PSY 7250 Theory of Personality Cr. 3

Major approaches to the study of personality. Current psychological research and issues in the field; implications for psychotherapy and assessment. Offered Every Other Year.

Restriction(s): Enrollment is limited to Graduate level students; enrollment is limited to students with a major in Psychology; enrollment limited to students in a Doctor of Philosophy degree.

PSY 7270 Research Methods in Clinical Psychology Cr. 3

Examines a range of methods that address the most commonly asked questions in the science of clinical psychology. Topics include defining research questions, reviewing literatures, designing studies, collecting data, and interpreting data. Specific topics include observational methods, longitudinal designs, clinical trials, program evaluation, mediators and moderators, publishing, and grant writing. Offered Winter.

Restriction(s): Enrollment is limited to Graduate level students; enrollment is limited to students with a major in Psychology; enrollment limited to students in a Doctor of Philosophy degree.

PSY 7300 Psychopathology Cr. 3

Basic psychological concepts of psychopathology with a focus on adult disorders. Current theory and research and their implications for clinical practice. Offered Fall.

Restriction(s): Enrollment is limited to Graduate level students; enrollment is limited to students with a major in Psychology.

PSY 7310 Developmental Psychopathology Cr. 3

Processes of development as they relate to emergence and course of psychopathology from conception through young adulthood; theory and research on major forms of psychopathology with childhood and adolescent onset. Offered Intermittently.

Restriction(s): Enrollment is limited to Graduate level students; enrollment is limited to students with a major in Psychology.

PSY 7330 Clinical Neuropsychology Cr. 3

History of the development of clinical neuropsychology. Current perspectives of theory and empirical foundations of neuropsychological assessment. Offered Intermittently.

Restriction(s): Enrollment is limited to Graduate level students; enrollment is limited to students with a major in Psychology.

PSY 7340 Neuropathology and Behavior Cr. 3

Discussion of the current state of neuropathology and its cognitive consequences. Offered Every Other Year.

Restriction(s): Enrollment is limited to Graduate level students; enrollment is limited to students with a major in Psychology.

PSY 7370 Psychological Interventions I Cr. 3

Survey of intervention development, theory and research; focus on empirically-supported individual psychotherapy for adults and evidenced-based therapeutic processes. Offered Fall.

Prerequisites: PSY 7300 with a minimum grade of B

Restriction(s): Enrollment is limited to Graduate level students; enrollment is limited to students with a major in Psychology.

PSY 7380 Psychological Interventions II Cr. 3

Survey of intervention development, theory and research; focus on evidence-based interventions for children and adolescents as well as systems (families, groups, communities). Offered Winter.

Prerequisites: PSY 7370 with a minimum grade of B (must be taken at WSU)

Restriction(s): Enrollment is limited to Graduate level students; enrollment is limited to students with a major in Psychology.

PSY 7400 Introduction to Life-Span Developmental Psychology Cr. 3

Theory, methods and selected content areas; cognitive and social development as they relate to the entire life cycle. Offered Every Other Year.

Restriction(s): Enrollment is limited to Graduate level students; enrollment is limited to students with a major in Psychology.

PSY 7425 Psychology of Infant Behavior and Development Cr. 3

Prenatal development and infancy through the toddler years. Major theoretical positions and research relating to motor, perceptual, cognitive, language, social, and emotional development. Implications for parenting, programming, and care. Offered Fall.

Restriction(s): Enrollment is limited to Graduate level students; enrollment is limited to students with a major in Psychology.

PSY 7430 Developmental Assessment of Infants and Toddlers Cr. 3

Overview of assessment methods; training in administration of the Bayley Scales of Infant development. No credit after PSY 6470. Offered Yearly.

Prerequisite: PSY 6420 with a minimum grade of C or PSY 7400 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students; enrollment is limited to students with a major in Psychology.

PSY 7440 Cognitive Development Cr. 3

Current theoretical perspectives and related research on cognitive development in childhood; topics include cognition, memory, concepts, and language. Offered Intermittently.

Prerequisite: PSY 7400 with a minimum grade of B

Restriction(s): Enrollment is limited to Graduate level students; enrollment is limited to students with a major in Psychology.

PSY 7450 Social Development Across the Life-Span Cr. 3

Recent perspectives on the psychological and environmental factors affecting social development across the life-span. Offered Every Other Year.

Restriction(s): Enrollment is limited to Graduate level students; enrollment is limited to students with a major in Psychology.

PSY 7470 Interdisciplinary Research Methods in Social, Cognitive and Developmental Psychology Cr. 3

Required of all first-year students in cognitive, developmental, and social psychology. Advanced survey of research design methods and issues across a broad array of social and behavioral fields, including cognitive, developmental, social, and personality psychology. Also covers Master's thesis development and ethical and professional issues. Offered Intermittently.

Restriction(s): Enrollment is limited to Graduate level students; enrollment is limited to students with a major in Psychology.

PSY 7490 Psychology of Aging Cr. 3

Provides foundational familiarity with the diverse conceptual and empirical contributions of psychology to the scientific study of aging. The study of aging, gerontology, is multidisciplinary activity, which this course will reflect by integrating psychological approaches to aging with models of aging grounded in biology, genetics, neuroscience, as well as the social sciences. Major topics studied include research methods and design, longevity, aging of the brain and the cardiovascular system, health and well-being, memory, intelligence, emotions, personality, social behavior, and psychopathology. Offered Intermittently.

Prerequisite: PSY 7400 with a minimum grade of B

Restriction(s): Enrollment is limited to Graduate level students.

PSY 7500 Research Methods in Industrial/Organizational Psychology Cr. 3

Analysis of methodology and research design problems in the field of industrial psychology; discussion of professional and ethical problems. Offered Yearly.

Prerequisite: PSY 7150 with a minimum grade of B

Restriction(s): Enrollment is limited to Graduate level students; enrollment is limited to students with a major in Psychology.

PSY 7510 Criterion Development and Performance Evaluation: Theory and Research Cr. 3

Nature and kinds of criteria of job performance; development and measurement of criteria; problems and issues in performance evaluation. Offered Yearly.

Prerequisite: PSY 7160 (may be taken concurrently) or PSY 7500 (may be taken concurrently)

Restriction(s): Enrollment is limited to Graduate level students; enrollment is limited to students with a major in Psychology.

PSY 7520 Selection and Placement: Theory and Research Cr. 3

Principles in development and evaluation of employee selection procedures; methods for establishing job-relatedness; problems and issues in evaluation and use of employee selection procedures. Offered Every Other Year.

Prerequisite: PSY 7160 (may be taken concurrently) with a minimum grade of B or PSY 7500 (may be taken concurrently) with a minimum grade of B

Restriction(s): Enrollment is limited to Graduate level students; enrollment is limited to students with a major in Psychology.

PSY 7560 Leadership and Executive Development: Theory and Research Cr. 3

Selected leadership research studies; theories relating to leadership; principles of training and development. Offered Every Other Year.

Prerequisite: PSY 7500 with a minimum grade of B

Restriction(s): Enrollment is limited to Graduate level students; enrollment is limited to students with a major in Psychology.

PSY 7570 Industrial Motivation and Morale: Theory and Research Cr. 3

Meaning of motivation and incentive as used in industry; research methods for study of motivation, job satisfaction, and morale; research data and interpretations in theoretical frameworks. Offered Every Other Year.

Prerequisite: PSY 7500 with a minimum grade of B

Restriction(s): Enrollment is limited to Graduate level students; enrollment is limited to students with a major in Psychology.

PSY 7590 Industrial and Organizational Psychology Cr. 3

Lecture, discussion, analysis of articles and chapters, in-class exercises. Offered Fall.

Restriction(s): Enrollment is limited to Graduate level students; enrollment is limited to students with a major in Psychology.

PSY 7620 Social Psychology: Research and Theory Cr. 3

Graduate-level introduction to the major theoretical and research areas of social psychology; current issues and research. Offered Fall.

Restriction(s): Enrollment is limited to Graduate level students; enrollment is limited to students with a major in Psychology.

PSY 7645 Social Psychology of Close Relationships Cr. 3

Social Psychological theory and research that examines the dynamics of close relationships, including relationship formation, maintenance, enhancement, and dissolution. Offered Every Other Year.

Prerequisite: PSY 7620 with a minimum grade of B

Restriction(s): Enrollment is limited to Graduate level students; enrollment is limited to students with a major in Psychology.

PSY 7745 Job Analysis and Performance Criteria Cr. 3

Job analysis methods, criterion development, and performance appraisal. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate level students; enrollment is limited to students with a major in Industrial/Organizational Psy.

PSY 7750 Organizational Staffing Cr. 3

Recruitment, screening, and personnel selection. Offered Yearly.

Prerequisites: PSY 7745 with a minimum grade of B (must be taken at WSU)

Restriction(s): Enrollment is limited to Graduate level students; enrollment is limited to students with a major in Industrial/Organizational Psy.

PSY 7770 Testing in the Workplace Cr. 3

Test development; in-depth discussion of existing tests. Offered Yearly.

Prerequisites: PSY 6535 with a minimum grade of B (must be taken at WSU)

Restriction(s): Enrollment is limited to Graduate level students; enrollment is limited to students with a major in Industrial/Organizational Psy.

Course Material Fees: \$100

PSY 7780 Industrial/Organizational Psychology Cr. 1

Approved internship field placement for a period of one semester to two years. Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students; enrollment is limited to students with a major in Industrial/Organizational Psy.

Repeatable for 4 Credits

PSY 7790 Capstone Course Cr. 3

Special topics in I/O psychology. Students write a major paper or conduct an individual project. Offered Spring/Summer.

Restriction(s): Enrollment is limited to Graduate level students; enrollment is limited to students with a major in Industrial/Organizational Psy.

PSY 7990 Directed Study Cr. 1-9

For students who wish further study of technical literature of a problem systematically reviewed in a preceding course. Intensive and systematic reading of original literature (particularly journals) dealing with topic or problem. Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students; enrollment is limited to students with a major in Psychology.

Repeatable for 9 Credits

PSY 7991 Current Topics in Behavioral Neuroscience Cr. 1

Discussion of current papers in the field. Offered Fall, Winter.

Restriction(s): Enrollment is limited to Graduate level students; enrollment is limited to students with a major in Psychology.

Repeatable for 12 Credits

PSY 7997 Research Problems Cr. 1-8

Original research under direction of departmental staff. Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students; enrollment is limited to students with a major in Psychology.

Repeatable for 32 Credits

PSY 8000 Clinical Internship Cr. 1

Approved placement in an APA accredited internship for a one- to two-year period. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate level students; enrollment is limited to students with a major in Psychology.

Repeatable for 3 Credits

PSY 8040 Social Neuroscience Cr. 3

Neurobiology of social cognition. Topics include: social communication, decision making, group dynamics, face/race processing, action and gesture cognition, emotional processing, development. Offered Intermittently.

Restriction(s): Enrollment is limited to Graduate level students; enrollment is limited to students with a major in Psychology.

PSY 8050 Cognitive Neuroscience Cr. 3

Concepts and methods used to study neurobiological basis of cognition, covering brain systems involved in perception, attention, memory, language, and decision making, as well as life-span development of brain, cognition and psychopathology. Offered Every Other Year.

Restriction(s): Enrollment is limited to Graduate level students; enrollment is limited to students with a major in Psychology.

PSY 8060 Functional Neuroanatomy Cr. 4

Anatomical features of the human nervous system; emphasis on relationship between neural structure and behavior. Offered Every Other Year.

Restriction(s): Enrollment is limited to Graduate level students; enrollment is limited to students with a major in Psychology.

Course Material Fees: \$15

PSY 8065 Neurophysiology and Neural Plasticity Cr. 3

Physiological and molecular properties of neurons and the relationship of neural plasticity to behavior and development. Offered Every Other Year.

Prerequisites: PSY 8060 with a minimum grade of C (must be taken at WSU)

Restriction(s): Enrollment is limited to Graduate level students; enrollment is limited to students with a major in Psychology.

PSY 8070 Psychopharmacology Cr. 3

Psychological and biological bases of psychopharmacology; emphasis on preclinical models and development of treatments for psychological disorders. Offered Every Other Year.

Restriction(s): Enrollment is limited to Graduate level students; enrollment is limited to students with a major in Psychology.

PSY 8140 Meta-Analysis Cr. 2-3

Use of quantitative techniques for summarizing research results in psychology. Offered Spring/Summer.

Prerequisites: PSY 8150 with a minimum grade of B (must be taken at WSU)

Restriction(s): Enrollment is limited to Graduate level students; enrollment is limited to students with a major in Psychology.

PSY 8150 Multivariate Analysis in Psychology Cr. 4

Extension of the general linear model to multivariate statistical techniques, including: exploratory factor analysis and principal components analysis, confirmatory factor analysis, discriminant function analysis, canonical correlation analysis, and multivariate analysis of variance. Offered Winter.

Prerequisite: PSY 7150 with a minimum grade of B

Restriction(s): Enrollment is limited to Graduate level students; enrollment is limited to students with a major in Psychology.

PSY 8170 Structural Equation Modeling Cr. 3

Practical introduction to structural equation modeling. Offered Yearly.

Prerequisites: PSY 7160 with a minimum grade of B (must be taken at WSU)

Restriction(s): Enrollment is limited to Graduate level students; enrollment is limited to students with a major in Psychology.

PSY 8300 Health Psychology I Cr. 3

Theoretical and empirical review of major topics in behavioral approaches to health and illness, including: 1) theories of health behavior and behavior change; 2) psychological impact of acute and chronic physical illness; and 3) health care utilization including health disparities, patient-provider communication, and psychosocial factors that affect adherence. . Offered Every Other Year.

Restriction(s): Enrollment is limited to Graduate level students; enrollment is limited to students with a major in Psychology.

PSY 8310 Health Psychology II Cr. 3

Applied issues in health psychology and behavioral medicine. Focus on research and practice related to assessment and intervention with medical populations and changing health behavior. Offered Every Other Year.

Restriction(s): Enrollment is limited to Graduate level students; enrollment is limited to students with a major in Psychology.

PSY 8320 Biobases of Health Psych Cr. 3

Offered Every Other Year.

Prerequisites: PSY 8300 with a minimum grade of B or PSY 8310 with a minimum grade of B

Restriction(s): Enrollment is limited to Graduate level students.

PSY 8340 Clinical Neuropsychological Assessment Cr. 3

Review of principles and literature on neuropsychological assessment, common neuropsychological tests and test batteries, in context of actual clinical cases. Offered Every Other Year.

Restriction(s): Enrollment is limited to Graduate level students; enrollment is limited to students with a major in Psychology.

PSY 8350 Community Psychology Cr. 3

Current findings, theory, and research in the field of community psychology. Emphasis on current urban problems. Offered Intermittently.

Restriction(s): Enrollment is limited to Graduate level students; enrollment is limited to students with a major in Psychology.

PSY 8390 Therapeutic Intervention Practicum Cr. 1

Students learn to conduct evidence-based psychological interventions with adults, children, couples, and families. Skills taught include how to: a) develop case conceptualizations based on different theoretical models; b) apply techniques from motivational, cognitive-behavioral, relational, psychodynamic, and other therapies; c) develop and maintain the therapeutic alliance; d) track outcomes and modify approach as needed; e) terminate cases; and f) both receive and provide supervision. Unique aspects of intervening for specific clinical conditions or disorders will be covered. Students will present cases based on interventions they conduct in the departmental training clinic. Offered Every Term.

Prerequisites: PSY 7380 with a minimum grade of B (must be taken at WSU)

Restriction(s): Enrollment is limited to Graduate level students; enrollment is limited to students with a major in Psychology.

Repeatable for 3 Credits

PSY 8400 Current Issues in Developmental Psychology Cr. 3

Integrative seminar in current theoretical and empirical issues. Offered Intermittently.

Restriction(s): Enrollment is limited to Graduate level students; enrollment is limited to students with a major in Psychology.

Repeatable for 9 Credits

PSY 8440 Developmental Neuropsychology Cr. 3

Neurobiology of development. Topics include: neuroplasticity throughout the life span, maturation of the brain and neural connectivity, neurodevelopment of behavioral, emotional, social and cognitive functions. This course will bridge human behavioral and animal models to illustrate the dexterity and limitations of available scientific methods to study developmental neuropsychology. Offered Intermittently.

Restriction(s): Enrollment is limited to Graduate level students; enrollment is limited to students in the Department of Psychology.

PSY 8500 Seminar in Industrial/Organizational Psychology Cr. 1-3

For industrial/organizational psychology students. Current topics in industrial psychology; content varies. Offered Intermittently.

Restriction(s): Enrollment is limited to Graduate level students; enrollment is limited to students with a major in Psychology.

Repeatable for 15 Credits

PSY 8560 Models and Methods in Psychopharmacology Cr. 3

Psychological and biological bases of psychopharmacology; emphasis on methods, models and theories in basic preclinical research. Offered Every Other Year.

Restriction(s): Enrollment is limited to Graduate level students; enrollment is limited to students with a major in Psychology.

PSY 8600 Seminar in Experimental Social Psychology Cr. 3

Review and evaluation of the literature on some current topic of research or theoretical concern. Offered Intermittently.

Restriction(s): Enrollment is limited to Graduate level students; enrollment is limited to students with a major in Psychology.

Repeatable for 9 Credits

PSY 8620 Social Cognition Cr. 3

How mental representations underlie the processes of social thought and behavior. Students survey, evaluate, and discuss social cognition processes and research; group work to design and conduct tests of social-cognitive processes. Offered Every Other Winter.

Restriction(s): Enrollment is limited to Graduate level students; enrollment is limited to students with a major in Psychology.

PSY 8740 Seminar in Psychological Measurement and Statistics Cr. 2-3

Topics in measurement and statistical analysis; exploratory data analysis and related problems; multidimensional scaling and clustering techniques; time series analysis; analysis of longitudinal data; item response theory and tailored testing; statistical power. Offered Intermittently.

Prerequisites: PSY 7160 with a minimum grade of B (must be taken at WSU)

Restriction(s): Enrollment is limited to Graduate level students; enrollment is limited to students with a major in Psychology.

Repeatable for 9 Credits

PSY 8760 Seminar in Clinical Psychology Cr. 1-3

New clinical methods and scientific developments in the field of clinical psychology. Meets with continuing education seminars in clinical psychology. Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students; enrollment is limited to students with a major in Psychology.

Repeatable for 9 Credits

PSY 8999 Master's Thesis Research and Direction Cr. 1-8

Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students; enrollment is limited to students with a major in Psychology.

Repeatable for 8 Credits

PSY 9990 Pre-Doctoral Candidacy Research Cr. 1-8

Research in preparation for doctoral dissertation. Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students.

Repeatable for 12 Credits

PSY 9991 Doctoral Candidate Status I: Dissertation Research and Direction Cr. 7.5

Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students.

PSY 9992 Doctoral Candidate Status II: Dissertation Research and Direction Cr. 7.5

Offered Every Term.

Prerequisite: PSY 9991 with a minimum grade of S

Restriction(s): Enrollment is limited to Graduate level students.

PSY 9993 Doctoral Candidate Status III: Dissertation Research and Direction Cr. 7.5

Offered Every Term.

Prerequisite: PSY 9992 with a minimum grade of S

Restriction(s): Enrollment is limited to Graduate level students.

**PSY 9994 Doctoral Candidate Status IV: Dissertation Research and
Direction Cr. 7.5**

Offered Every Term.

Prerequisite: PSY 9993 with a minimum grade of S

Restriction(s): Enrollment is limited to Graduate level students.

**PSY 9995 Candidate Maintenance Status: Doctoral Dissertation Research
and Direction Cr. 0**

Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students.

Course Material Fees: \$370.26

Repeatable for 0 Credits

PT - PHYSICAL THERAPY

PT 5010 Clinical Applications I Cr. 1

First part-time integrated clinical experience for physical therapy students. Orientation to clinical education and PT practice to develop professional behaviors, observation skills, fundamentals of written and verbal communication and basic examination and intervention skills in a clinical setting. Offered Winter.

Course Material Fees: \$50

PT 5020 Foundations of Physical Therapy Cr. 2

Satisfies General Education Requirement: Writing Intensive Competency Sociological and historical background of the PT profession. Professional behavior, patient care interaction and medical terminology. Basic physical therapy care procedures, documentation, patient education, care in medical emergencies. Offered Fall.

Restriction(s): Enrollment limited to students in the Pharmacy and Health Sciences.

Course Material Fees: \$55

PT 5030 Basic Patient Care in Physical Therapy Cr. 2

Introduction to the basic skills necessary for patient care and provide a foundation to the theory and practice of basic patient care procedures for the Physical Therapist. Offered Fall.

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students in the Pharmacy and Health Sciences; enrollment limited to students in a Doctor of Physical Therapy degree.

PT 5070 Clinical Applications II Cr. 2

Second part-time integrated clinical experience for physical therapy students. This clinical education course includes and orientation to basic and intermediate examination and intervention skills, professional behavior, communication, documentation, inter-professional collaboration and team work. Offered Fall.

Prerequisite: PT 5010 (may be taken concurrently)

PT 5100 Therapeutic Exercise I Cr. 3

Foundational course designed to focus on the principles and techniques of therapeutic exercise for patients with pathological conditions to the neuromusculoskeletal system. Students will develop and administer treatment plans for specific patient problems and progress treatment plans based on patient condition and response to treatment. Offered Fall.

Prerequisite: PT 5430 and PT 5500

Restriction(s): Enrollment limited to students in the Pharmacy and Health Sciences.

Course Material Fees: \$50

PT 5120 Human Growth and Development Cr. 2

Theories and basic principles in prenatal, physical, sensorimotor, perceptual, cognitive, social, emotional and language growth and development. Implications for physical therapy evaluation and treatment of children with developmental disabilities. Offered Spring/Summer.

Restriction(s): Enrollment limited to students in the Pharmacy and Health Sciences.

Course Material Fees: \$10

PT 5300 Surface Anatomy Cr. 2

Laboratory-based course teaching skills for soft tissue palpation, identification of surface anatomy landmarks, soft tissue mobilization and massage. Offered Fall.

Restriction(s): Enrollment limited to students in the Pharmacy and Health Sciences.

PT 5320 Basic Examination and Evaluation Procedures Cr. 3

Lecture and laboratory experience focusing on principles and procedures of foundational medical screening, physical therapy differentiation, and clinical reasoning and decision-making skills; basic principles and techniques for posture, integumentary, neurological, range of motion, and strength examination and evaluation, documenting progress and outcome, and the continued development of patient care skills. Offered Winter.

Prerequisite: PT 5030 and PT 5300 and PT 5505

Restriction(s): Enrollment limited to students in the Pharmacy and Health Sciences.

Course Material Fees: \$10

PT 5400 Neurosciences for Health Care Professionals Cr. 3

Study of the human central nervous system; emphasis on sensory and motor systems and structures that contribute to normal movement. Offered Fall.

Restriction(s): Enrollment limited to students in the Pharmacy and Health Sciences.

Course Material Fees: \$50

Equivalent: OT 5400

PT 5410 Clinical Medicine I Cr. 3

Designed to provide specific information needed by the physical therapist treating patients with a variety of diseases. Pathology, etiology, clinical signs and symptoms, prognosis, and treatment of a variety of illnesses and conditions relevant to physical therapy treatment are covered. The role of other health care specialists including physician, occupational therapist, speech pathologist, nurses and psychologists is explored. Offered Winter.

Restriction(s): Enrollment is limited to students with a major in Physical Therapy.

PT 5430 Clinical Medicine II Cr. 1

Disease processes, and medical and surgical interventions. Role of physical therapy as part of comprehensive multi-disciplinary health care team. Offered Spring/Summer.

Prerequisite: PT 5410

Restriction(s): Enrollment is limited to students with a major in Physical Therapy.

PT 5500 Kinesiology and Biomechanics Cr. 3

Normal movement and biomechanics applied to the human body. Offered Winter.

Prerequisite: PT 5505 and PT 5510 and PT 5400

Restriction(s): Enrollment limited to students in the Pharmacy and Health Sciences.

Course Material Fees: \$10

PT 5505 Clinical Applications of Human Anatomy Cr. 3

Knowledge of basic human anatomy for students in health science professional programs; foundation for further study in clinical sciences. Offered Fall.

Restriction(s): Enrollment is limited to students with a major, minor, or concentration in Occupational Therapy or Physical Therapy.

Equivalent: OT 5505

PT 5510 Clinical Applications of Human Anatomy: Laboratory Cr. 1

Examination of prosections, dissection of human cadavers; didactic study. Offered Fall.

Restriction(s): Enrollment limited to students in the Pharmacy and Health Sciences.

Course Material Fees: \$220

Equivalent: OT 5510

PT 5650 Pathophysiology for Health Sciences Cr. 3

Fundamental knowledge of the nature of disease for the health sciences student; physiologic and morphologic changes accompanying disease processes; mechanisms of repair and recovery. Offered Winter.

Restriction(s): Enrollment limited to students in the Pharmacy and Health Sciences.

Equivalent: OT 5650, RT 5650

PT 5660 Pathokinesiology Cr. 3

Continuation of P T 5500 designed to teach the biomechanical and kinesiological principles of human movement as related to anatomical and neuroanatomical structure. Analysis of pathological motion and pathokinesiology of selected joints will be included. Offered Spring/Summer.

Prerequisite: PT 5500

Restriction(s): Enrollment limited to students in the Pharmacy and Health Sciences.

Course Material Fees: \$10

PT 5800 Clinical Education I Cr. 3

First of a four-course clinical education series. Six weeks of full-time supervised clinical experience for physical therapy students. Offered Yearly.

Prerequisite: PT 7120 with a minimum grade of C or PT 7220 with a minimum grade of C

Course Material Fees: \$20

PT 5820 Clinical Education II Cr. 3

Second of a four-course clinical education series. Six-week of full-time supervised clinical experience for physical therapy students. Offered Spring/Summer.

Prerequisite: PT 7120 with a minimum grade of C or PT 7220 with a minimum grade of C

Restriction(s): Enrollment limited to students in the Doctor of Physical Therapy program.

Course Material Fees: \$30

PT 6100 Therapeutic Exercise II Cr. 3

Advanced application of principles and techniques of therapeutic exercise; evaluation and modification of therapeutic exercise plan of care, based on physical and functional responses and characteristics of patients or clients. Offered Fall.

Prerequisite: PT 5100

Restriction(s): Enrollment limited to students in the Pharmacy and Health Sciences.

Course Material Fees: \$60

PT 6200 Diversity, Ethics and Legal Issues in Health Care Cr. 3

Impact of diversity and legal practice standards, including federal, state, and institutional regulations related to patient care and fiscal management of health care practice. Issues in cultural awareness, cultural sensitivity, cultural competence, ethics, and ethical decision making in personal, professional, and societal contexts. Self-analysis of personal attitudes, values, and beliefs. Offered Winter.

Prerequisite: PT 5020

Restriction(s): Enrollment is limited to students with a major in Physical Therapy.

PT 6300 Research I: Critical Thinking Cr. 2

Introduction to evidence-based practice and clinical reasoning and decision making. Identification, location, critique and analysis of evidence. Offered Fall, Winter.

PT 6310 Physiology of Exercise II Cr. 3

Metabolic, neuromuscular, cardiovascular, and respiratory adjustments to acute and chronic exercise in health and disease, including body composition and weight control, nutritional considerations, and the effects of different environments on exercise performance. Offered Fall.

Restriction(s): Enrollment is limited to students with a major in Physical Therapy.

Equivalent: KIN 6310, PSL 6010

PT 6400 Teaching and Learning in Health Care Cr. 2-3

Exploration of theoretical and practical issues pertinent to physical therapy profession: educational methods, adult learning theories, instructional design methodologies, evaluation, instructional management. Additional project required if elected for three credits. Offered Winter.

Restriction(s): Enrollment limited to students in the Pharmacy and Health Sciences.

PT 6500 Pharmacology Cr. 2

Effects of drug distribution, absorption and excretion as pertaining to physical therapy. Major drug categories, OTC, and nutritional supplements, pertinent to acute and chronic responses to physical therapy; indications, mechanisms, effects. Offered Fall.

Prerequisite: PT 5430 and PT 5650

Restriction(s): Enrollment limited to students in the Pharmacy and Health Sciences.

PT 6700 Motor Learning and Motor Control Cr. 2-3

Current theories and concepts in processes of motor skill acquisition and performance, from a behavioral objective. Additional evidence-based case reports required if elected for three credits. Offered Winter.

Prerequisite: PT 5400 with a minimum grade of C-

Restriction(s): Enrollment limited to students in the Pharmacy and Health Sciences.

PT 6750 Seminar: Complementary and Alternative Health Care Cr. 2

Physical, psychological, and nutritional approaches relevant to practice of physical therapy. Seminar course. Offered Winter.

Prerequisite: PT 5430 and PT 6300

Restriction(s): Enrollment is limited to students with a major in Physical Therapy.

PT 7000 Therapeutic Modalities Cr. 3

Lecture and laboratory experiences focusing on principles and procedures for using physical agents and spinal traction. Tissue inflammation and repair, pain, superficial and deep heat, cryotherapy, electrotherapy, and spinal traction included. Integumentary evaluation and wound management. Offered Fall.

Prerequisite: PT 5430 and PT 5660

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students in the Pharmacy and Health Sciences.

Course Material Fees: \$20

PT 7100 Management of Patients with Orthopedic Conditions I Cr. 3

Lecture and laboratory experience focusing on knowledge, principles, clinical reasoning and decision making skills, examination and evaluation procedures, and interventions required for managing patients with impairments, functional limitations, and disabilities due to musculoskeletal pathologies of the extremity joints across the life span, and the continued development of patient care skills. Offered Fall.

Prerequisite: PT 5300 with a minimum grade of C and PT 5320 with a minimum grade of C and PT 5500 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students; enrollment is limited to students with a major in Physical Therapy.

Course Material Fees: \$15

PT 7120 Management of Patients with Orthopedic Conditions II Cr. 3

Lecture and laboratory experience focusing on knowledge, principles, clinical reasoning and decision making skills, examination and evaluation procedures, and interventions required for managing patients with impairments, functional limitations, and disabilities due to musculoskeletal pathologies of the spinal column and extremity joints across the life span, and the continued development of patient care skills. Offered Winter.

Prerequisite: PT 7100

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students in the Pharmacy and Health Sciences.

Course Material Fees: \$15

PT 7200 Management of Patients with Neurological Disorders I Cr. 3

Basic principles and techniques of assessing problems associated with neurological disorders including postural tone, sensation, superficial and developmental reflexes, quality of movement, perceptual-motor skills and functional mobility. Offered Yearly.

Prerequisite: PT 5400 and PT 6700

Restriction(s): Enrollment is limited to Graduate level students.

Course Material Fees: \$15

PT 7220 Management of Patients with Neurological Disorders II Cr. 3

Theory, principles and application of the neurophysiological approach to evaluation and treatment. Proprioceptive neuromuscular facilitation, neuro development treatment, sensory integration, and sensory-motor approaches. Offered Winter.

Prerequisite: PT 7200

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students in the Pharmacy and Health Sciences.

Course Material Fees: \$15

PT 7300 Orthotics and Prosthetics Cr. 3

Principles and techniques of prosthetic and orthotic function, component selection and application, use and training. Upper and lower extremity devices, and spinal devices, wheelchairs, ambulatory aids, assistive devices and environmental control systems. Advanced gait and movement biomechanics and evaluation. Offered Fall.

Prerequisite: PT 5500 and PT 5660 and PT 7200

Restriction(s): Enrollment is limited to Graduate level students; enrollment is limited to students with a major in Physical Therapy.

Course Material Fees: \$20

PT 7320 Rehabilitation Procedures Cr. 3

Theoretical issues and treatment of patients with spinal cord injury, traumatic brain injury, problems of aging, and chronic neuromuscular conditions. Offered Fall.

Prerequisite: PT 7200 and PT 7220

Restriction(s): Enrollment is limited to Graduate level students; enrollment is limited to students with a major in Physical Therapy.

PT 7400 Cardiopulmonary Rehabilitation Cr. 4

Physiology and pathophysiology of disorders of the cardiac and pulmonary systems. Evaluation and treatment of cardiopulmonary disorders. Offered Winter.

Prerequisite: PT 5100 and PT 5430 and PT 6310

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students in the Pharmacy and Health Sciences.

Course Material Fees: \$20

PT 7600 Physical Therapy for Medical and Surgical Conditions Cr. 3

Management of patients with complex problems including medical and surgical conditions seen in acute care hospital settings. Offered Winter.

Prerequisite: PT 5650 and PT 5430

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students in the Pharmacy and Health Sciences.

Course Material Fees: \$25

PT 7700 Research II: Design & Methodology Cr. 2

Introduction to basic principles of research theory, design, and methodology for physical therapy. Biostatistics and analysis of scientific literature relevant to physical therapy. Offered Fall.

Prerequisite: PT 6300

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students in the Pharmacy and Health Sciences.

PT 7720 Research III: Data Analysis and Interpretation Cr. 2

Basic principles of research design as it relates to the theory and practice of physical therapy. Students will analyze relevant scientific literature, design, develop and implement a research project, and learn basic computer skills in utilizing a statistical analysis program. Offered Fall.

Prerequisite: PT 7700 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students; enrollment is limited to students with a major in Physical Therapy.

Course Material Fees: \$20

PT 7740 Research IV: Research Practicum Cr. 1

Basic principles of research design as it relates to the theory and practice of physical therapy. Students will develop and implement a research project and present the results in several formats. Offered Fall.

Prerequisites: PT 6300 and PT 7700 and PT 7720

Restriction(s): Enrollment is limited to Graduate level students.

PT 7990 Directed Study Cr. 1-4

Independent study: critical analysis or review of new or unique topics in health care; or physical therapy role, approach, methodology, techniques or scientific rationale for professional practice. Oral and written presentation required. Elective. Offered Yearly.

Prerequisite: PT 5100

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students in the Pharmacy and Health Sciences.

PT 8000 Therapeutic Management of Pediatric Populations Cr. 3

Principles and application of the elements of physical therapy practice in the management of pediatric populations. Offered Fall.

Prerequisite: PT 5120 with a minimum grade of C and PT 6700 with a minimum grade of C and PT 7220 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students; enrollment is limited to students with a major in Physical Therapy.

Course Material Fees: \$15

PT 8110 Geriatrics Cr. 2

Theories and basic principles of physical, sensorimotor, perceptual, cognitive, social, emotional, and language changes during the aging process. Emphasis is placed on the how the aging process impacts functional independence and contributions from all body systems. Implications for physical therapy evaluation and treatment for the aging population are examined. Offered Winter.

Restriction(s): Enrollment is limited to Graduate level students; enrollment is limited to students with a major in Physical Therapy.

PT 8170 Professional Development and Reflective Practice Cr. 3

Exploration of novice vs. expert practice in physical therapy; role of reflection in developing professional skills and behaviors. Current professional and legal issues in provision of physical therapy services. Web-based course. Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students in the Pharmacy and Health Sciences; enrollment limited to students in the Doctor of Physical Therapy program.

PT 8200 Management in Physical Therapy Practice Cr. 2

Overview of health care systems; financing and administration of physical therapy services within various health care systems. Offered Fall.

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students in the Pharmacy and Health Sciences; enrollment limited to students in the Doctor of Physical Therapy program.

PT 8300 Differential Diagnosis for Health Sciences Cr. 3

Principles and procedures designed to facilitate the integration of previously-introduced examination and evaluation skills, in order to perform differential diagnosis for primary care practice. Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students in the Pharmacy and Health Sciences; enrollment limited to students in the Doctor of Physical Therapy program.

PT 8400 Diagnostic Procedures for Health Sciences Cr. 2-3

Medical diagnostic procedures and application of results as related to provision of physical therapy health services, including diagnostic imaging and laboratory tests. Additional project required if elected for three credits. Offered Every Term.

Prerequisite: PT 5650 with a minimum grade of C and PT 5430 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students in the Pharmacy and Health Sciences.

PT 8500 Clinical Decision Making Cr. 3

Integration of didactic and clinical knowledge in development of diagnostic prognostic skills in physical therapy; focus on refining competencies in peer referral across health care disciplines; development of strategies for clinical decision making. Offered Yearly.

Prerequisite: PT 6100 with a minimum grade of C and PT 7120 with a minimum grade of C and PT 7220 with a minimum grade of C and PT 7400 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students in the Doctor of Physical Therapy program.

Course Material Fees: \$80

PT 8600 Health Promotion and Wellness Cr. 2

Dimensions of health promotion and wellness, including implementation strategies for different populations. Analysis of physical, emotional and cost benefits. Identification of needs and development of practice plan for groups and individuals. Offered Winter.

Restriction(s): Enrollment is limited to Graduate level students; enrollment is limited to students with a major in Physical Therapy.

PT 8800 Clinical Education III Cr. 4

Third in a four-course clinical education series. Twelve weeks of full-time supervised terminal clinical experience for physical therapy students with emphasis on progression to entry-level clinician. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate level students; enrollment is limited to students with a major in Physical Therapy.

Course Material Fees: \$20

PT 8820 Clinical Education IV Cr. 8

Fourth in a four-course clinical education series. Final full-time supervised terminal clinical experience for physical therapy students. Twelve week full time experience with emphasis on progression to entry-level clinician. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate level students; enrollment is limited to students with a major in Physical Therapy.

Course Material Fees: \$30

PT 8850 Clinical Practicum Cr. 3

Monitored clinical practice in a focused area of physical therapy practice. Focus may include: administration and management, cardiopulmonary, neurology, orthopedics, integumentary care, pediatrics, and teaching. Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students in the Pharmacy and Health Sciences.

PTH - PATHOLOGY

PTH 7000 General Pathology Cr. 5

The structural and functional manifestations of disease. Concepts of biochemistry, physiology and cell biology are utilized in developing a dynamic approach to the study of the abnormal cell and its constituents. Basic mechanisms are stressed. Offered Fall.

Restriction(s): Enrollment is limited to Graduate level students.

PTH 7080 Special Topics in Pathology Cr. 1-15

Frontier areas in experimental pathology and clinical laboratory sciences. Format may be lecture, laboratory, or discussion; topics to be announced in Schedule of Classes . Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students.

Repeatable for 20 Credits

PTH 7085 Critical Review of Scientific Publications Cr. 1

For Ph.D. students in biomedical fields. Current experimental approaches in medical research. Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students; enrollment is limited to students with a major in Pathology; enrollment limited to students in the PhD in Medicine program.

Repeatable for 5 Credits

PTH 7090 Signal Transduction and Cell Growth Regulation Cr. 3

Signal transduction pathways, both cellular and molecular, and their alterations in cancer. Journal articles and instructor handouts used; emphasis on relationship to disease process. Offered Every Other Winter.

Prerequisites: IBS 7015 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

PTH 7130 Neuropathology Cr. 2

Offered Yearly.

Prerequisites: PTH 7000 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

PTH 7150 Pathology of Respiratory Tract Cr. 2

Offered Yearly.

Prerequisites: PTH 7000 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

PTH 7180 Cardiovascular Pathology Cr. 2

Gross, microscopic and submicroscopic anatomy and pathophysiology of cardiovascular disease, both human and experimental. Offered Yearly.

Prerequisites: PTH 7000 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

PTH 7330 Pathology of the Kidney Cr. 2

Techniques of preparing renal biopsies for light and electron microscopy and immunofluorescent studies; ultrastructure of normal kidney; physiology of kidney - acute and chronic renal failure; glomerular disease; pyelonephritis; vascular disease; and acute tubular necrosis and renal transplantation. Offered Yearly.

Prerequisites: PTH 7000 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

PTH 7500 Systemic Pathophysiology Cr. 3

Pathology and pathogenesis underlying abnormal physiologic function of major organ systems in humans. Offered Yearly.

Prerequisite: PSL 7010 with a minimum grade of C and BCH 7010 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

Course Material Fees: \$25

PTH 7890 Seminar Cr. 1

Offered Yearly.

Restriction(s): Enrollment is limited to Graduate level students; enrollment is limited to students with a major in Pathology; enrollment limited to students in a Doctor of Philosophy degree.

Repeatable for 25 Credits

PTH 7990 Directed Study in Clinical Pathology and Pathologic Anatomy Cr. 2

Offered Yearly.

Restriction(s): Enrollment is limited to Graduate level students; enrollment is limited to students with a major in Pathology; enrollment limited to students in the PhD in Medicine program.

Repeatable for 12 Credits

PTH 8000 Current Topics in Tumor Metastasis Cr. 3

Advances in research on key aspects of tumor metastasis; emphasis on molecular mechanisms, tumor invasion, angiogenesis, and organ-specific tumor metastasis. Offered Fall.

Prerequisites: IBS 7015 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

PTH 8010 Molecular Biology of Diabetes and Obesity Cr. 2

Basic principles and current research topics in the etiology and pathology of diabetes; diabetic complications and obesity. Offered Every Other Fall.

Prerequisites: IBS 7015 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students with a class of Applicant Masters, Candidate Masters or Doctoral Candidate.

PTH 9990 Pre-Doctoral Candidacy Research Cr. 1-8

Research in preparation for doctoral dissertation. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate level students.

Repeatable for 12 Credits

PTH 9991 Doctoral Candidate Status I: Dissertation Research and Direction Cr. 7.5

Offered Yearly.

Restriction(s): Enrollment is limited to Graduate level students.

PTH 9992 Doctoral Candidate Status II: Dissertation Research and Direction Cr. 7.5

Offered Yearly.

Prerequisite: PTH 9991 with a minimum grade of S

Restriction(s): Enrollment is limited to Graduate level students.

PTH 9993 Doctoral Candidate Status III: Dissertation Research and Direction Cr. 7.5

Offered Yearly.

Prerequisite: PTH 9992 with a minimum grade of S

Restriction(s): Enrollment is limited to Graduate level students.

PTH 9994 Doctoral Candidate Status IV: Dissertation Research and Direction Cr. 7.5

Offered Yearly.

Prerequisite: PTH 9993 with a minimum grade of S

Restriction(s): Enrollment is limited to Graduate level students.

PTH 9995 Candidate Maintenance Status: Doctoral Dissertation Research and Direction Cr. 0

Offered Yearly.

Restriction(s): Enrollment is limited to Graduate level students.

Course Material Fees: \$370.26

Repeatable for 0 Credits

PYC - PSYCHIATRY

PYC 6050 Biology of the Eye Cr. 3

Introduction to biology of eye structure/function, and to causes and clinical treatments of eye-related disorders and diseases. Offered Yearly.

Restriction(s): Enrollment is limited to Undergraduate level students.

Course Material Fees: \$25

Equivalent: ANA 6050, BIO 6055

PYC 7010 Neurobiology I Cr. 3

First part of a two-semester in-depth study of nerve cells, their organization into functional circuits and their mediation of normal and aberrant behaviors. Offered Fall.

Restriction(s): Enrollment is limited to Graduate level students.

PYC 7140 Fundamentals of Neuroimaging Cr. 3

Overview of methods: PET, EEG/ERP/TMS, fundamentals of MR, structural MRI, functional MR, MR spectroscopy and DTI. Review of the application of these methods in studying disorders of the nervous system. Offered Winter.

Restriction(s): Enrollment is limited to Graduate level students.

PYC 7150 Fundamentals of Neuropsychiatric Disorders Cr. 3

Overview of pathophysiology, clinical manifestations, and treatment of major neuropsychiatric disorders. Offered Fall.

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students in the School of Medicine.

PYC 7320 MR Imaging of Neurovascular Disease Cr. 3

Recent advances in MRI technology applied to human brain vascular diseases. Methods include: 3D anatomical imaging, diffusion tensor imaging, functional brain imaging, perfusion imaging, and susceptibility weighted imaging. Offered Every Other Fall.

Restriction(s): Enrollment is limited to Graduate level students.

Equivalent: BME 7720

PYC 7500 Advanced Topics in Neuroscience Cr. 1-6

Topics offered each semester in one-credit modules, relevant to ongoing research in the degree program. Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students.

Repeatable for 9 Credits

PYC 7515 Advanced Topics: Imaging, Neurodevelopment and Psychiatric Disorders Cr. 3

Advanced introduction to imaging neurodevelopment based on anatomical, biochemical and functional studies; focus on abnormal development of psychiatric disorders. Offered Every Other Winter.

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students in a Doctor of Philosophy degree.

PYC 7890 Research Seminar Cr. 1

Presentations by clinical and basic research staff and by the program's graduate students. Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students.

Repeatable for 8 Credits

PYC 7950 Psychology/Psychiatry Internship Cr. 3

Development of psychotherapy and psychological assessment skills, based on psychological theory and research. Training program is customized for each pre-doctoral intern, based on training needs and career objectives. Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students.

PYC 7990 Directed Study Cr. 1-6

Independent study under the guidance of an advisor, including complete review of a problem area immediately relevant to basic or clinical neuroscience. Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students.

Repeatable for 10 Credits

PYC 7996 Research Problems Cr. 3

Directed laboratory rotation for graduate students in the translational neuroscience program. Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students.

Repeatable for 9 Credits

PYC 7998 Clinical Neuroscience Rotation Cr. 3,6

Neuroscience trainees become familiar with clinical issues in their chosen area of study; transfer of basic science knowledge to clinical application. Offered Every Term.

Prerequisites: PYC 7150 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

Repeatable for 6 Credits

PYC 8999 Master's Thesis Research and Direction Cr. 1-8

Preparation in writing of a scholarly proposal and thesis. Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students with a class of Candidate Masters.

Repeatable for 8 Credits

PYC 9990 Pre-Doctoral Candidacy Research Cr. 1-8

Research in preparation for doctoral dissertation. Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students.

Repeatable for 12 Credits

PYC 9991 Doctoral Candidate Status I: Dissertation Research and Direction Cr. 7.5

Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students.

PYC 9992 Doctoral Candidate Status II: Dissertation Research and Direction Cr. 7.5

Offered Every Term.

Prerequisite: PYC 9991 with a minimum grade of S

Restriction(s): Enrollment is limited to Graduate level students.

PYC 9993 Doctoral Candidate Status III: Dissertation Research and Direction Cr. 7.5

Offered Every Term.

Prerequisite: PYC 9992 with a minimum grade of S

Restriction(s): Enrollment is limited to Graduate level students.

PYC 9994 Doctoral Candidate Status IV: Dissertation Research and Direction Cr. 7.5

Offered Every Term.

Prerequisite: PYC 9993 with a minimum grade of S

Restriction(s): Enrollment is limited to Graduate level students.

PYC 9995 Candidate Maintenance Status: Doctoral Dissertation Research and Direction Cr. 0

Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students.

Course Material Fees: \$370.26

Repeatable for 0 Credits

RAS - RADIOLOGIST ASSISTANT STUDIES

RAS 7000 Physics of Imaging Cr. 4

Survey course for the advanced practitioner in graduate radiologic sciences. Offered Spring/Summer.

Prerequisite: RAS 7610 with a minimum grade of C and RAS 7070 with a minimum grade of C and RAS 7320 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students in the MS in Radiologist Asst Studies program.

RAS 7070 Radiation Safety Cr. 2

Operational safety and imaging of fluoroscopic equipment in the clinical setting; for advanced practitioners in graduate radiologic sciences. Offered Spring/Summer.

Prerequisite: RAS 7610 with a minimum grade of C and RAS 7000 with a minimum grade of C and RAS 7320 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students in the MS in Radiologist Asst Studies program.

RAS 7320 Radiologist Mentored Experience II Cr. 5

Continuation of RAS 7310. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students in the Pharmacy and Health Sciences.

RAS 7330 Radiologist Mentored Experience III Cr. 5

Continuation of RAS 7320. Offered Fall.

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students in the Pharmacy and Health Sciences.

RAS 7400 Patient Assessment for RAs Cr. 3

Physical examination and assessment. Offered Spring/Summer.

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students in the Pharmacy and Health Sciences.

RAS 7410 Clinical Correlation of Disease Processes Cr. 1

Collection of pertinent data about patient and procedure. Offered Fall.

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students in the Pharmacy and Health Sciences.

RAS 7610 Radiologic Procedures I Cr. 1

Radiologic imaging procedural fundamentals.

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students in the Pharmacy and Health Sciences.

RAS 7620 Radiologic Procedures II Cr. 1

Advanced radiologic procedures for the radiologist assistant. Offered Fall.

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students in the Pharmacy and Health Sciences.

RCI - REHABILITATION COUNSELING AND COMMUNITY INCLUSION

RCI 7110 Techniques of Rehabilitation Counseling Cr. 3

Techniques and process of counseling of counseling including: facilitative relationships, case conceptualization, goal setting, intervention, and outcome evaluation. Development of skills with respect to psychological, social, and vocational implications of disabilities on adjustment. Offered Yearly.

Prerequisites: CED 6080 with a minimum grade of C and CED 7000 with a minimum grade of C and CED 7001 with a minimum grade of C and CED 7080 with a minimum grade of C and RCI 7410 with a minimum grade of C and RCI 7420 with a minimum grade of C and RCI 7450 with a minimum grade of C and RCI 7480 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students; enrollment is limited to students with a major, minor, or concentration in Rehab Couns & Comm Inclusion.

Equivalent: CED 7040

RCI 7120 Assessment for Counselors and Rehabilitation Cr. 3

Overview of psychological, educational and vocational assessment techniques, including specific assessment applications such as clinical assessment, communicating assessment results, assessment with diverse populations, and ethical issues. Offered Winter.

Prerequisites: RCI 7410 with a minimum grade of C, RCI 7420 with a minimum grade of C, and RCI 7480 with a minimum grade of C or CED 6070 with a minimum grade of C and CED 6080 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

Course Material Fees: \$52

Equivalent: CED 7120

RCI 7150 Rehabilitation Counseling Professional Roles Cr. 3

Roles of rehabilitation professional as counselor, consultant, case manager and advocate. Case analysis, service applications and recording and reporting from perspectives of various professional rehabilitation counseling roles. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate level students.

RCI 7410 Foundations of Rehabilitation Counseling Cr. 3

Comprehensive introduction to rehabilitation counseling as a human service field. Values philosophy, history and legislation of rehabilitation; community inclusion and support; and professional issues. Offered Fall.

Restriction(s): Enrollment is limited to Graduate level students.

RCI 7420 Medical Aspects of Disability Cr. 3

Types of disabilities, treatment strategies, impact of disability on physical and vocational functioning of persons with disabilities. Offered Winter.

Prerequisite: RCI 7410 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

RCI 7430 Counseling Practicum Cr. 4

Supervised experience in individual and group interactions, assessment and appraisal, diagnosis and treatment planning, other professional counseling activities; use of variety of counseling and rehabilitation resources. Students attend seminars for supervision and discussion of professional issues in interdisciplinary context (minimum of 100 clock hours). Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students.

Course Material Fees: \$25

Equivalent: AED 7380, CED 7150

RCI 7450 Employment for Persons with Disabilities Cr. 3

Design and implementation of effective methods to help persons with disabilities obtain and maintain employment. Marketing and job placement skills, job-seeking skills training, job clubs, job adaptation, supported and transitional employment, employer assistance and training, and follow-along services. Offered Winter.

Prerequisite: RCI 7100 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

RCI 7460 Counseling Internship Cr. 1-6

Supervised field experience providing counseling or rehabilitation services at a cooperating agency or institution under supervision of approved professional. Students complete a minimum of 600 clock hours. Offered Yearly.

Prerequisite: RCI 7430 with a minimum grade of B

Restriction(s): Enrollment is limited to Graduate level students.

Equivalent: AED 7890, CED 7020

Repeatable for 6 Credits

RCI 7470 Family and Community Support for Inclusion Cr. 3

Services that facilitate full participation of persons with disabilities in the life of their families and communities. Persons with disabilities in context of: families, family dynamics, cultural diversity, family structure, family support. Community support, supported independence, independent living centers, therapeutic recreation and related programs. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate level students.

RCI 7480 Psychosocial Aspects of Disability Cr. 3

Psychological, social and cultural aspects of adjustment and adaptation to a variety of disabling conditions. Theoretical and practical issues relating to various types of physical, neurological, sensory, psychiatric disabilities. Offered Winter.

Prerequisite: RCI 7410 with a minimum grade of C and RCI 7420 with a minimum grade of C and CED 6080 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

RCI 7510 Special Topics in Rehabilitation Counseling Cr. 1-3

Emerging and contemporary issues of selected disabilities and intervention techniques aimed at improving the lives of people with disabilities. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate level students.

Repeatable for 9 Credits

RCI 7515 Rehabilitation Treatment Planning and Intervention for People with Psychiatric Disabilities Cr. 2

Knowledge and skills in treatment planning and intervention with people who have psychiatric disabilities. Rehabilitation assessment, rehabilitation plan development, employment strategies, and life care planning. Offered Fall.

Prerequisites: RCI 7410 with a minimum grade of B- and RCI 7510 with a minimum grade of B-

Restriction(s): Enrollment is limited to Graduate level students.

RDT - RADIOLOGIC TECHNOLOGY

RDT 3090 Directed Study Cr. 1

Independent study of medical terminology and related vocabulary. Instructor-directed online course. Offered Fall.

Prerequisite: RDT 3100 with a minimum grade of C

Restriction(s): Enrollment limited to students in the BS in Radiologic Technology program.

RDT 3100 Introduction to Radiologic Technology Cr. 2

Introduction to radiology and hospital procedures. Role of radiographer as a member of the health care team. Offered Spring/Summer.

Restriction(s): Enrollment limited to students in the BS in Radiologic Technology program.

RDT 3200 Radiation Biology and Advanced Protection Cr. 3

Radiation protection procedures; radiation interaction with matter and dosage problem solving. Offered Spring/Summer.

Restriction(s): Enrollment limited to students in the BS in Radiologic Technology program.

RDT 3300 Radiographic Procedures I Cr. 3

Instruction and practical experience in procedures of positioning for the skeletal system with correlation to related anatomy in medical images. Offered Fall.

Prerequisite: RDT 3100 with a minimum grade of C

Restriction(s): Enrollment limited to students in the BS in Radiologic Technology program.

RDT 3400 Clinical Education I Cr. 6

Clinical course. Student participates in supervised practice of radiographic procedures, studied in conjunction with didactic coursework. Offered Spring/Summer.

Restriction(s): Enrollment limited to students in the BS in Radiologic Technology program.

Course Material Fees: \$55

RDT 3500 Patient Care Cr. 3

Practical application of patient handling: patient assessment, implication of medications and contrast media. BLS certification. Offered Winter.

Prerequisite: RDT 3090 with a minimum grade of C and RDT 3100 with a minimum grade of C and RDT 6500 with a minimum grade of C

Restriction(s): Enrollment limited to students in the BS in Radiologic Technology program.

Course Material Fees: \$35

RDT 3600 Clinical Education II Cr. 6

Application of didactic theory in practice on patients/clients under supervision of qualified technologists in a clinical setting. Offered Fall.

Prerequisite: RDT 3400 with a minimum grade of C

Restriction(s): Enrollment limited to students in the BS in Radiologic Technology program.

Course Material Fees: \$50

RDT 3700 Radiographic Procedures II Cr. 3

Continuation of RDT 3300. Additional advanced procedures, including skull, mammography, and gastrointestinal studies. Offered Winter.

Prerequisite: RDT 3300 with a minimum grade of C

Restriction(s): Enrollment limited to students in the BS in Radiologic Technology program.

Course Material Fees: \$35

RDT 3800 Cross-Sectional Anatomy Cr. 3

Presentation of anatomical structures in sectional format, as encountered in computed tomography or magnetic resonance imaging. Offered Spring/Summer.

Prerequisite: RDT 3300 with a minimum grade of C and RDT 3700 with a minimum grade of C

Restriction(s): Enrollment limited to students in the BS in Radiologic Technology program.

RDT 3900 Clinical Education III Cr. 6

Minimally supervised clinical experience. Skills practice to proficiency level; additional complex skills. Offered Winter.

Prerequisite: RDT 3600 with a minimum grade of C

Restriction(s): Enrollment limited to students in the BS in Radiologic Technology program.

RDT 4100 Radiographic Quality/Exposure Cr. 3

Practical application of technical exposure factor formulation; imaging systems and subsequent effects of equipment manipulation of images. Offered Fall.

Prerequisite: RDT 3200 with a minimum grade of C and RDT 3300 with a minimum grade of C and RDT 3700 with a minimum grade of C

Restriction(s): Enrollment limited to students in the BS in Radiologic Technology program.

Course Material Fees: \$35

RDT 4200 Radiation Physics and Circuitry Cr. 3

Radiation physics; tubes and circuits of radiographic equipment. Offered Fall.

Prerequisite: RDT 3200 with a minimum grade of C and RDT 3500 with a minimum grade of C

Restriction(s): Enrollment limited to students in the BS in Radiologic Technology program.

RDT 4300 Clinical Education IV Cr. 6

Continuation of RDT 3900. Offered Spring/Summer.

Prerequisite: RDT 3900 with a minimum grade of C

Restriction(s): Enrollment limited to students in the BS in Radiologic Technology program.

Course Material Fees: \$30

RDT 4400 Radiographic Pathology Cr. 3

Disease process and how they manifest in imaging modalities.

Clarification of modality preference. Offered Winter.

Prerequisite: RDT 3500 with a minimum grade of C and RDT 4500 with a minimum grade of C

Restriction(s): Enrollment limited to students in the BS in Radiologic Technology program.

RDT 4500 Clinical Education V Cr. 6

Supervised clinical experience in performing radiographic procedures on patients in clinical setting. Evaluation of outcomes; application of knowledge at a progressive level. Offered Fall.

Prerequisite: RDT 4300 with a minimum grade of C

Restriction(s): Enrollment limited to students in the BS in Radiologic Technology program.

Course Material Fees: \$75

RDT 4600 Radiology Seminar Cr. 1

Introduction to imaging modalities beyond the scope and practice of the general radiographer; emphasis on interventional procedures. Offered Winter.

Prerequisite: RDT 3500 with a minimum grade of C and RDT 3700 with a minimum grade of C and RDT 4100 with a minimum grade of C

Restriction(s): Enrollment limited to students in the BS in Radiologic Technology program.

RDT 4700 Clinical Education VI Cr. 6

Continuation of RDT 4500. Offered Winter.

Prerequisite: RDT 4500 with a minimum grade of C

Restriction(s): Enrollment limited to students in the BS in Radiologic Technology program.

RDT 4800 Independent Study Cr. 1

Satisfies General Education Requirement: Writing Intensive Competency
Independent research in radiology. Offered Fall.

Prerequisite: RDT 3090 with a minimum grade of C and RDT 3500 with a minimum grade of C and RDT 3700 with a minimum grade of C

Restriction(s): Enrollment limited to students in the BS in Radiologic Technology program.

RDT 4900 Jurisprudence for Radiographers Cr. 3

Ethical and legal case studies; research and discussion correlated to philosophical theory and accepted best law practice for general situations in health care and those specific to radiography. Offered Winter.

Prerequisite: PHI 2320 with a minimum grade of C and RDT 3500 with a minimum grade of C

Restriction(s): Enrollment limited to students in the BS in Radiologic Technology program.

RDT 6500 Pharmacology Cr. 2

Effects of drug distribution, absorption and excretion as pertaining to physical therapy. Major drug categories, OTC, and nutritional supplements, pertinent to acute and chronic responses to physical therapy; indications, mechanisms, effects. Offered Fall.

Prerequisite: RDT 3100 with a minimum grade of C

Restriction(s): Enrollment limited to students in the BS in Radiologic Technology program.

RLL - READING, LANGUAGE AND LITERATURE EDUCATION

RLL 6121 Teaching Reading in the Content Areas: Grades 6-12 Cr. 3

Teaching reading across all content areas with particular attention to readers with special needs. Offered Every Term.

Restriction(s): Enrollment limited to students in the College of Education.

RLL 6400 Practicum in Developmental Reading Cr. 1-4

Identifying and solving field problems in developmental reading, management of reading instruction, the importance of reading in the content areas. Offered Every Term.

Restriction(s): Enrollment limited to students in the College of Education.

Repeatable for 4 Credits

RLL 6700 Second Language Literacy Development: K-12 Cr. 3

Examination of theories, organizations and instructional strategies involved in second language literacy development, and their applications in the classroom. Offered Fall, Spring/Summer.

Prerequisite: LED 6520 with a minimum grade of C-

RLL 6801 Assessment and Differentiated Instruction for Diverse Learners: Pre-K-8 Cr. 3

Assessment of literacy competencies of diverse learners; use of assessments to plan and implement differentiated instruction in grades PreK-8. Implementation with students in field component; and evaluation. Offered Every Term.

Restriction(s): Enrollment limited to students in the College of Education.

RLL 6802 Assessment and Differentiated Instruction for Diverse Learners: 6-12 Cr. 3

Assessment of literacy competencies of diverse learners; use of assessments to plan and implement differentiated instruction in grades 6-12. Implementation with students in field component; and evaluation. Offered Every Term.

Restriction(s): Enrollment limited to students in the College of Education.

RLL 7100 Emergent Literacy Cr. 3

Variety of theories, organization and instructional strategies involved in the beginning stages of literacy; their application to the classroom. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate level students.

RLL 7200 Comprehension Cr. 3

Models of comprehension, factors that affect comprehension, instructional methods, reading/writing connection, evaluation (pre-K to adult). Offered Yearly.

Prerequisites: RLL 7100 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

RLL 7300 Literacy Across the Curriculum Cr. 3

Theoretical bases for teaching literacy across the curriculum; strategies for organization and instruction. Action research as a tool for learning. Offered Yearly.

Prerequisites: RLL 7100 with a minimum grade of C and RLL 7200 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

RLL 7350 Organization and Supervision of Literacy Programs Cr. 3

Factors necessary to organize and supervise literacy programs. Topics include: curriculum development for a variety of needs, evaluation of programs, resources and material; staff development; communicating with parents, other professionals, and the public. Offered Spring/Summer.

Prerequisites: RLL 7100 with a minimum grade of C and RLL 7200 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

RLL 7400 Practicum and Seminar in Evaluation and Instruction Cr. 3

Evaluation and literacy competencies of learners, methods of instruction, use of portfolios and reports to document progress; applied during supervised tutoring. Offered Yearly.

Prerequisites: RLL 7100 with a minimum grade of C and RLL 7200 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

Repeatable for 6 Credits

RLL 7500 Theoretical Foundations for Literacy Cr. 3

Implications of theories from sociology, psychology, linguistics, semiotics and related fields, for the development of literacy. Offered Yearly.

Prerequisites: RLL 7100 with a minimum grade of C and RLL 7200 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

RLL 7600 Current Developments in Literacy Education Cr. 1-6

Topics of current interest; review of literature, discussion of educational implications. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate level students.

Repeatable for 6 Credits

RLL 7720 Survey and Analysis of Current Literature for Children: PS-Grade 3 Cr. 3

Intensive examination of books appropriate for preprimary and primary school children. Analysis of the literary and extra-literary factors that affect the young child's experiences with fiction, non-fiction, and poetry. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate level students.

Equivalent: INF 6510

RLL 7740 Survey and Analysis of Literature for Older Children: Grades 4-8 Cr. 3

Intensive examination of books appropriate for children in grades four through eight. Analysis of literary and extra-literary factors affecting the older child's experiences with fiction, non-fiction, and poetry. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate level students.

Equivalent: INF 6520

RLL 7750 Survey and Analysis of Current Children's Literature: Preschool - Grade 8 Cr. 3

Intensive examination of books for children in preschool through eighth grade. Analysis of literary and extra-literary factors affecting the child's experiences with fiction, non-fiction and poetry. Offered Intermittently.

Restriction(s): Enrollment is limited to Graduate level students.

Equivalent: RLL 7720, RLL 7740

RLL 7780 Storytelling Cr. 3

Selection of appropriate literature and materials for story performance; guided practice in selection and presentation of literature for oral communication by reading aloud, mediated storytelling and storytelling. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate level students.

RLL 7800 Writing Development and Instruction Cr. 3

Key theories on how students learn to write; key stages of the writing process, authoring cycle, and special challenges students encounter with different genres. Strategies for developing various aspects of the writing process and creation of different genres. Offered Intermittently.

Restriction(s): Enrollment is limited to Graduate level students.

RLL 7820 Responding to Texts: Theory and Practice Cr. 3

Roles of reader, text, and teacher in connection with reader-response theories such as transmission, transaction and transformation theories; practical strategies for literary engagement and response. Offered Intermittently.

Restriction(s): Enrollment is limited to Graduate level students.

RLL 8600 Internship in Research and Teaching Cr. 3-6

Experiences in college-level teaching and/or research through internships teaching college courses and/or collaborative research with experienced faculty. Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students.

Repeatable for 6 Credits

RLL 8700 Research Applications in Literacy Cr. 3

Research designs, analysis strategies, relevant statistics useful in conducting a wide variety of contemporary literacy-related research. Offered Yearly.

Prerequisite: EER 7630 with a minimum grade of C and EER 7640 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

RLL 8800 Seminar in Theory and Research in Literacy I: Foundational Theory and Research Cr. 3

Foundational theories and research in literacy and related fields such as psychology, sociology, literary criticism, linguistics, and semiotics that have shaped literacy theory, research, and instruction. Includes behavioral, cognitive/metacognitive, critical and constructivist theories and research. Offered Every Other Year.

Restriction(s): Enrollment is limited to Graduate level students.

RLL 8810 Seminar in Theory and Research in Literacy II: Diversity, Contexts, and Communities Cr. 3

Examines issues of language, literacy, and culture in reading and literacy learning from preschool through adolescence with particular focus on diverse learners and linguistic diversity. Topics include emergent literacy, adolescence and youth culture, oral and written language, and the role of language in the home and community. Offered Every Other Year.

Restriction(s): Enrollment is limited to Graduate level students.

RLL 8830 Current Issues and Research in Literacy Cr. 3

Research and theories in literacy and related fields; their potential to impact instruction, society, and further research. Students read, discuss, and critique current research and consider the implications for theory, literacy instruction, and further research. Offered Every Other Year.

Restriction(s): Enrollment is limited to Graduate level students.

RLL 8840 Practicum in Supervision and Administration of Programs in Literacy Development Cr. 3

Understanding the supervision and administration of literacy programs through investigation, experience supervising a literacy center in conjunction with faculty, and working with master's-level students who are tutors in that program. Offered Every Term.

Prerequisite: RLL 7400 with a minimum grade of C or RDG 7400 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

ROC - RADIATION ONCOLOGY

ROC 5010 Introduction to Radiological Physics Cr. 4

Nature of radiation and its interaction with matter. Theory of dosimetry and instrumentation for detection of radiation. Principles of radiation protection. Applications of radiation in radiology and related problems. Offered for graduate credit only. Offered Fall.

Restriction(s): Enrollment is limited to Graduate level students.

ROC 5990 Directed Study in Medical Sciences Cr. 1-4

Introduction to modern methodology of cancer research. Students of the Division of Cancer Biology of the Department of Radiation Oncology conduct research projects under direction of research scientists. Areas of research include: molecular biology, enzyme purification, tumor biology, cellular biochemistry. Offered for graduate credit only. Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students.

ROC 6710 Physics in Medicine Cr. 3

Applications of physics in medicine including radioactivity; interaction of radiation in matter; x-ray, CT, MRI, ultrasound, and PET imaging; nuclear medicine; radiation oncology. Offered Winter.

ROC 7000 Imaging Physics I Cr. 4

Basic theory of medical imaging. Introduction to magnetic resonance imaging and spectroscopy, ultrasound; diagnostic radiology: radiography, fluoroscopy, CT, digital radiography, and mammography. Offered Fall.

Prerequisite: ROC 5010 (may be taken concurrently) with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

ROC 7010 Imaging Physics II: Nuclear Medicine Cr. 2

Physics of nuclear medicine, with emphasis on imaging. Offered Winter.

Prerequisite: ROC 7000 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

ROC 7020 Physics of Radiation Therapy Cr. 3

Lecture and demonstration in physics of radiation therapy. Offered Winter.

Prerequisite: ROC 5010 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

ROC 7040 Radiation Dosimetry Cr. 2

Lecture and demonstration on principles of radiation dosimetry. Dosimetry of photons, electrons, neutrons and dose from radioactive materials. Offered Winter.

Prerequisite: ROC 5010 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

ROC 7060 Applied Radiobiology in Radiological Science Cr. 2

Fractionation, oxygen enhancement ratio, characterization of neutron beams and heavy particles for radiation therapy, radiosensitivity within cell division. Offered Fall.

Prerequisite: PHY 2180 with a minimum grade of C-

Restriction(s): Enrollment is limited to Graduate level students.

ROC 7070 Radiation Safety Cr. 2

Lectures on radiation safety procedures and practices; governmental regulations on radiation safety. Offered Spring/Summer.

Prerequisite: ROC 5010 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

ROC 7080 Radiotherapy Physics Laboratory Cr. 2

Practical laboratory exercises in ionometric and solid-state dosimetry techniques, quality assurance procedures for selected radiation therapy and diagnostic radiological equipment. Offered Spring/Summer.

Prerequisite: ROC 7020 with a minimum grade of C and ROC 7040 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

ROC 7110 Treatment Planning Cr. 2

Practical aspects of radiotherapy treatment planning. Lectures and exercises in patient data acquisition and computerized treatment planning for a variety of sites with both teletherapy and brachytherapy. Offered Fall.

Prerequisite: ROC 7020 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

ROC 7120 Radionuclide Therapy Cr. 2

Development of radionuclide technology and its medical use from its discovery to the latest developments. Offered Fall.

Prerequisite: ROC 5010 with a minimum grade of C and ROC 7020 with a minimum grade of C and ROC 7040 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

ROC 7130 Nuclear Medicine Physics Laboratory Cr. 2

Laboratory experiments calibration, Q.A., etc., on isotope generators, isotope calibrators, counting systems, spectrometers, cameras, spect and PET systems, Counting statistics, spectrum analysis. Offered Spring/Summer.

Prerequisite: ROC 7010 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

ROC 7150 Radiation Oncology Anatomy and Physiology Cr. 2

Independent study course covering radiological (CT/MRI) anatomy and basic anatomy and medical terminology pertinent to radiation oncology. Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students.

ROC 7160 Advanced Topics in Medical Physics Cr. 2

Advanced imaging principles for students pursuing careers in medical physics or any other profession related to diagnostic imaging. Offered Winter.

Prerequisite: ROC 5010 with a minimum grade of C and ROC 7000 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

ROC 7170 Professional Aspects of Medical Physics Cr. 2

Provide an overview of the professional aspects of clinical radiation oncology physics. Involvement in practical aspects of clinical radiation oncology physics including analysis of quality assurance and practice quality improvement initiatives, review of regulatory and external certification requirements, etc. Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students.

ROC 7890 Seminar Cr. 1

Presentations by graduate students, staff, visitors with emphasis on topics relevant to radiation biophysics and radiological health. Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students.

ROC 7990 Directed Study Cr. 1-5

Independent study in the uses of new technologies in clinical radiology. Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students.

Repeatable for 5 Credits

ROC 7999 Essay Direction Cr. 3

Preparation of an in-depth paper on a subject in radiological physics. Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students; enrollment is limited to students with a major, minor, or concentration in Medical Physics or Radiological Physics.

ROC 8990 Special Problems in Radiation Biophysics Cr. 1-7

Independent study in advanced topics to be selected by the student in consultation with instructor. Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students; enrollment is limited to students with a major in Medical Physics or Radiological Physics.

Repeatable for 7 Credits

ROC 9990 Pre-Doctoral Candidacy Research Cr. 1-8

Research in preparation for doctoral dissertation. Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students.

Repeatable for 12 Credits

ROC 9991 Doctoral Candidate Status I: Dissertation Research and Direction Cr. 7.5

Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students.

ROC 9992 Doctoral Candidate Status II: Dissertation Research and Direction Cr. 7.5

Offered Every Term.

Prerequisite: ROC 9991

Restriction(s): Enrollment is limited to Graduate level students.

ROC 9993 Doctoral Candidate Status III: Dissertation Research and Direction Cr. 7.5

Offered Every Term.

Prerequisite: ROC 9992

Restriction(s): Enrollment is limited to Graduate level students.

ROC 9994 Doctoral Candidate Status IV: Dissertation Research and Direction Cr. 7.5

Offered Every Term.

Prerequisite: ROC 9993

Restriction(s): Enrollment is limited to Graduate level students.

ROC 9995 Candidate Maintenance Status: Doctoral Dissertation Research and Direction Cr. 0

Offered Every Term.

Prerequisite: ROC 9994

Restriction(s): Enrollment is limited to Graduate level students.

Course Material Fees: \$370.26

ROC 9996 Radiation Oncology Physics Clinical Rotation I Cr. 7.5

Prereq: DMP candidate in department and written consent of the program director. Required in Fall term of Year 3 of Professional Doctorate program. Offered for S and U grades only. Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students.

ROC 9997 Radiation Oncology Physics Clinical Rotation II Cr. 7.5

Prereq: Satisfactory completion of ROC 9996 and written consent of the program director. Required in Winter term of Year 3 of Professional Doctorate program. Offered for S and U grades only. Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students.

ROC 9998 Radiation Oncology Physics Clinical Rotation III Cr. 7.5

Prereq: Satisfactory completion of ROC 9997 and written consent of the program director. Required in Fall term of Year 4 of Professional Doctorate program. Offered for S and U grades only. Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students.

ROC 9999 Radiation Oncology Physics Clinical Rotation IV Cr. 7.5

Prereq: Satisfactory completion of ROC 9998 and written consent of the program director. Required in Winter term of Year 4 of Professional Doctorate program. Offered for S and U grades only. Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students.

RT - RADIATION THERAPY TECHNOLOGY

RT 3000 Concepts of Clinical Care Cr. 3

Procedures and ethics related to the care and examination of the radiation oncology patient. Topics include: basic pharmacology, drug administration, pain management, treatment side effects and their management. Offered Fall.

Restriction(s): Enrollment limited to students in the BS in Radiation Therapy Tech program.

Course Material Fees: \$15

RT 3010 Introductory Radiation Physics Cr. 3

Basic introduction of radiation physics including the x-ray machine, physical principles and circuitry; principles of mathematics. Offered Fall.

Restriction(s): Enrollment limited to students in the BS in Radiation Therapy Tech program.

RT 3020 Clinical Radiation Physics Cr. 3

Principles of radiation exposure; radiation producing and measuring devices; clinical application of radiation physics. Offered Winter.

Prerequisite: RT 3010 with a minimum grade of C

Restriction(s): Enrollment limited to students in the BS in Radiation Therapy Tech program.

RT 3110 Clinical Aspects of Radiation Therapy Cr. 3

Basic concepts in oncology and radiation therapy technology. Topics include: cancer statistics, neoplasia, and principles of treatment and dosage. Offered Fall.

Restriction(s): Enrollment limited to students in the BS in Radiation Therapy Tech program.

RT 3140 Topographic Anatomy and Medical Imaging Cr. 3

Procedures for imaging human structure and their relevance to radiation therapy; topographic and cross sectional anatomy, identification of anatomic structures as demonstrated through various imaging modalities and human anatomy lab sessions; fundamentals of radiographic exposure techniques and film processing. Offered Winter.

Restriction(s): Enrollment limited to students in the BS in Radiation Therapy Tech program.

Course Material Fees: \$10

RT 3200 Therapeutic Interactions in Oncology Care Cr. 2

Issues related to professional interaction with oncology patients. Impact of cancer diagnosis on patient and family; subsequent role of radiation therapist. Approaches to effective communication. Offered Spring/Summer.

Restriction(s): Enrollment limited to students in the BS in Radiation Therapy Tech program.

Course Material Fees: \$5

RT 3310 Clinical Practicum I Cr. 4

Introduction to clinical radiation therapy. Closely supervised patient-related activities. Emphasis on development of interpersonal communication skills in the clinical setting; medical terminology. Offered Spring/Summer.

Restriction(s): Enrollment limited to students in the BS in Radiation Therapy Tech program.

Course Material Fees: \$59

RT 3320 Clinical Practicum II Cr. 4

Closely supervised practice in the delivery of prescribed doses of radiation utilizing common radiation equipment. Observation and performance of clinical care procedures; Development of communication skills in patient/therapist relationships. Correlation of medical imaging techniques to diagnostic workup and treatment planning. Completion of clinical competency requirements. Offered Winter.

Prerequisite: RT 3310 with a minimum grade of C

Restriction(s): Enrollment limited to students in the BS in Radiation Therapy Tech program.

RT 3330 Clinical Practicum III Cr. 4

Expanded supervised practice in the delivery of radiation therapy treatments. Submission of essay on radiation oncology topic. Completion of clinical competency requirements. Offered Spring/Summer.

Prerequisite: RT 3320 with a minimum grade of C

Restriction(s): Enrollment limited to students in the BS in Radiation Therapy Tech program.

Course Material Fees: \$65

RT 4110 Clinical Radiation Oncology Cr. 4

General presentation of malignant conditions, their etiology and methods of treatment; specific radiation treatment methodology including technical parameters of field size and direction, dosage, blocking, and patient positioning. Offered Fall.

Restriction(s): Enrollment limited to students in the BS in Radiation Therapy Tech program.

Course Material Fees: \$15

RT 4120 Basic Clinical Dosimetry Cr. 4

Basic concepts of clinical dosimetry and treatment planning; various external beam techniques, depth dose data, and summation of isodose curves. Offered Winter.

Prerequisite: RT 4110 with a minimum grade of C

Restriction(s): Enrollment limited to students in the BS in Radiation Therapy Tech program.

Course Material Fees: \$10

RT 4140 Oncologic Pathology Cr. 2

Basic principles of neoplasia, including types of growth, causative factors, biological behavior, and significance of staging procedures. Pathology of radiation injury. Offered Fall.

Restriction(s): Enrollment limited to students in the BS in Radiation Therapy Tech program.

Course Material Fees: \$10

RT 4150 Radiobiology of Radiation Oncology Cr. 2

Biological effects of ionizing radiation on living tissue. Cell and tissue radiosensitivity; radiation syndromes and related effects. Basic radiobiological principles of radiation oncology and radiation protection. Offered Winter.

Restriction(s): Enrollment limited to students in the BS in Radiation Therapy Tech program.

RT 4220 Radionuclide Physics Cr. 3

Natural radioactivity; isotopes and nuclear structure; techniques of radiation measurement. The clinical use of radionuclides. Radiation safety. Offered Fall.

Prerequisite: RT 3020 with a minimum grade of C

Restriction(s): Enrollment limited to students in the BS in Radiation Therapy Tech program.

RT 4240 Radiation Therapy Technology Seminar Cr. 3

Issues relevant to the practice and profession of radiation therapy technology explored through group discussion and case studies. Topics include: psychosocial, cultural, economic, physical, and educational factors which affect the patient; professional, administrative, legal, and bioethical issues which influence professional practice. Offered Winter.

Restriction(s): Enrollment limited to students in the BS in Radiation Therapy Tech program.

Course Material Fees: \$15

RT 4300 Quality Assurance Cr. 2

Principles and application of a comprehensive quality assurance program, addressing general clinical and physics factors. Contents include: tasks to be performed, with their frequency and acceptable limits; model implementation program; and legal implications. Lecture and laboratory settings. Offered Spring/Summer.

Restriction(s): Enrollment limited to students in the BS in Radiation Therapy Tech program.

Course Material Fees: \$10

RT 4350 Clinical Practicum IV Cr. 4

Continued supervised practice in a wide spectrum of clinical activities. Submission of a critical bibliography from current literature of radiation therapy, cancer management and related areas. Completion of clinical competency requirements. Offered Fall.

Prerequisite: RT 3330 with a minimum grade of C

Restriction(s): Enrollment limited to students in the BS in Radiation Therapy Tech program.

Course Material Fees: \$59

RT 4360 Clinical Practicum V Cr. 4

Satisfies General Education Requirement: Writing Intensive Competency
Continued clinical practice under limited supervision. Submission of essay on radiation oncology topic. Completion of clinical competency requirements. Satisfies the University General Education Writing Intensive Course in the Major requirement. Offered Winter.

Prerequisite: RT 4350 with a minimum grade of C

Restriction(s): Enrollment limited to students in the BS in Radiation Therapy Tech program.

RT 4370 Clinical Practicum VI Cr. 4

Continued clinical practice under minimal supervision. Practice of procedures related to the development of various treatment plans and methods of treatment planning. Submission of report on quality assurance activities. Completion of clinical competency requirements. Offered Spring/Summer.

Prerequisite: RT 4360 with a minimum grade of C

Restriction(s): Enrollment limited to students in the BS in Radiation Therapy Tech program.

Course Material Fees: \$20

RT 5650 Pathophysiology for Health Sciences Cr. 3

Fundamental knowledge of the nature of disease for the health sciences student; physiologic and morphologic changes accompanying disease processes; mechanisms of repair and recovery. Offered Winter.

Equivalent: OT 5650, PT 5650

RT 5990 Directed Study in Radiation Therapy Technology Cr. 1-5

Production of a paper, written assignment, or presentation to develop critical thinking, research, writing and presentation skills. Focus on career options within the field. Offered Every Term.

Restriction(s): Enrollment limited to students in the BS in Radiation Therapy Tech program.

Repeatable for 5 Credits

RUS - RUSSIAN

RUS 1010 Elementary Russian I Cr. 4

Development of practical skills in speaking, understanding, reading, and writing contemporary Russian. Offered Fall.

Course Material Fees: \$5

RUS 1020 Elementary Russian II Cr. 4

Continuing development of the four skills in contemporary Russian. Offered Winter.

Prerequisites: RUS 1010 with a minimum grade of D-

Course Material Fees: \$5

RUS 2010 Intermediate Russian I Cr. 4

Satisfies General Education Requirement: Foreign Culture, Global Learning Inquiry

Continuation of RUS 1020 with emphasis on developing speaking and reading skills. Offered Fall.

Prerequisites: RUS 1020 with a minimum grade of D-

Course Material Fees: \$5

RUS 2020 Intermediate Russian II Cr. 4

Objectives begun in RUS 2010; at more advanced level. Offered Winter.

Prerequisites: RUS 2010 with a minimum grade of D-

Course Material Fees: \$5

RUS 2030 Russian Conversation Cr. 1

Development of Russian oral language skills through intensive speaking and listening practice. Offered Fall, Winter.

Prerequisites: RUS 2020 with a minimum grade of D-

RUS 2710 Introduction to Russian Culture Cr. 3

Satisfies General Education Requirement: Civ and Societies (CLAS only), Foreign Culture, Global Learning Inquiry

Survey of Russian culture from the tenth century to the present day.

Introduction to Russian history, art, architecture, literature, music, religious practices, intellectual thought, and cuisine, as well as various aspects of daily life from the Tsarist period to the present day. Offered Every Term.

RUS 2991 Understanding the Fairy Tale Cr. 3

Satisfies General Education Requirement: Cultural Inquiry, Philosophy Letters

Introduction to the interdisciplinary context of major Russian fairy tales, exploring the different types of traditional Russian fairy tales, as outlined by Vladimir Propp, as well as the evolution of these fairy tales, emphasizing their transformation from oral and literary form into film, animation, opera, ballet, art, sculpture, and music. The course will also examine contemporary literary texts based on fairy tale motifs. All lectures and reading in English. Offered Fall, Winter.

RUS 3010 Intermediate-Advanced Russian I Cr. 4

Further development of skills; taught in two tracks at fifth and seventh semester levels. Offered Fall.

Prerequisites: RUS 2020 with a minimum grade of D-

Repeatable for 8 Credits

RUS 3020 Intermediate-Advanced Russian II Cr. 4

Further development of skills; taught in two tracks at sixth and eighth semester levels. Offered Winter.

Prerequisites: RUS 2020 with a minimum grade of D-

Repeatable for 8 Credits

RUS 3050 Russian Practicum Cr. 3

Internship with local Russian businesses and non-profit organizations to enable students to use Russian in real-life settings and learn about Russian culture first-hand. Offered Fall, Winter.

Prerequisites: RUS 3010 with a minimum grade of D-

Repeatable for 9 Credits

RUS 3070 Russian Listening Comprehension II Cr. 2

Online course. Students view Russian videos and listen to audiotexts of fables and poetry, do exercises designed to develop their listening comprehension and expand their Russian vocabulary, and take quizzes and exams online. Offered Fall, Winter.

Prerequisites: RUS 3010 with a minimum grade of D-

Restriction(s): Enrollment is limited to Undergraduate level students.

RUS 3250 Reading Russian Cr. 3

Survey of Russian Grammar and basic vocabulary to develop reading skill. Offered Yearly.

Restriction(s): Enrollment is limited to Undergraduate level students.

RUS 3410 New Soil, Old Roots: The Immigrant Experience Cr. 3

Satisfies General Education Requirement: Civ and Societies (CLAS only), Diversity Equity Incl Inquiry, Foreign Culture, Global Learning Inquiry
Armenian, German, Jewish, Polish, Russian and Ukrainian immigration to the United States, its effects on the cultures (language, literature, religion, politics, music, art and theatre) of these ethnic groups and its influence upon American culture. Offered Fall.

Equivalent: ARM 3410, GER 3410, POL 3410, SLA 3410

RUS 3600 Nineteenth Century Russian Literature Cr. 3

Satisfies General Education Requirement: Cultural Inquiry, Philosophy Letters

Major Russian writers, including Pushkin, Dostoevsky, Tolstoy, Chekhov, and others. How literature reflects and grows out of history; how culture is affected by writers and poets. Taught in English; readings in English. Offered Fall.

RUS 3650 Russian Literature Since 1900 Cr. 3

Satisfies General Education Requirement: Cultural Inquiry, Philosophy Letters

Twentieth century Russian literature as it explores the universal questions of love, death, rebirth, spirituality, and despair against a background of war, revolution, political oppression and economic collapse. Close analysis of major works of prose and poetry as well as literary currents such as Russian modernism, Socialist Realism, and post-modernism. Taught in English; readings in English. Offered Every Other Year.

RUS 3700 The Changing Face of Europe Cr. 1-2

Special topics relating to Central, Eastern and Western Europe. Offered Intermittently.

Equivalent: GER 3700, POL 3700, SLA 3700

RUS 3810 Topics in Slavic Studies Cr. 3

Special topics relating to Slavic languages, literatures and cultures, such as drama, the Gulag, and contemporary culture. Offered Yearly.

Equivalent: POL 3800, SLA 3800

Repeatable for 9 Credits

RUS 3990 Directed Study Cr. 1-3

For students desiring additional work in the language at the intermediate level; for programs of work not included in scheduled courses, either in language or literature. Offered Every Term.

Prerequisites: RUS 2010 with a minimum grade of D-

Repeatable for 6 Credits

RUS 5600 Nineteenth Century Russian Literature Cr. 3-4

For advanced undergraduate and graduate students interested in Russian literature. Major nineteenth-century authors: Pushkin, Dostoevsky, Tolstoy, Chekhov, and others. Close readings of works introduce traditions and thematic concerns within historical and socio-cultural contexts; relevant intellectual, religious, political factors. Taught in English; readings in English. Offered Fall.

RUS 5650 Russian Literature Since 1900 Cr. 3-4

For advanced undergraduate and graduate students interested in Russian literature. Twentieth century Russian literature as it explores the universal questions of love, death, rebirth, spirituality, and despair against a background of war, revolution, political oppression and economic collapse. Close analysis of major works of prose and poetry as well as literary currents such as Russian modernism, Socialist Realism, and post-modernism. Taught in English; readings in English. Offered Every Other Year.

RUS 5990 Directed Study Cr. 1-3

For students who wish credit for program of work not included in regularly scheduled courses, either in language or in literature. Knowledge of Russian required. Offered Every Term.

Repeatable for 12 Credits**RUS 5993 Writing Intensive Course in Russian Cr. 0**

STA - STATISTICS

STA 1020 Elementary Statistics Cr. 3

Satisfies General Education Requirement: Quantitative Experience Comp Descriptive statistics, correlation and regression, notions in probability, binomial and normal distributions, testing hypothesis. Offered Every Term.

STA 2210 Probability and Statistics Cr. 4

Satisfies General Education Requirement: Quantitative Experience Comp Basic probability theory (definition of probability, conditional probability, independence, random variables, expectation and variance, normal distribution, law of large numbers, central limit theorem), descriptive statistics (histograms, scatter plots, box plots, mean, variance, quantiles, empirical rule, z-scores), statistical inference (confidence intervals for mean, t-tests, chi-square tests, linear regression, analysis of variance) and data analysis. Offered Every Term.

Prerequisites: MAT 1800 with a minimum grade of C- or MAT 2010-2350 with a minimum grade of C- or MAT Permit to Reg ACT/SAT with a test score minimum of 4 or Math Permit to Reg - L1-L4 with a test score minimum of 4

STA 5030 Statistical Computing and Data Analysis Cr. 3

Computational aspect of statistics and data analysis for advanced undergraduate and beginning graduate students. Topics include descriptive statistics, probability distributions, hypothesis testing, ANOVA, linear regression and logistic regression. Data analysis by use of statistical packages such as R, SAS, Python, SPSS or Minitab. Satisfies Society of Actuaries Validation by Educational Experience (VEE) in Applied Statistics for regression component with a B- or better. Offered Yearly.

Prerequisites: MAT 2250 or MAT 2150 and MAT 2210 or STA 2210 or MAT 5700 or BE 2100 or ECO 5100 or PH 3200

STA 5800 Introduction to Mathematical Statistics Cr. 4

A one-semester course for senior undergraduate and master's degree students. Introduction to basic mathematical theory of statistics. Topics include survey sampling, estimation theory, data analysis and sample statistics, testing hypothesis, two sample cases, analysis of variance, regression analysis, Bayesian inference. Satisfies Society of Actuaries Validation by Educational Experience (VEE) in Applied Statistics for regression component with a B- or better. Offered Yearly.

Prerequisite: MAT 5700 with a minimum grade of C-

STA 5830 Applied Time Series Cr. 3

Time series models, moving average models, autoregressive models, non-stationary models, and more general models; point estimators, confidence intervals, and forecast in the time domain. Statistical analysis in the frequency domain; spectral density and periodogram. Satisfies Society of Actuaries Validation by Educational Experience (VEE) in Applied Statistics for regression component with a B- or better. Offered Every Other Year.

Prerequisites: MAT 2250 or MAT 2150 and MAT 2210 or STA 2210 or BE 2100 and ECO 5100 or PH 3200

STA 6830 Design of Experiments Cr. 3

Randomized blocks; Latin and Graeco-Latin squares; factorial designs; confounding; split plot; fractional replication; balanced incomplete blocks. Offered Intermittently.

Prerequisites: MAT 2250 or MAT 2150 and MAT 2210 or STA 2210 or BE 2100 or ECO 5100 or PH 3200

STA 6840 Linear Statistical Models Cr. 3

Multivariate linear regression models, examples; least square estimates and system of normal equations; the Gauss-Markov theorem; hypothesis testing about regression coefficients; confidence intervals and regions; prediction; model selection, stepwise regression. Analysis of variances (ANOVA). Offered Every Other Year.

Prerequisites: MAT 5800 or STA 5800

STA 7810 Advanced Statistics Theory I Cr. 3

First of two basic courses for Ph.D. students in the Mathematics Department who are interested in statistics. Topics include sample distribution theory, point and interval estimations, optimal estimates, theory of hypothesis testing, and most powerful tests. Offered Every Other Year.

Prerequisite: MAT 5610 with a minimum grade of C and MAT 5700 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.
