate to multiple variables and/or multiple groups. Offered Every Other Winter.

Restriction(s): Enrollment is limited to Graduate level students.

IE 7290 Quality and Productivity Management Cr. 4

Topics in product assurance management including: definition, history, philosophy of quality. Strategic elements of proactive quality, design for quality, process project control, reliability program management. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate level students.

IE 7400 Capstone: Integrated Product Engineering Cr. 4

Integration of product development tools and theory. Industry-based project to develop hands-on experience with integrated project design and development. Application to robust product development methodologies. Offered Winter.

Prerequisite: IE 6400 with a minimum grade of C and IE 6410 with a minimum grade of C and IE 6420 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

IE 7410 Agile Systems for the Manufacturing Enterprise Cr. 2

Factors that help define the agility of a system; greater workforce autonomy and changes in training and production of technical personnel. Main elements of operations management. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate level students.

IE 7445 Manufacturing Analytics Cr. 3

Provides a deep understanding of the intersection of manufacturing and analytics and its application in current manufacturing industries to improve operations and gain competitive advantages. Covers fundamental concepts from data acquisition to analysis to decision making in manufacturing, specifically, manufacturing process and systems data acquisition; manufacturing data and information systems hierarchies and flows (IT/OT layers); manufacturing analytics, both real-time and historical; and data driven manufacturing decision making. Offered Every Other Fall.

Prerequisite: IE 6210 with a minimum grade of C

Restriction(s): Enrollment limited to students in a Doctor of Philosophy degree.

IE 7480 Knowledge-Based Design Cr. 3

Provides in-depth understanding of knowledge roles, knowledge elicitation techniques, knowledge based system and system modeling issues, and semantic modeling to support product design. Students will learn the concepts via lecture, articles, and semantic product model implementation projects. Offered Every Other Winter.

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students in the College of Engineering.

IE 7511 Linear and Nonlinear Optimization Cr. 3

The primary goal of the course is to provide a solid foundation in the deterministic optimization field. The basic concepts in linear programming and nonlinear programming will be covered. Topics include: convex sets/functions, duality, and sensitivity from different perspectives; simplex algorithm for solving linear programming problems; unconstrained and constrained optimization, nonlinear duality theory, Lagrangian relaxation, and algorithmic methods for solving nonlinear programs (including descent methods, Newton's method, conjugate gradient methods, and penalty and barrier methods). Offered Every Other Fall.

Restriction(s): Enrollment is limited to Graduate level students.

IE 7520 Optimization Methods Cr. 4

Introduction to optimization theory and optimization problems. Necessary and sufficient conditions for optimality. Mathematics and algorithms of linear programming. Non-linear programming and integer programming. Research methods. Duality in optimization problems. Geometric programming. Offered Fall.

Restriction(s): Enrollment is limited to Graduate level students.

IE 7521 Large Scale Optimization and Integer Programming Cr. 3

Examines modeling and solution methodologies for large scale optimization and integer programming problems. Presents the theory and the exact and approximate techniques that have been developed to solve related models. Techniques include branch and bound, cutting planes, Lagrangian relaxation, Bender's decomposition, and column generation. Polyhedral theory will be discussed at some length. Offered Every Other Winter.

Prerequisite: IE 6560 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

IE 7535 Stochastic Programming and Robust Optimization Cr. 3

Introduction to models, theory and computational methods for stochastic programming and robust optimization. Methods include decomposition-coordination algorithms for large-scale mathematical programming such as Benders, regularized Benders, Dantzig-Wolfe, L-shaped and statistically motivated decomposition methods. Applications, theory and practical algorithm implementation and computational experimentation will be emphasized. Particular attention will be given to large-scale problems, and use of cluster and grid computing architectures to solve them to optimality. Offered Every Other Fall.

Restriction(s): Enrollment limited to students in a Doctor of Philosophy degree.

IE 7570 Deterministic System Models and Optimization Cr. 2

Methods for quantifying impact of specific constraints on overall performance of a system; use of journal articles on corporate use of these models. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate level students.

IE 7620 Advanced Reliability and Survival Analysis Cr. 3

Focuses on general methods used to analyze the reliability and survival data. Introduces the methods to analyze the expected duration of time until one or more events happen, such as death in biological organisms and failure in mechanical systems. Illustrates the use of proven traditional techniques for reliability and survival data analysis and prediction, and brought up to date with modern computer-based graphical, analytical, and simulation-based methods. Offered Every Other Year.

Restriction(s): Enrollment is limited to Graduate level students.

IE 7710 Introduction to Stochastic Processes Cr. 4

Fundamental understanding of various probability models from applied and theoretical perspectives. Topics include: probability review, Markov chains, Poisson process, continuous time Markov chains, queuing processes, and inventory applications. Offered Every Other Year.

Restriction(s): Enrollment is limited to Graduate level students.

IE 7811 Data Mining: Algorithms and Applications Cr. 3

Application of various basic/advanced data mining techniques to real-world problems. Offered Winter.

Restriction(s): Enrollment is limited to Graduate level students.

Equivalent: CSC 7810

IE 7860 Intelligent Analytics Cr. 3

Computational intelligence methods used to solve complex analytics problems and develop decision support systems. Project-centric approach with the goal of developing several analytics solutions for real-world problems. Offered Fall.

Restriction(s): Enrollment is limited to Graduate level students.

Course Material Fees: \$50

IE 7990 Directed Study Cr. 1-6

Student selects some field of industrial engineering for advanced study and instruction. An outline approved by the instructor must be presented before registration in this course. Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students.

Repeatable for 6 Credits

IE 7995 Graduate Special Topics Cr. 1-4

Special subject matter in industrial engineering. Topics to be announced in Schedule of Classes. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate level students.

Repeatable for 12 Credits

IE 7996 Research Cr. 1-6

Advanced design, investigation or experimental work. Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students.

Repeatable for 6 Credits

IE 7999 Engineering Management Leadership Project Cr. 1-6

Integration of knowledge from individual courses in M.S. engineering management curriculum. Team-oriented focus on major industrial problem. Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students with a class of Candidate Masters.

Repeatable for 10 Credits

IE 8920 Decision and Risk Analysis for Research Cr. 3

Structure, modeling, and analysis of technical global management decisions with emphasis on multiple objectives and trade-offs, and significant uncertainty. Explores current trends in decision analysis research. Offered Every Other Fall.

Restriction(s): Enrollment is limited to students with a major in Industrial Engineering GET or Industrial Engineering; enrollment limited to students in a Doctor of Philosophy degree.

IE 8930 Global Perspectives and Networks Cr. 3

Provides technical leaders with a system of frameworks to holistically understand and practically manage operations, to be technologically competitive in the global marketplace. Foundation for the Country Courses. Offered Winter.

Restriction(s): Enrollment is limited to Graduate level students; enrollment is limited to students with a major, minor, or concentration in Industrial Engineering GET or Industrial Engineering GET.

IE 8941 From Idea through Launch: Products and Services I Cr. 2-3

Course comprised of twelve modules; the processes and progression from product or service innovation to development and launch. Offered Winter.

Restriction(s): Enrollment is limited to Graduate level students; enrollment is limited to students with a major, minor, or concentration in Industrial Engineering GET or Industrial Engineering GET.

IE 8942 From Idea through Launch: Products and Services II Cr. 2-4

Course comprised of twelve modules; the processes and progression from product or service innovation to development and launch. Offered Fall.

Restriction(s): Enrollment is limited to Graduate level students; enrollment is limited to students with a major, minor, or concentration in Industrial Engineering GET or Industrial Engineering GET; enrollment limited to students in the PhD in Engineering program.

IE 8943 From Launch through Sustainability: Products and Services I Cr. 2-4

From when the finished product hits the market to all the steps necessary to make the product sustainable. Offered Winter.

Restriction(s): Enrollment is limited to Graduate level students; enrollment is limited to students with a major, minor, or concentration in Industrial Engineering GET or Industrial Engineering GET.

IE 8944 From Launch through Sustainability: Products and Services II Cr. 2-4

From when the finished product hits the market to all the steps necessary to make the product sustainable. Offered Fall.

Restriction(s): Enrollment is limited to Graduate level students; enrollment is limited to students with a major, minor, or concentration in Industrial Engineering GET or Industrial Engineering GET.

IE 8950 Advanced Engineering Statistics Cr. 3

Skill development in model building, ANOVA, multiple regression, multivariate statistics, forecasting, and time series modeling. Offered Fall.

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students in the College of Engineering; enrollment is limited to students with a major, minor, or concentration in Industrial Engineering GET or Industrial Engineering GET; enrollment limited to students in the PhD in Engineering program.

IE 8951 Research Design Cr. 3

Focus on qualitative research design and methods. Discussion of conceptual and practical facets of the process of framing a research question, up to development of an instrument for data collection. Offered Winter.

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students in the College of Engineering; enrollment is limited to students with a major, minor, or concentration in Industrial Engineering GET or Industrial Engineering GET.

IE 8952 Research Methods Cr. 3

Focus on quantitative research design and methods. Topics such as purpose of statistical models, mathematical representation, interpretation, and methods are covered. Typical methods include: multiple regression, multivariate analysis (including survey data), and structural equation modeling. Offered Fall.

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students in the College of Engineering; enrollment is limited to students with a major, minor, or concentration in Industrial Engineering GET or Industrial Engineering GET.

IE 8960 Literature Review Cr. 1-2

Development of library skills for identifying key authors, articles, journals, books, dissertations, case studies, conferences, web sites, professional associations, and NSF funding for a scholarly area of interest. Offered Spring/Summer.

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students in the College of Engineering; enrollment is limited to students with a major, minor, or concentration in Industrial Engineering GET or Industrial Engineering GET; enrollment limited to students in the PhD in Engineering program.

IE 8970 Leadership of the Global Technical Organization Cr. 3

Understanding the elements of leadership and the dynamics of leadership behavior; development of the skills necessary for leading in a global technical organization. Offered Winter.

Restriction(s): Enrollment is limited to Graduate level students; enrollment is limited to students with a major, minor, or concentration in Industrial Engineering GET or Industrial Engineering GET.

IE 8993 Graduate Seminar: Supply Chain Management Cr. 1

Research and development methods for Ph.D. students: literature review, identification of research opportunities, investigation of specific topics; assessment of major contributions and of gap between application and theory. Students present research findings and receive feedback. Offered Intermittently.

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students in the PhD in Engineering program.

IE 8995 Graduate Seminar Cr. 1

Research and development methods. Leading-edge research topics. Platform for student to present preliminary research findings and obtain feedback. Offered Fall, Winter.

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students in the PhD in Engineering program.

Repeatable for 99 Credits

IE 8999 Master's Thesis Research and Direction Cr. 1-8

Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students with a class of Candidate Masters.

Repeatable for 8 Credits

IE 9990 Pre-Doctoral Candidacy Research Cr. 1-8

Research in preparation for doctoral dissertation. Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students.

Repeatable for 12 Credits

IE 9991 Doctoral Candidate Status I: Dissertation Research and Direction Cr. 7.5

Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students.

IE 9992 Doctoral Candidate Status II: Dissertation Research and Direction Cr. 7.5

Offered Every Term.

Prerequisite: IE 9991 with a minimum grade of S

Restriction(s): Enrollment is limited to Graduate level students.

IE 9993 Doctoral Candidate Status III: Dissertation Research and Direction Cr. 7.5

Offered Every Term.

Prerequisite: IE 9992 with a minimum grade of S

Restriction(s): Enrollment is limited to Graduate level students.

IE 9994 Doctoral Candidate Status IV: Dissertation Research and Direction Cr. 7.5

Offered Every Term.

Prerequisite: IE 9993 with a minimum grade of S

Restriction(s): Enrollment is limited to Graduate level students.

IE 9995 Candidate Maintenance Status: Doctoral Dissertation Research and Direction Cr. 0

Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students.

Course Material Fees: \$370.26

Repeatable for 0 Credits

IM - IMMUNOLOGY AND MICROBIOLOGY

IM 7010 Fundamentals of Immunology Cr. 2

Basic concepts and current developments in immunology, including cellular and molecular aspects, regulation, and immunopathological mechanisms. Offered Winter.

Restriction(s): Enrollment is limited to Graduate level students.

IM 7020 Fundamentals of Microbiology Cr. 2

Basic aspects of bacteriology, genetics and mycology. Offered Winter.

Restriction(s): Enrollment is limited to Graduate level students.

IM 7030 Molecular Biology of Viruses Cr. 2

Basic principles of virology including virus host interactions and the molecular biology of virus multiplication and genetics. Offered Winter.

Prerequisite: BMB 7010 with a minimum grade of C or MGG 7010 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

IM 7040 Fundamentals of Research Cr. 2

Lecture/discussion of practical aspects of professional scientific research. Offered Fall.

Restriction(s): Enrollment is limited to Graduate or Medical level students; enrollment limited to students in the School of Medicine.

IM 7410 Cancer Immunology and Immunotherapy Cr. 3

Cancer immunotherapy based on the molecular mechanisms of T-cell development, tolerance and activation. Topics include T-cell receptor and co-stimulatory signal-mediated regulation of T-cell activation, transcriptional regulation of T-cell differentiation, and T-cell effector function and regulatory mechanisms. Each week will consist of a one-hour lecture and a two-hour discussion. Offered Every Other Winter.

Prerequisite: IBS 7015 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

Equivalent: CB 7410

IM 7450 Current Trends in Immunology, Microbiology and Virology Cr. 1-5

Lectures and discussions on current literature and research problems. Offered Intermittently.

Restriction(s): Enrollment is limited to Graduate level students.

IM 7520 Molecular Mechanisms of Bacterial Pathogenesis Cr. 2

The roles of bacterial virulence factors such as tissue colonization, invasion, and exotoxins in pathogenesis. The genetic regulation of bacterial virulence factors will be discussed. Offered Winter.

Restriction(s): Enrollment is limited to Graduate level students; enrollment is limited to students with a major in Immunology and Microbiology.

IM 7850 Research Conferences in Immunology and Microbiology Cr. 1-5

Seminars and discussions in selected areas. Offered Fall, Winter.

Restriction(s): Enrollment is limited to Graduate level students; enrollment is limited to students with a major in Immunology and Microbiology.

IM 7890 Seminar Cr. 1

Weekly BMI seminar series. Offered Fall, Winter.

Restriction(s): Enrollment is limited to Graduate level students; enrollment is limited to students with a major in Immunology and Microbiology.

IM 7996 Research Cr. 1-8

Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students; enrollment is limited to students with a major in Immunology and Microbiology.

Repeatable for 25 Credits

IM 8999 Master's Thesis Research and Direction Cr. 1-8

Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students with a class of Candidate Masters.

Repeatable for 8 Credits

IM 9990 Pre-Doctoral Candidacy Research Cr. 1-8

Research in preparation for doctoral dissertation. Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students.

Repeatable for 12 Credits

IM 9991 Doctoral Candidate Status I: Dissertation Research and Direction Cr. 7.5

Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students.

IM 9992 Doctoral Candidate Status II: Dissertation Research and Direction Cr. 7.5

Offered Every Term.

Prerequisite: IM 9991 with a minimum grade of S

Restriction(s): Enrollment is limited to Graduate level students.

IM 9993 Doctoral Candidate Status III: Dissertation Research and Direction Cr. 7.5

Offered Every Term.

Prerequisite: IM 9992 with a minimum grade of S

Restriction(s): Enrollment is limited to Graduate level students.

IM 9994 Doctoral Candidate Status IV: Dissertation Research and Direction Cr. 7.5

Offered Every Term.

Prerequisite: IM 9993 with a minimum grade of S

Restriction(s): Enrollment is limited to Graduate level students.

IM 9995 Candidate Maintenance Status: Doctoral Dissertation Research and Direction Cr. 0

Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students.

Course Material Fees: \$370.26

Repeatable for 0 Credits

INF - INFORMATION SCIENCES

INF 6000 Introduction to Information Management Cr. 3

Introduction to current data/information management from an interdisciplinary perspective, incorporating the latest ideas, techniques, and technologies into the data/information life cycle. Offered for graduate credit only. Offered Fall.

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students in the School of Information Sciences.

INF 6010 Introduction to the Information Profession Cr. 3

The development and place of libraries in society; objectives, functions of and trends in major types of libraries. Core course. Prerequisite for all MLIS courses. Offered for graduate credit only. Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students in the School of Information Sciences.

INF 6050 Introduction to Computer Programming Cr. 3

Introduction to the basics of programming, utilizing scripts to connect and retrieve information from a database, and the development of coding skills that will allow creation of more advanced applications. Offered Every Term.

INF 6080 Information Technology Cr. 3

Storage and retrieval problems as approached by conventional and nonconventional methods. Computer applications in libraries. Core course. Offered for graduate credit only. Offered Every Term.

Prerequisites: May be taken concurrently: INF 6010 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students in the School of Information Sciences.

INF 6120 Access to Information Cr. 3

Reference function of the library including print and electronic reference sources; development of interpersonal communication skills to increase effectiveness in response to patrons' information needs; effective search strategies for all types of reference. Core course. Offered for graduate credit only. Offered Every Term.

Prerequisites: May be taken concurrently: INF 6010 with a minimum grade of C and May be taken concurrently: INF 6080 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students in the School of Information Sciences.

INF 6210 Organization of Knowledge Cr. 3

Characteristics of recorded knowledge; identification and description of recorded information; principles of physical description, authority control, and subject access; creation of catalogs and databases. Core course. Offered for graduate credit only. Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students in the School of Information Sciences.

INF 6350 Design Thinking and Knowledge Cr. 4

Exploring broad conceptions of design including all activities involved in generating intentional change via artifacts and experiences; design thinking and knowledge. Offered for graduate credit only. Offered Yearly.

Prerequisites: May be taken concurrently: INF 6010 with a minimum grade of C and May be taken concurrently: INF 6080 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students in the School of Information Sciences.

Equivalent: LDT 7111

INF 6360 Producing and Evaluating Technology-Based Instructional Materials Cr. 4

Design and development of instructional materials and media with an emphasis on technology applications integration. Creation and evaluation of instructional media and materials, based on national and state technology standards. Offered for graduate credit only. Offered Yearly.

Prerequisites: May be taken concurrently: INF 6010 with a minimum grade of C and May be taken concurrently: INF 6080 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students in the School of Information Sciences.

Equivalent: LDT 5140

INF 6510 Survey and Analysis of Current Literature for Children: PS-Grade 3 Cr. 3

Intensive examination of books appropriate for preprimary and primary school children. Analysis of the literary and extra-literary factors that affect the young child's experiences with fiction, nonfiction, and poetry. Offered for graduate credit only. Offered Fall.

Prerequisites: May be taken concurrently: INF 6010 with a minimum grade of C and May be taken concurrently: INF 6080 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students in the School of Information Sciences.

Equivalent: RLL 7720

INF 6520 Survey and Analysis of Literature for Older Children: Grades 4-8 Cr. 3

Intensive examination of books appropriate for children in grades four through eight. Analysis of literary and extra-literary factors affecting the older child's experiences with fiction, nonfiction, and poetry. Offered for graduate credit only. Offered Winter.

Prerequisites: May be taken concurrently: INF 6010 with a minimum grade of C and May be taken concurrently: INF 6080 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students in the School of Information Sciences.

Equivalent: RLL 7740

INF 6530 Young Adult Literature Cr. 3

Standards for evaluating adolescent literature. Selection of literature for individual pupils in relation to interest and reading ability. Use of classroom collections. Techniques for helping pupils read poetry, drama, and fiction. Offered for graduate credit only. Offered Spring/Summer.

Prerequisites: May be taken concurrently: INF 6010 with a minimum grade of C and May be taken concurrently: INF 6080 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students in the School of Information Sciences.

Equivalent: EED 6310

INF 6780 Introduction to Records and Information Management Cr. 3

Management of information, including records creation, records inventory and appraisal, retention/disposition scheduling, filing systems, maintenance of inactive records, micrographics, vital records protection, and electronic impact on records management. Offered for graduate credit only. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students in the Liberal Arts & Sciences or School of Information Sciences.

Equivalent: HIS 6780

INF 7040 Library Administration and Management Cr. 3

Library as an organization in various settings, functional diversification, staffing patterns, program planning, budgeting, performance evaluation, communication, and public relations. Core course. Offered Every Term.

Prerequisites: May be taken concurrently: INF 6080 with a minimum grade of C and May be taken concurrently: INF 6010 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students in the School of Information Sciences.

INF 7050 Public Libraries Cr. 3

Development of concepts introduced in LIS 6010; history, organization and function of public libraries; development of skills necessary to public librarianship. Offered Yearly.

Prerequisites: May be taken concurrently: INF 7040 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students in the School of Information Sciences.

INF 7060 Academic Libraries Cr. 3

Development of topics introduced in LIS 7040; history, organization, and function of the academic library within educational and research institutions; development of management and personnel concepts necessary to academic librarianship. Offered Fall.

Prerequisites: May be taken concurrently: INF 7040 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students in the School of Information Sciences.

INF 7070 Special Libraries and Information Centers Cr. 3

History, organization, and functions of various types of special libraries and skills necessary to deliver a wide range of services. Offered Winter.

Prerequisites: INF 6120 with a minimum grade of C and INF 7040 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students in the School of Information Sciences.

INF 7140 Advanced Reference Service Strategies Cr. 3

Information needs and seeking behaviors, reference interview techniques, and information literacy. Offered Fall.

Prerequisites: INF 6120 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students in the School of Information Sciences.

INF 7160 Advanced Online Searching Cr. 3

Advanced topics in online searching using broad range of databases, including Internet resources. Topics include: sophisticated search strategies, competitive intelligence, retrieval and organization of citations. Offered Winter.

Prerequisites: INF 6120 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students in the School of Information Sciences.

INF 7250 Programming and Services for Children and Young Adults Cr. 3

Principles and procedures for planning, managing and delivery of public library services to children and young adults. Offered Winter.

Prerequisites: INF 6080 with a minimum grade of C and INF 6010 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students in the School of Information Sciences.

INF 7310 School Library Media Programs Cr. 3

Role of library media programs in the school; methods of planning, organizing, and operating such programs; impact of technology upon instruction and library service. Core course. Offered Every Other Year.

Prerequisites: INF 6010 with a minimum grade of C and INF 6080 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students in the School of Information Sciences.

INF 7320 The Media Specialist as Teacher and Instructional Consultant Cr. 3

Instructional functions of the library media specialist in terms of integrating information processing skills in the curriculum through the instructional design process by working in partnership with teachers and applying the principles of teaching and learning theories. Offered Every Other Year.

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students in the School of Information Sciences.

INF 7340 Collection Development and Selection of Materials Cr. 3

Philosophy, principles and procedures for provision of materials and a collection that will meet the needs of the library's clientele. Concepts and procedures of community study, intellectual freedom, evaluation of materials, the use of selection aids, and an introduction to the publishing world. Offered Every Term.

Prerequisites: INF 6010 with a minimum grade of C and May be taken concurrently: INF 6080 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the School of Information Sciences.

INF 7370 Multicultural Information Services and Resources Cr. 3

Study of impact of cultural diversity on library services; development of relevant collections; effective interaction with a diverse community. Offered Winter.

Prerequisites: INF 6120 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students in the School of Information Sciences.

INF 7410 Software Productivity Tools Cr. 3

Concepts and skills for application and use of productivity tools in contemporary information environment. Offered Yearly.

Prerequisites: INF 6080 with a minimum grade of C or May be taken concurrently: INF 6000 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students in the School of Information Sciences.

INF 7415 Project Management Cr. 3

Identification of current information systems and problems, determination and definition of information needs and requirements, evaluation of alternative solutions. Offered Winter.

Prerequisites: INF 7040 with a minimum grade of C or May be taken concurrently: INF 6000 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students in the School of Information Sciences.

INF 7420 Website Development Cr. 3

Use of Internet protocols (ftp, telnet, smtp, http, gopher), location of Internet resources for library reference and research uses, construction of World Wide Web resources using HTML and successor technologies. Offered Every Term.

Prerequisites: INF 6080 with a minimum grade of C or May be taken concurrently: INF 6000 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students in the School of Information Sciences.

INF 7430 Building Web-Based Information Services Cr. 3

Principles of systems administration, file server supervision and local networks, and Internet and the World Wide Web management for library, information science, and archival environments. Offered Fall.

Prerequisites: INF 6080 with a minimum grade of C or May be taken concurrently: INF 6000 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students in the School of Information Sciences.

INF 7435 Integrated Library Systems Cr. 3

Practical experience with common Integrated Library Systems; understanding the role of ILS in function of the information organization. Extensive use of computing facilities. Offered Spring/Summer.

Prerequisites: INF 6210 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students in the School of Information Sciences.

INF 7440 Scripting Languages Cr. 3

Basic skills in using scripting languages to program and manipulate data structures for text information in library applications such as databases and websites. Offered Winter.

Prerequisites: INF 6080 with a minimum grade of C or May be taken concurrently: INF 6000 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students in the School of Information Sciences.

INF 7460 Database Concepts Cr. 3

Fundamentals of database design and basics of database implementation; focus on library and information science practice. Related and current database management technologies used in hands-on experiences. Offered Yearly.

Prerequisites: INF 6080 with a minimum grade of C or May be taken concurrently: INF 6000 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students in the School of Information Sciences.

INF 7470 Information Architecture Cr. 3

Dissemination of information that affects context, content and user. Associations with website development; use in technical writing, presentation preparation, report generation. Offered Winter.

Prerequisites: INF 6080 with a minimum grade of C or May be taken concurrently: INF 6000 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students in the School of Information Sciences.

INF 7490 Competitive Intelligence and Data Mining Cr. 3

Use of multidimensional databases, competitive intelligence and visualization software, data mining tools; access to disparate information sources to support and provide a structure for fact-based decision making. Offered Fall.

Prerequisites: INF 6080 with a minimum grade of C or May be taken concurrently: INF 6000 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students in the School of Information Sciences.

INF 7491 Data Analytics Cr. 3

Key areas of information analytics used by data librarians: quantitative statistics, computer simulation, and data mining tools/techniques. Offered Yearly.

Prerequisites: INF 6080 with a minimum grade of C or May be taken concurrently: INF 6000 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students in the School of Information Sciences.

INF 7492 Information Visualization Cr. 3

Analysis of large data sets and drawing insights through use of information technology tools, statistical techniques, charts and graphs. Offered Yearly.

Prerequisites: INF 6080 with a minimum grade of C or May be taken concurrently: INF 6000 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students in the School of Information Sciences.

INF 7500 Information Behavior Cr. 3

Totality of human behavior in relation to sources and channels of information. Information needs and barriers; information seeking, use and dissemination; information poverty and information overload; topics studied in variety of contexts. Offered Fall.

Prerequisites: INF 6080 with a minimum grade of C or May be taken concurrently: INF 6000 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students in the School of Information Sciences.

INF 7610 Health Sciences Information Services and Resources Cr. 3

First in series of three courses, designed to provide students with skills necessary to become health sciences librarians. Offered Every Other Year.

Prerequisites: INF 6120 with a minimum grade of C and INF 6210 with a minimum grade of C or May be taken concurrently: INF 6000 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students in the School of Information Sciences.

INF 7620 Introduction to Health Informatics and E-Science Cr. 3

Overview of health informatics and e-science, and critical role of health information technologies to enhance quality healthcare. Offered Winter.

Prerequisites: INF 6080 with a minimum grade of C or May be taken concurrently: INF 6000 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students in the School of Information Sciences.

INF 7645 Practicum: Urban Librarianship Cr. 6

On-site experience in an urban library under direction of professional librarian and supervision of faculty member. Theory and competencies relevant to the environment. Seminars to be arranged. Offered Every Term.

Prerequisites: INF 6010 with a minimum grade of B and INF 6080 with a minimum grade of B

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students in the School of Information Sciences.

INF 7710 Archival Administration Cr. 3

Basic training in archival methods. Offered Fall.

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students in the Liberal Arts & Sciences or School of Information Sciences.

Equivalent: HIS 7840

INF 7730 Administration of Audio Visual Collections Cr. 3

Basic course in the fundamentals of administering a visual collection: evaluation, organization, and control of visual collections in archives, librarians, historical agencies, and museums. Offered Winter.

Prerequisites: INF 7710 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students in the Liberal Arts & Sciences or School of Information Sciences.

Equivalent: HIS 7890

INF 7740 Archives and Libraries in the Digital World Cr. 3

Overview of electronic tools and the role of digital process in libraries and archives. Offered Every Other Year.

Prerequisites: INF 6010 with a minimum grade of C or INF 7710 with a minimum grade of C or HIS 7840 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students in the Liberal Arts & Sciences or School of Information Sciences.

Equivalent: HIS 7745

INF 7750 Introduction to Archival and Library Conservation Cr. 3

Fundamentals of archival and library conservation problems and methods essential for effective preservation management of paper and associated materials. Offered Every Other Year.

Prerequisites: INF 6010 with a minimum grade of C or INF 7710 with a minimum grade of C or HIS 7840 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students in the Liberal Arts & Sciences or School of Information Sciences.

Equivalent: HIS 7810

INF 7770 Oral History: A Methodology for Research Cr. 3

Techniques of gathering data from individuals for use in research, classroom teaching, historical, cultural or other contexts. Offered Fall.

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students in the Liberal Arts & Sciences or School of Information Sciences.

Equivalent: HIS 7860

INF 7780 Description and Access for Archives Cr. 3

Investigation of description of archival materials emphasizing the electronic technologies and standard practices. Offered Yearly.

Prerequisites: May be taken concurrently: INF 7710 with a minimum grade of C or HIS 7840 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students in the Liberal Arts & Sciences or School of Information Sciences.

Equivalent: HIS 7820

INF 7790 History of Books, Printing, and Publishing Cr. 3

Development of writing, the alphabet, early materials, manuscripts, paper making, invention and spread of printing, famous presses, modern methods of print and electronic production. The book as artistic output of the culture and part of the world in which it was produced. Offered Yearly.

Prerequisites: INF 6010 with a minimum grade of C and INF 6080 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students in the School of Information Sciences.

INF 7850 Issues in Librarianship Cr. 1-3

Critical analysis of library research, socio-technological trends, implications for the profession. Topics to be announced in Schedule of Classes. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate level students.

Repeatable for 9 Credits

INF 7880 Instructional Methods for Librarians Cr. 3

Introduction to library instruction, bibliographic instruction, information literacy, or user education for those expected to provide library instruction to clients. Offered Yearly.

Prerequisites: INF 6120 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students in the Liberal Arts & Sciences or School of Information Sciences.

INF 7885 Administration of Historical Agencies Cr. 3

The operation of public and private historical agencies, archives and museums. Determination of agency priorities, problems of staffing and finance, governmental regulations, community relations, and professional ethics. Offered Fall.

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students in the Liberal Arts & Sciences or School of Information Sciences.

Equivalent: HIS 7880

INF 7900 Digital Libraries Cr. 3

Critical issues, theoretical and practical principles of digital libraries. Offered Yearly.

Prerequisites: INF 6010 with a minimum grade of C and INF 6080 with a minimum grade of C and INF 6120 with a minimum grade of C and INF 6210 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students in the School of Information Sciences.

INF 7910 Metadata in Theory and Practice Cr. 3

Theoretical and practical principles of metadata used to provide access to digital objects online. Offered Yearly.

Prerequisites: INF 6010 with a minimum grade of C and INF 6080 with a minimum grade of C and INF 6120 with a minimum grade of C and INF 6210 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students in the School of Information Sciences.

INF 7920 Digital Curation and Preservation Cr. 3

Theoretical principles and practical aspects of digital curation and preservation within libraries, museums, archives and other institutions administering data and digital content. Offered Yearly.

Prerequisites: INF 6210 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students in the School of Information Sciences.

INF 7940 Human-Computer Interaction Cr. 3

Interactions between human beings and computer technologies through usability evaluations and user experience design. Offered Fall.

Prerequisites: INF 6080 with a minimum grade of C or May be taken concurrently: INF 6000 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students in the School of Information Sciences.

INF 7950 Practicum: Library Services Cr. 3

Practical experience with digital content under direction of professional librarian and supervision of faculty member. Theory and competencies relevant to the environment. Seminars to be arranged. Offered Yearly.

Prerequisites: 9 credits from INF 6000-9999, LIS 6000-9999 and INF 6010 with a minimum grade of C and INF 6080 with a minimum grade of C and INF 6120 with a minimum grade of C and INF 6210 with a minimum grade of C and INF 7040 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students in the School of Information Sciences.

INF 7960 Practicum: Information Management Cr. 3

Practical experience with technology-based information management under direction of information professional and supervision of a faculty member. Theory and competencies relevant to the project activities. Seminars to be arranged. Students are eligible to enroll in their last semester. Offered Every Term.

Prerequisites: INF 6080 with a minimum grade of C or May be taken concurrently: INF 6000 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students in the School of Information Sciences.

INF 7970 Practicum: Archives Cr. 3

On-site experience in archival center under direction of professional librarian or archivist and supervision of faculty member. Theory and competencies relevant to the environment. Offered Winter, Spring/ Summer.

Prerequisites: 2 of INF 6780, INF 7730, INF 7740, INF 7750, INF 7770, INF 7885 and INF 7710 with a minimum grade of C and INF 7780 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students in the Liberal Arts & Sciences or School of Information Sciences.

Equivalent: HIS 7685

INF 7975 Practicum: Digital Content Cr. 3

Practical experience with digital content under direction of professional librarian and supervision of faculty member. Theory and competencies relevant to the environment. Offered Every Term.

Prerequisite: INF 7900 with a minimum grade of C and INF 7910 with a minimum grade of C and INF 7920 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students in the School of Information Sciences.

Repeatable for 6 Credits

INF 7980 Practicum: School Media Cr. 2-3

On-site experience in school library media/information center under direction of professional librarian and supervision of faculty member; theory and competencies. Seminars to be arranged. Offered Every Term.

Prerequisites: 9 credits from INF 6000-9999, LIS 6000-9999 and INF 6120 with a minimum grade of C, INF 6210 with a minimum grade of C, and INF 7310 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students in the School of Information Sciences.

INF 7990 Research and Directed Study Cr. 1-8

Directed study and individual research under faculty guidance. Offered Every Term.

Prerequisites: INF 6010 with a minimum grade of C and INF 6080 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students in the Liberal Arts & Sciences or School of Information Sciences.

Repeatable for 8 Credits

INF 7996 Research for the Information Profession Cr. 3

Role of research in development of the profession. Research methods; analysis and evaluation of research reports. Core course. Offered Every Term.

Prerequisites: INF 6120 with a minimum grade of C and INF 6210 with a minimum grade of C or May be taken concurrently; INF 6000 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students in the School of Information Sciences.

INF 8000 Seminar in Information Policy Cr. 3

How information policies improve or set constraints on the goals and objectives of libraries and other information organizations. Effect of policies on interpersonal and financial quality of communities. Economic, technical, and ethical policy questions. Offered Yearly.

Prerequisites: INF 6080 with a minimum grade of C or May be taken concurrently; INF 6000 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students in the School of Information Sciences.

INF 8120 Legal Information Resources and Services Cr. 1

Characteristics of legal literature, including federal, state and administrative law; structure of U.S. court system and its publications; introduction to legal databases; special problems in legal reference service and administration; selection and use of basic tools in legal research. Offered Intermittently.

Prerequisites: INF 6120 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students in the School of Information Sciences.

INF 8410 Topics in Information Management Cr. 1-3

Current topics affecting information management systems and services. Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students.

Repeatable for 9 Credits

INF 8998 Specialist's Research Seminar Cr. 3

Advanced research methods and application. Offered Spring/Summer.

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students in the School of Information Sciences.

ISM - INFORMATION SYSTEMS MANAGEMENT

ISM 3630 Business Information Systems Cr. 3

Introductory information systems management course, which establishes a foundation for understanding the value of information systems in organizations. Provides a management-oriented study of computer-based information systems in organizations and an overview of the manner in which information systems and technology supports business processes, managerial decision-making, and organizational strategy. Offered Every Term.

Restriction(s): Enrollment limited to students in the School of Business.

ISM 4500 Business Co-op Assignment Cr. 0

Provides students with practical application of theory to on-the-job experience. Students must be admitted to the University's Cooperative Education Program during the work semester that the course is to be taken. Students will normally be assigned to a cooperating business organization for internship periods of one semester. Offered Yearly.

Restriction(s): Enrollment is limited to Undergraduate level students; enrollment limited to students in the School of Business.

ISM 4575 IT Security Cr. 3

Provides an investigation of contemporary issues in computer security. Students are exposed to the spectrum of security activities, procedures, and methodologies. Topics include: inspection and protection of information assets; detection of and reaction to threats to information assets; examination of pre- and post-incident procedures, and technical and managerial responses; and an overview of information security planning and staffing functions. Offered Yearly.

Prerequisite: ISM 3630 with a minimum grade of C

Restriction(s): Enrollment is limited to Undergraduate level students; enrollment limited to students in the School of Business.

ISM 4990 Directed Study in Information Systems Management Cr. 1-3

Provides the student with the opportunity to focus on advanced readings, projects (e.g., tutorials, certifications), and research in a particular area of information systems management that is of interest to the student and faculty member. Offered Every Term.

Prerequisites: ISM 3630 with a minimum grade of C

Restriction(s): Enrollment is limited to Undergraduate level students; enrollment limited to students in the School of Business.

ISM 5200 ERP Systems: Concepts and Practice Cr. 3

Discusses the role and function of ERP systems within organizations; analyzes the major business processes in their organization and their implementation using ERP software; provides hands-on use of ERP tools for transaction processing and decision support; and describes the use of ERP systems for customer relationship management (CRM), supply chain management (SCM), and electronic commerce. Offered for undergraduate credit only. Offered Winter.

Prerequisites: ACC 3010 with a minimum grade of C and ACC 3020 with a minimum grade of C and ISM 3630 with a minimum grade of C

Restriction(s): Enrollment is limited to Undergraduate level students; enrollment limited to students in the School of Business.

Course Material Fees: \$117

Equivalent: ACC 5200

ISM 5210 Blockchain Fundamentals for Accounting and Business Cr. 3

Introduces blockchain, which is a public, transparent, secure, immutable and distributed ledger. Blockchains can be used to record and transfer any digital asset, not just currency. Progressing from a detailed study of how blockchain works in Bitcoin; this course also discusses alternative blockchain platforms; potential uses of blockchain in accounting, other areas of business, and society; and this technology's potential impact on accounting systems, business transactions, financial services, government, and banking management. This course is taught completely online. Offered Spring/Summer.

Prerequisite: ACC 3010 with a minimum grade of C and ACC 3020 with a minimum grade of C

Equivalent: ACC 5210

ISM 5530 Ethics in Information Technology Cr. 3

An awareness of the wider social, legal and ethical issues of information technology. Relationship between technological change, society and the law. Student is introduced to legal issues such as intellectual property and liability for defective software. Offered for undergraduate credit only. Offered Yearly.

Prerequisites: May be taken concurrently: ISM 3630 with a minimum grade of C

Restriction(s): Enrollment is limited to Undergraduate level students; enrollment limited to students in the School of Business.

Equivalent: ISM 7530

ISM 5560 Survey of e-Commerce Cr. 3

Provides an introduction to electronic commerce. Topics include: e-commerce scope, business-to-business (B2B) and business-to-consumer (B2C) activities; supporting software, hardware, networking, security technologies; readings and online discussions. Offered for undergraduate credit only. Offered Yearly.

Prerequisite: ISM 3630 with a minimum grade of C

Restriction(s): Enrollment is limited to Undergraduate level students; enrollment limited to students in the School of Business.

ISM 5570 Data Mining and Analytics Cr. 3

Focuses on developing techniques to analyze large datasets and using techniques, algorithms, and software to automate the analysis and exploration of those datasets. Covers the methodology, major software tools, and applications in the data mining and analytics field. Offered for undergraduate credit only. Offered Yearly.

Prerequisite: ISM 3630 with a minimum grade of C

Restriction(s): Enrollment is limited to Undergraduate level students; enrollment limited to students in the School of Business.

Course Material Fees: \$16

ISM 5670 Special Topics in Information Systems Cr. 3

Topics range from JAVA to digital video creation and analytics. Offered for undergraduate credit only. Offered Intermittently.

Prerequisite: ISM 3630 with a minimum grade of C

Restriction(s): Enrollment is limited to Undergraduate level students; enrollment limited to students in the School of Business.

Repeatable for 6 Credits

ISM 5705 Inbound Information Technology Cr. 3

Provides insights and practical guidelines to help students learn how to create an appealing and engaging digital presence for businesses. The discussion focuses on topics relevant to planning, managing, and implementing on-line and social media interactivity such as: search engine organization (SEO), inbound links, page ranking, tagging content, pillaring content, publishing content, analytic reports, blogging, tweeting and other social media. Offered for undergraduate credit only. Offered Fall.

Prerequisites: ISM 3630 with a minimum grade of C

Restriction(s): Enrollment is limited to Undergraduate level students; enrollment limited to students in the School of Business.

Course Material Fees: \$50

ISM 5820 Systems Analysis and Design Cr. 3

Presents a structured and formal approach to information systems development. Analysis, logical requirements specification, general and detailed design, control, and implementation of information systems are discussed. Offered for undergraduate credit only. Offered Every Term.

Prerequisites: ISM 3630 with a minimum grade of C

Restriction(s): Enrollment is limited to Undergraduate level students; enrollment limited to students in the School of Business.

ISM 5860 Data Communications and Networks Cr. 3

Data communication concepts and terminology, communication system design approaches, data communications standards, data communications software and hardware, network architecture, distributed management information systems. Offered for undergraduate credit only. Offered Yearly.

Prerequisite: ISM 3630 with a minimum grade of C

Restriction(s): Enrollment is limited to Undergraduate level students; enrollment limited to students in the School of Business.

Course Material Fees: \$13

ISM 5890 Internship in Information Systems Cr. 3

Student performs assigned tasks and responsibilities in a professional manner under supervision of host-employer for a minimum of 160 hours during the semester, abiding by the rules and regulations established by the employer and expected by all employees; student must satisfactorily complete all course requirements outlined in the internship program for the School of Business Administration. Offered for undergraduate credit only. Offered Every Term.

Prerequisites: ISM 3630 with a minimum grade of C

Restriction(s): Enrollment is limited to Undergraduate level students; enrollment limited to students in the School of Business.

ISM 5900 Project Management Cr. 3

Understanding and appreciation of the different knowledge areas of project management. Insight into developing the inputs, tools, techniques, and outputs to successfully manage products. Offered for undergraduate credit only. Offered Yearly.

Prerequisites: ISM 3630 with a minimum grade of C

Restriction(s): Enrollment is limited to Undergraduate level students; enrollment limited to students in the School of Business.

Equivalent: MGT 5900

ISM 5992 Database Systems Cr. 3

Details the importance of data in today's enterprise and describes the theories, models, and techniques for designing, developing, creating, and manipulating a database. Students will practice data modeling, physical database design, database implementation, and complete introductory SQL exercises. Offered for undergraduate credit only. Offered Yearly.

Prerequisites: ISM 3630 with a minimum grade of C

Restriction(s): Enrollment is limited to Undergraduate level students; enrollment limited to students in the School of Business.

Course Material Fees: \$13

ISM 5994 Software Tools for Business Applications Cr. 3

Introduces the student to the use of the Internet to create a digital presence. Students design and develop websites, create responsive web pages to provide an optimal viewing experience, and integrate database functionality allowing all web pages to "know" who is looking at the information using HTML, Javascript, Hubl, HubDB, Wistia, and cascading style sheets (CSS). Smart design includes content complete with video, progressive forms, and focused calls-to-action. Offered for undergraduate credit only. Offered Yearly.

Prerequisite: ISM 3630 with a minimum grade of C

Restriction(s): Enrollment is limited to Undergraduate level students; enrollment limited to students in the School of Business.

Course Material Fees: \$13

ISM 6997 Information Systems Policy and Management Cr. 3

Within the overall structure of the systems approach, this capstone course integrates the managerial, technical, and strategic planning and control concepts developed throughout the undergraduate courses. It also focuses on the concepts and methodologies necessary for management of information systems projects. Offered for undergraduate credit only. Offered Yearly.

Prerequisites: ISM 3630 with a minimum grade of C and ISM 5820 with a minimum grade of C

Restriction(s): Enrollment is limited to Undergraduate level students; enrollment limited to students in the School of Business.

ISM 7290 Blockchain: An Accounting and Business Perspective Cr. 3

Introduces blockchain: a public, transparent, secure, immutable, and distributed ledger. Blockchains can be used to record and transfer any digital asset, not just currency. The course covers the workings, applications, and potential impact of this revolutionary technology. Offered Fall.

Prerequisite: BA 7000 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

ISM 7500 Business Information Systems Cr. 2

Teaches students how IT can influence, support, and advance organizational operations, performance, and decision making. The course will also teach students, as managers or employees, how to effectively define their information needs and utilize IT to increase their effectiveness. No credit after ISM 4630 or ACC 6070. Offered Fall, Winter.

Restriction(s): Enrollment is limited to Graduate level students.

ISM 7505 Information Analytics: Inbound Information Technology Cr. 3

The evolving cyberspace organization. Insights and practical guidelines to create an appealing and engaging digital presence. Discussion focuses on topics relevant to planning, managing, and implementing online and social media interactivity such as search engine organization (SEO), inbound links, blogging, page ranking, tagging content, tweeting, publishing content, analytic reports, and social media. Offered Fall.

Restriction(s): Enrollment is limited to Graduate level students.

Course Material Fees: \$113

ISM 7507 Application Development with Swift Cr. 3

Establishes a foundation for understanding the value of mobile applications in the enterprise and how to design, create, and publish mobile applications for the Apple iOS using Swift and Xcode. These tools allow you to quickly develop a mobile application so you can focus your energy on your design. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate level students.

Course Material Fees: \$115

ISM 7508 Application Development on Android Cr. 3

Establishes a foundation for understanding the value of mobile applications in the enterprise, and how to design, create, and publish mobile applications for the Android OS using MIT's App Inventor. This tool allows the user to quickly develop a mobile application using building blocks, so energy can be focused on design and not on programming language syntax. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate level students.

ISM 7510 Database Management Cr. 3

Overall examination of database management and knowledge management systems. Theories, models, and techniques for designing, developing, understanding, utilizing and creating competitive advantage through database systems. Topics include data modeling, logical and physical database design, strategic value of data, introductory SQL, knowledge management, and emerging database technologies. No credit after ISM 5993. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate level students.

Course Material Fees: \$13

ISM 7512 Digital Video Creation and Analytics Cr. 3

Helps users to shoot professional looking video to post on YouTube or another website, and to analyze the video's impact. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate level students.

ISM 7520 Information Systems Design Cr. 3

Non-technical course in how to use information systems to add value to an organization. Use of system analysis techniques to study and identify information needs of organizations and integration of IT specialists and manager-users. Topics include: IT and organizational design, inter-networking infrastructure, organization and leading the IT function. How information systems professionals link MIS to specific business operations and objectives to increase value; how managers may use information systems to support activities and increase individual productivity. No credit after ISM 5820. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate level students.

ISM 7530 Societal and Ethical Issues in the Information Age Cr. 3

Issues such as computer crime, privacy, copyrighting of software; other ethical issues related to use of business systems and information systems. No credit after ISM 5530. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate level students.

ISM 7560 Survey of E-Commerce Cr. 3

Introduction to electronic commerce: scope, business-to-business and business-to-consumer activities; supporting software, hardware, networking, security technologies; readings and online discussions. Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students.

ISM 7570 Data Mining Cr. 3

Tools and techniques used to analyze large data bases; hands-on approach to common techniques. Emphasis on application of data mining to problems in marketing, finance, and other business disciplines. Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students.

Course Material Fees: \$16

ISM 7575 Corporate Computer Networks and IT Security Cr. 3

Broad selection of contemporary issues in computer security. Security activities, methods, methodologies, and procedures including inspection and protection of information assets, detection of and reaction to threats to information assets, and examination of pre- and post-incident procedures, technical and managerial responses, and an overview of the Information Security Planning and Staffing functions. Includes many topics for Security+ exam by CompTIA. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students in the School of Business.

ISM 7890 Internship in Information Systems and Management Cr. 1-3

Students work a minimum of 160 hours for fifteen weeks in an entry-level management position in information systems. Offered Yearly.

Prerequisites: ISM 7500 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students in the School of Business.

Repeatable for 3 Credits

ISM 7900 Project Management Cr. 3

Management of resources (budget, personnel, materials, etc.) within the scope of a given project; understanding and appreciation for the different knowledge areas of project management; insight into identification of inputs, tools, and techniques of project management. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate level students.

Equivalent: MGT 7900

ISM 7994 Digital Content Development Cr. 3

Development of responsive, smart, and personalized web sites using leading web development tools and technologies. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate level students.

ISM 7995 Directed Study in Information Systems and Management Cr. 1-3

Advanced independent readings and research under supervision of a graduate faculty member in areas of special interest to student and faculty member. Offered Yearly.

Prerequisites: ISM 7500 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students in the School of Business.

ISM 7996 Principles for Customer Relationship Management Cr. 3

Investigation of the antecedents and consequences of implementing a customer-relationship management strategy. The course will provide students with insight on: What CRM and its conceptual foundations are; How CRM forces the interaction between corporate strategy, organizational structure, supply chain, and customer facing front end; The role of measuring and managing customer satisfaction, customer loyalty and customer profitability; Hands-on application with salesforce.com. Offered Fall.

Restriction(s): Enrollment is limited to Graduate level students.

Course Material Fees: \$75

ISM 8000 Seminar in Information Systems and Management Cr. 3

Current developments and emerging trends. Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students.

ITA - ITALIAN

ITA 1010 Beginning Italian I Cr. 4

Introduction to Italian language and its culture through exposure to authentic materials and interactive activities; developing communicative reading, writing, listening, and speaking skills and cultural proficiency. No experience with Italian is needed. Offered Every Term.

Course Material Fees: \$5

ITA 1020 Beginning Italian II Cr. 4

Continuation of ITA 1010. Strengthening communicative skills (reading, writing, speaking, and listening) and expanding cultural understanding and proficiency through exposure to authentic materials and interactive activities. Offered Every Term.

Prerequisites: ITA 1010 with a minimum grade of D-

Course Material Fees: \$5

ITA 2010 Intermediate Italian Cr. 4

Satisfies General Education Requirement: Foreign Culture, Global Learning Inquiry

Refining communicative skills (reading, writing, speaking, and listening) and cultural proficiency through extensive exposure to authentic sources, material, and interactive activities. Completion of this course fulfills the General education requirement for foreign language and culture. Offered Every Term.

Prerequisites: ITA 1020 with a minimum grade of D-

Course Material Fees: \$5

ITA 2020 Italian through Film Cr. 3

Increasing communicative abilities and cultural proficiency through study and analysis of Italian films, readings including contemporary news and fiction, and more interactive activities. Offered Yearly.

Prerequisites: ITA 2010 with a minimum grade of D-

Course Material Fees: \$5

ITA 2700 Anguish and Commitment: European Existentialist Literature Cr. 3-4

Satisfies General Education Requirement: Cultural Inquiry, Philosophy Letters

A team-taught interdisciplinary study in English of representative works by European existentialist writers: Dostoevsky, Hesse, Kafka, Pirandello, Sartre, Camus and Unamuno. Offered Every Other Year.

Equivalent: FRE 2700, GER 2700, SPA 2700

Satisfies General Education Requirement: Cultural Inquiry, Global Learning Inquiry

Introduction to the interdisciplinary context of major Italian tales and other European fairy tales traditions, emphasizing their transformation from oral and literary form into film, animation, opera, ballet, art, and music. All lectures and readings in English. Offered Fall.

ITA 3030 Road to Italy Cr. 3

Study and in-depth analysis of the Italian language and its cultural daily life. An interactive and highly communicative understanding of art, literature, music, cinema, food, media and TV, sport and leisure activities. Offered Yearly.

Prerequisites: ITA 2010 with a minimum grade of D-

ITA 3040 Business Italian Cr. 3

Understanding and developing basic business terminology, while studying style and etiquette for the Italian business world. Students will also learn how to write business correspondence in Italian. Offered Every Other Year.

Prerequisites: ITA 2010 with a minimum grade of D-

ITA 3100 Caffè Italia Cr. 3

Enhancing speaking, reading, and listening skills through debates, discussions and presentations on current events and topics. Offered Every Term.

Prerequisites: ITA 2020 with a minimum grade of D-

ITA 3200 Italian Rebels Cr. 3

A journey through forty years of turbulent Italian contemporary history. Through readings, songs of protest, epic film, and more, this course will strengthen and enhance the cultural and linguistic knowledge of contemporary Italy and Italians, focusing on formal and informal writing and research skills. Offered Every Other Year.

Prerequisites: ITA 2020 with a minimum grade of D-

ITA 3300 Science, History, and Culture of Italian Cuisine Cr. 3

Satisfies General Education Requirement: Cultural Inquiry, Global Learning Inquiry

Explores the science, history, and culture of Italian food and the Mediterranean Diet, and how Italian food culture has evolved throughout the centuries. Taught in English. Offered Yearly.

Equivalent: NFS 3300

ITA 3500 Dante in Translation: The Divine Comedy Cr. 3

An introduction to Dante and his cultural milieu through a critical reading of selected cantos of the Divine Comedy, and selected passages of Dante's minor works. Offered Yearly.

ITA 4610 The Birth of Italian Language and Literature Cr. 3

A journey in Italian literature and culture, from Marco Polo and the birth of the Italian language to the controversial writings of Galileo Galilei. Offered Yearly.

Prerequisites: ITA 2020 with a minimum grade of D-

ITA 4620 The Birth of Italy Cr. 3

A study of the formation of Italy through its literature and culture, from the Enlightenment to the contemporary period. Offered Yearly.

Prerequisites: ITA 2020 with a minimum grade of D-

ITA 5000 Minor Language Practicum Cr. 3

Controlled application of active language skills for students electing a Ph.D. minor in Italian. No degree credit toward the Ph.D. Offered for graduate credit only. Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students.

Repeatable for 9 Credits

ITA 5150 Italian Cinema Cr. 3

Concentrated study of specific trends or the development of individual directors. Topics to be announced in Schedule of Classes. Offered Every Other Year.

Course Material Fees: \$10

Repeatable for 9 Credits

ITA 5200 Italian Theater Workshop Cr. 3

A study of Italian language, including verbal expression, pronunciation, phonetics, listening exercises, and gestures in the applied context of theater performance. Offered Every Other Year.

Prerequisites: ITA 3100 with a minimum grade of D-

ITA 5570 Topics in Italian Studies Cr. 3

In-depth study of author or group of authors, genre, historic period, or particular literary or cultural movement. Topics to be announced in Schedule of Classes. Offered Every Other Year.

Prerequisites: ITA 4610 with a minimum grade of D- and ITA 4620 with a minimum grade of D-

Repeatable for 9 Credits

ITA 5990 Directed Study Cr. 1-4

Offered Every Term.

Repeatable for 8 Credits

ITA 5993 Writing Intensive Course in Italian Cr. 0

Satisfies General Education Requirement: Writing Intensive Competency Disciplinary writing assignments under the direction of a faculty member. Must be selected in conjunction with designated corequisite; see section listing in Schedule of Classes for corequisites available each term.

Satisfies the University General Education Writing Intensive Course in the Major requirement. Required for all majors. Offered Fall, Winter.

Prerequisites: May be taken concurrently: ITA 3000-3999 or ITA 6000-6999 or AFS 2390 with a minimum grade of C or ENG 2390 with a minimum grade of C or ENG 3010 with a minimum grade of C or ENG 3020 with a minimum grade of C or ENG 3050 with a minimum grade of C

Restriction(s): Enrollment is limited to Undergraduate level students.

ITA 5999 Internship in Italian Studies Cr. 3

Internship in a public or private organization related to Italian studies. Offered for undergraduate credit only. Offered Every Term.

Prerequisite: ITA 3040 with a minimum grade of C- or ITA 3100 with a minimum grade of C- or ITA 3200 with a minimum grade of C-

Restriction(s): Enrollment is limited to students with a major, minor, or concentration in Italian or Italian Honors.

ITA 6400 Languages of Italy Cr. 3

A study of the Italian language and its dialects from early years to present. Representative texts from various periods will explore Italy's diverse linguistic landscape. Offered Every Other Year.

ITA 6500 Introduction to Literary Criticism Cr. 3

Overview of various currents of critical theory, focusing on literary and cinematographic texts. The two-fold pedagogical approach, theoretical and empirical, will use semiotics as a disciplinary tool of analysis and apply it to the textual material studies in this course. Offered Intermittently.

ITA 6610 Dante's Comedy I: Inferno Cr. 3

A close reading of Dante's *Inferno* with attention to sources, background, and interpretation. Offered Every Other Year.

Prerequisite: ITA 3200 with a minimum grade of D-

Repeatable for 6 Credits

ITA 6620 Dante's Comedy II: Purgatory and Paradise Cr. 3

A close reading of Dante's *Purgatory* and *Paradise* with attention to sources, background, and interpretation. Offered Every Other Year.

Prerequisite: ITA 6610

Repeatable for 6 Credits

ITA 6680 Love, Politics and the Art of Elegance Cr. 3

A study of major contributions of the Italian Renaissance that shaped modern thought with a special focus on the art of elegance, effortless mastery, love, and politics. Offered Every Other Year.

Prerequisites: ITA 4610

Repeatable for 12 Credits

ITA 6690 Italian Love Sickness Cr. 3

A close study of major Baroque works that shaped ideas of love, the phenomenon of love sickness, and the scientific remedies for it. Offered Every Other Year.

Prerequisites: ITA 4610

ITA 6700 Performing Italy Cr. 3

A study of Italian theater, music, and opera, with a particular focus on the eighteenth century. Offered Every Other Year.

Prerequisites: ITA 4620

Repeatable for 9 Credits

ITA 6800 Imagining Italy, Creating Italians Cr. 3

A study of the literature, culture, and history of the period of Italian unification. Offered Every Other Year.

Prerequisites: ITA 4620

Repeatable for 9 Credits

A study of transformation, change, and crisis in Italy and its modernist art and literature, focusing on the period from the late 1800s through the early 1900s. Offered Every Other Year.

Prerequisites: ITA 4620

Repeatable for 9 Credits

ITA 6900 Contemporary Italian Culture Cr. 3

Study of contemporary Italian culture, including literature, film, and other media. Offered Every Other Year.

Prerequisites: ITA 4620

Repeatable for 9 Credits

ITA 7010 Introduction to Literary Theory Cr. 3

Graduate-level introduction to key critical perspectives, theories, problems, and questions that have informed the discussions and analyses of twentieth- and twenty-first-century literary and cultural scholars. Specific theoretical paradigms used to determine the task of textual interpretation, locate the limits of each approach, trace the emergence of subsequent theoretical paradigms, and think about how such theories might or might not be relevant in the study of specific texts. Offered Every Other Year.

Restriction(s): Enrollment is limited to Graduate level students.

Equivalent: CLA 7010, FRE 7010, GER 7010, NE 7010, SLA 7010, SPA 7010

ITA 7996 Research Project Cr. 1-4

Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students.

Repeatable for 12 Credits

ITA 7999 Master's Essay Direction Cr. 1-3

Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students with a class of Candidate Masters.

ITA 8999 Master's Thesis Research and Direction Cr. 1-8

Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students with a class of Candidate Masters.

Repeatable for 8 Credits

JPN - JAPANESE STUDIES

JPN 1010 Elementary Japanese I Cr. 4

Introduction to written and spoken Japanese. Offered Every Term.

Course Material Fees: \$5

JPN 1020 Elementary Japanese II Cr. 4

Continuation of JPN 1010. Offered Every Term.

Prerequisites: JPN 1010 with a minimum grade of D-

Course Material Fees: \$5

JPN 2010 Intermediate Japanese I Cr. 4

Satisfies General Education Requirement: Foreign Culture, Global Learning Inquiry

Continuation of JPN 1020. Focus on language and Japanese culture. Offered Every Term.

Prerequisites: JPN 1020 with a minimum grade of D-

Course Material Fees: \$5

JPN 2020 Intermediate Japanese II Cr. 4

Continuation of JPN 2010. Language and culture learned through situational activities with tasks to develop language proficiency. Enhancement of Kanji (ideograph writing system) learning to help students develop higher reading proficiency. Offered Winter.

Prerequisites: JPN 2010 with a minimum grade of D-

Course Material Fees: \$5

JPN 2110 Listening Japanese with Media and Animation Cr. 3

Development of listening skills using Japanese media, animation, and movies. Offered Intermittently.

Prerequisites: JPN 1020 with a minimum grade of D-

JPN 2710 Japanese Culture Cr. 3

Survey of Japanese culture from its beginning to the present day. Japanese thought, religion, art, society, literature, films. Offered Fall.

JPN 2720 Japanese Culture through Myth, Fairy Tales, and Media Cr. 3

Satisfies General Education Requirement: Cultural Inquiry, Global Learning Inquiry

Introduces Japanese philosophy, beliefs, values, and cultural heritage through a broad survey of Japanese fairy tales and media forms (cinema, TV drama, and Anime). Through the analysis of these different texts, students will consider questions related to Japanese identity, culture, communication styles, and politics, reflecting in particular on questions of space, place, and the environment. Ethnographic approaches will be also introduced. Offered Spring/Summer.

JPN 2800 Culture Studies in Japan (Homestay and Study Abroad Tour) Cr. 3

Satisfies General Education Requirement: Cultural Inquiry

Survey of Japanese culture taught in English. Introduction of family and group organization, customs, pop culture (fashion/music/films), aspects of daily lives (thought/religion/arts/society), and a brief modern history. Also, survival language practice. Offered Spring/Summer.

Prerequisites: JPN 1010 with a minimum grade of D-

Equivalent: ASN 2800

JPN 3010 Advanced Japanese I Cr. 3

Introduction to high intermediate grammar. Three thematic units: body and health; life and careers; communication and media. Emphasis on communication for business. Offered Yearly.

Prerequisites: JPN 2020 with a minimum grade of D-

JPN 3020 Advanced Japanese II Cr. 3

Introduction to language pertinent to media communication, using written, visual, and/or audio materials. Offered Yearly.

Prerequisites: JPN 3010 with a minimum grade of D-

JPN 3030 Japanese Reading and Writing Cr. 3

Various writing styles. Emphasis on expanding the vocabulary and Kanji characters. Offered Yearly.

Prerequisites: JPN 3010 with a minimum grade of D-

JPN 3540 Intensive Japanese Cr. 4-6

Introduction to the linguistic patterns, sound system, and writing system of the Japanese language. Open only to JCMU Study Abroad Students.

Offered Fall, Winter.

Repeatable for 12 Credits

JPN 3990 Directed Study Cr. 1-6

Directed study tailored to student and faculty interests and specializations. Offered Every Term.

Repeatable for 6 Credits

JPN 4010 Business Japanese I Cr. 3

Expansion of vocabulary and grammar knowledge especially used for business settings. Acquisition of business language and etiquette, role-playing of conversation patterns, reading business memos and documents. Classes are all task-oriented for business. (Basic.) Offered Yearly.

Prerequisites: JPN 3020 with a minimum grade of D-

JPN 4550 Japanese Culture and Society I Cr. 4

Satisfies General Education Requirement: Foreign Culture, Global Learning Inquiry

Examination of significant social institutions and cultural aspects of modern Japanese society, including their historical development. Open only to JCMU Study Abroad Students. Offered Fall.

JPN 4560 Japanese Culture and Society II Cr. 4

Satisfies General Education Requirement: Foreign Culture, Global Learning Inquiry

Significant social institutions and cultural aspects of modern Japanese society, including their historical development. Open only to JCMU Study Abroad Students. Offered Winter.

JPN 4850 Studies in Japanese Culture Cr. 4

Selected topics, themes, subjects on modern Japanese society, to be announced in Schedule of Classes. Offered Fall, Winter.

Repeatable for 8 Credits

JPN 5220 Languages of Asia Cr. 3

Introduction to major language families in Asia; grammar, sounds, language contacts. Offered Winter.

Equivalent: CHI 5220, LIN 5100

JPN 5999 Internship in Japanese Studies Cr. 3

Internships in Japanese studies allow students to apply the knowledge they have acquired through the Japanese program and to gain practical experience in their scholarly and professional areas of interest. An internship can also allow students to explore possible areas in which they would like to pursue a career. Offered Every Term.

Prerequisite: JPN 2020 with a minimum grade of D-

KHS - KINESIOLOGY, HEALTH AND SPORT STUDIES

KHS 1000 Contemporary Issues in Sport, Exercise, and Health Sciences Cr. 3

Satisfies General Education Requirement: Social Inquiry
Survey of selected topics in Kinesiology, including exercise science, health, physical education, athletic training and sports studies; a focus on current issues and related industry careers. Offered Fall, Winter.

KHS 1010 Wellness at Wayne Cr. 1

Satisfies General Education Requirement: Wayne Experience
Integrates information of eight dimensions of wellness with campus resources and encourages healthful living for WSU students. Class will include regular meetings at various campus locations and will involve physical activity sessions. Offered Fall, Winter.

Restriction(s): Enrollment limited to students with a class of Freshman.

KHS 5900 Research Methods in Kinesiology, Health and Sport Studies Cr. 3-4

Research proposal preparation, including literature review, hypothesis construction, research design, and computer-aided data analysis. Application of skills to critical reading of primary sources. Offered Fall, Winter.

KHS 6540 Workshop in Kinesiology, Health and Sport Studies Cr. 1-3

Exploration of topics of current interest for the profession. Offered Spring/Summer.

Restriction(s): Enrollment limited to students in the College of Education.

Repeatable for 12 Credits

KHS 7990 Special Problems in KHS Cr. 1-3

Offered Fall, Winter.

Restriction(s): Enrollment is limited to Graduate level students.

Repeatable for 9 Credits

KHS 7999 Master's Essay and Project Direction Cr. 3

Development and review of essay or project. Offered Fall, Winter.

Restriction(s): Enrollment is limited to Graduate level students.

Repeatable for 9 Credits

KHS 8540 Theories of Health Behavior Cr. 3

Overview of select social and behavioral theories used to understand health-related behaviors and develop interventions. Offered Every Other Year.

Restriction(s): Enrollment is limited to Graduate level students.

KHS 8700 Research in the Psychosocial Aspects of Physical Activity Cr. 3

Development of in-depth understanding of psychosocial aspects of research in physical activity (exercise, sport, leisure activity). Offered Winter.

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students with a class of Doctorate; enrollment is limited to students in the Department of Kinesiology, Hlth & Sport Std; enrollment is limited to students with a major in Kinesiology; enrollment limited to students in a Doctor of Philosophy degree.

KHS 8750 Internship in Kinesiology, Health and Sport Studies Cr. 1-8

Professional experience in public or private institutions relevant to student's field of specialization. Initial plan of involvement and final evaluation. Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students.

Course Material Fees: \$16

Equivalent: SAM 8750

Repeatable for 8 Credits

KHS 8800 Social Ecological Theories for Health Cr. 3

Doctoral level course designed to provide an overview of social and behavioral theories related to health. Offered Every Term.

Restriction(s): Enrollment is limited to students with a major in Kinesiology; enrollment limited to students in a Doctor of Philosophy degree.

KHS 8850 Physical Activity and Health Interventions Cr. 3

Doctoral level course designed to provide an overview of physical activity and health interventions developed and tested across different populations. Offered Every Term.

Restriction(s): Enrollment is limited to students with a major in Kinesiology; enrollment limited to students in a Doctor of Philosophy degree.

KHS 8999 Master's Thesis Direction Cr. 1-8

Offered Fall, Winter.

Restriction(s): Enrollment is limited to Graduate level students.

Repeatable for 8 Credits

KHS 9600 Doctoral Seminar in Kinesiology, Health and Sport Studies Cr. 3

Introduction to active programs of research in the field of kinesiology; research presentations and discussion by faculty, guest lecturers and students. Offered Fall.

Restriction(s): Enrollment is limited to Graduate level students; enrollment is limited to students in the Department of Kinesiology, Hlth & Sport Std; enrollment limited to students in a Doctor of Philosophy degree.

KHS 9601 Professional Seminar Cr. 1

Critical examination, presentation, and discussion of current interest in kinesiology and health. The emphasis is on interdisciplinary communication and presentation skills. Offered Every Term.

Restriction(s): Enrollment limited to students in a Doctor of Philosophy degree.

Repeatable for 6 Credits

KIN - KINESIOLOGY

KIN 1991 Professional Perspectives in Kinesiology Cr. 3

Overview of academic professional and career perspectives of kinesiology. Introduction of basic concepts and applications of fitness, physical activity, wellness, nutrition and assessment. Offered Fall, Winter.

KIN 2560 Individual Problems in Kinesiology Cr. 1-3

Solving a specific problem under the guidance of the divisional staff. Offered Fall, Winter.

Repeatable for 4 Credits

KIN 3400 Lifespan Growth and Development Cr. 3

Study of change in motor behavior from infancy to older adulthood. Competency in: ability to formulate a developmental perspective, knowledge of changing behavior across life-span, knowledge of factors affecting motor development, ability to apply knowledge in instructional and recreational settings. Offered Every Term.

KIN 3540 Cultural Foundations of Kinesiology Cr. 3

Introduction to cultural competence and cultural issues in physical activity, exercise, sport, and fitness for kinesiology and health care professionals. Offered Every Term.

KIN 3550 Motor Learning and Control Cr. 3

Satisfies General Education Requirement: Writing Intensive Competency Study of motor skill acquisition and motor control with applications to physical activity. Focus on cognitive processes and neural mechanisms which contribute to motor learning and control. Satisfies General Education program Writing Intensive requirement for kinesiology majors. Offered Every Term.

Prerequisites: AFS 2390 with a minimum grade of C or ENG 2390 with a minimum grade of C or ENG 3010 with a minimum grade of C or ENG 3020 with a minimum grade of C or ENG 3050 with a minimum grade of C

KIN 3580 Biomechanics Cr. 3

Application of knowledge of human physical structure and function in the analysis and appreciation of human movement; theory and practice of human movement analytic techniques. Offered Every Term.

Prerequisites: KIN 1991 with a minimum grade of C and BIO 2870 with a minimum grade of C and STA 1020 with a minimum grade of C or MAT 1000-6XXX with a minimum grade of C

Restriction(s): Enrollment limited to students in the College of Education.

KIN 5100 Anatomical and Physiological Bases of Physical Activity Cr. 3

Basic anatomical and physiological principles that have direct application to physical activity programming in the K-12 school setting and in community-based physical activity settings. The course will include practical application experiences to illustrate the theoretical knowledge base. Offered Fall.

Restriction(s): Enrollment is limited to Graduate or Undergraduate level students; enrollment limited to students with a class of Unranked Grad, Junior or Senior.

KIN 5110 Motor Learning and Development Cr. 3

Principles and practices that affect the learning and development of motor skills from birth to early adulthood. Study of theories of motor development, motor learning, and motor control; motor skill classification and games classification; developmental and motor learning stages; methodological considerations including how to measure and assess motor learning in field-based situations; and professional applications of the motor learning and development in physical education and physical activity programming. Offered Winter.

Restriction(s): Enrollment is limited to Graduate or Undergraduate level students; enrollment limited to students with a class of Unranked Grad, Junior or Senior.

KIN 5200 Effective Teaching and Instructional Practices Cr. 3

Effective teaching and instructional practices in physical education and physical activity. Study of the learning process, factors that influence the learning process, effective teaching skills, effective task presentation and content development, and management of and motivation in the learning environment. Research on effective teaching practices, including behavior management, in quality physical education and physical activity programs. Offered Fall.

Restriction(s): Enrollment is limited to Graduate or Undergraduate level students; enrollment limited to students with a class of Unranked Grad, Junior or Senior.

KIN 5210 Movement Education Cr. 3

Advanced study of elementary movement education through and in-depth analysis of Graham's movement skill themes. Study of movement concepts, skill themes, curriculum design, and the implementation of activities in a practical application. Students will also investigate research supporting the inclusion of movement education in quality physical education and physical activity programs. Offered Fall.

Prerequisites: KIN 5200 with a minimum grade of D-

Restriction(s): Enrollment is limited to Graduate or Undergraduate level students; enrollment limited to students with a class of Unranked Grad, Junior or Senior.

KIN 5220 Sports I Cr. 3

This course is designed for students to learn sports across three categories: tag, invasion, and field games. Students will learn multiple sports from each category and will be able to make extensions to many other sports in that category. In addition to instructional strategies, basic concepts, and planning for effective teaching, students will become familiar with the Sport Education Model and Tactical Games Approach. Offered Winter.

Prerequisites: KIN 5200 with a minimum grade of D-

Restriction(s): Enrollment is limited to Graduate or Undergraduate level students; enrollment limited to students with a class of Unranked Grad, Junior or Senior.

KIN 5230 Sports II Cr. 3

This course is designed for students to learn sports across two categories: target and net/wall games. Students will learn multiple sports from each category and will be able to make extensions to many other sports in that category. The specific instructional strategies, basic concepts, and planning for effective teaching will be focused and the sport education model will be further developed. Meanwhile, other instructional models for physical education, such as cooperative learning, teaching game for understanding, and teaching personal and social responsibility, will be introduced. Offered Spring/Summer.

Prerequisites: KIN 5200 with a minimum grade of D-

Restriction(s): Enrollment is limited to Graduate or Undergraduate level students; enrollment limited to students with a class of Unranked Grad, Junior or Senior.

KIN 5240 Fitness Instruction Cr. 3

Introduction to instructing children, youth, adolescents, and young adults in group fitness activities both in a physical activity environment and community setting. Instructional strategies, basic concepts, and planning for teaching group fitness as well as using basic technology to enhance teaching will be taught. Offered Winter.

Prerequisites: KIN 5200 with a minimum grade of D-

Restriction(s): Enrollment is limited to Graduate or Undergraduate level students; enrollment limited to students with a class of Unranked Grad, Junior or Senior.

KIN 5250 Adventure and Outdoor Pursuits Cr. 3

Instructing youth in adventure activities and outdoor pursuits. Basic principles and concepts behind teaching youth how to be physically active in the outdoors; planning appropriate instructional strategies. Content might include lessons focusing on initiatives and trust activities appropriate for school-aged youth as well rock climbing, hiking, kayaking, and orienteering. Offered Spring/Summer.

Prerequisites: KIN 5200 with a minimum grade of D-

Restriction(s): Enrollment is limited to Graduate or Undergraduate level students; enrollment limited to students with a class of Unranked Grad, Junior or Senior.

KIN 5260 Aquatic Leadership Cr. 3

Leadership responsibilities in the area of aquatics. Emphasis on a broad range of aquatic experiences and teaching methodologies including swimming and rescue skills necessary to complete certification as an American Red Cross Water Safety Instructor and Lifeguard. The course will also include program development, including programming for individuals with disabilities, risk management, and staff management. Offered Winter.

Prerequisites: KIN 5200 with a minimum grade of D-

Restriction(s): Enrollment is limited to Graduate or Undergraduate level students; enrollment limited to students with a class of Unranked Grad, Junior or Senior.

KIN 5350 Exercise Science Internship Cr. 2-4

Supervised experience in health and exercise programs with various populations at approved sites. Offered Every Term.

Prerequisite: KIN 6320 with a minimum grade of C and LFA 2330 with a minimum grade of C

Restriction(s): Enrollment limited to students in the College of Education.

Course Material Fees: \$16

Repeatable for 8 Credits

KIN 5360 Senior Research Project Cr. 1-5

Students conduct scientific research in exercise science; review of literature, data collection, assisting with data transformation, help with formal presentation of written or oral materials of findings from the study. Offered Every Term.

Restriction(s): Enrollment limited to students with a class of Junior or Senior.

Repeatable for 5 Credits

KIN 5400 Adapted Physical Activity Cr. 3

Discussion of historical and contemporary issues in adapted physical activity; instruction on appropriate evidence-based intervention strategies for individuals with varying disabling conditions; techniques for adapting the environmental conditions to improve performance and attending behaviors; and designing, implementing, and evaluating individualized programs of physical activity for individuals with emerging disabilities that face the community. Offered Fall.

Prerequisites: KIN 3400 with a minimum grade of D- or KIN 5110 with a minimum grade of D-

Restriction(s): Enrollment limited to students in the College of Education.

KIN 5410 Methods and Materials: Adapted Aquatics Cr. 3

Teaching methods and materials to meet the needs individuals with special needs through adapted aquatics including water orientation, swim instruction, fitness instruction, facilities and equipment considerations, and research on adapted aquatics. Offered Spring/Summer.

Prerequisite: KIN 5400 with a minimum grade of C

KIN 5420 Disability and Sports Cr. 3

This course will address teaching and coaching of developmental, recreational, and competitive sports across school-based and community-based settings including Paralympic, Special Olympic and deaf sport; and wheelchair and ambulatory sports for various age groups. Offered Winter.

Prerequisite: KIN 5400 with a minimum grade of C

KIN 5425 Assessment and Service Delivery in Adapted Physical Education Cr. 3

This course addresses how to appropriately and accurately select, administer and interpret assessment results for adapted physical education purposes; use assessment results to design and implement effective adapted physical education programs for PK-12 populations of students with disabilities; and participate collaboratively in the individualized education program (IEP) process. Offered Spring/Summer.

Prerequisites: KIN 5400 with a minimum grade of D-

KIN 5430 Leadership Training and Practicum in Adapted Physical Education Cr. 3

Prepares adapted physical education specialists for leadership positions in K-12 adapted physical education programs and community-based adapted physical activity programs. Includes directed fieldwork in adapted physical education as required by the State of Michigan. Offered Winter.

Prerequisite: KIN 5400 with a minimum grade of C and KIN 5410 with a minimum grade of C and KIN 5420 with a minimum grade of C

KIN 5520 Sport Psychology Cr. 3

History, personality, psychology of injury; theories of motivation, arousal, and anxiety; competition and cooperation, feedback, reinforcement and intrinsic motivation. Team dynamics, group cohesion, communication and leadership processes, psychological qualities and skills (such as goal setting, imagery, concentration). Unhealthy sport behaviors, burnout, over-training. Psychology of youth sport; character development. Offered Fall, Winter.

Prerequisites: PSY 1010-5999 with a minimum grade of C or AFS 2390 with a minimum grade of C or ENG 2390 with a minimum grade of C or ENG 3010 with a minimum grade of C or ENG 3020 with a minimum grade of C or ENG 3050 with a minimum grade of C

Restriction(s): Enrollment limited to students in the College of Education.

KIN 5523 Physical Activity and Exercise Psychology Cr. 3

Introduction of physical activity and exercise psychology from a multi-theory perspective. Determinants, well-being and interventions in physical activity, physical education and exercise settings will be explored through a broad spectrum. Offered Fall, Winter.

Prerequisites: PSY 1010-5999 with a minimum grade of C or AFS 2390 with a minimum grade of C or ENG 2390 with a minimum grade of C or ENG 3010 with a minimum grade of C or ENG 3020 with a minimum grade of C or ENG 3050 with a minimum grade of C

Restriction(s): Enrollment limited to students in the College of Education.

KIN 5530 Technology and Assessment in Kinesiology Cr. 3

Current methods and activities for assessment in physical education and physical activity programming. Course also includes the use of technology in physical education and physical activity programming. Offered Winter.

Prerequisites: KIN 5200 with a minimum grade of D- and KIN 5210 with a minimum grade of D- and KIN 5220 with a minimum grade of D- and KIN 5240 with a minimum grade of D-

KIN 5550 Health and Physical Education for the Elementary School Teacher Cr. 3

Broad content knowledge of developmentally appropriate physical education and health education for children in grades K-6. Offered Every Term.

KIN 5600 Socio-cultural Issues in Physical Activity Cr. 3

Contemporary and historical perspective on socio-cultural and philosophical issues that influence American youth and instruction in a physical activity setting, including race, gender, sexuality, obesity, and urbanization. Offered Fall.

Restriction(s): Enrollment is limited to Graduate or Undergraduate level students.

KIN 5700 Sport Leadership Cr. 3

Combines theory and practical application to provide an introduction to the various segments of the sports industry, including youth, interscholastic, collegiate, professional, and commercial sports. Additionally, sociocultural, legal, historical and political concepts as applied to sport will be integrated into the curriculum to enable students to develop industry-appropriate competencies. Coursework will also emphasize strategies for career success within the sports industry. Offered Winter.

KIN 5770 Physical Activity Leadership Internship Cr. 7

Individually arranged, supervised, educational and professional experience at an approved on-campus or off-campus based internship site. Opportunities to organize and conduct physical activity leadership responsibilities under close supervision. Through this type of exposure, the student will receive practical, on-the-job experience in one or more types of physical activity leadership. Offered Winter.

Restriction(s): Enrollment is limited to Graduate or Undergraduate level students; enrollment limited to students with a class of Unranked Grad, Junior or Senior.

KIN 5780 Student Teaching and Seminar Cr. 10

This course prepares students for initial teaching certification through K-12 student teaching experience and seminars. The regular seminar will cover a variety of issues and topics related to teaching methods and becoming an effective teacher. Offered Fall, Winter.

Restriction(s): Enrollment limited to students in the College of Education.

KIN 6100 Methods of Group Exercise Instruction Cr. 2

This course will provide students the opportunity to gain fitness leadership knowledge and ability of how to safely instruct a group exercise class. Offered Fall, Winter.

Prerequisites: KIN 6300 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate or Undergraduate level students; enrollment limited to students with a class of Unranked Grad, Junior or Senior.

KIN 6120 Strength and Conditioning Cr. 3

Provides a comprehensive overview of strength and conditioning and is offered to available to both undergraduate and graduate students. Emphasis is placed on the exercise sciences (including anatomy, exercise physiology, and biomechanics) and nutrition, exercise technique, program design, organization and administration, and testing and evaluation. Additionally, this course is designed to prepare students for the nationally accredited Certified Strength and Conditioning Specialist (CSCS) certification exam. Offered Every Term.

Prerequisites: KIN 3580 with a minimum grade of C and KIN 6300 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate or Undergraduate level students.

KIN 6150 ECG Interpretation Cr. 3

This course provides students with an understanding of ECG and how to interpret static and dynamic ECG strips. It gives the opportunity for students to gain a basic knowledge of ECG and how to recognize normal and abnormal ECGs. Offered Winter.

Prerequisites: KIN 6300 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate or Undergraduate level students; enrollment limited to students with a class of Unranked Grad, Junior or Senior.

KIN 6160 Pharmacology for the Physical Activity Professional Cr. 3

Provides students with an understanding of the concepts of pharmacology, how drugs work, and different pharmacologic actions and adverse effects that drugs produce. Offered Winter.

Prerequisites: KIN 3580 with a minimum grade of C and KIN 6300 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate or Undergraduate level students.

KIN 6210 Physical Activity and Cognition Cr. 3

An overview of physical activity as it relates to cognitive functioning across the lifespan. Exploration of measures of physical activity, neuropsychological test batteries assessing various domains of cognitive functioning. Review studies examining the effect of physical activity on cognition and its underlying mechanisms. Offered Winter.

Prerequisites: KIN 5523 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate or Undergraduate level students; enrollment limited to students with a class of Unranked Grad, Junior or Senior.

KIN 6300 Exercise Physiology I Cr. 3

Basic physiological concepts as they relate to exercise and human performance. Practical applications incorporated into the laboratory component. Offered Every Term.

Prerequisites: 1 of MAT 1000-6XXX, STA 1020 and 1 of KIN 1991, BIO 2870

Restriction(s): Enrollment limited to students in the College of Education.

KIN 6310 Exercise Physiology II Cr. 3

Metabolic, neuromuscular, cardiovascular, and respiratory adjustments to acute and chronic exercise in health and disease, including body composition and weight control, nutritional considerations, and the effects of different environments on exercise performance. Offered Every Term.

Prerequisites: KIN 6300 with a minimum grade of C

Restriction(s): Enrollment limited to students in the College of Education.

Equivalent: PSL 6010, PT 6310

KIN 6320 Fitness Assessment and Exercise Prescription Cr. 3

Provides physiological principles of physical fitness, including the assessment of physical fitness and exercise prescription guidelines. Offered Every Term.

Prerequisites: BIO 2870 with a minimum grade of C and KIN 6300 with a minimum grade of C or KIN 6300 with a minimum grade of C and KIN 6310 with a minimum grade of C

KIN 7580 Biomechanical Analysis of Motor Activity Cr. 3

Principles and practice in the analysis of human movement. Selected methods of analysis are used in demonstrations and lab experiences. Students complete a biomechanical analysis project on an appropriate human motor skill. Offered Winter.

Restriction(s): Enrollment is limited to Graduate level students.

KIN 8530 Motor Learning Cr. 3

Examination of research in motor learning and performance. Relation of the nervous system and other physiological mechanisms to motor behavior and other conditions which affect the acquisition of motor skill: perception, motivation, psychology of motor behavior. Offered Fall.

Restriction(s): Enrollment is limited to Graduate level students.

LAS - LATINO/LATINA AND LATIN AMERICAN STUDIES

LAS 1410 Latino/a Studies Seminar Cr. 1

First year seminar on Latino/a cultural studies topics. Offered Every Term.
Repeatable for 6 Credits

LAS 1420 Introduction to Interdisciplinary Latino/a Studies Research Cr. 3

Satisfies General Education Requirement: Diversity Equity Incl Inquiry
Interdisciplinary introduction to the issues, concepts, and debates concerning the study of Latin American and Latino/as in the U.S. Offered Winter.

LAS 1900 History of Colonial Latin America Cr. 3

Satisfies General Education Requirement: Historical Studies, Social Inquiry

The Spanish and Portuguese conquests in the Americas; the multi-racial and class social structures they established as colonies, and the movements for independence, 1492-1822. Offered Yearly.

Restriction(s): Enrollment is limited to Undergraduate level students.

Equivalent: HIS 1900

LAS 1910 Latin America from Independence to the Present Cr. 3

Satisfies General Education Requirement: Diversity Equity Incl Inquiry, Global Learning Inquiry, Historical Studies, Social Inquiry

Latin America from early nineteenth century to the 1980s. Major themes include: 1) colonial pasts and political independence; 2) state formation, and the construction of identities at local and national levels; 3) elite and popular relations, including cases of rebellion, revolution, and state repression; 4) forms of capitalist development and transformations in class relations, ideologies of economic development, and linkages to the United States. Offered Yearly.

Equivalent: HIS 1910

LAS 2100 Chicano/a Literature and Culture Cr. 3

Satisfies General Education Requirement: Cultural Inquiry, Civ and Societies (CLAS only), Diversity Equity Incl Inquiry, Global Learning Inquiry
Examination of Chicano/a literature. Themes and figures in a social and historical context. Offered Every Other Year.

Equivalent: SPA 2400

LAS 2110 Puerto Rican Literature and Culture Cr. 3

Satisfies General Education Requirement: Cultural Inquiry, Civ and Societies (CLAS only), Diversity Equity Incl Inquiry
Examination of Puerto Rican literature. Themes and figures in a social and historical context. Offered Every Other Year.

Equivalent: SPA 2500

LAS 2250 AfroLatino/a History and Culture Cr. 3

Satisfies General Education Requirement: Cultural Inquiry
Interdisciplinary introduction to the history and culture of AfroLatinos/as in the U.S. from the perspective of the African Diaspora in the Americas. Offered Winter.

Equivalent: AFS 2250

LAS 2410 History of Mexico Cr. 3

Satisfies General Education Requirement: Foreign Culture, Global Learning Inquiry

Historical development of Mexico and the Mexican people from the Spanish conquest to the present. Interaction of political, social, economic and cultural influences. Offered Yearly.

Equivalent: HIS 2440

LAS 2420 History of Puerto Rico and Cuba Cr. 3

Satisfies General Education Requirement: Diversity Equity Incl Inquiry, Foreign Culture, Global Learning Inquiry
Historical development of Puerto Rico and Cuba from the pre-Columbian period to the present. Interaction of political, social, economic and cultural influences. Offered Intermittently.

LAS 2430 History of Latino/as in the United States Cr. 3

Historical development of people of Hispanic descent in the United States from the early nineteenth century to the present. Cultural conflict, and interaction of political, social, and economic forces. Offered Yearly.

Equivalent: HIS 2430

LAS 3610 Seminar in Latino/a Urban Problems Cr. 3

Satisfies General Education Requirement: Social Inquiry, Social Sciences
Historical and current issues in economics, politics, and culture involving the multi-racial and multi-ethnic Latino/a population of the United States. Offered Intermittently.

LAS 3710 Learning About Your Community Through Research Cr. 4

Blend of participatory, in-service, and classroom work to enhance undergraduate research skills by linking social science theories and concepts to hands-on community-based learning opportunities. Offered Fall.

Restriction(s): Enrollment is limited to Undergraduate level students.

Equivalent: SOC 3710

LAS 3800 Spanish for Heritage Learners Cr. 3

Review of grammar and composition for Spanish heritage learners. Conducted entirely in Spanish. Offered Intermittently.

Prerequisites: SPA 2025 with a minimum grade of C

Equivalent: SPA 3800

LAS 3990 Directed Study Cr. 1-3

Special topics are addressed by students and faculty. Offered Fall, Winter.

LAS 5231 The Conquest in Latin America Cr. 3

Varying perspectives on European conquests in Latin America. Offered Intermittently.

Equivalent: HIS 5231

LAS 5234 Race in Colonial Latin America Cr. 3

Use of race to organize colonial society in Latin America. Offered Intermittently.

Equivalent: HIS 5234

LAS 5310 Special Topics in Latino/a and Latin American Studies Cr. 3

Selected, specialized and/or topical studies in Latino/a and Latin American studies. Topics to be announced in Schedule of Classes. Offered Fall, Winter.

LAS 5560 Spanish American Cultures and their Traditions Cr. 3

Spanish America before and after the discovery of the New World. Art, music, customs, contemporary institutions, through films, records, newspapers, gallery visit to Detroit Institute of Art, and the text. Offered Every Other Year.

Prerequisites: SPA 4610 with a minimum grade of C or SPA 4620 with a minimum grade of C or SPA 4630 with a minimum grade of C or SPA 4640 with a minimum grade of C

Equivalent: SPA 5560

LAT - LATIN

LAT 1010 Elementary Latin I Cr. 4

Introduction to the grammar, syntax and vocabulary of the language, and introduction to the culture of the ancient Romans. Offered Fall.

Course Material Fees: \$5

LAT 1020 Elementary Latin II Cr. 4

Continuation of LAT 1010, with increasing emphasis on reading ability. Offered Winter.

Prerequisites: LAT 1010 with a minimum grade of D-

Course Material Fees: \$5

LAT 2010 Intermediate Latin Cr. 4

Satisfies General Education Requirement: Foreign Culture, Global Learning Inquiry

Review of Latin grammar, and readings from selected Roman prose authors such as Cicero and Caesar. Offered Fall.

Prerequisites: LAT 1020 with a minimum grade of D-

Course Material Fees: \$5

LAT 2020 Intermediate Latin II Cr. 4

Introduction to genre; poetic language, meters, sociological and historical context; Catullus, Horace, Ovid, Vergil. Offered Winter.

Prerequisites: LAT 2010 with a minimum grade of D-

Course Material Fees: \$5

LAT 3210 Latin Poetry Cr. 4

Intermediate-level course for reading representative samples of poetry by prominent Latin authors. Offered Yearly.

Prerequisites: LAT 2020 with a minimum grade of D-

Repeatable for 12 Credits

LAT 3220 Latin Prose Cr. 4

Intermediate-level course for reading representative samples of prose by Latin authors. Offered Yearly.

Prerequisites: LAT 2020 with a minimum grade of D-

Repeatable for 12 Credits

LAT 5000 Latin for Graduate Students Cr. 1-4

Basic grammar and vocabulary of Latin; leads to reading of continuous passages of poetry and prose in Latin. Offered for graduate credit only. Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students.

Repeatable for 4 Credits

LAT 5300 Readings in Roman History and Culture Cr. 1-3

Readings in Latin primary sources that are relevant to the associated CLA course (which is taught in English). Offered Every Term.

Prerequisites: May be taken concurrently: CLA 5000-6XXX with a minimum grade of D- and LAT 3000-6XXX with a minimum grade of D-

Repeatable for 6 Credits

LAT 5810 Roman Historians Cr. 4

Selected readings from Tacitus, Livy, Caesar or Sallust illustrating the Roman rhetorical and ethical analysis of republican and imperial history. Offered Intermittently.

Prerequisites: LAT 3000-3999 with a minimum grade of D-

LAT 5850 Epic Cr. 4

Readings in Latin of the works of epic poets such as Ennius, Vergil, Lucan, Statius and others. Offered Intermittently.

Prerequisites: LAT 3000-3999 with a minimum grade of D-

LAT 5860 Lyric and Elegy Cr. 4

Readings in Latin of lyric and elegiac poetry by authors such as Catullus, Tibullus, Horace, and Propertius. Offered Intermittently.

Prerequisites: LAT 3000-3999 with a minimum grade of D-

LAT 5990 Directed Study Cr. 1-4

Directed independent research in depth on a topic or author not treated in the regular Latin offerings, culminating in a course paper. Offered Every Term.

Repeatable for 8 Credits

LAT 6100 Latin Prose for Learning and Teaching Cr. 3

Online course for future and current teachers of K-12 Latin. The grammar and syntax of Latin prose of the Republican period, through selected readings from authors such as Cato, Cicero, Caesar, Sallust, and Nepos; focus on narrative prose rather than oratory. Composition exercises to reinforce the study of grammar and stylistics. Course covers ways in which teachers can incorporate prose composition into their classes as exercises in fluency, and as a way to teach grammar in order to prepare their students for standardized tests in Latin. Students will prepare and share lesson plans. Web course. Offered for graduate credit only. Offered Spring/Summer.

Prerequisites: May be taken concurrently: LAT 3210 with a minimum grade of D- and May be taken concurrently: LAT 3220 with a minimum grade of D- or LAT 3150 with a minimum grade of D-

Restriction(s): Enrollment is limited to Graduate level students.

LAT 6500 Roman Epistolography Cr. 4

Social, literary, and historical significance of the letters of such writers as Cicero, Pliny and Seneca. Offered Intermittently.

Prerequisites: LAT 3000-3999 with a minimum grade of D-

LAT 6820 Roman Rhetoric Cr. 4

Study of Roman rhetorical theory and practice. Offered Intermittently.

Prerequisites: LAT 3000-3999 with a minimum grade of D-

LAT 6840 Roman Drama Cr. 4

Study of Roman comedy and tragedy through study of comedies of Plautus or Terence, or tragedies of Seneca. Studies in the early history of Roman drama may include readings in the literary remains of Accius, Pacuvius, and Naevius. Offered Intermittently.

Prerequisites: LAT 3000-3999 with a minimum grade of D-

LAT 6890 Roman Satire Cr. 4

Readings in the works of satirists such as of Horace, Persius and Juvenal. Offered Intermittently.

Prerequisites: LAT 2020 with a minimum grade of D-

LAT 7810 Studies in Latin Poetry Cr. 4

Study of a major poet or genre of poetry. Topics to be announced in Schedule of Classes . Offered Yearly.

Restriction(s): Enrollment is limited to Graduate level students.

Repeatable for 12 Credits

LAT 7820 Studies in Latin Prose Cr. 4

Study of a major prose author or prose genre. Topics to be announced in Schedule of Classes . Offered Yearly.

Restriction(s): Enrollment is limited to Graduate level students.

Repeatable for 12 Credits

LAT 7999 Master's Essay Direction Cr. 1-4

Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students with a class of Candidate Masters.

LAT 8999 Master's Thesis Research and Direction Cr. 1-8

Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students with a class of Candidate Masters.

Repeatable for 8 Credits

LDT - LEARNING DESIGN AND TECHNOLOGY

LDT 1000 City of Design: Exploring Creativity in Detroit Cr. 3

Students will develop creativity by examining their individual growth, by employing creative design strategies to solve problems and by investigating “City of Design” Detroit locations to analyze innovative design solutions. Offered Every Term.

LDT 2015 Introduction to Learning Design and Technology Cr. 3

Provides a historical overview of the field and delineates the foundational knowledge, skills, and attitudes needed by professionals. Students will explore various aspects of the field, including potential opportunities and career paths. Students will be able to distinguish between educational technologies and understand how design and technology teams impact practice. Offered Every Term.

Restriction(s): Enrollment is limited to Undergraduate level students; enrollment limited to students in the College of Education.

LDT 3115 Instructional Design Cr. 3

Explores broad conceptions of design including all activities involved in generating intentional change via artifacts and experiences. Offered Every Term.

Restriction(s): Enrollment is limited to Undergraduate level students; enrollment limited to students in the College of Education; enrollment is limited to students with a major, minor, or concentration in Instructional Technology or Learning Design and Technology.

LDT 3125 Evaluation Techniques and Tools Cr. 3

Evaluation techniques and tools for learning design and technology; formative and summative evaluation approaches; selecting appropriate evaluation techniques; designing effective evaluation tools to generate feedback and facilitate improvement. Offered Fall, Winter.

Prerequisites: May be taken concurrently: IT 3115 with a minimum grade of D- or LDT 3115 with a minimum grade of D-

LDT 3135 Practical Project Management Cr. 3

Basic techniques and skills needed to handle projects: goal setting, scheduling, resource management, monitoring and problem solving. people and process fundamentals, software applications.

Prerequisites: May be taken concurrently: IT 3115 with a minimum grade of D- or LDT 3115 with a minimum grade of D-

LDT 3145 Interactive Course Design Cr. 3

Strategies and techniques for organizing, presenting, assessing and evaluation web-based learning. Includes individual oral and written reports, development of an instructional web site. Offered Yearly.

Prerequisites: May be taken concurrently: IT 3115 with a minimum grade of D- or LDT 3115 with a minimum grade of D-

Restriction(s): Enrollment is limited to Undergraduate level students; enrollment limited to students in the College of Education.

LDT 4135 Engaging Presentation and Facilitation Strategies Cr. 3

Knowledge and delivery skills for conducting professional presentations in multiple settings; facilitation of small and large group sessions; focus on communication process, audience analysis, research, preparation, selection of content and support materials. Offered Yearly.

Restriction(s): Enrollment is limited to Undergraduate level students; enrollment limited to students in the College of Education.

LDT 4145 Digital Games for Learning Cr. 3

Design and development of games that are engaging and lead to learning. Students develop a learning game in a studio environment. Offered Yearly.

Prerequisites: May be taken concurrently: IT 3115 with a minimum grade of D- or LDT 3115 with a minimum grade of D-

Restriction(s): Enrollment is limited to Undergraduate level students; enrollment limited to students in the College of Education.

LDT 4155 Simulations for Learning Cr. 3

Design and development of models and interfaces for simulations, including devices, discrete and continuous models, and branching scenarios. Offered Yearly.

Prerequisites: May be taken concurrently: IT 3115 with a minimum grade of D-

Restriction(s): Enrollment is limited to Undergraduate level students; enrollment limited to students in the College of Education.

LDT 4165 Digital Video for Learning Cr. 3

Principles of multimedia learning applied to video production for the web or digital media. Offered Yearly.

Prerequisites: May be taken concurrently: IT 3115 with a minimum grade of D- or LDT 3115 with a minimum grade of D-

Restriction(s): Enrollment is limited to Undergraduate level students; enrollment limited to students in the College of Education.

LDT 4195 Emerging Technologies Cr. 3

Emerging digital technologies and their potential impact on learning in different settings as well as evaluation and implementation of new technologies. Offered Yearly.

LDT 4235 Directed Study in Learning Design and Technology Cr. 1-4

Directed study on special topics, supervised on an individual basis and which fall outside the scope of formal courses. Offered Every Term.

Restriction(s): Enrollment is limited to Undergraduate level students; enrollment limited to students with a class of Junior or Senior; enrollment limited to students in the College of Education.

Repeatable for 4 Credits

LDT 4310 Next Generation Learning Management Systems Cr. 3

Design, create, and implement instructionally sound learning environments by using advanced learning management systems to promote learning in face-to-face, blended, and online classes. Offered Fall.

Prerequisite: LDT 3115 with a minimum grade of D-

LDT 4410 Multi-dimensional Learning Environments Cr. 3

Design principles and use of multi-dimensional learning environments in various contexts like education, business, and communication by using mobile apps, devices, and tools. Offered Winter.

Prerequisite: LDT 3115 with a minimum grade of D-

LDT 4905 Advanced Seminar in Learning Design and Technology Cr. 3

In-depth study for advanced undergraduate students in learning design and technology, covering various topics including instructional design, instructional development protocols, and the applications of learning design and technology in different settings. Offered Yearly.

Restriction(s): Enrollment is limited to Undergraduate level students; enrollment limited to students with a class of Senior; enrollment limited to students in the College of Education.

LDT 4920 Internship in Learning Design and Technology Cr. 4

Supervised training under professional mentors in organizations. Students will gain experience in demonstration of design, evaluation, project management, presentation skills, etc. Offered Yearly.

Restriction(s): Enrollment is limited to Undergraduate level students; enrollment limited to students with a class of Senior; enrollment limited to students in the College of Education.

LDT 4995 Capstone Seminar in Learning Design and Technology Cr. 3

Offered Winter.

Restriction(s): Enrollment is limited to Undergraduate level students; enrollment limited to students with a class of Senior; enrollment limited to students in the College of Education.

LDT 5140 Producing and Evaluating Technology-Based Instructional Materials Cr. 4

Design and development of instructional materials and media with an emphasis on technology applications integration. Creation and evaluation of instructional media and materials, based on national and state technology standards. Offered Fall, Winter.

Restriction(s): Enrollment is limited to Graduate level students.

Equivalent: INF 6360

LDT 5275 Learning in Organizations Cr. 4

Provides an overview of key issues of human resource management, learning, and talent development in organizations. It will also explore considerations for technical training, soft skills training, compliance, as well as the effects of global environments in organizational learning. Offered Every Other Year.

Prerequisites: IT 3115 with a minimum grade of D- or IT 6110 with a minimum grade of D- or LDT 3115 with a minimum grade of D- or LDT 6110 with a minimum grade of D- or LDT 7111 with a minimum grade of D- and IT 3125 with a minimum grade of D- or IT 7150 with a minimum grade of D- or LDT 3125 with a minimum grade of D- or LDT 7150 with a minimum grade of D- and IT 3135 with a minimum grade of D- or LDT 3135

LDT 5310 Next Generation Learning Management Systems Cr. 3

Design, create, and implement instructionally sound learning environments by using advanced learning management systems to promote learning in face-to-face, blended, and online classes. Offered Yearly.

Prerequisite: LDT 3115 with a minimum grade of D-

LDT 5410 Multidimensional Learning Environments Cr. 3

Design principles and use of multi-dimensional learning environments in various contexts like education, business, and communication by using mobile apps, devices, and tools. Offered Yearly.

Prerequisite: LDT 3115 with a minimum grade of D-

LDT 6135 Technology Applications in School Administration Cr. 2-3

Use of technology tools by school administrators; factors related to leadership and research in technology integration. Also offered online. Offered Fall.

Repeatable for 3 Credits

LDT 6140 Designing Web Tools for the Classroom Cr. 4

Design, development and evaluation of learning experiences using the World Wide Web. Student creates and evaluates learning activities using the Web; creation of personal learning portal. Basics of HTML and common authoring tools. Also offered online. Offered Fall.

Restriction(s): Enrollment is limited to Graduate level students.

LDT 6230 Internet in the Classroom Cr. 4

Students use a variety of tools from the read/write web and explore their potential for use in K-12 education. Students also examine the use of online learning in the K-12 classroom. Offered Winter.

Prerequisites: IT 6140 with a minimum grade of D- or LDT 6140 with a minimum grade of D-

Restriction(s): Enrollment is limited to Graduate level students.

LDT 7100 Foundations of Instructional Technology Cr. 3

Introduction to the foundations of instructional technology: intellectual history, careers, job roles, organizations, scholarly literature, requisite technology skills; introduction to course content and initial planning for students' programs. Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students.

LDT 7105 Micro Analysis Methods Cr. 4

Following a high-level needs assessment, students will apply a variety of analytical methods to define specific solution requirements used during the design phase. Focus will include: job, task, process, content, learner and contextual analysis. Offered Fall, Winter.

Restriction(s): Enrollment is limited to Graduate level students.

LDT 7111 Design Thinking and Knowledge Cr. 4

Exploring broad conceptions of design including all activities involved in generating intentional change via artifacts and experiences; design thinking and knowledge. Offered Fall, Winter.

Restriction(s): Enrollment is limited to Graduate level students.

Equivalent: INF 6350

LDT 7112 Advanced Learning Design Cr. 4

Exploration and application of techniques, tools and competencies characteristic of expert designers. Topics may include: instructional strategies, program design, advanced analysis techniques, empathic design, rapid prototyping, reducing design cycle time, designing instruction for diverse learner populations and developing designer professional identity. Offered Every Term.

Prerequisite: LDT 7111 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

LDT 7115 Understanding the Adult Learner Cr. 4

Analysis of how adults learn: learner readiness, development, motivation. Developmental and learning theories, memory, creativity, experiential learning, and affective learning. Content based primarily on psychology of teaching and learning of adults; secondarily on application to instruction and training. Offered Every Other Year.

Restriction(s): Enrollment is limited to Graduate level students.

LDT 7130 Facilitation of On-Line Learning Cr. 4

Design, development, implementation, facilitation and evaluation of various learning activities for diverse learners in online contexts, using appropriate learning technologies. Offered Winter.

Restriction(s): Enrollment is limited to Graduate level students.

LDT 7140 Interactive Course Design Cr. 4

Design, development and implementation of web-based courseware. Characteristics, advantages and limitations of the web as an instructional delivery system. Appropriate instructional strategies for the web. Use of contemporary development tools to create engaging, interactive, instructionally-sound web materials; design and development teams create and test a web-based instructional module. Also offered online. Offered Fall, Winter.

Prerequisites: IT 6110 with a minimum grade of C or LDT 6110 with a minimum grade of C or LDT 7111 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

LDT 7150 Evaluation of Learning and Performance Cr. 4

Evaluation of learning and performance interventions. Link to evaluation stakeholders, decision-making, and performance needs; identification of measurable indicators and alignment of methodology. Deriving actionable performance improvement recommendations. Offered Fall, Winter.

Prerequisites: IT 6110 with a minimum grade of C or LDT 6110 with a minimum grade of C or LDT 7111 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

LDT 7180 Message Design for Learning Cr. 4

Analysis and application of principles of perception, message design, and foundation research for publication of print and electronic materials. Includes use of color, shape, typography, and page and screen design principles. Offered Every Other Year.

Restriction(s): Enrollment is limited to Graduate level students.

LDT 7210 Foundations of Distance Education Cr. 4

Critical review of the theoretical foundations, principles, current status and future directions of distance education. Offered online. Offered Fall.

Restriction(s): Enrollment is limited to Graduate level students.

LDT 7220 Multimedia for Instruction Cr. 4

Instructional design and development applied to multimedia instruction, such as games for learning. Instructional strategies for higher-order learning, including problem solving. Alternative design and development methodologies. Essential multimedia production tools. Also offered online. Offered Every Other Year.

Prerequisites: IT 6110 with a minimum grade of C or LDT 6110 with a minimum grade of C or LDT 7111 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

LDT 7230 Advanced Multimedia for Instruction Cr. 4

Advanced topics in multimedia and web-based learning, including topics such as design, planning, production and editing of digital audio and video for use in multimedia websites and CDs/DVDs used for learning. Offered Fall.

Prerequisites: IT 7140 with a minimum grade of C or IT 7220 with a minimum grade of C or LDT 7140 with a minimum grade of C or LDT 7220 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

Repeatable for 998.99 Credits

LDT 7310 Learning Management Systems Cr. 4

Design and implementation of systems to support e-learning and traditional delivery. Implementation of traditional courses in a generic LMS; interface of course materials to standards-based management systems, reusable learning objects, standards, and collaborative learning. Also offered online. Offered Fall.

Restriction(s): Enrollment is limited to Graduate level students.

LDT 7320 Human Performance Technology Cr. 4

Fundamentals of human performance technology, performances, standards, tools and techniques for the performance improvement consultant; analyzing jobs and tasks; improving individual performance; performance technology and instructional development strategies and tactics for performance improvement, performance support systems, organizational behavior; strategic planning and thinking; general processes; professional practices; human performances interventions of an instructional and non-instructional nature. Also offered online. Offered Every Other Year.

Restriction(s): Enrollment is limited to Graduate level students.

Repeatable for 998.99 Credits

LDT 7850 Needs Assessment and Analysis Cr. 4

Discussion and application of needs assessment and analysis concepts, approaches and procedures across various performance levels (organizational, human, and instructional). Discusses evidence and processes required for performance intervention selection. Offered Fall.

Restriction(s): Enrollment is limited to Graduate level students.

LDT 7920 Strategic Planning for Training and Organization Improvement Cr. 4

Current organizational issues and new competencies in the training profession, respecting: growth of organizational intellectual capital, resolution of complex performance problems, transformation of organizational culture and engineering of change. Offered Every Other Year.

Prerequisites: IT 7320 with a minimum grade of C or LDT 7320 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

LDT 7940 Capstone Course in Learning Design and Technology Cr. 4

Capstone course for the Learning Design and Technology program. Offered Winter.

Restriction(s): Enrollment is limited to Graduate level students.

LDT 7980 Capstone Seminar in Learning Technologies Cr. 4

Capstone seminar for advanced students in Learning Technologies track. Offered Winter.

Restriction(s): Enrollment is limited to Graduate level students.

LDT 8100 Background, Issues and Trends in Instructional Technology Cr. 4

History of instructional technology practice and intellectual foundations; implication for current issues. Factors likely to affect the future of the field, including contributions of key leaders. Electronic communication techniques used to explore issues with others in the field. Offered Fall.

Restriction(s): Enrollment is limited to Graduate level students.

Repeatable for 12 Credits

LDT 8110 Advanced Instructional Design Theory and Research Cr. 4

Analysis of theoretical foundations of instructional design and their application in design practice. Current design research and theory, future directions in design theory and practice. Offered Winter.

Prerequisites: IT 6110 with a minimum grade of C or LDT 6110 with a minimum grade of C or LDT 7111 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

LDT 8120 Practicum in Instructional Technology Cr. 1-9

Students design, develop, use, and evaluate instructional systems and subsystems in an educational, business, industrial, or human services setting. Offered Fall, Winter.

Prerequisites: IT 6110 with a minimum grade of C or LDT 6110 with a minimum grade of C or LDT 7111 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

Repeatable for 998.99 Credits

LDT 8130 Individual Projects in Instructional Technology Cr. 1-6

Students develop instructional technology material packages and devices through individual design and production. Offered Fall, Winter.

Restriction(s): Enrollment is limited to Graduate level students.

Repeatable for 6 Credits

LDT 8135 Technology Applications in Central Administration Cr. 3

Use of technology tools and data by central administrators; factors related to central office leadership and research in technology integration. Offered Winter.

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students in the College of Education.

LDT 8180 Readings in Instructional Technology Cr. 1-6

Individually-paced course: investigation of recent research studies and theoretical essays in the field. Offered Fall, Winter.

Restriction(s): Enrollment is limited to Graduate level students.

Repeatable for 6 Credits

LDT 8320 Performance Consulting and Analysis Cr. 4

Practical application of principles of performance consulting to solve problems in large and small organizations. Topics include: role of performance consultant, identifying business needs, assessing performance, contracting techniques, managing the performance improvement process. Also offered online. Offered Winter.

Restriction(s): Enrollment is limited to Graduate level students.

LDT 8500 Strategies for Teaching in Higher Education Cr. 3

Teaching in higher or adult education; topics may include: course design, writing tests, presentation skills, leading discussions, use of technology including course management systems. Offered Winter.

Restriction(s): Enrollment is limited to Graduate level students.

Repeatable for 9 Credits

LDT 9105 Conducting Research in Learning Design and Technology Cr. 4

Design, execution, and reporting of research in learning design and technology. Students should complete most of the course work for the learning design and technology program before registering for this course. Offered Fall.

Prerequisites: EER 7000-9999 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

LDT 9110 Advanced Research Seminar and Practicum Cr. 4

Course designed for advanced doctoral students in Learning Design and Technology; however it is also appropriate for students in other disciplines. Students should have completed almost all of their coursework in their major, and preferably also their work in EER. Offered Winter.

Restriction(s): Enrollment is limited to Graduate level students.

LED - LANGUAGE EDUCATION

LED 5300 Teaching Chinese as a Second Language Cr. 1-3

Introduction to basic teaching grammar and sound rules and general teaching methodology. Offered Winter.

Prerequisites: CHI 3100 with a minimum grade of D-

Equivalent: CHI 5300

LED 5850 Assessment in the Foreign Language Classroom Cr. 3

Theoretical basis of second language teaching models; historical overview of methodologies; current trends in teaching of reading, writing, listening, speaking, and culture. Implications of methodology on materials, classroom techniques, and assessment. Offered Every Other Year.

Equivalent: LGL 5850

LED 6500 Teaching World Languages in Elementary and Middle Schools: Methods III Cr. 3

Approaches and techniques; review of theory and practice relevant to young learners. Students teach mini-lessons and prepare materials based on national standards and age-appropriate methodologies. Offered Yearly.

Restriction(s): Enrollment limited to students in the College of Education.

LED 6510 Second Language Acquisition and the Teaching of Grammar Cr. 3

Seminar and intensive review of major models of applied sociolinguistics and psycholinguistics; second language acquisition research and teaching of grammar in K-12 education. Offered Yearly.

Restriction(s): Enrollment limited to students in the College of Education.

LED 6520 Teaching English as a Second Language/Foreign Language: Methods I Cr. 3

Methods and techniques; fundamental theory and practice; English as an international/intranational language. Students micro-teach lessons and prepare teaching materials which emphasize the listening and speaking language skills. Offered Yearly.

Restriction(s): Enrollment limited to students in the College of Education.

LED 6530 Teaching English as a Second Language/Foreign Language: Methods II Cr. 2-3

Methods and techniques; English as an international/intranational language. Students micro-teach lessons and prepare teaching materials which emphasize the reading and writing language skills. Offered Yearly.

Restriction(s): Enrollment limited to students in the College of Education.

LED 6555 Integration of Language and Content in Language Teaching Cr. 1-3

Examination and evaluation of instructional strategies used to teach content and develop a second language in specific content/language area instruction. Offered Yearly.

Restriction(s): Enrollment limited to students in the College of Education.

Repeatable for 3 Credits

LED 6565 Assessment in Language Teaching Cr. 1-3

Instruments, techniques, and strategies in the assessment, placement, and evaluation of second language instruction, including language learners in K-12 and post-secondary education. Offered Yearly.

Restriction(s): Enrollment limited to students in the College of Education.

Repeatable for 3 Credits

LED 6580 Culture as the Basis for Language Teaching Cr. 2-4

Culture examined in a multidisciplinary theoretical framework, to provide students with objective relativistic and holistic attitude about human diversity, enabling them to relate to pupils in urban areas. Offered Every Other Year.

Repeatable for 4 Credits

LEX - LAW

LEX 5000 Law in Social Context Cr. 3

Covers several substantive areas, with a particular focus on property in both its traditional common-law form (like owning a house) and in its newer statutory contexts (like intellectual property – for example, owning a patent). What does it mean to own something? What makes someone a legal owner of something? What kinds of things can be owned, what things cannot, and why? Offered Yearly.

Restriction(s): Enrollment is limited to Undergraduate level students.

LEX 5010 Law and Harm Cr. 3

Presents the basic concepts of law and the fundamentals of legal analysis, giving in-depth attention to the fields of tort and criminal law and using them to examine how law conceives of, regulates, and adjudicates questions of harm. When can you sue a person or a group for harming you? On the street or in a business, what makes something a crime, and why do we prosecute and punish crimes the way we do? Offered Yearly.

Restriction(s): Enrollment is limited to Undergraduate level students.

LEX 5020 Legal Procedure Cr. 3

Examines the lifecycle of a case in court. Discusses how a lawsuit begins with the filing of a complaint and how it ends in a judicial order, and it covers everything else that happens along the way—with special attention paid to things like negotiation and settlement. Introduces legal concepts like “due process of law,” and explores the procedural similarities and differences between civil cases, criminal cases, and administrative proceedings. Offered Yearly.

Restriction(s): Enrollment is limited to Undergraduate level students.

LEX 6100 Civil Procedure A Cr. 3

Structure of the judicial system in the United States and the process of civil litigation from the commencement of an action through appeal. Subjects considered include jurisdiction, the relationship between state and federal courts, pleading, discovery and other pre-trial devices, trial and appellate review. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 6101 Civil Procedure B Cr. 3

Structure of the judicial system in the United States and the process of civil litigation from the commencement of an action through appeal. Continuation of LEX 6100. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 6200 Contracts A Cr. 3

General principles of the law of contracts; definitions of contract; illegality, mistake, frustration, impossibility; statute of frauds, interpretation, the parol evidence rule; performance and breach; rescission; repudiation and discharge. Remedies, including damages, specific performance, injunction and restitution. All topics considered from viewpoints of both common law and statute. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 6201 Contracts B Cr. 3

General principles of the law of contracts; definitions of contract; illegality, mistake, frustration, the parol evidence rule; performance and breach; rescission; repudiation and discharge. Remedies, including damages, specific performance, injunction and restitution. All topics considered from viewpoints of both common law and statute. Continuation of LEX 6200. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 6300 Criminal Law Cr. 3

General doctrines of criminal liability as they relate to the moral and social problems of crime; definitions of principal crimes and defenses to criminal prosecution, both common law and statutory; limitations on the use of criminal sanctions. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 6400 Legal Research and Writing Cr. 2

Analysis of legal problems and the use of legal materials, through discussion, written assignments, and personal conferences. Preparation of a trial brief and oral argument on a selected civil or criminal case before a court composed of faculty or members of the local bench and Bar. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 6500 Property Cr. 4

Basic course in real property, which will include selected materials from some of the following areas: historical introduction to real property; personal property transfers by gift, finding, adverse possession; modern law of possessory estates, including non-freehold estates, and landlord and tenant relationships; concurrent estates; restraints upon the use of land; conveyancing and effects of the Recording Acts. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 6600 Torts Cr. 4

Legal principles underlying wrongs not based on contract, arising from intentional or negligent conduct and including strict liability; the nature of particular wrongs, including injuries to the person, to reputation, to real or personal property, and to interference with business or family relations. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 6700 Constitutional Law I Cr. 3

Problems arising under the Constitution of the United States, with particular attention to the nature of judicial review in constitutional cases and to the role of the judiciary in umpiring the federal system. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 6800 Professional Responsibility and the Legal Profession Cr. 2

Conflicts of interest; the attorney's standard of care, fiduciary duty, the organization of bar associations, the attorney's duty to the court and the community; the attorney's responsibilities in trial, and in unilateral actions and negotiations. The duty of disclosure of adverse data, the development of group legal services, and of legal services to the poor, and the responsibility of the bar in these areas. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 6900 The Regulatory State Cr. 3

Introduction to statutes and agency decisions and the central role they play in modern government. Nature of statutes and agency regulations, how they are generated, and how they are interpreted and applied. Justifications for modern regulation, the modern administrative state, the incentives that influence the behavior of the various actors, and the legal rules that help structure the relationships among legislatures, agencies and courts. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 7001 Accounting for Lawyers Cr. 2

Basic concepts of bookkeeping and generally-accepted accounting principles; background to help read and interpret financial statements; auditor's role and accounting issues that arise in business planning, in litigation, and in managing financial investments. May not be taken for credit by those who completed more than two undergraduate accounting courses or a graduate course in financial accounting. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 7006 Administrative Law Cr. 3-4

Functions and behavior of administrative agencies; constitutional and statutory constraints on agency operation. Government role in formulating and enforcing policy, administering of public benefit programs, and awarding of licenses. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 7009 Advanced Bankruptcy Cr. 3

Students will become familiar with the chapter 11 business reorganization process. By reviewing mock bankruptcy schedules, and cash collateral, relief from stay, and chapter 11 plan and disclosure statement proceedings, the students will develop the necessary substantive knowledge and hone their negotiation and trial advocacy skills. A problem-oriented approach will be used, with students and instructors participating in resolving situations commonly encountered in a business bankruptcy. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 7014 Taxation of Corporations: Acquisitions and Restructuring Cr. 4

Satisfies the professional skills requirement. Explores the tax rules for corporate stock or asset acquisitions and restructurings (including reorgs, spins and loss carryovers), and S corporations or consolidated returns through the lens of a simulated firm tax group working on a series of client projects (using an actor as client). Each student will work on at least two team projects during the semester, preparing written and oral presentations for, and briefing the client on, issues related to the team project topic. Team projects include: prepping a client for and negotiating an acquisition, drafting a private letter ruling request, preparing an internal memorandum outlining the pros and cons of restructuring choices, researching and writing a tax opinion letter, and outlining advantages of various entity choices for future transactions. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 7015 Advanced Torts Cr. 2

This course will focus on torts not involving physical injury, such as misrepresentation, defamation, invasion of privacy, interference with business relations, and misuse of legal procedure. These causes of action, which provide remedies for economic, reputational, or emotional harm, are not ordinarily covered in the four-hour Torts course required in the first year. They have become burgeoning areas of potential liability due to the emergence of electronic communications. An effort will be made to integrate substantive doctrine and practice implications with legal, economic, political and social theory. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 7016 Alternative Dispute Resolution Cr. 2

Forms of non-trial dispute resolution: arbitration, mediation, and negotiation—their various permutations and substantive applications. Factors affecting choice between dispute resolution processes, differences in design and structure, relative costs, quality of participant performance, accountability for results, privacy of proceedings, role of legal norms and lawyers, due process considerations, availability of judicial review; tactics and strategies employed in arbitration, mediation and negotiation. Offered Every Other Year.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 7021 American Indian Law Cr. 3

This course explores the foundational principles and doctrines governing the legal and political relationship between the United States and Indian tribes. Major topics in the course include the history of federal Indian law and policy, congressional plenary power, principles of interpretation of laws and treaties regarding Indians, the nature of tribal sovereignty, and jurisdiction in Indian country. In examining these topics, we will discuss laws and policies concerning tribal justice and legal systems, gambling and taxation in Indian country, and the Indian Child Welfare Act. Offered Intermittently.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 7023 Animal Law Cr. 3

Animal law encompasses human-animal interactions and evaluation of competing interests within the context of traditional areas of law (e.g., veterinary malpractice, expansion of anti-cruelty statutes to include farm animals, damage for death of / injury to companion animals, disputes over custody of companion animals in divorce or separation, landlord-tenant housing disputes, the inclusion of animals in wills and trusts, and constitutional issues such as standing). It also encompasses the current legal status of animals as living property and explores whether this status is antiquated and needs re-evaluation to reflect societal beliefs and values. Course will consider these traditional areas of law, groundbreaking laws enacted by other countries, as well as theories for the expansion of consideration and rights.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 7026 Antitrust Cr. 2-4

Government control of trade practices and industrial market structures which inhibit the competitive process; monopoly, oligopoly, mergers, cartel practices, distribution arrangements, resale price control, franchising patent licensing, foreign commerce and price discrimination under the Sherman, Clayton, Federal Trade Commission, and Robinson-Patman Acts. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 7045 Banking Law Cr. 2

Legal environment of the banking industry. Topics include: history and scope of banking in the United States, statutory requirements for chartering and operating banks, regulatory oversight at the Federal and State level, commercial and consumer lending, deposit insurance, lender liability, bank failures, and recent developments in banking regulation and legislation. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 7051 Bankruptcy and Creditors' Rights Cr. 3

Problems arising when debtors are in financial difficulty, including the principal state remedies of unsecured creditors such as attachment, garnishment, and enforcement of judgments; Chapter 7 bankruptcy liquidations; Chapter 13 wage-earner plans; and Chapter 11 reorganizations. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 7058 Bioethics and the Law Cr. 3

Role of law in shaping, analyzing and resolving conflicts that arise in the interplay between medicine, biotechnology, ethics, social history, and cultural evolution. Topics include reproductive rights and genetic technologies, maternal fetal decision making, medical decision making, definitions of death, death and dying decisions, regulation of research on humans, interdisciplinary decision making, and access to health care. Offered Intermittently.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 7060 Business Planning Cr. 4

Problems involving common business transactions, including choice of entity to conduct business; organization, financing, and operation of a corporation; restructuring of business enterprises. Corporate, tax, securities law, and financial matters; role of business lawyer in counseling and planning business transactions. Relationship between the corporation and its shareholders. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 7061 Business Planning: A Transactional Approach Cr. 4-8

Organizational problems for the closely-held and the public corporation; operational problems such as stock distributions, issuance of new securities, constructive dividend problems, and stock redemptions; corporate acquisitions, other reorganizations, contested take-overs, and liquidation and termination problems. Credit only on completion of two terms. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 7070 Child Abuse and Neglect Cr. 2

Introduces students to state and federal laws governing the child protection and child welfare systems. Topics addressed will include: defining abuse and neglect; mandatory reporting; child protection investigations and limitations thereon; emergency removal and less burdensome alternatives; adjudicatory hearings and proof of abuse and neglect; dispositional hearings and powers; permanency planning and long-term placements; termination of parental rights; right to counsel; and the duties of lawyers for children in abuse and neglect cases. Offered Intermittently.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 7075 Child, Family, and State Cr. 3

Aspects of children in legal system. Legal relationship between children, their parents, and government (federal, state, local, and tribal); rights of these parties and relationships between them. Education, medical care, children's rights, concept of legal parenthood, parental rights (and termination thereof), adoption, juvenile justice process. Concentration on constitutional and policy analysis as opposed to examination of rules and regulations in the different areas. Students graded on class participation, several short written assignments, and take-home final examination. Offered Intermittently.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 7121 Conflict of Laws Cr. 3

Principles, rules and methods thought to underlie the resolution of multi-state problems. Jurisdiction and enforcement of judgments of other states. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 7126 Constitutional Law II Cr. 4

Individual rights under the Constitution of the United States. Freedom of speech, religious freedom and equal protection. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

Equivalent: LEX 7829

LEX 7127 Constitutional Litigation Cr. 3

This course will track the jurisdictional and constitutional basis and the history of claims by individuals against government officials for constitutional violations. It will explore the limits and constraints on the actions of officials and the policies of governments. How must the plaintiffs plead and prove such cases and how can defendants defend their actions and policies. Since 1961, victims of official misconduct – ordinary private persons – have had the ability and opportunity to enforce the United States Constitution in federal courts. This has for decades provided American lawyers, courts and litigants with important power, the power to directly shape American democracy in unique ways. The study of this system of constitutional enforcement is essential to an understanding of American constitutional jurisprudence. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 7128 Consumer Law Cr. 2-3

An introduction to law specially directed at the rights and obligations of consumers. The consumer marketplace is regulated by a series of discrete statutes and regulations, such as the Federal Trade Commission Act (and accompanying regulations), Truth-in-Lending Act, Fair Credit Reporting Act, Equal Credit Opportunity Act, Fair Debt Collection Practices Act, and lemon laws. This course provides an overview of these special rules and their interpretation and enforcement. As such the course provides an introduction to the role of administrative agencies and the interpretation of statutes and regulations. Offered Intermittently.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 7136 Copyright Law Cr. 3

Law of copyright and related doctrines protecting literary, musical and artistic works. Nature of rights and kinds of works protected, doctrine of fair use, pre-emption problems, and problems posed by new technologies. Emphasis on 1976 Copyright Act and its relation to issues such as home videotaping, photocopying and non-profit performance of protected works. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 7141 Corporate Finance Cr. 3

Economic and legal problems arising in connection with financing decisions of publicly-held corporations, including valuation of the enterprise and its securities, determination of securities structure and dividend policy, capital structure (including problems relating to debt), and acquisition strategies. Federal securities regulations and selected topics. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 7156 Corporations Cr. 2-4

Relationships between owners and directors of a corporate enterprise; different types of stock ownership and the corresponding rights in profits and control; consolidation and merger; distinctive features of the closed corporation. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 7160 Criminal Pretrial Advocacy Cr. 3

The court rules, statutes and Constitutional principles implicated in pre-trial criminal advocacy. Topics include arraignment, discovery, pre-preliminary examination, preliminary examination, motion practice, and pleas. Structural rules and principles of the process; the practical application of those rules and principles. Students participate in mock arguments, client meetings, and witness interviews, and draft the documents that would be filed in a criminal case. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 7161 Criminal Procedure: Investigation Cr. 3

Constitutional requirements for arrests, searches, seizures, electronic surveillance, and interrogations. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 7166 Criminal Procedure: Adjudication Cr. 3

Operation of the criminal justice system from the defendant's first appearance in the court through the trial, and to post-conviction remedies, including a study of bail, the preliminary hearing, the grand jury, voir dire, discovery, double jeopardy, joinder, and habeas corpus. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 7172 Developing the Commercial Real Estate Project Cr. 3

Real estate development: laws and requirements affecting the development of commercial properties, including the law of contracts; real estate interests, such as mortgages, easements and encumbrances, zoning laws, environmental laws, building codes and requirements and other regulatory laws. Topics include: purchase and sale contracts, title and survey matters, due diligence investigations, closing processes, construction, financing, and leasing. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 7190 Domestic Violence and Law Cr. 2

Grounded in the historical and social context of domestic violence, as well as the dynamics of abusive relationships; this course will examine the response of the legal system to complex issues raised by domestic violence. The course will focus on criminal and family law issues and their intersections. Also explored will be current issues in the law as well as cultural contexts of interpersonal and gender-based violence. Offered Every Other Year.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 7201 Education Law Cr. 3

Survey of education law with emphasis on public education. Historical development of education law in the U.S. as well as topics of current interest: tenure, academic freedom, school discipline, school financing, home-based schooling, state regulation of private schools, church-state relationships, and desegregation in public education. Offered Intermittently.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 7205 Employee Benefits Law Cr. 3

Survey course provides students with a strong grounding in the major laws affecting employment-based benefits plans, including the Employee Retirement Income Security Act (ERISA) and the Internal Revenue Code. Retirement plans (including traditional defined benefit plans and common types of defined contribution plans such as 401 (k) plans). and welfare benefit plans (including health and life insurances and disability plans). Offered Yearly.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 7216 Employment Discrimination Cr. 2-3

Federal constitutional and statutory guarantees of freedom from invidious discrimination in employment. Thirteenth and Fourteenth Amendments, Title VII of the Civil Rights Act of 1964, the Reconstruction Civil Rights Acts, 42 U.S.C. 1881, et seq., the Equal Pay Act of 1963, and the Age Discrimination in Employment Act of 1967. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 7221 Employment Law Cr. 2-3

Legal rights and responsibilities of employees (excluding rights provided by anti-discrimination laws and the NLRA); statutory and common-law limitations on the employer's right to discharge; protection of employee privacy and reputation; laws governing wages and hours, occupational safety, unemployment compensation, workers' compensation, and employee benefits. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 7226 Entertainment Law Cr. 2-3

Legal and business issues in the entertainment industries, including those related to sound recordings, music publishing, literary publishing, films, television, the Internet and other new media. Readings and discussions: representing talent, drafting and negotiating contracts, remedies for breaches, and rights of publicity. How the entertainment industries and their economics work. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 7228 Energy Law Cr. 3

Introduction to energy law and regulation in the United States. Principles of rate regulation of public utilities and the division of jurisdiction between federal and state governments. Emerging trends such as promotion of energy efficiency and renewable energy. (This course does not cover traditional oil and gas law.) Offered Yearly.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 7231 Environmental Law Cr. 2-3

Environmental law in common-law, statutes, constitutional issues, administrative and international law. Coherent legal analysis of environmental problems and active legal remedies, rather than specialized instruction in pollution controls and the like. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 7236 Equitable Remedies Cr. 2-3

Survey of the equitable remedies available for the vindication of substantive rights, which includes injunctive and restitutionary relief as well as the general treatment of equitable relief in contract, tort and criminal actions. Offered Intermittently.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 7241 Estate, Gift and Inheritance Taxation Cr. 2

Federal and state transfer taxes and income taxation of fiduciaries and beneficiaries. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 7266 Evidence Cr. 2-4

General principles relating to the proof of questions of fact in civil and criminal trials, including competency, relevancy, and materiality of evidence; judicial notice, presumptions; burden of proof; competency of witnesses, rules relating to examination and cross-examination of witnesses; weight and sufficiency of evidence. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 7301 Family Law Cr. 2-3

Entry into marriage; legal treatment of couples in marital and non-marital relationships; divorce, including custody, alimony and property distribution, and the role of the attorney; procreation; illegitimacy; rights and responsibilities of children and parents with respect to each other and to the state; child abuse and neglect; and adoption. When offered for two credits, considerably less time is devoted to children's issues. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 7306 Federal Courts and the Federal System Cr. 2-3

Interrelationship of state and federal law in our legal system from the point of view of the federal courts and the Congress. Emphasis on the politics, history, and philosophy of federalism, rather than on procedures. Offered Every Other Year.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 7311 Taxation of Partnerships Cr. 2-3

This course covers the federal income taxation of partnerships and partners, with significant focus on the governing statutory provisions and regulations and the mechanics of partnership tax accounting. Topics will typically include the transfer of property to a partnership; determination of partners' distributive shares of items of income, gain, loss and deduction; partnership recourse and non-recourse debt; partnership cash or property distributions; and transfers of interests in partnerships. The course will also cover more general policy issues, including such topics as the concepts motivating the aggregate or entity approach, concepts of tax avoidance and the ethical issues arising in connection with the use of partnerships in tax shelter transactions, and the advantages and disadvantages of partnerships compared to alternative forms of business taxation such as C corporations and pass-through S corporations. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 7331 Franchise Law Cr. 2

Provides a survey of franchise and product distribution law, taking into account federal and state legislation and case law. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 7353 Health Care Organizations and Finance Cr. 3

Legal responses to problems of health care costs, access and financing from both public and private perspectives. Registration of insurance and managed care, developments in federal ERISA preemption, changing business structures, and antitrust enforcement. Medicare and Medicaid financing, rules prohibiting self-referrals, and standards policing fraud and abuse. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 7354 Health Care Quality, Licensing and Liability Cr. 3

Legal responses to problems of health care quality and medical errors. State licensing of health care professionals and institutions, self-regulation, and tort liability for physicians, hospitals and managed care organizations. Basic introduction to health care institutions, the particulars of malpractice litigation, and proposals for tort reform. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 7371 Immigration and Nationality Law Cr. 2-3

Immigration, its history and development; entry into the United States, and alien status and adjustment to status; deportation and relief from deportation; exclusion and relief from exclusion; nationality and citizenship. Offered Every Other Year.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 7381 Insurance Law Cr. 2

General principles, including indemnity, subrogation, reinsurance, insurable interest and classification of risks such as personal business and legal liability. Michigan insurance law and "no fault" legislation examined; contractual rights and liabilities of the insurer, insured, and third party beneficiaries. Offered Intermittently.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 7384 International Commercial Arbitration Cr. 3

Course follows the life cycle of an international commercial arbitration, including: drafting and enforcing arbitration agreements; appointment and challenge of arbitrators; conduct of the proceedings; drafting of awards; review and enforcement of awards by courts at the seat of arbitration and beyond. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 7404 International Business Transactions Cr. 3

This course introduces a wide range of problems and issues that private business entities may encounter in doing business across national borders. Topics include international sales, import and export regulations, cross-border IP protection and technology transfer, foreign direct investment, business ethics, and dispute settlement. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 7406 International Finance: Transactions, Regulation, and Policy Cr. 3

Legal problems associated with flow of capital across national borders. Topics include international financial transactions, regulation of international capital markets, regulation of international banking and financial services, emerging market debt crisis, role of International Monetary Fund, reform of international financial system. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 7407 International Intellectual Property Law Cr. 3

Addresses the legal issues surrounding the protection of intellectual property rights in a globalized commercial environment. The course centers on the study of the principal multilateral treaties that protect intellectual property rights: the Berne Convention on copyrights, the Paris Convention on trademarks and patents, and the Agreement on Trade-Related Aspects of Intellectual Property Rights ("TRIPS"). The course also looks at the intellectual property component of the North American Free Trade Agreement, and a variety of legislative materials from the European Union. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 7408 International Law Cr. 3

Basic legal concepts applied by international tribunals and courts of the United States to the relations between independent nations. The nature and sources of international law; the use of treaties; international organizations; and practices respecting recognition, territory, nationality and jurisdiction. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 7409 International Litigation Cr. 3

Issues arising in civil cases in American courts in which international parties, evidence, and issues are present. Subjects include personal jurisdiction, service of process abroad, conducting discovery abroad, suing foreign sovereigns and governmental officials, forum non conveniens and international arbitration. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 7410 International Organizations and Public Health Cr. 3

Course has two objectives: first, to give students a working understanding of the structure, function, and mission of the international organizations that increasingly impact modern life: the WTO, EHO, World Bank, IMF, and UN; second, to explore the effects of globalization on public health. Topics include: WHO control of infectious diseases such as SARS, impact of the WTO on pharmaceutical pricing of AIDS drugs and genetically-modified foods, international conventions for tobacco control, and influence of World Bank and IMF privatization requirements on health sector reform in developing countries. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate, Law or Medical level students; enrollment limited to students in the Law School or School of Medicine.

LEX 7411 International Protection of Human Rights Cr. 2-3

The main international and regional legal instruments and procedures for the protection of human rights. Offered Intermittently.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 7413 International Prosecution of State Actors Cr. 3

Legal and political aspects of new processes by which one-time state officials (such as former Yugoslav President Slobodan Milosevic, former Chilean dictator Augusto Pinochet, and former East German leader Egon Krenz) and their followers have been subjected to prosecution in international and foreign legal systems. Basic elements of transnational criminal law; controversial questions of principle and policy such as United States opposition to the new International Criminal Court; concerns about retroactive punishment; respect for amnesties that have contributed to ending civil conflicts. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 7414 International Legal Research Cr. 1

Fundamentals of research in public international law. In connection with Jessup International Law Moot Court Competition, students review structure of international legal institutions, nature of the materials they produce, and the unique way these materials are indexed and cataloged. Focus on how these materials can best be used in legal advocacy; emphasis on effective writing and oral argument. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

Repeatable for 4 Credits

LEX 7418 International Trade Law Cr. 3

Regulation of international trade relations. Focus on Law of the World Trade Organization (WTO) and its interaction with domestic regulation of international commerce. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 7419 Interviewing and Counseling Cr. 2-3

This course introduces students to interviewing and counseling theory, and helps students develop skills needed to effectively and efficiently interview and counsel clients in both litigation and transactional matters. Topics addressed and skills developed include active listening, phrasing and sequencing questions, eliciting timelines, probing for details, clarifying objectives, identifying options and discussing their consequences, and helping clients make final decisions. The course makes extensive use of role-playing exercises. Each student conducts a full-length simulated interview at mid-semester, and a full-length simulated counseling session towards the end of the semester. When offered for three credits, the course will include a forty-hour fieldwork component in which each student will interview and counsel actual clients who are seeking free legal help from one of the Law School's clinics or from a faculty-approved public interest externship field placement. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 7422 Islamic Law Cr. 3

This course will survey the universe of Islamic law from the vantage point of a beginner to the field. The readings and class discussions will broadly cover the following: (1) classical Islamic jurisprudential theory, (2) substantive aspects of family and criminal law, (3) the intersection of Islamic law and the American legal system, and (4) the place of American-Muslims in the framework of American constitutionalism. Because law - of any variety - does not operate in a vacuum, discussions will proceed with reflection on prevailing sociopolitical realities such as global terrorism, jihadist movements, Islamophobia, misogyny, and racism. The student will also be asked to draw from the offerings of philosophy, critical race theory, postcolonial studies, security studies, and feminism. The aim is for course participants to develop a more textured understanding of Islamic law and to be better positioned to understand the debates surrounding its relevance and practice. Offered Every Other Year.

Restriction(s): Enrollment is limited to Graduate or Law level students.

LEX 7424 Introduction to the Legal System of the United States Cr. 2-3

General introduction to the institutions and processes involved in lawmaking and legal interpretation in the United States, with a focus on lawmaking at the federal level. Topics include: federal legislative process, precedent and the common-law method, federal administrative rule-making, separation of powers, and judicial review. Sources of law produced by these processes and the development of research strategies with respect to these sources. Course is also designed to provide foreign LL.M students (all of whom write a Master's Essay to complete the LL.M. program) with an overview of the principal forms of legal scholarship in the American academy. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 7426 Jurisprudence Cr. 2-3

Analysis of important legal notions such as law, sanction, rule, and sovereignty; relations between law and morals as seen particularly in the development of natural law and legal positivism and in the development of the notion of legal responsibility. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 7435 Juvenile Delinquency Cr. 2

Introduction to the juvenile justice system. Topics include: juvenile court jurisdiction over delinquents and status offenders; pretrial criminal procedure in the juvenile justice context; screening and diversion; pretrial detention; waiver of juvenile court jurisdiction; procedural rights at trial; dispositional decisions. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 7501 Labor Law Cr. 2-4

Legislative, administrative and judicial regulation of labor relations. The scope of national labor legislation; the protection of the rights of self-organization and the designation of bargaining agents; the negotiation and administration of the collective agreement; the legality of strikes, picketing and boycotts; employer interference with concerted activities; and the relations between unions and their members. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 7506 Labor Law in the Public Sector Cr. 2

State (and some federal) regulation of labor relations in the public sector. Establishment of representative status, negotiation and administration of the collective agreement, strikes and impasse resolutions. Offered Every Other Year.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 7511 Land Use Cr. 2-3

Allocation of land use in the urban environment by both private agreement and governmental order. Problems involved in the development and effectuation of community planning; goals by means of conservation, clearance, and renewal; zoning, variances and exceptions; housing code enforcement, subdivision control, eminent domain; relocation. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 7514 Law, Authority, and Resistance Cr. 3

This course addresses, in both theoretical and practical terms, the relationship between legal and political obligation: When, if ever, do individuals have a moral obligation to obey the law because it is the law? What count as valid justifications of civil disobedience, conscientious refusal, or insurrection? When can governmental authority justifiably depart from "the rule of law"? When can individuals be held criminally accountable for egregious acts committed under unjust prior regimes? The course combines classics of the history of political thought with contemporary theoretical writings and contemporary discussions of topical questions (e.g., jury nullification, emergency measures, transitional justice). Particular attention will be paid to the special obligations of lawyers who are asked to validate immoral practices (e.g., "enhanced interrogation methods" in the Global War on Terrorism). Offered Every Other Year.

Restriction(s): Enrollment is limited to Graduate or Law level students.

LEX 7517 Law, Policy and International Development Cr. 3

Explores various law-based strategies for achieving economic and political development in poor countries. One influential school of thought claims that capitalism will not flourish in developing nations until there is a long-term, national commitment to reform property laws. Other scholars and development specialists insist that instituting the rule of law is the linchpin to attaining international development. Yet others insist that all law reform efforts are pointless unless access-to-justice issues are first addressed. This course is designed to investigate these claims and allow each student to come to her or his own conclusions about how law is most effectively used as a strategy for promoting political and economic development. Offered Intermittently.

Restriction(s): Enrollment is limited to Graduate or Law level students.

LEX 7518 Law of Armed Conflict Cr. 3

History and current state of the law governing recourse to force (jus ad bellum) and the law governing the application of force (jus in bello). Contemporary jus ad bellum topics include: prohibition of the use of force in international relations, self-defense, unilateral intervention in internal conflicts and humanitarian crises, as well as collective action relating to security and humanitarian crises. Contemporary jus in bello topics include: legal obligations relating to targeting, selection of weapons, status and treatment of prisoners, and protection of civilians during hostilities and occupation. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 7520 Advanced Legal Writing: Legal Drafting Cr. 3

Legal Drafting provides students with an opportunity to develop transactional drafting skills. It focuses on writing techniques involved in drafting transactional documents most often assigned to summer interns and first and second year associates. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 7536 Appellate Advocacy Cr. 3

Research and analysis of complex legal problems involving legislative history and administrative regulations. Class discussion on advanced research, development of strategy, and organization and writing as an advocate. Students write an appellate brief. May not be taken on pass/no credit basis. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 7541 Legislation Cr. 3

The legislative process and its use as an instrument of change; legislative drafting revision, interpretation and implementation. The appropriations process; role of and control of lobbying; operation of the legislative process and its effect on policy formulation; conduct of Congressional investigations, and effects of separation of powers doctrines. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 7581 Local Government Law Cr. 2

Law as an instrument for governing urban areas. Distribution of decision-making power between private and public persons, between state and local governments and among various local governments. Local finance, decentralization, annexation and municipal incorporation. Exploration of possible reform by means of metropolitan government or federal assistance. The lawyer's role in formulating governmental policy in major urban complexes. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 7590 Maastricht Exchange Program Cr. 1-4

Students take courses offered in the Maastricht Exchange Program. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate or Law level students.
Repeatable for 4 Credits

LEX 7595 Law Exchange Program Cr. 1-6

Intended for students participating in approved study abroad programs of study. Offered Every Term.

LEX 7603 Mergers and Acquisitions Cr. 2-3

Mechanics of an acquisition, including: (1) state corporate codes relevant to acquisitions, dissenting shareholder remedies, listing requirements, and federal security law affecting the mechanics (proxy, tender offers, public offerings); (2) successor liability, transfers of assets; (3) acquisition documents (confidentiality agreements, letters of intent, basic agreements, closing); (4) legal duties of board of directors and dominant shareholders (decision to sell or acquire, conflicts of interest, attempts to block takeovers, shareholder value); (5) disclosure requirements of federal and state securities law; (6) accounting and tax issues (definition of tax-free reorganization, accounting for mergers and acquisitions). Offered Yearly.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 7604 Mock Trial Workshop Cr. 2

Introduces students to basic evidence concepts (e.g. relevance, competency, impeachment, hearsay, authentication) and helps student develop basic trial advocacy skills (e.g. how to develop persuasive case theories and themes, how to deliver opening statements and closing arguments, how to examine and cross-examine witnesses, how to lay a proper evidentiary foundation for testimony, how to introduce and use demonstrative evidence, how to refresh a witness's recollection, how to impeach a witness by using the witness's prior statements, how to make and respond to objections). The course is graded on an Honors-Pass-Low Pass-No Credit basis. Students who have taken Trial Advocacy (LEX 7836) are not eligible to take this course, and vice versa. Offered Every Other Year.

Restriction(s): Enrollment is limited to Graduate or Law level students.

Equivalent: LEX 7836

LEX 7605 Multistate Taxation in the Digital Age Cr. 3

Sale and use taxes and corporate and personal income taxes imposed by state and other sub-national governments, including Indian tribes. Constitutional limits on cross-border taxation under the Due Process Clause and the Commerce Clause. Methods for apportioning income among jurisdictions, from theoretical and practical perspectives. Special income tax and sales tax issues arising from electronic commerce. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 7616 Negotiation Cr. 2,3

The 2 credit course is a comprehensive examination of various legal principles that affect negotiations, such as rights assessments, custom and practice, rule of contract construction, concepts of condonation, proper and improper conditions, as well as the effective use of evidence in the negotiation process. The course also explores strategic methods and techniques in which attorneys are frequently involved that affect the outcome of negotiations. Students will participate in mock negotiations. The 3 credit course will cover the material described above and will additionally address (1) the reintroduction of several topics (e.g., contract drafting, collaborative lawyering, use of mediation in negotiation), (2) the expansion of other topics (e.g., multicultural negotiation, the law of settlement), (3) enhanced processing of simulations, and (4) one or more contract drafting exercises. Offered Every Term.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 7631 No-Fault Insurance Law Cr. 2

Comprehensive review of Michigan's No-Fault Automobile Insurance Law, which governs all motor vehicle accidents in the State. Topics include: questions of coverage, medical and work loss benefits, coordination of benefits, exclusions, priorities, subrogation, and claims procedures. Negligence claims under the No-Fault Law also reviewed. Offered Every Other Year.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 7651 Patent Enforcement Cr. 3

Unique aspects of patent litigation. Policy issues; practice considerations in enforcing patents. Issues in approaching a patent infringement suit (who can file; when and where to file). Offered Yearly.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 7656 Patent Law Cr. 3

Substantive patent and related trade secret law. Emphasis on nature of patent right; scope of coverage of patent system; issues of validity, infringements, inequitable conduct, patent-antitrust. Special issues relating to software, living organisms, and chemistry. Technical background not required. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 7657 Patent Prosecution Cr. 2-3

Art of writing patent applications; aspects of practicing before the Patent and Trademark Office (PTO). Rules and techniques for investigating what is legally considered the background of the invention (prior art). Introduction to basic claim drafting concepts, techniques for writing a written description (or specification) of an invention. Effective response to PTO actions as defined by the Manual of Patent Examining Procedure (MPEP) and by the relevant case law. Inter partes post-grant proceedings and derivation proceedings available under the new America Invents Act. Ethics and licensing will be briefly covered. Course provides a good foundation for students who wish to take and pass the patent bar exam to become registered to practice before the PTO. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 7659 Political Theory of Public Law Cr. 3

Legal restraints on exercise of public power as conceived in works of early modern theorists (e.g., Machiavelli, Locke, Montesquieu, and Madison), and as applied in constitutional arrangements that have emerged in a range of historical settings. Topics include: role of law in totalitarian political systems; emergency rule; comparative approaches to judicial review. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

Equivalent: PS 7580

LEX 7660 Practicum in Dispute Resolution Cr. 3

Training in facilitative mediation with opportunity to practice skills in a variety of settings. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate or Law level students.

Course Material Fees: \$225

Equivalent: DR 7310

LEX 7666 Pretrial Advocacy Cr. 3

Adversary strategy and practice skills in the pretrial stages of litigation. Preparation of pleadings, interrogatories, requests for admission and document production requests. Students negotiate settlement of disputes, draft and argue motions, and take and defend depositions. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 7669 Privacy Law Cr. 2-3

Covers the law of information privacy. Addresses the law and policy applying to the collection, use and disclosure of personal information. Relevant law includes state laws founded in tort and property, federal laws addressing specific privacy issues and constitutional limitations on government. Topics may include use of personal information by the media, government surveillance aimed at combating terrorism, the privacy of health care information, the collection and use of personal information by businesses, privacy in schools and at the workplace and international privacy issues. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 7676 Public Finance Law Cr. 2

Legal principles involved in public finance transactions: municipal borrowing and debt; state law considerations: sources of authority for borrowing and repayment; effect of ultra vires borrowing, of procedural defects, municipal debt limitations, and other factors relating to power to incur municipal debt; traditional financing techniques; federal tax and securities law considerations; default and municipal bankruptcy; municipal bond market. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 7680 Public Health Law Cr. 3

Legal foundations of American public health system; struggle between individual liberties and governmental interest in providing for collective health and well-being of citizens. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 7686 Race and the Law Cr. 3

Impact of law on race relations and vice versa. Topics include: history and legal history, civil rights and equal protection, criminal law, affirmative action, employment, hate speech, education, interracial marriage and adoption, housing discrimination, emergence of Critical Race Theory in contemporary jurisprudence. Contemporary issues and solutions illuminated by historical problems and developments. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 7689 Race, the Law and Social Change in Southeast Michigan Cr. 2-3

Detroit is the most segregated metropolitan area in the country. Course examines role and limits of law in addressing issues of race, discrimination and equality in southeastern Michigan. From a legal and anthropological perspective, students study the efforts attorneys have made over the past century to create a region more consistent with American values of inclusiveness. Individual and class action lawsuits and other forms of policy advocacy, all addressing legal problems in southeast Michigan, examining litigation tactics and the role of expert testimony. History and social problems of the region examined from the perspective of the courtroom. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 7701 Real Estate Financing Cr. 2-3

Methods of financing the acquisition and improvement of residential and commercial real estate through the use of private sources of funds. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 7725 Religious Liberty in the United States Cr. 3

Relationship between church and state in the United States. First Amendment Free Exercise and Establishment Clauses; related state and federal statutes; matters of history, legal doctrine, and public policy. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 7751 Advanced Sales and Leases under the UCC Cr. 2-3

Advanced study in sales areas beyond first-year contracts course. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 7756 Secured Transactions Cr. 3

Basic study of Article 9 of the Uniform Commercial Code with particular attention to the law governing the creation and perfection of security interests in personal property and the relative priorities of interested parties; also attention to some of the following: goods-oriented remedies in Article 2, financing leases in Article 2a, bulk sales, effects of the Bankruptcy Code on secured transactions, and documents of title Article 7. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 7761 Securities Regulation Cr. 2-3

Analysis of current problems in federal and state regulation of transactions in securities. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 7766 Sports and the Law Cr. 2-3

Survey of legal issues presented by sports in America. Application of basic principles of antitrust and labor law, constitutional law, administrative law, contract law and tort law to sports. Regulation of professional sports labor markets, regulation of agent representation, sports franchises, leagues and the powers of commissioner's offices, and the regulation of intercollegiate sports. Offered Intermittently.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 7771 State and Local Taxation Cr. 2,3

Introduces the constitutional and statutory framework of state and local taxation, with a concentration on the current topical issues involved in the taxation of multinational taxpayers and taxation of remote sellers. Corporate and income, sales and use, gross receipts and other excise taxes will be covered, as well as local income and property taxes. Coverage of investment incentives, legislative matters and policy will also be included. Offered Intermittently.

Prerequisite: LEX 7816

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 7800 State Constitutionalism Cr. 3

This course will address some of the distinguishing features of state constitutions not shared with the parallel federal document. Among these features are elected judiciaries, part-time legislatures of plenary power, non-unitary executive branches, frequently employed amendment and revision procedures, and state powers over political subdivisions. Significant attention will be devoted to state judiciaries as the interpreters of state constitutions, including state courts' inherent powers, advisory powers, and relationships with federal and sister-state courts. State constitutions also protect civil liberties differently from the U.S. Constitution, both in kind and degree; these differences will be reviewed through readings in constitutional litigation. The course is not a survey of fifty different constitutions. Instead, it is designed to illuminate the common areas of inquiry in a theoretical field remarkably distinct from the study of the federal Constitution. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 7806 Tax-Exempt Organizations Cr. 2

Examines tax problems arising from activities of non-profit associations of a type usually subject to taxation. Offered Every Other Year.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 7816 Taxation Cr. 1-4

Interrelation between income tax policy and basic governmental and social institutions. Introduction to law of federal income taxation; the taxation of individuals. Basic application of these taxes; problems involved in transactions and situations which confront the lawyer in general practice; analysis and use of materials which permit their solution. Underlying problems of policy which have led to the tax law of today and which may be expected to require change in the tax law of tomorrow. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 7821 Taxation of Corporations Cr. 4

A detailed exploration of the federal income tax problems of corporations and their investors; an analysis of the statutory rules governing transactions between corporations and their shareholders, including tax-free incorporations, property and stock distributions, constructive dividend problems, stock redemptions; corporate reorganizations with a focus on corporate recapitalizations, dispositions of the assets of a corporation or of investor's interests in a corporation; liquidation problems; and the impact of judicial doctrines on corporate tax planning. Offered Every Other Year.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 7826 Teaching Law in High School Cr. 3

Students teach 20-25 sessions to a class of high school students, using a widely recognized high school text, Street Law. Students attend a weekly seminar which deals with teaching methods. Students will participate in and present model lessons in the seminar, prepare lesson plans and have field supervision of their teaching in the high school. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 7827 Topics in Advanced Legal Research Cr. 2

Covers complex research topics essential to successful legal practice and scholarship and builds upon the basic research skills and techniques learned in the required Legal Research and Writing course (LEX 6400). Its problem-solving approach gives students practical research experience that will enhance their ability to use legal, archival and social science information persuasively and cost-effectively. The scope is primarily limited to researching United States federal and state law. Offered Spring/Summer.

Prerequisite: LEX 6400

LEX 7828 Law of Electronic Commerce Cr. 3

New legal and policy issues that arise when businesses and consumers use the Internet to conduct their commercial transactions. Broad range of subject matters, such as history and technology of the Internet, regulatory paradigms, trademarks, copyright, jurisdiction over online disputes, spam and other online intrusions, clickwrap and browsewrap contracting, liability of online intermediaries, privacy, taxation of Internet commerce, and consumer protection. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 7829 Law of the First Amendment: Freedom of Speech Cr. 2

In-depth coverage of the First Amendment guarantee of freedom of speech, press, association and petition. Emphasis on the "law of the First Amendment" as it has developed through the decisions of the Supreme Court; how the "law of the First Amendment" operates in the context of actual litigation. First Amendment issues likely to arise in the United States today and tomorrow. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

Equivalent: LEX 7126

LEX 7831 Trademarks and Unfair Competition Cr. 2-3

Federal trademark statute, 15 U.S.C. section 1051 et. seq., state statutory and common law unfair competition, and the federal law of unfair competition and false advertising under 15 U.S.C. section 1125 (a). Offered Intermittently.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 7836 Trial Advocacy Cr. 3

Basic trial techniques taught through student performances of role-play exercises followed by critique. Mastering major trial skills in isolation: direct and cross examination, introduction of exhibits, impeachment, expert witnesses, opening and closing statements. Application of skills in simulated full criminal or civil jury trial. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

Equivalent: LEX 7604

LEX 7841 Trusts and Decedents' Estates Cr. 4

Intestate succession, wills and trusts, requisite elements of wills and express trusts, and procedural requirements for their creation; administration of decedents' estates and trusts; special rules relating to charitable and spendthrift trusts; trust forms as equitable remedial devices under resulting and constructive trust rules. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 7888 United States Foreign Relations Law Cr. 4

Constitutional and statutory doctrines that regulate the conduct of U.S. foreign relations. Topics include: distribution of foreign affairs powers between the three branches of government, status of international law in U.S. courts, scope of the treaty power, validity of executive agreements, preemption of state foreign affairs activities, and the political question and other doctrines regulating judicial review in foreign affairs cases; political influences on and policy effects of legal doctrines in this field. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

Equivalent: PS 6870

LEX 7931 Water Law Cr. 2-3

Categories of water bodies and public and private rights therein under the riparian and the prior appropriation systems. Consumptive and non-consumptive uses, management, and protection of the resource. Intergovernmental relations with respect to water resource allocation and management. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 7941 White Collar Crime Cr. 3

Substantive and investigative issues related to federal prosecution of business crimes. Balance between government powers to investigate white collar crime and the rights of corporate and individual investigatory targets in connection with criminal prosecutions of federal economic crimes. Problems related to parallel civil enforcement actions involving the same underlying conduct. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 7951 Workers' Compensation Law I Cr. 2

Overview of Michigan statute; discussion of "arising out of" and "in the course of employment," including the going to and from work doctrine. Analysis of the occupational disease provisions of the statute as compared to single event personal injury provisions. Study of specific loss. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 7990 Directed Study Cr. 1-2

A directed study may involve writing a paper, participating in a regularly-scheduled course for reduced credit, or other work of an academic nature. Subject matter and procedure are to be arranged prior to registration. Directed studies may not be elected on a pass-no credit basis. Offered Every Term.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 7995 Law Practicum Research Cr. 1

Students enrolled in the Law Practicum Research participate in an employment experience directly related to their academic studies and concurrently consult with a supervising member of the full-time Law School faculty. An enrolled student must submit written work to the supervising faculty member that relates the employment experience to the student's academic studies and that includes consideration of the roles and responsibilities of practicing attorneys and strategic and ethical issues in the applicable field of law. Offered Every Term.

LEX 7999 Special Topics Cr. 2-4

Areas of current interest in the law. Offered Every Term.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 8001 Antitrust and Trade Regulation: Current Issues Seminar Cr. 3

Addresses current topics in antitrust and trade regulation, providing a mix of substantive knowledge and professional skills instruction. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 8002 Access to Justice Seminar Cr. 3

History, policies, practices and laws that demonstrate how our legal system addresses access to justice for people with economic needs or other restrictions that prevent them from using the system effectively. Seminar examines issues in both the criminal and civil areas. How lawyers are uniquely suited to improve access to justice. Career options to enhance access to justice, such as: following a public interest career, performing pro bono legal service for the poor, and exercising leadership in government and elsewhere to bring changes that enhance access to justice for all. Lectures, readings, research, site visits, and guest speakers. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 8003 Reimagining Development in Detroit: Institutions, Law and Society Cr. 3

Seminar course. Examination of contemporary problems of community development from a perspective of institutional economics; how tools and theories of institutional economics are applied to problems relevant to the City of Detroit. Students write research papers applying these tools to issues such as race and regionalism, role of faith-based organizations in community development, abandoned land and community gardens, structure of local governance, charter schools and the fate of public schools, opportunity-based housing, and state of health-care safety net providers. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 8010 Ancient Greek and Roman Law Cr. 3

Legal systems of ancient Greece and Rome. The law of Athens during its classical period in fifth and fourth centuries B.C.E.; development of Roman law during Republican period and the Empire, as transmitted through the compilations of Justinian in the sixth century C.E. Students write a paper on a subject related to the course material (this paper will satisfy the Law School writing requirement). Offered Yearly.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 8015 Asian Pacific American History and the Law : Perspectives on APA Civil Rights and Civil Wrongs Cr. 3

This seminar explores the Asian Pacific American civil rights movement with an overview of how federal and state laws have affected the Asian Pacific American (APA) experience and presence in the United States, covering a variety of civil rights cases and civil wrongs against APAs. The seminar will cover the APA historical timeline, exclusion laws, alien land laws, World War II internment of Japanese Americans, affirmative action as it applies to APAs, civil rights and racial hate crime violence, APAs in the marriage equality movement, bilingual issues in education and in the workplace, post-9/11 issues, immigration law reform, the Hawaiian sovereignty movement, and the effort to change birthright citizenship and immigration laws, among other topics. Offered Fall.

Restriction(s): Enrollment is limited to Graduate or Law level students.

LEX 8029 Citizenship Seminar Cr. 3

Legal understanding of citizenship. How has the concept of citizenship evolved over time? How do we (or should we) decide who is and is not a citizen in the U.S. and in other nations? If one is a citizen, what rights flow from that status? Completion of this seminar satisfies the Law School writing requirement. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate or Law level students.

LEX 8031 Commercial Law Seminar Cr. 3

Advanced study of an area of commercial law; assigned readings. Final grade based on paper and seminar discussion leadership, on topic selected by student from instructor's list. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 8037 Consumerism&Democrcy Cr. 3

Offered Yearly.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 8039 Contract Drafting Seminar Cr. 3

Knowledge and skills necessary for sound drafting of agreements. Substantive issues of contract law and important drafting issues. Students draft several contracts for review and critique; final grade based on drafting and editing as well as participation in seminar meetings. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 8044 Advanced Topics in Criminal Law and Procedure Cr. 3

Focuses on the law governing, practice of, and debate about plea bargaining. Among the questions to be considered: Does plea bargaining serve society well? Is it on firm constitutional footing? What are the constitutional prerequisites for a valid guilty plea? Does plea bargaining work differently in state court and in federal court? In white collar cases and street crime cases? In high-level cases and low-level cases? What legal or extra-legal factors determine the outcome of a plea bargain? And finally, how does pervasive plea bargaining affect the role of the prosecutor, the defense lawyer, and the trial judge? This seminar can be used to complete the upper-level writing requirement. Offered Intermittently.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 8048 Current Topics in International Law Cr. 3

Focus on new and controversial issues; topics change with each offering. Readings, class discussions, and paper. How international institutions function, justification for the norms they seek to enforce, and coherence of those norms with respect to theories of international society. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 8049 Civil Rights Trip Seminar Cr. 2

introduction to the Civil Rights Movement of the 1950s and 1960s, as well as how lawyers at preeminent civil rights organizations continue the work today. Enrolled students travel to Atlanta, Selma, Montgomery, and Birmingham over spring break; meet with prominent civil rights attorneys; visit the legal, spiritual, and political landmarks of the Civil Rights Movement; meet survivors and activists from the movement, who provide them with first-hand accounts of the Selma to Montgomery March, the maneuverings of segregationist and progressive political figures in Montgomery, and daily life during the Jim Crow and civil rights eras. Offered Every Other Year.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 8051 Detroit Equity Action Lab: A Collaborative Study of Structural Racism Seminar Cr. 3

This Seminar introduces students to notions of structural racism as it impacts the city of Detroit. Students will work collaboratively with members of the Detroit Equity Action Lab (DEAL) addressing racial equity in a wide range of sectors, such as civil rights, transportation, community development, health, education and housing. Students will develop awareness of the role and limits of law in addressing structural racism. In addition to examining the work of individual organizations, students will consider broader issues impacting racial equity and will explore interventions that might change public policy and public awareness as it relates to structural racism. Offered Every Other Year.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 8067 Effective Oral Communication for Lawyers Cr. 3

Exercise-based seminar to help students become more familiar with, and more skillful at, oral communication in the various settings familiar to a lawyer. Topics include: physiology of speech and sources of speech pathology; aspects of non-verbal communication; use of humor; stage fright; making communication interesting. Offered Every Other Year.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 8068 Energy Law: Current Topics Cr. 3

In-depth exploration of a particular topic regarding regulation of energy production or consumption. Topics may include: regulation of fuel sources and emissions in the U.S. transportation sector, incentives and regulations in financing clean energy investments, and the impact of regulation on adoption of electric vehicles. Students are responsible for a research paper and presentation to the class. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 8075 Ethics of the Lawyering Experience Seminar Cr. 3

Psychological and ethical dimensions of law and legal practice, explored through engagement with works of fiction and selected legal scholarship. Student writes weekly reaction paper. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 8081 Evidence Law: Advanced Topics Cr. 3

Seminar course; students write papers and give presentations on current topics of evidence law. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 8101 Family Violence: Seminar Cr. 3

Analysis of the utilization of the legal system to address issues of abuse within the family. Topics include: the response of the criminal justice system to various forms of family violence, such as marital rape, spouse abuse, and child abuse; use of tort and injunctive remedies; examination of new and proposed legislation relevant to these issues. Offered Every Other Year.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 8141 International Environmental Law Seminar Cr. 3

Students explore use of bilateral and multilateral treaties and other international mechanisms for dealing with international environmental problems; emphasis on United States - Canada international environmental law. In-class presentations, paper required. Offered Intermittently.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 8161 International and Comparative Business Law: Doing Business in China Seminar Cr. 3

This seminar is designed as an introduction to the legal aspects of doing business with Chinese entities. After a brief overview of the historical context and the basic structure of the Chinese legal system, we will explore political, economic, legal and cultural issues U.S. companies typically encounter in conducting business with the Chinese. Specific topics include foreign direct investment, company law, intellectual property rights, labor law, banking and foreign exchange, anti-monopoly law, cyber and national security issues, and dispute settlement. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 8171 Health Law: Advanced Topics Cr. 3

Examines current legal issues related to health, such as applications of the law within and outside the health care system; contemporary debates on role of government and private sector in health; innovative proposals to use law, ethics and policy to improve health; and the role of law during public health emergencies. Offered Intermittently.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 8190 International Women's Human Rights Seminar Cr. 3

Evolution of women's rights as human rights. Students will examine women's human rights in the context of legal instruments such as the UN Convention to Eliminate Discrimination Against Women (CEDAW) and other international treaties, and in the jurisprudence of women's human rights in international tribunals. This course will also explore the role of global and regional human rights organizations in securing women's legal rights and analyze the current legal discourse on women's human rights and explore key issues in the light of specific world regions, cultures and religious traditions. Offered Fall.

LEX 8241 Advanced Topics in Work Law Cr. 3

Examines current and developing issues in labor and employment law. Offered Intermittently.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 8248 Law and Literature Seminar Cr. 3

Connection between law and literature. Topics include: role of narrative in legal arguments and legal decision-making; role of narrative and law, respectively, in constructing identity; literary criticisms of the law and legal profession. Focus on stories of adoption, including: shifting definitions of parenthood; nature vs. nurture debate; issues of class, race, gender, and national identity. Novels, short stories, films, memoirs, and legal cases; authors include Charles Dickens, George Eliot, P.D. James, and Louise Erdrich. In-class presentations; paper required. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 8256 Law in Cyberspace: Seminar Cr. 3

Topics may include online speech (including regulation of harmful and sexually explicit speech); filtering and intermediary liability; virtual property; online contracts; trademarks and domain names; copyright; the problems that flow from asserting national laws in a medium with no national borders. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 8260 Law of the City: Detroit: Seminar Cr. 3

Exploration of legal, economic, and policy issues regarding the contemporary American city, using Detroit as the case study. Themes covered include race, class, positive rights, community organization and identity, economics, public education, environmental justice and legal pluralism. Students read in constitutional and statutory provisions, case law, administrative determinations, academic writing, and current popular media. Discussion of a different aspect of urban law each week; students explore a broad array of legal issues and opportunities in the urban environment around them; current law and policy reforms; research paper and presentation. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate or Law level students.

LEX 8263 Legal Change Seminar Cr. 3

What is the relationship between law and social change? How effective are changes in legal doctrine in changing social practices? Under what conditions can we effectively use the law to promote social change? This course investigates these questions by studying the relationships among social movements, courts, legislatures, and other international and domestic institutions. Students will examine materials from actual legal reform movements, including equality in education and women's rights, and evaluate strategies for legal reform and their impact on statutory and decisional law as well as social practices. Offered Every Other Year.

LEX 8271 National Labor Relations Act: Current Problems Cr. 3

Legal issues pending before the National Labor Relations Board and in the courts. Students act in place of NLRB and render opinions on critical labor law issues; read actual briefs in pending cases, discuss the cases, and vote on disposition and draft majority and dissenting opinions. Each student writes one majority and one concurring or dissenting opinion.

Class discussions focus on NLRB decision-making process and judicial review of Board decisions; and on draft opinions of student Board panels. Grade is based on class participation as well as written work; students may elect to write papers based on legal issues discussed in class. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 8280 National Security Law Seminar Cr. 3

National security as area of specialization within government law practice, private law practice, and academia. Aspects of international law, constitutional law, criminal law, administrative law, and other fields as they apply to issues such as: Who formulates and implements the national security policies of the United States? When do the nation's security interests trump competing values (civil liberties, transparency, fulfillment of the nation's international legal obligations)? In what respects is America's approach to these issues similar to or different from that of other countries? Readings include statutes, treaties, regulations, case law, and extensive secondary literature, which serve as a basis for a substantial research paper or law journal note. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 8300 Race and the Law: Advanced Topics Cr. 3

This seminar will examine the role of the law in creating as well as maintaining race, racial hierarchies, and racial inequality. Contrary to the traditional view of racial subordination as solely a deviation from the liberal legal ideal, this course recasts the role of law as historically central to and complicit in upholding racial hierarchy as well as other hierarchies of gender, class and sexual orientation. The course will investigate these issues over the span of centuries, from the founding of the Americas to the present day. This course will explore oft-discussed issues at the intersection of race and law such as slavery, colonization, immigration, citizenship, nation building, national security, and affirmative action as well as less examined issues, such as sexual exploitation and unarmed police shootings. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 8335 Regulation of Vice Cr. 3

Seminar exploring legal, economic, and policy issues regarding federal, state, and local regulation of vice, including: alcohol nicotine, drugs, gambling, and commercial sex. The current legal landscape; potential policy reforms. Students prepare a research paper on a mutually agreed upon topic, which may include a specific regulation or vice law, proposed policy reform, comparative analysis from another jurisdiction, and state/local issues. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 8345 Sex, Sexuality and the Law in the Contemporary United States Cr. 3

The ways the law constructs people as sexual beings and regulates that being and her/his sexuality. Seminar course has four main objectives: 1) to deepen understanding of contemporary U.S. laws that address sex and sexuality; 2) to understand the ways in which individuals and groups are impacted by those laws; 3) to learn and apply aspects of critical legal theories in legal analysis; and 4) to strengthen written and oral legal analysis and communication. Workshop format; class contribution makes up a significant portion of the grade. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 8351 Sports and Inequality Cr. 3

This seminar will examine the legal and social implications of various forms of discrimination in both the professional and amateur sports contexts. Coverage will include a discussion of legal efforts to address discrimination in sports based on race, gender, disability, and sexual orientation. Topics include racial inequalities on the playing fields and in the front offices of amateur and professional sports, the impact of NCAA eligibility criteria, the effects and future of Title IX, gender segregation and exclusion in professional sports and sexual violence, sexual orientation discrimination in sports, and sports opportunities for people with disabilities. The final paper for this class may be used to satisfy the upper-level writing requirement. Offered Intermittently.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 8361 Tax Plcy: Crnt Issus Cr. 3

Offered Every Other Year.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 8363 Tax Policy Seminar: Role and Impact of Congressional Oversight on Abusive Tax Strategies Cr. 3

This seminar will examine the international tax rules, the abusive strategies, and the responses by Congress and foreign governments. We will use excerpts from Congressional hearings to explore the role of Congressional oversight in identifying the noncompliance with existing laws, the role of foreign governments in facilitating abuses and illegal behavior, and the need for legislative or administrative action to address some of the abuses. We will consider policy options to reduce the incentives for businesses to pursue these strategies. We will examine professional ethics and the role of lawyers and other professionals in structuring these abusive transactions. Offered Fall.

Restriction(s): Enrollment is limited to Graduate or Law level students.

LEX 8401 Urban Housing and Community Development: Seminar Cr. 3

Legal, social, and economic aspects of urban housing and community development, including local, state and national programs and policies. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 8505 Criminal Justice Externship Practicum Cr. 2

Students perform 150 hours of unpaid work in a criminal prosecutor or defender's office. Students are assigned tasks similar to those performed by entry-level prosecutors and defenders. Students develop advocacy skills, legal drafting skills, law practice management skills, the ability to recognize and resolve strategic and ethical dilemmas, and the ability to learn from experience. Offered Every Term.

Restriction(s): Enrollment is limited to Graduate or Law level students.

LEX 8506 Criminal Justice Externship: Colloquium Cr. 2

Roles and responsibilities of criminal prosecutors and defenders, the judicial process in criminal cases, and strategic and ethical issues in criminal prosecution and defense. Substantial class time is devoted to professional skills instruction and to facilitated discussion and analysis of students' fieldwork observations and experiences. Offered Every Term.

Restriction(s): Enrollment is limited to Graduate or Law level students.

LEX 8507 Judicial Externship: Practicum Cr. 2

Students perform 150 hours of unpaid work in judicial chambers. Students are assigned tasks similar to those performed by judicial clerks. Students develop research, writing, and analysis skills, legal drafting skills, oral communication skills, law practice management skills, and the ability to learn from experience. Offered Every Term.

Restriction(s): Enrollment is limited to Graduate or Law level students.

LEX 8508 Judicial Externship: Colloquium Cr. 2

Students learn about the roles and responsibilities of judges and judicial clerks, judicial decision-making, and effective advocacy. Substantial class time is devoted to professional skills instruction and to facilitated discussion and analysis of students' fieldwork observations and experiences. Offered Every Term.

Restriction(s): Enrollment is limited to Graduate or Law level students.

LEX 8515 Corporate Counsel Externship: Practicum Cr. 2

Students perform 150 hours of unpaid work in corporate counsel offices of non-profit and for-profit entities for two credits. Students are assigned tasks similar to those performed by attorneys in corporate counsel or general counsel offices. The Practicum is an opportunity for students to develop professional skills, including legal analysis and reasoning, contract drafting, problem solving, communication, teamwork, negotiation, and fact-finding. Students will also learn about important workplace issues such as time management, corporate culture, professionalism, and giving and receiving feedback. Grading will be on an Honors, Pass, Low Pass, No Credit basis. Offered Every Term.

Restriction(s): Enrollment is limited to Graduate or Law level students.

LEX 8516 Corporate Counsel Externship: Colloquium Cr. 2

Students will learn about substantive issues encountered in an in-house legal department and the ethical responsibilities of in-house counsel. Substantial class time is devoted to professional skills instruction on topics such as working with outside counsel, conflicts management, contract drafting, and conducting internal investigations. Students will also participate in facilitated discussion and analysis of their fieldwork observations and experiences. Chief legal officers, general counsel, and senior managing attorneys will guest lecture in some classes. Offered Every Term.

Restriction(s): Enrollment is limited to Graduate or Law level students.

LEX 8595 Advanced Externship Cr. 2

A two-credit, letter-graded course for students who will complete a second externship at a different field placement in the same substantive area or at a different division of the same location of their prior placement. Students will complete 150 hours of work at an approved field placement, submit reflective memoranda as assigned, and meet with the Director of Clinical Education, or other designated Faculty Supervisor, at least three times during the semester. Approval will only be granted in the rare circumstances where a student's learning objectives differ significantly from those for the first externship and these learning objectives cannot be met by existing clinical or experiential learning course opportunities. Application process required. Offered Every Term.

Prerequisites: LEX 8506 or LEX 8508 or LEX 8516 or LEX 8599

Restriction(s): Enrollment is limited to Law level students.

LEX 8598 Public Service Externship: Practicum Cr. 2

Students perform 150 hours of unpaid work in public service settings. Students are assigned tasks similar to those performed by entry-level public service lawyers. Students develop interviewing and counseling skills, legal drafting skills, oral communication skills, law practice management skills, and the ability to learn from experience. Offered Every Term.

Restriction(s): Enrollment is limited to Graduate or Law level students.

LEX 8599 Public Service Externship: Colloquium Cr. 2

Students learn about the roles and responsibilities of public service lawyers, strategic, practical, and ethical dimensions of public interest practice, and effective advocacy. Offered Every Term.

Restriction(s): Enrollment is limited to Graduate or Law level students.

LEX 8601 Appeal and Post-Conviction Advocacy Clinic Cr. 4

Clinical legal writing experience. Students will work with indigent clients who are challenging their felony convictions or sentences in state or federal court, in cooperation with the Michigan State Appellate Defender Office (SADO). Students will meet with the instructor in individual sessions and class sessions to discuss writing, investigation, client communication, research and the appellate and correctional processes. Students have client contact and may participate in an actual circuit court argument. Regardless of the court filing in each case, every student must prepare an appellate document (motion and brief, application for leave to appeal, or a memorandum of law) on behalf of his or her client. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 8604 Asylum and Immigration Law Clinic Cr. 6

Lawyering skills and values needed to effectively represent clients, and the legal skills and knowledge needed to represent clients seeking asylum or other immigration benefits, including an Immigration Court hearing. Asylum case simulation. Professional responsibility issues. In clinical component, students represent clients on a variety of immigration matters. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate or Law level students.

LEX 8606 Asylum and Immigration Law Clinic (Advanced) Cr. 2

Students continue to gain increased experience in different settings and issues, and may also organize and participate in community outreach projects. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 8607 Civil Rights and Civil Liberties Clinic Cr. 4

Collaborative venture with American Civil Liberties Union (ACLU) of Michigan; opportunity to litigate civil rights and civil liberties impact cases before state and federal courts. Classroom component includes a semester-long simulation of a civil rights case that gives students opportunity to develop professional skills such as interviewing, counseling, drafting pleadings and discovery requests, taking depositions, preparing and arguing motions, and negotiating with opposing counsel. Offered Winter.

Prerequisites: May be taken concurrently: LEX 6800 with a minimum grade of C and May be taken concurrently: LEX 7266 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

Repeatable for 8 Credits

LEX 8610 Transnational Environmental Law Clinic (Advanced) Cr. 2

Students continue their work with the Environmental Law Clinic, gaining increased experience in different settings and issues; students work with Great Lakes Environmental Law Center and may be involved in formally representing other community organizations and public interest groups. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 8611 Transnational Environmental Law Clinic Cr. 6

Skills and strategies needed to affect environmental policy in the three branches of state and federal government. Classroom sessions include current environmental policy challenges and opportunities; guest speakers. Clinical component includes preparation of policy papers and formal legislative testimony, commenting on rulemaking and permit decisions, and engaging in judicial review and enforcement litigation; students work with Great Lakes Environmental Law Center. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 8615 Patent Procurement Clinic Cr. 4

Students represent clients in patent procurement matters before the U.S. Patent and Trademark Office, Detroit satellite office. Student work includes interviewing and counseling clients, fact investigation, performing legal research, conducting prior art searches, and drafting and prosecuting patent applications. Skills and values necessary to effectively represent clients in patent procurement matters; exploration of substantive areas of patent law that arise in these matters. Professional responsibility issues commonly faced by patent attorneys, such as conflicts, competence, and confidentiality. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 8616 Patent Procurement Clinic (Advanced) Cr. 2

Students in this clinic represent clients in patent procurement matters before the United States Patent and Trademark Office's Detroit, Michigan, Satellite Office. There is no classroom component in the Advanced Patent Procurement Clinic. Students will be expected to spend between five to ten hours per week continuing work on ongoing cases that have significant deadlines during the semester, gaining increased experience in different settings and addressing more complex issues. Advanced Clinic students will also work with PPC faculty to provide direction and guidance to those enrolled in the PPC Clinic for the first time, in areas in which Advanced Clinic students have already acquired some expertise. Time spent in the Advanced Clinic will include a one-hour weekly meeting with the Clinic's faculty to discuss the status of client matters. Offered Fall, Winter.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 8621 Free Legal Aid Cr. 4

The Free Legal Aid Clinic, Inc. (FLAC) is a student-run, non-profit organization with a board of directors composed entirely of current Wayne Law students. FLAC partners with legal services organizations to provide free legal services to low-income people in Wayne County. FLAC students practice under the supervision of legal aid attorneys and law school faculty pursuant to the Michigan Student Practice Rule. Students, who work an average of 12-14 hours per week, are responsible for all aspects of the cases assigned to them, including interviewing clients, drafting pleadings and other court filings, arguing motions, conducting trials and evidentiary hearings, negotiating with opposing counsel, researching legal issues, and drafting legal documents. Students participate in a twice-weekly seminar class for this letter-graded course. Credits earned meet the experiential learning and clinical education requirements. Offered Every Term.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 8622 Free Legal Aid: Advanced Cr. 2

Students continue to work 12-14 hours per week at FLAC, taking on more complex cases and leadership roles within the organization. Students will meet with faculty on a weekly basis to discuss topics such as law practice management and non-profit management, as well as advanced substantive law topics and skills training. Students may also mentor new students and act as teaching assistants for the basic Free Legal Aid course. Limited enrollment, prior faculty approval required. Offered Every Term.

Restriction(s): Enrollment is limited to Law level students.

LEX 8625 Govt Agency Internship Cr. 1-3

Offered Every Term.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

Repeatable for 3 Credits

LEX 8627 In-House Counsel Internship Cr. 1-3

Offered Every Term.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

Repeatable for 3 Credits

LEX 8631 Business and Community Law Clinic Cr. 6

Course component: basic provisions of nonprofit corporate law, tax law, and legal ethics that affect community economic development groups. Clinical component: students assist a community group at or near the stage of incorporating itself and/or applying for tax-exempt status, in services such as drafting and filing articles of incorporation, bylaws, and IRS forms. Students complete term paper on topic of interest to community economic development organizations. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 8633 Business and Community Law Clinic (Advanced) Cr. 2

Participation requires demonstrated commitment to business law, community economic development, or nonprofit law. No classroom component; enrollment limited to two students per semester; students spend between five and ten hours a week continuing their work on ongoing cases and meeting significant deadlines during the semester. Advanced Clinic students also work with BCL faculty to provide direction and guidance to those in the BCL Clinic for the first time, in areas in which Advanced Clinic students have already acquired some expertise; as well as coordinate community outreach and informational programs. Includes one hour per week meeting with BCL faculty to discuss the status of client matters. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 8641 Disability Law Clinic Cr. 6

Cooperative venture with Wayne County Legal Services. Hands-on experience while helping individuals with disabilities and their families obtain services and support to avoid out-of-home placement at public expense. Students perform 15-20 hours fieldwork per week. Student responsible for 3 to 5 cases: investigating facts, researching law, counseling client, representing client in administrative or judicial proceedings, drafting and arguing appeals, engaging in settlement negotiations. Intake, case acceptance, individual client representation, community education and law reform efforts. Includes two-hour weekly seminar; graded on honors pass-low pass-no credit basis. Credits count toward 14-credit maximum in applied and skills courses. No credit after LEX 8621. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 8642 Disability Law Clinic (Advanced) Cr. 2

Students continue their work on cases or projects begun in the Disability Law Clinic that could not be completed in a single term, work on new cases or projects that involve more complex issues or give students opportunities to develop additional skills, or serve as teaching assistants for the Clinic. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 8661 Legal Advocacy for People With Cancer (Clinic) Cr. 4-6

Students work with healthcare professionals at the Karmanos Cancer Center to identify and resolve legal issues that present barriers to patient care and wellbeing. Students advise and assist people with cancer in matters pertaining to health insurance, housing, employee rights and benefits, estate and healthcare planning, and public benefits. They develop skills used in a broad range of practice settings: interviewing and counseling, case-management, problem-solving, persuasive fact analysis, legal drafting, negotiation, effective oral communication, and interdisciplinary collaboration. Offered for Law School grading: Honors pass, pass, low pass, no credit. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate or Law level students.

LEX 8662 Legal Advocacy for People with Cancer Clinic (Advanced) Cr. 2

Continuation of work begun in LEX 8661 which could not be completed in a single term; work on new cases or projects that involve more complex issues or give students opportunities to develop additional skills or serve as teaching assistants for the LAPC Clinic. Students are expected to perform at least 100 hours of clinical work, including regular, frequent meetings with the course instructors. Course does not have a classroom component, but students who serve as teaching assistants are expected to participate in some LAPC classes. Students are required to document their clinical work through detailed, contemporaneous time logs. Offered Fall, Spring/Summer.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 8701 Law Review Cr. 1-2

Offered Yearly.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

Repeatable for 4 Credits

LEX 8711 Moot Court Cr. 1-2

Members conduct, under general faculty supervision, the program in the preparation of briefs and the hearings on oral arguments. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

Repeatable for 4 Credits

LEX 8721 Mock Trial Cr. 1-2

Members participate in skills training; intraschool, regional, and national trial advocacy competitions. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

Repeatable for 4 Credits

LEX 8725 Journal of Business Law Cr. 1

The Wayne State Journal of Business Law provides the opportunity for law students the opportunity to edit legal scholarship, to prepare a student note or commentary on a relevant legal topic under the supervision of a Wayne Law professor. Offered Fall, Winter.

Repeatable for 4 Credits

LEX 8731 The Journal of Law in Society Cr. 1

Members contribute to publication of this law journal and the annual symposium. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

Repeatable for 4 Credits

LEX 8741 Transactional Law Competition Cr. 1

Practical skills course focused on improving transactional lawyering skills, including drafting agreements, revising agreements, advising clients, and negotiating with transactional attorneys, while exploring important legal/business issues relevant to mergers and acquisitions. During the fall semester, students will participate in an in-house transactional law competition, and during the winter semester, students will participate in the National Transactional LawMeet Competition. Offered Yearly.

Repeatable for 4 Credits

LEX 8815 Fundamentals of US Legal Research Cr. 1

Introduction to U.S. legal research skills for students from foreign jurisdictions, with a focus on the use of electronic resources for legal research. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School; enrollment is limited to students with a major, minor, or concentration in United States Law.

LEX 8875 Survey of United States Law Cr. 3,4

Concise survey of several substantive fields of United States Law (principally in the area of private law) with focus on several core legal topics integral to understanding the U.S. legal system as a whole, and to working with U.S.-trained lawyers. Material drawn from a variety of areas, such as: law of contracts, property, torts, criminal law, and constitutional law. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School; enrollment is limited to students with a major, minor, or concentration in United States Law.

LEX 8890 US Legal Skills for Foreign Law Students Cr. 2

This course will provide foreign-trained lawyers with a working knowledge of the memo-drafting, transactional, and other skills utilized by U.S. Lawyers. Students will draft a legal memorandum, a client letter, and a contract. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School; enrollment is limited to students with a major, minor, or concentration in United States Law.

LEX 8999 Master's Essay Direction Cr. 1-2

Offered Every Term.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students with a class of Candidate Masters; enrollment limited to students in the Law School.

Repeatable for 2 Credits

LFA - LIFE FITNESS ACTIVITIES

LFA 1020 Individualized Skills Development Laboratory Cr. 1-2

Offered Fall, Winter.

Repeatable for 4 Credits

LFA 1030 Fitness Infusion Cr. 2

Group exercise combination class that introduces five LFA courses offered in the program: Sculpt, Stretch and Tone; Cardio-Fit Kickboxing; Boot Camp Fitness; Weight Training and Fitness; and Step and Tone. Designed to promote a variety of cardio and resistance training formats. Offered Every Term.

Restriction(s): Enrollment is limited to Undergraduate level students.

Repeatable for 4 Credits

LFA 1035 Fitness Trends Cr. 2

A fitness sampler class offering an introduction to top fitness and physical activity trends. Fitness activities will change annually based on health and fitness trends in the industry. Offered Fall, Winter.

Repeatable for 4 Credits

LFA 1040 Healthy Lifestyle Basics Cr. 2

A study of healthy eating, physical activity, and other lifestyle strategies to promote healthy living and weight management. Students will examine individual health and wellness, identify healthy behaviors, and develop skills to support a healthy lifestyle. Offered Every Term.

Repeatable for 4 Credits

LFA 1100 Swimming: Elementary Cr. 2

Fundamental skills and knowledge in aquatics for beginners. Offered Every Term.

Repeatable for 4 Credits

LFA 1210 Pilates Matwork Cr. 2

Total body exercise program using a series of floor exercises to increase strength, flexibility, stamina and concentration. Exercises are selected based on core strengths and stabilization methods. Offered Every Term.

Repeatable for 4 Credits

LFA 1220 Cardio-Fit Kickboxing Cr. 2

Time-efficient workout that stimulates the cardiorespiratory and musculoskeletal systems. Structured routines for all fitness levels (basic, intermediate, advanced); utilizes only basic kickboxing techniques. Offered Every Term.

Repeatable for 4 Credits

LFA 1230 Basic Toning and Cardio Cr. 2

Total-body resistance exercise program using hand weights, ankle weights, rubber tubing, adjustable step, and other flexible sources of resistance. High-repetition exercises concentrating on proper technique, body alignment, muscular development, sound biomechanical principles. Offered Every Term.

Repeatable for 6 Credits

LFA 1240 Step and Tone Cr. 2

Cardiovascular and muscular endurance and strengthening program using the adjustable step, rubber tubing, and hand-held weights. Low-impact, high-intensity workout. Energy cost controlled by step height, music tempo, tubing tension, size of weights. Offered Every Term.

Repeatable for 4 Credits

LFA 1250 Zumba Cr. 2

Zumba is a fusion of Latin and International music and dance themes; the routines feature easy-to-follow aerobic/fitness interval training with rhythms that tone and sculpt the body. Offered Every Term.

Repeatable for 4 Credits

LFA 1275 Water Aerobics Cr. 2

Cardiovascular and muscular endurance program using water resistance exercises performed to music designed to improve strength, flexibility and overall cardiovascular fitness. Performed in shallow water, this class offers basic, structured drills and routines, with low-impact, variable workout intensities, and use of additional resistance devices. Swimming skills not necessary. Offered Every Term.

Repeatable for 4 Credits

LFA 1280 Piloxing Cr. 2

Offered Every Term.

Restriction(s): Enrollment is limited to Undergraduate level students.

Repeatable for 4 Credits

LFA 1310 Rock Climbing Cr. 2

Provides instruction in the fundamentals of the sport of rock climbing; practical instruction in correct tying of rock climbing knots and other rope work; techniques of safely belaying a climber; and physical climbing techniques. Climbing safety, technique, and equipment will be discussed. No previous experience necessary. Offered Every Term.

Repeatable for 4 Credits

LFA 1315 Boxing Conditioning Cr. 2

A time-efficient workout which stimulates the cardio respiratory and musculoskeletal systems. It offers structured routines for all fitness levels (basic, intermediate, advanced). Utilizes basic boxing techniques. Boxing skills not necessary. Great for improving cardiovascular endurance. Offered Every Term.

Repeatable for 4 Credits

LFA 1320 Total Body Conditioning Cr. 2

Group physical training class that mixes traditional calisthenics and body weight exercises with cardiovascular interval training and strength conditioning. Designed to promote fat loss, camaraderie and team effort. Offered Every Term.

Restriction(s): Enrollment is limited to Undergraduate level students.

Repeatable for 6 Credits

LFA 1330 Floor Hockey Cr. 2

Analysis, development and practice of fundamental skills, team play, strategies and rules of Floor Hockey. Offered Fall, Winter.

Restriction(s): Enrollment is limited to Undergraduate level students.

Repeatable for 4 Credits

LFA 1340 Zero to a 5K Cr. 2

A personalized walking/jogging/running program designed to improve the level of cardio-respiratory condition of the participant, with the ultimate goal of completing a 5K (3.1 miles). Considerations include: nutrition, endurance, strength, proper form and various injury prevention guidelines. Offered Every Term.

Restriction(s): Enrollment is limited to Undergraduate level students.

Repeatable for 4 Credits

LFA 1350 Pocket Billiards: Beginning Cr. 2

Basic skills and technique; history, rules, equipment and game courtesy. Offered Fall, Winter.

Repeatable for 4 Credits

LFA 1410 Golf Cr. 2

Analysis and practice of fundamentals focused on development of correct form in the use of different clubs. Offered Every Term.

Repeatable for 4 Credits

LFA 1420 Dance Fitness Cr. 2

Basic movement techniques to a variety of dance styles for increased cardiovascular fitness. Offered Every Term.

Repeatable for 4 Credits

LFA 1460 Yoga Fusion Cr. 2

Total body exercise program blending yoga, strength, core work, and dance to increase strength, flexibility, stamina and concentration. Offered Fall, Winter.

Repeatable for 4 Credits

LFA 1470 Mindfulness, Fitness and Stress Management Cr. 2

A variety of physical training methods which integrate a mind-body approach to achieve positive changes in physiological measures of physical fitness. Develop healthy coping habits to prevent or reduce stress. Techniques include but are not limited to exercise, yoga, breathing and meditation, and journaling. Offered Every Term.

Repeatable for 4 Credits

LFA 1480 Yoga Cr. 2

Yoga physical exercises to shape and strengthen the human body. Psychosomatic influences used to develop resistance against stress and to train the body and mind to relax. Utilization of auto-suggestion to influence lifestyle. Offered Every Term.

Repeatable for 4 Credits

LFA 1510 Women's Fitness Cr. 2

Students will be taught a variety of different methods of cardio and strength training in a different setting each week. Principles and benefits of cross training will be addressed through participation in a wide variety of activities in the gym, outside, and in the weight room. Offered Every Term.

Repeatable for 4 Credits

LFA 1520 Kickball/Dodgeball Cr. 2

Analysis, development and practice of fundamental skills, team play, strategies and rules of kickball and dodgeball. Offered Every Term.

Restriction(s): Enrollment is limited to Undergraduate level students.

Repeatable for 4 Credits

LFA 1530 Basketball: Fundamental Skills Cr. 2

Analysis and practice of fundamental skills, team play, and rules of basketball. Offered Every Term.

Repeatable for 4 Credits

LFA 1540 Basketball: Shooting Skills and Strategies Cr. 2

Analysis and practice of intermediate and advanced shot-making skills and game strategies. Offered Fall, Winter.

Repeatable for 4 Credits

LFA 1560 Team Sports Sampler Cr. 2

The analysis, development, and practice of fundamental skills, team play and rules of basketball, volleyball, dodgeball, kickball and other team sports. Offered Winter.

Repeatable for 4 Credits

LFA 1640 Strength Training for Beginners Cr. 2

Analysis and practice of sound weight training techniques; discussion of principles that underlie effective resistance exercise programs leading to improved personal fitness. Offered Every Term.

Repeatable for 4 Credits

LFA 1700 Brazilian Jiu Jitsu Cr. 2

Analysis and practice of fundamental skills, movements, and philosophy of Brazilian Jiu Jitsu as a modern martial art, self-defense, and competitive sport. Offered Every Term.

Repeatable for 4 Credits

LFA 1710 Fencing: Beginning Cr. 2

Analysis and practice of skills, rules, strategy, conduct of competitive means. Offered Fall, Winter.

Repeatable for 4 Credits

LFA 1780 Tai Chi Chuan: Beginning Cr. 2

An ancient Chinese exercise, Tai Chi is a series of postures and transitional movements, used to improve balance, strength, circulation, and relaxation. Offered Fall, Winter.

Repeatable for 4 Credits

LFA 1850 Soccer: Beginning Cr. 2

Fundamental playing skills and basic conditional and tactical aspects of the game of soccer. Rules of the game. Offered Every Term.

Repeatable for 4 Credits

LFA 1992 Volleyball: Beginning Cr. 2

Analysis and practice of skills, team play, strategy, rule interpretation. Offered Fall, Winter.

Repeatable for 4 Credits

LFA 2330 First Aid and CPR Cr. 3

Theory and practice of First Aid and CPR. Students can qualify for national certificates in First Aid and CPR. Offered Every Term.

Course Material Fees: \$30

LFA 2560 Freshmen Quests Cr. 2

Designed for incoming freshmen to help facilitate the transition to college life, workload, and expectations. During trips, students will be introduced to many faculty/staff from various departments to learn the keys to achieving a successful college career. Offered Fall.

Restriction(s): Enrollment is limited to Undergraduate level students.

Course Material Fees: \$75

LGL - LANGUAGE LEARNING

LGL 5750 Theories of Second Language Acquisition Cr. 3

The complex processes involved in learning a foreign/second language, including the nature of inter language and the individual and collective factors influencing learner success and the effectiveness of instruction. Offered Yearly.

Equivalent: ENG 5750, LIN 5750

LGL 5810 Teaching Foreign Languages: Receptive Skills Cr. 3

Current research and theory on acquisition of reading and listening skills in a foreign language applied to classroom instruction. Difference between receptive and productive language use; how methods of foreign language teaching treat the instruction of the receptive skills. Offered Every Other Year.

LGL 5820 Teaching Foreign Languages: Productive Skills Cr. 3

Current research on acquisition of speaking and writing skills in a foreign language. Difference between productive and receptive language use; how various methods of foreign language teaching treat the instruction of productive skills. Offered Every Other Year.

LGL 5830 Technology in the Foreign Language Classroom Cr. 3

Types of current technology; review of research on effectiveness of language classroom technologies; evaluation of technologies; development of activities for use in classroom. Offered Every Other Year.

LGL 5850 Foreign Language Instruction Cr. 3

Theoretical basis of second language teaching models; historical overview of methodologies; current trends in teaching of reading, writing, listening, speaking, and culture. Implications of methodology on materials, classroom techniques, and assessment. Offered Every Other Year.

Equivalent: LED 5850

LGL 5860 Assessment in the Foreign Language Classroom Cr. 3

Means of assessing students' knowledge of a foreign language. Topics include: ACTFL Oral Proficiency Interview; assessment of reading, writing, speaking, listening, vocabulary, grammar and culture; through testing and other forms of assessment. Offered Yearly.

LGL 7810 Teaching Foreign Languages: Receptive Skills Cr. 3

Latest research on acquisition of reading and listening skills in a foreign language. Difference between receptive and productive language use; how methods of foreign language teaching treat the instruction of the receptive skills. Offered Every Other Year.

Restriction(s): Enrollment is limited to Graduate level students.

LGL 7820 Teaching Foreign Languages: Productive Skills Cr. 3

Current research on acquisition of speaking and writing skills in a foreign language. Difference between productive and receptive language use; how various methods of foreign language teaching treat the instruction of productive skills. Offered Every Other Year.

Restriction(s): Enrollment is limited to Graduate level students.

LGL 7830 Technology in the Foreign Language Classroom Cr. 3

Types of current technology; review of research on effectiveness of language classroom technologies; evaluation of technologies; development of activities for use in classroom. Offered Every Other Year.

Restriction(s): Enrollment is limited to Graduate level students.

LGL 7850 Foreign Language Instruction Cr. 3

Theoretical basis of second language teaching models; historical overview of methodologies; current trends in teaching of reading, writing, listening, speaking, and culture. Implications of methodology on materials, classroom techniques, and assessment. Offered Every Other Year.

Restriction(s): Enrollment is limited to Graduate level students.

LGL 7860 Assessment in the Foreign Language Classroom Cr. 3

Means of assessing students' knowledge of a foreign language. Topics include: ACTFL Oral Proficiency Interview; testing of reading, writing speaking and listening skills; means of testing grammar and culture; testing as it relates to program goals. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate level students.

LGL 7999 Master's Essay Direction Cr. 1-3

Essay course required for degree. Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students in the MA in Language Learning program.

Repeatable for 3 Credits

LIN - LINGUISTICS

LIN 1850 Introductory Symbolic Logic Cr. 3

The logic of propositions; the general logic of predicates and relations. Offered Yearly.

Equivalent: PHI 2850

LIN 1860 Honors Introductory Symbolic Logic Cr. 3

See LIN 1850. Offered Yearly.

Equivalent: PHI 2860

LIN 2000 Chinese Phonetics Cr. 1

Students will have the hands-on experience of learning Chinese sounds and tones with the intensive instruction and correction of the instructor. After studying the articulatory mechanisms for the Chinese phonetic inventory and system in theory, students will practice them in different combinations and contexts with that native accuracy as the target. Offered Winter.

Equivalent: CHI 2000

Repeatable for 2 Credits

LIN 2720 Basic Concepts in Linguistics Cr. 3

Satisfies General Education Requirement: Cultural Inquiry, Philosophy Letters

Analysis of the structure and use of language, focusing on English, from the standpoint of current linguistic practice. Topics include: phonetics and sound structure, word structure, syntax, semantics, language origin and history, dialects, language learning, animal communication, and language in social interaction. Offered Yearly.

Equivalent: ENG 2720

LIN 2730 Languages of the World Cr. 3

Satisfies General Education Requirement: Foreign Culture, Global Learning Inquiry

Survey of structure of major language families of the world, western and non-western; interrelationships of language and culture; universals and variations of universals in language and culture. Offered Yearly.

Equivalent: ENG 2730

LIN 3080 Cognitive Psychology: Fundamental Processes Cr. 3

Fundamental theories, concepts, and empirical findings in study of human cognition. Topics include: thinking, problem solving, language comprehension and production, memory and attention. Offered Yearly.

Prerequisites: PSY 1010 with a minimum grade of D- or PSY 1020 with a minimum grade of D-

Equivalent: PSY 3080

LIN 3310 Language and Culture Cr. 3

An introduction to linguistic anthropology. Using comparative approaches to language and culture across time and space, explore variation and change, cognitive dimensions of language, language evolution, linguistic myths, and the use of language in social practice. Offered Fall.

Prerequisites: ANT 2100 with a minimum grade of D- or LIN 2720 with a minimum grade of D-

Restriction(s): Enrollment is limited to Undergraduate level students.

Equivalent: ANT 3310

LIN 3700 Structure of English Cr. 3

Survey of the major structural features of Standard English at the levels of sounds, words, and sentences, using concepts and methods from the field of linguistics. Special attention to relation of spoken to written English. Offered Yearly.

Equivalent: ENG 3700

LIN 5050 Advanced Symbolic Logic Cr. 4

Formal, extensive treatment of first-order predicate logic with emphasis on the notions of a formal logical language and truth in a model; the logic of identity; definite descriptions; brief introductions to set theory and the metatheory of propositional and first-order logic; some additional advanced topics to be selected by the instructor. Offered Yearly.

Equivalent: PHI 5050

LIN 5080 Phonetics Cr. 3

Multisensory study of sounds in the English language, emphasizing acoustic, physiologic, kinesiological approaches. Offered Fall, Winter.

Course Material Fees: \$12

Equivalent: SLP 5080

LIN 5100 Languages of Asia Cr. 3

Introduction to major language families in Asia; grammar, sounds, language contacts. Offered Winter.

Equivalent: CHI 5220, JPN 5220

LIN 5110 Teaching of Arabic as a Foreign/Second Language (TAFL) Cr. 3

Theoretical and conceptual framework of second language learning. Proper training in pedagogy as related to learning Arabic as a foreign/second language. Offered Yearly.

Equivalent: ARB 5100, NE 5100

LIN 5200 Modal Logic Cr. 4

The logic of necessity, possibility, and other modal notions as they occur in epistemic and deontic contexts. Propositional and quantified modal logic. Offered Every Other Year.

LIN 5210 Arabic Sociolinguistics Cr. 3

Arabic dialectology; Arabic as a minority language in contact. Theories and techniques developed outside Arabic, and their applicability to Arabic situations. Offered Fall.

Equivalent: ARB 5210, NE 5210

LIN 5220 Introduction to Chinese Linguistics Cr. 3

Writing, sound and grammar systems of Chinese; interaction between Chinese language and Chinese society. Offered Fall.

Equivalent: CHI 5210

LIN 5230 Structure of Arabic Cr. 3

Survey of historical constitution and theoretical structure of Arabic. Offered Yearly.

Equivalent: ARB 5230, NE 5230

LIN 5240 Grammar of Chinese Cr. 3

Chinese grammar from perspectives of negation, question formation, aspects and different parts of speech, and the like. Offered Fall.

Equivalent: CHI 5230

LIN 5290 Phonology Cr. 3

The sound systems of a variety of human languages compared and contrasted in an introduction to the diversity and similarities in human sound systems. Theories of the nature of sound systems and methods of analysis in phonology and morphophonology will be presented. Offered Yearly.

Prerequisites: LIN 5700 with a minimum grade of D- or ENG 5700 with a minimum grade of D- or LIN 2720 with a minimum grade of D- or ENG 2720 with a minimum grade of D-

Equivalent: ENG 5710

LIN 5300 Syntax Cr. 3

The theory of grammatical systems examined through analysis of sentence formation in a variety of human languages, diversity and universals in grammar, and theories of syntax. Offered Yearly.

Prerequisites: LIN 5700 with a minimum grade of D- or ENG 5700 with a minimum grade of D- or LIN 2720 with a minimum grade of D- or ENG 2720 with a minimum grade of D-

Equivalent: ENG 5740

LIN 5320 Language and Societies Cr. 3

For graduate students and advanced undergraduates with a background in linguistic anthropology. Students read classic and contemporary works of linguistic anthropology to expand knowledge of human language and sociality; conduct a major original research project. Offered Winter.

Prerequisites: ANT 3310 with a minimum grade of D- or LIN 3310 with a minimum grade of D-

Equivalent: ANT 5320

LIN 5360 Normal Language Acquisition and Usage Cr. 3

Language development in children and the associated areas of emotional and motor development; language stimulation techniques and programs. Offered Fall, Spring/Summer.

Course Material Fees: \$10

Equivalent: SLP 5320

LIN 5570 Philosophy of Language Cr. 4

Intensive investigation and discussion of philosophical problems concerning meaning, truth, and the nature of language. Offered Every Other Year.

Prerequisites: 1 of PHI 2400, PHI 2550, PHI 3500, PHI 3550, PHI 3600, PHI 5230, PHI 5500, PHI 5530, PHI 5550, PHI 5570, PHI 5630, PHI 5640 and PHI 1850 with a minimum grade of D- or PHI 1860 with a minimum grade of D-

Equivalent: PHI 5570

LIN 5700 Introduction to Linguistic Theory Cr. 3

Introduction to the scientific study of language and methodologies of linguistic analysis: phonetics and phonology, morphology, syntax and semantics. Offered Yearly.

Equivalent: ENG 5700

LIN 5715 Morphology Cr. 3

Morphology is a core area of Linguistics. The course will introduce the basic issues in the study of the internal structure of words, as well as the analytical techniques applied to morphological analysis. Students will learn how to analyze words of various (Indo-European and non-Indo-European) languages into morphemes, as well as to recognize morphological patterns and to utilize theoretical concepts in order to describe and analyze such patterns. In particular, the course will develop a theory of morphology in generative grammar, paying special attention to the question of whether particular morphological phenomena are primarily syntactic or primarily phonological in nature. Offered Fall.

Prerequisites: ENG 5700 with a minimum grade of D- or ENG 2720 with a minimum grade of D- or LIN 2720 with a minimum grade of D- or LIN 5700 with a minimum grade of D-

Equivalent: ENG 5715

LIN 5720 Linguistics and Education Cr. 3

Introduction to linguistics with emphasis on applications to education. Offered Yearly.

Equivalent: ENG 5720

LIN 5730 English Grammar Cr. 3

Comprehensive analysis of English sentence structure and parts of speech using the terminology and descriptive approach of traditional grammar. Offered Yearly.

Equivalent: ENG 5730

LIN 5745 Semantics Cr. 3

Semantics is a core area of Linguistics. This course investigates meaning in natural language. It examines two foundational assumptions of natural language semantics: (i) that the meaning of a declarative sentence is its truth conditions and (ii) that the truth conditions of an expression are determined compositionally (that is, they are determined as a function of its parts and how they are put together). Students will then learn to distinguish between the entailments, implicatures, and presuppositions of an expression, where only the first are part of the expression's truth conditions. Offered Winter.

Prerequisites: ENG 5700 with a minimum grade of D- or ENG 2720 with a minimum grade of D- or LIN 2720 with a minimum grade of D- or LIN 5700 with a minimum grade of D-

Equivalent: ENG 5745

LIN 5750 Theories of Second Language Acquisition Cr. 3

The complex processes involved in learning a foreign/second language, including the nature of inter language and the individual and collective factors influencing learner success and the effectiveness of instruction. Offered Yearly.

Equivalent: ENG 5750, LGL 5750

LIN 5760 American Dialects Cr. 3

Survey of chief social and geographic dialects of American English and introduction to theory of language variation. Offered Intermittently.

Equivalent: ENG 5760

LIN 5770 Sociolinguistics Cr. 3

Identification of sociolinguistic principles used by English speakers and writers in choosing among the different English codes, styles, registers and social dialects in American and other communities. Offered Every Other Year.

Equivalent: ENG 5770

LIN 5900 Culture, Language and Cognition Cr. 3

Systematic investigation of the relationships among, language, cognition and culture, including issues relating to human universals, cross-cultural concept formation, metaphor, classification and the evolution of cognition and language. Offered Every Other Winter.

Prerequisites: ANT 3310 with a minimum grade of D- or ANT 5320 with a minimum grade of D- or LIN 3310 with a minimum grade of D- or LIN 5320 with a minimum grade of D- or LIN 3080 with a minimum grade of D- or PSY 3080 with a minimum grade of D-

Restriction(s): Enrollment is limited to Graduate or Undergraduate level students.

Equivalent: ANT 5900, PSY 5900

LIN 5993 Writing Intensive Course in Linguistics Cr. 0

Satisfies General Education Requirement: Writing Intensive Competency Disciplinary writing assignments under the direction of a faculty member. Must be selected in conjunction with a corequisite course; see section listing in Schedule of Classes for corequisites available each term.

Satisfies the University General Education Writing Intensive Course in the Major requirement. Intensive training in literature search, linguistic analysis, and the preparation of scholarly written work. Required for all majors. Offered Every Term.

Prerequisites: May be taken concurrently: LIN 5210 or LIN 5320 or LIN 5750 or LIN 5760 or LIN 5770 or LIN 6720 or AFS 2390 with a minimum grade of C or ENG 2390 with a minimum grade of C or ENG 3010 with a minimum grade of C or ENG 3020 with a minimum grade of C or ENG 3050 with a minimum grade of C

Restriction(s): Enrollment is limited to Undergraduate level students.

LIN 6700 History of Arabic Cr. 3

History of the evolution of Arabic. Data from phonetics/phonology and morpho-syntax will form the basis of study. Offered Fall.

Equivalent: ARB 6700

LIN 6710 Psycholinguistics Cr. 3

Theory and research in various topics in psycholinguistics, including language development, speech perception and production, and language comprehension. Offered Intermittently.

Equivalent: PSY 6710

LIN 6720 Topics in Language Cr. 3

Topics such as: pragmatics, historical linguistics, history of English, language and gender, language and variation, language and evolution. Topics to be announced in the Schedule of Classes. Offered Yearly.

Equivalent: ENG 6720, LIN 5720

Repeatable for 12 Credits

LIN 7010 Acoustics of Speech Cr. 3

Acoustic consequences of phonetically-relevant articulatory movements. Offered Intermittently.

Prerequisites: SLP 5080 or SLP 5090

Restriction(s): Enrollment is limited to Graduate level students.

Equivalent: SLP 7010

LIN 7300 Comparative Romance Linguistics Cr. 3

Historical development and earliest texts in the Romance languages: Latin substrata, historical diffusion, Vulgar Latin, linguistic borrowings, classification, and characteristics of the various Romance languages. Offered Every Other Year.

Restriction(s): Enrollment is limited to Graduate level students.

LIN 7320 Seminar in Hispanic Linguistics Cr. 3

Seminar topics will vary according to the principal divisions of Spanish linguistics: phonology, morphology, lexicography, syntax, and dialectology. Offered Intermittently.

Restriction(s): Enrollment is limited to Graduate level students.

Equivalent: SPA 8420

Repeatable for 9 Credits

LIN 7665 Seminar in Linguistic Anthropology Cr. 3

Central concepts and theories. Current developments, problems and contemporary research orientations. Topics to be announced in Schedule of Classes. Offered Intermittently.

Prerequisites: ANT 5320 with a minimum grade of C or LIN 5320 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

Equivalent: ANT 7665

LIN 7710 Advanced Studies in Linguistic Structure Cr. 3

Current issues in linguistic theory, including but not limited to topics in phonology, morphology, syntax, semantics. Topics to be announced in the Schedule of Classes. Offered Intermittently.

Restriction(s): Enrollment is limited to Graduate level students.

Equivalent: ENG 7710

Repeatable for 9 Credits

LIN 7720 Advanced Studies in Language Use Cr. 3

Current problems in language use, including issues in language variation, pidgins and creoles, first language acquisition, perception and production, and linguistic stylistics. Topics to be announced in the Schedule of Classes. Offered Intermittently.

Restriction(s): Enrollment is limited to Graduate level students.

Equivalent: ENG 7720

Repeatable for 9 Credits

LIN 7770 Discourse Analysis Cr. 3

Analysis of inter-sentential relationships and of larger patterns. Implied and actual exchanges. Information ordering. Multi-level and intersectional analysis of expository prose. Topics to be announced in the Schedule of Classes. Offered Every Other Year.

Restriction(s): Enrollment is limited to Graduate level students.

Equivalent: ENG 7770

Repeatable for 9 Credits

LIN 7991 Directed Study in Linguistics Cr. 1-9

A research problem which requires field work or intensive and systematic reading of original technical literature. Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students.

Equivalent: ANT 7991

Repeatable for 9 Credits

LIN 7999 Master's Essay Direction Cr. 1-3

Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students with a class of Candidate Masters.

MAE - MATHEMATICS EDUCATION

MAE 1000 Detroit by the Numbers Cr. 3

Satisfies General Education Requirement: Quantitative Experience Comp
Designed for students to experience mathematics as doable, meaningful, and relevant to their lives. Students will study the city of Detroit by analyzing data and reasoning through quantitative tools presented by local agencies, such as health, environment, education, arts, and sports. Offered Every Term.

MAE 5100 Geometry for Middle School Teachers Cr. 3

Development of Euclidean geometry as a mathematical system; related historical topics; introduction to other geometries; selected topics such as transformations and tessellations. No credit toward a major or minor for secondary mathematics teaching. Offered Yearly.

Prerequisites: MAT 1110 with a minimum grade of C- and MAT 1120 with a minimum grade of C-

Equivalent: MAT 5180

MAE 5110 Number Theory for Middle School Teachers Cr. 3

Topics from elementary theory of numbers which underlie middle school mathematics; historical connections; role of abstraction and proof in mathematics. No credit toward a major or minor for secondary mathematics teaching. Offered Yearly.

Prerequisites: MAT 1800 with a minimum grade of C- or MAT 1120 with a minimum grade of C-

Equivalent: MAT 5190

MAE 5120 Abstract Algebra for Middle School Teachers Cr. 3

Topics from elementary abstract algebra underpinning middle school mathematics curriculum; historical connections; role of abstraction and proof in mathematics. No credit towards major in mathematics or secondary mathematics. Offered Yearly.

Prerequisites: MAT 1120 with a minimum grade of C- and MAT 1800 with a minimum grade of C-

Equivalent: MAT 5120

MAE 5130 Problem Solving for Middle School Teachers Cr. 3

Development of mathematical problem solving in middle grades mathematics education; study of non-routine problems; problem solving strategies; historical connections; connections to selected mathematics content and to topics in other disciplines. No credit towards a mathematics major or secondary mathematics education major. Offered Yearly.

Prerequisites: MAT 1120 with a minimum grade of C- and MAT 1800 with a minimum grade of C-

Equivalent: MAT 5130

MAE 5150 Methods and Materials of Instruction: Secondary School Mathematics Cr. 3

Mathematics in secondary school; major concepts of secondary school mathematics; methods and instructional materials; classroom administration; modern trends. Offered Yearly.

Restriction(s): Enrollment limited to students in the College of Education.

MAE 6050 Teaching Mathematics in the Middle Grades Cr. 3

Creative use of resources and materials for improving the mathematics competencies of middle school and junior high school students; organizing the mathematics classroom for effective instruction; promising trends; related research. Offered Yearly.

Restriction(s): Enrollment limited to students in the College of Education.

MAE 6150 Special Topics Cr. 1-6

Current issues and trends; areas of neglected content; curriculum proposals; related research. Topics to be announced in Schedule of Classes. Offered Intermittently.

Repeatable for 12 Credits

MAE 6200 Teaching Arithmetic, Algebra and Functions from an Advanced Perspective Cr. 3

Students gain profound understanding of K-12 mathematics. Concepts underlying topics and procedures; their connections to higher mathematics. Teaching with Simplify; application of mathematical understanding to teaching practices. Offered Yearly.

Prerequisites: MAT 5120 or MAT 6170 or MAT 6180

Equivalent: MAT 6200

MAE 6210 Teaching Geometry, Probability and Statistics, and Discrete Mathematics from an Advanced Perspective Cr. 3

Historical perspectives, common conceptions and misconceptions, applications, technology, and mathematical connections relative to teaching geometry (including trigonometry), probability and statistics, and discrete mathematics in secondary school. Offered Yearly.

Equivalent: MAT 6210

MAE 6400 Elementary School: Mathematics Curriculum and Assessment Cr. 3

Developing competence in school mathematics programs: objectives, procedures, materials, organizational patterns, evaluation. Offered Every Term.

MAE 6450 Integrating Literature and Mathematics in the Elementary School Cr. 3

Examining the potential of literature for exploration of various mathematical concepts and relationships. Offered Spring/Summer.

MAE 7150 Advanced Studies in Teaching Discrete Mathematics Cr. 3

Nature of discrete mathematics and its applications, incorporating discrete topics in school mathematics. Offered Every Other Year.

Restriction(s): Enrollment is limited to Graduate level students.

MAE 7200 Advanced Studies in Teaching Statistics and Probability Cr. 3

Techniques for teaching statistics and probability in grades K-12; promising materials and activities; research on the learning and teaching of statistics and probability; related resources; review of basic concepts. Offered Every Other Year.

Restriction(s): Enrollment is limited to Graduate level students.

MAE 7250 Advanced Studies in Teaching Algebra Cr. 3

Fundamental concepts of algebra for a modern secondary school mathematics program; current trends and experimental programs; related research; methods and materials of instruction. Offered Every Other Year.

Restriction(s): Enrollment is limited to Graduate level students.

MAE 7300 Advanced Studies in Teaching Geometry Cr. 3

Role of geometry and trigonometry in secondary school mathematics; selection of major concepts; development of postulational thinking; teaching procedures emphasizing modes of thinking in mathematics; modern trends. Offered Every Other Year.

Restriction(s): Enrollment is limited to Graduate level students.

MAE 7400 Seminar in Mathematics Education Cr. 3

Recent research in mathematics education; implications for learning and teaching, K-12. Topics to be announced in Schedule of Classes. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate level students.

Repeatable for 9 Credits

MAE 8400 Technology in Mathematics Learning and Teaching Cr. 3

Recent research on the use of technology in mathematics education; implications for learning and teaching mathematics, K-12. Offered Every Other Year.

Restriction(s): Enrollment is limited to Graduate level students.

MAT - MATHEMATICS

For details on Mathematics prerequisite requirements, please see the Mathematics Placement Information (<http://bulletins.wayne.edu/undergraduate/college-liberal-arts-sciences/mathematics/placement>) section of this bulletin, or the Mathematics Placement Exam (<http://testing.wayne.edu/register/math-placement-exam.php>) information provided by the Office of Testing, Evaluation and Research Services.

MAT 0900 Essentials of Mathematics Cr. 5

Review of arithmetic, integers, fractions, decimals, percents, ratios. Algebra: solving equations and inequalities, algebraic expressions, graphing, and problem solving. No credits apply toward degree. Offered Every Term.

Restriction(s): Enrollment is limited to Undergraduate level students.

MAT 0993 Beginning Algebra Cr. 3,5

Satisfies General Education Requirement: Web Based Course Review of arithmetic, integers, fractions, decimals, percents, ratios. Algebra: solving equations and inequalities, algebraic expressions, graphing, problem solving. No credits apply toward degree. Offered Every Term.

Course Material Fees: \$124

MAT 0995 Intermediate Algebra Cr. 3

Exponents and radicals, solving polynomial and other types of equations and inequalities, graphs and systems of linear equations, introduction to functions, elementary geometry. No credits apply toward degree. Offered Every Term.

Prerequisites: MAT 0993 with a minimum grade of CNC (must be taken at WSU) or MAT Permit to Reg ACT/SAT with a test score minimum of 2-4 or Math Permit to Reg - L1-L4 with a test score minimum of 2-4

Restriction(s): Enrollment is limited to Undergraduate level students.

Course Material Fees: \$124

MAT 1000 Mathematics in Today's World Cr. 3

Satisfies General Education Requirement: Quantitative Experience Comp An exploration of current applications of mathematics, such as gerrymandering, consumer mathematics, cryptography, identification numbers, art, music, statistical design, optimal decision making, and risk assessment. Offered Every Term.

Restriction(s): Enrollment is limited to Undergraduate level students.

MAT 1050 Algebra With Trigonometry Cr. 5,7

Satisfies General Education Requirement: Quantitative Experience Comp Algebra: properties of the real number system, equations and inequalities, lines, graphs, introduction to functions, exponents, logarithms. Geometry and trigonometry: basic concepts, introduction to trigonometric functions, solving right triangles. Mathematics, mathematics education, science, and engineering majors should elect the 7-credit version of this course. If elected for 5 credits, only 2 credits apply toward degree; if elected for 7 credits, only 3 credits apply toward degree. Offered Every Term.

Prerequisites: MAT 0993 with a minimum grade of CNC (must be taken at WSU) or MAT Permit to Reg ACT/SAT with a test score minimum of 2-4 or Math Permit to Reg - L1-L4 with a test score minimum of 2-4

MAT 1110 Mathematics for Elementary School Teachers I Cr. 3

Satisfies General Education Requirement: Quantitative Experience Comp Problem solving, sets, functions, reasoning, number theory, whole numbers, integers, fractions, decimals. Offered Fall, Winter.

Prerequisites: MAT 1050-6999 with a minimum grade of C- (must be taken at WSU) or MAT 0995 with a minimum grade of CNC (must be taken at WSU) or Math Permit to Reg - L1-L4 with a test score minimum of 3-4 or MAT Permit to Reg ACT/SAT with a test score minimum of 3-4

MAT 1120 Mathematics for Elementary School Teachers II Cr. 3

Satisfies General Education Requirement: Quantitative Experience Comp Statistics, probability, geometry, and measurement. Offered Fall, Winter.

Prerequisites: MAT 1110 with a minimum grade of C- (must be taken at WSU) or MAT Permit to Reg ACT/SAT with a test score minimum of 3-4 or Math Permit to Reg - L1-L4 with a test score minimum of 3-4

MAT 1500 College Algebra for the Social and Management Sciences Cr. 3

Satisfies General Education Requirement: Quantitative Experience Comp Equations and inequalities, graphs and functions, polynomial and rational functions, exponential and logarithmic functions. Offered Every Term.

Prerequisites: MAT 1050 with a minimum grade of C- (must be taken at WSU) or MAT Permit to Reg ACT/SAT with a test score minimum of 3-4 or Math Permit to Reg - L1-L4 with a test score minimum of 3-4

Course Material Fees: \$124

MAT 1800 Elementary Functions Cr. 4

Satisfies General Education Requirement: Quantitative Experience Comp Basic definition and concept of function. Definitions, properties and graphs of polynomial, rational, exponential, logarithmic, trigonometric, and inverse trigonometric functions. Only two degree credits after MAT 1500. Offered Every Term.

Prerequisites: MAT 1050 with a minimum grade of C- (must be taken at WSU) or MAT Permit to Reg ACT/SAT with a test score minimum of 3-4 or Math Permit to Reg - L1-L4 with a test score minimum of 3-4

MAT 1990 Precalculus Workshop Cr. 2

Students work cooperatively in groups to solve challenging problems related to precalculus. Learning is through discovery rather than by lecture. Offered Every Term.

MAT 2010 Calculus I Cr. 4

Satisfies General Education Requirement: Quantitative Experience Comp Calculus as the study of change. Definitions, concepts, and interpretations of the derivative and the definite and indefinite integrals; differentiation, integration, applications. No credit after former MAT 1510. Offered Every Term.

Prerequisites: MAT 1800 with a minimum grade of C- (must be taken at WSU) or MAT Permit to Reg ACT/SAT with a test score minimum of 4 or Math Permit to Reg - L1-L4 with a test score minimum of 4

MAT 2020 Calculus II Cr. 4

Satisfies General Education Requirement: Quantitative Experience Comp Review definition of definite integral and fundamental theorem of calculus. Techniques of integration; approximate integration; improper integrals; applications of integration. Sequences and series. Approximating functions by polynomials and Taylor series. Offered Every Term.

Prerequisites: MAT 2010 with a minimum grade of C-

MAT 2030 Calculus III Cr. 4

Multivariable calculus with applications. Vectors and vector functions in two and three dimensions; functions of several variables; differentiation; integration; vector calculus. Offered Every Term.

Prerequisites: MAT 2020 with a minimum grade of C-

MAT 2110 Calculus Workshop I Cr. 2

Students work cooperatively in groups to solve challenging problems related to calculus. Learning is through discovery rather than by lecture. Offered Every Term.

Prerequisite: MAT 2010 (may be taken concurrently) with a minimum grade of C-

MAT 2120 Calculus Workshop II Cr. 2

Students work cooperatively in groups to solve challenging problems related to calculus. Learning is through discovery rather than by lecture. Offered Winter.

Prerequisite: MAT 2020 (may be taken concurrently) with a minimum grade of C-

MAT 2150 Differential Equations and Matrix Algebra Cr. 4

Differential equations and applications; basic operations of matrices from linear algebra. Only one degree credit after MAT 2350. Offered Every Term.

Prerequisites: MAT 2030 with a minimum grade of C-

MAT 2250 Elementary Linear Algebra Cr. 3

Topics include: systems of linear equations, matrices, vector spaces, basis, dimension, inner products, linear transformations and eigenvalues. Applications presented. Offered Every Term.

Prerequisites: MAT 2020 with a minimum grade of C-

MAT 2350 Elementary Differential Equations Cr. 3

Topics include: first order equations, higher order linear equations, Laplace transforms, linear systems. Applications presented throughout the course. No degree credit after MAT 2150. Offered Every Term.

Prerequisites: MAT 2030 with a minimum grade of C- and MAT 2250 with a minimum grade of C-

MAT 2860 Discrete Mathematics Cr. 3

Foundations of mathematics: logic and mathematical reasoning; sets, functions, sequences; the integers and the Euclidean algorithm; induction, recursive definitions and recurrence relations; graphs. Combinatorics. Graph theory. Boolean algebra. No credit after former MAT 1860 or 1870. Offered Yearly.

Prerequisites: MAT 2010 with a minimum grade of C-

MAT 3430 Applied Differential and Integral Calculus Cr. 4

Limits, derivatives, applications of derivatives, definite integrals and their applications, and trigonometric functions. No degree credit in College of Liberal Arts and Sciences. Offered Every Term.

Prerequisites: MAT 1800 with a minimum grade of C-

Equivalent: ET 3430

MAT 3450 Applied Calculus and Differential Equations Cr. 4

Continuation of MAT/ET 3430, including logarithmic and exponential functions, first and second order ordinary differential equations, vectors, polar coordinates, Laplace transforms, Taylor series, and Fourier series. No degree credit in College of Liberal Arts and Sciences. Offered Every Term.

Prerequisites: ET 3430 with a minimum grade of C- or MAT 3430 with a minimum grade of C-

Equivalent: ET 3450

MAT 4990 Directed Study: Honors Program Cr. 1-4

Offered Intermittently.

Repeatable for 8 Credits

MAT 5000 Fundamental Concepts of Mathematics and Proof Writing Cr. 3

Fundamental concepts: basic logic, basic set theory, functions, equivalence relations. Proof: methods of proof, structures of proofs, proof-writing in a variety of mathematical subjects. Not considered a 5000+ level course for undergraduate degree requirements in mathematics; no credit towards graduate degree in mathematics. Offered Fall, Winter.

Prerequisites: MAT 2250 with a minimum grade of C- or MAT 2860

MAT 5070 Elementary Analysis Cr. 4

Topics include: the real numbers, cardinality, sequences, limits, continuity, uniform continuity, differentiation, integration. Offered Fall, Winter.

Prerequisites: 1 of MAT 2250, MAT 2350, MAT 2150 and MAT 2030 with a minimum grade of C- and MAT 2150 with a minimum grade of C- or MAT 2250 with a minimum grade of C- or MAT 2350 with a minimum grade of C-

MAT 5100 Numerical Methods I Cr. 3

Numerical errors; solutions of nonlinear equations; polynomial interpolation; numerical approximation; numerical integration and differentiation; numerical solutions of systems of linear equations; numerical solutions of ordinary differential equations. Offered Yearly.
Prerequisites: 1 of CSC 1100, BE 1500 and MAT 2030 with a minimum grade of C- and MAT 2250 with a minimum grade of C- and BE 1500 with a minimum grade of C- or CSC 1100 with a minimum grade of C- and CSC 1101 with a minimum grade of C-

MAT 5110 Numerical Methods II Cr. 3

Numerical linear algebra topics, including eigenvalue problems, conjugate-gradient method, GMRES method; numerical solution of ordinary differential equations, Runge-Kutta methods; numerical solutions of partial differential equations, finite difference methods. Offered Winter.

Prerequisites: MAT 5100 with a minimum grade of C- and MAT 2150 with a minimum grade of C- or MAT 2350 with a minimum grade of C-

MAT 5120 Abstract Algebra for Middle School Teachers Cr. 3

Topics from elementary abstract algebra underpinning middle school mathematics curriculum; historical connections; role of abstraction and proof in mathematics. No credit towards major in mathematics or secondary mathematics. Offered for undergraduate credit only. Offered Fall, Winter.

Prerequisites: MAT 1120 with a minimum grade of C- and MAT 1800 with a minimum grade of C-

Restriction(s): Enrollment is limited to Undergraduate level students.

Equivalent: MAE 5120

MAT 5130 Problem Solving for Middle School Teachers Cr. 3

Development of mathematical problem solving in middle grades mathematics education; study of non-routine problems; problem solving strategies; historical connections; connections to selected mathematics content and to topics in other disciplines. No credit towards a mathematics major or secondary mathematics education major. Offered for undergraduate credit only. Offered Spring/Summer.

Prerequisites: MAT 1120 with a minimum grade of C- and MAT 1800 with a minimum grade of C-

Restriction(s): Enrollment is limited to Undergraduate level students.

Equivalent: MAE 5130

MAT 5180 Geometry for Middle School Teachers Cr. 3

Development of Euclidean geometry as a mathematical system; related historical topics; introduction to other geometries; selected topics such as transformations and tessellations. No credit toward a major or minor for secondary mathematics teaching. Offered for undergraduate credit only. Offered Fall, Winter.

Prerequisites: MAT 1110 with a minimum grade of C- and MAT 1120 with a minimum grade of C-

Restriction(s): Enrollment is limited to Undergraduate level students.

Equivalent: MAE 5100

MAT 5190 Number Theory for Middle School Teachers Cr. 3

Topics from elementary theory of numbers which underlie middle school mathematics; historical connections; role of abstraction and proof in mathematics. No credit toward a major or minor for secondary mathematics teaching. Offered for undergraduate credit only. Offered Fall, Winter.

Prerequisites: MAT 1800 with a minimum grade of C- or MAT 1120 with a minimum grade of C-

Restriction(s): Enrollment is limited to Undergraduate level students.

Equivalent: MAE 5110

MAT 5210 Advanced Calculus Cr. 4

Functions of many variables; limits, continuity; differentiation, mean value theorems; implicit and inverse function theorems; extremal problems, Lagrange multipliers; fixed-point methods; Taylor series; Fourier series, uniform convergence; improper integrals. Offered Yearly.

Prerequisites: MAT 2250 with a minimum grade of C-

MAT 5220 Partial Differential Equations Cr. 4

Partial differential equations of mathematical physics; method of separation of variables; Fourier series; Sturm-Liouville eigenvalue problems; boundary-value problems; method of eigenfunction expansion. Optional topics include: Green's functions; solutions by Fourier transform; method of characteristics. Offered Every Other Year.

Prerequisites: MAT 5070 with a minimum grade of C-

MAT 5230 Complex Variables and Applications Cr. 4

Cauchy-Riemann equations; elementary functions; mappings by elementary functions; the Cauchy integral formula; Morera's theorem; Taylor series; Laurent series; residues and poles; conformal mappings. Optional topics: improper integrals, the Schwarz-Christoffel transformations; potential theory; applications to differential and integral equations. No credit after MAT 6600. Offered Every Other Year.

Prerequisites: MAT 5070 with a minimum grade of C-

MAT 5280 Methods of Differential Equations Cr. 3

Linear nth order differential equations; linear systems of differential equations (constant and periodic coefficients); oscillation and comparison theorems for second order differential equations; boundary value problems; stability theory (Liapunov's direct method and frequency domain stability criteria); asymptotic solutions; autonomous non-linear systems; classification of singularities. Offered Every Other Year.

Prerequisites: MAT 2150 with a minimum grade of C- or MAT 2350 with a minimum grade of C-

MAT 5350 Logical Systems I Cr. 4

Metaresults concerning formal systems of sentential and first-order logics; soundness, completeness; independence of axioms; introduction to recursive functions; formalization of elementary arithmetic; discussion of Godel's incompleteness theorem and Church's Theorem. Offered Every Other Year.

Prerequisites: MAT 5600 with a minimum grade of C- or PHI 2850 with a minimum grade of C- or PHI 2860 with a minimum grade of C- or PHI 5050 with a minimum grade of C- or MAT 5420 with a minimum grade of C-
Equivalent: PHI 5350

MAT 5400 Elementary Theory of Numbers Cr. 3

Primes and the Fundamental Theorem of Arithmetic; greatest common divisor, least common multiple, Euclidean Algorithm; congruences, theorems of Fermat, Wilson and Euler; arithmetic functions; linear Diophantine equations; quadratic congruences and the Law of Quadratic Reciprocity. Optional topics include: applications to cryptography, perfect numbers, primitive roots and indices, Fibonacci numbers, Pythagorean triples, sums of squares, continued fractions. Offered Yearly.

Prerequisites: MAT 2030 with a minimum grade of C- and MAT 2250 with a minimum grade of C-

MAT 5410 Applied Linear Algebra Cr. 4

Gaussian elimination, vector spaces, the four fundamental subspaces, orthogonality, least squares approximation, determinants, eigenvalues and eigenvectors, positive definite matrices, singular value decomposition, linear transformations, complex matrices. Applications such as differential and difference equations, Markov processes, graphs and networks, Fourier series, computer graphics, numerical linear algebra. Offered Every Other Year.

Prerequisites: MAT 2030 with a minimum grade of C- and MAT 2250 with a minimum grade of C-

MAT 5420 Algebra I Cr. 4

Abstract concepts: sets, mappings, equivalence relations, induction, general methods of proof. Group theory: groups, subgroups, cyclic groups, direct products, cosets, Lagrange's Theorem, quotient groups, homomorphisms, permutation groups. Rings and fields (basic definitions). Only two credits apply after either MAT 6170 or 6180; no credit after both MAT 6170 and 6180. Offered Fall, Winter.

Prerequisites: MAT 2030 with a minimum grade of C- and MAT 2250 with a minimum grade of C-

MAT 5430 Algebra II Cr. 4

Group theory continued: Sylow Theorems, finite abelian groups. Ring theory: rings, integral domains, fields of quotients, homomorphisms, ideals, quotient rings, P.I.D.s, U.F.D.s, polynomial rings. Advanced topics in linear algebra: canonical forms. Field theory: extensions, splitting fields, finite fields, geometric constructions. Offered Fall, Winter.

Prerequisites: MAT 5420 with a minimum grade of C-

MAT 5520 Introduction to Topology Cr. 3

An introduction to topology, mostly through an intuitive approach. Topics chosen from among: topological equivalence and topological properties, complexes, Euler characteristic, connectedness, compactness, continuity, Brouwer's Fixed Point Theorem, vector fields, Hairy Ball Theorem, n-dimensional spaces, classification of surfaces, cut and paste techniques, the Moebius band, orientability, the fundamental group. No credit toward graduate degree in mathematics or statistics. Offered Yearly.

Prerequisites: MAT 2030 with a minimum grade of C- and MAT 5000 with a minimum grade of C-

MAT 5530 Elementary Differential Geometry and its Applications Cr. 3

Introduction to the differential geometry of curves and surfaces in three-dimensional space. Curvature, torsion, Frenet formulas, fundamental theorem of space curves. Gauss and mean curvature, asymptotic and principal curves, geodesics, Gauss-Bonnet theorem. Applications such as pursuit curves, roulettes, brachistochrones, precession of Foucault's pendulum, design of packaging machines, shapes and soap films. Offered Intermittently.

Prerequisites: MAT 2030 with a minimum grade of C- and MAT 2250 with a minimum grade of C-

MAT 5600 Introduction to Analysis I Cr. 4

Completeness, convergence, compactness, connectedness and continuity in the context of metric spaces; applications to differential calculus. Offered Fall, Winter.

Prerequisites: MAT 5070 with a minimum grade of C-

MAT 5610 Introduction to Analysis II Cr. 3

Integration, point-wise and uniform convergence of sequences and series of functions; power series; introduction to analytic functions; Fourier series; possible additional topics. Offered Fall, Winter.

Prerequisites: MAT 5600 with a minimum grade of C-

MAT 5700 Introduction to Probability Theory Cr. 4

Probability spaces; combinatorial analysis; independence and conditional probability; discrete and continuous random variables including binomial, Poisson, exponential and normal distributions; expectations; joint, marginal and conditional distribution functions; law of large numbers; central limit theorems. Offered Fall, Winter.

Prerequisites: 1 of MAT 2150, MAT 2250, MAT 2350 and MAT 2030 with a minimum grade of C- and MAT 2150 with a minimum grade of C- or MAT 2250 with a minimum grade of C- or MAT 2350 with a minimum grade of C-

MAT 5710 Introduction to Stochastic Processes Cr. 3

Non-measure-theoretic introduction to the theory of stochastic processes and its applications, with emphasis on Markov processes in both discrete and continuous time, the Poisson process, and Brownian motion. Offered Every Other Year.

Prerequisites: MAT 5700 with a minimum grade of C-

MAT 5740 The Theory of Interest Cr. 3

Concrete problems used to explore concepts in the theory of interest, including measurement of interest, annuities, yield rates, amortization, bonds, and stochastic approaches. Students prepare for the actuarial examination FM/2. Offered Yearly.

Prerequisites: MAT 2020 with a minimum grade of C-

MAT 5750 Mathematics of Finance Cr. 3

Topics to be covered include: financial markets, binomial models, stocks and options, Black-Scholes formula, hedging, bond models and interest rate options, and computational methods for bonds. Offered Winter.

Prerequisites: 1 of MAT 2150, MAT 2350 and MAT 5700 with a minimum grade of C-

MAT 5770 Mathematical Models in Operations Research Cr. 3

Deterministic and probabilistic mathematical modeling of real-world problems. Linear and nonlinear programming; Markov chains; queuing theory; inventory models; Markov decision processes. Offered Every Other Year.

Prerequisites: MAT 2030 with a minimum grade of C-, MAT 2250 with a minimum grade of C-, and MAT 5700 with a minimum grade of C-

MAT 5870 Methods of Optimization Cr. 3

Introduction to basic mathematical theory and computational methods of optimization; unconstrained and constrained optimization problems; optimality conditions in various optimization problems; numerical methods of optimization. Offered Yearly.

Prerequisites: MAT 2150 with a minimum grade of C- or MAT 2350 with a minimum grade of C-

MAT 5890 Special Topics in Mathematics Cr. 3-4

Material currently of interest to students and faculty. Topics to be announced in Schedule of Classes. Offered Intermittently.

Prerequisites: 1 of MAT 2250, MAT 2350, MAT 2150 and MAT 2030 with a minimum grade of C- and MAT 2150 with a minimum grade of C- or MAT 2250 with a minimum grade of C- or MAT 2350 with a minimum grade of C-

Repeatable for 12 Credits

MAT 5990 Directed Study Cr. 1-4

Undergraduates who elect this course must be mathematics majors of honors caliber. Content will vary to satisfy needs of individual student. Offered Every Term.

Repeatable for 8 Credits

MAT 5992 Teaching Mathematics in College Cr. 1

Preparation for first semester of teaching in developmental-level mathematics course. Content presentation, test-writing, grading, classroom management, use of technology. Students are videotaped and critiqued. Required of all graduate teaching assistants in Mathematics Department. Offered for S and U grades only. Offered Fall.

Restriction(s): Enrollment is limited to Graduate or Undergraduate level students; enrollment limited to students with a class of Senior; enrollment is limited to students with a major in Mathematics or Mathematics Honors.

MAT 5993 Writing Intensive Course in Mathematics Cr. 0

Satisfies General Education Requirement: Writing Intensive Competency Disciplinary writing assignments under the direction of a faculty member. Must be selected in conjunction with a course designated as a corequisite. See section listing in Schedule of Classes for corequisites available each term. Satisfies the University General Education Writing-Intensive Course in the Major requirement. Required for all majors. Offered Every Term.

Prerequisites: AFS 2390 with a minimum grade of C or ENG 2390 with a minimum grade of C or ENG 3010 with a minimum grade of C or ENG 3020 with a minimum grade of C or ENG 3050 with a minimum grade of C

Restriction(s): Enrollment is limited to Undergraduate level students.

MAT 6130 Discrete Mathematics Cr. 3

Foundations of mathematics: logic, sets, functions, sequences. The integers. Matrices. Mathematical reasoning: induction, recursive definitions and recurrence relations. Combinatorics. Graph theory. Boolean algebra. No credit after former MAT 1860 or 1870. Not available to Math majors for degree credit. Offered Yearly.

Prerequisites: MAT 2010 with a minimum grade of C-

Restriction(s): Enrollment limited to students in the College of Education.

MAT 6140 Geometry: An Axiomatic Approach Cr. 3

Foundations: logic, axiom systems, models; Hilbert's axioms; the parallel postulate; Euclidean geometry; non-Euclidean geometries; hyperbolic geometry; philosophical questions. Offered Yearly.

Prerequisites: MAT 5000 with a minimum grade of C-

MAT 6150 Probability and Statistics for Teachers Cr. 4

Counting techniques, discrete sample spaces and probability, random variables, mean and variance, joint distributions, the binomial and normal distributions, central limit theorem, estimation and hypothesis testing. Not available to Math majors for degree credit. Offered Fall, Winter.

Prerequisites: MAT 1800 with a minimum grade of C

Restriction(s): Enrollment limited to students in the College of Education.

MAT 6170 Algebra: Ring Theory Through Exploration, Conjecture, and Proof Cr. 4

Rings: basic definitions; properties; examples including the integers, rationals, reals, and complex numbers; ideals; homomorphisms; and divisibility. Connections to high school algebra. Students will be involved in the mathematical processes of exploration, conjecture, and proof. Only two credits after MAT 5420; no credit after MAT 5430. Offered Intermittently.

Prerequisites: MAT 5000 with a minimum grade of C-

MAT 6180 Algebra: Group Theory Through Exploration, Conjecture, and Proof Cr. 3

Groups: basic definitions, properties, examples, subgroups, cyclic groups, permutation groups, homomorphisms, quotient groups. Connections to high school algebra. Students will be involved in the mathematical processes of exploration, conjecture, and proof. Offered Yearly.

Prerequisites: MAT 5000 with a minimum grade of C-

MAT 6200 Teaching Arithmetic, Algebra and Functions from an Advanced Perspective Cr. 3

Students gain profound understanding of K-12 mathematics. Concepts underlying K-12 topics and procedures; connections to higher mathematics. Teaching with Simplicity; applying mathematical understanding to teaching practices. Offered Yearly.

Prerequisites: MAT 5120 with a minimum grade of C- or MAT 6170 with a minimum grade of C- or MAT 6180 with a minimum grade of C-
Equivalent: MAE 6200

MAT 6210 Teaching Geometry, Probability and Statistics, and Discrete Mathematics from an Advanced Perspective Cr. 3

Historical perspectives, common conceptions and misconceptions, applications, technology, and mathematical connections relative to teaching geometry (including trigonometry), probability and statistics, and discrete mathematics in secondary school. Offered Yearly.

Equivalent: MAE 6210

MAT 6420 Advanced Linear Algebra Cr. 3

Vector spaces and linear maps from a basis free perspective. Vector spaces, linear transformations, dual spaces, quotient spaces, inner product spaces, quadratic forms, adjoint operators, normal operators, spectral theorem, Jordan canonical form, trace and determinant. Offered Winter.

Prerequisites: MAT 5430 with a minimum grade of C-

MAT 6480 Introduction to Quantum Computing Cr. 3

Serves as an introduction to quantum computing and brings together students with different backgrounds in mathematics, physics, chemistry, and computer science to foster interdisciplinary connections in the areas of quantum computing and quantum information. A strong background in linear algebra over the complex numbers as well as differential and integral calculus is required. Familiarity with quantum physics and complexity theory will be helpful, but it is not required. Offered Every Term.

Equivalent: PHY 6480

MAT 6500 Topology I Cr. 3

Topological spaces and continuous functions; connectedness; compactness; product and quotient spaces; metric spaces; Urysohn's lemma; Tietze extension theorem; homotopy; covering spaces and path lifting; the fundamental group and examples; Brouwer fixed point theorem and applications. Offered Yearly.

Prerequisites: MAT 5610 with a minimum grade of C-

MAT 6600 Complex Analysis Cr. 2-4

Complex differentiation; elementary functions; Cauchy's integral theorem; power series; Laurent expansions; singularities; residue theorem; entire and meromorphic functions; Riemann mapping theorem. Offered for three credits only, if student has taken MAT 5230. Offered Yearly.

Prerequisites: MAT 5610 with a minimum grade of C-

MAT 6990 Internship in Mathematical Sciences Cr. 1-3

Experience in industry, or in a research laboratory, or in an institution, using tools from the mathematics curriculum. Students provide a written report based on the internship experience. Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students; enrollment is limited to students in the Department of Mathematics.

Repeatable for 3 Credits

MAT 7200 Ordinary Differential Equations Cr. 3

Existence and uniqueness of solutions; linear solutions and linearization; linear differential equations in the complex domain; solutions near regular and irregular singular points; autonomous systems; stability theory; limit cycles; perturbation theory; boundary value problems; Green's function; spectral theory. Offered Every Other Year.

Prerequisites: MAT 5610 with a minimum grade of C or MAT 7600 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

MAT 7210 Partial Differential Equations Cr. 3

Linear partial differential equations; fundamental solutions; distributions and their Fourier transforms; hyperbolic equations; Cauchy-Kovalevsky theorem; energy inequalities; weak solutions; propagation of singularities; elliptic equations; maximum principles; Sobolev spaces and inequalities; Garding's inequality; existence and regularity of solutions of Dirichlet problems; fundamental solutions of parabolic equations; strongly continuous semigroups. Offered Every Other Year.

Prerequisites: MAT 5610 with a minimum grade of C or MAT 7600 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

MAT 7220 Advanced Numerical Analysis Cr. 3

Modern iterative methods for solving systems of linear and nonlinear equations, such as: conjugate gradient method, generalized minimum residue (GMRES) method, inexact Newton's Method; Newton-GMRES, multigrid and domain decomposition methods. Offered Every Other Year.

Prerequisite: MAT 5100 with a minimum grade of C- and MAT 5110 with a minimum grade of C-

Restriction(s): Enrollment is limited to Graduate level students.

MAT 7230 Finite Element Methods Cr. 3

Topics chosen at discretion of instructor from topics similar to: regularity theory for second order elliptic partial differential equations; Hamilton-Jacobi equations; conservation laws; evolution equations; semigroup theory; calculation of variations; nonvariational methods. Offered Every Other Year.

Prerequisite: MAT 5100 with a minimum grade of C- and MAT 5070 with a minimum grade of C-

Restriction(s): Enrollment is limited to Graduate level students.

MAT 7240 Advanced Partial Differential Equations Cr. 3

Continuation of MAT 7210. Variety of topics chosen by the instructor. Offered Every Other Year.

Prerequisite: MAT 7210 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

MAT 7270 Topics in Applied Mathematics Cr. 3-4

Topics of special interest such as differential equations; calculus of variations; elliptic functions; orthogonal functions; numerical methods; systems and control theory. Topics to be announced in Schedule of Classes . Offered Every Other Year.

Restriction(s): Enrollment is limited to Graduate level students.

Repeatable for 12 Credits

MAT 7400 Advanced Algebra I Cr. 4

Permutation groups; Sylow Theorems; Jordan-Holder theorem; solvable and nilpotent groups; free groups; unique factorization domains; principal ideal domains; modules over principal ideal domains; linear transformations; Cayley-Hamilton theorem; free modules; noetherian rings; localization. Offered Every Other Year.

Prerequisite: MAT 5430 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

MAT 7410 Advanced Algebra II Cr. 3

Field extensions; finite fields; Galois theory; classical applications of Galois theory; algebraic closure; tensor and exterior algebras; determinants; alternating, quadratic and hermitian forms. Offered Every Other Year.

Prerequisite: MAT 7400 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

MAT 7470 Topics in Algebra Cr. 3-4

Selected topics from linear algebra; homological algebra; group theory; field theory. Topics to be announced in Schedule of Classes . Offered Intermittently.

Prerequisite: MAT 7410 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

Repeatable for 12 Credits

MAT 7500 Topology II Cr. 3

Smooth manifolds and maps; examples from projective spaces, from Lie groups, and from low dimensions; local coordinates; partitions of unity; tangent vectors and tangent bundles; differentials of smooth maps; vector fields; local one-parameter groups of diffeomorphisms; differential forms; integration and Stokes theorem; definition of deRham cohomology. Offered Every Other Year.

Prerequisite: MAT 6500 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

MAT 7510 Algebraic Topology I Cr. 3

Homology and its applications including fixed-point theorems; Jordan-Brouwer separation theorem; invariance of domain; CW-complexes; Kunneth theorem. Offered Every Other Year.

Prerequisite: MAT 5430 with a minimum grade of C and MAT 6500 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

MAT 7520 Algebraic Topology II Cr. 3

Cohomology ring; orientation and duality on manifolds; homotopy theory, Hurewicz theorem. Offered Every Other Year.

Prerequisite: MAT 7510 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

MAT 7570 Topics in Geometry and Topology Cr. 3-4

Selected topics from geometry and topology; Lie groups, Riemannian and differential geometry. Offered Fall, Winter.

Prerequisite: MAT 7510 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

MAT 7600 Real Analysis I Cr. 3

Lebesgue measure; general measures; measurable functions; integration (monotone and dominated convergence theorems); function spaces; Lebesgue spaces; modes of convergence; product measures; Fubini theorem. Offered Every Other Year.

Prerequisite: MAT 5610 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

MAT 7610 Real Analysis II Cr. 3

Differentiation; relationship between differentiation and integration; Radon-Nikodym theorem; Fourier transforms; Hilbert and Banach spaces; selected topics. Offered Every Other Year.

Prerequisite: MAT 7600 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

MAT 7670 Topics in Analysis Cr. 3

Topics include: advanced harmonic analysis theory, applications to PDEs, geometric analysis, Fourier analysis, advanced theory of complex variables, analysis on manifolds, advanced PDEs. Offered Yearly.

Prerequisite: MAT 7610 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

MAT 7700 Advanced Probability Theory I Cr. 3

Probability spaces; random variables; expectations and moments; convergence concepts; product spaces and Kolmogorov extension theorem; separability of random processes; continuity of random processes; conditional expectation; independence. Offered Every Other Year.

Prerequisite: MAT 5700 with a minimum grade of C and MAT 7600 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

MAT 7710 Advanced Probability Theory II Cr. 3

Law of large numbers; characteristic functions; limit theorems; random walks; Markov processes; stationary processes; ergodic theory; martingales; stopping times. Offered Every Other Year.

Prerequisite: MAT 7700 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

MAT 7770 Special Topics in Probability Cr. 3-4

Topics of special interest such as Markov processes; time series; ergodic theory; random equations; probability measures on algebraic structures; probability measures in Banach spaces; martingales; Brownian motion; stochastic integrals. Topics to be announced in Schedule of Classes. Offered Intermittently.

Prerequisite: MAT 7710 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

Repeatable for 12 Credits

MAT 7990 Directed Study Cr. 1-4

Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students.

Repeatable for 12 Credits

MAT 7999 Master's Essay Direction Cr. 1-3

Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students with a class of Candidate Masters.

Repeatable for 3 Credits

MAT 8000 Advanced Topics in Mathematics Cr. 2-4

Topics to be announced in Schedule of Classes. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate level students.

Repeatable for 24 Credits

MAT 8999 Master's Thesis Research and Direction Cr. 1-8

Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students with a class of Candidate Masters.

Repeatable for 8 Credits

MAT 9990 Pre-Doctoral Candidacy Research Cr. 1-8

Research in preparation for doctoral dissertation. Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students.

Repeatable for 12 Credits

MAT 9991 Doctoral Candidate Status I: Dissertation Research and Direction Cr. 7.5

Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students.

MAT 9992 Doctoral Candidate Status II: Dissertation Research and Direction Cr. 7.5

Offered Every Term.

Prerequisite: MAT 9991 with a minimum grade of S

Restriction(s): Enrollment is limited to Graduate level students.

MAT 9993 Doctoral Candidate Status III: Dissertation Research and Direction Cr. 7.5

Offered Every Term.

Prerequisite: MAT 9992 with a minimum grade of S

Restriction(s): Enrollment is limited to Graduate level students.

MAT 9994 Doctoral Candidate Status IV: Dissertation Research and Direction Cr. 7.5

Offered Every Term.

Prerequisite: MAT 9993 with a minimum grade of S

Restriction(s): Enrollment is limited to Graduate level students.

MAT 9995 Candidate Maintenance Status: Doctoral Dissertation Research and Direction Cr. 0

Offered Every Term.

Prerequisite: MAT 9994 with a minimum grade of S

Restriction(s): Enrollment is limited to Graduate level students.

Course Material Fees: \$370.26

Repeatable for 0 Credits

MCT - MECHANICAL ENGINEERING TECHNOLOGY

MCT 3010 Instrumentation Cr. 3

Theory and use of measurement instruments and techniques; standards and dimensional units; experimental procedures and data analysis; sensors and transducers for parameters such as displacement, stress, strain, force, torque, temperature, motion, sound. Offered Fall, Winter.

Prerequisites: EET 2000 with a minimum grade of C- and PHY 2140 with a minimum grade of C-

Restriction(s): Enrollment is limited to Undergraduate level students.

Course Material Fees: \$25

MCT 3100 Mechanics of Materials Cr. 3

The elastic behavior of load bearing materials. Tension, compression, shear, combined stress, bending, torsion and columns. Failure analysis. Offered Fall, Winter.

Prerequisites: ET 3030 with a minimum grade of C- and May be taken concurrently: ET 3430 with a minimum grade of C-

Course Material Fees: \$10

MCT 3410 Kinematics and Dynamics of Machines Cr. 3

Velocity and acceleration of moving parts in machine elements and mechanisms; cam, gear, and gear train design; static and inertial forces, balancing, gyroscopic effects, and critical speeds. Offered Fall, Winter.

Prerequisite: ET 3050 with a minimum grade of C-

MCT 4150 Applied Thermodynamics Cr. 3

First and second laws of thermodynamics; power and refrigeration cycles; gas and vapor mixtures, nozzle and blade passage flow and combustion. Introduction to compressible flow. Direct energy conversion. Offered Yearly.

Prerequisites: ET 3430 with a minimum grade of C-

Course Material Fees: \$10

MCT 4180 Fluid Mechanics Cr. 3

Properties of fluids, fundamentals of fluid flow, dimensional analysis and similitude, and flow measurement techniques. Analysis of hydrostatic equipment, hydrokinetic equipment and systems. Introduction to network analysis and calculation. Offered Yearly.

Prerequisites: ET 3030 with a minimum grade of C- and May be taken concurrently: ET 3450 with a minimum grade of C-

MCT 4210 Heat Transfer Cr. 3

Basic modes of heat transfer and their applications. Steady state conduction in one and two dimensions and transient conduction. Numerical and graphical methods. Heat exchanges. Condensation and boiling heat transfer. Introduction to mass transfer. Offered Yearly.

Prerequisites: May be taken concurrently: MAT 3450 with a minimum grade of C- and PHY 2140 with a minimum grade of C-

MCT 4400 Design of Machine Elements Cr. 3

Fundamental concepts in the design of the separate elements which compose the machine; application of properties and mechanics of materials modified by practical considerations. Offered Yearly.

Prerequisites: MCT 3100 with a minimum grade of C- and MCT 3410 with a minimum grade of C-

MCT 4990 Guided Study Cr. 1-6

Supervised study and instruction in the field selected by the student. Offered Intermittently.

Repeatable for 6 Credits

MCT 5210 Energy Sources and Conversion Cr. 3

Various energy sources and how they are utilized. Wind, solar, geothermal, fuel cells, storage devices, energy economics and transportation techniques, related to harnessing energy to a usable form such as electricity and heat. Offered Fall.

Prerequisites: ET 3430 with a minimum grade of C- and PHY 2140 with a minimum grade of C-

MCT 6150 Hybrid Vehicle Technology Cr. 4

Technical concepts and design, energy analysis, unified modeling approach, optimization, control; power generation, engine overview, concepts of hybridization, on-board energy storage; overview of motors, transmissions, fuel cells, future applications. Offered Yearly.

Prerequisites: ET 3450 with a minimum grade of C- and PHY 2140 with a minimum grade of C-

MD - MEDICAL DOCTOR

MD 7230 Resident: WSU-Sponsored Clinical Rotation Cr. 38

Restriction(s): Enrollment is limited to Medical level students.

MD1 - MEDICAL SCHOOL: YEAR 1

MD1 5050 Advanced Learning Strategies for Physicians in Training Cr. 2

Designed to provide students with knowledge, skills, and behaviors consistent with optimizing academic performance in the medical education learning environment. These include: using evidence-based programming designed to foster clinical/critical thinking skills, developing metacognitive awareness through exposure to and practice with highly effective learning techniques required for success in medical school, and assessing and providing feedback on information age competencies. Offered Yearly.

Restriction(s): Enrollment limited to students with a class of Med First Year.

MD1 5051 Foundations of Normal Structure and Function Cr. 4

Introduces students to the study of medicine beginning with the exploration of life at the molecular and cellular levels. The course content is delivered by faculty whose expertise encompasses the disciplines of Biochemistry, Cell Biology & Histology, Human Genetics, Pharmacology, and Physiology. Themes will include: biological membranes; protein function; fundamentals of inter- and intracellular signal transduction, cellular energetics; introduction to the biochemical and physiological effects of pharmaceutical drugs (pharmacodynamics) and to how the human body processes drugs (pharmacokinetics); the flow of genetic information at the molecular level and on the basic principles of human genetics; and advanced topics in human genetics and pharmacology, and with the examination of human fetal development from fertilization through the first eight weeks of life. Offered Yearly.

Restriction(s): Enrollment limited to students with a class of Med First Year.

MD1 5053 Block 3 Lab Cr. 2

The first portion of the course will cover the structure and function of the normal musculoskeletal, skin, peripheral nervous system. The second portion of the course will cover the structure and function of normal cardiopulmonary system. By the end of the course, students will be able to describe the gross anatomical structure, microanatomy, and normal development of these systems. They will also apply basic scientific principles from biochemistry, physiology, and pharmacology to describe the normal function. Offered Yearly.

Restriction(s): Enrollment limited to students with a class of Med First Year.

MD1 5054 Normal Structure and Function of the Gastrointestinal and Urinary Systems Cr. 3

Students will learn the structure and function of the normal gastrointestinal and urinary systems. By the end of the course, students will be able to describe the gross anatomical structure, microanatomy, and normal development of these systems. They will also apply basic scientific principles from biochemistry, physiology, and pharmacology to describe the normal function. The first portion of the course will cover the structure and function of the normal gastrointestinal system, including the oral cavity, the pharynx and esophagus, the stomach, the intestines, the anal canal, and the liver and associated digestive organs. The second portion of the course will cover the structure and function of the urinary system, including the renal system (kidneys) and the urinary tract. Offered Yearly.

Restriction(s): Enrollment limited to students with a class of Med First Year.

MD1 5055 Block 4 Lab Cr. 1

Students will learn the structure and function of the normal gastrointestinal and urinary systems. By the end of the course, students will be able to describe the gross anatomical structure, microanatomy, and normal development of these systems. They will also apply basic scientific principles from biochemistry, physiology, and pharmacology to describe the normal function. The first portion of the course will cover the structure and function of the normal gastrointestinal system, including the oral cavity, the pharynx and esophagus, the stomach, the intestines, the anal canal, and the liver and associated digestive organs. The second portion of the course will cover the structure and function of the urinary system, including the renal system (kidneys) and the urinary tract. Offered Yearly.

Restriction(s): Enrollment limited to students with a class of Med First Year.

MD1 5056 Normal Structure and Function of the Reproductive, Endocrine, Blood, and Lymphatic Systems Cr. 3

Students will learn the structure and function of the normal endocrine and reproductive systems, as well as the structure and function of the components of blood and the normal lymphatic system. By the end of the course, students will be able to describe the gross anatomical structure, microanatomy, and normal development of these systems. They will also apply basic scientific principles from biochemistry, physiology, and pharmacology to describe the normal function. The first portion of the course will cover the structure and function of the normal reproductive and endocrine systems. The second portion of the course will cover the structure and function of normal blood and the lymphatic system, including an introduction to basic immunology. Offered Yearly.

Restriction(s): Enrollment limited to students with a class of Med First Year.

MD1 5057 Block 5 Lab Cr. 1

Students will learn the structure and function of the normal endocrine and reproductive systems, as well as the structure and function of the components of blood and the normal lymphatic system. By the end of the course, students will be able to describe the gross anatomical structure, microanatomy, and normal development of these systems. They will also apply basic scientific principles from biochemistry, physiology, and pharmacology to describe the normal function. The first portion of the course will cover the structure and function of the normal reproductive and endocrine systems. The second portion of the course will cover the structure and function of normal blood and the lymphatic system, including an introduction to basic immunology. Offered Yearly.

Restriction(s): Enrollment limited to students with a class of Med First Year.

MD1 5058 Normal Structure and Function of the Central Nervous System Cr. 3

Students will learn the structure and function of the central nervous system (CNS). By the end of the course, students will be able to describe the major pathways and centers in the brain and spinal cord and their normal function including the special senses. This will include the disciplines of Gross Anatomy, Microanatomy, Biochemistry, Cell Biology, Pharmacology, Physiology, and Development (both anatomical and behavioral). Students will be able to demonstrate application of the principles of normal structure and function to a clinical scenario involving damage to the central nervous system by predicting the outcome. Offered Yearly.

Restriction(s): Enrollment limited to students with a class of Med First Year.

MD1 5059 Block 6 Lab Cr. 2

Students will learn the structure and function of the central nervous system (CNS). By the end of the course, students will be able to describe the major pathways and centers in the brain and spinal cord and their normal function including the special senses. This will include the disciplines of Gross Anatomy, Microanatomy, Biochemistry, Cell Biology, Pharmacology, Physiology, and Development (both anatomical and behavioral). Students will be able to demonstrate application of the principles of normal structure and function to a clinical scenario involving damage to the central nervous system by predicting the outcome. Offered Yearly.

Restriction(s): Enrollment limited to students with a class of Med First Year.

MD1 5060 Clinical Skills Course I Cr. 5

Designed to develop and demonstrate foundational knowledge and basic clinical skills in history-taking, patient examination, oral case presentation, clinical reasoning and performance of procedures required to participate in clinical service learning activities. Students who are competent in these foundational skills will then proceed to develop advanced skills in patient interviewing and physical examination emphasizing a patient-centered empathic and compassionate approach incorporating the patient's perspective, socioeconomic background and cultural intelligence, and protection of patient privacy required to participate in early clinical experiences. Offered Yearly.

Restriction(s): Enrollment limited to students with a class of Med First Year.

MD1 5061 Clinical Skills Course II Cr. 3

Designed to develop and demonstrate foundational knowledge and basic clinical skills in history-taking, patient examination, oral case presentation, clinical reasoning and performance of procedures required to participate in clinical service learning activities. Students who are competent in these foundational skills will then proceed to develop advanced skills in patient interviewing and physical examination emphasizing a patient-centered empathic and compassionate approach incorporating the patient's perspective, socioeconomic background and cultural intelligence, and protection of patient privacy required to participate in early clinical experiences. Offered Yearly.

Restriction(s): Enrollment limited to students with a class of Med First Year.

MD1 5062 Population, Patient, Physician and Professionalism (P4) Part I Cr. 9

Provides students the opportunity to learn, practice, and apply knowledge and skills as a physician-in-training in diverse urban clinical and community outreach settings. Through large group sessions, small group sessions, online modules, self-directed reflective assignments, and clinical and community engagement, students will actively participate in activities demonstrating the interconnectedness of the population, patient and physician. The course also emphasizes the need for students to quickly develop their professional identity as a physician-in-training by behaving professionally and demonstrating respect to their colleagues, faculty, patients and families. By engaging early with patients and potential patients, students' attitudes, as well as knowledge and skills, will be developed with a concentrated focus on understanding the patient's perspective, leading to true patient-centered care. Offered Yearly.

Restriction(s): Enrollment limited to students with a class of Med First Year.

MD1 5063 Normal Structure and Function of the Musculoskeletal, Skin and Peripheral Nervous Systems Cr. 2

The overall goal will be to engage students in the key concepts related to the pathogenesis, pathology, pathophysiology, basic principles of diagnosis and treatment of disease processes effecting the musculoskeletal organ system, skin and peripheral nervous system. Content areas include: review of the anatomy of the extremities and spine; upper and lower extremity fractures/injuries; development, normal structure/function and aging of bones and joints; metabolic and non-metabolic bone disease; scoliosis; disorders of the extracellular matrix and soft tissue; synovial fluid analysis; osteoarthritis; rheumatoid arthritis; septic arthritis; gout; CPPD deposition disease and pseudogout; ankylosing spondylitis; reactive arthritis; psoriatic arthritis; systemic lupus erythematosus; systemic sclerosis; skin tumors, rashes and infections; manifestations of neuromuscular diseases; and pharmacologic interventions for the treatment of musculoskeletal, peripheral nervous system and skin disorders. Offered Yearly.

Restriction(s): Enrollment limited to students with a class of Med First Year.

MD1 5065 Normal Structure and Function of the Cardiopulmonary Systems Cr. 3

The cardiovascular system component includes: review of the normal anatomy, embryology and physiology of the cardiovascular system; systemic hypertension; atherosclerosis and ischemic heart disease; basic electrophysiological principles; ECG interpretation; valvular heart disease; examination of the cardiovascular system; diseases of the pericardium; tumors of the cardiovascular system; non-atherosclerotic vascular disease; primary myocardial disease; cardiovascular disease in the elderly; congenital heart disease; congestive heart failure; nutritional management of patients with cardiovascular disease will be discussed. . The pulmonary system component includes: review of anatomy, histology and physiology of the respiratory system; arterial blood gases; numerous diseases associated with the pulmonary system; aging and the respiratory system; respiratory failure; introduction to sleep and sleep medicine; and relevant pharmacologic management of cardiovascular and pulmonary diseases. Offered Yearly.

Restriction(s): Enrollment limited to students with a class of Med First Year.

MD1 5066 Block 3.5 Lab Cr. 3

Normal structure and function of cardiopulmonary systems lab. Offered Yearly.

Restriction(s): Enrollment limited to students with a class of Med First Year.

MD1 5150 Community Engagement Part I Cr. 5

Provides students with an opportunity to explore the experience of underserved patients as they navigate for health and community services in Southeast Michigan. Meeting with agency leaders and staff, students will learn about program design, administration and operation. Students will interact with program participants to understand their circumstances and challenges patients with limited resources face. Offered Yearly.

Restriction(s): Enrollment limited to students with a class of Med First Year.

MD1 5151 Leadership and External Affairs Development (LEAD) / Medical Political Action (MPAC) Cr. 5

Provides students with an opportunity to learn, practice and apply knowledge and skills as physician healthcare leaders and advocates. Students will engage in healthcare advocacy to improve healthcare for patients and communities and to improve the health systems that deliver care. Working with organized medicine, students will author resolutions and meet with governmental leaders to present and advocate for reforms to decrease health disparities. Students will learn about use of media as a tool for advocacy and learn about philanthropy as it relates to healthcare. Offered Yearly.

Restriction(s): Enrollment limited to students with a class of Med First Year.

MD1 5153 Medical Research Elective Cr. 5

This research program is designed to prepare physicians who are committed to excellence by cultivating habits of research and inquiry. By participating in an investigative experience, it will also significantly impact and sharpen critical reasoning skills. Students who are educated in a research environment are stimulated to seek a deeper understanding of health and disease and develop their ability to analyze scientific literature, making them valued members of any medical field, whether it be academic medicine, community-based practice, health care policy, or emerging technologies. Offered Yearly.

Restriction(s): Enrollment limited to students with a class of Med First Year.

MD1 5800 Directed Study Cr. 1-12

Individualized curriculum designed to enhance knowledge and skills in preparation for the next phase of medical school. Offered Yearly.

Restriction(s): Enrollment is limited to Medical level students; enrollment limited to students with a class of Med First Year or Med Second Year; enrollment limited to students in the School of Medicine; enrollment is limited to students with a major in Medicine.

MD1 6698 Foundations Course: Fundamentals of Human Disease Part I Cr. 8

The overall goal will be to engage medical students in learning the key concepts related to the mechanisms and consequences of human disease. Using examples from multiple body sites, this course will provide an in-depth study of basic pathologic processes. The major categories of disease to be covered will include: cellular adaptation and injury; inflammation and repair; circulatory disturbances; atherosclerosis; forensic pathology; immunopathology; neoplasia; genetic and pediatric diseases; environmental and nutritional disorders; infectious disease; and therapeutics. Within each of these categories, two concepts will be particularly emphasized: pathogenesis and altered morphology. Pathogenesis (mechanism of disease development) is reviewed primarily at the molecular and cellular level. It is at this step that the course will interface with biochemistry, pharmacology, cell biology, genetics, immunology, microbiology, and physiology. Offered Yearly.

MD1 6699 Populations, Patients, Physician, Professionalism and Clinical Skills Part I Cr. 1

The overall goals of the Populations, Patients and Professionalism Bridge course will be to engage first year medical students in learning about a special topic that occurs throughout a population residing within the city of Detroit as well as to understand basic principles about how to engage urban populations to achieve shared healthcare outcomes. Offered Yearly.

MD2 - MEDICAL SCHOOL: YEAR 2

MD2 0910 Year 2 First Patient Capstone Course Cr. 0

Students build upon the Year 1 Capstone course and continue to research the pathological finding associated with their first patient as they complete their basic science courses (abnormal systems) during their second year of medical school. Offered Yearly.

Restriction(s): Enrollment limited to students with a class of Med Second Year.

MD2 6510 Clinical Medicine II: Physical Diagnosis Cr. 0

Advanced physician-patient communication skills; additional competencies in physical examination and diagnosis. Offered Yearly.

Restriction(s): Enrollment is limited to Medical level students; enrollment limited to students with a class of Med Second Year; enrollment limited to students in the School of Medicine; enrollment is limited to students with a major in Medicine; enrollment limited to students in a Doctor of Medicine degree; enrollment limited to students in the Medical Doctor program.

MD2 6600 Directed Study Cr. 1-12

Students participate in an individualized curriculum designed to enhance their knowledge and skills in preparation for the next phase of medical school. Offered Yearly.

Restriction(s): Enrollment is limited to Medical level students; enrollment limited to students with a class of Med First Year or Med Second Year; enrollment limited to students in the School of Medicine; enrollment is limited to students with a major in Medicine.

Repeatable for 12 Credits

MD2 6610 Step 1 Preparation Course Cr. 1

As the first of what will be a lifetime of licensure exams, preparing for the USMLE Step 1 exam often creates a great deal of stress for students. While some amount of stress is a natural part of the test prep process, it does not have to be debilitating. The Wayne State School of Medicine serves to mitigate some of this stress by providing students with multiple resources to help them optimize their performance on Step 1. Offered Yearly.

Restriction(s): Enrollment limited to students with a class of Med Second Year.

MD2 6650 Step 1 Summer Preparation Cr. 2-8

Students will be provided the opportunity to enhance their Step 1 examination readiness through formal classroom and independent learning. Offered Yearly.

Restriction(s): Enrollment is limited to Medical level students; enrollment limited to students with a class of Med Second Year; enrollment is limited to students with a major in Medicine.

Repeatable for 8 Credits

MD2 6700 Foundations Course: Fundamentals of Human Disease Cr. 7
Engages the second year medical students in learning the key concepts related to the mechanisms and consequences of human disease.

Using examples from multiple body sites, this course will provide an in-depth study of basic pathologic processes. The major categories of disease to be covered will include: cellular adaptation and injury; inflammation and repair; circulatory disturbances; atherosclerosis; forensic pathology; immunopathology; neoplasia; genetic and pediatric diseases; environmental and nutritional disorders; infectious disease; and therapeutics. Within each of these categories, two concepts will be particularly emphasized: pathogenesis and altered morphology. Pathogenesis (mechanism of disease development) is reviewed primarily at the molecular and cellular level. It is at this step that the course will interface with biochemistry, pharmacology, cell biology, genetics, immunology, microbiology, and physiology. Offered Yearly.

Restriction(s): Enrollment limited to students with a class of Med Second Year.

MD2 6701 Population, Patient, Physician and Professionalism (P4) Part II Cr. 5

Builds on concepts learned in the first course with additional emphasis on equipping trainees to provide patient-centered and culturally responsive care to distinct patient populations living in Detroit. Topics of discussion include nutrition-related chronic disease, veteran health, sexual health, homeless health, school-based health and healthcare provided to those with disabilities. Through large group sessions, small group sessions, online modules, and service-learning activities, trainees will become effective inter-professional team members, learn how to reduce health care disparities, improve professional development and foster self-directed learning skills. Offered Yearly.

Restriction(s): Enrollment limited to students with a class of Med Second Year.

MD2 6702 Musculoskeletal, Skin and Peripheral Nervous Systems: Fundamentals of Human Disease Cr. 3

Engages medical students in learning the key concepts related to the pathogenesis, pathology, pathophysiology, basic principles of diagnosis, and treatment of disease processes effecting the musculoskeletal organ system, skin, and peripheral nervous system. Content includes: review of the anatomy of the extremities/spine; upper/lower extremity fractures/injuries; development, normal structure/function, and aging of bones and joints; metabolic and non-metabolic bone disease; scoliosis; disorders of the extracellular matrix and soft tissue; synovial fluid analysis; osteoarthritis; rheumatoid arthritis; septic arthritis; gout; CPPD deposition disease and pseudogout; ankylosing spondylitis; reactive arthritis; psoriatic arthritis; systemic lupus erythematosus; systemic sclerosis; skin tumors and rashes; skin and soft tissue infections; manifestations of neuromuscular diseases; and pharmacologic interventions for the treatment of MSK, PNS, and skin disorders. Offered Yearly.

Restriction(s): Enrollment limited to students with a class of Med Second Year.

MD2 6703 Cardiopulmonary Systems: Fundamentals of Human Disease Cr. 5

Covers the key concepts related to the pathology, pathophysiology, diagnosis and treatment of cardiovascular and pulmonary disease. The cardiovascular component includes: normal anatomy, embryology, and physiology; systemic hypertension; atherosclerosis and ischemic heart disease; basic electrophysiological principles; ECG interpretation; valvular heart disease; diseases of the pericardium; tumors; non-atherosclerotic vascular disease; primary myocardial disease; cardiovascular disease in the elderly; congenital heart disease; and congestive heart failure. The pulmonary component includes: normal anatomy, histology, and physiology; arterial blood gases; various diseases affecting the pulmonary system; lung cancer and smoking cessation; aging and the respiratory system; respiratory failure; and introduction to sleep and sleep medicine. Relevant pharmacologic management of cardiovascular and pulmonary diseases will also be discussed. Offered Yearly.

Restriction(s): Enrollment limited to students with a class of Med Second Year.

MD2 6704 Gastrointestinal Systems: Fundamentals of Human Disease Cr. 3

Engages medical students in learning the key concepts related to the etiology, pathogenesis, pathology, and pathophysiology of non-infectious and infectious disease processes affecting the gastrointestinal organs, as well as basic principles of their diagnosis and treatment. The following content areas will be covered: liver disorders; diseases affecting the gallbladder, extrahepatic biliary tract and pancreas; diseases of the salivary glands, esophagus, stomach, small intestine, and colon; genetic predisposition to cancers of the gastrointestinal tract; and the effects of various systemic disorders on the GI tract. Nutritional and pharmacologic management of gastrointestinal diseases will also be included. Offered Yearly.

Restriction(s): Enrollment limited to students with a class of Med Second Year.

MD2 6705 Renal and Urinary Systems: Fundamentals of Human Disease Cr. 2

Provides medical students with an understanding of the pathogenesis, pathology and pathophysiology of disease processes affecting the kidney and urinary tract. Students will develop the skills of diagnosis and learn treatment options. The following content areas are covered: normal renal physiology; various disorders of body fluid, electrolyte and acid#based regulation; the principles underlying appropriate therapeutic strategies; acute and chronic renal failure; uremia; end stage renal disease; major glomerular, tubulointerstitial and systemic diseases with renal involvement; major benign and malignant tumors of the kidney and bladder; infections of the urinary tract; the principles for appropriate supportive and therapeutic measures including nutritional management of patients with renal disease; and an understanding of the physiologic basis for the pharmacologic actions of drugs on the kidney. Offered Yearly.

Restriction(s): Enrollment limited to students with a class of Med Second Year.

MD2 6706 Endocrine and Reproductive Systems: Fundamentals of Human Disease Cr. 3

Engages medical students in learning the key concepts related to the pathogenesis, pathology, and pathophysiology of the more common disease processes affecting the endocrine and reproductive organ systems, as well as basic principles of their diagnosis and treatment. The following content areas will be covered: fundamental concepts regarding endocrine hormones; the hypothalamic/pituitary axis and related disorders; reproductive endocrinology and corresponding abnormalities; disorders of the male and female genital tracts; abnormalities of the placenta and selected complications of pregnancy; breast disease; diabetes mellitus; lipid disorders; diseases of the thyroid, parathyroid, and adrenal glands; calcium homeostasis and disorders of calcium; endocrine hypertension; obesity; and genetic factors that play a role in endocrine disorders. Nutritional management of diabetic and obese patients will be covered. Offered Yearly.

Restriction(s): Enrollment limited to students with a class of Med Second Year.

MD2 6707 Hematopoietic and Lymphoid Systems: Fundamentals of Human Disease Cr. 2

The overall goal will be to provide the foundations, background facts and expected competencies, to foster understanding common benign and malignant hematological disorders. At the end of this course, students should have the skills and the ability to integrate the acquired knowledge into clinical settings. The following content areas will be covered: a review of normal blood coagulation, hemostasis and platelet function; hemolytic anemia including diagnostic tests; hemoglobinopathies including how hemoglobin alterations produce disease, diagnosis and management; platelet disorders including the symptoms associated with inherited and acquired coagulation and vascular disorders; an introduction to stem cell transplantation; transfusion medicine; diagnostic criteria, pathophysiology, and therapeutic options for the treatment of anemia, myelodysplastic syndromes, acute leukemias, myeloproliferative disorders, and lymphomas, among other topics. Offered Yearly.

Restriction(s): Enrollment limited to students with a class of Med Second Year.

MD2 6708 Central Nervous System: Fundamentals of Human Disease Cr. 3

Covers key concepts related to disease processes affecting the central nervous system, and provides the basis for understanding the unique features that disease processes in the brain. Enables students to integrate neuroanatomy, neuropathology, and introductory clinical neurology in preparation for the clinical rotation in neurology. The following content areas will be covered: basic neuropathology and mass lesions; brain tumors and infectious processes; neurodegenerative diseases; cognitive dysfunction and dementia; the application of neuroradiology to diagnosis; pathology of cerebrovascular disorders and stroke; nervous system trauma; autoimmune and demyelinating diseases; epilepsy; and the pharmacotherapy of headache. Normal development and the recognition and treatment of psychiatric disorders seen in adults and children will also be covered. This portion will prepare students for their clinical rotation in psychiatry and provide a background in psychiatry. Offered Yearly.

Restriction(s): Enrollment limited to students with a class of Med Second Year.

MD2 6709 Clinical Skills Course III Cr. 3

A self-directed, competency-based course designed to develop and demonstrate knowledge and skills in history-taking, patient examination, oral case presentation, clinical reasoning and procedural skills. Offered Yearly.

Restriction(s): Enrollment limited to students with a class of Med Second Year.

MD2 6710 Clinical Experiential Clerkship Cr. 4

The course is focused on ambulatory clinical immersion with the overall objective of developing students as medical professionals, patient advocates, and skilled clinicians. Offered Yearly.

Restriction(s): Enrollment limited to students with a class of Med Second Year.

MD2 6711 Medical Political Action and Public Health Leadership (MPAC) Part II Cr. 5

Provides students with an opportunity to learn, practice and apply knowledge and skills as physician healthcare leaders and advocates. Students will engage in healthcare advocacy to improve healthcare for patients and communities and to improve the health systems that deliver care. Working with organized medicine, students will author resolutions and meet with governmental leaders to present and advocate for reforms to decrease health disparities. Students will learn about use of media as a tool for advocacy and learn about philanthropy as it relates to healthcare. Offered Yearly.

Restriction(s): Enrollment limited to students with a class of Med Second Year.

MD2 6712 Community Engagement Part II Cr. 5

Provides students with an opportunity to explore and understand the experience of under-served patients as they navigate community health services in Southeast Michigan. Medical students interact with patients or participants and staff to learn the circumstances and challenges faced with limited resources, to foster empathy, compassion, respect and humanistic care. Meeting with agency leaders and staff students learn about program design, administration and operation through outreach and mentoring volunteering. Offered Yearly.

Prerequisite: MD1 5151

Restriction(s): Enrollment limited to students with a class of Med Second Year.

MD2 6713 Medical Research Elective Part II Cr. 5

This research program is designed to "prepare physicians who are committed to excellence by cultivating habits of research and inquiry." By participating in an investigative experience, it will also significantly impact and sharpen critical reasoning skills. Students who are educated in a research environment are stimulated to seek a deeper understanding of health and disease and develop their ability to analyze scientific literature, making them valued members of any medical field, whether it be academic medicine, community-based practice, health care policy, or emerging technologies. Offered Yearly.

Restriction(s): Enrollment limited to students with a class of Med Second Year.

MD2 6714 Medical Political Action & Public Health Leadership (MPAC) Part III Cr. 1

The MPAC program elective provides students with an opportunity to learn, practice and apply knowledge and skills as physician healthcare leaders and advocates. Students will engage in healthcare advocacy to improve healthcare for patients and communities and to improve the health systems that deliver care. Working with organized medicine, students will author resolutions and meet with governmental leaders to present and advocate for reforms to decrease health disparities. Students will learn about use of media as a tool for advocacy and learn about philanthropy as it relates to healthcare. Offered Yearly.

Prerequisite: MD2 6711

Restriction(s): Enrollment limited to students with a class of Med Second Year.

MD2 6715 Community Engagement Part III Cr. 1

The Community Engagement elective provides students with an opportunity to explore and understand the experience of underserved patients as they navigate community health services in Southeast Michigan. Medical students interact with patients or participants and staff to learn the circumstances and challenges faced with limited resources, to foster empathy, compassion, respect and humanistic care. Meeting with agency leaders and staff students learn about program design, administration and operation through outreach and mentoring volunteering. Offered Yearly.

Restriction(s): Enrollment limited to students with a class of Med Second Year.

MD2 6716 Medical Research Elective Part III Cr. 1

This research program is designed to "prepare physicians who are committed to excellence by cultivating habits of research and inquiry." By participating in an investigative experience, it will also significantly impact and sharpen critical reasoning skills. Students who are educated in a research environment are stimulated to seek a deeper understanding of health and disease and develop their ability to analyze scientific literature, making them valued members of any medical field, whether it be academic medicine, community-based practice, health care policy, or emerging technologies. Offered Yearly.

Prerequisite: MD2 6713

Restriction(s): Enrollment limited to students with a class of Med Second Year.

MD2 - MEDICAL SCHOOL: YEAR 3

MD3 7000 Continuity Clinical Clerkship Cr. 3

A continuity experience in which the basic skills, knowledge and attitudes necessary to manage the care of patients in an out-patient primary care setting are learned. Offered Every Term.

Prerequisite: MD3 7300 (may be taken concurrently) and MD3 7100 (may be taken concurrently) and MD3 7200 (may be taken concurrently)

Restriction(s): Enrollment is limited to Medical level students; enrollment limited to students with a class of Med Third Year or Med Fourth Year; enrollment limited to students in the School of Medicine; enrollment is limited to students with a major in Medicine.

MD3 7100 Family Medicine Clerkship Cr. 4

Practice of family medicine learned in a community-based primary care setting; experiencing care and treatment of children, adolescents, and adults with acute and chronic disease. Offered Every Term.

Prerequisite: MD3 7000 (may be taken concurrently) and MD3 7300 (may be taken concurrently) and MD3 7200 (may be taken concurrently)

Restriction(s): Enrollment is limited to Medical level students; enrollment limited to students with a class of Med Third Year or Med Fourth Year; enrollment limited to students in the School of Medicine; enrollment is limited to students with a major in Medicine.

MD3 7200 Internal Medicine Clerkship Cr. 8

Practical experience in recognition, evaluation, diagnosis, and management of hospitalized adult patients with acute non-surgical illnesses. Offered Every Term.

Prerequisite: MD3 7300 (may be taken concurrently) and MD3 7100 (may be taken concurrently) and MD3 7000 (may be taken concurrently)

Restriction(s): Enrollment is limited to Medical level students; enrollment limited to students with a class of Med Third Year or Med Fourth Year; enrollment limited to students in the School of Medicine; enrollment is limited to students with a major in Medicine.

MD3 7300 Pediatrics Clerkship Cr. 8

Practical experience in recognition, evaluation, diagnosis, and management of pediatric patients in in-patient and ambulatory care settings. Offered Every Term.

Prerequisite: MD3 7200 (may be taken concurrently) and MD3 7100 (may be taken concurrently) and MD3 7000 (may be taken concurrently)

Restriction(s): Enrollment is limited to Medical level students; enrollment limited to students with a class of Med Third Year or Med Fourth Year; enrollment limited to students in the School of Medicine; enrollment is limited to students with a major in Medicine.

MD3 7400 Surgery Clerkship Cr. 8

Practical experience in recognition, evaluation, diagnosis, and management of patients in general surgery or surgical sub-specialties. Offered Every Term.

Prerequisite: MD3 7500 (may be taken concurrently) and MD3 7600 (may be taken concurrently) and MD3 7700 (may be taken concurrently)

Restriction(s): Enrollment is limited to Medical level students; enrollment limited to students with a class of Med Third Year or Med Fourth Year; enrollment limited to students in the School of Medicine; enrollment is limited to students with a major in Medicine.

MD3 7500 Psychiatry Clerkship Cr. 4

Practical experience in recognition, evaluation, diagnosis, and management of patients with behavioral and emotional brain disorders. Offered Every Term.

Prerequisite: MD3 7400 (may be taken concurrently) and MD3 7600 (may be taken concurrently) and MD3 7700 (may be taken concurrently)

Restriction(s): Enrollment is limited to Medical level students; enrollment limited to students with a class of Med Third Year or Med Fourth Year; enrollment limited to students in the School of Medicine; enrollment is limited to students with a major in Medicine.

MD3 7600 Obstetrics and Gynecology Clerkship Cr. 8

Practical experience in recognizing, evaluating, diagnosing, and managing the health care of women in a variety of inpatient and outpatient settings. Offered Every Term.

Prerequisite: MD3 7400 (may be taken concurrently) and MD3 7500 (may be taken concurrently) and MD3 7700 (may be taken concurrently)

Restriction(s): Enrollment is limited to Medical level students; enrollment limited to students with a class of Med Third Year or Med Fourth Year; enrollment limited to students in the School of Medicine; enrollment is limited to students with a major in Medicine.

MD3 7700 Neurology Clerkship Cr. 4

Practical experience in recognition, evaluation, diagnosis, and management of patients with disorders of the nervous system. Offered Every Term.

Prerequisite: MD3 7400 (may be taken concurrently) and MD3 7500 (may be taken concurrently) and MD3 7600 (may be taken concurrently)

Restriction(s): Enrollment is limited to Medical level students; enrollment limited to students with a class of Med Third Year or Med Fourth Year; enrollment limited to students in the School of Medicine; enrollment is limited to students with a major in Medicine.

MD3 7800 Directed Study Cr. 1-12

Individualized curriculum designed to enhance knowledge and skills in preparation for the next phase of medical school. Offered Every Term.

Restriction(s): Enrollment is limited to Medical level students; enrollment limited to students with a class of Med Third Year or Med Fourth Year; enrollment limited to students in the School of Medicine; enrollment is limited to students with a major in Medicine.

MD3 7810 Independent Study: Step 1 Extended Prep Cr. 0

Students use curricular time for continued preparation for the Step 1 board exam. Offered Yearly.

Restriction(s): Enrollment is limited to Medical level students; enrollment limited to students with a class of Med Third Year or Med Fourth Year; enrollment limited to students in the School of Medicine; enrollment is limited to students with a major in Medicine.

MD3 7815 Year 3 General Elective Month Cr. 3

Offered Yearly.

Restriction(s): Enrollment is limited to Medical level students; enrollment limited to students with a class of Med Third Year or Med Fourth Year; enrollment limited to students in the School of Medicine; enrollment is limited to students with a major in Medicine.

MD4 - MEDICAL SCHOOL: YEAR 4

MD4 8010 Humanities in Medicine Cr. 6

Work with vulnerable populations and stigmatized patients including the elderly, homeless, addicted, handicapped, pregnant teens and others. Offered Every Term.

Restriction(s): Enrollment is limited to Medical level students; enrollment limited to students with a class of Med Third Year or Med Fourth Year; enrollment limited to students in the School of Medicine; enrollment is limited to students with a major in Medicine.

MD4 8020 Medical Education Cr. 6

Processes involved in evaluation of courses; coordination of the assessment of Year 1-2 courses. Offered Every Term.

Restriction(s): Enrollment is limited to Medical level students; enrollment limited to students with a class of Med Third Year or Med Fourth Year; enrollment limited to students in the School of Medicine; enrollment is limited to students with a major in Medicine.

MD4 8025 Curriculum Development Cr. 6

Offered Every Term.

Restriction(s): Enrollment is limited to Medical level students; enrollment limited to students with a class of Med Fourth Year; enrollment limited to students in the School of Medicine; enrollment is limited to students with a major in Medicine.

MD4 8030 Medicine and Political Action Cr. 6

Observation and participation in medical areas that are politically in the forefront of medicine today. Offered Every Term.

Restriction(s): Enrollment is limited to Medical level students; enrollment limited to students with a class of Med Third Year or Med Fourth Year; enrollment limited to students in the School of Medicine; enrollment is limited to students with a major in Medicine.

MD4 8035 Students Teaching and Educating Peers Cr. 6

Students will learn and apply techniques to prepare medical students for the Step 1 examination, as well as lead Step 1 preparation sessions. Offered Every Term.

Restriction(s): Enrollment is limited to Medical level students; enrollment limited to students with a class of Med Fourth Year; enrollment limited to students in the School of Medicine; enrollment is limited to students with a major, minor, or concentration in Medicine.

MD4 8036 Independent Service Learning Cr. 3,6

Students will participate in a Service Learning Program within a community organization providing direct service to the organizations specific clientele. Offered Every Term.

Restriction(s): Enrollment is limited to Medical level students; enrollment limited to students with a class of Med Third Year or Med Fourth Year; enrollment limited to students in the School of Medicine; enrollment is limited to students with a major, minor, or concentration in Medicine.

MD4 8040 Special Topics in Anatomy and Cell Biology Cr. 3,6

Review of research training in gross anatomy, cell biology, histology, embryology, or neuroscience. Offered Every Term.

Restriction(s): Enrollment is limited to Medical level students; enrollment limited to students with a class of Med Fourth Year; enrollment limited to students in the School of Medicine; enrollment is limited to students with a major in Medicine.

MD4 8041 Gross Anatomy Teaching Lab Cr. 6

Students taking this elective will gain teaching and mentorship experience in preparation for a career in academic medicine by teaching freshman medical students dissection skills in the anatomy labs. Offered Every Term.

Restriction(s): Enrollment is limited to Medical level students; enrollment limited to students with a class of Med Fourth Year; enrollment limited to students in the School of Medicine; enrollment is limited to students with a major in Medicine.

MD4 8045 Medical Ethics Cr. 6

Medical ethics issues and concerns in the ICU, PICU, NICU, as well as those associated with a medical ethics committee. Offered Every Term.

Restriction(s): Enrollment is limited to Medical level students; enrollment limited to students with a class of Med Fourth Year; enrollment limited to students in the School of Medicine; enrollment is limited to students with a major in Medicine.

MD4 8046 Street Medicine: Detroit Cr. 3,6

Knowledge and skills necessary to promote health, prevent illness, and manage the common chronic, and minor acute primary care needs of adults who are experiencing homelessness in Detroit. Clinical Experience (CLN): students will complete 120 hours of clinical education experience during their one-month rotation Offered Every Term.

Restriction(s): Enrollment is limited to Medical level students; enrollment limited to students with a class of Med Third Year or Med Fourth Year; enrollment is limited to students with a major in Medicine.

MD4 8050 General Anesthesiology Cr. 3,6

Practice of anesthesia including preoperative assessment, delivery of general and regional anesthesia, equipment use, and monitoring techniques. Offered Every Term.

Restriction(s): Enrollment is limited to Medical level students; enrollment limited to students with a class of Med Third Year or Med Fourth Year; enrollment limited to students in the School of Medicine; enrollment is limited to students with a major in Medicine.

MD4 8060 Pain Management Cr. 6

Diagnosis, treatment and management of acute and chronic pain syndromes related to malignant and nonmalignant diseases. Offered Every Term.

Restriction(s): Enrollment is limited to Medical level students; enrollment limited to students with a class of Med Fourth Year; enrollment limited to students in the School of Medicine; enrollment is limited to students with a major in Medicine.

MD4 8070 Pediatric Anesthesiology Cr. 6

Preoperative assessment, delivery of general and regional anesthesia, equipment use, and monitoring techniques in pediatric patients. Offered Every Term.

Restriction(s): Enrollment is limited to Medical level students; enrollment limited to students with a class of Med Fourth Year; enrollment limited to students in the School of Medicine; enrollment is limited to students with a major in Medicine.

MD4 8100 Law and Medicine Cr. 3,6

Legal issues associated with practicing clinical medicine. Offered Yearly.

Restriction(s): Enrollment is limited to Medical level students; enrollment limited to students with a class of Med Third Year or Med Fourth Year; enrollment limited to students in the School of Medicine; enrollment is limited to students with a major in Medicine.

MD4 8120 General Dermatology Cr. 3,6

Fundamentals of diagnosing, treating and managing patients with common dermatologic disorders. Offered Every Term.

Restriction(s): Enrollment is limited to Medical level students; enrollment limited to students with a class of Med Fourth Year; enrollment limited to students in the School of Medicine; enrollment is limited to students with a major in Medicine.

MD4 8130 Dermatology Research Cr. 3,6

Knowledge and experience in dermatology research. Offered Every Term.

Restriction(s): Enrollment is limited to Medical level students; enrollment limited to students with a class of Med Fourth Year; enrollment limited to students in the School of Medicine; enrollment is limited to students with a major in Medicine.

MD4 8140 General Emergency Medicine Cr. 3,6

Initial evaluation, stabilization, and management of patients in the emergency department. Offered Every Term.

Restriction(s): Enrollment is limited to Medical level students; enrollment limited to students with a class of Med Fourth Year; enrollment limited to students in the School of Medicine; enrollment is limited to students with a major in Medicine.

MD4 8145 ER Ultrasound Cr. 6

Offered Every Term.

Restriction(s): Enrollment is limited to Medical level students; enrollment limited to students with a class of Med Fourth Year; enrollment is limited to students with a major in Medicine.

MD4 8150 Emergency Medicine Research Cr. 3,6

Process and participation in emergency medicine research. Offered Every Term.

Restriction(s): Enrollment is limited to Medical level students; enrollment limited to students with a class of Med Third Year or Med Fourth Year; enrollment limited to students in the School of Medicine; enrollment is limited to students with a major in Medicine.

MD4 8160 Emergency Medicine Subinternship Cr. 7

Evaluation, stabilization, and treatment of a variety of patients presenting to the ER with urgent and emergent illness and trauma. Offered Every Term.

Restriction(s): Enrollment is limited to Medical level students; enrollment limited to students with a class of Med Fourth Year; enrollment limited to students in the School of Medicine; enrollment is limited to students with a major in Medicine.

MD4 8165 Advanced Emergency Medicine Cr. 6

Being the primary provider for patients while in the ER, from initial evaluation to completion of disposition. Offered Every Term.

Prerequisite: MD4 8160 with a minimum grade of S

Restriction(s): Enrollment is limited to Medical level students; enrollment limited to students with a class of Med Fourth Year; enrollment limited to students in the School of Medicine; enrollment is limited to students with a major in Medicine; enrollment limited to students in a Doctor of Medicine degree.

MD4 8170 General Family Medicine Cr. 3,6

Enhancement of knowledge and skills in conducting a history/physical, diagnosing/managing patients, and participation in common office procedures in the outpatient setting. Offered Every Term.

Restriction(s): Enrollment is limited to Medical level students; enrollment limited to students with a class of Med Third Year or Med Fourth Year; enrollment limited to students in the School of Medicine; enrollment is limited to students with a major in Medicine.

MD4 8171 Rural Family Medicine Cr. 3-6

Students will gain a better understanding of the unique needs, challenges and rewards of practicing medicine in a medically underserved, rural or small-town community. Offered Every Term.

Restriction(s): Enrollment is limited to Medical level students; enrollment limited to students with a class of Med Third Year or Med Fourth Year; enrollment limited to students in the School of Medicine; enrollment is limited to students with a major in Medicine.

MD4 8172 Family Medicine Student Run Free Clinic Cr. 6

Students are involved in supervision of day-to-day operations of Student Run Free Clinic. Offered Every Term.

Restriction(s): Enrollment is limited to Medical level students; enrollment limited to students with a class of Med Third Year or Med Fourth Year; enrollment limited to students in the School of Medicine; enrollment is limited to students with a major in Medicine.

MD4 8175 MPH Master's Project Cr. 6

Students apply the knowledge and skills gained from classroom and field experiences to a scholarly project of their own design and execution.

The final products are a written paper and an oral presentation. Offered Intermittently.

Restriction(s): Enrollment limited to students with a class of Med Fourth Year.

MD4 8210 Family Medicine Subinternship Cr. 7

Students expand on Year 3 family medicine clerkship experience with more intensive involvement in select patient populations. Offered Every Term.

Restriction(s): Enrollment is limited to Medical level students; enrollment limited to students with a class of Med Fourth Year; enrollment limited to students in the School of Medicine; enrollment is limited to students with a major in Medicine.

MD4 8220 Hospice/Palliative Medicine Cr. 3,6

Care of terminally ill patients; basic communication and interactive skills associated with these patients and their families. Offered Every Term.

Restriction(s): Enrollment is limited to Medical level students; enrollment limited to students with a class of Med Third Year or Med Fourth Year; enrollment limited to students in the School of Medicine; enrollment is limited to students with a major in Medicine.

MD4 8230 Maternal and Child Health Cr. 6

Gaining experience in an aggressive family medicine OB service. Offered Yearly.

Prerequisite: MD3 7600 with a minimum grade of S

Restriction(s): Enrollment is limited to Medical level students; enrollment limited to students with a class of Med Fourth Year; enrollment limited to students in the School of Medicine; enrollment is limited to students with a major in Medicine; enrollment limited to students in a Doctor of Medicine degree.

MD4 8250 Sports Medicine Cr. 6

Knowledge and skills to assess the fitness and health risks of athletes. Offered Every Term.

Restriction(s): Enrollment is limited to Medical level students; enrollment limited to students with a class of Med Fourth Year; enrollment limited to students in the School of Medicine; enrollment is limited to students with a major in Medicine.

MD4 8255 International Elective Cr. 6

Restriction(s): Enrollment is limited to Medical level students; enrollment limited to students with a class of Med Fourth Year; enrollment limited to students in the School of Medicine; enrollment is limited to students with a major in Medicine.

MD4 8258 International Away Cr. 6

Restriction(s): Enrollment is limited to Medical level students; enrollment limited to students with a class of Med Fourth Year; enrollment limited to students in the School of Medicine; enrollment is limited to students with a major, minor, or concentration in Medicine.

MD4 8260 Allergy and Clinical Immunology Cr. 3,6

Conducting an allergic H & P; understanding basic mechanisms, pathophysiology and testing of allergic and immunologic disorders.

Offered Every Term.

Restriction(s): Enrollment is limited to Medical level students; enrollment limited to students with a class of Med Third Year or Med Fourth Year; enrollment limited to students in the School of Medicine; enrollment is limited to students with a major in Medicine.

MD4 8261 Advanced Physical Diagnosis Cr. 6

Students will refine their basic physical examination, as well as advance their skills in evaluating hypertension, thyroid disease, cardiac murmurs, breast abnormalities, and geriatric assessment. Offered Every Term.

Restriction(s): Enrollment is limited to Medical level students; enrollment limited to students with a class of Med Fourth Year; enrollment limited to students in the School of Medicine; enrollment is limited to students with a major in Medicine.

MD4 8262 Ambulatory Subspecialty in Internal Medicine Cr. 6

Students will learn the practice of ambulatory internal medicine, with an emphasis placed upon bedside teaching, physical diagnosis and in-depth discussion of the clinical, diagnostic and therapeutic aspects of each case. Offered Every Term.

Restriction(s): Enrollment is limited to Medical level students; enrollment limited to students with a class of Med Fourth Year; enrollment limited to students in the School of Medicine.

MD4 8264 Independent Study in Medical Education Cr. 6

Students will improve their skills as learners and critical thinkers, and gain an appreciation of the importance of lifelong learning. Offered Every Term.

Restriction(s): Enrollment is limited to Medical level students; enrollment limited to students with a class of Med Fourth Year; enrollment limited to students in the School of Medicine; enrollment is limited to students with a major in Medicine.

MD4 8265 Urban Medicine for Visiting Students Cr. 6

Students will learn academic internal medicine in an urban setting with an emphasis on recognizing, studying, treating, and preventing disparities in healthcare. Offered Every Term.

Restriction(s): Enrollment is limited to Medical level students; enrollment limited to students in the School of Medicine; enrollment is limited to students with a major in Medicine.

MD4 8270 Ambulatory Med Cr. 6

Offered Every Term.

Restriction(s): Enrollment is limited to Medical level students; enrollment limited to students with a class of Med Fourth Year; enrollment limited to students in the School of Medicine; enrollment is limited to students with a major in Medicine.

MD4 8280 Cardiology Cr. 3,6

Basic history/physical, diagnostic, treatment and management skills associated with common inpatient cardiac problems. Offered Every Term.

Restriction(s): Enrollment is limited to Medical level students; enrollment limited to students with a class of Med Third Year or Med Fourth Year; enrollment limited to students in the School of Medicine; enrollment is limited to students with a major in Medicine.

MD4 8281 Interventional Cardiology Cr. 6

Exposure to an interventional lab. Gaining familiarity with the clinical utility of routine cardiovascular interventions and hemodynamic measurements. Offered Yearly.

Prerequisite: MD4 8280 with a minimum grade of S

Restriction(s): Enrollment is limited to Medical level students; enrollment limited to students with a class of Med Fourth Year; enrollment limited to students in the School of Medicine; enrollment is limited to students with a major in Medicine; enrollment limited to students in a Doctor of Medicine degree.

MD4 8290 Cardiology Consultation Cr. 3,6

Skills needed to consult with medical and surgical patients with cardiac problems. Offered Every Term.

Restriction(s): Enrollment is limited to Medical level students; enrollment limited to students with a class of Med Third Year or Med Fourth Year; enrollment limited to students in the School of Medicine; enrollment is limited to students with a major in Medicine.

MD4 8310 Coronary Care Unit Cr. 6

Diagnosis and treatment of common cardiac problems; care for critically ill patients admitted to cardiac care unit. Offered Every Term.

Restriction(s): Enrollment is limited to Medical level students; enrollment limited to students with a class of Med Third Year or Med Fourth Year.

MD4 8320 Critical Care Medicine Cr. 3,6

Management of critically ill patients to improve diagnostic, problem solving, assessment, and treatment skills. Offered Every Term.

Restriction(s): Enrollment is limited to Medical level students; enrollment limited to students with a class of Med Third Year or Med Fourth Year; enrollment limited to students in the School of Medicine; enrollment is limited to students with a major in Medicine.

MD4 8340 Endocrine/Bone and Mineral Metabolism Cr. 3,6

Diagnosing, treating, and managing patients with metabolic bone diseases. Offered Every Term.

Restriction(s): Enrollment is limited to Medical level students; enrollment limited to students with a class of Med Third Year or Med Fourth Year; enrollment limited to students in the School of Medicine; enrollment is limited to students with a major in Medicine.

MD4 8350 Endocrinology Research Cr. 6

The research process; participation in research associated with medical endocrinology. Offered Every Term.

Restriction(s): Enrollment is limited to Medical level students; enrollment limited to students with a class of Med Fourth Year; enrollment limited to students in the School of Medicine; enrollment is limited to students with a major in Medicine.

MD4 8360 Endocrine/Metabolism Cr. 3,6

Techniques of conducting a history and physical; diagnostic, therapeutic, and laboratory approaches to endocrine disorders. Offered Every Term.

Restriction(s): Enrollment is limited to Medical level students; enrollment limited to students with a class of Med Third Year or Med Fourth Year; enrollment limited to students in the School of Medicine; enrollment is limited to students with a major in Medicine.

MD4 8365 Scholarly Writing for Critical Appraisal of Clinical Research Cr. 4

Peer review for clinical research practice. Offered Yearly.

Restriction(s): Enrollment limited to students with a class of Med Fourth Year.

MD4 8370 Gastroenterology Cr. 3,6

Conducting a history and physical exam, and diagnosing, treating, and managing patients with common gastrointestinal diseases. Offered Every Term.

Restriction(s): Enrollment is limited to Medical level students; enrollment limited to students with a class of Med Third Year or Med Fourth Year; enrollment limited to students in the School of Medicine; enrollment is limited to students with a major in Medicine.

MD4 8380 Gastroenterology Research Cr. 6

The research process; participation in specific gastroenterology research. Offered Every Term.

Restriction(s): Enrollment is limited to Medical level students; enrollment limited to students with a class of Med Fourth Year; enrollment limited to students in the School of Medicine; enrollment is limited to students with a major in Medicine.

MD4 8390 General Internal Medicine Inpatient Cr. 3,6

Common problems encountered in an internal medicine inpatient clinical setting. Offered Every Term.

Restriction(s): Enrollment is limited to Medical level students; enrollment limited to students with a class of Med Fourth Year; enrollment limited to students in the School of Medicine; enrollment is limited to students with a major in Medicine.

MD4 8391 Internal Medicine: Miscellaneous Cr. 3,6

Students learn various topics and issues in general internal medicine. Offered Every Term.

Restriction(s): Enrollment is limited to Medical level students; enrollment limited to students with a class of Med Third Year or Med Fourth Year; enrollment limited to students in the School of Medicine; enrollment is limited to students with a major in Medicine.

MD4 8392 Metabolic Nutrition and Weight Management Cr. 3,6

Offered Every Term.

Restriction(s): Enrollment is limited to Medical level students; enrollment limited to students with a class of Med Third Year or Med Fourth Year; enrollment limited to students in the School of Medicine; enrollment is limited to students with a major in Medicine.

MD4 8395 Clinical Pharmacology Cr. 6

Four-week on-line elective where students use case-based scenarios to apply pharmacology principles in a clinical setting. Offered Every Term.

Restriction(s): Enrollment is limited to Medical level students; enrollment limited to students with a class of Med Fourth Year; enrollment limited to students in the School of Medicine; enrollment is limited to students with a major in Medicine.

MD4 8400 Clinical Genetics Cr. 3,6

Interviewing, conducting a physical examination, and other patient interactions in patients with suspected or known genetic diseases. Offered Every Term.

Restriction(s): Enrollment is limited to Medical level students; enrollment limited to students with a class of Med Fourth Year; enrollment limited to students in the School of Medicine; enrollment is limited to students with a major in Medicine.

MD4 8420 Geriatric Medicine Cr. 6

Conduct of a comprehensive assessment and treatment of a geriatric patient; factors affecting the health of the elderly. Offered Every Term.

Restriction(s): Enrollment is limited to Medical level students; enrollment limited to students with a class of Med Fourth Year; enrollment limited to students in the School of Medicine; enrollment is limited to students with a major in Medicine.

MD4 8430 Hematology Cr. 3,6

Familiarization with a variety of hematologic and oncologic disorders; how to diagnose, treat, and manage patients with these disorders. Offered Every Term.

Restriction(s): Enrollment is limited to Medical level students; enrollment limited to students with a class of Med Fourth Year; enrollment limited to students in the School of Medicine; enrollment is limited to students with a major in Medicine.

MD4 8440 HIV/AIDS Cr. 6

Basic knowledge and skills associated with care of HIV-infected persons in outpatient and inpatient settings. Offered Every Term.

Restriction(s): Enrollment is limited to Medical level students; enrollment limited to students with a class of Med Fourth Year; enrollment limited to students in the School of Medicine; enrollment is limited to students with a major in Medicine.

MD4 8450 Infectious Disease Cr. 3,6

Evaluating, diagnosing and treating patients with acute and chronic infectious diseases. Offered Every Term.

Restriction(s): Enrollment is limited to Medical level students; enrollment limited to students with a class of Med Third Year or Med Fourth Year; enrollment limited to students in the School of Medicine; enrollment is limited to students with a major in Medicine.

MD4 8460 Infectious Disease Research Cr. 6

The research process; participation in specific infectious disease research. Offered Every Term.

Restriction(s): Enrollment is limited to Medical level students; enrollment limited to students with a class of Med Fourth Year; enrollment limited to students in the School of Medicine; enrollment is limited to students with a major in Medicine.

MD4 8470 Internal Medicine Subinternship Cr. 7

Expanding on Year 3 internal medicine clerkship experience; more intensive involvement in select patient populations. Offered Every Term.

Restriction(s): Enrollment is limited to Medical level students; enrollment limited to students with a class of Med Fourth Year; enrollment limited to students in the School of Medicine; enrollment is limited to students with a major in Medicine.

MD4 8480 Medicine/Pediatrics Cr. 3,6

Aspects of the day-to-day practice of a physician specializing in an internal medicine/pediatric practice. Offered Every Term.

Restriction(s): Enrollment is limited to Medical level students; enrollment limited to students with a class of Med Third Year or Med Fourth Year; enrollment limited to students in the School of Medicine; enrollment is limited to students with a major in Medicine.

MD4 8490 Nephrology Cr. 3,6

Experience in diagnosing and managing patients with acute and chronic nephrologic problems. Offered Every Term.

Prerequisite: MD3 7200 with a minimum grade of S

Restriction(s): Enrollment is limited to Medical level students; enrollment limited to students with a class of Med Third Year or Med Fourth Year; enrollment limited to students in the School of Medicine; enrollment is limited to students with a major in Medicine.

MD4 8500 Nephrology Consultation Service Cr. 6

Evaluation, diagnosis, and treatment of patients with renal problems. Offered Every Term.

Restriction(s): Enrollment is limited to Medical level students; enrollment limited to students with a class of Med Fourth Year; enrollment limited to students in the School of Medicine; enrollment is limited to students with a major in Medicine.

MD4 8510 Oncology: Medical Cr. 3,6

Evaluation, diagnosis, treatment and management of patients with oncologic conditions. Offered Every Term.

Restriction(s): Enrollment is limited to Medical level students; enrollment limited to students with a class of Med Fourth Year; enrollment limited to students in the School of Medicine; enrollment is limited to students with a major in Medicine.

MD4 8520 Oncology: Outpatient Cr. 3,6

Cancer patients in the outpatient setting: initial evaluations, types of malignant diseases, role of staging, conducting a focused follow-up of cancer patients. Offered Every Term.

Restriction(s): Enrollment is limited to Medical level students; enrollment limited to students with a class of Med Third Year or Med Fourth Year.

MD4 8530 Oncology Research Cr. 6

The research process; participation in research involving patients with cancer. Offered Every Term.

Restriction(s): Enrollment is limited to Medical level students; enrollment limited to students with a class of Med Fourth Year; enrollment limited to students in the School of Medicine; enrollment is limited to students with a major in Medicine.

MD4 8540 Otolaryngology Cr. 3,6

History and basic head and neck examination on patients with otolaryngologic disease. Offered Every Term.

Restriction(s): Enrollment is limited to Medical level students; enrollment limited to students with a class of Med Third Year or Med Fourth Year; enrollment limited to students in the School of Medicine; enrollment is limited to students with a major in Medicine.

MD4 8550 Otolaryngology Medical and Surgical: Head and Neck Cr. 3,6

Additional training in otolaryngology head and neck surgery. Offered Every Term.

Prerequisite: MD3 7200 with a minimum grade of S and MD3 7400 with a minimum grade of S

Restriction(s): Enrollment is limited to Medical level students; enrollment limited to students with a class of Med Third Year or Med Fourth Year; enrollment limited to students in the School of Medicine; enrollment is limited to students with a major in Medicine.

MD4 8560 Otolaryngology Research Cr. 6

The research process; participation in otolaryngology research. Offered Every Term.

Restriction(s): Enrollment is limited to Medical level students; enrollment limited to students with a class of Med Fourth Year; enrollment limited to students in the School of Medicine; enrollment is limited to students with a major in Medicine.

MD4 8570 Palliative Medicine Cr. 3,6

Understanding of and skills in palliative medicine: communication, cultural issues, psycho-emotional and spiritual aspects of end of life care and death and dying. Offered Every Term.

Restriction(s): Enrollment is limited to Medical level students; enrollment limited to students with a class of Med Fourth Year; enrollment limited to students in the School of Medicine; enrollment is limited to students with a major in Medicine.

MD4 8575 Complementary Medicine Cr. 6

The world of complementary medicine: what it is, how it is different from conventional medicine, how it is practiced, and what its benefits are. Offered Yearly.

Restriction(s): Enrollment is limited to Medical level students; enrollment limited to students with a class of Med Fourth Year; enrollment limited to students in the School of Medicine; enrollment is limited to students with a major in Medicine; enrollment limited to students in a Doctor of Medicine degree.

MD4 8580 Primary Care Medicine Cr. 6

Common problems encountered in internal medicine outpatient clinical setting. Offered Every Term.

Restriction(s): Enrollment is limited to Medical level students; enrollment limited to students with a class of Med Fourth Year; enrollment limited to students in the School of Medicine; enrollment is limited to students with a major in Medicine.

MD4 8590 Pulmonary Medicine Cr. 3,6

Diagnosis and management of a variety of pulmonary disorders; diagnosis of acute and chronic respiratory failure; interpretation of pulmonary tests. Offered Every Term.

Restriction(s): Enrollment is limited to Medical level students; enrollment limited to students with a class of Med Third Year or Med Fourth Year; enrollment limited to students in the School of Medicine; enrollment is limited to students with a major in Medicine.

MD4 8600 Pulmonary and Sleep Research Cr. 6

The research process; participation in pulmonary and sleep research. Offered Every Term.

Restriction(s): Enrollment is limited to Medical level students; enrollment limited to students with a class of Med Fourth Year; enrollment limited to students in the School of Medicine; enrollment is limited to students with a major in Medicine.

MD4 8610 Pulmonary Consultation Cr. 6

Diagnosis and management of a variety of pulmonary disorders; diagnosis of acute and chronic respiratory failure; interpretation of pulmonary tests. Offered Every Term.

Restriction(s): Enrollment is limited to Medical level students; enrollment limited to students with a class of Med Fourth Year; enrollment limited to students in the School of Medicine; enrollment is limited to students with a major in Medicine.

MD4 8620 Rheumatology Cr. 3,6

Diagnosis and management of common rheumatologic problems; understanding ancillary procedures and lab tests. Offered Every Term.

Restriction(s): Enrollment is limited to Medical level students; enrollment limited to students with a class of Med Third Year or Med Fourth Year; enrollment limited to students in the School of Medicine; enrollment is limited to students with a major in Medicine.

MD4 8630 Sleep Disorders Cr. 6

Interviewing, physical examination, diagnosis, and therapy of patients with sleep disorders. Offered Every Term.

Restriction(s): Enrollment is limited to Medical level students; enrollment limited to students with a class of Med Fourth Year; enrollment limited to students in the School of Medicine; enrollment is limited to students with a major in Medicine.

MD4 8640 Molecular Medicine Cr. 3,6

State-of-the-art molecular biological research and methods, relating to basic and applied research of human disease. Offered Every Term.

Restriction(s): Enrollment is limited to Medical level students; enrollment limited to students with a class of Med Third Year or Med Fourth Year; enrollment limited to students in the School of Medicine; enrollment is limited to students with a major in Medicine.

MD4 8650 General Neurology Cr. 3,6

Evaluation, diagnosis, treatment and management of patients with an array of general neurologic conditions. Offered Every Term.

Restriction(s): Enrollment is limited to Medical level students; enrollment limited to students with a class of Med Third Year or Med Fourth Year; enrollment limited to students in the School of Medicine; enrollment is limited to students with a major in Medicine.

MD4 8660 Neurology Consult Cr. 6

Pathogenesis, genetics, neurochemistry, imaging, diagnostic testing, presentation and treatment of Alzheimer's and other forms of dementia. Offered Every Term.

Restriction(s): Enrollment is limited to Medical level students; enrollment limited to students with a class of Med Third Year or Med Fourth Year; enrollment limited to students in the School of Medicine; enrollment is limited to students with a major in Medicine.

MD4 8670 Clinical Neurology of AIDS Cr. 3,6

Common neurologic manifestations of AIDS and their evaluation and management. Offered Every Term.

Restriction(s): Enrollment is limited to Medical level students; enrollment limited to students with a class of Med Third Year or Med Fourth Year; enrollment limited to students in the School of Medicine; enrollment is limited to students with a major in Medicine.

MD4 8690 Movement Disorders Cr. 6

Evaluation, diagnosis, treatment and management of patients with neurologic movement disorders. Offered Every Term.

Restriction(s): Enrollment is limited to Medical level students; enrollment limited to students with a class of Med Fourth Year; enrollment limited to students in the School of Medicine; enrollment is limited to students with a major in Medicine.

MD4 8700 Neurology - Oncology Cr. 6

Diagnosis, treatment and management of patients with malignancies of the neurologic system. Offered Every Term.

Restriction(s): Enrollment is limited to Medical level students; enrollment limited to students with a class of Med Fourth Year; enrollment limited to students in the School of Medicine; enrollment is limited to students with a major in Medicine.

MD4 8710 Neurologic Sleep Disorders Cr. 6

Operations of a sleep lab and evaluation of patients with sleep disorders. Offered Every Term.

Restriction(s): Enrollment is limited to Medical level students; enrollment limited to students with a class of Med Fourth Year; enrollment limited to students in the School of Medicine; enrollment is limited to students with a major in Medicine.

MD4 8730 Neurology Pediatrics Cr. 3,6

Diagnosis, treatment, and management of a variety of neurologic disorders of infancy and childhood. Offered Every Term.

Restriction(s): Enrollment is limited to Medical level students; enrollment limited to students with a class of Med Third Year or Med Fourth Year; enrollment limited to students in the School of Medicine; enrollment is limited to students with a major in Medicine.

MD4 8750 General Neurosurgery Cr. 3,6

Preoperative, intraoperative, and post-operative care of neurologic patients. Offered Every Term.

Restriction(s): Enrollment is limited to Medical level students; enrollment limited to students with a class of Med Fourth Year; enrollment limited to students in the School of Medicine; enrollment is limited to students with a major in Medicine.

MD4 8760 Neurosurgery Research Cr. 3,6

Basic research principles as they apply to clinical questions in neurosurgery. Offered Every Term.

Restriction(s): Enrollment is limited to Medical level students; enrollment limited to students with a class of Med Third Year or Med Fourth Year; enrollment limited to students in the School of Medicine; enrollment is limited to students with a major in Medicine.

MD4 8780 General Gynecology Cr. 3,6

Signs, symptoms, and management of both surgical and nonsurgical gynecologic disease. Offered Every Term.

Restriction(s): Enrollment is limited to Medical level students; enrollment limited to students with a class of Med Third Year or Med Fourth Year; enrollment limited to students in the School of Medicine; enrollment is limited to students with a major in Medicine.

MD4 8781 Family Planning and Abortion Cr. 3-6

Students will learn the principles and counseling techniques for contraceptive management and abortion. Offered Every Term.

Restriction(s): Enrollment is limited to Medical level students; enrollment limited to students with a class of Med Third Year or Med Fourth Year; enrollment limited to students in the School of Medicine; enrollment is limited to students with a major in Medicine.

MD4 8790 Gynecologic Oncology Cr. 3,6

Evaluation and treatment of patients presenting with a range of gynecologic malignancies. Offered Every Term.

Restriction(s): Enrollment is limited to Medical level students; enrollment limited to students with a class of Med Third Year or Med Fourth Year; enrollment limited to students in the School of Medicine; enrollment is limited to students with a major in Medicine.

MD4 8800 Obstetrics Cr. 3,6

Signs, symptoms and management of normal/abnormal labor, and experience patients with intrapartum high risk conditions and intrapartum/postpartum complications. Offered Every Term.

Restriction(s): Enrollment is limited to Medical level students; enrollment limited to students with a class of Med Third Year or Med Fourth Year; enrollment limited to students in the School of Medicine; enrollment is limited to students with a major in Medicine.

MD4 8810 Obstetrics/Gynecology Cr. 3,6

Care of inpatient and outpatient obstetric and gynecologic patients, and participation in obstetric and gynecological procedures. Offered Every Term.

Restriction(s): Enrollment is limited to Medical level students; enrollment limited to students with a class of Med Third Year or Med Fourth Year; enrollment limited to students in the School of Medicine; enrollment is limited to students with a major in Medicine.

MD4 8820 Obstetrical Ultrasound Cr. 6

Basic knowledge and skills in obstetrical ultrasound. Offered Every Term.

Restriction(s): Enrollment is limited to Medical level students; enrollment limited to students with a class of Med Fourth Year; enrollment limited to students in the School of Medicine; enrollment is limited to students with a major in Medicine.

MD4 8830 Maternal Fetal Medicine Cr. 3,6

Experience patients with common medical and obstetrical complications; development of skills in fetal assessment and evaluation of high risk pregnancies. Offered Every Term.

Restriction(s): Enrollment is limited to Medical level students; enrollment limited to students with a class of Med Third Year or Med Fourth Year; enrollment limited to students in the School of Medicine; enrollment is limited to students with a major in Medicine.

MD4 8850 Nurse Midwifery Cr. 3,6

Ambulatory women's health care delivery as performed by a certified nurse midwife, including management of labor and delivery. Offered Every Term.

Restriction(s): Enrollment is limited to Medical level students; enrollment limited to students with a class of Med Third Year or Med Fourth Year; enrollment limited to students in the School of Medicine; enrollment is limited to students with a major in Medicine.

MD4 8860 Reproductive Endocrine and Infertility Cr. 3,6

Diagnosis and treatment of couples with infertility and reproductive endocrine disorders. Offered Every Term.

Prerequisite: MD3 7600 with a minimum grade of S

Restriction(s): Enrollment is limited to Medical level students; enrollment limited to students with a class of Med Third Year or Med Fourth Year; enrollment limited to students in the School of Medicine; enrollment is limited to students with a major in Medicine.

MD4 8870 Reproductive Genetics Cr. 3,6

Diagnostic, therapeutic and counseling procedures associated with reproductive genetics, fetal diagnosis, and fetal therapy. Offered Every Term.

Restriction(s): Enrollment is limited to Medical level students; enrollment limited to students with a class of Med Third Year or Med Fourth Year; enrollment limited to students in the School of Medicine; enrollment is limited to students with a major in Medicine.

MD4 8890 Ophthalmology Cr. 3,6

Conducting basic eye examinations; evaluation methods, management and treatment of eye diseases. Offered Every Term.

Restriction(s): Enrollment is limited to Medical level students; enrollment limited to students with a class of Med Third Year or Med Fourth Year; enrollment limited to students in the School of Medicine; enrollment is limited to students with a major in Medicine.

MD4 8900 Ophthalmic Research Cr. 3,6

The research process; participation in ophthalmic research. Offered Every Term.

Restriction(s): Enrollment is limited to Medical level students; enrollment limited to students with a class of Med Third Year or Med Fourth Year; enrollment limited to students in the School of Medicine; enrollment is limited to students with a major in Medicine.

MD4 8910 General Orthopedic Surgery Cr. 3,6

Conduct of an H & P, diagnosis and treatment of patients with orthopedic problems; participation in preoperative, operative, and post-operative care. Offered Every Term.

Restriction(s): Enrollment is limited to Medical level students; enrollment limited to students with a class of Med Third Year or Med Fourth Year; enrollment limited to students in the School of Medicine; enrollment is limited to students with a major in Medicine.

MD4 8911 Orthopedic Surgery Sports Medicine Cr. 3,6

Through the clinic and operating room settings, students will learn the assessment of the athlete, emergent care of injuries on the field, as well as common sport injuries. Offered Every Term.

Restriction(s): Enrollment is limited to Medical level students; enrollment limited to students with a class of Med Fourth Year; enrollment limited to students in the School of Medicine; enrollment is limited to students with a major in Medicine.

MD4 8912 Orthopedic Hand Surgery Cr. 3,6

Students will learn about the care of patients with upper extremity disorders, including carpal tunnel, tendon injuries, hand fractures, arthritis of the hand and common congenital deformities. Offered Every Term.

Restriction(s): Enrollment is limited to Medical level students; enrollment limited to students with a class of Med Fourth Year; enrollment limited to students in the School of Medicine; enrollment is limited to students with a major in Medicine.

MD4 8913 Orthopedic Foot/Ankle Surgery Cr. 3,6

Through the clinic and operating room, students will learn how to perform a history and physical exam, diagnose and treat patients that have foot or ankle complaints. Offered Every Term.

Restriction(s): Enrollment is limited to Medical level students; enrollment limited to students with a class of Med Fourth Year; enrollment limited to students in the School of Medicine; enrollment is limited to students with a major in Medicine.

MD4 8914 Orthopaedic Surgery Research Cr. 3,6

Students participate in current orthopaedic surgery and biomechanics research. Offered Every Term.

Restriction(s): Enrollment is limited to Medical level students; enrollment limited to students with a class of Med Third Year or Med Fourth Year; enrollment limited to students in the School of Medicine; enrollment is limited to students with a major in Medicine.

MD4 8930 Orthopedic Traumatology Cr. 3,6

Basic surgical principles and pathophysiology, diagnosis, and management of a variety of traumatic orthopedic conditions. Offered Every Term.

Restriction(s): Enrollment is limited to Medical level students; enrollment limited to students with a class of Med Fourth Year; enrollment limited to students in the School of Medicine; enrollment is limited to students with a major in Medicine.

MD4 8940 General Pathology Cr. 3,6

Functions of a clinical laboratory, including interpretation of surgical pathology. Offered Every Term.

Restriction(s): Enrollment is limited to Medical level students; enrollment limited to students with a class of Med Third Year or Med Fourth Year; enrollment limited to students in the School of Medicine; enrollment is limited to students with a major in Medicine.

MD4 8950 Anatomic Pathology Cr. 3,6

Basic pathologic processes; how gross, microscopic and other techniques are applied to the diagnosis and treatment of disease. Offered Every Term.

Restriction(s): Enrollment is limited to Medical level students; enrollment limited to students with a class of Med Third Year or Med Fourth Year; enrollment limited to students in the School of Medicine; enrollment is limited to students with a major in Medicine.

MD4 8970 Forensic Pathology Cr. 3,6

Basic mechanisms of injury; characteristic features of injury patterns; relationship between medicine and law. Offered Every Term.

Restriction(s): Enrollment is limited to Medical level students; enrollment limited to students with a class of Med Third Year or Med Fourth Year; enrollment limited to students in the School of Medicine; enrollment is limited to students with a major in Medicine.

MD4 8980 Tumor Genetics Cr. 6

Role of cytogenetics and molecular cytogenetics in diagnosis, management and prognosis of a patient's disease. Offered Every Term.

Restriction(s): Enrollment is limited to Medical level students; enrollment limited to students with a class of Med Fourth Year; enrollment limited to students in the School of Medicine; enrollment is limited to students with a major in Medicine.

MD4 8990 General Pediatrics Cr. 3,6

Evaluating and managing children with common pediatric problems; aspects of normal growth and development. Offered Every Term.

Restriction(s): Enrollment is limited to Medical level students; enrollment limited to students with a class of Med Third Year or Med Fourth Year; enrollment limited to students in the School of Medicine; enrollment is limited to students with a major in Medicine.

MD4 8991 Child Abuse Identification and Treatment Cr. 6

Students will learn the techniques to identify and report suspected child abuse and neglect, as well as methods of treatment and prevention. Offered Every Term.

Restriction(s): Enrollment is limited to Medical level students; enrollment limited to students with a class of Med Fourth Year; enrollment limited to students in the School of Medicine; enrollment is limited to students with a major in Medicine.

MD4 8992 Pediatric Pulmonary Cr. 6

Students will learn the evaluation and treatment of pediatric patients with acute and chronic respiratory diseases. Offered Every Term.

Restriction(s): Enrollment is limited to Medical level students; enrollment limited to students with a class of Med Fourth Year; enrollment limited to students in the School of Medicine; enrollment is limited to students with a major in Medicine.

MD4 9000 Adolescent Pediatrics Cr. 6

Interviewing and physical examination on adolescent patients; normal physical, cognitive and psychosocial development of adolescent patients. Offered Every Term.

Restriction(s): Enrollment is limited to Medical level students; enrollment limited to students with a class of Med Fourth Year; enrollment limited to students in the School of Medicine; enrollment is limited to students with a major in Medicine.

MD4 9010 Allergy, Immunology, and Rheumatology Cr. 3,6

Day-to-day care of pediatric patients with common allergic, immunologic and rheumatologic disease. Offered Every Term.

Restriction(s): Enrollment is limited to Medical level students; enrollment limited to students with a class of Med Third Year or Med Fourth Year; enrollment limited to students in the School of Medicine; enrollment is limited to students with a major in Medicine.

MD4 9040 Developmental Behavioral Pediatrics Cr. 6

Distinguishing normal from abnormal development; approaches to assessment of disorders of learning and development. Offered Every Term.

Restriction(s): Enrollment is limited to Medical level students; enrollment limited to students with a class of Med Fourth Year; enrollment limited to students in the School of Medicine; enrollment is limited to students with a major in Medicine.

MD4 9050 Pediatric Genetics Cr. 3,6

Abnormal morphology of children; diagnostic skills in various inborn errors. Offered Every Term.

Restriction(s): Enrollment is limited to Medical level students; enrollment limited to students with a class of Med Fourth Year; enrollment limited to students in the School of Medicine; enrollment is limited to students with a major in Medicine.

MD4 9060 Medical Toxicology and Poison Control Cr. 6

Assessment and management of pediatric patients with suspected or known poisoning or toxic exposure. Offered Every Term.

Restriction(s): Enrollment is limited to Medical level students; enrollment limited to students with a class of Med Fourth Year; enrollment limited to students in the School of Medicine; enrollment is limited to students with a major in Medicine.

MD4 9070 Neonatology Cr. 3,6

Evaluation of healthy newborns; common newborn conditions; care of high risk infants and their mothers. Offered Every Term.

Restriction(s): Enrollment is limited to Medical level students; enrollment limited to students with a class of Med Third Year or Med Fourth Year; enrollment limited to students in the School of Medicine; enrollment is limited to students with a major in Medicine.

MD4 9080 Pediatric Cardiology Cr. 3,6

Skills in taking and performing a cardiac exam; normal hemodynamics; natural history of children with congenital and acquired heart disease. Offered Every Term.

Restriction(s): Enrollment is limited to Medical level students; enrollment limited to students with a class of Med Third Year or Med Fourth Year; enrollment limited to students in the School of Medicine; enrollment is limited to students with a major in Medicine.

MD4 9090 Pediatric Ear, Nose and Throat Cr. 3,6

Entire scope of pediatric otolaryngology. Offered Every Term.

Restriction(s): Enrollment is limited to Medical level students; enrollment limited to students with a class of Med Third Year or Med Fourth Year; enrollment limited to students in the School of Medicine; enrollment is limited to students with a major in Medicine.

MD4 9100 Pediatric Emergency Medicine Cr. 3,6

Observation and participation in care of children presenting with a wide range of conditions in pediatric emergency medicine. Offered Every Term.

Restriction(s): Enrollment is limited to Medical level students; enrollment limited to students with a class of Med Third Year or Med Fourth Year; enrollment limited to students in the School of Medicine; enrollment is limited to students with a major in Medicine.

MD4 9110 Pediatric Endocrinology and Diabetes Cr. 3,6

Evaluation of normal physical growth and development; recognition of common pediatric endocrine problems. Offered Every Term.

Restriction(s): Enrollment is limited to Medical level students; enrollment limited to students with a class of Med Third Year or Med Fourth Year; enrollment limited to students in the School of Medicine; enrollment is limited to students with a major in Medicine.

MD4 9120 Pediatric Gastroenterology, Hepatology, and Nutrition Cr. 3,6

Performance of a history and physical exam, development of a diagnosis, and caring for patients with disorders of the gastrointestinal tract. Offered Every Term.

Restriction(s): Enrollment is limited to Medical level students; enrollment limited to students with a class of Med Third Year or Med Fourth Year; enrollment limited to students in the School of Medicine; enrollment is limited to students with a major in Medicine.

MD4 9130 Pediatric Hematology/Oncology Cr. 3,6

Basic skills to conduct an H & P and diagnose and treat children with hematologic and oncologic problems. Offered Every Term.

Prerequisite: MD3 7300 with a minimum grade of S

Restriction(s): Enrollment is limited to Medical level students; enrollment limited to students with a class of Med Third Year or Med Fourth Year; enrollment limited to students in the School of Medicine; enrollment is limited to students with a major in Medicine.

MD4 9140 Pediatric Infectious Disease Cr. 6

Evaluation, diagnosis, treatment, and management of common pediatric infections. Offered Every Term.

Restriction(s): Enrollment is limited to Medical level students; enrollment limited to students with a class of Med Fourth Year; enrollment limited to students in the School of Medicine; enrollment is limited to students with a major in Medicine.

MD4 9150 Pediatric Intensive Care Cr. 3,6

Basic diagnostic and therapeutic approach to care of critically ill children. Offered Every Term.

Restriction(s): Enrollment is limited to Medical level students; enrollment limited to students with a class of Med Third Year or Med Fourth Year; enrollment limited to students in the School of Medicine; enrollment is limited to students with a major in Medicine.

MD4 9160 Pediatric Nephrology Cr. 3,6

Basic skills to examine, diagnose and treat patients with common renal diseases. Offered Every Term.

Restriction(s): Enrollment is limited to Medical level students; enrollment limited to students with a class of Med Third Year or Med Fourth Year; enrollment limited to students in the School of Medicine; enrollment is limited to students with a major in Medicine.

MD4 9170 Pediatric Neurology Cr. 3,6

Performance of a complete neurological history, examination, and ordering of appropriate laboratory tests to diagnose and manage pediatric patients with neurologic disease. Offered Every Term.

Restriction(s): Enrollment is limited to Medical level students; enrollment limited to students with a class of Med Third Year or Med Fourth Year; enrollment limited to students in the School of Medicine; enrollment is limited to students with a major in Medicine.

MD4 9180 Pediatric Pathology: Autopsy and Surgical Cr. 3,6

Correlation of clinical, anatomical and laboratory findings in diagnosing pediatric disease. Offered Every Term.

Restriction(s): Enrollment is limited to Medical level students; enrollment limited to students with a class of Med Third Year or Med Fourth Year; enrollment limited to students in the School of Medicine; enrollment is limited to students with a major in Medicine.

MD4 9190 Pediatric Plastic Surgery/Craniofacial Cr. 3,6

Recognition and development of a treatment plan for congenital craniofacial anomalies and vascular lesions. Offered Every Term.

Restriction(s): Enrollment is limited to Medical level students; enrollment limited to students with a class of Med Third Year or Med Fourth Year; enrollment limited to students in the School of Medicine; enrollment is limited to students with a major in Medicine.

MD4 9200 Pediatric PMR Cr. 3,6

Childhood functional impairments including head injury, spinal cord injury, cerebral palsy, neuromuscular diseases, sports medicine, and electromyography. Offered Every Term.

Restriction(s): Enrollment is limited to Medical level students; enrollment limited to students with a class of Med Third Year or Med Fourth Year; enrollment limited to students in the School of Medicine; enrollment is limited to students with a major in Medicine.

MD4 9210 Pediatric Subinternship Cr. 7

Senior students expand upon Year 3 pediatric clerkship experience with more intensive involvement in select patient populations. Offered Every Term.

Restriction(s): Enrollment is limited to Medical level students; enrollment limited to students with a class of Med Fourth Year; enrollment limited to students in the School of Medicine; enrollment is limited to students with a major in Medicine.

MD4 9230 Physical Medicine and Rehabilitation Cr. 3,6

Performance of an H & P; development of greater understanding of diagnosis, management and treatment of patients with neuromuscular and musculoskeletal problems.] Offered Every Term.

Restriction(s): Enrollment is limited to Medical level students; enrollment limited to students with a class of Med Third Year or Med Fourth Year; enrollment limited to students in the School of Medicine; enrollment is limited to students with a major in Medicine.

MD4 9240 Spinal Cord Injury Rehabilitation Cr. 3,6

Management of patients with spinal cord injuries; role of rehabilitation team approach to spinal cord injuries. Offered Every Term.

Restriction(s): Enrollment is limited to Medical level students; enrollment limited to students with a class of Med Third Year or Med Fourth Year; enrollment limited to students in the School of Medicine; enrollment is limited to students with a major in Medicine.

MD4 9250 Traumatic Brain Injury Rehabilitation Cr. 3,6

Management of patients with traumatic brain injuries; role of a rehabilitation team in management of patients with traumatic brain injuries. Offered Every Term.

Restriction(s): Enrollment is limited to Medical level students; enrollment limited to students with a class of Med Third Year or Med Fourth Year; enrollment limited to students in the School of Medicine; enrollment is limited to students with a major in Medicine.

MD4 9260 Brain Imaging of Childhood Onset of Neuropsychiatric Disorders Cr. 3,6

Brain imaging techniques; neurodevelopmental approaches. Offered Every Term.

Restriction(s): Enrollment is limited to Medical level students; enrollment limited to students with a class of Med Fourth Year; enrollment limited to students in the School of Medicine; enrollment is limited to students with a major in Medicine.

MD4 9261 Emergent and Consult Liaison Psychiatry Cr. 3,6

Students will learn to assess psychiatric patients, manage acute intoxication and withdrawal syndromes, manage psychiatric patients with medical comorbidities and learn basic managed care principals. Offered Every Term.

Restriction(s): Enrollment is limited to Medical level students; enrollment limited to students with a class of Med Third Year or Med Fourth Year; enrollment limited to students in the School of Medicine; enrollment is limited to students with a major in Medicine.

MD4 9262 Emergency Psychiatry Cr. 3-6

Students will learn to evaluate, diagnose, and treat psychiatric patients in an emergency setting. Offered Every Term.

Restriction(s): Enrollment is limited to Medical level students; enrollment limited to students with a class of Med Third Year or Med Fourth Year; enrollment limited to students in the School of Medicine; enrollment is limited to students with a major in Medicine.

MD4 9263 Clinical Electro-Physiology Research Cr. 3-6

Students will participate in the academic research process, as well as learn the strengths and weakness of the different electrophysiological testing modalities. Offered Every Term.

Restriction(s): Enrollment is limited to Medical level students; enrollment limited to students with a class of Med Third Year or Med Fourth Year; enrollment limited to students in the School of Medicine; enrollment is limited to students with a major in Medicine.

MD4 9264 Psychiatry Research Cr. 3,6

Students will participate in research projects and learn the clinical components associated with neuropsychiatric research. Offered Every Term.

Restriction(s): Enrollment is limited to Medical level students; enrollment limited to students with a class of Med Fourth Year; enrollment limited to students in the School of Medicine; enrollment is limited to students with a major in Medicine.

MD4 9265 Outpatient Psychiatry Cr. 3-6

The student will observe routine outpatient practice and have an opportunity to evaluate new outpatients under the supervision of residents/staff. Offered Every Term.

Restriction(s): Enrollment is limited to Medical level students; enrollment limited to students with a class of Med Third Year or Med Fourth Year; enrollment limited to students in the School of Medicine; enrollment is limited to students with a major in Medicine.

MD4 9270 Child and Adolescent Psychiatry Cr. 3,6

Experience of a variety of children and adolescents with psychiatric disorders; evaluation of patients and provision of care. Offered Every Term.

Restriction(s): Enrollment is limited to Medical level students; enrollment limited to students with a class of Med Fourth Year; enrollment limited to students in the School of Medicine; enrollment is limited to students with a major in Medicine.

MD4 9290 Psychiatric Consultation Cr. 3,6

Knowledge and skills associated with the psychiatric interview; mental status examination; development of knowledge base in behavioral medicine and treatment of psychiatric illness. Offered Every Term.

Restriction(s): Enrollment is limited to Medical level students; enrollment limited to students with a class of Med Fourth Year; enrollment limited to students in the School of Medicine; enrollment is limited to students with a major in Medicine.

MD4 9300 Psychiatry: Geriatrics Cr. 3,6

Knowledge and skills associated with the psychiatric interview; mental status examination; interpretation of data, diagnosis, psychopharmacology and psychotherapy in geriatric patients. Offered Every Term.

Restriction(s): Enrollment is limited to Medical level students; enrollment limited to students with a class of Med Fourth Year; enrollment limited to students in the School of Medicine; enrollment is limited to students with a major in Medicine.

MD4 9310 Psychotherapy Elective Cr. 3,6

Psychodynamic, cognitive, and group therapies; observation and participation in psychotherapeutic encounters. Offered Every Term.

Restriction(s): Enrollment is limited to Medical level students; enrollment limited to students with a class of Med Third Year or Med Fourth Year; enrollment limited to students in the School of Medicine; enrollment is limited to students with a major in Medicine.

MD4 9320 Research and Practice in Addiction Psychiatry Cr. 3,6

Diagnosis and management of individuals with addictive disorders; psychotherapeutic and pharmacotherapeutic interventions for problems with psychotropic substances. Offered Every Term.

Restriction(s): Enrollment is limited to Medical level students; enrollment limited to students with a class of Med Fourth Year; enrollment limited to students in the School of Medicine; enrollment is limited to students with a major in Medicine.

MD4 9340 Substance Abuse Cr. 3,6

Inpatient and outpatient treatment of substance use disorders. Offered Every Term.

Restriction(s): Enrollment is limited to Medical level students; enrollment limited to students with a class of Med Fourth Year; enrollment limited to students in the School of Medicine; enrollment is limited to students with a major in Medicine.

MD4 9345 Psychiatric Care of Veterans Cr. 6

Clinical Experience; Students will complete 160 hours of clinical education experience during their one-month rotation. Offered Every Term.

Restriction(s): Enrollment is limited to Medical level students; enrollment limited to students with a class of Med Fourth Year; enrollment is limited to students with a major in Medicine.

MD4 9350 General Diagnostic Radiology Cr. 3,6

Basic techniques of imaging; skills to diagnose and interpret radiographic studies. Offered Every Term.

Restriction(s): Enrollment is limited to Medical level students; enrollment limited to students with a class of Med Third Year or Med Fourth Year; enrollment limited to students in the School of Medicine; enrollment is limited to students with a major in Medicine.

MD4 9360 Intervention Radiology Cr. 3,6

Role of interventional radiologic techniques in diagnosis and management of disease. Offered Every Term.

Restriction(s): Enrollment is limited to Medical level students; enrollment limited to students with a class of Med Third Year or Med Fourth Year; enrollment limited to students in the School of Medicine; enrollment is limited to students with a major in Medicine.

MD4 9370 Nuclear Medicine Cr. 3,6

Performing and interpreting clinical nuclear medicine procedures; role of nuclear medicine in clinical practice. Offered Every Term.

Restriction(s): Enrollment is limited to Medical level students; enrollment limited to students with a class of Med Fourth Year; enrollment limited to students in the School of Medicine; enrollment is limited to students with a major in Medicine.

MD4 9380 Radiation Oncology Cr. 3,6

Role of radiation therapy in variety of adult and pediatric malignancies. Offered Every Term.

Restriction(s): Enrollment is limited to Medical level students; enrollment limited to students with a class of Med Third Year or Med Fourth Year; enrollment limited to students in the School of Medicine; enrollment is limited to students with a major in Medicine.

MD4 9390 General Surgery Cr. 3,6

Experience in a variety of elective and acute surgical cases; diagnostic skills; basic surgical techniques and procedures. Offered Every Term.

Restriction(s): Enrollment is limited to Medical level students; enrollment limited to students with a class of Med Third Year or Med Fourth Year; enrollment limited to students in the School of Medicine; enrollment is limited to students with a major in Medicine.

MD4 9392 Advanced Surgical Skills Cr. 6

Students will learn advanced surgical skills in preparation for their surgery residency program. Offered Every Term.

Restriction(s): Enrollment is limited to Medical level students; enrollment limited to students with a class of Med Fourth Year; enrollment limited to students in the School of Medicine; enrollment is limited to students with a major in Medicine.

MD4 9393 Breast Surgery Cr. 6

Students will gain exposure to the diagnosis and treatment of breast diseases at the Walt Comprehensive Breast Center. Offered Every Term.

Restriction(s): Enrollment is limited to Medical level students; enrollment limited to students with a class of Med Fourth Year; enrollment limited to students in the School of Medicine; enrollment is limited to students with a major in Medicine.

MD4 9400 Acute Burn Care Cr. 6

Physiologic principles and clinical management of burn victims. Offered Every Term.

Restriction(s): Enrollment is limited to Medical level students; enrollment limited to students with a class of Med Fourth Year; enrollment limited to students in the School of Medicine; enrollment is limited to students with a major in Medicine.

MD4 9410 Cardiovascular Surgery Cr. 3,6

Diagnosis and treatment of cardiology diseases using invasive surgical approaches. Offered Every Term.

Restriction(s): Enrollment is limited to Medical level students; enrollment limited to students with a class of Med Third Year or Med Fourth Year; enrollment limited to students in the School of Medicine; enrollment is limited to students with a major in Medicine.

MD4 9430 Gastrointestinal Surgery Cr. 6

Pathophysiology and management of gastrointestinal surgical diseases. Offered Every Term.

Restriction(s): Enrollment is limited to Medical level students; enrollment limited to students with a class of Med Fourth Year; enrollment limited to students in the School of Medicine; enrollment is limited to students with a major in Medicine.

MD4 9440 Pediatric Surgery Cr. 3,6

Diagnosis and care of surgical disorders in children. Offered Every Term.

Restriction(s): Enrollment is limited to Medical level students; enrollment limited to students with a class of Med Third Year or Med Fourth Year; enrollment limited to students in the School of Medicine; enrollment is limited to students with a major in Medicine.

MD4 9470 Plastic and Reconstructive Surgery Cr. 3,6

Evaluation, formulation of treatment plan, management of postoperative care, and participation in surgical procedures for patients requiring plastic surgery. Offered Every Term.

Restriction(s): Enrollment is limited to Medical level students; enrollment limited to students with a class of Med Fourth Year; enrollment limited to students in the School of Medicine; enrollment is limited to students with a major in Medicine.

MD4 9480 Surgical Intensive Care Unit Cr. 3,6

Care of critically ill surgical patients; common surgical intensive care unit procedures. Offered Every Term.

Restriction(s): Enrollment is limited to Medical level students; enrollment limited to students with a class of Med Fourth Year; enrollment limited to students in the School of Medicine; enrollment is limited to students with a major in Medicine.

MD4 9490 Surgery Subinternship Cr. 7

Senior students expand upon their Year 3 surgery clerkship experience with more intensive involvement in select patient populations. Offered Every Term.

Restriction(s): Enrollment is limited to Medical level students; enrollment limited to students with a class of Med Fourth Year; enrollment limited to students in the School of Medicine; enrollment is limited to students with a major in Medicine.

MD4 9495 Advanced Maxillofacial Surgery Cr. 7

Offered Every Term.

Restriction(s): Enrollment is limited to Medical level students; enrollment limited to students with a class of Med Fourth Year; enrollment limited to students in the School of Medicine; enrollment is limited to students with a major in Medicine.

MD4 9500 Transplant Surgery Cr. 3,6

Basic surgical principles and pathophysiology, diagnosis and management of a variety of transplant surgical conditions. Offered Every Term.

Prerequisite: MD3 7200 with a minimum grade of S and MD3 7400 with a minimum grade of S

Restriction(s): Enrollment is limited to Medical level students; enrollment limited to students with a class of Med Third Year or Med Fourth Year; enrollment limited to students in the School of Medicine; enrollment is limited to students with a major in Medicine.

MD4 9510 Acute Care Surgery Cr. 3,6

Evaluation, diagnosis, treatment, and management of critically ill patients; basic procedures in the care of this population. Offered Every Term.

Restriction(s): Enrollment is limited to Medical level students; enrollment limited to students with a class of Med Third Year or Med Fourth Year; enrollment limited to students in the School of Medicine; enrollment is limited to students with a major in Medicine.

MD4 9520 Vascular Surgery Cr. 3,6

Pathophysiology, evaluation, diagnosis, and management of patients needing vascular surgery; participation of procedures for this population. Offered Every Term.

Restriction(s): Enrollment is limited to Medical level students; enrollment limited to students with a class of Med Fourth Year; enrollment limited to students in the School of Medicine; enrollment is limited to students with a major in Medicine.

MD4 9528 Maxillofacial Surgery Cr. 6

In-depth exposure to the field of maxillofacial surgery and its subspecialties of trauma, oncology, and micro-vascular reconstruction. Offered Every Term.

Restriction(s): Enrollment is limited to Medical level students; enrollment limited to students with a class of Med Third Year or Med Fourth Year; enrollment limited to students in the School of Medicine; enrollment is limited to students with a major in Medicine.

MD4 9530 General Urology Cr. 3,6

Pathophysiology, evaluation, diagnosis and management of patients with urologic disease; participation in urologic surgery. Offered Every Term.

Restriction(s): Enrollment is limited to Medical level students; enrollment limited to students with a class of Med Third Year or Med Fourth Year; enrollment limited to students in the School of Medicine; enrollment is limited to students with a major in Medicine.

MD4 9540 Male Reproductive Medicine Cr. 3,6

Understanding of the basic physiology of sperm production and photophysiology that lead to infertility and sexual dysfunction. Offered Every Term.

Restriction(s): Enrollment limited to students with a class of Med Fourth Year; enrollment is limited to students with a major in Medicine.

MD4 9545 Step 2 Preparation Cr. 1

Students will be introduced to methods for successfully passing the mandatory Step 2 CK United States Licensing Examination (USMLE). Offered Intermittently.

Restriction(s): Enrollment is limited to Medical level students; enrollment limited to students with a class of Med Fourth Year; enrollment limited to students in the School of Medicine.

MD4 9999 Year 3 Additional Course Work Cr. 0

Students complete Year 3 course work prior to starting Year 4 course work. Offered Every Term.

Restriction(s): Enrollment is limited to Medical level students; enrollment limited to students with a class of Med Third Year or Med Fourth Year; enrollment limited to students in the School of Medicine; enrollment is limited to students with a major in Medicine.

MDR - MEDICAL RESEARCH

MDR 7090 Fellowship Writing Cr. 2

Preparation and submission of fellowship applications to national funding agencies such as the NIH. Advanced scientific communication, including bibliographic and online resources, organization of federal funding agencies, composition and function of study sections, NIH grant application process, fellowship writing, Institutional Review Boards (IRBs). Students work with faculty and research mentors to prepare and submit applications. Offered Fall.

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students in the School of Medicine; enrollment limited to students in the MD & PHD program.

MDR 7100 Clinical Research Design Cr. 2

Design and implementation of authorized clinical research projects, with exposure to such topics as drug discovery, study design, obtaining FDA approval, subject recruitment and retention, data management, translational and biotechnological aspects, GCRC, and bioinformatics; preparation for establishment of career in clinical and translational research. Offered Fall, Winter.

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students in the School of Medicine; enrollment limited to students in the MD & PHD program.

MDR 7110 Clinical Field Experience Cr. 2

Complexity of the disease process from initial presentation of patient in a clinic, to understanding the pathophysiological basis of the disease, to diagnosis, treatment, and patient management; application of clinical and laboratory research training and current technology. Topics may include: diabetes, sickle cell anemia, asthma, seizures, hypertension, congestive heart failure, chronic myeloid leukemia, genetics of cancer, stroke, lupus. Offered Fall, Winter.

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students in the School of Medicine; enrollment limited to students in the MD & PHD program.

Repeatable for 2 Credits

MDR 7420 Topics in International Health Medicine Cr. 2

Clinical trainees are exposed to topics in understanding and managing health care and other needs of children involved in international travel, as well as of children adopted locally from other countries. One-hour biweekly lectures by experts in various areas of international health. Offered Every Other Year.

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students in the School of Medicine.

MDR 7990 Directed Study in Pediatric Global Health Cr. 4

Clinical trainees develop and execute research projects in international settings, using international and culturally sensitive protocols and regulations. Conducting research in clinical areas at partnering sites in India and China. Offered Every Other Year.

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students in the School of Medicine.

MDR 8999 Master's Thesis Research and Direction Cr. 1-8

Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students with a class of Candidate Masters; enrollment is limited to students with a major in Medical Research; enrollment limited to students in a MS in Medical Research degree.

Repeatable for 8 Credits

ME - MECHANICAL ENGINEERING

ME 2200 Thermodynamics Cr. 3

Transformation of heat energy to other energy forms. Basic concepts and laws of thermodynamics. Thermodynamic properties and processes for simple substances. Applications to power and refrigeration cycles. No credit after ME 2210. Offered Fall, Winter.

Prerequisites: MAT 2020 with a minimum grade of C- and PHY 2175 with a minimum grade of C- and May be taken concurrently. BE 1300 with a minimum grade of C- and May be taken concurrently. BE 1310 with a minimum grade of C- and BE 1500 with a minimum grade of C-

ME 2410 Statics Cr. 3

Basic concepts and principles of statics with applications to Newton's Laws of Motion to engineering problems. Forces, moments, equilibrium, couples, free body diagrams, trusses, frames, fluid statics, friction, area and mass moment of inertia. Offered Every Term.

Prerequisites: MAT 2020 with a minimum grade of C- and PHY 2175 with a minimum grade of C- and BE 1500 with a minimum grade of C-
Equivalent: CE 2410

ME 2420 Elementary Mechanics of Materials Cr. 3

Elastic relationships between external forces acting on deformable bodies and the associated stresses and deformations; structural members subjected to axial load, torsion, and bending; column buckling; combined stresses; repeated loads; unsymmetrical bending. Offered Every Term.

Prerequisites: ME 2410 with a minimum grade of C- or CE 2410 with a minimum grade of C-
Equivalent: CE 2420

ME 2500 Numerical Methods Using MATLAB Cr. 2

Developing numerical solutions for engineering problems using MATLAB. Evaluation of alternative approaches to the numerical solutions in terms of accuracy and efficiency. Offered Fall, Spring/Summer.

Prerequisites: BE 1500 with a minimum grade of C- and MAT 2030 with a minimum grade of C- and May be taken concurrently. MAT 2150 with a minimum grade of C-

ME 3300 Fluid Mechanics: Theory and Laboratory Cr. 4

Introduction to the nature and physical properties of fluids, statics, equation of motion, incompressible inviscid flow, dimensional analysis, incompressible one-dimensional compressible channel flow. Experiments to supplement lectures. Offered Fall, Winter.

Prerequisites: ME 2410 with a minimum grade of C- and BE 2550 with a minimum grade of C- or ME 2500 with a minimum grade of C-
Restriction(s): Enrollment limited to students in the following programs: BS in Biomedical Engineering, BS in Chemical Engineering, BS in Civil Engineering, BS in Electrical Engineering, BS in Industrial Engineering, BS in Mechanical Engineering.

ME 3400 Dynamics Cr. 3

Basic concepts and principles of dynamics with application of Newton's Laws of Motion to engineering problems. Kinematics and kinetics of particles and rigid and variable-mass bodies. Equations of motion, impulse-momentum, impact and work-energy principles. Offered Fall, Winter.

Prerequisites: ME 2410 with a minimum grade of C- and ME 2500 with a minimum grade of C- and MAT 2150 with a minimum grade of C-
Restriction(s): Enrollment limited to students in the following programs: BS in Biomedical Engineering, BS in Chemical Engineering, BS in Civil Engineering, BS in Electrical Engineering, BS in Industrial Engineering, BS in Mechanical Engineering.

ME 3450 Manufacturing Processes I Cr. 3

A study of the field of manufacturing processes from a mechanical engineering design standpoint. Topics include: processing of metals, polymers and ceramics, and computer-aided manufacturing. Offered Fall, Winter.

Prerequisites: BE 1500 with a minimum grade of C- and ME 2420 with a minimum grade of C- and BE 1300 with a minimum grade of C- and BE 1310 with a minimum grade of C-

Restriction(s): Enrollment limited to students in the following programs: BS in Biomedical Engineering, BS in Chemical Engineering, BS in Civil Engineering, BS in Electrical Engineering, BS in Industrial Engineering, BS in Mechanical Engineering.

Course Material Fees: \$25

Equivalent: IE 3450

ME 4150 Design of Machine Elements Cr. 4

Static body stresses, strain and deflection, failure theories, introduction to impact loading and fatigue. Design of common mechanical elements: threaded fasteners, rivets, welding and bonding, springs, lubrication and sliding bearings, rolling element bearings. Offered Every Term.

Prerequisites: ME 3450 with a minimum grade of C- and BE 2100 with a minimum grade of C-

Restriction(s): Enrollment limited to students in the following programs: BS in Biomedical Engineering, BS in Chemical Engineering, BS in Civil Engineering, BS in Electrical Engineering, BS in Industrial Engineering, BS in Mechanical Engineering.

Course Material Fees: \$40

ME 4210 Heat Transfer: Theory and Laboratory Cr. 4

Fundamental concepts and basic modes of heat transfer. General equation of heat conduction, steady state heat conduction on one and more dimensions. Transient heat conduction. Heat transfer by radiation, Kirchoff's law and the black body. Radiation between diffuse surfaces. Radiation from gases, vapors and flames. Introduction to heat convection; concept of heat transfer coefficient and Nusselt number. Lab experiments to supplement lectures. Offered Fall, Winter.

Prerequisite: ME 3300 with a minimum grade of C- and ENG 3050 with a minimum grade of C-

Restriction(s): Enrollment limited to students in the following programs: BS in Biomedical Engineering, BS in Chemical Engineering, BS in Civil Engineering, BS in Electrical Engineering, BS in Industrial Engineering, BS in Mechanical Engineering.

Course Material Fees: \$25

ME 4300 Thermal Fluid Systems Design Cr. 4

Design of thermal-fluid systems to meet system performance requirements, computer-aided design, system simulation, design optimization including investment economics. Offered Fall, Winter.

Prerequisite: ME 4210 with a minimum grade of C- and ENG 3060 with a minimum grade of C-

Restriction(s): Enrollment limited to students in the College of Engineering; enrollment limited to students in the following programs: BS in Biomedical Engineering, BS in Chemical Engineering, BS in Civil Engineering, BS in Electrical Engineering, BS in Industrial Engineering, BS in Mechanical Engineering.

Course Material Fees: \$40

ME 4410 Vibrations: Theory and Laboratory Cr. 4

Fundamentals of dynamic principles, energy relation and Rayleigh's principle. Undamped and damped free vibration of one degree of freedom systems. Forced vibrations with harmonic excitation. Vibration isolation, critical speed of shafting. Experiments to supplement theory. Offered Fall, Winter.

Prerequisite: ME 3400 with a minimum grade of C- and ENG 3050 with a minimum grade of C-

Restriction(s): Enrollment limited to students in the following programs: BS in Biomedical Engineering, BS in Chemical Engineering, BS in Civil Engineering, BS in Electrical Engineering, BS in Industrial Engineering, BS in Mechanical Engineering.

Course Material Fees: \$25

ME 4420 Dynamic Modeling and Control of Engineering System Cr. 4

Mathematical modeling of linear, lumped, time-invariant systems, open and closed loop systems, single-input-single-output system design using root locus method. Offered Fall, Winter.

Prerequisite: ME 3400 with a minimum grade of C-

Restriction(s): Enrollment is limited to Undergraduate level students; enrollment limited to students in the following programs: BS in Biomedical Engineering, BS in Chemical Engineering, BS in Civil Engineering, BS in Electrical Engineering, BS in Industrial Engineering, BS in Mechanical Engineering.

ME 4500 Mechanical Engineering Design II Cr. 4

Satisfies General Education Requirement: Writing Intensive Competency. Involve teamwork on semester-long open-ended design project. Develop design concepts based on various design theories, analyze alternative solutions and identify "best design solution" within given constraints. Students perform patent literature search, design, fabricate, develop and test prototypes. Perform product verification and validation. Require submission of formal progress reports, a final written report and a public presentation. Course satisfies Writing Intensive course requirement. Offered Fall, Winter.

Prerequisites: ME 4150 with a minimum grade of C- or ME 4250 with a minimum grade of C- and ENG 3060 with a minimum grade of C- and BE 2250 with a minimum grade of C- or ME 2500 with a minimum grade of C- and May be taken concurrently: ME 4410 with a minimum grade of C-

Restriction(s): Enrollment limited to students in the following programs: BS in Biomedical Engineering, BS in Chemical Engineering, BS in Civil Engineering, BS in Electrical Engineering, BS in Industrial Engineering, BS in Mechanical Engineering.

Course Material Fees: \$50

ME 5000 Engineering Analysis I Cr. 4

Applications of ordinary differential equations. The method of Frobenius, Bessel functions, Legendre polynomials. Orthogonality of characteristic functions. Fourier series and Fourier integrals. Characteristics and solutions of partial differential equations. Method of separation or variations. Applications to initial and boundary value problems in engineering. Offered Fall.

Course Material Fees: \$5

ME 5040 Finite Element Methods I Cr. 4

Introduce finite element methods and review solid mechanics concepts and formalisms, variational methods and potential energy principles. Emphasize the basic understanding of the finite element method including its physical and mathematical principles, numerical procedures and their implementation. Define displacement-based formulations of spring, bar, beam, plane strain and plane stress elements along with isoparametric element formulation, assembly of elements and solution of global stiffness equations. Offered Fall, Winter.

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students in the College of Engineering.

ME 5100 Quantitative Physiology Cr. 4

Basic principles of human physiology presented from the engineering perspective. Bodily functions, their regulation and control discussed in quantitative terms and illustrated by mathematical models where feasible. Offered Fall, Winter.

Equivalent: BME 5010, CHE 5100, ECE 5100

ME 5110 Fundamental Fuel Cell Systems Cr. 4

Introduce various types of fuel cells, materials properties of electrodes and polymeric membranes, and electrochemical mechanisms. Reforming of various types of hydrocarbon fuel to hydrogen, and reforming technology. Offered Fall.

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students in the College of Engineering.

Equivalent: AET 5110, CHE 5110, EVE 5130

ME 5115 Fundamentals of Electric-drive Vehicle Modeling Cr. 4

Covers engineering and modeling fundamentals and basic design of electric-drive vehicle powertrains by understanding and analyzing the relevant multi-physics and applying the associated equations and simple models. MATLAB script m-file is required for all assignments. Offered Fall.

Restriction(s): Enrollment is limited to Graduate or Undergraduate level students; enrollment limited to students with a class of Senior; enrollment limited to students in the College of Engineering.

Equivalent: EVE 5110, EVE 5115

ME 5120 Fundamentals of Alternative Energy Technology Cr. 4

Provide an overview/review of thermodynamics. Cover advanced thermodynamics topics of energy and chemical reacting systems. Introduce general areas of alternative energy technology, engineering analysis and design of solar angle/time/radiation, solar heating, solar photovoltaic, and wind power. Offered Winter.

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students in the College of Engineering.

Equivalent: AET 5120

ME 5160 Musculoskeletal Biomechanics Cr. 4

Structure and properties of the major tissue components of the musculoskeletal system and evaluation of how tissues combine to provide support and motion to the body. Offered Fall.

Prerequisite: BME 5010 with a minimum grade of C or BMS 6550 with a minimum grade of C

Equivalent: BME 5210

ME 5170 Design of Human Rehabilitation Systems Cr. 4

Design, fabrication and testing of customized hardware to aid handicapped patients. Offered Fall.

ME 5180 Introduction to Biomaterials Cr. 4

Introduction to study of both biological materials (bone, muscle, etc.) and materials for medical applications. Topics include tissue properties and effects of pathology, biocompatibility, and design considerations. Offered Winter.

Prerequisites: BIO 1510 with a minimum grade of C- or May be taken concurrently: BMS 5010 with a minimum grade of B-

Equivalent: BME 5370

ME 5215 Fundamentals of Battery Systems for Electric and Hybrid Vehicles Cr. 4

Covers fundamental electrochemistry and engineering aspects for electric propulsion batteries including lead acid, nickel metal hydride, lithium ion and capacitor technologies. Offered Winter.

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students in the College of Engineering.

Equivalent: AET 5310, CHE 5120, EVE 5120

ME 5300 Intermediate Fluid Mechanics Cr. 4

Introduce fluid kinematics entailing vector field, potential flows, vorticity along with the computation of particle trajectory in a given velocity field and near stagnation points. Define basics of fluid dynamics including stress tensor in fluids, Navier-Stokes equations, Euler's equations, properties of solutions of Euler's equations, Bernoulli's integral and role of viscosity. Extend the analysis to two-dimensional potential flows and vortex flows. Offered Winter.

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students in the College of Engineering.

ME 5330 Advanced Thermal Fluid System Design Cr. 4

Involve teamwork on semester-long open-ended design project of thermal fluid systems to meet performance requirements using sound design process and system engineering approach. Apply engineering principles and computational design software to analyze and optimize system or subsystem processes. Offered Fall, Winter.

Prerequisites: ENG 3060 with a minimum grade of C- and ME 4210 with a minimum grade of C-

Restriction(s): Enrollment limited to students in the College of Engineering.

Course Material Fees: \$40

ME 5400 Dynamics II Cr. 4

Cover three-dimensional kinematics and kinetics of rigid bodies, Euler angles, angular momentum, D'Alembert Principle, equations of motion in general rotating coordinate frames. Derive Lagrange's equation of motion for particles and rigid bodies. Introduce Lagrange multipliers, holonomic and non-holonomic constraints, virtual work principle, and Hamilton's Principle. Offered Fall.

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students in the College of Engineering.

Course Material Fees: \$10

ME 5410 Vibrations II Cr. 4

Review the vibration response of two-degree-of-freedom systems including frequency response function. Extend the analysis to multi-degree-of-freedom systems including eigenvalues (natural frequencies) and orthogonality of eigenvectors (normal modes). Introduce numerical and experimental modal analysis techniques. Formulate the boundary-value problem for the vibration of continuous structural elements such as rods, strings, and beams. Offered Winter.

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students in the College of Engineering.

ME 5425 Analysis of Vibration Movements and Instrumentation Cr. 4

Basic tools and instrumentation, such as spectral analyzers to measure and analyze vibration time histories of excitation and response signals (stationary or non-stationary) in the time and frequency domains. Fast Fourier transform, frequency time analyses. Offered Fall.

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students in the College of Engineering.

Course Material Fees: \$20

ME 5440 Industrial Noise Control Cr. 4

Basic and advanced measurement techniques to acquire various acoustic quantities in a non-ideal environment including measurements of pressure, power and intensity of sound levels, reverberation time, absorption, coefficients of materials, room acoustics, and modal analysis. Cover noise reduction and control strategies for engineering applications. Offered Fall.

Restriction(s): Enrollment limited to students in the College of Engineering.

ME 5453 Automotive Manufacturing Systems and Processes Cr. 4

Introduce principles and methodologies of automotive assembly systems and processes. Cover operation management, quality management, principle of system development, planning and analysis of assembly systems and supportive functions, assembly processes, automatic and manual operations, management of tooling development and honing processes of sheet metal parts. Offered Spring/Summer.

Prerequisite: ME 3450 with a minimum grade of C- or ME 4250 with a minimum grade of C-

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students in the College of Engineering.

ME 5460 Fundamentals in Acoustics and Noise Control Cr. 4

Introduce principles of sound generation, propagation and interaction with solid boundary surfaces, as well as engineering noise control applications. Gain hands-on experience on simulating sound radiation and interactions with solid boundaries, and estimating sound transmission through partitions. Offered Every Other Fall.

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students in the College of Engineering.

ME 5465 Lasers for Medical Applications Cr. 3

Summarizes the wealth of recent research on the principles, technologies and application of lasers in diagnostics, therapy and surgery. Includes an overview of optics, optical components used in a typical laser, key principles of lasers and radiation interactions with tissue. The respective types of the laser (solid state, gas, dye, and semiconductor) are reviewed to provide an understanding of the wide diversity, and therefore, the large possible choice of these devices for a specific diagnosis, treatment, or surgery. Offered Winter.

Equivalent: BME 5460, PHY 5460

ME 5470 Creative Problem Solving in Design and Manufacturing Cr. 3

Concepts of laws of natural development of engineering systems. Algorithm for inventive (creative) problem-solving (AIPS-85). Creative use of physical and geometrical effects in design of mechanical and manufacturing systems. Concepts of strength, stiffness, vibratory effects, reliability in mechanical design. Offered Yearly.

Equivalent: IE 5490, SYE 5470

ME 5500 Advanced Engineering Design Cr. 4

Satisfies General Education Requirement: Writing Intensive Competency

Involve teamwork on semester-long open-ended design project. Develop design concepts based on various design theories, analyze alternative solutions and identify "best design solution" within given constraints. Students perform patent literature search, design, fabricate, develop and test prototypes. Perform product verification and validation. Require submission of formal progress reports, a final written report and a public presentation. Course satisfies Writing Intensive course requirement. Offered Fall, Winter.

Prerequisites: BE 2550 with a minimum grade of C-, ENG 3060 with a minimum grade of C-, and ME 4250 with a minimum grade of C-

Course Material Fees: \$50

ME 5580 Computer-Aided Mechanical Design Cr. 4

Introduce aspects of constraint-based solid modeling and parametric modeling using Unigraphics, Solid Edge, I-DEAS and Pro-E. Develop intelligent solid models with application to data management and sheet metal design. Introduce computer-aided simulation and manufacturing. Offered Spring/Summer.

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students in the College of Engineering.

ME 5620 Fracture Mechanics in Engineering Design Cr. 4

Introduce linear and nonlinear fracture mechanics principles and their applications to structural design. Formulate fracture parameters based on energy methods and stress-intensity factors for linear elastic fracture mechanics (LEFM), J-Integral and crack tip opening displacement (CTOD) for elastic plastic fracture mechanics (EPFM). Introduce design concepts based on failure assessment diagram and damage tolerance. Cover crack growth mechanisms, crack closure and crack retardation concepts. Offered Fall, Winter.

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students in the College of Engineering.

ME 5700 Fundamentals of Mechanics Cr. 4

Introduce Lagrangian and Hamiltonian classical mechanics. Derive thermodynamics laws from mechanics. Cover continuum kinematics and basics of tensor analysis, continuum mechanics (basic laws; thermodynamics of continuum media; classical continuum models). Offered Winter.

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students in the College of Engineering.

Course Material Fees: \$5

ME 5720 Mechanics of Composite Materials Cr. 4

Develop a comprehensive understanding of analytical models of micro-mechanical and macro-mechanical behavior of composite materials. Conduct stiffness, strength, hydrothermal, laminate, viscoelastic, dynamic behavior and fracture analyses. Introduce experimental characterization procedures for mechanical behavior evaluation. Offered Fall.

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students in the College of Engineering.

ME 5730 Tribology and Lubrication Technology Cr. 4

Introduce friction, wear, and lubrication fundamentals including wear mechanisms, application of coatings, surface engineering fundamentals, measurement of surface topological features and surface wear. Offered Yearly.

ME 5780 Products Liability Introduction for Engineers Cr. 1

Application of engineering practice to minimize products liability exposure. Stages of a products liability lawsuit; how engineers may be involved at different stages of the process. Offered Yearly.

Restriction(s): Enrollment limited to students with a class of Applicant Masters, Candidate Masters or Senior; enrollment limited to students in the College of Engineering.

Equivalent: IE 5780

ME 5800 Combustion Engines Cr. 4

Cover thermodynamics and cycle analysis of spark and compression ignition engines. Introduce combustion processes in actual systems, engine performance characteristics and engine modeling. Offered Fall, Winter.

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students in the College of Engineering.

Course Material Fees: \$35

ME 5810 Combustion and Emissions Cr. 4

Define air quality and emissions standards. Cover fundamentals of emission formation in combustion systems, wall quenching and imperfect combustion, unburned hydrocarbons, carbon monoxide, aldehydes, nitrogen oxides, species stratification in the combustion chamber, and particulates. Discuss the effects of design parameters and engine operating variables on emission formation. Introduce chemical kinetics simulation. Offered Winter.

Prerequisite: ME 5800 with a minimum grade of C-

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students in the College of Engineering.

Course Material Fees: \$35

ME 5820 Thermal Environmental Engineering Cr. 4

Design and analyze heating, ventilating and air-conditioning systems. Introduce moist air properties calculations, heat transfer and transmission coefficients, heating load, cooling load, heating and cooling equipment, duct design, fans, air distribution, and refrigeration principles. Offered Spring/Summer.

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students in the College of Engineering.

ME 5900 National Design Competition Projects Cr. 1-4

Offered Every Term.

Repeatable for 998.99 Credits

ME 5990 Directed Study Cr. 1-4

Offered Every Term.

Repeatable for 6 Credits

ME 5992 Research Experiences for Undergraduates Cr. 1-4

Offered for undergraduate credit only. Offered Intermittently.

Restriction(s): Enrollment is limited to Undergraduate level students.

Repeatable for 6 Credits

ME 5995 Special Topics in Mechanical Engineering I Cr. 1-4

Topics to be announced in Schedule of Classes . Offered Intermittently.

Restriction(s): Enrollment limited to students in the College of Engineering.

Repeatable for 8 Credits

ME 6180 Biomedical Instrumentation Cr. 4

Engineering principles of physiological measurements, signal conditioning equipment, amplifiers, recorders and transducers. Recent advances in instrumentation. Offered Winter.

Prerequisites: BME 5020 with a minimum grade of B- and ECE 3300 with a minimum grade of C- or BME 5040 with a minimum grade of B-

Equivalent: BME 6480, ECE 6180

ME 6550 Modeling and Control of Dynamic Systems Cr. 4

Introduce state-space representation of dynamical systems, apply Lyapunov stability criteria, and examine controllability and observability of systems. Design linear state feedback controllers using pole-placement technique and formulate full- and reduced-order linear state observers such as Luenberger observer. Design linear model following controller and linear quadratic optimal controllers. Offered Fall.

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students in the College of Engineering.

Course Material Fees: \$5

ME 6991 Internship in Industry Cr. 1-4

Written report describing internship experience. Offered Every Term.

Repeatable for 4 Credits

ME 7020 Finite Element Methods II Cr. 4

Introduce isoparametric elements, plate and shell elements. Perform dynamic analysis of structures (explicit versus implicit methods). Formulate problems with geometric, materials, and/or contact nonlinearities. Introduce hybrid variational techniques. Cover examples dealing with solids, fluids and heat transfer by utilizing commercially available software such as HyperMesh, OptiStruct, LS/DYNA and ANSYS. Offered Winter.

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students in the College of Engineering.

ME 7100 Mathematical Modeling in Impact Biomechanics Cr. 4

Review of models created for impact simulations. Regional impact simulation models. Human and dummy models subject to various restraint systems. Offered Winter.

Prerequisite: BME 5010 with a minimum grade of B-

Restriction(s): Enrollment is limited to Graduate level students.

Equivalent: BME 7100, ECE 7100, IE 7100

ME 7160 Impact Biomechanics Cr. 4

Biomechanical response of the body regions and the whole body to impact. Mechanisms of injury in blunt impact. Effects of restraints on injury reduction. Development of test surrogates such as dummies. Offered Fall.

Prerequisite: BME 5010 with a minimum grade of B-

Restriction(s): Enrollment is limited to Graduate level students.

Course Material Fees: \$10

Equivalent: BME 7160

ME 7180 Advanced Topics in Biomaterials and Tissue Biomechanics Cr. 4

Seminar format: advanced topics presented to the class; lectures by the instructor and by the participants based on literature reviews. Topics determined by student interest. Offered Every Other Fall.

Prerequisite: BME 5210 with a minimum grade of C or BME 5370 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

Equivalent: BME 7300, MSE 7180

ME 7260 Heat and Mass Transfer Cr. 4

Introduce transport phenomena and rate equations. Formulate heat and mass transfer problems using lumped, differential and integral formulations. Solve these problems using the method of separation of variables, partial solutions, variation of parameters, superposition, Laplace transformation and Duhamel Integral for problems with time-dependent boundary conditions. Apply these concepts to various thermal and combustion systems. Offered Fall.

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students in the College of Engineering.

ME 7290 Advanced Combustion and Emissions I Cr. 4

Introduce thermodynamics of chemically reacting mixtures, oxidation mechanisms of hydrocarbon fuels, theories of explosions, structure of pre-mixed hydrocarbon flames, propagation of laminar premixed flames, pre-mixed turbulent flames, kinetics of nitrogen oxides formation, combustion and emissions in spark ignition engines and control strategies. Offered Winter.

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students in the College of Engineering.

Course Material Fees: \$5

ME 7300 Advanced Fluid Mechanics Cr. 4

Understand the physics of governing equations of conservation of mass, momentum, energy, and other scalar properties in transport processes. Express the numerical aspects of the transport processes in finite volume approach and pressure-based solution algorithm. Introduce physical models of turbulence, multi-phase and reacting flows. Acquire hands-on experience of formulation, meshing, simulation, post-processing and presentation to solve engineering problems. Stress the importance of CFD encountered in real-life engineering applications. Offered Winter.

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students in the College of Engineering.

ME 7310 Computational Fluid Mechanics and Heat Transfer Cr. 4

Understand the physics of governing equations of conservation of mass, momentum, energy, and other scalar properties in transport processes. Express the numerical aspects of the transport processes in finite volume approach and pressure-based solution algorithm. Introduce physical models of turbulence, multi-phase and reacting flows. Acquire hands-on experience of formulation, meshing, simulation, post-processing and presentation to solve engineering problems. Stress the importance of CFD encountered in real-life engineering applications. Offered Fall.

Prerequisite: ME 5300 with a minimum grade of C-

Restriction(s): Enrollment is limited to Graduate level students.

ME 7315 Electric-drive Vehicle Simulation and Control Cr. 4

Cover modeling, simulation and control of electric-drive vehicle powertrain including plant modeling, controls model development, and in-the-loop controls testing. Proficiency in MATLAB/Simulink is required. Offered Winter.

Prerequisites: EVE 5115 with a minimum grade of B- or ME 5115 with a minimum grade of B-

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students in the College of Engineering.

Equivalent: EVE 7310

ME 7400 Advanced Dynamics Cr. 4

Introduce physical concepts and formalisms of Newtonian, Lagrangian, and Hamiltonian mechanics. Formulate calculus of variations including Hamiltonian least action principle and Euler-Lagrange equation. Develop the boundary-value problem of continuous elastic structures using Hamilton's principle. Model strongly nonlinear dynamical systems involving impact, non-smooth and discontinuous loads. Offered Winter.

Prerequisite: ME 5400 with a minimum grade of C-

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students in the College of Engineering.

Course Material Fees: \$5

ME 7420 Random Vibrations Cr. 4

Introduce statistical parameters of random vibration such as mean, mean square, correlation function, power spectral density, cumulant and moment generating function. Define Brownian motion process, white noise, Markov processes, and Fokker-Planck-Kolmogorov equation. Develop stochastic calculus rules (Itô and Stratonovich integrals) and stochastic averaging. Generate random response statistics of single- and two-degree-of-freedom systems. Offered Winter.

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students in the College of Engineering.

ME 7440 Signal Processing Technologies and Their Applications Cr. 4

Develop advanced signal processing techniques for analyzing transient signals containing discontinuities and sharp spikes with applications to such fields as blind sources separation, de-noising time-domain signals, etc. Acquire hands-on experience with software such as LabVIEW to set up experiments and analyze data. Offered Winter.

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students in the College of Engineering.

ME 7451 Advanced Manufacturing II: Material Forming Cr. 4

Cover classical theory of plasticity and basic equations, deformation behavior and constitutive equations of materials, deformation mechanisms related to microstructures, mechanical analyses of various forming processes, experimental study on material properties, microstructure evolution and forming mechanics. Offered Every Other Fall.

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students in the College of Engineering.

ME 7460 Advanced Acoustics and Noise Control Cr. 4

Introduce advanced techniques in near-field acoustical holography for visualizing acoustic fields, analyzing vibro-acoustic correlations and identifying the critical vibration components responsible for acoustic radiation from a vibrating structure. Offered Every Other Winter.

Prerequisite: ME 5460 with a minimum grade of C-

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students in the College of Engineering.

ME 7480 Nonlinear Vibration Cr. 4

Categorize nonlinearities in mechanical systems and qualitatively describe their effects on the dynamic response. Introduce the concepts of phase portrait, limit cycles, dynamic characteristics of Duffing and Van der Pol oscillators, parametric vibration and parametric resonance. Outline nonlinear techniques such as harmonic balance, averaging method, and multiple scales methods to analyze nonlinear modal interaction (internal resonance), vibro-impact dynamics and chaotic motion. Offered Fall.

Prerequisite: ME 5410 with a minimum grade of C- and ME 7400 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

ME 7550 Control of Dynamic Systems Cr. 4

Formulate static optimization problems with equality constraints, system identification, parameter optimization using Lyapunov's method. Introduce calculus of variations including dynamic optimization with equality constraints and apply them to formulate linear regulator and tracking problems. Introduce Pontryagin's minimum principle and state inequality constraints. Solve minimum-time problems and minimum control-effort problems. Offered Winter.

Prerequisite: ME 6550 with a minimum grade of C- or ECE 5470 with a minimum grade of C-

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students in the College of Engineering.

Course Material Fees: \$5

ME 7590 Nonlinear Control Systems Cr. 4

Provide examples of nonlinear dynamical control systems, perform system analysis using phase-portrait, and examine stability using Lyapunov's direct method and invariant set theorems (local and global stability). Introduce describing function method, feedback linearization technique, internal dynamics, and zero-dynamics. Design nonlinear robust controllers. Offered Fall.

Prerequisite: ME 6550 with a minimum grade of C- or ECE 5470 with a minimum grade of C-

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students in the College of Engineering.

Equivalent: ECE 7420

ME 7610 Theory of Elasticity Cr. 4

Define boundary value problems of linear elasticity. Cover variational principles in linear elasticity along with theory of beams, plates and shells. Introduce homogenized description of composite materials. Offered Fall.

Prerequisite: ME 5700 with a minimum grade of C-

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students in the College of Engineering.

Course Material Fees: \$5

ME 7680 Manufacturing Processing Mechanics Cr. 4

Perform finite element analysis (FEA) of non-linear large strain deformation problems using the software ABAQUS. Cover thermal-mechanical coupled deformation problems involving micro-manufacturing of micro-electronic mechanical systems (MEMS), electronic packaging, composite curing, creep-fatigue of micro-system and large plastic deformation in metal forming. Offered Yearly.

Prerequisite: ME 5040 with a minimum grade of C-

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students in the College of Engineering.

ME 7720 Advanced Mechanics of Composite Materials Cr. 4

Conduct a review on tensor notation with application to stress strain and constitutive equations. Develop damage tolerance analysis and approaches including durability of composite materials and structures. Conduct extensive literature review and independent focused research on the above topics that encompass advanced models and their applications. Offered Winter.

Prerequisite: ME 5720 with a minimum grade of C-

Restriction(s): Enrollment is limited to Graduate level students.

ME 7820 Engineering Non-Destructive Evaluation (NDE) Methods and Industrial Applications Cr. 4

Cover basic and advanced non-destructive evaluation methods used in industry. Treat in-depth the physics and engineering NDE applications of ultrasonics, vibration, acoustic emission and thermal wave sciences. Cover methodologies of penetrant and eddy current diagnostics. Illustrate NDE concepts through laboratory experiments. Offered Fall.

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students in the College of Engineering.

ME 7990 Directed Study Cr. 1-4

Advanced study and instruction in mechanical engineering. Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students.

Repeatable for 4 Credits

ME 7995 Special Topics in Mechanical Engineering II Cr. 1-8

Special subject matter in mechanical engineering. Topics to be announced in Schedule of Classes. Offered Intermittently.

Restriction(s): Enrollment is limited to Graduate level students.

Repeatable for 8 Credits

ME 7996 Research Cr. 1-4

Perform experimental and analytic study on a selected topic in mechanical engineering. Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students.

Repeatable for 4 Credits

ME 8020 Crashworthiness and Occupant Protection in Transportation Systems I Cr. 4

Introduce crashworthiness and occupant safety facts along with computational environment influences. Review of federal motor vehicle safety regulations. Design strategies for crash load sustainment and disbursement. Review the plasticity theory and its application to modeling and design. Define strategic material selection for crash affected and related regions. Cover modeling, analysis and simulation techniques in restraint systems, energy management, and various barrier crash tests. Offered Fall, Winter.

Prerequisite: ME 5040 with a minimum grade of C-

Restriction(s): Enrollment is limited to Graduate level students.

ME 8030 Crashworthiness and Occupant Protection in Transportation Systems II Cr. 4

Develop mathematical models of vehicle crashes in front, side, rear, and rollover modes. Cover roles of vehicle structures and restraint systems in reducing risk of injury. Offered Winter.

Prerequisite: ME 8020 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

ME 8290 Advanced Combustion and Emissions II Cr. 4

Introduce single-component and multi-component droplet evaporation and combustion processes, liquid fuel sprays formation, evaporation and combustible mixture formation, comparison between autoignition of homogeneous and heterogeneous mixtures, diffusion flames, combustion of liquid sprays in compression ignition engines and emission control strategies along with advances in gasoline compression ignition engines. Offered Winter.

Prerequisite: ME 7260 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

ME 8999 Master's Thesis Research and Direction Cr. 1-8

Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students with a class of Candidate Masters.

Repeatable for 8 Credits

ME 9990 Pre-Doctoral Candidacy Research Cr. 1-8

Research in preparation for doctoral dissertation. Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students.

Repeatable for 12 Credits

ME 9991 Doctoral Candidate Status I: Dissertation Research and Direction Cr. 7.5

Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students.

ME 9992 Doctoral Candidate Status II: Dissertation Research and Direction Cr. 7.5

Offered Every Term.

Prerequisite: ME 9991 with a minimum grade of S

Restriction(s): Enrollment is limited to Graduate level students.

ME 9993 Doctoral Candidate Status III: Dissertation Research and Direction Cr. 7.5

Offered Every Term.

Prerequisite: ME 9992 with a minimum grade of S

Restriction(s): Enrollment is limited to Graduate level students.

ME 9994 Doctoral Candidate Status IV: Dissertation Research and Direction Cr. 7.5

Offered Every Term.

Prerequisite: ME 9993 with a minimum grade of S

Restriction(s): Enrollment is limited to Graduate level students.

ME 9995 Candidate Maintenance Status: Doctoral Dissertation Research and Direction Cr. 0

Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students.

Course Material Fees: \$370.26

Repeatable for 0 Credits

MED - MUSIC EDUCATION

MED 2500 Piano Skills for the Music Classroom Cr. 2

Continuation of MUA 2795. Additional practice with functional skills needed in music classroom. Students acquire a repertoire of musical selections commonly used in the educational setting. Offered Winter.

Prerequisite: MUA 2795 with a minimum grade of C

Course Material Fees: \$75

MED 3500 Introduction to Music Education Cr. 2

Course work includes lesson-plan writing, introduction to methodologies, and participating in teaching experiences. Exploration of philosophical, historical, psychological, and cultural/social foundations of the profession in the context of practical exercises. Offered Fall.

MED 3510 Teaching General Music Cr. 2

Developing a knowledge base for teaching general music including application of learning theories, developmental characteristics of children, and appropriate literature, materials, and resources. Emphasis on structuring successful learning experiences through effective planning, delivery, and evaluation of music instruction for students in grades K-12. Offered Winter.

Prerequisite: MED 3500 with a minimum grade of C

MED 3990 Directed Study Cr. 1-3

Offered Fall, Winter.

Restriction(s): Enrollment limited to students with a class of Junior, Senior or Post Bachelor; enrollment is limited to students with a major in Music or Music Honors.

Repeatable for 6 Credits

MED 4510 Vocal Music in Schools I Cr. 3

Course expands and develops the knowledge base and teaching competencies introduced in MED 3510. Class activities explore strategies for engaging children in a variety of musical experiences that align with state and national standards. Fieldwork in the schools provides an opportunity to apply and refine specific teaching skills within a real-world setting. Emphasis on K-6 elementary music classroom. Offered Fall.

Prerequisite: MED 3500 with a minimum grade of C

MED 4530 Vocal Music in Schools II Cr. 3

Role of choral and vocal music education in secondary schools. Class activities, readings, and fieldwork focus on curriculum development, repertoire, score analysis, rehearsal planning, rehearsal techniques, vocal pedagogy and assessment. Organizational and managerial aspects such as recruitment, budgeting and scheduling are also included. Offered Winter.

Prerequisite: MED 4510 with a minimum grade of C

MED 4540 Instrumental Music in the Schools I Cr. 3

Teaching techniques, materials and organization of instrumental music in elementary schools. Offered Fall.

Prerequisite: MUA 1720 with a minimum grade of C and MUA 1730 with a minimum grade of C and MUA 1740 with a minimum grade of C and MUA 1750 with a minimum grade of C and MUA 1760 with a minimum grade of C and MED 3500 with a minimum grade of C

MED 4550 Instrumental Music in the Schools II Cr. 3

Teaching techniques, materials and organization of instrumental music in secondary schools. Offered Winter.

Prerequisite: MED 4540 with a minimum grade of C

MED 4560 Practicum in Music Education Cr. 2

Practicum provides field experiences in elementary or secondary school settings prior to full-time student teaching. Students apprentice with a cooperating teacher while assisting, observing and teaching throughout the semester. A minimum of 15 hours per week in an approved classroom is required. Offered Fall, Winter.

Prerequisite: MED 3500 with a minimum grade of C

Restriction(s): Enrollment limited to students in the College of Education.

MED 4570 Student Teaching and Seminar Cr. 8

Directed teaching in schools at grade levels for which advanced students are preparing for certification. Seminars feature discussion of important educational issues. Offered Fall, Winter.

Restriction(s): Enrollment limited to students in the College of Education.

MED 5550 Choral Conducting and Rehearsal Techniques Cr. 3

Conducting and rehearsal methods and materials for secondary schools. No credit for M.Mus. in conducting or music education. Offered Winter.

Prerequisite: MUA 3670 with a minimum grade of C

MED 5590 Applications of Technology in Music Teaching Cr. 2

Presentation of techniques and strategies for utilizing various hardware and software applications in classroom music instruction. Emphasis on evolving technologies, including collaborative media, smart technology, and interactive smartboard class materials. Offered Fall.

Restriction(s): Enrollment is limited to students with a major in Music.

Course Material Fees: \$75

MED 7990 Directed Study in Music Education Cr. 1-3

Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students.

Repeatable for 6 Credits

MED 7999 Master's Essay Direction Cr. 3

Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students with a class of Candidate Masters.

MED 8999 Master's Thesis Direction Cr. 1-8

Preparation of M.M. thesis project in music education. Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students in a Master of Music degree; enrollment limited to students in the Master of Music program.

Repeatable for 8 Credits

MGG - MOLECULAR GENETICS AND GENOMICS

MGG 6010 Molecular Biology and Genetics Cr. 4

Covers the basic aspects of molecular genetics. Students should have completed previous coursework in organic chemistry, introductory biology, and biochemistry or cell and molecular biology. Offered Yearly.

Restriction(s): Enrollment is limited to Undergraduate level students.

MGG 7010 Molecular Biology and Genetics Cr. 4

Basic aspects of molecular genetics. Offered Fall.

Restriction(s): Enrollment is limited to Graduate level students.

MGG 7015 Introduction to Genetics Cr. 2

Forges a link between genotype and phenotype and covers topics in contemporary genetics, including Mendelian analysis, chromosomes, mitosis/meiosis, recombination, mutations and mutagenesis, linkage mapping, complementation, extranuclear inheritance, genetic interactions and epistasis, epigenetics, and developmental genetics. Offered Fall.

Restriction(s): Enrollment is limited to Graduate level students.

MGG 7020 Metabolism and Disease Cr. 2

This course will review normal metabolic pathways and their regulation and then discuss in depth aberrant metabolism as it contributes to or causes diseases such as diabetes, cancer, and neurodegeneration. Didactic lectures will be complemented with student-based presentations of classic and current primary literature studies. Offered Fall.

Restriction(s): Enrollment is limited to Graduate level students.

MGG 7030 Functional Genomics and Systems Biology Cr. 2

Exploration of several new technologies for determining gene function on a genome-wide scale and for integrating information into a systems-level view of biological processes. Offered Winter.

Prerequisite: IBS 7015 with a minimum grade of C or MGG 7010 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

Equivalent: IBS 7030

MGG 7050 Bioinformatics: theory and practice Cr. 3

This course will teach graduate students in the biological sciences how to use public web-based bioinformatics resources to analyze the structure and function of protein-coding and noncoding-RNA genes. Offered Winter.

Restriction(s): Enrollment is limited to Graduate level students.

MGG 7091 Scientific Communication Cr. 2

Advanced technical and grant-writing techniques related to the unique requirements in NIH grant proposals. Offered Winter.

Restriction(s): Enrollment is limited to Graduate level students.

MGG 7400 Molecular Biology of Cellular Signalling Cr. 2

Molecular basis of cell-cell interactions, hormonal interactions, and interactions between different cellular compartments. Offered Every Other Year.

Restriction(s): Enrollment is limited to Graduate level students.

MGG 7460 Research Training in Molecular Biology and Genetics Cr. 1-8

Direct participation in laboratory research under the supervision of faculty advisor. Design and execution of experiments; analysis of laboratory data; interpretation of results and their relation to published findings. Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students.

Repeatable for 8 Credits

MGG 7600 Advanced Human Genetics Cr. 4

Concepts, problems, and methods of human genetics at an advanced level. Offered Every Other Year.

Restriction(s): Enrollment is limited to Graduate level students.

MGG 7640 Principles of Genetic Counseling Cr. 4

History and evolution of genetic counseling and how it relates to clinical genetic services within the health care delivery system. Genetic counseling skills such as case preparation, interviewing techniques, and family history assessment; counseling methods. Offered Every Other Year.

Restriction(s): Enrollment is limited to Graduate level students.

MGG 7660 Practical Applications of Genetic Counseling Cr. 3

Provides the foundation for identifying and applying the practical aspects of genetic counseling, including genetic testing and billing and reimbursement, to the reproductive, cardiovascular, pediatric, neurogenetic and cancer genetics clinical settings. Offered Winter.

Prerequisite: MGG 7640 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

MGG 7710 Introduction to Medical Genetics Cr. 2

The principles of genetics and genomics related to medical genetics and how it is integrated into clinical practice. Offered Winter.

Restriction(s): Enrollment is limited to students with a major in Genetic Counseling.

MGG 7740 Theory and Practice of Genetic Counseling Cr. 3

Major theories of human behavior and application of these theories to the practice of genetic counseling. Development of interpersonal communication and psychosocial assessment skills. Offered Winter.

Prerequisite: MGG 7640 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

MGG 7741 Advanced Genetic Counseling Theory and Practice Cr. 3

Cultural, social, ethical, legal, professional and health-related issues that influence delivery of genetic counseling service and patient decision-making. Application of knowledge to practice. Offered Fall.

Prerequisite: MGG 7740 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

MGG 7800 Advanced Medical Genetics Cr. 3

Overview of medical genetic disorders taught at a level suitable for those preparing for certification examinations in clinical genetics specialties or for those whose research focus or clinical practice will have a strong emphasis in medical genetics. Offered Every Term.

Prerequisite: MGG 7600 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

MGG 7830 Human Development and Teratology Seminar Cr. 1

Through lecture, self-study, exam, and oral presentation, students learn key aspects of fetal development, the embryological basis of birth defects and genetic dysmorphism syndromes, clinical teratology, and the associated medical terminology. Offered Fall.

Restriction(s): Enrollment is limited to Graduate level students.

MGG 7850 Current Topics in Molecular Biology and Genetics Cr. 2

Current literature in molecular biology and genetics; one student makes oral presentation with student and faculty discussion. Offered Intermittently.

Restriction(s): Enrollment is limited to Graduate level students.

Repeatable for 4 Credits

MGG 7860 Evaluating the Health Care Literature Cr. 1

Reading and analysis of health care literature with focus on research articles. Principles of health research design and analysis; skills for critical assessment of medical literature. Offered Winter.

Restriction(s): Enrollment is limited to Graduate level students; enrollment is limited to students with a major, minor, or concentration in Genetic Counseling.

MGG 7880 Genetic Counseling Seminar Cr. 1-6

Discussion format; issues relevant to medical genetics and the genetic counseling process. Presentations by students and invited faculty.

Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students.

MGG 7881 Senior Seminar in Genetic Counseling Cr. 2

Preparation for the transition to from student to practicing professional in the areas of the job search, billing and reimbursement, clinical supervision, developing effective educational programs, advocacy, and other relevant areas. Offered Winter.

Restriction(s): Enrollment is limited to Graduate level students.

MGG 7998 Master's Essay in Molecular Genetics and Genomics Cr. 3

Students will write a scholarly document (essay) based upon a topic of ongoing research in genetics or genomics. Offered Every Term.

Restriction(s): Enrollment limited to students with a class of Candidate Masters; enrollment is limited to students with a major in Molecular Genetics & Genomics.

MGG 7999 Master's Research Project and Direction Cr. 1-5

Student conducts hypothesis-driven research and prepares written manuscript and oral presentation. Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students; enrollment is limited to students with a major, minor, or concentration in Genetic Counseling; enrollment limited to students in a MS in Genetic Counseling degree.

Repeatable for 5 Credits

MGG 8010 Quantitative Data Analysis for Biological and Medical Sciences Cr. 2

Covers several of the statistical concepts and data analytic skills needed to succeed in data-driven life science research, beginning with relatively basic concepts related to computing p-values and advancing to topics related to analyzing high-throughput data. Offered Every Other Fall.

Restriction(s): Enrollment is limited to Graduate level students.

MGG 8680 Advanced Topics in Molecular Genetics and Genomics Cr. 1-3

Offers an in-depth study of concepts and research in specific fields. Offered Intermittently.

Restriction(s): Enrollment is limited to Graduate level students.

Repeatable for 12 Credits

MGG 8770 Molecular Biology of Mitochondrial Disease Cr. 2

Mitochondrial structure and function; mitochondria as sites of phenomena such as cell death, generation of free radicals, and production of most cellular energy. Traditional mitochondrial diseases (e.g., caused by mutations in the mitochondrial DNA); more recent findings of involvement of mitochondria in pathologies such as cancer, diabetes, aging, and neurodegenerative diseases. Offered Fall.

Prerequisite: IBS 7015 with a minimum grade of C or MGG 7010 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

MGG 8998 Genetic Counseling Internship Cr. 1-8

Students work in variety of genetics and subspecialty clinics as well as laboratory settings, under supervision of genetic counselor/geneticist. Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students; enrollment is limited to students with a major, minor, or concentration in Genetic Counseling; enrollment limited to students in a MS in Genetic Counseling degree.

Repeatable for 8 Credits

MGG 8999 Master's Thesis Research and Direction Cr. 1-8

Student conducts research and prepares written presentation, designed to test specific hypothesis dealing with method, concept, or data. Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students with a class of Candidate Masters; enrollment is limited to students with a major, minor, or concentration in Molecular Biology and Genetics; enrollment limited to students in a Master of Science degree.

Repeatable for 8 Credits

MGG 9990 Pre-Doctoral Candidacy Research Cr. 1-8

Research in preparation for doctoral dissertation. Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students.

Repeatable for 12 Credits

MGG 9991 Doctoral Candidate Status I: Dissertation Research and Direction Cr. 7.5

Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students.

MGG 9992 Doctoral Candidate Status II: Dissertation Research and Direction Cr. 7.5

Offered Every Term.

Prerequisite: MBG 9991 with a minimum grade of S

Restriction(s): Enrollment is limited to Graduate level students.

MGG 9993 Doctoral Candidate Status III: Dissertation Research and Direction Cr. 7.5

Offered Every Term.

Prerequisite: MBG 9992 with a minimum grade of S

Restriction(s): Enrollment is limited to Graduate level students.

MGG 9994 Doctoral Candidate Status IV: Dissertation Research and Direction Cr. 7.5

Offered Every Term.

Prerequisite: MBG 9993 with a minimum grade of S

Restriction(s): Enrollment is limited to Graduate level students.

MGG 9995 Candidate Maintenance Status: Doctoral Dissertation Research and Direction Cr. 0

Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students.

Course Material Fees: \$370.26

Repeatable for 0 Credits

MGT - MANAGEMENT

MGT 2530 Management of Organizational Behavior Cr. 3

Applied issues in management examined through a focus on the organization and its external environment, group functions and processes, and employee attitudes and behaviors. Offered Every Term.

Prerequisites: PSY 1010 with a minimum grade of D- or PSY 1020 with a minimum grade of D-

MGT 4500 Business Co-op Assignment Cr. 0

Must be elected by Professional Development Co-operative Program students during work semester. Offered for S and U grades only. No credit toward degree. Opportunity to put theory into practice on the job. Students will normally be assigned to cooperating business organizations for internship periods of one semester. Offered Every Term.

Equivalent: ACC 4500, FIN 4500, MKT 4500

MGT 4990 Directed Study in Management Cr. 1-3

Advanced readings and research or tutorial under the supervision of a faculty member in areas of special interest to student and faculty member. Offered Every Term.

Prerequisites: MGT 5510 with a minimum grade of D- and MGT 5530 with a minimum grade of D-

Restriction(s): Enrollment is limited to Undergraduate level students; enrollment limited to students in the School of Business.

Repeatable for 6 Credits

MGT 4991 Study Abroad in Management Cr. 3

Study abroad programs in various countries. Programs run 10-15 days in length. Recent country programs in China, Poland, and Italy. Travel within a given country with visits to various companies and cultural attractions. Traveling costs are over and above tuition and vary by country. Various reading and assignments required. Offered Every Term.

Equivalent: GSC 4991, MKT 4991

Repeatable for 6 Credits

MGT 5100 Introduction to Sport & Entertainment Management Cr. 3

Provides an overview of the sport & entertainment industry, and examines issues encountered by sport and entertainment managers with special emphasis on the use of business principles to identify, attract and retain consumers. Offered Every Term.

Equivalent: SEM 5100

MGT 5510 Managing Organizational Structure and Processes Cr. 3

Analysis of strategic pressures on the organization. Application of advanced concepts of structured organizational change to contemporary organizational design problems. Offered for undergraduate credit only. Offered Fall, Winter.

Prerequisites: MGT 2530 with a minimum grade of D-

Restriction(s): Enrollment is limited to Undergraduate level students; enrollment limited to students in the School of Business.

MGT 5530 Advanced Organizational Behavior Cr. 3

Analysis and application of advanced organizational behavior concepts relevant to managing in a complex and changing environment. Topics include: leading and managing organizational change; solving workplace problems creatively; communicating effectively in a diverse work environment; building and empowering effective teams. Offered for undergraduate credit only. Offered Fall, Winter.

Prerequisites: MGT 2530 with a minimum grade of D-

Restriction(s): Enrollment is limited to Undergraduate level students; enrollment limited to students in the School of Business.

MGT 5650 The Entrepreneur and Venture Creation Cr. 3

Nature of entrepreneurship and the role of the entrepreneur in society. Focus on the critical factors and special problems associated with the process of creating new business ventures. Emphasis on development of a business plan. Offered for undergraduate credit only. Offered Yearly.

Prerequisites: ACC 3010 with a minimum grade of C and FIN 3290 with a minimum grade of D- and MGT 2530 with a minimum grade of D- and MKT 2300 with a minimum grade of D-

Restriction(s): Enrollment is limited to Undergraduate level students; enrollment limited to students in the School of Business.

MGT 5700 Human Resource Management Cr. 3

Theory, policies, procedures and practices in employment relationships. Topics: strategic HRM, legal environment of HRM, equal employment opportunity, job analysis and design, employment planning, recruitment, selection, training and development, performance appraisal, compensation and benefits, labor relations, health and safety. Managerial and policy implications; linkages between HRM practices and organizational effectiveness. Offered for undergraduate credit only. Offered Every Term.

Prerequisites: MGT 2530 with a minimum grade of D-

Restriction(s): Enrollment is limited to Undergraduate level students; enrollment limited to students in the School of Business.

MGT 5740 Collective Bargaining Cr. 3

Development of union-management relationships, including legal environment of labor relations; philosophy and practice of collective bargaining, major challenges facing unions and employers today. A bargaining simulation is normally utilized. Offered for undergraduate credit only. Offered Yearly.

Prerequisites: MGT 2530 with a minimum grade of D-

Restriction(s): Enrollment is limited to Undergraduate level students; enrollment limited to students in the School of Business.

MGT 5770 Advanced Human Resource Management Cr. 3

In-depth study of contemporary human resource practices. Specific personnel techniques discussed and analyzed through applications. Offered for undergraduate credit only. Offered Fall, Winter.

Prerequisites: MGT 5700 with a minimum grade of D-

Restriction(s): Enrollment is limited to Undergraduate level students; enrollment limited to students in the School of Business.

MGT 5790 Internship in Management Cr. 3

Student performs assigned tasks and responsibilities in a professional manner under supervision of host-employer for minimum 160 hours during the semester, abiding by rules and regulations established by the employer and expected of all employees; student must satisfactorily complete all course requirements outlined in the internship program for the School of Business Administration. Offered for undergraduate credit only. Offered Every Term.

Prerequisites: MGT 2530 with a minimum grade of C

Restriction(s): Enrollment is limited to Undergraduate level students; enrollment limited to students in the School of Business.

MGT 5900 Project Management Cr. 3

Understanding and appreciation of the different knowledge areas of project management. Insight into developing the inputs, tools, techniques, and outputs to successfully manage products. Offered for undergraduate credit only. Offered Yearly.

Prerequisites: ISM 3630 with a minimum grade of C and MGT 2530 with a minimum grade of C

Restriction(s): Enrollment is limited to Undergraduate level students; enrollment limited to students in the School of Business.

Equivalent: ISM 5900

MGT 6890 Strategic Management and Business Policy Cr. 3

Managing the firm as an integrated unit under conditions of uncertainty. Integration of concepts and skills covered in previous specialized courses. Offered for undergraduate credit only. Offered Every Term.

Restriction(s): Enrollment is limited to Undergraduate level students; enrollment limited to students in the School of Business.

MGT 6995 Topics in Management Cr. 3

Integration and application of management theory to applied projects in a variety of areas (i.e., human resource management, manufacturing, and information systems) with a focus on leadership. Offered for undergraduate credit only. Offered Every Term.

Prerequisites: MGT 5530 with a minimum grade of C- and MGT 5700 with a minimum grade of C-

Restriction(s): Enrollment is limited to Undergraduate level students; enrollment limited to students in the School of Business.

MGT 7620 Complex Organizations Cr. 3

The formal structure and processes in complex organizations: departmentalization, decentralization, authority and power, relationships between groups, organizational design and evaluation. Factors affecting organizational design, adaptation to environments, and designing effective decision-making systems. Offered Every Term.

Prerequisites: BA 7040 with a minimum grade of C or MGT 7640 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

MGT 7630 Organizational Change and Development Cr. 3

Analysis of the impact of dynamic forces, particularly globalization, on the theory, methods, and skills involved in designing and implementing planned changes in organizations. Offered Intermittently.

Prerequisites: BA 7040 with a minimum grade of C or MGT 7640 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

MGT 7640 Management of Human Resources Cr. 3

Theory, policy, research and process issues in employment relationships. The specific personnel practices of planning, selecting, employee development and appraisal, compensation and labor relations examined as they relate to conceptual and pragmatic views of management or employee behavior. Offered Every Term.

Prerequisites: BA 7040 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

MGT 7650 Strategic Human Resource Management Cr. 3

Survey of human resource management from a strategic perspective. Formulation and implementation of human resource strategy addressed for recruitment, placement, training, development, issues in an international community. Offered Yearly.

Prerequisite: MGT 7640 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

MGT 7660 Entrepreneurial Management Cr. 3

Nature of entrepreneurship and role of entrepreneur. Focus on problematic issues involved in creating and managing a small business. Emphasis on special knowledge and skills required of an entrepreneurial manager. Individual students may act as consultants to entrepreneurs or small business owner/managers. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate level students.

MGT 7700 Leadership and Management of Innovation and Technology Cr. 3

Technology and innovation in corporations. Building on principles of leadership and management, consideration of technology, innovation, organizational effectiveness and global competition. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate level students.

MGT 7750 Labor Relations and Collective Bargaining Cr. 3

Forces affecting the character and quality of industrial relations and collective bargaining in the United States; their influence on contract negotiations and grievances. Major challenges facing unions and employers today. A collective bargaining situation is generally used, in which participants plan for negotiations and bargain contract issues. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate level students.

MGT 7770 Union Contract Administration Cr. 3

Daily union-management relations. Grievance handling and arbitration. The causes of labor-management conflicts under a union contract. Offered Yearly.

Prerequisite: MGT 7750 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

MGT 7780 Concepts and Processes of Dispute Resolution I: Negotiating Theory and Practice Cr. 3

Theoretical foundations of processes of negotiation and multi-party collaborative problem solving. Skill building simulation to integrate theory and practice. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate level students.

Equivalent: DR 7210

MGT 7790 Compensation Administration Cr. 3

Process policy and theoretical issues in pay and benefits administration; determination of structural level of individual pay, non-traditional reward systems, and government regulation of benefits. Offered Yearly.

Prerequisite: MGT 7640 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

MGT 7815 Strategic Leadership Cr. 3

Academic and practitioner views of strategic leadership to understand the dynamics of leadership influence in complex organizations. Offered Fall, Winter.

Prerequisite: BA 7040 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

MGT 7816 Leading in Organizations Cr. 3

Leadership competency development. Participant assessment precedes developmental planning and the formation of feedback and support networks. Offered Yearly.

Prerequisite: BA 7040 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

MGT 7850 Management through Constructive Persuasion Cr. 3

Introduction to methods of persuasion. Students learn how persuasion strategies can be applied in listening, speaking and written formats for business management situations. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate level students.

MGT 7895 Internship in Management Cr. 3

Students work a minimum of 160 hours for fifteen weeks in an entry-level management position in management. Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students.

MGT 7900 Project Management Cr. 3

Management of resources (budget, personnel, materials, etc.) within the scope of a given project; understanding and appreciation for the different knowledge areas of project management; insight into identification of inputs, tools, and techniques of project management. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate level students.

Equivalent: ISM 7900

MGT 7950 Business and Sustainability Cr. 3

How organizations can be good to the environment while being profitable. Sustainability concerns such as climate change, rising energy prices, natural resource depletions, and air pollution. Evaluation of aspects of business operations including marketing and communications, stakeholder engagement, product development, operations, supply chain management, and reporting concerns. Offered Fall.

Prerequisites: BA 7040 with a minimum grade of C or BA 7050 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

Equivalent: MKT 7950

MGT 7995 Directed Study in Management Cr. 1-3

Advanced independent readings and research under supervision of a graduate faculty member in areas of special interest to student and faculty member. Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students.

Repeatable for 3 Credits

MGT 8000 Seminar in Management Cr. 3

Selected topics in the management and organizational sciences. Offered Intermittently.

Prerequisite: BA 7040 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

Repeatable for 6 Credits

MIT - MANUFACTURING AND INDUSTRIAL ENGINEERING TECHNOLOGY

MIT 3350 Applied Human Factors Cr. 3

Introduction to human physiological and psychological functions and capabilities from an engineering viewpoint; sensory information processing and motor abilities, human-machine design aspects. Offered Yearly.

MIT 3500 Machine Tool Laboratory Cr. 1

Laboratory experiences in manufacturing processes, machine tools, and mechanization. Calibration and part-setup. Offered Fall, Winter.

Prerequisites: ET 2140 with a minimum grade of C-

MIT 3520 Manufacturing Processes Theory Cr. 2

Nature and deformation behavior of materials commonly used in manufacturing; basic processes used in transforming them into useful products; scientific theory underlying those processes; criteria for selecting particular processes. Offered Fall, Winter.

Prerequisites: CHM 1020 with a minimum grade of C- and May be taken concurrently; MIT 3500 with a minimum grade of C-

MIT 3600 Process Engineering Cr. 3

Processing functions. Methods of manufacturing analysis. Manufacturing sequence, mechanization. Selection of tooling and equipment. Planning the process of manufacture. Offered Yearly.

Prerequisites: MIT 3520 with a minimum grade of C-

MIT 4700 Computer-Aided Design and Manufacturing Cr. 3

Fundamentals of computer-aided manufacturing using computer software. Two- and three-dimensional applications programming, numerical control and programming. Offered Yearly.

Prerequisites: ET 2140 with a minimum grade of C- and MIT 3520 with a minimum grade of C- or MIT 3510 with a minimum grade of C-

Course Material Fees: \$25

MIT 4800 Quality Control Cr. 4

Introduction to total quality systems design and to basic analytical techniques for quality control. Offered Intermittently.

Prerequisites: ET 3850 with a minimum grade of C-

MIT 4990 Guided Study Cr. 1-6

Supervised study and instruction in the field selected by the student. Offered Intermittently.

Repeatable for 6 Credits

MIT 5500 Machine Tool Laboratory Cr. 1

Laboratory experiences in manufacturing processes, machine tools, and mechanization. Calibration and part-setup. Offered Fall, Winter.

Prerequisites: ET 2140 with a minimum grade of C-

MIT 5700 Industrial Robots Modeling and Simulation Cr. 4

Topics include: the direct kinematic problem (homogeneous transformation matrices, composite homogeneous transformation matrix, links, joints and their parameters, the Denavit-Hartenberg representation, kinematic equations for manipulators); the inverse kinematic problem (geometric approach applied for 2DOF, 3DOF, 4DOF, 5DOF, and 6DOF manipulators; modeling, simulation and off-line programming of industrial robots and cobots (collaborative robots); and current trends and research in industrial robotics and cobotics. Offered Winter.

Restriction(s): Enrollment is limited to Graduate or Undergraduate level students; enrollment limited to students with a class of Unranked Grad or Senior.

MIT 7700 Robotics and Flexible Manufacturing Cr. 4

Kinematics, dynamics and controls of the manipulators, their design and applications in flexible manufacturing cells. Computer-integrated manufacturing. Offered Intermittently.

Prerequisite: ET 7430 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

MKT - MARKETING

MKT 2300 Marketing Management Cr. 3

Planning the marketing program within social, economic and legal environments, market segmentation and behavior, market systems and strategy, international marketing. Offered Every Term.

Prerequisites: ECO 2010 with a minimum grade of D-

Restriction(s): Enrollment limited to students in the School of Business.

MKT 4500 Business Co-op Assignment Cr. 0

Must be elected by Professional Development Co-operative Program students during work semester. Offered for S and U grades only. No credit toward degree. Opportunity to put theory into practice on the job. Students will normally be assigned to cooperating business organizations for internship periods of one semester. Offered Every Term.

Equivalent: ACC 4500, FIN 4500, MGT 4500

MKT 4990 Directed Study in Marketing Cr. 1-3

Advanced readings and research or tutorial under the supervision of a faculty member in areas of special interest to student and faculty member. Offered Every Term.

Prerequisites: MKT 5410 with a minimum grade of D- and MKT 5450 with a minimum grade of D-

Restriction(s): Enrollment is limited to Undergraduate level students; enrollment limited to students in the School of Business.

Repeatable for 6 Credits

MKT 4991 Study Abroad in Marketing Cr. 3

Study abroad programs in various countries. Programs run 10-15 days in length. Recent country programs have been in China, Poland, and Italy. Travel within a given country with visits to various companies and cultural attractions. Traveling costs are over and above tuition and vary by country. Various reading and assignments required. Offered Winter, Spring/Summer.

Equivalent: GSC 4991, MGT 4991

Repeatable for 6 Credits

MKT 5410 Marketing Research and Analysis Cr. 3

Methods of gathering and analyzing data which will facilitate the identification and solution of marketing problems. Planning the project, data sources for exploratory and conclusive research. Questionnaire construction, sample design, and design of marketing experiments. Offered for undergraduate credit only. Offered Fall, Winter.

Prerequisites: MKT 2300 with a minimum grade of D- and BA 3400 with a minimum grade of D-

Restriction(s): Enrollment is limited to Undergraduate level students; enrollment limited to students in the School of Business.

MKT 5450 Consumer Behavior Cr. 3

Concepts and theories to explain consumer and organizational buyer behavior. Application of this understanding to marketing management and public policy decision making. Offered for undergraduate credit only. Offered Fall, Winter.

Prerequisites: MKT 2300 with a minimum grade of D-

Restriction(s): Enrollment is limited to Undergraduate level students; enrollment limited to students in the School of Business.

MKT 5460 Sales Management Cr. 3

Organization and direction of a sales organization including selection, training, compensation, supervision, motivation, budgets, quotas, territories, and sales analysis. Offered for undergraduate credit only. Offered Every Term.

Prerequisites: MKT 2300 with a minimum grade of D-

Restriction(s): Enrollment is limited to Undergraduate level students; enrollment limited to students in the School of Business.

MKT 5490 Principles of Advertising Cr. 3

Basic elements of advertising research, media, and creative strategies, including integrated marketing communications. Applications include development of advertising for local business organizations. Offered for undergraduate credit only. Offered Fall, Winter.

Prerequisites: MKT 2300 with a minimum grade of D-

Restriction(s): Enrollment is limited to Undergraduate level students; enrollment limited to students in the School of Business.

MKT 5500 Advertising Copy Cr. 3

Principles of effective advertising copy and application in consumer and industrial advertisements. Exercises in writing, criticizing, testing, and revising magazine, newspaper, radio, television, outdoor and direct mail advertisements. Offered for undergraduate credit only. Offered Winter.

Prerequisites: MKT 5490 with a minimum grade of D-

Restriction(s): Enrollment is limited to Undergraduate level students; enrollment limited to students in the School of Business.

MKT 5510 Advertising Media Planning Cr. 3

Influence of marketing, creative and media objectives upon media planning. Information systems, budgeting approaches, media characteristics, media models, schedule construction, execution, and auditing. Offered for undergraduate credit only. Offered Yearly.

Prerequisites: MKT 5490 with a minimum grade of D-

Restriction(s): Enrollment is limited to Undergraduate level students; enrollment limited to students in the School of Business.

MKT 5520 Public Relations of Business Cr. 3

Philosophy of public relations of business, history of public relations, study of public opinion, the public relations process, tools of communication, uses of mass media in public relations work, and analysis of methods employed in establishing sound public relations programs. Offered for undergraduate credit only. Offered Fall.

Restriction(s): Enrollment is limited to Undergraduate level students; enrollment limited to students in the School of Business.

MKT 5700 Retail Management Cr. 3

Retailing concepts and problems. Competitive structure, store location, organization, buying, inventory control, sales promotion, pricing, credit policy, customer services, research and franchising. Offered for undergraduate credit only. Offered Fall, Winter.

Prerequisites: MKT 2300 with a minimum grade of D-

Restriction(s): Enrollment is limited to Undergraduate level students; enrollment limited to students in the School of Business.

MKT 5750 International Marketing Management Cr. 3

Offered for undergraduate credit only. Offered Winter.

Prerequisites: MKT 2300 with a minimum grade of D-

Restriction(s): Enrollment is limited to Undergraduate level students; enrollment limited to students in the School of Business.

MKT 5800 Introduction to Digital Marketing and Analytics Cr. 3

Team-taught course, focuses on all of the major aspects of digital marketing and how to analyze that marketing performance using major (and in some cases native) analytical tools. Examines web analytics, search engine optimization (SEO), e-commerce, social media, online advertising, email marketing and a slew of up-and-coming online marketing techniques each segment of digital marketing is widely used across the marketing profession and we will discuss the strengths and weaknesses of each one in addition to determining when best to use each type. Offered Fall.

Prerequisite: MKT 2300 with a minimum grade of C

MKT 5840 Special Topics in Marketing Cr. 3

Offered for undergraduate credit only. Offered Every Term.

Restriction(s): Enrollment is limited to Undergraduate level students; enrollment limited to students in the School of Business.

MKT 5850 Integrated Marketing Communications Strategy Cr. 3

Application of basic advertising skills to development of a fully-integrated marketing communications program for a major national or international business; research, media, creative, and promotion strategies. Offered for undergraduate credit only. Offered Winter.

Prerequisites: MKT 5490 with a minimum grade of D-

Restriction(s): Enrollment is limited to Undergraduate level students; enrollment limited to students in the School of Business.

MKT 5890 Internship in Marketing Cr. 3

Consult School of Business Administration website for further guidelines and application form for the internship. Offered for undergraduate credit only. Offered Every Term.

Prerequisites: MKT 2300 with a minimum grade of C

Restriction(s): Enrollment is limited to Undergraduate level students; enrollment limited to students in the School of Business.

MKT 6996 Strategic Marketing Cr. 3

Capstone course in the marketing sequence; includes four components designed to develop skills in planning and development of strategies to solve marketing problems. Offered for undergraduate credit only. Offered Every Term.

Prerequisites: MKT 2300 with a minimum grade of D- and MKT 5410 with a minimum grade of D- and MKT 5450 with a minimum grade of D-

Restriction(s): Enrollment is limited to Undergraduate level students; enrollment limited to students in the School of Business.

MKT 7150 Global Automotive Marketing Strategy Cr. 3

Marketing concepts, strategies, and tactics in global automotive industry. Marketing principles, role of marketing, target market selection, segmentation, brand management, distribution systems. Offered Spring/Summer.

Prerequisites: BA 6015 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

MKT 7430 Advertising Management Cr. 3

Planning, implementing, and controlling advertising and sales promotion. Internal and external relationships of the advertising department, determining advertising objectives and copy platform, setting the budget, selecting media and measuring advertising effectiveness. Offered Fall, Winter.

Prerequisites: BA 7050 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

MKT 7450 Business Research and Methodology Cr. 3

An intensive study of the objectives and methodologies of research for business decisions. Course topics include: the scientific method, primary and secondary data sources, research design, reliability and validity, sampling, and applied statistics. Focus on the development of decision-oriented research information for all aspects of a business organization. Offered Fall, Winter.

Prerequisites: BA 7050 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

MKT 7460 International Business Cr. 3

Globalization, the multinational firm, and emerging economies. Evolution of the international monetary environment and monetary systems. Theory of the multinational firm and foreign direct investment. Cultural and market opportunity analyses. Internationalization patterns and modes of foreign market entry. Strategic and organizational choice in international business. International alliances and emerging market economies. Fundamentals of international financial management. Offered Fall.

Prerequisites: BA 7050 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

MKT 7470 Consumer and Industrial Buying Behavior Cr. 3

Behavioral theory as it relates to consumer and industrial decision processes. Relevant concepts, theories, and recent research findings are drawn from the fields of marketing, psychology, social psychology, and communications. Examination of consumer and industrial buying practices. Offered Fall.

Prerequisites: BA 7050 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

In-depth study of the retail mix variables as they relate to products and services, pricing, promotion, place, and operating policies. Merchandising, inventory controls, store operations, and research approaches in monitoring current trends in retail management. Offered Intermittently.

Prerequisites: BA 7050 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

MKT 7860 Social Media and Digital Marketing Analytics Cr. 3

Students will examine some of the top social media platforms today and the analytics used to measure their effectiveness. In addition, students will learn the basics of building a digital marketing team including how to manage digital marketing employees. Offered Winter, Spring/Summer.

Prerequisite: BA 7050 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

MKT 7870 Seminar in Marketing Cr. 3

In-depth exploration of new and important subjects or techniques in marketing. Topics vary by semester; consult instructor. Offered Intermittently.

Prerequisite: BA 7050 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

MKT 7890 Internship in Marketing Cr. 3

Students work a minimum of 160 hours for fifteen weeks in an entry-level management position in marketing. Offered Every Term.

Prerequisites: BA 7050 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

MKT 7950 Business and Sustainability Cr. 3

How organizations can be good to the environment while being profitable. Sustainability concerns such as climate change, rising energy prices, natural resource depletions, and air pollution. Evaluation of aspects of business operations including marketing and communications, stakeholder engagement, product development, operations, supply chain management, and reporting concerns. Offered Fall.

Prerequisites: BA 7040 with a minimum grade of C or BA 7050 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

Equivalent: MGT 7950

MKT 7995 Directed Study in Marketing Cr. 1-3

Advanced independent readings and research under supervision of a graduate faculty member in areas of special interest to student and faculty member. Offered Every Term.

Prerequisites: BA 7050 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

Repeatable for 5 Credits

MS - MORTUARY SCIENCE

MS 3100 Thanatochemistry Cr. 2

Discussion, problem solving, and application of general inorganic, organic and biochemistry to postmortem changes, biologic preservation, and embalming chemistry. Course includes a problem-based laboratory and case studies with correlations to embalming chemistry. Offered Winter.

Prerequisite: CHM 1000 with a minimum grade of C

Restriction(s): Enrollment limited to students in the BS in Mortuary Science program.

MS 3300 Religions, Values, and Death Cr. 2

Various religious, secular, and philosophical views regarding the value of life, the meaning of death, and life after death. Offered Winter.

Restriction(s): Enrollment limited to students in the BS in Mortuary Science, BS in Pathologist Assistant or PBC in Forensic Investigation programs.

MS 3400 Funeral Service Law and Ethics I Cr. 3

Business law and legal environment affecting funeral service. Introduction to American legal system, court structure, and civil & criminal procedure. Contract law, property law and UCC Articles 2, 3, and 9. Survey of tort law. Discussion and problems based on the ethical responsibilities of funeral practitioners Offered Winter.

Restriction(s): Enrollment limited to students in the BS in Mortuary Science program.

Legal principles affecting funeral service including legal status of a deceased, rights and responsibilities affecting disposition, licensing laws, regulatory compliance, preneed and probate law. Funeral service torts and discussion and problems on due diligence, best practices, and ethical responsibilities of funeral practitioners. Offered Spring/Summer.

Restriction(s): Enrollment limited to students in the BS in Mortuary Science program.

Course Material Fees: \$60

MS 3500 Embalming I Cr. 2

Theories, practices, and techniques of biologic preservation and disinfection of human remains; case analyses; methods of application of embalming chemicals; use of instruments and equipment; special case embalming. Offered Fall.

Restriction(s): Enrollment limited to students in the BS in Mortuary Science program.

Course Material Fees: \$200

MS 3510 Embalming II Cr. 2

Dynamics of decomposition; influence of disease and its treatment on the embalming process; public health considerations; anatomical embalming; disaster response. Offered Winter.

Prerequisite: MS 3500 with a minimum grade of C

Restriction(s): Enrollment limited to students in the BS in Mortuary Science program.

Course Material Fees: \$200

MS 3600 Restorative Art I Cr. 3

Theories, methods, and techniques used in the restoration of superficial tissues and features. Color theory, cosmetology, facial proportions, skin tones correlated with reconstruction. Clay and wax modeling. Case studies in restorative art. Offered Fall.

Restriction(s): Enrollment limited to students in the BS in Mortuary Science program.

Course Material Fees: \$50

MS 3610 Restorative Art II Cr. 2

Continuation of MS 3600. Offered Winter.

Prerequisite: MS 3600 with a minimum grade of C

Restriction(s): Enrollment limited to students in the BS in Mortuary Science program.

Course Material Fees: \$35

MS 3620 Preparation for Disposition Cr. 2

Preparing the decedent for disposition, including handling of personal effects, refrigeration, container selection, identification viewing, dressing, transportation and special ceremonial preparation. Offered Spring/Summer.

Prerequisite: MS 3610 with a minimum grade of C

Restriction(s): Enrollment limited to students in the BS in Mortuary Science program.

Course Material Fees: \$200

MS 3760 Funeral Service History and Trends Cr. 2

Basic human need to memorialize the dead, examined throughout history. Funeralization as a process affected by social and religious change. The funeral service professional in a socio-temporal context. Possible future practices based on understanding of historical records and current trends. Offered Spring/Summer.

Restriction(s): Enrollment limited to students in the BS in Mortuary Science program.

MS 3800 Funeral Directing Cr. 3

Funeral service operations. Practical applications including field trips. Funeral service process from first call to final disposition. Terminology, government regulations, ethics, professional conduct, vital statistics records, necessary forms. Religious, ethnic, fraternal and military variations. Computer technologies and applications. Offered Fall.

Restriction(s): Enrollment limited to students in the BS in Mortuary Science program.

Course Material Fees: \$80

MS 3810 Funeral Service Marketing and Merchandising Cr. 3

Marketing, merchandising, public relations, pre-need planning, personnel management, job-seeking skills, licensing requirements; planning, building and establishing of funeral home. Government regulations. Offered Fall.

Prerequisite: MS 3800 with a minimum grade of C

Restriction(s): Enrollment limited to students in the BS in Mortuary Science program.

Course Material Fees: \$80

MS 3830 Psychology of Death and Dying Cr. 3

Various social and cultural perspectives; psychosocial changes related to death, dying, and disposition; special cases: sudden, violent or unexpected death. Offered Fall.

Restriction(s): Enrollment limited to students in the BS in Mortuary Science program.

MS 3840 Psychosocial Aspects of Grief Cr. 3

Psychology of funeral service practices; social role of funeral service practitioner in the dynamics of grief; psychosocial interpretations of changing attitudes toward death; normal and abnormal grief responses; sociology of funeral service. Offered Spring/Summer.

Prerequisite: MS 3830 with a minimum grade of C

Restriction(s): Enrollment limited to students in the BS in Mortuary Science program.

MS 3970 Practicum I Cr. 3

Student placement in licensed funeral service facility to acquire practical experience in basic funeral service skills. Offered Fall.

Restriction(s): Enrollment limited to students in the BS in Mortuary Science program.

Course Material Fees: \$30

MS 3980 Practicum II Cr. 3

Continuation of the Practicum I course. Students are placed in a licensed funeral service facility to acquire practical experience in advanced funeral service skills. Offered Winter.

Prerequisite: MS 3970 with a minimum grade of P

Restriction(s): Enrollment limited to students in the BS in Mortuary Science program.

Course Material Fees: \$30

MS 4000 Practicum III Cr. 3

Continuation of the Practicum II course. Students are placed in a licensed funeral service facility to acquire practical experience in advanced funeral service skills and evaluation of clinical embalming competency. Offered Spring/Summer.

Prerequisite: MS 3970 with a minimum grade of P and MS 3980 with a minimum grade of P

Restriction(s): Enrollment limited to students in the BS in Mortuary Science program.

MS 4010 Forensic Laboratory Standards Cr. 3

The forensic lab, its organization, accreditation, and regulation; quality control, safety, and documentation; discussion and demonstration of methods for collection and processing of specimens. Specimen extraction techniques and analyte-specific analytical instrumentation used in forensic laboratory. Basis for the forensic logic tree. Offered Fall.

Restriction(s): Enrollment is limited to students with a major, minor, or concentration in Forensic Invest and Policing or Forensic Investigation.

MS 4011 Interview and Interrogation Techniques Cr. 3

Appropriate and effective techniques for conducting interviews in forensic investigations. Effective and efficient techniques for interviewing witnesses and interrogating defendants. Legal issues surrounding investigations; strategies in gathering information and obtaining confessions. Offered Fall.

Restriction(s): Enrollment is limited to students with a major, minor, or concentration in Forensic Invest and Policing or Forensic Investigation.

MS 4050 Anatomy for Mortuary Science Cr. 2

Detailed systemic study of human anatomy. Laboratory work consists of demonstrations and selected dissections; emphasis on vascular anatomy and adjacent structural relationships; anatomic guides. Material Fee As Indicated In The Schedule of Classes. Offered Fall.

Restriction(s): Enrollment limited to students in the BS in Mortuary Science program.

Course Material Fees: \$30

MS 4200 Introduction to Forensic Anatomic Pathology Cr. 3

Role of medical examiner, early signs of death, medical investigation of cause of death, methods for identification of remains, medicolegal aspects of forensic science, toxicology specimen techniques, legal issues in anatomic/forensic pathology. Offered Spring/Summer.

Restriction(s): Enrollment limited to students in the Pharmacy and Health Sciences; enrollment limited to students in the BS in Pathologist Assistant or PBC in Forensic Investigation programs.

MS 4250 Pathology and Microbiology for Mortuary Science Cr. 3

Discussion and application of pathogenic microbial agents; host-parasite relationships; disinfection-decontamination; immunology; epidemiology of infectious disease; and public health issues. Basic study of disease states and processes that may negatively impact restorative art efforts or the success of preservation through embalming. Lecture and problem-based laboratory/case studies. Offered Winter.

Restriction(s): Enrollment limited to students in the BS in Mortuary Science program.

MS 4450 Funeral Service Management and Accounting Cr. 3

Financial aspects of starting and operating a funeral business; basic accounting principles; dealings with fellow professionals and government agencies. Offered Spring/Summer.

Prerequisite: ACC 3010 with a minimum grade of D-

Restriction(s): Enrollment limited to students in the BS in Mortuary Science program.

MS 4500 Clinical Autopsy Pathology Cr. 6

Autopsy procedures, including data retention, dissection techniques, selection of tissue for microscopic examination, and methods of body restoration prior to release. Course addresses clinical Gross Anatomy Techniques and Gross Pediatric Pathology techniques. Offered Every Term.

Restriction(s): Enrollment limited to students with a class of Senior; enrollment limited to students in the BS in Pathologist Assistant program.

MS 4600 Clinical Forensic Pathology Cr. 3-5

Assisting pathologist in determining cause of death; basic methods for identifying remains with regard to age, sex, and race; techniques of photographic record keeping. Offered Every Term.

Restriction(s): Enrollment limited to students with a class of Senior; enrollment limited to students in the BS in Pathologist Assistant or PBC in Forensic Investigation programs.

Course Material Fees: \$30

MS 4650 Clinical Surgical Pathology Cr. 5

Principles, theories, and clinical practices related to gross surgical dissections. Offered Every Term.

Restriction(s): Enrollment limited to students with a class of Senior; enrollment limited to students in the BS in Pathologist Assistant program.

MS 4700 Clinical Pathology Cr. 3

Fundamental processes in benign and malignant hematopathology and lymphoid tissue; interpretation of clinical chemistry values, tumor markers, laboratory values, and the evolution of clinical and pathology case studies. Offered Every Term.

Restriction(s): Enrollment limited to students with a class of Senior; enrollment limited to students in the BS in Pathologist Assistant program.

MS 4800 Clinical Photography Cr. 2

Techniques required to photographically record gross and microscopic specimens as presented from surgery. Offered Every Term.

Restriction(s): Enrollment limited to students with a class of Senior; enrollment limited to students in the BS in Pathologist Assistant program.

MS 4850 Clinical Academic Pathology Cr. 6

Principles and theories of surgical diagnostic pathology and mechanisms of disease. Offered Every Term.

Restriction(s): Enrollment limited to students with a class of Senior; enrollment limited to students in the BS in Pathologist Assistant program.

MS 5010 Forensic Analysis Cr. 2

New developments in the forensic laboratory; current areas of research and potential applications. Forensic logic trees and forensic case applications; novel techniques in crime scene investigation and analysis. Offered Winter.

Prerequisite: MS 4010 with a minimum grade of C

Restriction(s): Enrollment is limited to students with a major, minor, or concentration in Forensic Invest and Policing or Forensic Investigation.

MS 5011 Forensic Investigation of Firearms, Ballistics, and Explosives Cr. 4

Introduction to firearm operation, identification, ballistics and explosive materials and devices from the perspective of forensic evaluation. Principles of forensic evidence collection and analysis discussed in lab. Offered in collaboration with Bioengineering Center Ballistic Research Laboratory. Offered Winter.

Prerequisite: MS 4010 with a minimum grade of C or MS 6010 with a minimum grade of C

Restriction(s): Enrollment is limited to students with a major, minor, or concentration in Forensic Invest and Policing or Forensic Investigation.

Course Material Fees: \$40

MS 5350 Funeral Service Communications Cr. 1

Survey of professional communication in funeral service, including: verbal and non-verbal communication strategies, email and written communication, principles of customer service, public relations, networking, conflict resolution, workplace and professional expectations. Offered Winter.

Restriction(s): Enrollment limited to students in the BS in Mortuary Science program.

MS 5550 Special Topics in Mortuary Science Cr. 1

Lectures and discussions; invited speakers on current topics in the profession. Topics to be announced in Schedule of Classes. Offered Yearly.

Restriction(s): Enrollment limited to students in the BS in Mortuary Science or PBC in Forensic Investigation programs.

Repeatable for 3 Credits

MS 5990 Directed Study Cr. 3

Library and/or laboratory study of current or pending professional development; study of an existing problem, study or development of new procedures or techniques. Assigned project under the guidance of departmental/program faculty member. Offered Every Term.

Restriction(s): Enrollment limited to students in the BS in Mortuary Science or PBC in Forensic Investigation programs.

MS 5996 Professional Review Cr. 3

A comprehensive review and assessment in preparation for the National Board Examination consisting of assigned questions and in-class discussion and assessment, culminating in the Practice National Board Examination. Students receive a grade of Y at the conclusion of the course and have 30 days to take the National Board Examination after completion of the Mortuary Science professional coursework. Offered Spring/Summer.

Restriction(s): Enrollment limited to students in the BS in Mortuary Science program.

Course Material Fees: \$100

MS 6010 Forensic Analysis for the Toxicologist Cr. 3

Introduction to the field for the analytical toxicologist. Design, organization, quality control, quality assurance, safety, documentation in forensic laboratory; specimen collection; handling of biological and other evidentiary specimens. Offered Fall.

MSE - MATERIALS SCIENCE AND ENGINEERING

MSE 5350 Polymer Science Cr. 3

Fundamental relationships between chemical structure and physical properties of high polymers. Basic structures, states and transitions of polymers. Polymerization reactions and processes. Molecular weight, viscous flow and mechanical properties of polymers. Offered Fall.

Prerequisites: May be taken concurrently: MAT 2150 with a minimum grade of C-

Course Material Fees: \$10

Equivalent: CHE 5350

MSE 5360 Polymer Processing Cr. 3

A detailed analysis of polymer processing. Rheology of polymers, flow in tubes, calendaring, extrusion, coating and injection molding. Offered Winter.

Prerequisites: CHE 3200 with a minimum grade of C-

Course Material Fees: \$10

Equivalent: CHE 5360

MSE 5385 Biocompatibility Cr. 4

Wound healing and the tissue response to foreign materials. The organization, activation, and mechanisms of the immune system. Bioactive materials and the molecular basis for surface recognition and masking. Offered Intermittently.

Prerequisite: BME 5010 with a minimum grade of C or BMS 6550 with a minimum grade of C

Equivalent: BME 5380

MSE 5650 Surface Science Cr. 3

An introduction to the science and technology of surface phenomena, including surface structure, surface energy, surface diffusion, crystal growth and selected applications of technological importance. Offered Intermittently.

Prerequisites: BE 1300 with a minimum grade of D- and CHM 5440 with a minimum grade of D-

MSE 7100 Advanced Engineering Mathematics Cr. 3

Presentation, evaluation and use of mathematical methods within the framework of engineering problems; including ordinary and partial differential equations, transforms and vector operations. Offered Fall.

Restriction(s): Enrollment is limited to Graduate level students.

Equivalent: CHE 7100

MSE 7180 Advanced Topics in Biomaterials and Tissue Biomechanics Cr. 4

Seminar format: advanced topics presented to the class; lectures by the instructor and by the participants based on literature reviews. Topics determined by student interest. Offered Every Other Fall.

Prerequisite: BME 5210 with a minimum grade of C or BME 5370 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

Equivalent: BME 7300, ME 7180

MSE 7300 Advanced Thermodynamics Cr. 3

Advanced presentation of the principles of thermodynamics; application to open systems, phase diagrams and chemical equilibria. Offered Fall.

Restriction(s): Enrollment is limited to Graduate level students.

Equivalent: CHE 7300

MSE 7400 Mechanical Behavior of Materials Cr. 3

Analysis of elastic and plastic deformation of single crystals and polycrystalline materials, emphasizing the relations between metallurgical microstructure and material properties. Offered Intermittently.

Restriction(s): Enrollment is limited to Graduate level students.

MSE 7990 Directed Study Cr. 1-6

Library investigation of an approved project in materials science and engineering. Independent study, conferences with supervisor and preparation of a comprehensive report. Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students.

MSE 7995 Special Topics in Materials Science II Cr. 1-4

A consideration of special subject matter in materials science. Topics to be announced in Schedule of Classes. Offered Intermittently.

Restriction(s): Enrollment is limited to Graduate level students.

Repeatable for 12 Credits

MSE 8996 Research Cr. 1-10

Library and laboratory investigation of an approved proposal for advanced research project. Conferences and periodic oral progress reports. Comprehensive report of entire project upon completion. Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students.

MSE 8997 Seminar Cr. 0.5

Offered Fall, Winter.

Restriction(s): Enrollment is limited to Graduate level students.

MSE 8999 Master's Thesis Research and Direction Cr. 1-8

Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students with a class of Candidate Masters.

Repeatable for 8 Credits

MSE 9990 Pre-Doctoral Candidacy Research Cr. 1-8

Research in preparation for doctoral dissertation. Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students.

Repeatable for 12 Credits

MSE 9991 Doctoral Candidate Status I: Dissertation Research and Direction Cr. 7.5

Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students.

MSE 9992 Doctoral Candidate Status II: Dissertation Research and Direction Cr. 7.5

Offered Every Term.

Prerequisite: MSE 9991 with a minimum grade of S

Restriction(s): Enrollment is limited to Graduate level students.

MSE 9993 Doctoral Candidate Status III: Dissertation Research and Direction Cr. 7.5

Offered Every Term.

Prerequisite: MSE 9992 with a minimum grade of S

Restriction(s): Enrollment is limited to Graduate level students.

MSE 9994 Doctoral Candidate Status IV: Dissertation Research and Direction Cr. 7.5

Offered Every Term.

Prerequisite: MSE 9993 with a minimum grade of S

Restriction(s): Enrollment is limited to Graduate level students.

MSE 9995 Candidate Maintenance Status: Doctoral Dissertation Research and Direction Cr. 0

Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students.

Course Material Fees: \$370.26

Repeatable for 0 Credits

MUA - MUSIC ENSEMBLES AND GENERAL COURSES

MUA 0804 Warrior Band Cr. 0

Warrior band performs for all home football games during fall term and basketball games during late fall and winter terms. Performances for University special events may be scheduled. Offered Fall, Winter.

Restriction(s): Enrollment is limited to Undergraduate level students.

MUA 0900 General Lectures and Concerts Cr. 0

Lectures by visiting scholars; recitals by invited guest artists; student and faculty recitals, concerts and convocations. Offered Fall, Winter.

MUA 1700 Guitar Class Cr. 2

Fundamentals in guitar playing; techniques, hand positions, bar chords, general performance practices. Offered Fall, Winter.

Course Material Fees: \$75

Repeatable for 8 Credits

MUA 1710 Piano Class Cr. 2

Rudiments of rhythmic and staff notation, beginning keyboard technique, hand positions, scales, simple compositions. Offered Fall, Winter.

Course Material Fees: \$75

Repeatable for 8 Credits

MUA 1720 Voice Techniques and Pedagogy Cr. 2

Fundamentals in voice training and pedagogy for music majors. Offered Fall.

Prerequisite: MUT 1140 with a minimum grade of C and MUT 1150 with a minimum grade of C

Repeatable for 8 Credits

MUA 1730 String Techniques and Pedagogy Cr. 2

Techniques and fundamental problems in the playing and teaching of stringed instruments. Offered Fall, Winter.

Prerequisites: MUT 1140 with a minimum grade of D- or MUT 1100 with a minimum grade of D-

Restriction(s): Enrollment is limited to students with a major in Music or Music Honors.

Course Material Fees: \$75

Repeatable for 6 Credits

MUA 1740 Woodwind Techniques and Pedagogy Cr. 2

Techniques and fundamental problems in the playing and teaching of woodwind instruments. Offered Fall, Winter.

Prerequisites: MUT 1140 with a minimum grade of D- or MUT 1100 with a minimum grade of D-

Restriction(s): Enrollment is limited to students with a major in Music or Music Honors.

Course Material Fees: \$75

Repeatable for 6 Credits

MUA 1750 Brasswind Techniques and Pedagogy Cr. 2

Techniques and fundamental problems in the playing and teaching of brasswind instruments. Offered Fall.

Prerequisites: MUT 1140 with a minimum grade of D- or MUT 1100 with a minimum grade of D-

Restriction(s): Enrollment is limited to students with a major in Music or Music Honors.

Course Material Fees: \$75

Repeatable for 6 Credits

MUA 1760 Percussion Techniques and Pedagogy Cr. 2

Techniques and fundamental problems in the playing and teaching of percussion instruments. Offered Fall.

Prerequisites: MUT 1140 with a minimum grade of D- or MUT 1100 with a minimum grade of D-

Restriction(s): Enrollment is limited to students with a major in Music or Music Honors.

Course Material Fees: \$75

MUA 1795 Piano Skills I Cr. 2

Repertoire, scales, sight reading, harmonization, and simple transpositions. Offered Every Term.

Prerequisites: MUA 1710 with a minimum grade of C

Restriction(s): Enrollment is limited to students with a major in Music or Music Honors; enrollment limited to students in the BA in Fine Arts or Bachelor of Music programs.

Course Material Fees: \$75

MUA 2400 Music Business I Cr. 3

Overview of the music business: emphasis on career options/development; necessary training/experience; music in the marketplace, arts entrepreneurship, mass media, technology, digital/global implications and future trends, arts administration, industry networking, social media, internship development; professional organization, association, and industry affiliations. Offered Winter.

Prerequisite: MUT 1160 with a minimum grade of C and MUT 1170 with a minimum grade of C

MUA 2500 Music Technology Cr. 3

Introductory class on music technology. Learn to record, edit, and export music using a computer. Learn the basics of audio hardware setup for music, multimedia, and classes. Offered Every Term.

Course Material Fees: \$75

MUA 2510 Studio Recording Techniques Cr. 2

Learn techniques of multi-track recording. Students will learn how to observe and understand equipment in a professional recording studio. Offered Fall.

Prerequisite: MUA 2500 with a minimum grade of C

Restriction(s): Enrollment is limited to students with a major in Music or Music Honors.

Course Material Fees: \$75

MUA 2530 Electronic Music Synthesis Cr. 3

Learn to create sounds by manipulating electronic signals. Topics include fundamentals of synthesizers, theories of digital signal processing, and principle of sound design. Offered Fall.

Prerequisite: MUA 2500 with a minimum grade of C

Course Material Fees: \$75

MUA 2720 Voice Class Cr. 2

Fundamentals in voice training. Correct breathing: tone placement: articulation vocalises. Offered Fall, Winter.

Equivalent: MUA 1720

Repeatable for 8 Credits

MUA 2795 Piano Skills II Cr. 2

Continuation of MUA 1795; development of basic piano skills to a higher level. Offered Winter, Spring/Summer.

Prerequisite: MUA 1795 with a minimum grade of C

Restriction(s): Enrollment is limited to students with a major in Music; enrollment limited to students in the BA in Fine Arts or Bachelor of Music programs.

Course Material Fees: \$75

MUA 2800 University Bands Cr. 1

. Offered Fall, Winter.

Course Material Fees: \$30

Repeatable for 99 Credits

MUA 2802 Chamber Winds Cr. 1

Offered Fall, Winter.

Course Material Fees: \$25**Repeatable for 10 Credits****MUA 2804 Warrior Band Cr. 1**

Warrior band performs for all home football games during fall term and basketball games during late fall and winter terms. Performances for University special events may be scheduled. Offered Fall, Winter.

Restriction(s): Enrollment is limited to Undergraduate level students.**Course Material Fees:** \$30**Repeatable for 8 Credits****MUA 2806 Campus Band Cr. 0**

Co-curricular concert band open to all University students. Campus Band performs one formal concert during winter term. Performances for University special events may be scheduled. Offered Winter.

Restriction(s): Enrollment is limited to Undergraduate level students.**Course Material Fees:** \$30**MUA 2810 University Symphony Orchestra Cr. 1**

Offered Fall, Winter.

Course Material Fees: \$30**Repeatable for 99 Credits****MUA 2820 Jazz Big Band Cr. 1**

Offered Fall, Winter.

Course Material Fees: \$30**Repeatable for 99 Credits****MUA 2822 Jazz Guitar Ensemble Cr. 1**

Large ensemble for jazz guitar majors/principals. Offered Every Term.

Restriction(s): Enrollment is limited to students with a major in Music or Music Honors.**Course Material Fees:** \$30**Repeatable for 99 Credits****MUA 2824 Jazztet Cr. 1**

Select ensemble for jazz majors. Offered Every Term.

Restriction(s): Enrollment is limited to students with a major in Music or Music Honors.**Course Material Fees:** \$25**Repeatable for 10 Credits****MUA 2826 Jazz Combos Cr. 1**

Small ensemble for jazz majors. Offered Every Term.

Restriction(s): Enrollment is limited to students with a major in Music or Music Honors.**Course Material Fees:** \$25**Repeatable for 10 Credits****MUA 2830 Men's Glee Club Cr. 1**

Music majors must enroll for one credit to satisfy degree requirements.

Offered Fall, Winter.

Course Material Fees: \$20**Repeatable for 99 Credits****MUA 2840 Choral Union Cr. 1**

Offered Fall, Winter.

Course Material Fees: \$30**Repeatable for 99 Credits****MUA 2850 Concert Chorale Cr. 1**

Offered Fall, Winter.

Course Material Fees: \$30**Repeatable for 99 Credits****MUA 2860 Opera Workshop Cr. 1**

Offered Fall, Winter.

Course Material Fees: \$30**Repeatable for 10 Credits****MUA 2870 Women's Chorale Cr. 1**

Offered Fall, Winter.

Course Material Fees: \$25**Repeatable for 99 Credits****MUA 2880 Chamber Music and Special Ensembles Cr. 1**

All forms including: flute ensemble, percussion ensemble, string trios and quartets, small wind or brass ensembles, and mixed ensembles. Offered Fall, Winter.

Restriction(s): Enrollment is limited to students with a major in Music.**Course Material Fees:** \$25**Repeatable for 10 Credits****MUA 2891 Electronic Music Ensemble Cr. 1**

Learn to play electronic instruments in an ensemble. Current and vintage electronic instruments as well as approved traditional instruments are being used to perform contemporary electronic music repertoire. Offered Fall, Winter.

Prerequisite: MUA 2500 with a minimum grade of C or MUA 2530 with a minimum grade of C**Course Material Fees:** \$75**Repeatable for 2 Credits****MUA 3510 Mixing and Mastering Cr. 2**

Students will learn project management skills through proper session documentation and billing. Topics include surround sound mixing, live sound, and large ensemble production techniques. Offered Winter.

Prerequisite: MUA 2510 with a minimum grade of C**Course Material Fees:** \$75**MUA 3530 Sound Design Cr. 3**

Covers the basics of audio programming using text-based audio applications. Students will learn to create their own plugins and software synthesizers. Offered Winter.

Prerequisite: MUA 2530 with a minimum grade of C**Course Material Fees:** \$75**MUA 3550 Advanced Studio Techniques Cr. 2**

Examines project management skills through proper session documentation and billing. Topics include surround sound mixing, live sound, and large ensemble production techniques. Offered Fall.

Prerequisite: MUA 3510 with a minimum grade of C**Course Material Fees:** \$75**MUA 3670 Conducting Techniques I Cr. 2**

Rudiments of conducting; special attention to baton techniques. Offered Fall.

Prerequisite: MUT 2160 with a minimum grade of C and MUT 2170 with a minimum grade of C**MUA 3680 Conducting Techniques II Cr. 2**

Continuation of MUA 3670. Score reading and rehearsal techniques. Offered Winter.

Prerequisite: MUA 3670 with a minimum grade of C**MUA 3795 Advanced Piano Skills Cr. 2**

Continuation of MUA 2795; emphasis on jazz skills and styles. Offered Fall.

Prerequisite: MUA 2795 with a minimum grade of C**Restriction(s):** Enrollment limited to students in the Bachelor of Music program.**Course Material Fees:** \$75**MUA 3990 Directed Study Cr. 1-3**

Individualized research and work in a particular aspect of music under the supervision of a faculty member. Offered Fall, Winter.

Restriction(s): Enrollment limited to students with a class of Junior or Senior; enrollment is limited to students with a major, minor, or concentration in Music or Music Honors.**Repeatable for 6 Credits**

MUA 4010 Audio Electronics Cr. 3

Examines practical electronics for music production and electronic music composition. Topics include basic electronics, building and repairing audio equipments, and building analog and digital signal processors and synthesizers. Offered Fall.

Prerequisites: MAT 1050 with a minimum grade of C and MUA 3510 with a minimum grade of C or MUA 3530 with a minimum grade of C

MUA 4020 Theories of Electronic Music Cr. 3

Covers advanced digital theories of electronic music synthesis and production. Topics include digital signal processing, advanced audio programming, interactive audio, and audio synthesis. Offered Fall.

Prerequisite: MUA 3510 with a minimum grade of C or MUA 3530 with a minimum grade of C

MUA 4030 Sound Design for Visual Media Cr. 3

Covers sound design and audio treatment for visual media. Topics include research and creation of sound for film, web, sound libraries, instructional technology, sound installations, and non-linear sound design (video games). Offered Winter.

Prerequisite: MUA 3510 with a minimum grade of C or MUA 3530 with a minimum grade of C

MUA 4040 Electroacoustic Music Cr. 3

Introduces techniques, aesthetics, and composition of electroacoustic music. Topics include analytical techniques for electronic music, creative usage of audio hardware and software, and advanced electroacoustic music performance. Offered Fall.

Prerequisite: MUA 3510 with a minimum grade of C or MUA 3530 with a minimum grade of C

MUA 4650 Directed Study: Internships Cr. 1-3

Directly supervised professional experience in the music and creative arts industries and related fields (marketing, music technology, recording, publicity, public relations). Offered Every Term.

Restriction(s): Enrollment is limited to students with a major in Music; enrollment limited to students in the Bachelor of Music program.

Repeatable for 6 Credits

MUA 4950 Music Technology Senior Project Cr. 1

Students will create a large-scale, long-term project that demonstrates the skills learned in the music technology classes. Offered Winter.

Prerequisite: MUA 4650 (may be taken concurrently) with a minimum grade of C

MUA 4990 BA Project Cr. 2

Directed study leading to completion of the B.A. project in music. Offered Fall, Winter.

Restriction(s): Enrollment limited to students with a class of Senior; enrollment is limited to students with a major, minor, or concentration in Music or Music Honors; enrollment limited to students in a Bachelor of Arts degree.

Equivalent: MUH 4990, MUT 4990

MUA 5600 Music Business II Cr. 3

Continuation of MUA 2400. Basic aspects of the music business. Topic coverage will include legal issues, copyright and fair use, songwriting, publishing, licensing, artist management, the recording industry, recording contracts, unions and guilds, use of agents, attorneys, and managers, and an introduction to various forms of business entities and related tax issues in the music business. Offered Fall.

Prerequisite: MUA 2400 with a minimum grade of C

Restriction(s): Enrollment is limited to students with a major in Music or Music Honors.

MUA 5690 Stage Band Direction Cr. 1

Techniques of big-band direction in a jazz medium. Offered for undergraduate credit only. Offered Fall, Winter.

Prerequisite: MUA 3670 with a minimum grade of C

Restriction(s): Enrollment is limited to Undergraduate level students.

Repeatable for 3 Credits

MUA 5700 Music Business III Cr. 3

Third in the four-course music business course sequence. Intensive individual research and study of specific areas of the music business and music industry, on local, national and global levels. Artist management, nonprofit organizations, arts advocacy/citizenship, and arts entrepreneurship. Other areas of research/investigation may include live concert production/touring, film music, music video, radio/television, marketing/communications, music business/industry associations, social media and technological/digital implications. Comprehensive individual and collaborative team research projects, music business projects, and internship/career networking development. Offered for undergraduate credit only. Offered Winter.

Prerequisite: MUA 5600 with a minimum grade of C

Restriction(s): Enrollment is limited to Undergraduate level students.

MUA 5730 Harpsichord Class Cr. 2

Offered Fall, Winter.

Restriction(s): Enrollment is limited to students with a major in Music or Music Honors.

Repeatable for 8 Credits

MUA 5800 Music Business IV Cr. 3

Final course in the music business sequence. Individual study of specific areas of music business/management and the music industry at the local, national, and international levels. Areas may include: live concert production/touring, film music and music video, marketing/communication, music business/industry associations, and technology/digital implications. Comprehensive research project required. Offered for undergraduate credit only. Offered Fall.

Prerequisite: MUA 5700 with a minimum grade of C

Restriction(s): Enrollment is limited to Undergraduate level students.

Course Material Fees: \$50

MUA 7730 Advanced Diction Cr. 3

In-depth study of diction for singers. Offered Intermittently.

Prerequisite: MUH 5370 with a minimum grade of C and MUH 5380 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

Repeatable for 6 Credits

MUA 7800 University Bands Cr. 1

Offered Fall, Winter.

Restriction(s): Enrollment is limited to Graduate level students.

Course Material Fees: \$30

Repeatable for 3 Credits

MUA 7802 Chamber Winds Cr. 1

Offered Fall, Winter.

Restriction(s): Enrollment is limited to Graduate level students.

Course Material Fees: \$25

MUA 7810 University Symphony Orchestra Cr. 1

Offered Fall, Winter.

Restriction(s): Enrollment is limited to Graduate level students.

Course Material Fees: \$30

Repeatable for 3 Credits

MUA 7820 Jazz Big Band Cr. 1

Offered Fall, Winter.

Restriction(s): Enrollment is limited to Graduate level students.

Course Material Fees: \$30

Repeatable for 3 Credits

MUA 7822 Jazz Guitar Ensemble Cr. 1

Large ensemble for jazz guitar majors/principals. Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students; enrollment is limited to students with a major in Music.

Course Material Fees: \$30

Repeatable for 2 Credits

MUA 7824 Jazztet Cr. 1

Select ensemble for jazz majors. Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students; enrollment is limited to students with a major in Music.

Course Material Fees: \$25

Repeatable for 2 Credits

MUA 7826 Jazz Combos Cr. 1

Small ensemble for jazz majors. Offered Every Term.

Prerequisite: MUP 2281 with a minimum grade of C

Course Material Fees: \$600

Repeatable for 6 Credits

MUP 2283 Classic Guitar: Major Instruction Cr. 3

Offered Fall, Winter.

Prerequisite: MUP 2282 with a minimum grade of C

Course Material Fees: \$600

Repeatable for 6 Credits

MUP 2284 Classic Guitar: Major Instruction Cr. 3

Offered Fall, Winter.

Prerequisite: MUP 2283 with a minimum grade of C

Course Material Fees: \$600

Repeatable for 6 Credits

MUP 3201 Organ: Principal Instruction Cr. 1

Offered Fall, Winter.

Prerequisite: MUP 1204 with a minimum grade of C

Course Material Fees: \$500

Repeatable for 2 Credits

MUP 3202 Organ: Principal Instruction Cr. 1

Offered Fall, Winter.

Prerequisite: MUP 3201 with a minimum grade of C

Course Material Fees: \$500

Repeatable for 2 Credits

MUP 3203 Organ: Principal Instruction Cr. 1

Offered Fall, Winter.

Prerequisite: MUP 3202 with a minimum grade of C

Course Material Fees: \$500

Repeatable for 2 Credits

MUP 3204 Organ: Principal Instruction Cr. 1

Offered Fall, Winter.

Prerequisite: MUP 3203 with a minimum grade of C

Course Material Fees: \$500

Repeatable for 2 Credits

MUP 3205 Organ: Secondary Instruction Cr. 1

Offered Fall, Winter.

Course Material Fees: \$300

Repeatable for 4 Credits

MUP 3211 Piano: Principal Instruction Cr. 1

Offered Fall, Winter.

Prerequisite: MUP 1214 with a minimum grade of C

Course Material Fees: \$500

Repeatable for 2 Credits

MUP 3212 Piano: Principal Instruction Cr. 1

Offered Fall, Winter.

Prerequisite: MUP 3211 with a minimum grade of C

Course Material Fees: \$500

Repeatable for 2 Credits

MUP 3213 Piano: Principal Instruction Cr. 1

Offered Fall, Winter.

Prerequisite: MUP 3212 with a minimum grade of C

Course Material Fees: \$500

Repeatable for 2 Credits

MUP 3214 Piano: Principal Instruction Cr. 1

Offered Fall, Winter.

Prerequisite: MUP 3213 with a minimum grade of C

Course Material Fees: \$500

Repeatable for 2 Credits

MUP 3215 Piano: Secondary Instruction Cr. 1

Offered Fall, Winter.

Course Material Fees: \$300

Repeatable for 4 Credits

MUP 3221 Voice: Principal Instruction Cr. 1

Offered Fall, Winter.

Prerequisite: MUP 1224 with a minimum grade of C

Course Material Fees: \$500

Repeatable for 2 Credits

MUP 3222 Voice: Principal Instruction Cr. 1

Offered Fall, Winter.

Prerequisite: MUP 3221 with a minimum grade of C

Course Material Fees: \$500

Repeatable for 2 Credits

MUP 3223 Voice: Principal Instruction Cr. 1

Offered Fall, Winter.

Prerequisite: MUP 3222 with a minimum grade of C

Course Material Fees: \$500

Repeatable for 2 Credits

MUP 3224 Voice: Principal Instruction Cr. 1

Offered Fall, Winter.

Prerequisite: MUP 3223 with a minimum grade of C

Course Material Fees: \$500

Repeatable for 2 Credits

MUP 3225 Voice: Secondary Instruction Cr. 1

Offered Fall, Winter.

Course Material Fees: \$300

Repeatable for 4 Credits

MUP 3231 Strings: Principal Instruction Cr. 1

Offered Fall, Winter.

Prerequisite: MUP 1234 with a minimum grade of C

Course Material Fees: \$500

Repeatable for 2 Credits

MUP 3232 Strings: Principal Instruction Cr. 1

Offered Fall, Winter.

Prerequisite: MUP 3231 with a minimum grade of C

Course Material Fees: \$500

Repeatable for 2 Credits

MUP 3233 Strings: Principal Instruction Cr. 1

Offered Fall, Winter.

Prerequisite: MUP 3232 with a minimum grade of C

Course Material Fees: \$500

Repeatable for 2 Credits

MUP 3234 Strings: Principal Instruction Cr. 1

Offered Fall, Winter.

Prerequisite: MUP 3233 with a minimum grade of C

Course Material Fees: \$500

Repeatable for 2 Credits

MUP 3235 Strings: Secondary Instruction Cr. 1

Offered Fall, Winter.

Course Material Fees: \$300

Repeatable for 4 Credits

MUP 3241 Woodwinds: Principal Instruction Cr. 1

Offered Fall, Winter.

Prerequisite: MUP 1244 with a minimum grade of C

Course Material Fees: \$500

Repeatable for 2 Credits

MUP 3242 Woodwinds: Principal Instruction Cr. 1

Offered Fall, Winter.

Prerequisite: MUP 3241 with a minimum grade of C

Course Material Fees: \$500

Repeatable for 2 Credits

MUP 3243 Woodwinds: Principal Instruction Cr. 1

Offered Fall, Winter.

Prerequisite: MUP 3242 with a minimum grade of C

Course Material Fees: \$500

Repeatable for 2 Credits

MUP 3244 Woodwinds: Principal Instruction Cr. 1

Offered Fall, Winter.

Prerequisite: MUP 3243 with a minimum grade of C

Course Material Fees: \$500

Repeatable for 2 Credits

MUP 3245 Woodwinds: Secondary Instruction Cr. 1

Offered Fall, Winter.

Course Material Fees: \$300

Repeatable for 4 Credits

MUP 3251 Brasswinds: Principal Instruction Cr. 1

Offered Fall, Winter.

Prerequisite: MUP 1254 with a minimum grade of C

Course Material Fees: \$500

Repeatable for 2 Credits

MUP 3252 Brasswinds: Principal Instruction Cr. 1
Offered Fall, Winter.
Prerequisite: MUP 3251 with a minimum grade of C
Course Material Fees: \$500
Repeatable for 2 Credits

MUP 3253 Brasswinds: Principal Instruction Cr. 1
Offered Fall, Winter.
Prerequisite: MUP 3252 with a minimum grade of C
Course Material Fees: \$500
Repeatable for 2 Credits

MUP 3254 Brasswinds: Principal Instruction Cr. 1
Offered Fall, Winter.
Prerequisite: MUP 3253 with a minimum grade of C
Course Material Fees: \$500
Repeatable for 2 Credits

MUP 3255 Brasswinds: Secondary Instruction Cr. 1
Offered Fall, Winter.
Course Material Fees: \$300
Repeatable for 4 Credits

MUP 3261 Percussion: Principal Instruction Cr. 1
Offered Fall, Winter.
Prerequisite: MUP 1264 with a minimum grade of C
Course Material Fees: \$500
Repeatable for 2 Credits

MUP 3262 Percussion: Principal Instruction Cr. 1
Offered Fall, Winter.
Prerequisite: MUP 3261 with a minimum grade of C
Course Material Fees: \$500
Repeatable for 2 Credits

MUP 3263 Percussion: Principal Instruction Cr. 1
Offered Fall, Winter.
Prerequisite: MUP 3262 with a minimum grade of C
Course Material Fees: \$500
Repeatable for 2 Credits

MUP 3264 Percussion: Principal Instruction Cr. 1
Offered Fall, Winter.
Prerequisite: MUP 3263 with a minimum grade of C
Course Material Fees: \$500
Repeatable for 2 Credits

MUP 3265 Percussion: Secondary Instruction Cr. 1
Offered Fall, Winter.
Course Material Fees: \$300
Repeatable for 4 Credits

MUP 3271 Harp: Principal Instruction Cr. 1
Offered Fall, Winter.
Prerequisite: MUP 1274 with a minimum grade of C
Course Material Fees: \$500
Repeatable for 2 Credits

MUP 3272 Harp: Principal Instruction Cr. 1
Offered Fall, Winter.
Prerequisite: MUP 3271 with a minimum grade of C
Course Material Fees: \$500
Repeatable for 2 Credits

MUP 3273 Harp: Principal Instruction Cr. 1
Offered Fall, Winter.
Prerequisite: MUP 3272 with a minimum grade of C
Course Material Fees: \$500
Repeatable for 2 Credits

MUP 3274 Harp: Principal Instruction Cr. 1
Offered Fall, Winter.
Prerequisite: MUP 3273 with a minimum grade of C
Course Material Fees: \$500
Repeatable for 2 Credits

MUP 3275 Harp: Secondary Instruction Cr. 1
Offered Fall, Winter.
Course Material Fees: \$300
Repeatable for 4 Credits

MUP 3281 Classic Guitar: Principal Instruction Cr. 1
Offered Fall, Winter.
Prerequisite: MUP 1284 with a minimum grade of C
Course Material Fees: \$500
Repeatable for 2 Credits

MUP 3282 Classic Guitar: Principal Instruction Cr. 1
Offered Fall, Winter.
Prerequisite: MUP 3281 with a minimum grade of C
Course Material Fees: \$500
Repeatable for 2 Credits

MUP 3283 Classic Guitar: Principal Instruction Cr. 1
Offered Fall, Winter.
Prerequisite: MUP 3282 with a minimum grade of C
Course Material Fees: \$500
Repeatable for 2 Credits

MUP 3284 Classic Guitar: Principal Instruction Cr. 1
Offered Fall, Winter.
Prerequisite: MUP 3283 with a minimum grade of C
Course Material Fees: \$500
Repeatable for 2 Credits

MUP 3285 Classic Guitar: Secondary Instruction Cr. 1
Offered Fall, Winter.
Course Material Fees: \$300
Repeatable for 4 Credits

MUP 3321 Jazz Piano: Principal Instruction Cr. 1
Offered Fall, Winter.
Prerequisite: MUP 1324 with a minimum grade of C and (MUA 2820 (may be taken concurrently) with a minimum grade of C or MUA 2822 (may be taken concurrently) with a minimum grade of C)
Course Material Fees: \$500
Repeatable for 2 Credits

MUP 3322 Jazz Piano: Principal Instruction Cr. 1
Offered Fall, Winter.
Prerequisite: MUP 3321 with a minimum grade of C and (MUA 2820 (may be taken concurrently) with a minimum grade of C or MUA 2822 (may be taken concurrently) with a minimum grade of C)
Course Material Fees: \$500
Repeatable for 2 Credits

MUP 3323 Jazz Piano: Principal Instruction Cr. 1
Advanced private instruction in jazz piano. Offered Fall, Winter.
Prerequisite: MUP 3322 with a minimum grade of C and (MUA 2820 (may be taken concurrently) with a minimum grade of C or MUA 2822 (may be taken concurrently) with a minimum grade of C)
Restriction(s): Enrollment is limited to students with a major in Music or Music Honors.
Course Material Fees: \$500
Repeatable for 2 Credits

MUP 3324 Jazz Piano: Principal Instruction Cr. 1

Advanced private jazz piano. Offered Fall, Winter.

Prerequisite: MUP 3323 with a minimum grade of C and (MUA 2820 (may be taken concurrently) with a minimum grade of C or MUA 2822 (may be taken concurrently) with a minimum grade of C)

Restriction(s): Enrollment is limited to students with a major in Music or Music Honors.

Course Material Fees: \$500

Repeatable for 2 Credits

MUP 3325 Jazz Piano: Secondary Instruction Cr. 1

Offered Fall, Winter.

Course Material Fees: \$300

Repeatable for 4 Credits

MUP 3331 Jazz Strings: Principal Instruction Cr. 1

Offered Fall, Winter.

Prerequisite: MUP 1334 with a minimum grade of C and (MUA 2820 (may be taken concurrently) with a minimum grade of C or MUA 2822 (may be taken concurrently) with a minimum grade of C)

Course Material Fees: \$500

Repeatable for 2 Credits

MUP 3332 Jazz Strings: Principal Instruction Cr. 1

Offered Fall, Winter.

Prerequisite: MUP 3331 with a minimum grade of C and (MUA 2820 (may be taken concurrently) with a minimum grade of C or MUA 2822 (may be taken concurrently) with a minimum grade of C)

Course Material Fees: \$500

Repeatable for 2 Credits

MUP 3333 Jazz Strings: Major Instruction Cr. 1

Individual instruction on a jazz string instrument. Offered Fall, Winter.

Prerequisite: MUP 3332 with a minimum grade of C and (MUA 2820 (may be taken concurrently) with a minimum grade of C or MUA 2822 (may be taken concurrently) with a minimum grade of C)

Restriction(s): Enrollment is limited to students with a major in Music or Music Honors.

Course Material Fees: \$500

Repeatable for 2 Credits

MUP 3334 Jazz Strings: Principal Instruction Cr. 1

Advanced private instruction on a jazz string instrument. Offered Fall, Winter.

Prerequisite: MUP 3333 with a minimum grade of C and (MUA 2820 (may be taken concurrently) with a minimum grade of C or MUA 2822 (may be taken concurrently) with a minimum grade of C)

Restriction(s): Enrollment is limited to students with a major in Music or Music Honors.

Course Material Fees: \$500

Repeatable for 2 Credits

MUP 3335 Jazz Strings: Secondary Instruction Cr. 1

Offered Fall, Winter.

Course Material Fees: \$300

Repeatable for 4 Credits

MUP 3341 Jazz Woodwinds: Principal Instruction Cr. 1

Offered Fall, Winter.

Prerequisite: MUP 1344 with a minimum grade of C and (MUA 2820 (may be taken concurrently) with a minimum grade of C or MUA 2822 (may be taken concurrently) with a minimum grade of C)

Course Material Fees: \$500

Repeatable for 2 Credits

MUP 3342 Jazz Woodwinds: Principal Instruction Cr. 1

Offered Fall, Winter.

Prerequisite: MUP 3341 with a minimum grade of C and (MUA 2820 (may be taken concurrently) with a minimum grade of C or MUA 2822 (may be taken concurrently) with a minimum grade of C)

Course Material Fees: \$500

MUT - MUSIC THEORY

MUT 1100 Elementary Music Theory Cr. 3

Terminology and standard notation, including intervals, triads, scales, rhythm, correlated ear training, and general musicianship. No degree credit for music majors. Offered Every Term.

MUT 1140 Theory I Cr. 3

Prior knowledge of scales, clefs, and key signatures. Triads, intervals, principles of four-part writing, voice leading and melody harmonization, including all diatonic triads, dominant and super tonic seventh chords, inversions, and nonharmonic tones. Offered Fall, Winter.

Prerequisite: MUT 1100 with a minimum grade of C

Restriction(s): Enrollment is limited to students with a major in Music or Music Honors.

MUT 1150 Ear Training I Cr. 1

An introduction to sight singing, solfeggio, and the basic materials of tonal music including intervals, chords, simple melodies, and basic harmonic progressions. Offered Fall, Winter.

Restriction(s): Enrollment is limited to students with a major in Music or Music Honors.

MUT 1160 Theory II Cr. 3

Further study of diatonic harmony, including idiomatic chord functions and tonal sequences. Offered Winter, Spring/Summer.

Prerequisite: MUT 1140 with a minimum grade of C

MUT 1170 Ear Training II Cr. 1

A continuation of MUT 1150. Sight-singing and dictation of more advanced diatonic materials. Offered Winter, Spring/Summer.

Prerequisite: MUT 1150 with a minimum grade of C

MUT 1200 Beginning Composition I Cr. 2

Introduction to creative writing in twentieth and twenty-first century composition. Group composition projects and associated private lessons explore a broad range of contemporary styles and techniques. Topics include melodic studies, process, acoustics, polytonality, free atonality, serialism, timbre, postmodernism. Offered Fall.

Restriction(s): Enrollment is limited to Undergraduate level students; enrollment is limited to students with a major in Music or Music Honors.

MUT 1210 Beginning Composition II Cr. 2

Introduction to creative writing in twentieth and twenty-first century composition. Group composition projects and associated private lessons explore a broad range of contemporary styles and techniques. Topics include rhythmic studies, notational exploration, indeterminacy, extended techniques, minimalism, pitch class sets, electronic music. Offered Winter.

Prerequisite: MUT 1200 with a minimum grade of C

MUT 2030 Keyboard Harmony I Cr. 1

First of a two-course sequence. Basic training in score reading, such as practice in various clefs and transpositions found in current instrumental writing. No credit after MUT 2040. Offered Every Other Year.

Prerequisite: MUA 2795 with a minimum grade of C and MUT 1160 with a minimum grade of C

MUT 2040 Keyboard Harmony II Cr. 1

Continuation of MUT 2030. Advanced harmonic progressions applied to the keyboard; figured bass; harmonization of soprano or bass; modulation; transposition, and score reading. Offered Every Other Year.

Prerequisites: MUT 2030 with a minimum grade of C

MUT 2100 Counterpoint Cr. 2

Overall introduction to counterpoint with some emphasis on the style of J. S. Bach. Offered Fall.

Prerequisite: MUT 2140 with a minimum grade of C

MUT 2120 Jazz Theory and Harmony Cr. 3

Harmonic, rhythmic and melodic concepts used in jazz including basic chord nomenclature, non-tertian sonorities and advanced improvisation. Offered Winter.

Prerequisite: MUT 1160 with a minimum grade of C

MUT 2140 Theory III Cr. 3

Study of chromatic harmony and voice leading; introduction to complete tonal structures. Offered Fall.

Prerequisite: MUT 1160 with a minimum grade of C

MUT 2150 Ear Training III Cr. 1

Sight singing and dictation of chromatic materials; more advanced work with rhythm and meter. Offered Fall.

Prerequisite: MUT 1170 with a minimum grade of C

MUT 2160 Theory IV Cr. 3

Twentieth- and twenty-first century music; impressionistic techniques. Mainstream compositional devices of melody, harmony and rhythm; serial music, electronic music, aleatoric music, contemporary notation. Offered Winter.

Prerequisite: MUT 2140 with a minimum grade of C

MUT 2170 Ear Training IV Cr. 1

Sight singing and dictation of more advanced chromatic material; introduction to ear training with post-tonal music. Offered Winter.

Prerequisite: MUT 2150 with a minimum grade of C

MUT 2200 Beginning Composition III Cr. 2

Students continue to develop compositional skill and technique. Small groups and associated private lessons explore writing for specific instrument families and larger combinations than those explored in the first year. Offered Fall.

Prerequisite: MUT 1210 with a minimum grade of C

Restriction(s): Enrollment is limited to Undergraduate level students.

MUT 2210 Beginning Composition IV Cr. 2

Continuation of MUT 2200. Offered Winter.

Prerequisite: MUT 2200 with a minimum grade of C

Restriction(s): Enrollment is limited to Undergraduate level students.

MUT 2885 Jazz Improvisation I Cr. 1

Techniques of individual jazz improvisation. Offered Fall.

Prerequisite: MUT 1160 with a minimum grade of C and MUT 1170 with a minimum grade of C

Restriction(s): Enrollment is limited to students with a major in Music or Music Honors.

Repeatable for 2 Credits

MUT 2887 Jazz Improvisation II Cr. 1

Continuation of MUT 2885; emphasis on individual jazz improvisation skills. Offered Winter.

Prerequisite: MUT 2885 with a minimum grade of C

Restriction(s): Enrollment is limited to Undergraduate level students; enrollment is limited to students with a major in Music or Music Honors.

Repeatable for 2 Credits

MUT 3000 Orchestration Cr. 2

Practical course in arranging music for orchestra, including study of transposition, arrangements from a piano score; general treatment of range, relationship, timbre, balance of orchestral instruments. Offered Fall.

Prerequisite: MUT 2160 with a minimum grade of C and MUT 2170 with a minimum grade of C

MUT 3200 Intermediate Composition I Cr. 2

Emphasizes refinement and personalization of student compositional activity through private composition lessons. Offered Fall.

Prerequisites: MUT 2210 with a minimum grade of C

Restriction(s): Enrollment is limited to Undergraduate level students.

MUT 3210 Intermediate Composition II Cr. 2

Continuation of MUT 3200. Offered Winter.

Prerequisites: MUT 3200 with a minimum grade of C

Restriction(s): Enrollment is limited to Undergraduate level students.

MUT 3990 Directed Study Cr. 1-3

Individualized research and work in music theory or composition under the supervision of a faculty member. Offered Fall, Winter.

Restriction(s): Enrollment limited to students with a class of Junior or Senior.

Repeatable for 6 Credits

MUT 4200 Advanced Composition I Cr. 2

Creative writing in twentieth- and twenty-first century idioms. Aesthetic, stylistic and formal problems in private composition lessons employing contemporary techniques. Offered Fall.

Prerequisite: MUT 3210 with a minimum grade of C

Restriction(s): Enrollment is limited to Undergraduate level students.

Repeatable for 4 Credits

MUT 4210 Advanced Composition II Cr. 2

Continuation of MUT 4200. Offered Winter.

Prerequisites: MUT 4200 with a minimum grade of D-

Restriction(s): Enrollment is limited to Undergraduate level students.

Repeatable for 4 Credits

MUT 4990 BA Project Cr. 2

Directed study leading to completion of the B.A. project in music. Offered Fall, Winter.

Restriction(s): Enrollment limited to students with a class of Senior; enrollment is limited to students with a major in Music or Music Honors; enrollment limited to students in a Bachelor of Arts degree.

Equivalent: MUA 4990, MUH 4990

MUT 5060 Advanced Orchestration Cr. 3

Arranging and scoring for orchestra in all forms of ensemble structure. No credit for the M.Mus. in composition/theory degree. Offered Intermittently.

Prerequisite: MUT 3000 with a minimum grade of C

MUT 5085 History of Theory Cr. 3

Theoretical writings from Plato to Rameau to Schenker, in historical contexts. Offered for undergraduate credit only. Offered Intermittently.

Restriction(s): Enrollment is limited to Undergraduate level students.

MUT 5110 Jazz Arranging and Composition I Cr. 3

Creative writing for small jazz and pop ensembles. Arranging for three to five pieces including ""head"" arrangements, block chord technique and contrapuntal writing. No credit for M.Mus. in jazz performance degree. Offered Fall.

Prerequisite: MUT 2160 with a minimum grade of C and MUT 2170 with a minimum grade of C

MUT 5120 Jazz Arranging and Composition II Cr. 3

Creative writing for larger jazz and pop ensembles; jazz arranging for six to eighteen pieces combining various textures and timbres. No credit for M.Mus. in jazz performance degree. Offered Winter.

Prerequisite: MUT 5110 with a minimum grade of C

MUT 5130 Jazz Arranging and Orchestration Cr. 3

Arranging pieces with concentration on orchestrating for large jazz ensembles. No credit for M.Mus. in jazz performance degree. Offered Fall.

Prerequisite: MUT 5120 with a minimum grade of C

MUT 5200 Special Topics in Theory Cr. 3

In-depth study of such topics as set or serial theories, aesthetics and philosophies of musics, and recent theoretical developments. Student may repeat course when topic changes. Offered for undergraduate credit only. Offered Intermittently.

Prerequisite: MUT 5997 with a minimum grade of C

Equivalent: MUT 7200

Repeatable for 6 Credits

MUT 5220 Introduction to Schenkerian Analysis Cr. 3

Aesthetic premises and basic analytic procedures of tonal music, viewed from a Schenkerian perspective. Applications of graphic technique to short phrases and to larger forms (e.g., sonata) from a wide repertory (1700-1900). Offered for undergraduate credit only. Offered Every Other Year.

Prerequisite: MUT 5997 with a minimum grade of C

Restriction(s): Enrollment is limited to Undergraduate level students.

MUT 5240 Analysis of Twentieth-Century Music Cr. 3

Aesthetic and technical procedures of twentieth-century music. Applications of pitch-class set and interval analysis to short phrases and to large-scale organizational strategies of entire pieces. Offered for undergraduate credit only. Offered Every Other Year.

Prerequisite: MUT 5997 with a minimum grade of C

Restriction(s): Enrollment is limited to Undergraduate level students.

MUT 5280 Interactive Electronic Music Composition Cr. 3

Explores basic interactive electronic music composition using computer music software for sound. Offered Yearly.

MUT 5997 Analytical Techniques Cr. 3

Capstone course for Music Department. Structural analysis of tonal music in historical perspective. Credit not applicable to graduate degrees in music. Offered Winter.

Prerequisite: MUT 2160 with a minimum grade of C and MUT 2170 with a minimum grade of C and MUH 3330 with a minimum grade of C

MUT 7020 Seminar in Schenkerian Analysis Cr. 3

Aesthetic premises and basic analytic procedures of tonal music, viewed from a Schenkerian perspective. Applications of graphic technique to short phrases and to larger forms (e.g., sonata) from a wide repertory (1700-1900). Offered Every Other Year.

Restriction(s): Enrollment is limited to Graduate level students; enrollment is limited to students with a major in Music.

MUT 7040 Seminar in Twentieth Century Music Cr. 3

Analysis of twentieth-century music using current applications of post-tonal theories. Offered Every Other Year.

Restriction(s): Enrollment is limited to Graduate level students; enrollment is limited to students with a major in Music.

MUT 7050 Seminar in Music Theory Pedagogy Cr. 3

Study of materials, teaching techniques, philosophy and organization of music theory classes. Offered Intermittently.

Restriction(s): Enrollment is limited to Graduate level students; enrollment is limited to students with a major in Music.

MUT 7070 Advanced Jazz Theory and Analysis Cr. 3

Analysis and application of advanced harmonic, rhythmic and melodic concepts used in jazz improvisation and composition. Offered Every Other Year.

Restriction(s): Enrollment is limited to Graduate level students; enrollment is limited to students with a major in Music.

MUT 7085 History of Theory Cr. 3

Theoretical writings from Plato to Rameau to Schenker, in historical contexts. Offered Intermittently.

Restriction(s): Enrollment is limited to Graduate level students; enrollment is limited to students with a major in Music.

MUT 7100 Graduate Composition Cr. 3

Advanced creative work in all of the idioms of twenty-first century musical composition. Offered Fall, Winter.

Restriction(s): Enrollment is limited to Graduate level students; enrollment is limited to students with a concentration in Composition/Theory; enrollment limited to students in the Master of Music program.

Repeatable for 12 Credits

MUT 7200 Special Topics in Theory Cr. 3

In-depth study of such topics as set or serial theories, aesthetics and philosophies of music, and recent theoretical developments. Student may repeat course when topic changes. Offered Intermittently.

Restriction(s): Enrollment is limited to Graduate level students; enrollment is limited to students with a major in Music or Music Honors.

Equivalent: MUT 5200

Repeatable for 6 Credits

MUT 7992 Directed Study in Theory Cr. 1-3

Offered Fall, Winter.

Restriction(s): Enrollment is limited to Graduate level students.

Repeatable for 6 Credits

MUT 8999 Master's Thesis Direction Cr. 1-8

Preparation of M.M. thesis project in composition/theory. Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students with a class of Candidate Masters; enrollment limited to students in a Master of Music degree; enrollment limited to students in the Master of Music program.

Repeatable for 8 Credits

NE - NEAR EASTERN STUDIES

NE 1900 Comparative Religion Cr. 3

Origins of religion: its social importance, its structure (fetish, totemism, myth, ritual). Pre-historic religion and the major religious traditions. Offered Every Other Year.

NE 2000 Introduction to Islamic Civilization of the Near East Cr. 3

Satisfies General Education Requirement: Civ and Societies (CLAS only), Foreign Culture, Global Learning Inquiry

The origin of Islam; growth of Islamic thought and institutions; Islamic revival and reform in modern times. Offered Yearly.

NE 2010 The Bible and Ancient Mythology Cr. 3

Satisfies General Education Requirement: Cultural Inquiry, Civ and Societies (CLAS only)

The Bible and Biblical religion in the context of its antecedents in the ancient world. Offered Yearly.

NE 2030 The Age of Islamic Empires: 600-1600 Cr. 3

Satisfies General Education Requirement: Cultural Inquiry, Global Learning Inquiry, Historical Studies

Historical evolution of the Islamic world from birth of Islam to height of Ottoman Empire. Islamic history and civilization in a world-historical context; developments indigenous to specific regions, such as Islamic Spain. Offered Every Term.

Equivalent: HIS 1800

NE 2040 The Modern Middle East Cr. 3

Satisfies General Education Requirement: Cultural Inquiry, Global Learning Inquiry, Historical Studies

Survey of Middle East history in modern era, focusing on the nineteenth and twentieth centuries. Ottoman history from 1600: impact of European imperialism and nationalist movements, resulting in development of modern state systems, regional/national conflicts, and Islamic response to modernization. Offered Every Term.

Equivalent: HIS 1810

NE 2060 Hebrew/Israeli Film: Trends and Themes in Israeli Cinema Cr. 3

Satisfies General Education Requirement: Cultural Inquiry, Visual Performing Arts

Evolution of Hebrew/Israeli cinema from the beginning of the twentieth century to the present. Collectivism to individual concerns. From Yaakov Ben-Dov to Joseph Cedar. Course taught in English; films have English subtitles. Offered Every Term.

NE 2170 Islamic and Near Eastern Philosophy Cr. 3

Satisfies General Education Requirement: Global Learning Inquiry

An examination of major figures and movements in Islamic and Near Eastern philosophy. Offered Fall.

Equivalent: PHI 2170

NE 2700 Topics in Middle Eastern Studies Cr. 1-8

Specialized topics related to the Middle East: language, literature, etc. Offered Intermittently.

Repeatable for 8 Credits

NE 3010 Jewish History from the Bible to 1492 Cr. 4

Survey the history of the Jews from biblical antiquity until the Expulsion from Spain. Special attention will be paid to the world of the Hebrew Bible, the Jewish encounter with Hellenistic Civilization, the creation and triumph of Rabbinic Judaism, and Jewish life under Christian and Muslim Rule. Offered Intermittently.

Restriction(s): Enrollment is limited to Undergraduate level students.

Equivalent: HIS 3010

NE 3011 Jewish History since 1492 Cr. 3

Major developments in Jewish History since the expulsion of the Jews from Spain in 1492. Specific topics include the impact of the Spanish expulsion, the Jews of the Ottoman Empire, Jews and the Italian Renaissance, Martin Luther and the Jews, the golden age of Polish Jewry, 1648, Shabbetai Tzvi, Hassidic Judaism, the Court Jews and Age of Absolutism, the impact of the Enlightenment, the French Revolution and the Age of Emancipation, the twin birth of Reform and Orthodox Judaism, Anti-Semitism and the Dreyfus Affair, Zionism and other forms of Jewish Nationalism, Hitler and the Final Solution, the creation of the State of Israel, and Jews in Post-World War II America, Israel, Europe, and the Soviet Union. Offered Intermittently.

Restriction(s): Enrollment is limited to Undergraduate level students.

Equivalent: HIS 3011

NE 3015 History of Judaism and Jewish Thought Cr. 4

Development of Judaism and Jewish thought from early beginnings in the Hebrew Bible to contemporary American Jewish religious developments. Offered Intermittently.

Equivalent: HIS 3015

NE 3040 Twentieth Century Middle East Cr. 3

The contemporary Middle East; emphasis on social and economic development. Investigation of issues that identify the region, such as oil, gender issues, fundamentalism, and regional conflicts. Offered Every Term.

Equivalent: HIS 3320

NE 3061 Oral History in Middle Eastern Tradition Cr. 3

Methodologies, techniques and applications of oral history used as tools to investigate modern social history of Middle Eastern societies. Offered Every Other Year.

Equivalent: ANT 3061

NE 3225 Modern Israeli Culture: A Pluralistic Perspective Cr. 3

Satisfies General Education Requirement: Foreign Culture, Global Learning Inquiry

Minorities in Israel; the Kibbutz; women in public life; the Arab in Israeli literature; the press; education; technology; archaeology; music and dance. Taught in English. Offered Every Term.

NE 3320 Muhammad: Life of the Prophet Cr. 3

Introduction to the historical Muhammad in context of religious, political, social and economic life of seventh century Arabia. Aspects of his career, from religious to secular, including his relationship with other religious communities. Offered Every Other Year.

NE 3520 Women and Gender in Middle East History Cr. 3

Women's role in Middle East history; impact of religion, culture, social and economic change on construction of gender in the Middle East. Offered Intermittently.

Equivalent: GSW 3520

NE 3550 Arab Society in Transition Cr. 3

Satisfies General Education Requirement: Diversity Equity Incl Inquiry, Foreign Culture, Global Learning Inquiry

Distinctive social and cultural institutions and processes of change in the Arab Middle East. Regional variations: background and discussion of current political and economic systems and their relations to international systems. Offered Intermittently.

Equivalent: ANT 3550

NE 3990 Directed Study Cr. 1-3

Readings; consultations and reports. Offered Every Term.

Repeatable for 9 Credits

NE 5000 Globalization, Social History and Gender in the Arabian Gulf Cr. 3
Social history of the Arabian Gulf (especially Bahrain, Qatar, and the UAE) in the age of globalization. Contemporary history with special emphasis on gender relations as an index of current social developments in the region. Offered Every Other Year.
Equivalent: HIS 5960

NE 5100 Teaching of Arabic as a Foreign/Second Language (TAFL) Cr. 3
Theoretical and conceptual framework of second language learning. Proper training in pedagogy as related to learning Arabic as a foreign/second language. Offered Yearly.
Equivalent: ARB 5100, LIN 5110

NE 5110 History and Development of Islamic Political Thought Cr. 3
Historical analysis of political Islam through study of the precepts and historical vicissitudes impacting the Islamic world from within and from external forces. Offered Every Other Year.
Prerequisites: NE 2030 with a minimum grade of D- and NE 3040 with a minimum grade of D-
Equivalent: PS 5760

NE 5210 Arabic Sociolinguistics Cr. 3
Arabic dialectology; Arabic as a minority language in contact. Theories and techniques developed outside Arabic, and their applicability to Arabic situations. Offered Fall.
Equivalent: ARB 5210, LIN 5210

NE 5220 Muslim Personal Law Cr. 3
Study of Muslim family law, with attention to the status of women and children in the law. Areas include: betrothal, marital contracts, forms of marital dissolution, laws of inheritance, and child custody. Focus on classical interpretation of the law, and its application in modern times. Offered Intermittently.

NE 5230 Structure of Arabic Cr. 3
Survey of historical constitution and theoretical structure of Arabic. Offered Yearly.
Equivalent: ARB 5230, LIN 5230

NE 5300 Quran: History and Interpretation Cr. 3
Traditional and revisionist narratives of the canonization of the Quran; textual features of the Quran; history of quranic hermeneutics and exegesis Offered Yearly.

NE 5700 Topics in Middle Eastern Studies Cr. 1-4
Special topics in Middle Eastern politics, language, and literature. Offered Yearly.
Repeatable for 8 Credits

NE 5710 Islam and the Challenge of Modernity Cr. 3
Influence of Enlightenment values and colonial institutions on the social, political, and ideological structures of the Islamic World. Offered Every Other Year.

NE 5990 Directed Study Cr. 1-3
Offered Every Term.
Repeatable for 9 Credits

NE 5993 Writing Intensive Course in Near Eastern and Asian Studies Cr. 0
Satisfies General Education Requirement: Writing Intensive Competency Disciplinary writing assignments under the direction of a faculty member. Must be selected in conjunction with a designated corequisite; see section listing in Schedule of Classes for corequisites available each term. Satisfies the University General Education Writing Intensive Course in the Major requirement. Required for all majors. Offered Every Term.
Prerequisites: AFS 2390 with a minimum grade of C or ENG 2390 with a minimum grade of C or ENG 3010 with a minimum grade of C or ENG 3020 with a minimum grade of C or ENG 3050 with a minimum grade of C
Restriction(s): Enrollment is limited to Undergraduate level students.

NE 5999 Internship in Near Eastern Studies Cr. 3
Internship in a public or private organization related to Near Eastern studies. Offered for undergraduate credit only. Offered Every Term.
Restriction(s): Enrollment is limited to students with a major, minor, or concentration in Near Eastern Languages , Near Eastern Languages Honors, Near Eastern Studies or Near Eastern Studies Honors.

NE 6031 Methodologies and Research in Oral History: Near Eastern and Asian Societies Cr. 3
Techniques, methodologies and legalities of studying and interpreting alternative data for historical research. Social and cultural sensitivities of Near Eastern and Asian societies and the gathering of historical information through oral research. Offered for graduate credit only. Offered Every Other Year.
Restriction(s): Enrollment is limited to Graduate level students.

NE 6500 Religion and Society Cr. 3
Role of religion in societies from ancient to contemporary times. Religion as related to science, violence, patriarchy, feminism, art, government, ethics, and issues of religious pluralism. Offered Every Other Year.

NE 7010 Introduction to Literary Theory Cr. 3
Graduate-level introduction to key critical perspectives, theories, problems, and questions that have informed the discussions and analyses of twentieth- and twenty-first-century literary and cultural scholars. Specific theoretical paradigms used to determine the task of textual interpretation, locate the limits of each approach, trace the emergence of subsequent theoretical paradigms, and think about how such theories might or might not be relevant in the study of specific texts. Offered Every Other Year.
Restriction(s): Enrollment is limited to Graduate level students.
Equivalent: CLA 7010, FRE 7010, GER 7010, ITA 7010, SLA 7010, SPA 7010

NE 7100 Islam and the West Cr. 3
Areas covered include: emergence of Muslim political power in seventh century Middle East; Iberian Peninsula and religious pluralism; Crusades and their impact on religion and society in Middle East; colonialism and transfer of Enlightenment values to Islamic world; Muslim migration to Europe and America. Offered Every Other Year.
Restriction(s): Enrollment is limited to Graduate level students.

NE 7300 Qur'an: History and Interpretation Cr. 3
Traditional and revisionist narratives of the canonization of the Qu'ran; textual features of the Qu'ran; history of qur'anic hermeneutics and exegesis Offered Yearly.
Restriction(s): Enrollment is limited to Graduate level students.

NE 7999 Master's Essay Direction Cr. 1-3
Offered Every Term.
Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students with a class of Candidate Masters.

NE 8999 Master's Thesis Research and Direction Cr. 1-8
Offered Every Term.
Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students with a class of Candidate Masters.
Repeatable for 8 Credits

NEN - NANOENGINEERING

NEN 5000 Introduction to Nanotechnology and Nanomedicine Cr. 4

Basic understanding of nanomaterials synthesis, characterization, manufacturing methods, and their biomedical applications. Offered Winter.

Prerequisites: BE 1300 with a minimum grade of D- or BE 1310 with a minimum grade of D-

NEN 5100 Nanoengineering Lab Cr. 2

Hands-on experience in the synthesis and characterization of nanomaterials, as well as device fabrication and biomedical applications. Offered Winter.

Corequisite: NEN 5000

Course Material Fees: \$100

NEN 5200 Scale-down Engineering - from Engineered Systems to Nanotechnology Cr. 4

Basic understanding of scale-down engineering in a wide range of systems including sensors, drug delivery, manufacturing, electromagnetic materials, and imaging. Offered Fall.

Prerequisites: BE 1300 or BE 1310 and NEN 5000

NEN 5300 Nanoengineering Research and Capstone Design Cr. 4

Formulation and solution of open-ended research problems related to nanomaterials and nanotechnology using current methods, tools and principles of nano-engineering. Offered Winter.

Prerequisites: NEN 5000 with a minimum grade of D- and NEN 5100 with a minimum grade of D- and NEN 5200 with a minimum grade of D-

NEN 5400 Nanoengineering Seminar Cr. 1

State-of-the-art research in nanotechnology by attending seminars given by nationally and internationally prominent. Offered Fall, Winter.

Prerequisites: BE 1300 with a minimum grade of D- or BE 1310 with a minimum grade of D-

NFS - NUTRITION AND FOOD SCIENCE

NFS 2030 Nutrition and Health Cr. 3

Satisfies General Education Requirement: Life Sciences, Natural Scientific Inquiry

Food as a carrier of nutrients; food availability; nutrient utilization including digestion, metabolism and excretion. Patterns of food consumption based on biological, psychological and social needs; and anthropological findings. Offered Every Term.

Repeatable for 6 Credits

NFS 2130 Introductory Food Science Cr. 3

Chemical, physical and biological properties of foods which affect their keeping quality, nutritional and organoleptic values. For students interested in the scientific study of foods. Offered Every Term.

NFS 2140 Introductory Food Science Laboratory Cr. 1

Experimental study of principles discussed in NFS 2130. For students interested in the scientific study of food. Offered Every Term.

Prerequisite: NFS 2130 with a minimum grade of C-

Course Material Fees: \$90

NFS 2220 Nutrition Laboratory Cr. 1

Laboratory course for introductory nutrition. Meets General Education Laboratory requirement. Offered Every Term.

Prerequisites: May be taken concurrently: NFS 2030 with a minimum grade of C- or NFS 3230 with a minimum grade of C-

Course Material Fees: \$90

NFS 3230 Human Nutrition Cr. 3-4

Principles of the science of nutrition. Emphasis on physiological requirements as well as biochemical and metabolic processes of nutrients for human growth, development and maintenance within the life cycle. Honors students participate in additional reading, discussion and presentations. Offered Every Term.

Prerequisites: NFS 2030 with a minimum grade of C-

NFS 3270 Eating Disorders Cr. 3

Causes and treatments of anorexia nervosa, bulimia nervosa, binge eating, and overeating, from biological, psychological, and social perspectives. Offered Winter.

Prerequisite: PSY 1010 with a minimum grade of C- or PSY 1020 with a minimum grade of C-

NFS 3300 Science, History, and Culture of Italian Cuisine Cr. 3

Satisfies General Education Requirement: Cultural Inquiry, Global Learning Inquiry

Explores the science, history, and culture of Italian food and the Mediterranean Diet, and how Italian food culture has evolved throughout the centuries. Taught in English. Offered Yearly.

Equivalent: ITA 3300

NFS 4100 Nutrition Care Process I Cr. 2

Introduction to management of nutrition care in both healthy and ill people throughout the life span using the Nutrition Care Process model, developed by the Academy of Nutrition and Dietetics. Emphasis is on the Registered Dietitian's role in the four steps of the process, nutrition assessment, diagnosis, intervention, and monitoring and evaluation. The process covers identification of nutrition-related problems in patients, planning intervention to solve their nutrition problems and reduce nutrition-related health risks associated with chronic disease. Offered Fall.

Prerequisite: NFS 3230 with a minimum grade of C- and NFS 5220 (may be taken concurrently) with a minimum grade of B- and NFS 5350 (may be taken concurrently) with a minimum grade of B-

Restriction(s): Enrollment limited to students in a PBC in Dietetics degree.

Course Material Fees: \$90

NFS 4120 Nutrition Care Process II Cr. 2

In-depth and simulation-based application of the steps of the Nutrition Care Process, including nutritional assessment, interpretation of biochemical parameters, drug-nutrient interactions, planning therapeutic diets, documenting in the medical record, and patient interviewing. Offered Winter.

Prerequisite: NFS 4100 with a minimum grade of B- and NFS 5250 (may be taken concurrently) with a minimum grade of B-

Restriction(s): Enrollment limited to students in a PBC in Dietetics degree.

NFS 4150 Advanced Food Science Cr. 3

Satisfies General Education Requirement: Writing Intensive Competency Principles of food science such as: chemical ingredients of food, issues in food product development, sensory evaluation, and microbiological safety of food. Lab provides hands-on experience and enhances understanding of major issues in the overall quality and safety of food. Offered Winter, Spring/Summer.

Prerequisites: BIO 2200 with a minimum grade of D- and NFS 2130 with a minimum grade of C-

Restriction(s): Enrollment is limited to Undergraduate level students.

Course Material Fees: \$90

NFS 4160 Food Laws and Regulations Cr. 3

State, federal and international food law; interpretations of regulatory food standards and determination of conformity of food products to them. Methods of food inspection. Role of the food law in assuring food safety, wholesomeness and nutritional quality. Offered Fall, Spring/Summer.

Prerequisite: NFS 2030 with a minimum grade of C- or NFS 3230 with a minimum grade of C-

NFS 4200 Dietetic Practice I Cr. 4

Supervised practice in various dietetic services venues. Offered Winter.

Prerequisite: NFS 4100 with a minimum grade of B- and NFS 4120 (may be taken concurrently) with a minimum grade of B-

Restriction(s): Enrollment limited to students in a PBC in Dietetics degree.

Course Material Fees: \$400

NFS 4210 Dietetic Practice II Cr. 10

Satisfies General Education Requirement: Writing Intensive Competency Supervised practice in specialty and critical care areas and in community settings; experiences in developing, implementing, evaluating and documenting care plans for individuals needing specialized nutrition support and nutrition education programs for health promotion and for high risk groups. Offered Fall.

Prerequisite: NFS 4100 with a minimum grade of B- and NFS 4120 with a minimum grade of B- and NFS 5250 with a minimum grade of B- and NFS 5200 (may be taken concurrently) with a minimum grade of B-

Restriction(s): Enrollment limited to students in a PBC in Dietetics degree.

Course Material Fees: \$700

NFS 4220 Dietetic Practice III Cr. 10

Supervised practice in various specialty, critical care, and long-term care areas and/or in community settings. Experiences in developing, implementing, evaluating and documenting care plans for individuals needing nutrition care and specialized nutrition support, and nutrition education programs for health promotion and for high risk groups. Offered Winter.

Prerequisite: NFS 4210 with a minimum grade of B- and NFS 5360 (may be taken concurrently) with a minimum grade of B-

Restriction(s): Enrollment limited to students in a PBC in Dietetics degree.

Course Material Fees: \$700

NFS 4230 Macronutrient Metabolism Cr. 3

Focus on normal human nutrition and physiological functions. Biochemical properties of macronutrients and their interrelationships at the cellular and subcellular level. Offered Fall.

Prerequisites: NFS 2130 with a minimum grade of C- and NFS 3230 with a minimum grade of C- and CHM 1240 with a minimum grade of D

Restriction(s): Enrollment is limited to Undergraduate level students.

NFS 4231 Human Nutrition: Micronutrients Cr. 3

Principles of micronutrient metabolism, including function, toxicity, and deficiency; principles and techniques for assessing micronutrient status. Micronutrients in the physiopathology of chronic disease; sources of micronutrients and factors affecting nutrient bioavailability. Impact of disease and/or genetics on nutrient function and nutrient requirement; role of fortification, enrichment, and/or supplementation of micronutrients in the food supply and on health outcomes. Offered Winter.

Prerequisites: NFS 2130 with a minimum grade of C- and NFS 3230 with a minimum grade of C- and CHM 1240 with a minimum grade of D

NFS 4800 Special Topics in Nutrition and Food Science Cr. 1

New and emerging topics in nutrition and food science or topics presented by a visiting faculty member in his or her research area. Topics to be announced in Schedule of Classes. Offered Intermittently.

Prerequisites: BIO 1050 with a minimum grade of D- or BIO 2870 with a minimum grade of D- and NFS 2030 with a minimum grade of D-

Restriction(s): Enrollment is limited to Undergraduate level students.

NFS 4990 Directed Study Cr. 1-4

Offered Every Term.

Repeatable for 4 Credits

NFS 5130 Food Chemistry Cr. 3

Study of the chemical constituents of foods, their relationship to the biological and physical properties, and overall food quality. Offered Fall, Winter.

Prerequisites: CHM 2220 with a minimum grade of C- (must be taken at WSU) and NFS 2130 with a minimum grade of C-

NFS 5140 Laboratory Techniques in Nutrition and Food Science Cr. 3

Satisfies General Education Requirement: Writing Intensive Competency Basic modern and classical analytical techniques and instruments in nutrition and food science. Background theory to principles of instrumental assays. Procedures for evaluation of macro and micro food components analysis. Physiological functions relevant to nutrition. Offered Fall.

Prerequisites: CHM 2220 with a minimum grade of D and NFS 2130 with a minimum grade of C- and NFS 2220 with a minimum grade of C-

Course Material Fees: \$90

NFS 5170 Nutrition, Physical Activity, and the Brain Cr. 3

Neurobehavioral responses and adaptations to dietary constituents and physical activity/inactivity. Offered Fall.

Prerequisite: NFS 3230 with a minimum grade of C- and (BIO 2870 with a minimum grade of C- or BIO 2600 with a minimum grade of C-) and BIO 3200 with a minimum grade of C- and PSY 3330 with a minimum grade of C-

NFS 5200 Advanced Dietetics Cr. 3

Development and refinement of dietetic practitioner skills through application in critical care and specialty practice areas such as nutrition support, renal, oncology, pulmonary, stress and trauma. Offered Fall.

Prerequisite: NFS 4100 with a minimum grade of B- and NFS 4120 with a minimum grade of B- and NFS 5250 with a minimum grade of B- and NFS 4210 (may be taken concurrently) with a minimum grade of B-

Restriction(s): Enrollment limited to students in a PBC in Dietetics degree.

Course Material Fees: \$90

Equivalent: NFS 4200

NFS 5220 Community Nutrition Cr. 2

Introduction to management of nutritional care in healthy and at-risk persons throughout the lifespan. Identifying problems and planning interventions to meet population nutritional problems and to reduce nutrition-related health risks in community settings. Community assessment; organization and function of community agencies; interventions appropriate to small and large groups, including nutrition education. Offered Fall, Spring/Summer.

Prerequisite: NFS 2130 with a minimum grade of C- and NFS 2140 with a minimum grade of C- and NFS 3230 with a minimum grade of C-

NFS 5230 Nutrition and Metabolism Cr. 3

The physio-biochemical properties of nutrients and their bionutritional interrelationships at the cellular and sub-cellular level. Carbohydrate, protein, and lipid metabolism and the role of vitamins and minerals in these metabolic processes. Offered Fall, Winter.

Prerequisites: NFS 3230 with a minimum grade of C-

NFS 5250 Nutrition and Disease Cr. 4

Application of the principles of biochemistry and physiology in the study of nutrient metabolism as altered by disease. The physio-biochemical basis for diet in the treatment of disease. Offered Winter, Spring/Summer.

Prerequisites: NFS 4230 with a minimum grade of C- and NFS 4231 with a minimum grade of C-

NFS 5350 Organization and Management of Food Service Systems Cr. 4

Survey of food service systems; factors affecting their successful operation. Components of quality assurance supporting well-being of target markets. Identification of operative management skills. Offered Fall.

Prerequisite: NFS 2130 with a minimum grade of C- and NFS 2140 with a minimum grade of C- and NFS 3230 with a minimum grade of C- and MGT 2350 with a minimum grade of C-

NFS 5360 Management of Nutritional Care and Services Cr. 3

Application of management theory and principles in the three areas of dietetic practice; career planning and professional role development.

Offered Winter.

Prerequisite: NFS 5200 with a minimum grade of B- and NFS 4220 (may be taken concurrently) with a minimum grade of B-

Restriction(s): Enrollment limited to students in a PBC in Dietetics degree.

NFS 5990 Honors Directed Study Cr. 1-4

Offered for undergraduate credit only. Offered Every Term.

Restriction(s): Enrollment is limited to Undergraduate level students; enrollment is limited to students with a major in Nutrition and Food Science Hon.

Repeatable for 6 Credits

NFS 5992 Supervised Field Experience Cr. 2-4

Supervised field experience designed to correlate classroom theory with practical work. Offered Every Term.

NFS 5996 Research in Food Science and Nutrition Cr. 1-4

Research projects under direction of faculty active in research. Offered for undergraduate credit only. Offered Every Term.

Restriction(s): Enrollment is limited to Undergraduate level students; enrollment limited to students with a class of Unranked Undergrad, Freshman, Sophomore, Junior or Senior.

Repeatable for 6 Credits

NFS 6000 Nutritional Biochemistry Cr. 3

Biochemical effects of nutrients at cellular and organ levels. Offered for graduate credit only. Offered Fall.

Restriction(s): Enrollment is limited to Graduate level students.

NFS 6020 Nutrient and Gene Interaction Cr. 3

Introduction to molecular genetics concepts, terminology and molecular methodologies, with emphasis on nutrition and food science. Overview of nutrition and gene interaction in onset and progression of disease, cancer, and aging. Offered for graduate credit only. Offered Every Other Year.

Prerequisites: NFS 5130 with a minimum grade of C- and NFS 5140 with a minimum grade of C- and NFS 5230 with a minimum grade of C-

Restriction(s): Enrollment is limited to Graduate level students.

NFS 6030 Microbiological Safety of Foods Cr. 3

Food-borne microorganisms as causes of human illnesses, including bacteria, mold, viruses and parasites. Microbial toxins and their mode of action. Antimicrobial agents in food. Means of prevention and protection. Offered Fall.

Prerequisites: NFS 4150 with a minimum grade of C- and NFS 5130 with a minimum grade of C-

NFS 6150 Functional Foods for Health Cr. 3

Introduction to functional foods (those with specific health benefits) and nutraceuticals, as well as a variety of functional food ingredients and extracts, their chemical and potential health promoting properties, processing, production, safety and regulation. Offered Winter.

Prerequisite: NFS 2030 with a minimum grade of D- and NFS 2130 with a minimum grade of D- and NFS 3230 with a minimum grade of D-

Restriction(s): Enrollment is limited to Graduate level students.

NFS 6210 Nutrition through the Life Cycle Cr. 3

Biological growth and nutritional requirements from fetal stages of development through aging. Nutritional standards in light of current epidemiological data and scientific research. Offered for graduate credit only. Offered Intermittently.

Prerequisites: NFS 5230 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

NFS 6230 Nutrition and Physical Performance Cr. 3

How nutrients affect physical fitness and physical performance; how physical performance can be improved by adopting optimal dietary practice and how exercise and optimal nutrition can prevent human diseases. Offered Fall.

Prerequisites: NFS 4230 with a minimum grade of C- and NFS 4231 with a minimum grade of C-

NFS 6270 Eating Behavior and Body Weight Regulation Cr. 3

Central and peripheral regulation of food intake, normal and abnormal eating behavior, physiological and psychological regulation of body weight, different models of obesity, etiology of treatment of obesity. Offered Winter.

Prerequisite: BIO 2870 with a minimum grade of C-

NFS 6850 Controversial Issues Cr. 2

Topics to be announced in Schedule of Classes. Offered Fall.

Prerequisite: NFS 5230 with a minimum grade of C-

Restriction(s): Enrollment is limited to students with a major in Nutrition and Food Science or Nutrition and Food Science Hon.

NFS 6860 Controversial Issues in Clinical Nutrition: Dietetics Cr. 2

Current controversial topics; differing points of view will be debated; discussion of modes of communication of nutrition information. Offered Winter.

Prerequisite: NFS 5230 with a minimum grade of D-

Restriction(s): Enrollment is limited to students with a major in Dietetics; enrollment limited to students in the BS in Dietetics or PBC in Dietetics programs.

NFS 7000 Nutritional Metabolomics and Bioinformatics Cr. 3

Introduction to and application of the ""omics"" technologies to nutrition: genomics, proteomics, and metabolomics. Examples and exercises using bioinformatic software for multivariate data analyses. Offered Winter.

Prerequisite: NFS 6000 with a minimum grade of C- and STA 1020 with a minimum grade of C-

Restriction(s): Enrollment is limited to Graduate level students.

Course Material Fees: \$90

NFS 7060 Research Problems in Nutrition and Food Science Cr. 2

Research orientation: acquaintance with published data, principles of design, methods of collecting data, and basic statistical analysis. Offered Every Other Year.

Restriction(s): Enrollment is limited to Graduate level students.

NFS 7140 Advanced Laboratory Techniques in Nutrition and Food Science Cr. 4

Laboratory techniques in nutrition and food science research, including: animal experimentation, isotope use and quantitation, radioimmunoassay and receptor assays, atomic absorption; chromatography; microbial assays. Offered Yearly.

Prerequisite: (BMB 5010 with a minimum grade of C- or CHM 5600 with a minimum grade of C-) and NFS 5140 with a minimum grade of C-

Restriction(s): Enrollment is limited to Graduate level students.

Course Material Fees: \$90

NFS 7170 Nutrition, Physical Activity, and the Brain Cr. 3

Neurobehavioral responses and adaptations to dietary constituents and physical activity/inactivity. Offered Fall.

Prerequisite: NFS 6000 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

NFS 7230 Nutrition and Physical Performance Cr. 3

How nutrients affect physical fitness and physical performance; how physical performance can be improved by adopting optimal dietary practice and how exercise and optimal nutrition can prevent human diseases. Offered Fall.

Prerequisite: NFS 5230 with a minimum grade of C-

Restriction(s): Enrollment is limited to Graduate level students.

NFS 7240 Nutritional Epidemiology Cr. 3

Introduction to epidemiology concepts and terminology. Emphasis on examining the associations between nutrition and chronic disease.

Offered Intermittently.

Prerequisite(s): NFS 2210 with a minimum grade of C-

Restriction(s): Enrollment is limited to Graduate level students.

NFS 7250 Nutrition and Aging Cr. 3

Topics include: conserved pathways determining longevity and the role of nutrition in these pathways; role of metabolic/nutritional factors on longevity and successful aging; premature aging disorders; interventional strategies impacting longevity and health span. Offered Fall.

Restriction(s): Enrollment is limited to Graduate level students.

NFS 7850 Graduate Seminar Cr. 1

Presentations by graduate students, graduate faculty, and visiting scientists. Offered Fall, Winter.

Restriction(s): Enrollment is limited to Graduate level students.

NFS 7890 Advanced Workshop Cr. 2-4

Application of theoretical principles to selected areas of nutrition and food science. Topics and prerequisites to be announced in Schedule of Classes. Offered Intermittently.

Restriction(s): Enrollment is limited to Graduate level students.

Repeatable for 8 Credits

NFS 7990 Directed Study Cr. 1-4

Offered for each area of specialization. Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students.

Repeatable for 4 Credits

NFS 7991 Lab Rotation Cr. 1

For new graduate students; students spend at least two weeks in all research labs. Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students.

NFS 7996 Research Cr. 1-8

Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students.

Repeatable for 20 Credits

NFS 7999 Master's Essay Direction Cr. 1-3

Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students with a class of Candidate Masters.

Repeatable for 3 Credits

NFS 8999 Master's Thesis Research and Direction Cr. 1-8

Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students with a class of Candidate Masters.

Repeatable for 8 Credits

NFS 9990 Pre-Doctoral Candidacy Research Cr. 1-8

Research in preparation for doctoral dissertation. Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students.

Repeatable for 12 Credits

NFS 9991 Doctoral Candidate Status I: Dissertation Research and Direction Cr. 7.5

Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students.

NFS 9992 Doctoral Candidate Status II: Dissertation Research and Direction Cr. 7.5

Offered Every Term.

Prerequisite: NFS 9991 with a minimum grade of S

Restriction(s): Enrollment is limited to Graduate level students.

NFS 9993 Doctoral Candidate Status III: Dissertation Research and Direction Cr. 7.5

Offered Every Term.

Prerequisite: NFS 9992 with a minimum grade of S

Restriction(s): Enrollment is limited to Graduate level students.

NFS 9994 Doctoral Candidate Status IV: Dissertation Research and Direction Cr. 7.5

Offered Every Term.

Prerequisite: NFS 9993 with a minimum grade of S

Restriction(s): Enrollment is limited to Graduate level students.

NFS 9995 Candidate Maintenance Status: Doctoral Dissertation Research and Direction Cr. 0

Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students.

Course Material Fees: \$370.26

Repeatable for 0 Credits

NUR - NURSING

NUR 2010 Health Assessment: History Taking and Physical Examination Cr. 3

Foundational learning experiences for understanding and performing the health assessment of the individual; includes systematic history-taking and physical examination. Holistic health assessment from health promotional, cultural, nutritional, mental health, and developmental perspectives. Assessment approaches of various nurse theorists. Offered Fall.

Course Material Fees: \$25

NUR 2030 Pathophysiology Related to Nursing Practice Cr. 3

Exploration of processes by which disease occurs, body responses, and effects of diseases on normal physiology. Diseases explored in terms of definition, diagnosis, etiology, epidemiology, clinical manifestations, cultural and socioeconomic factors, and contemporary research. Offered Fall.

NUR 2050 Supportive Measures for Basic Care Needs Cr. 5

Supportive nursing care strategies for individuals in the context of family and community. Emphasis on scientific basis of supportive care, critical thinking and nursing process, development of basic nursing care skills, therapeutic communication, and understanding of cultural context. Offered Fall, Winter.

Prerequisites: NUR 2010 with a minimum grade of C and NUR 2030 with a minimum grade of C and NUR 2060 with a minimum grade of C and may be taken concurrently; NUR 2995 with a minimum grade of C

Course Material Fees: \$85

NUR 2060 Nursing Implications of Drug Administration Cr. 3

Concepts of pharmacotherapeutics across the life cycle: theories of drug actions mediating physiological processes, variables affecting drug actions, and unusual and adverse reactions. Development of nursing role incorporating principles of safe, therapeutic, legal, and ethical principles. Psychological and cultural variations addressed. Contemporary research explored. Pharmacological math competency required. Offered Fall.

Prerequisite: BIO 2870 with a minimum grade of C

NUR 2070 Professional Nursing in the Future: Strategies for Health Promotion Cr. 3

Preparation for professional practice; emphasis on developing knowledge and skills for health promotion within the context of groups and the community. Impact of nursing theories and research on practice, directed toward health promotion issues. Strategies for health promotion; focus on group process and teaching/learning. Offered Fall.

Restriction(s): Enrollment is limited to Undergraduate level students; enrollment limited to students in the College of Nursing.

NUR 2995 Foundations of Professional Nursing Cr. 3

Characteristics of nursing as a profession: ethical, legal, and professional governing structures; foundation for effective communication and documentation. Nursing process as it applies to health promotion; problem-based care in the health care arena. The phenomenon of health as experienced by individuals across the lifespan in family, group, and community. Offered Fall.

Prerequisite: PSY 2400 with a minimum grade of C

Restriction(s): Enrollment limited to students in the College of Nursing.

NUR 3005 Integrated Pathophysiology and Pharmacology for Nursing Practice: Advanced Concepts Cr. 4

Alterations in normal physiological functioning that occur as a result of a disease process and integrates concepts of pharmacological mechanisms employed as therapy. Current theories of pathophysiological mechanisms are discussed in-depth. Theories of drug actions, physiological processes mediating drug actions, variables affecting drug actions, and beneficial, unusual and adverse drug therapy responses are also examined. Offered Fall, Spring/Summer.

NUR 3010 Restorative Care of Adults and Elders with Acute Illness Cr. 5
Theory and practice in providing nursing care to adults throughout the lifespan experiencing acute disruptions in living patterns within the context of their families and in a community-based systems of health care. Emphasis on practice within a theoretical framework using research-based interventions. Offered Fall, Winter.

Prerequisite: NUR 2050 with a minimum grade of C and NFS 3230 with a minimum grade of C

NUR 3015 Restorative Care: Psychiatric Mental Health Nursing Across the Lifespan Cr. 5

Nursing care to individuals experiencing emotional crises and/or acute chronic psychiatric illnesses within the context of their families and communities. Biosocial theories of mental health and illness, determinants of mental illness; cultural and socioeconomic factors and psychotherapeutic modalities. Public and private systems of care for mental health promotion, restoration, and rehabilitation. Offered Fall, Winter.

Prerequisite: NUR 2050 with a minimum grade of C

Restriction(s): Enrollment limited to students with a class of Junior or Senior.

NUR 3020 Restorative Care of Adults and Elders with Chronic Illness Cr. 5

Theory and practice in providing nursing care to adults throughout the adult lifespan experiencing chronic disruptions in living patterns within the context of their families in a community based system of healthcare. Offered Winter, Spring/Summer.

Prerequisite: NUR 3010 with a minimum grade of C

NUR 3200 Global Healthcare Cr. 3

Satisfies General Education Requirement: Global Learning Inquiry, Social Inquiry

Explores health care challenges worldwide while examining intercultural beliefs systems. Examines issues related to health disparities among vulnerable populations in urban environments nationally and globally. Students will travel abroad during spring break to experience first-hand the healthcare issues and disparities internationally. Students must have valid passports and pay the Office of Study Abroad required travel fees prior to course start date. Offered Winter.

NUR 3400 Introduction to Nursing Research Cr. 2

Introduction to the research process and research utilization in nursing practice. Research problems, access and retrieval of research literature and databases, reading and critiquing research studies, and individual and organizational strategies to promote research-based practice. Offered Winter, Spring/Summer.

Prerequisite: NUR 2050 with a minimum grade of C

NUR 3405 Introduction to Nursing Research and Evidence-Based Practice Cr. 3

Provides basic information about nursing research problems; principles of evidence-based nursing research, access and retrieval of research literature and databases; reading and critiquing research reports; ethical issues related to research; and individual strategies and organizational mechanisms to promote research-based practice. The research process is examined as a foundation for critical thinking and scholarship. Offered Fall.

NUR 4010 Integrative Care of Children and Their Families Cr. 5

Theory and practice in care of children in various states of health in the context of their families. Emphasis on knowledge of age-appropriate normal biological, physical, psychosocial, cognitive, moral, spiritual, and social development as a basis for implementing health promotion, supportive, and restorative practices with children of all ages in the context of their families in community-based systems of health care. Offered Fall, Spring/Summer.

Prerequisite: NUR 2050 with a minimum grade of C

Restriction(s): Enrollment limited to students with a class of Junior or Senior.

NUR 4020 Integrative Care of the Perinatal Family Cr. 5

Theory and practice in care of the perinatal family: woman, fetus, newborn, and other members from preconception to postpartum and newborn in the first month of life. Emphasis on integrative care: health assessment, risk assessment, health promotion, supportive and restorative care of the woman and the family. Exploration of ethical and consumer movement effects on prenatal care. Offered Fall, Spring/Summer.

Prerequisite: NUR 2050 with a minimum grade of C-

Restriction(s): Enrollment limited to students with a class of Junior or Senior.

NUR 4040 Leadership and Management in Nursing Practice Cr. 4

Theory and skill development in leadership processes in nursing practice. Assessment of a health care system, analysis of nurses' roles, organizational design systems theory, leadership and management theory, culture, decision-making, delegation, conflict management, and planned change. Offered Fall.

NUR 4050 Theory of Caring for Complex, Critically Ill Patients Cr. 3

An opportunity for the student to integrate knowledge of anatomy, physiology, pathophysiology and pharmacology in the care of patients with complex acute illnesses. Fosters the advancement of critical reasoning, clinical knowledge, and clinical judgment through case studies, lecture and group discussions. Offered Fall, Winter.

Prerequisite: NUR 3010 with a minimum grade of C and NUR 3020 with a minimum grade of C

NUR 4060 Synthesis of Core Nursing Knowledge Cr. 5

Precepted, integrative clinical immersion course that integrates the knowledge of ethics, standards, and expectations of professional nursing roles with an emphasis on critical thinking. The student will have an opportunity to synthesize foundational concepts and master competencies and skills of the advanced beginner in professional nursing. The focus is on integration of professional nursing behaviors within a complex organizational environment, and synthesis of core nursing knowledge. Offered Fall, Winter.

Prerequisites: May be taken concurrently: NUR 4040 and May be taken concurrently: NUR 4120 and May be taken concurrently: NUR 4050

NUR 4120 Community Focused Nursing Practice Cr. 5

Analysis of role of professional nurse in community settings: caring for individuals and groups from diverse cultural backgrounds at various developmental stages and at any point on the health-illness continuum. Offered Every Term.

Restriction(s): Enrollment limited to students with a class of Senior.

NUR 4300 Nursing Informatics Cr. 3

Opportunity for nursing students or registered nurses to develop knowledge and skills in nursing informatics. Offered Fall, Spring/Summer.

NUR 4505 Professional Nursing in the Future: Current Issues for Professional Practice RN-BSN Cr. 3

Examination and discussion of issues related to professional nursing practice (RN to BSN). The current professional practice of nurses transitioning to a BSN encompasses a role change and exposure to political processes (micro to national issues), bioethical issues in U.S. health care, and educational pathways in nursing and related policy implications, the importance of interprofessional education for nurses, and the various levels of legal responsibility for the practicing professional nurses. These discussions will assist the new graduate in becoming an informed and politically active professional, an ethically sound provider and consumer of health care services, as well as an informed citizen capable of providing leadership to those who are not health care professionals. Offered Fall.

NUR 4600 Gerontological Nursing Perspectives in Health and Illness Cr. 3

Knowledge from the fields of gerontology and geriatrics used to enhance the student's nursing perspective when providing nursing care to meet the complex health care needs of healthy and frail older adults and their families. As students learn about the physical and psychosocial problems encountered with aging, they will be engaged in discussions about the contributions that can be brought forth from nursing and multiple disciplines to enhance the health of older adults. Offered Winter.

NUR 4800 Transcultural Health Through the Life Cycle Cr. 3

Satisfies General Education Requirement: Foreign Culture, Global Learning Inquiry

Transcultural health differences and similarities in selected Western and non-Western cultures, from birth through old age. Use of theories and research methods from the health and social sciences and humanities in study and analysis of different cultures. Offered Fall, Spring/Summer.

Restriction(s): Enrollment limited to students with a class of Junior or Senior.

NUR 4990 Directed Study Cr. 1-4

Offered Every Term.

Restriction(s): Enrollment limited to students in the College of Nursing.

NUR 5993 Writing Intensive Course in Nursing Cr. 0

Satisfies General Education Requirement: Writing Intensive Competency Successful completion of this course satisfies the University's General Education Writing Intensive Course requirement. Prior to graduation, all students must demonstrate the ability to communicate effectively with specialized or professional audiences by successfully completing the writing requirements. Students must be able to analyze, synthesize, and evaluate current information from literature on their topical area. Offered for undergraduate credit only. Offered Every Term.

Prerequisites: AFS 2390 with a minimum grade of C or ENG 2390 with a minimum grade of C or ENG 3010 with a minimum grade of C or ENG 3020 with a minimum grade of C or ENG 3050 with a minimum grade of C

Restriction(s): Enrollment is limited to Undergraduate level students.

NUR 6510 Health Economics, Policy, and Professional Issues for APNs Cr. 3

Examination of the major health policy and professional issues relevant to the advanced-practice nurse. Students will be assisted in the synthesis of theoretical and pragmatic aspects of issues of concern in order to develop confidence in their skills and establish an APN practice. Offered for graduate credit only. Offered Winter.

Restriction(s): Enrollment is limited to Graduate level students.

NUR 7000 Statistics in Nursing Cr. 3

Introduction to statistical analysis in nursing research. Topics include: levels of measurement, statistical inference, selected descriptive and inferential statistics for parametric and nonparametric conditions, and selected statistics used to summarize results from multiple studies (i.e., meta-analytic statistics). Offered Spring/Summer.

Prerequisite: NUR 3400 with a minimum grade of B

Restriction(s): Enrollment is limited to Graduate level students.

NUR 7015 Research for Evidence-Based Nursing I Cr. 4

Identification, review, and evaluation of existing research and other relevant evidence for application in nursing. Application of basic research knowledge and research utilization principles to begin synthesizing the adequacy of the evidence for application in nursing. Offered Fall, Winter.

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students in the MS in Nursing program.

NUR 7018 Research for Evidence-Based Nursing II Cr. 3

Continuation of NUR 7015. Designed to advance the understanding of evidence-based nursing and to advance the ability to synthesize existing evidence in a nursing area. Based on this synthesis, students will be able to develop evidence-based nursing protocols/guidelines, or proposals for obtaining additional evidence if current evidence is insufficient. Offered Winter, Spring/Summer.

Prerequisite: NUR 7015 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students in the MS in Nursing program.

NUR 7025 Community Based Participatory Research Cr. 3

Explores common issues and methods involved in conducting community based participatory research (CBPR). Students engage in building the necessary skills and learn how to collaborate across interdisciplinary perspectives to engage in research that leads to community change, the improvement of public health, and enhances the quality of life. Offered Fall.

Restriction(s): Enrollment is limited to Graduate level students; enrollment is limited to students with a major in Adv Public Health Nurse.

NUR 7030 Advanced Nursing Assessment Cr. 4

Development of advanced physical psychosocial assessment skills. Development of critical thinking skills in relation to differential diagnosis (medical and nursing) that are required in the performance of advanced nursing practice. Offered Spring/Summer.

Prerequisite: PTH 7500 with a minimum grade of C and NUR 7555 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

Course Material Fees: \$100

NUR 7035 Family Centered Health Promotion and Risk-reduction Cr. 3

The purpose of this course is to facilitate student's understanding and application of family systems approach to the theoretical foundation for health promotion and risk reduction across the lifespan. The emphasis is on family theory, health promotion theories and research to promote and preserve wellness lifestyles in client populations using epidemiological principles, disease risk appraisal and reduction and other tools. Offered Winter, Spring/Summer.

Restriction(s): Enrollment is limited to Graduate level students.

NUR 7040 Comprehensive Community Assessment Cr. 5

Provides opportunities for students to develop knowledge and skills essential to conducting comprehensive community assessments. Students engage with interprofessional team members, community agencies, and diverse populations to conduct a comprehensive assessment. Offered Winter.

Restriction(s): Enrollment is limited to Graduate level students; enrollment is limited to students with a major in Adv Public Health Nurse.

NUR 7055 Health Promotion and Prevention with Diverse Populations Cr. 5

Focuses on the development of advanced public health nursing knowledge and collaborative practice skills essential to integrating theoretical frameworks, comprehensive community assessments, and diverse perspectives when designing and implementing health promotion and prevention programs. Offered Spring/Summer.

Restriction(s): Enrollment is limited to Graduate level students.

NUR 7065 Program Planning, Quality Improvement and Evaluation Residency Cr. 5

Focuses on the development of knowledge, skills and leadership strategies essential for advanced public health nurses to transform complex systems, and to improve the health of communities and diverse populations. The course emphasizes the application of concepts and theories germane to planning, improving, and evaluating health programs to advance public health, and enhance quality of life. Offered Fall.

Restriction(s): Enrollment is limited to Graduate level students.

NUR 7105 Theoretical Foundations for Nursing Cr. 3

Theory course: foundations for nurses in practice and leadership roles. Discussion of diverse perspectives that influence knowledge development in nursing, including, systems, communication, developmental, health promotion, stress and coping theories. Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students in the MS in Nursing program.

NUR 7130 APN: Management of Oncology, Mental Health, and Lifestyle Change Cr. 6

Development of clinical expertise required to co-manage the care of persons with illness trajectories related to oncology, hematology, mental health and wound management. Offered Winter.

Prerequisite: NUR 7030 with a minimum grade of B and PTH 7500 with a minimum grade of B and NUR 7555 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

NUR 7140 APN: Management of Cardiopulmonary and Renal Problems Cr. 6

Development of clinical nursing expertise required to co-manage the care of persons with illness trajectories related to pulmonary, cardiovascular and renal systems. Offered Winter.

Prerequisite: NUR 7030 with a minimum grade of B and NUR 7555 with a minimum grade of C and PTH 7500 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

NUR 7155 Primary Prevention Strategies Cr. 8

Synthesis of theoretical, scientific, and clinical knowledge to support health promotion, health protection, and disease prevention advanced practice in Adult-Gerontology Primary Care Nursing. Offered Fall.

Prerequisites: NUR 7030 with a minimum grade of C and NUR 7555 with a minimum grade of C and NUR 7890 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students in the MS in Nursing program.

NUR 7165 Clinical Decision Making in Adult-Gerontology Cr. 8

Critical thinking and analysis of managerial decisions in primary care of adults and older adults. Offered Winter.

Prerequisite: NUR 7155 with a minimum grade of B and PTH 7500 with a minimum grade of C and NUR 7555 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students in the MS in Nursing program.

NUR 7175 Adult-Gerontology Primary Care Management and Evaluation Cr. 8

Synthesis of community-based adult-gerontology primary care nursing within the framework of evaluation. Offered Fall, Winter.

Prerequisite: NUR 7165 with a minimum grade of B and PTH 7500 with a minimum grade of C and NUR 7555 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students in the MS in Nursing program.

NUR 7200 Advanced Neonatal Pharmacology Cr. 3

Basic concepts of pharmacology; application and integration of content to advanced practice nursing with high-risk neonate. Offered Spring/Summer.

Restriction(s): Enrollment is limited to Graduate level students.

NUR 7207 Advanced Pediatric Pharmacology Cr. 3

Preparation of advanced practice nurses to apply concepts of pediatric pharmacology when assessing, managing and treating the pediatric patient in a variety of environments, including acute/critical and primary care. Offered Winter.

Restriction(s): Enrollment is limited to Graduate level students.

NUR 7222 Leadership in Health Policy, Ethics and Change Cr. 3

Examines health systems and health policy within evolving sociopolitical contexts from a national and international perspective. Content includes human diversity, social issues, systems theory, health systems analysis, ethics, health policy analysis, and policy formulation. Offered Fall, Winter.

Restriction(s): Enrollment is limited to Graduate level students.

NUR 7225 Pathophysiology, Clinical Care and Management I Cr. 8

Managing health care needs of women, neonates, and/or children; conceptual basis for advanced nursing. Offered Fall.

Prerequisite: NUR 2010 with a minimum grade of B and NUR 3400 with a minimum grade of B and NUR 7030 with a minimum grade of B

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students in the College of Nursing.

NUR 7226 Pathophysiology, Clinical Care and Management II Cr. 8

Development and demonstration of a model of advanced practice nursing or nurse-midwifery. Offered Winter.

Prerequisite: NUR 7225 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students in the College of Nursing.

NUR 7227 Pathophysiology, Clinical Care and Management III Cr. 8

Synthesis of advanced practice nursing or nurse-midwifery model for care of women, neonates, and/or children. Offered Spring/Summer.

Prerequisite: NUR 7226 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students in the College of Nursing.

NUR 7370 APN: Management of Neurological, Endocrine, and Musculoskeletal Problems Cr. 6

Assisting advanced practice nurses in development of clinical expertise required to co-manage persons with problems related to neurology, endocrinology, and musculoskeletal disorders. Offered Winter.

Prerequisite: NUR 7030 with a minimum grade of B and NUR 7555 with a minimum grade of C and PTH 7500 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

NUR 7415 Physical and Psychosocial Issues in Aging Cr. 3

Analysis of predominant physical and psychosocial aspects of aging encountered by elderly clients. Offered Winter.

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students in the College of Nursing.

NUR 7444 Advanced Physiology and Pathophysiology Across the Lifespan for APRNs Cr. 4

General physiology and pathologic principles for promoting health and treating disease across the lifespan. This course builds upon previous courses in anatomy and physiology and is a core competency that provides the basis for critical thinking in the role as an advanced practice nurse. Further, it provides an in-depth study of principles of advanced physiology and pathophysiology applicable across the lifespan, including enhancement of knowledge of human physiology of organ systems as well as the etiology, developmental considerations, pathogenesis, morphology, and clinical manifestations of common disease processes. Offered Fall.

Restriction(s): Enrollment is limited to Graduate level students.

NUR 7515 End-of-Life Issues Cr. 3-4

Physical, spiritual, legal, economic, political, cultural, and ethical issues at the end of life, examined as stories about individuals, families, and communities. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate level students.

Equivalent: ANT 7430, SOC 7020

NUR 7555 Pharmacotherapeutics for Advanced Practice Cr. 3

General pharmacotherapy; critical evaluation of drug therapy; critique and prescription of appropriate therapeutic regimens. Offered Winter.

Prerequisites: NUR 2060 and PTH 7500

Restriction(s): Enrollment is limited to Graduate level students.

NUR 7605 Psychopharmacology for Advanced Practice Nursing Cr. 5

Focus on pharmacokinetics and pharmacodynamics of psychotropic and neurologic medications used across the life span. Emphasis on efficacy of the medications, individualized selections, and titration of dosages. Offered Fall.

Prerequisites: May be taken concurrently: NUR 7555 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students in the College of Nursing.

NUR 7710 Theoretical Perspectives of Teaching in Nursing Cr. 3

Theories of learning and teaching, critical thinking, value development, and psychomotor skill development as basis for teaching in nursing. Teaching methods in nursing for classroom and clinical practice. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate level students.

NUR 7720 Evaluation and Testing in Nursing Education Cr. 3

Development of educational program in nursing. Test construction, clinical and performance evaluation, and grading. Offered Every Other Winter.

Restriction(s): Enrollment is limited to Graduate level students.

NUR 7730 Practice Teaching in Nursing Cr. 3

Application experience in educational setting appropriate to student's needs and goals. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate level students.

NUR 7840 Advanced Practice Nursing with Individuals/Communities Cr. 6

Opportunities for psychiatric nursing and community health nursing advanced practice students to integrate content about individuals and communities within cultural contexts. Offered Fall.

Prerequisite: NUR 7030 with a minimum grade of B and NUR 7555 with a minimum grade of C and PTH 7500 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students in the College of Nursing.

NUR 7855 Advanced Practice Nursing with Groups Cr. 6

Opportunities for psychiatric nursing and community health nursing advanced practice students to integrate content about groups within cultural contexts. Offered Winter.

Prerequisite: NUR 7030 with a minimum grade of B and NUR 7555 with a minimum grade of C and PTH 7500 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students in the College of Nursing.

NUR 7860 Advanced Practice Nursing with Families Cr. 6

Opportunities for advanced practice psychiatric nursing and advanced practice community health nursing students to integrate content about families within cultural contexts. Offered Spring/Summer.

Prerequisite: NUR 7030 with a minimum grade of B and NUR 7555 with a minimum grade of C and PTH 7500 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students in the College of Nursing.

NUR 7865 Foundations of Complementary and Alternative Medicine (CAM) Cr. 3

Philosophical, historical, physiological basis of CAM; use in advanced practice nursing. Offered Fall.

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students in the College of Nursing.

NUR 7870 Complementary Therapy Research: Understanding the Evidence Cr. 4

Focus on the research related to complementary therapies allowing students to explore what has already been established, limitations and benefits, and future directions and initiatives that are needed to support CAM therapies for integrative health care use. Offered Fall, Winter.

Prerequisite: NUR 7865 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

NUR 7875 Complementary Alternative Medicine Therapies: Clinical Intervention II Cr. 5

Additional in-depth information on mind-body techniques, herbs/supplements, aromatherapy and energy healing; focus on physiological, psychological, and spiritual aspects of integrative care. Offered Fall, Winter.

Prerequisite: NUR 7870 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

NUR 7890 Special Topics in Nursing Cr. 1-8

Exploration and analysis of topics significant to the development of nursing science and professional practice. Offered Fall, Winter.

Restriction(s): Enrollment is limited to Graduate level students.

NUR 7990 Directed Study in Nursing Cr. 1-8

Individually designed courses of study in nursing. Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students.

Repeatable for 16 Credits

NUR 7998 Master's Research Project Cr. 1-3

Scientific investigation of nursing phenomena using all steps of the research process; includes written report. Offered Every Term.

Prerequisite: NUR 7010 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

NUR 8011 Scientific Writing in Nursing Cr. 1

Seminar to assist students in becoming more effective scientific writers in order to be successful nurse scholars and scientists. Students will conduct a mini-review of the literature related to a specific aspect of urban health. After identifying a precise statement to focus their review, students will synthesize the literature and write iterative drafts of their review. Offered Fall.

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students in the College of Nursing; enrollment limited to students in a Doctor of Philosophy degree.

NUR 8012 Philosophical Basis of Nursing Cr. 3

Philosophical underpinnings of the nursing discipline in order to assist students in understanding the tripartite role of a Ph.D.-prepared nurse as scholar, scientist, and steward of the discipline. Students will explore the interaction of historical, theoretical, and philosophical contexts within which nursing science has developed, discuss the role each has played in the process of developing nursing as an academic research discipline, and examine these for congruence with contemporary thinking. Emphasis is on analyzing epistemological and ontological assumptions underlying the discipline, the science, and the practice of nursing. Debates arising from philosophy and the history of science and nursing inform discussions about the nature of science and nursing's past, present, and future directions in theory and knowledge development. Offered Fall.

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students in the College of Nursing; enrollment limited to students in a Doctor of Philosophy degree.

NUR 8014 Health Interventions Cr. 3

Evaluation of intervention research to create nursing knowledge to improve health outcomes for urban populations. Students will examine select intervention designs to evaluate the effectiveness of therapeutic interventions related to their phenomenon of interest. The course also addresses important considerations of measurement, feasibility, fidelity, and data safety monitoring plans when conducting intervention research. Ethical concerns related to intervention research are discussed. Offered Winter.

Restriction(s): Enrollment is limited to Graduate level students.

NUR 8020 Theoretically-Based Nursing Inquiry Cr. 3

Synthesis and application of knowledge from theoretical and empirical literature to a phenomenon of interest. Assistance to students in translating philosophical and theoretical perspectives into research methodologies. Concept analysis and construction, theory development, and relationships among conceptual frameworks, theories, and empirical referents are critically analyzed. The course will enable students to develop or further explicate a theoretical framework to guide a study within an emerging program of research in urban health. Offered Spring/Summer.

Prerequisites: NUR 8012 and NUR 8040 or NUR 8060

Restriction(s): Enrollment is limited to Graduate level students.

NUR 8040 Quantitative Research Methods Cr. 3

Non-experimental and experimental designs used in health-care research. Students will examine common threats to study validity and discuss methods to address these threats. Students also will develop the methods section of a quantitative proposal that addresses a researchable problem in nursing and health care. Offered Winter.

Restriction(s): Enrollment is limited to Graduate level students.

NUR 8050 Introduction to Advanced Quantitative Methods: Big Data and Mixed Methods Cr. 3

Introduces advanced quantitative methods that may be used in the students' future program of research. Students will explore the methods associated with triangulation of data (i.e. mixed methods) and big data science, and the course will address the epistemological underpinnings of these two methods. Students will examine key design, sampling, analysis and management techniques required for using mixed methods or large data sets. Emphasis will be on exploring pragmatic considerations that contribute to the efficacy of projects using these different methods. Offered Fall.

Restriction(s): Enrollment is limited to Graduate level students; enrollment is limited to students with a major in Interdisciplinary or Nursing; enrollment limited to students in a Doctor of Philosophy degree.

NUR 8060 Qualitative Research Methods Cr. 3

Relevance of qualitative approaches to the advancement of knowledge and practice in nursing and healthcare. An overview of qualitative traditions will be covered. Sampling, measurement, data collection, data management, and analysis will be discussed relative to various qualitative approaches. Strategies to maintain data quality and integrity are also discussed. Offered Spring/Summer.

Restriction(s): Enrollment is limited to Graduate level students.

NUR 8065 Health Economics and Policy Evaluation of Nursing Care for Vulnerable Populations Cr. 3

The intersection of vulnerable populations and their health care needs will be explored from a health economics and health policy approach. The course will promote discourse on the economic structure of the American health system as it relates to disparities. Further, it will explore the economic analytical evaluation of health care through current economic models of analysis for nursing care. Offered Spring/Summer.

Prerequisites: FPH 7240 with a minimum grade of C and NUR 8630 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

NUR 8070 Advanced Qualitative Methods Cr. 3

Focuses on analysis and critique of various traditions within qualitative methods (phenomenology, grounded theory, case study) and an in-depth examination of various methodological approaches and technical skill related to participant recruitment, ethical issues, data collection, data management and analysis, and interpretation of for qualitative methods. Students must have a data set for analysis, even if they are in the process of collecting data or receive permission to use a faculty member's data set. Offered Winter.

Prerequisites: NUR 8060 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

NUR 8210 Health Determinants & Disparities Cr. 3

Examination of multiple determinants of health and issues related to health disparities among vulnerable populations in urban environments.

Course content addresses biophysiological, genetic, behavioral, cultural, environmental (social and physical), economic, and health policy factors that affect health and contribute to health disparities.

It prepares students to generate questions of concern to health and health outcomes; and to collaborate in interdisciplinary research teams regarding determinants of health and health disparities. Offered Fall.

Restriction(s): Enrollment is limited to Graduate level students.

NUR 8604 Health Analytics and Data Management Cr. 4

This course provides the student with a foundation to evaluate the psychometric properties of outcome measures; to evaluate group differences for clinical programs, quality/process improvement, or practice change projects; and to synthesize results across qualitative and quantitative studies. Offered Fall.

Restriction(s): Enrollment is limited to Graduate level students.

NUR 8610 Statistical Analysis I Cr. 3

Application of selected univariate statistical procedures commonly used in nursing and health research. Topics will include descriptive and inferential statistics such as measures of central tendency and variability, sampling, estimation, hypothesis testing, analysis of variance, regression and correlation, analysis of covariance, analysis of frequency and nonparametric procedures. Emphasis is on the utilization and interpretation of basic univariate procedures applied in nursing and health research. Offered Fall.

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students in the College of Nursing.

NUR 8612 Statistical Analysis II Cr. 3

Advanced multivariate statistical procedures. The course will cover a range of advanced quantitative techniques, such as discriminant analysis, logistic regression analysis: dichotomous response, logistic regression analysis: polytomous response, principle component analysis, factor analysis, cluster analysis and survival analysis. The course also addresses statistical analysis for advanced quantitative designs such as analysis of variance for some unbalanced designs, analysis of variance for some fixed-, random-, and mixed-effects models, nested or hierarchical designs, multivariate repeated-measures analysis of variance and power analysis and sample size determination. An introduction to psychometric theory for instrument development also will be addressed. Offered Winter.

Prerequisites: NUR 8610

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students in the College of Nursing.

NUR 8615 Informatics Innovations in Nursing Cr. 3

Development of understanding of concepts in health care informatics relevant to the advanced practice nurse. Offered Fall.

Restriction(s): Enrollment is limited to Graduate level students.

NUR 8620 Foundations of Nursing as a Discipline Cr. 3

Critical examination of factors that have contributed to the development of the discipline of nursing. Offered Fall.

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students in the Doctor of Nursing Practice program.

NUR 8625 Evidence Based Nursing Practice: Theoretical and Methodological Issues Cr. 3

Scientific foundation for integration of evidence based knowledge into clinical practice. Offered Winter.

Restriction(s): Enrollment is limited to Graduate level students.

NUR 8630 Conceptual Methodologies in Health Policy Leadership and Ethics Cr. 3

Basic understanding of health policy and ethical theories and practice, skills in policy development and analysis, joined with ethical analysis. Offered Fall.

Restriction(s): Enrollment is limited to Graduate level students.

NUR 8635 Clinical Practice Outcomes: Evaluation and Benchmarking Methodologies Cr. 3

Foundational knowledge and skills necessary to measure clinical outcomes and quality in advanced clinical nursing practice. Offered Fall.

Restriction(s): Enrollment is limited to Graduate level students.

NUR 8640 Health Information Technology Cr. 3

Current and future advances in health information technologies as they apply to hospital or community health systems. Offered Fall.

Prerequisite: NUR 8615 with a minimum grade of B-

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students in the College of Nursing.

NUR 8650 Advanced Professional Leadership Cr. 3

Preparation of advanced nurses and others to effectively transition into the role of leader and change agent. Offered Winter.

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students in the College of Nursing.

NUR 8670 APN Specialty I: Foundations Cr. 3-4

Foundational knowledge and skills necessary to manage health care needs across the developmental spectrum, while providing the conceptual basis for advanced practice nursing (APN). Focus on refinement and further development of basic clinical diagnostic skills, including physical examination, diagnosis, management, interventions, and outcomes assessment. Offered Fall.

Prerequisites: NUR 7030 with a minimum grade of C and NUR 7555 with a minimum grade of C and PTH 6860 with a minimum grade of C or NUR 7200 with a minimum grade of C and PTH 7500 with a minimum grade of C or NUR 7205 with a minimum grade of C or NUR 7203 with a minimum grade of C

Corequisite: NUR 8675

Restriction(s): Enrollment is limited to Graduate level students.

NUR 8675 APN Specialty Clinical I: Foundations Cr. 4-5

Clinical (lab) component focuses on the continued application of specialty knowledge foundational to advanced practice nursing or nurse-midwifery. Strengthening and further development of the nurse practitioner/nurse-midwifery management model, roles of advanced practice nurses, and interventions to promote and/or restore health within each specialty area. Offered Fall.

Restriction(s): Enrollment is limited to Graduate level students.

NUR 8680 APN Specialty II: Intermediate Cr. 3-4

Specialty seminar focuses on strengthening and further development of the application of the specialty knowledge of acute care, children, community, neonates, primary care, psychiatric and women's health within a broad social context. Students manage the care of clients in their designated specialty area while assessing for deviations from normal which may result in collaboration or referral. Development of the advanced practice role, provision of a supportive clinical practice environment, and examination of factors that contribute to the vulnerability of clients across the lifespan. Offered Winter.

Prerequisites: NUR 8675 with a minimum grade of C

Corequisite: NUR 8685

Restriction(s): Enrollment is limited to Graduate level students.

NUR 8685 APN Specialty Clinical II: Intermediate Cr. 4-5

Clinical (lab) component focuses on the continued application of specialty knowledge foundational to advanced practice nursing. Strengthening and further development of the nurse practitioner/nurse-midwifery management model, roles of advanced practice nurses, and interventions to promote and/or restore health within each specialty area. Offered Winter.

Prerequisite: NUR 8670 with a minimum grade of C and NUR 8680 (may be taken concurrently) with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

NUR 8690 APN Specialty III: Advanced Cr. 2-4

Synthesis of an advanced practice nursing model for care across the developmental spectrum. Health promotion, development, and long-term care of vulnerable populations within a broad social context. Specialty seminar component focuses on strengthening and applying specialty knowledge of acute care, children, neonates, primary care, and women's health within a broad social context. Offered Winter.

Prerequisites: NUR 8680 with a minimum grade of C and NUR 8685 with a minimum grade of C

Corequisite: NUR 8695

Restriction(s): Enrollment is limited to Graduate level students.

NUR 8695 APN Specialty Clinical III: Advanced Cr. 4-6

Students are to concentrate with hands on patient care in the role of a provider. Offered Winter.

Restriction(s): Enrollment is limited to Graduate level students.

NUR 8890 Special Topics in Nursing Cr. 1-8

Exploration and analysis of topics significant to the development of nursing science and professional practice at the doctoral level. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students in a Doctor of Philosophy degree.

Repeatable for 8 Credits

NUR 8895 Population Health for Nursing Cr. 3

Introduction to the basic concepts of epidemiology as tools that will promote understanding of the complexity of local, national, and global healthcare systems. Emphasis is on the use of epidemiologic reasoning in deriving inferences about the etiology of health outcomes from population data and in guiding the design of health service programs. Discussion of behavioral and contextual factors that converge to impact the health of individuals, families, and communities in relationship to strategies that advanced practice nurses use to mitigate these factors. Students will be challenged to develop approaches for using epidemiology to influence, create, and lead change. Offered Fall.

Restriction(s): Enrollment is limited to Graduate level students.

NUR 8990 Directed Study Cr. 1-8

Individually designed courses in nursing for doctoral students whose needs and interests are not met in scheduled classes. Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students.

NUR 8999 Master's Thesis Research and Direction Cr. 1-8

Offered Every Term.

Prerequisite: NUR 7010 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students with a class of Candidate Masters.

Repeatable for 8 Credits

NUR 9500 DNP Project Practicum I Cr. 2

Provides guided study to identify role components for the advanced practice nurse pursuing a Doctor of Nursing Practice (DNP) degree. The student will begin exploration and identification of a specific practice topic area for the DNP Project. The scholarly practicum gives the student hands on experience in her/his chosen area of clinical inquiry. Offered Fall, Winter.

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students in the College of Nursing.

NUR 9505 DNP Project Practicum II Cr. 2

Requires the student to engage faculty, community and/or healthcare organization leaders for project proposal planning of an evidenced-based DNP Project based on the specific practice topic identified. The student must establish the state of the science upon which the DNP Project will be based. Offered Every Term.

Prerequisites: NUR 8625 with a minimum grade of C and NUR 9500 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students in the College of Nursing.

NUR 9510 DNP Project Practicum III Cr. 2-4

Builds on the knowledge and skills developed in the previous courses: DNP Project Practicum I and II. Students, working with their DNP Project Chair and relevant leaders, will implement their projects. Offered Winter, Spring/Summer.

Prerequisites: NUR 9500 with a minimum grade of C and NUR 9505 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students in the College of Nursing.

NUR 9520 DNP Project Cr. 4-6

Builds on the knowledge and skills developed in the previous courses: DNP Project Practicum I, II and III. Provides the doctorate nursing practice student with the opportunity to demonstrate their ability to analyze, synthesize and apply clinical inquiry knowledge and competencies through written and public presentation. Offered Every Term.

Prerequisites: NUR 9500 with a minimum grade of C and NUR 9505 with a minimum grade of C and NUR 9510 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students in the College of Nursing.

NUR 9990 Pre-Doctoral Candidacy Research Cr. 1-8

Research in preparation for doctoral dissertation. Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students.

Repeatable for 12 Credits

NUR 9991 Doctoral Candidate Status I: Dissertation Research and Direction Cr. 7.5

Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students.

NUR 9992 Doctoral Candidate Status II: Dissertation Research and Direction Cr. 7.5

Offered Every Term.

Prerequisite: NUR 9991 with a minimum grade of S

Restriction(s): Enrollment is limited to Graduate level students.

NUR 9993 Doctoral Candidate Status III: Dissertation Research and Direction Cr. 7.5

Offered Every Term.

Prerequisite: NUR 9992 with a minimum grade of S

Restriction(s): Enrollment is limited to Graduate level students.

NUR 9994 Doctoral Candidate Status IV: Dissertation Research and Direction Cr. 7.5

Offered Every Term.

Prerequisite: NUR 9993 with a minimum grade of S

Restriction(s): Enrollment is limited to Graduate level students.

NUR 9995 Candidate Maintenance Status: Doctoral Dissertation Research and Direction Cr. 0

Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students.

Course Material Fees: \$370.26

Repeatable for 0 Credits

OT - OCCUPATIONAL THERAPY

OT 3000 Introduction to Occupation, Health, and Wellness Cr. 3-4

Introduction to the processes and procedures utilized by the occupational therapist: observation, interview, communication and skills gained through interaction with normal individuals from infancy through senescence. Offered Fall.

Restriction(s): Enrollment limited to students in the Pharmacy and Health Sciences.

Course Material Fees: \$50

OT 3070 Occupational Therapy Research I Cr. 3

Basic concepts and principles of research, terminology used to describe research, and effective use of research information for evidence-based practice in occupational therapy. Didactic and experiential components. Offered Spring/Summer.

Restriction(s): Enrollment limited to students in the Pharmacy and Health Sciences.

OT 3200 Therapeutic Media Cr. 2-3

Performance, adaptation and utilization of processes involved in selected creative and manual tasks and activities which have therapeutic value. Principles and methods of teaching appropriate to the therapist. Offered Winter.

Restriction(s): Enrollment limited to students in the Pharmacy and Health Sciences.

Course Material Fees: \$25

OT 3300 Movement Assessment and Intervention Cr. 3

Lecture and laboratory on human movement concepts prerequisite to the understanding of occupational therapy procedures applicable to patients with physical or sensory-integrative dysfunction. Offered Fall.

Restriction(s): Enrollment limited to students in the Pharmacy and Health Sciences.

Course Material Fees: \$30

OT 3400 Health Conditions I: Physical Disabilities Cr. 3-4

A series of interdisciplinary presentations on the clinical manifestations and management of selected problems due to disease states or injury; includes etiology, assessment, course and medical specialty management of the problems. Offered Winter.

Restriction(s): Enrollment limited to students in the Pharmacy and Health Sciences.

Course Material Fees: \$5

OT 4050 Life Occupations I Cr. 3

Examination of areas of occupation: daily living activities, work/school, play, leisure and social participation. Tools and techniques for analysis of occupations; development of intervention strategies; effective documentation. First of two courses. Offered Spring/Summer.

Restriction(s): Enrollment limited to students in the Pharmacy and Health Sciences.

OT 4280 Occupational Therapy Assessments Cr. 5

Tools and techniques for conducting assessments; documenting, observing, and interviewing. Course format: didactic, case presentation, and experiential. Offered Winter.

Restriction(s): Enrollment limited to students in the Pharmacy and Health Sciences.

OT 4400 Health Conditions II: Mental Health Cr. 3-4

Major categories of psychiatric conditions, young adult through elderly. Diagnostic criteria; treatment strategies in hospital and community settings with fieldwork requirements. Guest lecturers from medical and community settings. Second of two courses. Offered Winter.

Restriction(s): Enrollment limited to students in the Pharmacy and Health Sciences.

Course Material Fees: \$20

OT 4600 Group Dynamics Cr. 5

Experiential approach to learning group dynamics and achieving skills necessary for conducting effective therapeutic groups for a variety of settings. Development of self-awareness and social skills necessary in building practical group skills. Level I fieldwork. Offered Fall.

Restriction(s): Enrollment limited to students in the Pharmacy and Health Sciences.

Course Material Fees: \$50

OT 4990 Directed Study Cr. 1-2

Offered Every Term.

Restriction(s): Enrollment limited to students in the Pharmacy and Health Sciences.

Repeatable for 5 Credits

OT 5000 Interventions and Outcomes I Cr. 5

Occupation-based therapeutic activities, intervention strategies, documentation skills, and discharge planning that promote client-centered outcomes; focus is on children, through the teen years. First of two courses. Offered Fall.

Restriction(s): Enrollment limited to students in the Pharmacy and Health Sciences.

Course Material Fees: \$67

OT 5040 Environmental Influence on Disability and Health Cr. 3

Application of OT practice in health care delivery. Critical examination of physical, social, economic and political environments on the health, wellness, and disability of individuals, populations, and the health care delivery system. Offered for graduate credit only. Offered Fall.

Restriction(s): Enrollment limited to students in the Pharmacy and Health Sciences.

OT 5050 Life Occupations II Cr. 3

Role of leisure in health, wellness, prevention and rehabilitation; focus: across the life span. Explores and develops assessment tools, treatment plans for diverse populations; includes experiential learning. Second of two courses. Offered Fall.

Prerequisite: OT 4050

Restriction(s): Enrollment limited to students in the Pharmacy and Health Sciences.

Course Material Fees: \$50

OT 5080 Occupational Sci Cr. 2

Offered Spring/Summer.

Restriction(s): Enrollment is limited to Undergraduate level students; enrollment is limited to students with a major, minor, or concentration in Occupational Therapy.

OT 5300 Surface Anatomy for Occupational Therapy Cr. 1

Students will: 1) practice and develop palpation skills, 2) locate bony landmarks, muscles, tendons, joints, ligaments, nerves, and arteries on the living human body, 3) appreciate differences of a variety of tissue types. Offered Fall.

Prerequisites: May be taken concurrently: OT 5505 and May be taken concurrently: OT 5510

OT 5400 Neurosciences for Health Care Professionals Cr. 3

Study of the human central nervous system; emphasis on sensory and motor systems and structures that contribute to normal movement. Offered Winter.

Restriction(s): Enrollment limited to students in the Pharmacy and Health Sciences.

Course Material Fees: \$50

Equivalent: PT 5400

OT 5500 Aging: From Community to Longterm Care Cr. 3

The goal of the course is to strengthen knowledge and skills in aging and geriatric rehabilitation. Content includes: successful aging, age-related health conditions, gerontology research for OTs, at risk older adults, assisted living and long term care, policy and legislation. Offered Fall.

Restriction(s): Enrollment is limited to Graduate or Undergraduate level students; enrollment is limited to students with a major in Occupational Therapy.

OT 5505 Clinical Applications of Human Anatomy Cr. 3

Knowledge of basic human anatomy for students in health science professional programs; foundation for further study in clinical sciences. Offered Fall.

Restriction(s): Enrollment is limited to students with a major, minor, or concentration in Occupational Therapy or Physical Therapy.

Equivalent: PT 5505

OT 5510 Clinical Applications of Human Anatomy: Laboratory Cr. 1-2

Examination of prosections, dissection of human cadavers; didactic study. Offered Fall.

Restriction(s): Enrollment limited to students in the Pharmacy and Health Sciences.

Course Material Fees: \$200

Equivalent: PT 5510

OT 5650 Pathophysiology for Health Sciences Cr. 3

Fundamental knowledge of the nature of disease for the health sciences student; physiologic and morphologic changes accompanying disease processes; mechanisms of repair and recovery. Offered Winter.

Restriction(s): Enrollment limited to students in the Pharmacy and Health Sciences.

Equivalent: PT 5650, RT 5650

OT 5993 Writing Intensive Seminar in Occupational Therapy Cr. 0

Satisfies General Education Requirement: Writing Intensive Competency Disciplinary writing assignments under the direction of a faculty member. Must be selected in conjunction with designated corequisite; consult Schedule of Classes for corequisites available each term. Satisfies University General Education Writing Intensive Course in the Major requirement. Required for all majors. Offered Every Term.

Prerequisite: OT 3000 (may be taken concurrently) with a minimum grade of D-

Restriction(s): Enrollment is limited to Undergraduate level students; enrollment limited to students in the Pharmacy and Health Sciences.

OT 6000 Interventions and Outcomes II Cr. 5

Occupation-based therapeutic activities, intervention strategies, documentation skills, and discharge planning that promote client-centered outcome; focus is on young adult, adult years, life span. Second of two courses. Offered Winter.

Prerequisite: OT 5000

Restriction(s): Enrollment limited to students in the Pharmacy and Health Sciences.

OT 6070 Occupational Therapy Research II Cr. 3

Application of research principles and methods to solving occupational therapy problems. Offered Fall.

Prerequisite: OT 3070

Restriction(s): Enrollment limited to students in the Pharmacy and Health Sciences.

Course Material Fees: \$15

OT 6090 Directed Research Cr. 1-4

Opportunity to conduct supervised research and to participate in research activities of a mentor. Offered Every Term.

Prerequisite: OT 6070

Restriction(s): Enrollment limited to students in the Pharmacy and Health Sciences.

Repeatable for 8 Credits

OT 6230 Motor Control Cr. 3

Current theories of motor control and motor learning; recovery of function and normal movement across the lifespan. Offered Winter.

Restriction(s): Enrollment limited to students in the Pharmacy and Health Sciences.

OT 6320 Patient Perspectives of Health, Illness and Culture Cr. 2

People from various cultures (religious, ethnic, sexual orientation, disability, chronic illness, economic status) discuss in small groups how these cultures influence living with a chronic illness. Students also discuss readings on health culture and keep a journal on their course experience. Offered Spring/Summer.

Restriction(s): Enrollment limited to students in the Pharmacy and Health Sciences.

Equivalent: PPR 6300

OT 7120 Topics in Assistive Technology Cr. 3

Theories of assistive technology; their application in health care and community settings. Offered Spring/Summer.

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students in the Pharmacy and Health Sciences.

OT 7200 Occupational Therapy Practice in Aging Cr. 3

Covers the concepts and the process of aging and the role of occupational therapy with adults impacted by changing physical health and cognitive capacities and environments. Focuses on the effects of major late life transitions including, for example, retirement from paid employment, driving cessation, household downsizing and caregiving. Offered Winter.

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students in the Pharmacy and Health Sciences.

OT 7300 Professional Lit Cr. 3

Offered Fall.

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students in the Pharmacy and Health Sciences.

OT 7500 Occupational Therapy Synthesis Cr. 3

Synthesizes learning from all previous coursework while preparing the student to take the National Board Certification of Occupational Therapy (NBCOT) examination and business and management fundamentals. This course will include blended learning methodology to enhance learning and peer interaction. Students will complete a review of previously learned content and apply that content into practical clinical scenarios and gain knowledge to successfully pass the NBCOT exam. Offered Intermittently.

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students in the Pharmacy and Health Sciences.

Repeatable for 9 Credits

OT 7700 Research Dissemination Cr. 3

Offered Winter.

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students in the Pharmacy and Health Sciences.

OT 7750 Professional Field Experience Cr. 1-4

Supervised placement in area of specialization. Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students in the Pharmacy and Health Sciences.

OT 7800 Occupational Therapy Capstone. Cr. 3

Offered Spring/Summer.

Restriction(s): Enrollment is limited to Graduate level students; enrollment is limited to students with a major in Occupational Therapy.

OT 7898 Level II Fieldwork A: Medical Cr. 8

Supervised field work experience in affiliated health care agencies. Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students in the Pharmacy and Health Sciences.

OT 7899 Level II Fieldwork B: Community Cr. 8

Supervised field work experience in affiliated health care agencies.
Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students;
enrollment limited to students in the Pharmacy and Health Sciences.

OT 7990 Directed Study Cr. 1-3

Opportunities for study and experience in areas of special interest in occupational therapy. Written report and oral presentation required.
Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students;
enrollment limited to students in the Pharmacy and Health Sciences.

Repeatable for 5 Credits

OT 7999 Masters Essay Dir Cr. 1-2

Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students;
enrollment limited to students with a class of Candidate Masters;
enrollment limited to students in the Pharmacy and Health Sciences.

OT 8990 Masters Project Dir Cr. 1-5

Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students;
enrollment limited to students in the Pharmacy and Health Sciences.

OT 8999 Master's Thesis Research and Direction Cr. 1-8

Offered Every Term.

Prerequisite: OT 7700

Restriction(s): Enrollment is limited to Graduate level students;
enrollment limited to students with a class of Candidate Masters;
enrollment limited to students in the Pharmacy and Health Sciences.

Repeatable for 8 Credits

PAA - PATHOLOGISTS' ASSISTANT

PAA 5020 Applied General Pathology Cr. 3

Fundamental principles and theories applied to general pathology with special emphasis on disease processes and mechanisms found in adult and pediatric pathology. Offered Fall.

Corequisite: PAA 7250

Restriction(s): Enrollment is limited to students with a major in Pathologists'Assistant Program.

PAA 5050 Clinical Terminology and Methodology for the Pathologists' Assistant Cr. 3

Clinical and medical terminology specific to the pathologists' assistant along with associated methodologies used in surgical and autopsy pathology in the second year of the program. Introduction to laboratory human organ system grossing methodologies. Offered Winter.

Prerequisite: PAA 7060 with a minimum grade of C and PAA 7061 with a minimum grade of C

Restriction(s): Enrollment is limited to students with a major in Pathologists'Assistant Program.

Course Material Fees: \$250

PAA 5051 Clinical Terminology and Methodology for the Pathologists' Assistant: Laboratory Cr. 2

The course is designed to familiarize students with surgical procedures, the most common surgical specimens received at the bench, and the manner in which such specimens are grossed, inked, sectioned, and submitted to histology. The use of simulation laboratory sessions for practice of grossing techniques and methodologies will emphasize the step-wise grossing, safety, and dictation of given pathological specimens. Offered Winter.

Prerequisite: PAA 7060 with a minimum grade of C and PAA 7061 with a minimum grade of C

Restriction(s): Enrollment is limited to students with a major in Pathologists'Assistant Program.

PAA 5100 Medical Photography and Techniques in Pathology Cr. 2

Theory of the behavior of light and selection of appropriate lenses; principles of exposure, color, and filters; macro- and microphotography. Adjustment of clinical photographs and student photographs corrected by Adobe Photoshop Professional resulting in a student Eportfolio. Offered Spring/Summer.

Restriction(s): Enrollment is limited to students with a major in Pathologists'Assistant Program.

Course Material Fees: \$100

PAA 5200 Medical Microbiology for Technical Professionals: Pathologists' Assistant Cr. 3

Infectious diseases affecting major organ systems of the body encountered by the pathologists' assistant. Clinical case study analysis with student presentations. Offered Winter.

Restriction(s): Enrollment is limited to students with a major in Pathologists'Assistant Program.

PAA 6060 Human Embryology and Pediatric Pathology Cr. 3

Embryological basis of pediatric and childhood diseases along with adult presentations. Human embryological correlations to clinical settings: case study analysis specific to the pathologists' assistant and clinical evaluation of pediatric pathology. Recognition of anatomical presentations with embryological development in normal and diseased states. Offered Winter.

Prerequisite: PAA 5020 with a minimum grade of C and PAA 7060 with a minimum grade of C

Restriction(s): Enrollment is limited to students with a major, minor, or concentration in Pathologists'Assistant Program.

Course Material Fees: \$100

PAA 6150 Histochemistry for the Pathologists' Assistant Cr. 4

Study of techniques specific to the Pathologists' Assistant involved in the preparation of tissues prior to microscopic examination and processing inclusive of embedding, sectioning, preparing frozen sections and performing routine and special stain on a variety of tissues. Offered Spring/Summer.

Prerequisites: PAA 6560 with a minimum grade of C

Restriction(s): Enrollment is limited to students with a major in Pathologists'Assistant Program.

Course Material Fees: \$200

PAA 6420 Laboratory Management and Quality Management in Anatomic Pathology Cr. 3

Interpersonal and technical management techniques for the clinical and anatomic pathology laboratory settings. Quality management techniques, policies, protocols and best practices for the pathologists' assistant. Safety mandates and protocols as applied to anatomic and surgical pathology. Discussion and analysis of governmental mandates covering laboratory improvement (CLIA). Offered Winter.

Restriction(s): Enrollment is limited to students with a major in Pathologists'Assistant Program.

PAA 6560 Human Histology and Clinical Correlations Cr. 4

Characteristics and identification of human tissue microanatomy. Functional interpretation of human microstructure. Examine and study prepared, stained tissue sections from a variety of organ sections both normal and abnormal allowing for clinical correlations in patient case presentations. Offered Fall.

Restriction(s): Enrollment is limited to students with a major in Pathologists'Assistant Program.

Course Material Fees: \$100

PAA 7060 Human Anatomy and Physiology for Pathologists' Assistants Cr. 3

Detailed comprehensive review of human anatomy and physiology as it pertains to the pathologists' assistant practice. Offered Fall.

Restriction(s): Enrollment is limited to Graduate level students; enrollment is limited to students with a major in Pathologists'Assistant Program.

Course Material Fees: \$350

PAA 7061 Human Anatomy and Physiology for the Pathologists' Assistant: Laboratory Cr. 1

Comprehensive examination of anatomical organs and organ systems through the use of human cadaver prosections, 3D models, computer software applications, medical imaging, and clinical correlations as it pertains to the pathologists' assistant scope of practice. Offered Fall.

Restriction(s): Enrollment is limited to Graduate level students; enrollment is limited to students with a major in Pathologists'Assistant Program.

PAA 7200 Introduction to Autopsy Techniques and Forensic Pathology Cr. 3

Comprehensive review of general and specialized techniques for performing postmortem examinations in both the hospital and medical examiner settings, with emphasis on the external examination, evisceration, and block dissection of the adult, perinatal, and pediatric decedent as it pertains to specific forensic pathology cases and presentations. Offered Spring/Summer.

Prerequisites: PAA 7060 with a minimum grade of B

Restriction(s): Enrollment is limited to Graduate level students; enrollment is limited to students with a major in Pathologists'Assistant Program.

Course Material Fees: \$300

Equivalent: MS 4200

PAA 7210 Introduction to Autopsy Techniques and Forensic Pathology: Laboratory Cr. 1

Comprehensive review of general and specialized techniques for performing postmortem examinations in both the hospital and medical examiner settings with emphasis on the external examination, evisceration, and block dissection of the adult, perinatal, and pediatric decedent. Focus on developing techniques for the external examination of adult and pediatric cadaveric specimens, toxicology retrieval, evisceration techniques, and appropriate block dissection methodology and procedures. Offered Spring/Summer.

Prerequisites: PAA 7060 with a minimum grade of B and PAA 7061 with a minimum grade of B

Restriction(s): Enrollment is limited to Graduate level students; enrollment is limited to students with a major in Pathologists'Assistant Program.

PAA 7250 Clinical Academic Pathology I Cr. 3

Systemic pathologies affecting the following organ and organ systems: white blood cells, lymph nodes, spleen and thymus, red blood cells and bleeding disorders, peripheral nerve and skeletal muscles, CNS, the skin, and the bones, joints and soft tissue tumors. Concepts of molecular diagnostics are integrated when appropriate. Offered Fall.

Corequisite: PAA 5020

Restriction(s): Enrollment is limited to Graduate level students; enrollment is limited to students with a major in Pathologists'Assistant Program.

PAA 7251 Clinical Academic Pathology II Cr. 3

Continuation of PAA 5020 and PAA 7250. Systemic pathologies affecting the following organ and organ systems: the blood vessels and heart, the lung, head, and neck, the gastrointestinal tract, liver and gallbladder, and the eye. Concepts of molecular diagnostics are integrated when appropriate. Offered Winter.

Prerequisite: PAA 7060 with a minimum grade of B and PAA 7250 with a minimum grade of B

Restriction(s): Enrollment is limited to Graduate level students; enrollment is limited to students with a major in Pathologists'Assistant Program.

PAA 7252 Clinical Academic Pathology III Cr. 3

Continuation PAA 7250 and 7251. Systemic pathologies affecting the following organ and organ systems: the kidney, the lower urinary tract and male genital system, the female genital tract, the breast, the endocrine system and the pancreas. Concepts of molecular diagnostics are integrated when appropriate. Offered Spring/Summer.

Prerequisites: PAA 5020 with a minimum grade of C and PAA 7250 with a minimum grade of C and PAA 7251 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students; enrollment is limited to students with a major in Pathologists'Assistant Program.

PAA 7420 Future Trends in Pathology Practice and Education Methodology Cr. 2

Group discussion of trends associated with healthcare, patient care, technology, legal issues, education methodology, licensure and accreditation issues; medical ethics, safety, medicolegal, and quality management in anatomic, surgical and autopsy pathology are covered. Presentations lead to recommendations for future best practices in a variety of pathology settings. Students present research findings via PowerPoint and in a seminar format. Offered Spring/Summer.

Restriction(s): Enrollment is limited to Graduate level students; enrollment is limited to students with a major in Pathologists'Assistant Program.

PAA 7500 Clinical Autopsy Pathology Cr. 1

Clinical autopsy procedures, including data retention, dissection techniques, selection of tissue for microscopic examination, and methods of body restoration prior to release in clinical facilities. Course addresses NAACLS competency levels for medical autopsy techniques (adult) and medical autopsy techniques (pediatric). Offered Fall.

Restriction(s): Enrollment is limited to Graduate level students; enrollment is limited to students with a major in Pathologists'Assistant Program.

Course Material Fees: \$100

PAA 7550 Clinical Histopathologic Technique Cr. 2

Organization of a histology laboratory, instrumentation and safety; advanced staining techniques including immunohistochemistry; frozen sections, tumor triage and proper handling of specimens for processing and assessment of clinical cases. Offered Fall.

Prerequisite: PAA 6560 with a minimum grade of C and PAA 6150 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students; enrollment is limited to students with a major in Pathologists'Assistant Program.

Course Material Fees: \$100

PAA 7600 Clinical Pediatric Pathology Cr. 3

Embryological basis of pediatric and childhood diseases along with adult presentations. Human embryological correlations to clinical settings: case study analysis specific to the pathologists' assistant; clinical evaluation of pediatric pathology. Recognition of anatomical presentations with embryological development in normal and diseased states. Offered Fall.

Prerequisite: PAA 5050 with a minimum grade of C and PAA 6061 with a minimum grade of C and PAA 7060 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students; enrollment is limited to students with a major in Pathologists'Assistant Program.

PAA 7650 Surgical Pathology I Cr. 5

Application of principles, theories, and clinical practices related to grossing (simple) surgical dissections. Addresses NAACLS competency levels associated with adult and pediatric surgical pathology techniques. Offered Fall.

Prerequisite: PAA 5050 with a minimum grade of C and PAA 7060 with a minimum grade of C and PAA 7250 with a minimum grade of C and PAA 7251 with a minimum grade of C and PAA 7252 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students; enrollment is limited to students with a major in Pathologists'Assistant Program.

Course Material Fees: \$100

PAA 7651 Surgical Pathology II Cr. 5

Application of principles, theories, and clinical practices related to gross (simple and complex) surgical dissections. Addresses NAACLS competency levels associated with adult and pediatric surgical pathology techniques. Offered Winter.

Prerequisite: PAA 5050 with a minimum grade of C and PAA 7060 with a minimum grade of C and PAA 7250 with a minimum grade of C and PAA 7251 with a minimum grade of C and PAA 7252 with a minimum grade of C and PAA 7650 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students; enrollment is limited to students with a major in Pathologists'Assistant Program.

Course Material Fees: \$100

PAA 7652 Surgical Pathology III Cr. 5

Application of principles, theories, and clinical practices related to gross (simple and complex) surgical dissections. Addresses NAACLS competency levels associated with adult and pediatric surgical pathology techniques. Offered Spring/Summer.

Prerequisite: PAA 5050 with a minimum grade of C and PAA 7060 with a minimum grade of C and PAA 7250 with a minimum grade of C and PAA 7251 with a minimum grade of C and PAA 7650 with a minimum grade of C and PAA 7651 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students; enrollment is limited to students with a major in Pathologists'Assistant Program.

Course Material Fees: \$100

PAA 7700 Forensic Pathology and Techniques Cr. 5

Forensic autopsy techniques specific to the Pathologists' Assistant and compliant with NAACLS competency levels associated with adult and pediatric cases; forensic toxicology specimen collection and processing; forensic techniques associated with determining cause manner and mechanism of death; techniques of photographic record keeping and body release. Offered Winter.

Prerequisite: PAA 6061 with a minimum grade of C and PAA 7060 with a minimum grade of C and PAA 7200 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students; enrollment is limited to students with a major in Pathologists'Assistant Program.

Course Material Fees: \$100

PAA 7750 Clinical Laboratory Management in Anatomic Pathology Cr. 2

The clinical application of interpersonal and technical management techniques for the clinical and anatomic pathology laboratory settings. Quality management techniques, policies, protocols and best practices for the pathologists' assistant. Safety mandates and protocols as applied to anatomic and surgical pathology. Discussion and analysis of governmental mandates covering laboratory improvement (CLIA). Offered Winter.

Prerequisite: PAA 6420 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

PAA 7800 Clinical and Forensic Photography Cr. 2

Techniques required to photographically record gross and microscopic specimens as presented from surgery and in surgical grossing, as well as from the forensic setting resulting in a PA student E-portfolio. Offered Spring/Summer.

Prerequisite: PAA 5100 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students; enrollment is limited to students with a major in Pathologists'Assistant Program.

Course Material Fees: \$100

PAA 7890 Seminar in Anatomic and Surgical Pathology Cr. 2

Clinically based capstone seminar course. Invited clinical specialists in anatomic and surgical pathology address contemporary issues in pathology allowing dialogue between pathologists' assistant students and pathologists. Offered Spring/Summer.

Prerequisite: PAA 7650 with a minimum grade of C and PAA 7651 with a minimum grade of C

Corequisite: PAA 7652

Restriction(s): Enrollment is limited to Graduate level students; enrollment is limited to students with a major in Pathologists'Assistant Program.

PAS - PHYSICIAN ASSISTANT STUDIES

PAS 7000 Anatomy for Physician Assistants I Cr. 2

Structural and functional anatomy of the human body relevant to physician assistant responsibilities. All major regions of body will be studied. Regional dissections; programmed instruction; lectures and demonstrations with emphasis on use of gross anatomy in physical diagnosis. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students in the Pharmacy and Health Sciences; enrollment is limited to students with a major in Physician Assistant Studies.

Course Material Fees: \$250

PAS 7001 Anatomy for Physician Assistants II Cr. 1

Continuation of PAS 7000. Structural and functional anatomy of the human body relevant to physician assistant responsibilities. All major regions of body will be studied. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students in the Pharmacy and Health Sciences; enrollment is limited to students with a major in Physician Assistant Studies.

PAS 7010 Clinical Medicine I Cr. 3

Introduction to etiology, manifestation, diagnosis, prevention and treatment of disease; includes: all major organ systems and disease entities. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students in the Pharmacy and Health Sciences; enrollment is limited to students with a major in Physician Assistant Studies.

Course Material Fees: \$30

PAS 7020 Clinical Medicine II Cr. 3

Continuation of PAS 7010. Offered Yearly.

Prerequisite: PAS 7010 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students in the Pharmacy and Health Sciences; enrollment is limited to students with a major in Physician Assistant Studies.

Course Material Fees: \$30

PAS 7030 Clinical Medicine III Cr. 4

Continuation of PAS 7020. Offered Yearly.

Prerequisite: PAS 7020 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students in the Pharmacy and Health Sciences; enrollment is limited to students with a major in Physician Assistant Studies.

Course Material Fees: \$30

PAS 7040 Patient Evaluation I Cr. 2

The elicitation and recording of complete medical history, including a complete and comprehensive physical examination. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students in the Pharmacy and Health Sciences; enrollment is limited to students with a major in Physician Assistant Studies.

Course Material Fees: \$324

PAS 7050 Patient Evaluation II Cr. 2

Continuation of PAS 7040. Offered Yearly.

Prerequisite: PAS 7040 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students in the Pharmacy and Health Sciences; enrollment is limited to students with a major in Physician Assistant Studies.

Course Material Fees: \$222

PAS 7060 Patient Evaluation III Cr. 3

Continuation of PAS 7050. Offered Yearly.

Prerequisite: PAS 7050 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students in the Pharmacy and Health Sciences; enrollment is limited to students with a major in Physician Assistant Studies.

Course Material Fees: \$383

PAS 7070 Health Care Issues I Cr. 1

Specialized topics in the care of patients, medical research, as well as issues concerning the delivery of health care to the public. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students in the Pharmacy and Health Sciences; enrollment is limited to students with a major in Physician Assistant Studies.

Course Material Fees: \$25

PAS 7080 Health Care Issues II Cr. 1

Continuation of PAS 7070. Offered Yearly.

Prerequisite: PAS 7070 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students in the Pharmacy and Health Sciences; enrollment is limited to students with a major in Physician Assistant Studies.

Course Material Fees: \$25

PAS 7090 Health Care Issues III Cr. 1

Continuation of PAS 7080. Offered Yearly.

Prerequisite: PAS 7080 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students in the Pharmacy and Health Sciences; enrollment is limited to students with a major in Physician Assistant Studies.

Course Material Fees: \$25

PAS 7100 Pharmacology I Cr. 2

Principles of pharmacologic action followed by review of major therapeutic agents in each clinical area. Major systems of the body as related to drugs and diseases. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students in the Pharmacy and Health Sciences.

Course Material Fees: \$15

PAS 7110 Pharmacology II Cr. 2

Continuation of PAS 7100, Offered Yearly.

Prerequisite: PAS 7100 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students in the Pharmacy and Health Sciences.

Course Material Fees: \$30

PAS 7500 Pathophysiology I Cr. 1

Dynamics of alterations in function in response to disease. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students in the Pharmacy and Health Sciences; enrollment is limited to students with a major in Physician Assistant Studies.

PAS 7510 Pathophysiology II Cr. 1

Continuation of PAS 7500. Offered Yearly.

Prerequisite: PAS 7500 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students in the Pharmacy and Health Sciences; enrollment is limited to students with a major in Physician Assistant Studies.

PAS 7520 Pathophysiology III Cr. 1

Continuation of PAS 7510. Offered Winter.

Prerequisite: PAS 7510 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students in the Pharmacy and Health Sciences; enrollment is limited to students with a major in Physician Assistant Studies.

PAS 8000 Internal Medicine Rotation: Practicum Cr. 4

Advanced training in internal medicine with particular emphasis on both inpatient and outpatient primary care. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students in the Pharmacy and Health Sciences.

Course Material Fees: \$393

PAS 8010 Obstetrics and Gynecology Rotation: Practicum Cr. 2

Advanced training in the problems associated with gestation, birth, and women's health. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students in the Pharmacy and Health Sciences.

Course Material Fees: \$34

PAS 8020 Emergency Medicine Rotation: Practicum Cr. 2

Advanced training in all aspects of the practice of urgent and emergency medicine. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students in the Pharmacy and Health Sciences.

Course Material Fees: \$34

PAS 8030 Pediatrics Rotation: Practicum Cr. 2

Advanced training in the care of children from birth through adolescence. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students in the Pharmacy and Health Sciences.

Course Material Fees: \$34

PAS 8040 Psychiatry Rotation: Practicum Cr. 2

Advanced training in the care of patients with psychiatric disorders. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students in the Pharmacy and Health Sciences.

Course Material Fees: \$34

PAS 8050 Surgery Rotation: Practicum Cr. 4

Examination of patients with surgical disorders, arrangement and participation in selected surgical procedures and recommendations for further evaluation and care. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students in the Pharmacy and Health Sciences.

Course Material Fees: \$40

PAS 8060 Family Medicine Rotation: Practicum Cr. 6

Advanced training in outpatient evaluation of pediatric and adult patients with emphasis on family health, lifespan, and coordination of the health care team. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students in the Pharmacy and Health Sciences.

Course Material Fees: \$60

PAS 8070 Preceptorship Cr. 2

Rotation specialized to the primary care needs of individual physician assistant students in last phase of clinical training. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students in the Pharmacy and Health Sciences.

Course Material Fees: \$279

PCS - PEACE AND CONFLICT STUDIES

PCS 2000 Introduction to Peace and Conflict Studies Cr. 3

Introduction to the peace and conflict studies co-major. Survey, ranging from biology and conflict among animals to disputes involving the individual, the family, the neighborhood and region, the nation and global or international community. Definitions and approaches to peace. (Some sections linked to Peace and Justice Learning Community.) Offered Yearly.

Equivalent: HIS 2500, PS 2820

PCS 2010 Topics in Peace and Conflict Studies Cr. 1-4

Special topics relating to peace and conflict studies. Offered Every Term.

Equivalent: HIS 2520, PS 2830

Repeatable for 12 Credits

PCS 2020 Science, Technology, and War Cr. 4

Modern weapons, nuclear and otherwise are becoming increasingly available and dangerous; people with grievances seem eager to use them. Science and technology, as well as constraints of bureaucracy and society underpin weapons development and use, as technologies affect prospects and results of war and peace. History of humanity and its tools of war. Offered Yearly.

Equivalent: HIS 2510, PHY 2020, PS 2440

PCS 2050 The Study of Non-Violence Cr. 3

Satisfies General Education Requirement: Diversity Equity Incl Inquiry Intellectual and social roots of non-violence and the practice of non-violence in various societies and people's life styles. Historical and political forces and movements related to non-violence. (Some sections linked to Peace and Justice Learning Community.) Offered Every Term.

Equivalent: HIS 2530, PS 2550, SOC 2050

PCS 5000 Dispute Resolution Cr. 3

Overview of the processes and actors in the field of dispute resolution including negotiation, mediation, arbitration, and conciliation. Offered Yearly.

Equivalent: CRJ 5994, PS 5890, PSY 5710

PCS 5010 Community or International Internship Cr. 3

Internship in dispute resolution, research, social service or international agencies in Detroit area, nationally, or abroad. Offered Every Term.

Prerequisites: PCS 2000 with a minimum grade of D-

PCS 5100 Advanced Special Topics Cr. 3-4

Topics may include: study of negotiating organizations and processes, advanced theory to practice applications, in-depth specialization. Offered for undergraduate credit only. Offered Intermittently.

PCS 5500 Ethnicity Cr. 4

Offered Yearly.

Equivalent: AFS 5740, PS 5740

PCS 5999 Special Readings/Research Cr. 1-4

Intensive study with faculty member on peace-related topic; may include study abroad projects. For co-majors and non-majors. Offered Every Term.

Repeatable for 4 Credits

PCS 6000 Senior Seminar in Peace and Conflict Studies Cr. 3

Students work with faculty on a semester research or creative project relevant to concepts studied in the program; serves as capstone program evaluative course. Offered for undergraduate credit only. Offered Every Term.

Restriction(s): Enrollment is limited to Undergraduate level students; enrollment limited to students with a class of Senior.

PCS 6050 Topics in Peace, Security and Non-Violence Cr. 3

Various graduate-level topics in Peace and Security Studies. Offered for graduate credit only. Offered Intermittently.

Restriction(s): Enrollment is limited to Graduate level students.

PCS 6100 Introduction to Graduate Peace and Security Studies Cr. 3

Survey of the peace and security studies fields at the graduate level. Offered for graduate credit only. Offered Fall, Winter.

Restriction(s): Enrollment is limited to Graduate level students.

Equivalent: PS 6100

PCS 7100 Peace Making: Regional, Technological, Transnational Perspectives Cr. 3

The prerequisites for peaceful and secure borders and peace settlements. Offered Winter.

Restriction(s): Enrollment is limited to Graduate level students.

PCS 7800 Graduate Practicum in Peace and Security Studies Cr. 3-4

Field work or applied research in Peace and Security Studies. Offered Every Term.

Prerequisite: PCS 6100 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

PH - PUBLIC HEALTH

PH 2100 Introduction to Public Health Cr. 3

Satisfies General Education Requirement: Life Sciences, Natural Scientific Inquiry

Provides both an overview of the principles and practice of public health and basic information needed to understand and analyze a variety of individual-level and population-level health problems. This course is intended for students with no previous course work in public health. Offered Every Term.

PH 3050 Mental Health and Crime Cr. 3

Provides a comprehensive overview of the issues and challenges located at the intersection of mental health/illness and the criminal justice system. Attention will be focused on a range of topics, including, but not limited to, the definition of mental illness, deinstitutionalization and criminalization of the mentally ill, the impact of mental illness on criminal proceedings, treatment/intervention effectiveness, and the reentry/reintegration of mentally ill individuals. Offered Fall.

Equivalent: CRJ 3050

PH 3100 Social and Behavioral Aspects of Public Health Cr. 3

Satisfies General Education Requirement: Social Inquiry, Social Sciences Examines the social and behavioral aspects of health, illness, and health care, and help students develop a basic understanding of the societal factors that influence health status and public health interventions. Offered Every Term.

PH 3200 Introduction to Biostatistics Cr. 4

Provides an introduction to statistical methods used in biological and medical research and covers elementary probability theory, basic concepts of statistical inference, sampling theory, regression and correlation methods, analysis of variance, and study design. In addition, the course will examine statistical applications in biomedicine, epidemiology, public health and the life sciences. Offered Every Term.

Prerequisites: PH 2100 with a minimum grade of C and MAT Permit to Reg ACT/SAT with a test score minimum of 4 or Math Permit to Reg - L1-L4 with a test score minimum of 4 or STA 1020 with a minimum grade of C or MAT 1800 with a minimum grade of C or MAT 2010 with a minimum grade of C or MAT 2020 with a minimum grade of C or STA 2210 with a minimum grade of C

PH 3300 Epidemiology Cr. 4

Introduces the basic concepts of epidemiology as applied to public health problems. Emphasis is placed on the principles and methods of epidemiologic investigation, including the appropriate summaries, displays, and analysis of data, and the use of classical statistical and other methodological approaches to describe the health of populations. Offered Every Term.

Prerequisites: PH 2100 with a minimum grade of C and MAT Permit to Reg ACT/SAT with a test score minimum of 4 or Math Permit to Reg - L1-L4 with a test score minimum of 4 or STA 1020 with a minimum grade of C or MAT 1800 with a minimum grade of C or MAT 2010 with a minimum grade of C or MAT 2020 with a minimum grade of C or STA 2210 with a minimum grade of C

PH 3410 Global Health Cr. 3

Satisfies General Education Requirement: Global Learning Inquiry, Social Inquiry, Social Sciences

Introduces students to problems of disease and disorder worldwide and looks at various efforts to define and address these problems through a social science perspective. Offered Winter.

Equivalent: ANT 3410, GLS 3410

PH 3500 Environmental Health Cr. 3

Using a public health perspective, the course will provide students with an overview of the key areas of environmental health, and it will cover factors associated with the development of environmental health problems. Students will gain a system-level understanding of the interaction of individuals and communities with the environment, the potential impact of environmental agents on population, and specific applications of public health concepts to environmental health. Offered Every Term.

PH 3550 Geography and Public Health Cr. 3

Introduces the field of medical geography, or the study of geographic aspects of health and disease. Students will gain an understanding of how geography as a discipline contributes to an understanding health and health care, and how social and economic contexts impact health. Students will utilize mapping techniques to examine the spatial patterns of disease and risk factors that may contribute to disease. Offered Yearly.
Equivalent: US 3550

PH 3600 Special Topics in Public Health Cr. 3

Topics may include but are not limited to an examination of health in families, health in the workplace, health across the life course, health of urban communities, community health interventions, access to health care, and health services administration. Offered Intermittently.

Repeatable for 6 Credits

PH 3900 LGBT Health Cr. 3

Centers on LGBT voices and takes an intersectional socioecological approach to exploring social determinants of health, and a range of health outcomes and challenges in LGBT communities; and the implications for public health research, policy, and practice to improve LGBT health. Introduces students to key conceptual frameworks for understanding LGBT health across the lifespan and promoting health equity. Offered Yearly.

Prerequisite: PH 2100 with a minimum grade of C or PH 3100 with a minimum grade of C or GSW 2500 with a minimum grade of C or GSW 2600 with a minimum grade of C or SOC 1020 with a minimum grade of C or SOC 2202 with a minimum grade of C or SOC 2300 with a minimum grade of C

Equivalent: SOC 3900

PH 4050 Crime and Public Health Cr. 3

Introduces students to the interface between public health and criminal justice in the United States, focusing on different aspects of the relationship. It will first describe the newly emerged epidemiological criminology, and then analyze a variety of topics on crime and public health, including, but not limited to, the health of incarcerated populations, the health of criminal justice professionals, health consequences of crime and risk behaviors, public health and law, gangs and gang violence, mental health and substance abuse, environmental justice, and public health interventions with criminal justice populations. Offered Winter.

Equivalent: CRJ 4050

PH 4100 Public Health Principles and Practice Cr. 2

This required course examines practice-based approaches to improve public health. The focus will be on learning methods for community health improvement, from assessment to finding and implementing evidence-based public health interventions. Offered Every Term.

Prerequisites: PH 2100 with a minimum grade of C and PH 3100 with a minimum grade of C and PH 3200 with a minimum grade of C and PH 3300 with a minimum grade of C

Corequisite: PH 4150

Restriction(s): Enrollment limited to students with a class of Senior; enrollment is limited to students with a major in Public Health or Public Health Honors.

PH 4150 Public Health Practicum Cr. 2

This required course is a practice-based experience that provides a hands-on, diverse approach to learning about public health practice. Students will complete a 90-hour practicum experience in a local community organization or other public health setting. Offered Every Term.

Prerequisites: PH 2100 with a minimum grade of C and PH 3100 with a minimum grade of C and PH 3200 with a minimum grade of C and PH 3300 with a minimum grade of C

Corequisite: PH 4100

Restriction(s): Enrollment limited to students with a class of Senior; enrollment is limited to students with a major in Public Health or Public Health Honors.

PH 4400 Methodological Approaches in Public Health Cr. 4

This course provides students with a review of methodological approaches in public health. Students will analyze the benefits and costs of each methodological approach, and how to best apply each method in real-world settings. Students will also critically assess scientific literature in core areas of public health. The content and assignments for this course are designed to prepare students for the Capstone Course (PH 5100). Offered Every Term.

Prerequisites: PH 2100 with a minimum grade of C and PH 3100 with a minimum grade of C and PH 3200 with a minimum grade of C and PH 3300 with a minimum grade of C

Restriction(s): Enrollment is limited to students with a major in Public Health or Public Health Honors.

PH 4600 Special Topics in Health Disparities Cr. 3

Topics may include but are not limited to an examination of health disparities by race or ethnicity, gender, income, age, nationality, or residential location. Offered Intermittently.

Repeatable for 6 Credits

PH 4900 Directed Study in Public Health Cr. 1-3

Course requirements include directed readings and participation in public health research, under the direct supervision of a faculty member affiliated with the Bachelors in Public Health program. Offered Every Term.

Repeatable for 3 Credits

PH 5100 Capstone Course in Public Health Cr. 4

Satisfies General Education Requirement: Writing Intensive Competency

This capstone course provides the culminating curricular experience for students enrolled in Wayne State's Bachelor's program in Public Health. A major part of the final course grade is based on the student's completion of an individualized capstone project. Offered Every Term.

Prerequisites: PH 2100 with a minimum grade of C and PH 3100 with a minimum grade of C and PH 3200 with a minimum grade of C and PH 3300 with a minimum grade of C and PH 4100 with a minimum grade of C and PH 4150 with a minimum grade of C and PH 4400 with a minimum grade of C

PHA - PHARMACY

PHA 4105 Pathophysiology 1 Cr. 3

Advanced pathophysiologic concepts affecting the adult human using a research-based, system-focused approach, including etiology, pathogenesis and clinical manifestations of commonly found/seen altered health states. Offered Fall.

Restriction(s): Enrollment limited to students in the Doctor of Pharmacy program.

PHA 4125 Drug Literature Evaluation and Foundations of Research Cr. 3

Critical evaluation of the medical literature and provision of foundational research skills. Offered Fall.

Restriction(s): Enrollment limited to students in the Doctor of Pharmacy program.

PHA 4205 Pathophysiology II Cr. 2

Advanced pathophysiologic concepts affecting the adult human using a research-based, system-focused approach, including etiology, pathogenesis and clinical manifestations of commonly found/seen altered health states. Offered Winter.

Prerequisite: PHA 4105

Restriction(s): Enrollment limited to students in the Doctor of Pharmacy program.

PHA 4225 Principles of Pharmacotherapy I: Respiratory, Gastroenterology, Allergy, Ophthalmology Cr. 4

Principles of medicinal chemistry, pharmacology, and therapeutics as applied to the treatment of gastroenterologic, pulmonary, ophthalmologic, and allergic disorders, and basic self-care. Offered Winter.

Prerequisite: PHA 4105

Restriction(s): Enrollment limited to students in the Doctor of Pharmacy program.

Course Material Fees: \$70

PHA 4235 Pharmacotherapeutic Problem Solving I: Respiratory, Gastroenterology, Allergy, Ophthalmology Cr. 2

Problem-based learning focusing on pathophysiology, pharmacology, medicinal chemistry and pharmacotherapeutics of respiratory, gastroenterologic, allergic, and ophthalmologic disorders, and basic self-care. Offered Winter.

Restriction(s): Enrollment limited to students in the Doctor of Pharmacy program.

Course Material Fees: \$85

PHA 4395 Research Scholars: Research Development Cr. 2

Development of basic foundations of research practices for students pursuing the Research Scholars path. Offered Spring/Summer.

Restriction(s): Enrollment limited to students in the Doctor of Pharmacy program.

PHA 5110 Pharmacogenomics Cr. 2

Principles and applications of human genetics and genomics in drug therapy optimization, patient care, and counseling. Offered Spring/Summer.

Restriction(s): Enrollment is limited to Professional level students; enrollment limited to students with a class of PharmD Yr 2 or PharmD Yr 3.

PHA 5115 Principles of Pharmacotherapy II: Cardiology, Nephrology Cr. 5

Principles of medicinal chemistry, pharmacology, and therapeutics as applied to the treatment of cardiovascular and renal disease. Offered Fall.

Restriction(s): Enrollment limited to students in the Doctor of Pharmacy program.

PHA 5125 Principles of Pharmacotherapy III: Endocrinology, Gynecology, Urology Cr. 4

Principles of medicinal chemistry, pharmacology, and therapeutics as applied to the treatment of endocrinologic, gynecologic, and urologic disorders. Offered Fall.

Restriction(s): Enrollment limited to students in the Doctor of Pharmacy program.

PHA 5135 Pharmacotherapeutic Problem Solving II :Nephrology, Cardiology, Endocrinology, Gynecology, Urology Cr. 2

Problem-based learning focusing on pathophysiology, pharmacology, medicinal chemistry and pharmacotherapeutics of nephrologic, cardiologic, endocrinologic, and gynecologic conditions.

Restriction(s): Enrollment limited to students in the Doctor of Pharmacy program.

PHA 5195 Research Scholars: Research Conduct Elective Cr. 1-4

Conducting research project for students pursuing the Research Scholars path. Offered Every Term.

Prerequisite: PHA 4395

Restriction(s): Enrollment limited to students in the Doctor of Pharmacy program.

Repeatable for 4 Credits

PHA 5215 Principles of Pharmacotherapy IV: Infectious Diseases Cr. 4

The chemistry, pharmacology, and toxicology of anti-infective agents and the pathophysiology, microbiology, and therapeutics of infectious diseases. Offered Winter.

Restriction(s): Enrollment limited to students in the Doctor of Pharmacy program.

PHA 5225 Principles of Pharmacotherapy V: Neurology, Psychiatry Cr. 4

Medicinal chemistry, pharmacology and therapeutics of neurologic and psychiatric disorders. Offered Winter.

Restriction(s): Enrollment limited to students in the Doctor of Pharmacy program.

Course Material Fees: \$70

PHA 5235 Pharmacotherapeutic Problem Solving III: Infectious Diseases, Neurology, Psychiatry Cr. 2

Problem-based learning focusing on pathophysiology, pharmacology, medicinal chemistry and pharmacotherapeutics of infectious, neurologic, and psychiatric diseases. Offered Winter.

Restriction(s): Enrollment limited to students in the Doctor of Pharmacy program.

Course Material Fees: \$85

PHA 5280 Principles of Pharmacotherapy VIII Cr. 2-3

Pharmacotherapeutic principles of special populations, men's and women's health, patient problem solving. Offered Winter.

Corequisite: PHA 5275

Restriction(s): Enrollment is limited to Professional level students; enrollment limited to students in the Pharmacy and Health Sciences.

PHA 6125 Principles of Pharmacotherapy VI: Oncology, Advanced Immunology Cr. 3

Principles of medicinal chemistry, pharmacology, and therapeutics as applied to the treatment of oncologic and immunologic disorders Offered Fall.

Restriction(s): Enrollment limited to students in the Doctor of Pharmacy program.

Course Material Fees: \$70

PHA 6135 Pharmacotherapeutic Problem Solving IV: Oncology and Advanced Pharmacotherapeutics Cr. 3

Problem-based learning focusing on pathophysiology, pharmacology, medicinal chemistry and pharmacotherapeutics of neoplastic disorders and advanced pharmacotherapeutics. Offered Fall.

Restriction(s): Enrollment limited to students in the Doctor of Pharmacy program.

PHA 6235 Pharmacotherapeutic Problem Solving V: Drug Induced Diseases Cr. 2

Problem-based learning focusing on pathophysiology, pharmacology, medicinal chemistry, and pharmacotherapeutics of drug-induced diseases. Offered Winter.

Restriction(s): Enrollment limited to students in the Doctor of Pharmacy program.

Course Material Fees: \$85

PHC - PHARMACOLOGY

PHC 5030 Individual Research in Pharmacology Cr. 2-5

Direct participation in laboratory research into the ways drugs affect cell processes, under the supervision of a departmental faculty advisor. Introduction to experimental protocol and current related scientific literature. Offered for graduate credit only. Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students.

PHC 6500 Drugs and the Addictive Process Cr. 3

Introduction to general principles of drug action; specific pharmacologic, toxicologic, and pathologic effects of abused drugs; bio-psycho-social bases for addiction. Offered for graduate credit only. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate level students.

PHC 7010 Pharmacology Lecture Cr. 4

Introductory presentation of drug actions on living tissue. Offered Winter.

Restriction(s): Enrollment is limited to Graduate level students.

PHC 7220 Molecular Biology of Cancer Development Cr. 3

Topics covered include: genetics and molecular basis of normal cell transformation into malignant cancer cells; and molecular mechanisms that are fundamental to the regulation of cell growth, development, and differentiation. The students are expected to present and participate in discussions of one or more key recent papers that are relevant to the lectures. Students with a strong background in biology/molecular biology are encouraged to apply. Offered Every Other Year.

Prerequisite: IBS 7015 with a minimum grade of C and CB 7210 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

Equivalent: CB 7220

PHC 7240 Principles of Cancer Therapy Cr. 2

Continuation of the principles of cancer therapy taught in CB 7210. Concepts relating to tumor biology and the biochemistry and pharmacology of both classic and targeted agents are covered. Offered Every Other Winter.

Prerequisite: IBS 7015 with a minimum grade of C and CB 7210 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

Equivalent: CB 7240

PHC 7410 Principles of Toxicology Cr. 3

Basic concepts and principles of toxicology, including toxicity of major classes of chemicals (pesticides, solvents, metals) and organ systems (renal, immune, digestive, neuro and respiratory) affected. Offered Fall.

Restriction(s): Enrollment is limited to Graduate level students.

Equivalent: BIO 7011

PHC 7650 Advanced Topics in Pharmacology Cr. 1-6

Modules of instruction in sharply-defined areas of current research in pharmacology and related disciplines. Each module will cover fundamental concepts, essential knowledge base, research protocols and techniques, and future issues. Offered Every Term.

Prerequisite: PHC 7010 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

Repeatable for 6 Credits

PHC 7700 Recent Developments in Pharmacology Cr. 1-4

Selected topics and readings in pharmacology. Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students.

Repeatable for 12 Credits

PHC 7710 Individual Studies in Pharmacology Cr. 1-8

Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students; enrollment is limited to students with a major in Pharmacology; enrollment limited to students in a Doctor of Philosophy or Master of Science degrees.

Repeatable for 8 Credits

PHC 7890 Seminar Cr. 1

Assigned readings and student presentation; faculty and outside speakers. Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students; enrollment is limited to students with a major in Pharmacology; enrollment limited to students in a Doctor of Philosophy or Master of Science degrees.

Repeatable for 12 Credits

PHC 7996 Research Cr. 1-20

Special research topics in specified areas arranged with individual faculty members. Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students.

Repeatable for 30 Credits

PHC 8999 Master's Thesis Research and Direction Cr. 1-8

Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students with a class of Candidate Masters.

Repeatable for 8 Credits

PHC 9990 Pre-Doctoral Candidacy Research Cr. 1-8

Research in preparation for doctoral dissertation. Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students.

Repeatable for 12 Credits

PHC 9991 Doctoral Candidate Status I: Dissertation Research and Direction Cr. 7.5

Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students.

PHC 9992 Doctoral Candidate Status II: Dissertation Research and Direction Cr. 7.5

Offered Every Term.

Prerequisite: PHC 9991 with a minimum grade of S

Restriction(s): Enrollment is limited to Graduate level students.

PHC 9993 Doctoral Candidate Status III: Dissertation Research and Direction Cr. 7.5

Offered Every Term.

Prerequisite: PHC 9992 with a minimum grade of S

Restriction(s): Enrollment is limited to Graduate level students.

PHC 9994 Doctoral Candidate Status IV: Dissertation Research and Direction Cr. 7.5

Offered Every Term.

Prerequisite: PHC 9993 with a minimum grade of S

Restriction(s): Enrollment is limited to Graduate level students.

PHC 9995 Candidate Maintenance Status: Doctoral Dissertation Research and Direction Cr. 0

Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students.

Course Material Fees: \$370.26

Repeatable for 0 Credits

PHI - PHILOSOPHY

PHI 1010 Introduction to Philosophy Cr. 4

Satisfies General Education Requirement: Cultural Inquiry, Philosophy Letters

Survey of some major questions that have occupied philosophers throughout history, such as Does God exist? What is a good person? Do we have free will? Is the mind the same as the brain? What can we really know? Course will acquaint students with major figures both historical and contemporary. Offered Every Term.

PHI 1020 Honors Introduction to Philosophy Cr. 3-4

Satisfies General Education Requirement: Cultural Inquiry, Honors Section, Philosophy Letters

Survey of some major questions that have occupied philosophers throughout history, such as Does God exist? What is a good person? Do we have free will? What can we really know? Course will acquaint students with major figures both historical and contemporary. Offered Intermittently.

PHI 1050 Critical Thinking Cr. 3

Satisfies General Education Requirement: Critical Thinking Competency Knowledge and skills relevant to the critical evaluation of claims and arguments. Topics will include: the formulation and identification of deductively and inductively warranted conclusions from available evidence; the assessment of the strengths of arguments; the assessment of consistency, inconsistency, implications, and equivalence among statements; the identification of fallacious patterns of inference; and the recognition of explanatory relations among statements. Offered Every Term.

PHI 1070 Reasoning and Decision Cr. 3

Satisfies General Education Requirement: Quantitative Experience Comp Students develop quantitative reasoning skills such as statistical analysis and probabilistic reasoning. Offered Every Term.

PHI 1100 Contemporary Moral Issues Cr. 3

Satisfies General Education Requirement: Cultural Inquiry, Diversity Equity Incl Inquiry, Philosophy Letters

Critical discussion of contemporary moral issues including pornography, adultery, same-sex marriage, abortion, preferential treatment, obligations to the poor, capital punishment, terrorism, and others. Offered Yearly.

Repeatable for 9 Credits

PHI 1110 Ethical Issues in Health Care Cr. 3

Satisfies General Education Requirement: Cultural Inquiry, Diversity Equity Incl Inquiry, Philosophy Letters

Survey of moral issues that arise in the practice of medicine and in pursuit of medical knowledge: abortion, euthanasia, experimentation on human subjects, informed consent, rights to health care, genetic engineering, the concepts of death, health and disease. Offered Yearly.

PHI 1120 Professional Ethics Cr. 3

Satisfies General Education Requirement: Cultural Inquiry, Philosophy Letters

Critical examination of moral issues in the workplace, including: discrimination and preferential treatment, sexual harassment, whistleblowing, privacy and disclosure, corporate social responsibility. No credit after PHI 1110. Offered Yearly.

PHI 1130 Environmental Ethics Cr. 3

Satisfies General Education Requirement: Cultural Inquiry, Philosophy Letters

Is the natural world something to be valued in itself, or is its value exhausted by the uses human beings derive from it? This course introduces students to some of the major views on the subject, anthropocentric (human-centered) and non-anthropocentric. Offered Yearly.

Restriction(s): Enrollment is limited to Undergraduate level students.

PHI 1200 Life and Death Cr. 3

Satisfies General Education Requirement: Cultural Inquiry, Philosophy Letters

Central philosophical and religious questions about life and death, and the enterprise of answering these questions through reasoning and argument. What is it to be alive, and to die? Do we cease to exist when we die, or might we continue to exist in an afterlife following our deaths? Should we fear or regret the fact that we will die someday, or should we be indifferent to it? Why is killing wrong? Is it always wrong to prevent a life from beginning, or to help someone bring his or her own life to an end? What, if anything, makes a life meaningful? We will study the ways in which these questions are raised and answered in a selection of classic and contemporary works of philosophy and literature. Offered Yearly.

PHI 1500 Race, Sex, and Religion Cr. 3

Satisfies General Education Requirement: Cultural Inquiry, Diversity Equity Incl Inquiry

An examination of contemporary ethical issues and controversies involving race, sex, religion, and related topics such as gender identity, class, economic injustice, immigration, and sexual orientation. Offered Fall, Winter.

PHI 2100 Ancient Greek Philosophy Cr. 3

Satisfies General Education Requirement: Cultural Inquiry, Philosophy Letters

Introduction to the Western philosophical tradition from its origins in Ancient Greece. Readings from the pre-Socratics, Plato, and Aristotle. Offered Every Other Year.

PHI 2110 Seventeenth and Eighteenth Century Philosophy Cr. 3

Satisfies General Education Requirement: Cultural Inquiry, Philosophy Letters

A survey of the views concerning knowledge and reality of the major European philosophers of the seventeenth and eighteenth centuries such as Descartes, Spinoza, Leibniz, Locke, Berkeley, Hume, and Kant. Offered Every Other Year.

PHI 2140 Ancient Greek Medicine and Psychology Cr. 3

Satisfies General Education Requirement: Cultural Inquiry

An examination of early Greek psychology and medical practice and theory. Figures and schools of thought covered include Homer, Empedocles, Hippocrates and the Hippocratic school, Plato, Aristotle, and Epicurus. Offered Fall.

PHI 2150 Chinese Philosophy Cr. 3

Satisfies General Education Requirement: Foreign Culture, Global Learning Inquiry

Main philosophical traditions from ancient to pre-Communist China. Readings from Confucianism, Taoism, Mohism, Legalism, Buddhism, Neo-Confucianism, and the Chinese Enlightenment. Offered Winter.

Restriction(s): Enrollment is limited to Undergraduate level students.

PHI 2170 Islamic and Near Eastern Philosophy Cr. 3

Satisfies General Education Requirement: Global Learning Inquiry

An examination of major figures and movements in Islamic and Near Eastern philosophy. Offered Fall.

Equivalent: NE 2170

PHI 2320 Introduction to Ethics Cr. 3

Satisfies General Education Requirement: Cultural Inquiry, Philosophy Letters

An introduction to some classical and modern views concerning such questions as: What determines the rightness and wrongness of actions? What is the nature of moral reasoning? What constitutes a moral life? Offered Every Term.

PHI 2330 Introduction to Social and Political Philosophy Cr. 3

Introduction to the basic issues of political philosophy, such as the nature of the state, the ways of justifying its power and authority over its citizens; a philosophical analysis of central concepts like those of freedom, justice, and equality. Selected readings from some of the following: Plato, Aristotle, Hobbes, Locke, Rousseau, Mill, Marx, and Rawls. Offered Intermittently.

PHI 2360 Feminist Philosophy Cr. 3

Satisfies General Education Requirement: Cultural Inquiry, Diversity Equity Incl Inquiry

An examination of work by feminist philosophers. Offered Winter.

PHI 2390 Philosophy of Human Rights Cr. 3

Addresses central issues in the philosophy of human rights, including questions about the foundation, content, and application of human rights. Examines different approaches to the foundation of human rights and considers whether human rights have one unique foundation or plural foundations. Offered Fall.

PHI 2400 Introduction to the Philosophy of Religion Cr. 3

Satisfies General Education Requirement: Cultural Inquiry, Philosophy Letters

Religious beliefs provide subject matter for philosophical study; for example, Are the traditional arguments for the existence of God credible? Does the existence of evil conflict with a belief in God's omnipotence and omnibenevolence? What is the value of religious experience? Offered Intermittently.

PHI 2550 Introduction to Philosophy of Science Cr. 3

Satisfies General Education Requirement: Cultural Inquiry, Philosophy Letters

Distinguishing science from non-science; how scientific knowledge is established; what constitutes scientific progress; whether science is cumulative; the place of science in the enterprise of knowledge and rational belief. Offered Every Other Year.

PHI 2650 Philosophy of Psychology Cr. 3

Satisfies General Education Requirement: Cultural Inquiry

Central examples of these questions and proposed answers: Could we build an intelligent computer? Is our mind just a piece of software that our brain is running? Is there a "language of thought"? Are we much less rational than we think? How can we understand each other's minds? Can there be laws in psychology? What is consciousness, and can it be studied scientifically? We will address these and other questions via the work of philosophers, psychologists and cognitive scientists. Offered Winter.

Equivalent: PSY 2650

PHI 2850 Introductory Symbolic Logic Cr. 3

The logic of propositions; the general logic of predicates and relations. Offered Yearly.

Equivalent: LIN 1850

PHI 2860 Honors Introductory Symbolic Logic Cr. 3

Satisfies General Education Requirement: Honors Section
See PHI 1850. Offered Yearly.

Equivalent: LIN 1860

PHI 3270 Foundations of Law Cr. 3

The legal system we live under commands, forbids, punishes, and defines responsibilities and harm. Common-sense morality: what is it, and what is its relation to law? Statutory interpretation: do judges create new law? Punishment: why do we have it, and what rights do the accused have? What is the legal concept of harm and responsibility? Offered Every Other Year.

Prerequisites: PHI 2000-6XXX with a minimum grade of D- or CLA 1010 with a minimum grade of D- or PS 1010-1030 with a minimum grade of D-

PHI 3450 Existentialism Cr. 3

Examines major philosophical views and figures in the Existentialist tradition, such as Sartre, Camus, Heidegger, de Beauvoir, Buber, Ortega y Gasset, Kierkegaard, and Nietzsche. Offered Fall.

PHI 3500 Theory of Knowledge Cr. 3

Satisfies General Education Requirement: Cultural Inquiry, Philosophy Letters

The distinction between knowledge and belief is germane to every field of inquiry. What is the difference between knowledge and belief? Do we know anything at all? If so, how? Are we ever in a position of being certain about beliefs pertaining to an objective world? Is our belief in an objective world based on our subjective experiences? Offered Every Term.

PHI 3550 Metaphysics Cr. 3

Satisfies General Education Requirement: Cultural Inquiry, Philosophy Letters

Survey and examination of some of the enduring questions of metaphysics concerning the nature of reality. Topics include: the nature of physical objects, abstract entities, the concepts of time and change, the relation between mind and body, causation, the nature of metaphysics. Offered Yearly.

PHI 3600 Space, Time, and the Philosophy of Physics Cr. 3

Survey of some principal problems concerning the concepts of space and time and their relation to physical theories. Topics include: our knowledge of the geometric features of the world, the existence of space and time, time without change, the passage of time, the philosophical foundations and implications of Einstein's Special Theory of Relativity, and the explanation of motion and the General Theory of Relativity. No prior knowledge of modern physics will be presupposed. Offered Every Other Year.

Prerequisites: PHI 2000-6XXX with a minimum grade of D-

PHI 3700 Philosophy of Art Cr. 3

Satisfies General Education Requirement: Cultural Inquiry, Philosophy Letters

What are art works? Why are they so moving? What is the nature of the experience they offer? This course introduces the student to some of the schools of thought on these issues. It also attempts to deal with the specific natures of the various artistic media, such as: drama, literature, film, painting, photography, music and opera. Offered Every Term.

PHI 3800 Topics in Philosophy Cr. 3

Topics to be announced in Schedule of Classes . Offered Intermittently.
Repeatable for 6 Credits

PHI 4870 Honors Directed Reading Cr. 4

Research on topic of honors essay and research for comprehensive examinations. Offered Fall.

Restriction(s): Enrollment is limited to students with a major in Philosophy Honors; enrollment limited to students in a Bachelor of Arts degree.

PHI 4890 Honors Thesis Cr. 3

Continuation of PHI 4870. Offered Winter.

Restriction(s): Enrollment limited to students in the Honors College.

PHI 4995 Research Training Cr. 1-4

Students engage in an independent research project and learn research methods in Philosophy under the supervision of a faculty member.

Offered Every Term.

Repeatable for 4 Credits

PHI 5050 Advanced Symbolic Logic Cr. 4

Formal, extensive treatment of first-order predicate logic with emphasis on the notions of a formal logical language and truth in a model; the logic of identity; definite descriptions; brief introductions to set theory and the metatheory of propositional and first-order logic; some additional advanced topics to be selected by the instructor. Offered Yearly.

Equivalent: LIN 5050

PHI 5230 Philosophy of Science Cr. 4

Intensive investigation and discussion of special topics or particular authors in the philosophy of science. Offered Yearly.

Prerequisites: 1 of PHI 2400, PHI 2550, PHI 3500, PHI 3600, PHI 5230, PHI 5500, PHI 5530, PHI 5550, PHI 5570, PHI 5630, PHI 5640

PHI 5240 Special Topics in Social and Political Philosophy Cr. 4

Selected topics and readings from major social and political philosophers. Offered Intermittently.

Prerequisites: May be taken concurrently: PHI 2000-ZZZZ with a minimum grade of C

Repeatable for 8 Credits

PHI 5250 Justice and Rights in Health Care Cr. 4

This course is centered around the general question: What does justice require of a society in terms of providing health care to its members? It examines classic philosophical theories of justice including egalitarianism, libertarianism, and Rawls' justice as fairness, before turning to the implications of these theories for health care access.

Questions include: Does justice require providing universal health care?

Is it compatible with offering different health care plans to different persons, or does justice require everyone have the same health care?

How do issues of fairness in health care access relate to various forms of oppression in society, such as racism, classism, and sexism? Offered Fall.

Prerequisites: May be taken concurrently: PHI 2000-ZZZZ with a minimum grade of C

PHI 5260 Philosophy of Sex and Gender Cr. 3

Explores ethical and conceptual issues surrounding sex, gender, and sexual orientation. Specific topics include conceptual analysis of sex, gender, and sexual orientation; sexual perversion, natural law, consent, marriage, adultery, "casual" sex, polygamy and polyamory, prostitution, and pornography. Offered Every Other Year.

PHI 5270 Philosophy of Law Cr. 4

Intensive investigation and discussion of special topics or particular authors in the philosophy of law. Offered Every Other Year.

PHI 5280 History of Ethics Cr. 4

A survey and discussion of historically important moral philosophers from Plato to Mill. Offered Every Other Year.

Prerequisites: PHI 2000-6XXX with a minimum grade of D- or CLA 1010 with a minimum grade of D- or PS 1010-1030 with a minimum grade of D-

PHI 5290 Free Will and Moral Responsibility Cr. 4

Exploration of the nature of, and relationship between, free will and moral responsibility. Questions include: What is free will? Is free will required for moral responsibility? Are freedom and responsibility compatible with determinism (the claim that the initial state of the universe plus the physical laws of nature determine everything that happens)? Does our practice of holding one another responsible reveal the nature of moral responsibility? Offered Fall.

Prerequisites: May be taken concurrently: PHI 2000-ZZZZ with a minimum grade of C

PHI 5300 Foundations of Ethics Cr. 4

Twentieth century moral philosophers in the analytic tradition, with focus on debates in moral realism, moral epistemology, and the "Why be moral?" question; includes such philosophers as Moore, Stevenson, Foot, Mackie, Blackburn, Gibbard, Parfit, Korsgaard, and Railton. Offered Every Other Year.

Prerequisites: PHI 2000-6XXX with a minimum grade of D- or CLA 1010 with a minimum grade of D- or PS 1010-1030 with a minimum grade of D-

PHI 5350 Logical Systems I Cr. 4

Metaresults concerning formal systems of sentential and first-order logics; soundness, completeness; independence of axioms; introduction to recursive functions; formalization of elementary arithmetic; discussion of Godel's incompleteness theorem and Church's Theorem. Offered Every Other Year.

Prerequisites: MAT 5600 with a minimum grade of C- or PHI 2850 with a minimum grade of C- or PHI 2860 with a minimum grade of C- or PHI 5050 with a minimum grade of C- or MAT 5420 with a minimum grade of C-
Equivalent: MAT 5350

PHI 5400 The Presocratics and Sophists Cr. 4

Selected readings on topics in philosophers who preceded or were contemporaneous with Socrates (7th - 5th centuries B.C.E), such as Heraclitus, Parmenides, Zeno, Democritus. Offered Intermittently.

Prerequisites: PHI 2000-6XXX with a minimum grade of D- or CLA 1010 with a minimum grade of D- or PS 1010-1030 with a minimum grade of D-

PHI 5410 Plato Cr. 4

Selected readings on topics in Plato. Offered Every Other Year.

Prerequisites: PHI 2000-6XXX with a minimum grade of D- or CLA 1010 with a minimum grade of D- or PS 1010-1030 with a minimum grade of D-

PHI 5420 Aristotle Cr. 4

Selected readings on topics in Aristotle. Offered Every Other Year.

PHI 5450 British Empiricism Cr. 4

Topics concerning Locke, Berkeley or Hume. Offered Intermittently.

Prerequisites: PHI 2000-6XXX with a minimum grade of D- or CLA 1010 with a minimum grade of D- or PS 1010-1030 with a minimum grade of D-

PHI 5460 Kant Cr. 4

Selected topics or readings in Kant's philosophy. Offered Every Other Year.

Prerequisites: PHI 2000-6XXX with a minimum grade of D- or CLA 1010 with a minimum grade of D- or PS 1010-1030 with a minimum grade of D-

PHI 5500 Topics in Metaphysics Cr. 4

Intensive investigation and discussion of special topics or particular authors in metaphysics. Offered Yearly.

Prerequisites: 1 of PHI 2400, PHI 2550, PHI 3500, PHI 3600, PHI 5230, PHI 5500, PHI 5530, PHI 5550, PHI 5570, PHI 5630, PHI 5640

PHI 5530 Topics in Epistemology Cr. 4

Intensive investigation and discussion of special topics or particular authors in the theory of knowledge. Offered Intermittently.

Prerequisites: 1 of PHI 2400, PHI 2550, PHI 3500, PHI 3600, PHI 5230, PHI 5500, PHI 5530, PHI 5550, PHI 5570, PHI 5630, PHI 5640

PHI 5550 Philosophy of Mind Cr. 4

Intensive investigation and discussion of special topics or particular authors concerned with the nature and status of the mental and theories about the mental. Offered Every Other Year.

Prerequisites: 1 of PHI 2400, PHI 2550, PHI 3500, PHI 3600, PHI 5230, PHI 5500, PHI 5530, PHI 5550, PHI 5570, PHI 5630, PHI 5640

PHI 5570 Philosophy of Language Cr. 4

Intensive investigation and discussion of philosophical problems concerning meaning, truth, and the nature of language. Offered Every Other Year.

Prerequisites: 1 of PHI 2400, PHI 2550, PHI 3500, PHI 3600, PHI 5230, PHI 5500, PHI 5530, PHI 5550, PHI 5570, PHI 5630, PHI 5640

Equivalent: LIN 5570

PHI 5630 Twentieth Century Analytic Philosophy I Cr. 4

Major works, movements, and writers in the analytic tradition in the twentieth century up to the 1940s, such as Frege, Russell, Moore, the early Wittgenstein, Carnap, Ayer. Offered Intermittently.

Prerequisites: 1 of PHI 2400, PHI 2550, PHI 3500, PHI 3600, PHI 5230, PHI 5500, PHI 5530, PHI 5550, PHI 5570, PHI 5630, PHI 5640

PHI 5800 Special Topics in Philosophy Cr. 2-4

Topics and prerequisites to be announced in Schedule of Classes . Offered Intermittently.

Repeatable for 8 Credits

PHI 5900 Capstone Seminar in Philosophy Cr. 4

Advanced seminar in Philosophy. Topics and instructor vary by semester. Offered Fall, Winter.

Restriction(s): Enrollment is limited to students in the Department of Philosophy.

Repeatable for 12 Credits

PHI 5990 Directed Reading Cr. 1-6

Intensive investigation by student on topic chosen by student in consultation with instructor. Offered Every Term.

Repeatable for 12 Credits

PHI 5993 Writing Intensive Course in Philosophy Cr. 0

Satisfies General Education Requirement: Writing Intensive Competency Disciplinary writing assignments under direction of faculty member. Must be selected in conjunction with a course designated as a corequisite; see section listing in Schedule of Classes for corequisites available each term. Satisfies the University General Education Writing Intensive Course in the Major requirement. Directed practice in rewriting assignments for the concurrently-elected course, for the purpose of perfecting skills in philosophical writing. Does not count toward the course minimums for the major or minor. Required for all majors. Offered Every Term.

Prerequisites: May be taken concurrently: PHI 3000-5040 or PHI 5200-5340 or PHI 5400-6999 or AFS 2390 with a minimum grade of C or ENG 2390 with a minimum grade of C or ENG 3010 with a minimum grade of C or ENG 3020 with a minimum grade of C or ENG 3050 with a minimum grade of C

Restriction(s): Enrollment is limited to Undergraduate level students.

PHI 7790 Seminar in Philosophy of Language Cr. 4

Offered Intermittently.

Prerequisites: PHI 5000-5999

Restriction(s): Enrollment is limited to Graduate level students.

Repeatable for 8 Credits

PHI 7800 Seminar in Philosophy: Special Topics Cr. 4

Offered Intermittently.

Prerequisites: PHI 5000-5999

Restriction(s): Enrollment is limited to Graduate level students.

Repeatable for 8 Credits

PHI 7810 Seminar in History of Philosophy Cr. 4

Study of a philosopher or period. Offered Intermittently.

Restriction(s): Enrollment is limited to Graduate level students.

Repeatable for 8 Credits

PHI 7840 Seminar in Ethics Cr. 4

Offered Intermittently.

Prerequisites: PHI 5000-5999

Restriction(s): Enrollment is limited to Graduate level students.

Repeatable for 8 Credits

PHI 7850 Seminar in Epistemology Cr. 4

Offered Intermittently.

Prerequisites: PHI 5000-5999

Restriction(s): Enrollment is limited to Graduate level students.

Repeatable for 8 Credits

PHI 7860 Seminar in Metaphysics Cr. 4

Offered Intermittently.

Prerequisites: PHI 5000-5999

Restriction(s): Enrollment is limited to Graduate level students.

Repeatable for 8 Credits

PHI 7990 Directed Study in Philosophy Cr. 1-4

Directed study for graduate students in Philosophy. Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students.

Repeatable for 12 Credits

PHI 7999 Master's Essay Direction Cr. 1-4

Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students with a class of Candidate Masters.

Repeatable for 99 Credits

PHI 8999 Master's Thesis Direction and Research Cr. 1-8

Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students with a class of Candidate Masters.

Repeatable for 8 Credits

PHI 9990 Pre-Doctoral Candidacy Research Cr. 1-8

Research in preparation for doctoral dissertation. Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students.

Repeatable for 12 Credits

PHI 9991 Doctoral Candidate Status I: Dissertation Research and Direction Cr. 7.5

Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students.

PHI 9992 Doctoral Candidate Status II: Dissertation Research and Direction Cr. 7.5

Offered Every Term.

Prerequisite: PHI 9991 with a minimum grade of S

Restriction(s): Enrollment is limited to Graduate level students.

PHI 9993 Doctoral Candidate Status III: Dissertation Research and Direction Cr. 7.5

Offered Every Term.

Prerequisite: PHI 9992 with a minimum grade of S

Restriction(s): Enrollment is limited to Graduate level students.

PHI 9994 Doctoral Candidate Status IV: Dissertation Research and Direction Cr. 7.5

Offered Every Term.

Prerequisite: PHI 9993 with a minimum grade of S

Restriction(s): Enrollment is limited to Graduate level students.

PHI 9995 Candidate Maintenance Status: Doctoral Dissertation Research and Direction Cr. 0

Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students.

Course Material Fees: \$370.26

Repeatable for 0 Credits

PHY - PHYSICS

PHY 1001 Perspectives in Physics, Biomedical Physics, and Astronomy Cr. 1

Survey of educational and career paths including specializations in basic research and applied disciplines; recommended for entering students and those considering or beginning a major or minor concentration. Offered Fall.

Restriction(s): Enrollment is limited to Undergraduate level students.

PHY 1020 Conceptual Physics: The Basic Science Cr. 4

Satisfies General Education Requirement: Natural Scientific Inquiry, Physical Sciences

Physical concepts and practical applications to everyday life of the basic principles of motion, forces, energy, matter, heat, sound, electricity, magnetism, and light. Lectures, demonstrations and optional laboratory; laboratory is strongly recommended. Meets General Education Laboratory Requirement when elected for 4 credits. Offered Every Term.

Course Material Fees: \$25

PHY 2020 Science, Technology, and War Cr. 4

Modern weapons, nuclear and otherwise are becoming increasingly available and dangerous; people with grievances seem eager to use them. Science and technology, as well as constraints of bureaucracy and society underpin weapons development and use, as technologies affect prospects and results of war and peace. History of humanity and its tools of war. Offered Yearly.

Equivalent: HIS 2510, PCS 2020, PS 2440

PHY 2130 Physics for the Life Sciences I Cr. 4

Satisfies General Education Requirement: Natural Scientific Inquiry, Physical Sciences

Introduction to physics for students in the life sciences, preparing for medicine, dentistry, pharmacy and health sciences and for general Liberal Arts and Sciences students. Covers motion, forces, energy, diffusion, fluids, thermal physics with many biological examples. Satisfies General Education laboratory requirement only when taken concurrently with PHY 2131. No credit after PHY 2170. Offered Every Term.

Corequisite: PHY 2131

PHY 2131 Physics for the Life Sciences Laboratory Cr. 1

Laboratory experiments in fluid mechanics, diffusion and biophysics. Satisfies General Education laboratory requirement only when taken concurrently with PHY 2130. Offered Every Term.

Course Material Fees: \$25

PHY 2140 Physics for the Life Sciences II Cr. 4

Second part of introduction to physics for students in the life sciences, students preparing for medicine, dentistry, pharmacy and health sciences and for general Liberal Arts and Sciences students. Covers thermodynamics, electric fields, oscillations, waves and optics. No credit after PHY 2180. Offered Every Term.

Prerequisites: PHY 2130 with a minimum grade of C-

Corequisite: PHY 2141

PHY 2141 Physics for the Life Sciences Laboratory Cr. 1

Laboratory experiments in electric fields, fluids, optics and spectroscopy. Offered Every Term.

Course Material Fees: \$25

PHY 2170 University Physics for Scientists I Cr. 4

Satisfies General Education Requirement: Natural Scientific Inquiry, Physical Sciences

For students specializing in physics, biology, chemistry, mathematics or engineering. Statics, kinematics, dynamics, energy and linear momentum, rotational kinematics and dynamics, angular momentum, solids and fluids, vibrations and wave motion, thermodynamics. Satisfies General Education Laboratory Requirement only when taken concurrently with PHY 2171. No credit after PHY 2175. Offered Every Term.

Prerequisites: MAT 1800 with a minimum grade of C- and May be taken concurrently: MAT 2010 with a minimum grade of C-

Corequisite: PHY 2171

PHY 2171 University Physics Laboratory Cr. 1

Laboratory experiments in statics, kinematics, dynamics, energy and linear momentum, rotational kinematics and dynamics, angular momentum, simple harmonic motion, optics, continuum mechanics, thermodynamics. Satisfies General Education laboratory requirement only when taken concurrently with PHY 2170. Offered Every Term.

Course Material Fees: \$25

PHY 2175 University Physics for Engineers I Cr. 4

Satisfies General Education Requirement: Natural Scientific Inquiry, Physical Sciences

For students specializing in engineering. Statics, kinematics, dynamics, energy and linear momentum, rotational kinematics and dynamics, angular momentum, solids and fluids, vibrations and wave motion, thermodynamics. No credit after PHY 2170. Offered Every Term.

Prerequisites: MAT 1800 with a minimum grade of D- and May be taken concurrently: MAT 2010 with a minimum grade of C

Restriction(s): Enrollment limited to students in the College of Engineering.

PHY 2180 University Physics for Scientists II Cr. 4

Electric forces and electric fields, electrical energy, capacitance, current, resistance, direct current circuits, magnetism, induced voltage and inductance, AC circuits, electromagnetic waves, geometric and wave optics. No credit after PHY 2185. Offered Every Term.

Prerequisites: MAT 2010 with a minimum grade of D- and May be taken concurrently: MAT 2020 with a minimum grade of D- and PHY 2170 with a minimum grade of C-

Corequisite: PHY 2181

PHY 2181 University Physics Laboratory II Cr. 1

Laboratory experiments in electrostatics, currents and circuit elements, magnetic fields, magnetic induction, AC circuits, electromagnetic waves, interference of waves. Offered Every Term.

Course Material Fees: \$25

PHY 2185 University Physics for Engineers II Cr. 4

Electric forces and electric fields, electrical energy, capacitance, current, resistance, direct current circuits, magnetism, induced voltage and inductance, AC circuits, electromagnetic waves, geometric and wave optics. No credit after PHY 2180. Offered Every Term.

Prerequisites: PHY 2170 with a minimum grade of C- or PHY 2175 with a minimum grade of C- and MAT 2010 with a minimum grade of D- and May be taken concurrently: MAT 2020 with a minimum grade of D-

Restriction(s): Enrollment limited to students in the College of Engineering.

PHY 2210 General Physics Laboratory Cr. 1

Consult departmental undergraduate academic advisor prior to registering for this course. No credit after PHY 1020 if taken for four credits. Offered Every Term.

Prerequisite: PHY 1020 with a minimum grade of D-

Course Material Fees: \$15

PHY 3100 The Sounds of Music Cr. 4

Satisfies General Education Requirement: Natural Scientific Inquiry, Physical Sciences

For music majors and other students interested in the physical foundations of the production, perception, and reproduction of musical sounds. Makes only limited use of simple mathematics. Includes topics such as wave properties, loudness levels and the human ear, hearing loss, tone quality, frequency and pitch, musical intervals and tuning, room acoustics, the production of sound by various musical instruments, and electronic reproduction of music. Meets General Education Laboratory Requirement. Offered Fall.

Course Material Fees: \$25

PHY 3300 Introductory Modern Physics Cr. 3

For physics, chemistry, engineering, mathematics majors and other interested students. Introduction to relativity, quantum phenomena, atomic structure, quantum mechanics, condensed matter physics, quantum optics, nuclear physics, elementary particles, and anti-particles. Offered Fall, Winter.

Prerequisites: PHY 2130 with a minimum grade of C- and PHY 2131 with a minimum grade of C- or PHY 2170 with a minimum grade of C- and PHY 2171 with a minimum grade of C- and PHY 2140 with a minimum grade of C- and PHY 2141 with a minimum grade of C- or PHY 2180 with a minimum grade of C- and PHY 2181 with a minimum grade of C- and MAT 2020 with a minimum grade of C-

Corequisite: PHY 3310

PHY 3310 Introductory Modern Physics Laboratory Cr. 2

Laboratory course to accompany PHY 3300. Hands-on experience in logical and rigorous analysis of phenomena of modern physics. Offered Fall, Winter.

Prerequisites: PHY 2140 with a minimum grade of D- and PHY 2141 with a minimum grade of D- or PHY 2180 with a minimum grade of D- and PHY 2181 with a minimum grade of D- and May be taken concurrently: PHY 3300 with a minimum grade of C or PHY 5015 with a minimum grade of C

Course Material Fees: \$25

PHY 3500 Introduction to Thermal and Fluid Physics Cr. 3

Provides an introduction to physics of gases, fluids and other states of matter for majors in physics and other science, technology and mathematics fields. builds on a knowledge of the mechanics in introductory physics courses. Topics covered include: thermodynamic equilibrium; energy, work and heat; Ideal gas and kinetic theory; entropy; free energy; Maxwell relations; chemical equilibria; equilibrium between liquids, solids and gases; heat transport and kinetics; and properties of fluids. Familiarity with mathematics at the level of Calculus 3 is recommended. Offered Yearly.

Prerequisite: PHY 2170 with a minimum grade of C- or PHY 2180 with a minimum grade of C-

PHY 3700 Mathematics for Biomedical Physics Cr. 4

Training in specific applied topics of mathematics for biomedical physics majors. Offered Fall.

Prerequisites: PHY 2130 with a minimum grade of C-, PHY 2131 with a minimum grade of C-, PHY 2140 with a minimum grade of C-, and PHY 2141 with a minimum grade of C- or PHY 2170 with a minimum grade of C-, PHY 2171 with a minimum grade of C-, PHY 2180 with a minimum grade of C-, and PHY 2181 with a minimum grade of C- and May be taken concurrently: MAT 2020 with a minimum grade of C-

PHY 3750 Introduction to Computational Methods Cr. 1

Introduction to the principles of computer programming with MATLAB or similar software. In addition to learning applications of the software, there will be opportunities for independent or group projects of interest to students. Offered Fall.

Prerequisites: PHY 2130 with a minimum grade of C- and PHY 2140 with a minimum grade of C- or PHY 2170 with a minimum grade of C- and PHY 2180 with a minimum grade of C- and May be taken concurrently: MAT 2020 with a minimum grade of C-

Restriction(s): Enrollment is limited to students with a major in Biomedical Physics.

PHY 3990 Directed Study Cr. 1-4

Primarily for students who wish to continue in a field beyond material covered in regular courses, or who wish to study material not covered in regular courses, including certain research participation. Offered Every Term.

Repeatable for 4 Credits

PHY 4700 Introduction to Biomedical Physics Cr. 4

Basic and applied physical concepts used in biology, human anatomy, and physiology, as well as in medical diagnosis and treatment. Offered Winter.

Prerequisites: PHY 2130 with a minimum grade of C- and PHY 2140 with a minimum grade of C- or PHY 2170 with a minimum grade of C- and PHY 2180 with a minimum grade of C- and PHY 3700 with a minimum grade of C- and MAT 2020 with a minimum grade of D-

PHY 5010 Astrophysics and Stellar Astronomy Cr. 3

Electromagnetic radiation and matter; solar characteristics; stellar distances; magnitudes; spectral classification; celestial mechanics; binary stars; stellar motions, structure and evolution; compact and variable stars; Milky Way Galaxy and interstellar medium; galaxies and clusters of galaxies; quasars; Hubble's Law; cosmology. Offered Every Other Winter.

Prerequisites: PHY 3300 with a minimum grade of C-

Equivalent: AST 5010

PHY 5015 Non-classical Physics for Educators Cr. 3

Development of relativity and quantum mechanics. Emphasis on nuclear physics and elementary particles. Required math: algebra and trigonometry. Offered for undergraduate credit only. Offered Winter.

Prerequisites: PHY 2130 with a minimum grade of D- and PHY 2140 with a minimum grade of D-

PHY 5100 Methods of Theoretical Physics I Cr. 3

Introduction to mathematical tools used in advanced courses in physics. Offered Fall.

Prerequisites: MAT 2030 with a minimum grade of C- and PHY 2180 with a minimum grade of C-

PHY 5200 Classical Mechanics I Cr. 3

Introduction to fundamental ideas: Newton's laws, notions of momentum, angular momentum, kinetic and potential energy, mechanical energy, conservation laws, motion in 1- and 3-D, friction and retardation forces, oscillations, resonances, and gravitation. Offered Fall.

Prerequisites: PHY 2180 with a minimum grade of C- and May be taken concurrently: PHY 5100 with a minimum grade of C-

PHY 5210 Classical Mechanics II Cr. 3

Accelerated reference frames, centrifugal and Coriolis forces, rigid body dynamics, motion of tops and gyroscopes, Lagrange's equations, constraints, Lagrange multipliers, general central force problem, stability of orbits, relativistic mechanics. Offered Winter.

Prerequisite: PHY 5200 with a minimum grade of C- and MAT 2150 with a minimum grade of C-

PHY 5340 Optics Cr. 3

Electromagnetic radiation; geometrical, physical, and modern optics. Offered Winter.

Prerequisites: MAT 2030 with a minimum grade of C- and PHY 2140 with a minimum grade of C- or PHY 2180 with a minimum grade of C- and PHY 3700 with a minimum grade of C- or PHY 2140 with a minimum grade of C- and PHY 3700 with a minimum grade of C- or MAT 2030 with a minimum grade of C- and PHY 2180 with a minimum grade of C-

PHY 5341 Optics Laboratory Cr. 2

Experiments involving geometrical, physical, and quantum optics. Offered Winter.

Prerequisites: May be taken concurrently: ECE 5760 with a minimum grade of C and May be taken concurrently: PHY 5340 with a minimum grade of C

Course Material Fees: \$25

PHY 5460 Lasers for Medical Applications Cr. 3

Summarizes the wealth of recent research on the principles, technologies and application of lasers in diagnostics, therapy and surgery. Includes an overview of optics, optical components used in a typical laser, key principles of lasers and radiation interactions with tissue. The respective types of the laser (solid state, gas, dye, and semiconductor) are reviewed to provide an understanding of the wide diversity, and therefore, the large possible choice of these devices for a specific diagnosis, treatment, or surgery. Offered Winter.

Equivalent: BME 5460, ME 5465

PHY 5620 Electronics and Electrical Measurements Cr. 3

Theory of amplifier circuits, operational amplifiers, oscillators, digital electronics, analog and digital measurements. Offered Fall.

Prerequisites: PHY 2180 with a minimum grade of C- and PHY 2181 with a minimum grade of C- or PHY 2140 with a minimum grade of C- and PHY 2141 with a minimum grade of C- and May be taken concurrently: PHY 5621 with a minimum grade of C-

Corequisite: PHY 5621

PHY 5621 Electronics and Electrical Measurements Laboratory Cr. 2

Laboratory measurements related to amplifier circuits, operational amplifiers, oscillators, and digital electronics. The lab will also cover analog and digital measurements and will require a final project. Offered Fall.

Corequisite: PHY 5620

Course Material Fees: \$25

PHY 5750 Biological Physics Cr. 4

Introduction to applications of physics to molecular biology. Offered Fall.

Prerequisites: PHY 3700 with a minimum grade of C- and PHY 4700 with a minimum grade of C-

PHY 5990 Directed Study Cr. 1-3

Primarily for students who wish to continue in a field beyond material covered in regular courses, or who wish to study material not covered in regular courses, including certain research participation. Offered Every Term.

Repeatable for 6 Credits

PHY 6400 Quantum Physics I Cr. 3

Operators and their eigenfunctions, quantization rules, solution of Schrodinger equation in 1- and 3-D, the hydrogen atom, angular momentum, spin, boson, fermions, Time-independent perturbation theory. Offered Winter.

Prerequisites: MAT 2150 with a minimum grade of C-, PHY 3300 with a minimum grade of C-, and PHY 5100 with a minimum grade of C-

PHY 6410 Quantum Physics II Cr. 3

Applications of quantum mechanics: atoms in electric and magnetic fields, multielectron atoms, molecules, quantum statistics, solids (band structure, magnetic properties), nuclei, fundamental forces and standard model. Offered Fall.

Prerequisites: PHY 6400 with a minimum grade of C-

PHY 6450 Introduction to Material and Device Characterizations Cr. 4

Lecture/laboratory; introduction to analytic and measurement techniques for characterizing and evaluating materials, especially for potential applicability in sensor and integrated devices. Techniques include diffraction and microscopy methods, electron spectroscopies, and electrical, optical and magnetic measurements. Offered for graduate credit only. Offered Winter.

Prerequisite: (PHY 7050 (may be taken concurrently) or ECE 5500 (may be taken concurrently) or ECE 5550 (may be taken concurrently))

Restriction(s): Enrollment is limited to Graduate level students.

Course Material Fees: \$60

PHY 6480 Introduction to Quantum Computing Cr. 3

Serves as an introduction to quantum computing and brings together students with different backgrounds in mathematics, physics, chemistry, and computer science to foster interdisciplinary connections in the areas of quantum computing and quantum information. A strong background in linear algebra over the complex numbers as well as differential and integral calculus is required. Familiarity with quantum physics and complexity theory will be helpful, but it is not required. Offered Every Term.

Equivalent: MAT 6480

PHY 6500 Thermodynamics and Statistical Physics Cr. 4

Laws of thermodynamics, thermodynamic equilibrium, applications of kinetic theory of gases, basic introduction to classical and quantum statistical description of physical systems with large numbers of particles. Offered Fall.

Prerequisites: PHY 3300 with a minimum grade of C- and PHY 5100 with a minimum grade of C-

PHY 6570 Smart Sensor Technology I: Design Cr. 4

Introduction to various types of sensors and the design of basic analog VLSI circuit building blocks. Offered Winter.

Equivalent: BME 6470, ECE 6570

PHY 6600 Electromagnetic Fields I Cr. 3

Topics include electrostatics, solution of Laplace equation, dielectric media, electric current, magnetic field of steady currents, magnetic properties of matter, electromagnetic induction. Offered Fall.

Prerequisite: PHY 5100 with a minimum grade of C- and PHY 5200 with a minimum grade of C- and MAT 2150 with a minimum grade of C-

PHY 6610 Electromagnetic Fields II Cr. 3

Continuation of PHY 6600: Maxwell equations, electromagnetism and relativity, optics, wave guides and transmission lines, radiation of EM waves. Offered Winter.

Prerequisite: PHY 6600 with a minimum grade of C-

PHY 6750 Applied Computational Methods Cr. 2

Development of concepts learned in PHY 3750 or PHY 3310 for computer applications in physics research, including applications in theoretical physics, data fitting, image analysis, and integration with experimental equipment. There will be opportunities for independent as well as group projects. Offered Fall.

Prerequisite: PHY 3750 with a minimum grade of C- or PHY 3310 with a minimum grade of C-

PHY 6780 Research Methods in Biomedical Physics Cr. 3

Satisfies General Education Requirement: Writing Intensive Competency
Introduction to laboratory experience in biomedical physics research.

Capstone course for biomedical physics majors. Offered Winter.

Prerequisites: PHY 3700 with a minimum grade of C- and PHY 4700 with a minimum grade of C-

PHY 6850 Modern Physics Laboratory Cr. 2

Satisfies General Education Requirement: Writing Intensive Competency
Techniques and experiments in physics of atoms, atomic nuclei, molecules, the solid state and other areas that have advanced our modern understanding of physics. Offered Winter.

Prerequisites: PHY 3300 with a minimum grade of C-

Course Material Fees: \$25

PHY 6860 Computational Physics Cr. 3

Introduction to use of computers to model physical systems; description of techniques in numerical analysis including linear algebra, integration, algebraic and differential equations, data analysis and symbolic algebra. Offered Fall.

Prerequisites: PHY 3310 with a minimum grade of C- or PHY 5100 with a minimum grade of C-

PHY 6991 Special Topics Cr. 1-4

Topics and prerequisites for each section to be announced in Schedule of Classes. More than one section may be elected in a semester. Offered for graduate credit only. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate level students.

Repeatable for 4 Credits

PHY 6992 Physics Graduate Teaching Assistant Training Cr. 1

Students solve and discuss problems from calculus-based general physics courses in front of their peers and instructor, enhancing their ability to analyze, interpret and present the material in a clear, informative way. Offered for graduate credit only. Offered Fall.

Restriction(s): Enrollment is limited to Graduate level students.

PHY 7010 Modern Physics for Secondary School Educators Cr. 3

Development of relativity and quantum mechanics. Emphasis on nuclear physics and elementary particles. Required math: algebra and trigonometry. Offered Fall, Spring/Summer.

Prerequisite: PHY 2130 with a minimum grade of C- and PHY 2140 with a minimum grade of C-

Restriction(s): Enrollment is limited to Graduate level students.

PHY 7050 Survey of Condensed Matter Physics Cr. 3

Contemporary solid state physics dealing primarily with experiments in this area and with modern descriptive models of solids. Offered Winter.

Prerequisite: PHY 6400 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

PHY 7060 Survey of Elementary Particle Physics Cr. 3

Fundamental interactions and the basic particles; introduction to quantum mechanical treatment of decay, scattering, spin, internal symmetries; introduction to quantum field theory; gauge theories; the standard model and proposed modifications; experimental evidence; survey of experimental methods, detector, accelerators and colliders. Offered Winter.

Prerequisite: PHY 6400 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

PHY 7070 Survey of Nuclear Physics Cr. 3

Survey of nuclear decay, nuclear structures, nuclear interactions and reactions, nuclear models, conservative laws and subnuclear particles. Offered Winter.

Prerequisite: PHY 6400 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

PHY 7110 Methods of Theoretical Physics II Cr. 3

Complex variables and their applications. Homogeneous and inhomogeneous differential equations. Special functions such as gamma functions, Bessel functions, Legendre functions, Hermite functions and Laguerre functions. Fourier series. Offered Fall.

Prerequisite: PHY 5100 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

PHY 7200 Advanced Mechanics Cr. 3-4

Variational principles, central forces, transformation theory, Hamilton-Jacobi theory. Offered Winter.

Prerequisite: PHY 5210 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

PHY 7400 Quantum Mechanics I Cr. 3

Physical and mathematical principles of quantum mechanics. Schrodinger equation and its applications. Spin and angular momentum in quantum mechanics. The WKB approximation. Perturbation theory for time-independent and time-dependent cases. Offered Fall.

Prerequisite: PHY 6410 with a minimum grade of C and PHY 7110 (may be taken concurrently) with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

PHY 7410 Quantum Mechanics II Cr. 3

Scattering theory. Partial wave expansion and perturbation theory. Bound states. Symmetry principles and conservation laws. The path integral formalism. Entanglement. Quantum computation. Charged particles in electromagnetic fields. Quantum theory of radiation. Relativistic one-particle equations Offered Winter.

Prerequisite: PHY 7400 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

PHY 7500 Statistical Mechanics Cr. 4

Classical and quantum statistical mechanics and applications. Offered Fall.

Prerequisite: PHY 6500 with a minimum grade of C and PHY 7400 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

PHY 7550 Advanced Condensed Matter Physics: Solid State Cr. 3

Current topics in condensed matter physics, including electronic band structure, magnetism, superconductivity, nanophysics, and the optical properties of solids. Offered Every Other Fall.

Prerequisite: PHY 7050 with a minimum grade of C and PHY 7110 with a minimum grade of C and PHY 7400 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

PHY 7560 Advanced Condensed Matter Physics: Soft Matter Cr. 3

Current topics in condensed matter physics, including the building blocks, structures, physical properties, and phase transitions in a variety of complex fluid systems such as simple liquids and liquid mixtures, colloids, polymers, liquid crystals, amphiphiles, and soft matter in living organisms. Offered Every Other Winter.

Prerequisite: PHY 7050 with a minimum grade of C and PHY 7110 with a minimum grade of C and PHY 7400 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

PHY 7580 Smart Sensor Technology II: Characterization and Fabrication Cr. 4

Integration of ongoing research in integrated technology of smart sensors. Design of smart sensor devices using computer simulation. Fabrication of smart sensor. Offered Spring/Summer.

Prerequisite: PHY 6570 with a minimum grade of B- or ECE 6570 with a minimum grade of B- or BME 6470 with a minimum grade of B-

Restriction(s): Enrollment is limited to Graduate level students.

Course Material Fees: \$50

Equivalent: BME 7470, ECE 7570

PHY 7600 Electromagnetic Theory I Cr. 3

Microscopic and macroscopic Maxwell's equations, special relativity, Lagrangian and Hamiltonian formulation of EM theory, energy-momentum tensor, conservation laws, radiation, scattering, applications. Offered Winter.

Prerequisite: PHY 6610 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

PHY 7610 Electromagnetic Theory II Cr. 3

Continuation of PHY 7600. Offered Fall.

Prerequisite: PHY 7600 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

PHY 7990 Directed Study Cr. 1-3

Application forms available in department office. Primarily for graduate students in physics who wish to study material not covered in regular courses. Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students.

Repeatable for 6 Credits

PHY 7996 Research in Physics Cr. 1-4

Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students.

Repeatable for 12 Credits

PHY 7999 Master's Essay Direction Cr. 1-3

Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students with a class of Candidate Masters.

PHY 8800 Advanced Nuclear Physics Cr. 3

Research topics in nuclear physics such as: relativistic heavy ion physics, nuclear/nucleon models, and many body theory. Covers both theory and experimental methods. Offered Every Other Winter.

Prerequisite: PHY 7070 with a minimum grade of C and PHY 7110 with a minimum grade of C and PHY 7410 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

PHY 8810 Advanced Particle Physics Cr. 3

Advanced elementary particle physics including weak, electromagnetic, and strong interactions. Rudiments of experimental devices and techniques at level appropriate to both experimentally- and theoretically-oriented students. Offered Every Other Fall.

Prerequisite: PHY 7060 with a minimum grade of C and PHY 7110 with a minimum grade of C and PHY 7410 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

PHY 8850 Quantum Theory of Fields I Cr. 3

Introduction to quantum field theory, classical and path integral quantization of scalar, spinor, and vector fields, gauge theories, interactions and Feynman rules, modal field theories, Hubbard model, introduction to renormalization Suitable for both students of theory and experiment in the fields of nuclear, particle, and condensed matter physics and astrophysics. Offered Every Other Fall.

Prerequisite: PHY 7110 with a minimum grade of C and PHY 7410 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

PHY 8860 Quantum Theory of Fields II Cr. 3

Symmetry and symmetry breaking. Goldstone theorem and Higgs effect, renormalization group, collective phenomena, superfluids and superconductivity, the Standard Model of electroweak interactions, effective field theories. Appropriate for students in fields of nuclear, particle, condensed matter physics and astrophysics. Offered Every Other Winter.

Prerequisite: PHY 8850 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

PHY 8991 Special Topics Cr. 1-3

Topics and prerequisites for each section to be announced in Schedule of Classes . More than one topic may be elected in a semester. Offered Fall, Winter.

Restriction(s): Enrollment is limited to Graduate level students.

Repeatable for 12 Credits

PHY 8995 Colloquium Cr. 1

Must be elected every semester by all graduate physics students.

Lectures given by external visitors and graduate faculty. Offered Fall, Winter.

Restriction(s): Enrollment is limited to Graduate level students.

PHY 8999 Master's Thesis Research and Direction Cr. 1-8

Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students with a class of Candidate Masters.

Repeatable for 8 Credits

PHY 9990 Pre-Doctoral Candidacy Research Cr. 1-8

Research in preparation for doctoral dissertation. Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students.

Repeatable for 12 Credits

PHY 9991 Doctoral Candidate Status I: Dissertation Research and Direction Cr. 7.5

Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students.

PHY 9992 Doctoral Candidate Status II: Dissertation Research and Direction Cr. 7.5

Offered Every Term.

Prerequisite: PHY 9991 with a minimum grade of S

Restriction(s): Enrollment is limited to Graduate level students.

PHY 9993 Doctoral Candidate Status III: Dissertation Research and Direction Cr. 7.5

Offered Every Term.

Prerequisite: PHY 9992 with a minimum grade of S

Restriction(s): Enrollment is limited to Graduate level students.

PHY 9994 Doctoral Candidate Status IV: Dissertation Research and Direction Cr. 7.5

Offered Every Term.

Prerequisite: PHY 9993 with a minimum grade of S

Restriction(s): Enrollment is limited to Graduate level students.

PHY 9995 Candidate Maintenance Status: Doctoral Dissertation Research and Direction Cr. 0

Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students.

Course Material Fees: \$370.26

Repeatable for 0 Credits

POL - POLISH

POL 1010 Elementary Polish I Cr. 4

Development of practical skills in understanding, reading, speaking and writing Polish; emphasis on fundamental communication skills. Offered Fall.

Course Material Fees: \$5

POL 1020 Elementary Polish II Cr. 4

Continuation of POL 1010. Development of practical skills in understanding, reading, speaking and writing Polish; emphasis on fundamental communication skills. Offered Winter.

Prerequisites: POL 1010 with a minimum grade of D-

Course Material Fees: \$5

POL 2010 Intermediate Polish Cr. 4

Satisfies General Education Requirement: Foreign Culture, Global Learning Inquiry

Further development of Polish language and cultural proficiency through listening, reading, speaking and writing activities, and examination of Polish culture. Completion of this course fulfills the General Education requirement for foreign language and culture. Offered Fall.

Prerequisites: POL 1020 with a minimum grade of D-

Course Material Fees: \$5

POL 2030 Polish Conversation Cr. 1

Development of Polish oral language skills through intensive speaking and listening practice. Offered Intermittently.

Prerequisites: POL 2010 with a minimum grade of D-

Repeatable for 4 Credits

POL 2035 Polish Conversation II Cr. 1

Students develop speaking and listening comprehension skills discussing a variety of topics including work, leisure time, pets, living arrangements, cooking, fashion, and shopping. Particular attention is paid to expressing opinions and arguing a point. Offered Intermittently.

Prerequisites: POL 1020 with a minimum grade of D-

POL 2060 Composition and Conversation Cr. 4

For students with rudimentary knowledge of Polish. Vocabulary and aspects of grammar not discussed in the previous courses, practiced through oral and written composition and translation exercises. Offered Every Other Winter.

Prerequisites: POL 2010 with a minimum grade of D-

Repeatable for 8 Credits

POL 2710 Survey of Polish Culture Cr. 3

Satisfies General Education Requirement: Civ and Societies (CLAS only), Foreign Culture, Global Learning Inquiry

Introductory cultural survey from beginnings of Polish state to present. Polish society and cultural developments analyzed in comparative contexts. Offered Fall, Winter.

POL 3000 Polish Grammar and Usage Cr. 4

Comprehensive review of Polish grammar; proper usage, vocabulary expansion. For intermediate or advanced-level students, including heritage speakers. Offered Every Other Year.

Prerequisites: POL 2010 with a minimum grade of D-

POL 3030 Language Skills: Advanced Speaking and Writing Cr. 2-4

Original texts and audio-visual materials used to further knowledge of Polish language. Special attention paid to vocabulary enrichment, colloquial usage and idioms needed for achieving independent expression in the Polish language. Offered Every Other Fall.

Prerequisites: POL 2060 with a minimum grade of D-

POL 3060 Medical Polish I Cr. 1

One of two online Polish language courses designed to teach vocabulary used in the medical field. POL 3060 focuses on the human musculoskeletal and digestive systems, their diseases and treatments, medical facilities and doctor-patient interactions. Offered Fall, Winter.

Prerequisites: POL 1020 with a minimum grade of D-

Restriction(s): Enrollment is limited to Undergraduate level students.

POL 3061 Medical Polish II Cr. 1

One of two online Polish language courses designed to teach vocabulary used in the medical field. POL 3061 focuses on the human cardiovascular and respiratory systems, their diseases and treatments, on dentistry, and on doctor-patient interactions. Offered Fall, Winter.

Prerequisites: POL 1020 with a minimum grade of D-

Restriction(s): Enrollment is limited to Undergraduate level students.

POL 3410 New Soil, Old Roots: The Immigrant Experience Cr. 3

Satisfies General Education Requirement: Civ and Societies (CLAS only), Diversity Equity Incl Inquiry, Foreign Culture, Global Learning Inquiry
Armenian, German, Jewish, Polish, Russian and Ukrainian immigration to the United States, its effects on the cultures (language, literature, religion, politics, music, art and theatre) of these ethnic groups and its influence upon American culture. Offered Fall.

Equivalent: ARM 3410, GER 3410, RUS 3410, SLA 3410

POL 3700 The Changing Face of Europe Cr. 1-2

Special topics relating to Central, Eastern and Western Europe. Offered Intermittently.

Equivalent: GER 3700, RUS 3700, SLA 3700

POL 3750 Polish and Yugoslavian Cinema Cr. 3

Satisfies General Education Requirement: Cultural Inquiry, Visual Performing Arts

Two national cinemas introduced through milestone films and lesser-known cinematic gems produced before and after the fall of communism. Offered Every Other Winter.

Equivalent: SLA 3750

POL 3800 Topics in Slavic Studies Cr. 3

Special topics relating to Slavic languages, literatures and cultures, such as drama, the Gulag, and contemporary culture. Offered Yearly.

Equivalent: RUS 3810, SLA 3800

Repeatable for 9 Credits

POL 3990 Directed Study Cr. 1-3

For students desiring additional work in the language at the intermediate level; for programs of work not included in scheduled course, either in language or literature. Offered Every Term.

Prerequisites: POL 2010 with a minimum grade of D-

Repeatable for 6 Credits

POL 5990 Directed Study Cr. 1-3

Offered Every Term.

Prerequisites: POL 3020 with a minimum grade of D-

Repeatable for 12 Credits

POL 5993 Writing Intensive Course in Polish Cr. 0

Satisfies General Education Requirement: Writing Intensive Competency
Disciplinary writing assignments under the direction of a faculty member. Must be selected in conjunction with a designated corequisite; see

section listing in Schedule of Classes for corequisites available each term. Satisfies the University General Education Writing Intensive Course in the Major requirement. Required for all majors. Offered Fall, Winter.

Prerequisites: AFS 2390 with a minimum grade of C or ENG 2390 with a minimum grade of C or ENG 3010 with a minimum grade of C or ENG 3020 with a minimum grade of C or ENG 3050 with a minimum grade of C

Restriction(s): Enrollment is limited to Undergraduate level students.

POL 5999 Internship in Polish Studies Cr. 3

Internship in a public or private organization related to Polish studies.
Offered for undergraduate credit only. Offered Every Term.

Prerequisite: POL 3000 with a minimum grade of C- or POL 3030 with a minimum grade of C- or POL 3060 with a minimum grade of C-

Restriction(s): Enrollment is limited to students with a major, minor, or concentration in Slavic Studies or Slavic Studies Honors.

PPR - PHARMACY PRACTICE

PPR 4115 Social Administrative Sciences and Professional Development I Cr. 2

Designed to familiarize the student with pharmacy as a profession and to facilitate an understanding of its place in health care today and in the future. Offered Fall.

Restriction(s): Enrollment limited to students in the Doctor of Pharmacy program.

PPR 4245 Patient Care Lab 1 Cr. 1

The Patient Care Lab sequence (PCL 1-4) is designed to allow students to begin to develop the direct patient care and pharmacy practice skills they will need to become successful practitioners. Offered Winter.

Restriction(s): Enrollment limited to students in the Doctor of Pharmacy program.

Course Material Fees: \$40

PPR 4255 Social Administrative Sciences and Professional Development II Cr. 2

Exploration of health care delivery and payment systems, with an emphasis on pharmacy and pharmacists. Discussion of social constructs, cultural sensitivity, and health belief models as related to pharmacy practice. Offered Winter.

Restriction(s): Enrollment limited to students in the Doctor of Pharmacy program.

PPR 4315 Pharmacy Jurisprudence Cr. 2

Application of Michigan state and federal laws to the practice of pharmacy. Offered Spring/Summer.

Restriction(s): Enrollment limited to students in the Doctor of Pharmacy program.

PPR 4365 Introductory Pharmacy Practice Experience I Cr. 1

Satisfies General Education Requirement: Writing Intensive Competency Beginning learning experiences for patient interviewing and counseling, interaction with healthcare professionals, pharmacy practice in various settings, interprofessional education, healthcare in the underserved population, and community service. Offered Spring/Summer.

Restriction(s): Enrollment limited to students in the Doctor of Pharmacy program.

PPR 5145 Patient Care Lab II Cr. 1

The Patient Care Lab sequence (PCL 1-4) is designed to allow students to begin to develop the direct patient care and pharmacy practice skills they will need to become successful practitioners. Offered Fall.

Restriction(s): Enrollment limited to students in the Doctor of Pharmacy program.

Course Material Fees: \$40

PPR 5155 Social Administrative Sciences and Professional Development III: Practice Management Cr. 2

Focus on topics that will enable an understanding of how pharmacy services are managed and how to manage personnel and provide leadership. Offered Fall.

Restriction(s): Enrollment limited to students in the Doctor of Pharmacy program.

PPR 5165 Introductory Pharmacy Practice Experience II Cr. 1

Beginning learning experiences for patient interviewing and counseling, interaction with healthcare professionals, pharmacy practice in various settings, interprofessional education, healthcare in the underserved population, and community service. Offered Fall.

Restriction(s): Enrollment limited to students in the Doctor of Pharmacy program.

PPR 5215 Applied Pharmacokinetics and Pharmacogenomics Cr. 2

Application of knowledge of pharmacokinetics and pharmacogenomics to patient-specific drug dosing. Offered Winter.

Prerequisite: PSC 5115

Restriction(s): Enrollment limited to students in the Doctor of Pharmacy program.

PPR 5245 Patient Care Lab III Cr. 1

The Patient Care Lab sequence (PCL 1-4) is designed to allow students to begin to develop the direct patient care and pharmacy practice skills they will need to become successful practitioners. Offered Winter.

Restriction(s): Enrollment limited to students in the Doctor of Pharmacy program.

Course Material Fees: \$40

PPR 5255 Social Administrative Sciences and Professional Development IV Cr. 2

Designed to enable understanding of the importance of constructing medication systems and processes around proven best practices to maximize patient safety and to begin developing the ability to conceptualize, implement, and manage these systems in all health care settings. Offered Winter.

Restriction(s): Enrollment limited to students in the Doctor of Pharmacy program.

PPR 5265 Introductory Pharmacy Practice Experience III Cr. 1

The introductory pharmacy practice experiences are to provide a beginning learning experiences for patient interviewing and counseling, interaction with healthcare professionals, pharmacy practice in various settings, interprofessional education, healthcare in the underserved population, and community service. Offered Winter.

Restriction(s): Enrollment limited to students in the Doctor of Pharmacy program.

PPR 5990 Directed Study in Pharmacy Practice Cr. 2

No credit after election of two credits in any of PSC 5990, PSC 5991, PSC 5992, except by written consent of department chair. Offered Every Term.

Restriction(s): Enrollment is limited to Professional level students; enrollment limited to students in the Pharmacy and Health Sciences.

PPR 6115 Applied Therapeutics in Self-Care Cr. 2

Application of concepts of patient assessment, therapeutics, patient education, and health care systems to patient self-care. Offered Fall.

Restriction(s): Enrollment limited to students in the Doctor of Pharmacy program.

PPR 6145 Patient Care Lab IV Cr. 1

The Patient Care Lab sequence (PCL 1-4) is designed to allow students to begin to develop the direct patient care and pharmacy practice skills they will need to become successful practitioners. Offered Fall.

Restriction(s): Enrollment limited to students in the Doctor of Pharmacy program.

Course Material Fees: \$40

PPR 6155 Social Administrative Sciences and Professional Development V Cr. 3

Development of and justification for a pharmacy service, including background, service objectives, service design, implementation plan, and evaluation. Offered Fall.

Restriction(s): Enrollment limited to students in the Doctor of Pharmacy program.

PPR 6165 Community-Introductory Pharmacy Practice Experience (C-IPPE) Cr. 2

Introduction to the organization and provision of community pharmacy services. Offered Fall, Winter.

Restriction(s): Enrollment limited to students in the Doctor of Pharmacy program.

PPR 6175 Hospital-Introductory Pharmacy Practice Experience (H-IPPE) Cr. 2

Introduction to the organization and provision of health-system pharmacy services. Offered Fall, Winter.

Restriction(s): Enrollment limited to students in the Doctor of Pharmacy program.

PPR 6235 Social Administrative Sciences and Professional Development V Cr. 2

Understanding, developing and evaluating population health and population-based health care programs. Offered Winter.

Restriction(s): Enrollment limited to students in the Doctor of Pharmacy program.

PPR 6245 Pharmacy Ethics and Professional Responsibility Cr. 2

Understanding ethical precepts and applying normative principles to the practice of pharmacy in the context of professional service to the community. Offered Winter.

Restriction(s): Enrollment limited to students in the Doctor of Pharmacy program.

PPR 6295 Clinical Capstone Cr. 2

Utilization of pharmacotherapeutic-related knowledge and skills to evaluate patient cases and practice-related problems in order to assess students' preparedness for advanced pharmacy practice experiences. Offered Winter.

Restriction(s): Enrollment limited to students in the Doctor of Pharmacy program.

Course Material Fees: \$90

PPR 6300 Patient Perspectives of Health, Illness and Culture Cr. 2

People from various cultures (religious, ethnic, sexual orientation, disability, chronic illness, economic status) discuss in small groups how these cultures influence living with a chronic illness. Students also discuss readings on health culture and keep a journal on their course experience. Offered Spring/Summer.

Restriction(s): Enrollment is limited to Professional level students; enrollment limited to students in the Pharmacy and Health Sciences.

Equivalent: OT 6320

PPR 6320 Underserved Care: Local and Global Experiences Cr. 2

Provides the opportunity for hands-on clinical experience in local and international under-served communities. Offered Every Term.

Restriction(s): Enrollment limited to students in the Doctor of Pharmacy program.

PPR 6520 Contemporary Issues in Nutrition Support Cr. 2

Provision of patient care in cooperation with patients, patients' agents, prescribers, and other members of an interprofessional health care team; management and use of resources of the health care system; evaluation of a patient case and design of an optimal nutritional regimen. Offered Spring/Summer.

Restriction(s): Enrollment is limited to Professional level students; enrollment limited to students in the Pharmacy and Health Sciences.

PPR 6550 Psychiatric Pharmacy Cr. 2

Covers core clinical sciences beyond the required pharmacotherapy modules on psychiatric topics. Offered Spring/Summer.

Prerequisite: PHA 5155 or PHA 5225

PPR 6560 Foundations in Global Health Cr. 2

Provides pharmacy students an introduction to Global Health and enables them to explore their own Global Health interests through local volunteering, class discussions and group projects. Offered Fall.

Restriction(s): Enrollment limited to students with a class of PharmD Yr 3 or PharmD Yr 4; enrollment limited to students in the Doctor of Pharmacy program.

PPR 6580 Contemporary Issues in Anticoagulation Management Cr. 2

Advanced therapeutics in area of anticoagulant use. Offered Fall.

Restriction(s): Enrollment is limited to Professional level students; enrollment limited to students in the Pharmacy and Health Sciences.

PPR 6590 Principles of Pain Management Cr. 2

Covers core clinical sciences beyond the required pharmacotherapy modules on pain management topics. And expands on the pathophysiology, pharmacology, and therapeutics covered in the core clinical sciences courses to assist the student pharmacist in developing assessment skills emphasizing inter-professional collaboration. Offered Winter.

Prerequisites: PHA 5225

Restriction(s): Enrollment is limited to Professional level students; enrollment limited to students in the Pharmacy and Health Sciences.

PPR 6720 Clinical Applications of Diabetes Cr. 2

Advanced elective course on management of diabetes mellitus and its related disorders. Principles of student directed learning, literature discussion and evaluation, interprofessional exposure, small group learning, and hands-on activities. Offered Fall.

Restriction(s): Enrollment is limited to Professional level students; enrollment limited to students in the Pharmacy and Health Sciences.

PPR 6740 Adv Tpcs: Amb Care Pharm Cr. 2

The overall goal of this course is to increase pharmacy students' knowledge of practice models for ambulatory care pharmacy and investigate career opportunities in ambulatory care pharmacy practice. Offered Winter.

Restriction(s): Enrollment limited to students in the Doctor of Pharmacy program.

PPR 6770 Study of Medicinal Plants and Culture in Amazonia Cr. 2

Ethnobotany of indigenous plants and use of these substances in the health and beliefs of the native people. Students meet with botanists, taxonomists, pharmacists, shamans, and native people. Offered Spring/Summer.

Restriction(s): Enrollment is limited to Professional level students; enrollment limited to students in the Pharmacy and Health Sciences.

PPR 6860 Principles of Pediatric Pharmacy Cr. 2-3

Common pediatric problems and diseases including poisonings, cystic fibrosis, sickle-cell anemia, placental transfer of drugs and teratology. Offered Yearly.

Restriction(s): Enrollment is limited to Professional level students; enrollment limited to students in the Pharmacy and Health Sciences.

PPR 7195 Advance Research Scholars: Advance Pharmacy Practice Experience Cr. 4

Provides capstone research instruction aimed at project completion, writing and peer review processes, and research program advancement. Offered Fall.

Restriction(s): Enrollment limited to students in the Doctor of Pharmacy program.

PPR 7225 Vaccines in Clinical and Public Health Practice Cr. 2

Explorations of topics related to use of vaccines for infants, children and adults in practice settings that include clinics, pharmacies and public health programs. Offered Yearly.

Restriction(s): Enrollment limited to students with a class of PharmD Yr 2 or PharmD Yr 3; enrollment limited to students in the Doctor of Pharmacy or Master in Public Health programs.

PPR 7410 Advanced Pharmacy Practice Inpatient/Acute Care Cr. 4

Experimental education designed to provide practical training experience in managing drug therapy of patients in a variety of health-care settings.

Offered Every Term.

Restriction(s): Enrollment is limited to Professional level students; enrollment limited to students in the Pharmacy and Health Sciences.

Course Material Fees: \$85

Repeatable for 12 Credits

PPR 7420 Advanced Pharmacy Practice Ambulatory Care Cr. 4

Experimental education designed to provide practical training experience in managing drug therapy of patients in a variety of health-care settings.

Offered Every Term.

Restriction(s): Enrollment is limited to Professional level students; enrollment limited to students in the Pharmacy and Health Sciences.

Repeatable for 12 Credits

PPR 7430 Advanced Pharmacy Practice Patient Care Core Cr. 4

Experimental education designed to provide practical training experience in managing drug therapy of patients in a variety of health-care settings.

Offered Every Term.

Restriction(s): Enrollment is limited to Professional level students; enrollment limited to students in the Pharmacy and Health Sciences.

Repeatable for 12 Credits

PPR 7530 Advanced Pharmacy Practice Patient Care Elective I Cr. 4

Experimental education designed to provide practical training experience in managing drug therapy of specialized patients in diversified health-care settings. Offered Every Term.

Restriction(s): Enrollment is limited to Professional level students; enrollment limited to students in the Pharmacy and Health Sciences.

Repeatable for 8 Credits

PPR 7540 Advanced Pharmacy Practice Non-Patient Care Elective I Cr. 4

Practical education to develop knowledge in specific areas of pharmacy practice in specialized pharmacy or health-care settings. Offered Every Term.

Restriction(s): Enrollment is limited to Professional level students; enrollment limited to students in the Pharmacy and Health Sciences.

Repeatable for 8 Credits

PPR 7550 Advanced Pharmacy Practice Hospital Cr. 4

Practical training experience in hospital pharmacy practice, including pharmacy operations and clinical services. Offered Every Term.

Restriction(s): Enrollment is limited to Graduate or Professional level students; enrollment limited to students in the Pharmacy and Health Sciences.

PPR 7560 Advanced Pharmacy Practice Community Cr. 4

Practical training experience in management of a community pharmacy, and managing drug therapy of patients in community pharmacy setting. Offered Every Term.

Restriction(s): Enrollment is limited to Graduate or Professional level students; enrollment limited to students in the Pharmacy and Health Sciences.

PPR 7960 Economic Evaluation of Health Care Interventions Cr. 2-3

Designed for advanced professional students (3rd year pharmacy, medicine, health sciences), students in the Master of Public Health degree program, graduate students and Fellows who would like an introduction to cost-effectiveness analysis. Offered Spring/Summer.

Restriction(s): Enrollment is limited to Professional level students; enrollment limited to students in the Pharmacy and Health Sciences.

PPR 7990 Directed Study in Pharmacy Practice Cr. 1-3

Minor projects in pharmacy for students whose interests and needs are not adequately met in other scheduled classes or in the doctoral research project. Offered Every Term.

Restriction(s): Enrollment is limited to Graduate or Professional level students; enrollment limited to students in the Pharmacy and Health Sciences.

PS - POLITICAL SCIENCE

PS 1000 Introduction to Political Science Cr. 3

Satisfies General Education Requirement: Civic Literacy, Social Inquiry, Social Sciences

Introduction to the scope and method of political science. Overview of politics, political systems, nature and role of political institutions. Empirical political theory; practice in conducting political research. Offered Yearly.

PS 1010 American Government Cr. 4

Satisfies General Education Requirement: American Society Institution, Civic Literacy, Social Inquiry

Politics and functions of American governmental institutions. Policy processes and the role of citizens in the political process. No credit after PS 1030. Offered Every Term.

PS 1030 The American Governmental System Cr. 3

Satisfies General Education Requirement: American Society Institution, Civic Literacy, Social Inquiry

Structure and functions of the American political system. Governmental institutions and processes. No credit after PS 1010. Offered Every Term.

PS 1050 Understanding Political Science Statistics Cr. 4

Satisfies General Education Requirement: Quantitative Experience Comp
Applications of elementary statistical methods to the study of American government, comparative politics, and international relations. Offered Fall, Winter.

Equivalent: STA 1020

PS 2000 Introduction to Urban Studies Cr. 4

Satisfies General Education Requirement: Social Inquiry, Social Sciences
Urban phenomena both past and present, including the quality and nature of urban life; major concerns of urban areas; perspectives and techniques of various urban-related disciplines. Offered Every Term.

Equivalent: GPH 2000, HIS 2000, SOC 2500, US 2000

PS 2206 Political Sociology Cr. 3

Examines the sociology of politics and explores sociological analysis of political processes in the United States. Offered Every Other Year.

Equivalent: SOC 2206

PS 2240 Introduction to Urban Politics and Policy Cr. 4

Satisfies General Education Requirement: Social Inquiry, Social Sciences
Influences on politics and problems of cities, forms of local political involvement, role of local public officials, impact of state and federal policies. Overview of current issues and problems in specific policy areas. Offered Yearly.

PS 2310 Introduction to Public Administration Cr. 4

Governmental and administrative structures and organizations. Concepts and techniques of public management. Impact of public bureaucracies on modern society. Offered Every Term.

Prerequisites: PS 1010 with a minimum grade of D- or PS 1030 with a minimum grade of D-

PS 2410 Introduction to Public Policy Cr. 4

Public policy-making institutions and processes. Emphasis on theory and practice of policy formation, implementation and evaluation. Various models of political decision making. Offered Every Term.

Prerequisites: PS 1010 with a minimum grade of D- or PS 1030 with a minimum grade of D-

PS 2420 Ethics and Politics of Public Policy Cr. 4

Moral and political standards for policy-making, relation of major political and social theorists to policy issues such as economic inequality, racial and sexual discrimination, the enforcement of morals, and violence and social change. Offered Yearly.

PS 2440 Science, Technology, and War Cr. 4

Modern weapons, nuclear and otherwise are becoming increasingly available and dangerous; people with grievances seem eager to use them. Science and technology, as well as constraints of bureaucracy and society underpin weapons development and use, as technologies affect prospects and results of war and peace. History of humanity and its tools of war. Offered Yearly.

Equivalent: HIS 2510, PCS 2020, PHY 2020

PS 2460 Policy and Rationality: Dilemmas of Choice Cr. 4

Individual decision-making and limitations on human cognition; collective choice; implications for policy development. Offered Yearly.

PS 2510 Introduction to Political Ideologies Cr. 4

Comparison of ideologies, political institutions, and economic systems. Democracy and authoritarianism, capitalism, socialism and communism contrasted. Offered Yearly.

PS 2550 The Study of Non-Violence Cr. 3

Satisfies General Education Requirement: Diversity Equity Incl Inquiry
Intellectual and social roots of non-violence and the practice of non-violence in different people's life styles. Historical and political forces and movements related to non-violence. (Some sections linked to Peace and Justice Learning Community.) Offered Every Term.

Equivalent: HIS 2530, PCS 2050, SOC 2050

PS 2700 Introduction to Canadian Studies Cr. 3

Satisfies General Education Requirement: Foreign Culture, Global Learning Inquiry

Survey of Canada in its cultural, literary, historical, geographical and political aspects; key concepts and social patterns that define the Canadian experience. Offered Yearly.

Equivalent: ENG 2670, GPH 2700, HIS 2700

PS 2710 Introduction to Comparative Politics Cr. 4

Comparison of the political cultures, politics, and political institutions of Eastern, Western, and Southern European political systems. Similarities and differences in public policies; European influence; parallels in developing nations. Offered Every Other Year.

PS 2810 World Politics Cr. 4

Role of power, methods of resolving international conflict, economic relations between industrialized and Third World countries, multinational corporations, terrorists, and other non-state actors. Offered Yearly.

PS 2820 Introduction to Peace and Conflict Studies Cr. 3

Introduction to the peace and conflict studies co-major. Survey, ranging from biology and conflict among animals to disputes involving the individual, the family, the neighborhood and region, the nation and global or international community. Definitions and approaches to peace. (Some sections linked to Peace and Justice Learning Community.) Offered Yearly.

Equivalent: HIS 2500, PCS 2000

PS 2830 Topics in Peace and Conflict Studies Cr. 1-4

Special topics relating to peace and conflict studies. Offered Every Term.

Equivalent: HIS 2520, PCS 2010

Repeatable for 12 Credits

PS 2992 Political Science Internship Cr. 1-4

Internship in a public or quasi-public organization, agency, civic or voluntary group, or campaign organization. Collateral reading, written work and arranged conferences with faculty supervisor. Offered Every Term.

Repeatable for 4 Credits

PS 3010 Public Opinion and Political Behavior Cr. 4

Factors that shape public opinion; patterns of political participation and electoral politics. Impact of public opinion and popular participation on the political system. Offered Yearly.

Prerequisites: PS 1010 with a minimum grade of D- or PS 1030 with a minimum grade of D-

PS 3020 Political Parties and Elections Cr. 4

Development, structure, functions and operations of American political parties; their electoral and governmental roles; comparison with other systems; possible reforms. Offered Every Other Year.

Prerequisites: PS 1010 with a minimum grade of D- or PS 1030 with a minimum grade of D-

PS 3025 Political Campaigns in America Cr. 4

Nature and dynamics of campaigns for public office in the U.S. Campaign techniques and strategies in an era of candidate-centered American politics. Offered Intermittently.

PS 3030 Political Interest Groups Cr. 4

Structure, techniques and internal politics of interest groups, their roles in policy-making and relationship with other groups such as political parties, legislatures and administrative agencies. Offered Intermittently.

Prerequisites: PS 1010 with a minimum grade of D- or PS 1030 with a minimum grade of D-

PS 3040 The Legislative Process Cr. 4

Function, structure, procedures and politics of American legislative bodies with special attention to Congress. Relationships with other political institutions, especially the executive branch, and comparisons with foreign legislative institutions. Offered Yearly.

Prerequisites: PS 1010 with a minimum grade of D- or PS 1030 with a minimum grade of D-

PS 3050 Politics of the American Presidency Cr. 4

Constitutional, historical, and political bases of the presidency. Influence of courts, Congress, interest groups, the news media, and personality on the office. Offered Intermittently.

Prerequisites: PS 1010 with a minimum grade of D- or PS 1030 with a minimum grade of D-

PS 3060 State Government and Politics Cr. 4

A comparison of states in the United States in terms of their governmental structures, functions and response to changes in national and local relationships. Offered Every Other Year.

PS 3070 Michigan Politics Cr. 4

History and overview of Michigan politics: structure, process, current issues. Offered Every Term.

PS 3080 Gender and Politics Cr. 4

Satisfies General Education Requirement: Civic Literacy

Genesis and perpetuation of gender roles; feminist movements to modify these roles; impact of gender on public policy; gender-differentiated impact of public policy. Offered Intermittently.

PS 3100 American Legal Systems and Processes Cr. 4

Analysis of the institutional structure, processes and policy-making of the American judicial system, including the recruitment of lawyers and judges, the influence of legal rules on policy-making, and selected areas of judicial policy-making. Emphasis on federal and state appellate courts. Offered Yearly.

PS 3120 Politics of the Criminal Justice Process Cr. 3

Satisfies General Education Requirement: Civic Literacy

Political aspects of criminal justice; politics of crime legislation, police function, prosecution, adjudication, and corrections; Federal role in criminal justice. Offered Intermittently.

Equivalent: CRJ 3120

PS 3250 Detroit Politics: Continuity and Change in City and Suburbs Cr. 4

Satisfies General Education Requirement: Diversity Equity Incl Inquiry
Detroit area political systems and processes; historical, economic, and social influences on local politics. Traditions, changes, and future challenges in Detroit and metropolitan area. Offered Every Other Year.

Equivalent: HIS 3240

PS 3430 Bureaucracy and Public Policy Cr. 4

Theory and development of modern governmental bureaucracy. Bureaucratic politics and its significance for decision making and program implementation. Normative aspects of bureaucracy, including accountability to the public and the role of bureaucrats in helping to define rational, efficient policies. Offered Every Other Year.

Prerequisites: PS 1010 with a minimum grade of D- or PS 1030 with a minimum grade of D-

PS 3450 Environmental Policy and Politics Cr. 4

Introductory course; primary focus on United States. Discussion of major environmental problems and their causes; environmental politics and the policy process. Offered Every Other Year.

PS 3510 Law, Authority and Rebellion Cr. 4

Satisfies General Education Requirement: Cultural Inquiry, Philosophy Letters

Analysis of major theories of law, authority, freedom, and political obligation; justifications of disobedience, resistance and revolution. Offered Every Other Year.

PS 3515 American Political Thought Cr. 3-4

American political culture and thought through modern history from 1930 to the present. Variety of interpretations of American political culture including conservative, liberal, Marxist, and post-modernist. Offered Every Other Year.

PS 3520 Justice Cr. 4

Satisfies General Education Requirement: Cultural Inquiry, Philosophy Letters

Analysis of major theories of justice; social, economic and political justice. Offered Every Other Year.

PS 3530 Great Political Thinkers I Cr. 4

Great political thinkers from Plato to Machiavelli. Offered Every Other Year.

PS 3540 Great Political Thinkers II Cr. 4

Great political thinkers from Machiavelli to the present. Offered Every Other Year.

Restriction(s): Enrollment is limited to Undergraduate level students.

PS 3600 Methods of Political Inquiry Cr. 4

Techniques of political science research: data gathering techniques, especially survey design; data processing and analysis using computers; and the interpretation and reporting of statistical results. Offered Every Term.

PS 3710 Politics of Western Europe Cr. 4

Western Europe: driving force in world politics over centuries; lofty principles and gruesome conflict. Origins of European political systems; twentieth-century crises; ongoing process of creating united Europe. Offered Every Other Year.

PS 3715 Politics of Central and Eastern Europe Cr. 4

Central and eastern Europe: crossroads of many world civilizations and birthplace of the movements that shaped the modern world. Rise and fall (and rise?) of nationalism, communism, and democracy in the region. Offered Every Other Year.

PS 3735 Politics of Latin America Cr. 4

Political, social, economic and cultural foundations, the structure and function of institutions, and political processes in Latin America. Offered Every Other Year.

PS 3770 Politics of East Asia Cr. 4

Survey of five major polities in East Asia: China, Taiwan, Japan, South Korea, and (more briefly) North Korea. Why some of them have undergone democratization and others have not; how political factors have affected their recent economic performance; what explains conflicts and cooperation among them, and what security implications they hold for the United States. Offered Every Other Year.

Restriction(s): Enrollment is limited to Undergraduate level students.

Equivalent: ASN 3770

PS 3795 Latin America in World Affairs Cr. 4

Latin America's position in the international system; relationships between Latin American countries and the United States. Offered Every Other Year.

PS 3811 Theory of World Politics Cr. 4

Major theoretical approaches. Evaluation of the extent to which theses that devolve from realist, idealist, globalist, culturalist, feminist and decision-making approaches allow the explication of phenomena in world politics. Offered Intermittently.

Prerequisites: PS 2810 with a minimum grade of D-

PS 3820 Pan Africanism: Politics of the Black Diaspora Cr. 4

Satisfies General Education Requirement: Global Learning Inquiry Interplay of Pan Africanism as a cultural and socio-political movement in world politics from its origins as a concept to organizing practice worldwide. Offered Yearly.

Equivalent: AFS 3420

PS 3830 War Cr. 4

Major theoretical and methodological approaches to study of international conflict. Analysis of impact of domestic, state, and global system factors in explicating international war. Aspects of civil wars that have become internationalized. Offered Intermittently.

Prerequisite: PS 2810 with a minimum grade of C-

PS 3835 Middle East Conflict Cr. 4

International and regional factors affecting contemporary political landscape of the region: influence of European colonialism; emergence and persistence of Palestinian-Israeli conflict; contemporary developments in the Persian Gulf and the role of U.S. policy since 9/11. Discussion of topics of current interest such as the situation in Iraq and the prospects for democratic reform in the region. Offered Intermittently.

Restriction(s): Enrollment is limited to Undergraduate level students.

PS 3840 American Foreign Policy and Administration Cr. 4

Shaping and administering United States foreign policy; influences of Congress and interest groups on the White House; secrecy; and the foreign service. Offered Intermittently.

PS 3991 Directed Study: WSU-Salford Exchange Cr. 3-9

Credit earned through approved upper-division course work at the University of Salford, England, as part of the W.S.U.- Salford Exchange Program. Offered Fall, Winter.

PS 4460 Techniques of Policy Analysis Cr. 4

Introduction to several major techniques used by policy analysts to measure and evaluate the effectiveness, efficiency, and equity of public policies and programs. Approaches and methodologies considered will include systems analysis, benefit-cost analysis, and simulation. This course involves quantitative data analysis. Students are expected to be proficient in basic algebra and to be computer literate. Offered Yearly.

Course Material Fees: \$5

PS 4710 Democracy Cr. 4

"The worst form of government except for all the others?" How democracy has evolved from ancient Athens until today. What makes democracy work. How democratization is proceeding in Latin America, Europe, Africa, Asia. Offered Every Other Year.

PS 4725 Globalization and Politics Cr. 4

Domestic and international politics and globalization: theories and evidence. Consequences for economic development and democratization or economic inequality. Questions explored include: What is economic globalization? Is it really new? What caused its recent resurrection? What political disjunctions engendered the process and how do they vary within political institutions? How has it threatened sovereign nation-states, constrained governmental policy autonomy, and encouraged regional separatist movements? Offered Every Other Year.

PS 4810 Foreign Policies of Major Powers Cr. 4

Major issues and trends in the foreign policies of Russia, China, Japan, and the European Union. Offered Every Other Year.

PS 4850 International Organizations Cr. 4

Issues of global governance; role of international organizations in managing issues that cross borders. Offered Intermittently.

Restriction(s): Enrollment is limited to Undergraduate level students.

PS 4990 Directed Study Cr. 1-4

Independent study assignment under the direction of a faculty member. Offered Every Term.

Repeatable for 8 Credits

PS 4995 Senior Honors Paper Cr. 4

Completion of an extended examination of a topic or research question in political science, under the direction of one or more members of the departmental faculty. Offered Every Term.

PS 5030 African American Politics Cr. 4

Nature and texture of black politics; various perspectives on politics by blacks; the impact of blacks on American politics. Offered Every Other Year.

Equivalent: AFS 5030

PS 5040 Religion and Politics Cr. 4

Religion and American political culture; religious institutions and religious movements; church lobbying in national, state, and local governments; specific manifestations of religion and politics; African Americans, women and conservative Christians. Offered Every Other Year.

Prerequisites: PS 1010 with a minimum grade of D- or PS 1030 with a minimum grade of D-

PS 5050 Mass Media and Politics Cr. 3

Role of communications media in modern politics. Historical evolution of media; political impact of newspapers, radio and television; polling and the media; political advertising; media law; mass media and the future of American democracy. Offered Every Other Year.

Prerequisites: PS 1010 with a minimum grade of D- or PS 1030 with a minimum grade of D-

PS 5110 Constitutional Law Cr. 4

Examination of the power of judicial review, barriers to court review, distribution of powers in the national government, federal-state relations, federal-state power to regulate and tax interstate commerce, and protection of property through the due process clause. Offered Yearly.

PS 5120 Constitutional Rights and Liberties Cr. 4

The Bill of Rights and the Fourteenth Amendment's due process and equal protection clauses, including rights of criminal defendants, freedom of speech and religion, race and sex discrimination. Offered Yearly.

PS 5560 Biopolitics Cr. 4

Use of the perspective of the life sciences in the study of political behavior, political evolution, political institutions, and contemporary political issues. Offered Yearly.

PS 5630 Statistics and Data Analysis in Political Science I Cr. 4

Introduction to statistical description and inference in the study of politics, administration and public policy. Introduction to statistical analysis using microcomputers. Offered Every Term.

Course Material Fees: \$5

PS 5710 Politics of Europe and the European Union Cr. 3

Comparative analysis of the politics, culture and societies of major European countries; investigation of the formation and operation of the European Union. Offered Intermittently.

PS 5740 Ethnicity: The Politics of Conflict and Cooperation Cr. 4

Current ethnic (racial, linguistic, religious, and cultural) conflicts regionally, nationally and internationally. Introduction to concepts and analytic perspectives for understanding ethnicity as a factor in nation building and maintenance. Offered Yearly.

Equivalent: AFS 5740, PCS 5500

PS 5760 History and Development of Islamic Political Thought Cr. 3

Historical analysis of political Islam through study of the precepts and historical vicissitudes impacting the Islamic world from within and from external forces. Offered Every Other Year.

Prerequisites: NE 2030 with a minimum grade of D- and NE 3040 with a minimum grade of D-

Equivalent: NE 5110

PS 5820 International Law Cr. 4

Sources of international law (treaty and custom); institutions of the international system and relationship to domestic law and the courts; state sovereignty; role of United Nations and other international organizations. Application of legal norms to contemporary armed conflicts and human rights catastrophes. Offered Intermittently.

PS 5830 International Conflict and Management Cr. 4

Types of international conflict and such methods of resolution as negotiation, mediation and other third-party procedures. Offered Intermittently.

PS 5850 Human Rights Cr. 4

Theoretical traditions that have inspired the human rights movement; critiques from liberal and conservative perspectives; international human rights treaties and efforts to implement their terms; controversies over cultural relativism, economic and social rights, treatment of women, and the question of non-intervention. Offered Every Other Year.

PS 5890 Dispute Resolution Cr. 3

Overview of the processes and actors in the field of dispute resolution including negotiation, mediation, arbitration, and conciliation. Offered Yearly.

Equivalent: CRJ 5994, PCS 5000, PSY 5710

PS 5991 Directed Study: WSU- Salford Exchange Cr. 3-9

Credit earned through approved upper-division course work at the University of Salford, England, as part of W.S.U.- Salford student exchange program. Offered for undergraduate credit only. Offered Fall, Winter.

Restriction(s): Enrollment is limited to Undergraduate level students.

PS 5992 Political Science AGRADE Internship Cr. 4

Internship to supplement classroom course work with practical experience gained through substantial involvement in a responsible capacity in a public or quasi-public agency or civic organization. Offered Every Term.

Restriction(s): Enrollment is limited to Undergraduate level students.

PS 5993 Writing Intensive Course in Political Science Cr. 0

Satisfies General Education Requirement: Writing Intensive Competency Disciplinary writing assignments under the direction of a faculty member. Must be selected in conjunction with a designated corequisite; see section listing in Schedule of Classes for corequisites available each term. Satisfies the University General Education Writing Intensive Course in the Major requirement. Required for all majors. Offered Every Term.

Prerequisites: AFS 2390 with a minimum grade of C or ENG 2390 with a minimum grade of C or ENG 3010 with a minimum grade of C or ENG 3020 with a minimum grade of C or ENG 3050 with a minimum grade of C

Restriction(s): Enrollment is limited to Undergraduate level students.

PS 5999 Special Topics in Political Science Cr. 1-4

Topics to be announced in Schedule of Classes . Offered Every Term.

Repeatable for 16 Credits

PS 6010 Political Psychology Cr. 3

Political attitudes and behavior of both ordinary citizens and political elites using theory and research that adopt a psychological perspective. Topics include: political socialization, ideological belief systems, role of mass media in shaping beliefs and attitudes, race and gender stereotypes and their psychological and political consequences, personality and the dynamics of political leadership. Offered Yearly.

Prerequisite: PSY 1010 with a minimum grade of D-

Equivalent: PSY 6020

PS 6020 Intergovernmental Relations and American Federalism Cr. 3

Legal, fiscal, political and administrative relationships among governments in the American federal system. Current issues and public policies which affect or are affected by intergovernmental relationships. Offered Every Other Year.

PS 6050 Class, Race, and Politics in America Cr. 3

Historical and analytic investigation into the role of class and race in American politics. Offered Intermittently.

Equivalent: AFS 6100, HIS 5110, SOC 7330, UP 7030

PS 6070 Labor and American Politics Cr. 3

Role of organized labor in American politics. Historical background, including rise of the UAW and its role in Detroit and Michigan politics. Recent declines; future of organized labor as a force in American politics. Offered Every Other Year.

PS 6100 Introduction to Graduate Peace and Security Studies Cr. 3

Survey of the peace and security studies fields at the graduate level. Offered for graduate credit only. Offered Fall, Winter.

Restriction(s): Enrollment is limited to Graduate level students.

Equivalent: PCS 6100

PS 6120 Administrative Law and Regulatory Politics Cr. 3

Constitutional and statutory status of bureaucratic agencies; administrative powers and procedures; judicial review of administrative decisions; Congressional oversight of bureaucracies. Offered Intermittently.

PS 6340 Public Sector Labor Relations Cr. 3

History, present functions, problems and current controversies surrounding public sector unions. Offered Every Other Year.

Restriction(s): Enrollment is limited to Graduate level students.

PS 6440 Regional, State, and Urban Economic Development: Policy and Administration Cr. 3

Examination of regional, state, and local economic development theory, analysis, policy and administration. Offered for graduate credit only. Offered Every Other Year.

Restriction(s): Enrollment is limited to Graduate level students.

Equivalent: ECO 6650, UP 6550

PS 6455 Discrimination and Fair Housing Cr. 3

Multidisciplinary investigation into the nature, motivations, consequences, and legal/public policy implications of racial/ethnic discrimination in housing and related markets in U.S. metropolitan areas. Offered Intermittently.

Equivalent: AFS 6455, ECO 6455, SOC 6455, UP 6455, US 6455

PS 6640 Statistics and Data Analysis in Political Science II Cr. 3

Modern statistical theory applied to the study of politics, administration, and public policy. Multivariate analysis: multiple regression, logistic regression, path analysis, and factor analysis. Offered Yearly.

Prerequisite: PS 5630

Course Material Fees: \$5

PS 6700 Financial Management for Nonprofit Organizations Cr. 3

Conducting financial management in nonprofit organizations. Topics include: legal responsibilities, cash versus accrual basis accounting, financial statements, fund accounting, fixed assets and depreciation, contributions and budgeting. Offered Yearly.

PS 6710 Introduction to Nonprofit Organizations Cr. 3

Topics include: nonprofit organizations and their history, types and characteristics, goals, external environment, legal framework, governance, leadership, management, and ethics. Offered Fall.

Restriction(s): Enrollment is limited to Graduate level students.

PS 6720 Marketing, Development, and Grant Writing for Nonprofit Organizations Cr. 3

How nonprofit organizations locate and secure resources from the private sector, individual philanthropists, foundations, and governments, through marketing, development, and the writing and submission of grants. Offered for graduate credit only. Offered Winter.

Restriction(s): Enrollment is limited to Graduate level students.

PS 6830 Civil War and Conflict Processes Cr. 3

Introduction to literature on civil wars: origins, variables affecting their duration, termination. Peace making and peace agreements studied comparatively. Recent Balkan and African civil wars. Offered Intermittently.

PS 6850 International Organizations Cr. 3

Covers origins and significance of international institutions in world politics. Reviews theoretical approaches to international institutions and global governance, including realist, institutionalist and constructivist. Examines problems of cooperation, delegation of power, disparities of power and the development of robust international regimes in a variety of areas of global governance (security, economic, human rights). Offered Intermittently.

PS 6860 American Foreign Policy Cr. 3

Contending paradigms of realism and liberalism as they relate to programs for American foreign policy. Offered Yearly.

PS 6870 United States Foreign Relations Law Cr. 4

U.S. constitutional law and politics relating to the branches' competencies in conduct of foreign affairs and to incorporation of international law in U.S. courts; war powers, counterterrorism, treaties, human rights litigation, immunities. Offered Every Other Year.

Prerequisite: PS 5110 with a minimum grade of D- or PS 5820 with a minimum grade of D-

Equivalent: LEX 7888

PS 7020 The New Institutionalism Cr. 3

Applies concepts of rational choice theory to explain the development of political institutions. Offered Fall.

Restriction(s): Enrollment is limited to Graduate level students.

PS 7030 American Political Processes Cr. 3

Political socialization, public opinion, and political behavior. Role of political parties and interest groups in the political process. Offered Every Other Year.

Restriction(s): Enrollment is limited to Graduate level students.

PS 7040 American Governmental Institutions: Congress and the Courts Cr. 3

Examination of the functions, structure and processes of major American governmental institutions with special emphasis on the Congress and the courts. Offered Every Other Year.

Restriction(s): Enrollment is limited to Graduate level students.

PS 7045 American Governmental Institutions: The Presidency Cr. 3

Analysis of the American presidency: the presidency and American political development, relationship of the office to other major political institutions, nature and sources of presidential power. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate level students.

PS 7050 American Political Culture Cr. 3

Analysis of the relationship between belief systems and political action in America. Focus on patterns of social change and conflict management. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate level students.

PS 7099 Topics in American Politics Cr. 3

Topics chosen by faculty; may include: gender politics, political socialization, voting behavior, political parties, and interest groups. Offered Intermittently.

Restriction(s): Enrollment is limited to Graduate level students.

PS 7210 Approaches to the Study of Urban Politics Cr. 3

Examination of aspects of the urban political process and the research methods used in studying them. Topics include forms of political participation, political structures, community power and influence, strengths and weaknesses of case studies, comparative research, aggregate and individual data. Offered Every Other Year.

Restriction(s): Enrollment is limited to Graduate level students.

PS 7240 Urban Public Policy Cr. 3

Overview of major theoretical approaches to understanding urban/regional problems and politics. Focus on following regional issues: interdependence of populations across municipal borders, municipal fragmentation, racial and economic segregation, mobility of labor and capital within and across regions. Offered Every Other Year.

Restriction(s): Enrollment is limited to Graduate level students.

PS 7250 Seminar in Urban Administration Cr. 3

Administration in agencies with urban-related policy and program functions. Focus on: public services delivery; urban systems development; program-project design, implementation and evaluation; and intergovernmental relations. Offered Every Other Year.

Restriction(s): Enrollment is limited to Graduate level students.

PS 7260 Urban Poverty and Racial Segregation Cr. 3

Review of theories of poverty from various economic/political perspectives; historical intervention policies; current literature on interplay of racial, economic, and spatial factors on growing economic inequality among urban whites and African-Americans. Political rationale and meaning of the underclass debate. Offered Every Other Year.

Restriction(s): Enrollment is limited to Graduate level students.

Equivalent: AFS 6600, ANT 7260, SOC 7350, UP 7260

PS 7300 Public Administration and its Environment Cr. 3

Emergence and evolution of public administration as both a profession and a field of study. The role of public bureaucracies in the political process and efforts to ensure administrative accountability and responsiveness to the democratic system. Administrative relationships with elected executives, legislatures, the judiciary, the media and interest groups. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate level students.

PS 7310 Public Management Internship Cr. 1-3

Internship designed to integrate graduate course work with practical knowledge and experience gained from employment in a responsible capacity in a public agency or nonprofit organization. Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students.

Repeatable for 6 Credits

PS 7320 Organization Theory and Behavior Cr. 3

Study of major theoretical approaches to the structure, functioning and performance of organizations and the behavior of groups and individuals within them. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate level students.

PS 7330 Public Budgeting and Finance Cr. 3

Processes of public budgeting in the United States; political dynamics of budgetary decision-making; assessment of efforts to change budget systems; basic concepts of fiscal analysis of expenditure patterns and revenue sources. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate level students.

PS 7340 Public Personnel Management Cr. 3

Examination of the public personnel systems of American governmental units; analysis of current practices and techniques for recruiting, selecting, training, promoting, compensating and removing public employees. Major issues in public personnel management such as collective bargaining, equal employment opportunity, civil service reform and employee productivity and performance. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate level students.

PS 7350 Managing Public Organizations and Programs Cr. 3

Processes and techniques for managing public organizations and providing public services. Topics include: total quality management, communication and information management, motivation and supervision of subordinates, planning and decision making. Relying on for-profit and nonprofit organizations in service delivery. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate level students.

PS 7375 Professional Development Seminar Cr. 1-2

Analysis of managerial techniques and practices currently used by administrators in the public sector. Emphasis on managerial applications of information technology, administrative writing and presentation skills, and organizational and behavioral approaches and techniques. Content areas will vary with yearly offerings. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate level students.

PS 7410 Policy Formation and Implementation Cr. 3

Analysis of the processes through which public policy is made and implemented. Examination of the factors that promote or impede the development and realization of rational, effective, and responsive public policy. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate level students.

PS 7460 Program Evaluation Cr. 3

Theory and practice of program evaluation. Role of program evaluation in the policy process. A number of theories of evaluation will be presented, followed by a discussion of techniques. Topics include total quality management, bench marking; utilization of evaluation. Offered Every Other Year.

Prerequisite: PS 5630 with a minimum grade of C-

Restriction(s): Enrollment is limited to Graduate level students.

PS 7470 Comparative Public Policy Cr. 3

Provides a comparative introduction to the field of public policy for graduate students. Topics covered include actors and institutions involved in policy making, key concepts, major policy theories and frameworks. After establishing this conceptual foundation, students will explore substantive policy in the U.S. and international context, with attention to the sources of policy differences, such as political institutions, economic conditions and culture. Offered Every Other Year.

Restriction(s): Enrollment is limited to Graduate level students.

PS 7480 Policy Analysis for Administration Cr. 3

Introduction to the conceptual foundations of public policy analysis as well as training in various policy analysis tools. Opportunities for students to do policy analysis. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate level students.

PS 7550 Topics in the History of Political Thought Cr. 3-6

Survey of selected political theorists by period or theme; emphasis on interpretation of major works. Offered Every Other Year.

Restriction(s): Enrollment is limited to Graduate level students.

PS 7560 Contemporary Political and Social Theory Cr. 3-6

Analysis of selected major problems, topics, and themes in recent political and social theory. Offered Every Other Year.

Restriction(s): Enrollment is limited to Graduate level students.

PS 7580 Political Theory of Public Law Cr. 3

Legal restraints on exercise of public power as conceived in works of early modern theorists (e.g., Machiavelli, Locke, Montesquieu, and Madison), and as applied in constitutional arrangements that have emerged in a range of historical settings. Topics include: role of law in totalitarian political systems; emergency rule; comparative approaches to judicial review. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate level students.

Equivalent: LEX 7659

PS 7640 Introduction to Game Theory Cr. 3

Standard elements of game theory including some political science applications for illustrative purposes. Emphasis on gaining facility with theoretical concepts and tools. Offered Every Other Year.

Restriction(s): Enrollment is limited to Graduate level students.

PS 7660 Research Methods in Policy and Politics Cr. 3

Analytic methods in the study of politics and public policy: formulating researchable problems, use of models, research design, measurement, data collection, and computer-based data analysis. Offered Yearly.

Prerequisite: PS 5630

Restriction(s): Enrollment is limited to Graduate level students.

PS 7710 Seminar in Comparative Politics Cr. 3

Research-oriented seminar in which students learn basic approaches to the study of domestic policy-making through the comparative method, including structural, cultural, institutional, elite, and rational choice approaches. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate level students.

PS 7711 Advanced Seminar in Comparative Politics Cr. 3-6

Analysis of selected major issues, topics, and debates in the field. Offered Every Other Year.

Restriction(s): Enrollment is limited to Graduate level students.

Repeatable for 99 Credits

PS 7720 Comparative Politics of Advanced Industrial Democracies Cr. 3

Provides an in depth at the political structures and institutions of advanced industrial democracies and at the methods, concepts and theories of comparative politics that further our understanding of those countries. Offered Winter.

Restriction(s): Enrollment is limited to Graduate level students.

PS 7730 Seminar: Comparative Politics of Developing Countries Cr. 3
Intellectual questions and methodological strategies political scientists are addressing in the study of politics in the developing world. Offered Intermittently.
Restriction(s): Enrollment is limited to Graduate level students.

PS 7740 Political Economy Cr. 3
Seminar course; comprehensive survey of political economy: interaction between the government and the economy; microeconomics of politics. Offered Every Other Year.
Restriction(s): Enrollment is limited to Graduate level students.

PS 7810 Seminar in World Politics Cr. 3
Major theoretical approaches. Students evaluate the extent to which theses that devolve from realist, idealist, Marxist, culturalist, decision-making, and alternative approaches allow us to explicate phenomena in world politics. Offered Every Other Year.
Restriction(s): Enrollment is limited to Graduate level students.
Repeatable for 9 Credits

PS 7811 Advanced Seminar in World Politics Cr. 3
Examination of broad range of substantive topics; student develops ability to conduct independent research in world politics subfield; introduction to alternative theoretical approaches and different methods for conducting empirical research. Major performance objective is student development of a research design. Offered Every Other Year.
Restriction(s): Enrollment is limited to Graduate level students.
Repeatable for 6 Credits

PS 7995 Directed Study Cr. 1-6
Offered Every Term.
Restriction(s): Enrollment is limited to Graduate level students.

PS 7997 Research in Political Science Cr. 1-9
Offered Every Term.
Restriction(s): Enrollment is limited to Graduate level students.

PS 7999 Master's Essay Direction Cr. 1-3
Offered Every Term.
Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students with a class of Candidate Masters.

PS 8000 Readings in Political Science Cr. 3
Offered Every Term.
Restriction(s): Enrollment is limited to Graduate level students.
Repeatable for 6 Credits

PS 8600 Philosophic Problems of Social and Political Inquiry Cr. 3
Required of all doctoral students. Exploration of competing philosophies of science and their relevance to the study of politics. Study of selected problems in political inquiry, including objectivity, commensurability, and progress. Review of disciplinary history and assessments of contemporary approaches to the study of politics. Offered Every Other Year.
Restriction(s): Enrollment is limited to Graduate level students.

PS 8999 Master's Thesis Research and Direction Cr. 1-8
Offered Every Term.
Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students with a class of Candidate Masters.
Repeatable for 8 Credits

PS 9990 Pre-Doctoral Candidacy Research Cr. 1-8
Research in preparation for doctoral dissertation. Offered Every Term.
Restriction(s): Enrollment is limited to Graduate level students.
Repeatable for 12 Credits

PS 9991 Doctoral Candidate Status I: Dissertation Research and Direction Cr. 7.5
Offered Every Term.
Restriction(s): Enrollment is limited to Graduate level students.

PS 9992 Doctoral Candidate Status II: Dissertation Research and Direction Cr. 7.5
Offered Every Term.
Prerequisite: PS 9991 with a minimum grade of S
Restriction(s): Enrollment is limited to Graduate level students.

PS 9993 Doctoral Candidate Status III: Dissertation Research and Direction Cr. 7.5
Offered Every Term.
Prerequisite: PS 9992 with a minimum grade of S
Restriction(s): Enrollment is limited to Graduate level students.

PS 9994 Doctoral Candidate Status IV: Dissertation Research and Direction Cr. 7.5
Offered Every Term.
Prerequisite: PS 9993 with a minimum grade of S
Restriction(s): Enrollment is limited to Graduate level students.

PS 9995 Candidate Maintenance Status: Doctoral Dissertation Research and Direction Cr. 0
Offered Every Term.
Restriction(s): Enrollment is limited to Graduate level students.
Course Material Fees: \$370.26
Repeatable for 0 Credits

PSC - PHARMACEUTICAL SCIENCES

PSC 3110 Pharmaceutical Biochemistry Cr. 3

Survey of biochemistry for pharmacy students, metabolism, and drug effects in the maintenance of normal human biochemistry and homeostasis. Offered Fall.

Restriction(s): Enrollment is limited to Professional level students; enrollment limited to students in the Pharmacy and Health Sciences.

PSC 4115 Pharmaceutics I Cr. 2

Introduction to pure drug substance formulation into dosage forms and the principles and mechanisms for developing dosage forms for safe and effective use in patients. Offered Fall.

Restriction(s): Enrollment limited to students in the Doctor of Pharmacy program.

PSC 4125 Introduction to Pharmaceutical Sciences: Medicinal Chemistry / Pharmacology / Immunology Cr. 3

Introduction to medicinal chemistry, pharmacology and biotechnology with a focus on drug discovery and drug action. Offered Fall.

Restriction(s): Enrollment limited to students in the Doctor of Pharmacy program.

PSC 4215 Pharmaceutics II Cr. 2

Basic pharmacokinetics: principles of drug administration, distribution, metabolism and excretion (ADME) using different dosage forms, and basics of administration routes. Offered Winter.

Restriction(s): Enrollment limited to students in the Doctor of Pharmacy program.

PSC 4225 Autonomic Pharmacology Cr. 2

The principles of autonomic pharmacology integrated into an understanding of the functioning of the autonomic system; the major target organs and the physiological effects of agonists and antagonists elicited through autonomic receptor subtypes. Offered Winter.

Prerequisite: PSC 4125

Restriction(s): Enrollment limited to students in the Doctor of Pharmacy program.

PSC 5115 Pharmacokinetics Cr. 2

Conceptual knowledge-base and practical calculation applications of pharmacokinetic principles. Offered Fall.

Restriction(s): Enrollment limited to students in the Doctor of Pharmacy program.

PSC 5600 Drugs of Abuse Cr. 2

Pharmacology and toxicology, both clinical and animal, associated with recreationally-used agents; treatment of acute and chronic problems associated with these agents; concept of chronic drug administration and abuse as disease state. Offered Yearly.

Restriction(s): Enrollment limited to students in the Pharmacy and Health Sciences.

PSC 5870 Seminar in Pharmacology Cr. 1

Reports and discussions on current literature and recent advances in the field. Assigned topics presented by students. Offered for undergraduate credit only. Offered Every Term.

Restriction(s): Enrollment limited to students in the Pharmacy and Health Sciences.

Repeatable for 2 Credits

PSC 5990 Directed Study in Medicinal Chemistry Cr. 2

Offered for undergraduate credit only. Offered Every Term.

Restriction(s): Enrollment limited to students in the Pharmacy and Health Sciences.

PSC 5991 Directed Study in Pharmaceutics Cr. 2

Offered for undergraduate credit only. Offered Every Term.

Restriction(s): Enrollment limited to students in the Pharmacy and Health Sciences.

PSC 5992 Directed Study in Pharmacology Cr. 2

Offered for undergraduate credit only. Offered Every Term.

Restriction(s): Enrollment limited to students in the Pharmacy and Health Sciences.

PSC 6285 Pharmacy Seminar Cr. 1

Presentations on topics of current interest on basic science problems relevant to the major discipline of pharmaceutical sciences. Offered Winter.

Restriction(s): Enrollment limited to students in the Doctor of Pharmacy program.

PSC 6620 Veterinary Pharmacology Cr. 2

Provides an overview of veterinary pharmacology that offers a review of the chemical structure, mechanism of action, indications for use, and side effects of therapeutics. Includes topics such as toxicology, laws and regulations and common diseases/conditions of veterinary species. Offered Fall.

Restriction(s): Enrollment limited to students in the Doctor of Pharmacy program.

PSC 6800 Introduction to Research Cr. 2

Fundamental concepts and resources for responsible conduct of biomedical research and advancing scientific professional development, and data analysis and statistics. Offered Yearly.

Restriction(s): Enrollment limited to students in the Pharmacy and Health Sciences.

PSC 6890 Toxicology for Pharmacists Cr. 2

Exposes students to basic concepts in toxicology; serves as a knowledge base to assist in the understanding of mechanisms and rationale behind the relationship of certain drugs and their specific types of toxicities, and addresses tissue and organ-specific toxicities, drug-drug interactions, on-target and off-target effects, and risk assessment. Offered Winter.

Restriction(s): Enrollment limited to students in the Pharmacy and Health Sciences.

PSC 6910 Pharmaceutical Waste: Environmental Impact and Management Cr. 2-3

Course designed for advanced professional and graduate students with sufficient chemistry and/or biological sciences background who are interested in the environmental impact, management, and regulation of waste pharmaceuticals as emerging issues. Offered Spring/Summer.

Restriction(s): Enrollment is limited to Graduate or Professional level students.

Equivalent: CE 6910

PSC 7010 Advanced Drug Action and Safety I Cr. 3

Survey of advanced research topics in pharmacology. Offered Every Other Fall.

Restriction(s): Enrollment is limited to Graduate or Professional level students; enrollment limited to students in the Pharmacy and Health Sciences.

PSC 7020 Advanced Drug Discovery I Cr. 3

Survey of advanced research topics in medicinal chemistry. Offered Every Other Fall.

Restriction(s): Enrollment is limited to Graduate or Professional level students; enrollment limited to students in the Pharmacy and Health Sciences.

PSC 7040 Advanced Drug Formulation and Delivery I Cr. 3

Survey of advanced research topics in pharmaceuticals. Offered Every Other Winter.

Restriction(s): Enrollment is limited to Graduate or Professional level students; enrollment limited to students in the Pharmacy and Health Sciences.

PSC 7160 Advanced Practice Basic Pharmaceutical Sciences Elective Cr. 3-6

Eight-week rotation in basic science-oriented research laboratory. Offered Intermittently.

Restriction(s): Enrollment is limited to Graduate or Professional level students; enrollment limited to students in the Pharmacy and Health Sciences.

Repeatable for 6 Credits

PSC 7600 Drugs of Abuse: Advanced Cr. 2

Pharmacology and toxicology, both clinical and animal, associated with recreationally-used agents; treatment of acute and chronic problems associated with these agents; concept of chronic drug administration and abuse as disease state. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate or Professional level students; enrollment limited to students in the Pharmacy and Health Sciences.

PSC 7700 Advanced Drug Action and Safety II Cr. 2

Continuing survey of modern research topics in pharmacology. Offered Every Other Winter.

Restriction(s): Enrollment is limited to Graduate or Professional level students; enrollment limited to students in the Pharmacy and Health Sciences.

PSC 7710 Advanced Drug Discovery II Cr. 2

Continuing survey of advanced research topics in medicinal chemistry. Offered Every Other Winter.

Restriction(s): Enrollment is limited to Graduate or Professional level students; enrollment limited to students in the Pharmacy and Health Sciences.

PSC 7720 Advanced Drug Formulation and Delivery II Cr. 2

Second course in survey of advanced research topics in pharmaceuticals. Offered Every Other Winter.

Restriction(s): Enrollment is limited to Graduate or Professional level students; enrollment limited to students in the Pharmacy and Health Sciences.

PSC 7800 Research Techniques in Medicinal Chemistry Cr. 1-4

Laboratory work employing modern techniques available in medicinal chemistry; application of basic principles to graduate study and research. Offered Every Term.

Restriction(s): Enrollment is limited to Graduate or Professional level students; enrollment limited to students in the Pharmacy and Health Sciences.

Repeatable for 12 Credits

PSC 7810 Research Techniques in Pharmaceuticals Cr. 1-4

Laboratory work employing modern techniques available in pharmaceuticals: application of basic principles to graduate study and research. Offered Every Term.

Restriction(s): Enrollment is limited to Graduate or Professional level students; enrollment limited to students in the Pharmacy and Health Sciences.

Repeatable for 12 Credits

PSC 7820 Research Techniques in Pharmacology Cr. 1-4

Laboratory work employing some of the modern techniques available in pharmacology, including the application of basic principles to graduate study and research. Offered Every Term.

Restriction(s): Enrollment is limited to Graduate or Professional level students; enrollment limited to students in the Pharmacy and Health Sciences.

Repeatable for 12 Credits

PSC 7850 Pharmaceutical Sciences Colloquium Cr. 1

This course is a required seminar course for all graduate students in the Department of Pharmaceutical Sciences. Offered Every Term.

Restriction(s): Enrollment is limited to Graduate or Professional level students; enrollment limited to students in the Pharmacy and Health Sciences.

Repeatable for 10 Credits

PSC 7860 Introduction to Seminar Cr. 1

A required seminar course for all first year graduate students in the Department of Pharmaceutical Sciences. Students will be required to present a seminar on their research progress during their first year in the program. Offered Every Term.

Restriction(s): Enrollment is limited to Graduate or Professional level students; enrollment limited to students in the Pharmacy and Health Sciences.

Repeatable for 4 Credits

PSC 7870 Second Year Seminar Cr. 1

A required seminar course for all second year PhD students in the Department of Pharmaceutical Sciences. Students will be required to present a seminar on a topic unrelated to their research. Offered Fall, Winter.

Prerequisites: PSC 7860 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

PSC 7880 Third Year Seminar Cr. 1

A required seminar course for all third year PhD students in the Department of Pharmaceutical Sciences. Students will be required to present a seminar on their research. Offered Fall, Winter.

Prerequisites: PSC 7870 with a minimum grade of C

PSC 7999 Master's Essay Direction Cr. 1-4

Offered Every Term.

Restriction(s): Enrollment is limited to Graduate or Professional level students; enrollment limited to students with a class of Candidate Masters; enrollment limited to students in the Pharmacy and Health Sciences.

Repeatable for 4 Credits

PSC 8650 Special Topics in Medicinal Chemistry Cr. 2

Recent developments in medicinal chemistry. Topics under investigation and of current interest offered in different semesters. Offered Every Term.

Restriction(s): Enrollment is limited to Graduate or Professional level students; enrollment limited to students in the Pharmacy and Health Sciences.

Repeatable for 6 Credits

PSC 8660 Special Topics in Pharmaceuticals Cr. 2

Recent developments in pharmaceuticals. Topics under investigation and of current interest offered in different semesters. Offered Every Term.

Restriction(s): Enrollment is limited to Graduate or Professional level students; enrollment limited to students in the Pharmacy and Health Sciences.

Repeatable for 6 Credits

PSC 8670 Special Topics in Pharmacology Cr. 2

Recent developments in pharmacology. Topics under investigation and of current interest offered in different semesters. Offered Every Term.

Restriction(s): Enrollment is limited to Graduate or Professional level students; enrollment limited to students in the Pharmacy and Health Sciences.

Repeatable for 6 Credits

PSC 8999 Master's Thesis Research and Direction Cr. 1-8

Offered Every Term.

Restriction(s): Enrollment is limited to Graduate or Professional level students; enrollment limited to students with a class of Candidate Masters; enrollment limited to students in the Pharmacy and Health Sciences.

Repeatable for 8 Credits

PSC 9990 Pre-Doctoral Candidacy Research Cr. 1-8

Research in preparation for doctoral dissertation. Offered Every Term.

Restriction(s): Enrollment is limited to Graduate or Professional level students; enrollment limited to students in the Pharmacy and Health Sciences.

Repeatable for 12 Credits

PSC 9991 Doctoral Candidate Status I: Dissertation Research and Direction Cr. 7.5

Offered Every Term.

Restriction(s): Enrollment is limited to Graduate or Professional level students; enrollment limited to students in the Pharmacy and Health Sciences.

PSC 9992 Doctoral Candidate Status II: Dissertation Research and Direction Cr. 7.5

Offered Every Term.

Restriction(s): Enrollment is limited to Graduate or Professional level students; enrollment limited to students in the Pharmacy and Health Sciences.

PSC 9993 Doctoral Candidate Status III: Dissertation Research and Direction Cr. 7.5

Offered Every Term.

Restriction(s): Enrollment is limited to Graduate or Professional level students; enrollment limited to students in the Pharmacy and Health Sciences.

PSC 9994 Doctoral Candidate Status IV: Dissertation Research and Direction Cr. 7.5

Offered Every Term.

Restriction(s): Enrollment is limited to Graduate or Professional level students; enrollment limited to students in the Pharmacy and Health Sciences.

PSC 9995 Candidate Maintenance Status: Doctoral Dissertation Research and Direction Cr. 0

Offered Every Term.

Restriction(s): Enrollment is limited to Graduate or Professional level students; enrollment limited to students in the Pharmacy and Health Sciences.

Course Material Fees: \$370.26

Repeatable for 0 Credits

PSL - PHYSIOLOGY

PSL 5010 Individual Research I Cr. 2-5

Direct participation in laboratory research in the physiological sciences under the supervision of a departmental faculty advisor. Introduction to experimental protocol and current related scientific literature. Offered Every Term.

Restriction(s): Enrollment limited to students with a class of Junior or Senior.

Repeatable for 5 Credits

PSL 5680 Basic Endocrinology Cr. 3

Basic description of the human endocrine system, the endocrine control of several physiologic processes (growth, development, metabolism and reproduction), and a description of common endocrine disorders. Offered Fall.

Prerequisites: BIO 3200 with a minimum grade of C- or BIO 4120 with a minimum grade of C-

Equivalent: BIO 5680

PSL 6010 Physiology of Exercise II Cr. 3

Metabolic, neuromuscular, cardiovascular, and respiratory adjustments to acute and chronic exercise in health and disease, including body composition and weight control, nutritional considerations, and the effects of different environments on exercise performance. Offered Fall.

Prerequisite: KIN 3570 with a minimum grade of C-

Restriction(s): Enrollment limited to students with a class of Unranked Undergrad, Freshman, Sophomore, Junior, Senior or Post Bachelor.

Equivalent: KIN 6310, PT 6310

PSL 6300 Biotechnology: Techniques and Applications Cr. 2

Various biotechnological methodologies currently used in research and industry; application of these methodologies in scientific inquiries. Offered Fall.

PSL 6310 Biotechnology: Techniques and Applications Lab Cr. 2-5

Students choose one of the biotechnology techniques discussed in PSL 6300 and spend the semester in an active research laboratory learning the practice of the technique through hands-on experience. Offered Winter.

Prerequisites: May be taken concurrently. PSL 6300 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

PSL 7010 Basic Graduate Physiology Lecture I Cr. 4

Introduction to basic human physiology. Offered Fall.

Restriction(s): Enrollment is limited to Graduate level students.

PSL 7011 Basic Integrative Graduate Physiology I Cr. 4

Offered Fall.

Restriction(s): Enrollment is limited to students with a major in Physiology.

PSL 7020 Basic Graduate Physiology Laboratory I Cr. 2

Introductory laboratory exercises to measure cell and membrane function; neuronal activity; electrophysiology; and hormonal actions. Offered Fall.

Restriction(s): Enrollment is limited to students with a major in Physiology.

Course Material Fees: \$50

PSL 7030 Basic Graduate Physiology Lecture II Cr. 4

Functional mechanisms of the human body. Offered Winter.

Restriction(s): Enrollment is limited to Graduate level students.

PSL 7031 Basic Integrative Graduate Physiology II Cr. 4

Offered Winter.

Restriction(s): Enrollment is limited to students with a major in Physiology.

PSL 7040 Basic Graduate Physiology Laboratory II Cr. 2

Experimental physiology of organ systems. Offered Winter.

Restriction(s): Enrollment is limited to students with a major in Physiology.

Course Material Fees: \$50

PSL 7060 Current Literature in Physiology Cr. 1

Students are required to present published papers at least once each semester, and must attend all class meetings. Offered Fall, Winter.

Restriction(s): Enrollment is limited to Graduate level students.

PSL 7215 Nanobioscience Cr. 3

Introduction to interdisciplinary research field of nanobioscience, at the interphase of biology, chemistry, and physics; specific properties of nanoscale objects. Offered Fall.

Restriction(s): Enrollment is limited to Graduate level students.

PSL 7400 Advanced Respiratory Physiology Cr. 2

Advanced topics in respiratory physiology; guidance in critical reading and discussion of the literature. Offered Every Other Winter.

Prerequisite: PSL 7030 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate or Medical level students.

PSL 7550 Advanced Renal Physiology Cr. 2

A detailed study of the physiological mechanisms promoting homeostasis of the body fluid volumes and ionic composition in the mammal. Offered Every Other Fall.

Prerequisites: PSL 7030 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

PSL 7600 Advanced Cardiovascular Physiology Cr. 2

Basic principles of heart dynamics and control techniques in measurement of cardiac function. Offered Fall.

Prerequisites: PSL 7030 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students; enrollment is limited to students with a major in Physiology; enrollment limited to students in a Doctor of Philosophy or Master of Science degrees.

PSL 7610 Biological Basis of Sleep Cr. 2

Basic physiology of human sleep; role of sleep in cognitive and physical performance; sleep disorders (such as sleep apnea, narcolepsy). Offered Every Other Winter.

Prerequisites: PSL 7030 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

PSL 7640 Cell and Molecular Physiology Cr. 3

Lecture and discussion. Research in atomic force microscopy, molecular structure, exocytosis, insulin signal transduction, glucose transport, estrogen receptors, ion channels, Na, K-ATPase, Na/Ca exchanger, hormonal regulation of ion transport. Offered Every Other Winter.

Prerequisites: PSL 7010 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

PSL 7660 Neurophysiology Cr. 3

Anatomy and physiology of the neuron and the mammalian nervous system. Correlations of central nervous system functions and electrophysiology. Offered Every Other Fall.

Prerequisites: PSL 7010 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

PSL 7680 Endocrinology Cr. 4

A detailed emphasis on current research. Student participation encouraged; each student required to present a one hour lecture. Offered Winter.

Prerequisites: PSL 7010 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

PSL 7690 Principles and Techniques of Reproductive Biology Cr. 3

Principles and techniques in reproduction including endocrinology, gametogenesis, fertilization, implantation, embryogenesis, stem cell determination, pregnancy and parturition. Offered Every Other Fall.

Restriction(s): Enrollment is limited to Graduate level students.

PSL 7700 Embryonic Stem Cell Biology Cr. 3

Methods involved in production and utilization of embryonic stem cells. Lectures supplemented with text, reviews, and recent papers. Offered Every Other Winter.

Prerequisite: PSL 7690

Restriction(s): Enrollment is limited to Graduate level students.

PSL 7710 Disease States and Reproductive Processes Cr. 1

Diseases and areas in reproductive medicine where additional research is required. Students accompany clinicians during rounds in hospital and out-patient clinics. Offered Spring/Summer.

Restriction(s): Enrollment is limited to Graduate level students; enrollment is limited to students with a major in Medicine.

PSL 7730 Reproductive Sciences: Teratology Cr. 3

Principles of the science of birth defects; focus on impact of environmental poisons, medicines, and drugs of abuse on developing germ cells, embryos and fetuses. Roles of pharmacological/toxicological, physiological (maternal, placental, and fetal), genetic and nutritional factors in the teratogenic response are examined. Texts and current readings. Offered Every Other Fall.

Restriction(s): Enrollment is limited to Graduate level students.

PSL 7775 Current Research Topics in Reproductive Science Cr. 1

Lectures covering current topics in reproductive biology, health, and medicine. Offered Fall.

Restriction(s): Enrollment is limited to Graduate level students.

PSL 7825 Membrane Physiology: Protein Transport, Lipid Metabolism and Human Diseases Cr. 2

Covers the basic concepts of membrane transport in the mammalian secretory pathway with an emphasis on the dysregulation of key transport steps and the defective mutations of key regulators which lead to human diseases (e.g. neurodegenerative diseases, diabetes and coronary heart diseases). Offered Fall.

Restriction(s): Enrollment is limited to Graduate level students.

PSL 7880 Special Problems in Physiology Cr. 1-8

Topics individually arranged with faculty. Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students.

Repeatable for 8 Credits

PSL 7890 Seminar Cr. 1

For graduate students in physiology. Participation in weekly departmental seminars. Offered Fall, Winter.

Restriction(s): Enrollment is limited to Graduate level students.

Repeatable for 6 Credits

PSL 7910 Molecular Male Reproduction and Chromatin Cr. 1

Students write topic-specific essays. Offered Fall.

Restriction(s): Enrollment is limited to Graduate level students.

PSL 7996 Arranged Research Cr. 1-15

Graduate level experiences in research techniques. Special research topics in specified areas arranged with individual faculty member. Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students.

Repeatable for 15 Credits

PSL 8999 Master's Thesis Research and Direction Cr. 1-8

Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students with a class of Candidate Masters.

Repeatable for 8 Credits

PSL 9990 Pre-Doctoral Candidacy Research Cr. 1-8

Research in preparation for doctoral dissertation. Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students.

Repeatable for 12 Credits

PSL 9991 Doctoral Candidate Status I: Dissertation Research and Direction Cr. 7.5

Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students.

PSL 9992 Doctoral Candidate Status II: Dissertation Research and Direction Cr. 7.5

Offered Every Term.

Prerequisite: PSL 9991 with a minimum grade of S

Restriction(s): Enrollment is limited to Graduate level students.

PSL 9993 Doctoral Candidate Status III: Dissertation Research and Direction Cr. 7.5

Offered Every Term.

Prerequisite: PSL 9992 with a minimum grade of S

Restriction(s): Enrollment is limited to Graduate level students.

PSL 9994 Doctoral Candidate Status IV: Dissertation Research and Direction Cr. 7.5

Offered Every Term.

Prerequisite: PSL 9993 with a minimum grade of S

Restriction(s): Enrollment is limited to Graduate level students.

PSL 9995 Candidate Maintenance Status: Doctoral Dissertation Research and Direction Cr. 0

Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students.

Course Material Fees: \$370.26

Repeatable for 0 Credits

PSY - PSYCHOLOGY

PSY 1010 Introductory Psychology Cr. 4

Satisfies General Education Requirement: Life Sciences, Natural Scientific Inquiry

Grade of C or better required for psychology majors. Introduction to the science of behavior. Principles, concepts, and theories of human thought and action. Selected concepts illustrated through laboratory experiments. Recommended for students intended to major in psychology. Meets General Education Laboratory Requirement. No credit after PSY 1020. Offered Every Term.

PSY 1020 Elements of Psychology Cr. 3

Satisfies General Education Requirement: Life Sciences, Natural Scientific Inquiry

Principles, theories and applications of psychological knowledge. Intended for non-psychology majors. No credit after PSY 1010. Offered Every Term.

PSY 1030 Introductory Psychology Laboratory Cr. 1

Principles, concepts and theories of human thought and behavior illustrated through laboratory experiments. Required of psychology majors who have AP Psych credit or took PSY 1020 to complete Introductory Requirement; Grade of C or better required for psychology majors. No credit after PSY 1010. Offered Every Term.

Prerequisites: PSY 1020 with a minimum grade of C-

Restriction(s): Enrollment is limited to Undergraduate level students.

PSY 2020 Research Methods In Psychology Cr. 4

Basic principles of research design in psychology and measurement of psychological constructs. Students must take lecture and corresponding lab. Psychology majors must earn C or better. Students are strongly urged to take STA 1020 to satisfy the math prerequisite. Course study and/or tutoring is available for this course. Offered Yearly.

Prerequisites: PSY 1010 with a minimum grade of C or PSY 1030 with a minimum grade of C and MAT 1000-6999 with a minimum grade of C or STA 1020 with a minimum grade of C or ACT Math ≥ 25 QE = 100 with a test score minimum of 100 or Quantitative Exp P=100/F=000 with a test score minimum of 100 or SAT Math QE = 100 with a test score minimum of 100 or Michigan Transfer Agreement with a test score minimum of 100

PSY 2030 Statistical Methods in Psychology Cr. 4

Primarily for psychology majors. Principles and computational methods that apply to quantitative aspects of psychological procedure; elementary correlation theory and prediction, sampling problems, tests of hypotheses, elementary test theory, interpretation of results. Students must take lecture and corresponding lab. Students will learn how to use statistic software SPSS. Psychology majors must earn C or better. Students are strongly urged to take STA 1020 to satisfy the math prerequisite. Course study and/or tutoring is available for this course. Offered Every Term.

Prerequisites: PSY 1010 with a minimum grade of C or PSY 1030 with a minimum grade of C and PSY 2020 with a minimum grade of C and MAT 1000-6999 with a minimum grade of C or STA 1020 with a minimum grade of C or ACT Math ≥ 25 QE = 100 with a test score minimum of 100 or Quantitative Exp P=100/F=000 with a test score minimum of 100 or SAT Math QE = 100 with a test score minimum of 100 or Michigan Transfer Agreement with a test score minimum of 100

PSY 2080 Introduction to Drugs, Behavior, and Society Cr. 3

Introduction to drugs and their actions. Emphasis on psychoactive drugs, their effects, and the consequences of their use and misuse to the individual and society. Offered Every Term.

Prerequisites: PSY 1010 with a minimum grade of D- or PSY 1020 with a minimum grade of D-

PSY 2100 Psychology and the Workplace Cr. 3

Psychology applied to workplace issues. Major topics include organizational staffing, employee training and development, organizational leadership, employee attitudes and motivation, organizational culture and climate, and employee health and well-being. Offered Every Term.

Prerequisites: PSY 1010 with a minimum grade of D- or PSY 1020 with a minimum grade of D-

PSY 2300 Psychology of Everyday Living Cr. 4

Applications of psychological principles to everyday life. How research can be used to guide positive self-change in various contexts (e.g., stress, psychological problems, personality, persuasion, attitudes). Offered Every Term.

Prerequisites: PSY 1010 with a minimum grade of D- or PSY 1020 with a minimum grade of D-

PSY 2400 Developmental Psychology Cr. 4

Facts, principles, theories of psychological development throughout the lifespan. Development of intellectual, emotional, perceptual, linguistic, and social behavior. Developmental trends. Offered Every Term.

Prerequisites: PSY 1010 with a minimum grade of D- or PSY 1020 with a minimum grade of D-

PSY 2410 Health Psychology Cr. 4

Clinical, social, developmental, and biopsychosociological theory and research on relationship of psychological and behavioral factors to physical health and well-being. Positive and negative health behaviors, stress and coping, social relations and social support, psychoneuroimmunology, patient-practitioner interaction and health utilization, management of chronic illness. Offered Every Term.

Prerequisites: PSY 1010 with a minimum grade of D- or PSY 1020 with a minimum grade of D-

PSY 2450 Developmental Psychology Service Learning Laboratory Cr. 1

The laboratory involves a project related to development that serves a community need and is conducted within the community. Participation in the project is intended to result in deeper learning of the course content in PSY 2400. Offered Fall.

Prerequisites: PSY 1010 or PSY 1020 and May be taken concurrently: PSY 2400

PSY 2600 Psychology of Social Behavior Cr. 4

Social behavior of the individual as influenced by the group. Particular attention given to social perception, motivation, and learning; attitudes and values; dynamics of social groups. Offered Every Term.

Prerequisites: PSY 1010 with a minimum grade of D- or PSY 1020 with a minimum grade of D-

PSY 2650 Philosophy of Psychology Cr. 3

Satisfies General Education Requirement: Cultural Inquiry

Central examples of these questions and proposed answers: Could we build an intelligent computer? Is our mind just a piece of software that our brain is running? Is there a "language of thought"? Are we much less rational than we think? How can we understand each other's minds? Can there be laws in psychology? What is consciousness, and can it be studied scientifically? We will address these and other questions via the work of philosophers, psychologists and cognitive scientists. Offered Winter.

Equivalent: PHI 2650

PSY 3040 Psychology of Perception: Fundamental Processes Cr. 3

Fundamental theories, concepts, and empirical studies of basic sensory processes and the perception and organization of sensory phenomena. Offered Fall, Winter.

PSY 3060 Psychology of Learning and Memory: Fundamental Processes Cr. 3

Fundamental theories, concepts, and empirical findings in field of learning. Offered Fall, Winter.

Prerequisites: PSY 1010 with a minimum grade of D- or PSY 1020 with a minimum grade of D-

PSY 3080 Cognitive Psychology: Fundamental Processes Cr. 3

Fundamental theories, concepts, and empirical findings in study of human cognition. Topics include: thinking, problem solving, language comprehension and production, memory and attention. Offered Every Term.

Prerequisites: PSY 1010 with a minimum grade of D- or PSY 1020 with a minimum grade of D-

Equivalent: LIN 3080

PSY 3120 Brain and Behavior Cr. 3

Introduction to the brain and its influence over behavior. Structure and function of the nervous system, neural communication, and neural mechanisms of higher nervous system functions and dysfunctions. Topics include: biological basis of sleep, sex, learning, memory, language, schizophrenia, and depression. . No credit after PSY 5330. Offered Every Term.

Prerequisites: PSY 1010 with a minimum grade of D- or PSY 1020 with a minimum grade of D-

PSY 3200 Motivation, Feeling and Emotion Cr. 3

Experimental findings in psychological and allied fields on topics of motivation, feeling, and emotion; evaluation of classical theories and an attempt to develop a theoretical approach based on factual knowledge. Offered Intermittently.

Prerequisites: PSY 1010 with a minimum grade of D- or PSY 1020 with a minimum grade of D-

PSY 3250 Psychology of Gender Cr. 3

Evidenced-based understanding of similarities and differences between women and men in domains such as cognitive skills, aggression, empathy, communication, emotional expression and mental health. Exploration of biological, psychological and social theories used to explain gender identity and expression. Focus on historical and current issues related to the psychology of women, including relationships, careers and health. Offered Every Term.

Prerequisites: PSY 1010 with a minimum grade of D- or PSY 1020 with a minimum grade of D-

PSY 3310 Abnormal Psychology Cr. 4

Nature and causes of various forms of abnormal behavior, including schizophrenia, depression, and neurosis, viewed from psychological, biological, cultural, developmental and historical perspectives. Diagnosis and treatment of pathological behavior. Offered Every Term.

Prerequisites: PSY 1010 with a minimum grade of D- or PSY 1020 with a minimum grade of D-

PSY 3330 Systems Neuroscience Cr. 3

Systems Neuroscience explores the brain circuits that contribute to regulatory (i.e., sexual differentiation and reproductive behavior, reward and addiction, aggression and violence, physical and social pain), and higher order (i.e., learning and memory, cerebral lateralization and consciousness) experiences and behaviors. Changes in neural circuits that contribute to disorders of thought (schizophrenia), emotion (anxiety) and sensory processing (chronic pain), and neurobiological strategies for their remediation also are explored. Offered Winter.

Prerequisite: BIO 3200 with a minimum grade of C-

PSY 3350 Psychology of Personality Cr. 3

An examination of the major approaches to the study of personality. Current psychological findings in the field of personality and their implications for psychotherapy and assessment. Offered Every Term.

Prerequisites: PSY 1010 with a minimum grade of D- or PSY 1020 with a minimum grade of D-

PSY 3380 Human Sexuality Cr. 3

Biological, psychological and socio-cultural aspects of human sexuality. Topics include anatomy and development, sexual behavior, and cultural influences. Offered Every Term.

Prerequisites: PSY 1010 with a minimum grade of D- or PSY 1020 with a minimum grade of D-

PSY 3430 Infant Development Cr. 3

Development of the infant from conception through the toddler years. Physical, motor, perceptual, cognitive, language, social and emotional development. Current findings and their implications for parenting, programming and care. Offered Yearly.

Prerequisites: PSY 2400 with a minimum grade of D-

PSY 3440 Psychology of Child Behavior and Development Cr. 3

Developmental processes in childhood; language acquisition, cognitive development, development of peer-peer interactions. Offered Yearly.

Prerequisites: PSY 2400 with a minimum grade of D-

PSY 3460 Psychology of Adolescent Behavior and Development Cr. 3

Factors that promote the emergence of new relationships with parents, changes in peer relationships, increased independence, preparation for marriage and parenthood, and socioeconomic integration into the larger society. Biological and anthropological perspectives on sex roles. Offered Yearly.

Prerequisites: PSY 1010 with a minimum grade of D- or PSY 1020 with a minimum grade of D-

PSY 3480 Parent-Child Interaction Across the Lifespan Cr. 3

Theory and research on interactions between parents and children. Focus on normal developmental concerns, infancy through adulthood: discipline, sibling rivalry, sex-role identification, parental support. Offered Yearly.

Prerequisites: PSY 2400 with a minimum grade of D-

PSY 3490 Psychology of Adult Development and Aging Cr. 3

The adulthood and aging years from a developmental perspective, including: intelligence, memory, personality, and social behavior. Offered Intermittently.

Prerequisites: PSY 1010 with a minimum grade of D- or PSY 1020 with a minimum grade of D- and PSY 2400 with a minimum grade of D-

PSY 3993 Laboratory in Experimental Psychology Cr. 2

Satisfies General Education Requirement: Writing Intensive Competency Lab investigations of perceptual, sensory, learning, and cognitive processes. Offered Every Term.

Prerequisites: PSY 2030 with a minimum grade of C and May be taken concurrently: PSY 3040 with a minimum grade of D- or PSY 3060 with a minimum grade of D- or PSY 3080 with a minimum grade of D- and ENG 2390 with a minimum grade of C or ENG 3010 with a minimum grade of C or ENG 3020 with a minimum grade of C or ENG 3050 with a minimum grade of C

Restriction(s): Enrollment is limited to Undergraduate level students.

Course Material Fees: \$15

PSY 4140 Hormones and Behavior Cr. 3

Examines the relationship between hormones and behavior, taking a biological approach to behavioral questions that have long been of interest to Psychologists, Biologists and Neuroscientists. Explores the research area of Behavioral Endocrinology, a field that seeks biologically (in particular hormone)-based explanations of behavior. Offered Winter.

Prerequisite: PSY 1010 with a minimum grade of C- or BIO 1020 with a minimum grade of C-

Equivalent: BIO 4140

PSY 4310 Psychological Disorders of Children Cr. 3

Points of view, methods of study and research findings regarding psychopathology in children. Offered Fall.

Prerequisites: PSY 1010 with a minimum grade of C or PSY 1020 with a minimum grade of C

PSY 4320 Introduction to Clinical Psychology Cr. 3

An introduction to the methods, rationale, and empirical foundations of clinical psychology. Issues in the assessment and treatment of psychopathology. Offered Yearly.

Prerequisites: PSY 1010 with a minimum grade of C or PSY 1020 with a minimum grade of C

PSY 4330 Social Psychology of Close Relationships Cr. 3

Scientific study of close relationships, with a focus on romantic relationships. Current theories and research findings on various dynamics of relationship functioning from a social psychological perspective.

Offered Intermittently.

Prerequisite: PSY 2600 with a minimum grade of D-

PSY 4990 Directed Study and Research Cr. 2-4

Library or laboratory study of an advanced problem in psychology under the guidance of a faculty member. Offered Every Term.

Repeatable for 9 Credits

PSY 4991 Honors Directed Study Cr. 2-4

Honors library or laboratory study of advanced problem in psychology under guidance of a faculty member. Offered Every Term.

Repeatable for 9 Credits

PSY 4993 Field Study Cr. 3

Assignment to a hospital, clinic or other agency under faculty supervision. Term paper on observations made in the field. Agency placement contingent upon appropriate background and training in psychology. Offered Fall, Winter.

Prerequisite: PSY 1010 with a minimum grade of C- or PSY 1030 with a minimum grade of C- and PSY 3310 with a minimum grade of C-

Repeatable for 6 Credits

PSY 4994 Special Projects Cr. 1-4

Departmental assignment to special projects for advanced students. Offered Every Term.

Prerequisite: PSY 1010 with a minimum grade of C or PSY 1030 with a minimum grade of C

Repeatable for 12 Credits

PSY 4995 Special Topics in Psychology Cr. 3

Topics of current interest to be announced in Schedule of Classes . Offered Intermittently.

Prerequisites: PSY 1010 with a minimum grade of D- or PSY 1020 with a minimum grade of D-

Repeatable for 6 Credits

PSY 4998 Senior Thesis Cr. 3

Research leading to the design and execution of a senior honors thesis in psychology. Offered Every Term.

Prerequisites: PSY 2010 with a minimum grade of C and PSY 2020 with a minimum grade of C and PSY 3993 with a minimum grade of C

Restriction(s): Enrollment is limited to students with a major in Psychology Honors.

PSY 5020 Honors Research in Psychology Cr. 3

Critical evaluation of scientific literature and the planning and development of psychological research proposals. Offered Fall, Winter.

Prerequisites: PSY 2010 with a minimum grade of C and PSY 2020 with a minimum grade of C and PSY 3993 with a minimum grade of C

Restriction(s): Enrollment is limited to students with a major in Psychology Honors.

PSY 5040 Cognitive Neuroscience Cr. 3

Brain processes and brain structures that support them, framed in terms of theoretical models and empirical evidence from brain imaging techniques and patient populations. Topics include attention, memory, space, language, and decision-making. Offered Yearly.

Prerequisites: PSY 3120 with a minimum grade of C

PSY 5070 Neuropharmacology Cr. 3

Physiological and behavioral bases of drug action, with emphasis on brain neurotransmitters, psychopharmacology, and substance abuse disorders. Offered Fall.

Prerequisites: PSY 3120 with a minimum grade of C or PSY 5050 with a minimum grade of C or BIO 1020 with a minimum grade of C

PSY 5080 Cellular Basis of Animal Behavior Cr. 3

Relationship between behavior and neuroscience using a variety of animal models, each examined from the level of natural behavior progressively to the cellular level. Topics include: sensory systems, motor behavior, and learning. Offered Winter.

Equivalent: BIO 5080

PSY 5100 Applied Statistics in Psychology Cr. 4

General linear model, coding techniques, multiple correlation and regression, analysis of variance and covariance, planned and post hoc tests, use of statistical computer packages. Offered Every Term.

Prerequisites: PSY 2020 with a minimum grade of C

PSY 5330 Human Neuropsychology Cr. 3

History of the development of human neuropsychology. Neuropsychological mechanisms underlying behavior and mental processes: sensory-motor mechanisms; integrative action of the nervous system; mechanisms involved in emotional behavior and learning and memory. Current perspectives of theories of brain organization and function and empirical foundations of neuropsychological assessment. Offered Yearly.

Prerequisites: PSY 1010 with a minimum grade of D- or PSY 1020 with a minimum grade of D-

PSY 5440 Developmental Neuropsychology Cr. 3

Neurobiology of development. Topics include: neuroplasticity throughout the life span, maturation of the brain and neural connectivity, neurodevelopment of behavioral, emotional, social and cognitive functions. This course will bridge human behavioral and animal models to illustrate the dexterity and limitations of available scientific methods to study developmental neuropsychology. Offered Intermittently.

Prerequisite: PSY 1010 with a minimum grade of C and PSY 3010 with a minimum grade of C

PSY 5700 The Psychology of African Americans Cr. 4

Methodological approaches to and theories of Black behavior and personality development. Topics include: race and pathology, life-span and psycho-sexual development, personality formation, social and environmental stress and adaptation. Offered Every Term.

Equivalent: AFS 5700

PSY 5710 Dispute Resolution Cr. 3

Overview of the processes and actors in the field of dispute resolution including negotiation, mediation, arbitration, and conciliation. Offered Yearly.

Equivalent: CRJ 5994, PCS 5000, PS 5890

PSY 5900 Culture, Language and Cognition Cr. 3

Systematic investigation of the relationships among, language, cognition and culture, including issues relating to human universals, cross-cultural concept formation, metaphor, classification and the evolution of cognition and language. Offered Every Other Winter.

Prerequisites: ANT 3310 with a minimum grade of D- or ANT 5320 with a minimum grade of D- or LIN 3310 with a minimum grade of D- or LIN 5320 with a minimum grade of D- or LIN 3080 with a minimum grade of D- or PSY 3080 with a minimum grade of D-

Restriction(s): Enrollment is limited to Graduate or Undergraduate level students.

Equivalent: ANT 5900, LIN 5900

PSY 6010 Family Centered Collaboration in Early Childhood Intervention and Special Education Cr. 3-4

Theories, concepts and practices of family centered intervention services for young children with special needs. Team-building and cross-disciplinary communication and collaboration with families. Offered Fall.

Equivalent: ELE 6010, SW 6010

PSY 6020 Political Psychology Cr. 3

Political attitudes and behavior of both ordinary citizens and political elites using theory and research that adopt a psychological perspective. Topics include: political socialization, ideological belief systems, role of mass media in shaping beliefs and attitudes, race and gender stereotypes and their psychological and political consequences, personality and the dynamics of political leadership. Offered Yearly.

Prerequisite: PSY 1010 with a minimum grade of D-

Equivalent: PS 6010

PSY 6200 Development of Memory Cr. 3

Major theoretical models of memory development will be discussed and used to explore various aspects of the memory process from infancy to adulthood. Offered Intermittently.

Prerequisites: PSY 3080 with a minimum grade of D- or PSY 2400 with a minimum grade of D-

PSY 6500 Advanced Psychological Statistics Cr. 3

Review of core statistical procedures; in-depth exploration of concepts of correlation and regression. Brief review of descriptive statistics and methods of statistical inference. Statistical software will be introduced and used. Offered for graduate credit only. Offered Yearly.

Restriction(s): Enrollment is limited to students with a major in Industrial/Organizational Psy.

PSY 6510 Organization Theory Cr. 3

Work organization theories, and history of social modeling; classical, neoclassical, and open system of contingency theories. Offered Yearly.

Restriction(s): Enrollment is limited to students with a major in Industrial/Organizational Psy.

PSY 6520 Organizational Behavior Cr. 3

Employee motivation, job attitudes, leadership and management development; related aspects of organizational behavior, design and development. Offered Yearly.

Restriction(s): Enrollment is limited to students with a major in Industrial/Organizational Psy.

PSY 6535 Psychometric Theory Cr. 3

Development, validation, and use of psychological tests and other psychological instruments. Origins and value of psychological testing. Offered Yearly.

Prerequisites: PSY 6500 with a minimum grade of B

Restriction(s): Enrollment is limited to students with a major in Industrial/Organizational Psy.

PSY 6550 Training and Employee Development Cr. 3

Theory and practice of organizational training, employee development, and management development; establishment of performance standards, performance appeal process, evaluation of training and development programs. Offered Yearly.

Restriction(s): Enrollment is limited to students with a major in Industrial/Organizational Psy.

PSY 6570 Research Methods in Industrial/Organizational Psychology Cr. 3

Field and lab research methods for workplace settings. Offered Yearly.

Restriction(s): Enrollment is limited to students with a major in Industrial/Organizational Psy.

PSY 6710 Psycholinguistics Cr. 3

Theory and research in various topics in psycholinguistics, including language development, speech perception and production, and language comprehension. Offered Intermittently.

Equivalent: LIN 6710

PSY 6995 Advanced Special Topics Cr. 3

Topics to be announced in Schedule of Classes . Offered Intermittently.

Restriction(s): Enrollment limited to students with a class of Unranked Grad or Senior.

Repeatable for 6 Credits

PSY 7010 History and Systems of Psychology Cr. 2-3

History and philosophical ideas that have influenced development of the scientific field of psychology. Core issues in philosophy of science; their integration with major theories, philosophies and trends in development of modern psychology. Offered Every Other Year.

Restriction(s): Enrollment is limited to Graduate level students; enrollment is limited to students with a major in Psychology.

PSY 7020 An Integrative Approach to Social, Cognitive and Developmental Psychology Cr. 3

Integration of three major topics in psychology. Offered Intermittently.

Restriction(s): Enrollment is limited to Graduate level students; enrollment is limited to students with a major in Psychology.

PSY 7080 Human Cognition Cr. 3

Unified approach to human cognitive activity, including perception, attention, memory, language, concepts, and problem solving. Offered Every Other Year.

Restriction(s): Enrollment is limited to Graduate level students; enrollment is limited to students with a major in Psychology.

PSY 7090 Theories of Learning Cr. 3

Systematic examination of learning theories. Offered Every Other Year.

Restriction(s): Enrollment is limited to Graduate level students; enrollment is limited to students with a major in Psychology.

PSY 7120 Biological Basis of Behavior Cr. 3

Major literature relating the anatomy of the nervous system to psychological processes. Offered Every Other Year.

Restriction(s): Enrollment is limited to Graduate level students; enrollment is limited to students with a major in Psychology.

PSY 7140 Psychophysical and Scaling Methods Cr. 3

Major psychophysical methods; data analysis and written reports. Offered Intermittently.

Restriction(s): Enrollment is limited to Graduate level students; enrollment is limited to students with a major in Psychology.

PSY 7150 Quantitative Methods in Psychology I Cr. 4

Introduction to statistical inference for psychologists. Bivariate measures of relationship and associated statistical tests: chi square, t-test, F test and selected rank order tests. Research methods including randomized designs, repeated measures, counter-balancing and Latin square designs, and quasi-experimental designs common to applied social science research, such as matched case controls, pre- and post- designs, and interrupted time-series. Offered Fall.

Restriction(s): Enrollment is limited to Graduate level students; enrollment is limited to students with a major in Psychology.

PSY 7160 Psychometrics and Factor Analysis Cr. 3

Psychometric theory and psychological measurement including Factor Analysis and Item Response Theory. Offered Winter.

Prerequisites: PSY 7150 with a minimum grade of C (must be taken at WSU)

Restriction(s): Enrollment is limited to Graduate level students; enrollment is limited to students with a major in Psychology.
