

**WAYNE STATE
UNIVERSITY**

**Graduate Bulletin
2019-2020**

TABLE OF CONTENTS

Graduate Bulletin	8	Administrative and Organizational Studies	91
General Information	9	Administration and Supervision (Education Specialist Certificate)	92
Academic Calendar 2019 - 2020	10	College and University Teaching (Graduate Certificate)	93
Academic Regulations	12	Educational Leadership (M.Ed.)	93
Accreditation	17	Educational Leadership and Policy Studies (Ed.D.)	94
Administration of the University	18	Educational Leadership and Policy Studies (Ph.D.)	94
Admission: Graduate School	19	Learning Design and Technology (Ed.D.)	94
Campus Life	23	Learning Design and Technology (Education Specialist Certificate)	95
Centers and Institutes	25	Learning Design and Technology (M.Ed.)	95
Computing and Information Technology Division (C&IT)	34	Learning Design and Technology (Ph.D.)	96
Degree and Certificate Requirements	35	Online Teaching (Graduate Certificate)	96
Educational Outreach	42	Kinesiology, Health and Sport Studies	97
Financial Aid	45	Adapted Physical Education (Teaching Endorsement)	98
Office of International Programs	47	Athletic Training (M.S.)	98
Records and Registration	52	Health Education (M.Ed.)	99
Student Academic Success Services	54	Kinesiology (M.Ed.)	100
Tuition and Fees	56	Kinesiology (Ph.D.)	101
University Libraries and Archives	61	Sports Administration (M.A.)	101
University Policies	63	Teacher Education	102
Mike Ilitch School of Business	66	Art Education (M.Ed.)	104
Academic Regulations for the Mike Ilitch School of Business	66	Bilingual Education (Bridge Graduate Certificate)	105
Graduate Programs	68	Curriculum and Instruction (Education Specialist Certificate)	106
Accounting (M.S.A.)	69	Curriculum and Instruction (Ph.D. and Ed.D.)	106
AGRADE - Accelerated Graduate Enrollment	70	Early Childhood Education, Infant Mental Health Dual-Title (Ph.D. Program)	107
Automotive Supply Chain Management (Executive M.S.)	72	Educational Studies (Ph.D.)	107
Business (Graduate Certificate)	73	Elementary Education Major Leading K-8 Certification (M.A.T.)	108
Business Administration (M.B.A. Program)	73	Elementary Mathematics Specialist: Advanced (Graduate Certificate)	110
Business Administration (Ph.D.)	78	Elementary Mathematics Specialist: Introductory (Graduate Certificate)	110
Business Administration and Law (M.B.A./J.D. Joint Degree)	79	English as a Second Language (Bridge Graduate Certificate)	111
Data Science and Business Analytics (M.S.)	79	English Education (Secondary) (M.Ed.)	111
Entrepreneurship and Innovation (Graduate Certificate)	80	Physical Education Pedagogy (M.A.T.)	111
Finance (M.S.)	81	Reading (Education Specialist Certificate)	112
Taxation (M.S.T. Program)	82	Reading (M.Ed.)	112
Faculty	83	Secondary Education Major (M.A.T.)	113
College of Education	86	Teaching and Learning (M.Ed.)	115
Academic Regulations for the College of Education	86	Theoretical and Behavioral Foundations	116
Master's Degrees	87	Advanced Studies in School Psychology (Graduate Certificate)	118
Post-Bachelor's Teaching Certificate	88	Applied Behavior Analysis (Graduate Certificate)	118
Education Specialist Certificate	88		
Doctoral Degrees	89		
Academic Services	91		

Applied Behavior Analysis (M.S.)	119	Industrial Engineering (Ph.D.)	140
Counseling (Education Specialist Certificate)	119	Manufacturing Engineering (M.S.)	142
Counseling (M.A.)	120	Systems Engineering (Bridge Graduate Certificate)	142
Counseling (M.Ed.)	120	Mechanical Engineering	143
Counseling Education (Ed.D. and Ph.D.)	120	Mechanical Engineering (M.S.)	143
Counseling Psychology (M.A.)	121	Mechanical Engineering (Ph.D.)	145
Educational Evaluation and Research (Ed.D. and Ph.D.)	121	Programs Offered by the College of Engineering	148
Educational Evaluation and Research (M.Ed.)	121	Alternative Energy Technology (Graduate Certificate)	149
Educational Psychology (M.Ed.)	121	Alternative Energy Technology (M.S.)	149
Educational Psychology (Ph.D.)	121	Cyber-Physical Systems (Graduate Certificate)	149
Rehabilitation Counseling and Community Inclusion (M.A.)	122	Electric-drive Vehicle Engineering (Graduate Certificate)	151
.....	122	Electric-drive Vehicle Engineering (M.S.)	151
School and Community Psychology (M.A.)	122	Sustainable Engineering (Graduate Certificate)	151
College of Engineering	124	College of Fine, Performing and Communication Arts	153
Academic Regulations for the College of Engineering	125	Academic Regulations for the College of Fine, Performing, and Communication Arts	153
Biomedical Engineering	127	Art and Art History	155
Biomedical Engineering (M.S.)	127	Art (M.A.)	155
Biomedical Engineering (Ph.D.)	128	Art (M.F.A.)	155
Biomedical Imaging (dual-title program)	129	Art History (M.A.)	155
Injury Biomechanics (Bridge Graduate Certificate)	129	Communication	156
Chemical Engineering and Materials Science	129	Communication (Ph.D.)	156
Chemical Engineering (M.S.)	130	Communication and Urban Sustainability (Ph.D. Dual-Title) ...	157
Chemical Engineering (Ph.D.)	130	Communication (M.A.)	158
Materials Science and Engineering (M.S.)	131	Dispute Resolution (M.A.D.R.)	158
Materials Science and Engineering (Ph.D.)	131	Dispute Resolution (M.A./J.D.)	158
Polymer Engineering (Graduate Certificate)	131	Dispute Resolution (Graduate Certificate)	158
Civil and Environmental Engineering	131	Communication and New Media (Graduate Certificate)	156
Civil Engineering (M.S.)	132	Health Communication (Graduate Certificate)	159
Civil Engineering (Ph.D.)	132	Risk and Crisis Communication (Graduate Certificate)	160
Computer Science	132	Music	160
Computer Science (M.S.)	133	Music (M.A.)	161
Computer Science (Ph.D.)	134	Music (M.Mus.)	161
Data Science and Business Analytics (M.S.)	135	Orchestral Studies (Graduate Certificate)	163
Electrical and Computer Engineering	136	Theatre and Dance	164
Computer Engineering (M.S.)	136	Arts Administration (M.A.)	164
Computer Engineering (Ph.D.)	136	Theatre (M.F.A.)	164
Electrical Engineering (M.S.)	137	Theatre and Dance (M.A.)	166
Electrical Engineering (Ph.D.)	137	School of Information Sciences	167
Engineering Technology	137	Graduate Certificate Programs	168
Engineering Technology (M.S.)	138	Archival Administration (Graduate Certificate)	168
Industrial and Systems Engineering	138	Information Management (Graduate Certificate)	169
Data Science and Business Analytics (M.S.)	139	Library and Information Science (Graduate Certificate)	170
Engineering Management (M.S.)	140	Library and Information Science (Specialist Certificate)	170

GRADUATE BULLETIN

University Mission

Wayne State's mission is to create and advance knowledge, prepare a diverse student body to thrive, and positively impact local and global communities.

Our vision

Wayne State will be a pre-eminent, public, urban research university known for academic and research excellence, success across a diverse student body, and meaningful engagement in its urban community.

Our values

While our vision and mission show where we want to go, our values guide us on the way. They cut across organizational boundaries, bind us culturally, and permeate our strategic and tactical initiatives. They are the defining traits of the Wayne State community.

Collaboration: When we work together, drawing upon various talents and perspectives, we achieve better results.

Integrity: We keep our word, live up to our commitments and are accountable to ourselves and each other.

Innovation: We are unafraid to try new things and learn by both failure and success.

Excellence: We strive for the highest quality outcomes in everything we do.

Diversity and Inclusion: We value all people and understand that their unique experiences, talents and perspectives make us a stronger organization and better people.

Wayne State intends to remain one of the nation's most respected public research universities, and feels that these goals provide a way to make that happen. National recognition is not an end in itself; what matters most is how Wayne State's progress as shaped by these goals will position the university to benefit its students and, ultimately, its city, state, nation and the world.

GENERAL INFORMATION

Mission of the Graduate School

The mission of the Wayne State University Graduate School is to provide leadership in advancing excellence in graduate and postdoctoral education and cultivating a supportive environment for research, scholarly activities and other creative endeavors that are integral to the success of a diverse body of master's and doctoral students, postdoctoral scholars, and graduate faculty across programs. It assures the quality and integrity of graduate programs and monitors the academic requirements for the Ph.D. degree, specific master's degrees and graduate certificates. The Graduate School also administers and regulates funds that support graduate studies and disseminates information related to graduate programs and policies. The University's Carnegie designation within the classification of Research Universities with very high research activity is reflective of a deep commitment to excellence in graduate education, relevance in academic curriculum, and leadership in research and scholarship. Accordingly, the Graduate School is committed to the highest standards of academic performance and ethical behavior.

Graduate Council

The Graduate Council, the policy-formulating body for the Graduate School, is composed of two members elected from the regular graduate faculty of each of the various schools and colleges of the University, at least one graduate student member, the Dean of the Graduate School, and three members of the graduate faculty appointed by the Dean of the Graduate School. The Council meets monthly during the academic year, and all meetings are open to the University community.

In 1968, the Board of Governors established the Graduate Council and granted it the 'authority and responsibility for the development of basic policies for the graduate education system and for the encouragement, improvement and evaluation of graduate programs throughout the University.' In addition to reviewing new and existing graduate programs, the Council sets admission standards for graduate programs, makes recommendations for graduate faculty appointments, establishes criteria and evaluates applications for the Graduate-Professional Scholarship program, and awards all Ph.D. degrees, select master's degrees, and interdisciplinary graduate certificates.

Graduate Faculty

The Graduate Faculty consists of faculty members who are eminently qualified by virtue of preparation and competence to teach and direct research at the graduate level, according to specific criteria. Appointment to the Graduate Faculty does not modify a faculty member's responsibility to or affiliation with their department, division, college, or other instructional or administrative unit. The Dean of the Graduate School, on behalf of the Graduate Council, may appoint members of the WSU faculty to the Graduate Faculty, upon recommendation of their departments or divisions and with the approval of their deans.

Appointments to the Graduate Faculty are for a period of five years. Upon completion of the term, a qualified candidate may be recommended for reappointment to the Graduate Faculty by the department chairperson and the college dean.

History and Procedures of the Graduate School

Wayne State University's graduate and professional programs were established early in the history of the University and were unified within the newly-created Graduate School in 1933. Since that time, the

Graduate School has grown steadily both in terms of quality and size and now ranks as one of the largest graduate schools in the nation. The University's Carnegie classification is reflective of a deep commitment to excellence in graduate education, relevance in academic curriculum, and leadership in research and scholarship.

The Graduate School is the central unit for the supervision and encouragement of graduate work in the University and has basic responsibility for the improvement and review of existing programs. The Ph.D. degree at Wayne State University is conferred by the Graduate School. The Graduate School monitors every significant stage in the doctoral student's career and ensures that all university-wide requirements have been fulfilled. Ph.D. plans of work must be approved by the Graduate School, and a Ph.D. applicant cannot advance to Ph.D. candidacy without the Graduate School's approval. After the dissertation defense, the Graduate School conducts a final audit of the student's record to certify them for graduation.

History of the University

Wayne State University's story begins in 1868 with the founding of the Detroit Medical College, now the School of Medicine. In 1881, the Detroit Normal Training School was established, which is now the College of Education. The now-iconic Old Main Hall was built in 1896 as Central High School, which began adding college classes in 1913. Those classes evolved into the Detroit Junior College (offering a two-year general education program) in 1917, which became the College of the City of Detroit (with four-year degree programs) in 1923, and now is the College of Liberal Arts and Sciences.

In 1924, the College of Pharmacy was organized, and six years later the first regular graduate courses were offered in liberal arts and education. Frank Cody became the first president in 1933, with the existing colleges united into a university organization, eventually named Wayne University, taken from Wayne County in honor of General Anthony Wayne.

Wayne University continued to grow, adding the School of Social Work, the Law School, and the School of Business Administration. In 1956, it was renamed Wayne State University. In 1963, Wayne State was designated one of Michigan's three constitutionally established universities.

1868 — The Detroit Medical College, forerunner of the School of Medicine, was established.

1881 — The Detroit Normal Training School, forerunner of the College of Education, was established.

1917 — The Detroit Junior College, offering a two-year program in general education, was established in 'Old Main' and later developed into the College of Liberal Arts.

1923 — The Detroit Normal Training School became a four-year degree-granting institution under the name of the Detroit Teachers College. The first degrees were granted in 1924. The Detroit Junior College became the College of the City of Detroit with four-year degree programs. The first degrees were conferred in 1925.

1924 — The College of Pharmacy was organized.

1930 — The first regular graduate courses were offered in Liberal Arts and Education. The first Master's degrees were conferred in 1932.

1933 — The College of Engineering and the Graduate School were established.

1933 — The Colleges of Liberal Arts, Education, Engineering, Medicine and Pharmacy and the Graduate School were united by action of the

Detroit Board of Education into a university organization, temporarily called the Colleges of the City of Detroit.

1934 – The name Wayne University was adopted, taken from Wayne County and, ultimately, from General Anthony Wayne.

1935 – The School of Public Affairs and Social Work was organized. In 1950 it became the present School of Social Work.

1937 – The Law School, established in 1927 as Detroit City Law School, came into the University.

1945 – The first doctoral programs were authorized in the fields of Chemistry, Physiological Chemistry and Education.

1945 – The College of Nursing, which began as a program in the College of the City of Detroit, became a separate college.

1946 – The School of Business Administration, originating in the College of Liberal Arts, became the tenth academic unit in the University.

1956 – Wayne University became Wayne State University by Act 183 of Michigan Public Acts of 1956.

1959 – Monteith College was established.

1959 – Wayne State University became a constitutionally established University by popularly adopted amendment to the Michigan Constitution.

1964 – The Division of Urban Extension was established.

1973 – The College of Lifelong Learning was established as successor to the Division of Urban Extension.

1973 – The College of Pharmacy and Allied Health Professions was established.

1985 – The School of Fine and Performing Arts and the College of Urban, Labor and Metropolitan Affairs were established.

1989 – The name of the School of Fine and Performing Arts was changed to the College of Fine, Performing and Communication Arts.

1993 – The College of Science was established.

2001 – The name of the College of Pharmacy and Allied Health Professions was changed to the Eugene Applebaum College of Pharmacy and Health Sciences.

2002 – The College of Lifelong Learning was discontinued and its programs transferred to other units.

2004 – The College of Liberal Arts and the College of Science were merged into the College of Liberal Arts and Sciences.

2005 – The College of Urban, Labor and Metropolitan Affairs was discontinued and its programs transferred to other units.

2008 – The Irvin D. Reid Honors College was established.

2009 – The Library and Information Science Program was established as the School of Library and Information Science.

2011 – The Warrior football team made its first appearance in the NCAA Division II championship game.

2015 – The name of the School of Business Administration was changed to the Mike Ilitch School of Business.

2017 – The name of the School of Library and Information Science was changed to the School of Information Sciences.

Location of the University

More than 100 buildings provide housing for the services, instructional and research needs of the University and its students and staff. Most academic and service units of the University are located on the main campus in Midtown Detroit, largely bounded by York Street on the north, Woodward Avenue on the east, Forest Avenue on the south and Trumbull Street on the west. The major classroom, laboratory, library and other academic buildings are located east of the John C. Lodge Freeway; most of the athletics and recreational facilities are on the west side of the freeway.

The School of Medicine and its affiliated teaching hospitals and clinics are located a short distance south and east of the main campus in the Detroit Medical Center. The Eugene Applebaum College of Pharmacy and Health Sciences is also located on the medical campus. Certain smaller instructional and service units are located in other parts of the metropolitan area

- University Year Appointments are a full nine months in length. Individual service assignments are the responsibility of the appropriate Dean, or, by delegation, the Department Chairperson
- An equal number of class days is needed for courses.

Academic Regulations

Graduate Status

Continuance in graduate status is contingent upon the student keeping informed of and abiding by all guidelines, rules, regulations and requirements and complying with all official procedures of the university, the Graduate School, the individual college or school, and the department or program. The student is responsible for fulfilling all course and degree requirements in proper sequence with satisfactory scholarship. In case of doubt regarding any matter affecting their standing as a graduate student, students should consult with their advisor. The primary responsibility of keeping informed of policy and procedures rests with the student. Regulations contained herein should not be construed as exhaustive.

Graduate Courses

Graduate work is classified either as course work, in which students meet as an assembled group, or as research. Generally, courses numbered 5000 and above may be considered graduate level; in some departments, certain 5000 and 6000-level courses are not permitted for graduate credit and are so designated. Courses numbered 7000 and above are open only to graduate students.

Graduate Course Numbering Systems

– For the College of Education

- 5000-6999 – Undergraduate or graduate credit.
- 7000-8999 – Open to graduate students exclusively.
- 9000-9999 – Open to doctoral students exclusively.

– For the Faculty of Pharmacy

- 6000-6999 – Undergraduate/Graduate Courses.
- 7000-8999 – Graduate Courses.
- 9000-9999 – Ph.D. Courses.

– For all other Schools and Colleges

- 5000-6999 – Junior- and senior-level courses; also may be taken for graduate credit by students admitted to a graduate program, except where expressly prohibited.
- 7000-8999 – Open to graduate/professional students exclusively.
- 9000-9999 – Open to doctoral students exclusively.

Mike Ilitch School of Business: All courses numbered 6000-6100 and 7000 or higher are open *only* to students formally admitted to a Wayne State graduate program, or to qualified guest students. Enrollment in these courses must be approved by a graduate advisor or be consistent with a student's Plan of Work. Students in an undergraduate, post-bachelor, or non-matriculated status are not eligible.

Law School: In addition to the above approvals, graduate students must obtain the written permission of the Law School Dean to elect Law School courses or directed studies.

University Grading System

Final grades are available on Academics (<http://academics.wayne.edu>). Grades are not mailed to students. Final grades are recorded under the following system.

Graduate Grades

The graduate grading system is intended to reflect higher standards of critical and creative scholarship than those applied at the undergraduate level. To receive a graduate grade in courses open to both undergraduate and graduate students, the graduate student is expected to do work of superior quality and is required to do any additional work specified by the instructor.

To be awarded a graduate degree, a student must have achieved at least a 'B' (3.0) overall grade point average. Grades of 'B-minus' and below are unsatisfactory for graduate level work. A limited number of 'B-minus', 'C-plus', or 'C', though unsatisfactory, may be applied toward a graduate degree provided they are offset by a sufficient number of higher grades to maintain a grade point average of 3.0. Grades below 'B' can constitute reason for dismissal from a program at the department or program's discretion. Students should consult with their departments and advisors regarding unsatisfactory grades and their impact on good academic standing. All graduate teaching assistants and graduate research assistants must maintain a minimum grade point average of 3.0 in order to continue their assistantship appointments. Every effort is made to assist students whose work suffers as a result of a condition beyond their control, or interruption of study for military service.

Law School and School of Medicine: This grading system does not apply to Law School students in the J.D. program or students in the four-year M.D. program of the School of Medicine. Students enrolled in those programs should see the appropriate sections of this bulletin and should consult with appropriate Program Directors for more information.

Final grades for graduate courses are recorded under the following system.

A	Excellent	4.0 per credit hour
A-minus		3.67 per credit hour
B-plus		3.33 per credit hour
B	Good	3.0 per credit hour
B-minus	Below Graduate Standards	2.67 per credit hour
C-plus	Below Graduate Standards	2.33 per credit hour
C	Below Graduate Standards	2.0 per credit hour
F	Failure	0 per credit hour
M	Marginal Pass in designated courses such as field work, practicums and internships (not considered in calculation of grade point average)	

S and U	Satisfactory and Unsatisfactory performance in non-degree courses and in certain designated courses such as field work, practicums and internships. The grade of 'S' is given for all dissertation credits upon final acceptance of the dissertation in partial fulfillment of the requirements for the Ph.D. and Ed.D. degrees. 'S' and 'U' grades are not considered in the calculation of the grade point average but courses completed with an 'S' grade may count toward a degree
---------	--

The mark of I (Incomplete) is given to a student when he/she has not completed all of the course work as planned for the term and when there is, in the judgment of the instructor, a reasonable probability that the student will complete the course successfully without again attending regular class sessions. The student should be passing at the time the grade of I is given. A written contract specifying the work to be completed should be signed by the student and instructor. Responsibility for completing all course work rests with the student.

The mark of I will be changed to a letter grade when the student completes the course work as arranged with the instructor or, if the instructor has left the University, with the Chairperson of the department or other instructional unit. Work must be completed within one calendar year. There are NO extensions.

The mark of I will not be awarded if, in the instructor's judgment, it is necessary for the student to attend subsequent sessions of the class. If regular attendance is necessary to complete coursework, the student must register for the class for the semester in which attendance is planned. The student will be assessed tuition and applicable fees for the second registration. If the student decides to register for the course, subsequent to the assignment of an I, then the mark of I for the original election will be changed to a Withdrawal/Passing (WP), and the student will be responsible for tuition and applicable fees for the second registration. Students are responsible for notifying their department and the department offering the course that they have reregistered for the course so that the I is not changed to an F.

Any unchanged mark of I will, within one calendar year from the time it was received, be changed to a grade of F or failure. This will not be changed after the I is replaced.

The mark of WF (Official Withdrawal Failing) is given when the student withdraws from the course in accordance with University policy and the student had earned a failing grade as of the date the withdrawal is approved.

The mark of WN (Official Withdrawal No Basis for Letter Grade) is given to students when there is no basis for a letter grade.

The mark of WP (Official Withdrawal Passing) is given when the student drops the course in accordance with University policy and the student had earned a passing grade as of the date the withdrawal is approved.

The mark of Y (Deferred) is given when the student is up-to-date in the work of a course planned to continue beyond the semester (i.e., essay, thesis, dissertation and certain courses taken in sequence).

The mark of Z (Auditor) is given when the student has formally registered for the course for audit. The student's Academic Dean or his/ her designee must provide written audit authorization to the student at the time of registration.

Credit by Examination

A student wishing to obtain credit toward an advanced degree for knowledge essential to his/her program of study, acquired by means precluding formal transfer to Wayne State University, may petition for an advanced credit examination in a course or courses covering the relevant area of study. The petition requesting such advanced credit shall state the basis for the request in terms of the student's competence at the graduate level in the particular academic area. The established examination fee must be paid before the examination is taken. All grades will be recorded on the student's transcript. Such grades will not be used in computing the grade point average. The fulfillment of any requirement through credit by examination does not relieve the student of the residence requirement for degree.

Change of Grades and Marks

Once recorded in the Office of the Registrar, grades/marks will be changed only if the instructor posts the grade change in the online grade/mark change system in Academica. Most changes must be posted within one calendar year. (Deferred (Y) grades are the exception.) Failure grades that are posted as a result of a student not completing an incomplete course may not be changed. After a degree has been awarded, the grades associated with that degree may not be changed. Other change of grades or marks older than a year must be approved by the department chair and the Associate Dean of the school or college that offered the course.

Grade Point Average

The grade point average (g.p.a.) is the numerical index of the student's scholastic average. Points are assigned to each letter grade (see University Grading System, above) for each hour of credit. To compute your grade point average, multiply the grade points assigned to each course grade by the number of credits for each course; add the results and divide by the total number of credits.

For example, a grade of A in a class carrying 3 credits would be assigned 12 grade points (3 x 4), and a grade of C in a class carrying 4 credits would be assigned 8 grade points (4 x 2). In this example, the grade point average is: 20 (total grade points) divided by 7 (total credits attempted) = 2.85 g.p.a.

Credit for special examinations, transfer credit, and courses in which a mark of I, W, WF, WN, or WP or a grade of S, U, M, P, and N, has been earned are excluded from grade point average computation.

Law School: This grade point system does not apply to Law School students.

Directed Study

Independent study may be authorized provided the area of interest is an integral part of the student's graduate program and is not covered by courses scheduled while completing one's course requirements. Before Ph.D. students may register in directed study, they must complete the Ph.D. directed study petition form, *Doctor of Philosophy Petition and Authorization for Directed Study*, and obtain the written permission of his/

her department's graduate director. The petition must contain information about the nature, scope, and significance of the course, and indicate the major requirements the student must fulfill. Master's students must provide the same information and obtain the written permission of their college/school Graduate Officer.

Definition of Credits

A credit hour is an amount of work represented in intended learning outcomes and verified by evidence of student achievement that reasonably approximates not less than:

1. one hour of classroom or direct faculty instruction and a minimum of two hours of out-of-class student work each week for approximately fifteen weeks for one semester hour of credit, or the equivalent amount of work over a different amount of time; or
2. at least an equivalent amount of work for other activities, including laboratory work, internships, practicums, studio work, and other academic work leading to the award of credit hours.

Major and Minor Graduate Credits

Major Credits: Credits earned in the student's major field are designated as major credits. The dissertation, thesis, or essay must be in the major field.

Minor Credits: Credits earned in departments other than the major are classified as minor or cognate credits. Election of minor credit is encouraged to enable the student to broaden his/her program. In doctoral programs, minor courses should be related to the major and six or more graduate credits approved by the unit graduate director will constitute a minor.

Normal Program Load

A full-time graduate student is one who is enrolled for eight or more credits during academic-year semesters; a graduate student is considered full-time during the spring/summer term if she/he enrolls for at least two credits. The definition of normal course load will vary depending upon the requirements of each program.

Maximum Credit Load

A student with a strong academic record who is devoting full-time to graduate study may register for a maximum of *sixteen credits per semester*. Graduate Assistants are required to register for at least six credits each semester. The University considers a program of eight graduate credits per academic-year semester and two credits per spring/summer semester to be full-time study. Note that students are not required to enroll over spring/summer to continue their full-time status. For students who have advanced to Ph.D. candidacy, 7.5 credits is considered as full-time study.

Auditing Courses

To audit a course, a student must indicate that they wish to audit the course rather than receive academic credit, at the time of registration. Registration to audit a course is subject to the following regulations:

1. Students must pay the tuition assessment for the course, which is the same as if it were taken for academic credit;
2. A student is not permitted to take quizzes and examinations in audited courses;
3. A student may not normally change from audit status after registering for the course. In some cases, exceptions may be permitted during the term with the written recommendation of the instructor and the written approval of the Dean of the college/school in which the student is enrolled. The instructor's recommendation

and Dean's approval must be included with the student's Drop/Add Form indicating the desired change.

The Graduate School does not encourage students to audit graduate-level courses.

Retaking Courses

Graduate Students: A graduate program may, if it wishes, allow a student to retake a graduate course in which the student earned a grade of 'B-minus' or lower. This prerogative is exercised by the program through the use of the override provisions in the University's registration system which will prevent students from independently retaking courses. The number of courses and the number times a course may be retaken is determined by the program. The original grade for the course will remain on the student's transcript, but only the final grade received in retaking of the course will be used in computation of the student's grade point average. Students will not receive University financial aid for courses that are retaken. It is the student's responsibility to be apprised of his/her program's repeat policy.

Mike Ilitch School of Business: No course in which a student has received a passing grade or mark may be retaken without the prior written approval of the Director of Student Services of the Mike Ilitch School of Business.

College of Engineering: No course may be retaken without the prior written approval of the respective department's Graduate Program Chairperson and the Associate Dean of Engineering for Graduate Studies. Students may not retake any course in which a grade of 'A' or 'B' was received.

Dual Enrollment

Graduate Election of an Undergraduate Course: Graduate students may register for undergraduate courses, however these courses will be recorded on the undergraduate transcript. All courses elected under this status will be assessed at the graduate rate. These courses cannot be used as graduate credit nor to meet requirements for any graduate degree.

Undergraduate Election of a Graduate Course: Highly qualified undergraduate students may, under special circumstances, take a 7000-level course for undergraduate credit only (these credits may not be transferred in to a graduate program at a later date). A written petition initiated by the student's advisor must be approved by the graduate officer of the School or College, the professor teaching the course, and the Dean of the Graduate School. The petition, with all required signatures, must be turned in at the time of registration.

Accelerated Graduate Enrollment Program (AGRADE). AGRADE programs enable highly qualified seniors in the university to enroll simultaneously in undergraduate and graduate programs and to apply a maximum of 16 credits toward both the undergraduate and graduate degrees. They encourage such students to continue to graduate school at Wayne State by reducing the time to the master's degree. To be eligible for AGRADE, students must achieve an undergraduate GPA of at least 3.3 and complete at least 90 credits of undergraduate degree requirements (up to 16 credits can count for both undergraduate and graduate degrees). The availability of the AGRADE program differs depending on programs and departments. AGRADE may not be used in conjunction with Senior Rule.

Senior Rule Graduate School Admission: In their last semester, undergraduate students with a 3.0 (or above) upper division grade point average who have completed all general education competencies (mathematics, basic composition, intermediate composition, oral communication, critical thinking, and computer literacy), have the option of taking a limited number of graduate credits. Graduate credit

is awarded only for those courses taken in excess of baccalaureate degree requirements. Undergraduate and graduate courses combined may not exceed sixteen credits for the final semester of baccalaureate degree course work. A Senior Rule student must register for at least one credit which is required for the undergraduate degree in order to be eligible for this status. Students who have completed all required courses for the baccalaureate degree may not obtain Senior Rule status. Completion of the Application for Graduate Admission form is required, and students are advised to consult their advisors and the Office of Graduate Enrollment Services. Application deadlines for Senior Rule admission are the same as for regular graduate admission. Students who qualify and are recommended by the Department or College will be admitted for one semester. Graduate admission will be regularized upon evidence that the student has completed all requirements for the bachelor's degree.

The University permits a student to pay undergraduate fees for the graduate courses elected in a Senior Rule status. It is recommended that students elect only courses numbered 5000-6999 in their Senior Rule semester. Senior Rule may not be used in conjunction with AGRADE .

Dual Registration at the University of Michigan

A student enrolled at either Wayne State University or the University of Michigan may elect a course or courses in the other institution if the course fits his/her program but is not available in his/her home institution. The student must have written approval of the department chairperson in his/her major area at the home college and the approval of his/her Dean. The election must also be approved by the department which offers the course. Students desiring to participate in Wayne State University - University of Michigan dual registration should obtain the necessary forms from the Office of the Registrar and pay the appropriate tuition at their home institution.

Transfer of Credits – Graduate Transfer Credits for master's degree

In work toward the master's degree, credit beyond the twenty-four credits which must be earned in residence may be transferred from accredited graduate schools, provided such credit is 'B' or better and certified as graduate-level credit on an official transcript. Up to nine credits may be used from a non-degree program at WSU or another institution. Up to 8 graduate credits from a graduate degree program (at WSU or another institution) may transfer to a student's WSU master's degree. Those 8 in addition to a maximum of twenty-four earned in residency will be transferred toward the Ph.D. Departments and schools/colleges may further restrict the number of credits that may be transferred.

Transfer Credits for the Ph.D. Degree

The Graduate School allows a maximum of 32 credits to be transferred to the Ph.D. These 32 credits may include up to eight master's degree transfer credits as noted above. Departments and schools/colleges may have additional requirements and restrictions. A student wishing to transfer graduate credit toward the Ph.D. degree must file a petition with the Graduate School via the Transfer of Credit form, approved by his/her advisor and departmental graduate director, requesting such transfers. The petition must be supported by a transcript showing a minimum grade of 'B' for the courses to be transferred; 'B-minus' and credit earned with 'S' and 'P' (satisfactory or pass) grades are not acceptable for transfer. When students would like to transfer credits from institutions without course codes, the closest WSU equivalents must be listed. When students would like to transfer credits from institutions without letter grades, a conversion chart must be provided and used. Transfer credits must be appropriate to the student's degree program. Doctoral dissertation credits will not be transferred. Courses accepted for transfer credit from outside or within Wayne State University cannot have provided credit toward a prior degree except when the master's or another pre-doctoral certificate

or degree is applied to the doctoral degree. Admission to Wayne State University based upon a previously earned master's degree does not guarantee that those credits are applicable to a graduate degree at Wayne State University.

Up to thirty-two semester credits of 'B' or better graduate credit earned prior to the student's admission as a doctoral applicant may be applied toward the Ph.D., whether the graduate credit was earned at Wayne State University or another institution, degree without regard to lapse of time. Credit earned with 'B' minus or 'S' or 'P' (satisfactory or pass) grades are not acceptable for transfer.

Extension Credits

Credits earned at other than Michigan institutions cannot be applied toward a graduate degree nor an education specialist certificate.

Short-Term and Travel-Study Courses for Graduate Credit

Short-Term, Workshop-Institute-Conference, and Travel-Study courses offered for graduate credit must be proposed, approved and authorized well in advance via the appropriate form (obtainable from the Graduate School). After an initial authorization, courses to be repeated with no substantial change may be petitioned and approved by memorandum on the basis of the original on file.

Short-Term Courses: These are created or adapted to meet for a time period of less than one-half an academic semester— i.e., less than 7-1/2 weeks. Such courses offered for graduate credit will provide for at least fifteen contact hours and the requisite proportion of outside preparation for each hour of credit. It is assumed that short-term courses will not differ from regular fifteen-week courses in terms of objectives, content, contact hours, or academic expectations, unless such a difference is reflected by a proportioning of graduate credits.

Workshop-Institute-Conference Courses (WIC): WIC courses are those specially formulated experiences which, because of their usually 'applied' nature, lend themselves to an exceptionally brief but intensive time span. They differ from short-term courses in their concentration, usually spanning from a single day to two or three weekends. Offered for graduate credit, these courses provide for a minimum of twenty-five contact hours and an appropriate proportion of additional work for each hour of credit. Since these experiences vary greatly in their purposes and the degree of participation expected of the student, they are offered for credit only infrequently and enroll only those students for whose academic programs they would be directly relevant. Graduate grading will be on an 'S' and 'U' basis only.

Travel-Study Courses are courses created or adapted to take special advantage of the opportunity to relate a particular course of study to the cultures, mores, or institutions studied. Such courses may involve either domestic or foreign travel. All are offered through the Educational Outreach Division. Graduate credit for travel-study courses will be graded on an 'S' and 'U' basis only.

CREDIT RESTRICTIONS: Graduate students may not register for any course or combination of courses in these categories that permit the accumulation of graduate credits at a rate greater than one credit hour per week. Registrations that exceed this rate will be canceled in advance if discovered and, in no case will the excess credit be counted toward the requirements for a Wayne State graduate degree.

Attendance Policy

Whenever attendance forms a basis for a portion or all of a course grade, students must be provided with explicit written information concerning that fact during the first week of classes. Such information shall be specific with regard to the penalty incurred for each absence and the

means, if any, to compensate for the absence. It should be recognized that there may be certain situations where the student may not be permitted to make up the absence(s). This policy shall be applicable to all courses within the University, regardless of setting.

Responsible Attendance and Performance

Students must show diligence and are normally expected to complete the courses they elect. Irresponsible attendance is wasteful of both student and University resources. Those students who consistently receive excessive marks of 'I' (incomplete), 'WF' (Withdrawal Failing), 'WN' (Withdrawal No Basis for Letter Grade), or 'WP' (Withdrawal Passing) may be refused the privilege of further registration by the dean or the dean's designee of their school or college.

Appeal Procedures

In matters where a College's signed final decision is based upon the evaluation of a student's academic performance, and when review procedures available to him/her within the College have been exhausted, the student may request the Associate Provost for Academic Programs to review that decision on the record. The academic appeal form must be submitted by the student himself/herself, **within thirty calendar days** of the postmark of the College's final decision, which is to be sent to the address provided by the student in the College's review procedures. The Associate Provost's review of the College's decision will proceed as soon as practicable after submission by the student of his/her wish to seek review. The form is located at <https://provost.wayne.edu/academic-policy>

Grade Appeal Procedure

Students should first seek to settle grade disputes informally with the instructor. The dean's office of each school/college has established formal grade appeal procedures. Links to these procedures are also available on the Office of the Provost website: <https://provost.wayne.edu/academic-policy>. In most instances, formal grade appeals must be filed within thirty (30) calendar days of the time the student has or should have received their final grade. Note that the college of record for Ph.D. students is the Graduate School. For all other students, the college of record is the college or school in which the degree program is housed.

Academic Appeal Procedure

Ph.D. program dismissals should begin in the program or department and should be made on the basis of evidence, existing policy, and must follow due process procedures. Graduate directors must communicate with students in writing about the dismissal including a description of the evidence used to justify the dismissal. Students begin the appeal process in writing, following their unit's grade appeal procedures. If the student is dissatisfied with the outcome of the response, the student may then appeal in writing to the Dean of the Graduate School within thirty (30) calendar days of receiving the program's decision. A decision by the Dean of the Graduate School is final and ends the appeal process.

Academic Misbehavior Appeal Procedure

Where the Ph.D. program dismissal is based upon academic misbehavior as defined in Section 2.1 of the Student Code of Conduct, as opposed to poor academic performance, the procedures outlined in the Student Code of Conduct under Section 10.1 (a) and (b) must be followed. Students begin the appeal process for academic misbehavior in writing as defined in Section 10.1 (a), within ten (10) school days of oral or written notice of action taken by a faculty member under 10.1(a).

In addition to any action taken under Section 10.1(a), if a charge is also filed for academic misbehavior under Section 10.1(b), the procedures set forth in section 13.0 of the Student Code of Conduct are followed.

The student may initiate an appeal under Section 18.1 of the Student

Code of Conduct within twenty (20) school days of the school or college's final decision. The appeal is before the Provost, who is the President's designee for all purposes under the Student Code of Conduct. A decision by the Provost is a final decision and ends the appeal process.

Disputes Regarding Graduate Student Contractual Employment

Disputes concerning contractual employment including GTA/GSA assignments should be resolved in accordance with the Graduate Employees Organizing Committee (GEOC) contract in effect. Note that for non-Ph.D. students, academic appeals move from the department/program to the college or school in which the degree program is housed.

Student Ethics

Academic Records: The submission of fraudulent academic records for admission or transfer of credit by a student may be cause for the student's dismissal.

Academic Work: Academic work submitted by a student for credit is assumed to be of his/her own creation, and if found not to be, will constitute cause for the student's dismissal.

Student Code of Conduct

High standards of student conduct play a major role in creating an environment of excellence and the Student Code of Conduct is used to maintain these standards. The code:

1. establishes the expectations that students are accountable for their behavior;
2. describes acceptable student conduct, both academic and non-academic;
3. describes disciplinary policies and procedures;
4. specifies the rights of students and other parties; and
5. specifies prohibited conduct and sanctions to be imposed if such conduct occurs.

Examples of prohibited conduct subject to the Student Code of Conduct include, but are not limited to, academic misbehavior, knowingly furnishing false information to the University, disorderly behavior, theft, damage of property, illegal drugs, weapons on campus, physical assault, unauthorized entry, violation of criminal law, etc.

The University Student Conduct Officer, housed in the Dean of Students Office, monitors the student disciplinary process and is responsible for coordinating matters involving student discipline; describing the disciplinary procedures; and informing students and other parties of their rights. Copies of the Student Code of Conduct can be found online (<http://www.doso.wayne.edu/codeofconduct.pdf>) at or in the Dean of Students Office, 351 Student Center.

Obligations to the Instructional Process

Since education is a cooperative effort between teacher and student, both parties must fulfill obligations if the integrity and efficacy of the instructional process are to be preserved.

Responsibilities of Faculty Members

1. To contribute to and remain abreast of the latest developments in their fields;
2. To continually pursue teaching excellence;
3. To treat all students with respect and fairness without regard to ancestry, race, color, religion, political belief, national origin, gender, sexual orientation, age, marital status, disability, or veteran status;
4. To encourage differing viewpoints and demonstrate integrity in evaluating their merit;

5. To attend regularly and punctually, adhere to the scheduled class and final examination times, and arrange for notification of absence and coverage of classes;
6. To establish and maintain appropriate office hours;
7. To present, early in the semester, the following course information:
 - a. course objectives and general outline;
 - b. classroom procedures to be followed, expectations concerning class attendance, and proposed dates of major evaluations (including examinations, papers, and other projects);
 - c. grading policy;
 - d. where appropriate, a schedule of class-related activities, including class meetings and laboratory sessions;
 - e. lists of texts and/or other materials needed for the course;
 - f. late enrollment, withdrawal, and other special policies.
8. To provide and adhere, within reasonable limits, to the written syllabus of the course;
9. To know course matter thoroughly and prepare and present the material conscientiously;
10. To be informed of University services and recommend their use to students when advisable;
11. To follow these policies concerning written work and grades:
 - a. grade and return written work promptly;
 - b. submit final grades by the scheduled time;
 - c. retain written materials not returned within the semester (e.g., final examinations, major term papers) for one academic semester in accordance with unit policy and allow students to examine such materials;
12. To implement unit procedures for student evaluation of faculty teaching, with attention to preserving student anonymity;
13. To behave appropriately in dealing with students so as to maintain a scholarly atmosphere

Responsibilities of Students

1. To inform themselves of and to fulfill all requirements of the University and those of the College and Department from which they expect to receive their degree;
2. To fulfill conscientiously all assignments and requirements of their courses;
3. To attend classes regularly and punctually;
4. To maintain a scholarly, courteous demeanor in class;
5. To uphold academic honesty in all activities;
6. To notify the instructor as early as possible if prevented from keeping an appointment or carrying out an assignment;
7. To discuss with the instructor any class-related problem and follow established procedures in the resolution of these problems;
8. To adhere to the instructor's and general University policies on attendance, withdrawal, or other special procedures.

It is expected that faculty and students will fulfill their obligations to the instructional process. If, however, a complaint does arise, the parties should meet in an effort to resolve the matter. When such a discussion fails to resolve the problem or is inappropriate given the circumstances, the head of the academic unit should be contacted. If this contact fails to satisfy the complaint, the College's published procedures should be followed. Although the University Ombudsperson is not a direct part of the appeal process, students and faculty may consult the Ombudsperson at any point during such proceedings.

Academic Nepotism

Faculty members are not to place themselves, or allow themselves to be placed, in situations amounting to 'academic nepotism,' i.e., teaching or

otherwise directing the credit study or research of a student who is also a close relative. Concomitantly, students are not to take courses from close relatives or engage in research for academic credit under the direction of close relatives. All such credit will be disallowed.

Fraud and Misuse of Documents

Intentionally furnishing false information to the University is explicitly prohibited, as is forgery, alteration, unauthorized possession, or misuse of University documents, records and identification cards. The University reserves the right to rescind degrees if the award of the degree was based in whole or in part on deception, fraud, other unacceptable academic conduct, or misuse of University documents.

Data Access, Retention, and Ownership Guidelines

The Graduate School developed guidelines (<https://gradschool.wayne.edu/policies/data-ownership>) regarding the responsibilities and rights with respect to research data collected or produced by WSU graduate students, postdoctoral scholars, faculty, staff, and volunteers. These guidelines are of particular importance for collaborative work involving multiple stakeholders or investigators. Doctoral and Master's theses are important publications associated with the scholarly work of the University's students. Research Data that is included in these publications are expected to be predominantly the result of work by the primary author. A thesis may use Research Data from other Stakeholders in a research project only if the Principal Investigator or research supervisor provides a signed statement explicitly acknowledging the use as appropriate and setting forth any applicable limitations on use of the other Stakeholders' Research Data as necessary to protect those Stakeholders' interest in the research project. Additional guidelines are provided on the Graduate School website (<https://gradschool.wayne.edu/policies/data-ownership>).

Accreditation

Wayne State University as a whole is accredited as a doctoral degree-granting institution by the regional accrediting agency:

The Higher Learning Commission
230 South LaSalle St., Suite 7-500
Chicago, Illinois 60604-1411
telephone: 800-621-7440.

In addition, many specific programs and curricula are accredited individually by specialized or professional accrediting agencies. A report is produced annually for the Board of Governors which designates the accrediting agencies of the University's programs; the report is available from the Office of the Provost (<https://provost.wayne.edu/apr/accreditations>). The principal accreditation agencies are as follows:

Mike Ilitch School of Business

BS and BA, MBA, MS in Taxation, MS in Accounting, and PhD:
Accreditation Council of AACSB International – The Association to Advance Collegiate Schools of Business (AACSB)

Education

Art Therapy Program: *American Art Therapy Association*

Counseling (graduate only): *Council for Accreditation of Counseling and Related Educational Programs (CACREP)*

School Psychology, MA and Graduate Certificate: *National Association of School Psychologists*

Rehabilitation Counseling and Community Inclusion (graduate only): *Council for Accreditation of Counseling and Related Educational Programs (CACREP)*

Teacher Education Programs: *Council for the Accreditation of Educator Preparation (CAEP)*

Engineering

Division of Engineering (undergraduate): B.S. degrees in Biomedical Engineering, Chemical Engineering, Civil Engineering, Electrical Engineering, Industrial Engineering, and Mechanical Engineering: *Accreditation Board of Engineering and Technology, Inc. (ABET, Inc.) Engineering Accreditation Commission*

Division of Engineering Technology (undergraduate): B.S. degrees in Electrical/Electronic Engineering Technology and Mechanical Engineering Technology: *Accreditation Board of Engineering and Technology, Inc. (ABET, Inc.) Technology Accreditation Commission*

Computer Science (undergraduate): B.S. degree in Computer Science: *Accreditation Board of Engineering and Technology, Inc. (ABET, Inc.) Computing Accreditation Commission*

Fine, Performing And Communication Arts

Communication (B.A. in Public Relations): *The Public Relations Society of America, Inc. (PRSA)*

Dance: *National Association of Schools of Dance (NASD)*

Music: *National Association of Schools of Music (NASM)*

Theatre: *National Association of Schools of Theatre (NAST)*

Information Sciences

MLIS: *American Library Association (ALA)*

Law

American Bar Association (ABA) and Association of American Law Schools (AALS) (Joint Committee)

Liberal Arts and Sciences

B.S. in Chemistry: *American Chemical Society (ACS)*

B.S. in Biochemistry and Chemical Biology: *American Society for Biochemistry and Molecular Biology*

Communication Sciences and Disorders (Doctor of Audiology and M.A. in Speech Language Pathology): *American Speech-Language-Hearing Association, Council on Academic Accreditation (CAA) in Audiology and Speech-Language Pathology*

Nutrition and Food Science (Coordinated Program in Dietetics): *Accreditation Council for Education in Nutrition and Dietetics*

Political Science (Master of Public Administration): *Network of Schools of Public Policy, Affairs and Administration (NASPAA)*

Psychology (Clinical Training Program): *American Psychological Association (APA)*

Urban Planning (Master of Urban Planning): *Planning Accreditation Board (PAB)*

Medicine

Continuing Medical Education: *Accreditation Council for Continuing Medical Education (ACCME)*

Doctor of Medicine Degree Program (M.D.): *Liaison Committee on Medical Education (LCME), representing the American Medical Association and the Association of American Medical Colleges*

Genetic Counseling (Master of Science in Genetic Counseling): *Accreditation Council of Genetic Counseling*

Graduate Medical Education Programs, Affiliated Hospitals' Resident Physician Programs: *Accreditation Council on Graduate Medical Education (ACGME)*

Master of Public Health: *Council on Education for Public Health*

Medical Physics/Radiation Oncology: *Commission on Accreditation of Medical Physics Educational Programs, Inc.*

Nursing

Nursing (Baccalaureate programs, M.S.N., and D.N.P.): *Commission on Collegiate Nursing Education (CCNE)*

Nurse-Midwifery Program: *Accreditation Commission for Midwifery Education (ACME) and Commission on Collegiate Nursing Education (CCNE)*

Eugene Applebaum College of Pharmacy and Health Sciences

Clinical Laboratory Science: *National Accrediting Agency for Clinical Laboratory Sciences (NAACLS)*

Mortuary Science: *American Board of Funeral Service Education, Inc. (ABFSE)*

Nurse Anesthesia: *Council on Accreditation of Nurse Anesthesia Educational Programs (COA)*

Occupational Therapy: *American Council on Occupational Therapy Education (ACOTE)*

Pathologists' Assistant Program: *National Accrediting Agency for Clinical Laboratory Sciences (NAACLS)*

Pharmacy (Doctor of Pharmacy): *American Council on Pharmaceutical Education (ACPE)*

Physical Therapy: *Commission on Accreditation in Physical Therapy Education (CAPTE), American Physical Therapy Association*

Physician Assistant Program: *Accreditation Review Committee on Education for the Physician Assistant, Inc. (ARC-PA)*

Radiation Therapy Technology (undergraduate): *Joint Review Committee on Education in Radiologic Technology (JRCERT)*

Radiologic Technology (undergraduate): *Joint Review Committee on Education in Radiologic Technology (JRCERT)*

Social Work

Bachelor of Social Work and Master of Social Work: *Council on Social Work Education (CSWE)*

Administration of the University

The general governance of Wayne State University is constitutionally vested in the Board of Governors, consisting of eight popularly elected members and the President of the University, who is named by the elected members. The President is the chief executive officer of the University and is charged by the Board of Governors with responsibility for its administration. For educational and administrative purposes, the

University is organized into major academic units - schools, colleges, divisions, centers and institutes. The following schools, colleges and divisions constitute the heart of the University:

Mike Ilitch School of Business
College of Education
College of Engineering
College of Fine, Performing and Communication Arts
Irvin D. Reid Honors College
Graduate School
Law School
College of Liberal Arts and Sciences
School of Information Sciences
School of Medicine
College of Nursing
Eugene Applebaum College of Pharmacy and Health Sciences
School of Social Work

The Dean of the College or School is its chief executive officer. More than half the Colleges and Schools are organized into departments or divisions, each administered by a chairperson (or head). Academic standards, curricular development, course revision and similar academic matters are the primary responsibility of the faculty and dean of the College or School, although these matters are subject to review and approval by the Provost and Senior Vice President for Academic Affairs and by the President and, whenever they involve major educational policy decisions, by the Academic Senate.

The Graduate School is the central unit for the supervision and encouragement of graduate work in the University and has basic responsibility for the improvement and review of existing programs and the approval of new graduate programs. Except for applicants and candidates for the Doctor of Philosophy degree, the detailed supervision of graduate students' work is conducted by the College and School and, where appropriate, by the departments.

All degrees are granted by the University through the Colleges and Schools, except that the Dean of the Graduate School, with the approval of the Graduate Council, recommends candidates for the Doctor of Philosophy degree, selected master's degrees and interdisciplinary graduate certificate programs.

Board of Governors

BRYAN C. BARNHILL, II
MICHAEL BUSUITO MARK GAFFNEY
MARILYN KELLY
ANIL KUMAR
SANDRA HUGHES O'BRIEN
DANA THOMPSON
KIM TRENT, Chair

M. ROY WILSON, *ex officio*

President and Cabinet

M. ROY WILSON, M.D., President of the University
KEITH WHITFIELD, Ph.D., Provost and Senior Vice President for Academic Affairs
SUSAN BURNS, B.Mus., Vice President for Development and Alumni Affairs and President of the Wayne State University Foundation
MARQUITA T. CHAMBLEE, Ph.D., Associate Provost for Diversity and Inclusion and Chief Diversity Officer
WILLIAM DECATUR, J.D., Vice President, Finance and Business Operations and Treasurer and Chief Financial Officer

AHMAD EZZEDDINE, Ph.D., Associate Vice President for Educational Outreach and International Programs and Senior Associate to the President for Special Initiatives

DAVID S. HEFNER, M.P.A., Vice President for Health Affairs

STEPHEN M. LANIER, Ph.D., Vice President for Research

LOUIS LESSEM, J.D., Vice President and General Counsel

PATRICK O. LINDSEY, M.A., Vice President for Government and Community Affairs

JULIE MILLER, M.A., Vice President and Secretary to the Board of Governors

EDWARD (NED) STAEBLER, M.S., Vice President for Economic Development.

MICHAEL WRIGHT, M.B.A., Vice President of Marketing and Communications and Chief of Staff

Academic Administrators

BORIS BALTES, Ph.D., Associate Provost Faculty Affairs and Associate Vice President of Academic Personnel

ANNMARIE CANO, Ph.D., Associate Provost for Faculty Development and Faculty Success

RICHARD BIERSCHBACH, J.D., Dean of the Law School

MONICA BROCKMEYER, Ph.D., Senior Associate Provost for Student Success

JON CAWTHORNE, Ph.D., Dean of the University Libraries and the School of Information Sciences

JOHN CORVINO, Ph.D., Dean of the Irvin D. Reid Honors College

STEPHANIE HARTWELL, Ph.D., Dean of the College of Liberal Arts and Sciences

SHERYL KUBIAK, Ph.D., Dean of the School of Social Work

LAURIE LAUZON CLABO, Ph.D., Dean of the College of Nursing

R. DARIN ELLIS, Ph.D., Associate Provost for Academic Programs and Associate Vice President for Institutional Effectiveness

ROBERT FORSYTHE, Ph.D., Dean of the Mike Ilitch School of Business

FARSHAD FOTOUHI, Ph.D., Dean of the College of Engineering

INGRID GUERRA-LOPEZ, Ph.D., Interim Dean of the Graduate School

DAREN HUBBARD, M.B.A., Chief Information Officer and Vice President, Computing and Information Technology

SARA KACIN, Ph.D., Associate Provost and Director of Office for Teaching and Learning

CELESTE LEZUCH, M.S.A., Assistant Vice President for Academic Administration

CATHERINE LYSACK, Ph.D., Interim Dean of the Eugene Applebaum College of Pharmacy and Health Sciences

TONYA MATTHEWS, Ph.D., Associate Provost for Inclusive Workforce Development and Director of STEM Learning Innovation

DAWN MEDLEY, Ed.S., Associate Vice President of Enrollment Management

TIMOTHY MICHAEL, M.Ed., Associate Vice President for Student Auxiliary Services

MATTHEW SEEGER, Ph.D., Dean of the College of Fine, Performing and Communication Arts

JACK SOBEL, M.D., Dean of the School of Medicine

DAVID STRAUSS, Ph.D., Dean of Students

ANITA G. WELCH, Ph.D., Dean of the College of Education

Admission: Graduate School

OFFICE OF GRADUATE ADMISSIONS

5057 Woodward, Suite 6305

Detroit MI 48202

Telephone: 313-577-4723; Fax: 313-577-0131

<http://wayne.edu/admissions/graduate>

Admission: Graduate

To be considered for graduate admission, an applicant must hold or be completing an earned baccalaureate degree or its equivalent from a college or university of recognized standing and have adequate preparation with discernible ability to pursue graduate studies in the major field elected. These criteria are subject to standards set by the individual Colleges and Schools, which reserve the right to revise or amend their entrance requirements beyond the minimal requirements of the University. Note: Proof of the earned bachelor's degree must be submitted before regular admission will be granted.

Before any student can be considered for admission to graduate study, the following must be submitted to the Office of Graduate Admissions: A completed online Application for Graduate Admission and an official transcript from any college or university at which a bachelor's degree was earned. A transcript is considered official only if it is sent directly from the institution where the course work was completed and bears an official seal. International applicants are expected to submit additional documentation for regular admission. Note: The applicant is also responsible for arranging to take any examinations that may be specified by the Office of Graduate Admissions, the College, or the Department in which the student intends matriculation.

Some academic programs may require an additional departmental application for admission. Students are advised to contact the department to which they are applying and request full particulars on admission procedures.

In most departments (see the departmental sections of this bulletin for variants), a regular admission may be authorized for the domestic master's degree applicant upon the department's recommendation, if the applicant's grade point average is 2.75 ('C'=2.00) or above for the upper division (approximately the last sixty semester credits) of his/ her undergraduate course work and if he/she holds a bachelor's degree from a regionally accredited institution.

All baccalaureate graduates of unaccredited institutions must present a 3.00 ('B') or better upper-division grade point average to be considered for graduate admission. Course work completed after the baccalaureate which is presented as the qualifying basis for graduate admission cannot be applied toward a graduate degree at Wayne State University.

Doctoral applicants must present higher entrance qualifications than those required of master's degree applicants. A doctoral applicant is required to have an undergraduate grade point average of 3.0 ('B'=3) or above for the upper division of the undergraduate, bachelor's degree course work and must have completed an undergraduate major or substantial specialized work in his/her proposed doctoral major field. Certain departments require the completion of a master's degree with superior scholarship before considering acceptance of a student as a doctoral applicant. Applicants with less than a 3.0 grade point average in undergraduate course work may be eligible for admission to doctoral study if they have subsequently achieved a grade point average of 3.0 or better in substantial graduate course work in the proposed doctoral field.

The individual colleges reserve the right to refuse a non-resident admission if such admission prevents registration of a qualified Michigan resident. This ruling may not be invoked to secure admission to a Michigan resident if his/her grade point average entitles him/her to qualified status only.

Admission: Qualified Graduate

In most Departments, qualified admission to a master's or certificate program may be authorized if an applicant's grade point average is between 2.50 and 2.74 or if his/her degree is from a non-accredited

institution, provided the major Department and the Graduate Officer of the appropriate School or College have reviewed the applicant's academic experience, extra-scholastic qualifications and reasons for pursuing graduate study and have recommended his/her admission to the Graduate School.

Upon recommendation of the Department and the Graduate Officer of the appropriate College or School, qualified status may be granted to an applicant whose grade point average is below 2.5, if, since the time his/her baccalaureate degree was conferred, he/she has shown substantial evidence of academic or extra-scholastic qualifications of such merit as to warrant special consideration.

Applications from students who have completed substantial course work at, and/or graduated from, institutions which were not accredited by one of the six regional U. S. accrediting institutions (MSCHE, NEASC, HLC, NWCCU, SACS, or WSCUC) at the time studies were undertaken, will have a special review. If requested, the applicant will be required to furnish documentation of the nature and level of the credit obtained, the bases on which the credit was awarded, institutional operating practices, library holdings, physical facilities, faculty qualifications, and any other matters that may be relevant to an evaluation of credit. The director of admissions is authorized to deny admission to any applicant whose previous education does not conform to Graduate School standards. The Office of Graduate Admission may also make recommendations concerning the appropriateness for transfer of previously completed graduate course work.

All graduate admission procedures and regulations are subject to revision by the University Graduate Council at any time.

Graduate Application Dates

The Office of Graduate Admission will make every effort to process applications in time for the semester of the student's choice. However, only complete applications received by the last recommended dates shown below are ensured academic review before the semester starts. Unless an application and all supporting materials are received by the date indicated, there may not be adequate time for the desired program to review the application and make the admission decision.

Fall Term — Classes begin Late August: **apply by June 1**

Winter Term — Classes begin Early January: **apply by October 1**

Spring Term — Classes begin Early May: **apply by February 1**

For international students, the application form and all transcripts and documents must be on file in the Office of Graduate Admission at least four months prior to the start of the term in which the applicant plans to begin graduate studies.

Several Colleges and Departments have earlier deadlines. Doctoral programs also have earlier application deadlines. Students should consult the School/College and Department sections of this bulletin, the program's website, or the Office of Graduate Admissions for complete information.

Change of Graduate Status

A Change of Graduate Status is a type of admission only for those students who have previously been admitted to and registered as regular graduate students at WSU. For such students, a Change of Graduate Status is used to request:

1. to change from one graduate program or level to another graduate program or level; or
2. to add a second graduate program to the one in which the student is already enrolled.

A department's normal admission criteria apply to Change of Graduate Status applicants. The application form (<http://gradschool.wayne.edu/current/forms.php>) is downloadable from the Graduate School.

Students should submit the form and transcripts, if needed, to the Graduate Office of the School/College of the new program. Other admission documents required by the department should be submitted directly to the department. The School/College Graduate Office prepares and sends the application and documents to the department for decision. The Graduate Office notifies the student of the admission decision, and, if admission was approved, notifies the Records Office of the change to be made to the student's record. The department's regular admission deadlines apply. No fees are charged for a Change of Status application.

The Change of Graduate Status application should NOT be used by the following students: those who have never been admitted through the Office of Graduate Admissions, those who were admitted but did not register, those who were admitted on a Permit to Register or as Guest students, and those who have been registered in graduate classes only as Non-Matriculated students through the College of Liberal Arts and Sciences.

Graduate Non-Degree Admission

An applicant who wishes to take graduate courses but does not wish to be in a degree program may request admission on a non-degree basis. The eligible applicant will be admitted to a particular College but not to an individual major program. In most instances, a non-degree student may, with the Department's approval, register for any courses for which he/she has the necessary preparation.

The applicant for a non-degree graduate classification is cautioned that *only one semester of full-time graduate study, or part-time registrations not to exceed nine credits, is normally permitted in this classification*. Beyond these limits, registration as a non-degree student requires the approval of the Graduate Officer of the student's College. Not more than nine credits, subject to the approval of the Graduate Officer, may be applied at a later date toward the residency and credit requirements for either the master's or Ph.D. degree. For the Ed.D. degree, credit earned beyond the nine-credit limitation will be reviewed by the appropriate Division and the Education Graduate Officer for possible application toward the degree.

If a student in non-degree status decides to seek admission to a graduate degree program, he/she should apply to the appropriate College Graduate Office for a Change of Status *before* completing nine credits. There is no assurance that credits earned while holding a non-degree classification will be acceptable in a degree program, or that prerequisites may not have to be specified if the student later becomes a degree applicant. Also, financial aid is not available to students in Non-Degree status.

Graduate Guest Admission

Graduate students actively pursuing degrees and who are in good standing at other accredited colleges and universities may be admitted to elect a limited number of credits at Wayne State University. Interested students may obtain a Graduate Guest Application (<http://wayne.edu/admissions/graduate/applying/app-instructions>) from the Office of Graduate Admissions. This must be signed by their home institution before it can be accepted for consideration. **A guest admission is valid for only one semester and must be renewed with each subsequent registration.** A maximum of twelve semester credits may be earned as a Graduate Guest Student. Admission as a Graduate Guest student does not constitute permission to register as a degree applicant.

Senior Rule

In their last undergraduate semester, Wayne State students with a 3.0 (or above) upper division grade point average have the option of taking a

limited number of graduate credits. Graduate credit is awarded only for those courses taken in excess of baccalaureate degree requirements. Undergraduate and graduate courses combined may not exceed sixteen credits for the final semester of baccalaureate degree course work. A Senior Rule student must register for at least one credit which is required for the undergraduate degree in order to be eligible for this status. Students who have completed all required registrations for the baccalaureate may not obtain Senior Rule status. Completion of the *Application for Graduate Admission* is required, and students are advised to consult their advisors and the Office of Graduate Admissions. Application deadlines for Senior Rule admission are the same as for regular graduate admission. Students who qualify and are recommended by the Department or College will be admitted for one semester. Graduate admission will be regularized upon evidence that the student has completed all requirements for the bachelor's degree; it is the student's responsibility to provide this transcript.

As a courtesy, the University permits a student to pay undergraduate fees for the graduate courses elected in a Senior Rule status. It is recommended that students elect only courses numbered 5000-6999 in their Senior Rule semester. Senior Rule may not be used in conjunction with AGRADE.

AGRADE: Accelerated Graduate Enrollment

Several Colleges have established an accelerated combined undergraduate and graduate program (AGRADE) in which highly qualified seniors in the college may enroll simultaneously in some undergraduate and graduate programs of the College. A maximum of sixteen credits may be applied towards both undergraduate and graduate degrees in a student's major field if that program is an AGRADE participant. Those who elect the AGRADE program may expect to complete the Bachelor's and Master's degrees in five years of full-time study. AGRADE may not be used in conjunction with Senior Rule.

AGRADE Credits: Students may elect a minimum of three and a maximum of sixteen AGRADE credits. These will be used to complete the baccalaureate degree as well as to serve as the beginning of graduate study. Upon formal admission to a master's program, AGRADE credits are transferred as if they were graduate credits transferred from a graduate program at another university. The remaining graduate credits required for the master's degree will be earned in the conventional manner following formal admission to the graduate program.

Eligibility: AGRADE applicants must have an outstanding overall g.p.a. and have performed at a superior level in their major, as determined by the major department. The earliest date by which a student may apply for the AGRADE program is during the semester in which he/she completes ninety credits toward the undergraduate degree.

Application: A student seeking AGRADE status should present to the Graduate Admissions Committee of his/her major department all of the materials which that department requires for normal admission (except the GRE; where required, the GRE scores should be forwarded at the normal point in the formal graduate admission process).

Admission and program requirements are described in the respective School and College sections of this bulletin, the Undergraduate Bulletin, and department advising offices.

Permit to Register Status

This is a one-term-only admission status which may be granted to applicants with incomplete applications for graduate admission, at the discretion of the academic department, and upon presentation of evidence of an earned baccalaureate degree with an acceptable grade

point average and the application fee. Registration beyond the initial semester requires the submission of a regular graduate admission application, official transcripts and other required documentation as determined by the university and department. Admission as a graduate Permit-to-Register student does not obligate Wayne State University to accept the applicant in the future for a graduate degree, nor is there any assurance that credit earned in this status will be accepted toward a graduate degree.

This option is not available in all University Schools and Colleges. Applicants are encouraged to discuss admission options with the staff of the Office of Graduate Admissions. In addition, financial aid is not available to students in Permit to Register status.

Michigan Intercollegiate Graduate Studies (MIGS) Program

The Michigan Intercollegiate Graduate Studies (MIGS) Program enables graduate students of Michigan public institutions to take advantage of educational opportunities at other Michigan public institutions offering graduate degrees. Any graduate student in good standing in a master's, specialist, or doctoral program at a member institution is eligible to participate with approval of the appropriate academic unit. Students on a MIGS enrollment pay tuition and other fees at the host institution. All credits earned under a MIGS enrollment are accepted by a student's home institution as if offered by that institution. *This type of enrollment is limited to one term for master's or specialist degree students, or two terms for doctoral degree students.* Students interested in this program should contact the Office of Graduate Admissions (<https://wayne.edu/admissions/graduate/application-types>) for further information.

University of Windsor – WSU Exchange Program Agreement

Wayne State University and the University of Windsor have entered into an exchange agreement whereby students from each institution may enroll in selected courses at the other institution. Courses available are limited to those not offered at the student's home institution. Limitations also apply to the number of courses and credits a student may take under this agreement. Wayne State University and the University of Windsor students who wish to participate in the program must be in good standing at their home institution and must have prior approval of the appropriate academic unit that the course(s) will be accepted as part of the student's course of study. Students who participate in the Wayne State University/University of Windsor program pay tuition and fees at the home institution and receive credit for the course(s) only at the home institution. Students should consult the Director of the Office of Study Abroad for further information.

Post-Bachelor Admission

The Post-Bachelor status is granted to college/university graduates who wish to take Wayne State University courses through the 6000 level *for undergraduate credit only*. The status serves two groups of students:

1. Those who wish to pursue vocational or avocational interests without intending to use Wayne State University credit to earn another degree at Wayne State University;
2. Those who seek admission to a graduate program but need to raise their undergraduate grade point average and/or fulfill specific undergraduate course requirements for graduate admission consideration.

The following special rules apply to Post-Bachelor Admission:

1. **Under no circumstances will credit earned in this status apply toward a graduate degree program.**
2. The applicant must present evidence of a degree earned from an accredited institution (official transcript or diploma).
3. Post-Bachelor status students are not eligible for financial aid from Wayne State University, except in certain circumstances depending on the program; students should consult the Office of Student Financial Aid (<http://www.finaid.wayne.edu>) for a list of eligible programs.
4. Applications for Post-Bachelor status from students new to Wayne State University should be made to the Office of Undergraduate Admissions, Welcome Center, 42 W. Warren, Wayne State University.
5. An applicant who earned an undergraduate degree from Wayne State University, or who was previously admitted and registered in a Wayne State graduate program, should contact the Records Office to be re-admitted to the University as a Post-Bachelor student. Post-Bachelor applicants in the Colleges of Education and Nursing must obtain authorization directly from the College.

International Graduate Students

To be considered for graduate admission, international applicants must have completed an appropriate university-level program comparable in subject matter and credits to a program for which a bachelor's degree is awarded at Wayne State University.

The fact that a degree in another country may have a similar name to a degree offered in the United States does not mean the two degrees require similar lengths and content of study or that they should be accepted as equivalents. *All graduate applicants must:*

1. present an excellent scholastic record;
2. have sufficient financial resources for minimum tuition, supplies and living expenses; and
3. have a sufficient proficiency in English (see the section on English Proficiency Requirement – International Students, below).

FINANCIAL AID: University-sponsored financial assistance for international students is extremely limited and unconfirmed awards should not be included in financial projections.

English Proficiency Requirements

Graduate applicants who graduated from colleges/universities in other countries must demonstrate proficiency in English. To fulfill this requirement an applicant must satisfy one of the following criteria:

1. Complete baccalaureate degree requirements at an accredited U.S. institution or in a country where English is the native language.
2. Present an acceptable score on the Michigan English Language Assessment Battery (MELAB).
3. Present an acceptable score on the Test of English as a Foreign Language (TOEFL) or equivalent tests such as the IELTS or PTE.

Some units may elect to grant qualified graduate admission to academically-talented International Students whose TOEFL scores fall slightly below the University minimum score. Interested students should contact the chairperson or director of their prospective program, to determine whether the program offers such qualified admission. For further information on the English Proficiency policy, please consult the Office of Graduate Admissions.

Faculty Admission

Tenured Wayne State University faculty members holding the rank of Assistant Professor or above may be admitted to Wayne State graduate

degree programs outside the faculty member's school/college, under certain specified conditions. Untenured tenure-track faculty members are not eligible to pursue a graduate or professional degree at Wayne State while in University employment. Faculty members who are not tenured and not on the tenure track may enroll in degree programs outside their own unit with the approval of the dean of their college. For further information, contact the Dean of the Graduate School.

Special Status Students

Visiting Doctoral Guest

The Graduate School may issue a Visiting Doctoral Guest certificate to persons with an earned doctorate who come to Wayne State for scholarly study under the sponsorship of a department. Such Guests may obtain University library privileges and attend classes upon invitation of the department. No official record of attendance is kept on such Guests. For further information, contact the Graduate School.

Visiting Scholar

The Graduate School may issue a Visiting Scholar certificate to persons who have an advanced degree, such as an M.D., or are earning a doctoral degree, and who have come to Wayne State for scholarly study under the sponsorship of a department. Scholars may obtain University library privileges and attend classes upon invitation of the department. No official record of attendance is kept on such Scholars. For further information, contact the Graduate School.

Campus Life

Dean of Students Office

301 Student Center; 313-577-1010

The Dean of Students Office provides services and affords opportunities to enhance student life and campus activities. The Office coordinates major campus student activities and events, including Orientation Part 2 (O2), New Student Convocation and Festifall, Student Organizations Day, Homecoming, and the Finals Week Late Night Breakfast.

The office coordinates the campus calendar of student activities, community service programs; advises fraternities and sororities; and promotes student involvement in co-curricular life at Wayne State and Detroit including the Thursdays in the D series, the Discover Detroit series, the Weekends in the D series, the Arts in the D program, and the Campus Activities Team program board. The office also coordinates the Warrior Pride program focused on school spirit, and the Warrior Zone athletic events student section. The University Student Conduct Officer is housed in the Dean of Students Office and the office also coordinates the Student Care Report process

The Dean of Students serves as the Deputy Coordinator for Title IX and the Student Life Wellness Coordinator resides in the Dean of Students Office and focuses on sexual violence prevention education, substance abuse prevention education, and digital citizenship education.

Student Organizations

There are over 400 recognized student organizations including such diverse categories as academic/professional, social action, political, sororities/fraternities, honoraries, ethnic and religious groups, as well as student governments. Student organizations use the Dean of Students Office to process their event planning and all students use the Dean of Students Office to learn about getting involved in campus life. The Office staff also assists students who want to organize new student groups. The staff also coordinates various campus publications including the on-line newsletter Get Involved at Wayne. Student organizations can apply

to the Student Activities Funding Board for funds to present events, programs, and activities on-campus.

The official student newspaper is the South End (<http://www.thesouthend.wayne.edu>).

Parent and Family Services

The Dean of Students Office coordinates Wayne State's Parent and Family Services. Through this office, parents and family members receive the twice monthly parent and family newsletter and have services available to them to help them help their students be successful, including the parents helpline: 1-877-WSU-PARENT. The office may be e-mailed at: parents@wayne.edu.

Student Senate

395 Student Center
<http://www.studentsenate.wayne.edu>

The Student Senate is the recognized student government of Wayne State University. It consists of twenty-eight members, fourteen members at large elected in a University-wide election, and fourteen appointed members, one student representative appointed by the Office of Housing and Residential Life, and one representative appointed by the Associate Vice President for Educational Outreach to represent the extension centers. The Student Senate has an official advisory responsibility in policy formation for the governing of student activities at Wayne State. The Student Senate is advised by the Dean of Students Office

Office of Housing and Residential Life

582 Student Center; 313-577-2116
<http://www.housing.wayne.edu>

Housing and Residential Life at Wayne State fosters student learning and success through engaging residents in an intentional living-learning community. Supported by safe, comfortable and convenient residence hall, apartment and dining environments, residents grow in self-awareness and cross-cultural understanding as they practice social and group development as members of a diverse group of Wayne State learners.

Facilities and programs administered by this Office are located just steps away from classrooms, libraries, the Student Center, and the Recreation and Fitness Center and combine the convenience and activity of the campus with the energy and pace of downtown urban living.

Parking: Faculty, Staff, and Visitor

42 W. Warren, Suite 257, Welcome Center (8:30 a.m. - 5:00 p.m., Mon. - Fri.); 313-577-2273
<http://www.parking.wayne.edu>

The University maintains numerous parking facilities available to faculty, staff and visitors on a fee basis. The easiest way to approach parking, for faculty, staff and students, is to purchase a semester-long assigned parking pass. This allows unlimited entry and access to a designated structure or lot, which you'll choose based on availability and where you spend most of your time on-campus.

All new parking pass customers will pay a one-time fee for an RFID tag (\$25 at the time of issuance), which hangs from their rear-view mirror to allow for quick, hands-free entry and exit. The hang-tag is linked to a student, faculty or staff person's OneCard and all current/future parking assignments. If the hang-tag is lost, parking patrons can simply swipe their OneCard to enter their assigned structure or lot. Lost hang-tags should be immediately reported to the parking office to be deactivated.

A replacement tag must be purchased at \$25.00 and is required to avoid ticketing or towing.

General parking is also available for visitors and those without a parking assignment. This allows patrons to pay as they go, with access to any of the general parking areas. Students, faculty and staff can deposit funds onto their OneCard for easy in-and-out access. Students only can take advantage of the discounted student OneCard parking rate (\$3.75 at time of publication and \$4.75 for premium parking areas). The general public may park in designated WSU lots and structures at the public rate, typically between \$7.50 and \$10.00, using a credit/debit card for entrance and exit and cash at limited locations.

Campus Health Center

Helen DeRoy Apartment Building, Suite 115
5200 Anthony Wayne Drive; 313-577-5041

The Campus Health Center provides comprehensive health care services for students, including physical examinations, family planning, illness visits, and immunizations (including flu, meningitis, hepatitis B, etc.). Visits are by appointment, but walk-ins are accepted for students experiencing an illness. Counseling referral services are also available. All currently enrolled students receive one free office visit per semester. Additional visits are billed to student's health insurance with most health care plans accepted. Students without insurance have reduced fees based on a sliding scale and ability to pay for additional office visits per semester. Payment is accepted at the time of service by cash, OneCard, Visa, MasterCard, Discover, or American Express credit cards. To make an appointment, call 313-577-5041.

Police and Public Safety Services

6050 Cass; 313-577-2222
<http://www.police.wayne.edu>

The Wayne State University Police Department patrols and services the University including the city streets, businesses, and private residences within and between the various campus areas. The Department, to the extent that resources allow, also patrols and provides other police services to the neighborhoods and businesses in the area surrounding the University.

Police service is provided twenty-four hours a day, seven days a week. All officers have, at minimum, a bachelor's degree. They are commissioned as Detroit Police Officers, with full police authority on and off campus, after training at a State-certified Police Academy. Any matter requiring the services of a police officer can be reported at any hour of the day or night.

Blue Light System – Emergency Telephones (7-2222): The University has installed outdoor emergency telephones throughout the campus. These emergency telephones are identified by bright blue lights.

Emergencies (313-577-2222): All emergencies should be reported immediately, i.e.: all crimes, missing/stolen property, automobile accidents, suspicious persons, injured persons, vandalism, break-ins or burglaries.

Accidents (313-577-2222): Ambulatory patients will be transported, by officers, to either Detroit Receiving Hospital or the University Health Center. The Police Department does not provide ambulance service but utilizes the Detroit Fire Department Emergency Medical Service to handle other than minor injuries.

Fire or Other Extreme Hazards (313-577-2222): Emergencies such as fire, smoke, explosions, broken gas or water mains, severe electrical hazards, etc., should be reported.

Crime Prevention Section (313-577-6064): The Police Department's Crime Prevention Section provides a number of crime prevention services, including personal safety seminars, crime prevention programs, and services. All programs and services are free of charge (except the Rape Aggression Defense Training for which there is a fee of \$25.00) to any Wayne State department, student, staff, or faculty member. Examples of services provided include:

- Security Services
- Street Smarts seminars
- Operation Identification
- Alcohol Awareness
- Rape Aggression Defense Training

The Crime Prevention Section also publishes monthly 'CampusWatch' articles. Email inquiries may be made to: campuswatch@wayne.edu.

Athletics, Intramurals and Recreation

Matthaei Facility: 126 Matthaei Building; 313-577-4295

Intramural Sports: Mort Harris Recreation and Fitness Center; 313-577-6712

Intercollegiate Athletics: 101 Matthaei Building; 313-577-4280
<http://wsuathletics.com>.

Wayne State University has a rich athletic tradition dating back to the fall of 1917 and recently celebrated 100 years of singular outreach and academic success. The first Detroit Junior College athletic event (precursor of Wayne State University) was a basketball game against the Detroit College of Law on January 19, 1918. Since then WSU student-athletes have captured numerous honors, including national championships awarded by the NCAA and conference championships. In the past ten years, 276 WSU student-athletes have been recognized as All-American. In the 101 year history, 644 students have been so recognized. Over seventy percent (70.26%) of the nearly 400-plus student-athletes currently involved in competitive athletics have a 3.00 or better cumulative grade point average. According to the latest federally mandated report, WSU student-athletes graduation rate is eighty-three percent (83%). The athletic department provides competitive opportunities in the following sports: baseball, men's and women's basketball, men's and women's cross country, men's and women's fencing, football, men's and women's golf, softball, men's and women's swimming/diving, men's and women's tennis, volleyball, and women's indoor/outdoor track. Last season, nine out of eighteen programs competed in NCAA championships. In 2012, women's swimming and diving won the NCAA National Championship joining ten other programs to be so honored. The past seventeen years WSU Athletics has had its seventeen highest ratings in the annual NACDA Cup and in twelve of the past fifteen years finished in the top 12% of the 319 institutions in Division II. The NACDA ranks the top overall competitive intercollegiate athletic programs in the country.

The University competes in both the NCAA Division I (men's and women's fencing) and Division II levels. The sixteen non-Division I University athletic programs compete in the Great Lakes Intercollegiate Athletic Conference (GLIAC). Members of the GLIAC are: Ashland University, Davenport University, Ferris State University, Grand Valley State University, Lake Superior State University, Michigan Technological University, Northern Michigan University, Northwood University, Purdue Northwest University, Saginaw Valley State University, and the University of Wisconsin-Parkside.

The fencing teams compete in the Midwest Fencing Conference with Ohio State, Cleveland State, Detroit Mercy, and Northwestern, among other schools.

The University offers a wide and varied program of recreational and intramural activities. The Matthaei Complex, and the surrounding athletic campus on forty-three acres of land, located on the west end of campus, offers a myriad of drop-in activity areas that include courts and fields for basketball, football, jogging, racquetball, soccer, squash, tennis, and volleyball, a weight training/exercise room, and swimming facilities. Use of these facilities is free with a current University ID or with a membership through the Mort Harris Recreation and Fitness Center. The recently built Doris J. & Donald L. Duchene, Sr. Athletic Facility features 35,000 square feet of usable space, four tennis courts and a sprint track. Open recreation hours and rental information for this facility are available at: <http://rfc.wayne.edu/multipurpose/>

Ticket and schedule Information is available at the Athletic Office (<http://WSUathletics.com>), 101 Matthaei Building, 313-577-4280. All men's basketball and football games are broadcast on the Warrior Radio Network at WDTK-AM 1400 and FM 101.5 and are also available for free on the internet. Students are admitted free to all University-controlled WSU athletic events with a One Card.

Sports Facilities

Matthaei Building

Matthaei is normally open from 7:00 a.m. to 8:30 p.m., Monday through Friday; and is closed to recreation on Saturday and Sunday, during the fall and winter semesters. During the spring/summer semester the Building is open from 7:00 a.m. to 7:30 p.m., Monday through Friday. Outdoor tennis courts and track are available during posted hours. A facility schedule is published monthly. Operational hours are subject to change, and not all areas of the complex will be available at all times, due to scheduled classes, intramural activities and varsity athletics. Lap swim is available at the Matthaei for all affiliates and the lap hours are on the monthly recreation schedule, available online or hard copy at Matthaei. Locker and towel services are available for all affiliates daily with current OneCard at no charge. Locker rental plans both semester and yearly are also available. For charges and additional facility information, visit the Matthaei Shop in the Matthaei Building; or call 313-577-4295.

Mort Harris Recreation and Fitness Center

The Mort Harris Recreation and Fitness Center is open from 5:30 a.m. to 11:00 p.m., Monday through Friday; and 10:00 a.m. to 7:00 p.m. on Saturday and Sunday, during the fall, winter and spring/summer semesters. Operational hours are subject to change, and not all areas of the complex will be available for open recreation at all times, due to scheduled group fitness classes, intramural activities, club sport activities, and varsity athletics. Locker and towel services are available for all students and members with a current OneCard. Locker rentals are available for semester and yearly rentals. For charges and additional facility information, please visit the Mort Harris Recreation and Fitness Center (<http://rfc.wayne.edu>) website or call 313-577-2348.

Group Fitness Classes (non-credit)

These classes include a variety of programming, conducted by trained, certified and experienced instructors. Class options include yoga, cycling, Zumba, and a variety of strength and conditioning classes.

Open Recreation: The fitness areas, multi-purpose courts, walking track and climbing wall offer opportunities for unstructured play and participation. Basketball, volleyball, and a variety of equipment and areas for working out, stretching, and socializing are also available.

Intramural Sports Programs: Men's, Women's and Co-Rec intramural sports leagues are available for all currently enrolled WSU students as well as WSU faculty/staff members of the facility. Leagues and

tournaments are available in a variety of sports, including basketball, volleyball, dodgeball, flag football, soccer, Esports and more.

Club Sports: The Mort Harris RFC is also the home for all Club Sports. Students interested in starting a particular club sport, are invited to consult our website (<http://www.rfc.wayne.edu>) to view the registration process and to become familiar with g.p.a., credit load, and insurance guidelines. All WSU Club Sports are fully funded by the participating students themselves. Current clubs include men's and women's soccer, men's lacrosse, men's and women's volleyball, quidditch, equestrian, rowing and cricket.

Fitness and Wellness Programs: Fitness assessments, personal training, and group fitness programs for every level of fitness are available to all students and members. All students and members have a free consultation included with their membership every year.

Climbing Wall: The facility offers ten top rope anchors with dozens of routes which change weekly. All necessary equipment may be rented; day and yearly passes are available.

Adventure Trips: The Mort Harris Recreation and Fitness Center offers a variety of outdoor excursions for novices to seasoned adventures. Trips include but are not limited to whitewater rafting, kayaking, skydiving, skiing and snowboarding, fishing, camping, and mountain biking.

Team Building: The high ropes course is designed to foster interpersonal and intra-personal growth in a fun and challenging environment. Your Student Organization, Department, Corporation or group will climb up thirty feet and traverse through fifteen different elements that focus on teamwork and interdependency. Groups will learn to communicate effectively, listen to each member, recognize individual strengths and utilize collaborative efforts.

Student Center Administration

Student Center Administration (313-577-4585) is located in the lower level of the Student Center. This office schedules rooms and audio-visual equipment available for meetings, seminars, conferences and special programs. Bake sale, literature and vendor tables as well as Community Arts and St. Andrews reservations are also provided.

Student Center Administration provides the following services for a fee: duplicating service, SMART and DDOT bus passes, fax service, and State Hall locker rentals. In addition, Student Center Graphics, University Lost and Found, and the campus bulletin board posting service are located here.

Student Center Graphics (313-577-3730): Student Center Graphics is a student operated design and print shop. They provide design services and large format printing for the campus community and outside clients. SCG also provides items such as banners, posters, logo designs and consultations for a fee.

Religious Organizations

Various religious denominations have offices on the sixth and seventh floors of the Student Center. Programs and personal and spiritual counseling are available from various denominations. A reflection room is available on the 3rd floor of the Student Center.

Centers and Institutes

Barbara Ann Karmanos Cancer Institute

4100 John R Street, 2nd Floor; 313-576-8670, 1-800-527-6277; Fax: 313-576-8668

Director, President, and CEO: Gerold Bepler, M.D., Ph.D.

Email: beplerg@med.wayne.edu
http://www.karmanos.org

The Barbara Ann Karmanos Cancer Institute is one of forty-five National Cancer Institute-designated comprehensive cancer centers in the country and has been serving the Detroit area for more than sixty years. The Karmanos Cancer Institute operates the Karmanos Cancer Center, an independent cancer hospital, and manages the comprehensive cancer center core grant from the National Cancer Institute, in affiliation with Wayne State University. The faculty of the graduate program in cancer biology are drawn from a number of academic departments at Wayne State University and are Scientific Members of the Cancer Center. Students are trained in the biology of cancer at the molecular, cellular, and tissue levels, as well as in translational research and population studies of cancer. The focus of the training experience can be varied to suit individual student needs. It leads to the Doctor of Philosophy degree in Cancer Biology.

The Barbara Ann Karmanos Cancer Institute is a premier, nationally-recognized cancer research, treatment, education, and outreach center. It is also home to one of the eighteen national registries of the SEER (Surveillance, Epidemiology, End Result) programs. The current research programs are as follows:

- Molecular Imaging
- Molecular Therapeutics
- Population Sciences and Disparities
- Tumor Biology and Microenvironment

Bioengineering Center

818 W. Hancock, 2208 Bioengineering Center.;
313-577-0252; Fax: 313-577-8333
Director: King H. Yang

The Bioengineering Center is an interdisciplinary research unit that coordinates and supports joint research activities between the College of Engineering and the School of Medicine. Although the Center is administered by the College of Engineering, the research faculty is drawn from such diverse departments as Anatomy, Physiology, Orthopedics, Neurological Surgery, Mechanical Engineering, Electrical and Computer Engineering, Chemical Engineering, and Physical Medicine and Rehabilitation. The research activities are located on campus as well as in various hospitals and clinics of the Detroit metropolitan area.

Current research projects include a continuing program on trauma biomechanics, the study of human response and tolerance to injury resulting from high speed vehicular accidents and contact sports. This area of research has recently been expanded to include an investigation of the effects of non-lethal munitions, blast-induced mild traumatic brain injuries, and landmine-induced spine and lower extremity injuries. The Center is equipped with a vast array of impact facilities, including three horizontal accelerator mechanisms used for simulating car and aircraft crashes, two linear impactors, three servo hydraulic Instron material testing systems, a high-rate Instron material testing system, and a 12-inch diameter shock tube. The Center is also equipped with a computer-controlled universal receiver (which can fire 9 mm, .357 Magnum, .44 Magnum, and 12 gauge ammunitions) and an air cannon system (which can fire 37 mm sub-munitions through the use of compressed gases) to study the injurious effects of non-lethal munitions as well as behind body armor. In 2015, a split Hopkinson pressure bar system was added to measure highrate properties of biological materials.

Up to 150 channels of data can be acquired simultaneously for digitization and data processing. Additionally, the Advanced Human Modeling Laboratory in the Center is equipped with an Opteron Cluster

an Opteron Cluster #1: 15 nodes (30 CPU, 64 bits) + 1 master (Sun Fire V20z dual AMD Opterons 250 with 4G RAM) linked by a Myrinet network, running RH Linux + Rocks cluster software, an Opteron Cluster #2: 15 nodes (60 CPU, 64 bits) + 1 master, 3 TB raid, running RH Linux and Beowulf cluster software + PBS, a new Opteron Cluster #3 (ON ORDER): 16 nodes (120 CPU, 64 bits) + 1 master, 3TB raid 20GB infiniband interconnect, running RH Linux WS5.2 + Rocks cluster software, and 10 Intel dual Xeon (2GHz-3.2GHz), running Redhat Linux 7.2 to RHWS4. For high-speed graphics, the Center has 4 Intel P4 3.2GHz 1M L2 2G Ram with Nvidia Quadro FX3400 Graphics running RedHat WS4, 3 Intel Core 2 Duo 2GHz with Nvidia Graphics running Windows XP 64-bit and Redhat Linux WS5.1 (dualboot), and legacy capability with HP j6000, j5600, c5600 (dual PA8500, HPUX11), two SGI Octane (dual R1000, IRIX6.5) graphic workstations. For data storage, the Center has Anacapa Opteron 250 2U raid (3.6TB raid mirrored) and 3 external raid boxes on SCSI160/320 (1.8-2.2TB) with an external 12 tapes system (2.4TB capacity).

The Center is also engaged in a study of low back pain, which is a common affliction among workers in industrialized countries, and whiplash associated neck pain. A full neurophysiology laboratory is available for the characterization of neural impulses and the histological evaluation of tissues associated with pain stimuli. Research also includes the characterization of biological materials using uni-axial and multi-axial testing protocols from quasi-static to high strain rates. This activity includes the assessment of orthopedic soft tissues, bone, brain, and individual axons. Other areas of research include human motion biomechanics and orthopedic biomechanics.

The research program in the Bioengineering Center has been strengthened through the creation of a broader graduate program in biomedical engineering. This program, offering both M.S. and Ph.D. degrees, involves fifteen faculty members drawn from seven departments within both the College of Engineering and the School of Medicine. The areas of concentration have been expanded beyond the traditional transportation-related trauma to include age-related injury, engineering neurophysiology and biomaterials, including tissue engineering. Students who wish to major in biomedical engineering should apply for admission to the graduate program in Biomedical Engineering, housed in the College of Engineering. In addition, a number of traditional engineering departments allow their students to concentrate in biomedical engineering; consult the program descriptions in the College of Engineering section of this bulletin.

Cardiovascular Research Institute

1107 Elliman Building, 421 E. Canfield; 313-577-4630; FAX: 313-577-8615
Director: Karin Przyklenk, Ph.D.

The Cardiovascular Research Institute (CVRI) was chartered in August 2009 with the mission of establishing a nationally and internationally recognized center of excellence for the study of cardiovascular pathophysiology and disease. The hallmarks of the CVRI are collaboration and innovation: the institute serves as a nexus for cardiovascular investigators from a broad range of disciplines and departments within Wayne State University's School of Medicine with interests and expertise encompassing the continuum from basic molecular and cellular biology to clinical application.

The CVRI and its member-faculty are dedicated to conducting state-of-the-art translational research that is at the forefront of cardiovascular science. Areas of research strength include: myocardial ischemia-reperfusion injury and cardioprotection; cerebral ischemia and stroke; heart failure; thrombosis, and platelet aggregation and coagulation. In addition, the CVRI is committed to providing a robust and productive multi-disciplinary training environment for the next generation of leaders in cardiovascular medicine.

Center to Advance Palliative-Care Excellence (CAPEWAYNE)

4201 St. Antoine, Suite 5C-UHC; 313-576-3997; Fax: 313-745-4710
<http://www.capewayne.med.wayne.edu>

CAPEWAYNE is an inter-disciplinary academic center bringing together scholars, educators, researchers and clinicians dedicated to improving the quality of end-of-life care. The main focus areas of this center are education, research and clinical practice, all of which permeated by the field of humanities.

Education: The Center offers an end-of-life curriculum for students, trainees and clinicians across disciplines and levels of training. A major undertaking of the Center is to offer a highly regarded regional conference on Palliative Care annually.

Research: The Center gathers researchers who have a shared interest in the conduct of collaborative, interdisciplinary interdepartmental research.

Clinical Practice: The Center provides resources to clinicians across disciplines and settings that practice palliative care, through a paradigm of sharing and ensuring optimization of clinical care in our community.

Center for Automotive Research

2121 Engineering; 313-577-3887; Fax: 313-577-8789
Director: Naiem Henein, Ph.D.
Email: henein@eng.wayne.edu

The Center for Automotive Research (CAR) was established in 1980 to advance, promote and support research and academic courses in areas of interest to the automotive industry. Faculty and graduate students from the College of Engineering and local industry participate in the research programs conducted at the Center.

Current research areas include the auto-ignition, combustion and emission characteristics of petroleum, alternate and renewable fuels in spark-ignition and compression-ignition engines, under different operating conditions. The research thrust areas are auto-ignition and combustion in engines, conventional, alternate and renewable fuels, cold startability at low ambient temperatures, sensors, diagnostics, electronic controls, engine dynamics, friction and wear, and simulations and mathematical modeling.

A unique research area at CAR is engine cold start at low ambient temperatures to reduce the number of cranking cycles and exhaust emissions in gasoline and diesel engines. In gasoline engines, the hydrocarbon emissions in the first few seconds of engine start, before the catalyst is warmed up, represent a challenging problem. At CAR, strategies have been developed for managing the fuel delivery, intake charge and spark timing to reduce hydrocarbon emissions by cutting the number of cranking cycles and by eliminating combustion instability. The factors that cause misfiring after acceleration have been identified in both gasoline and diesel engines. In diesel engines, innovative strategies for fuel injection have been developed to reduce the cranking period and combustion instability at low ambient temperatures, while injecting smaller amounts of fuel than has been conventionally applied. The low ambient temperature research is conducted in a cold room, electronically controlled to produce ambient temperatures between 25°C and -50°C.

In addition to the cold room facility, the research has been extended to gain a basic understanding of the spray behavior, auto-ignition and combustion processes at low ambient temperatures, using advanced laser based diagnostic techniques. The research is conducted on a unique optically accessible engine at low ambient temperatures. The engine has an extended piston with a transparent piston top for spray

and combustion imaging. Furthermore, the engine has four transparent windows on the top of the cylinder for laser beam based combustion diagnostic investigations. In addition, spectroscopic techniques are used to determine the key radicals and combustion intermediates that lead to the auto-ignition of fuel-air mixtures, flame development, formation of nitrogen oxides, soot and other emissions.

The research in the Center combines theoretical and experimental investigations. Theoretical research deals with fundamental processes of thermodynamics, heat transfer, mass transfer, and combustion kinetics, applied to combustion engines. CFD and chemical kinetics codes are used to determine the flow in the combustion chamber, the development of the auto-ignition and combustion processes, the radicals concentrations and the formation of the different engine-out emission species. In addition to the cold room and optical engine test cells, experimental research is conducted under warmed up and loaded engine conditions in six dynamometer test cells equipped with electric dynamometers, flow-meters, pressure transducers, charge amplifiers, shaft encoders, gas analysis equipment, particulate mass and characterization equipment, gas chromatograph, FTIR spectrometer, mass spectrometer, fast response flame ionization detectors, fast-response NO detectors, and fast response CO and CO₂ detectors and high speed data acquisition systems.

Center for Excellence and Equity in Mathematics

1309 Faculty Administration Building; 313-577-2558; Fax: 313-577-7596;
Email: ceem@wayne.edu
Director: Steven Kahn, Ph.D.
<http://clas.wayne.edu/ceem/>

The Center for Excellence and Equity in Mathematics, in the College of Liberal Arts and Sciences, is a research and educational center with a two-fold mission: to find ways to significantly improve the quality of K-12 and introductory college-level mathematics instruction across the United States; and, by using mathematics as a tool, to provide students from inner cities and underrepresented minority groups with the kinds of educational and lifetime opportunities that should be available to all students.

The Center currently operates five core programs: the WSU Math Corps, an outreach program serving Detroit middle and high school students; the WSU Middle and High School Math Network, which provides day to day instructional and/or operational resources to Detroit area middle and high school math departments; the Math Corps Learning Community at WSU, a University support and retention program for Math Corps "kids" now attending WSU; and the Emerging Scholars Program (ESP), a WSU honors-level calculus and pre-calculus program; and the Rising Scholars Program (RSP), serving WSU students at the developmental level.

Center for Latino/a and Latin American Studies

3324 Faculty/Admin. Bldg.; 313-577-4378; Fax: 313-993-4073;
Director: Jorge L. Chinea, Ph.D.
Email: aa1941@wayne.edu
<http://www.clas.wayne.edu/cllas/>

The Center for Latino/a and Latin American Studies is a multi-service unit engaged in teaching, research, and service. The Center plays an important role in the urban mission of Wayne State University and involves four components:

1. The Center hosts two learning communities: the CBS Scholars Program and the College-to-Career Program. The first one recruits

students into the University, facilitates their transition between high school and college, and promotes increased retention. The second program supports students through completion of their degrees and beyond, especially in the areas of career development and graduate school preparedness. It also offers courses and related educational activities for students interested in Latino and Latin American Studies.

2. It promotes research on issues relevant to the Latino/a community, especially in the urban and workplace environment; and Latin American cultural studies and current issues.
3. It creates and fosters the interaction and exchange of personnel and resources between the University and the Latino/a community; and it serves as a source of expertise on Latino issues to the larger metropolitan community.
4. As an advocate for the awareness and advancement of Latino/a issues within the University, the Center contributes to the University's continuing efforts to create a richer multicultural campus environment.

Center for Molecular Medicine and Genetics

3127 Scott Hall; 540 E. Canfield; 313-577-5323; Fax: 313-577-5218

Email: l.grossman@wayne.edu

Director: Lawrence I. Grossman, Ph.D.

<http://genetics.wayne.edu>

The Center for Molecular Medicine and Genetics conducts and fosters interdisciplinary health-related research and research training in three focal areas of molecular biology:

1. Structure and function of macromolecules: chemical synthesis and analytical characterization of nucleic acids and protein products with scientific and commercial potential; and genetically-engineered products with new or improved functions.
2. Structure and function of human, viral, mitochondrial and other genomes; DNA sequences of genes and their regulatory regions; genetic and physical maps of simple and complex genomes, with emphasis on those important in human health and disease.
3. Development and characterization of animal models of human disease: use of transgenic and knockout technologies in vertebrate and invertebrate model organisms to elucidate the etiology and pathophysiology of major diseases.

The Center offers the MS and Ph.D. in Molecular Genetics and Genomics and the MS in Genetic Counseling.

The research and research training activities promoted by the Center involve its own research faculty and faculty from at least twelve departments throughout the University. The Center is supported by the University's Research Excellence and Economic Development Fund.

Center for Peace and Conflict Studies

Director: Frederic S. Pearson

2320 Faculty/Administration Building

Phone: 313-577-3453; Fax: 313-577-8269

<http://www.clas.wayne.edu/pcs/>

On November 20, 1965 the Center for Teaching about War and Peace opened its doors under the leadership of Director Russell Broadhead and a committee of distinguished faculty members. The mission then was to provide interdisciplinary, University wide, academic programs in the field of domestic and international conflict and peace issues. In 1987 the WSU

Board of Governors, building upon this rich heritage, created The Center for Peace and Conflict Studies.

The mission of the Center for Peace and Conflict Studies is to develop and implement projects, programs, curricula, research, and publications in areas of scholarship related to international and domestic peace, war, social justice, arms control, globalization, multicultural awareness and constructive conflict resolution. The Center addresses this mission in three ways. CPCS supports undergraduate and graduate student excellence through its academic programs. CPCS staff and students engage in scholarly research initiatives on aspects of domestic and international conflict management. CPCS provides community outreach programs that emphasize: conflict resolution, development of intercultural understanding, and enhance local knowledge of global affairs.

Center for School Health

125 Matthaei Building, 5101 Lodge Service Dr.;

Phone: 313-577-0014; Fax 313-577-5002

Director: Nate McCaughtry, Ph.D.

<http://coe.wayne.edu/centerforschoolhealth>

Founded in 2010, the Center for School Health aims to address social, economic, academic and health disparities by improving healthy eating and physical activity opportunities and education in community and educational institutions. The center conducts two types of activities:

1. research on healthy school transformation interventions and
2. providing support services for health promotion and reform initiatives in a range of diverse community and education institutions.

The primary activities conducted in the Center for School Health involve research on healthy school transformation interventions. In these projects, research faculty in the Center design innovative solutions to improving youth and family physical activity and healthy eating in community and education venues, acquire external funding to execute interventions and research, implement health school transformations, and conduct research on process and impact. Several large-scale, long-term, externally-funded healthy school transformation programs include: Building Healthy Communities, the Detroit Healthy Youth Initiative, and the Volunteers, Administrators and Coaches program.

Secondary activities conducted in the Center for School Health include providing support services to community and educational institutions to initiate, support, develop and execute environmental health reforms and individual and population health promotion. Support services provided include: grant writing, professional development, technical assistance, program implementation, curriculum development, evaluation, reporting and marketing, and grant administration.

In 2013, Center for School Health faculty, staff, and graduate students acquired \$2.8 million to support healthy school transformation projects; published twenty-eight journal articles, books and chapters; and presented forty-three research and keynote lectures. Their healthy school transformation work involved eighty-four educational institutions, 720 educators and site staff, and 36,000 children and their families.

The Center for School Health supports the educational mission of Wayne State University by serving as an incubator for undergraduate and graduate research opportunities, field placements, service learning, and internship sites.

Center for School Health faculty include: Nate McCaughtry (Director), Jeffrey Martin, Mariane Fahlmann, Bo Shen, Cheryl Somers, Anne Murphy, Noel Kulik Erin Centeio, Suzanna Dillon, Laurel Whalen, and Ronald Simpkins.

Center for Social Work Research

5447 Woodward; 313-577-4439; Fax 313-577-8770

Director: Joanne Sobeck, Ph.D.

Email: ab1350@wayne.edu

<http://www.research.socialwork.wayne.edu>

Chartered in 2008, the goals of the Center for Social Work Practice and Policy Research are to:

1. conduct research that advances social work practice and policy in settings that range from urban neighborhoods to international contexts;
2. develop relationships with the purpose of identifying and expanding research opportunities and promoting Center sustainability; and
3. foster a commitment to the dissemination of findings that inform social work practice and expand the body of social work knowledge.

The Center fosters a culture for research within the School of Social Work by creating an infrastructure of resources for faculty scholarship and research including pre- and post-award grant support. In addition, the Center facilitates opportunities for faculty and staff engagement with community partners. The Center strongly believes in using interactive processes where researchers, practitioners and policy makers can find new ways to work together, generate innovative ideas, share knowledge and solve problems. Through our Strategic Partners Project and other Center activities, the School of Social Work continues to demonstrate its commitment to the Detroit area, researching and developing real solutions for real world problems. To this end our faculty and staff are engaged in evaluation research, grant writing, instrument development and other research-related service projects with community agencies.

Translating research and disseminating social work knowledge among practitioners is critical. The Center implements a variety of strategies to synthesize recent research findings into serviceable formats for practitioners including an enhanced web page, policy and practice briefs, and researcher-practitioner dialogue meetings. Learning communities are also provided for students interested in applying research methods to social work contexts.

Center for the Study of Citizenship

3089 Faculty/Admin. Bldg.; 313-577-2593; Fax: 313-577-6987

Email: M.Kruman@wayne.edu

<http://www.clas.wayne.edu/citizenship>

Twitter: @CitizenshipWSU

Director: Marc W. Kruman, Ph.D. The Center for the Study of Citizenship at Wayne State University promotes research and intellectual exchange about citizenship among a global community of scholars; students; political, community, and business leaders; and the general public. The Center fosters research in the emerging interdisciplinary field of citizenship studies locally, nationally, and internationally. In particular, the Center encourages analysis of the relationship between citizens and the political, social, economic, and cultural communities of which they are a part. Toward these ends, the Center hosts the leading international conference in citizenship studies; publishes a book series, *Citizenship Studies*, in collaboration with the Wayne State University Press; sponsors a discussion network with over 2000 subscribers from over 30 countries; hosts an annual civic festival in September; and sponsors public programs about citizenship.

Center for Urban Studies

5700 Cass Avenue, Room 2207 Academic/Administration Building;

Tel.: 313-577-2208; Fax: 313-577-1274

Director: Lyke Thompson, Ph.D.;

Email: ad5122@wayne.edu

Managing Director: Charo Hulleza, M.P.A.

Email: c.hulleza@wayne.edu

Email: CUSinfo@wayne.edu

<http://www.cus.wayne.edu>

The Center for Urban Studies improves understanding of and provides innovative responses to urban challenges and opportunities. The Center conducts and disseminates research, develops policies and programs, and provides training, capacity-building, and technical assistance. The Center participates in defining and influencing local, regional, State, and urban policy. The Center's current initiatives have a real, substantial and lasting impact on Detroit's challenges across a number of areas ranging from crime reduction to healthy homes. Committed to serving Detroit and its metropolitan area, the Center exemplifies Wayne State's urban research and service mission. The Center employs a highly trained multi-disciplinary team consisting of social science Ph.D. and master's-level researchers, as well as WSU graduate and undergraduate students. The Center is organized into eight specialized programs:

Healthy Homes: The Center's Healthy Homes unit has focused on researching and facilitating collaborative solutions to addressing housing-based hazards to health. The Center is conducting national and local studies on housing risks and their amelioration. Families have been assisted through educational presentations and programs, and home assessments.

Early Childhood and Disabilities: The Center provides a variety of education program evaluations for the State of Michigan and local school districts throughout Michigan, particularly in special education. Many of these evaluation studies collect information from program participants using different techniques including surveys and focus groups.

Urban Safety: The Urban Safety unit employs the latest techniques to evaluate crime prevention projects including, but not limited to, showing hot spots of urban crime, determining safe routes for children to walk to school, and prisoner re-entry initiatives. Community partners include community development organizations, local police departments, and municipalities. The Center maintains numerous databases that include, but are not limited to, crime statistics, transportation, housing, Census data, and health.

Governor's and Mayor's AmeriCorps Urban Safety: The Center is operating the Governor's and Mayor's AmeriCorps Midtown Urban Safety program to improve resident public safety capacity in seven areas of Detroit. AmeriCorps members work with local non-profits, police departments, schools and residents to improve resident public safety by recruiting residents to establish block clubs, and using mobile mapping to tackle area problems. Members are also facilitating safety workshops, conducting home assessments, and boarding up dangerous buildings/cleaning up public private areas to promote neighborhood stabilization and safe routes to school.

Urban Health: The Urban Health unit partners with local agencies to conduct research and program evaluation on specific urban health issues. The unit specializes in projects geared to address obesity and emergency preparedness, and to assist people diagnosed with HIV and victims of trauma. However, unit researchers can also assist organizations with health research/evaluation on other urban health topics.

Survey Research: The Survey Research unit engages in a variety of data collection techniques, including computer assisted telephone interviews, computer assisted self-administered interviews, community-based in-person interviews, focus groups, mail surveys, and web-based surveys. The unit has the capability to implement any and all phases of a project,

from design and implementation to production of computerized data files and data analysis.

Evaluation Research: The Center provides program evaluation service to a range of organizations in the Detroit area and statewide. The support is structured to provide both process and outcome evaluation, as well as to provide training and capacity building on evaluation implementation.

Faculty Support: The Center regularly provides support for Wayne State faculty and administrative projects that include the Center as a project partner. The type of support varies by project, and ranges from project evaluation design to performing the lead role in grant submission (filling out all forms, developing overall budget, active development of grant narrative, etc.).

Cohn-Haddow Center for Judaic Studies

2311 Faculty/Admin. Bldg., 656 W. Kirby; 313-577-2679; Fax: 313-577-8136

Director: Howard Lupovitch, Ph.D.

Email: cohnhaddowcenter@wayne.edu

<http://www.judaicstudies.wayne.edu/>

Established in 1988 as a cooperative venture between Wayne State University and the Jewish Foundation of Metropolitan Detroit/United Jewish Foundation, the Cohn-Haddow Center embodies the fruitful relationship that has long linked the University to the metropolitan Jewish community. As such, it is a model for universities and Jewish communities in a dynamic urban setting. The Cohn-Haddow Center serves as a resource to the University and to the larger community in Jewish studies and related areas. It sponsors a broad array of programs and activities related to several of the University's wide-ranging missions. From biannual international conferences to smaller symposia, incidental lectures, and broadly-defined cultural events, the Cohn-Haddow Center has introduced the University and community to some of the world's most distinguished academics and eminent writers, poets, artists and musicians.

Confucius Institute

5057 Woodward, Suite 11204; 313-577-0153; Fax: 313-577-6929

Director: John Brender, Ph.D.

Email: ci@wayne.edu

<http://www.clas.wayne.edu/ci/>

The Confucius Institute was launched in January 2008 and established with the mission of offering Chinese language and culture in southeast Michigan and to establish educational ties with China. With support from Hanban: Chinese Language International, there are over 100 Confucius Institutes in the United States and over 425 institutes worldwide in over 100 countries. While some Confucius Institutes are dedicated to Chinese art, music, distance learning and other specialty areas, the Confucius Institute at Wayne State University provides programmatic support to K-12 teachers and schools, the Wayne State University community, and to various professional groups.

K-12 programs include K-12 outreach, after school programs, a three-week summer camp, an annual Chinese quiz bowl, Chinese language testing, a two-week summer program in China, and grants for local school districts to establish or improve upon their Chinese language programs. At the university level, the WSU-CI provides study-abroad opportunities in China, including year-long scholarships and a summer service learning program to rural areas. Additional campus programs include a Chinese language and culture learning-community, a weekly Confucius Cafe featuring lectures about China, and regularly-scheduled opportunities to practice Chinese with native speakers. At the professional level, the WSU-CI hosts an annual Chinese language and culture teaching conference,

sponsors and produces TV documentaries, and offers forums on Chinese language and culture upon request. Since December 2012, the WSU-CI has produced short, weekly videos spotlighting Chinese idioms with corresponding supplementary videos to enhance Chinese language learning. The WSU-CI also works with its sister school, Huazhong University of Science and Technology and other Chinese universities, to promote exchange and joint degree programs.

C.S. Mott Center for Human Growth and Development

275 E. Hancock; 313-577-1337; Fax: 313-577-8554

Interim Director: Jay M. Berman, M.D.

Co-Director: Stephen A. Krawetz, Ph.D.

The Mott Center was established in 1973 for the purpose of conducting basic and applied research in the areas of biomedical reproductive sciences. Its mission is to advance research and research training in women's and children's health, focusing on reproductive biology, toxicology and perinatal medicine towards personalized reproductive medicine using a systems approach. The Center's objectives are to conduct basic and clinical research and research training in:

1. developmental biology, developmental disorders, preterm birth, preeclampsia, perinatal and neonatal physiology;
2. reproductive toxicology, teratology and the effects of drugs and environmental pollutants on pre- and post-natal life;
3. the etiology, mechanism and treatment of human genetic diseases;
4. developing new technologies in fertility/infertility and contraception;
5. changes and problems associated with reproductive and related mechanisms across the life cycle, as well as management and treatment relevant to these changes; and
6. undergraduate and postgraduate education in human growth and development.

The Center is strategically situated in a recently renovated state-of-the-art free standing physical plant that houses primarily faculty and staff from the Department of Obstetrics and Gynecology, School of Medicine. It is utilized to support the basic research activities of this department, as well as work in conjunction with departments across the University, including Physiology, Molecular Medicine and Genetics, Pediatrics, Computer Sciences, Psychiatry, the Merrill Palmer Skillman Institute as well as others. Obstetrics and Gynecology faculty at the Mott Center also work in close association with basic science and clinical departments within the School of Medicine and with Hutzel Women's Hospital and other clinical facilities in the Detroit Medical Center and the Henry Ford Health System. In addition, the Mott Center provides laboratory facilities to support the basic research activities of the Perinatology Research Branch (PRB) of the National Institute of Child Health and Human Development, National Institutes of Health, and houses the Wayne State University Applied Genomics Technology Center along with substantial epigenomics and bioinformatics capacity. In addition the Mott Center houses the new Clinical Research Center that serves the needs of the University's translational research program.

As the basic research hub of the Department of Obstetrics and Gynecology, the Mott Center also supports the graduate teaching activities of this department. The graduate program offers interdisciplinary doctoral-degree training in the reproductive sciences with the Ph.D. degree earned through the Department of Physiology. This is an integrated Ph.D. program incorporating the teaching, research and physical resources of two departments Obstetrics and Gynecology and Physiology at the Wayne State University School of Medicine. The program's integration into the Department of Obstetrics and Gynecology allows students the unique opportunity to obtain a Ph.D.

in a clinical environment. Reproductive scientists and physiologists from both departments guide graduate students through their course work and research training. The curriculum focuses on education and research training in reproduction and development using a systems biology approach including genomics, proteomics, molecular biology and bioinformatics. Dissertation research is typically performed in the basic science laboratories at the Mott Center under the mentorship of Obstetrics and Gynecology faculty.

Damon J. Keith Center for Civil Rights

471 W. Palmer St.; 313-577-3620
Director: Peter J. Hammer, J.D., Ph.D.
<http://www.keithcenter.wayne.edu/>

The Damon J. Keith Center for Civil Rights memorializes the work of the Honorable Damon J. Keith, Senior Judge for the United States Court of Appeals for the Sixth Circuit, a civil rights icon, and one of our country's leading jurists. The Keith Center is also a leading source for the legal history of the civil rights movement and the historic accomplishments of African American lawyers and judges. The Keith Center is further dedicated to research and community outreach addressing modern challenges to civil rights and racial justice.

The Keith Center seeks to honor Judge Keith by developing programs and opportunities that build upon his contributions to promoting equality and justice under law. The Keith Center promotes civil rights educational opportunities and encourages research on racial justice issues, including housing segregation, inadequate and segregated education, and unequal economic opportunities, with a particular focus on southeastern Michigan. It also contributes to the development of the next generation of civil rights advocates by providing opportunities to work with leading civil rights organizations and providing scholarships to Wayne Law students interested in pursuing civil rights law. The Keith Center partners with the Wayne Law clinics to engage the community directly through education initiatives and direct services.

The Keith Center recognizes the ongoing need for institutions that instill the virtues of social conscience and sensitivity to the challenges that remain in the fight for legal and social equality. The Keith Center is a national and international resource for identifying and defining the struggles that have occurred and addressing those that remain.

Developmental Disabilities Institute

Leonard Simons Building, Suite 268, 4809 Woodward Avenue;
313-577-2654 or 1-888-978-4334; Fax: 313-577-3770
Director: Barbara LeRoy, Ph.D.;
Email: B_Le_Roy@wayne.edu
<http://www.ddi.wayne.edu/>

The Developmental Disabilities Institute is one of a national network of over sixty University Affiliated Programs, nationally and in U.S. territories. The Institute's mission is to contribute to the development of inclusive communities, which enhance the quality of life of people with disabilities and their families through a culturally-sensitive statewide program of interdisciplinary education, community support and services, and research and dissemination of information.

Staff and faculty engage in technical assistance, training, and research programs throughout Michigan via collaborative efforts with schools, community agencies, community colleges, and other Universities. Over 10,000 individuals with disabilities benefit from these activities annually. The Institute offers a wide range of opportunities for students and faculty to engage in state-of-the-art community-based research, education, and technical assistance.

Students from a wide range of disciplines are provided opportunities for interdisciplinary leadership education and participation in research, training, and technical assistance projects. Students may earn credits for designation as Trainees of the University Affiliated Program. These activities allow students to develop leadership skills and to gain skills in working with an interdisciplinary team. Interdisciplinary Education Programs of the Institute are developed as cooperative efforts between the Institute and academic units throughout Wayne State University and in collaboration with other universities in Michigan. The Graduate Certificate Program in Disabilities offers leadership education opportunities related to community integration and support of persons with disabilities; see Disabilities (Graduate Certificate (p. 321)). A number of other programs have been developed with academic programs throughout the University.

The Institute develops activities and projects based on needs of persons with disabilities and the communities in which they live and work. The Community Advisory Council, composed of representatives of twenty-five key statewide organizations, meets bi-annually to provide information and assistance to Institute staff and faculty in establishing priorities and evaluating activities.

Douglas A. Fraser Center for Workplace Issues

Walter P. Reuther Library, 5401 Cass Ave.; 313-577-5382; Fax:
313-577-5359
Director: Marick F. Masters, Ph.D.
Email: marickm@wayne.edu
<http://www.clas.wayne.edu/fraser/>

The Douglas A. Fraser Center for Workplace Issues is a core part of Labor@Wayne. It was chartered by the University Board of Governors in 1998 to honor Douglas Fraser, former president of the United Automobile Workers (UAW). The Center has been endowed by major gifts from the UAW, General Motors Corporation, Chrysler Corporation, and Ford Motor Company, and generous gifts from many other organizations and individuals, including the United Steelworkers of America. The mission of the Fraser Center is to generate knowledge and information about best practices in the workplace through effective union representation. The Center is guided by the external and internal advisory Boards of Labor@Wayne. It supports research through the Fraser Fellows, Fraser Scholars, Fraser Paper Series, and Fraser Workshop activities. It sponsors the annual Labor Leaders on Labor Forum which honors nationally prominent leaders for their contributions to working people and families. The Fraser Center also convenes numerous conferences and events to bring academics, labor leaders, business leaders, and policymakers together to discuss important workplace and public policy topics. It focuses on manufacturing, healthcare, and the public sector. The Fraser Center supports various topical White Papers on key issues such as employee engagement through labor-management joint initiatives.

Humanities Center

2226 Faculty/Administration Building; 656 W. Kirby
Telephone: 313-577-5471; *Fax:* 313-577-2843
Director: Walter F. Edwards, Ph.D.
Email: walter.edwards@wayne.edu
<http://www.research2.wayne.edu/hum/>

The mission of the Humanities Center is to nurture interdisciplinary, transdisciplinary and intradisciplinary work in the humanities and the arts through competitions, conferences, discussion groups and other programs for Wayne State's humanities and arts faculty and students, and for visiting scholars and artists. The Center promotes excellence in research and creative endeavors through rigorous peer review of

proposals submitted to it for funding. By sponsoring programs that involve community participants, the Center supports the University's urban mission. Through its various programs, the Center brings humanists of diverse talents and interests together for conversation and collaboration, and fosters innovation and creativity across the humanistic disciplines.

The Humanities Center provides funding support to both faculty members and students. Two of the Center's most prominent faculty programs are the Marilyn Williamson Endowed Distinguished Faculty Fellowship (MWEDF) and an annual themed Faculty Fellowship Competition. The Center awards either one or two Williamson fellowships a year, each worth \$20,000, depending on the funds available in the budget. Other faculty award programs include an annual themed the Faculty Fellowship Competition with between eight and ten recipients awarded up to \$6,000 each. Prominent student programs are the Doctoral Dissertation Fellowship and the Graduate Travel program. The Doctoral Dissertation Fellow will receive \$15,000 plus health care coverage if it is requested. Up to three smaller awards of \$500 may be made at the discretion of the Center to applicants for the award. The Graduate Travel program encourages graduate students in the humanities and the arts to present their research or artistic work at national conferences and exhibitions by offering up to \$300 in travel assistance to applicants. Please check the Humanities Center Web site for additional programs that provide funding opportunities for faculty.

Institute of Environmental Health Sciences

Integrative Biosciences Center, 6135 Woodward Ave.; 313-577-5631; Fax: 313-972-8025

Director: Melissa Runge-Morris, M.D.

Email: iehs_info@wayne.edu

<http://www.iehs.wayne.edu>

The Institute of Environmental Health Sciences (IEHS) is the originator of the Center for Urban Responses to Environmental Stressors (CURES). The CURES Center focuses on how the stresses of urban, industrialized life affect vulnerable populations. Two defining features of this urban environment are:

1. the exposure to stressors that are especially prevalent in the urban industrialized environment, including physico-chemical (e.g., air pollution, heavy metals, polychlorinated biphenyls, maternal alcohol exposure) and psychosocial (e.g., the stress experienced by first responders to emergencies) stressors; and
2. the experiences of people who are particularly vulnerable to the adverse effects of such exposures (e.g., children and adults of low socio-economic status, older adults, first responders, and refugees).

Detroit's leadership in the automobile manufacturing industry during the 1950s-60s brought prosperity to this region with an unprecedented level of private home ownership. The 1970s-90s introduced global competition to car manufacturing and eroded Detroit's dominance in the automotive industry. Today, with its reduced tax base and aging population, Detroit's infrastructural support is at an all-time low. The population of the City of Detroit has declined by 64% from its zenith of 2 million in 1950 to an estimated 713,777 according to the 2010 census. As industry and residents leave Detroit, urban blight has caused large areas of the city to become areas of environmental concern. Today, Detroit is the "poster child" for urban rezoning, restructuring, and rebuilding (Time Magazine, Sept. 24, 2009; The Wall Street Journal, May 14, 2010; The Washington Times, March 9, 2010). The mayor is working with Detroit's communities and urban leaders to "right size" the city so that neighborhood resources and infrastructure can be realigned to match the current density and

needs of the urban populace. This ambitious goal will require activity by many groups and stakeholders, and includes plans to relocate individuals, schools, and support facilities from abandoned "ghost town" neighborhoods to newer revitalized population centers. Urban gardens are planned, and thousands of dilapidated homes and businesses are slated for demolition in Detroit. However, the toxicological implications of urban restructuring have not been adequately addressed and need to be dealt with effectively to ensure a safe transition toward a modernized, clean, "right-sized" urban community.

CURES investigators are partnering with members of Detroit's urban community and with academic investigators in our region. We share an underlying concern that diseases that compromise the quality of life in the residents of an industrialized urban environment, such as Detroit, occur as a consequence of dynamic interactions among an individual's genetic and epigenetic make-up, nutritional status, and environmental stressors, which include chronic low-level toxicant exposures as well as psychosocial and physical stressors, that reprogram key cellular gene expression and regulatory networks to favor pathogenesis. Major goals of the CURES Center are to:

1. identify the chief environmental health threats to metropolitan Detroit's urban communities and vulnerable populations;
2. develop well-integrated mechanistic, epidemiological, and community-based research programs focused on the impact of urban environmental exposure on human health;
3. characterize the molecular signatures of urban environmental toxicant exposure using cellular, animal, and human models; and
4. discover and validate novel biomarkers of environmental disease risk that can be applied to disease prevention and policy change initiatives

With its unique emphasis on applying transdisciplinary team science to achieve translational research gains in the field of urban environmental public health, the CURES Center stands at the leading edge of the next wave of paradigm-shifting advances in this field. The next generation of "environmental health scientists" will most certainly be team scientists who above all are supremely facile with applying transdisciplinary approaches to tackle tough environmental health issues. Understanding exposure to environmental stressors requires an integrated appreciation of environmental contaminants in our physical environment, their bioavailability, the means of personal exposure, and interactions of contaminants with emotional stress and gene expression networks that influence health outcomes in the individual. The new leaders in this field will bring a transdisciplinary team approach to the research table, offering much needed diversity of expertise in civil engineering, industrial hygiene, urban planning, community engagement, toxicant chemistry and bioavailability, mechanistic science, exposure science and bio-monitoring, medicine, population science, psychiatry, social work, geopolitics, computer modeling, genetics/epigenetics, bioinformatics and yes, teamwork. The CURES Center is optimally positioned on "the ground floor" of innovative team science opportunities that have the greatest promise to realize the early detection, prevention and eventual eradication of urban environmental disease in our lifetime.

Institute of Gerontology

87 E. Ferry St.; 226 Knapp Bldg.

Telephone: 313-577-2297; Fax: 313-664-2667

Director: Peter Lichtenberg, Ph.D., A.B.P.P.

Email: ioginfo@wayne.edu

<http://www.iog.wayne.edu>

The Institute of Gerontology was created in 1965 by the Wayne State University Board of Governors in response to a mandate by the State of Michigan. Its mission is to:

1. sustain a premiere program of behavioral and social research with a focus on aging and health among diverse social groups in varying social settings;
2. collaborate with faculty across Wayne State University, the State of Michigan, and globally to stimulate research and teaching on gerontology issues;
3. prepare tomorrow's leaders in aging research through mentorship in its rigorous and nationally recognized pre- and post-doctoral training programs;
4. prepare practitioners, connect seniors and their families to current knowledge, and improve the lives of citizens through the Institute's colloquia series, continuing education, and community outreach education programs; and
5. build research, education, and outreach programs in aging that will stand the test of time by strengthening support of the Institute of Gerontology through community partnerships.

The Institute of Gerontology strives to contribute relevant research and education devoted to enhancing the quality of life of older people, especially those who reside in metropolitan Detroit and the State of Michigan. The interdisciplinary team of faculty partner with academic colleagues, trainees, community organizations, and citizens to better understand aging and health. It works to promote the integration of gerontology into the broader research, teaching, and service activities of Wayne State University, and employs analytical and conceptual advances in the understanding of aging and related processes, with specific attention focused on health and health disparities in our urban environment.

Institute for Learning and Performance Improvement

399 Education Bldg.; 313-577-5139; Fax: 313-577-1693
Director: Ingrid Guerra-López, Ph.D.
Email: iguerra@wayne.edu

The mission of the Institute for Learning and Performance Improvement (ILPI) is to improve community, organizational, and individual performance in the workplace. To this end, one of ILPI's aims is to bridge research and practice through the application of systematic and scientific processes for measurably improving performance. Therefore, ILPI offers rigorous performance improvement methodologies that are based on empirical evidence, and have the scalability and flexibility to fit a variety of contexts and situations in private and public sectors. ILPI personnel are internationally recognized experts in their fields with both theoretical and applied experience in a variety of areas including: needs assessment; performance, program, and impact evaluation; performance measurement and management systems, including dashboard design; instructional and performance design; change creation and change management; training and development, including interactive technologies; leadership coaching; and customer and employee surveys. The benefits targeted by ILPI are measured through several important indicators, including:

Organizational Benefits

- Increased personnel competence, productivity, efficiency, and profitability
- Reduced costs and improved image in the community and customer satisfaction

Community Benefits

- Improved quality of life, self-sufficiency and resident satisfaction
- Business and job creation
- Educational attainment and health promotion

Intellectual Property Law Institute (I.P.L.I.)

This Institute was created in 1987 as a cooperative effort of the law faculties of Wayne State University, the University of Detroit Mercy and the University of Windsor in Ontario. The Institute offers an exceptional, rich curriculum for law students with courses and seminars in patent, copyright, trademark, computer and related technology, communications and media law and entertainment law. Law students who enroll in I.P.L.I. courses pay tuition to their home institution; Wayne State students receive transfer credit for I.P.L.I. courses taken at the other law schools. In addition to these courses, Law School students have the opportunity to take courses at another Detroit law school and at a law school across the border in Canada through the Intellectual Property Law Institute (I.P.L.I.).

Labor Studies Center

3178 Faculty/Administration Building; 313-577-2191; Fax: 313-577-7726;
Email: laborschool@wayne.edu
Director: Gayle Hamilton

The Labor Studies Center is a comprehensive labor education center committed to strengthening the capacity of organized labor to represent the needs and interests of workers, while at the same time strengthening the University's interdisciplinary research and teaching on labor and labor relations issues. The Center's primary areas of research and practice include: training and technical assistance to unions on labor relations and workplace issues; an undergraduate labor studies major and internship program; interventions to increase the organizational effectiveness of unions; the development and diffusion of constructive labor-management relations practices, particularly in the public sector; the formation and institutionalization of labor-community coalitions; and the impact of lean production systems on workers and labor relations practice in the North American auto industry.

Ligon Research Center of Vision

Ligon Research Center of Vision, 4717 St. Antoine; 313-577-9136
Director: Gary Abrams, M.D.
Scientific Director: Zhuo-Hua Pan, Ph.D.
Email: ligoncenter@med.wayne.edu
<http://www.kresgeeye.org/research/ligon-research-center-of-vision/>

The Ligon Research Center of Vision was chartered in 1999. The Center was founded by a gift from philanthropist Robert Ligon, with the mission to restore vision to the blind. The Center is a collaborative effort between the departments of Ophthalmology and Anatomy & Cell Biology at Wayne State University, conducting interdisciplinary research on molecular biology, immunocytochemistry, electrophysiology, gene therapy, and animal behavior. In particular, the Center invented a novel strategy for vision restoration, the optogenetic gene therapy.

The severe loss of photoreceptive cells in inherited or acquired retinal degenerative diseases, such as retinitis pigmentosa or age-related macular degeneration, can result in partial or complete blindness. The optogenetic gene therapy strategy for restoring vision relays upon expressing a light sensitive protein, called channelrhodopsin-2 (ChR2) from green algae, to convert light-insensitive inner retinal neurons into photosensitive cells, thus restoring light sensitivity to retinas lacking photoreceptors. Using recombinant adeno-associated virus (rAAV) vectors to deliver ChR2, previous work in the Department of

Anatomy/Cell Biology and the Ligon Center of Kresge Eye Institute has demonstrated the feasibility of restoring light sensitivity to the retinas of photoreceptor-deficient animal models. The technologies developed at Wayne State University have been licensed to a biotech company, RetroSense therapeutics. In August, 2015, RetroSense's first optogenetic gene therapy drug application received clearance from the US Food and Drug Administration (FDA) for clinical trial.

To achieve better outcomes for the restored vision in patients, current research in the Center focuses on the further development of the optogenetic technologies. The studies include improving the properties of optogenetic light sensors, developing virus-mediated targeting to specific inner retinal cell type(s), improving rAAV-mediated delivery and transduction efficiency in retinal neurons using non-human primate models.

Manufacturing Information Systems Center

328.02 Prentis Bldg., 5201 Cass Ave.; 313-577-4545; Fax: 313-577-5486
Email: aragowsky@aol.com
Director: Arik Ragowsky, Ph.D.

The Manufacturing Information Systems Center was chartered in 2000. Its mission is to enhance and extend the Mike Ilitch School of Business' involvement with Enterprise Resource Planning (ERP) systems research, and place it at the front of information systems and ERP research. The Center conducts interdisciplinary research on the use and value of ERP systems to the manufacturing industry and on methods of using information systems for management and competitive purposes. In addition, the center conducts research about the following topics: The gap between IT and the organizational managers and users, and the way to bridge this gap; Outsourcing versus insourcing of IT activities; and, Different trends in the IT industry like cloud computing.

Another goal of the Center is to link research to real life and to address the business community's needs. For this purpose, the Center's research staff collaborates with the business community and provides the respective participants with the research findings in order to help them to efficiently plan and use their ERP and other information systems for better operation, management, and competition. For this purpose, a new initiative with colleagues from Oakland University and Drexel University (Philadelphia) has been undertaken: an annual CIO (Chief Information Officer) Roundtable discussion. In consultation with some of the CIOs, the faculty members determine which topics will be covered at the next Roundtable. The faculty members undertake research on these topics, present opening comments on the topics, and then moderate the discussion while refraining from offering their own opinions. The purpose of the Roundtable is to let the CIOs discuss significant topics among themselves and to learn from each other. These discussions inform the faculty members' course content and research efforts, enhancing student learning and leading to scholarly presentations/publications of both basic and applied research. To date, the Center has held eight Roundtable discussions; the participants have been very pleased and encouraged us to continue these meetings. As ERP systems have grown beyond the manufacturing sector, the Center has involved organizations from other industries, such as finance, green energy, and government. We published seven papers in different academic journals based on these Roundtable discussions, with additional papers in process.

The Center involves students in its activities. The Center organizes projects for students in real-life organizations where the students can practice the theory they learned in class. For instance, the Center worked with the Lear Corporation, conducting projects with fourteen of Lear's plants. Students gained significant knowledge and experience, the

participant plants learned how to better use information systems in general and ERP in particular, and the Center faculty members prepared academic papers based on these case studies.

These types of activities expand the visibility of the University and the Mike Ilitch School of Business in the business community, while benefiting businesses, students and faculty research activities.

Merrill-Palmer Skillman Institute for Children and Families

71 East Ferry Ave.; 313-664-2500; Fax: 313-664-2555
Interim Director: Peter Lichtenberg, Ph.D.
Email: mpsi@wayne.edu
<http://www.mpsi.wayne.edu/>

The Merrill-Palmer Skillman Institute is an interdisciplinary research institute focusing on urban children and families. It has a long and distinguished history as a research and educational institution, serving as a pioneer in the field of child development and early education. Since it became a part of Wayne State University in 1982, the Institute has encouraged collaborations among faculty from many departments within the University.

The Institute emphasizes research, research training and community engagement and service in the areas of children's health and development. Current research strengths range from pre-natal exposures and child development, infant mental health, cognitive development of high risk infants as well as adolescent health and development. The service programs of the Institute are an outgrowth of its research mission. MPSI operates one of the nation's oldest preschools. Community outreach and engagement through MPSI's Healthier Urban Families Program includes training of mental health workers who serve very young children in the care of public and non-profit agencies; consultation to education and child care organizations; workshops for teachers, parents and the public; and the annual Metropolitan Detroit Teen Conference.

Infant Mental Health: Dual-title degree programs in infant mental health are offered in conjunction with degrees sponsored by the Schools of Nursing, Education and Social Work. For curricula pertaining to these programs, please refer to the individual program and school/college sections in this bulletin.

Computing and Information Technology Division (C&IT)

Office: 5925 Woodward Ave.
Tel.: 313-577-4722; Fax: 313-577-5500
Associate Vice President and Chief Information Officer: Daren Hubbard
<http://computing.wayne.edu>

Computing and Information Technology (C&IT) provides IT services and resources that support and enhance Wayne State University's teaching, learning, research, and administrative activities. C&IT's primary goal is to provide technology services that enable our students, faculty, and staff to be successful at WSU. C&IT employees strive to provide excellent customer service, respond to the changing needs of the University community, and make it easy and convenient for everyone to use technology at Wayne State. Functional C&IT organization charts are available on our website (<https://computing.wayne.edu/about/org-charts.php>).

AccessID

Everyone at Wayne State receives a unique identification code (AccessID) consisting of two letters and four numbers, for example: xy1234. The AccessID and password are key to accessing many University online systems; the Access ID can be found on the One- Card; passwords are assigned with initial email communications in the admissions application process.

Email and Communication Tools

Wayne Connect: The University's Wayne Connect system is a campus-wide method of communication. It is powered by Microsoft and features email, calendars, online storage, mobile apps, and more.

Broadcast Messaging (Emergency Alerts) (<https://broadcast.wayne.edu>): This University-wide service delivers emergency alerts and other significant messages to faculty, students, and staff. Recipients can register their cell phones to get emergency alerts, grades, and other important information via text messages.

Mobile Apps

Wayne State Mobile App offers students, faculty, staff, and alumni an easy way to access University information like email, calendar, parking availability, class schedules, campus maps, OneCard balances, and more. Apps are available for free download on Android and iOS devices.

Academic IT Services

Canvas (<https://tech.wayne.edu/kb/academic-services>) is Wayne State's online learning management system. Students can take quizzes, upload assignments, participate in message boards and more. Free mobile apps for teachers and students are available.

Computer Labs (<http://www.computing.wayne.edu/computer-labs>): The University libraries have both open and restricted-access computing areas, with more than 600 computers and a variety of applications. Additionally, many Schools, Colleges, and academic departments provide special-purpose computers and software for their students and faculty.

Grid Computing (<http://www.grid.wayne.edu>): WSU researchers with projects requiring high performance computing can use Wayne State University's scalable, Grid-enabled computing system.

Administrative IT Services

Academica is the primary online means to securely register for classes, apply for financial aid, pay tuition, and more.

Internet Access (<http://computing.wayne.edu/wireless>): WSU's wireless networks offer high-speed Internet access within campus buildings including the residence halls. We recommend connecting to WSU-SECURE whenever possible.

Research Networks: Internet2 and MiLR (<http://computing.wayne.edu/research-networks>): Wayne State's membership in the Internet2 advanced networking consortium offers researchers countless opportunities for participation and collaboration. The Internet2 Network addresses researchers' bandwidth-intensive requirements, such as: collaborative applications, distributed research experiments, and grid-based data analysis.

Software Purchases and Discounts (<https://computing.wayne.edu/helpdesk/freesoftware.php>): The C&IT Help Desk provides free and discounted software to current students, faculty and staff for academic, departmental and personal use.

Computer Security (<http://security.wayne.edu>): Students can rely on C&IT to protect the confidentiality, integrity, and availability of information on WSU computer systems, but security is everyone's responsibility.

Help Desk (<https://computing.wayne.edu/helpdesk>): The C&IT Help Desk is Wayne State's campus technology headquarters - a one-stop shop for all your tech support needs. Call, email, or live chat for one-on-one help with any of Wayne State's IT systems, like email, Canvas, or Academica.

Qualtrics Online Survey Software (<http://computing.wayne.edu/qualtrics>): The Qualtrics Research Suite is a user-friendly, feature rich, web-based survey tool that allows users to build, distribute, and analyze online surveys, collaborate in real-time, and export data in multiple formats. All Wayne State students have access to a free account for this service.

Graduate Degree and Certificate Requirements

Application for Degree or Certificate

Each candidate for a degree or certificate must file an Application for Degree (<https://wayne.edu/commencement/apply-for-graduation>), no later than the Friday of the fourth week of classes for the semester in which the student expects to complete the requirements for the degree or certificate. If an application for a degree was filed for a previous graduation term in which the student did not graduate, a new application and fee is required. Applications for graduation require that a \$40.00 fee be paid in the online application process.

Master's Degrees

In addition to the following regulations, requirements may be specified by the individual graduate departments.

The minimum Graduate School requirement for the master's degree is thirty credits, at least twenty-four of which must be taken at the University. In those master's degree programs where the college, school or department requires more than the Graduate School minimum, their requirements take precedence. The Graduate School recognizes three general master's degree plans, though not all plans are offered in each department (for exact information, see listings under individual departments in the appropriate sections of this bulletin):

PLAN A requires a total of thirty credits, including a total of eight credits for a thesis (some departments require less).

PLAN B requires a total of thirty credits, including a minimum of two credits for an essay.

PLAN C requires a total of thirty credits. The essay or thesis is not required.

Candidacy for Master's Degree

Admission as an applicant does not assure acceptance as a candidate for a degree. Candidacy is a necessary but not sufficient requirement for graduation.

Generally, students enrolled in master's degree programs are expected to file a Plan of Work by the time eight to twelve graduate credits have been earned. The applicant shall be advanced to the rank of 'Candidate' upon approval of the Plan of Work by the College Graduate Office. In most colleges candidacy must be authorized by the time twelve graduate credits have been earned or subsequent registration will be denied. In preparing the Plan, the student and advisor should evaluate with care the

personal and professional objectives of the student as well as all degree and departmental requirements.

Master's Essay

Under Plan B, students are required to complete an essay prior to the granting of a master's degree. The essay must show evidence of scholarly study and writing and be related to the student's major. Students should consult their departments regarding any additional requirements for essays, as well as for correct essay manuscript style.

Master's Thesis

Under Plan A, departments require the completion of a thesis prior to the granting of a master's degree. The thesis may be of a research, expository or critical nature and should be selected and planned with care. It must be an original work, in or related to the student's major field of specialization. Work submitted for credit in other courses cannot be used in fulfilling thesis requirements. Neither the results of the research nor the publication of findings may be restricted by any non-University agency. The results of the research may be published prior to submission and acceptance of the thesis, with the approval of the thesis advisor.

The presentation of a thesis generally brings to a close the pursuit of the master's degree. In essence such manuscripts represent a tangible summation of the many hours spent in study and research to acquire a higher education. For this reason such scholarly documents must evidence only the highest standards of research and writing. They must show consistency in punctuation, style and format. The Graduate School oversees the format requirements and templates (<http://www.gradschool.wayne.edu>).

Advisors have primary responsibility for approval of the thesis. Such approval includes all academic and professional evaluations and judgments as to originality, adequacy, accuracy, significance, methodology, justification or conclusions and correctness of style. Approval shall not be recorded until the work and manuscripts are fully verified and accepted.

Additional Essay or Thesis Elections and Fee Policy

A master's student who has enrolled for all elections (including essay or thesis) stipulated by his/her Plan of Work, and who has completed all the requirements of these elections, but has not completed the essay or thesis, will be required to register for at least one credit (the appropriate amount to be determined by the department) of essay or thesis direction until such time as the student:

1. completes the requirements for the degree;
2. declares himself no longer a candidate for the degree; or
3. exceeds the time limit allotted for securing the degree.

For these credits, the student will pay customary fees and will register as an auditor. No degree credit will be granted for these elections which are beyond the required credits for an essay or thesis. A mark of 'Z' (Auditor) will be recorded on the student's record for additional elections.

College of Nursing: The additional elections and fee policy also applies to field studies and research practicums.

Time Limitation for Master's Degree

Students have a six-year time limit to complete all requirements for the master's degree. The six-year period begins with the end of the semester during which the student has taken work which applies toward meeting the requirements of the degree. The individual college or school reserves the right of revalidation of over-age credits which are between six and ten years old and which represent courses completed at Wayne State University. Such authority rests with the Graduate Officer of the college or school. Students are not permitted to revalidate credits earned at other

institutions. In revalidation cases the advisor and the student must set a terminal date for completion of all degree requirements, including such additional requirements as may be prescribed to revalidate the over-age credits. Time extensions beyond these conditions are authorized only for conditions clearly beyond the student's control.

A student registered in a non-degree graduate classification is cautioned that only one semester of full-time graduate study, or part-time registration not to exceed nine credits, is permitted in this classification. Not more than nine credits may be applied toward the credit requirements for the master's degree.

Please see the appropriate school and college sections of this bulletin for specific master's program information.

Doctor of Philosophy Degrees (Ph.D.)

In addition to the following regulations, additional requirements for doctoral degrees may be specified by the individual graduate departments.

Requirements for the degree of Doctor of Philosophy emphasize an overall understanding of and high competence in a field of knowledge, familiarity with cognate disciplines, facility in the use of research techniques, and responsibility for the advancement of knowledge. The meeting of the requirements for the doctorate is tested primarily by examinations and the presentation of the dissertation rather than by a summation of courses, grades and credits.

Admission: Ph.D. Program

Students may be admitted to the status of Ph.D. applicant if they meet all Graduate School requirements for admission, presents a grade point average of 3.0 ('B'=3) for the upper division of the undergraduate course work and are accepted for study toward the degree by their school or college and major department. Additional requirements (e.g., letters of recommendation, undergraduate research experience, personal interview, specific coursework, service learning) are specified by departments and programs. Students presenting less than a 3.0 undergraduate grade point average are required to complete a master's degree program, or its equivalent, prior to consideration for admission to a Ph.D. program.

Initial Ph.D. Advising

An advisor is assigned to the student at the beginning of his/her program and represents the Department in helping plan the student's program. The advisor provides academic guidance, approves required documents and monitors student progress. The initial advisor serves until the time the student identifies a dissertation director, who then assumes advising responsibilities.

Graduate Faculty and Ph.D. Student Responsibilities

Course work and research leading to the doctoral degree is a matter of shared responsibilities between faculty members and Ph.D. students. The Graduate Council has established the following reciprocal obligations:

Ph.D. program faculty are responsible for:

1. Admitting qualified students whose research interests can be accommodated within those of the program.
2. Ensuring that students receive competent and sustained advising from their entry into the program until degree requirements are completed or the student is separated from the program.
3. Monitoring and evaluating student progress toward the degree and for communicating the results of the evaluation to the student on an annual basis.
4. Assisting students in locating potential dissertation directors.
5. Offering guidance and instruction in those research areas in which they have expertise. To this end individual faculty members are responsible for deciding whether or not to serve as a dissertation

director for any given student. This responsibility rests solely with the faculty, who are expected to make decisions based on reasonable academic criteria.

Ph.D. program students are responsible for:

1. Identifying research areas in which the Ph.D. program can provide guidance. The selection of a research area outside these areas may cause difficulty in achieving the degree.
2. Maintaining good standing throughout the doctoral program and making normal progress toward the degree.
3. Requesting that an individual member of the faculty serve as the dissertation director, working with the dissertation director toward timely completion of degree requirements, and complying with the dissertation director's instructions.

Ph.D. Procedural Calendar

The stages of the Ph.D. degree are outlined below. The section following describes these stages in detail. Necessary forms and additional instructions and requirements may be found on the Graduate School website (<http://wayne.edu/gradschool/phd>).

1. **Plan of Work:** Initiated by the student and completed with his/her advisor to plan the sequence of study. An approved Plan is a requirement for Ph.D. Candidacy.
2. **Ph.D. Coursework:** Ninety graduate credits beyond the baccalaureate degree are required. Completion of about fifty credits of coursework is a requirement for Ph.D. Candidacy.
3. **Annual Review:** The student's department prepares a review of the student's progress at the end of each academic year.
4. **Qualifying Examination:** The qualifying examination contains a written portion and may include an oral component. Successful completion of the qualifying examination is a requirement for Ph.D. Candidacy.
5. **Dissertation Advisory Committee:** The naming of a dissertation advisory committee is a requirement for Ph.D. Candidacy.
6. **Candidacy:** Ph.D. Candidacy begins the dissertation preparation phase of the degree.
7. **Dissertation Registration:** Four consecutive academic-year semesters of registration as a degree candidate are required during the preparation of the dissertation.
8. **Oral Examination:** An oral examination is required of all Ph.D. students. It may be addressed as part of the qualifying examination, a prospectus meeting, a lecture or seminar, or another format approved by the student's department.
9. **Dissertation Prospectus:** After attaining Candidacy, the student prepares a description of the proposed research and dissertation for approval by his/her advisory Committee.
10. **Dissertation Preparation:** The dissertation presents the original scholarship or research completed by the student.
11. **Dissertation Public Lecture-Presentation Defense:** The student presents and defends the dissertation in a public lecture.
12. **Submission of approved dissertation:** The student must submit the approved dissertation electronically.

Plan of Work

This planning document, which is developed by the student and the advisor, should include both course and non-course objectives. An interim Plan of Work, to be retained in the department, should be developed by the end of the student's first year and updated annually. The final Plan of Work requires the signatures of both the advisor and the departmental Graduate Director prior to submission to the Graduate School for approval. The final Plan of Work (<https://gradschool.wayne.edu/phd/forms>) may be filed with the Graduate School at any time; however, it must be submitted before forty credits have been completed and before the qualifying examination is scheduled. Once a student has an approved Plan of Work on file with the Graduate School, any changes to that plan are monitored and approved at the department level. The student is primarily responsible for monitoring that they've taken the minimum number of credits to earn the degree; 90 credits total, at least 30 WSU coursework credits, 60 coursework credits total, and 30 dissertation block credits.

Transfer credit: A student wishing to transfer graduate credit toward the Ph.D. degree must file a petition with the Graduate School via the Transfer of Credit form (<https://gradschool.wayne.edu/phd/forms>), approved by his/her advisor and departmental graduate director, requesting such transfer. The petition must be supported by an official transcript showing a minimum grade of 'B' for the courses to be transferred; 'B-minus' and credit earned with 'S' and 'P' (satisfactory or pass) grades are not acceptable for transfer. When students would like to transfer credits from institutions without course codes, the closest WSU equivalents must be listed. When students would like to transfer credits from institutions without letter grades, a conversion chart must be used and submitted to the Graduate School. When students would like to transfer credits toward the 30 required 7000-level and above, evidence that those courses were open to graduate students only, and not undergraduates with special permission, must be submitted to the Graduate School. Up to thirty-two semester credits of 'B' or better graduate credit earned at Wayne State University or another institution prior to the student's admission as a doctoral applicant may be applied toward the degree without regard to lapse of time. Credit earned with 'B' minus or 'S' or 'P' (satisfactory or pass) grades are not acceptable for transfer.

Ph.D. Coursework

To ensure adequate preparation, the Graduate Council has adopted minimum coursework requirements for the University's highest degree. Many programs will exceed these minima.

A minimum of ninety graduate credits beyond the baccalaureate degree is required for completion of the Ph.D. program. A Ph.D. program will consist of:

1. at least twelve credits of coursework in the major (not including directed study or research credit);
2. sufficient additional coursework to total sixty credits (major and minor coursework, pre-dissertation research and directed study); and
3. thirty credits earned in four consecutive Candidate Status semesters after candidacy has been approved.

The Ph.D. program should provide for effective concentration in a major field with supporting courses in related fields. The decision concerning whether the student's Plan of Work will include a minor is made by the department.

The total Ph.D. program must include thirty credits, excluding Candidate Status semesters, in courses open only to graduate students (i.e., 7000 level or above).

Directed Study

Registration in directed study must have advance approval of the student's advisor and advance authorization of the student's department. A Graduate School Petition and Authorization for Directed Study must be signed by the student's advisor, instructor, and the Graduate Director of the department before registration. The Directed Study Petition must contain all relevant details, including an explicit course outline, a rationale for the course, and information about the major academic requirements the student must successfully fulfill.

Mandatory Ph.D. Pre-Candidacy Enrollment

During the pre-candidacy stage, registration is required in all semesters in which the Ph.D. student uses University resources, including the semester(s) in which the Qualifying Examination is taken. The student must register for a minimum of one graduate credit.

Annual Reviews

All Ph.D. students are required to receive an annual review of the student's progress toward completion of degree requirements. The student's progress in course work, scholarship, teaching, and all other academic or professional areas defined by the department will be summarized and communicated to the student in writing. The annual review must be signed by the student, advisor, and departmental Graduate Director. The annual review is filed in the student's department.

Individual Development Plans (I.D.P.'s)

To promote long-term career planning and development, all Ph.D. students are required to complete an Individual Development Plan (IDP) by the end of their first year in graduate school. These documents are designed to foster conversation between a student and their mentor(s) about career goals and the skills necessary to succeed in those positions after graduate school. The document is to be updated annually throughout the student's tenure in graduate school to promote follow through on the action plan and to revise the action plan in response to new opportunities and increased competency. This document is completed on-line. It is approved electronically by both the dissertation advisor and the Graduate Director.

Qualifying Examination

The Qualifying Examination covers the student's primary areas of study and research, as well as such related matters as the qualifying examining committee may prescribe. The Qualifying Exam must contain a written component; an oral component (described later) is optional. No part of the dissertation proposal may be used to satisfy the written Qualifying Examination requirement.

The Qualifying Examining Committee must consist minimally of three members, two of which must be from the major department, and at least two must hold Regular Graduate Faculty appointments. An external member may be added at the discretion of the department. In this latter instance, the department is encouraged to select a person from the student's minor/cognate area. The membership of this committee may not normally be changed until the Qualifying Examination(s) (written or written and oral, as required) have been passed.

If the written component of the Qualifying Examination is not completed successfully at the first administration, the examination may be repeated only once. A second examination may not be held until at least one semester has elapsed, but must be held within one calendar year following the first examination. The same examining committee must preside over both examinations. The second written examination will be considered final.

The student's examining committee will select one of its members to serve as the Graduate Examiner. The results of the oral qualifying

examination are to be communicated to the Graduate School via Report on Doctor of Philosophy Oral Examination form (<https://gradschool.wayne.edu/phd/forms>). If the Oral Examination is part of the final Qualifying Examination it must be completed within 60 days of the written exam.

If the Graduate Examiner certifies that the applicant has not passed all parts of the oral examination, the committee may recommend that a second oral examination be held. If a second oral examination is recommended, the committee must specify any additional work the student must complete prior to that examination. A second examination may not be held until at least four months have elapsed, but must be held within one calendar year following the first examination. The second oral examination shall be considered final.

Dissertation Advisory Committee

The dissertation advisory committee shall consist minimally of four members. If there are co-chairs, the committee shall consist of five members. At least two committee members shall be from the student's home department/program, and at least two shall hold Regular Graduate Faculty appointments. The committee chair shall hold a Regular Graduate Faculty appointment in the home unit, and if there are co-chairs, at least the one from the home unit shall hold a Regular Graduate Faculty appointment. The committee shall have at least one external member who broadens the dissertation committee beyond the home program to represent a different perspective by virtue of his/her field, location or knowledge application; who does not hold any salaried or contractual appointment, tenure line or retreat rights in the home program; and, who is familiar with the standards for doctoral research. The expertise of the extra-departmental member must be appropriate to the student's dissertation work. The dissertation director and advisory committee should be identified as early as possible, and by the time course work is completed at the latest. The dissertation advisory committee membership must be submitted to the Graduate School as a condition for attaining candidacy. The committee membership may be changed up to the time the dissertation prospectus is submitted. After Graduate School approval of the dissertation prospectus, any changes in committee membership will require written justification via the Change in Committee form (<https://gradschool.wayne.edu/phd/forms>).

Conflict of Interest: It is essential that the members of the committee have not only the requisite professional credentials, but that they are also free of conflicts of interest or commitment that could bias or have the appearance of biasing their judgment about the best interests of the student and the scholarly merit of the dissertation. The present policies and procedures provide a means of disclosing and managing perceived or real conflicts of interest or commitment among dissertation committee members. Each committee member must complete and sign the disclosure form, which must be submitted prior to the approval of the Prospectus and Record of Approval form and again at the time of the Dissertation Public Lecture Presentation Defense form. Conflicts of interest or commitment include financial, personal and/or professional affiliations that could potentially or actually affect the member's objectivity about the dissertation or the student. Committee members unable to sign or provide an electronic signature must email the Ph.D. Office with this exact verbiage: I, [committee member's name], do not have a financial, commitment or affiliation conflict of interest with [student's name] nor any member of his/her committee (should a conflict be disclosed, the conflict must be briefly described).

Candidacy for Ph.D. Degree

A Ph.D. applicant will be advanced to the rank of Ph.D. Candidate by the Graduate School upon the recommendation of the department and completion of the following requirements:

1. Approval of the Plan of Work by the Graduate School;
2. completion of didactic course work, or approximately fifty credits, as required by the Plan of Work;
3. satisfactory completion of the Qualifying Examination(s);
4. identification of the membership of the student's dissertation advisory committee.

(The advisory Committee membership may be changed prior to submission of an approved prospectus to the Graduate School.) The department shall submit the Recommendation for Doctor of Philosophy Candidacy Status form (<https://gradschool.wayne.edu/phd/forms>) to the Graduate School to recommend advancing the student to degree Candidacy.

Dissertation Registration

The Doctor of Philosophy degree requires that students register for Candidate Status during the preparation of the dissertation: Doctoral Dissertation Research and Direction I, II, III, and IV (courses numbered 9991, 9992, 9993, and 9994 offered under various subject area codes, respectively), in consecutive academic year semesters. Registration for these four Candidate Status courses equates to thirty credits.

Ph.D. student enrollment in the first candidate status course prior to candidacy: Ph.D. applicants may be permitted to register in XXX 9991, Doctoral Candidate Status I: Dissertation Research and Direction, during the semester in which they expect to take their Qualifying Examination. To obtain permission to register, students must already have an approved Plan of Work on file with the Graduate School, and submit written approval prior to the census date from their advisor and graduate director that explicitly states the student is expected to achieve candidacy that term to the Graduate School. Students who submit this request to the Graduate School but do not have a Plan of Work on file by the census date will not be provided the override. Students who do not submit this request to the Graduate School by the census and then do achieve candidacy later in the semester cannot retroactively register for 9991 that semester. Students who achieved candidacy in a previous semester but did not register for 9991 can do so after the census date.

Courses numbered 9990 should only ever be taken under special circumstances: If a student is not able to register for 9991 because they are studying for their Qualifying Exam(s) but have finished all 60 credits of coursework, they may request to register for 9990, Pre-Doctoral Candidacy Research, to meet enrollment requirements (8 credits are required for full-time status). Note that 9990 credits do not count toward the 90 required for the degree and cannot be taken in 7.5 credit blocks. If there is any doubt that a student will achieve candidacy, the applicant should register for required coursework or 9990 and not request to register for 9991. Students who register for 9991 but do not achieve candidacy during that term must notify the PhD Office in writing to explain the situation, then register for required coursework or 9990. Up to 8 credits of 9990 can be taken per term; with maximum of 12 credits during the student's degree program. The 7.5 credit blocks are reserved for dissertation blocks (9991, 9992, 9993, 9994).

If a student has registered for all four Candidate Status courses but has not completed the dissertation requirements, the student may register in Candidate Maintenance status (9995) until the requirements are completed, the time limit for the degree is reached, or the student withdraws from the program. Registration in Candidate Maintenance Status is required in all semesters in which the student uses University resources, including the semester in which the student defends the dissertation. The Candidate Maintenance fee is equivalent to the Registration Fee plus the Student Services Fee for one graduate credit and confers full-time registration status.

Dissertation Prospectus and Approval

The Ph.D. Candidate must prepare and complete a prospectus of the proposed dissertation research within 18 months of being named a PhD Candidate. If this timeline is delayed, one must request a formal extension of this policy, which must be approved by the dissertation committee, the director of graduate studies, and the Graduate School. In some departments, oral presentation of the prospectus constitutes the required Oral Examination. The student must submit the Doctoral Dissertation: Prospectus and Record of Approval form (<https://gradschool.wayne.edu/phd/forms>) with the prospectus. The prospectus and form must be approved by the dissertation advisory committee and the departmental Graduate Director, before being forwarded to the Graduate School, which requires a hard copy of the proposal; a completed Conflict of Interest (<https://gradschool.wayne.edu/phd/forms>); and Institutional Review Board (<http://research.wayne.edu/irb>)(IRB)/Institutional Animal Care and Use Committee (<http://research.wayne.edu/iacuc>) (IACUC) approvals, if needed. Students and their dissertation Chair are responsible for following IRB/IACUC regulations and rules.

Oral Examination

Successful completion of an Oral Examination is a requirement for the Ph.D. degree. The Oral Examination may be administered as part of the Qualifying Examination (see previous discussion of Qualifying Examination), or as part of the prospectus meeting, or a lecture, or in some other departmentally-approved format in which the student presents information orally and answers questions posed by the student's committee. The committee for the Oral Examination must be composed of minimally three members, two must be from the student's department, one must be the advisor; a member outside the department, is optional. The members of the Oral Examination committee may also serve as the student's dissertation advisory committee, but this is not required. At least two members must hold Regular Graduate Faculty appointment status, one must be the advisor. If the Oral Examination is part of the Qualifying Examination, the Oral Examination must be completed within 60 days of the written qualifying examination. If the Oral Examination is part of the prospectus meeting, the results of the Exam are to be reported to the Graduate School via the Doctoral Dissertation: Prospectus and Record of Approval form. The results of the Oral Examination administered in all other contexts should be reported to the Graduate School via the Report on Doctor of Philosophy Oral Examination form.

Dissertation Preparation

The dissertation should be selected and planned with care; it may be of a research, expository or critical nature. It must be an original work, in or related to the student's major field of specialization. Work submitted for credit in other courses cannot be used in fulfilling dissertation requirements. Neither the results of the research nor the publication of findings may be restricted by any non-University agency. The results of the research may be published prior to submission and acceptance of the dissertation, with the approval of the dissertation advisor.

Members of a doctoral dissertation advisory committee must read, approve and sign the dissertation. Such approval includes all academic and professional evaluations and judgments as to originality, adequacy, accuracy, significance, methodology, justification or conclusions and correctness of style. Approval shall not be recorded until the work and manuscripts are fully verified and accepted.

Format: Candidates preparing manuscripts are instructed to follow closely the Graduate School regulations governing the format of the dissertation. Format requirements and format templates are available on the Graduate School website. Two weeks prior to the Dissertation Defense, the student must submit the dissertation electronically (<http://>

dissertations.umi.com/wayne) for the initial format check. Note that format guidelines are written for Microsoft Word, and students who use other programs are expected to meet the same guidelines.

Inclusion of Publications in the Dissertation: In such instances where doctoral students have published work in discipline-appropriate refereed journals, and when the doctoral committee approves, these published materials may be incorporated into the dissertation. For papers so included, the student must be the principal author and/ or have made the major contribution to the published work. In cases of co-authored material, the text of the dissertation must make clear (e.g., in the summary and conclusion) to the reader the original contribution of the author. If published materials are included, references to them in the other dissertation sections may not need to be as detailed as is required in dissertations which do not incorporate published materials.

When a co-author is someone other than the candidate and the advisor, it is recommended that permission to include the publication in the dissertation be secured from the other author(s). Students are advised that incorporation of materials published elsewhere requires permission of the copyright holder. Once permission is secured, it must be cited in the chapter from whom the permission was granted/where the material is already published

Students must format a published article to conform to the body of the dissertation. As well, all remaining sections of the dissertation (e.g., abstract, introduction, conclusions) must conform to Graduate School format requirements.

Dissertation Public Lecture Presentation-Defense

Two weeks before the planned Defense, each dissertation advisory committee member must have certified in writing, via the Dissertation Public Lecture Presentation-Defense Final Report form (<https://gradschool.wayne.edu/phd/forms>), that the dissertation has been read and approved for the Defense. Committee members unable to sign or provide an electronic signature may email this exact verbiage to the PhD Office: I, [committee member's name], certify that I have read the dissertation, approve its content and verify that it is ready for the Public Lecture Presentation-Defense. And I, [committee member's name], do not have a financial, commitment or affiliation conflict of interest with [student's name] nor any member of his/her committee (should a conflict be disclosed, the conflict must be briefly explained). The Defense cannot be held without such certification.

Dissertation Readiness for the Defense: Dissertation committee members will sign Part 1 of the Defense form and thereby indicate their assessment that the dissertation is ready for the Defense. Under no circumstances will a committee member sign Part 1 of the Defense form if s/he has not read the dissertation. A pre-Defense meeting of the student and whole committee is recommended, allowing committee members to indicate their concerns regarding the dissertation and the student to make needed revisions. Consequently, no requests for major revisions of the dissertation should arise at the Defense.

The Graduate School requires that all dissertations and theses must be submitted for a plagiarism check through Canvas Learning Management System (LMS) plagiarism check software prior to the defense. The Graduate School further requires that the student's dissertation/thesis advisor or program Graduate Director certify that the dissertation/thesis has been checked through plagiarism software in Canvas. The Defense Final Report form and the first page of the plagiarism check report will be used to transmit the certification to the Graduate School. The Graduate School requires additional justification for reports that suggests evidence of plagiarism.

Policy on Presence at the Defense: The Graduate School expectation is that the student and all members of the dissertation committee be

physically present at the student's Final Defense of the dissertation. At the very least, the student and the dissertation committee chair(s) must be physically present; a student with dissertation co-chairs must have at least one in attendance. Committee members who cannot attend in person, synchronous audio-visual access, such as Skype, will be required. The Defense will be held during business hours, Eastern Standard Time. Electronic signatures on the Defense form and the title page are accepted.

Graduate Examiner: The Graduate Examiner is the presiding officer at the Defense and is responsible for its conduct. Representing the Graduate Council and the Graduate School, the Graduate Examiner serves as an advocate for the student. The dissertation advisor serves as the Graduate Examiner, but the student (or any committee member) may request that the Graduate School appoint a Graduate Examiner from outside the committee.

The Doctoral Dissertation Public Lecture Presentation-Defense has three phases, as follows:

Public Lecture Presentation-Defense: In the public lecture or presentation, candidates are expected to share the results of their dissertation research with the audience and the dissertation committee. This lecture or presentation may vary in length depending on the circumstances and discipline. At the end of this public lecture or presentation, members of the audience, as well as the dissertation committee members, are encouraged to direct questions pertaining to the presentation or research to the candidate. The Graduate Examiner moderates the questioning.

Communicating Dissertation Revision Requirements: To communicate to the Graduate School that revisions to the dissertation were requested at the Defense, a box on the Defense form will be checked that indicates "Changes Required." The dissertation advisor will not sign the dissertation cover page until the student has made all required revisions. Submission of the cover page to the Graduate School will indicate that the student has made the revisions satisfactorily.

Dissertation Committee's Meeting with the Candidate: At the conclusion of the public presentation and defense, the dissertation committee members will meet privately with the candidate to pose further questions about the candidate's research or to address issues related to the dissertation manuscript. The Graduate Examiner presides at this meeting.

Evaluation of the Candidate's Performance: Upon the completion of the public presentation and defense and the private meeting, the dissertation committee members, in the absence of the candidate and the audience, discuss the candidates' performance and decide whether or not they have passed the defense. The Graduate Examiner chairs the discussion and communicates the result to the candidate, and subsequently, to the Graduate School within 48 hours of the dissertation defense via the Dissertation Public Lecture Presentation-Defense Final Report form (<https://gradschool.wayne.edu/phd/forms>).

If the candidate fails the Defense, the advisor and committee may recommend that the student be given the opportunity for a second defense. If a second defense is recommended, the advisor and committee will submit to the Graduate School, the Graduate Director of the program and the student a written description of the areas of weakness and what the student must do to correct the weaknesses. If candidates will need to make extensive corrections to the manuscript (ones requiring more than ten days), they will not be passed. Candidates must wait at least four months before holding another defense. The second defense shall be considered final.

Ph.D. Completion Deadline: Each semester the Graduate School establishes a Ph.D. completion deadline calendar for students intending to graduate in that semester, by which time all work must be completed and all required documents submitted, if the Ph.D. degree is to be awarded that term. Any dissertation revisions stemming from the defense must be completed and submitted prior to the completion deadline for the semester, so the manuscript can be accepted for publication by the deadline. Acceptance for publication by the Ph.D. completion deadline is required for a student to graduate that term.

Submission of Approved Dissertation

The submission of the approved dissertation concludes work pursuant to the doctoral degree. In essence such manuscripts represent a tangible summation of the many hours spent in study and research to acquire a higher education. For this reason such scholarly documents must evidence only the highest standards of research and writing. They must show consistency in punctuation, style and format. It is official policy that acceptance of a dissertation, as well as certification of a candidate for a degree, shall not be granted unless a manuscript is technically correct in format and in a form suitable in all respects for publication.

The corrected dissertation must be submitted and accepted for publication by the completion deadline of the graduation semester. Manuscripts must be submitted electronically (<http://dissertations.umi.com/wayne>). The signature page must also be submitted to the Graduate School.

Dissertation Publication Plan: Filing a Doctoral Dissertation Publishing Agreement form is required.

Dissertation Copyrighting Charge: Copyright service, provided by Proquest, is available upon request. The student shall pay the amount necessary to cover the cost of copyrighting.

Students wishing to obtain bound dissertation copies for personal use must select a bindery and pay the binding charges for these.

Information regarding completion of additional forms is available from the Graduate School office and website. The Ph.D. degree will be certified only upon receipt of the approved dissertation and the reconciliation of the student's Plan of Work and transcripts.

Graduation

Each candidate for a degree or certificate must file a *Graduate Application for Degree* by the end of the fourth week of classes in the semester in which they expect to complete the requirements for the degree. If an application for a degree was filed for a previous term in which the student did not graduate, a new application is necessary.

Commencement

Information concerning commencement announcements, caps and gowns, invitations, tickets, time and place, assembling and other relevant items will be mailed to the graduates by the Commencement Office prior to the event. Candidates for advanced degrees are requested and expected to attend the commencement at which the University confers upon them the honor of the degree earned.

Exceptions

A student who wishes to request an exception to any of the Ph.D. program minimum requirements should file a written, detailed petition with his/her advisor. If the advisor approves the petition, they will forward it, along with their recommendation, to the Chairperson of the departmental Graduate Committee. If approved by the department, the petition will be forwarded to the Graduate School. All exceptions must ultimately be approved by the Graduate School. Appeals of decisions

follow the same process; appeals of Graduate School decisions may be presented to the Provost.

Time Limitation for Doctoral Programs

Students have a seven-year time limit to complete all requirements for the Ph.D. degree. The seven-year period begins with the end of the semester during which the student was admitted to doctoral study and was completing work toward meeting the requirements for the degree. In order to request a time extension, a student may petition his/her advisor. If the advisor supports the request, it is forwarded to the chairperson of the departmental Graduate Committee, and if approved, it is reviewed by the Graduate School. The petition must include information concerning the reasons for the request, an explanation of how the student's circumstances have changed to enable them now to complete the dissertation, compelling evidence that the student's dissertation is in progress, a plan and timeline for completion of the dissertation, an explanation of how the student has remained current in his/her field, and a copy of the current annual review. The initial request for a time extension must be filed within six months of the expiration date. There is no grace period for additional time extensions that may be granted after the initial request. To be considered eligible for a time extension, the student must have an approved prospectus on file at the Graduate School. If students do not complete the program within ten years of their applicant date with approved time extensions, the written qualifying examination(s) must be repeated and passed by the end of the time extension. Students who have been granted time extensions must complete all program requirements within twelve years of the applicant date.

Foreign Language Requirement

The Ph.D. Foreign Language Requirement is a matter of departmental option. Students are advised to contact the department in which they intend to major in order to determine the nature of the Ph.D. foreign language requirement, if any, for that discipline.

Doctoral students should bear in mind that most departments reserve the right to require foreign language proficiency for any Ph.D. student pursuing research which would benefit from the use of foreign language materials, even though other students in the same Ph.D. program are not required to establish foreign language competence.

Ph.D. Residence Requirement

The Ph.D. requirement of one year of residence is met by completion of at least six graduate credits in course work, exclusive of dissertation, in each of two successive semesters. The spring/summer semester may be excluded from the definition of successive semesters. Additional residence requirements may be imposed by the Ph.D.-granting departments. The student should contact the major department to determine what residence requirements must be satisfied.

In the experimental sciences for which it can be demonstrated that a student's research must be completed on campus, the residence requirement for the Ph.D. degree may be met by the dissertation director's written certification that the student has been in full-time residence for at least two successive semesters and one summer session. In this latter case, a count of course credits is not required for the fulfillment of the residence requirement, but specific dates of residence must be furnished.

In addition, the Ph.D. residence requirements stipulate that the student must elect at least thirty credits in graduate work exclusive of dissertation direction at the University.

Certificates: Graduate and Bridge Graduate Programs

Programs leading to Graduate Certificates and to Bridge Graduate Certificates are available through several University units and are open to students who meet the general graduate admission requirements of the University; individual programs may have additional admissions requirements. The specific number of credits required for completion varies by program, though Certificate programs must consist of at least twelve graduate credits.

Graduate Certificates may be earned independently of or concurrently with a graduate degree. A Graduate Certificate program must be completed within three years, a minimum grade point average of 3.0 in certificate courses must be maintained, and only nine semester credits of certificate course work may be applied toward a graduate degree.

Bridge Graduate Certificates are certificate programs designed to provide students with specialized knowledge that may subsequently be applied toward the requirements of a designated Master's degree and may be viewed as transitional to a Master's program. The program is for students who hold at least a baccalaureate degree and are admissible to graduate studies.

The Bridge Graduate Certificates are generally housed in the same unit as the Master's program that proposes it. The Certificate program consists of at least twelve graduate-level credits to be completed within three years and a minimum grade point average of 3.0. No transfer credits are accepted into a Bridge program. The curriculum consists of courses from the corresponding Master's program. All courses in the Bridge Certificate may be applied toward the requirements of the designated Master's degree, given that they meet the approval of the Master's program and the six-year time limit for Master's degrees. For specific certificate requirements interested students should consult the specific certificate program descriptions in this Bulletin or contact the sponsoring department.

Dual-title Graduate Degrees

A dual-title degree program is designed to provide additional valuable course work not prescribed in an existing major program. The dual-title degree program consists of two components: an area of study, in which there are graduate course offerings and faculty strength but no graduate degree program, and one or more major degree programs that adopts the area of study and integrates its content into the coursework and progressive stages of the major program, including the Qualifying Examination, thesis and dissertation. The dual-title areas of study are not available as separate graduate degree programs.

Potential dual-title areas of study typically are interdisciplinary with courses and faculty housed in various departments. When incorporated into an existing program, they provide students with knowledge and skills graduates of traditional programs do not have. Dual-title areas often exist in new and emerging fields, generally where the most significant advances in research occur. The addition of a dual-title area to an existing degree program enables graduates to acquire the most current knowledge and up-to-date research skills beneficial to the major program.

Joint Degrees

A joint degree program is a formally approved and authorized program between two cooperating graduate or graduate and professional programs that permits the use of a limited number of credits to fulfill requirements in both programs. The joint degree programs offer exceptionally talented students the opportunity to acquire expertise and

knowledge in a shorter time than is possible by completing two separate degrees in sequence.

Educational Outreach

5057 Woodward Avenue, Suite 3101, Detroit MI 48202; Telephone: (313) 577-4682

Email: educationaloutreach@wayne.edu

<http://www.educationaloutreach.wayne.edu>

Associate Vice President for Educational Outreach and International Programs: Ahmad Ezzeddine

Sr. Director, Business Affairs: Arthurine Turner

Director of Operations: Rebecca Journigan

Manager, Administrative Services: Heather Howell

Program Coordinators: Gail Stanford, Nevein Michail,

Director, Educational Outreach and Transfer Initiatives: Michael Quattro

Associate Director, Educational Outreach: Stacy Jackson

Program Manager, Schoolcraft Center: Gail Stanford

Associate Director, Executive and Professional Development: Michael Kelly

Instructional Services Supervisor: Margaret Matyniak

Project Coordinator, Marketing: Carol Baldwin

Financial Analyst: Stacey Smith

Educational Outreach is principally responsible for Wayne State University's off-campus offerings including online programs and courses. This division administers academic off-campus course offerings and programs for most Schools and Colleges of the University; the University Summer Session; and the partnership degree programs at University centers located on community college campuses. Educational Outreach staff coordinate relationships with community colleges partners and oversee transfer student recruitment and retention via the Transfer Student Success Center. Additionally, the division oversees credit and non-credit executive education, certificate, professional development and continuing education programs for the University.

The Division operates several instructional centers in the Detroit metropolitan area as well as in other selected locations in Michigan, and delivers distance learning and online instructional programs. Through these outreach efforts, WSU is able to serve and meet the educational needs of a diverse student audience: working adults who are unable to pursue traditional on-campus programs of study; persons who desire courses of instruction at or near their place of employment; and others who are simply taking courses to enrich their educational background or improve their technical skills.

Dual Enrollment Cohort Programs

Educational Outreach coordinates dual enrollment cohort programs for eligible high school students in interested school districts. Dual enrollment cohort programs may be offered on site within the school district or at any of the Wayne State University campuses. For information regarding Dual Enrollment Cohort Programs, telephone: 313-577-1430.

Visitor Program (Non-Credit)

Educational Outreach also administers the University's Visitor Program. Under this program, adults can attend a wide range of selected University courses, both on and off campus, provided classroom space is available. No grade or academic credit may be earned, and students may not be registered for courses taken for credit simultaneously with courses taken under the Visitor Program.

The Visitor Program allows any adult who is not currently enrolled in credit courses at Wayne State University to attend a wide range of University courses in a noncredit status. Visitor status students do not receive academic credit and do not receive acknowledgement on

transcripts. Provided space is available and permission has been granted, adults may enroll as visitors in most of the courses listed in the Schedule of Classes.

It is not necessary to be formally admitted to the University to take advantage of the Visitor Program. Visitor status students do not submit written work or take examinations. Registration for both on-campus and off-campus classes takes place the first two weeks of classes and is processed by the Division of Educational Outreach, located on the main campus.

Students enrolled in the Visitor Program are assessed one-half of the undergraduate resident lower division credit hour rate for each credit hour plus a non-refundable Registration Fee equal to one-half of the regular Registration fee and the full per credit hour undergraduate Student Service Credit Hour Fee. Payment of tuition and fees are due at the time of registration. Tuition must be paid in full at the time of registration. Payment is accepted by money order, check, Discover, Master or Visa Card. Money orders or checks must be drawn from a United States bank and cannot be starter checks. Students may register in person or by calling: 313-577-4682.

Travel Study

Sponsoring schools and colleges in the University offer travel study programs through the Division of Educational Outreach. Most programs occur in the spring/summer sessions; times and locales vary each year. Travel study refers to programs in the United States. Please refer to the Office of International Programs (<http://bulletins.wayne.edu/undergraduate/general-information/international-programs>) for study abroad programs. Recent travel study programs include:

College of Liberal Arts and Sciences: Biological Sciences: marine lab at the Florida Keys; field studies at Fish Lake, Michigan
College of Education: Science Education: ecology courses at Higgins Lake, Michigan
College of Fine, Performing and Communication Arts: Fashion Merchandising: design in New York City

Extension Centers

Director, Educational Outreach and Transfer Initiatives: Michael Quattro
Associate Director, Educational Outreach: Stacy Jackson
Program Manager, Schoolcraft Center: Gail Stanford

The Division of Educational Outreach operates several instructional centers in the Detroit metropolitan area as well as in other selected locations in Michigan. Through these outreach locations, the University is able to serve and meet the educational needs of a diverse student audience. The locations of the centers are listed below.

OAKLAND COMMUNITY COLLEGE, ORCHARD RIDGE CAMPUS
Building D, 27055 Orchard Lake Road
Farmington Hills, MI 48334
Telephone: 248-522-3905

SCHOOLCRAFT COLLEGE
18600 Haggerty Road
Jeffress Center, Suite 320
Livonia, MI 48152
Telephone: 734-853-3450
Fax: 734-853-3446
Email: schoolcraft@wayne.edu

MACOMB EDUCATION CENTER
16480 Hall Road
Clinton Township, MI 48038

Telephone: 586-226-4291; 313-577-9632
Fax: 586-226-8570
Email: macomb@wayne.edu

UNIVERSITY CENTER AT MACOMB
44575 Garfield Road
Clinton Township, MI 48038
Telephone: 586-263-6700; 313-577-6261
Fax: 586-263-6120
Email: macomb@wayne.edu

ADVANCED TECHNOLOGY EDUCATION CENTER
14601 East 12 Mile Road
Warren, MI 48088
Telephone: 586-447-3905; Fax: 586-447-3907
Email: atec@wayne.edu

Registration for Off-Campus Courses

Registration for off-campus academic courses is held during the regular registration periods for each semester. For specific registration information, telephone: 313-577-3541 or 313-577-4682.

Fees for credit classes are the regularly established fees of Wayne State University, which are published each semester in the University Schedule of Classes (<http://classschedule.wayne.edu>). All fees are subject to change at any time without notice by action of the Board of Governors of the University.

Non-Matriculant Advising

Persons who wish to enroll in credit courses offered through this division and who have NOT been formally admitted to the University are registered as non-matriculated students in the College of Liberal Arts and Sciences. Students are advised to consult the non-matriculant advisor as well as the specific degree program requirements cited in this bulletin, and are urged to process formal application and admission documents as soon as possible. Upon admission to a Wayne State school or college, credits earned in non-matriculant status may be applied toward degrees subject to the approval of the admitting school or college.

Admission Requirements

Most credit courses offered through Educational Outreach are open to all students who are qualified by virtue of meeting the prerequisites for individual courses or, in cases where there are no prerequisites, on the basis of their own assessment of their aptitudes. Those individuals who have been formally admitted to Wayne State University for a degree or certificate program, or post-baccalaureate study, and who are in good academic standing, will have course credits and grades earned through extension recorded on their transcripts in the same manner as credits earned on campus. Guest students should consult with their home institution when formulating their registration plans and submit an application for guest admission (<http://admissions.wayne.edu/guest/requirements.php>).

Programs Offered Through Educational Outreach

Educational Outreach offers entire curricula or selected courses applicable to many Wayne State University degrees and certificates at convenient times and places. The following complete degree programs are offered at various extension centers. Students should visit the Educational Outreach (<https://wayne.edu/educationaloutreach/>) website for more details.

Undergraduate Degree and Certificate Programs
Bachelor of Arts with a major in Anthropology

Bachelor of Arts in Business Administration with a major in Global Supply Chain Management
 Bachelor of Arts in Business Administration with a concentration in Accounting or Management
 Bachelor of Arts in Information Systems Technology
 Bachelor of Arts with a major in Communication Sciences and Disorders
 Post-bachelor's program in Communication Sciences and Disorders
 Bachelor of Arts with a major in History with optional minor in Political Science or Criminal Justice
 Bachelor of Arts with a major in Public Relations
 Bachelor of Arts/Science in Elementary Education with a major in Special Education with a concentration in Cognitive Impairment
 Bachelor of Science with a major in Computer Science
 Bachelor of Science in Construction Management
 Bachelor of Science in Criminal Justice
 Bachelor of Science with a major in Elementary Education (Integrated Science or Mathematics)
 Bachelor of Science in: (Engineering Technology degrees)

Electrical/Electronic Engineering Technology
 Electromechanical Engineering Technology
 Manufacturing/Industrial Engineering Technology
 Mechanical Engineering Technology
 Product Design Engineering Technology

Bachelor of Science in Mechanical Engineering
 Bachelor of Social Work
 Bachelor of Science in Nutrition and Food Science
 Bachelor of Science in Nursing

Graduate Degree and Certificate Programs

Master of Business Administration
 Education Specialist Certificate in Special Education with a concentration in Learning Disabilities or Autism Spectrum Disorder
 Endorsement in Bilingual/Bicultural Education with a concentration in English as a Second Language
 Master of Arts in Employment and Labor Relations
 Master of Education with a major in Special Education and concentrations in:

Cognitive Impairment
 Learning Disabilities
 Autism Spectrum Disorders

Master of Social Work

Transfer Student Success Center

Director, Educational Outreach and Transfer Initiatives: Michael Quattro
Manager: Jo Bains
Telephone: 313-577-2487
Email: transfer@wayne.edu

The Transfer Student Success Center (TSSC) is a hub for transfer students to obtain the help they need to successfully complete their degree at Wayne State University. The TSSC is designed to help those transferring from a community college or other four-year institution navigate the administrative and academic units of the university and ensure a timely and successful completion of their degree.

The TSSC provides direct service to students, community college staff, and WSU departments.

Direct service to students includes support with:

Transfer credit evaluation
 Academic advising
 Student organizations

Engaging students with the larger Wayne State community
 Providing opportunities for prospective students to visit campus

Direct service to community college staff includes:

Information about Transfer Plans and transferring of credit
 Development of articulation agreements
 Hosting/coordinating staff and faculty visits to WSU
 Providing counselors/advisors and other staff with current/updated WSU information

Direct service to WSU departments includes:

Facilitating and coordinating the development of articulation agreements
 Acting as a resource and clearinghouse for information on transfer students
 Participating in and leading development of events and activities for transfer students

Executive and Professional Development Programs (Non-Credit)

Associate Director: Michael Kelly
Project Manager: Abby Cheatham
Telephone: 313-577-4665
<http://www.ExecEd.wayne.edu>

Executive and Professional Development (EPD) provides proven practical solutions to business challenges through executive education, business training and consulting. Offering a unique blend of expertise and flexible design, EPD moves beyond off-the-shelf, pre-packaged education, training and consulting 'services' by applying problem-solving strategies to assess and meet the needs of its clients. EPD is committed to providing customized, fully integrated, in-depth programs to address specific organizational needs and improve individual and organizational capabilities and performance. The EPD portfolio includes:

Business Training and Executive Education

EPD offers programs that respond to problems currently facing business, government and industry. Programs are offered in a variety of formats and deliver the strategies, tools, and knowledge needed to succeed in today's changing business environment. EPD mobilizes the resources of WSU to serve the specific and unique needs of the community by offering customized degree and non-degree programs, be they an onsite MBA program offered for a specific company, an Engineering Management Master program offered for a group of engineering executives, or a master of social work offered at one of the university's extension sites.

EPD provides a blended training approach by using a variety of alternative delivery methods including on-site facilitated sessions, video-conferencing, online training and computer-based programs.

Certificate Programs

EPD responds to industry's demand for a more comprehensive approach to continuing education by offering certificate programs that encompass several current management and business issues. These multiple-session programs offer participants the opportunity for higher mastery and competency in a particular subject area and can be customized to meet each organization's specific needs.

On-Site Consulting Services

In conjunction with training, EPD's expert staff provides consulting services in a variety of areas including training and design development, leadership and organizational development, succession planning,

business process improvement, strategic planning, and executive coaching.

Procurement Technical Assistance Center

The Procurement Technical Assistance Center (PTAC) works with qualified businesses in the Detroit area to prepare them to bid for government contracts. PTAC's goal is to provide small business owners with a competitive edge in selling to the public sector by educating them about opportunities, and offering marketing and technical assistance. Recently, PTAC services resulted in awarded contracts totaling more than \$5 million.

For further information on any Executive and Professional Development services or activities, call: 313-577-4665.

Financial Aid

Office of Student Financial Aid (OSFA)

Welcome Center, 42 W. Warren Avenue
P.O. Box 2340, Detroit, MI 48202
Telephone: 313-577-2100, Fax: 313-577-6648
<https://wayne.edu/financial-aid>

The Office of Student Financial Aid (OSFA) provides need-based and non-need-based financial aid to help eligible students meet the expenses of their education. Financial aid is intended to supplement, not to replace, students' financial resources. Financial need is determined from the information that students submit on the Free Application for Federal Student Aid (FAFSA (<https://fafsa.gov>)).

Information concerning scholarships (<https://wayne.edu/scholarships>) is available online. Wayne State University offers a variety of University-wide scholarships that are awarded based on financial need, scholastic achievement, and/or leadership qualities. To apply for University-wide scholarships, students must complete the online application (<https://wayne.edu/scholarships/privateapp>). Note: Scholarships that have need as a criterion require submission of the FAFSA.

Service Hours: Walk-in financial aid assistance is provided in the lobby of the Welcome Center Monday through Thursday, 8:30 a.m. to 6:00 p.m., and Friday 8:30 a.m. to 5:00 p.m. June through August, appointments and walk-in services end at 5:00 p.m. Monday through Friday. You may also email studentservice@wayne.edu or call 313-577-2100.

The Office of Student Financial Aid will send email and notices to your WSU email account (<https://tech.wayne.edu/kb/communication-collaboration/wayne-connect>). Information about your award and award requirements is available in *Academica*. More information about using *Academica* is available on our website (<https://wayne.edu/financial-aid/receiving/pipeline>).

Financial Aid Types

Financial aid at Wayne State University is awarded in the form of a 'package,' or combination of aid sources, and generally consists of four types: grants, scholarships, loans, and employment. The amount of aid a student may receive cannot exceed the estimated cost of attendance. The amount of need-based financial aid that a student may receive cannot exceed their financial need, which is based on the information provided on the FAFSA. Graduate students may be eligible for a need-based Federal Work-study award or non-need-based Federal Unsubsidized or Grad PLUS loan.

Grants

Grants are gift assistance awarded on the basis of financial need and do not require repayment. The Free Application for Federal Student Aid

(FAFSA) is required. Note: The Federal Pell Grant is limited to students who have not earned a bachelor's or professional degree.

Scholarships

Scholarships are gift assistance awarded based on academic achievement or other special ability and do not require repayment. For some awards, financial need is a factor and a FAFSA is required.

Loans

Loans are money that must be repaid at a future date, usually following graduation or when the student ceases to be enrolled on at least a half time basis. Federal loans require submission of the FAFSA. A graduate student may qualify for a Federal Unsubsidized loan and may apply for a Federal Direct PLUS loan to assist with educational expenses.

Federal Work-Study

Federal work-study is on- or off-campus part-time employment with eligible employers. Work-study is awarded based on financial need. Students interested in work-study should complete the annual FAFSA. The Work-Study Request Form available on our website. The Student Guide to On-Campus Employment, which explains the hiring process and the terms and conditions of employment is available from the Office of Career Services (<http://careerservices.wayne.edu/student-employment.php>).

Free Application for Federal Student Aid (FAFSA)

How and When to Apply for Financial Aid: Each academic year, submit the Free Application for Federal Student Aid (FAFSA) (<http://www.fafsa.ed.gov>) and include the WSU federal code, 002329. The federal processor, the U.S. Department of Education, will electronically transmit the FAFSA data to the Office of Student Financial Aid.

Help Completing the FAFSA: Help completing the FAFSA is provided online throughout the application process. Help also is available by telephone from the Federal Student Aid Information Center: 1-800-4-FED-AID (1-800-433-3243) during regular business hours (Eastern Time), Monday through Friday.

Application Deadlines

Fall/Winter Application Priority Date: The application priority date for financial aid consideration at WSU for fall and winter semesters is the date by which the FAFSA should be submitted to facilitate determination of student eligibility for financial aid before the beginning of the fall semester. The priority date is not a deadline. See our website (<https://wayne.edu/financial-aid/resources/dates>) for current information.

Students may submit the FAFSA during the following periods:

The 2019-20 FAFSA can be submitted October 1, 2018 through June 30, 2020.

The 2020-21 FAFSA can be submitted October 1, 2019 through June 30, 2021.

The 2019-20 FAFSA requires 2017 federal tax information. The 2020-21 FAFSA requires 2018 federal tax information. Applicants may be able to use the IRS Data Retrieval Tool when completing the FAFSA. The IRS Data Retrieval Tool will immediately upload tax data to the FAFSA.

Spring/Summer Financial Aid: The Office of Student Financial aid will use your 2019-20 FAFSA information to determine your aid eligibility for spring/summer 2020 and your 2020-21 FAFSA information to determine your eligibility for spring/summer 2021. Note: If the FAFSA has been

submitted for the academic year, it is not necessary to submit it again for the spring/summer semester.

Academic Calendar: At WSU, the spring/summer semester is the third term of the school year. For example: The spring/summer semester 2020 is part of the 2019-20 school year; the spring/summer semester 2021 is part of the 2020-21 school year.

Financial Need Determination

The Student Aid Report (SAR) lists the financial aid applicant's answers to the questions on the FAFSA. Based on those answers, the SAR either states the student's Expected Family Contribution (EFC) or instructs the student to take additional action which will allow an EFC to be determined. The EFC is a measure of the student's financial strength and is used in determining financial need. The SAR also indicates whether the financial aid application has been selected for the verification process.

How Financial Need Is Determined: To determine financial need, OSFA subtracts the student's expected family contribution (EFC) from the average cost of attendance (COA) for their program at Wayne State University. COA minus EFC equals financial need.

Verification: The process by which an educational institution confirms the accuracy of the data reported on an individual student's FAFSA is called verification. The federal processor selects the FAFSA applications for which the data submitted must be verified. A student whose application is selected for verification must provide documentation to confirm the information on the FAFSA.

Note: If an application is selected for verification, the student must complete the verification process before eligibility for financial aid can be confirmed, and before financial aid can be paid.

The Cost of Attendance (COA): The cost of attendance (COA), which is also called a budget, components include: tuition, fees, books and supplies, housing allowance (based on the living arrangements reported on the FAFSA) and miscellaneous expenses. If a loan is awarded, loan fees will be an included component. All students are initially assigned estimated tuition costs and estimated costs for books and supplies based on full-time enrollment status for their academic programs. Financial aid awards are offered based on the estimated budgets. At the time of disbursement, each student's financial aid award is adjusted based on current enrollment status (full-time, three-quarter time, or half-time).

The COA may be adjusted to include dependent care directly related to attendance at WSU; costs related to a disability; computer purchase for educational purposes; costs to obtain a first professional license; and an allowance for reasonable costs directly related to one's program of study.

Michigan Resident and Out-of-State Resident Cost of Attendance (<http://wayne.edu/financial-aid/resources/cost-of-attendance>): Please access our website for detailed information concerning how student budgets are assigned and cost of attendance component amounts.

Current Tuition and Fees (<http://reg.wayne.edu/students/tuition.php>): Tuition and fees are subject to change by the WSU Board of Governors without notice.

Special Circumstances (<https://wayne.edu/financial-aid/forms/appeal>): The Office of Student Financial Aid recognizes that students may have extenuating financial circumstances that the standard need analysis form (FAFSA) does not consider. Applicants may request a review of extenuating circumstances that they believe affect their financial aid eligibility by submitting a Special Circumstances Appeal Form.

Eligibility and Conditions of Financial Aid

Students must be enrolled in an eligible degree- or certificate-granting program to receive financial aid funds. Enrollment must be at least half-time to be considered eligible for most types of aid.

Non-degree programs have aid limitations and not all programs are eligible for financial aid. OSFA can provide more information about non-degree programs, including a list of specific certificate programs that are ineligible for financial aid.

Prerequisite coursework aid eligibility is limited. Determination of aid eligibility requires submission of the Prerequisite Coursework Aid Request Form, which is available on our website.

Repeat Coursework

Federal financial aid will pay for only one repeat registration in a course for which the student has previously earned credit with a passing grade. That is, students are only eligible to receive financial aid the first time the course is repeated.

Calculating "Earned" versus "Unearned" Financial Aid

OSFA must follow federal regulations in determining the amount of "earned" versus "unearned" federal financial aid disbursed to a student who then leaves school without completing the semester. The refund percentage is determined by the student's effective date of withdrawal from all classes, which is the last recorded date of attendance.

A student who completes 60% or less of a semester will be considered to have "earned" the same percentage of financial aid as the percentage of the semester completed. The percentage will be calculated by dividing the completed number of days by the total number of days in the semester. The percentage of "unearned" aid will correspond to the percentage of the semester not completed. A student who completes more than 60% of a semester will be considered to have earned 100% of the financial aid disbursed for that semester and no return of federal financial aid will be calculated.

A student has not "earned" all of the financial aid received may be required to repay those funds. Detailed information is provided in the WSU Withdrawals and Return of Title IV Policy (<https://wayne.edu/financial-aid/receiving/cancellation>).

Enrollment Requirements for Federal Direct Loans

To receive a Federal loan disbursement, a student's enrollment status must be at least half-time.

Satisfactory Academic Progress (SAP)

Federal financial aid regulations require OSFA to apply reasonable standards for measuring whether a student is making progress toward a degree or certificate. The standards, which are called satisfactory academic progress (SAP), must be met for a student to remain eligible to receive financial aid. Academic progress is measured each semester.

WSU Satisfactory Academic Progress Standards are comprised of three components:

1. The cumulative grade point average of at least 3.0 is required at the graduate level.
2. The pace of progress toward the degree or certificate must be at least 67%, which is determined by dividing the cumulative number of credits completed by the cumulative number of credits attempted.
3. The maximum time frame for completing the degree or certificate, is 150% of the average published length in credits of the program.

Note: Full-time or part-time enrollment is not a factor in determining the pace of progress or the time frame since the sole unit of measurement is credits.

The WSU Satisfactory Academic Progress Policy is available online. (<https://wayne.edu/financial-aid/receiving/sap>) Check your SAP status in Academica (<https://academica.aws.wayne.edu>).

Consequences of Withdrawing from Courses

A student's satisfactory academic progress (<https://wayne.edu/financial-aid/receiving/sap>) may be affected if they withdraw from courses (some or all) during a semester. A student who does not comply with SAP standards may be denied financial aid for subsequent semesters. The university has specific instructions for SAP appeals (<https://wayne.edu/financial-aid/receiving/sap/sapappeal>).

A student who withdraws from all courses may be required to repay a portion of the financial aid received. Please see the section above titled Calculating "Earned" versus "Unearned" Financial Aid.

If a student's withdrawal from one or more courses results in less-than-half-time enrollment status, the student will not be eligible for new federal loan funds. At the end of the grace period on the loans received, repayment will begin. Detailed information about grace periods and loan repayment is available on the Federal Student Aid website (<http://studentaid.ed.gov/repay-loans/understand>). A student should contact their loan servicer (<https://studentaid.ed.gov/sa/repay-loans/understand/servicers>) to make payment arrangements or request a loan deferment or forbearance.

The amount in federal student loans that a student can receive has annual and aggregate limits. Students are strongly encouraged to consider these limits in developing their education plan.

The U.S. Department of Education's Office of Federal Student Aid (<https://studentaid.ed.gov/sa>) governs the policies and procedures for loan repayments, deferment, forbearance, and limits.

Financial Aid Disbursement

Financial Aid Disbursement: Financial aid (except work-study) is paid in two disbursements if the award is for the academic year (fall and winter semesters). Half of the award is paid in the fall semester and half is paid in the winter semester.

Financial aid recipients are expected to attend courses throughout the semester. Aid will not disburse after courses begin unless the instructor confirms participation in courses. If participation in class is not confirmed, the amount of financial aid may be affected.

Financial aid funds are applied directly to institutional charges (tuition, fees, room and board). Any excess funds will be available within 14 days of the date the credit balance occurs or within 14 days of the first day of classes — whichever is later.

Federal Work-Study Payments: Work-study earnings are paid biweekly in the form of a paycheck. The department in which the student is employed submits a record of the hours worked to the Payroll Office, and the Payroll Office authorizes payments.

Note: Students cannot earn more than the amount of their work-study award. Spring/summer semester is separate from the fall and winter semesters. Unused funds from a fall and/or winter work-study award cannot be earned in the spring/summer semester.

Enrollment Requirements for Federal Direct Loans: A student must be enrolled at least half-time to receive a federal loan disbursement.

Office of International Programs

4228 Faculty/Administration Building; Phone: 313-577-8968; Fax: 313-577-5666

Associate Vice President for Educational Outreach and International Programs: Ahmad Ezzeddine
Director of Operations: Rebecca Journigan
Associate Director: Jaclyn Assarian
Associate Director, Student Programs: Fareed Shalhout
Project Coordinator: Margaret Hall

<http://www.oip.wayne.edu>

The Office of International Programs (OIP) is responsible for coordinating the University's resources and expertise to support international education on and off campus, to expand the university's global presence, and to facilitate the engagement of students, faculty, and staff with its global agenda. It also connects the metropolitan Detroit community with other university constituencies, locally and abroad. OIP encompasses the following programs and activities:

- the Office of International Students and Scholars
- Study Abroad and Global Programs
- the English Language Institute

Office of International Students and Scholars (OISS)

416 Welcome Center; 313-577-3422; Fax: 313-577-2962

Director: Kelli Dixon
<http://www.oiss.wayne.edu>

The mission of OISS is to support and enhance the educational, cultural, and social experiences of the more than 2000 international students and scholars at Wayne State University. OISS is the University's main point of contact for issues related to international students and scholars' immigration regulation compliance.

OISS staff advise students and scholars on immigration regulations and issues of cross-cultural adjustment; provide educational, cultural and social programs and activities, including a comprehensive orientation program and written materials designed to help arriving students and scholars achieve their educational and personal goals; assist University departments in the hiring of foreign national employees, consult and interact with University units, governmental organizations and other agencies.

Academic Progress for International Students

Department of Homeland Security regulations require:

1. That F-1 and J-1 students maintain a full course of study and make normal academic progress toward program completion at the institution they have been authorized to attend.
2. Graduate students must successfully complete at least eight credits each semester (excluding continuing students who qualify for an annual vacation semester during Spring/Summer or have been granted an exception to full-time enrollment). Undergraduate students must successfully complete at least twelve credits each semester (excluding continuing students who qualify for an annual vacation semester during Spring/Summer or have been granted an exception for full-time enrollment).
3. Graduate Teaching Assistants and Graduate Research Assistants must successfully complete at least eight credits each semester

(excluding students who qualify for a vacation semester during Spring/Summer or an approved annual vacation). If GTAs/GRAs need to take less than eight credits, they must complete the OISS Request for Exception to Full Time Enrollment form and obtain approval from OISS. Students should consult an OISS advisor for details on compliance with this and other requirements.

New International Students and Scholars

New International Students and Scholars receive the OISS welcome booklet with their visa document (Form I-20 or DS 2019) before they leave their home country. The booklet provides information on a wide variety of important topics such as housing, health insurance, expenses, immigration status, local climate, and air transportation. New students and scholars from abroad must report to OISS as soon as they arrive and must participate in a comprehensive orientation program. This program is designed to meet immediate needs in terms of housing information and University registration procedures; introduce them to U.S. culture and the University's educational system; and provide information on banking, health insurance, safety, and immigration regulations. In addition, a number of social and recreational programs and activities are planned to assist students and scholars in making a smooth transition to their new environment

Non-Immigrant International Students

Before registering for classes, all non-immigrant international students must report to OISS to complete check-in procedures and have immigration documents reviewed, purchase mandatory health insurance (see below), and obtain an orientation schedule. Transferring F-1 students from other U.S. institutions must have their previous school release their Student and Exchange Visitor Information System (SEVIS) record to Wayne State University and must complete transfer procedures as provided in the federal regulations within fifteen days of the first day of class. F-1 students must notify the OISS of any change in name, address, program (including changes in level and field of study), and full-time enrollment. OISS must provide this information to Immigration and Customs Enforcement (ICE) through the Student and Exchange Visitor Information System (SEVIS). J-1 exchange visitors, including students, may not make a change in level, field, or category without the advance approval of the Department of State, and may be precluded from change of visa status until a two-year home country residency requirement is met.

Commuting Canadian Students

Canadian students (commuters) enrolled less than full time must obtain a part-time I-20 from OISS each semester they are enrolled and should consult with an OISS advisor to determine the impact of their status on future immigration benefits including the availability of practical training.

International Faculty and Research Scholars

The University provides foreign professors and research scholars with opportunities to engage in research, teaching, consulting, and lecturing with colleagues at Wayne State; to participate actively in cross-cultural activities; and to share their experience as well as increase their knowledge about the United States, Wayne State University, and the metropolitan Detroit community. OISS provides centralized support services necessary to enable and assure the employability of such non-U.S. citizens within government regulations. Offers of employment to foreign nationals must be authorized by OISS, and only this Office may sign immigration forms and petitions related to employment on behalf of the University. All foreign national employees must complete USCIS Form I-9, 'Employment Eligibility Verification' and present evidence of

their identity and employment eligibility at OISS before commencing employment at Wayne State University.

Health Insurance (International Students and Scholars)

416 Welcome Center; 313-577-3422; Fax: 577-2962
Health Insurance Advocate: 313-577-0724

International students and scholars, and their dependents holding F1/ F-2 status and J-1 exchange visitors and their dependents holding J-1/ J-2 status are required to comply with the health insurance requirements of the University. Commuting Canadian students may waive the health insurance requirement by providing proof of OHIP coverage prior to each semester of enrollment. The mandatory international insurance program is designed to provide international students, exchange visitors, and their eligible dependents with continuous insurance protection and access to quality affordable health care services. The University is mandated by federal law to terminate from its program all exchange visitors and their dependents who do not meet minimum insurance requirements. For additional information or to purchase health insurance please access the OISS website (<http://www.oiss.wayne.edu>) or contact the Health Insurance Advocate in OISS; telephone: 577-0724 or e-mail oissmail@wayne.edu

Cross-Cultural Activities

The OISS provides cross-cultural activities in order to provide exposure to American society, culture, and institutions. Activities include: International Education Week, new international student learning community, a free international coffee hour held every two weeks on Wednesdays from 11:30 a.m. to 1:30 p.m. Coffee hour provides opportunity for dialogue with and among international students and scholars, American students, and the WSU community. Other activities include monthly sessions on employment options, internships, cross cultural adjustment and more.

Study Abroad and Global Programs Office

906 W. Warren Avenue; 131 Manoogian Hall; 313-577-3207
Director: Kelli Dixon
<http://www.Studyabroad.wayne.edu>

Study Abroad and Global Programs coordinates international educational activities at Wayne State University. Key activities include:

1. the management of WSU faculty-led study abroad programs and exchange agreements;
2. the administration of the Hostelling International Travel Award for students to encourage international study, research and internship abroad initiatives;
3. the administration for the NSEP - David Boren Scholarship;
4. the administration of the U.S. Student Fulbright Program;
5. the coordination and support of internationally-themed events; and
6. the development and management of international outreach activities and off-campus programs including agreements between Wayne State University and universities outside the United States.

Study Abroad programs are offered in collaboration between academic departments and faculty of both U.S. and foreign institutions, in order to combine academic study with a cross-cultural learning experience in a foreign environment. A variety of program options have been developed to address the diverse needs of students. Programs vary in length, level, academic focus, teaching format, language requirements, cost, and degree of independence demanded of the participant.

The office provides a full range of support services to students on such issues as program selection, academic planning, registration, credit, financial aid, and cultural adjustment. In addition, program materials have been designed specifically to assist students in preparing for their study abroad experience. Books, brochures, catalogs on academic and travel/study programs in foreign countries are available at the Study Abroad Resource Center, including information on Wayne State's thirty-three study abroad programs and other programs sponsored by American and foreign institutions.

For a complete and current list of WSU Study Abroad programs, learning experiences, and services, please contact the Study Abroad and Global Programs Office (<http://studyabroad.wayne.edu>).

Arabic Language and Culture at the Lebanese American University, Beirut

This program provides opportunities for WSU students to study Arabic language and culture abroad. During the summer, WSU students may take a variety of language and culture classes while living abroad in Lebanon.

Japan Center for Michigan Universities

The Japan Center for Michigan Universities (JCMU) is a consortium consisting of the fifteen State-supported Michigan public universities, the Michigan Japan Foundation, and Shiga Prefecture. JCMU offers semester- and year-long study opportunities in Hikone, Japan.

The Center's academic program is designed for students interested in acquiring knowledge about Japanese language and culture, including those not majoring in Japanese studies. It provides semi-intensive Japanese language courses and several core courses on Japanese culture to Michigan and other American university students. Academic credit may be granted by a student's home institution upon successful completion of JCMU courses; independent study is also available. The program also features home-stays in a Japanese community, field trips, and participation in cultural events.

Other International Opportunities: Numerous short-term special international study trips for credit are available to Wayne State students.

International Students requiring information on study at Wayne State University should contact the Office of International Students and Scholars (<http://www.oiss.wayne.edu>).

Resource Center

Books, brochures, catalogs and advising on travel/study programs in foreign countries are available at the Resource Center, including information on Wayne State sponsored study abroad programs and programs sponsored by U.S. and foreign institutions. Course credit is available on approval for many study abroad programs; credit approval usually must be obtained prior to entering a study abroad program.

Honors College

The Irvin D. Reid Honors College has study abroad experiences; for information, see the Honors College section in the WSU Undergraduate Bulletin.

Fulbright Grants and other grants for graduate study abroad

The U.S. Fulbright student program (<http://us.fulbrightonline.org>) is designed to give recent B.S and B.A. graduates, masters and doctoral candidates, and young professionals and artists opportunities for personal growth and international experience. Each year the Fulbright Program allows Americans to study or conduct research in over 100 nations. Application deadline depends on the specific program but generally it must be submitted to the campus Fulbright advisor by September of the year prior to the foreign study experience.

Fulbright-Hays Doctoral Dissertation Research Abroad Program (<http://eca.state.gov/fulbright/fulbright-programs/program-summaries/fulbright-hays-program>): Provides grants to colleges and universities to fund individual doctoral students to conduct research in other countries in modern foreign languages and area studies for periods of 6 to 12 months. Proposals focusing on Western Europe are not eligible.

English Language Institute (ELI)

351 Manoojian Hall, 313-577-2729

Director: Bruce Morgan

<http://www.Eli.wayne.edu>

As the only intensive English language program in the metropolitan Detroit area, the English Language Institute (ELI) has specialized in teaching academic preparation skills, English communication, and cultural orientation to non-native speakers of English from all over the world for more than forty years. The ELI is committed to assisting individuals at all levels to develop their communication skills in the shortest possible time by using the newest language-teaching methodology and the most up-to-date audio, video, and computer technology available. Small classes and highly trained instructors make it possible for students to improve their English rapidly and effectively.

Programs

Intensive Program: For students interested in improving their academic skills in a relatively short period of time, the ELI offers up to twenty hours per week of instruction at varying levels from beginning to advanced. While beginning levels focus on basic communicative skills, advanced classes emphasize mastery of the academic skills needed to succeed in the university such as essay writing, note-taking, and presenting information to an audience.

In addition to attending class, ELI students are encouraged to participate in weekly extracurricular activities in order to become integrated into the English-speaking community. Each semester the ELI offers field trips around the metro-Detroit area, conversation partner practice with native speakers, and socio-cultural activities while at the same time encouraging students to take advantage of all university facilities and services.

Test of English as a Foreign Language (TOEFL) Testing and Reporting: To ensure international students will be successful in the University, all must meet Wayne State's English proficiency requirements or complete the highest level of ELI. The ELI administers the TOEFL ITP® monthly on the main campus. Scores are then reported to the applicants as well as Undergraduate and Graduate Admissions.

Graduate Teaching Assistant (GTA) Training and Testing: All prospective GTAs whose native language is not English must pass the SPEAK® test, rated by ELI faculty, with a score of at least fifty (out of sixty) to be cleared for teaching. A score of forty-five allows a person to teach while enrolling in ELI 0520, a course taught by two ELI faculty members. The final exam, also rated by ELI faculty as well as a faculty member from the academic department, is a teaching demonstration in the GTA's field of study. The SPEAK® test is offered at various times throughout the academic year. ELI 0520 is offered fall and winter semesters.

Scholarly Writing for Graduate Students: Non-native English speaking Ph.D. candidates who need to publish in scholarly journals and meet other professional obligations can take a course designed specifically to meet their needs. ENG 5850 is a course supported by the Graduate School and taught by ELI faculty each semester.

English Language Institute Courses (ELI)

The following courses, numbered 0100-0999, are not offered for degree credit. For registration in any of these courses students should contact the English Language Institute.

ELI 0100 Level 1: Oral Integrated Cr. 2,4

The focus of this course is to develop students' basic listening and speaking skills necessary for everyday life. They will learn basic listening strategies, interact with others about simple topics, and produce simple sentences and questions with target vocabulary. Students will practice articulating consonant and vowel sounds correctly and produce accurate stress and intonation patterns. Offered Every Term.

Restriction(s): Enrollment is limited to English Language Institute level students.

Repeatable for 4 Credits

ELI 0110 Level 1: Written Integrated Cr. 2,4

The focus of this course is to introduce basic writing and grammar skills. Students will produce simple sentences on topics related to their personal needs. Timed and multi-draft writings will include simple sentences, correct use of capital and lower case letters, legible handwritten letters, and appropriate vocabulary. Basic grammatical structures will be introduced. Offered Every Term.

Restriction(s): Enrollment is limited to English Language Institute level students.

Repeatable for 4 Credits

ELI 0120 Level 1: Reading and Vocabulary Cr. 2,4

The focus of this course is to increase students' ability to read and comprehend simple material and to increase their ability to recognize familiar words in everyday contexts. Students will use a picture dictionary and develop vocabulary associated with simple topics. Students will read short texts from basic readers and ELI library books. Offered Every Term.

Restriction(s): Enrollment is limited to English Language Institute level students.

Repeatable for 4 Credits

ELI 0200 Level 2: Oral Integrated Cr. 2,4

The focus of this course is to develop students' abilities to carry on short, sustained conversation. They will apply listening strategies to discuss simple passages. They will interact with classmates. Students will use high-frequency vocabulary to produce simple and compound sentences with correct verb tenses. Students will use connected and reduced speech. Offered Every Term.

Restriction(s): Enrollment is limited to English Language Institute level students.

Repeatable for 4 Credits

ELI 0210 Level 2: Written Integrated Cr. 2,4

The focus of this course is to introduce paragraph writing and to develop basic grammatical understanding. Students will produce paragraphs in a variety of rhetorical modes. Timed and multi-draft paragraphs will include a topic sentence, simple transitions, three main points with some supporting details, and a concluding sentence. Basic grammatical structures will be introduced. Offered Every Term.

Restriction(s): Enrollment is limited to English Language Institute level students.

Repeatable for 4 Credits

ELI 0215 Level 2: Intensive Reading and Vocabulary Cr. 1,2

The focus of this course is to increase students' comprehension of printed material and acquire high-frequency vocabulary. Students will read simplified texts and apply reading skills, such as identifying main ideas and details, inferencing, and understanding sequence. Students will acquire vocabulary by using definitions from the text, interpreting from the context, and using dictionary skills. Offered Every Term.

Restriction(s): Enrollment is limited to English Language Institute level students.

Repeatable for 2 Credits

ELI 0220 Level 2: Communicative Grammar Cr. 1,2

The focus of this course is to build students' communicative competence, or their ability to communicate effectively and appropriately. To that end, basic grammar points will be studied and practiced in ways that simulate everyday conversations and scenarios. Students will engage in a variety of communicative activities that focus on speaking and writing. Offered Every Term.

Restriction(s): Enrollment is limited to English Language Institute level students.

Repeatable for 2 Credits

ELI 0300 Level 3: Oral Integrated Cr. 2,4

The focus of this course is to develop students' emerging academic listening and speaking skills. Students will apply listening and speaking strategies. They will also give short presentations. Emphasis will be on generating compound and complex sentences using simple academic vocabulary. Students will pronounce English sounds accurately and follow intonation and stress patterns appropriately. Offered Every Term.

Restriction(s): Enrollment is limited to English Language Institute level students.

Repeatable for 2 Credits

ELI 0310 Level 3: Written Integrated Cr. 2,4

The focus of this course is to produce well-developed paragraphs in a variety of rhetorical modes on academic topics. This course will culminate in an introduction to essay writing. Intermediate grammatical structures, such as complex sentences, adjective clauses, and the present perfect, will be introduced. Error-correction tasks, peer evaluations, and self-evaluations will develop self-editing skills. Offered Every Term.

Restriction(s): Enrollment is limited to English Language Institute level students.

Repeatable for 2 Credits

ELI 0315 Level 3: Intensive Reading and Vocabulary Cr. 1,2

The focus of this course is to increase students' vocabulary and comprehension of longer and varied reading passages. Students will also be able to understand the structure of a text with transition words and the relationship between the main point(s) and supporting examples. Strategies to discern meaning of words from context will also be practiced. Offered Every Term.

Restriction(s): Enrollment is limited to English Language Institute level students.

Repeatable for 2 Credits

ELI 0320 Level 3: Extensive Reading Cr. 1,2

The focus of this course is to increase students' reading fluency by reading large quantities of texts. Class Readers will give the teacher the opportunity to help the students acquire the art of extensive reading, to improve their skills, and to monitor their progress closely. Students will choose their own texts for independent reading. Offered Every Term.

Restriction(s): Enrollment is limited to English Language Institute level students.

ELI 0400 Level 4: Oral Integrated Cr. 2,4

The focus of this course is to develop students' academic listening and speaking skills needed for successful extended academic discourse. Students will demonstrate detailed understanding of academic listening passages. Students will use speaking strategies for academic discussions and to summarize information. They will give speeches using visuals, transitions, and grammatically-correct sentences with academic vocabulary. Offered Every Term.

Restriction(s): Enrollment is limited to English Language Institute level students.

Repeatable for 4 Credits

ELI 0410 Level 4: Written Integrated Cr. 2,4

The focus of this course is to develop students' essay writing skills and improve accuracy in grammar, mechanics, and spelling. Essays will be produced in a variety of rhetorical modes on academic topics that include some authentic sources. Students will also be introduced to summarizing and citing authentic sources. Complex grammatical structures will be introduced. Offered Every Term.

Restriction(s): Enrollment is limited to English Language Institute level students.

Repeatable for 4 Credits

ELI 0415 Level 4: Intensive Reading and Vocabulary Cr. 1,2

The focus of this course is to increase students' academic vocabulary and comprehension of academic reading passages. Students will identify the structure, purpose, and connection between ideas in texts. Students will use strategies to discern meaning of words from context. They will acquire knowledge of word forms and will use dictionary skills to build vocabulary. Offered Every Term.

Restriction(s): Enrollment is limited to English Language Institute level students.

Repeatable for 2 Credits

ELI 0420 Level 4: Extensive Reading Cr. 1,2

The focus of this course is to increase students' reading fluency by reading large quantities of texts. Class Readers will give the teacher the opportunity to help the students acquire the art of extensive reading, to improve their skills, and to monitor their progress closely. Students will choose their own texts for independent reading. Offered Every Term.

Restriction(s): Enrollment is limited to English Language Institute level students.

Repeatable for 2 Credits

ELI 0500 Level 5: Oral Integrated Cr. 2,4

The focus of this course is to develop students' academic listening and speaking skills needed for successful extended academic discourse. Students will use listening strategies to show detailed understanding of lengthy academic listening passages. They will apply speaking strategies to share information and communicate with automaticity. Concentration will be on consistently speaking intelligibly and fluently. Offered Every Term.

Restriction(s): Enrollment is limited to English Language Institute level students.

Repeatable for 4 Credits

ELI 0510 Level 5: Written Integrated Cr. 2,4

Students will develop critical thinking skills through reading, writing, and classroom discussion. Students will write well-developed five- to eight-paragraph essays and relate assigned readings to their own experience. Students will learn how to incorporate outside sources into their essays and use appropriate citations. Advanced grammatical structures will be reviewed and expanded as necessary Offered Every Term.

Restriction(s): Enrollment is limited to English Language Institute level students; enrollment is limited to students with a major, minor, or concentration in English Language Institute.

Repeatable for 4 Credits

ELI 0515 Level 5: Research Skills Cr. 1,2

The focus of this course is to introduce skills essential to conduct academic research at the university level. Students will learn how to search for and evaluate academic sources in the library and online databases as well as how to read, analyze, and use the information gathered. The course also focuses on paraphrasing and summarizing. Offered Every Term.

Restriction(s): Enrollment is limited to English Language Institute level students.

Repeatable for 2 Credits

ELI 0520 English for Teaching Assistants Cr. 2

American English language skills to improve teaching effectiveness of non-native speakers of English. Pronunciation, stress, intonation, speaking rate; oral presentation practice; cultural factors in U.S. university classroom. Not offered for degree credit. Offered Every Term.

Repeatable for 4 Credits

ELI 0530 TOEFL/Timed Essay Writing Preparation Cr. 1-2

Class designed to enhance student's ability to understand and perform on the Test of English as a Foreign Language (TOEFL) for the paper-based and iBT(Internet)-based formats. Offered Yearly.

Restriction(s): Enrollment is limited to English Language Institute level students; enrollment is limited to students with a major, minor, or concentration in English Language Institute.

ELI 0540 Level 5: Media & Culture Cr. 1,2

The focus of this course is to gain a greater understanding of American culture and current events via extensive reading from print and digital media, leading to written assignments, oral presentations, and discussions. In addition, TV and radio programs, as well as podcasts and documentaries, will provide input for written and oral assignments. Offered Every Term.

Restriction(s): Enrollment is limited to English Language Institute level students.

Repeatable for 6 Credits

ELI 0699 Directed Study Cr. 1-4

Meets the needs of English as a Second Language (ESL) students in their last stages of preparation for matriculation. Based on students' particular needs, instruction will be provided to strengthen various academic preparation skills, including listening and note-taking practice in an academic context, extensive and intensive reading, and expository and research paper writing. Offered Every Term.

Restriction(s): Enrollment is limited to English Language Institute level students; enrollment is limited to students with a major, minor, or concentration in English Language Institute.

Repeatable for 8 Credits

ELI 0700 Written Communication Cr. 1,2

Through reading and writing of complex texts, students improve their understanding and use of American English grammar and mechanics (punctuation and capitalization) for academic and professional settings. Offered Every Term.

Restriction(s): Enrollment is limited to English Language Institute level students.

Repeatable for 2 Credits

ELI 0705 American Pronunciation and Clear Communication Cr. 1,2

Course addresses the communication needs of advanced-level, non-native English speakers who want to reduce the amount of pronunciation errors produced in their speech. Offered Winter.

Restriction(s): Enrollment is limited to English Language Institute level students.

Repeatable for 2 Credits

ELI 0800 Writing Skills I Cr. 3

This course integrates reading, writing, and grammar and focuses on comprehending main ideas and details, inferencing in simplified reading texts, and understanding This course integrates reading, writing, and grammar and focuses on comprehending main ideas and details, inferencing in simplified texts, and understanding vocabulary in context. Students will learn to organize and write paragraphs with simple grammatically correct sentences. Offered Spring/Summer.

Restriction(s): Enrollment is limited to English Language Institute level students.

ELI 0810 Oral Skills I Cr. 3

This course integrates listening and speaking in English and introduces culturally appropriate interaction in speech. Students listen to dialogues, newscasts, and short lectures; give presentations on a variety of topics; and receive individualized feedback on pronunciation. Offered Spring/Summer.

Restriction(s): Enrollment is limited to English Language Institute level students.

ELI 0820 Writing Skills II Cr. 3

This course integrates reading, writing, and grammar and will emphasize how reading and writing are related. Rhetorical modes of essay writing will be introduced, authentic texts will be read, and more advanced grammar points will be covered. Offered Spring/Summer.

Restriction(s): Enrollment is limited to English Language Institute level students.

ELI 0830 Oral Skills II Cr. 3

This course integrates listening and speaking in English and focuses on refining students' abilities to understand academic and informal spoken language by listening to academically-themed lectures and extended dialogues. They will develop critical thinking skills for responding to questions and giving presentations. Offered Spring/Summer.

Restriction(s): Enrollment is limited to English Language Institute level students.

ELI 0840 Writing Skills III Cr. 4

Course integrates reading, writing, and grammar; focuses on reading authentic materials and writing essays. Students work to improve their understanding and use of American English, grammar, and mechanisms for academic settings. Offered Spring/Summer.

Restriction(s): Enrollment is limited to English Language Institute level students.

ELI 0850 Oral Skills III Cr. 4

Course integrates listening and speaking in English and will help students increase their aural/oral fluency through participation in academic/content-based discussions and various other forms of speech in formal, informal, and academic settings. Offered Spring/Summer.

Restriction(s): Enrollment is limited to English Language Institute level students.

ELI 0860 Communication and Culture Cr. 4

This course will involve writing and oral presentations based on academic readings and cultural experiences. Additional instruction in grammar and sentence structure will be provided based on students' needs. Offered Spring/Summer.

Restriction(s): Enrollment is limited to English Language Institute level students.

Records and Registration

Office of the Registrar

In Person Services: Student Service Center, Welcome Center, 42 West Warren

Mailing Address: 5057 Woodward; Suite 5101, Detroit, MI 48202

Telephone: 313-577-3550, Fax: 313-577-7870

h (<http://www.reg.wayne.edu>)<http://wayne.edu/registrar> (<http://wayne.edu/registrar>)

The Office of the Registrar supports the instructional, research and service missions of the University by providing a wide variety of academic services to students, faculty and staff. The office consists of several units: The Office of the Registrar prepares academic calendars, assesses tuition and fees, determines residency, and reviews all appeals for exceptions to University enrollment policies. Records and Registration oversees registration, adds, drops, course withdrawals, grading, student personal and academic data, and transcripts/academic records. Curricular Services oversees the preparation of each term's Schedule of Classes, degree audit tools, graduation applications and diplomas. Transfer Credit evaluates coursework from other universities for undergraduate credit at Wayne State University.

Registration

Registration (<http://wayne.edu/register>) is the process of officially enrolling in classes for a particular term. Students can view the Class Schedule (<http://classschedule.wayne.edu>) online, add courses to their cart, and complete registration within Academica. A student may not attend any class for which he/she is not officially registered.

POST-BACHELOR STATUS: Students wanting graduate credit should NOT register 'post-bachelor.' This status allows students holding bachelor's degrees from accredited institutions to elect only courses open to undergraduate students (numbered below 7000), which may be used to fulfill prerequisite requirements for graduate admission. Credits for courses elected as a post-bachelor student do *not* count toward graduate credit.

Academica

Academica (<http://academica.wayne.edu>) is a secure gateway that provides unified access to Wayne State information, services, and computing systems. This comprehensive environment is a one-stop location where WSU students, faculty, and staff can conveniently use online self-service functions and easily access many computing systems, such as the Wayne Connect Email system and the Blackboard Learning System. Using Academica, students also have continual access to specific information and helpful tools needed for communication, collaboration, teaching and learning, and University administration. Current students can use secure self-services to check financial aid, register for and drop/add classes, pay tuition and fees, check holds and final grades, obtain enrollment verifications and transcripts, self-register for training programs/workshops, and more.

Accessing Academica requires a valid WSU Access ID (<http://computing.wayne.edu/accessid>) (e.g., xy6789) and password. As soon as a student applies for admission or an employee is hired, a unique Access ID is automatically created. The university's Help Desk (<https://tech.wayne.edu/helpdesk>) services can provide technical assistance if necessary.

Degree Works

Degree Works (<http://wayne.edu/degreeworks>) is a degree tracking tool that allows you to see your progress toward graduation and help you and your advisor determine which courses you still need to take. Along with your advisor, you can also map out which courses you will take in future semesters, putting you on the right path for graduation.

Drop/Add – Adjusting Your Schedule

Registered students may drop and/or add classes on the date(s) indicated on the Registration Calendar. Note the following requirements:

1. The regulations pertaining to dropping and adding courses are stated as they pertain to regular courses fifteen weeks or more in duration.

These regulations are applied proportionately to courses that are offered for less than fifteen weeks. Students can click on the Course Reference Number (CRN) on the class schedule website to view specific deadline dates for each course(s). Students can also contact the Registration Office (registration@wayne.edu) for any questions regarding these regulations.

2. Students who do not officially drop their courses within the first two weeks of classes are financially obligated to pay for the courses even if they have not attended any class sessions.
3. Students who officially drop full term courses before the conclusion of the first two weeks of classes (for the Fall and Winter terms) are entitled to 100% tuition cancellation, and the courses do not appear on the students' academic records.
4. Students are not permitted to add courses after the first week of the term without instructor and departmental permission. Departments are required to enter a late add permit/override for students if exceptions are made to permit adding of classes during the second week.
5. Effective Fall 2018, the withdrawal period starts after the second week of classes, and lasts through the tenth week. The withdrawal will include a notation on the academic record of 'WP' - Passing, 'WF' - Failing, or 'WN' - No Basis for Letter Grade. Students are required to submit their withdrawal through Academica for their instructors' approval. Once logged into Academica, click the Student tab, under Registration from the Student Services menu, choose Withdraw from a Class, follow the prompts on each page. Before a withdrawal request is sent to the instructor, undergraduate and Masters level students will be required to complete a SMART Check. See the Financial Aid website (<http://wayne.edu/financial-aid/receiving/withdrawal>) for more information.
6. Students are not permitted to withdraw from courses after the end of the tenth week of class for full term classes. The withdrawal deadlines are published in each term's academic and registration calendar. Withdrawal dates for less than full term courses are adjusted proportionally. Late withdrawal requests will not be approved. Medical withdrawal requests have separate deadlines.

Classes for which a grade has been earned cannot be withdrawn.

College of Engineering: Students are not permitted to withdraw from courses after the fifth week of classes without written approval of their advisor. Some departments have more stringent restrictions on withdrawing from courses.

Transcript Request Policy

Official transcripts bear the seal of the University and the signature of the Registrar. They are sent directly to the receiving party. Transcripts are issued free of charge, up to ten copies per year. A fee of \$5.00 per transcript is charged for copies in excess of ten. A fee of \$20.00 is assessed for each emergency transcript. An emergency transcript is one which is mailed for overnight delivery. The next day service only applies to street addresses (No Post Office Boxes) within North America. Next day service requests must be received by 1:00 p.m.

Students may request transcripts via Academica (<http://academica.wayne.edu>). There are no on demand transcript requests. Due to the signature requirement for releasing educational records, the University cannot accept telephone requests for transcripts.

Transcripts are not issued to anyone outside the University without the written permission of the student. Requests for official transcripts will not be honored if the student or former student has an outstanding financial obligation to the University.

For students who have been in attendance since the year 2000, transcripts can be sent electronically. A valid email address must be provided.

Release of Student Records

The University recognizes the educational records of students as being privileged and has a policy designed to ensure that this information is not improperly divulged without the consent of the student. The University is subject to the Family Education Rights and Privacy Act (<http://reg.wayne.edu/students/privacy.php>) (FERPA) and has promulgated regulations pursuant thereto. Copies of the regulations and a list of student records maintained by the University are available for inspection in the Office of the Registrar. The University reserves the right to provide anonymous academic information to other schools and colleges when it is to be used for curriculum evaluation purposes.

Michigan's Freedom of Information Act

The Freedom of Information Act (PA 242) provides that a member of the public, in accordance with certain guidelines, has a right to inspect and receive copies of public records maintained by the University. A public record is broadly defined and includes written documents, pictures, recordings, punch cards, magnetic cards, etc., which are maintained by the University in the course of official responsibilities. However, certain records are exempt from disclosure.

The Media Relations Office, located in 3100 Academic/Administrative Building, is responsible for accepting requests for public records, and the Director of that office is the University officer in charge of providing this service. Under statute, a fee can be charged for records released and is based on the cost of labor involved in the search, examination and duplication of records, as well as the mailing costs. Only the Office of General Counsel may authorize the denial of a FOIA request.

Student Directory Information

Effective Winter Term 2000, and updated Spring/Summer 2017, Wayne State University policy permits the release of certain Student Directory information. The specific items are: name, university-provided email address, major, classification (freshman, sophomore, etc.), participation in official recognized activities, including sports, height and weight of member of athletic teams, degree(s) received from Wayne State University, and honors and or/academic awards received.

Unless a student informs the Office of the Registrar that he or she does not want this information released, it will be available to third parties on request. In addition, the student's name, WSU e-mail address, College/School, and major will be visible in the University's Electronic Directory on the Internet. Students who do not want this information released must formally request withholding by completing the Release of Directory Information form, available from the Office of the Registrar (<http://reg.wayne.edu>).

WSU OneCard

The WSU OneCard is a multi-purpose identification and debit card all in one. It is a convenient, easy-to-use card designed to provide students with access to a wide variety of campus services including, parking, door access, copying and printing services food and book-store purchases, and more, all without having to use cash. The OneCard is needed to access the fitness center, the complimentary campus shuttle and serves as the Library Card for the WSU Libraries. Students should contact the OneCard Office (<http://www.onecard.wayne.edu>) for complete details.

Retention and Graduation Data

The following information provided by the National Student Clearinghouse reflects 4-year and 6-year graduation and retention rates of the Fall 2010 cohort. Decisions by students to complete degree

programs in more than four years varies from personal to programmatic to economic reasons. Additionally, some students in the 2010 cohort have graduated or will eventually graduate at other institutions through transfer or pre-baccalaureate entry into professional programs.

The Fall 2010 cohort consisting of 2400 students tracked by the Clearinghouse for periods of four years and six years shows:

Description	At the End of 4-years	At the End of 6-years
4-year degree from WSU	13%	39%
4-year degree from other institution	1%	6%
2-year degree from other institution	2%	5%
Certificate from other institution	1%	1%
Retained at Wayne State University	41%	11%
Retained at other 4-year institution	8%	6%
Retained at other 2-year institution	13%	8%
Not retained, not completed	22%	24%

Student Academic Success Services Ombuds Office

790 Student Center Building; 313-577-3487
<http://ombudsman.wayne.edu>

The Ombuds Office exists to support students in achieving their academic goals by providing them with the tools to access services and resolve issues that are hampering their academic progress. The Office advises students about University policies and procedures, helps them identify possible avenues and solutions, and directs them to relevant University services.

The Ombuds Office is objective, impartial, and does not advocate a particular point of view. It listens to student-related concerns and exercises independent judgment regarding any action it may take. The Office has no authority to change academic or administrative decisions, but it facilitates communication when suitable. Confidentiality is maintained as appropriate and feasible based on individual student needs and desires.

The Ombudsperson is the Chair of the Tuition and Fees Appeals Board (TFAB). The TFAB is charged by the President to be the final arbiter of appeals for tuition and related fees. Students who have exhausted the appeals process in the Office of the Registrar related to tuition and fees may appeal to the TFAB. Each appeal is reviewed as an individual case, and cancellation of tuition and/or fees is granted only when circumstances warrant. It cannot grant tuition adjustments for classes in which students received earned grades, nor can it grant course withdrawals without tuition cancellation. The TFAB will consider only those appeals that are filed within one calendar year following the last day of the academic term in which the challenged fees were assessed.

Counseling and Psychological Services (CAPS)

552 Student Center Building; 313-577-3398

<http://caps.wayne.edu>

Counseling and Psychological Services (CAPS) enhances students' development and academic success by promoting an open, problem-solving approach to personal challenges and working collaboratively on building appropriate skills, attitudes, and actions.

Service hours: Monday - Friday 8:30 am to 5:00 pm. Registered WSU students may drop-in or call for an evaluation with a CAPS counselor Monday through Friday from 9:00 am to 4:00 pm.

Eligibility: All currently enrolled students are eligible for counseling evaluation to assess whether their needs can be addressed effectively via short-term counseling at CAPS or require more specialized or longer-term counseling at another facility. Faculty, staff, alumni, children, or spouses are not eligible.

Crisis Services: In the case of a non-life-threatening crisis, students, faculty, or staff can contact CAPS and indicate that a student needs immediate assistance. If assistance is needed during evening or weekend hours, contact the Wayne State University Police Department at 313-577-2222 or call the Wayne County crisis hotline at 313-224-7000. In the event of a life-threatening emergency at any time, contact the Wayne State Police Department.

Student Disability Services (SDS)

1600 David Adamany Undergraduate Library; 313-577-1851;
 313-202-4216 (Videophone)
<http://studentdisability.wayne.edu>

Student Disability Services is the office at Wayne State University that determines eligibility and implements academic accommodations, services and support for students with disabilities pursuant to the Americans with Disabilities Act (ADA), the ADA Amendments Act of 2008, and Section 504 of the Vocational Rehabilitation Act of 1973. SDS is committed to teaching students to advocate for themselves in order to fulfill their academic goals. SDS also provides training and outreach throughout the university to ensure equal access to all university programs.

Disability Determination: In order to register for SDS services, students must self-identify by providing documentation of their disability. Students will meet with disability specialists to discuss appropriate and reasonable accommodations. Once accommodations are determined, students are guided through the process of providing faculty with their accommodation letters and securing appropriate services. Students receiving accommodations are held to the same academic standards as all other WSU students and are responsible for requesting services and following procedures in a timely manner.

Academic Accommodations: Accommodations and services are individualized and based upon the student's documentation. It is for this reason that students should ensure that they have sufficient documentation that supports the need for appropriate and reasonable accommodations. Some of the accommodations and services provided by SDS might include alternative testing, interpreter and CART reporting services, alternative text format, note-taking assistance, furniture requests, use of assistive technology, and use of SDS exam/study rooms. Students registered with SDS are also eligible for pre-priority registration for classes. Through the SDS liaison program with University departments and programs, SDS ensures that members of the University community understand the types of support offered to enhance collaboration in providing accommodations.

Assistive Technology: The SDS staff includes an assistive technician who secures alternative text formats for students and teaches students how to use the various assistive technologies. SDS exam/study rooms

house CCTV magnification equipment, computers with software such as Zoomtext, JAWS, Kurzweil Educational Systems, Dragon Naturally Speaking and Inspiration. Students are also informed about free downloadable software programs for reading and recording.

Community Resources: SDS collaborates with various community agencies that assist students with disabilities at the university. Students are connected to agencies such as Michigan Rehabilitation Services, the Bureau of Services for Blind Persons, Learning and Disability Network/ Michigan.

Career Services

1001 Faculty/Administration Building; 313-577-3390
<http://www.careerservices.wayne.edu>

Career Services provides support to students and alumni in defining career and employment goals and assists them in their search for employment opportunities. In addition to the following services, Career Services offers topical workshops, career events, and group and individual career/employment counseling. Career Services welcomes the opportunity to discuss customized services to meet individual needs.

Career Development: The main focus of this service is to help students explore career options, clarify their career goals, and link those goals to appropriate academic paths. Individual and group services are available.

Cooperative Education, Internships, and Summer

Employment: Comprehensive paid professional, career- and non-career related work experiences are available, including a wide variety of part- and full-time experiential learning situations. Orientation workshops are offered on an ongoing basis.

On-campus Student Employment: Students may work on-campus up to twenty hours per week as a Student Assistant or College Work-Study employee. Job openings may be viewed in-house or online via our open posting system.

Professional Employment: Graduating students and alumni may increase professional full-time employment opportunities through on-campus interviews, resume referral, career fairs, in-house and on-line job postings, along with a myriad of career-related support services.

Testing, Evaluation, and Research Services

686 Student Center; 313-577-3400; Fax: 313-577-0617
<http://www.testing.wayne.edu/>

Testing

We provide:

- A secure, standardized, testing environment where students can demonstrate their academic skills for placement, course credit, or high stakes decisions.
- The opportunity for students to earn course credit in courses accepted by the transfer credit office through the College Level Examination Program (CLEP).
- Placement testing for students interested in meeting general education and other requirements targeted toward their personal skill level in Biology, Chemistry, English Composition and Mathematics.
- Outside exams: Graduate Record Exam (GRE), Testing for the Law School Admission Council (LSAC), Medical College Admission Test (MCAT), Miller Analogies Test (MAT), Test of English as a Foreign Language (TOEFL), Written and Oral exams for the American Council

on the Teaching of Foreign Languages (ACTFL), and written exams for doctoral students in the College of Education.

Evaluation

We collect student opinions about faculty teaching through Student Evaluation of Teaching (SET). We share SET reports with students, administrators and faculty members toward the goal of improving quality of teaching at the University.

We survey students and faculty regarding the quality of their education through

1. the Cooperative Institutional Research Program (CIRP) Freshman Survey,
2. National Survey of Student Engagement (NSSE) and
3. Faculty Survey of Student Engagement (FSSE).

Research Services

We offer consulting on best practice in testing for faculty and academic staff. We offer machine scoring of exams, including tabulation of test scores and statistical output to help faculty improve their tests.

Office of Military and Veterans Academic Excellence (OMVAE)

Suite 687 Student Center Building;
313-577-9180; Fax: 313-577-5020
<http://www.omvae.wayne.edu>

This office assists veterans, active-duty service members, reservists, National Guard and eligible dependents/survivors in utilizing educational benefits. Specifically, students are aided in applying for Federal benefits outlined under Title 38, and Title 10, U.S.C., including: the Montgomery G.I. Bill (chapter 30), Vocational Rehabilitation (chapter 31), Post 9/11 G.I. Bill (Chapter 33), Reserve Educational Assistance Program, the Reserve G.I. Bill (chapter 1606), REAP (chapter 1607), and the Survivors'/ Dependents' Educational Assistance (chapter 35). All eligible students must officially request (<http://omvae.wayne.edu/va-certification.php>) to use their educational benefits each semester.

Non-Degree Status: Students must be in a degree program to receive benefits. Those not currently admitted to a degree program and enrolled in classes must verify to the OMVAE via an academic advisor (<http://advising.wayne.edu/makeappt.php>) the reason for enrollment (i.e., completing foundation courses for a master's-level program).

Transfer Credits: Wayne State University will give four transfer credits for veterans, reservists, National Guard, and active-duty service members for service in the U.S. military. The University will require military discharge document DD-Form 214 (<http://www.dd214.us>).

Wayne State University will accept up to twelve transfer credits from veterans upon receiving their Joint Service Transcript of military training. These credits are to be evaluated according to the 'Guide to the Evaluation of Educational Experiences in the Armed Services,' published by the American Council on Education.

This policy shall be in effect for all veterans, reservists, National Guard, and active-duty service members currently enrolled Fall 2005 and thereafter.

Late Tuition and Late Registration Fee Waiver: Late fees, Partial Payment fees and Late Registration fees can be waived for all students currently receiving VA Educational Benefits. Contact OMVAE for assistance.

Licensing/Certification Reimbursement: In most instances, students receiving VA educational benefits (<http://www.gibill.va.gov>) are

eligible for reimbursement (https://www.benefits.va.gov/gibill/licensing_certification.asp) for licensing test fees.

Tutorial Assistance is also available (https://www.benefits.va.gov/gibill/tutorial_assistance.asp) as part of all benefit packages as noted above. Eligible recipients may receive \$100.00 per month, up to twelve months to help defray tutoring costs. Contact the OMVAE for further details. No charge to benefit entitlement is incurred for the first six months received of Tutorial Assistance.

In-State Tuition Waiver: Individuals on active duty in the U.S. Military who are stationed in Michigan and their dependents are eligible for Michigan in-state tuition. Stationing orders and proof of relationship (for dependents) must be provided with the application.

Students utilizing Chapter 31 or Chapter 33 G.I. Bill™ benefits will be granted a deferment of tuition and fees for the current enrollment period upon submission of a corresponding Certificate of Eligibility (or suitable documentation which demonstrates benefit eligibility). The deferment will be placed proportionally based on the student's percentage of eligibility.

Veterans and their dependents are eligible for Michigan in-state tuition. The term "veteran" means a citizen of the United States or a resident alien whose most recent separation from any branch of the armed forces of the United States was under conditions other than dishonorable after having served on active duty for 90 consecutive days or more by reason of disability incurred while serving on active duty.

Individuals who are members of the National Guard of any state, or who were separated from the National Guard of any state under conditions other than dishonorable, and their dependents are eligible for Michigan in-state tuition.

Without regard to the foregoing, any individual using educational assistance under either Chapter 30 (Montgomery GI Bill® – Active Duty Program), Chapter 33 (Post-9/11 GI Bill®), of title 38, United States Code, and/or the Marine Gunnery Sergeant John David Fry Scholarship (38 U.S.C. § 3311 (b)(9) who lives in the State of Michigan while attending Wayne State University (regardless of his/her formal state of residence) is eligible for Michigan in-state tuition.

VA Work-study Program: The VA work-study (<https://www.benefits.va.gov/gibill/workstudy.asp>) allowance is available to all students eligible for VA Educational Benefits. Those eligible who are at least a three-quarter-time student in a college degree program, or a vocational or professional program, can 'earn while they learn.' Pay for VA Work-study is the equal to the Federal minimum wage or your state minimum wage, whichever is greater.

Services performed under a VA work-study program must be related to VA work. Examples of acceptable work are:

- Processing VA paperwork at any university or college having a VA Office (e.g., you may be enrolled at WSU but work at Oakland or Macomb Community College VA Offices)
- Outreach services under VA supervision
- Work at VA medical facilities or National Cemetery System offices
- Work with the Veterans counselor at any of the MESC offices
- Work in the Education or Transition offices at local base
- Work at Department of Defense facilities related to education benefits under the GI Bill.

National Guard Students: Please note that Wayne State does not currently participate in the Guard's Tuition Grant Program. However, if your branch provides Tuition Assistance and/or Tuition Reimbursement

the OMVAE will provide assistance as necessary with regard to grade and tuition certifications to your unit.

Reserve Officer Training Corps (ROTC): Wayne State University offers an Army ROTC (<http://omvae.wayne.edu/rotc>) program. Students interested in joining the Army ROTC program at Wayne State University should contact M.S.G. Nicholas Lachance 734-647-3034.

Recalled To Active Duty (Reservists / National Guard): Students serving in the Selected Reserves or National Guard who are called up to Active Duty during a semester may request full reimbursement of tuition and fees. Students must file an *Exception to Enrollment Policy* form and submit a copy of their orders to OMVAE. Students called up active near the end of a semester are encouraged to consider requesting incomplete grades for coursework.

Early-Out Requests: Potential Students on Active Duty requesting a verification of enrollment to be sent to their Commands must be admitted to Wayne State University and have registered for classes. Please contact the Graduate Admissions Office and the Registration Office for assistance. Once these conditions are met, the VA Certifying Official can complete an enrollment verification for active duty members seeking an 'early out' from military service. Hard copy proof of student's admittance and registration for classes is NOT required for the VA Certifying Official to complete the enrollment verification.

Tuition and Fees

Listed below are the Tuition and Fees, as adopted by the Board of Governors, at the time of preparation of this Bulletin. Please see the Undergraduate Bulletin (<http://bulletins.wayne.edu/undergraduate>) for rates in Undergraduate programs. Current tuition and fee information is also available on the Office of the Registrar's website (<https://wayne.edu/registrar/tuition>). **Tuition and Fees are subject to change without notice by action of the Board of Governors.**

Tuition and Fees, Graduate

Business Administration, Engineering (except for Global Exec. Track of Industrial Engineering see below), and Library Science

Resident	\$787.55 per credit
Non-Resident	\$1,578.75 per credit

Education (except for Division of Kinesiology), Graduate School, Liberal Arts and Sciences, and Social Work

Resident	\$678.55 per credit
Non-Resident	\$1,469.75 per credit

Education (Division of Kinesiology) and Eugene Applebaum College of Pharmacy and Health Sciences

Resident	\$771.44 per credit
Non-Resident	\$1,562.64 per credit

Fine, Performing and Communication Arts

Resident	\$712.47 per credit
Non-Resident	\$1,503.68 per credit

Global Executive Track Doctoral Program in Industrial Engineering

Resident	\$1,575.09 per credit
Non-Resident	\$2,366.29 per credit

Law School (J.D. Program and LL.M.)

Resident Year 1 and LL.M.	\$1055.56 per credit
Non-Resident Year 1 and LL.M.	\$1,158.00 per credit
Resident Years 2, 3, and Unranked	\$1055.56 per credit
Non-Resident Years 2, 3, and Unranked	\$1,158.00 per credit
Resident Year 4	\$1,035.87 per credit
Non-Resident Year 4	\$1,138.31 per credit

M.D. Program

For students registering for 40 or more hours, a flat rate will be assessed as follows:

Resident Years 1-3	\$34,039.00
Non-Resident Years 1-3	\$61,414.00
Resident Year 4	\$33,210.00
Non-Resident Year 4	\$69,109.00

For students registered for less than 40 hours, a per credit hour rate will be assessed as follows:

Resident Years 1-4	\$681.00 per credit
Non-Resident Years 1-3	\$1,227.00 per credit
Non-Resident Year 4	\$1,417.00 per credit

Medicine: Graduate Programs (excluding M.D.)

Resident	\$845.26 per credit
Non-Resident	\$1,595.71 per credit

Nursing

Resident	\$925.72 per credit
Non-Resident	\$1,716.93 per credit

Student Fees

Registration Fee

There is a \$315.70 registration fee for graduate and professional students (other than M.D. students). The registration fee is refundable according to the same principles as tuition and other fees.

Late Registration Fee

Any student registering after the Priority registration date (as indicated in the Schedule of Classes (<http://www.classschedule.wayne.edu>)) must pay either a \$35.00 Late Registration Fee if registration is completed before the start of classes or \$70.00 if completed after the start of classes. Late Registration Fees will be waived for new students in their first term of WSU enrollment.

Student Services Fee

Graduate and professional students (other than M.D. students) are assessed a \$54.56 fee per credit per term. The Student Services Fee is used primarily to maintain, upgrade and replace student computing and technology resources on campus. A small portion is also used to fund student activities on campus, and to enhance programs directed toward improving on-campus activities, including athletics.

Doctoral Candidate Maintenance Fee

If a student has registered for all four Candidate Status courses but has not completed the dissertation requirements, the student may register in Candidate Maintenance status (9995) until the requirements are completed, the time limit for the degree is reached, or the student withdraws from the program. Registration in Candidate Maintenance

Status is required in all semesters in which the student uses University resources, including the semester in which the student defends the dissertation. The Candidate Maintenance fee is \$370.26 (equivalent to the Registration Fee plus the Student Services Fee for one graduate credit) and confers full-time registration status.

Medical Student Fees

M.D. students (Years 1-4) are assessed a Student Services Fee of \$26.00 per credit and an annual Student Support Fee of \$920.00.

Student Exchange and Visitors Information Service (SEVIS) Fee

International students and scholars/visitors who must be reported through the federal SEVIS system shall be charged a \$50.00 non-refundable fee for each term of enrollment.

Course Material Fees

These fees are required of some classes in which a relatively large portion of instructional costs is due to the necessary use of consumable resources. The fee is automatically assessed; a fee card is not required. The fee may be canceled when a course is officially dropped within the tuition and fee cancellation period specified in each semester's term calendar. For additional information, contact the Department offering the course. Courses listed as having special fees require payment of the fee in addition to the tuition.

Music Fees

Students registering for music courses taken as private lessons pay an additional fee. In the event of withdrawal, the student will receive a refund of the difference between the fee assessed and the cost to the University of any lessons that were provided.

Examination Fee for Credit by Examination

The fee for an examination taken to establish credit by examination is \$10.00 per credit. Such examinations will be approved under provisions established by the Schools and Colleges. Credit allowed on the basis of transcript entries from another institution is not applicable to this provision.

Graduation/Certificate Fee

There shall be a \$40.00 fee for students who apply for a degree or certificate/diploma. Graduate applicants for graduate degrees will not be charged the Graduation Fee as they pay a higher Registration Fee. Undergraduates who are new to the university in fall 2014 or after will pay a Matriculation Fee in lieu of a Graduation Fee and in lieu of an Orientation Fee.

Payment of Tuition and Fees

Disclosure Statement

The University reserves the right to update and/or change this information at anytime.

Student Financial Obligation for Payment of Tuition and Fees

When registering for courses each semester students are required to electronically sign a "Financial Responsibility Agreement." This agreement represents a binding contract obligating the student to pay all tuition and fees assessed including any collection, attorney, and/or litigation costs associated with collecting those fees, in the event of non-payment.

Payment Due Dates

Students registering during priority registration period are expected to pay the balance as follows:

FALL SEMESTER - August 15
WINTER SEMESTER - December 15
SPRING/SUMMER SEMESTER - April 15

Students registering on or after these payment dates are expected to pay the balance in full at the time of registration.

Students who register for short-term courses are required to pay the balance in full at the time of registration.

Students adding credits after the tenth day of the term must pay the additional tuition and fee assessment at the time the credits are added.

Failure to pay the balance in full by the specified due dates or dishonoring payment plan schedules will result in the assessment of monthly "late payment fees" and financial "holds" preventing registration, drop/add, release of official transcripts, diplomas, degrees and other university services.

Please refer to the published eBill Schedule and Payment Due Dates (<http://fisops.wayne.edu/bursar/e-bills/eBill-Schedule.php>) on the Office of University Bursar's website.

Checks, Money Orders, and Cash: Wayne State University accepts personal and certified checks, money orders, and cash as payment for tuition and fees. Payments can be mailed, however, please do not mail cash. Checks or money orders should be made payable to Wayne State University. All checks must be issued in U.S. dollars, and drawn on or payable through a U.S. or Canadian bank. The student's name and University AccessID number should be written on the check or money order. Personal checks are not accepted on delinquent balances.

Fee-free ACH Checks: Wayne State University also accepts fee-free automated clearing house (ACH) check payments using WSU Pipeline. Checks (paper or ACH) returned by the bank are subject to returned check fees.

Credit Card Payments

Wayne State University does not accept credit card payments. Credit card payments can be applied to a student's University account by a third party processor, CASHNet SmartPay. CASHNet SmartPay will assess a convenience fee (2.9%) on all credit card payments. To make a credit card payment log into WSU Pipeline and select credit card payment which will automatically invoke the CASHNet SmartPay process. Discover, MasterCard and American Express cards are accepted.

Installment Payment Plans (IPP)

Wayne State University has two affiliations which enables it to offer interest free installment payment plans for students. Installment payment plans allow students and/or parents to make payments in easy monthly installments. Students can enroll for the fall and winter semester or choose both as an annual plan. A plan is not offered for a spring/summer semester. The plans are offered through Tuition Management Systems (TMS) (<https://wayne.edu/bursar/payment/installment-plans>). There is a nominal fee for enrolling. Contact the company for terms and conditions.

Sponsored Tuition Programs

Certain employers participate in direct tuition billing arrangements as part of their employee benefits programs. Students with questions about the University's procedures or required documentation for a specific plan should contact the Student Accounts Receivable Office at 313-577-6623.

IMPORTANT: Students who do not drop their courses during the tuition cancellation period for the term are financially obligated to pay for the courses even if they have not attended any class sessions. Tuition cancellation deadlines are available on the Registration Calendar (<http://reg.wayne.edu/students/registration-calendar.php>).

Students with questions regarding any information presented in Payment of Tuition and Fees section above should contact the Office of the University Bursar at 313-577-3653.

Registration is not permitted beyond the prescribed registration date unless extenuating circumstances beyond the control of the student warrant an exception to University Policy as determined by the University Registrar. In such cases, full tuition, Registration Fee and Late Registration Fee must be paid in advance of registration.

Short Term Courses

Payment of the full tuition and the non-refundable Registration Fee is required on the date of registration or no later than the first class meeting date. Late Payment Fees are assessed to any student who has not paid his/her tuition and fee assessment by the due date.

Special Adjustments

The University Registrar is authorized to make adjustments in the application of the policies stated in this section when unusual circumstances warrant. Examples of circumstances which may warrant special consideration include: serious illness or death of the student or someone closely related, or mis-advisement by a University representative. Tuition cannot be canceled for reasons such as changes in work schedule or other employment demands, claims of lack of information, insufficient funds, unawareness of the difference between tuition and student financial aid, undocumented reasons, or for reasons that are within the control of the student. Non-attendance, except for situations falling under the University non-attendance policy (below), is not in and of itself a reason for tuition and fee cancellation. Students (or an authorized representative in the case of death or serious illness) must submit their applications and supporting documentation to the Office of the Registrar. A medical withdrawal is a complete withdrawal from all courses, supported by medical reports from the attending physician. Requests for exceptions to tuition and fee policies must be submitted within approximately two months of the end of the term, as follows:

Fall Term - March 1
Winter Term - July 1
Spring/Summer Term - November 1

Deadlines falling on weekends will be extended to the next business day.

University Non-Attendance Policy

The University Non-Attendance Policy will allow 100% tuition cancellation only for students in their first term of attendance at Wayne State University. Instructors for all courses must verify the student did not attend classes after the tuition cancellation deadline. This policy is designed to provide relief to those students who in their first semester at Wayne State may not be familiar with the University's Tuition Cancellation Policy.

Where the student has otherwise proceeded properly, (s)he may be granted full cancellation of tuition and fees assessed for the class(es) involved:

If the University cancels the class(es), or

If the University re-schedules the class(es) after the student has registered and (s)he is now unable to attend, or

If an authorized University representative has taken action which causes financial loss related to tuition, e.g., authorizing a student's schedule when the student does not have the necessary prerequisite(s).

Appeal Procedures: If a student (or an authorized representative in the case of death or serious illness) is dissatisfied with the Registrar's decision with reference to this policy, the student (or an authorized representative) may appeal to the Tuition and Fee Appeals Board through the University Ombudsperson.

University policy allows for a Request for Medical Withdrawal. A medical withdrawal is a complete withdrawal from all courses. For approved requests, the University Medical Withdrawal Policy will grant 100% tuition and fee cancellation if a student stops attending ALL classes before the end of the 10th week of the scheduled class meeting period in a full fall/winter term. Medical documentation will need to confirm that medical attention was provided during this time period. For medical withdrawals occurring during the 11th or 12th week, tuition cancellation will be granted at the rate of 60%. There is no tuition cancellation after the twelfth week of the term. These periods are adjusted proportionally for courses that do not run the full term. While a request is under review tuition payments should be made as scheduled.

Holds on Records

Initial eligibility to register for classes each semester is based on a student's admission status with the University. All students must be authorized by the University in order to enroll in classes. 'Holds' may be placed on student records, and registration denied to a student, for academic reasons (e.g., probation or dismissal), a disciplinary problem, money owed to the University, failure to return library books and/or other supplies and equipment, and/or non-compliance with program, Departmental, School/College, or University regulations.

A 'Hold' will be placed on the records of any student who has past due indebtedness to the University. While the hold is in effect, registration for a subsequent term will not be permitted, official transcripts of academic work taken at the University will not be furnished, degree or enrollment certification will not be provided, nor will a diploma be issued.

Tuition Cancellation

Tuition may be canceled in accordance with the following schedule when students officially drop classes using the Academics on-line portal, by submitting a properly completed Register/Drop/Add form, or by sending a certified letter to the Office of the Registrar. A certified letter requesting to drop classes sent through the U.S. Postal Service shall be considered effective on the date it is received in the Office of the Registrar.

Students who officially drop classes before the conclusion of the first two weeks of classes (for the Fall and Winter terms) are entitled to 100% tuition cancellation, and the dropped classes do not appear on the academic record.

Students are contractually liable for tuition unless they take official action during the tuition cancellation period to drop classes.

Students who officially withdraw from fifteen-week classes after the second week of classes (for the Fall and Winter terms) are not entitled to any tuition cancellation.

The tuition cancellation schedule shown below applies to courses that start in accordance with the Official University Academic Calendar. The tuition cancellation schedule for courses with specially approved starting dates is dependent upon the starting date of the course. Questions about the tuition cancellation schedule should be referred to the University Registrar.

Classes meeting fewer than four weeks: Students who officially drop scheduled classes before the first day of classes are entitled to a 100% tuition cancellation and 0% thereafter.

Classes meeting four to eight weeks: Students who officially drop scheduled classes before the second week of classes are entitled to a 100% tuition cancellation and 0% thereafter.

Classes meeting nine to fifteen weeks: Students who officially drop scheduled classes before the third week of classes are entitled to a 100% tuition cancellation and 0% thereafter.

Classes meeting sixteen to twenty-seven weeks: Students who officially drop scheduled classes before the fourth week of classes are entitled to a 100% tuition cancellation and 0% thereafter.

Classes meeting twenty-eight or more weeks: Students who officially drop scheduled classes before the seventh week of classes are entitled to a 100% tuition cancellation and 0% thereafter.

Tuition Regulations and Review Procedures

The following regulations and review procedures are established by Wayne State University for tuition and fee purposes. Wayne State University recognizes three means by which an individual may establish eligibility for in-state tuition and fees:

By establishing residence by presence in the State of Michigan;

By establishing attendance at Michigan high schools; or

By establishing military service status.

Establishing Residence by Presence in Michigan

Generally, in order to establish residence by presence in the State of Michigan, an individual must document at least six months of continuous physical presence in the State. The six months continuous residence must be completed before the first day of classes for the semester in which in-state tuition is sought. Even if someone is present in Michigan for six months, the person may not qualify for in-state tuition; it depends on whether the person is in Michigan for educational purposes or some other reason. Under limited circumstances which clearly demonstrate that a student's presence in the State of Michigan is not primarily for educational purposes, the student may be eligible for in-state tuition prior to the passage of the six-month presence requirement.

Temporary Absences

In general, a person's residence is the place where he or she actually lives with the intention of making it the person's permanent home and to which he or she intends to return from temporary absences. A person may be temporarily absent from Michigan without affecting his or her previously established residence. Full-time attendance at a school outside Michigan or enlistment in a military service are examples of temporary absences. Other types of absences for more than six months will be presumed not to be temporary.

Presence for Educational Purposes

Coming to Michigan from another state or country in order to attend Wayne State University or another school does not establish residence. A non-resident at the time of his or her enrollment remains a non-resident throughout his or her presence as a student, except where it can be established that presence in the State of Michigan is primarily for purposes that are not educational, with enrollment only incidental to the primary purpose of being in Michigan. If a student enrolls in undergraduate school for more than eight credits, or in graduate

school for more than six credits, or in Law School for more than ten credits in any one full length semester, within six months after arrival in Michigan, Wayne State University normally presumes that the student is in Michigan for the purpose of attending school. Applicants must demonstrate that their presence in Michigan is primarily for purposes that are not related to enrollment.

Factors Considered in a Residence Classification

The following circumstances, although not conclusive, support a claim for in-state tuition on the basis of residence.

The student is employed in Michigan on a permanent, full-time basis or has accepted an offer of permanent employment in Michigan.

The student's parents (or in the case of divorce, one parent) are legal residents of Michigan as shown by their permanent employment in Michigan and/or their establishment of a primary household in Michigan, and the applicant previously was a resident of Michigan and has maintained significant connections to Michigan.

The student's spouse or partner is employed in Michigan on a permanent, full-time basis and the applicant moved to Michigan as a consequence of that employment; and

The student has severed ties to his or her previous state of residence so that he or she no longer can reasonably be considered to be a resident of another state.

Factors Typically Not Supporting Residence Classification

The following circumstances, standing alone, do not typically support residence, inasmuch as they may be common to a temporary or short-term presence in Michigan:

1. Employment by the University as a fellow, scholar, assistant, or in any position normally filled by students;
2. A statement of intention to establish residence in this state;
3. Payment of local and state taxes; or
4. Automobile registration, driver's license, continued presence in Michigan during vacation periods.

Although insufficient to establish residence, certain of these factors may be taken into consideration in determining whether a student has severed ties to the student's previous state of residence.

For purposes of these regulations, the age of majority is eighteen years. Except as provided in paragraph "7" of this section, a minor does not have the capacity to establish his or her own legal residence. Normally, the legal residence of a minor follows:

1. That of the parents or surviving parent; or
2. That of the parent to whom custody of the minor has been awarded by a divorce or other judicial decree; or
3. That of the parent with whom the minor in fact makes his or her home, if there has been a separation without a judicial award of custody; or
4. That of an adoptive parent, where there has been a legal adoption, even though the natural parents or parent may be living; or
5. That of a "natural" guardian, such as grandparent with whom the minor in fact makes his or her home, where the minor has permanently left his or her parental home and reasonable expectation of substantial financial support from the parents has been dissolved. A natural guardian is someone who, although not legally the minor's parent or guardian, performs the same sort of parental duties.

6. If a Michigan resident parent or guardian of a minor moves his or her residence to another state, the minor shall remain eligible for resident tuition status as long as he or she continues to attend school regularly in this state.
7. A minor who has permanently left his or her parental home, and who has no reasonable expectation of significant financial support from his or her parents or legal guardian, etc., may qualify for resident status even if under eighteen years of age.

Non-U.S. Citizen

A non-U.S. citizen may apply for resident status in the same manner as a citizen, if he or she is in the United States for other than a temporary educational purpose. In order to demonstrate this, applicants must provide evidence from the U.S. Department of Citizenship and Immigration Services of one of the following:

1. A U.S. permanent resident alien with a green card.
2. An applicant for U.S. permanent residence whose Petition for Alien Relative, or Employment-based Immigration Petition for Alien Worker has been approved, or who has been issued an Employment Authorization document pending adjustment of status. These individuals will have documentation of this status such as an I-130 (Petition for Alien Relative) or I-140 (Immigration Petition for Alien Working) Approval Notice, or an I-151 or I-551 Notice of Action indicating approval of petition to become an immigrant.
3. An alien with a current valid visa type issued for purposes of working in the United States, and currently working in the State of Michigan. These currently include visa types of A, E, G, H, I, L, R, and TN.
4. An Alien granted asylum or refugee status.

Attendance of Michigan High Schools

An individual may be eligible for in-state tuition on the basis of high school attendance if he or she demonstrates that he or she:

1. Attended an accredited Michigan high school for at least three years and thereafter graduated from an accredited Michigan high school or obtained his or her GED in Michigan; and
2. Enrolls at Wayne State University within twenty-eight months of graduating from high school or obtaining a GED.

An individual does not need to be a legal resident of Michigan or a citizen of the United States to qualify for in-state tuition on the basis of attendance at Michigan schools.

Military Service

Individuals on active duty in the U.S. Military who are stationed in Michigan and their dependents are eligible for Michigan in-state tuition. Stationing orders and proof of relationship (for dependents) must be provided with the application.

Veterans and their dependents are eligible for Michigan in-state tuition. The term "veteran" means a citizen of the United States or a resident alien whose most recent separation from any branch of the armed forces of the United States was under conditions other than dishonorable after having served on active duty for 90 consecutive days or more or by reason of disability incurred while serving on active duty.

Individuals who are members of the National Guard of any state, or who were separated from the National Guard of any state under conditions other than dishonorable, and their dependents are eligible for Michigan in-state tuition.

Without regard to the foregoing, any individual using educational assistance under either Chapter 30 (Montgomery GI Bill® – Active Duty Program), Chapter 33 (Post-9/11 GI Bill®), of title 38, United States Code,

and/or the Marine Gunnery Sergeant John David Fry Scholarship (38 U.S.C. § 3311(b)(9)) who lives in the State of Michigan while attending Wayne State University (regardless of his/her formal state of residence) is eligible for Michigan in-state tuition.

Good Neighbor Provisions

Residents of Fulton, Lucas, Ottawa, and Williams counties in Ohio, or residents of Ontario, Canada, who are enrolled in eligible graduate programs will pay in-state tuition. WSU Tuition and Fee Regulations published each academic year identify specific academic programs eligible for this provision.

Great Lakes Policy (Undergraduate Only)

Residents of the states of Ohio, Indiana, Illinois, Wisconsin, Minnesota, New York, or Pennsylvania, or the province of Ontario, Canada, who are enrolled in eligible undergraduate programs and who are not eligible for the Good Neighbor Policy may pay tuition and fees at 110% of the then-current in-state rate.

Online Programs

Students enrolled in programs which are offered online in their entirety will have the out-state portion of their tuition waived. WSU Tuition and Fee Regulations published each academic year will identify the specific academic programs eligible for this provision.

Review Procedures

Initial Classification and Appeal

1. The student is responsible for registering under proper residence or tuition status and advising the University of changes in circumstances, which might affect tuition status. Questions concerning a student's residence or tuition status prior to enrollment should be raised with the Office of Admissions. Questions arising after enrollment should be raised with the Registrar's Office.
2. After enrolling, a student may challenge the initial classification made by the Office of Admissions by filing an Application for Residence Classification or Change in Tuition Status with the Registrar's Office.
3. Except for documented delays caused by University personnel, such applications must be filed by:

September 30 for the Fall semester and the Medical Year semester

January 31 for the Winter semester

July 31 for the Spring/Summer semester

Deadlines falling on weekends or on days when the University is closed will be extended to the next business day. Applications received after these dates will be processed for the following semester.

Further Appeal

A student may appeal the initial tuition decision as follows:

1. By filing a written notice of appeal with the Registrar within thirty (30) days after the student is notified of the classification decision. The notice of appeal shall include reasons for the appeal, the period for which resident status is claimed, and a complete statement of the facts on which the appeal is based, together with supporting affidavits or other documentary evidence. Failure to file notice within thirty (30) days shall constitute a waiver of any right to further appeal. The student has the right to consult the University Ombuds Office at any time, and the student may particularly want to utilize the Ombudsperson's services at this point in the review procedures.
2. A student may appeal the Registrar's decision by filing a written notice of appeal with the Office of the General Counsel within fifteen (15) days from the date of the Registrar's decision. Failure to file

written notice of appeal of the Registrar's decision with the Office of the General Counsel within fifteen (15) days shall constitute a waiver of any right to further appeal.

3. A student may appeal the decision of the Office of the General Counsel within fifteen (15) days with the Office of the President. Failure to file written notice of appeal of the General Counsel's decision with the Office of the President within fifteen (15) days shall constitute a waiver of any right to further appeal. After the notice of appeal, the President or his designee shall review the student's appeal and render a final decision.

Erroneous Classification

1. If an erroneous classification of non-residence occurs, an adjustment for the appropriate period and amount will be made.
2. If an erroneous classification of residence occurs, the student shall be reclassified as a non-resident student. If the cause of his or her incorrect classification shall be found to be due to any material concealment of facts or false statement made by the student before the time of the original classification, the student will be required to pay all tuition and fees which would have been charged to him or her and also will be subject also to appropriate discipline in accordance with University Student Code of Conduct. If it is determined that there is no such concealment of facts by the student, fees shall be adjusted only for current and future semesters.

Effective Dates of Residence Regulations

Amended statute as adopted on September 20, 2013, will be effective for the Winter Semester 2014.

University Libraries and Archives

Office: 3100 David Adamany Undergraduate Library
Tel.: 313-577-4023; Fax: 313-577-5525
Dean of University Libraries: Jon E. Cawthorne
library.wayne.edu (<https://library.wayne.edu>)

The University Libraries support the education, research and service missions of the University and its communities through comprehensive, high-quality resources, services and programs. The libraries are leaders in providing accurate and timely information to Wayne State University as well as the metropolitan Detroit area and Michigan. Scholarly materials in the University Libraries offer total more than three million volumes, over 56,000 journal titles and a broad range of electronic resources, including electronic journals and over 800,000 e-books, all available through the Libraries' website.

The Library System includes the David Adamany Undergraduate Library, the Arthur Neef Law Library, the Purdy/Kresge Library, the Vera P. Shiffman Medical Library and its Learning Resource Center at the Eugene Applebaum College of Pharmacy and Health Sciences, and the Walter P. Reuther Library of Labor and Urban Affairs and University Archives. The School of Information Sciences and the Detroit Area Library Network (DALNET) are also under the Library System's charge.

The University Libraries offer in-person and online reference and research support, interlibrary loan, circulation and course reserve services, document delivery and library and information literacy programs. The latest information technologies provide state-of-the-art access to instructional and research materials. The libraries provide silent and collaborative study spaces, including a 24-hour facility, as well as classroom support to over 300 general purpose classrooms throughout campus.

David Adamany Undergraduate Library (<https://library.wayne.edu>)

The David Adamany Undergraduate Library (UGL) is designed to enhance the learning experience of undergraduate students by offering open spaces for collaboration and silent study as well as hundreds of computers for student use. The library features instructional labs, the Collaborative Commons, an open space with flexible furniture and technology, collaborative study rooms that can be reserved online, and course reserves. The Warrior Writing, Research and Technology Zone (The WRT Zone) is a one-stop shop for Wayne State students to get research, writing and technology assistance. The UGL also houses Student Academic Success Services, which includes the Academic Success Center, Student Disability Services, the Office of Military and Veterans Excellence, Pre-Med Advising and the University Advising Center, P.A.L. Peer Assisted Learning and the Irvin D. Reid Honors College. The UGL is also home to The Tech Bunker and Vault, two new technologically-rich immersive learning spaces at the that invite users to develop, design, dream and discover.

Purdy/Kresge Library (<https://library.wayne.edu>)

The Purdy/Kresge Library supports the research and instructional needs of faculty, graduate students and upper-level undergraduates, as well as the information needs of the greater Detroit community. The library provides access to over sixty 60 computers as well as ample study space in a traditional library atmosphere.

The Purdy/Kresge Library houses a book collection of over 1.5 million volumes, an extensive microform collection, a large document collection and a number of special collections including the Leonard Simons Collection of rare Michigan history texts, the Arthur L. Johnson Endowment collection, and the Ramsey Collection of Children's Literature. This library is also the home of the Teaching Commons, a collaborative effort of the Libraries, the Office for Teaching and Learning, and Computing & Information Technology, that assists faculty and instructors in designing and developing instructional experiences for the classroom and online teaching environments.

Arthur Neef Law Library (<https://library.wayne.edu/neef>)

Located at the north end of the University's main campus, Wayne State University's Arthur Neef Law Library offers researchers a comprehensive legal research center. Its collection of more than 620,000 print and microform equivalent volumes, plus an expansive collection of e-books, databases and other digital resources makes it a leading legal research facility in the State of Michigan. The Law Library is also a depository for U.S. government publications and for the records and briefs filed with the Michigan Supreme Court.

Shiffman Medical Library and Learning Resources Centers (<https://library.wayne.edu/shiffman>)

The Shiffman Medical Library supports the research, education and clinical and public health care information needs for the University, major hospitals within the Detroit Medical Center, and unaffiliated health care providers and trainees throughout Michigan. In addition to assisting WSU undergraduate students with research, learning and internship information needs in the health sciences, all WSU students are encouraged to use the library's consumer health information services. The library maintains access to all the major health sciences, bio-

scientific and consumer health databases; a core collection of journals dating to the mid-19th century; and books in print and electronically reproduced. Health information learning programs and informatics workshops, listed on our Website, are open to all members of the University community. A Learning Resources Center focused on the daily information and computing needs of students of the Applebaum College is available Monday through Friday.

Walter P. Reuther Library of Labor and Urban Affairs and University Archives (<https://www.reuther.wayne.edu>)

The archival collections held in the Walter P. Reuther Library cover a variety of topics, organizations, and individuals. In all, the Reuther Library has more than 95 million documents, 20,000 books, monographs, union publications and proceedings, 2 million photographic images; and 20,000 audio and moving image recordings. Due to issues of format, size, and security, the collection stacks are not open to the public and researchers work with these materials in the Reuther reading room during established hours of business.

The Reuther Library has an international reputation as the largest labor archives in the world and additionally holds significant collections relating to social and urban affairs in the metro Detroit area. It collects and preserves records of the American labor movement, related social, economic, and political reform groups, and twentieth century urban America. The Reuther Library has since become the official depository for the inactive files of several labor unions and organizations, including the United Auto Workers, the American Federation of Teachers, the National Association of Letter Carriers, The Newspaper Guild, the United Farm Workers, the Service Employees International Union, the American Federation of State, County and Municipal Employees, the Air Line Pilots Association, the Association of Flight Attendants, the Industrial Workers of the World, the Society of Women Engineers, and many state and local organizations. Records have also been received from urban and civil rights groups as the Citizens Crusade Against Poverty, the Michigan Chapter of the American Civil Liberties Union, the Detroit Branch of the National Association for the Advancement of Colored People, the United Community Services of Detroit, United Way for Southeastern Michigan, and New Detroit, Inc. A unique portion of the holdings is a labor journal and newspaper collection, which has nearly 1,600 current and non-current titles dating from the late 1800s to the present. Many individuals who played leading roles in labor and urban affairs have also placed their papers in the Reuther Library.

The Reuther Library also houses the Wayne State University Archives which provides historical information about WSU and its predecessor institutions that date to 1868. In addition to collecting the University's historical records, the WSU Archives holds the papers of presidents and administrative leaders, the papers of selected faculty members, and the papers of student and professional organizations that document the development of the University and higher education in Michigan. The WSU Archives also collects all publications created by and pertaining to the University, including the student newspaper from 1917 to present, as well as departmental newsletters. Subjects in the collection range from student activities such as athletics and student organizations, to local subjects such as Central High School, the Detroit Medical Center, and the Detroit Board of Education.

University Policies

University Equality of Opportunity Policy

Wayne State University is committed to a policy of non-discrimination and equal opportunity in all of its operations, employment opportunities, educational programs and related activities.

This policy embraces all persons regardless of race, gender, color, sex (including gender identity), national origin, religion, age, sexual orientation, marital status, familial status, disability, arrest record, weight, qualified Vietnam era veterans, qualified special disabled veterans, recently separated veterans and other protected veterans, or any other characteristic protected by applicable federal or state law. It expressly forbids discrimination, sexual harassment or any form of harassment in hiring, terms of employment, tenure, promotion, placement and discharge of employees, admission, training and treatment of students, extra-curricular activities, the use of University services, facilities and in the awarding of contracts.

This policy also forbids retaliation and/or any form of harassment against an individual as a result of filing a complaint of discrimination or harassment, or participating in an investigation of a complaint of discrimination or harassment.

Wayne State University, as an equal opportunity/affirmative action institution, complies with all applicable federal and state laws regarding non-discrimination and affirmative action. In furtherance of this policy, the University is also committed to promoting institutional diversity to achieve full equity in all areas of University life and service and in those private clubs and accommodations that are used by University personnel. No off-campus activities sponsored by or on behalf of Wayne State University shall be held in private club facilities or accommodations which operate from an established policy barring membership or participation on the basis of race, color, sex (including gender identity), national origin, religion, age, sexual orientation, familial status, marital status, height, weight, disability or veteran status. Affirmative action procedures, measures and program may be used to the extent permitted by law to establish, monitor and implement affirmative action plans for all budgetary units and the University as a whole.

Inquiries regarding equal opportunity Academic/Administrative policies or complaints may be made to:

Office of Equal Opportunity
4324 Faculty/Administration Building
Wayne State University
Detroit, Michigan 48202
Telephone: 313-577-2280
or <http://www.oeo.wayne.edu>

Disability Non-Discrimination Policy

In accordance with federal requirements of the Americans with Disabilities Act of 1990 and the Rehabilitation Act of 1973, there shall be no discrimination on the basis of disability in Wayne State University's programs, operations and activities, in the hiring, terms and conditions or privileges of employment or any matter directly or indirectly related to such employment, or in the admission, education and treatment of students. The Student Disability Services Office (<http://studentdisability.wayne.edu>) has complete information on services available to students.

Drug and Alcohol Free Workplace Policy

Wayne State University is committed to providing a drug-free environment for its faculty, staff, and students. The Board of Governors

has made this commitment a formal policy of the University. All faculty, staff and students must abide by the terms of the Board policy as a condition of employment or enrollment at the University. The unlawful possession, use, distribution, sale or manufacture of drugs or alcohol is prohibited on University premises, at University activities, and at University work sites.

Pursuant to that policy, the unlawful possession, use, distribution, dispensation, sale or manufacture of any illicit drugs, and the unlawful possession, use or distribution of alcohol on University property, or at any University work site, or as part of any University activity, is prohibited.

Any employee or student employee who is convicted of a criminal drug offense occurring at the workplace is subject to appropriate employee discipline in accordance with established University policies and collective bargaining agreements, and may be required to participate satisfactorily in a drug abuse or rehabilitation program as a condition of further employment or enrollment.

Any student or employee who, while on University premises or at any University activity, engages in the unlawful possession, sale, manufacture, distribution, or use of drugs or alcohol shall be subject to appropriate sanctions, in accordance with established University policies, the Student Code of Conduct, and collective bargaining agreements, and in conformity with local, state and federal law, up to and including expulsion or termination.

The University encourages employees who may have a problem with the use of illicit drugs or with the abuse of alcohol to seek professional advice and treatment. Individuals who seek assistance with such problems may obtain additional information on a confidential basis by telephoning the Employee Assistance Program (EAP) at 1-800-448-8326. Students may also seek referral assistance by contacting University Counseling and Psychological Services (CAPS), at 313-577-3398.

Policy Governing the Use of Alcoholic Beverages on Campus

The use or possession of alcoholic beverages is expressly prohibited in classrooms, lecture halls, laboratories, the libraries, the chapel and within buildings or arenas where athletic events, lectures, and concerts are held. The use of alcoholic beverages is expressly prohibited in all public areas of campus buildings except as follows: the use of alcoholic beverages, subject to State law, is permitted in areas designated by, and with the approval of, the Office of the President, and the use of alcoholic beverages at student social events, subject to State law, is permitted in areas designated by, and with the approval of, the Office of the President.

Sexual Discrimination, Harassment, and Assault Policy

Title IX of the Education Amendments of 1972 is a federal civil rights law that prohibits discrimination on the basis of sex in education programs and activities. Under Title IX, discrimination on the basis of sex can include sexual harassment or forms of sexual assault, such as rape, sexual assault or sexual battery.

Sexual discrimination is prohibited by Title IX and by University Policy. (WSU Statute 2.28.01).

Sexual harassment is a form of sex discrimination that is prohibited by Title IX and by University policy. It is the policy of Wayne State University that no member of the University community may sexually harass another. (WSU Statute 2.28.06).

Sexual harassment is defined as unwelcome sexual advances, requests for sexual favors, and other verbal or physical conduct or communication of a sexual nature when:

1. Submission to such conduct or communication is made a term or condition either explicitly or implicitly to obtain employment, public accommodations or public services, education, or housing.
2. Submission to or rejection of such conduct or communication by an individual is used as a factor in decisions affecting such individual's employment, public accommodations or public services, education, or housing.
3. Such conduct or communication has the purpose or effect of substantially interfering with an individual's employment, public accommodations or public services, educational, or housing environment, or creates an intimidating, hostile or offensive employment, public accommodations, public services, educational or housing environment.

In the area of speech, what the law and this policy prohibit is speech as action: that is, sexual communication which is either directly coercive as demanding favors, or indirectly coercive, as rising to that level of offensiveness which interferes substantially with the victim's education or employment. The determination of what level of offensiveness is actually coercive, and therefore unlawful and prohibited by this policy, will in some cases be difficult. A significant element in the determination is provided by the fact that an unequal power relationship underlies sexual harassment. The more unequal the relationship, the greater the risk is of substantial interference with the victim's education or employment.

In the area of physical contact, physical contact which is unwelcome is so gravely offensive that it always has the effect of substantially interfering with the victim's employment or educational environment. Employees and students should not take for granted that they are welcome to touch other employees or students, since if their contact is in fact unwelcome, they will be in violation of the law and of this policy. (WSU Statutes 2.28.06.010-2.28.06.080).

Sexual harassment is also unwelcome behavior of a sexual nature that creates a hostile or abusive work or educational environment. Sexual harassment is also unwelcome behavior of a sexual nature that is severe or pervasive and interferes with an individual's work or performance in a course or program

Sexual assault is also prohibited by Title IX and by University policy (01-5 University Policy). Sexual assault includes, but is not limited to any of the following:

1. Any intentional, unconsented, unwelcome physical contact or threat of unwelcome physical contact or attempt thereof, of:
 - a. an intimate body part of another person, such as a sexual organ,
 - b. any body part of another person with one's sexual organs, or
 - c. any part of another person's body with the intent of accomplishing a sexual act; or
2. Unwanted, inappropriate disrobing of another person, or purposeful exposure of one's genitals to another without the other's consent; or
3. Forcing, or attempting to force, any other person to engage in sexual activity of any kind without her or his consent; or
4. Any behavior that is proscribed as "criminal sexual conduct" under the Michigan Penal Code, notwithstanding whether criminal charges have been brought against the individual alleged to have engaged in such behavior. This may include rape, attempted rape, sexual assault or sexual battery.

Date rape and acquaintance rape are forms of sexual assault.

For purposes of the University's statutes/policies on sexual discrimination, sexual harassment and sexual assault, consent shall not be deemed to have occurred if given by a person who is unable to make a reasoned judgment concerning the nature or harmfulness of the activity because of his or her intoxication, unconsciousness, mental deficiency or incapacity, or if the product of threat or coercion. (WSU Statute 2.28.06.060).

Any employee or student will be subject to disciplinary action for violation of any of these policies. If any staff, faculty or student of the University community learns of a sexual discrimination, harassment or assault incident, they should immediately report that incident to either the Title IX Coordinator or the Deputy Coordinator, who are:

Linda Galante, Esq. - Interim Title IX Coordinator
Associate General Counsel
4259 Faculty Administration Building
656 W. Kirby Avenue
Detroit, Michigan 48202
Telephone: 313-577-2280
Fax: 313-577-7738
Email: lgalante@wayne.edu

Dean David Strauss - Deputy Title IX Coordinator
Dean of Students
351 Student Center
Detroit, Michigan 48202
Telephone: 313-577-1010
Email: ak3096@wayne.edu

The Title IX Coordinator's responsibilities include overseeing all Title IX complaints, identifying and addressing any patterns or systemic problems that arise during the review of such complaints, and coordinating the training, education, communication and administration of grievance procedures for faculty, staff, students and other members of the University community.

The Deputy Coordinator is responsible for Title IX compliance for matters involving students, including training, education, communication and administration of grievance procedures for all complaints against WSU students.

Students or employees having a complaint against a WSU student for sexual harassment, sex discrimination or sexual assault, should contact the Deputy Coordinator by phone or email or file a Student Care Report available on Dean of Students' website (<http://www.doso.wayne.edu>). Any such complaint can also be filed with the Title IX Coordinator.

The University statutes/policies prohibiting discrimination and sexual harassment/sexual violence can be found on the Board of Governors' website (<http://www.bog.wayne.edu/code>) and among the general university policies (<http://policies.wayne.edu>). These are also posted by the Office of Equal Opportunity (<http://www.deo.wayne.edu>) and the Dean of Students Office (<http://www.doso.wayne.edu>). The purpose of these policies is to assure the fullest possible awareness of WSU's stand on sexual discrimination/harassment/assault and to confirm and regularize WSU's procedures regarding the handling of complaints.

Additional Resources

In addition to filing a complaint with the Title IX Coordinator or Deputy Coordinator, in instances involving rape, sexual assault or sexual battery, students and/or employees should also contact the WSU Police Department at:

6050 Cass Avenue
Detroit, Michigan 48202

Violence in the Workplace Policy

Wayne State University is committed to providing a work and educational environment that is free from threats, assaults, or acts of violence. Threats of violence or of physical harm, and any form of physical or sexual assault or threats of physical assault are prohibited. This includes conduct that harasses, disrupts, or interferes with another person's work performance or creates an intimidating, offensive or hostile work or educational environment.

The University has also adopted a Campus Safety Ordinance (WSU Statute 2.87.03) which applies to all property owned, leased or otherwise controlled by Wayne State University and applies to all individuals when present on such property, regardless of whether the individual has a concealed weapons permit or is otherwise authorized by law to possess, discharge or use any device referenced in therein. The ordinance states that no person shall, while on any property owned, leased, or otherwise controlled by WSU:

1. possess or carry on his or her person any firearm, explosive or chemical weapon;
2. carry on his or her person any sword, switchblade knife, or other knife with a blade longer than three inches; and
3. carry on his or her person any other object or device with the intent of intimidating or injuring another person.

Upon conviction of any violation of this ordinance, the violator shall be sentenced to a fine not to exceed \$500.00. In addition, violations of this policy may result in disciplinary action under existing University administrative policies. Limited exceptions to this policy exist for University employees expressly authorized to possess or use such weapons, devices or substances, law enforcement officials so authorized, and any individual whose possession or use is in connection with a research or regularly scheduled educational program authorized by the University, for which the Chief of the Wayne State University Police Department has been given at least one week's advance notice.

University personnel are expected to notify appropriate management personnel of any violent or threatening behavior, when that behavior is work-related, carried out on University property, or is connected to University employment. Any individual who has obtained a personal protection order that identifies the workplace as a protected area should provide that information to the Wayne State University Police Department.

MIKE ILITCH SCHOOL OF BUSINESS

Dean: Robert Forsythe

The Mike Ilitch School of Business is a professional school concerned with the theory and practice of business administration. The primary objectives of the School are to provide a contemporary education of high quality for business administration students, to develop new knowledge through research and to encourage application of its findings. To this end, in addition to their instructional services, the faculty has been a continuing source of notable scholarly publications and it is a special strength of the School that this research faculty teaches both undergraduate as well as graduate courses.

This School has a tradition of instructional programs exemplifying high standards for both faculty and students as is acknowledged by the accreditation of the AACSB International (the Association to Advance Collegiate Schools of Business) for both the baccalaureate and master's degree programs. The School provides relevant, comprehensive business education through programs that serve recent high school graduates as well as more mature student populations. The student body is racially and ethnically diverse, commuting, and often working and raising families. To meet the needs of these students, the School schedules classes on campus, at the University Oakland Center and online.

The Mike Ilitch School of Business also recognizes its obligation to community service. As part of an urban university, the School makes a special commitment to foster basic and applied research that will benefit business enterprises. Equally important is the dedication to excellence in the instructional programs that create and support the business leadership that is critical to the continuing revitalization of southeastern Michigan.

Mission Statement

Our mission is to prepare our students for challenging and rewarding careers, advance the boundaries of scholarly and practitioner knowledge, and enhance the economic vitality of the city of Detroit, the state of Michigan and beyond through our programs, research and community engagement.

Undergraduate Program

The undergraduate program begins with students acquiring an educational foundation in several introductory business courses and in the basic sciences and the humanities. During the third and fourth years, students follow a program designed to provide professional education in the major. Students may select majors in accounting, finance, global supply chain management, management, information systems management, and marketing. Degrees of Bachelor of Science in Business Administration or Bachelor of Arts in Business Administration are awarded; post-bachelor certificates in accounting and information systems management are also offered. For additional undergraduate information, consult the Wayne State University Undergraduate Bulletin.

The program leading to the Master of Business Administration degree educates graduate students for professional careers in business administration. The program requires a minimum of thirty-six graduate credits beyond the pre-professional foundation requirements. Graduate courses are offered at both on- and off-campus locations during the late afternoon and evening, and online. It is possible for students to complete their M.B.A. online, onsite, or through a combination of online and onsite courses.

The program leading to the Master of Science in Accounting is designed to prepare individuals for careers in accounting in public accounting firms, private industries, financial institutions, and government and nonprofit organizations. The program requires a minimum of thirty credits beyond the foundation requirements. Courses are offered in the late afternoon and evening.

The program leading to the Master of Science in Taxation (M.S.T.) degree prepares students for entry into professional tax practice in both the public and private sectors. Through the interdisciplinary nature of the program, the M.S.T. candidate learns the accounting, legal, and public policy aspects of taxation. The program requires a minimum of thirty credits beyond the foundation requirements. Courses are offered in the late afternoon and evening.

The program leading to the Graduate Certificate in Business is designed to equip non-business degree holders with relevant business knowledge pertaining to the daily operations of business in corporate, non-profit and entrepreneurial settings. The program requires a minimum of thirteen credits. Courses are offered in the late afternoon and evening or online.

The Doctor of Philosophy in Business Administration prepares persons interested in careers in research and university teaching. The core goals for Ph.D. students are the creation of new knowledge through research and excellence in teaching. This program offers concentrations in finance, management, and marketing.

Accreditation

Mike Ilitch School of Business programs are accredited as follows:

School: Accreditation Council of AACSB International: The Association to Advance Collegiate Schools of Business. (AACSB)

Academic Regulations for the Mike Ilitch School of Business

For complete information regarding the academic rules and regulations of the University, students should consult the Academic Regulations (p. 12) of this bulletin. The following additions and amendments pertain to the Mike Ilitch School of Business. Graduate students are advised that, in addition to the policies, procedures, and rules specified by the Mike Ilitch School of Business, other regulations and requirements of Wayne State University's Graduate School may apply.

The Graduate Programs Office is responsible for credential evaluation, admissions processing, advising, and graduation certification of business administration graduate students. In addition, personnel prepare and distribute the Plan of Work for students enrolled in graduate programs. Any student seeking academic, vocational or personal counseling should make an appointment to see a member of the counseling staff: 313-577-4511.

Academic Standing

Students who have been admitted to the Graduate Program on a 'qualified' or conditional basis are expected to remove that status by the completion of the first twelve credits in course work with a minimum 3.0 grade point average. Failure to do so will result in dismissal from the program.

Students admitted to regular status or those who have attained regular status following a 'qualified' admission, will be given an academic warning at any time their graduate grade point average falls below 3.0. After an academic warning, students will be permitted nine credits to restore their cumulative grade point average to a 3.0 level. Failure to do so within this credit limit will result in dismissal from the program. The

second (or subsequent) time(s) a student is placed on probation, he or she is subject to immediate dismissal from the Mike Ilitch School of Business.

Advisors

No credit will be allowed for concentration courses taken below the 7000-level or courses taken outside of the Mike Ilitch School of Business without prior written approval of the Graduate Director.

Students may not modify core course requirements without approval of the Graduate Director.

The Graduate Director retains final authority for the approval of all concentration courses.

For advising, students should contact the Graduate Programs Office at 313-577-4511.

Application for Degree

Prior to the semester in which a student intends to graduate, an online degree application must be filed with the University Records Office, 5057 Woodward. Applications and instructions are available on the University website (<https://wayne.edu/commencement/apply-for-graduation>).

Attendance Policy

Regular attendance is a necessary condition for success in university study. Course content includes classroom lecture and discussion, certain aspects of which may not be covered in examinations, quizzes, term papers, or homework assignments. Each Instructor will announce his or her attendance standards at the beginning of the term.

All candidates for degrees are expected to be present at commencement.

Conduct

Each student is subject to the Student Due Process statute governing student activities and student behavior. Furthermore, it is the responsibility of each student to adhere to the principles of academic integrity. Academic integrity includes the requirement that a student is honest with him/herself, fellow students, instructors, and the University in matters concerning his or her educational endeavors. For example, a student should not falsely claim the work of another as one's own, or misrepresent him/herself so that the measures of one's academic performance do not reflect his/her own work or personal knowledge. Assignments submitted for any class are expected to be original, *not* resubmissions of work submitted in a previous or concurrent class.

If there are reasonable grounds to believe that a student has disregarded the regulations or student responsibilities, he or she may be disciplined. Such discipline may include suspension or dismissal, but no dismissal will be directed without reasonable opportunity for an appropriate hearing, as provided in the Student Due Process statute.

For more information, please reference the University Code of Conduct (<http://doso.wayne.edu/assets/codeofconduct.pdf>) or the Mike Ilitch School of Business Code of Ethics.

Course Level Requirement

Graduate business students are required to take all core and concentration/elective course work in classes reserved exclusively for graduate students. At Wayne State University, these classes are numbered at the 7000 level or above. **A graduate student must obtain the specific written approval of the Graduate Officer prior to registering for a course that is not reserved exclusively for graduate students. Credit will not be applicable to the degree if prior approval has not been obtained.**

Course Sequencing

The M.B.A., M.S.A. and M.S.T. curricula have been designed to provide logical sequencing of subject matter. This means that students must observe all course prerequisites and limitations, and must complete *all* required foundation courses prior to beginning any core or concentration/elective courses.

The Strategic Management course (BA 7080) is an integrative capstone course that may *only* be taken in the last twelve credits, and *only* after completion of the other five core courses in the M.B.A. curriculum.

Similarly, the Seminar in Tax and Accounting Policy (ACC 7998) must be elected as part of the final nine credits in the M.S.A. and M.S.T. student's program.

Students who do not adhere to these regulations will be administratively withdrawn from the out-of-sequence course(s) and may not be allowed to register for further course work.

Exception: A student taking his/her last foundation course(s) may simultaneously enroll for one or more core courses, if the relevant foundation course or prerequisite courses for the core course(s) has been satisfactorily completed.

Course Repetition Policy

Graduate business students may not routinely repeat courses taken as part of their degree program requirements. While the repetition of certain required courses may be necessary if failing or unsatisfactory grades are earned, this should not be done without first consulting the Graduate Programs Office at 313-577-4511.

Upon petition by the student, the Graduate Committee may authorize the repetition of *two* graduate courses during a student's graduate business program, whereby the grade earned in the initial course attempt is deleted from the grade point total and grade point average calculations.

Directed Study

A student can apply up to three credits of directed study course work to a Mike Ilitch School of Business degree. Credit allowances (1-3) are predicated on the amount of time and effort to be spent in the study. Prior to enrollment, students must have completed all core courses in their respective graduate program (other than the capstone course) with a passing grade. If enrolled in the Master of Science in Accounting or the Master of Science in Taxation programs, students must have completed at least twelve credits of graduate accounting courses or obtained the approval of the Chairperson of the Department of Accounting.

Enrollment Eligibility

Graduate-level courses offered by the Mike Ilitch School of Business are open only to students who have been formally admitted to a Wayne State University graduate program or admitted as a graduate guest student. Students having undergraduate, post-bachelor, or any non-matriculated status are *not* eligible to take graduate courses. Graduate business courses include all courses numbered 6000-6100 and 7000 and above. All electives must be taken in accordance with an approved *Plan of Work*.

Grade Appeal Procedure

Students disputing a final grade should first contact the instructor of the course informally. Should the dispute remain unresolved, the student may initiate a formal appeal. A copy of the Mike Ilitch School of Business's grade appeal procedure is available in the Graduate Programs Office, 103 Prentis Building, and on the School's website (<http://ilitchbusiness.wayne.edu>).

Non-grade-related grievances should be brought directly to the appropriate departmental chairperson or to the Graduate Programs Office. Additionally, the University Ombudsperson (p. 23) is available to all students for assistance in the resolution of University-related problems.

Internships

Graduate Students can earn up to three credits in internships (ACC 7990, FIN 7890, GSC 7890, ISM 7890, MGT 7895, or MKT 7890) offered as S or U grades only, which can be applied toward their elective courses. In order to satisfy requirements for these courses, the student is expected to perform assigned tasks and responsibilities in a professional manner under the supervision of an employer for a minimum of 160 hours during the semester, and abide by the rules and regulations established by the employer and expected of all employees. The student commitment is for the entire semester even if the 160 hours have been completed prior to the end of the semester. Further, to be eligible, students must have completed all core courses in the respective graduate program (other than the capstone course) with a passing grade. If enrolled in the Master of Science in Accounting or the Master of Science in Taxation programs, students must complete at least twelve credits of graduate accounting courses or obtain the approval of the Chair of the Department of Accounting in order to enroll in an internship.

'Incomplete' Marks

The mark of 'I' which is not converted to a letter grade within one year from the time it was received will be changed to an 'F' (failure).

Maximum Credit Load

A student employed full-time will normally not register for more than six to nine graduate credits. Graduate assistants are required to register for at least eight credits each semester.

Online Courses

The Mike Ilitch School of Business offers online sections of some courses available to Traditional M.B.A. students. Students who enroll in online sections of any M.B.A. course should anticipate that, at the discretion of the instructor, they may be required to attend an in-class session for the final examination in the course.

Passed-Not Passed Registration

Graduate students may *not* take graduate program requirements on a *passed-not passed* basis.

Plan of Work

All course work must be in accordance with an approved Plan of Work on file in the Graduate Programs Office, 103 Prentiss Building. No credit will be granted for graduate courses in business administration taken at Wayne State University prior to admission to the graduate program in the Mike Ilitch School of Business. **Only the Graduate Committee is authorized to approve changes affecting a student's foundation requirements or core courses.**

Time Limitation for Program Completion

Students have a six-year time limit to complete all 7000-level requirements. The six-year period begins at the start of the semester during which the student takes his/her first 7000-level courses. Students who expect to exceed the time limitation must file a written request for an extension with the Graduate Programs Office. The School reserves the right to re-validate credits which are over-age. In re-validation cases, the Graduate Committee will set a terminal date for completion of all

degree requirements, including such additional requirements as may be prescribed to re-validate the over-age credits.

Transfer of Core and Concentration/ Elective Courses

Graduate transfer credit for core and concentration/elective courses from either a Wayne State University graduate program or a graduate program at another institution is not routinely granted. Students with a non-business undergraduate degree may only petition to transfer credit from an AACSB accredited M.B.A. program. A petition for transfer credit must be initiated by the student in the form of a letter to the Graduate Committee, prior to the completion of the first twelve credits in graduate course work. To be eligible for consideration for transfer of credit, the following conditions must be satisfied:

1. The course must have been taken at an AACSB accredited college or university;
2. The course must have been taken in a class reserved exclusively for graduate students;
3. A letter grade of 'B' (3.0) or higher must have been awarded; passed-not passed credit is not acceptable. A letter grade of 'Bminus' or less is not acceptable.
4. The course must be relevant to the student's Plan of Work as approved by the Graduate Committee.
5. The course may not be more than six years old at the time of graduation.
6. The course cannot have provided credit toward a prior degree.

A maximum of six semester credits (normally two courses) may be considered for transfer credit. In addition to evidence regarding the above six conditions, the student must submit additional supporting materials concerning any proposed transfer course. Course syllabi, examinations, class notes, texts, and the like constitute such materials.

Waiver of Course Prerequisites

Requests for waiver of course prerequisites are not routinely granted. Waiver requests must be made in writing to the Graduate Committee and must include full documentation of the case. No waiver will be granted if the supporting documentation consists solely of professional experience proposed in lieu of course work.

Waiver of Foundation Courses

Students are allowed to waive foundation course requirements (except BA 6005) based on equivalent course work taken at a regionally-accredited college or university. A grade of 'C' (2.0 g.p.a.) or above must have been earned in this course work. Normally these waivers are granted after review of the student's transcript(s). Students who believe additional waivers are warranted must submit evidence of course equivalency, including course syllabi, class notes, and textbooks. Waivers will not be granted on the basis of professional experience.

Withdrawals from Class

Students should consult the instructor as to his/her policy on withdrawal from class, as well as the Drop/Add procedures (p. 52).

Graduate Programs

- Business Administration (M.B.A.) (p. 73)
- Business Administration and Law (M.B.A./J.D. Joint Degree) (p. 79)
- Accounting (M.S.A.) (p. 69)

- Finance (M.S.) (p. 81)
- Taxation (M.S.T.) (p. 82)
- Automotive Supply Chain Management (Executive M.S.) (p. 72)
- Data Science and Business Analytics (M.S.) (p. 79)
- Business Administration (Ph.D.) (p. 78)
- Business (Graduate Certificate) (p. 73)
- Entrepreneurship and Innovation (Graduate Certificate) (p. 80)
- AGRADE - Accelerated Graduate Enrollment (p. 70)

Accounting (M.S.A.) Admission Requirements

Admission to any graduate program is contingent upon admission to the Graduate School (p. 19). In addition, applicants to the M.S.A. program must comply with the following:

Admission to the Master of Science in Accounting (M.S.A.) program is limited to students who demonstrate high promise of success and hold a baccalaureate degree in business administration, a discipline area of business administration, or accounting from regionally accredited institutions. Several measures of probable success that may be considered in the evaluation of an applicant include but are not limited to:

1. Performance on the Graduate Management Admission Test (GMAT) (p. 73).
2. Undergraduate grade point averages and the trend of grades earned during undergraduate education.
3. Other relevant factors such as employment and leadership experience.

The M.S. in Accounting Committee is authorized to review the credentials of each applicant. Final approval of the applicant's admission to graduate study in accounting is authorized by the Dean of the Mike Ilitch School of Business or the Dean's designee, upon recommendation of the M.S.A. Committee. Appeals to an admission denial must be made in writing to the Director of Graduate Programs, Mike Ilitch School of Business. A copy of the guidelines for formal appeals is available in the School's Graduate Programs Office.

Before an applicant can be considered for admission, the following material must be timely submitted:

1. an online W.S.U. Application for Graduate Admission (<http://www.gradadmissions.wayne.edu>);
2. an official transcript from each college or university previously attended by the applicant;
3. an official notification of the applicant's score on the GMAT and, if required, the TOEFL. For information regarding the GMAT.

The M.S.A. degree program requires completion of thirty credits in final-program course work with a grade point average of not less than 3.0. Additional foundation coursework may also be required prior to starting the thirty credits of final-program coursework. Degrees are granted upon recommendation of the faculty of the Mike Ilitch School of Business. Consideration is given to both scholastic achievement and the extent to which the candidate has met the standards and requirements of the School. All course work must be completed in accordance with the regulations of the Graduate School and the Mike Ilitch School of Business governing graduate scholarship and degrees; see the sections beginning under Academic Regulations (p. 12) and Academic Regulations for the Mike Ilitch School of Business (p. 66), respectively. University policies on transfer of credits from other institutions will apply.

Course Distribution Requirements (M.S.A.)

The M.S.A. program consists of four course categories, as follows:

Foundation Courses are required pre-professional courses but ones for which credit is not applicable to the M.S.A. degree. Applicants who have already earned a degree in business administration or accounting may usually be able to waive most, if not all, of the foundation course requirements.

Core Courses comprise 18-21 semester hours, which must include each of the courses listed under the chosen concentration, providing in-depth coverage of the body of knowledge associated with studies in accounting. Applicants who have already earned a degree in accounting may be able to waive many of the core courses and substitute accounting electives in their place.

Elective Courses are two additional courses surrounding coverage of the body of knowledge associated with studies in accounting.

Capstone Course: When nearing the conclusion of the M.S. in Accounting program, the degree candidate will take ACC 7998, Seminar in Tax and Accounting Policy.

Foundation Requirements (M.S.A.)

The M.S.A. is an advanced degree. Before progressing to the core courses of the program, the student should possess a solid foundation in accounting as comprised by the following set of three courses:

Code	Title	Credits
ACC 7040	Intermediate Financial Accounting I	3
ACC 7050	Intermediate Financial Accounting II	3
BA 7000	Managerial Accounting	3

However, if the applicant's business administration or accounting degree is from a college or university located outside of the United States, some or all of the foundation requirements may not be waived because U.S. generally accepted accounting principles (US GAAP) may not have been studied.

The graduate-level foundation courses (BA 7000, ACC 7040 and ACC 7050) cited above are open only to students who have been formally admitted to a graduate program at Wayne State University. Analogous courses offered at the undergraduate level (as determined by the admission evaluation process) may be taken to satisfy foundation requirements prior to graduate admission. However, once a student has been formally admitted to the M.S.A. program, NO graduate credit will be allowed for subsequent registration in undergraduate courses.

A cumulative grade point average of 3.0 ('B') is required in foundation requirements courses. No individual grade below 'C' (2.0) is acceptable. Students may begin taking Core courses during the semester in which they elect Foundation Requirements, subject to the prerequisite and corequisite requirements of the Core courses.

Core Requirements (M.S.A.) (Eighteen-Twenty-one Credits)

The following core courses are required of all students depending on the chosen concentration and are prerequisite or corequisite to subsequent/concurrent elective courses. ACC 7300 must be completed within the first nine credits of the program.

Code	Title	Credits
Professional Accounting Concentration Core Requirements		
ACC 7115	Financial Statement Analysis	3
ACC 7120	Introduction to Taxation: Individuals	3
ACC 7130	Intermediate Managerial Accounting	3
ACC 7145	Accounting Systems: Design and Controls	3
ACC 7180	Auditing	3
ACC 7300	Accounting and Tax Research and Professional Communications	3
ACC 7310	Business and Professional Ethics for Managers and Accountants	3
Total Credits		21

Code	Title	Credits
Financial Reporting and Auditing Concentration Core Requirements		
ACC 7115	Financial Statement Analysis	3
ACC 7122	Advanced Accounting I	3
ACC 7190	Advanced Auditing	3
ACC 7280	Accounting Data Analytics	3
ACC 7300	Accounting and Tax Research and Professional Communications	3
ACC 7310	Business and Professional Ethics for Managers and Accountants	3
Total Credits		18

Code	Title	Credits
Taxation Concentration Core Requirements		
ACC 7280	Accounting Data Analytics	3
ACC 7300	Accounting and Tax Research and Professional Communications	3
ACC 7310	Business and Professional Ethics for Managers and Accountants	3
ACC 7320	Introduction to Taxation: Business Entities	3
ACC 7325	Advanced Tax Research and IRS Procedures	3
ACC 7335	Taxation of Corporations and Shareholders	3
ACC 7340	Taxation of Pass-Through Entities	3
Total Credits		21

For students who have completed undergraduate or graduate courses equivalent to Core courses within the preceding three years with a grade point average of 3.0 or above, one or more advanced courses in accounting may be substituted for Core courses, at the discretion of the M.S.A. committee

Elective Requirements (M.S.A.) (Six-Nine Credits)

A minimum of two to three electives chosen from accounting courses offered at the 7000 level are required of all M.S.A. students. A student may begin to take electives once he/she has completed the foundation requirements.

Code	Title	Credits
Accounting Electives		
Select six-nine credits of the following:		6-9
ACC 7122	Advanced Accounting I	
ACC 7148	ERP Systems and Business Integration	
ACC 7155	Forensic Accounting	
ACC 7165	Internal Audit I	

ACC 7170	International Accounting	
ACC 7188	Governmental and Not-for-Profit Accounting	
ACC 7190	Advanced Auditing	
ACC 7320	Introduction to Taxation: Business Entities	
ACC 7325	Advanced Tax Research and IRS Procedures	
ACC 7335	Taxation of Corporations and Shareholders	
ACC 7340	Taxation of Pass-Through Entities	
ACC 7400	Taxation of International Business and Multinational Transactions	
ACC 7410	Tax Accounting Methods and Accounting for Income Taxes	
ACC 7420	Taxation by State and Local Jurisdictions	
ACC 7450	Taxes and Business Strategy	
ACC 7990	Internship in Accounting or Tax Practice	
ACC 7995	Directed Study in Accounting	
BLW 7220	Business Law II	
Total Credits		6-9

Business Electives (zero to nine credits): Students may choose electives from graduate business courses (offered at the 7000 level) based on their professional interests, with prior approval from the M.S. in Accounting Committee.

Capstone Requirement (M.S.A.)

ACC 7998, Seminar in Tax and Accounting Policy, is the capstone course for all M.S.A. degree candidates; it must be elected as part of the final nine credits in the student's program. ACC 7998 provides the opportunity to combine concepts developed by students in their professional and educational experience with economic, social, industrial, administrative, and legislative policy considerations.

AGRADE - Accelerated Graduate Enrollment

AGRADE – Accelerated Graduate Enrollment

The Mike Ilitch School of Business has established an accelerated combined undergraduate and graduate program ('AGRADE') whereby qualified students in the Mike Ilitch School of Business may enroll simultaneously in undergraduate and graduate courses of the School. A maximum of twelve credits may be applied towards both undergraduate and graduate degrees in a student's major field if the major department is an AGRADE participant. Those who elect the 'AGRADE' program may expect to complete the Bachelor's and Master's degrees in five years of full-time study.

AGRADE accelerated graduate program option

Save money and time toward your graduate business degree with the Accelerated Graduate Enrollment (AGRADE) program.

Highly qualified Wayne State University Mike Ilitch School of Business students are eligible to participate in the AGRADE program. AGRADE students can cut substantial time and as much as one-third off the total cost of a WSU graduate business degree program by applying up to 12 credits toward both their undergraduate and select graduate degrees.

AGRADE benefits

- Start earning your master of business administration (M.B.A.) (<https://ilitchbusiness.wayne.edu/mba>), master of science

in accounting (M.S.A.) (<https://ilitchbusiness.wayne.edu/accounting/ms.php>), master of science in finance (<https://ilitchbusiness.wayne.edu/finance/masters.php>) or executive master of science in automotive supply chain management (<https://ilitchbusiness.wayne.edu/supply-chain/masters.php>) while completing your bachelor's degree

- Earn graduate credits at undergraduate tuition rates
- Apply up to 12 credits of selected graduate courses (<https://ilitchbusiness.wayne.edu/students/agrade.php#agradecourses>) as dual credit for undergraduate and eligible graduate programs
- Option to move immediately to the graduate program or rejoin the program later
- Earn both your bachelor's and master's degrees in as little as five years

AGRADE requirements

- Undergraduate major in accounting, finance, global supply chain management, information systems management, management or marketing
- Junior or senior standing (~90 credits earned)
- Overall GPA of 3.5 or higher at WSU
- Major GPA of 3.6 or higher at WSU
- Meet with undergraduate and graduate advisors to discuss program requirements
- Complete the Dual Credit Enrollment Form
- Courses apply to M.B.A., M.S.A., master of science in finance or executive master of science in automotive supply chain management degrees only

Transfer of courses

Only those AGRADE-approved courses in which the student has earned a B or higher will transfer to the graduate transcript. Once in the master's program, students may be required to repeat an AGRADE course in which they earn less than a B grade.

Approved AGRADE courses

For students approved to participate in the AGRADE program, four of the following courses from any one of the program areas listed below may be counted toward both their bachelor's degree and M.B.A. All courses are three credits.

Courses Approved for AGRADE

Take no more than four courses or 12 credits from any one of the following program areas.

Code	Title	Credits
Accounting		
ACC 7120	Introduction to Taxation: Individuals	3
ACC 7122	Advanced Accounting I	3
ACC 7130	Intermediate Managerial Accounting	3
ACC 7145	Accounting Systems: Design and Controls	3
ACC 7148	ERP Systems and Business Integration	3
ACC 7165	Internal Audit I	3
ACC 7180	Auditing	3
ACC 7188	Governmental and Not-for-Profit Accounting	3
ACC 7320	Introduction to Taxation: Business Entities	3
Finance		
FIN 7000	Applied Financial Analysis	3
FIN 7220	Advanced Managerial Finance	3

FIN 7230	Investment Policies	3
FIN 7280	Entrepreneurial Finance and Venture Capital	3
FIN 7870	International Finance	3
FIN 7990	Portfolio Management/Student Managed Investment Fund (SMIF)	3

Global Supply Chain Management

GSC 7620	Global Supply Chain Management	3
GSC 7650	Strategic Procurement	3
GSC 7670	Special Topics in Supply Chain Management	3
GSC 7991	Principles of Quality Management	3
GSC 7992	Methods of Quality Management	3

Information Systems Management

ISM 7510	Database Management	3
ISM 7520	Information Systems Design	3
ISM 7530	Societal and Ethical Issues in the Information Age	3
ISM 7560	Survey of E-Commerce	3
ISM 7570	Data Mining	3
ISM 7575	Corporate Computer Networks and IT Security	3
ISM 7900	Project Management	3
ISM 7994	Digital Content Development	3

Management

EI 7000	Introduction to Entrepreneurship and Innovation	3
MGT 7640	Management of Human Resources	3
MGT 7650	Strategic Human Resource Management	3
MGT 7660	Entrepreneurial Management	3
MGT 7750	Labor Relations and Collective Bargaining	3
MGT 7900	Project Management	3
MGT 8000	Seminar in Management	3

Marketing

MKT 7150	Global Automotive Marketing Strategy	3
MKT 7430	Advertising Management	3
MKT 7450	Business Research and Methodology	3
MKT 7470	Consumer and Industrial Buying Behavior	3
MKT 7500	International Marketing Strategy	3
MKT 7700	Management of Retail Enterprises	3

Eligibility: 'AGRADE' applicants must have an overall g.p.a. of 3.5 through their junior year. Applicants are also expected to have performed at a superior level in their major, as determined by the major department and reflected in a g.p.a. in the major of at least 3.6 at the time of application.

Application: A student seeking 'AGRADE' status should present to the Mike Ilitch School of Business Graduate Programs Office all of the materials which that department requires for normal graduate admission, EXCEPT for the GMAT or Graduate Record Examination (GRE). Specific graduate admission requirements can be found in this bulletin or obtained from the Graduate Programs Office of the Mike Ilitch School of Business at 313-577-4511.

The earliest date by which a student may apply for the 'AGRADE' program is during the semester in which he/she completes ninety credits toward the undergraduate degree.

AGRADE Credits: Students may elect a minimum of three and a maximum of twelve 'AGRADE' credits. These will be used to complete the baccalaureate degree as well as to serve as the beginning of graduate study. Upon formal admission to a master's program, 'AGRADE' credits are transferred as if they were graduate credits transferred from a graduate program at another university. The remaining graduate credits

required for the master's degree will be earned in the conventional manner following formal admission to the graduate program.

For more details about the 'AGRADE' program, contact the Undergraduate Student Services Office or by calling 313-577-4505, or contact the Graduate Programs Office at 313-577-4511 or email gradbusiness@wayne.edu.

Automotive Supply Chain Management (Executive M.S.)

Admission requirements

Admission to the Executive Master of Science in Automotive Supply Chain Management (EMS-SCM) program is contingent upon admission to the Wayne State University Graduate School (<https://wayne.edu/apply/#fndtn-graduate>). *Please note: The admission application's academic programs list is alphabetical; you'll find this degree listed as Automotive Supply Chain Management.*

In addition to Wayne State's graduate school admission criteria, applicants to the EMS-SCM program must meet the following requirements:

- Baccalaureate degree or equivalent from a regionally accredited institution. If the applicant's undergraduate degree is in a non-business discipline, the applicant may be required to complete foundation courses determined by the selection committee.
- Overall undergraduate GPA of 2.75, with a 3.0 major GPA (on a 4.0 scale)
- Minimum GMAT score of 550. The Ilitch School does offer GMAT waivers to highly qualified applicants. To be considered for a GMAT waiver, you must meet one of the following criteria:
 - Acceptable score on the Graduate Record Examinations (GRE), Law School Admission Test (LSAT) or Medical College Admission Test (MCAT) entrance exam
 - GPA of 3.0 or higher from an AACSB-accredited business program or GPA of 3.2 or higher from a regionally-accredited university in any major, AND at least three years of relevant supply chain professional experience in a manufacturing organization that shows increased responsibility over that period
- Two letters of recommendation from professors or employers
- A short essay answering on the following:
 - What are your career objectives and how will an EMS-SCM help you achieve your goals?
 - Describe any special circumstances related to your academic record you think the admissions committee should consider.

On-campus or phone interviews may be required. Background in supply chain management (via undergraduate degree, professional certification or work experience) is preferred though not an absolute requirement. The committee will base its recommendation for admissions on the composite characteristics of the applicant. The applicant's work experience and an outstanding track record may be considered a positive factor to make up for deficiency in one or two numerical criteria.

Curriculum Requirements

The EMS-SCM is a 31 credit degree program that can be completed in three semesters for full-time students. By taking six credit hours (two courses) per semester, a part-time student can complete the program in five semesters. Students enrolled in the program must complete the program within six years of their start date.

Up to six transfer credits for previous equivalent graduate coursework can be applied to the degree if those credits have not been counted towards a degree, earned a B grade or better, are from an AACSB accredited institution, not older than 6 years and are equivalent substitutes. Students transferring to the program from the Ilitch School's M.B.A. with a concentration in global supply chain management may transfer unlimited Wayne State graduate credits in global supply chain management.

A minimum grade point average (GPA) of 3.00 is required to obtain the EMS-SCM degree. A maximum of two courses in which a C has been received may be used to meet graduation requirements, provided this is offset by sufficient A grades to maintain the required 3.00 average

All courses listed below are three credits each unless otherwise noted.

Code	Title	Credits
Core Courses		15
Five courses form the backbone of the EMS-SCM program, providing the critical skills needed for various specialties within the broader field.		
GSC 7620	Global Supply Chain Management

Business Administration (M.B.A. Program)

Admission (M.B.A.)

Admission to any graduate program is contingent upon admission to the Graduate School (p. 19). In addition, applicants to the M.B.A. program must comply with the following:

Admission to the Master of Business Administration program is limited to holders of baccalaureate degrees from regionally accredited institutions who demonstrate high promise of success in graduate business study. Several measures of probable success may be included in the evaluation of an applicant; criteria which may be considered are:

1. Performance on the Graduate Management Admission Test (GMAT); see below.
2. Undergraduate grade point averages and the trend of grades earned during undergraduate education.
3. Other indicators of promise of success in the graduate study of business, such as relevant employment and leadership experience.

Appeals to an admission denial may be made in writing to the Assistant Dean of Graduate Programs, Mike Ilitch School of Business. Guidelines for formal appeals are available in the Mike Ilitch School of Business's Graduate Programs Office.

Graduate Management Admission Test (GMAT)

The GMAT must be taken prior to admission to graduate study. This test is a three-hour aptitude test designed to measure certain mental abilities and skills important in the study of management. The GMAT includes verbal, quantitative analytical writing and integrated reasoning sections administered by a computer. The Educational Outreach Office offers a preparation course for the GMAT (313-577-4449).

The GMAT is offered on a continuous basis by appointment at computer-based testing centers throughout North America and at selected international sites. Candidates can schedule a testing appointment by calling 1-800-717-GMAT (4628). A list of test centers is provided in the GMAT Bulletin (<http://mba.com>) and on GMAT's website (<http://gmac.com>).

Most prospective graduate business students will take the GMAT or GRE for admissions, although the School of Business does offer GMAT/GRE waivers to highly qualified applicants. This is generally defined as those applicants who meet one of the following criteria:

1. Acceptable score on the Graduate Record Examinations (GRE), Law School Admission Test (LSAT) or Medical College Admission Test (MCAT) entrance exam.
2. GPA of 3.0 or higher from an AACSB-accredited business program (or GPA of 3.2 or higher from a regionally-accredited university in any major) OR at least three years of relevant professional experience that shows increased responsibility over that period.

Please contact the Graduate Programs Office for more information on GMAT waivers or equivalency requirements

Application

A completed Application for Graduate Admission (<http://wayne.edu/admissions/graduate>), the application fee, and an official transcript from

¹ There are two critical value added activities in this program: training sessions provided in conjunction with the Automotive Industry Action Group and networking sessions with automotive industry professionals. A combination of these are required and covered as a directed study in supply chain management.

The directed study course is designed to provide students with automotive industry produced training programs and conferences. Students are required to participate in the following and provide documentation of participation:

- Completion of 3 Automotive Industry Action Group (AIAG) online training modules related to quality, sustainability, or supply chain management in general, or other such programs agreed to by the directed study (GSC 7995) course instructor.
- Participation in 2 conferences on broad supply chain management topics produced by the Automotive Industry Action Group (AIAG) or other industry related program approved by the study abroad (GSC 7995) course instructor.
- The course will require a term paper on what was learned in these experiences.

International experience requirement

Students are required to have an international experience as part of the program. This can be fulfilled by taking one of the Ilitch School Study Abroad two week courses.

Business (Graduate Certificate)

Admission Requirements

Admission to this program is contingent upon admission to the Graduate School (p. 19). In addition, applicants must have earned a minimum g.p.a. of 3.0 in their undergraduate/graduate program. Applicants who already have a business or related degree are not eligible.

The Graduate Certificate in Business is designed to provide non-business undergraduates fundamental knowledge in the basic functional areas of business administration: accounting, finance, management, and marketing.

The Certificate program requires successful completion of thirteen credits consisting of six courses: four functional basic required courses (eight credits); a foundation elective course (two credits); and a functional elective course (three credits). Courses are to be chosen from the following.

Code	Title	Credits
Functional Basics		
BA 6000	Introduction to Accounting and Financial Reporting	2
BA 6005	Basics of Financial Management	2
BA 6015	Marketing Foundations	2
BA 6020	Contemporary Principles of Management	2
Foundation Electives		
Select one of the following:		2
BA 6010	Basics of Business Economics	
BA 6025	Basics of Production/Operations Management	
BA 6090	Quantitative Analysis: Theory and Application	
Functional Electives		
Select one of the following:		3
BA 7000	Managerial Accounting	
BA 7020	Corporate Financial Management	
BA 7040	Managing Organizational Behavior	
BA 7050	Marketing Strategy	
BA 7070	Social Perspectives on the Business Enterprise	

each college or university attended are required before a student can be considered for admission to graduate status.

Candidates for the Master of Business Administration degree must complete thirty-six credits in final-program course work with a minimum grade point average of 3.0. Additional foundation course work may be required prior to beginning the thirty-six final-program credits.

Degrees are granted upon the recommendation of the faculty of the Mike Ilitch School of Business. All course work must be completed in accordance with the regulations of the Graduate School (p. 12) and the Mike Ilitch School of Business (p. 66) governing graduate scholarship and degrees.

Course Distribution Requirements (M.B.A.)

The master's degree program provides a fundamental background in business administration as well as opportunities for advanced specialization in particular areas. The program beyond the common body of knowledge is broad in nature and is directed at general competence for overall business management. There are three phases of course work required:

- foundation
- core
- electives and/or concentrations

Depending on the student's academic background, there may be no foundation courses or as many as seven foundation courses required. All students must complete six core courses. Students must also choose six elective courses which can be used as part of a general curriculum. Students in the M.B.A. program may select electives that apply toward the completion of one or more of the concentrations as listed on the "Concentrations" tab.

Foundation Requirements (M.B.A.)

The following foundation courses are open only to students who have been formally admitted to a graduate program at Wayne State University – undergraduate, post-baccalaureate, and non-matriculated students are not eligible. (Analogous courses offered at the undergraduate level may be taken to satisfy Foundation Requirements prior to graduate admission. However, once a student has been formally admitted to the M.B.A. program, NO graduate credit shall be allowed for subsequent registrations in undergraduate courses analogous to the Graduate Foundation Requirements without approval of the Graduate Committee or its designee. Information regarding such courses is available in the Graduate Programs Office, 2771 Woodward Avenue, Suite 137.) A cumulative grade point average of 3.00 ('B') is required for foundation requirements and no individual grade below 2.0 ('C') is acceptable. **All foundation requirements must be completed before a student begins core and elective courses.**

Code	Title	Credits
BA 6000	Introduction to Accounting and Financial Reporting	2
BA 6005	Basics of Financial Management	2
BA 6010	Basics of Business Economics	2
BA 6015	Marketing Foundations	2
BA 6020	Contemporary Principles of Management	2
BA 6025	Basics of Production/Operations Management	2
BA 6090	Quantitative Analysis: Theory and Application	2
ISM 7500	Business Information Systems	2

In general, a baccalaureate degree in Business Administration from a regionally accredited institution fulfills most foundation requirements. However, each applicant's background will be individually examined to determine if any foundation course work is needed. If courses proposed to satisfy the foundation requirements of the M.B.A. program are over six years old, the Graduate Committee may require the applicant to demonstrate proficiency in the subject matter either by interview with a faculty member, by taking an equivalent course, or by taking an equivalent course by examination.

Foundation Waivers: While all of the above foundation courses are required, students who have had equivalent course work in their undergraduate programs (except for BA 6005, see below) with a cumulative g.p.a. of 3.00 ('B') or higher may be granted waivers of certain foundation courses at the time of their admission to the graduate program.

BA 6005 Foundation Waiver Criteria:

1. Students who have earned a grade of 3.00 ('B') or higher in an undergraduate course that is compatible with BA 6005 and the prior course was taken within the last three years from an AACSB accredited college or university. These students must also have quantitative GMAT/GRE scores higher than the 50th percentile.
2. Students who are Finance or Accounting majors from an AACSB accredited US or Canadian university, have obtained a g.p.a. of 3.00 or higher in the major, and have graduated in the last two years.
3. Students who are not Finance or Accounting major but have completed FIN 3290 or an equivalent course from an AACSB accredited US or Canadian university within the last 12 months and passed the course with a grade of 3.33 ('B+') or higher.
4. Students who do not meet any of these conditions may take and pass a waiver exam administered by the Department of Finance; however, they are strongly encouraged to take BA 6005. BA 6005 (Basics of Financial Management) is a prerequisite for BA 7020.

Mathematics Proficiency: In addition to these courses, one college-level algebra or finite mathematics course is required.

Writing Proficiency: Each student admitted to the graduate business program is required to demonstrate competency in analytical writing. A score of at least 3.5 on the GMAT writing assessment will demonstrate this competency. A student who scores below 3.5 on the GMAT writing assessment must complete with a grade of 'C' or better ENG 3050 or a writing course approved by the Mike Ilitch School of Business Graduate Programs Office. The cumulative g.p.a. of all waived courses (for example, introduction to accounting or finance) and courses taken to demonstrate competency, such as ENG 3050, must be 'B' (3.0) or higher.

Core Requirements (M.B.A.)

The following six core courses are required of all students:

Code	Title	Credits
BA 7000	Managerial Accounting	3
BA 7020	Corporate Financial Management	3
BA 7040	Managing Organizational Behavior	3
BA 7050	Marketing Strategy	3
BA 7070	Social Perspectives on the Business Enterprise	3
BA 7080	Strategic Management ¹	3

¹ BA 7080 is the capstone course and is to be taken in the final twelve credits of the graduate program and only after the completion of the other five core courses. For those students with an undergraduate major in accounting, management or marketing, a more advanced course in a subject area (approved as part of the student's Plan of Work) must replace the pertinent core course noted above.

Examination Requirements (M.B.A./C.P.A.)

M.B.A. students who hold a baccalaureate degree in a field other than accounting and who wish to qualify to sit for the C.P.A. examination in the State of Michigan should contact their advisor in the Graduate Programs Office (313-577-4511) as early as possible. While no formal M.B.A. curriculum is offered to meet the educational requirements of the Michigan State Board of Accountancy, an individualized Plan of Work can be developed. Generally, such a Plan of Work includes more than the minimum number of courses required for the M.B.A.

Concentration Requirements (M.B.A.)

The purpose of the concentration is to provide depth in a specialization that will contribute to the student's attainment of his or her professional objectives. The Mike Ilitch School of Business currently offers twelve areas of concentration. The following are the areas of concentrations and the list of courses that must be completed to fulfill the concentration requirement.

Accounting Systems

Elective Requirements (M.B.A.)

All elective courses must be at the 7000 level or higher and must be offered by the Mike Ilitch School of Business. The written approval of the Dean or his/her designee is required to take any course as an M.B.A. elective outside the Mike Ilitch School of Business. (Only students holding a bachelor's degree in business administration are eligible to take elective courses outside the Mike Ilitch School of Business.) Students may select any combination of elective courses from the following set of courses.

Accounting

Business Administration (Ph.D.)

The Doctor of Philosophy in Business prepares persons interested in careers in research and university teaching. The core goals for the program are the creation of new knowledge through research and excellence in teaching. The Ph.D. program offers specialized tracks in finance, management, and marketing. For detailed information, please visit the Mike Ilitch School of Business (<http://ilitchbusiness.wayne.edu>).

Admission Requirements

Admission to any graduate program is contingent upon admission to the Graduate School (p. 19). In addition, applicants to the Ph.D. program must comply with the following:

1. hold a bachelor's degree with a grade point average of at least 3.0, or 3.5 upper division (junior or senior), or a graduate degree g.p.a. of 3.5.;
2. score at least a 600 on the Graduate Management Admissions Test (Attainment of satisfactory GMAT score and GPA does not guarantee admission);

3. provide at least three letters of recommendation from officials or faculty at the institution(s) most recently attended, or by a recent employer of the applicant;
4. submit a brief essay (not to exceed four pages) by the applicant on his or her career objectives.
5. Applicants from other countries must demonstrate English proficiency by obtaining at least a 550/213/79 on the Test of English as a Foreign Language.

Ph.D. students in Business Administration must successfully complete at least ninety credits of graduate study, consisting of at least sixty credits of course work and thirty credits in dissertation research. The program must include at least thirty credits (excluding dissertation direction) in courses numbered 7000 or above, or as approved by the students advisor and the Ph.D. program director. All course work must be completed in accordance with the regulations of the Graduate School (p. 12) and the Mike Ilitch School of Business (p. 66) governing graduate scholarship and degrees.

All Business School Ph.D. students must complete:

Code	Title	Credits
BA 8777	Professional Development Seminar for Business Doctoral Students	1-3
BA 8900	Development of Effective Research Programs in Business	3

All Finance Track students must complete:

Code	Title	Credits
BA 8120	Theory of Finance	3
BA 8121	Seminar in Corporate Finance	3
BA 8122	Empirical Methods in Finance	3
BA 8123	Seminar in Corporate Governance	3

All Management Track students must complete:

Code	Title	Credits
BA 8220	Seminar in Organizational Behavior	3
BA 8221	Seminar in Strategic Management	3
BA 8420	Seminar in Organizational Theory	3

All Marketing Track students must complete:

Code	Title	Credits
BA 8050	Seminar in Marketing Theory	3
BA 8054	Seminar in Marketing Strategy	3
BA 8058	Advanced Topics in Consumer Behavior	3

Upon completion of fifty credits of the course work, students must take written and oral qualifying examinations. The qualifying examinations require of students critical analysis of the state of research and knowledge in their substantive areas. In addition, they must demonstrate the reflective presentation of innovations in perspectives, theory, knowledge, and research design, methods and strategies that will advance practice and create new knowledge in their chosen areas.

Students advance to Ph.D. Candidacy after successful completion of both written and oral qualifying exams. Ph.D. Candidacy begins the dissertation preparation phase of the degree. Four consecutive academic-year semesters of registration as a degree candidate are required during the preparation of the dissertation. The thirty-credit dissertation registration requirement is fulfilled by registering for courses BA 9991, BA 9992, BA 9993, BA 9994 (Doctoral Research and Direction I, II, III, IV,

respectively), in consecutive academic year semesters. Students should consult Graduate School regulations governing doctoral study (p.).

Business Administration and Law (M.B.A./J.D. Joint Degree)

Joint degree programs are those in which credit for some courses may be applied to both degrees. The Joint M.B.A./J.D. Program leads to the receipt of both the Master of Business Administration (M.B.A.) degree from the Mike Ilitch School of Business and the Juris Doctor (J.D.) degree from the Law School. The joint program allows students to fulfill the requirements of both programs concurrently. Students will need to complete all the requirements for both degrees, but Law School courses may count for up to nine elective credits toward the M.B.A. degree.

Applicants to this program must apply to both the Law School J.D. program and the Mike Ilitch School of Business M.B.A. program. Admission to the Concurrent M.B.A./J.D. Program requires separate approval by both the Law School and the Mike Ilitch School of Business. Students must meet all admission requirements of both programs; be admitted to both programs; and obtain the separate approval of both units to participate in the concurrent degree program.

Students seeking admission into the Joint M.B.A./J.D. program may use their Law School Admission Test (LSAT) score for M.B.A. admission consideration, as long as the student makes it clear at the time of application that they would like to pursue this option. Otherwise, the student must take the Graduate Management Admission Test (GMAT) and submit that score for M.B.A. admission consideration. If the student is a current J.D. student within their first year of law school, the student may apply for the Joint M.B.A./J.D. program using the University Graduate Change of Status form and submitting all required application documents.

The first year of study is spent in the Law School; after completion of the first year, students may elect one Business School course per semester, with a maximum of four M.B.A. graduate courses applicable toward the J.D. degree. Students are eligible to apply a maximum of nine J.D. credits as M.B.A. elective credit, provided the following conditions are met:

1. The law school courses to be applied to the M.B.A. must be taken at the Wayne State University Law School, as part of the J.D. program;
2. A grade of 'B' (3.0) or higher must have been awarded for the courses; Passed/Not Passed credit is acceptable only for LEX 8631 and LEX 8633;
3. The courses must be relevant to the student's Plan of Work as approved by the Graduate Committee;
4. The courses may not be more than five years old at the time of graduation;
5. The Law courses which will be considered for dual applicability are:

Code	Title	Credits
LEX 6200	Contracts A	3
LEX 6201	Contracts B	3
LEX 7009	Advanced Bankruptcy	3
LEX 7014	Taxation of Corporations: Acquisitions and Restructuring	4
LEX 7026	Antitrust	2-4
LEX 7045	Banking Law	2
LEX 7060	Business Planning	4
LEX 7061	Business Planning: A Transactional Approach	4-8
LEX 7128	Consumer Law	2-3
LEX 7141	Corporate Finance	3

LEX 7156	Corporations	2-4
LEX 7221	Employment Law	2-3
LEX 7353	Health Care Organizations and Finance	3
LEX 7404	International Business Transactions	3
LEX 7407	International Intellectual Property Law	3
LEX 7603	Mergers and Acquisitions	2-3
LEX 7828	Law of Electronic Commerce	3
LEX 7831	Trademarks and Unfair Competition	2-3
LEX 8631	Business and Community Law Clinic	6
LEX 8633	Business and Community Law Clinic (Advanced)	2

6. If a Joint M.B.A./J.D. student would like to apply a J.D. course to the M.B.A. that is not listed above, the student must petition in writing to the Graduate Committee for dual application of credit.

Data Science and Business Analytics (M.S.)

Analytics is a fast-growing STEM field with a high demand for individuals who possess the skills and expertise necessary to navigate the process of transforming data into insight for making sound business decisions. It's the reason that the WSU College of Engineering and the Mike Ilitch School of Business launched an innovative and interdisciplinary new master's program in data science and business analytics. Leaders in this field use data to fundamentally rethink all facets of business in many sectors, including manufacturing, supply chain, finance, and healthcare.

Admission

Admission to any graduate program is contingent upon admission to the Graduate School (p. 19). Applicants should have 3.0 or higher cumulative undergraduate g.p.a.

Interview

Prospective candidates being considered for admission may have to participate in an online interview with the admissions committee. Upon evaluating the application, admissible candidates will be contacted for scheduling these interviews.

Prerequisite Knowledge

Candidates are expected to well-versed in basic probability and statistics and also familiar with some programming language. Courses will be available in the summer months for admitted applicants to refresh their knowledge or makeup for any deficiency in this knowledge.

Students without this prerequisite knowledge but otherwise possess good credentials will be given conditional admission and have to take this remedial coursework in the summer months prior to starting the program in the fall term

Graduate Management Admission Test (GMAT) and Graduate Record Examination (GRE)

Applicants must complete the GRE or the GMAT with minimum scores in the top 75 percentile.

Students must complete a total of 30 credits in order to earn the M.S. in Data Science and Business Analytics.

The "interdisciplinary core" includes 9 credits of coursework across business, computer science, and industrial engineering. On top of this integrated breadth of study covering the core areas of data science and business analytics, each student has 9 credits of "concentration" courses to give them depth in an engineering, business, or analytics area. Each student's 6 credits of elective choices can be personalized to support their individual career goals. The final piece of the curriculum is a 6-credit

applied analytics practicum, in which students will work with companies and organizations on real analytics problems.

Base Curriculum for all Concentrations

Code	Title	Credits
	Data Science Analytics	3
	Data Science Strategy and Leadership	3
	Computing Platforms for Data Science	3
	Three Concentration Courses	9
	Two Elective Courses	6
	Data Science and Business Analytics Practicum	6
	Total Credits	30

Each student's course choices must satisfy the requirements of at least one of the defined concentrations: Data Computing, Advanced Analytics, or Data-Driven Business

Entrepreneurship and Innovation (Graduate Certificate)

Program Overview

The entrepreneurship and innovation certificate program provides insights and practical experience for both current and future for-profit and not-for-profit professionals working in a wide range of settings, including business, engineering, science and technology, health care, the arts, sports and entertainment, communication and information technology, manufacturing, and community and economic development. This cross-disciplinary certificate program has been designed to provide you with the specialized knowledge, skills and experience required to develop, launch and grow a new venture. The courses offered are developed and provided in collaboration with other Wayne State University schools and colleges, and many classes can satisfy the requirements of both your degree program and the certificate program.

Students who participate in the Entrepreneurship and Innovation Certificate program are eligible to apply for support from the Belinsky Entrepreneurial Learning Laboratory (BELL). The BELL assists sustainable, investment-ready student startups and supports the development of commercialization pathways for WSU intellectual property by providing mentors and subject matter experts, direct support and limited funding to assist in the process of attracting additional funding in the form of revenue growth, grants, loans or direct investment. Direct support is provided by BELL Fellows, and certificate program students are eligible to apply for these fellowships. Contact the program director for further information.

For additional information and program updates please refer to <http://ilitchbusiness.wayne.edu/entrepreneurship/department.php>

Admission requirements

The graduate certificate in entrepreneurship and innovation is open only to those students who can meet the graduate admission requirements of Wayne State University. Further, those admitted to this certificate program are: 1) currently enrolled WSU graduate students who have completed at least 6 graduate credit hours and have a cumulative grade point average of 3.0 or above; or 2) students who possess a graduate degree from an accredited college or university. Students must also successfully complete an introductory course and gain approval for their elective selection and plan of work. Students can develop a full plan of

work with the program advisor before registering for the introductory course, and are strongly encouraged to do so.

Formal admission to the certificate program requires that students complete an introductory course and obtain approval for their plan of work which includes three elective courses and a capstone course. Students can develop a full plan of work with the program advisor before registering for the introductory course and are strongly encouraged to do so.

The introductory course provides an integrative framework, processes and tools which must be mastered and opportunities to explore resources available within the local entrepreneurial ecosystem. The electives courses are matched to student talents and interests and provide opportunities to acquire additional breadth and depth of knowledge, skills and abilities and opportunities for additional applications of the integrative framework, processes and tools. In the capstone course students are engaged in a project-intensive learning experience in the Detroit entrepreneurial ecosystem. The capstone course is designed to help the student deepen their understanding of and appreciation for what it takes to translate ideas into reality and provides students an opportunity to celebrate and reflect on their passion and ability to launch and support startups of both a technical and non-technical nature.

Program standards

- A minimum cumulative GPA of 3.0 will be required for completion of the certificate, with no grades less than a B in each of the core courses.
- Although students are encouraged to complete the certificate in three consecutive semesters, it must be completed within three years of admission. Students may enroll on a full- or part-time basis.
- The certificate will be awarded upon completion of the related graduate program. Or, if the student already has been awarded the graduate degree, the certificate will be awarded upon completion of the certificate program.
- Up to 9 of the credit hours of coursework taken toward this graduate certificate may also be used to satisfy graduate degree requirements, assuming no credits have been applied from a second certificate and also subject to the approval of the relevant academic unit and graduate office.
- The credits earned while completing this certificate program cannot be applied toward another Wayne State University certificate program.
- Credits applied to a graduate certificate cannot be applied toward a subsequent Wayne State University graduate degree.
- No transfer credit will be accepted.

Curriculum requirements

The student must complete 15 credits, with six credits from the core, and nine elective credits selected from an approved list. Electives which will count toward the completion of the certificate program are open to students who have satisfactorily completed the introductory course and who have been admitted to the program. Students must complete 12 approved credits before enrolling in the capstone course.

Required core courses (6 credits)

Code	Title	Credits
EI 7000	Introduction to Entrepreneurship and Innovation	3
EI 7900	Entrepreneurship and Innovation Capstone ¹	3

¹ Approval to take EI 7900 requires completion of nine (9) credits of electives with a minimum grade of C in addition to EI 7000 with a minimum grade of B.

Electives (9 credits)

Three elective courses are also required. A subset of the list of elective courses (free-elective courses) will carry no pre-requisite beyond EI 7000, thereby broadening accessibility to non-business students. The list of approved elective courses will also include restricted-electives, courses which may require completion of discipline-specific course prerequisites. Restricted-elective courses must meet the following criteria: (1) the course learning objectives, content and activities must be explicitly and substantially correlated with the GCEI program learning goals; (2) the course incorporates one or more of the foundation framework elements and/or skill and tool kit components; (3) the student has satisfied pre-requisites for these courses; (4) the student completes these courses after having been admitted to the certificate program; and (5) the credits earned in these courses must also satisfy the degree requirements of the student's graduate degree program.

Note: The list of elective courses will be updated periodically subject to the review and approval of the curriculum committee of the Entrepreneurship and Innovation program and its advisory board.

Code	Title	Credits
Free Electives (3 credits each)

Finance (M.S.)

Admissions

Admissions into the Master of Science in Finance program is contingent upon admissions to the Wayne State University Graduate School. In addition, applicants must meet the following requirements:

1. Baccalaureate degree in business administration, a discipline area of business administration such as accounting or finance, or in a quantitative field such as mathematics, economics, physics, engineering, statistics or the sciences from a regionally accredited institution
2. Minimum GMAT score of 550; or minimum GRE score of 155 on Quantitative Reasoning and 154 on Verbal Reasoning
3. Overall undergraduate grade point average (GPA) of 2.75, with 3.0 major grade point average (GPA) on a 4.0 scale
4. Three letters of recommendation from professors or employers

On-campus or telephone interviews may be required.

Application

A completed application for Graduate Admissions, the application fee, and an official transcript from each college or university attended are required before a student can be considered for admissions to graduate status.

Course Requirements

The M.S.F. program requires a total of 30 credit hours. Up to six transfer credits from previous equivalent graduate coursework can be applied to the degree if those credits have not been counted toward another degree, are from an AACSB accredited institution, are equivalent substitutes, have a B grade or better and are not older than 6 years.

Students can pursue the M.S.F. full time or part time. Students must complete the program within six years.

A minimum cumulative grade point average (GPA) of 3.0 or greater is required for graduation. A maximum of two courses in which a C grade has been received may be used to meet graduation requirements, provided this is offset by sufficient A grades to maintain the required 3.0 GPA.

The M.S.F. curriculum will provide the student with a solid foundation for the Chartered Financial Analyst (CFA) level one exam and will prepare them for a variety of financial roles. There are three phases of course work required:

- Foundation
- Core
- Electives

Foundation Requirements

Before progressing to the core courses of the program, students should possess a solid foundation in finance and accounting as comprised by the following set of courses:

Code	Title	Credits
BA 6000	Introduction to Accounting and Financial Reporting	2
BA 6005	Basics of Financial Management	2
BA 7000	Managerial Accounting	3

The graduate level foundation courses (BA - Business Administration) cited above are open only to students who have been formally admitted into a graduate program at Wayne State University. Analogous courses offered at the undergraduate level (as determined by the admissions evaluation process) may be taken to satisfy foundation requirements PRIOR to graduate admissions. However, once a student has been formally admitted to the M.S.F. program, no graduate credit will be allowed for subsequent registration in undergraduate courses.

If the applicant's business administration, finance or accounting degree is from a college or university located outside of the United States, some or all of the foundation requirements may not be waived because U.S. generally accepted accounting principles (US GAAP) may not have been studied.

Core Requirements

Five core courses form the backbone of the M.S.F. program, providing general analytical methods and technical tools that can be applied to a variety of sub-specialties in finance. With the exception of FIN 7220, the finance core courses shown below will be taken in the first semester, after which students may customize their program through electives according to their long-term goals and specific areas of interest.

Code	Title	Credits
FIN 7015	Managerial Economics and Quantitative Methods	3
BA 7020	Corporate Financial Management	3
FIN 7000	Applied Financial Analysis	3
FIN 7220	Advanced Managerial Finance	3
FIN 7230	Investment Policies	3

Electives

Students may take elective courses before finishing all the core courses as long as prerequisites such as BA 7020, FIN 7220 and FIN 7230 are completed. After taking the 15 credit finance core, students can choose from a variety of elective courses to develop expertise in their areas of interest. Students may also opt to take an elective outside the program, such as in economics, with permission from the department chair.

An innovation feature of the M.S.F. is the ability for students to tailor the program to their individual needs and interests. Students may select courses that focus on corporate finance or investments or both.

Corporate Finance Courses

The curriculum includes a study of asset, liability and capital structure management, with emphasis on valuation capital budgeting techniques; risk evaluation; working capital management, and methods of short-term, intermediate and long-term financing.

Students may take any five of the following elective courses if interested in the corporate finance area:

Code	Title	Credits
FIN 7090	Money and Capital Markets	3
FIN 7229	Corporate Valuation: Techniques, Models and Strategic Applications	3
FIN 7280	Entrepreneurial Finance and Venture Capital	3
FIN 7777	Corporate Financial Consulting	3
FIN 7290	Topics in Finance	3

Investment Courses

These courses focus on skills necessary in the financial services industry (such as banking, investment banking, consulting, or the financial

service function of major corporations). Skill set involves analysis of investments, constructing investment portfolios, and advising clients on investment selection and portfolio strategy.

Students may take any five of the following elective courses if interested in the investments area:

Code	Title	Credits
FIN 7330	Fixed Income Securities	3
FIN 7340	Futures and Options	3
FIN 7870	International Finance	3
FIN 7990	Portfolio Management/Student Managed Investment Fund (SMIF)	3
FIN 7290	Topics in Finance	3

Other Finance Electives

Code	Title	Credits
FIN 7890	Internship in Finance	3
FIN 7995	Directed Study	1-3

Taxation (M.S.T. Program)

Admission Requirements

Admission to any graduate program is contingent upon admission to the Graduate School (p. 19). In addition, applicants to the M.S.T. program must comply with the following:

Admission to the Master of Science in Taxation (M.S.T.) program is limited to students who demonstrate high promise of success and hold a baccalaureate degree in business administration, a discipline area of business administration, or accounting from regionally accredited institutions. Several measures of probable success that may be considered in the evaluation of an applicant include but are not limited to:

1. Performance on the Graduate Management Admission Test (GMAT) (p. 73).
2. Undergraduate grade point averages and the trend of grades earned during undergraduate education.
3. Other relevant factors such as employment and leadership experience.

The M.S.T. Committee is authorized to review the credentials of each applicant. Final approval of the applicant's admission to graduate study in taxation is authorized by the Dean of the Mike Ilitch School of Business or the Dean's designee, upon recommendation of the M.S.T. Committee. Appeals to an admission denial must be made in writing to the Director of the Graduate Programs, Mike Ilitch School of Business. A copy of the Guidelines for formal appeals is available in the School's Graduate Programs Office.

Before an applicant can be considered for admission, the following material must be timely submitted:

1. An online W.S.U. Application for Graduate Admission (<http://www.gradadmissions.wayne.edu>);
2. an official transcript from each college or university previously attended by the applicant;
3. an official notification of the applicant's score on the GMAT and, if required, the TOEFL. For information regarding the GMAT.

The M.S.T. degree program requires completion of thirty credits in final-program course work with a grade point average of not less than 3.0. Additional foundation coursework may also be required prior to starting

the thirty credits of final-program coursework. Degrees are granted upon recommendation of the faculty of the Mike Ilitch School of Business. Consideration is given to both scholastic achievement and the extent to which the candidate has met the standards and requirements of the School. All course work must be completed in accordance with the regulations of the Graduate School (p. 12) and the Mike Ilitch School of Business (p. 66) governing graduate scholarship and degrees.

Course Distribution Requirements (M.S.T.)

The M.S.T. program consists of four course categories, as follows:

Foundation Courses are required pre-professional courses but ones for which credit is not applicable to the M.S.T. degree. Applicants who have already earned a degree in business administration or accounting may usually be able to waive most, if not all, of the foundation courses.

Core Courses are six courses providing in-depth coverage of the body of knowledge associated with studies in taxation and tax policy.

Electives comprise three additional courses providing additional coverage of the body of knowledge associated with studies in taxation and tax policy.

Capstone Course: When nearing the conclusion of the M.S. in Taxation program, the degree candidate will take ACC 7998, Seminar in Tax and Accounting Policy.

Foundation Requirements (M.S.T.)

The M.S. in Taxation is an advanced degree. Before progressing to the core courses of the program, the student should possess a solid foundation in accounting as comprised by the following set of three courses:

Code	Title	Credits
ACC 7040	Intermediate Financial Accounting I	3
ACC 7050	Intermediate Financial Accounting II	3
ACC 7120	Introduction to Taxation: Individuals	3

However, if the applicant's business administration or accounting degree is from a college or university located outside of the United State, some or all of the foundation requirements may not be able to be waived as U.S. generally accepted accounting principles (US GAAP) may not have been studied.

The graduate-level foundation courses (ACC 7040, ACC 7050 and ACC 7120) cited above are open only to students who have been formally admitted to a graduate program at Wayne State University. Analogous courses offered at the undergraduate level (as determined by the admission evaluation process) may be taken to satisfy foundation requirements prior to graduate admission. However, once a student has been formally admitted to the M.S.T. program, NO graduate credit will be allowed for subsequent registration in undergraduate courses.

A cumulative grade point average of 3.0 ('B') is required in foundation requirements courses. No individual grade below 'C' (2.0) is acceptable. Students may begin taking Core courses during the semester in which they elect Foundation Requirements, subject to the prerequisite and corequisite requirements of the Core courses.

Core Requirements (M.S.T.)

(Eighteen Credits)

The following six courses are required of all students and are prerequisite or corequisite to subsequent/concurrent elective courses. ACC 7300 must be completed within the first nine credits of the program.

Code	Title	Credits
Core Requirements		
ACC 7300	Accounting and Tax Research and Professional Communications	3
ACC 7310	Business and Professional Ethics for Managers and Accountants	3
ACC 7320	Introduction to Taxation: Business Entities	3
ACC 7325	Advanced Tax Research and IRS Procedures	3
ACC 7335	Taxation of Corporations and Shareholders	3
ACC 7340	Taxation of Pass-Through Entities	3
Total Credits		18

For students who have completed undergraduate, graduate or law courses equivalent to Core courses, within the preceding three years with a grade point average of 3.0 or above, one or more advanced courses in taxation may be substituted for Core courses, at the discretion of the M.S.T. Committee.

Elective Requirements (M.S.T.)

(Nine Credits)

At least two electives are required of all M.S.T. students. A student may begin to take electives if he/she has completed the foundation requirements. Advanced graduate courses in taxation offered by the Accounting Department may be elected without approval of the student's advisor. Electives outside of the field of taxation, as offered by the Accounting Department, require approval of the advisor; electives from outside the Accounting Department or the Mike Ilitch School of Business must also be approved by the M.S. in Taxation Committee.

A student may elect Law School courses with the approval of his/her advisor and the Director of Graduate Studies of the Law School. Students should be aware that registration for Law School courses takes place earlier than for the Mike Ilitch School of Business and the rest of the University, and that the Law School calendar and the regular University calendar also differ. Students should consult the Law School (p. 177) regarding courses, schedules, and calendar.

Capstone Requirement (M.S.T.)

ACC 7998, Seminar in Tax and Accounting Policy, is the capstone course for all M.S.T. degree candidates; it must be elected as part of the final nine credits in the student's program, and only after completion of at least four Core courses. ACC 7998 provides the opportunity to combine concepts developed by students in their professional and educational experience with economic, social, industrial, administrative, and legislative policy considerations.

TAYLOR, JOHN: Ph.D., M.B.A., B.A., Michigan State University; Associate Professor and Chair

VERMA, HARISH L.: Ph.D., M.B.A., M.S., Michigan State University; B.S., Institute of Technology, India; Associate Professor Emeritus

WILLIAMS, DAVID L.: Ph.D., M.A., Wayne State University; B.A., University of Wisconsin; Emeritus Associate Professor

YAN, TINGTING: Ph.D., Arizona State University; M.S., Fudan University; B.A., Zhongnan University; Associate Professor

YAPRAK, ATTILA: Ph.D., Georgia State University; M.B.A., B.S., Indiana University; Professor

YILDIZ, HAKAN: Ph.D., M.S., Carnegie Mellon University; B.Sc., Bilkent University; Associate Professor

COLLEGE OF EDUCATION

Dean: Anita G. Welch

The College of Education at Wayne State University is located in, and serves the needs of, one of the nation's largest metropolitan areas. Thus, the College reflects the dynamic character of urban life, and, in its concern with urban problems, places great faith in education as the means by which human circumstances can be improved. To this end, the College prepares professional educators who have the commitment and competence to help young people achieve dignity, preserve individuality, develop democratic values, and find self-fulfillment.

As society has been altered by such factors as the development of knowledge, technological advances and population growth, the purposes and processes of education have changed. New technologies of instruction are evolving rapidly and offer the educator many opportunities for developing a high level of competence. Problems generated in our urban society are complex, and those related to education are no exception. Yet, the opportunities for curriculum innovation, experimentation and leadership have never been greater.

Accreditation

The College of Education's teacher certification programs are accredited by the Council for the Accreditation of Educator Preparation (CAEP).

Art Therapy is approved by the American Art Therapy Association (AATA).

Counselor Education is accredited through the Council for Accreditation of Counseling and Related Educational Programs (CACREP) and now includes Rehabilitation Counseling and Community Inclusion, which was formerly accredited through the Council on Rehabilitation Education (CORE). CORE and CACREP have merged.

School and Community Psychology is accredited through the National Association of School Psychologists.

Academic Regulations for the College of Education

For complete information regarding the academic rules and regulations of the University, students should consult the Graduate School (p. 12). The following additions and amendments pertain to the College of Education.

Financial Aid and Scholarships

Over 100 scholarships established by private donors are available through the College of Education. A number of them are targeted toward graduate students, all require a cumulative g.p.a. of at least 3.0, and all are awarded to applicants who demonstrate high academic achievement and leadership potential. Most, though not all, are also based on financial need. Application materials are available on the College of Education's website (<http://coe.wayne.edu/student/scholarship.php>). Review the website for more information and for the specific deadline date.

Normal Program Load

A full-time graduate student load is eight credits per semester in Fall and Winter and is limited without exception to a sixteen credit maximum by the Graduate School. In Spring/Summer full-time is two credits. If a significant portion of a student's time is spent in outside work, corresponding adjustments must be made in the college schedule. A graduate student working full-time who desires to carry more than eight credits must

secure permission from the Assistant Dean for Academic Services, who serves as Graduate Director.

Attendance

Regularity in attendance and performance is necessary for success in college work. Although there are no officially excused absences as defined by College policy, the conscientious student is expected to explain absences to the instructor. Such absences may be due to illness; to participation in inter-college activities, certified by the sponsoring faculty member; or other similar types of absence for which the student can present to the instructor evidence that he/she was engaged in authorized University activities. Each instructor, at the beginning of the course, will announce his/her attendance requirements.

Probation and Withdrawal

If, at any time, a graduate student's scholastic grade point average falls below 3.0, the student is automatically placed on probation. A student on probation must submit a plan of action completed with their advisor to the Graduate Director of the College of Education. The plan of action addresses the necessary steps and timeline for the student to regain good academic standing and identifies the coursework to be repeated or new coursework necessary to achieve good academic standing. The plan of action must be approved by the Graduate Director before registering for subsequent work in the College. The College reserves the right to ask a student to withdraw at any time from specific courses or from the College entirely, if progress does not warrant continuance.

Readmission

Graduate students who have received a master's degree from Wayne State University and have not registered since the degree was conferred, and who desire to pursue further non-degree graduate work must complete a Returning Student Update Record form (<http://reg.wayne.edu/students/forms.php>).

Educator Criminal History Review

PUBLIC ACT 68 of 1993 Sec. 1230: This act requires public and non-public schools to conduct a criminal history check of new teachers, school administrators, school psychologists and other personnel required to hold State Board of Education approvals. Criminal history checks may be required at various stages from admission to certification/graduation in some programs. A Judgment of Sentence for any conviction must be on file with any student's application for the College of Education to recommend that student for certification to the Michigan Department of Education. This document may be obtained from the court where the matter was adjudicated. In addition, a narrative describing the circumstances surrounding the conviction or action from the student's perspective must be on file. The State Board of Education may refuse to grant a certificate or approval to an applicant pursuant to the following State Board of Education Teacher Certificate Code:

State Board of Education Teacher Certificate Code: R 390.1201
Certificates; denial, suspension, or revocation.

1. The superintendent of public instruction may refuse to grant or renew, or may suspend for a fixed term, or revoke, or may impose reasonable conditions on, a teaching certificate or state board approval granted pursuant to these rules for the following reasons:
 - a. Fraud, or material misrepresentation, concealment or omission of fact in the application for, or the use of, a teaching certificate or state board approval.

b. Conviction of an offense listed in MCL 380.1535a or MCL 380.1539b.

2. The superintendent of public instruction may refuse to grant or renew a teaching certificate or a state board approval for failure or ineligibility of the applicant to meet the criteria for the applicable certification or state board approval.

Additional criminal history checks may be required at the discretion of the College. A criminal history check is completed for a fee paid by the student.

Graduation

Applications for graduate degrees, graduate certificates and the Education Specialist Certificate must be made not later than the fourth week of classes for the semester in which degree or certificate requirements are to be completed. Graduation deadline dates for the semester in which candidates are completing doctoral (Ed.D. and Ph.D.) degree requirements are established and posted online (<https://gradschool.wayne.edu/phd/deadlines-requirements>) by the Graduate School.

Information concerning commencement announcements, caps and gowns, invitations, tickets, time and place, and other relevant information is posted by the Commencement Office (<http://commencement.wayne.edu>). Candidates for doctoral degrees are requested and expected to attend the commencement ceremony at which the University confers upon them the degree earned. Graduate Certificate and Education Specialist Certificate students do not participate in the Commencement Ceremony, which is limited to degree-granting programs.

Master's Degrees

Master Degrees in the College of Education

Plan of Work: After consultation with the advisor, the master's applicant prepares a Plan of Work for the program, setting forth the courses that will satisfy the requirements for the degree.

Candidacy: This status is established upon completion by the master's applicant of nine credits toward degree requirements, and after filing an approved Plan of Work with the College Graduate Office, 489 Education Building. The Plan of Work MUST be filed prior to or during the term in which the applicant completes twelve graduate credits toward the degree. Failure to file a Plan of Work will preclude further registration for courses.

Time Limitations: Requirements for all master's degrees must be completed within six years after completion of the first course to be applied toward the degree.

Time Extensions: The advisor and student must complete a Request for a Time Extension form (<http://coe.wayne.edu/student/forms.php>) and set a terminal date for completion of all degree requirements, including such additional requirements as may be indicated by the Graduate Director to revalidate over-age credits (see the Revalidation section below). Time extensions require the approval of the Graduate Director. Time extensions to complete the requirements for a master's degree may not be granted beyond year 10 since admission.

Revalidation: Upon the recommendation of the advisor and approval of the Graduate Director, a master's degree student may revalidate over-age credits which are between six and ten years old, and that represent courses completed at Wayne State University with grades of 'B' or

better. Students are not permitted to revalidate credits earned at other institutions.

Master of Arts Degrees

The Master of Arts degrees offered by the College of Education are administered by the Division of Kinesiology, Health and Sport Studies, and by the Division of Theoretical and Behavioral Foundations. The generic degree requirements and specific requirements associated with individual majors and areas of concentration are described in the respective divisional sections.

Master of Arts in Teaching

The Master of Arts in Teaching degree is administered by the Division of Teacher Education. Both generic degree requirements and specific requirements associated with individual majors and areas of concentration are described in that section.

Master of Education

The Master of Education degree is offered in various curricular areas administered by each of the College's academic divisions:

- Administrative and Organizational Studies
- Kinesiology, Health and Sport Studies
- Teacher Education
- Theoretical and Behavioral Foundations

Specific requirements associated with individual majors and areas of concentration are presented in the respective divisional sections; generic degree requirements applicable to all Divisions are as follows:

Admission

Admission to these programs is contingent upon admission to the Graduate School (p. 19). In addition, applicants must satisfy the following criteria:

For some programs, a teaching certificate is required for admission. Additional prerequisites include a satisfactory background in the area of specialization and the completion of general undergraduate academic requirements appropriate to the degree for which admission is sought. A personal interview in the chosen major may be required.

Application

Application information is available on the Graduate Admissions (<http://gradadmissions.wayne.edu/apply.php.html>) website.

Degree Requirements

The minimum requirement for a Master of Education degree is thirty credits, at least twenty-four of which must be taken at the University. Many programs in the College of Education require more than the minimum, in which case those requirements take precedence. The coursework for the Master of Education degree is divided into three areas: major requirements, general professional core courses, and electives. Major Requirements consist of a minimum of eight credits in the specialization selected by the student in addition to and when required the terminal seminar and thesis, essay, or project. Specific course requirements for the various majors are presented in the respective divisional sections.

The Master of Education is offered with the following options:

- **Plan A** – A minimum of twenty-two credits in coursework, plus eight credits for the terminal seminar and thesis

- **Plan B** – A minimum of twenty-seven credits in coursework, plus three credits for the terminal seminar and essay or project
- **Plan C** – A total of thirty credits, essay/project or thesis not required

General Professional Requirement: Fundamental Areas and Core Courses

Philosophical and theoretical perspectives unite the College of Education in its mission to prepare educators and other professionals as agents of change for an equitable, inclusive, global society that improves the lives of children, adults, families, and community.

This goal is achieved in the Masters of Education by emphasizing the following Fundamental Areas and/or Core Courses in education, performance improvement, health, and human development:

- Philosophical, historical, sociocultural, and political influences;
- Impact of ecological factors on human development, health, and well-being across the lifespan;
- Research, writing, and innovation.

Preparation includes the development of knowledge, skills, and dispositions and thus can be achieved through various means, such as coursework, field experiences, research, and community engagement. Although these fundamental areas provide an overarching umbrella that unites the College, individual Divisions and Programs may articulate these philosophical and theoretical tenets in different ways.

All students in a Masters of Education program must meet the General Professional Requirement through completion of the following Fundamental Areas and/or through completion of Core Courses, which are listed below:

Fundamental Areas

Philosophical, Historical, Sociocultural, and Political Influences include:

- Global/local education as social justice
- Knowledge of history and systems of discipline area and implications
- Issues of power and empowerment
- Perspectives on inclusive society
- Preparation for serving as an agent of change

Ecological Perspectives on Development, Health, and Wellbeing include:

- Psychology of learning across the lifespan
- Knowledge of human development, child/adolescent psychology
- Ecological influences on the quality of life issues

Research, Writing, and Innovation include:

- Methods of evaluation & research
- Critique of research

Core Courses

In addition to the Fundamental Areas above, the General Professional Requirement is met through completion of professional Core Courses. The student must complete three courses from three different areas chosen from those listed below. Courses within a student's major area cannot be used to satisfy this requirement.

Code	Title	Credits
Counseling		
CED 6700	The Role of the Teacher in Guidance	2
Educational Administration		
EDA 7600	The Structure of American Education	2
Educational Psychology		

Select one of the following:		2-3
EDP 5450	Child Psychology	
EDP 5480	Adolescent Psychology	
EDP 7350	The Learning Process	

Evaluation and Research

EER 7610	Evaluation and Measurement	2-3
----------	----------------------------	-----

History and Philosophy of Education

EHP 7600	Philosophy of Education	2-3
----------	-------------------------	-----

Electives are those courses recommended outside the major and general professional sequences. A minimum of six credits is recommended in this area. The purpose of elective courses is to provide breadth to the student's program.

See the individual programs in the following Divisional sections of this bulletin for specific courses required by certain program areas in the major, the general professional sequence, or the elective sections of Plans of Work.

Master of Science Degrees

The Master of Science degrees offered by the College of Education are administered by the Division of Kinesiology, Health and Sport Studies and the Division of Theoretical and Behavioral Foundations. The generic degree requirements and specific requirements associated with individual majors and areas of concentration are described in the respective divisional sections.

Post-Bachelor's Teaching Certificate

This program provides a means of obtaining teacher certification for those who do not intend to pursue the Master of Arts in Teaching. The program incorporates classroom theory with practice, requires a minimum of four semesters to complete and is available at both the elementary and secondary levels. Courses are offered during the day. Admission requires a baccalaureate degree with an appropriate teaching major and minor earned at a regionally accredited institution. Undergraduate course work should reflect a minimal 2.5 g.p.a., submission of an official test score from a nationally normed test (ACT, SAT or GRE) must be on file with Wayne State University*, provide a current criminal background check from a College of Education approved vendor, provide documentation of a current TB test, a verification of group work with children and, for World Language majors/minors and Bilingual/Bicultural Education minors, appropriate language proficiency test results. A complete list of requirements can be found on the College of Education (<http://coe.wayne.edu/admissions/post-bachelor.php>) website.

* Use the following codes to have official scores sent to WSU. (SAT-1898, ACT-2064, GRE-3631).

Education Specialist Certificate

The Education Specialist Certificate program is a thirty credit minimum curriculum beyond the master's degree. It is a self-contained concentration, separate from other existing programs, with a distinct form of recognition at its completion. This is a planned program, not merely recognition for thirty credits of graduate study accrued beyond the master's degree.

The Education Specialist Certificate is offered in various curricular areas administered by the following academic divisions:

- Administrative and Organizational Studies
- Teacher Education
- Theoretical and Behavioral Foundations

Specific requirements associated with individual majors and areas of concentration are presented in the Divisional sections

Admission

Admission to this program is contingent upon admission to the Graduate School (p. 19). Minimum entrance requirements established by the College of Education are:

1. A master's degree from an accredited institution.
2. In general, applicants must present a grade point average of 2.75 or above for upper-division undergraduate work. Applicants with an undergraduate grade point average below 2.75 must have a grade point average of 3.4 or above on their master's degree work.
3. Fulfillment of the special requirements of the area of concentration in which the student wishes to work.
4. All major areas with the exception of administration and supervision, instructional technology and counseling require a minimum of three years of teaching experience or equivalent.

Application

Application information is available on the Graduate Admissions (<http://gradadmissions.wayne.edu/apply.php.html>) website.

Certificate Requirements

The Education Specialist Certificate program requires a minimum of thirty credits beyond the master's degree. The purpose of the Certificate program is to strengthen the liberal education of administrators, counselors, instructional designers and teachers to contribute to more effective productivity of professional workers in and outside the field of education. The specific content of each major is dependent upon the individual student's needs and interests.

Plans of Work are adapted to the professional needs of students and each one is developed by the individual student with the help of his/her advisor. A Plan of Work must be approved by the advisor and filed with the Education Graduate Office, 489 Education Building, before six credits have been completed following acceptance into the program. Failure to file a Plan of Work at the appropriate time may preclude further registration for courses.

Research studies, projects, or field studies may be accepted in partial fulfillment of requirements for the Certificate. Such projects will be in the nature of culminating experiences and arranged with the individual student's advisor.

Time Limitations: Requirements for the Education Specialist Certificate must be completed within six years after admission to the program. Credit earned beyond the master's degree which is over six years old at the time of admission may not be applied toward meeting requirements of the certificate. Credit earned after acceptance as a certificate applicant may not be over six years old at the time the certificate is granted.

Transfer Credit

A maximum of ten-semester credits of graduate post-master's degree work earned at another accredited university, or at Wayne State University *prior* to admission to the Education Specialist program, may be applied to the certificate provided the courses are approved by the advisor and the College Graduate Officer as appropriate to the program plan.

A maximum of six-semester credits of graduate post-master's degree work earned at another accredited university after admission to the Education Specialist program may be transferred and applied to the program provided no prior transfer credit from another university has been included in the program.

Coursework used toward a previously received degree, Graduate certificate, or Education Specialist certificate cannot be used toward the current Education Specialist certificate.

Time Extensions

The advisor and student must complete a Request for a Time Extension form (<http://coe.wayne.edu/student/forms.php>) and set a terminal date for completion of all degree requirements, including such additional requirements as may be indicated by the Graduate Director to revalidate over-age credits (see the Revalidation section below). Time extensions require the approval of the Graduate Director. Time extensions to complete the requirements for a specialist certificate may not be granted beyond year 10 since admission.

Revalidation: Upon the recommendation of the advisor and approval of the Graduate Director, a specialist certificate student may revalidate over-age credits which are between six and ten years old, and that represent courses completed at Wayne State University with grades of 'B' or better. Students are not permitted to revalidate credits earned at other institutions.

Doctoral Degrees

The doctoral programs of the College of Education at Wayne State are designed to afford opportunity for advanced study and research to persons who have demonstrated superior scholarship; leadership in education; promise in the field of research; and potential for professional leadership. Advanced graduate degrees are conferred not merely upon the completion of a prescribed number of courses, nor necessarily after a given period of residence; but, rather, in recognition of outstanding ability and high attainment in course work, examinations, research, scholarly writing, and personal fitness for education as a profession.

The Ed.D. degree is typically more application oriented; the Ph.D. degree more research oriented. Ed.D. study includes development of specialized practitioner skills; application of other educational foundations and techniques to a field; or applied research which primarily addresses localized practitioner problems. Ph.D. study includes theoretical foundations in the field; application of foundational or related disciplines; or research directed toward theory-building.

Doctoral degree programs are administered by the following academic divisions of the College:

- Administrative and Organizational Studies
- Kinesiology, Health and Sport Studies
- Teacher Education
- Theoretical and Behavioral Foundations

Admission to Graduate Programs

Prerequisites

1. An undergraduate grade point average of 'B' or above (3.0 on a 4.0 point scale). Applicants with grade point averages of less than 3.0 for the baccalaureate must present evidence of superior academic achievement in a Masters Degree program (3.5 or above) before being considered for admission.

2. The following program requires a Masters degree from an accredited school: Counseling.

3. Admission to these programs is contingent upon admission to the Graduate School (p. 19). Application information is available on the Graduate Admissions (<http://gradadmissions.wayne.edu/apply.php.html>) website.

Specific admission requirements associated with individual majors and areas of concentration can be found in the respective divisional sections; generic degree requirements applicable to all Divisions are stated below.

Doctor of Education Requirements

Credit Requirements: The minimum credit requirement for the Ed.D. degree is ninety credits in graduate work beyond the baccalaureate degree. All course work must be completed in accordance with the academic procedures of the College of Education (p. 86) and the Graduate School's (p. 35) regulations governing graduate scholarship and degrees.

Residence: At least one full year of course work, i.e., thirty credits of course work beyond the master's degree, must be taken in residence at Wayne State University. This may include work in research techniques, but does not include dissertation research credit.

The Ed.D. program requires the completion of six graduate credits in regular course work in each of two successive semesters after admission as an Ed.D. applicant. The residence requirement must be completed following admission to the Ed.D. program.

All degree requirements must be completed within seven years from the time of admission as a doctoral applicant.

Doctoral Seminars: Students must elect two doctoral seminars from an area outside the field of concentration from the following foundation areas:

- educational administration
- educational psychology
- educational sociology
- history and philosophy of education
- curriculum and instruction

These seminars are open only to doctoral students.

Research Methods: A minimum of eleven credits is required in course work, approved by the College's Doctoral Advisory Committee, aimed at developing competence in statistics and research methodologies. At least six credits of the minimum requirement will consist of a comprehensive course in evaluation and statistics and an advanced course in research methodology and experimental designs. The remaining five credits will include research electives appropriate to the needs of the student, department research seminars, internships in research, or any combination thereof.

Concentrations: A minimum of thirty credits is required in the student's area of concentration. The courses constituting the major will be specified by the department in which the student selects the concentration. Course work in the field of concentration is not restricted to courses offered by the College of Education.

Cognates: A cognate in professional education or in a single field is optional at the discretion of the major advisor. Courses included in the cognate will be selected by the student and advisor in conjunction with the cognate field committee member.

Dissertations: The doctoral student is required to submit a dissertation on a topic satisfactory to the doctoral committee. Twenty credits are required in dissertation research (ED 9989). Prior to candidacy, students may register for up to eight (8) credit hours. The balance of hours are completed after advancement to candidate status. In each semester, registration must be completed prior to Census Day. All 20 semester hours of dissertation research must be registered prior to the Final Public Lecture-Presentation Defense.

Final Public Lecture-Presentation Defense: Students must be registered the semester of the Final Defense. Students that have completed 20 semester hours of dissertation research may register for ED 9995, Candidate Maintenance Status.

Electives may be chosen from the foundations of education, non-dissertation research techniques, or any course work the applicant and advisor consider appropriate to the student's individual program.

A Plan of Work must be filed and approved by the advisor and graduate officer during the semester in which the student is completing eighteen credits of work under advisement. Failure to file a Plan of Work may preclude further registration.

Annual Progress Reports are required and completed at the end of the winter semester (due by April 30). The annual review of student progress is an important cornerstone of quality training of doctoral students. An Annual Review from each year of the program is required when requesting a time extension.

Final written and oral examinations in the major field of concentration are required. Testing in the cognate is optional at the discretion of the major advisor. The exact times of these examinations are determined by the Graduate Officer. Students will register for the examinations with advisor approval. The committee must consist minimally of three graduate faculty members from the major department (faculty from the College of Education), at least two of whom hold a Regular Graduate Faculty Appointment valid through the completion of the Qualifying Examination period. The major advisor must be one of the two members with a valid Regular Graduate Faculty Appointment. When performance on a final examination is unsatisfactory, the student may request a re-examination which must be taken within one year of the date of the examination and after one semester has elapsed since the examination. The second examination shall be considered final.

Selection of Advisor and Dissertation Advisory Committee: Students will be assigned an advisor at the time of admission. The advisor acts as the chairperson of the student's doctoral committee, which will consist of a minimum of three members: the advisor, one member representing the area of the concentration, and one member outside of the concentration area

Two members of the committee, including the advisor, must hold a Regular Graduate Faculty Appointment. The committee must be fully constituted not later than the time the student begins active work on dissertation research or project. The main function of the doctoral committee is to advise the student in research activities and to administer the final defense. The dissertation committee chair assumes the responsibility for overseeing the procedures of the dissertation defense, serving as the advocate for the student and resolving conflicts.

Candidacy is achieved when the dissertation prospectus receives final approval by the Graduate Officer following approval by the Dissertation Advisory Committee through a proposal oral defense and by the Internal Review Board (when applicable).

Time Extensions may be granted to candidates in good standing with demonstrable progress towards completion of the dissertation. The

request for a time extension must be made within six months of the original 7-year completion deadline and the student's dissertation proposal must have been approved prior to making the request. Students who have not completed the Ed.D. requirements within ten years of their application date are required to re-take the Final Qualifying Examination and may need to complete additional coursework to prepare for the examination. The total time for earning the Ed.D., including all time extensions and any required revalidation, is 12 years.

A final oral examination on the dissertation is conducted by the student's doctoral committee under the auspices of the Education Graduate Office. The student must be registered the semester during the Final Public Lecture-Presentation Defense.

Doctor of Philosophy Requirements

The Doctor of Philosophy embraces the same fields of concentration as the Doctor of Education, except that the Ph.D. degree is not available in the areas of Reading, Language and Literature; and Curriculum and Instruction: Bilingual-Bicultural Education, but is available in Educational Psychology and Kinesiology.

Ph.D. programs in the College of Education require a minimum of ninety graduate credits beyond the bachelor's degree, with the exception of the Ph.D. in Educational Psychology. The Educational Psychology Ph.D. requires a minimum of one hundred graduate credits beyond the bachelor's degree. Of the minimum of ninety graduate credits (or one hundred for the Ph.D. in Educational Psychology), a minimum of twenty credits in coursework must be completed in the major field, including at least twenty-four credits of graduate work in Education. Thirty credits in dissertation research are required in the Ph.D. program. The thirty credit dissertation registration requirement is fulfilled by registering for the courses ED 9991, ED 9992, ED 9993, and ED 9994 (Doctoral Dissertation Research and Direction I, II, III, and IV, respectively), in consecutive academic year semesters. The remaining credits will be assigned to research or coursework in accordance with the needs of the students and the requirements in the field of concentration. A minimum of fifteen credits in research technique courses approved by the College's Doctoral Advisory Committee are required. A cognate in a field inside or outside the College of Education is optional at the discretion of the major advisor.

A Plan of Work, qualifying examinations, and a Final Public Lecture Presentation are required. Satisfactory completion of the full-time residency requirement must be certified by the advisor and the College graduate officer. For additional information, Ph.D. applicants should consult Graduate Degree and Certificate Requirements (p.). Also, please consult the College of Education Doctoral Policies and Procedures handbook, available in Room 489, Education Building, for further specific Ph.D. requirements.

Academic Services

Office: 489 Education; 313-577-1601

Assistant Dean: Paul W. Johnson

Pre-Admission Graduate Advising: LaSondra Dawn, Deborah Gibson, Mary Waker, Kevin Williams

Graduate Programs Outreach Specialist: Gloria McDonald

Undergraduate Advising: Fawne Allossery, Shawntae Harris, Cassandra Tackett, Kurt Troutman, Tanesha Watkins

Undergraduate Success Coach: Daniel Lewis III

Undergraduate Recruitment Coordinator: Jeffrey Lisiecki

Marketing & Communications: Donna Carroll, Tracy Walker

<http://coe.wayne.edu/admissions/index.php>

Purposes of the Division

The Division of Academic Services in the College of Education is responsible for Undergraduate Advising, Graduate Admissions, Graduation & Certification, Marketing & Communications, Curriculum: Course & Program Proposals, Course Scheduling & the Bulletin, the Education Scholars Alliance Program, and Graduate Faculty Appointments.

Advising Services

Advising in the College of Education is centralized for undergraduate students in the Division of Academic Services and decentralized for graduate students in the four academic divisions of the college: 1) Administrative and Organization Studies, 2) Kinesiology, Health and Sport Studies, 3) Theoretical and Behavioral Foundations, and 4) Teacher Education. Undergraduate students have professional advisors and graduate students are advised by faculty in the student's program. Every student admitted to the College of Education is assigned an advisor.

Pre-Admission Graduate Advising

Academic Services provides pre-admission advising to students interested in graduate programs. Graduate advisors provide guidance with program selection, the satisfaction of admission requirements and completion of the graduate admission application.

Graduate Student Services

- Degree and certificate audits for graduation.
- Recommendations to the Michigan Department of Education for certification and licensure (see the Certification section below).
- Plans of work for teaching endorsements in the core subject areas.
- Requests for time extensions and monitoring of the university's academic probation system.
- Annual Educator Job Placement Fair for PK-12 careers.

Certification

As a liaison to the Michigan Department of Education, the Division of Academic Services recommends candidates for initial certification as teachers, administrators, and school psychologists; approvals for supervisors and directors of Special Education; and licensure for school counselors. Additionally, the division helps candidates secure endorsements to existing teacher and administrator certificates.

Administrative and Organizational Studies

Office: 341 Education Building; 313-577-1728

Interim Assistant Dean: William Hill

<http://www.coe.wayne.edu/aos>

The Division of Administrative and Organizational Studies has as its primary goal the development and enhancement of leadership and organizational learning. It is within the scope of this division to study emergent trends, technologies and educational innovations; to develop rationales for supporting educational change; to present viable programs of study for advanced students in education which will enable them to function skillfully as educational leaders in facilitating change, and in developing and conducting on-going programs; and to design and implement learning innovations, and the impact of instructional methodologies on the improvement of human and organizational performance. Program areas, Educational Leadership and Policy Studies,

and Learning Design and Technology, are under the guidance of this Division.

Educational Leadership and Policy Studies Programs

In this area the College offers the Master of Education in Educational Leadership, and doctoral degrees with a major in Educational Leadership and Policy Studies, as well as an Educational Specialist Certificate program in Administration and Supervision. The master's degree is a basic, entry-level program in this discipline designed to assist educators in improving their competence in leadership roles in schools and the community. The master's program in Educational Leadership is approved by the Michigan Department of Education and leads to Elementary and Secondary Administrator K-12.

Individuals aspiring to positions such as building administrators, central office administrators, special education directors, higher education administrators, or other educational policy making positions in business, industry or government should undertake study at the specialist and doctoral levels in educational leadership and policy studies. At the specialist level individuals may seek an emphasis in elementary administration, secondary administration, special education administration, or the superintendency. The College offers certification programs in all areas of administration approved by the Michigan State Board of Education. In the doctoral programs individuals may emphasize educational foundations, general educational administration, or special education administration.

The doctoral program in Educational Leadership and Policy Studies is approved by the University Council for Educational Administration (UCEA).

Learning Design and Technology Specialties

Each degree and certificate program in Learning Design and Technology is designed to prepare persons for positions in a variety of organizations and sectors including healthcare, business, education, government, military, and human services agencies. The newest technologies are incorporated into these programs, enabling the graduate to function in the ever-changing roles of this profession including:

- learning designer
- learning & development specialist
- talent development
- instructional designer, developer, or researcher
- advanced technology and e-learning specialist
- media or learning resources consultant or manager
- professor, teacher or curriculum specialist
- faculty developer
- technology coordinator and performance technologist
- trainer
- training manager
- consultant

Students can achieve advanced skills in specialty areas such as:

1. Instructional design and evaluation;
2. Performance improvement, training and organizational development;
3. Interactive technologies design and development;

4. e-learning and distance education;
5. Technology integration in the schools;
6. Instructional media design and production;
7. Research and publication in the field; and
8. Other emerging applications of learning design and technology.

Further information can be found on the Learning Design and Technology (<http://coe.wayne.edu/aos/ldt>) webpage.

- Educational Leadership (M.Ed.) (p. 93)
- Administration and Supervision (Education Specialist Certificate) (p. 92)
- Educational Leadership and Policy Studies (Ph.D.) (p. 94)
- Educational Leadership and Policy Studies (Ed.D.) (p. 94)
- Learning Design and Technology (M.Ed.) (p. 95)
- Learning Design and Technology (Education Specialist Certificate) (p. 95)
- Learning Design and Technology (Ph.D.) (p. 96)
- Online Teaching (Graduate Certificate) (p. 96)
- College and University Teaching (Graduate Certificate) (p. 93)

Administration and Supervision (Education Specialist Certificate)

Admission Requirements

Applicants must have a 2.75 Undergraduate GPA or a 3.40 Graduate GPA in the master's program for regular admission; a master's degree from an accredited institution; submission of official transcripts from the undergraduate and graduate degree institutions; a personal statement to include career/academic goals (500-1000 words); and if applicant is seeking the Special Education Administrator concentration, the following two additional requirements apply:

1. Must have current and valid certification in an area of special education including but not limited to the following: Certified Special Education teacher, School Social Worker, School Psychologist, or Speech & Language Pathologist and
2. a minimum three years of experience in Special Education

Thirty credits are required for this certificate predicated on the admission status of the applicant as cited below under the concentrations A-D. Basic requirements are cited under Education Specialist Certificate (p. 86). Since this program is specifically designed to strengthen the individual background of teachers and administrators, all Plans of Work are developed in consultation with the appropriate advisor.

A. Central Office Administrator Concentration

Applicants with a Master's Degree in Educational Leadership/ Administration (thirty credits):

Code	Title	Credits
EDA 7670	Economic Issues in Education	4
EDA 8620	School Personnel Administration	4
EDA 8630	Supervision	4
EDA 8990	Internship in Administration	3
EPS 9600	Seminar in Research and Theory of Administration	3
ED 7998	Field Studies	3

LDT 8135	Technology Applications in Central Administration	3
Electives		6

B. Elementary and Secondary Administrator Concentration

Applicants with Master's Degree other than in Educational Leadership/ Administration (thirty credits):

Code	Title	Credits
EDA 7625	Leadership, Administration and the Principalship	4
EDA 7660	Administrative Leadership in School-Community Relations and Public Relations	3
EDA 7675	Public School Finance and Budgeting	4
EDA 7690	Introduction to Michigan School Law	4
EDA 8630	Supervision	4
EDA 8650	Staff Development and School Improvement	3
EDA 8990	Internship in Administration	3
ED 7998	Field Studies	3
LDT 6135	Technology Applications in School Administration	2

C. Special Education Administrator

(thirty credits):

Code	Title	Credits
EDA 7660	Administrative Leadership in School-Community Relations and Public Relations	3
EDA 7675	Public School Finance and Budgeting	4
EDA 7800	Administration and Supervision of Special Education	4
EDA 7810	Michigan Special Education Law	4
EDA 7820	Emergent Policies in Special Education Administration	2
EDA 7830	Practicum in Special Education Administration and Supervision	3
EDA 8630	Supervision	4
EDA 8650	Staff Development and School Improvement	3
LDT 8135	Technology Applications in Central Administration	3

D. Charter School Administration (NOT CURRENTLY OFFERED)

(thirty-nine credits):

Code	Title	Credits
EDA 7640	The Elementary School Principalship	4
or EDA 7650	Secondary School Administration	
EDA 7690	Introduction to Michigan School Law	4
EDA 8630	Supervision	4
EDA 8650	Staff Development and School Improvement	2-6
EDA 8990	Internship in Administration	1-8
ED 7998	Field Studies	1-8
LDT 6135	Technology Applications in School Administration	2-3

All course work must be completed in accordance with the academic procedures of the College of Education (p. 86) and the Graduate School's (p. 35) regulations governing graduate scholarship and degrees. All Plans of Work are developed in consultation with the student's assigned advisor.

The Administration and Supervision Education Specialist Certificate is designed to be completed in 3 years.

This program will cost \$32,349.37 for in-state tuition and fees and \$62,249.50 for out-of-state tuition and fees if completed within normal time. There may be additional costs for living expenses. These costs were accurate at the time of posting, but may have changed.

Fewer than 10 students completed this program within normal time. Typical student debt has been withheld to preserve the confidentiality of the students.

This program does not meet any licensure requirements.

For more information about graduation rates, loan repayment rates, and post-enrollment earnings about this institution and other postsecondary institutions please click here: <https://collegescorecard.ed.gov/>.

College and University Teaching (Graduate Certificate)

The Graduate Certificate in College and University Teaching is designed to equip doctoral students with insight, skills and experience to excel as classroom instructors and members of the academic community.

Admission Requirements

Admission to this program is contingent upon admission to the Graduate School (p. 19). This program is open only to recent graduates of and students currently enrolled in a Wayne State University doctoral or terminal master's program and who plan to seek faculty positions upon completing their degree.

A minimum of fifteen credits is required for this certificate including:

Code	Title	Credits
LDT 7310	Learning Management Systems	4
LDT 8500	Strategies for Teaching in Higher Education	3
	Additional courses to meet the minimum number of credit hours, selected with advisor approval	8
Total Credits		15

All course work must be completed in accordance with the academic procedures of the College of Education (p. 86) and the Graduate School's (p. 35) regulations governing graduate scholarship and degrees.

For additional information, please contact: Dr. Timothy Spannaus, Program Director; 313-577-1728, or 313-577-1741.

Educational Leadership (M.Ed.)

Admission Requirements

Applicants must have a 2.75 Undergraduate GPA for regular admission (or a 2.50 Undergraduate GPA for qualified admission); submission of official transcripts from the undergraduate degree institution; and a personal statement to include career/academic goals (500-1000 words).

General requirements for the Master of Education degree may be found at Master of Education (p. 86). This major in educational leadership is offered only as Plan B or C options; specific requirements are as follows:

Code	Title	Credits
Required Courses		
The required thirty credits must include:		
EDA 7625	Leadership, Administration and the Principalship	4

EDA 7660	Administrative Leadership in School-Community Relations and Public Relations	3
EDA 7675	Public School Finance and Budgeting	4
EDA 7690	Introduction to Michigan School Law	4
EDA 8650	Staff Development and School Improvement	3
EDA 8990	Internship in Administration	3
LDT 6135	Technology Applications in School Administration	2
ED 7999	Terminal Master's Seminar and Essay or Project	3
The following two courses are required as part of the six credit General Professional (Core) Area:		
EDP 7350	The Learning Process	2
EER 7610	Evaluation and Measurement	2

All course work must be completed in accordance with the academic procedures of the College of Education (p. 86) and the Graduate School's (p. 35) regulations governing graduate scholarship and degrees.

Educational Leadership and Policy Studies (Ed.D.)

Admission Requirements

Both the Doctor of Education (Ed.D.) program and the Doctor of Philosophy (Ph. D.) program in Educational Leadership and Policy Studies require a master's degree from an accredited institution or 30 graduate semester hours beyond the bachelor's degree from an accredited graduate school with no grade lower than 'B' and a graduate GPA of at least 3.50. In addition, an Autobiographical Statement to include career/academic goals and research interests (1000–1500 words), three recommendations (two professional and one academic), and an interview may be required.

The Doctor of Education (Ed.D.) program in Educational Leadership and Policy Studies (EPS), with provisions for educational leadership, including special administration, is designed for a person to who is planning on working in the field primarily as a practitioner; interested in educational research in settings such as a school district or educational institution; interested in developing continued leadership in education; and policy-making roles.

The general requirements for the degrees are stated in the College's [Academic Regulations](#). In addition, all students must complete at least fifteen-credit sequence in the major. Specific requirements for the major are determined in the consultation with the assigned advisor. A minimum six credits are required in doctoral seminars for non-majors.

All coursework must be completed in accordance with the academic procedures of the College of Education (p. 86) and the Graduate School's (p. 35) regulations governing graduate scholarship and degrees.

Research Techniques: A minimum of 11 semester hours in research techniques are required from the following:

EPS 8180 (4 crs.) Research Seminar (**required**)

EER 7630 (3 crs.) Fundamentals of Statistics

EER 7640 (3 crs.) Fundamentals of Quantitative Research

EER 7650 (3 crs.) Computer Use in Research.

EER 7870 (3 crs.) Fundamentals of Qualitative Research

EER 8800 (3 crs.) Variance and Covariance Analysis

All coursework must be completed in accordance with the academic procedures of the [College of Education](#) and the [Graduate School's](#) regulations governing graduate scholarship and degrees.

Educational Leadership and Policy Studies (Ph.D.)

Admission Requirements

Both the Doctor of Education (Ed.D.) program and the Doctor of Philosophy (Ph.D) program in Educational Leadership and Policy Studies require a master's degree from an accredited institution or 30 graduate semester hours beyond the bachelor's degree from an accredited graduate school with no grade lower than 'B' and a graduate GPA of at least 3.50. In addition, an Autobiographical Statement to include career/academic goals and research interests (1000–1500 words), three recommendations (two professional and one academic), and an interview may be required.

The Doctor of Philosophy (Ph.D.) program in Educational Leadership and Policy Studies (EPS), with provisions for educational leadership, including special education administration, is designed for a person who is anticipating an academic career or in an area of practice which demands theoretical research expertise; who is interested in theory and conceptual analysis; and is interested in research which has potential for advancing education theory and practice.

The general requirements for the degrees are stated under Doctoral Degrees (p. 89). In addition, all students must complete at least a fifteen-credit sequence in the major. Specific requirements for the major are determined in consultation with the assigned advisor. A minimum six credits is required in doctoral seminars for non-majors.

Research Techniques: At least 15 semester hours in research techniques are required from the following:

EPS 8180 (4 crs.) Research Seminar (required)

EER 7630 (3 crs.) Fundamentals of Statistics

EER 7640 (3 crs.) Fundamentals of Quantitative Research

EER 7650 (3 crs.) Computer Use in Research.

EER 7870 (3 crs.) Fundamentals of Qualitative Research

EER 8820 (3 crs.) Multivariate Analysis

EER 8800 (3 crs.) Variance and Covariance Analysis

All course work must be completed in accordance with the academic procedures of the College of Education (p. 86) and the Graduate School's (p. 35) regulations governing graduate scholarship and degrees.

Learning Design and Technology (Ed.D.)

Admission Requirements

Admission to the Ph.D. and Ed.D. programs in Learning and Design Technology requires completion of the Verbal, Quantitative and Writing sections of the Graduate Record Examination, four academic letters of recommendation, a statement of research interests, and a resume.

The general requirements for these degrees are stated at Doctor of Education Requirements (p. 86).

Core requirements in the major include:

Code	Title	Credits
LDT 7100	Foundations of Instructional Technology	3
LDT 7111	Design Thinking and Knowledge	4
LDT 7150	Evaluation of Learning and Performance	4
LDT 7320	Human Performance Technology	4
LDT 8100	Background, Issues and Trends in Instructional Technology	4
LDT 8110	Advanced Instructional Design Theory and Research	4
Total Credits		23

In addition, Ed.D. students are required to complete twenty-four credits in LDT professional focus area. Students with a K-12 Technology Integration focus must take a minimum of six credits in Foundations of Education (Doctoral Seminars). Two courses are to be selected from:

Code	Title	Credits
EHP 9600	Doctoral Seminar in Philosophy of Education	3
EDP 9310	Doctoral Seminar in Educational Psychology	3
EDS 9620	Doctoral Seminar in Educational Sociology	3
TED 9130	Doctoral Seminar in Curriculum and Instruction	3
EDA 9790	Doctoral Seminar in Educational Administration	3

Eighteen credits in research courses are required in this program for both Ph.D. and Ed.D. students.

Additional coursework is required in a cognate area and in dissertation research requirements.

A minimum of ninety credits are required for a doctoral degree in Learning Design and Technology. All doctoral committees must include a minimum of two faculty members from Learning Design and Technology; three LDT faculty members are preferred for Ph.D. students. All Plans of Work are developed in consultation with the student's assigned advisor.

Learning Design and Technology (Education Specialist Certificate)

Admission Requirements

Three academic recommendations and a resume are required. Related work experience is expected of students who have no previous coursework in Learning Design and Technology.

A minimum of thirty-one credits is required for this certificate. The Plan of Work for the Education Specialist Certificate in Learning Design and Technology is highly individualized. Basic certificate requirements may be found at Education Specialist Certificate (p. 88). Courses required are LDT 8100 and LDT 8110. Students who do not have a previous degree in LDT will normally include additional courses from the M.Ed. plan of work (see above). The remainder of the plan of work is created by the student with the advice and approval of the advisor. The plan of work must present a coherent academic program with a clear area of focus.

The Learning Design and Technology Education Specialist Certificate is designed to be completed in 2 years.

This program will cost \$25,737.42 for in-state tuition and fees and \$49,504.19 for out-of-state tuition and fees if completed within normal time. There may be additional costs for living expenses. These costs were accurate at the time of posting, but may have changed.

Fewer than 10 students completed this program within normal time. Typical student debt has been withheld to preserve the confidentiality of the students.

This program does not meet any licensure requirements.

For more information about graduation rates, loan repayment rates, and post-enrollment earnings about this institution and other postsecondary institutions please click here: <https://collegescorecard.ed.gov/>.

Learning Design and Technology (M.Ed.)

Admission Requirements

The Graduate Record Examination may be required for those students with undergraduate grade point averages between 2.50 and 2.80. Contact the program area for further information.

There are two program emphases at the Master's level:

1. Design and Performance Systems
2. Learning Technologies

Each emphasis is directed toward different career opportunities. General requirements may be found under the Master of Education (p. 86) section. This degree is offered only as a Plan C option, as defined under the general requirements section. Courses required for the curricular emphases are:

Emphasis 1: (Concentration in Design and Performance Systems)

Code	Title	Credits
Required Courses		
LDT 7100	Foundations of Instructional Technology	
LDT 7111	Design Thinking and Knowledge	
LDT 7140	Interactive Course Design	
LDT 7150	Evaluation of Learning and Performance	
LDT 7850	Needs Assessment and Analysis	
LDT 7940	Capstone Course in Learning Design and Technology	
Electives		
Select eight credits of the following:		8
LDT 7115	Understanding the Adult Learner	
LDT 7140	Interactive Course Design	
LDT 7180	Message Design for Learning	
LDT 7210	Foundations of Distance Education	
LDT 7220	Multimedia for Instruction	
LDT 7230	Advanced Multimedia for Instruction	
LDT 7310	Learning Management Systems	
LDT 7320	Human Performance Technology	
LDT 8120	Practicum in Instructional Technology	
LDT 8320	Performance Consulting and Analysis	
Total Credits		8

Emphasis 2

Code	Title	Credits
Required Courses		
LDT 7100	Foundations of Instructional Technology	
LDT 7111	Design Thinking and Knowledge	

LDT 7150	Evaluation of Learning and Performance	
LDT 7940	Capstone Course in Learning Design and Technology	
Other credits		
Select 4 from the following:		17
LDT 5140	Producing and Evaluating Technology-Based Instructional Materials	
LDT 6140	Designing Web Tools for the Classroom	
LDT 6230	Internet in the Classroom	
LDT 7105	Micro Analysis Methods	
LDT 7130	Facilitation of On-Line Learning	
LDT 7140	Interactive Course Design	
LDT 7180	Message Design for Learning	
LDT 7210	Foundations of Distance Education	
LDT 7220	Multimedia for Instruction	
LDT 7310	Learning Management Systems	
LDT 7850	Needs Assessment and Analysis	
Total Credits		17

Requirements for the credits in General Professional Core (p. 86) courses vary in terms of the program emphasis. All coursework must be completed in accordance with the academic procedures of the College of Education (p. 86) and the Graduate School's (p. 35) regulations governing graduate scholarship and degrees.

Online Programs: Each of the two Learning Design and Technology M.Ed. program emphases are offered online. For further information on the online programs please consult the College of Education (<http://coe.wayne.edu/aos>) website. All Plans of Work are developed in consultation with the student's assigned advisor.

Learning Design and Technology (Ph.D.)

Admission Requirements

Admission to the Ph.D. program in Learning and Design Technology requires completion of the Verbal, Quantitative and Writing sections of the Graduate Record Examination, four academic letters of recommendation, a statement of research interests, and a resume.

The general requirements for these degrees are stated at Doctor Degrees (p. 89).

Core requirements in the major include:

Code	Title	Credits
LDT 7100	Foundations of Instructional Technology	3
LDT 7111	Design Thinking and Knowledge	4
LDT 7150	Evaluation of Learning and Performance	4
LDT 7320	Human Performance Technology	4
LDT 8100	Background, Issues and Trends in Instructional Technology	4
LDT 8110	Advanced Instructional Design Theory and Research	4
Total Credits		23

In addition, Ph.D. students are required to complete sixteen credits in LDT professional focus areas.

Students with a K-12 Technology Integration focus must take a minimum of six credits in Foundations of Education (Doctoral Seminars). Two courses are to be selected from:

Code	Title	Credits
EHP 9600	Doctoral Seminar in Philosophy of Education	3
EDP 9310	Doctoral Seminar in Educational Psychology	3
EDS 9620	Doctoral Seminar in Educational Sociology	3
TED 9130	Doctoral Seminar in Curriculum and Instruction	3
EDA 9790	Doctoral Seminar in Educational Administration	3

Eighteen credits in research courses are required in this program for both Ph.D. and Ed.D. students.

Ph.D students are to elect:

Code	Title	Credits
EER 7640	Fundamentals of Quantitative Research	3
EER 7870	Qualitative Research I: Introduction	3
Select one of the following:		3-4
EER 7880	Fundamentals of Ethnographic Research	3
EER 8700	Advanced Qualitative Evaluation: Theory and Practice	4
EER 8800	Variance and Covariance Analysis	4
LDT 9105	Conducting Research in Learning Design and Technology	4
LDT 9110	Advanced Research Seminar and Practicum	4

A minimum of ninety credits are required for a doctoral degree in Learning Design and Technology. All doctoral committees must include a minimum of two faculty members from Learning Design and Technology; three LDT faculty members are preferred for Ph.D. students. All Plans of Work are developed in consultation with the student's assigned advisor.

Online Teaching (Graduate Certificate)

The Graduate Certificate Program in Online Teaching is designed to prepare students for teaching positions in online or other distance education settings in both the K-12 and higher education environments. The certificate provides students with essential knowledge and skills in pedagogy, course development, evaluation, instruction, and other aspects of the educational process in online learning environments.

Admission Requirements

Admission to these programs is contingent upon admission to the Graduate School (p. 19).

A minimum of eighteen credits is required for this certificate:

Code	Title	Credits
LDT 7130	Facilitation of On-Line Learning	4
LDT 7210	Foundations of Distance Education	4
LDT 8120	Practicum in Instructional Technology	2
Select two from the following courses:		
LDT 6140	Designing Web Tools for the Classroom	4
LDT 6230	Internet in the Classroom	4
LDT 7140	Interactive Course Design	4
LDT 7220	Multimedia for Instruction	4

LDT 7230	Advanced Multimedia for Instruction	4
LDT 7310	Learning Management Systems	4

All coursework must be completed in accordance with the academic procedures of the College of Education (p. 86) and the Graduate School's (p. 35) regulations governing graduate scholarship and degrees.

For additional information, please contact: Dr. Ke Zhang, Program Director; 313-577-1728, or 313-577-1679.

The Online Teaching Graduate Certificate is designed to be completed in 1 year.

This program will cost \$10,382.38 for in-state tuition and fees and \$19,582.42 for out-of-state tuition and fees if completed within normal time. There may be additional costs for living expenses. These costs were accurate at the time of posting, but may have changed.

Fewer than 10 students completed this program within normal time. Typical student debt has been withheld to preserve the confidentiality of the students.

This program does not meet any licensure requirements.

For more information about graduation rates, loan repayment rates, and post-enrollment earnings about this institution and other postsecondary institutions please click here: <https://collegescorecard.ed.gov/>.

Kinesiology, Health and Sport Studies

Office: 2152 Faculty Administration Building; 313-577-4249
Assistant Dean: Nate McCaughtry
<http://coe.wayne.edu/kinesiology/>

Health and kinesiology, as integral parts of a general education, focus attention upon the vital needs of the human being to acquire attitudes, knowledge and skills necessary for regular participation in healthful living and physical and leisure-time activities. Accordingly, the Division provides courses of instruction both to promote physical well being through athletic and exercise programs, and to prepare teachers and practitioners to promote such health in others. The decreased demands for physical vigor, as well as the increased tensions caused by the technological progress of the modern society, demand a scientific approach to these vital phases of well-being.

The Division of Kinesiology, Health and Sport Studies (KHS) provides courses of instruction in athletic training, health and physical education pedagogy, community health, exercise and sport science and sports administration for the general student body. In addition, it provides professional curricula at the undergraduate and graduate levels for those students seeking careers in these areas. For students interested in advanced study and research the Division offers a doctoral program in Kinesiology: concentrations (Exercise and Sport Science, Community Health and Health and Physical Education Pedagogy).

Advisors: Each student admitted to the College at the graduate level and seeking a degree is assigned to a faculty member who acts as the advisor. The advisor guides the student in the selection of courses and counsels the student in solving academic problems.

Assistantships, Scholarships and Financial Aid

A number of assistantships are available in the area of kinesiology. Applications should be made to the Office of the Assistant Dean, 2177 FAB. Scholarships, loans, work-study, and other types of financial aid are

available through Wayne State University; contact the University Office of Financial Aid; 313-577-3378.

Scholarships are also available in the College of Education; contact Julie Osburn, Chair of the College of Education Scholarship Committee; julie.osburn@wayne.edu or 313-577-0909.

Admission to Master's Programs

Current and prospective students should always review the KHS webpage (<http://coe.wayne.edu/kinesiology>), for the most current information regarding admission and degree requirements.

Admission to graduate programs in the Division of Kinesiology, Health and Sport Studies is contingent upon admission to the Graduate School (p. 19). In addition, applicants to any program in the Division must meet the following criteria, as applicable:

Regular Admission: Applicants must have an undergraduate grade point average of 3.0 or above, and an undergraduate degree directly relating to the field of specialization being applied for, or an undergraduate degree accompanied by an extensive educational background in a closely-related field.

Qualified Admission: Applicants whose undergraduate grade point average is between 2.5 and 2.9, and who otherwise meet the criteria for regular admission, will be admitted on this basis but will be required to successfully complete additional coursework and/or other requirements as stipulated by the Division Graduate Officer.

Non-Degree Admission (Pre- or Post-Master's): Applicants must have an undergraduate grade point average of 2.5 or above, and an undergraduate degree in any field. Non-degree applicants must include a personal statement with their initial graduate application, specifying their intent to apply to a Kinesiology, Health and Sport Studies degree program prior to the earning of nine credit hours. Only one semester of full-time graduate study, part-time registrations not to exceed nine credits, are normally permitted in this classification. Based on the approval of the College of Education Graduate Officer, no more than nine credits taken in graduate non-degree admission status may later be applied to graduate degree program requirements.

Post-Bachelor Admission: Applicants must have an undergraduate grade point average of 2.25 or above, and an undergraduate degree in any field. Post-Bachelor status allows students to elect courses through the 6000 level, for undergraduate credit only.

Special Admission (Non-Degree or Post-Bachelor): Upon the recommendation of an advisor and the Division Graduate Officer, an applicant whose undergraduate grade point average is below 2.25 may be admitted on Non-Degree or Post-Bachelor status, if the applicant demonstrates substantial evidence of meritorious academic achievement subsequent to the conferral of his/her undergraduate degree.

Senior Rule Admission: In their last undergraduate semester, Wayne State students with a 3.0 (or above) upper division grade point average have the option of taking a limited number of graduate credits. Graduate credit is awarded only for those courses taken in excess of baccalaureate degree requirements. Undergraduate and graduate courses combined may not exceed sixteen credits for the final semester of baccalaureate degree work. A Senior Rule student must register for at least one credit which is required for the undergraduate degree in order to be eligible for this status. Students who have completed all required registrations for the baccalaureate may not obtain Senior Rule status. Completion of the *Application for Graduate Admission* form is required, and students are advised to consult their advisors and the Office of University Admissions. Application deadlines for Senior Rule admission are the same as for regular graduate admission. Students who qualify and are recommended

by the department or college will be admitted for one semester. Graduate admission will be regularized upon evidence that the student has completed all requirements for the bachelor's degree; it is the student's responsibility to provide this transcript.

As a courtesy, the University permits a student to pay undergraduate fees for the graduate courses elected in a Senior Rule status. It is recommended that students elect only courses numbered 5000-6999 in their Senior Rule semester.

- Athletic Training (M.S.) (p. 98)
- Health Education (M.Ed.) (p. 99)
- Kinesiology (M.Ed.) (p. 100)
 - Exercise and Sport Science Concentration (M.Ed.) (p.)
 - Physical Education - Physical Activity Leadership Concentration (M.Ed.) (p.)
- Sports Administration (M.A.) (p. 101)
- Adapted Physical Education (Teaching Endorsement) (p. 98)
- Kinesiology (Ph.D.) (p. 101)

Adapted Physical Education (Teaching Endorsement)

This program leads to a state teaching endorsement as a "teacher of students requiring adapted physical education" (SP endorsement). The requirements for the Adapted Physical Education endorsement can be completed as part of a graduate program leading to a Master of Education (M.Ed) with a Major in Kinesiology (Physical Education Pedagogy).

Admission Requirements

Admission to this program is contingent upon admission to the Graduate School (p. 19) and the Division (p. 97). Additionally, applicants must possess a valid Michigan teaching certificate in physical education or any area of special education.

Code	Title	Credits
Endorsement Requirements		
KIN 5400	Adapted Physical Activity	3
KIN 5410	Methods and Materials: Adapted Aquatics	3
KIN 5420	Disability and Sports	3
KIN 5425	Assessment and Service Delivery in Adapted Physical Education	3
KIN 5430	Leadership Training and Practicum in Adapted Physical Education	3
SED 5080	Supportive Environments, Engaged Learning	2
SED 5000	History, Philosophy, and Ethics of Teaching Students with Disabilities	2
SED 5260	Effective Instructional Strategies for Exceptional Learners	3
Total Credits		22

Athletic Training (M.S.)

The Master of Science in Athletic Training is a graduate level professional program for students interested in becoming an Athletic Trainer (AT). Athletic Trainers (ATs) are healthcare professionals who render service or treatment, under the direction of or in collaboration with a physician, in accordance with their education and training and the states' statutes, rules and regulations. As a part of the healthcare team, services provided by ATs include: injury and illness prevention and

wellness promotion; emergent care, examination and clinical diagnosis; therapeutic intervention and rehabilitation of injuries and medical conditions. Students who complete the program become eligible for national certification and state licensure by successfully completing the Board of Certification, Inc. examination.

Admission Requirements

Admission to this program is contingent upon admission to the Graduate School (p. 19) and the Division of Kinesiology, Health and Sport Studies (p. 86). Additionally, applicants must satisfy the following criteria:

- An earned bachelor's degree from an accredited institution of higher education with a minimum cumulative g.p.a. of 3.0 on a 4.0
- Statement of professional goals
- Three professional references, with at least one from a licensed and certified AT.
- Documented observation of an AT in the professional setting for a minimum of 30 hours
- Proof of current Emergency Cardiac Care (CPR/AED) Certification and/ or Basic Life Support (BLS)
- Proof of Immunizations
- Completion of the Technical Standards Agreement
- A personal interview
- Grade of C or better in the following courses:
 - Anatomy and Physiology (6 credits)
 - Exercise Physiology (3 credits)
 - Research/Statistical Methods (3 credits)
 - Physics (3 credits)
 - Chemistry (3 credits)
 - Biology (3 credits)
 - Psychology (3 credits)
 - Nutrition (3 credits)
 - Biomechanics (3 credits)

The course of study will be a 24-month program beginning during the summer semester. Students will complete a total of four semesters and two summer sessions, integrating a competency-based approach in both the classroom and clinical settings. Students are required to complete each semester sequentially, with full-time enrollment.

Degree Requirements

First Year		Credits
Spring/Summer Semester		
ATR 5110	Pathophysiology of Sports Injuries	3
ATR 5115	Acute Care of Athletic Injuries	3
ATR 5149	Pre-Season Integrative Experience I	1
		Credits
		7
Fall Semester

Health Education (M.Ed.)

Health Education is a professional field that is expanding rapidly, primarily because of recent Federal legislation that has emphasized health promotion and disease prevention as major priorities of national health and social policy. The goal of health education is to facilitate voluntary health-related behavioral and social change through application of the principles of the behavioral and social sciences. As such, health education is concerned with helping individuals and groups to assume responsibility for their health by learning and adopting behaviors, and by supporting social policies that can promote and maintain health. To this end, those earning a Master of Education with a major in health education

develop competencies in: assessing individual and group needs for health education; planning, implementing, and evaluating effective health education programs; coordinating provisions for health education; acting as resource persons in health education; and communicating health and health education needs, concerns and resources. Successful completion of the degree program prepares students to become Certified Health Education Specialists (CHES).

There are two different programs for this degree:

- M.Ed in Health Education for those pursuing employment with health departments, hospitals, businesses, and other community agencies.
- M.Ed in Health Education with a teaching endorsement in Health, grades 6-12

M.Ed. In Health Education

The Master of Education with a major in health education degree is offered under the following plans:

- **Plan A:** Thirty-six credits including an eight-credit thesis
- **Plan B:** Thirty credits including a three-credit project
- **Plan C:** Thirty credits (neither thesis or project required)

Requirements for this degree include: general professional education courses; specialization courses and elective courses. Professional education courses and electives should be chosen in consultation with an advisor. A minimum g.p.a. of 3.0 is required for graduation. All coursework must be completed in accordance with the academic procedures of the College of Education (p. 86) and the Graduate School's (p. 35) regulations governing graduate scholarship and degrees.

Code	Title	Credits
General Professional Courses		
EER 7630	Fundamentals of Statistics	3
HE 7310	Psychology of Learning Across Development	3
Required Specialization Courses		
HE 6350	Health Education and the Nation's Health	3
HE 6420	Introduction to Health Education Program Design	3
HE 6530	Principles and Practice of Health Education and Health Promotion	3
HE 6501	Measurement and Evaluation in Community Health Education	3
HE 6550	Teaching Methods and Techniques in Health Education	3
HE 5522	Health Psychology	3
KHS 8540	Theories of Health Behavior	3
Select one of the following:		3-8
KHS 7999	Master's Essay and Project Direction	
KHS 8999	Master's Thesis Direction	
KHS 8750	Internship in Kinesiology, Health and Sport Studies	
Total Credits		30-35

M.Ed. With Teaching Endorsement

Teachers who possess a current Michigan teaching certificate may earn a health teaching endorsement by selecting this option.

The professional preparation in Health Education leading to a Master of Education degree with a teaching endorsement in Health grades 6-12 requires a minimum of thirty credits and is divided into two general areas of study: specialization courses (twenty-four credits) and general professional courses (six credits) as outlined below. This option for the

MED in Health Education is offered as a Plan C option for which neither an essay/project or thesis is required.

Code	Title	Credits
Pre-Requisite Courses		
LFA 2330	First Aid and CPR	3
HE 4340	Family and Reproductive Health (or equivalent)	3
Required Health Education Courses		
HE 5220	Health Behavior Change	3
HE 5440	Mental Health and Substance Abuse	3
HE 5620	Performance Based Assessment in Health Education	3
HE 6350	Health Education and the Nation's Health	3
HE 6500	Comprehensive School Health Education	3
HE 6550	Teaching Methods and Techniques in Health Education	3
Select one of the following:		1-3
KHS 6540	Workshop in Kinesiology, Health and Sport Studies	
KHS 7990	Special Problems in KHS (Max. 9)	
RLL 6802	Assessment and Differentiated Instruction for Diverse Learners: 6-12	
HE 5522	Health Psychology	3
General Professional Courses		
Select three of the following:		6
CEG 6700	The Role of the Teacher in Guidance	
EDP 5480	Adolescent Psychology	
EDP 7350	The Learning Process	
EER 7630	Fundamentals of Statistics	
EHP 7600	Philosophy of Education	
Total Credits		34-36

Kinesiology (M.Ed.)

The Master of Education with a Major in Kinesiology is offered under two concentrations:

- Exercise and Sport Science
- Physical Education and Physical Activity Leadership (PE-PAL)

Completion of this degree requires satisfaction of one of these specializations as outlined below.

Admission Requirements

Admission to this program is contingent upon admission to the Graduate School (p. 19) and the Division of Kinesiology, Health and Sport Studies (p. 86).

This Master of Education with a major in Kinesiology degree is offered under the following options:

- **Plan A:** A minimum of thirty credits including an eight credit thesis
- **Plan B:** A minimum of thirty credits including a three-credit project
- **Plan C:** A minimum of thirty credits including an internship (variable credit option)

Exercise and Sport Science (M.Ed.)

This graduate degree in kinesiology with an exercise and sport science concentration is designed to prepare students on the knowledge and skill in sport and fitness activities, psychology of exercise and sport, apply knowledge about human movement systems to fitness/wellness, and

analyze and evaluate human performance of individuals in various age groups and at differing fitness levels.

Degree Requirements

Thirty credits are required and plan of work is tailored based on the student's career goal.

Code	Title	Credits
Required Courses		
KIN 5523	Physical Activity and Exercise Psychology	3
KIN 6210	Physical Activity and Cognition	3
KIN 6310	Advanced Exercise Physiology	3
KIN 6320	Fitness Assessment and Exercise Prescription	3
KIN 7580	Biomechanical Analysis of Motor Activity	3
KIN 8530	Motor Learning	3
Culminating Experience		
Select one of the following:		3-8
KHS 7999	Master's Essay and Project Direction	
KHS 8999	Master's Thesis Direction	
KHS 8750	Internship in Kinesiology, Health and Sport Studies	
Elective Courses		
Select courses as approved by advisor to complete the thirty credits required for graduation		9
Total Credits		30-35

Physical Education and Physical Activity Leadership (PE-PAL) Pedagogy (M.Ed.)

This specialization is designed to prepare students for academic or professional careers in teaching physical education or physical activity leadership. It involves the study of concepts related to conducting physical activity programs, with an emphasis on those relating to school-based, community-based and sport-based contexts. This degree is intended to enable teachers certified in physical education to continue their studies in physical education pedagogy (including adapted physical education), and for teachers certified in other areas of education to obtain certification in physical education while simultaneously obtaining their graduate degree. As such, candidates for the program must hold a current Michigan teacher certification (but not necessarily in physical education).

Degree Requirements

This Master of Education degree requires a minimum of thirty credit including major requirement/elective courses (minimum of twenty-four credits) and general professional courses (minimum of six credits). All courses are selected at the discretion and with the guidance of an advisor. A minimum g.p.a. of 3.0 is required for graduation. All coursework must be completed in accordance with the academic procedures of the College of Education (p. 86) and the Graduate School's (p. 35) regulations governing graduate scholarship and degrees.

Code	Title	Credits
General Professional Courses		
Select six credits of the following:		6
CEG 6700	The Role of the Teacher in Guidance	
EDP 5450	Child Psychology	
EDP 5480	Adolescent Psychology	
EDP 7350	The Learning Process	
EER 7630	Fundamentals of Statistics	
EER 7870	Qualitative Research I: Introduction	

EHP 7600	Philosophy of Education	
SED 5000	History, Philosophy, and Ethics of Teaching Students with Disabilities	
SED 5080	Supportive Environments, Engaged Learning	
Major Requirement/Elective Courses		
Select 24 credits of the following (Sample courses to fulfill this requirement might include but are not limited to the following):		24
KHS 6540	Workshop in Kinesiology, Health and Sport Studies	
KHS 7990	Special Problems in KHS	
KHS 7999/8999	Master's Essay and Project Direction	
KIN 5110	Motor Learning and Development	
KIN 5210	Movement Education	
KIN 5220	Sports I	
KIN 5240	Fitness Instruction	
KIN 5200	Effective Teaching and Instructional Practices	
KIN 5530	Technology and Assessment in Kinesiology	
KIN 5600	Socio-cultural Issues in Physical Activity	
KIN 8530	Motor Learning	
KIN 5400	Adapted Physical Activity	
KIN 5420	Disability and Sports	
KIN 5425	Assessment and Service Delivery in Adapted Physical Education	
KIN 5430	Leadership Training and Practicum in Adapted Physical Education	
Total Credits		30

Kinesiology (Ph.D.)

The Ph.D. program in Kinesiology will prepare students to become teachers and researchers at academic institutions and other venues requiring Ph.D.-trained professionals. The Exercise and Sport Science concentration offers students unique research opportunities in an urban setting as well as study and research options with other units such as nutrition and food science, physical therapy and the school of medicine. The Physical Education and Physical Activity Leadership (PE-PAL) pedagogy concentration students benefit from a strong faculty research program in physical education pedagogy and access to other units in the College of Education. These provide students with both a unique and wide range of study.

Admission Requirements

Admission to this program is contingent upon admission to the Graduate School (p. 19) and the Division (p. 97).

The general requirements for this degree are stated in the Doctor of Education Requirements (p. 86). For the Ph.D. program in Kinesiology, the core courses provide a background in the respective concentrations. The statistics/research methods courses provide background in the design of research protocols and subsequent analysis of data. The doctoral seminar courses provide the opportunity to interact with other doctoral students in a setting that promotes the discussion of specific research topics. The cognate/elective courses supplement the knowledge base for the student's research. The dissertation credits allow the students to design and implement a program of original research culminating in a dissertation.

All coursework must be completed in accordance with the academic procedures of the College of Education (p. 86) and the Graduate School's (p. 35) regulations governing graduate scholarship and

degrees. Students may enroll on a full-time or part-time basis but must complete requirements within seven years of admission.

Required Core Courses

Physical Education and Physical Activity Leadership Concentration

Code	Title	Credits
KHS 9600	Doctoral Seminar in Kinesiology, Health and Sport Studies	3
Additional credits of approved Kinesiology courses		12

Exercise and Sport Science Concentration

Code	Title	Credits
KHS 8700	Research in the Psychosocial Aspects of Physical Activity	3
KHS 9600	Doctoral Seminar in Kinesiology, Health and Sport Studies	3
KIN 6310	Advanced Exercise Physiology	3
KIN 7580	Biomechanical Analysis of Motor Activity	3
KIN 8530	Motor Learning	3
Six additional credits of approved Kinesiology courses		6

Requirements for Both Concentrations

Code	Title	Credits
Statistics and research methods courses as approved		15
Doctoral seminar courses as approved		6
Cognate courses: Ten credits in the student's area of interest.		10
Elective courses: Additional courses in student's area of interest to meet the total requirement of ninety credits.		5-8
Dissertation Courses		30

Sports Administration (M.A.)

This online M.A. program is designed to prepare students for a career within the broad spectrum of sports programs, agencies, and related organizations. Students may specialize in one of four areas of concentration: interscholastic athletic administration, intercollegiate athletic administration, commercial sports administration, or professional sports administration. Students may custom-design their curriculum through internships and elective coursework as approved by their advisor.

Admission Requirements

Admission to this program is contingent upon admission to the Graduate School (p. 19) and the Division (p. 97).

This Master of Arts degree is offered as a Plan C option. Plan C requires thirty-four credits in course work including twenty-four credits in required courses, with the remaining credits from courses to be selected in consultation with an advisor. All course work must be completed in accordance with the academic procedures of the College of Education (p. 86) and the Graduate School's (p. 35) regulations governing graduate scholarship and degrees.

Code	Title	Credits
Required Courses		
SAM 6410	Introduction to Sports Administration	3
SAM 6570	Sports Marketing	3
SAM 6660	Risk Management in Physical Education and Sports	3
SAM 6661	Equity and Access in Sport	3

SAM 7540	Concepts of Management in Health, Physical Education and Recreation	3
SAM 7581	Sport Finance	3
SAM 8750	Internship in Sports Administration	1-8
Additional Courses		6
Please select six (6) credits from the following elective courses (additional courses may be selected in consultation with the advisor):		
SAM 5510	Principles of Coaching	3
SAM 6300	Interscholastic Athletic Directing	3
SAM 6310	Collegiate Athletic Administration	3
SAM 6320	Youth Sports and Recreation	3
SAM 6530	Professional Sport Administration	3
SAM 6531	Sports Event Management	3
SAM 6560	Media Design and Communication	3
SAM 6750	Field Work in Sports Administration and Management	1-4
SAM 6640	Legal Issues in Health, Physical Education and Recreation	3

Selected Courses: Additional courses from a list approved by the advisor to complete the minimum of thirty credits required for graduation. A minimum of twenty-four of these thirty credits required for graduation must be earned in courses within the Division of Kinesiology, Health and Sport Studies.

Teacher Education

Graduate Teacher Education

The graduate unit of the Division of Teacher Education emphasizes the development of competence in instruction, the improvement of curriculum at all levels, and the ability to conduct scholarly research. The graduate programs in teacher education are designed to prepare educators and researchers who are:

- effective in schools and other educational settings; knowledgeable in content areas for which they are responsible;
- knowledgeable about growth and development of learners, teaching and learning styles, philosophical purposes of schooling and methodologies of education;
- committed to the continuous improvement of the processes of education;
- responsive to a rapidly-changing technology and cognizant of its implications for education and schooling;
- cognizant of the uniqueness of urban and metropolitan areas;
- cognizant of the values and contributions of various racial, ethnic, gender, sexual, national, ability and linguistic groups;
- capable of promoting an understanding of the dynamics of cultural and linguistic pluralism in our society;
- able to promote collaboration between teachers, schools, parents, community and students;
- capable of creative thought and able to stimulate and promote creative thought in their students;
- able to study educational issues through the design and implementation of a research project;
- able to identify and use the results of educational research;
- able to reflect on and develop their own patterns of ethical behavior;

- able to serve educational institutions in local, national and international settings.

The Division offers degree programs for a wide range of advanced professional roles:

1. supervisory and resource teachers, coordinators, consultants, and curriculum specialists;
 2. teachers and consultants in parent education in school and non-school settings;
 3. college and university teachers and researchers in the field of education.
- Educational Studies (Ph.D.) (p. 107)
 - Curriculum and Instruction (Ph.D.) (p. 106)
 - Secondary Education Major (M.A.T.) (p. 113)
 - Elementary Education Major Leading K-8 Certification (M.A.T.) (p. 108)
 - Physical Education (M.A.T.) (p. 111)
 - Art Education (M.Ed.) (p. 104)
 - English Education (Secondary) (M.Ed.) (p. 111)
 - Reading (M.Ed.) (p. 112)
 - Teaching and Learning (M.Ed.) (p. 115)
 - Bilingual Education (Bridge Graduate Certificate) (p. 105)
 - English as a Second Language (Bridge Graduate Certificate) (p. 111)
 - Elementary Mathematics Specialist: Advanced (Graduate Certificate) (p. 110)
 - Elementary Mathematics Specialist: Introductory (Graduate Certificate) (p. 110)
 - Curriculum and Instruction (Education Specialist Certificate) (p. 106)
 - Reading (Education Specialist Certificate) (p. 112)

Teaching Certificates

Present-day education is characterized by specialization at the secondary and elementary levels, related to both subject-matter fields and the age of school children. The Michigan Certification Code provides for specialization in either the elementary, or secondary school areas by authorizing state certification for teaching on those levels. Thus, a person who has kindergarten through grade eight endorsement is not legally qualified to teach in the secondary schools above grade eight, and a person with grades six through twelve endorsement is not legally qualified to teach below grade six. An exception is made in certain fields such as art, physical education, and music education, where the holder of a provisional certificate is qualified to teach his/her major subject in all grades, and, if indicated by his/her certificate, other subjects in other grades.

The certification code recognizes subject-matter specialization by requiring that the candidate for a teacher's certificate present concentrations of credits called majors and minors. In general, the secondary school teacher must have a major and minor teaching field. The elementary school teacher must have one of the following options:

1. a core subject major or two minors and the Elementary Planned Program or
2. a student-centered program and the Elementary Comprehensive Major.

The Elementary Planned Program/Comprehensive Major is a series of courses designed to support the teaching of all subjects K-5: Health and Physical Education, Language-Arts, Mathematics, Science, Social Studies,

Technology and the Arts. All majors and minors must be in subject-matter fields appropriate to teaching at the level for which certification is to be recommended. Individuals must pass state examinations in their major and minor fields before they begin student teaching.

Certification Requirements

Michigan State Teacher's Certificates are granted by the Michigan State Board of Education upon the recommendation of the College of Education. The Standard Certificate is the initial certificate issued for a five-year period. Renewal of the Standard Certificate adds five years to the certificate's validity and renewals are unlimited. Teachers may advance to a five-year Professional Certificate after completing additional requirements. As with the Standard Certificate, the Professional Certificate has unlimited renewals. Contact a College of Education advisor for additional information. Certificates will indicate in which grades and subjects the holder is eligible to teach. In certain specified nonacademic fields, however, the holder of a teaching certificate is eligible to teach his/her major subject in all grades from the kindergarten through the twelfth. The qualifications which the College requires for recommendation for the certificate are summarized below.

State of Michigan Basic Skills Requirement

Completion of Michigan's Basic Skills Examination for Teacher Candidates: Currently, this requirement is met by scoring a 480 on the SAT Evidence-Based Reading and Writing test (taken March 2016 and thereafter) and a score of 530 on the SAT Math test (taken March 2016 and thereafter). SAT scores must be reported directly to Wayne State University. Make sure to select Wayne State (code 1898) when registering for the test as one of the institutions when you would like official scores sent. When requesting scores be sent to Wayne State after the test please contact SAT customer service at (866) 756-7346. A fee will be assessed for sending scores more than 9 days after the test is completed. Students that completed all or part of the Basic Skills Test, Professional Readiness Examination, ACT and/or Michigan Merit Exam (MME), should see an advisor.

Standard Certificates

Teaching certificates as listed below are granted when all certification requirements have been met, which usually occurs upon the completion of the professional education sequence of the M.A.T. program.

Elementary Standard Certificate—for Kindergarten through Grade Five all subjects, Kindergarten through Grade Eight in a self-contained classroom, and Kindergarten through Eight in subjects corresponding to majors and minors.

1. The candidate must have graduated with a bachelor's degree from an approved or accredited institution.
2. Students seeking elementary certification must meet major/minor requirements according to the curriculum guide see an academic advisor. All Elementary Programs must include the Planned Program/ Comprehensive Major.
3. Completion of a professional education sequence is required.
4. Teaching candidates are required by the Michigan State Department of Education to obtain First Aid and Adult and Child CPR Certification, by a state-approved program, before they can be recommended for a teaching certificate in the State of Michigan. Also, a Criminal Background check no more than six months old is required.

Secondary Standard Certificate—for Grades Six through Twelve

1. The candidate must have graduated with a bachelor's degree from an approved or accredited teacher education institution.

2. In general, the academic background must include a single subject major or a group major in subjects in which the applicant expects to teach that are appropriate to the Secondary level. An additional minor is optional.
3. Career and Technical Education (CTE) Majors in Health Occupations and Trade and Industry must have two majors: An academic major and the CTE major. A minor is not required.
4. Completion of a professional education sequence is required.
5. Teaching candidates are required by the Michigan State Department of Education to obtain First Aid and Adult and Child CPR Certification, by a state-approved program, before they can be recommended for a teaching certificate in the State of Michigan. Also, a Michigan State Police Criminal Background check no more than six months old is required.

Certificate Endorsement

Holders of one level of certificate who wish to add another level (i.e., elementary to secondary or vice versa) must consult an advisor in the Division of Academic Services, 489 Education Building.

Professional Education Certificate

Requirements before July 1, 2018

The Professional Teaching Certificate is valid for up to 5 years and may be applied for any time requirements are met.

Requirements:

1. 3 years of successful teaching since the issue date of the initial Standard Teaching Certificate, within the content areas and grade level of the Standard Teaching Certificate; and
2. 6 semester credit hours of reading methods coursework for elementary teachers and 3 semester credit hours for secondary certified teachers. If you completed your teacher preparation program in Michigan since 1985, you have met this requirement; and
3. 3 semester credit hours of reading diagnostics and remediation, which includes a field experience. This credit can be applied toward the professional learning requirement listed below assuming the credit was earned after the issue date of the most recent certificate or renewal; and
4. Education-related professional learning totaling 150 hours; or An education-related master's or higher degree earned at any time (even if previously utilized to renew the Standard Teaching Certificate) from a regionally accredited college or university.

Requirements after July 1, 2018

In addition to the requirements listed above (1-4), the following applies to teachers advancing to the Professional Certificate after July 2, 2018:

5. Effectiveness ratings in accordance with MCL 380.1531j:
 - a. Consecutive: effective or highly effective ratings on your annual year-end performance evaluations for the 3 consecutive school years immediately preceding your application for a Professional Teaching Certificate; or
 - b. Nonconsecutive: effective or highly effective ratings on your annual year-end performance evaluation for at least 3 nonconsecutive school years prior to applying for the Professional Teaching Certificate, including: An Effective Educator Recommendation form completed by the chief school administrator of the school where you are currently employed.

Reading Requirements for the Professional Certificate

In addition to the above requirements, all candidates for an elementary five-year professional certificate must have completed the six credits in reading instruction in either their undergraduate or postgraduate preparation, three of which must be reading in the content areas.

In addition to the above requirements, all candidates for a secondary five-year professional certificate must have completed in their undergraduate or post-graduate preparation a three-credit course in reading in the content areas.

Bilingual/Bicultural Endorsement

The Bilingual Endorsement certifies a teacher who is qualified to teach classes of bilingual children. Students qualifying for an initial provisional certificate complete a twenty-four credit minor for the endorsement. Students holding existing certificates may add a bilingual endorsement by completing a minimum twenty-credit planned program. Interested students should consult a Bilingual/ESL advisor.

All students in the bilingual-bicultural program must successfully complete the language proficiency examinations in English and the designated language of his/her individual program prior to taking courses for this minor.

English as a Second Language Endorsement

The English as a Second Language (ESL) Endorsement certifies a teacher who is qualified to teach learners with limited English proficiency. Students holding existing certificates may add an ESL endorsement by completing a minimum twenty-credit planned program. Interested students should consult a Bilingual/ESL advisor.

Early Childhood General and Special Education (ZS) Endorsement

The Early Childhood General and Special Education (ZS) endorsement is designed to ensure that teachers working with children from birth to the age of eight years and their families obtain specialty area preparation in early childhood education (ECE) to include working with children with developmental delays or disabilities. Teachers holding an elementary certificate must complete 26-credit hours of course work, lead-teaching experience with two age groups, and pass the Michigan Test for Teacher Certification (MTTC) to obtain the ZS endorsement. The endorsement program consists of a minimum of 26 credits across specified areas beyond the Provisional Certificate requirements and lead-teaching experience in teaching two of the following three age levels:

1. infant-toddlers,
2. preschool,
3. kindergarten to third grade, to include experience with Individual Family Service Plan (IFSP) and/or Individual Education Program (IEP) for young children receiving special education.

The courses may be part of a master's, education specialist, or doctor of education program. Interested students should consult an ECE advisor.

K-12 Reading Endorsement

The K-12 Reading Specialist Endorsement is designed to prepare teachers to provide specialized instruction in reading within classrooms or in special programs at all grade levels in elementary, middle, and secondary schools to work with teachers in classrooms to improve literacy instruction and to supervise school or district level reading programs. Teachers holding an elementary or secondary certificate

must complete a twenty-four credit program and then pass the State K-12 Reading Specialist examination in reading in order to receive this endorsement. The courses may be part of a master's, education specialist, or doctor of education program. Interested students should consult a reading program advisor.

Vocational Endorsement

A vocational endorsement is available for secondary occupational instructional programs in Career and Technical Education (<http://coe.wayne.edu/ted/career/certificates->).

Student Teaching

Application: Each student must make application for student teaching during the appropriate application period. The date a completed application form is submitted to the Office of Clinical Experiences (221 Education Building,) will determine the semester during which student teaching will take place. Student teaching application periods are as follows:

FALL SEMESTER: Applications are due by December 1 of the previous year

WINTER SEMESTER: Applications are due by April 1 of the previous year

Procedures for Student Teaching Application

1. Confer with an advisor to determine eligibility for student teaching.
2. Complete application forms provided by the Office of Clinical Experiences, 221 Education Building, during the application period.

Prerequisites for Student Teaching Placement

1. Full admission to a M.A.T. program must be accomplished before applying for student teaching.
2. A WSU cumulative graduate g.p.a. of at least 3.0
3. Completion of the professional education sequence coursework.
4. Completion of the teaching major and minor(s) as defined by the student's curriculum area in the College of Education.
5. Satisfactory completion of appropriate pre-student teaching courses and appropriate methods courses as outlined by the student's Plan of Work.
6. Satisfactory tuberculosis test within six months before the assignment begins.
7. Passing scores on state examinations: (Professional Readiness Examination and Subject Area Examinations).
8. Criminal background check and fingerprinting if required by the school district.

Art Education (M.Ed.)

This program follows the general admission and degree requirements for the Master of Education (p. 87). Additional tabs enumerate the specific amendments/variations to generic requirements, as well as program options.

Art Education (Visual Art Education) (M.Ed.)

The Master of Education degree with a major in Art Education assists graduates in becoming more effective art teachers and leaders in the field of art education. Emphasis is placed on each student designing a curriculum of graduate studies to fit his or her professional needs.

Admission Requirements

For admission to the program, the applicant must have: a baccalaureate degree from a college or university of recognized standing; a major in art; a teaching certificate; and adequate preparation and ability to pursue graduate study. Entering students should make an appointment with an Art Education graduate advisor for assistance: Room 163, Art Building.

Art Therapy (M.Ed.)

Art therapy is a concentration available in the Master of Education in Art Education degree program. In addition to the admission requirements stated above, students must submit letters of recommendation, an autobiographical statement, and a digital (CD preferred) portfolio. (A teaching certificate is NOT required for this program.) A concentration in Art Therapy is also available as part of the M.A. in Community Counseling in the Division of Theoretical and Behavioral Foundation.

Art Education (Visual Art Education) (M.Ed.)

This program requires thirty credits in course work:

Code	Title	Credits
TED 7000	Introductory Master's Seminar	3
ED 7999	Terminal Master's Seminar and Essay or Project	3
Professional education courses		6
Additional Art Education Courses		18
Total Credits		30

Eighteen of the thirty credits required must be in the art education major. The intent is that the thirty credits will comprise a unified, meaningful curriculum extending each student's ability as an artist, a scholar, and a teacher. All coursework must be completed in accordance with the academic procedures of the College of Education (p. 86) and the Graduate School's (p. 35) regulations governing graduate scholarship and degrees.

Art Therapy (M.Ed.)

This program is offered as a master's Plan B. A minimum of forty-eight credits is required for this concentration:

Code	Title	Credits
Art therapy		24
General professional sequence		6
Psychopathology		3
Research		6
Practicum and internship		9
Total Credits		48

A related essay or project of substantial quality concludes the program. All course work must be completed in accordance with the academic procedures of the College of Education (p. 86) and the Graduate School's (p. 35) regulations governing graduate scholarship and degrees. Interested candidates should contact the Art Education & Art Therapy office for additional information: Room 163, Community Arts Building; telephone: 313-577-1823.

Bilingual Education (Bridge Graduate Certificate)

The Bridge Graduate Certificate in Bilingual Education leads to an endorsement to the Michigan teaching certificate in Bilingual Education.

Students who complete this Bridge Certificate Program as well as the appropriate Michigan Test for Teacher Certification subject area examination will earn the endorsement. As a bridge program this Graduate Certificate allows students to apply all of their course work for the Certificate to the Master of Education degree with a major in Bilingual-Bicultural Education if they decide to pursue that degree after completing the Certificate.

Admission Requirements

Admission to this program is contingent upon admission to the Graduate School (p. 19). Additionally, applicants must possess a valid Michigan teaching certificate and must have successfully completed the American Council on the Teaching of Foreign Languages' (ACTFL's) Oral Proficiency Interview (OPI) and Writing Proficiency Test (WPT) in the (nonEnglish) designated language. Contact an adviser for authorization to take the OPI and WPT. For more information, please review the following website: <http://www.testing.wayne.edu/>

The Bridge Certificate in Bilingual Education requires a minimum of twenty-one credits as listed below. All course work must be completed in accordance with the academic procedures of the College of Education (p. 86) and the Graduate School's (p. 35) regulations governing graduate scholarship and degrees.

Code	Title	Credits
Required Courses		
BBE 5500	Introduction to Bilingual/Bicultural Education	3
BBE 6560	Teaching Methods in Bilingual/Bicultural Education	3
Select one of the following:		3
BBE 6590	Culture and Language in Bilingual/Bicultural Education	
LIN/ENG 5770	Sociolinguistics	
BBE 6600	Internship in Bilingual/Bicultural Teaching	2
BBE 6850	Applied Linguistics: Issues in Bilingual Education	3
or LED 6520	Teaching English as a Second Language/Foreign Language: Methods I	
LED 6555	Integration of Language and Content in Language Teaching	1
LIN/ENG 5730	English Grammar	3
RLL 6700	Second Language Literacy Development: K-12	3
Total Credits		21

The Bilingual Education Bridge Graduate Certificate is designed to be completed in 2 years.

This program will cost \$17,704.71 for in-state tuition and fees and \$33,804.78 for out-of-state tuition and fees if completed within normal time. There may be additional costs for living expenses. These costs were accurate at the time of posting, but may have changed.

Fewer than 10 students completed this program within normal time. Typical student debt has been withheld to preserve the confidentiality of the students.

This program does not meet any licensure requirements.

For more information about graduation rates, loan repayment rates, and post-enrollment earnings about this institution and other postsecondary institutions please click here: <https://collegescorecard.ed.gov/>.

Curriculum and Instruction (Education Specialist Certificate)

The Teacher Education Division offers a number of education specialist programs at the elementary and secondary levels. These certificate programs are designed to strengthen the educational background of teachers, administrators, and other education professionals.

Admission Requirements

Admission to this program is contingent upon admission to the the College of Education (p. 88) and the Graduate School (p. 19).

These certificate programs require thirty credits beyond the master's degree. The individual student's professional needs and interests are taken into account in determining the specific content of his/her program. The typical plan includes course work in the specialized professional area and subject matter areas supportive of a major or minor. All course requirements for the various majors are selected in consultation with an advisor. All course work must be completed in accordance with the academic procedures of the College of Education (p. 86) and the Graduate School's (p. 35) regulations governing graduate scholarship and degrees.

The Curriculum and Instruction Education Specialist Certificate is designed to be completed in 2 years.

This program will cost \$25,027.04 for in-state tuition and fees and \$48,027.14 for out-of-state tuition and fees if completed within normal time. There may be additional costs for living expenses. These costs were accurate at the time of posting, but may have changed.

Fewer than 10 students completed this program within normal time. Typical student debt has been withheld to preserve the confidentiality of the students.

This program does not meet any licensure requirements.

For more information about graduation rates, loan repayment rates, and post-enrollment earnings about this institution and other postsecondary institutions please click here: <https://collegescorecard.ed.gov/>.

Curriculum and Instruction (Ph.D. and Ed.D.)

An admissions moratorium is currently in effect for this program.

The Doctor of Education (Ed.D.) and the Doctor of Philosophy (Ph.D.) programs prepare professional educators and researchers for positions in institutions of higher learning, educational research centers, state and national education agencies, and intermediate and local school districts. Advanced programs are designed for those individuals who are committed to the educational renewal of urban America; whose career goals emphasize the development and improvement of curriculum and instruction; who desire to prepare themselves for leadership roles in various areas of curriculum and educational research; and who will serve as agents of change, creating and expanding the varied institutions and programs needed for the continuing development of educators. This program also serves those interested in the educational aspects of business and industry, health and social services, and other areas that require expertise in curriculum and instruction.

Based on pure and applied research in instruction and curriculum, doctoral study incorporates formal classroom instruction, independent

study, and direct, clinical experience in a variety of field settings. It reflects

1. the legitimacy of the emerging pattern of inter-institutional partnerships in teacher education at all levels;
2. the significance of the diverse nature of metropolitan society; and
3. the importance of the integration of theory, research, and practice as the basis for sound professional development.

Admission to certain majors and concentrations in the doctoral program may be limited by the availability of faculty advisors. Prior to applying, students should consult with an advisor in 489 Education to discuss current admission limitations.

Admission Requirements

The College of Education has specific requirements for admission to doctoral programs (p. 89).

K-12 Curriculum Concentration (Ph.D. and Ed.D.)

The doctoral program adopts an interdisciplinary approach to teaching and learning, acknowledging the relationship among the learner, the learning, and the learning environment and the consequences this approach has for educational theory, policy, and practice. The program emphasizes the interrelationship between cultural/linguistic diversity and learning and utilizes learners' experiences in curriculum studies. The socio-cultural context of learning in the educative process promotes equity and excellence within larger political and institutional settings. The important frames guiding the doctoral study are the integration of theory and research; the importance of reflection in learning; the role of gender, race, ethnicity, culture, and class as social constructions, which profoundly impact and inform teaching and learning; and the establishment of collaborative partnerships for community-based research. The doctoral program provides a forum that brings together the latest academic and policy discussions, and promotes critical inquiry, discourse, and debate, on the often complex interconnections in education.

Courses in the field of concentration in each program are selected in consultation with an advisor to develop a Plan of Work. All students in content-specific concentrations under the major of Curriculum and Instruction are required to complete TED 8280 and TED 8350; TED 9130 is recommended but not required. All course work must be completed in accordance with the academic procedures of the College of Education (p. 86) and the Graduate School's (p. 35) regulations governing graduate scholarship and degrees.

The K-12 curriculum (Curriculum Studies) area of emphasis, within the curriculum and instruction program, requires the following courses in the major area:

Code	Title	Credits
TED 8350	Basic Principles of Curriculum and Instruction	3
TED 8270	Seminar: Issues in Curriculum and Instruction	2-6
TED 8280	Research Seminar: Curriculum and Instruction I	3
TED 9130	Doctoral Seminar in Curriculum and Instruction	3

Early Childhood Education, Infant Mental Health Dual-Title (Ph.D. Program)

The Doctor of Education (Ed.D.) and the Doctor of Philosophy (Ph.D.) programs prepare professional educators and researchers for positions in institutions of higher learning, educational research centers, state and national education agencies, and intermediate and local school districts. Advanced programs are designed for those individuals who are committed to the educational renewal of urban America; whose career goals emphasize the development and improvement of curriculum and instruction; who desire to prepare themselves for leadership roles in various areas of curriculum and educational research; and who will serve as agents of change, creating and expanding the varied institutions and programs needed for the continuing development of educators. This program also serves those interested in the educational aspects of business and industry, health and social services, and other areas that require expertise in curriculum and instruction.

Based on pure and applied research in instruction and curriculum, doctoral study incorporates formal classroom instruction, independent study, and direct, clinical experience in a variety of field settings. It reflects

1. the legitimacy of the emerging pattern of inter-institutional partnerships in teacher education at all levels;
2. the significance of the diverse nature of metropolitan society; and
3. the importance of the integration of theory, research, and practice as the basis for sound professional development.

Admission to certain majors and concentrations in the doctoral program may be limited by the availability of faculty advisors. Prior to applying, students should consult with an advisor in 489 Education to discuss current admission limitations.

Admission Requirements

The College of Education has specific requirements for admission to doctoral programs (p. 89).

The dual-title degree is designed to prepare early childhood educators and infant mental health specialists on recommended practices aimed to promote the young child's social and emotional development within the contexts of parent-child and adult-child relationships to include the adult's psychological development and learning as a parent/caregiver; including children and/or parents who have developmental delays or disabilities, and/or physical health or mental health concerns. The dual-title coursework follows competencies outlined by the MI-AIMH required for the Level 2 endorsement (i.e., Infant Family Specialist).

Admission Requirements

Applicants must meet the admission standards and requirements of the Graduate School (p. 19) and the College of Education (p. 89). Applicants can indicate interest in the dual-title IMH, ECE program on their initial online application or may discuss their interest in the graduate program with their faculty advisor.

Courses in the field of concentration in each program are selected in consultation with an advisor to develop a Plan of Work. All students in content-specific concentrations under the major of Curriculum and Instruction are required to complete TED 8280 and TED 8350; TED 9130 is recommended but not required. All course work must be completed in accordance with the academic procedures of the College of Education

(p. 86) and the Graduate School's (p. 35) regulations governing graduate scholarship and degrees.

Students are required to successfully complete 13 credit hours of IMH coursework. All students must maintain a "B" grade point average or above in the following courses:

Code	Title	Credits
ELE 7035	Infant and Toddler Developmental Assessment for Intervention Planning	3
SW 7880	Infant/Family Mental Health Assessment	2
SW 7025	Infant Mental Health: Theory to Practice across Early Childhood Settings	2
SW 8880	Infant Mental Health Practice	3
PSY 7425	Psychology of Infant Behavior and Development	3
Total Credits		13

All coursework must be completed in accordance with the academic procedures of the College of Education (p. 86) and the Graduate School's (p. 35) regulations governing graduate scholarship and degrees.

Educational Studies (Ph.D.)

The doctoral program in Educational Studies is committed to preparing a new generation of researchers, educators, and leaders by engaging them in critical inquiry of educational issues and needs germane to the large cities of the 21st century. Education of new scholars capitalizes on the cultural richness of urban Detroit and its suburbs. Consistent with contemporary understandings of knowledge development and learning sciences, professional educators study the art and craft of constructing learning sequences, teaching and learning modules, assessments, and professional development models and materials. Educational tools and intellectually stimulating empathetic environments are provided to facilitate conceptual understanding, defensible practices, and learning dispositions. Conducting innovative research centered in and informed by theory and practice is endowed with intellectual merit and is intended to have a broad impact on teaching and learning.

The doctoral program adopts an interdisciplinary approach to teaching and learning, acknowledging the relationship among the learner, the learning, and the learning environment and the consequences this approach has for educational theory, policy, and practice. The program emphasizes the interrelationship between cultural/linguistic diversity and learning and utilizes learners' experiences in curriculum studies. The socio-cultural context of learning in the educative process promotes equity and excellence within larger political and institutional settings. The important frames guiding the doctoral study are the integration of theory and research; the importance of reflection in learning; the role of gender, race, ethnicity, culture, and class as social constructions, which profoundly impact and inform teaching and learning; and the establishment of collaborative partnerships for community-based research. The doctoral program provides a forum that brings together the latest academic and policy discussions, and promotes critical inquiry, discourse, and debate, on the often complex interconnections in education.

The cohort model of this program is designed to support students by providing opportunities for socialization into doctoral studies and research, mentorship from nationally and internationally recognized scholars, and collaboration with peers and faculty members from across concentration areas. This program offers opportunities for students to experience program-, division-, and college-level committees; engage in teaching internships, and conduct, document, and publish research in collaboration with faculty.

Admission Requirements

The College of Education has specific requirements for admission to doctoral programs (p. 89). Admission decisions are made once per year for the doctoral program. All application materials must be completed and submitted by January 15th for fall admission in the following academic year.

At the time of application, you should select an area of concentration: Science, Technology, Engineering and Mathematics (STEM); Reading, Literacy and Literature (RLL); or Curriculum and Critical Social Inquiry (CCSI).

The doctoral program in Educational Studies offers three concentration areas:

- Science, Technology, Engineering and Mathematics (STEM);
- Reading, Literacy and Literature (RLL);
- Curriculum and Critical Social Inquiry (CCSI).

Ninety (90) credits are required for the program. Of these, a minimum of twenty-four (24) credits are in the major area (i.e., Educational Studies with a concentration), minimum fifteen (15) are research courses, thirty (30) credits are the dissertation. All coursework must be completed in accordance with the academic procedures of the College of Education (p. 86) and the Graduate School's (p. 35) regulations governing graduate scholarship and degrees.

Required Courses

ED 9994	Doctoral Candidate Status IV: Dissertation Research and Direction	7.5
Total Credits		30

To be awarded a graduate degree, a student must have achieved at least a 'B' (3.0) overall grade point average. Grades of 'B-minus' and below are unsatisfactory for graduate level work. A limited number of 'B-minus', 'C-plus', or 'C', though unsatisfactory, may be applied toward a graduate degree provided they are offset by a sufficient number of higher grades to maintain a grade point average of 3.0. Grades below 'B' can constitute reason for dismissal from a program at the department or program's discretion. Students will consult with their departments and advisors regarding unsatisfactory grades and their impact on good academic standing. Up to two courses with grades of C+ or below can be retaken once in order to continue in the program. Any student receiving more than two grades of C+ or below in either his/her major area courses (including the various statistics and research courses) or in the minor area courses will not be permitted to continue in the program.

All doctoral students are required to pass the Final Qualifying Examination near or at the end of their coursework. The Exams are held during the fall and winter terms each academic year. With approval by the major advisor, students in this program have the option of taking traditional on-site qualifying exams or take-home qualifying exams.

Elementary Education Major Leading K-8 Certification (M.A.T.) Teaching (M.A.T. Program)

The Master of Arts in Teaching (M.A.T.) degree is designed for students who have completed a bachelor's degree in a non-education program with appropriate teaching majors and minors, and who desire both a master's degree and Michigan Standard Teaching Certification at either the elementary or secondary level. Teaching certification can be earned prior to completion of the master's degree requirements (see Teaching

Certification at Certification Requirements). Each of the M.A.T. programs consists of graduate-level courses (several involving work with children in a school setting) and field experiences (pre-student teaching for one semester and student teaching for one semester).

Information regarding teaching certificate requirements can be found at Teaching Certificates of this bulletin.

Admission to the Master of Arts in Teaching is contingent upon admission to the Graduate School (p. 19) and the College of Education Division of Teacher Education. In order to be eligible for admission, all M.A.T. applicants must submit the following: Scores from a nationally normed test (i.e., ACT, SAT), verification of participation in group work with children, a negative Tuberculosis (TB) test completed within the last three years, and a Criminal History Background check completed through Castle Branch. Additional testing is required for Foreign Language majors and minors and Bilingual-Bicultural Education minors prior to admission. Students without appropriate teaching majors and minors and other general education requirements will be required to complete the necessary coursework as post-degree students before entering the M.A.T. program.

Persons interested in the elementary or secondary education M.A.T. degrees should consult with an advisor in the Teacher Education Division regarding appropriate teaching majors and minors and the process for a formal transcript evaluation.

Testing in the content areas is required for State Certification and completed near the end of the professional coursework. The Michigan Test for Teacher Certification (MTTC) examination scores must be furnished directly to Wayne State University by Evaluation Systems Group of Pearson, the MTTC testing agency. When registering for the MTTC, students should select "Wayne State University (31)" as a "College or University to Receive Scores."

Students whose examination scores were not released to Wayne State University should request an original score report from Evaluation Systems Group of Pearson. The scores must be mailed directly from Evaluation Systems Group of Pearson to Wayne State University. An original score report is required by the Michigan Department of Education for verification of test scores.

Degree Requirements (General M.A.T.)

The M.A.T. program is offered as a master's Plan B and requires a minimum of thirty credits. Total credit requirements vary based on the applicant's background in his/her teaching field at the undergraduate level and specialized requirements.

All course work must be completed in accordance with the academic procedures of the College of Education (p. 86) and the Graduate School's (p. 12) regulations governing graduate scholarship and degrees. Requirements for the Master of Arts in Teaching degree must be completed within six years after completion of the first course to be applied to the degree.

Course work for the degree is distributed among three areas: Prerequisite courses, major courses, and concentration courses. A teaching certificate is required in order to receive a M.A.T. degree.

Common Prerequisite Courses: All M.A.T. Elementary Education students are required to complete the following courses, which are required for a Michigan Teaching Certificate.

Code	Title	Credits
EDP 6210	Foundations of Educational Psychology	3
BBE 5000	Multicultural Education in Urban America	2

SED 5010	Inclusive Teaching	2
TED 6020	Computer Applications in Teaching I	3
ELE 6200	Children's Literature for Teachers	3

Elective Courses, if needed for diversity in the program, are selected in consultation with an advisor at the time a Plan of Work is prepared.

Professional Field Experiences (pre-student teaching and student teaching) are integral parts of all M.A.T. programs, and must be completed during daytime school hours. The following courses involve field experiences.

Code	Title	Credits
TED 5150	Analysis of Elementary Teaching	3,5
TED 5650	Pre-Student Teaching Field Experience for Secondary Majors	5
TED 5780	Directed Teaching and Conference	1-12
TED 5790	Directed Teaching and Conference for Special Groups	1-15
BBE 6600	Internship in Bilingual/Bicultural Teaching	2-12
AED 5050	Integrating the Arts into the Elementary Classroom	3

Information on the student teaching phases of the program is presented at Student Teaching of this bulletin.

Elementary Education Major Leading to K-8 Certification (M.A.T. Program)

Code	Title	Credits
Major Requirements		
TED 5150	Analysis of Elementary Teaching	5
ELE 6220	Literacy I	3
ELE 6240	Literacy II	3
ELE 6260	Literacy III	3
ELE 6390	Mathematics Instruction: P-8	3
ELE 6500	Science Curriculum: P-8	3
ELE 6600	Social Studies Curriculum: P-8	3
EHP 7600	Philosophy of Education	2
TED 5780	Directed Teaching and Conference (All courses above must be completed prior to registering for TED 5780) ¹	5-8
ED 7999	Terminal Master's Seminar and Essay or Project	3
Total Credits		33-36

¹ TED 5780 is completed for 5 credit hours in Early Childhood Education and Special Education concentrations. TED 5780 is completed for 8 credit hours in all other concentrations.

Students wishing additional specialized endorsement may elect to complete one of the minor concentrations on the next tab.

Elementary Education Concentrations (M.A.T. Program)

Early Childhood Education

(A concentration in Teaching Minor: Early Childhood Education leading to the Early Childhood General and Special Education (ZS) endorsement)

Code	Title	Credits
Courses to be completed prior to student teaching:		
ELE 6020	Seminar in Early Childhood	3

ELE 6040	Role of Content Areas in Early Childhood Education	3
ELE 6050	Infant and Toddler Development to Inform Relationship-Based Curricula and Interventions	3
ELE 6340	Teaching Reading in Early Childhood Education	3
ELE 6010	Family Centered Collaboration in Early Childhood Intervention and Special Education	3-4
or ELE 6060	Community Contacts: Working with Families in Urban Settings	
ELE 6080	Preprimary Goals and Practices	3
SED 6040	Introduction to Early Childhood Special Education	3
TED 5790	Directed Teaching and Conference for Special Groups	8
Total Credits		29-30

The plans for the Early Childhood Education concentration must be done in consultation with their faculty advisor.

Bilingual/Bicultural Education

(A concentration in Teaching Minor: Bilingual-bicultural Education)

Code	Title	Credits
BBE 5500	Introduction to Bilingual/Bicultural Education	3
BBE 6560	Teaching Methods in Bilingual/Bicultural Education	3
BBE 6590	Culture and Language in Bilingual/Bicultural Education	1-3
BBE 6600	Internship in Bilingual/Bicultural Teaching	2-12
BBE 6850	Applied Linguistics: Issues in Bilingual Education	3
LED 6520	Teaching English as a Second Language/Foreign Language: Methods I	3
LED 6555	Integration of Language and Content in Language Teaching	1-3
Select six credits in methods courses in the major field, selected in consultation with the appropriate major advisor.		6
Total Credits		22-36

All students in the bilingual-bicultural program must successfully complete the language proficiency examinations in English and in the designated language of their individual program prior to taking courses for this minor.

English as a Second Language

(A concentration in Teaching Minor: English as a Second Language)

Code	Title	Credits
BBE 6600	Internship in Bilingual/Bicultural Teaching	2-12
BBE 6850	Applied Linguistics: Issues in Bilingual Education	3
LED 6510	Second Language Acquisition and the Teaching of Grammar	3
LED 6520	Teaching English as a Second Language/Foreign Language: Methods I	3
LED 6555	Integration of Language and Content in Language Teaching	1-3
LED 6565	Assessment in Language Teaching	1-3
LED 6580	Culture as the Basis for Language Teaching	2-4
Select six credits in methods courses in the major field, selected in consultation with the appropriate major advisor.		6
Total Credits		21-37

Special Education Concentrations

In addition to the elementary education requirements stated on the previous tab, students seeking elementary certification with a special education Teaching Major: Autism K-12, or Teaching Major: Cognitive Impairment K-12, must complete a special education program. Additional courses in special education are selected in consultation with an advisor.

World Language Education, K-12

(Includes concentrations in: Teaching Major: Arabic K-12, Teaching Major: French K-12, and Teaching Major: Spanish K-12)

In addition to the elementary education requirements described on the previous tab, students seeking an elementary certification with a K-12 foreign language endorsement must complete the coursework for a teaching major in the foreign language and the following prerequisites:

Code	Title	Credits
LED 6530	Teaching English as a Second Language/Foreign Language: Methods II	2-3
EDP 5480	Adolescent Psychology	2-3
RLL 6700	Second Language Literacy Development: K-12	3
Total Credits		7-9

Students must complete the language proficiency examination in the designated language of his/her program prior to taking courses for this program.

Elementary Mathematics Specialist: Advanced (Graduate Certificate)

The GCEMS-Adv prepares candidates to be curriculum specialists, teacher leaders, or coaches who are responsible for supporting effective mathematics instruction and student learning at the classroom, school, district, or state levels. The program will provide professionals with a deep and broad knowledge of mathematics content and pedagogy.

Admissions Requirements

Applicants must have completed the Graduate Certificate in Elementary Mathematics Specialist: Introductory (p. 110), hold an elementary teaching certificate and must meet requirements for admission to the Graduate School (p. 19).

A total of 12 credit hours is required for the GCEMS-Adv, including MAE 7400, an additional MAE course not previously completed, and one course from CED, EDA or LDT. Course selections are made from a list of courses in consultation with a program advisor, and are tailored to the student's background and school needs.

No transfer credit will be accepted for a certificate program, and no more than nine semester credits taken in this classification may be applied toward a graduate degree, subject to the approval of the relevant academic unit and graduate office.

Elementary Mathematics Specialist: Introductory (Graduate Certificate)

The GCEMS-Intro prepares candidates to be instructional specialists who are responsible for supporting effective mathematics instruction and student learning at the classroom or school level. This program will provide teachers with enhanced knowledge of mathematics content, expertise in using and helping others use effective practices, and the

ability to support efforts that help all students learn mathematics in school settings.

Admission Requirements

Applicants must hold an elementary teaching certificate and must meet requirements for admission to the Graduate School (p. 19).

A total of 12 credit hours is required for the GCEMS-Intro, including the two required courses (MAE 6400 and MAE 6150) and at least one course at the 7000 level or higher. Course selections are made from the Mathematics Education (MAE) courses in consultation with a program advisor, and are tailored to the student's background and school needs.

No transfer credit will be accepted for a certificate program, and no more than nine semester credits taken in this classification may be applied toward a graduate degree, subject to the approval of the relevant academic unit and graduate office.

English as a Second Language (Bridge Graduate Certificate)

The Bridge Graduate Certificate in English as a Second Language leads to an endorsement to the Michigan teaching certificate in English as a Second Language. Students must demonstrate English language fluency and foreign language learning experience to be eligible for the endorsement. Students who meet these requirements, complete the Bridge Certificate Program and the appropriate Michigan Test for Teacher Certification subject area examination will earn the endorsement.

As a bridge program this Graduate Certificate allows students to apply all of their coursework for the Certificate to the Master of Education degree with a major in Bilingual-Bicultural Education and a concentration in English as a Second Language if they decide to pursue that degree after completing the Certificate.

Admission Requirements

Admission to this program is contingent upon admission to the Graduate School (p. 19) and the College of Education (p. 86). Additionally, applicants must possess a valid Michigan teaching certificate.

The English as a Second Language Bridge Graduate Certificate is designed to be completed in 2 years.

This program will cost \$17,704.71 for in-state tuition and fees and \$33,804.78 for out-of-state tuition and fees if completed within normal time. There may be additional costs for living expenses. These costs were accurate at the time of posting, but may have changed.

Fewer than 10 students completed this program within normal time. Typical student debt has been withheld to preserve the confidentiality of the students.

This program does not meet any licensure requirements.

For more information about graduation rates, loan repayment rates, and post-enrollment earnings about this institution and other postsecondary institutions please click here: <https://collegescorecard.ed.gov/>.

English Education (Secondary) (M.Ed.)

This program follows the general admission and degree requirements for the Master of Education (p. 87). Additional tabs enumerate the

specific amendments/variations to generic requirements, as well as program options.

This program is designed to increase the skills and knowledge of teachers already holding certificates. Additionally, some students find this program useful as a preparation for positions as department heads or resource personnel. Admission to this program requires a teaching certificate and at least twenty-one credits in English.

The Master of Education is offered in this area under Plans A, B, or C. This program requires a minimum of thirty credits distributed as follows:

Code	Title	Credits
	Major course work including the final essay or project	17
	General professional courses selected from such fields as educational psychology, educational philosophy, educational sociology, educational evaluation and research, and guidance and counseling	6
	Cognate courses selected to enrich the teaching major or minor	7-9
	Total Credits	30-32

Additionally, students with less than a cumulative total of thirty credits in English (including the twenty-one credits required for admission) must make up the deficit within the cognate area. All coursework must be completed in accordance with the academic procedures of the College of Education (p. 86) and the Graduate School's (p. 35) regulations governing graduate scholarship and degrees.

English as a Second/Foreign Language: Students in the English Education program may also choose to become either teachers of English as a second language (ESL) or teachers of English as a foreign language (EFL). Persons who wish to devote themselves to ESL/EFL teaching come from a variety of backgrounds. Thus, a number of curricula have been devised to complete the degree, accommodating those who are certified teachers in need of an ESL endorsement, and those who wish only ESL/EFL training.

Requirements for this concentration are similar to the generic English Education major (see above), except that Plan A is not offered.

Physical Education Pedagogy (M.A.T.)

Teaching (M.A.T. Program)

The Master of Arts in Teaching (M.A.T.) degree is designed for students who have completed a bachelor's degree in a non-education program with appropriate teaching majors and minors, and who desire both a master's degree and Michigan Standard Teaching Certification at either the elementary or secondary level. Teaching certification can be earned prior to completion of the master's degree requirements (see Teaching Certification at Certification Requirements). Each of the M.A.T. programs consists of graduate-level courses (several involving work with children in a school setting) and field experiences (pre-student teaching for one semester and student teaching for one semester).

Information regarding teaching certificate requirements can be found at Teaching Certificates of this bulletin.

Admission to the Master of Arts in Teaching is contingent upon admission to the Graduate School (p. 19) and the College of Education Division of Teacher Education. In order to be eligible for admission, all M.A.T. applicants must submit the following: Scores from a nationally normed test (i.e., ACT, SAT), verification of participation in group work with children, a negative Tuberculosis (TB) test completed within the last three years, and a Criminal History Background check completed through

Castle Branch. Additional testing is required for Foreign Language majors and minors and Bilingual-Bicultural Education minors prior to admission. Students without appropriate teaching majors and minors and other general education requirements will be required to complete the necessary coursework as post-degree students before entering the M.A.T. program.

Persons interested in the elementary or secondary education M.A.T. degrees should consult with an advisor in the Teacher Education Division regarding appropriate teaching majors and minors and the process for a formal transcript evaluation.

Testing in the content areas is required for State Certification and completed near the end of the professional coursework. The Michigan Test for Teacher Certification (MTTC) examination scores must be furnished directly to Wayne State University by Evaluation Systems Group of Pearson, the MTTC testing agency. When registering for the MTTC, students should select "Wayne State University (31)" as a "College or University to Receive Scores."

Students whose examination scores were not released to Wayne State University should request an original score report from Evaluation Systems Group of Pearson. The scores must be mailed directly from Evaluation Systems Group of Pearson to Wayne State University. An original score report is required by the Michigan Department of Education for verification of test scores.

Students must complete at least forty-nine credits preceded by any identified prerequisites. Teacher certification is required for degree completion. All coursework must be completed in accordance with the academic procedures of the College of Education (p. 86) and the Graduate School's (p. 35) regulations governing graduate scholarship and degrees. Courses offered in the three components of the program are as follows:

Code	Title	Credits
Teacher Certification Courses		
KIN 5100	Anatomical and Physiological Bases of Physical Activity	3
KIN 5110	Motor Learning and Development	3
KIN 5200	Effective Teaching and Instructional Practices	3

Total Credits		49

Reading (Education Specialist Certificate)

The Teacher Education Division offers a number of education specialist programs at the elementary and secondary levels. These certificate programs are designed to strengthen the educational background of teachers, administrators, and other education professionals.

Admission Requirements

Admission to this program is contingent upon admission to the College of Education (p. 88) and the Graduate School (p. 19).

These certificate programs require thirty credits beyond the master's degree. The individual student's professional needs and interests are taken into account in determining the specific content of his/her program. The typical plan includes course work in the specialized professional area and subject matter areas supportive of a major or minor. All course requirements for the various majors are selected in consultation with an advisor. All course work must be completed in accordance with the academic procedures of the College of Education (p. 86) and the Graduate School's (p. 35) regulations governing graduate scholarship and degrees.

The Reading Education Specialist Certificate is designed to be completed in 2 years.

This program will cost \$25,027.04 for in-state tuition and fees and \$48,027.14 for out-of-state tuition and fees if completed within normal time. There may be additional costs for living expenses. These costs were accurate at the time of posting, but may have changed.

Fewer than 10 students completed this program within normal time. Typical student debt has been withheld to preserve the confidentiality of the students.

This program does not meet any licensure requirements.

For more information about graduation rates, loan repayment rates, and post-enrollment earnings about this institution and other postsecondary institutions please click here: <https://collegescorecard.ed.gov/>.

Reading (M.Ed.)

This program follows the general admission and degree requirements for the Master of Education (p. 87). Additional tabs enumerate the specific amendments/variations to generic requirements, as well as program options.

This program services graduates of bachelor's degree programs who wish to develop and/or strengthen their expertise in literacy instruction in pre-primary through adult levels. This might include elementary and secondary teachers and those who work in college developmental, family literacy, adult basic education, GED, high school equivalency, or workplace literacy programs. This program provides a curriculum that qualifies certified teachers for the Michigan K-12 reading specialist endorsement in reading by the State of Michigan. Graduates of this program are primarily prepared for the roles of classroom teacher of reading and reading specialist.

Admission Requirements

Admission to this program is contingent upon admission to the Graduate School (p. 19).

This degree is offered under Plan C, requiring a minimum of thirty-three credits in course work distributed as follows:

Code	Title	Credits
RLL 7100	Emergent Literacy	3
RLL 7200	Comprehension	3
RLL 7300	Literacy Across the Curriculum	3
RLL 7350	Organization and Supervision of Literacy Programs	3
RLL 7400	Practicum and Seminar in Evaluation and Instruction	6
RLL 7500	Theoretical Foundations for Literacy	3
General Professional Courses (see General Professional Requirements: Fundamental Areas and Core Courses)		6
Elective credits		6
Total Credits		33

All course work must be completed in accordance with the academic procedures of the College of Education (p. 86) and the Graduate School's (p. 35) regulations governing graduate scholarship and degrees.

Secondary Education Major (M.A.T.) Teaching (M.A.T. Program)

The Master of Arts in Teaching (M.A.T.) degree is designed for students who have completed a bachelor's degree in a non-education program with appropriate teaching majors and minors, and who desire both a master's degree and Michigan Standard Teaching Certification at either the elementary or secondary level. Teaching certification can be earned prior to completion of the master's degree requirements (see Teaching Certification at Certification Requirements). Each of the M.A.T. programs consists of graduate-level courses (several involving work with children in a school setting) and field experiences (pre-student teaching for one semester and student teaching for one semester).

Information regarding teaching certificate requirements can be found at Teaching Certificates of this bulletin.

Admission to the Master of Arts in Teaching is contingent upon admission to the Graduate School (p. 19) and the College of Education Division of Teacher Education. In order to be eligible for admission, all M.A.T. applicants must submit the following: Scores from a nationally normed test (i.e., ACT, SAT), verification of participation in group work with children, a negative Tuberculosis (TB) test completed within the last three years, and a Criminal History Background check completed through Castle Branch. Additional testing is required for Foreign Language majors and minors and Bilingual-Bicultural Education minors prior to admission. Students without appropriate teaching majors and minors and other general education requirements will be required to complete the necessary coursework as post-degree students before entering the M.A.T. program.

Persons interested in the elementary or secondary education M.A.T. degrees should consult with an advisor in the Teacher Education Division regarding appropriate teaching majors and minors and the process for a formal transcript evaluation.

Testing in the content areas is required for State Certification and completed near the end of the professional coursework. The Michigan Test for Teacher Certification (MTTC) examination scores must be furnished directly to Wayne State University by Evaluation Systems Group of Pearson, the MTTC testing agency. When registering for the MTTC, students should select "Wayne State University (31)" as a "College or University to Receive Scores."

Students whose examination scores were not released to Wayne State University should request an original score report from Evaluation Systems Group of Pearson. The scores must be mailed directly from

Evaluation Systems Group of Pearson to Wayne State University. An original score report is required by the Michigan Department of Education for verification of test scores.

Degree Requirements (General M.A.T.)

The M.A.T program is offered as a master's Plan B and requires a minimum of thirty credits. Total credit requirements vary based on the applicant's background in his/her teaching field at the undergraduate level and specialized requirements.

All course work must be completed in accordance with the academic procedures of the College of Education (p. 86) and the Graduate School's (p. 12) regulations governing graduate scholarship and degrees. Requirements for the Master of Arts in Teaching degree must be completed within six years after completion of the first course to be applied to the degree.

Course work for the degree is distributed among three areas: Prerequisite courses, major courses, and concentration courses. A teaching certificate is required in order to receive a M.A.T. degree.

Common Prerequisite Courses: All M.A.T. Secondary Education students are required to complete the following courses, which are required for a Michigan Teaching Certificate.

Code	Title	Credits
EDP 5480	Adolescent Psychology	2-3
or EDP 6210	Foundations of Educational Psychology	
BBE 5000	Multicultural Education in Urban America	2
SED 5010	Inclusive Teaching	2
TED 6020	Computer Applications in Teaching I	3

Elective Courses, if needed for diversity in the program, are selected in consultation with an advisor at the time a Plan of Work is prepared.

Professional Field Experiences (pre-student teaching and student teaching) are integral parts of all M.A.T. programs, and must be completed during daytime school hours. The following courses involve field experiences.

Code	Title	Credits
TED 5150	Analysis of Elementary Teaching	3,5
TED 5650	Pre-Student Teaching Field Experience for Secondary Majors	5
TED 5780	Directed Teaching and Conference	1-12
TED 5790	Directed Teaching and Conference for Special Groups	1-15
BBE 6600	Internship in Bilingual/Bicultural Teaching	2-12

Information on the student teaching phases of the program is presented at Student Teaching of this bulletin.

Secondary Education Major (M.A.T. Program)

Code	Title	Credits
Major Requirements		
Courses must be completed prior to student teaching		
EHP 7600	Philosophy of Education	2
ELE 6240	Literacy II	3
TED 5650	Pre-Student Teaching Field Experience for Secondary Majors	5
TED 5780	Directed Teaching and Conference	8

TED 7000	Introductory Master's Seminar ¹	3
ED 7999	Terminal Master's Seminar and Essay or Project	3
Total Credits		24

¹ TED 7000 is not required for students with an English Education Concentration.

Two specific methods courses are required for each of the concentrations below and must be selected in consultation with an advisor. Some programs require a third methods course.

The student teaching assignment (TED 5780) for this program requires a full-time assignment to a public school for a minimum of one University semester.

Applicants should consult with the appropriate advisor prior to filing an admissions application in order to determine the appropriateness of various major and minor areas of study to the student's interest.

Bilingual-bicultural Education

(A concentration in Teaching Minor: Bilingual-bicultural Education)

Code	Title	Credits
BBE 5500	Introduction to Bilingual/Bicultural Education	3
BBE 6560	Teaching Methods in Bilingual/Bicultural Education	3
BBE 6590	Culture and Language in Bilingual/Bicultural Education	1-3
BBE 6600	Internship in Bilingual/Bicultural Teaching	2-12
BBE 6850	Applied Linguistics: Issues in Bilingual Education	3
LED 6520	Teaching English as a Second Language/Foreign Language: Methods I	3
LED 6555	Integration of Language and Content in Language Teaching	1-3
Select six credits in methods courses in the major field, selected in consultation with the appropriate major advisor		6
Total Credits		22-36

All students in the bilingual-bicultural program must successfully complete the language proficiency examinations in English and the designated language of his/her individual program prior to taking courses for this minor.

English as a Second Language

(A concentration in Teaching Minor: English as a Second Language)

Code	Title	Credits
BBE 6600	Internship in Bilingual/Bicultural Teaching	2-12
BBE 6850	Applied Linguistics: Issues in Bilingual Education	3
LED 6510	Second Language Acquisition and the Teaching of Grammar	3
LED 6520	Teaching English as a Second Language/Foreign Language: Methods I	3
LED 6555	Integration of Language and Content in Language Teaching	1-3
LED 6565	Assessment in Language Teaching	1-3
LED 6580	Culture as the Basis for Language Teaching	2-4
Select six credits in methods courses in the major field, in consultation with the appropriate advisor		6
Total Credits		21-37

English Education

LED 6510	Second Language Acquisition and the Teaching of Grammar	3
LED 6580	Culture as the Basis for Language Teaching	2-4
Total Credits		10-13

K-12 Endorsement: A major in a world language and additional courses are required for the K-12 option. Please see an advisor for more information.

Students must complete the language proficiency examination in the designated language of his/her program prior to taking courses for this program.

Teaching and Learning (M.Ed.)

This program follows the general admission and degree requirements for the Master of Education (p. 87). Additional tabs enumerate the specific amendments/variations to generic requirements, as well as program options.

The Master of Education (M.Ed.) in Teaching and Learning is for teachers and other professionals who wish to enhance their content and pedagogical knowledge, as well as research skills in teaching and learning. Program activities engage students in the study of teaching and learning using current theoretical developments in order to:

1. develop curriculum illustrating best practices and
2. research inquiries in areas of their interest.

The theoretical knowledge and research skills acquired in this program are an important aspect of an educator's professional growth and essential to those interested in taking on leadership roles and/or pursuing another advanced degree in the future.

Program applicants may choose to concentrate in one of eight specialty areas:

- Bilingual/Bicultural (BBE), which may lead to a teaching endorsement; Online
- Career and Technical Education (CTE), which may lead to the Standard CTE Certificate; Online
- Early Childhood Education (ECED), which may lead to a teaching endorsement
- Elementary Education (ELED), which may lead to a teaching endorsement
- English as a Second Language (ESL), which may lead to a teaching endorsement; Online
- Foreign Language (FLED):
- Mathematics Education (MATE)
- Peace and Conflict Studies (PCOS)
- Science Education (SCIE)
- Social Studies Education (SSE)
- Special Education (SPE), which may lead to a teaching endorsements in one of two areas:
 - Cognitive Impairment
 - Autism Spectrum Disorder

Admission Requirements

Applicants must meet requirements for admission to the Graduate School (p. 19) (a minimum undergraduate degree GPA of 2.75 for regular admission and a GPA of 2.50 for qualified admission). In addition, prior coursework or a teaching endorsement in the field of study is required for admission to the following concentrations:

- Career and Technical Education
- Elementary Education
- Foreign Language Education
- Mathematics Education
- Science Education
- Social Studies Education
- Special Education

The Master of Education degree requires a minimum of thirty credits, at least twenty-four of which must be taken at Wayne State University. The program is offered under master's degree plan 'B,' which includes completion of a terminal seminar and essay or project.

The following courses are required of all students in the program (12 credit hours): The remaining credit hours will come from the area of the concentration (18 to 24 credits). The total number of credit hours for the degree will vary from 30 to 36 depending on the area of the concentration.

Code	Title	Credits
TED 7000	Introductory Master's Seminar	3
ED 7999	Terminal Master's Seminar and Essay or Project	3
TED 7030	Foundations of Teaching and Learning	3

Theoretical and Behavioral Foundations

Assistant Dean: Cheryl Somers
Office: 361 Education Building; 313-577-1805
<http://coe.wayne.edu/tbf/>

The Division of Theoretical and Behavioral Foundations includes degree programs in educational evaluation and research, counseling, educational psychology, school and community psychology, counseling psychology, and rehabilitation counseling and community inclusion. The Division is designed to facilitate a realization of the following aims:

1. to integrate the educational experiences and course offerings;
2. to perform a service function in meeting the needs of those enrolled in other divisions within the College;
3. to provide degree and specialist programs for those who are majoring in a particular field of the division;
4. to provide students with an opportunity to study those aspects of educational thought and practice that are interdisciplinary as well as foundational;
5. to formulate programs looking toward the development of new combinations of specialties, as in
 - a. counseling-psychology,
 - b. pupil personnel managers in school systems,
 - c. utilization of theoretical and behavioral foundations in teacher education,
 - d. underlying philosophical premises of educational programs and practices; and
6. to design interdisciplinary, cross disciplinary, and multidisciplinary experiences for and with students.

Counselor Education

The counselor education unit offers graduate counseling programs for those professionals committed to being effective counselors in elementary and secondary schools, colleges, universities, and private and public agencies. The unit offers degree programs appropriate for counseling work in K-12 school settings, community agencies, substance abuse treatment centers, sports and exercise facilities, corporate structures, medical institutions, nursing homes, rehabilitation agencies/centers and independent practice.

All applicants will be evaluated with respect to their potential for being effective counseling professionals. Admission decisions are based on a review of the application and a personal interview with the appropriate admission committee. Acceptance is dependent upon the applicant's professional potential, academic and professional background, and professional career goals.

The counselor education unit offers a Master of Arts program with a major in clinical mental health and school counseling. Additional training may be completed in art therapy, and rehabilitation counseling. A rehabilitation counseling major in the Master of Arts program includes training in disability management, disability leadership, career development, job placement supported employment, adjustment counseling and vocational evaluation.

All programs include a practicum and internship clinical experience and a terminal masters seminar and project.

Counseling Accreditation: The Council for Accreditation of Counseling and Related Educational Programs (CACREP), a specialized accrediting body recognized by the Council on Postsecondary Accreditation (COPA), has conferred accreditation to the M.A. in Counseling with concentrations in Clinical Mental health and School Counseling, and the Ed.D and Ph.D programs in counselor education and supervision. In addition, the Council on Rehabilitation Education accredits the Rehabilitation Counseling major (CORE).

The Education Specialist Certificate program is intended for guidance professionals who want to improve their competence in counseling. Since this is a professional certificate program, persons considering applying should confirm that they have the prerequisite education and experience prior to making formal application. This certificate is not an entry level program, but builds on master's level preparation in counseling.

The Doctor of Philosophy is generally required for those intending to teach, conduct research, or provide counseling services in universities and colleges. In addition, those desiring counseling positions in governmental or community agencies, and the like, may be required to take advanced training in counseling theory and practice, consultation, scholarly research, and supervision of counselors.

The Doctor of Education program consists of advanced courses designed for those persons who wish to become directors of guidance or pupil personnel programs and coordinators or consultants in guidance and counseling programs in K-12 and intermediate school districts. The Ed.D. provides opportunities to improve skills and competencies as school counselors in counseling, program development, career development, consultation research, and supervision of counselors.

Time Limitation: Requirements for the Master of Arts or Master of Education degree must be completed within six years after completion of the first course applicable toward the degree. All degree requirements for the doctoral program must be completed within seven years from the time of official admission.

Writing Style: The counselor education unit has adopted the *Publication Manual of the American Psychological Association* as the style guide for preparation of all papers submitted in fulfillment of program requirements.

Class and Internship Scheduling: All counseling program courses are offered only in the evening hours (4:00 p.m. to 10:15 p.m.), permitting working students the opportunity to pursue their educational endeavors. Additionally, the counseling program will arrange with community settings (i.e., agencies, schools, institutions) whereby working students may complete the clinical portions of their programs as well as fulfill employment obligations elsewhere.

Licensure: Individuals in the counseling profession who practice in Michigan must seek professional licensure. Satisfactory completion of degree requirements in the counselor education master's and doctoral programs allows the student to apply for the Limited Licensed Professional Counselor (LLPC) credential in the State of Michigan. The Educational Specialist Certificate program does not meet Michigan eligibility requirements for the professional counselor licensure. Information on licensure may be obtained from the:

Michigan Department of Community Health
Board of Counseling
P.O. Box 30670
Lansing, Michigan 48909
telephone: 517-335-0918

Effective with the passing of PA 288 (July 10, 2000) an amendment in Act 451 of the Public Acts of 1976 (the Revised School Code), individuals

who complete the school counseling specialization (with or without a teaching certificate) may be employed as school counselors and recommended for the new School Counselor License (SCL). All applicants for the School Counselor License (SCL) must have received a passing score on the State of Michigan, Department of Education's Michigan Test for Teacher Certification (MTTC) Guidance Counselor Examination. MTTC examination scores must be furnished directly to Wayne State University by the MTTC testing agency, Evaluation Systems Group of Pearson. When registering for the MTTC, select "Wayne State University (31)" as a "College or University to Receive Scores."

Students whose examination scores were not released to Wayne State University should request an original score report from Evaluation Systems Group of Pearson. An original score report is required by the Michigan Department of Education for verification of test scores.

Counseling Accreditation: The Council for Accreditation of Counseling and Related Educational Programs (CACREP), a specialized accrediting body recognized by the Council on Postsecondary Accreditation (COPA), has conferred accreditation to the following programs in the counselor education program: M.A. with various specializations and the Ed.D. and Ph.D. programs in counselor education and supervision. In addition, the Rehabilitation Counseling and Community Inclusion major is accredited by the Council on Rehabilitation Education (CORE).

Educational Evaluation and Research Programs

Evaluation and Research offers concentrated programs for building careers and leadership positions in educational evaluation and statistics; computer applications; and research methodology.

Students who have already successfully achieved background, training, and experience in substantive disciplines of education and in non-education fields and who are interested in becoming more proficient in scientific inquiry, research strategies, evaluation and appraisal of studies, models and designs, and multivariate analysis, especially in conjunction with computer facilities, are afforded such opportunities in these programs. For optimum effective preparation, internships in research will be arranged upon request. The staff is available to students and faculty for consultation in research design and multivariate analysis.

Cooperative educational programs leading to training skills in Educational Evaluation and Research in Medical Education are also available. This specialized training is available in cooperation with selected faculty from the School of Medicine. Persons from the health sciences seeking educational research skills and persons from education backgrounds seeking health science education skills are brought together for their mutual growth

Educational Psychology

The Master's Degree programs in Educational Psychology are primarily concerned with the preparation of individuals working in settings such as schools, behavioral mental health care settings, business and other fields, who wish to develop skills and knowledge in the application of psychology. At the doctoral level, our program is focused on research and university teaching contexts. The Applied Behavior Analysis training emphasized working in clinical settings with people with Autism.

There is one Master of Education (M.Ed.) program in Educational Psychology, geared toward those who want to apply psychology/educational psychology to their current professions (e.g., teaching). Two majors are offered for the Master of Arts (M.A.) degree: School and Community Psychology and Counseling Psychology. The School and Community psychology program offers two years of course work, plus a one-year internship. Satisfactory completion of the School and

Community Psychology program allows the student to be certified as a school psychologist by the State of Michigan. It also allows the student to apply for a Limited License to Practice as a Psychologist (L.L.P.) in the State of Michigan. The major in Counseling Psychology has an emphasis in individual and marriage and family therapy and offers two years of course work plus one or two semesters of a clinical internship. Satisfactory completion of the Counseling Psychology program allows the student to qualify for the Limited License to Practice as a Psychologist in the State of Michigan and, with additional coursework, a State of Michigan license as a Marriage and Family Therapist. The Ph.D. in Educational Psychology has a concentration in Learning and Instruction science and is focused on educational psychology theory and research. Additionally, an Applied Behavior Analysis Graduate Certificate is offered for those who already hold a master's degree, or it can be accomplished as part of the M.Ed. in Educational Psychology. Through this training, students become eligible to sit for the Board Certified Behavior Analyst (BCBA) exam, which is part of earning the BCBA credential. All of these programs are described in more detail below.

The prospective student should recognize that a grade point average of 3.0 with no more than one earned grade of 'C' plus is required to continue in all of these programs and to graduate. The majors of School and Community Psychology and Counseling Psychology involve, in addition to course requirements, clinical experience in school and/or agency settings. Due to the clinical nature of the courses and the internship, both majors require students to have active liability coverage throughout the program. Retention in the program, graduation, and recommendation for certification/licensing approval depend upon demonstrated clinical skill as well as on the student's academic achievement. The staff will try to arrange for psychological practicums and internships in either a school system or a community mental health facility in keeping with program requirements. The Applied Behavior Analysis training also involves intensive training working with children in clinical settings and thus requires successful demonstration of both clinical and academic skills.

In addition to completing all procedures for admission to the Graduate School, each applicant must complete an admissions form obtained from the Program Area website: <http://coe.wayne.edu/tbf/> for the program of interest, and follow those instructions carefully. Applicants are strongly encouraged to contact the program area secretary to ensure they have received complete and updated application and program information.

Rehabilitation Counseling and Community Inclusion

The counselor education program offers a Master of Arts degree in rehabilitation counseling and community inclusion that reflects current trends in psychosocial rehabilitation, career development and job placement, supported employment, psychiatric disabilities, trauma, and the support of individuals with disabilities.

The program's mission is to provide an effective model of graduate education in partnership with rehabilitation constituencies to promote quality rehabilitation services. It aims to prepare qualified, reflective, and innovative rehabilitation professionals who are able to competently work with individuals with disabilities and their families, regardless of the type or severity of disability, or of ethnic, racial or cultural background. The program seeks to promote the empowerment, self-determination, economic self-sufficiency, independence, and inclusion in community life of individuals with disabilities.

The master of arts program provides students with the opportunity to develop skills and abilities in disability adjustment counseling, career counseling, job development and placement, vocational and educational

evaluation, psychosocial rehabilitation, trauma and mental illness. The degree requirements in this program are designed to develop the competencies necessary for students to apply for the Certified Rehabilitation Counselor (CRC) credential after completion of their course work. In addition, students are eligible to apply for the Limited Licensed Professional Counselor (LLPC) credential in the State of Michigan.

The prospective student should recognize that this program involves both course requirements and clinical experience in community rehabilitation settings. Retention in the program and recommendation for credentials depend upon demonstrated clinical skills as well as academic achievement. Requirements for the Master of Arts degree must be completed within six years after admission to the program.

Advanced Studies in School Psychology (Graduate Certificate)

Admission Requirements

Admission to this program is only for students in the M.A. program in School & Community Psychology. Admission is contingent upon admission to the Graduate School (p. 19). Students must be in good academic standing in the School and Community Psychology M.A. program to apply and enroll in the Certificate program. Students will be admitted concurrently to the Certificate program for the Spring/Summer of second year of the Master's program.

The last fourteen credits of the School and Community Psychology program are the internships, which are the basis for this Graduate Certificate and are required for full completion of this program and for recommendation for state school psychology certification and state psychology limited licensing (LLP). Students are required to complete a professional portfolio, to attend supervision meetings, and to conduct a comprehensive case study and presentation at the end of the Certificate program. Students are evaluated by both university faculty and field supervisors on both their professional skills and their professional behaviors and attitudes as outlined by the National Association of School Psychologists. During Spring/ Summer of the second year, students will complete their Master's requirements by enrolling in EDP 8320 and EDP 8330 for a total of eight credits and during this time period, students will be concurrently enrolled in the M.A. and Graduate Certificate program, and these credits will count toward both the Master's degree and the Certificate. Graduate School policy permits nine credits to be applied to fulfill the requirements of both a Certificate and a Master's degree.

Students will complete the final six credits of the Certificate by enrolling in EDP 8360 during the third year of the program. The curriculum is outlined below.

Code	Title	Credits
EDP 8320	Internship in Clinical Procedures I	5
EDP 8330	Practicum/Field Experience in School Psychology	3
EDP 8360	Internship in School Psychology	6
Total Credits		14

All course work must be completed in accordance with the academic procedures of the College of Education (p. 86) and the Graduate School's (p. 35) regulations governing graduate scholarship and degrees.

The School Psychology Graduate Certificate is designed to be completed in 1 year.

This program will cost \$11,803.14 for in-state tuition and fees and \$22,536.52 for out-of-state tuition and fees if completed within normal time. There may be additional costs for living expenses. These costs were accurate at the time of posting, but may have changed.

Fewer than 10 students completed this program within normal time. Typical student debt has been withheld to preserve the confidentiality of the students.

This program does not meet any licensure requirements.

For more information about graduation rates, loan repayment rates, and post-enrollment earnings about this institution and other postsecondary institutions please click here: <https://collegescorecard.ed.gov/>.

Applied Behavior Analysis (Graduate Certificate)

Admission Requirements

Admission to this program is contingent upon admission to the Graduate School (p. 19). A 2.75 minimum GPA is required for consideration for the program. Applicants apply both online to Graduate Admissions and directly to the program. In addition to uploading transcripts, program area application with essay, and letters of recommendation with the online application; these materials must also be mailed directly to the program. On the program area application, applicants must specify whether they are seeking the Graduate Certificate in ABA only or they wish to take the ABA sequence as part of the M.Ed. program. Contact the program secretary for guidance with your application.

This program is calendar controlled in that all students begin and end together, taking the same courses as a cohort. Required courses are:

Code	Title	Credits
EDP 7101	Foundations of Applied Behavior Analysis	4
EDP 7102	Assessment Techniques in Applied Behavior Analysis	4
EDP 7103	Applied Behavior Analysis Treatment Planning	4
EDP 7104	Research Methods in Applied Behavior Analysis	3
EDP 7105	Ethical Practice in Applied Behavior Analysis	3
Total Credits		18

Additional practicum experiences are offered that are not part of the actual degree or certificate requirements. All course work must be completed in accordance with the academic procedures of the College

of Education (p. 86) and the Graduate School's (p. 35) regulations governing graduate scholarship and degrees.

The Applied Behavioral Analysis Graduate Certificate is designed to be completed in 3 years.

This program will cost \$21,693.67 for in-state tuition and fees and \$40,093.75 for out-of-state tuition and fees if completed within normal time. There may be additional costs for living expenses. These costs were accurate at the time of posting, but may have changed.

Fewer than 10 students completed this program within normal time. Typical student debt has been withheld to preserve the confidentiality of the students.

Program meets licensure requirements in the following States: Michigan

For more information about graduation rates, loan repayment rates, and post-enrollment earnings about this institution and other postsecondary institutions please click here: <https://collegescorecard.ed.gov/>.

Applied Behavior Analysis (M.S.)

The Master of Science in Applied Behavior Analysis trains practitioners extensively in applied behavior analysis with a focus on treating autism.

Recent Michigan legislation mandates insurance companies to cover therapeutic services for autistic persons by BCBA credentialed treatment providers. To earn a BCBA credential, a master's degree in psychology, education/special education, or applied behavior analysis is required, plus a specific sequence of 6 classes (22 credit hours total) and 5 field experiences/practica (10 credits total) across three semesters as described below. Our course sequence has received full approval by the Behavior Analytic Certification Board (BACB). Either way, this set of courses that will meet the requirements for students to sit for the BCBA exam. Students who successfully complete the courses are eligible to sit for the BCBA examination, which, upon passing, would lead to the BCBA credential.

Students enter the program as a cohort and must take their classes in sequence together as outlined by the program—it is a block scheduled program with no variations permitted. The cohort model includes a combination of supported and independent learning through classroom based and practiced-based hands-on learning. Cohort-mates work collaboratively throughout their training. Thus, all classes in the BCBA course sequence are live, classroom-based courses. Online and hybrid classes are not available for the courses in this sequence. Although some students find the online and hybrid courses convenient, the interactive learning environment and the hands-on learning activities offered in the BCBA course sequence classes at Wayne State University will help students take their learning experiences into the workplace for a more seamless crossover between classroom and field placement activities. This instills a sense of professional community not only during the program, but as students move into the field as practitioners. Our program emphasizes the importance of intensive learning while in the program as well as the need for collaborative lifelong learning. Our cohorts begin each fall and primarily run during the day. Most classes are typically taught at the Oakland Community College Orchard Ridge Campus in Farmington Hills.

Admission Requirements

Admission to this program is contingent upon admission to the Graduate School (p. 19). A 2.75 minimum GPA is required for consideration for the program. Applicants apply both online to Graduate Admissions and directly to the program. Additionally, applicants must provide

three letters of recommendation, complete a program area application including a professional essay, and attend a personal interview.

There are a total of 40 credits for full program completion. Students are required to complete each semester sequentially, with full-time enrollment. Transfer credits are not accepted into this program.

Code	Title	Credits
EDP 5450	Child Psychology	3
EDP 7610	Child and Adolescent Psychopathology	3
EER 7610	Evaluation and Measurement	2
EDP 7101	Foundations of Applied Behavior Analysis	4
EDP 7102	Assessment Techniques in Applied Behavior Analysis	4
EDP 7103	Applied Behavior Analysis Treatment Planning	4
EDP 7104	Research Methods in Applied Behavior Analysis	3
EDP 7105	Ethical Practice in Applied Behavior Analysis	3
EDP 7111	Advanced Applied Behavior Analysis Treatment Planning	4
EDP 7106	Field Experience in Applied Behavior Analysis I	2
EDP 7107	Field Experience in Applied Behavior Analysis II	2
EDP 7108	Field Experience in Applied Behavior Analysis III	2
EDP 7109	Field Experience in Applied Behavior Analysis IV	2
EDP 7110	Field Experience in Applied Behavior Analysis V	2
Total Credits		40

All course work must be completed in accordance with the academic procedures of the College of Education (p. 86) and the Graduate School's (p. 35) regulations governing graduate scholarship and degrees.

Counseling (Education Specialist Certificate)

The Educational Specialist Certificate program in Counseling is intended for those who are presently counseling professionals who want to improve their competency in counseling and/or receive training in counselor clinical supervision. The Specialist Certificate does not meet eligibility requirements for the Professional Counselor License in the State of Michigan.

Admission Requirements

Admission to this program is contingent upon admission to the Graduate School (p. 19). After admission to the College, program requirements also include a master's degree from an accredited graduate school in counseling, rehabilitation counseling, or a closely related field that includes entry-level curricular experiences and demonstrated knowledge and competency in each of eight common counseling areas required by CACREP.

- human growth and development
- social and cultural foundations
- helping relationships
- groups
- life and career development
- appraisal
- research and evaluation
- professional orientation

A minimum grade point average of 3.0 ('B' or above) on the master's degree is required for admission consideration. Additionally, applicants

to the educational specialist certificate program must hold professional counselor licensure (LLPC or LPC) prior to admission.

Applicants are also required to conduct a single 45-minute counseling session in the College of Education Counseling and Testing Center. This session will be audio and/or video taped for evaluation by the Advanced Admissions Advisory Committee. An interview with the Advanced Admissions advisory Committee is also required.

A minimum of thirty credits is required for this certificate. Course requirements for the program are determined in consultation with an advisor. All course work must be completed in accordance with the academic procedures of the College of Education (p. 86) and the Graduate School's (p. 35) regulations governing graduate scholarship and degrees.

The Counseling Education Specialist Certificate is designed to be completed in 2 year.

This program will cost \$25,027.04 for in-state tuition and fees and \$48,027.14 for out-of-state tuition and fees if completed within normal time. There may be additional costs for living expenses. These costs were accurate at the time of posting, but may have changed.

Fewer than 10 students completed this program within normal time. Typical student debt has been withheld to preserve the confidentiality of the students.

This program does not meet any licensure requirements.

For more information about graduation rates, loan repayment rates, and post-enrollment earnings about this institution and other postsecondary institutions please click here: <https://collegescorecard.ed.gov/>.

Counseling (M.A.)

Admission Requirements

Admission to these programs is contingent upon admission to the Graduate School (p. 19). Admission to the counselor education program requires a grade point average of 2.50 or above for the undergraduate course work. Program admission requirements include: a personal interview with an admission committee and a typewritten autobiographical statement reflecting the applicant's respective personal and professional history with a statement of rationale for seeking admittance to the program.

Admission to the specialization in Art Therapy also requires submission of a portfolio of original art work, to be evaluated by art therapy faculty, that demonstrates competence with art materials

The various specializations in counseling require a set of core courses and individual requirements depending on the goals of the student. All specializations require a foundation program of sixty credits under Plans A or C. Additional credits may be required for students completing more than one specialization area. Outlines of recommended minimum programs in the specialization area may be secured from the unit secretary. Cognate course work within and /or outside the College of Education supportive of a major in counselor education is required of all candidates. All course work must be completed in accordance with the academic procedures of the College of Education (p. 86) and the Graduate School's (p. 35) regulations governing graduate scholarship and degrees.

Counseling (M.Ed.)

Admission Requirements

Admission to these programs is contingent upon admission to the Graduate School (p. 19). Admission to the counselor education program requires a grade point average of 2.50 or above for the undergraduate course work. Program admission requirements include: a personal interview with an admission committee and a typewritten autobiographical statement reflecting the applicant's respective personal and professional history with a statement of rationale for seeking admittance to the program.

Admission to the specialization in Art Therapy also requires submission of a portfolio of original art work, to be evaluated by art therapy faculty, that demonstrates competence with art materials.

The various specializations in counseling require a set of core courses and individual requirements depending on the goals of the student. All specializations require a foundation program of sixty credits under Plans A or C. Additional credits may be required for students completing more than one specialization area. Outlines of recommended minimum programs in the specialization area may be secured from the unit secretary. Cognate course work within and /or outside the College of Education supportive of a major in counselor education is required of all candidates. All course work must be completed in accordance with the academic procedures of the College of Education (p. 86) and the Graduate School's (p. 35) regulations governing graduate scholarship and degrees.

Counseling Education (Ed.D. and Ph.D.)

Admission Requirements

In addition to meeting the basic admission requirements of the Graduate School (p. 19) and those of the College (p. 89), a master's degree from an accredited graduate school is required. The master's program must be in counseling, school counseling, rehabilitation counseling, or a closely related field that includes entry-level curricular experiences and demonstrable knowledge and skill competency in each of the eight areas required by CACREP.

- human growth and development
- social and cultural foundations
- helping relationships
- groups
- life and career development
- appraisal
- research and evaluation
- professional orientation

In addition to either a grade point average of 3.5 or above in the master's degree, or a grade point average of 3.35 or above in a master's degree and a grade point average of 3.75 in the Counseling Educational Specialist Certificate program, admission criteria include consideration of academic aptitude for doctoral work, previous professional experience, demonstrated counseling skills, knowledge of counseling concepts, and potential for professional leadership.

A department-written examination is required. Doctoral program applicants are also required to take the Graduate Record Examination and have the results forwarded to the program area. In addition, a demonstration of counseling skills is required using the Counseling and

Testing Center. A single 45-minute session is audio- and/or video-taped and reviewed by the Advanced Admission Committee.

Applicants must make up any deficits or remedial work as listed on their approved application for admission form before beginning advanced doctoral course work. Specifically, those persons who have master's degrees from closely-related fields (psychology, social work, nursing) must complete all academic and clinical prerequisites required before beginning advanced doctoral course work.

The doctoral program is individually developed with a major advisor. Within the guidelines of the Graduate School and the college, students build a specialized curriculum. All course work must be completed in accordance with the academic procedures of the College of Education (p. 86) and the Graduate School's (p. 35) regulations governing graduate scholarship and degrees.

All students complete:

1. two doctoral seminars from foundation areas;
2. a concentration in counselor education;
3. at least two doctoral level supervised internships;
4. course work aimed at developing competence in statistics and research methodologies;
5. course work selected by the student, major advisor and cognate advisor which supports an additional area of professional expertise;
6. and electives chosen from the major field or the cognate area.

Additional requirements for the doctoral degrees are explained in greater detail in program materials available from the program area

Counseling Psychology (M.A.)

Admission Requirements

Admission to this program is contingent upon admission to the Graduate School (p. 19). A minimum of fifteen credits in psychology or related field approved by admissions committee and a minimum undergraduate point average of 3.0 are prerequisite to admission. A program application, Graduate Record Examination (GRE), three letters of recommendation, undergraduate/graduate transcripts, and a personal interview with the admissions committee are required. Applications are accepted after September 1 with a rolling deadline starting February 15 through March 15. Applicants are encouraged to apply early and will be interviewed by the Admissions Committee until a class of fifteen students is admitted. Students are admitted once each year and begin the program in the summer semester of the year for which they are admitted. It is strongly suggested that applicants reference the Counseling Psychology (<http://coe.wayne.edu/tbf/educational-psychology/counseling->) website to obtain program and scholarship information and a program application. Application for graduate admissions must be made online.

This program is calendar controlled in that all course work must be completed in semester sequences commencing with the Summer term. Students should refer to the program for current plans of work and course requirements (<http://coe.wayne.edu/tbf/educational-psychology/counseling->).

A clinical 500-hour internship/practicum is required for licensure in the State of Michigan and must be conducted in a non-profit setting under the supervision of a licensed psychologist. All course work must be completed in accordance with the academic procedures of the College of Education (p. 86) and the Graduate School's (p. 35) regulations governing graduate scholarship and degrees.

Educational Evaluation and Research (Ed.D. and Ph.D.)

Admission Requirements

Applicants to doctoral programs in this area must meet the admission requirements stated under Admission to Graduate Programs (p. 89).

Basic degree requirements for the Ph.D. and Ed.D. programs are stated at Doctor of Education Requirements (p. 86). All courses in the major are selected in consultation with an advisor. All course work must be completed in accordance with the academic procedures of the College of Education (p. 86) and the Graduate School's (p. 35) regulations governing graduate scholarship and degrees.

Educational Evaluation and Research (M.Ed.)

Admission Requirements

Students are admitted every semester and must meet the general admission requirements for the Master of Education (p. 87).

A minimum of thirty credits is required for this degree under Plan A, B, or C. Required courses include ED 7999 if Plan B or C is elected, or ED 8999 for Plan A. In addition, a minimum of twelve credits in educational evaluation and research. All course work must be completed in accordance with the academic procedures of the College of Education (p. 86) and the Graduate School's (p. 35) regulations governing graduate scholarship and degrees.

Educational Psychology (M.Ed.)

Admission Requirements

Admission to this program is contingent upon admission to the Graduate School (p. 19). A minimum undergraduate GPA of 2.75 is required. GRE scores are not required. In addition to uploading transcripts to an online Graduate Admissions application, contact the program secretary for a program area application and guidance with your application.

This program requires a minimum of thirty credits, including the basic degree requirements for the Master of Education (p. 87). All course work is selected in consultation with an advisor and must be completed in accordance with the academic procedures of the College of Education (p. 86) and the Graduate School's (p. 35) regulations governing graduate scholarship and degrees.

Educational Psychology (Ph.D.)

Admission Requirements

Applicants should refer to the admission requirements for doctoral degrees (p. 121) in the College of Education. The Educational Psychology Doctor of Philosophy Program has a concentration in Learning and Instruction Sciences. Successful applicants seeking admission to the Learning and Instruction Sciences concentration should have a master's degree in Educational Psychology, or a closely related field. In addition to uploading materials to an online Graduate Admission application, materials must be submitted to the chairperson of the Learning and Instruction Sciences concentration.

Applicants are strongly encouraged to contact the program secretary to ensure they have received complete and updated application and program information BEFORE APPLYING.

Learning and Instruction Sciences

The concentration in Learning and Instruction Sciences is a full-time program adhering to the scientist-practitioner model and prepares students in the systematic study of human learning and educational instruction. This concentration integrates interdisciplinary training in instructional technology and educational evaluation and research to prepare graduates to design, implement, and evaluate learning in various contexts. The Learning and Instruction Sciences concentration prepares students for research, service, and administrative careers, teaching in diverse educational settings, and consultation in the private sector. In addition to the departmental requirements for the doctoral degree, students take courses in ethics and professional standards, advanced theories of learning and development, instructional technology, and program evaluation. Students may also select a number of courses in the psychology department.

Research course requirements include a minimum of fifteen credits in research and evaluation (EER). The remaining plan of work is arranged with an advisor depending on master's level training and future goals, and includes 30 dissertation credits, which is a requirement set by the university.

All doctoral students will complete a comprehensive examination at the end of coursework and a final report and defense after completion of the dissertation. All course work must be completed in accordance with the academic procedures of the College of Education (p. 86) and the Graduate School's (p. 35) regulations governing graduate scholarship and degrees. All Plans of Work are developed in consultation with the student's assigned advisor.

Rehabilitation Counseling and Community Inclusion (M.A.)

Admission Requirements

Admission to this program is contingent upon admission to the Graduate School (p. 19). To qualify for admission, applicants must have a bachelor's degree or its equivalent from an accredited college or university, adequate preparation and the ability to pursue graduate study in the area of rehabilitation counseling. Regular admission may be recommended with a grade point average of 3.0 or above for undergraduate coursework. Detailed information on admission can be obtained from the counseling program area.

The Master of Arts degree in this discipline requires the completion of a minimum fifty-five credits. Course requirements include:

Code	Title	Credits
RCI 7120	Assessment for Counselors and Rehabilitation	3
RCI 7150	Rehabilitation Counseling Professional Roles	3
RCI 7410	Foundations of Rehabilitation Counseling	3
RCI 7420	Medical Aspects of Disability	3
RCI 7430	Counseling Practicum ¹	4
RCI 7450	Employment for Persons with Disabilities	3
RCI 7460	Counseling Internship ²	1-6
RCI 7470	Family and Community Support for Inclusion	3
RCI 7480	Psychosocial Aspects of Disability	3
RCI 7510	Special Topics in Rehabilitation Counseling	1-3
CED 6080	Theories of Counseling	3
CED 7000	Introduction to Group Work	2
CED 7010	Group Counseling Participation	2
CED 7040	Techniques of Counseling	4

CED 7080	Career Development and Counseling	3
CED 7730	Cultural and Diversity Issues in Mental Health Treatment Research	3
EDP 7490	Psychological Evaluation I	1-3
EER 7640	Fundamentals of Quantitative Research	3
ED 7999	Terminal Master's Seminar and Essay or Project ³	3

¹ Minimum of 100 clock hours required.

² Minimum of 600 clock hours required.

³ Terminal master's project with an emphasis on rehabilitation counseling.

All coursework must be completed in accordance with the academic procedures of the College of Education (p. 86) and the Graduate School's (p. 35) regulations governing graduate scholarship and degrees. All Plans of Work are developed in consultation with the student's assigned advisor.

The above outlines of recommended minimum degree program requirements are consistent the Council on Rehabilitation Education (CORE), the Commission on Rehabilitation Counselor Certification (CRCC) and the state of Michigan licensure requirements.

School and Community Psychology (M.A.)

Admission Requirements

Admission to this program is contingent upon admission to the Graduate School (p. 19). A minimum of fifteen credits in psychology or educational psychology is prerequisite to admission. A program area application, the verbal and quantitative sections of the Graduate Record Examination (GRE), three letters of recommendation and a personal interview are required for admission consideration. Applications are accepted between September 1 and February 1. Students are admitted once each year and must begin the program in the fall semester of the year for which they are admitted. It is a cohort program so students are given a sequence in which to take classes. In addition to uploading transcripts to an online Graduate Admission application, there are additional items to be submitted directly to the program. Contact the program secretary for guidance in applying. As part of the completion of the master's program, students move into a graduate certificate program that culminates at the end of year 3.

Course work requirements include:

Code	Title	Credits
EDP 7220	Psychotherapy with Children and Adolescents	4
EDP 7260	School-Based Consultation and Intervention	3
EDP 7300	Ethics, Standards, and the Practice of Psychology	4
EDP 7400	Foundations of Social Psychology	3
EDP 7410	Human Developmental Psychology	3-4
EDP 7420	Introduction to Behavioral Psychology	4
EDP 7430	Applications I: Behavioral Psychology and Social Learning	4
EDP 7561	Assessment of Cognitive Functioning	4
EDP 7562	Assessment of Personality and Social-emotional Functioning	4
EDP 7563	Assessment of Academic Achievement	3
EDP 7564	Assessment and Intervention for Academic Learning Difficulties	4
EDP 7610	Child and Adolescent Psychopathology	3

EDP 8320	Internship in Clinical Procedures I	1-6
EDP 8330	Practicum/Field Experience in School Psychology	1-8
EDP 8360	Internship in School Psychology	1-8
EER 7640	Fundamentals of Quantitative Research	3
ED 7999	Terminal Master's Seminar and Essay or Project	3
Total Credits		52-72

All course work must be completed in accordance with the academic procedures of the College of Education (p. 86) and the Graduate School's (p. 35) regulations governing graduate scholarship and degrees.

COLLEGE OF ENGINEERING

Dean: Farshad Fotouhi

Graduate education is important to the engineer interested in keeping pace with rapid growth in science and technology and in preparing for changes in job responsibilities. In the midst of greater Detroit's large community of professional engineers, Wayne State University's College of Engineering has an important mission to provide opportunities for study in contemporary areas and the latest developments in technology.

The College of Engineering is a leading research institution in Michigan and the nation. This is reflected in its instructional programs, which are supported both by its own research and by that of other institutions, and in the suitability of its industrial/educational environment for advanced study. Engineering graduate students are drawn both from the upper ranks of graduating seniors in various disciplines and from established engineers interested in pursuing advanced degrees. Criteria for admission are restrictive, and a high standard of performance is expected of successful candidates. In short, the challenges are great, but the potential rewards are equally promising.

The College of Engineering offers the Master of Science and Doctor of Philosophy degrees in biomedical, chemical, civil, computer science, electrical, industrial, mechanical, and materials science and engineering. In addition, a Master of Science may be earned in alternative energy technology, electric-drive vehicle engineering, engineering management, engineering technology, and manufacturing engineering. Graduate certificate programs are also available in a number of areas for additional specialization after completion of an undergraduate or graduate engineering degree. These programs are described generally below and specifically in the subsequent, departmental sections.

The College provides support for the various instructional and research laboratories in the construction, modification, repair, calibration and installation of experimental equipment. In addition, the College offers sophisticated assistance in the design of electronic and instrumentation equipment and devices. Qualified students use these facilities under the supervision of trained professionals.

Excellent research programs are available in this college; graduate students can write a thesis or dissertation based on their participation in these programs to fulfill part of their degree requirements.

Many graduate students pursue their studies in the College while working full or part-time in local industry, where they have available to them unique facilities not found within the University. Students in such situations are encouraged to pursue their graduate research at their places of employment, under the joint supervision of the faculty advisor and a company representative. Such research may be applicable as credit earned for directed study courses, master's theses, or doctoral dissertations. However, after completion of a Bachelor of Science degree and one or more years of on-the-job experience, additional training at the graduate level is often desirable without participation in a research program, and the College provides an optional master's degree program without a thesis research requirement.

Research Centers

Opportunities exist at both the graduate and advanced undergraduate levels for students to participate in the programs of the research centers.

Bioengineering Center

The Bioengineering Center is an interdisciplinary group engaged in biomedical research, utilizing the principles of mechanical, chemical, electrical, and computer engineering. Faculty members from the College

of Engineering collaborate with colleagues from the Wayne State Medical School in joint efforts to solve both basic and clinical problems. The principal area of research in the Center is injury biomechanics, with major areas of research include trauma biomechanics, the mechanical basis for low back pain, human locomotion studies, and orthopedic biomechanics. Other activities include the development of advanced anthropometric test dummies and impact studies using horizontal accelerator test sleds.

Center for Automotive Research

The Center for Automotive Research coordinates a variety of programs in different automotive areas, such as combustion engines, dynamics, acoustics, vibrations, and electronic controls. The engine research deals with the basic processes of thermodynamics, heat transfer, mass transfer and chemical kinetics which affect the performance, fuel economy, startability and emissions of different types of engines. A fully-instrumented cold room is used for some of these studies. Research is also conducted on diesel engine combustion and alternate fuels. The research consists of extensive theoretical analysis, supported by experimental investigations. The Center combines expertise from the Departments of Mechanical, Chemical, and Electrical and Computer Engineering.

Facilities of the College

Wayne State University has been identified as a PACE Partner, a group of fifty universities world-wide who have been selected by the PACE (Partnership for the Advancement of Collaborative Engineering Education) consortium to offer educational programs that are centered around the concepts of product life cycle management and the design, analysis, and planning processes in the artifice of virtual worlds with relevance to real world situations. PACE provides Wayne State students with access to the same state-of-the-art computer software and tools that are used in industry. In addition, opportunities for collaborative project development exist within the College, with other PACE institutions in Michigan, and with universities across the globe. This provides College of Engineering students with an advantage when entering the workforce or when transitioning to new roles following their graduate education.

Stimulating productive research and teaching methods are the goals of the Engineering Computer Center. These goals are met by providing and supporting the latest technologies in computer hardware, software, and networking including those associated with PACE. All curricula are designed to take advantage of these advancements and students feel the impact of these tools in their coursework. The latest in simulation, analysis, and design software are provided for students to use and master.

College of Engineering facilities include five separate buildings with over 330,000 square feet of classroom, office and laboratory space. The primary home of the College of Engineering is a three-story office building directly attached to a laboratory wing and connected to the Engineering Development Center. This has created a stimulating and productive research and teaching facility for the College. Among these facilities are multimedia classrooms, a comprehensive computer center, electronics and machine shops, dedicated teaching laboratories, and sophisticated research laboratories. The four multimedia classrooms support innovative course delivery techniques, including interactive distance learning with classrooms at a variety of sites within WSU, at other colleges and universities, and at industrial locations. The computer facilities include dedicated computer graphics, design, and personal computing hardware and software. The Marvin I. Danto Engineering Development Center, which opened in 2009, provides 80,000 square feet of space dedicated to advanced research and student collaborative projects. This includes the PACE Teaming Center, a classroom that is designed to support student team-based collaboration. The Division of

Engineering Technology is housed in a separate building of approximately 24,000 square feet, located at 4855 Fourth Street. This recently remodeled facility houses labs and classrooms, including a teaching machine shop.

Research Facilities

The College oversees a wide range of undergraduate, graduate, and faculty research laboratories and excellent support facilities, housed in its five-building complex. The Bioengineering Center operates in close collaboration with Wayne's Medical School, employing unique equipment, in particular its own massive horizontal accelerator, to conduct impact studies emphasizing biomechanics. The College's Manufacturing Engineering Building (MEB) is home to the Department of Industrial and Systems Engineering. The most striking feature of MEB is its multi-story High Bay Lab, Wayne's largest research space, capable of accommodating full-scale production machinery. The MEB includes eighteen other labs currently in use by faculty from several departments. The Marvin I. Danto Engineering Development Center, which opened in 2009, provides significant new research space that focuses on interdisciplinary research and collaboration. EDC laboratories are focused on the urban infrastructure, alternative energy and advanced propulsion systems, nanotechnology, and smart sensors. The main Engineering Building, one of the largest structures on campus, houses specialized labs of many types. The Center for Automotive Research conducts interdisciplinary investigations of diesel and gasoline engines in a series of specialized test cells, including the engineering cold room a fully-instrumented lab capable of reaching a temperature of minus-40 C. The College's anechoic chamber is a walk-in scale facility dedicated to advanced research on vibrations and noise, particularly in automobiles. Other labs house research on diesel and gasoline combustion, structures and earthquake systems (utilizing the two-story structures lab, capable of testing multi-ton building components), soil mechanics, pollution and remediation models, polymers and composite materials, environmental kinetics, electron microscopy, catalysis, surface science, biomedical sciences, high-performance computing, neural networks, communication and information systems, materials/ fluids/metallurgy testing, solid-state electronics, robotics and computer-aided manufacturing, microprocessors, optical computing, and molecular beams and laser light scattering. Of particular note is the nano-fabrication (n-Fab) Laboratory, along with a Class 10 clean room, built with a \$7.0 million equipment grant from Delphi Automotive and a \$3.0 million investment by Wayne State University for infrastructure development. This investment provides the College of Engineering with one of the nation's leading nano-fabrication research laboratories. The College's research equipment is maintained, modified, and, in many cases, constructed by its in-house electronics shop and machine shop.

Accreditation

All of the undergraduate curricula of the Division of Engineering leading to a Bachelor of Science degree in engineering are accredited by the Engineering Accreditation Commission (EAC) of the Accreditation Board for Engineering and Technology (ABET) (415 North Charles Street, Baltimore, MD 21201, 410-347-7700). Electrical/ Electronic Engineering Technology and Mechanical Engineering Technology programs are accredited by the:

Technology Accreditation Commission (TAC) of ABET
1415 North Charles Street
Baltimore, MD 21201
410-347-7700

Details of these programs are provided in the Undergraduate Bulletin. Curriculum accreditation is based upon careful periodic appraisal of the faculty, educational program, and facilities of the College. This approval provides assurance of an up-to-date, high quality education pertinent to

the engineering profession. Such accreditation is recognized by other universities, prospective employers, and state professional licensing agencies.

Academic Regulations for the College of Engineering

For complete information regarding the academic rules and regulations of the University, students should consult the Academic Regulations (p. 12) section of this bulletin. The following additions and amendments pertain to the College of Engineering.

Matriculation

After receiving credentials from the Office of Admissions, and before registration, a student should contact the graduate advisor in his/her major department (see the following list) for details of program planning and to discuss requirements and course work.

Academic Scholarship

A graduate degree is evidence of scholarly achievement, academic excellence, critical and creative abilities, the capacity to apply and interpret what has been learned, and proper use of the work of others. Continuance in graduate status is contingent on satisfactory scholarship with grades of 'B' or better. Every effort is made to assist the student whose work suffers as a result of conditions beyond his/ her control.

Graduate students are required to earn a g.p.a. of 3.0 ('B' average) or better in all graduate-level subjects taken at WSU in order to satisfy degree requirements. Students whose cumulative g.p.a. falls below 3.0 are placed on probation, and the performance of these students is closely monitored by the departmental graduate committee. Students who fail to remediate this probationary status within eight credits after being placed on probation are subject to termination from the graduate program.

Any grade lower than 'B-minus' in a core course MUST be repeated. (The Industrial and Systems Engineering Department requires students to repeat core courses in which they have received a grade of 'B-minus' or lower. The Biomedical Engineering Department will not count any course with a grade lower than a 'B-minus' towards degree requirements.) No more than two courses may be repeated in a graduate program (the Electrical and Computer Engineering and the Mechanical Engineering Departments permit the repetition of only one course), and a student must have the appropriate approvals BEFORE the repeat registration takes place. These two repeats may consist of a second attempt of two separate courses or two repeat attempts of a single course. Per University policy, any course in which a mark appears on the student's transcript (including WN, WP, or WF) counts as an attempt to earn credit in that course. These attempts are therefore factored into the assessment of allowed repeats unless an exception is granted during the semester of the withdrawal (see below). 'F' grades earned while in the College of Engineering may be the basis for immediate termination. Consult each department for additional requirements.

All course work must be completed in accordance with the academic procedures of the College of Engineering and the Graduate School (p. 12) governing graduate scholarship and degrees. University rules require an overall g.p.a. of 3.0 or higher for graduation, in all graduate work completed at Wayne State.

Plan of Work

Students who have been admitted into a graduate program in the College of Engineering are required to meet with their graduate program advisor before registering for their first term, and then to enroll in those courses

mutually decided upon. During the first semester of their graduate program, in consultation with their graduate advisor, all graduate students must develop a Plan of Work that determines their anticipated schedule for each term.

Students who fail to meet with their graduate advisor before registration or who do not have an approved Plan of Work may be administratively withdrawn from their classes if, in the opinion of the graduate program advisor, they are not taking classes appropriate to their program.

If a student has been admitted to one graduate program and decides not to pursue that program, the student **MUST** obtain admission to another graduate program, or he/she must withdraw from the University. To obtain admission into another program, the student must meet all the admission requirements for that program and must provide the required admission documents. Approval of the transfer of program by the original admitting program is required. International students on a student visa must also amend their I-20 form at the University Office of International Students and Scholars to reflect the change in program.

Directed Study

Independent study may be authorized and applied to completion of degree requirements provided the area of interest is an integral part of the student's graduate program and is not covered by scheduled courses. Students who elect a directed study are required to submit a Directed Study Authorization Form, which includes a description of the proposed directed study, with the necessary signatures, prior to registration.

Withdrawal from Courses

Engineering students are expected to assess early in the semester if they have appropriate time and background to successfully complete a course. Therefore, following University policy, all courses for which a grade or mark (including WN, WP, and WF) appears on the transcript will count as an attempt at a course. Students may drop a course within the first two weeks of the semester without a notation appearing on the transcript. Starting with the fifth week of the semester, a withdrawal will be noted on a student's transcript. If a student feels that extenuating circumstances beyond his or her control justify the withdrawal and support its not being counted as an attempt at the course, a petition must be submitted for consideration to the Associate Dean for Academic Affairs during the semester in which the course is taken. If the petition is approved, the withdrawal mark will remain on the transcript but a notation will be made in the student's advising record to not count it as an attempt for assessment of allowed repeats.

Cross-Registration Opportunities

Students are encouraged to consider incorporating into their course of study up to two courses elected in any of three exchange arrangements: the Michigan Intercollegiate Graduate Studies Program (MIGS) (p. 19), the University of Windsor – WSU, Exchange Program Agreement (p. 19)), and Dual Enrollment with the University of Michigan (p. 19). The latter enrollment may be utilized at both the Ann Arbor and Dearborn campuses. Consult the graduate advisor and the Dean's Office for information and application forms applicable to these programs.

The Master of Science is offered in alternative energy technology, biomedical, chemical, civil, computer, and electrical engineering; engineering management, engineering technology; industrial, manufacturing, and mechanical engineering; and materials science and engineering.

Admission Requirements

Admission to these programs is contingent upon admission to the Graduate School (p. 19). Applicants to the engineering master's degree programs must also satisfy the following criteria.

In addition to the minimum requirement for admission of an overall grade point average of 2.8 from an institution accredited by the Accreditation Board for Engineering and Technology (ABET), a minimum grade point average of 2.8 in all junior and senior year (upper division) courses is required. Applicants from abroad will be judged on the basis of their academic record and on the credentials of the school from which they graduated. Individual departments and interdisciplinary programs may require a higher minimum upper division or cumulative g.p.a.; please refer to the departmental sections of the Graduate Bulletin. Regular admission may also be granted to applicants with undergraduate degrees from regionally (non-ABET) accredited institutions in engineering, physics, chemistry, mathematics and computer science who meet the equivalent of the above minimum standards. Additional course work will generally be required of such applicants.

Degree Requirements

The College of Engineering's minimum requirement for the master's degree is thirty credits. Some programs require more than this minimum. Master of Science degrees are offered under the following degree plans approved by the College:

Plan A: A minimum of twenty-four to twenty-six credits in course work, a minimum of six credits of thesis, and a seminar or an oral presentation on the thesis research.

Plan B: A minimum of thirty to forty-two credits, including a four to six credit project. (Engineering Management and Engineering Technology ONLY.)

Plan C: A minimum of thirty to forty credits in course work. A thesis is not required.

Major Credits

Credits earned in the student's major field are designated as major credits. Of the minimum of thirty-two credits required for the master's degree, at least one-half of the course work, exclusive of thesis credit, must be in the major field. At least six credits in the major must be in upper level graduate courses, as designated by the graduate program.

Thesis Degree Plan

Students who elect the thesis degree plan (Plan A) are required to file a Thesis Outline Approval Form for approval by the advisor and the program's Graduate Officer before writing the thesis. Final recommendation of approval for the thesis requires an oral defense of the thesis material in the presence of a departmental faculty committee of at least three persons, including the advisor and one faculty member from outside the department.

Transfer Credits

Every Wayne State student pursuing the M.S. degree must complete at least twenty-four credits in residence. As a privilege, a student may file a Petition for Transfer of Graduate Credit, provided that the credits were earned in residence at another accredited graduate school, are certified as graduate credit with grades of 'B' or better on an official transcript, and are certified by the advisor to be acceptable in the student's degree program. Courses transferred may NOT have been used as applicable credit toward any other degree. In order to transfer grades from another institution, that institution has to be listed on

the student's WSU Admissions Application, or specifically mentioned in correspondence to the College prior to matriculation. Special documentation is necessary to transfer credits earned outside of North America. A student whose Petition to transfer credits is denied may still receive credit by examination.

All transcripts supporting the transfer of credits must be for credits earned prior to the student's first semester at WSU. While enrolled in a degree program in the College of Engineering, graduate-level courses taken at another institution may not be applicable to the College of Engineering degree without approval prior to registration for any such courses. A Transfer of Credit request should not be submitted before the completion of eight credits in residence at Wayne State. All credits transferred must conform to the six-year time limitation for completion of requirements.

Since twenty-four credits of any M.S. program must be earned at WSU, the number of transfer credits from a related, uncompleted graduate program at another institution are limited to eight credits for a thirty-two credit M.S. program and twelve credits for a thirty-six credit M.S. program. Exceptions to this limit are made only for identified collaborative programs with partner universities.

The Doctor of Philosophy (Ph.D.) degree is offered by the College of Engineering in the following major areas: biomedical engineering, chemical engineering, civil engineering, computer engineering, computer science, electrical engineering, industrial engineering, materials science and engineering, and mechanical engineering.

Admission Requirements

Admission to the doctoral programs of the College is contingent upon admission to the Graduate School (p. 19). For admission into an engineering doctoral program, the student's overall grade point average must be 3.2 or better, with a 3.5 in the last two years as an undergraduate student if being admitted directly from a bachelor's program. Students who do not satisfy these minimum standards will not be considered for admission to the program until they have completed a master's degree and have earned a grade point average in courses taken for graduate credit that is not less than 3.5. Individual departments may have higher admission requirements.

Generally, students applying for admission to the doctoral program should have first achieved an M.S. degree. Students completing their M.S. degree programs who wish to enter the doctoral program must have a minimum grade point average of 3.5 at the graduate level.

Degree Requirements

A minimum of ninety credits beyond the bachelor's degree is required for the doctoral program, including thirty credits for the dissertation. The thirty credit dissertation registration requirement is fulfilled by registering for the courses 9991, 9992, 9993, and 9994 (Doctoral Dissertation Research and Direction I, II, III, and IV, respectively) offered under various subject area codes, in consecutive academic year semesters. For specific course requirements, students should consult the departmental sections of this bulletin, which follow.

There are no general foreign language requirements for the doctoral degree. Specific requirements can be made by the Ph.D. advisory committee and are designed to suit individual Ph.D. applicants.

If the student fails to meet the doctoral requirements, he/she may transfer appropriate credits toward the Master of Science degree program in the discipline in which credits were accrued.

Biomedical Engineering

Office: 818 W. Hancock; 313-577-1861

Interim Chairperson: Guangzhao Mao

Associate Chairpersons: Mahendra Kavdia (COE), E. Mark Haacke (SOM)

<http://engineering.wayne.edu/bme/>

The field of biomedical engineering applies engineering science and design to the solution of problems related to human physiology and pathophysiology. Working at the interface of engineering and medicine, biomedical engineers work to prevent injury, diagnose disease, and treat illnesses or injuries that occur. Built on a strong research foundation that stretches back more than seventy years, the biomedical engineering program at Wayne State provides coursework and research opportunities in a broad range of areas in biomechanics, tissue engineering and biomaterials, biomedical imaging, bioinstrumentation and computational biology.

- Injury Biomechanics (Bridge Graduate Certificate) (p. 129)
- Biomedical Engineering (M.S.) (p. 127)
- Biomedical Engineering (Ph.D.) (p. 128)
- Biomedical Imaging (dual-title program) (p. 129)

Biomedical Engineering (M.S.)

Program specialization in this master's degree may be under-taken in these areas:

- injury biomechanics
- bioinstrumentation
- biomedical imaging
- tissue engineering and biomaterials
- systems biology and computational biology

These specializations are available to both part-time and full-time students, in either research or non-research degree programs.

Admission Requirements

Admission to this program is contingent upon admission to the Graduate School (p. 19). In addition, the minimum requirements for admission into the M.S. Program in Biomedical Engineering are:

1. Official transcripts from an accredited institution showing completion of an engineering baccalaureate degree. Students with a baccalaureate degree from a non-engineering discipline will be considered for admission to the program if they have the prerequisite coursework in Calculus (1, 2 and Differential Equations) and Physics (1 and 2). Students without subsequent mathematical application course work (e.g. life science) must have passed these courses with a grade of 'B' or better.
2. A Grade Point Average (g.p.a.) of 3.0 or higher on a 4.0 scale will be considered for Regular Admission and g.p.a. between 2.8 and 3.0 will be considered for Qualified Admission.
3. Submission of a one-page statement of purpose describing their interest in graduate degree in biomedical engineering.
4. Applicants must also submit Graduate Record Examination (GRE) scores if applying for financial support.
5. International applicants are required to submit a WES Evaluation (<http://wayne.edu/admissions/graduate/international>).

This Master of Science degree in Biomedical Engineering is offered under the following options:

Plan A: minimum of thirty-two credits in course work including an eight credit thesis.

Plan C: minimum of thirty-four credits in course work.

For either plan, students must complete the following Core Requirements:

Code	Title	Credits
BME 5010	Quantitative Physiology	4
BME 5020	Computer and Mathematical Applications in Biomedical Engineering	4
BME 8070	Seminar in Biomedical Engineering	1

Additional courses can be chosen from the curriculum outlined for each specialization. Students must take a minimum of six credits at the 7000-level or above if they are enrolled in Plan A, and a minimum of nine credits at the 7000-level or above (with six credits in BME) if they are enrolled in Plan C. Directed study and directed research courses (BME 7990 and BME 7996) cannot be counted toward the satisfaction of the 7000-level course requirement. A maximum of four credits in directed study or directed research (BME 5990, BME 7990, and BME 7996) may be applied towards the degree. Thesis credits are earned through satisfactory completion of BME 8999. All course work must be completed in accordance with the regulations of the Graduate School (p. 12) and the College of Engineering (p. 125). Courses to be applied to the degree requirements must be completed with a grade of 'B' minus or higher.

Students enrolled in the master's degree program are required to file a Plan of Work with the Graduate Officer of the program by the time eight graduate credits have been earned. Following this, the applicant will petition his/her advisor to advance his/her rank to 'candidate.' Candidate status must be authorized by the time twelve graduate credits have been earned, or else subsequent registration will be denied.

Biomedical Engineering (Ph.D.)

Program specialization in this Ph.D. degree may be under-taken in these areas:

- injury biomechanics
- bioinstrumentation
- biomedical imaging
- tissue engineering and biomaterials
- systems biology and computational biology

These specializations are available to both part-time and full-time students, in either research or non-research degree programs.

Admission Requirements

Admission to this program is contingent upon admission to the Graduate School (p. 19). In addition, the minimum requirements for admission into the Doctoral Program in Biomedical Engineering are:

1. A student seeking admission to the doctoral program must have a Bachelor's or Master's degree in Biomedical Engineering, or other closely related field from an accredited institution.
2. A g.p.a. of at least 3.5/4.0 in the applicant's Bachelor's degree or a g.p.a. of at least 3.3/4.0 in the applicant's Master's degree is required.
3. All applicants must submit Graduate Record Examination (GRE) scores.
4. Three letters of recommendation.
5. An approved faculty member who agrees to be the student's PhD advisor. The student must contact the faculty member with whom

they want to work and obtain this approval before their application is considered for admission.

6. A statement of research interests and goals.
7. For admission and full funding consideration, please have your application completed by March 1st. Most decisions will be released by April 1st.
8. Current master's students in the WSU BME program must have:
 - a. At least 12 earned credits in the BME courses
 - b. A GPA of at least 3.3/4.0 in the BME courses
 - c. An approved faculty member who agrees to be the student's Ph.D. advisor

Completion of a minimum of ninety credits beyond the baccalaureate degree is required for the Ph.D. program. These credits are distributed as follows:

Code	Title	Credits
Core Courses		
BME 5020	Computer and Mathematical Applications in Biomedical Engineering	4
BME 7010	Functional Anatomy	4
BME 8070	Seminar in Biomedical Engineering	1
BME 8080	Doctoral Seminar in Biomedical Engineering	1
BIO 5040 or FPH 7015	Biometry Biostatistics I	4
Life Sciences Minor		6
Dissertation Credits		30
General Courses		40
Total Credits		90

Students must complete the General Courses in graduate coursework, in addition to the core courses and including the satisfaction of the minor in life sciences. The life sciences minor may be satisfied by the completion of six credits of course work in graduate-level life science beyond the core curriculum. The student is required to seek approval of his/her selection of courses from their doctoral advisor. At least twelve credits in general courses must be chosen from those offered by the Biomedical Engineering Program. At least thirty credits of relevant courses must be at the 7000-level or above. Up to twelve credits in directed study and research can be applied towards the degree.

An approved Plan of Work should be filed with the Office for Graduate Studies as early in the graduate program as possible. The student must have filed the Plan of Work before being recommended for candidacy status. Courses to be applied to the degree requirements must be completed with a grade of 'B' minus or higher.

Academic Scholarship: All course work must be completed in accordance with the regulations of the Graduate School (p. 12) and the College of Engineering (p. 125).

Examinations: All Ph.D. students must pass the examinations outlined below. After successful completion of the written qualifying examination, a student may be admitted to the status of doctoral candidate.

1. **Written Qualifying Examination:** All Ph.D. students are required to attempt the written qualifying examination before completion of forty-eight credits after their baccalaureate degree. Each student has two chances to pass the examination; if the exam is not passed by the second attempt, the student will be dismissed from the program (the option of obtaining a terminal master's degree will apply). The examination is offered once a year during the Spring/Summer semester.

- Dissertation Prospectus Defense (Oral Qualifying Examination):**
This examination shall be a presentation of the student's proposal for dissertation research, and will be administered by the student's Doctoral Dissertation Committee. This Oral Examination MUST be satisfactorily completed at least twelve months prior to the Dissertation Defense.
- Dissertation** requirements are satisfied by the successful completion of thirty credits of dissertation research. The thirty credit dissertation registration requirement is fulfilled by registering for the courses BME 9991, BME 9992, BME 9993, and BME 9994 (Doctoral Dissertation Research and Direction I, II, III, and IV, respectively), in consecutive academic year semesters. All Ph.D. students must pass the written qualifying examination and apply for doctoral candidacy before election of dissertation credits. All Ph.D. students must register for dissertation credits or doctoral candidacy maintenance status (BME 9995) for any semester in which they utilize campus facilities or consult with faculty, even though they may not be enrolled in a formal lecture course.
- The dissertation defense will be publicized by public notice to the academic community; at this session the candidate presents his/her doctoral research for final approval by the Doctoral Dissertation Committee.
- A minimum of one first author peer reviewed journal publication is required before defending the Doctoral Dissertation.

For additional information, students should consult the Graduate School's regulations (p.) governing doctoral study.

Biomedical Imaging (dual-title program)

The objective of this program is to prepare students who are currently enrolled in any biomedical related Ph.D. program or in an M.D./ Ph.D. program to become strong imaging researchers. With an excellent imaging background, they have the potential to obtain positions in either industry or academia and tackle problems in engineering and science with new insights and new equipment.

Admission Requirements

Biomedical Engineering Ph.D. students by the end of the first year of their program may submit a written request to the Biomedical Engineering Graduate Program Director to add the Biomedical Imaging dual-title program to their plan of study.

See full description, Admission requirements, and Curriculum at this link: <http://www.tbi.wayne.edu/dualtitle>

Core Courses (16-18 credits): Students should select 16 to 18 credits (5 or 6 courses) from the course list (please see the program director for an updated course list). Note that these courses can be counted as part of the Ph.D. requirements.

Seminar Courses (0-1 credits): Doctoral seminar series related to imaging can be taken by the student and counted toward 1 credit for the dual title program.

Special Laboratory Rotation (2-3 credits): The student will be expected to gain at least one semester's experience in an imaging laboratory, different from their advisor's laboratory, to broaden their imaging experience.

Injury Biomechanics (Bridge Graduate Certificate)

This bridge graduate certificate program aims to provide specialized skills and training engineers will need to address impact biomechanics and motor vehicle trauma in the automotive and defense industries as well as blast-induced injury biomechanics and counter measures. Those enrolled in the program will take a core program in physiology and impact biomechanics, with additional electives to broaden the educational program.

As a Bridge Graduate Certificate, students who complete this program have the option to continue into the M.S. program in Biomedical Engineering. Credits earned as part of the Bridge Graduate Certificate in Injury Biomechanics can be applied towards the M.S. degree requirements as long as they were completed with at least a 'B' (3.0 g.p.a.) and within six years of the completion date for the M.S.

Admission Requirements

Admission to this program is contingent upon admission to the Graduate School (p. 19). A minimum grade point average for regular admission to Graduate Certificate Program is 3.0. However, those with g.p.a. of 2.70 can be admitted conditionally requiring that they maintain a 3.0 average g.p.a. for the first two consecutive semesters. Applicants should have a Bachelor of Science degree in engineering. Applicants with degrees in chemistry, physics, or life sciences who wish to be considered for admission must have completed the undergraduate engineering calculus sequence and the calculus-based undergraduate physics sequence.

Students must complete sixteen credits in BME courses related to injury biomechanics, including three required courses.

Code	Title	Credits
Required Courses		
BME 5010	Quantitative Physiology	4
BME 7100	Mathematical Modeling in Impact Biomechanics	4
BME 7160	Impact Biomechanics	4
Elective		
Select one of the following:		4
BME 6480	Biomedical Instrumentation	
BME 7120	Applied Finite Element Methods in Biomechanical Analysis	
BME 7150	Biomechanics of Blast-Related Injuries	
BME 7170	Experimental Methods in Impact Biomechanics	

All requirements must be completed within a three-year period. The minimum cumulative g.p.a. must be 3.0 at the time of graduation. No grade lower than a B-minus will be accepted for credit towards certificate requirements. All course work must be completed in accordance with the regulations of the Graduate School (p. 12) and the College of Engineering (p. 125).

Chemical Engineering and Materials Science

Office: 1100 W. Engineering Building; 313-577-3800
 Chairperson: Guangzhao Mao
<http://engineering.wayne.edu/che/>

Chemical Engineering

The field of chemical engineering embraces those industries in which matter is treated to effect a change of state, energy content, or

composition, and in which chemical engineers may be concerned with either the processes or the process equipment used for them. Examples of such industries are: fuels and petroleum processing; heavy, fine and pharmaceutical chemicals; textiles and fibers; food processing and products; natural and synthetic rubbers and plastics; explosives, pulp and paper; surface coatings; disposal of chemical plant wastes; atomic energy processes; environmental control and medical systems; and the general fields of biotechnology.

Areas of specialized research and support for graduate students include thermodynamics and transport properties of polymer solutions and melts, processing, rheology and separations of polymers, heterogeneous catalysis, surface science of catalytic and polymeric materials, environmental transport and management of hazardous waste, process design, control, and manufacturing based on sustainability principles, renewable energy, biocatalysis in multiphase systems, bioremediation for waste treatment, tissue engineering, and pharmacokinetics.

Materials Science and Engineering

Materials problems constitute an important area of research and development in the complex technology of our industrial society. The use of advanced materials, such as thermoplastic and thermoset polymers, intermetallic alloys, reinforced plastic or metal composites, ceramics and electronic materials, in the manufacturing of durable goods and devices has presented challenges to the profession of materials science and engineering. Materials engineers must understand the behavior of advanced materials, their chemical, mechanical, optical, thermal, and electrical properties, and the atomic or molecular structure that determines these properties. They can then apply their knowledge to the synthesis and processing of materials into useful products by controlling and improving their properties.

Areas of specialized research and support for graduate students include processing and rheology of polymers, thermodynamics and transport properties of polymer solutions and melts, computer simulation of polymeric and microporous materials, deformation and fracture of materials at elevated temperatures, effects of processing on mechanical properties of intermetallic alloys, influences of microstructure on fatigue, fracture toughness, stress cracking and corrosion in metals, nondestructive mechanical testing of composites, surface science of catalytic and polymeric materials, electronic materials and sensors for automotive applications.

- Polymer Engineering (Graduate Certificate) (p. 131)
- Chemical Engineering (M.S.) (p. 130)
- Materials Science and Engineering (M.S.) (p. 131)
- Chemical Engineering (Ph.D.) (p. 130)
- Materials Science and Engineering (Ph.D.) (p. 131)

Chemical Engineering (M.S.)

The Master of Science program is open to students with a bachelor's degree in engineering, and other mathematics-based sciences. The program is designed to accommodate those students employed in local industries, as well as full-time students, by offering a majority of its courses in the evening.

Admission Requirements

Regular Admission

Admission to this program is contingent upon admission to the Graduate School (p. 19). Regular admission requires a 3.0 grade point average or the equivalent as determined by the Department Graduate Officer.

Combined B.S./M.S. for Students with a B.S. in Chemistry

This program is designed for individuals who have earned a baccalaureate in chemistry from an accredited United States institution with a minimum grade point average of 3.0. Students are first admitted into the undergraduate program and are then eligible to earn both the B.S. in Chemical Engineering and, once admitted to the Graduate School, the M.S. degree. Evaluation of prerequisite requirements and applicable transfer credit will be determined by the departmental advisor.

A combined total of sixty-six credits is required: a minimum of thirty-four credits for the second baccalaureate and thirty-two credits for the master's degree. For additional information regarding specific course requirements, contact the departmental advisor: 313-577-3716.

This Master of Science degree is offered under the following options:

Plan A: Thirty-two credits including an eight credit thesis.

Plan C: Thirty-two credits of course work.

Both options require the following core courses:

Code	Title	Credits
CHE 7100	Advanced Engineering Mathematics	3
CHE 7200	Advanced Transport Phenomena	3
CHE 7300	Advanced Thermodynamics	3
CHE 7400	Advanced Kinetics and Reactor Design	3

In addition to the above core-course requirement for the Master of Science degree (General), the Chemical Engineering MS Graduate Program also offers four technical options, which include Biomolecular Engineering, Nanotechnology, Process Engineering and Project Management, and Sustainable Engineering. These options have different core course requirements.

All course work must be completed in accordance with the regulations of the Graduate School (p. 12) and the College of Engineering (p. 125).

Chemical Engineering (Ph.D.)

Admission Requirements

Admission to this program is contingent upon admission to the Graduate School (p. 19). Regular admission requires a 3.5 grade point average in a Master of Science program, or a Bachelor of Science program from an accredited U.S. institution. Evaluation of admission prerequisites will be determined by the Department Graduate Officer.

Candidates for the doctoral degree must complete ninety credits beyond the baccalaureate, including thirty credits of dissertation direction. The thirty credit dissertation registration requirement is fulfilled by registering for the courses CHE 9991, CHE 9992, CHE 9993, and CHE 9994 (Doctoral Dissertation Research and Direction I, II, III, and IV, respectively), in consecutive academic year semesters. Credit distribution must also include at least thirty credits in graduate courses numbered 7000 and above, including the core courses:

Code	Title	Credits
CHE 7100	Advanced Engineering Mathematics	3
CHE 7200	Advanced Transport Phenomena	3
CHE 7300	Advanced Thermodynamics	3
CHE 7400	Advanced Kinetics and Reactor Design	3

The program requires a qualifying examination (written and oral, taken after the equivalent of one year of course work), an approved dissertation

outline and prospectus, and a final oral examination after completion of the doctoral dissertation. Students should consult the Graduate School's regulations (p.) governing doctoral study.

Materials Science and Engineering (M.S.)

Admission Requirements

Admission to this program is contingent upon admission to the Graduate School (p. 19).

The Master of Science in Materials Science and Engineering program is open to students with a bachelor's degree in engineering or the physical sciences. Admission requires a 3.0 grade point average, or the equivalent as determined by the Department Graduate Officer. Applicants whose baccalaureate degrees are not in materials or metallurgical engineering, or whose undergraduate preparation is evaluated as insufficient, may be required to elect additional courses prior to admission.

The master's degree is offered by this department under the following options:

Plan A: thirty-two credits in course work, including an eight credit thesis.

Plan C: thirty-two credits in course work.

Requirements for both options include at least twenty-six credits in materials science and engineering courses, including the core courses:

Code	Title	Credits
MSE 5650	Surface Science	3
MSE 7300	Advanced Thermodynamics	3
MSE 7400	Mechanical Behavior of Materials	3
PHY 6450	Introduction to Material and Device Characterizations	4

All course work must be completed in accordance with the regulations of the Graduate School (p. 12) and the College of Engineering (p. 125).

Materials Science and Engineering (Ph.D.)

Admission Requirements

Admission to this program is contingent upon admission to the Graduate School (p. 19). Regular admission requires a 3.5 grade point average in the Master of Science degree or in the Bachelor of Science degree, from an accredited U.S. institution, and the written approval of the student's advisor (selected from the departmental faculty). Evaluation of admission credits is determined by the Department Graduate Officer.

A minimum of ninety credits beyond the Bachelor of Science degree is required in the Doctor of Philosophy program, including thirty credits in dissertation direction. The thirty credit dissertation registration requirement is fulfilled by registering for the courses MSE 9991, MSE 9992, MSE 9993, and MSE 9994 (Doctoral Dissertation Research and Direction I, II, III, and IV, respectively), in consecutive academic year semesters. Credit distribution must also include at least thirty credits in graduate courses numbered 7000 and above, including the core courses:

Code	Title	Credits
MSE 5650	Surface Science	3
MSE 7300	Advanced Thermodynamics	3
MSE 7400	Mechanical Behavior of Materials	3

PHY 6450	Introduction to Material and Device Characterizations	4
CHM 7060	Materials Chemistry and Engineering <small>Students may choose either PHY 6450 or CHM 7060</small>	3

Note: Students are required to take four core courses, including MSE 5650, MSE 7300, and MSE 7400, plus either PHY 6450 or CHE 7060.

Also required are: a qualifying examination, taken after the equivalent of one academic year of course work; an approved dissertation outline and prospectus; and a final oral examination, taken after the completion of the Ph.D. dissertation. Students should consult the Graduate School's regulations (p.) governing doctoral study.

Polymer Engineering (Graduate Certificate)

This program provides specialized formal education for working engineers and scientists. Those enrolled in the program will learn the fundamentals of polymer science and engineering, extend their knowledge of current polymer research topics, and maintain technical competitiveness by broadening their polymer expertise.

Admission Requirements

Admission to this program is contingent upon admission to the Graduate School (p. 19). Applicants must have a Bachelor of Science degree in engineering, chemistry, or physics.

Students must complete twelve credits:

Code	Title	Credits
CHE 5350	Polymer Science	3
CHE 5360	Polymer Processing	3
Select six credits in electives		6
Total Credits		12

The minimum grade point average must be 3.0. All course work must be completed in accordance with the regulations of the Graduate School (p. 12) and the College of Engineering (p. 125). For additional information and advice about electives, contact Dr. Z. Cao (zcao@wayne.edu).

The Polymer Engineering Graduate Certificate is designed to be completed in 1 years.

This program will cost \$11,649.82 for in-state tuition and fees and \$20,849.86 for out-of-state tuition and fees if completed within normal time. There may be additional costs for living expenses. These costs were accurate at the time of posting, but may have changed.

Fewer than 10 students completed this program within normal time. Typical student debt has been withheld to preserve the confidentiality of the students.

This program does not meet any licensure requirements.

For more information about graduation rates, loan repayment rates, and post-enrollment earnings about this institution and other postsecondary institutions please click here: <https://collegescorecard.ed.gov/>.

Civil and Environmental Engineering

Office: 2100 E. Engineering Building; 313-577-3789

Chairperson: Mumtaz Usman

<http://www.cee.eng.wayne.edu>

The urban crisis in America has brought into sharp focus the profession of civil engineering and the responsibilities of its practitioners. The civil engineer is a leader in such diverse areas of concern as the design of structural systems; water resources planning; the treatment and ultimate disposal of noxious solid and liquid wastes; design of building systems which will provide adequate housing for urban dwellers, commerce and industry; the development of adequate transportation systems; construction methods and management; and the implementation and management of public works infrastructure projects designed to improve the urban environment. The responsibilities of the civil engineer directly involve the health, safety and welfare of the public.

The Department of Civil and Environmental Engineering offers graduate degree programs in which students may specialize in the following areas: structures, geotechnical engineering (M.S. only), environmental engineering, transportation, and construction management.

- Civil Engineering (M.S.) (p. 132)
- Civil Engineering (Ph.D.) (p. 132)

Civil Engineering (M.S.)

The civil engineering graduate program at Wayne State University is designed to accommodate the needs of both full-time on-campus students and part-time students concurrently employed by local industry or government. To this end, a majority of graduate classes are held in the evening. Full-time students have the opportunity to participate in research and experimental work with the faculty, while pursuing their graduate courses.

Admission Requirements

Admission to this program is contingent upon admission to the Graduate School (p. 19). Additionally, all applicants must satisfy the following:

1. The student must have an undergraduate engineering degree from an institution accredited by the Accrediting Board for Engineering and Technology (ABET) or from a comparable foreign institution. In the event that the degree is in some field other than civil engineering, the student may be required to complete a set of prerequisite undergraduate courses before graduate degree credit may be accrued
2. The student must have an overall grade point average (g.p.a.) of 3.0 for regular admission. Qualified or probationary admission may be granted to students with a lower g.p.a. Conditions of such admissions are specifically mandated and applicants should contact the Department for details.

The Master of Science is offered by this department under the following options:

Plan A: Thirty credits including a six credit thesis.

Plan C: Thirty credits of course work.

For either plan, credits must be distributed as follows: at least twenty credits must be taken in the major (CE courses). There must be two courses numbered 7000-8999, and a cluster of courses which will constitute a core, to be selected from one of the following areas: environmental engineering, geotechnical engineering, structures, transportation, and construction management.

Students must maintain a grade of 'B' or better in all core courses. The credit distribution requirements do not include thesis credit for Plan A candidates.

Within the first nine to twelve credits in graduate work, the student should file an advisor-approved Plan of Work. All course work must be completed

in accordance with the regulations of the Graduate School (p. 12) and the College of Engineering (p. 125).

Civil Engineering (Ph.D.)

The Department offers doctoral programs in all the major areas listed as core specializations under the Master of Science degree: environmental engineering, geotechnical engineering, structures, transportation, and construction management.

Admission Requirements

Admission to this program is contingent upon admission to the Graduate School (p. 19). For admission to the Ph.D. program, the student's overall grade point average must be 3.2 or better, and 3.4 in the last two years as an undergraduate student. Students who do not satisfy these minimum standards will not be considered for admission to the program until they have completed a M.S. degree and have earned a grade point average in courses taken for graduate credit which is not less than 3.5.

Candidates for the doctoral degree must complete ninety credits beyond the baccalaureate, including thirty credits of dissertation direction, and sixty credits of course work and directed study. The thirty credit dissertation registration requirement is fulfilled by registering for the courses CE 9991, CE 9992, CE 9993, and CE 9994 (Doctoral Dissertation Research and Direction I, II, III, and IV, respectively), in consecutive academic year semesters. All doctoral students are required to submit a Plan of Work indicating their course work (with major/minor designation), and developed in consultation with an advisor. Additionally, students should consult the Graduate School's regulations (p.) governing doctoral study.

Computer Science

Office: 5057 Woodward, Suite 3010; 313-577-2477
Chairperson: Loren Schwiebert
<http://engineering.wayne.edu/cs>

The mission of the Department of Computer Science at Wayne State University is to provide excellence in teaching, research, public service, and leadership in the computer science profession and the community. The Department provides a high-quality, innovative, baccalaureate and graduate education that emphasizes the fundamentals of computer science as well as the most recent technological innovations, preparing students for employment and advanced studies. Students are encouraged to become involved in research programs in order to enhance their education and their employment opportunities. Through the use of our state-of-the-art laboratory facilities, students can conduct basic and applied research of high quality, influence, visibility, and potential community impact. The Department continues to develop cooperative research relationships within and outside the computer science discipline, as well as with industry, government and alumni, and local community organizations. This worldwide interaction with professional organizations provides our students with the highest standards, goals, and professional practices.

The Department of Computer Science operates eight instructional and multiple research laboratories comprising about 300 state-of-the-art workstations and servers.

- Computer Science (M.S.) (p. 133)
- Computer Science (Ph.D.) (p. 134)
- Data Science and Business Analytics (M.S.) (p. 135)

Computer Science (M.S.)

The Department of Computer Science awards the degree of Master of Science with a major in computer science under two plans. The two plans are distinguished on the basis of the breadth and depth of the material covered. The Master of Science degree under the Plan A option is granted to students who pursue a more concentrated set of topics culminating in a master's thesis. The Master of Science degree under the Plan C option offers students experience in many areas of computer science.

The great variety of subjects that are part of computer science, together with the immense diversity of their applications, makes it imperative that students in the master's program maintain close contact with their advisors in order to achieve a coherent plan of study directed toward a specific goal. In particular, elections of courses should be made after consultation with and the approval of the student's advisor.

Admission Requirements

Admission to these programs is contingent upon admission to the Graduate School (p. 19). In addition, applicants are expected to have attained a level of scholarship in the baccalaureate program equal to a grade point average of 3.0 or better, including adequate preparation in computer science and supporting courses in mathematics. Normally, the entering student will be expected to have fulfilled the equivalent of the requirements for the Bachelor of Science degree at Wayne State University and to have satisfied any deficiencies by successfully completing necessary prerequisite course work, before becoming an applicant for an advanced degree. The Graduate Record Examination (GRE) is not required for admission to the Master of Science program.

Applicants must submit official transcripts from each college or university attended, three letters of recommendation, Graduate Record Examination scores, a statement of approximately 300 words describing the applicant's academic and professional goals, and the Computer Science Graduate Admission Evaluation Form.

Students planning to pursue some of the more theoretical courses may find it necessary to have additional preparation in mathematics and/or computer science. The student should make a careful examination of the prerequisites for advanced courses in his/her areas of special interest before seeking admission. Prerequisite course work which is required as a condition of admission must be completed prior to electing graduate courses.

Upon admission, each student is assigned an advisor for guidance and direction in meeting degree requirements and academic goals. As the student's interests in computer science become more focused, a change in advisor may be necessary; forms for this purpose are available from the Department office. Such a change must be done prior to submitting the Plan of Work.

Candidacy: By the time twelve credits have been earned, a Plan of Work must be developed with the student's advisor and submitted to the Chairperson of the Computer Science Graduate Committee. In the Plan of Work the student indicates his/her choice of master's program, either Plan A or C (see below). Upon approval of the Plan of Work by the Graduate Committee, the student is considered a degree candidate. The student is not permitted to take more than twelve credits in the master's program unless candidacy has been established. If the student has not graduated after two years as a candidate, the Plan of Work will be reviewed for possible adjustment.

Scholarship/Academic Probation: Students must maintain a minimum overall 3.0 grade point average. Failure to do so for one semester places the student on academic probation. Failure to do so for two semesters will result in the student's dismissal from the graduate program. All

course work must be completed in accordance with the regulations of the Graduate School (p. 12) and the College of Engineering (p. 125).

The above requirements are those in force as of the publication date of this bulletin; however, students should keep in mind that the degree requirements for any particular student are those in force at the time of his/her admission.

Areas of Research

Computer and Network Systems: Networking & Distributed Systems, Computer Security, Parallel & Cloud Computing, Real-Time Systems, Software Engineering.

Information and Intelligent Systems: Databases, Machine Learning, Artificial Intelligence, Pattern Recognition, Computer Graphics & Visualization, Bioinformatics and Health Informatics.

Degree Requirements

The Master of Science degree is offered under either Plan A or Plan C. Plan A requires thirty credits and includes eight credits for the completion of a thesis. A thesis is a technical paper describing the original creative work of the author. The master's thesis work is directed by the student's advisor together with a committee of at least two additional faculty members. All committee members must read and approve the thesis, after which time it must be presented at a public session prior to final acceptance. The thesis must conform to the Graduate School's specifications on format and presentation (p.). Plan C requires thirty credits in course work. There is no thesis required for the Plan C Master's degree.

Course Requirements and Restrictions for Plan A

Code	Title	Credits
Select at least 1 course (minimum 3 credits) from each of the 3 groups ¹		
Group 1		
CSC 6500	Theory of Languages and Automata	
CSC 6580	Design and Analysis of Algorithms	
Group 2		
CSC 6110	Software Engineering	
CSC 6220	Parallel Computing I: Programming	
CSC 6280	Real-Time and Embedded Operating Systems	
CSC 6290	Data Communication and Computer Networks	
CSC 7110	Software Engineering Environments	
CSC 7220	Parallel Computing II: Algorithms and Applications	
CSC 7260	Distributed Systems	
CSC 7270	Advanced Computer Security	
CSC 7290	Advanced Computer Networking	
CSC 7430	Electronic Commerce	
Group 3		
CSC 6430	Game Programming and Design II	
CSC 6431	Game Programming and Design II: Lab	
CSC 6710	Database Management Systems I	
CSC 6720	Data Science Applications Development	
CSC 6800	Artificial Intelligence I	
CSC 6860	Digital Image Processing and Analysis	
CSC 6870	Computer Graphics II	
CSC 7300	Bioinformatics I: Biological Databases and Data Analysis	
CSC 7301	Bioinformatics I: Programming Lab	
CSC 7410	Bioinformatics II	

CSC 7710	Database Management Systems II	
CSC 7800	Artificial Intelligence II	
CSC 7810	Data Mining: Algorithms and Applications	
CSC 7825	Machine Learning	
CSC 7860	Computer Vision	
CSC 8999	Master's Thesis Research and Direction	8

¹ At least one course that must be taken at or above the 7000 level.

No more than three credits of CSC 7990, Directed Study, can be used to satisfy the degree requirements.

A student must have prior written consent of their advisor and the Graduate Committee Chair before registering for any course outside of the department.

At least twenty-four credits must be taken in residence.

Course Requirements and Restrictions for Plan C

Code	Title	Credits

¹ Select at least one course must be taken at or above the 7000 level. CSC 7990 does not satisfy the 7000 level requirement.

All credits must be taken from CSC designated courses.

At least twenty-four credits must be taken in residence.

Computer Science (Ph.D.)

The Doctor of Philosophy degree is conferred upon individuals who have demonstrated the ability to make original contributions to the knowledge in the field of computer science.

The Ph.D. program develops experts and professionals who will continue in academic work, industry, or government. It encourages the attainment of excellence in research and scholarship necessary to catalyze the advancement of computer science. The fulfillment of the doctoral degree requirements is monitored primarily through the proficiency, qualifying, and prospectus examinations, and the presentation of the dissertation.

The doctoral program emphasizes research and the Department encourages prospective Ph.D. candidates to involve themselves in faculty projects at their earliest possible opportunity.

Admission Requirements

Admission to this program is contingent upon admission to the Graduate School (p. 19). The successful applicant should possess a bachelor's or master's degree with a major in computer science or related field. In addition, applicants are expected to have attained a level of scholarship equal to a 3.3 grade point average or better in their most recent degree, along with adequate preparation in the computer science field and supporting courses in mathematics. Normally, the admitted student will be expected to have fulfilled the equivalent requirements for the Bachelor of Science in Computer Science, and to have satisfied any deficiencies in course content by successfully completing the pre-requisite course work prior to becoming an applicant for the advanced degree.

Applicants must submit to the Department official transcripts from each college or university that they have attended, three letters of recommendation, Graduate Record Examination scores, a statement of approximately 300 words describing the applicant's academic and professional goals, and the Computer Science Graduate Evaluation Form.

The Doctor of Philosophy degree requires ninety credits beyond the baccalaureate degree, thirty of which must be earned as dissertation credit. All course work must be completed in accordance with the regulations of the Graduate School (p. 12) and the College of Engineering (p. 125).

The computer science doctoral program is designed to be flexible, in order to meet the individual student's interests and to reflect the dynamic nature of the field. It is comprised of seven major stages:

- 1. Advisor/Program Selection:** The first stage is devoted to the selection of a faculty advisor, taking course work, and the production of a Plan of Work in consultation with the student's faculty advisor. Students are encouraged to investigate the different areas of research available by talking with various graduate faculty members and attending research seminars held by the Department. Advisor selection must be done within the first semester of admission. The student will then begin course selection and outlining the Plan of Work. The approved Plan of Work must designate a primary area of research and a minor field outside the Department. The student is encouraged, in consultation with their advisor, to define his/her own primary and minor fields of interest by the selection of a cohesive grouping of available graduate courses. The Plan of Work must include at least thirty credits in course work at, or above, the 7000 level. Twenty-one of these credits must be in course work other than directed study (CSC 7990). Both CSC 6500 and CSC 6580 must be part of the students' plan of work.

2. **Proficiency Examination:** In order to demonstrate knowledge of undergraduate-level computer science fundamentals, all Ph.D. students are required to pass the proficiency examination within the first two semesters of starting the program. This exam is given once each semester (not including the spring/summer term). The first attempt must be made in the students' first term in the program. In the first attempt, all three subject tests (Discrete Mathematics, Data Structures, and Computer Programming) must be attempted. Students are given two attempts to pass each subject. If all the exams are not passed after two attempts, the student will not be allowed to continue in the Ph.D. program.
3. **Qualifying Examination:** The Qualifying Exam is designed to determine the student's capacity for critical thinking as evident in both written and oral presentations. By the end of the second year in the program, students are required to make their first attempt at this exam. The exam consists of two parts. In the first portion of the exam the student must demonstrate his/her knowledge of theoretical computer science at the graduate level in each of the two core theory areas taught in CSC 6500 and CSC 6580, both of which the student must have passed with grades of 'B' or better, or must take an additional written exam on each subject. In the second portion of the exam, the competency of the student in their major area of the research is to be demonstrated in the form of a written document and accompanying oral presentation. The exam is offered in March and November, and the student will have two opportunities to pass both parts. Failure to pass both parts of the qualifying examination by the end of the fifth semester will result in the student's removal from the Ph.D. program. Upon successful completion of this requirement, a Report on Doctor of Philosophy Oral Examination form is submitted to the Graduate School.
4. **Dissertation Committee Formation:** With the approval of the Department Graduate Committee, the student establishes a Dissertation Committee that consists of four members. If there are co-chairs, the committee will consist of five members. At least two committee members are from the student's home department, Computer Science. The Chairperson and one additional member must hold a Regular Graduate Faculty appointment in the Department of Computer Science. The committee will also include an external member from outside the department. This Committee is responsible for administering the prospectus and the dissertation defense of the candidate.
5. **Candidacy:** Candidacy is reached after the Plan of Work has been approved, the written qualifying examination has been passed, approximately fifty credits in course work have been completed, and the dissertation committee has been formed. Upon completion of these requirements, a Recommendation for Doctor of Philosophy Candidacy Status form is submitted to the Graduate School in order to advance the Ph.D. applicant to Candidate Status.
6. **Prospectus:** After completion of the written qualifying exam, the student will continue to develop the dissertation prospectus, a document that provides evidence that the prospective doctoral candidate has completed adequate preliminary research on the topic of the proposed doctoral dissertation. The principles for determining the scope of the prospectus are detailed in the Doctoral Dissertation Outline and Record of Approval form (<http://wayne.edu/gradschool>).
7. **Dissertation:** The final stage is devoted primarily to the research and preparation of the dissertation. The thirty credit dissertation registration requirement is fulfilled by registering for the courses CSC 9991, CSC 9992, CSC 9993, and CSC 9994 (Doctoral Dissertation Research and Direction I, II, III, and IV, respectively), in consecutive academic year semesters. The dissertation research is presented and defended before the Dissertation Committee in a public lecture presentation.

Bioinformatics and Computational Biology (Ph.D.)

The concentration in bioinformatics and computational biology is intended for doctoral students in computer science who wish to receive research training in this specialization. Students will be prepared to do inter-disciplinary work in computer science, biology, and biomedical research. They will be trained to identify important biological problems that require bioinformatics and computational solutions, and to identify and apply appropriate approaches to address these problems. This concentration has been developed to provide outstanding and highly-motivated students with the specialized training needed to initiate productive work in their chosen careers. General admission and degree requirements are the same as cited above for the Ph.D. program. Concentration requirements are as follows:

Code	Title	Credits
Required Courses		
CSC 7300	Bioinformatics I: Biological Databases and Data Analysis	3
CSC 7301	Bioinformatics I: Programming Lab	1
CSC 7410	Bioinformatics II	4
MGG 7010	Molecular Biology and Genetics	4
Total Credits		12

Electives appropriate to each student's background and interests will be selected by the student and his/her advisor and could include courses such as: IBS 7030/MGG 7030, Functional Genomics and Systems Biology.

Note: students must complete MGG 7010 before enrolling in the Bioinformatics CSC courses and CSC 7300 and CSC 7301 must be completed before CSC 7410.

Data Science and Business Analytics (M.S.)

Analytics is a fast-growing STEM field with a high demand for individuals who possess the skills and expertise necessary to navigate the process of transforming data into insight for making sound business decisions. It's the reason that the WSU College of Engineering and the Mike Ilitch School of Business launched an innovative and interdisciplinary new master's program in data science and business analytics. Leaders in this field use data to fundamentally rethink all facets of business in many sectors, including manufacturing, supply chain, finance, and healthcare.

Admission

Admission to any graduate program is contingent upon admission to the Graduate School (p. 19). Applicants should have 3.0 or higher cumulative undergraduate g.p.a.

Interview

Prospective candidates being considered for admission may have to participate in an online interview with the admissions committee. Upon evaluating the application, admissible candidates will be contacted for scheduling these interviews.

Prerequisite Knowledge

Candidates are expected to well-versed in basic probability and statistics and also familiar with some programming language. Courses will be available in the summer months for admitted applicants to refresh their knowledge or makeup for any deficiency in this knowledge.

Students without this prerequisite knowledge but otherwise possess good credentials will be given conditional admission and have to take this

remedial coursework in the summer months prior to starting the program in the fall term

Graduate Management Admission Test (GMAT) and Graduate Record Examination (GRE)

Applicants must complete the GRE or the GMAT with minimum scores in the top 75 percentile.

Students must complete a total of 30 credits in order to earn the M.S. in Data Science and Business Analytics.

The "interdisciplinary core" includes 9 credits of coursework across business, computer science, and industrial engineering. On top of this integrated breadth of study covering the core areas of data science and business analytics, each student has 9 credits of "concentration" courses to give them depth in an engineering, business, or analytics area. Each student's 6 credits of elective choices can be personalized to support their individual career goals. The final piece of the curriculum is a 6-credit applied analytics practicum, in which students will work with companies and organizations on real analytics problems.

Base Curriculum for all Concentrations

Code	Title	Credits
	Data Science Analytics	3
	Data Science Strategy and Leadership	3
	Computing Platforms for Data Science	3
	Three Concentration Courses	9
	Two Elective Courses	6
	Data Science and Business Analytics Practicum	6
	Total Credits	30

Each student's course choices must satisfy the requirements of at least one of the defined concentrations: Data Computing, Advanced Analytics, or Data-Driven Business

Electrical and Computer Engineering

Office: 3100 W. Engineering Building; 313-577-3920
 Chairperson: Mohammed Ismail Elnaggar
<http://engineering.wayne.edu/ece/>

In the field of electrical and computer engineering, basic physical and mathematical principles are utilized to develop new devices, technologies, and techniques of constantly broadening and rapidly changing applications. Examples include:

- Microcomputers, parallel processing systems, and embedded systems, and their utilization in a growing range of system applications
- Signal processing techniques in telemetry and communication networks
- Image processing techniques in industrial material diagnostics and medical imaging
- Information processing techniques for data analytics and machine learning
- Photonics and fiber optic devices for applications in optical data processing, sensing, and communication
- Sophisticated control techniques, transducers, and robotics for advanced automation and electric systems
- Energy conversion devices and power systems, including smart grid, electric vehicles, and alternative energy systems
- Micro and nano-fabricated smart sensors for biomedical and environmental applications

- Systems on chip for the internet of things, cyber physical systems, wearable and implantable medical devices
- Microelectronics and integrated smart systems for a wide variety of applications, including self-driving vehicles, wireless communications, consumer electronics, instrumentation, multimedia, future smart homes and smart cities

Part-time study in courses offered in the evening allows professionals working in local industry to pursue graduate degrees concurrently with their employment.

- Computer Engineering (M.S.) (p. 136)
- Electrical Engineering (M.S.) (p. 137)
- Computer Engineering (Ph.D.) (p. 136)
- Electrical Engineering (Ph.D.) (p. 137)

Computer Engineering (M.S.) Admission Requirements

Admission to these programs is contingent upon admission to the Graduate School (p. 19). All applicants whose B.S. degree is not from an ABET-accredited college or university are required to submit additional pertinent information, including results of the general test of the Graduate Record Examination (GRE), publications, and/or inventions.

Students with B.S. degrees from selected science and engineering undergraduate programs not specifically related to this discipline may be admitted into the master's program after completing a sequence of undergraduate courses designed to prepare them for the graduate curriculum.

In the areas of electrical engineering and computer engineering the Master of Science degree is offered by this department under the following options:

Plan A: Thirty-two credits including an eight credit thesis.

Plan C: Thirty-two credits of course work.

For either plan, students may choose from courses in one or more areas of specialization within the ECE curriculum. Detailed degree requirements, academic policies, and the course curriculum may be found at <https://engineering.wayne.edu/ece/programs/ms.php>.

All course work must be completed in accordance with the regulations of the Graduate School (p. 12) and the College of Engineering (p. 125).

ECE AGRADE Program (Accelerated Graduate Enrollment)

Outstanding undergraduates in the ECE department who meet eligibility criteria may enroll in the ECE AGRADE program. This program allows students to count up to 16 credits towards both the B.S. and M.S. degrees, enabling students to complete the B.S. and M.S. degrees within 5 years of full-time study. More information about eligibility, degree requirements, course selections, and policies may be found at <https://engineering.wayne.edu/ece/programs/aggregate.php>

Computer Engineering (Ph.D.) Admission Requirements

Admission to these programs is contingent upon admission to the Graduate School (p. 19). Applicants must have an overall grade point average of 3.6 in a Master of Science degree program. It is possible for outstanding students to enter the Ph.D program with only a Bachelor of Science degree. All applicants whose B.S. degree is not from an ABET-accredited college or university are required to submit additional

pertinent information, including results of the general test of the Graduate Record Examination (GRE), publications, and/or inventions.

Candidates for the doctoral degree must complete ninety credits beyond the bachelor's degree, including thirty credits of dissertation direction. The thirty credit dissertation registration requirement is fulfilled by registering for the courses ECE 9991 (<http://bulletins.wayne.edu/search/?P=ECE%209991>), ECE 9992 (<http://bulletins.wayne.edu/search/?P=ECE%209992>), ECE 9993 (<http://bulletins.wayne.edu/search/?P=ECE%209993>), and ECE 9994 (<http://bulletins.wayne.edu/search/?P=ECE%209994>) (Doctoral Dissertation Research and Direction I, II, III, and IV, respectively), in consecutive academic year semesters. The division of these credits includes 60 credits of pre-candidacy coursework, and 30 credits of dissertation research. Students are required to complete a preliminary exam, prospectus exam, and a public defense of a doctoral dissertation, completed with a research advisor. Students entering the program with an MS degree may transfer up to 30 credits towards pre-candidacy coursework. Details about degree requirements and course curriculum may be found at <https://engineering.wayne.edu/ece/programs/phd.php>.

All course work must be completed in accordance with the regulations of the Graduate School (p. 12) and the College of Engineering (p. 125). For additional information, students should consult the Graduate School's regulations (p.) governing doctoral study.

Electrical Engineering (M.S.)

Admission Requirements

Admission to these programs is contingent upon admission to the Graduate School (p. 19). All applicants whose B.S. degree is not from an ABET-accredited college or university are required to submit additional pertinent information, including results of the general test of the Graduate Record Examination (GRE), publications, and/or inventions.

Students with B.S. degrees from selected science and engineering undergraduate programs not specifically related to this discipline may be admitted into the master's program after completing a sequence of undergraduate courses designed to prepare them for the graduate curriculum.

In the areas of electrical engineering and computer engineering the Master of Science degree is offered by this department under the following options:

Plan A: Thirty-two credits including an eight credit thesis.

Plan C: Thirty-two credits of course work.

For either plan, students may choose from courses in one or more areas of specialization within the ECE curriculum. Detailed degree requirements, academic policies, and the course curriculum may be found at <https://engineering.wayne.edu/ece/programs/ms.php>.

All course work must be completed in accordance with the regulations of the Graduate School (p. 12) and the College of Engineering (p. 125).

ECE AGRADE Program (Accelerated Graduate Enrollment)

Outstanding undergraduates in the ECE department who meet eligibility criteria may enroll in the ECE AGRADE program. This program allows students to count up to 16 credits towards both the B.S. and M.S. degrees, enabling students to complete the B.S. and M.S. degrees within 5 years of full-time study. More information about eligibility, degree requirements, course selections, and policies may be found at <https://engineering.wayne.edu/ece/programs/aggregate.php>

Interdisciplinary Physics-ECE AGRADE Program (Accelerated Graduate Enrollment)

Outstanding seniors in Physics (both Applied Physics option and Fundamental Physics option) who meet eligibility criteria may apply for the cross-college AGRADE program between the Physics undergraduate program (College of Liberal Arts and Sciences) and Electrical Engineering (EE) Master's programs (College of Engineering). The Physics-ECE AGRADE program allows students to count up to 12 credits of selected graduate courses towards a B.S. degree in physics as well as an M.S. degree in Electrical Engineering. This enables students to complete both degrees within 5 years of full-time study. More information about eligibility, degree requirements, course elections, and academic policies may be found at <https://engineering.wayne.edu/ece/programs/aggregate.php>.

Electrical Engineering (Ph.D.)

Admission Requirements

Admission to these programs is contingent upon admission to the Graduate School (p. 19). Applicants must have an overall grade point average of 3.6 in a Master of Science degree program. It is possible for outstanding students to enter the Ph.D program with only a Bachelor of Science degree. All applicants whose B.S. degree is not from an ABET-accredited college or university are required to submit additional, pertinent information including GRE scores, publications and/or inventions.

Candidates for the doctoral degree must complete ninety credits beyond the bachelor's degree, including thirty credits of dissertation direction. The thirty credit dissertation registration requirement is fulfilled by registering for the courses ECE 9991 (<http://bulletins.wayne.edu/search/?P=ECE%209991>), ECE 9992 (<http://bulletins.wayne.edu/search/?P=ECE%209992>), ECE 9993 (<http://bulletins.wayne.edu/search/?P=ECE%209993>), and ECE 9994 (<http://bulletins.wayne.edu/search/?P=ECE%209994>) (Doctoral Dissertation Research and Direction I, II, III, and IV, respectively), in consecutive academic year semesters. The division of these credits includes 60 credits of pre-candidacy coursework, and 30 credits of dissertation research. Students are required to complete a preliminary exam, prospectus exam, and a public defense of a doctoral dissertation, completed with a research advisor. Students entering the program with an MS degree may transfer up to 30 credits towards pre-candidacy coursework. Details about degree requirements and course curriculum may be found at <https://engineering.wayne.edu/ece/programs/phd.php>.

All course work must be completed in accordance with the regulations of the Graduate School (p. 12) and the College of Engineering (p. 125). For additional information, students should consult the Graduate School's regulations (p.) governing doctoral study.

Engineering Technology

Office: 4855 Fourth Street; 313-577-0800
Chairperson: Ece Yaprak
<http://engineering.wayne.edu/et/>

The Division of Engineering Technology, founded in 1973, stresses the application of current technology to typical industrial problems. The curricula maintain a close relationship between theoretical principles taught in the classroom and their applications.

Engineering technology is a profession closely related to engineering. It deals with the application of knowledge and skills to industrial processes, production and management. Technologists are organizers of people, materials, and equipment for the effective planning, construction and

maintenance of technical facilities and operations. Their responsibilities require technical and practical knowledge. Graduates of Wayne State's engineering technology programs are employed in such areas as manufacturing engineering, engineering production, marketing, maintenance, quality control, product testing, field engineering, consulting engineering, design, and technical supervision.

- Engineering Technology (M.S.) (p. 138)

Engineering Technology (M.S.)

The Master of Science in Engineering Technology (M.S.E.T.) program is designed to meet the needs of adults who wish to expand or upgrade their knowledge within the areas of their previous training or current profession. It provides for highly individualized graduate study, and is designed to promote greater depth of understanding in a field of specialization beyond the bachelor's level. It allows more advanced coverage in specialized topics, develops more rigorous analytical skills, helps to advance expertise, and prepares graduates to perform more sophisticated and independent work.

Admission Requirements and Student Selection Procedures

Admission to the M.S.E.T. degree program is contingent upon admission to the Graduate School (p. 19). Additionally, all applicants must:

1. Hold a bachelor's degree in engineering technology or a related discipline from a college or university of recognized standing, or the equivalent;
2. Have maintained at least a 'B' average (3.0 g.p.a.) in undergraduate coursework;
3. Provide at least two letters of recommendation from persons acquainted with the applicant's academic achievement at the institution most recently attended (applicants whose academic references date back more than five years may substitute other references, if desired);
4. Submit with his/her application a preliminary proposal for the intended plan of study which includes a general set of objectives and an outline of types of coursework or other educational projects to be pursued;
5. Applicants who do not meet the 3.0 g.p.a. requirement but whose g.p.a. does fall within the Graduate School's qualified admission span (2.5 to 2.9 g.p.a.) may be admitted with a conditional status. Immediately upon successful completion of two graduate-level courses with a grade of 'B' or above, the candidate must request in writing that his/her status be changed to regular status.
6. Students will be required to submit a finalized Plan of Work, listing all the courses the student intends to take to fulfill the degree requirements. The Plan must be developed with the aid of the student's faculty advisor and is generally submitted by the time the student has earned eight credits.

The Master of Science in Engineering Technology degree is offered under the following options:

PLAN B: A minimum of thirty credits in graduate-level (numbered 5000 and above) course work, including a four- to six-credit Master's Project (ET 7999).

PLAN C: A minimum of thirty credits of graduate level course work (numbered 5000 and above).

For either plan, students must complete the core requirement, ET 7430. A minimum grade of 'B' is required in this core course, and the grade

of 'F' grade is not acceptable in any course. In addition to fulfilling the general scholarship requirements of the Division, all course work must be completed in accordance with the regulations of the Graduate School (p. 12) and the College of Engineering (p. 125).

Master's Project: ET 7999 integrates the knowledge gained in coursework, laboratory studies, and prior work experience to provide a focused activity demonstrating the student's ability to perform master's-level work. The master's project should include elements of design, synthesis, fabrication, modeling and simulation, CAD/CAM, and empirical and theoretical analysis balanced in a manner appropriate to the student's specific project.

A member of the Division of Engineering Technology faculty holding a graduate faculty appointment chairs the student's Master's Project Advisory Committee. (Individuals outside the Division directing master's project research must hold an adjunct graduate faculty appointment.) An adjunct graduate faculty member may co-chair the Committee. Using the form provided by the Division, the student must submit a proposal indicating the scope of the project, the problem to be solved, the nature of the system to be studied, the plan of approach and work plan for the activity, facilities and resources to be employed, and the student's qualifications for performing this work. The Master's Project Advisory Committee may accept, decline, or request resubmission of the proposal as explained to the student.

Only students with accepted proposals are allowed to register for ET 7999. Requests to elect additional credits in ET 7999 beyond those originally allowed by the Master's Project Advisory Committee must also be approved by the Committee.

Residency Requirement: Of the required credits for the M.S.E.T. degree, a minimum of eighteen must be Division of Engineering Technology courses. A maximum of eight transfer credits may be allowed for graduate courses taken at other accredited institutions, if they are appropriate to the student's plan of study. Up to eight credits in graduate courses completed at Wayne State as a non-degree graduate student may be applied toward degree requirements and must be included in the applicant's preliminary Plan of Work. Minimum completion period for the degree is three semesters.

Industrial and Systems Engineering

Office: 2143 Manufacturing Engineering Building 4815 Fourth St.; 313-577-3821

Chairperson: Leslie Monplaisir

<http://www.engineering.wayne.edu/ise/index.php>

Industrial Engineering is a broadly-based integrated field concerned with enabling complex systems to function effectively. Managing the inventory of a production facility, for example, involves issues of production and stocking policy, manufacturing equipment, human resources, customer demand, and supplier relationships. The industrial engineer must understand the interaction of the components of a system, and coordinate the flow of materials and information to effectively manage the operation. He/she plays an important role in defining information needs and developing strategies for improving decision making in existing systems. The skills of the industrial engineer, however, can be applied in more than just the traditional production environment. In the growing service sector of the economy including health care delivery, public safety, air transportation, energy, and banking issues of resource management, scheduling, quality of service, and systems design are of increasing importance.

Manufacturing Systems Engineering was traditionally involved in developing process capabilities to realize the output of design engineering. Today, design and manufacturing systems engineering

is becoming reciprocally integrated and both groups work together in teams to assure the soundness of design and producibility of goods and services. The manufacturing systems engineer must have an understanding of the design process as well as special expertise in the knowledge and understanding of the production process, which is now computer-based and provides flexibility through numerical control. The manufacturing systems engineer is responsible for designing and implementing the cells and production lines which become the basic units of manufacture. Increasingly, such production units are becoming parts of an integrated factory system, and are not simply islands of automation. The manufacturing systems engineer must understand the multi-layered control architecture of the integrated factory, and the computer-based technologies which enable it.

Engineering Management has grown in importance as today's engineer must possess the necessary tools for effective technical management. Inherent in successful leadership is an understanding of the business functions of an organization, tools used in the decision-making process, and skills for efficient project management, among others. An effective engineering manager will utilize industrial engineering skills to develop strategies that improve the product development process, manage quality and productivity, and advance techniques in world-class manufacturing. More often, a business overview is critical to developing and improving these processes.

Systems Engineering is an interdisciplinary approach and means to enable the realization of successful systems. It focuses on defining customer needs and required functionality early in the development cycle, documenting requirements, then proceeding with design synthesis and system validation while considering the complete problem.

Data Science & Business Analytics is an interdisciplinary program with Computer Science and Mike Ilitch School of Business that is designed to provide a broad range of data science and analytics knowledge and skills. This fast growing field is quickly becoming a key facet of business strategy with increasing need for employees who can think uniquely across disciplines to transform data into relevant insights for making better decisions.

Facilities: The Department maintains laboratories in systems simulation, computer-aided manufacturing, smart engineering systems, big data, design, and concurrent engineering.

Master's Degree Programs of this department offer the flexibility of full or part-time study. Most of the courses are offered in the evening, allowing students to continue full-time employment in local industries. Some program classes are offered at off-campus sites. Many of the graduate-level courses are also offered in the evening, allowing graduate students also to continue full-time employment in local industries. To further accommodate the working student population, several engineering courses are offered online (refer to the schedule of classes to determine availability).

All incoming M.S. students must demonstrate competency in undergraduate probability and statistics, through successful completion of BE 2100, or equivalent courses. If the student fails to show competency, he or she may be required to complete a pre-requisite course in probability and statistics.

- Manufacturing Engineering (M.S.) (p. 142)

- Engineering Management (M.S.) (p. 140)
- Data Science & Business Analytics (M.S.) (p. 139)
- Industrial Engineering (Ph.D.) (p. 140)

Data Science and Business Analytics (M.S.)

Analytics is a fast-growing STEM field with a high demand for individuals who possess the skills and expertise necessary to navigate the process of transforming data into insight for making sound business decisions. It's the reason that the WSU College of Engineering and the Mike Ilitch School of Business launched an innovative and interdisciplinary new master's program in data science and business analytics. Leaders in this field use data to fundamentally rethink all facets of business in many sectors, including manufacturing, supply chain, finance, and healthcare.

Admission

Admission to any graduate program is contingent upon admission to the Graduate School (p. 19). Applicants should have 3.0 or higher cumulative undergraduate g.p.a.

Interview

Prospective candidates being considered for admission may have to participate in an online interview with the admissions committee. Upon evaluating the application, admissible candidates will be contacted for scheduling these interviews.

Prerequisite Knowledge

Candidates are expected to well-versed in basic probability and statistics and also familiar with some programming language. Courses will be available in the summer months for admitted applicants to refresh their knowledge or makeup for any deficiency in this knowledge.

Students without this prerequisite knowledge but otherwise possess good credentials will be given conditional admission and have to take this remedial coursework in the summer months prior to starting the program in the fall term

Graduate Management Admission Test (GMAT) and Graduate Record Examination (GRE)

Applicants must complete the GRE or the GMAT with minimum scores in the top 75 percentile.

Students must complete a total of 30 credits in order to earn the M.S. in Data Science and Business Analytics.

The "interdisciplinary core" includes 9 credits of coursework across business, computer science, and industrial engineering. On top of this integrated breadth of study covering the core areas of data science and business analytics, each student has 9 credits of "concentration" courses to give them depth in an engineering, business, or analytics area. Each student's 6 credits of elective choices can be personalized to support their individual career goals. The final piece of the curriculum is a 6-credit applied analytics practicum, in which students will work with companies and organizations on real analytics problems.

Base Curriculum for all Concentrations

Code	Title	Credits
	Data Science Analytics	3
	Data Science Strategy and Leadership	3
	Computing Platforms for Data Science	3
	Three Concentration Courses	9
	Two Elective Courses	6

Data Science and Business Analytics Practicum	6
Total Credits	30

Each student's course choices must satisfy the requirements of at least one of the defined concentrations: Data Computing, Advanced Analytics, or Data-Driven Business

Engineering Management (M.S.)

The department offers two options for a Master of Science in Engineering Management (EMMP). Students should read both sections carefully to determine which program they are eligible for.

On-campus Program

The on-campus Master of Science in Engineering Management program is designed to build both technical competence and business acumen. The program builds understanding and skills critical to the support of fast-to-market strategies, which also guarantee product quality, and cost minimization. A systematic analytical framework is developed and coupled with tools for managing the engineering and technical functions within manufacturing-based companies. This cross-disciplinary program draws from the expertise of the College of Engineering and the School of Business Administration.

Admission Requirements

Admission to this program is contingent upon admission to the Graduate School (p. 19). The program is intended for the practicing engineer or technical leader with an undergraduate degree from an accredited engineering program, who possesses at least two years of full-time work experience. The work experience requirement is waived for U.S. based students who are currently working full-time in an engineering type job.

On-site Program (Automotive Supplier)

The on-site (automotive supplier) Master of Science in Engineering Management program is limited to working professionals at organizations with a partnership agreement with the Department of Industrial and Systems Engineering. Engineers with high potential are selected by management to participate in a three-year, two-evenings-per-week curriculum. The courses are team based, and include two years of class studies and team projects in areas such as leadership, quality management, global marketing, robust design, and information systems. The final year of the program involves a team capstone project, which provides application of the knowledge gained to a current strategy or opportunity within their organization.

Admission Requirements

Admission to this program is contingent upon admission to the Graduate School (p. 19) and is limited to management selected individuals from partner organizations. For more information on admission or becoming a partner organization, please contact the EMMP program chair.

On-campus Program

Plan A: Minimum thirty-six credits including six to eight thesis credits. Submit the thesis credit registration approval form to register for ISE thesis credits.

Plan C: Minimum thirty-six credits of course work.

Plan A and C require fifteen credits of common core, three credits of quality, six credits from the Business School. Up to six additional credits may be earned in courses outside the Industrial and Systems Engineering Department, and require approval of the graduate advisor. All course work

must be completed in accordance with the regulations of the Graduate School (p. 12) and the College of Engineering (p. 125).

On-site Program (Automotive Supplier)

Plan B: Thirty-nine credits including a six to nine credit final project. There are four core segments: engineering management, business cognate, engineering cognate, and capstone project

All course work must be completed in accordance with the regulations of the Graduate School (p. 12) and the College of Engineering (p. 125).

Industrial Engineering (M.S.)

The master of science degree program in Industrial Engineering is built on a core designed to provide breadth of experience in systems modeling, analysis, and applications common in industrial engineering and operations analysis.

Admission Requirements

Admission to the master's program is contingent upon admission to the Graduate School (p. 19). Applicants with a baccalaureate degree in engineering from an institution accredited by the Accreditation Board for Engineering and Technology (ABET), and who have earned a grade point average of at least 2.8 in the upper division of their undergraduate program are eligible for admission. GRE Exam is not required for applicants. However, a high GRE score will be considered as an incentive for the evaluation process. Additionally, applicants with an undergraduate degree in mathematics, physics, computer science, or another discipline with a strong analytical base may be considered for admission.

The Master of Science in Industrial Engineering is offered under the following options:

Plan A: Minimum thirty credits including six to eight thesis credits. Submit the thesis credit registration approval form to register for ISE thesis credits.

Plan C: Minimum thirty credits of course work.

Plan A requires nine credits of common core. Plan C requires twelve credits of common core for the general option and nine credits of common core for concentrations. While the core provides breadth to the student's program, depth of understanding is acquired through completion of concentration specific courses and electives. Appropriate courses for specific concentrations can be found on the department's website. Students interested in an area not among the concentrations cited should elect the general option. Up to six credits may be earned in courses outside the Industrial and Systems Engineering Department, and require approval of the graduate advisor. All course work must be completed in accordance with the regulations of the Graduate School (p. 12) and the College of Engineering (p. 125).

Thesis Option: If a thesis option (Plan A) is selected, six to eight credits of Master's Thesis Research and Direction (IE 8999) is required, which integrates with the student's plan of work to create depth of understanding in an area relevant to the program objective. In such cases, the student must take nine credits of common core and design an individual program of study that must be approved by both the thesis research advisor and the M.S. program director.

Industrial Engineering (Ph.D.)

The Doctor of Philosophy degree is conferred upon individuals who have demonstrated the ability to make original contributions to the knowledge in this field. The Ph.D. program develops experts and professionals who will continue in academic work, industry, or government. It encourages

the attainment of excellence in research and scholarship necessary to catalyze the advancement of industrial engineering.

Traditional Ph.D. Program - Admission Requirements

Admission to this program is contingent upon admission to the Graduate School (p. 19). In general, applicants are required to have a Graduate degree in engineering or a related discipline (e.g., operations research, MBA, information systems, or mathematics) with a 3.5 GPA or higher. Students with an undergraduate degree in one of these areas and a grade point average of 3.5 or above may apply for direct admission to the Ph.D. program. While such direct admissions will be rare, admission will be predicated on the specific courses and strength of the undergraduate curriculum as well as interests of faculty.

Applicants with an undergraduate major in mathematics, computer science, or the physical sciences, completed at an accredited institution, are also eligible for admission to this program, provided an evaluation concludes that the educational background includes sufficient background in analytically-oriented course work. Please visit the Doctor of Philosophy in Industrial & Systems Engineering (<http://engineering.wayne.edu/ise/programs/phd-admission.php>) website for more information.

Global Executive Track Ph.D. Program - Admission Requirements

This is a unique track/curriculum designed to accommodate the busy schedule of working executives. Applicants for this cohort-based program are expected to bring ten years of experience with five years or more of significant managerial experience and management span of control, global experience, a technical B.S. Degree, and a relevant graduate degree. Admission to this program is contingent upon admission to the Graduate School (p. 19). Upon completion of the program, the candidate earns a Ph.D. in Industrial Engineering. Every year, a limited number of highly qualified, full-time working professionals are admitted for the Winter term (limited admissions in Summer or Fall terms). Please visit the Global Executive Track Ph.D. (<http://engineering.wayne.edu/ise/programs/phd-get.php>) website for more information.

Industrial Engineering (Ph.D. Program)

The Doctor of Philosophy degree requires ninety credits beyond the baccalaureate degree, thirty of which must be earned as dissertation credits. All course work must be completed in accordance with the regulations of the Graduate School (p. 12) and the College of Engineering (p. 125).

The Industrial & Systems Engineering doctoral program is designed to be flexible, in order to meet the individual student's interests and to reflect the dynamic nature of the field. It is comprised of five major stages:

1. **Advisor/Program Selection:** The first stage is devoted to the selection of a faculty advisor, taking course work, and the production of a Plan of Work in consultation with the student's faculty advisor. Students are encouraged to investigate the different areas of research available by talking with various graduate faculty members and attending research seminars held by the Department. Advisor selection should be done within the first semester of admission. The student will then begin course selection and outlining the Plan of Work. The approved Plan of Work must designate a primary area of research. The student is encouraged, in consultation with their advisor, to define his/her own primary and minor fields of interest by the selection of a cohesive grouping of available graduate courses. The Plan of Work must include at least thirty credits in course work

at, or above, the 7000 level. Twenty-one of these credits must be in course work other than directed study (IE 7990).

2. **Examination:** All Ph.D. students must pass the examinations outlined below. After successful completion of the written qualifying examination, a student may be admitted to the status of doctoral candidate.
 - a. **Written Qualifying Examination (Preliminary Exams):** The exams are scheduled once each year in late May. The exam includes three separate tests: 1) probability, 2) statistics and 3) operations research. The material tested by the exams is generally covered in master's level or advanced undergraduate courses. Relevant courses include BE 2100, IE 6210, and IE 6560. The math course MAT 5700 is also good preparation for the probability exam. Students must take the preliminary examination before completing three academic year semesters of work after their masters degree. Doctoral students entering the program in Fall are expected to take the exam the following winter. Students who enter in winter would take the exam, a year later in their second winter semester. A student must take all three parts of the examination. If the student passes only two of the exams, the student will be required to retake only the third exam the next time it is offered. If a student fails at least two exams, the student will have to take all three exams the next time they are offered. Once a student has taken the preliminary exam once and failed all or part of the exam, the student MUST take the exam the next time it is offered; not doing so will count as a second failed attempt. Students will have two chances to pass the entire preliminary examination. If all or parts of the exam are not passed by the second attempt, the student will be asked to leave the doctoral program.
 - b. **Oral Qualifying Examination (Proposal Defense):** This examination shall be a presentation of the student's proposal for dissertation research, and will be administered by the student's Doctoral Dissertation Committee. The Oral Examination must be satisfactorily completed at least twelve months prior to the Dissertation Defense. After completion of the written qualifying exam, the student will continue to develop the dissertation prospectus, a document that provides evidence that the prospective doctoral candidate has completed adequate preliminary research on the topic of the proposed doctoral dissertation. The principles for determining the scope of the prospectus are detailed in the Doctoral Dissertation Outline and Record of Approval form (<http://wayne.edu/gradschool>).
3. **Dissertation Committee Formation:** With the approval of the Department Doctoral Committee, the student establishes a Dissertation Committee that consists of four members. If there are co-chairs, the committee will consist of five members. At least two committee members are from the student's home department, Industrial & Systems Engineering. The Chairperson and one additional member must hold a Regular Graduate Faculty appointment in the Department of Industrial & Systems Engineering. The committee will also include an external member from outside the department. This Committee is responsible for administering the prospectus and the dissertation defense of the candidate.
4. **Candidacy:** Candidacy is reached after the Plan of Work has been approved, the written qualifying examination has been passed, approximately fifty credits in course work have been completed, and the dissertation committee has been formed. Upon completion of these requirements, a Recommendation for Doctor of Philosophy Candidacy Status form is submitted to the Graduate School in order to advance the Ph.D. applicant to Candidate Status.
5. **Dissertation** requirements are satisfied by the successful completion of thirty credits of dissertation research. The thirty credit dissertation registration requirement is fulfilled by registering for the courses

IE 9991, IE 9992, IE 9993, and IE 9994 (Doctoral Dissertation Research and Direction I, II, III, and IV, respectively), in consecutive academic year semesters. All Ph.D. students must pass the written qualifying examination and apply for doctoral candidacy (<https://gradschool.wayne.edu/phd/candidacy>) before election of dissertation credits. All Ph.D. students must register for dissertation credits or candidacy maintenance status (IE 9995) for any semester in which they utilize campus facilities or consult with faculty, even though they may not be enrolled in a formal lecture course. The dissertation defense will be publicized by public notice to the academic community; at this session the candidate presents his/her doctoral research for final approval by the Doctoral Dissertation Committee. A minimum of one first author peer reviewed journal publication is required before defending the Doctoral Dissertation. All course work must be completed in accordance with the regulations of the Graduate School (p. 12) and the College of Engineering (p. 125). Students should consult the Graduate School's regulations (p.) governing doctoral study.

Required Courses (must pass at least two)

Code	Title	Credits
IE 7220	Advanced Statistical Methods	3
IE 7511	Linear and Nonlinear Optimization	3
IE 7710	Introduction to Stochastic Processes	4

Global Executive Track PhD Program

The Global Executive Track (GET) PhD Program follows the same requirements as the traditional PhD Program as detailed above. The only differences between these two tracks is they have an alternative option for completing the Written Qualifying Examination and different core courses that are required.

Written Qualifying Examination - Global Executive Track Program Option

To enhance writing skills and provide the learning partners with the opportunity to contribute to the body of teaching knowledge in industrial and systems engineering, each Executive Track cohort will draw on their years of relevant experience to develop and defend two (2) original Teaching Case Studies throughout the program. Successful development and defense of these two case studies will serve to satisfy the written qualifying examination requirement of the Global Executive Ph.D. track.

Code	Title	Credits
Required Courses		
IE 8941	From Idea through Launch: Products and Services I	2-3
IE 8942	From Idea through Launch: Products and Services II	2-4
IE 8943	From Launch through Sustainability: Products and Services I	2-4
IE 8944	From Launch through Sustainability: Products and Services II	2-4
IE 8960	Literature Review	1-2
IE 8930	Global Perspectives and Networks	3

Manufacturing Engineering (M.S.)

The master of science degree program in manufacturing engineering is built on a core designed to provide a firm foundation in the various elements of manufacturing and systems engineering.

Admission Requirements

Admission to this program is contingent upon admission to the Graduate School (p. 19). Applicants with a baccalaureate degree in engineering from an institution accredited by the Accreditation Board for Engineering and Technology (ABET) and who have earned a grade point average of at least 2.8 in the upper division of their undergraduate program are eligible for admission. GRE Exam is not required for applicants. However, a high GRE score will be considered as an incentive for the evaluation process. Additionally, applicants with an undergraduate degree in mathematics, physics, computer science, or another discipline with a strong analytical base may be considered for admission.

Because of the interdisciplinary nature of the program, applicants whose undergraduate education is deficient in prerequisites for graduate classes may be required to take background courses which will NOT count toward the thirty-two credit degree requirement.

The Master of Science in Manufacturing Engineering is offered under the following options:

Plan A: Minimum thirty credits including six to eight thesis credits. Submit the thesis credit registration approval form to register for ISE thesis credits.

Plan C: Minimum thirty credits of course work.

Plan A requires nine credits of common core. Plan C requires twelve credits of common core for the general option and nine credits of common core for available concentrations. While the core provides breadth to the student's program, depth of understanding is acquired through completion of concentration specific courses and electives. Appropriate courses for specific concentrations can be found on the department's website. Students interested in an area not among the concentrations cited should elect the general option. Up to six credits may be earned in courses outside the Industrial and Systems Engineering Department, and require approval of the graduate advisor. All course work must be completed in accordance with the regulations of the Graduate School (<http://bulletins.wayne.edu/graduate/general-information/academic-regulations>) and the College of Engineering (<http://bulletins.wayne.edu/graduate/college-engineering/academic-regulations>).

Thesis Option: If a thesis option (Plan A) is selected, six to eight credits of Master's Thesis Research and Direction (IE 8999) is required, which integrates with the student's plan of work to create depth of understanding in an area relevant to the program objective. In such cases, an individually-designed program of study must be approved by both the thesis research advisor and the M.S. program officer.

Systems Engineering (Bridge Graduate Certificate)

This program is designed for technical professionals with work experience and a degree in engineering. The program consists of twelve credits of coursework scheduled for completion by working engineers in two years. The certificate can serve as a bridge to the M.S. degree in Engineering Management or Industrial Engineering.

Admission Requirements

Applicants must meet the requirements for admission to the Graduate School (p. 19), and either the M.S. program in Industrial Engineering (p. 138) or Engineering Management (p. 138). They must hold a baccalaureate degree in engineering from an institution accredited by the Accreditation Board for Engineering and Technology (ABET). In addition, they must have earned a grade point average of at least 2.8 in the upper

division of their undergraduate program or have at least three years of full-time engineering work experience. International students are required to complete the GRE exam.

Students must complete twelve credits consisting of one required foundation course in systems engineering; at least one required course in project management, risk/decision analysis or problem solving; and one elective course. At least one course must be 7000-level or above.

Students may later apply all certificate credits toward the Master's degree requirements in Engineering Management or Industrial Engineering, provided any such credits have been earned with a minimum 'B' grade and are within the six years time limit for completing the Master's degree.

Graduation Requirements: All course work must be completed in accordance with the regulations of the Graduate School (p. 12) and the College of Engineering (p. 125). Students may enroll on a full-time or part-time basis but must complete requirements within three years of admission.

Mechanical Engineering

Office: 2100 W. Engineering Building; 313-577-3843; Fax: 313-577-8789

Chairperson: Nabil G. Chalhoub

Director ME Graduate Studies: Ming-Chia Lai

<http://engineering.wayne.edu/me/>

The opportunities and challenges in the field of mechanical engineering are diverse and virtually unlimited. The broad variety of career possibilities includes research and development, design analysis and synthesis, manufacturing and production engineering, testing, sales, engineering, maintenance and administration. The challenge of a mechanical engineer may lie in the perfection and reliability of a device that will be duplicated a million-fold or in the control optimization of a single complex system of unique design. The mechanical engineering curriculum is designed to prepare graduate students in many applied fields, including such important areas as biomechanics, energy conversion, combustion engines, emissions controls, machine tool design, manufacturing, computer graphics, structural analysis, automatic controls, vehicle dynamics and design, continuum mechanics, fluid dynamics, environmental design, mechanisms, acoustics and noise control, laser diagnostics, and composite materials. Faculty members in the Department are currently engaged in state-of-the-art research in all of these areas. Specialized areas of research support for graduate students include: manufacturing processes, composite material behavior, combustion, acoustics and noise control, vibrations, laser diagnostics, biomechanics, control of mechanical systems, sheet metal stamping, and engine research.

Part-time study (with most courses offered in the evening) and cooperative programs allow professionals working in local industry to pursue graduate degrees while employed.

- Mechanical Engineering (M.S.) (p. 143)
- Mechanical Engineering (Ph.D.) (p. 145)

Mechanical Engineering (M.S.)

Program specializations at the master's degree level may be undertaken in many areas, including acoustics, vibrations, machine tool design, biomechanics, combustion engines, controls, composite materials, and fluid and solid mechanics, among others. These program specializations are available to both part-time and full-time students, in either research or non-research degree programs.

Admission Requirements

Applicants must apply for admission into the MSME program online at: [g \(https://wayne.edu/apply/#fndtn-graduate\)](https://wayne.edu/apply/#fndtn-graduate)[radapply.wayne.edu \(https://wayne.edu/apply/#fndtn-graduate\)](https://wayne.edu/apply/#fndtn-graduate). The applicant must have a bachelor's degree from an ABET accredited institution in the United States or a comparable degree from an officially recognized institution outside the United States to apply for graduate admission. He/she must have adequate preparation and discernible ability to pursue graduate study in the selected major field.

All applicants for the MSME program whose B.S. degree is not from an ABET-accredited university are required to submit his/her scores of the Graduate Record Examination (GRE (<http://www.ets.org/gre>)). International applicants are required to submit a WES Evaluation (<http://wayne.edu/admissions/graduate/international>) for their transcripts. Note that the official transcript evaluation must be transmitted directly from WES to the Office of Graduate Admissions. Along with the application, the applicant must upload an official transcript from every college and/or university attended. All students who have earned degrees from a country where English is not the native language must have a minimum score of 79 on the internet-based TOEFL (iBT) or 550 from a paper-based TOEFL (pBT) or IELTS score of 6.5.

To be admitted into the ME graduate programs, an applicant must satisfy all Graduate School requirements that are listed at <https://wayne.edu/admissions/graduate/admission-requirements/>. In addition, a regular admission for Master's degree may be authorized if the applicant's grade point average (GPA) is 3.0/4.0 or better and if he/she holds a degree from an ABET accredited or equivalent institution. Students with an overall GPA between 2.8 and 3.0 out of 4.0 in their BSME degree program will be considered on a case-by-case basis.

Students with degrees in fields other than Mechanical Engineering or degrees from non-accredited institutions may be admitted to the post-bachelor program where students will be expected to complete a set of assigned courses with a grade B or better in each course. The set of assigned courses will be selected from the following list of courses based on the student's field of interest:

Code	Title	Credits
ME 2200	Thermodynamics	3
ME 2410	Statics	3
ME 2420	Elementary Mechanics of Materials	3
ME 3300	Fluid Mechanics: Theory and Laboratory	4
ME 3400	Dynamics	3
ME 4300	Thermal Fluid Systems Design	4
ME 4150	Design of Machine Elements	4
ME 4500	Mechanical Engineering Design II	4

A successful completion of all post-bachelor program requirements will earn the student a regular admission to the Master's degree program in Mechanical Engineering.

All applicants must pay the \$50 Application Fee (<https://wayne.edu/admissions/graduate/admission-requirements>). Note that your application will not be assessed until all necessary items are submitted via our online application at [g \(https://wayne.edu/apply/#fndtn-graduate\)](https://wayne.edu/apply/#fndtn-graduate)[radapply.wayne.edu \(https://wayne.edu/apply/#fndtn-graduate\)](https://wayne.edu/apply/#fndtn-graduate). For questions about your application or requirements, please contact the Graduate Program Coordinator Ms. Ellen Cope at (313) 577-0409 or esclope@wayne.edu and include your Access ID or Application ID. For additional questions,

please contact Professor and Chair Dr. Nabil Chalhoub at a (nchalhoub@eng.wayne.edu)b9714@wayne.edu (ab9714@wayne.edu).

The master's degree in mechanical engineering is offered under the following options:

Plan A (Thesis Option): A minimum of thirty-two credits in course work including an eight-credit thesis.

This program requires a minimum of 32 semester credits that can be selected as follows

- ME 8999 - MS Thesis (8 Cr.)
- A minimum of 8 credits (2 courses) should be taken at the 7000-level. At least 4 credits should be selected from the ME curriculum. Directed study and directed research courses (ME 7990 and ME 7996) cannot be used to satisfy this requirement.
- ME 5000 - Engineering Analysis I (4 Cr.) is a required core course
- A maximum of 8 credits may be taken from other Departments in Engineering (excluding Engineering Technology), Chemistry, Physics or Mathematics Departments
- A maximum of 4 credits may be taken in Directed Studies (ME 5990)
- A minimum of 4 courses (16 Cr.) should be taken from one of the three thrust areas of the ME Department

Plan C (Coursework Option): A minimum of thirty-two credits in course work.

This program requires a minimum of 32 semester credits that can be selected as follows

- A minimum of 12 credits should be taken at the 7000-level. At least 8 credits should be selected from the ME curriculum. Directed study and directed research courses (ME 7990 and ME 7996) cannot be used to satisfy this requirement.
- ME 5000 - Engineering Analysis I (4 Cr.) is a required core course
- A maximum of 8 credits may be taken from other Departments in Engineering (excluding Engineering Technology), Chemistry, Physics or Mathematics Departments
- A maximum of 4 credits may be taken in Directed Studies (ME 5990)
- A minimum of 4 courses (16 Cr.) should be taken from one of the three thrust areas of the ME Department.

Students can choose up to three semesters of internship with the permission of both the ME Graduate Advisor and the Office of International Students and Scholars (OISS). ME 6991 credits must be taken in addition to the minimum 32 credits required for the MSME under either plan A or plan C. The student is responsible for arranging the internship in the industry. Students are eligible to enroll in ME 6991 after successfully completing 16 credits in their graduate program.

Course Group Requirements

The Department of Mechanical Engineering has three research thrust areas, namely the "Noise and Vibration Control", the "Advanced Materials and Manufacturing", and the "Advanced Propulsion and Energy Systems". In addition, many Biomedical Engineering courses are cross listed with ME courses and are available for ME Graduate students to take and be considered towards their degree. Graduate students must select a field of study in one of the three thrust areas of the ME Department.

All MSME students must select at least four courses from one of the three thrust areas listed above. The core course (ME 5000) is considered to be one of the four courses required from the selected thrust area.

Courses offered in the **Noise and Vibration Control** Thrust area are:

Code	Title	Credits
MAT 5000	Fundamental Concepts of Mathematics and Proof Writing	3
ME 5115	Fundamentals of Electric-drive Vehicle Modeling	4
ME 5400	Dynamics II	4
ME 5410	Vibrations II	4
ME 5425	Analysis of Vibration Movements and Instrumentation	4
ME 5440	Industrial Noise Control	4
ME 5460	Fundamentals in Acoustics and Noise Control	4
ME 5990	Directed Study	1-4
ME 5995	Special Topics in Mechanical Engineering I	1-4
ME 6550	Modeling and Control of Dynamic Systems	4
ME 7315	Electric-drive Vehicle Simulation and Control	4
ME 7400	Advanced Dynamics	4
ME 7420	Random Vibrations	4
ME 7440	Signal Processing Technologies and Their Applications	4
ME 7460	Advanced Acoustics and Noise Control	4
ME 7480	Nonlinear Vibration	4
ME 7550	Control of Dynamic Systems	4
ME 7590	Nonlinear Control Systems	4
MAT 8999	Master's Thesis Research and Direction	1-8

Courses offered in the **Advanced Materials and Manufacturing** Thrust area are:

Code	Title	Credits
ME 5000	Engineering Analysis I	4
ME 5040	Finite Element Methods I	4
ME 5453	Automotive Manufacturing Systems and Processes	4
ME 5580	Computer-Aided Mechanical Design	4
ME 5620	Fracture Mechanics in Engineering Design	4
ME 5700	Fundamentals of Mechanics	4
ME 5720	Mechanics of Composite Materials	4
ME 5730	Tribology and Lubrication Technology	4
ME 5990	Directed Study	1-4
ME 5995	Special Topics in Mechanical Engineering I	1-4
ME 7020	Finite Element Methods II	4
ME 7451	Advanced Manufacturing II: Material Forming	4
ME 7610	Theory of Elasticity	4
ME 7680	Manufacturing Processing Mechanics	4
ME 7720	Advanced Mechanics of Composite Materials	4
ME 7820	Engineering Non-Destructive Evaluation (NDE) Methods and Industrial Applications	4
ME 8020	Crashworthiness and Occupant Protection in Transportation Systems I	4
ME 8030	Crashworthiness and Occupant Protection in Transportation Systems II	4
ME 8999	Master's Thesis Research and Direction	1-8

Courses offered in the **Advanced Propulsion and Energy Systems** Thrust area are:

Code	Title	Credits
ME 5000	Engineering Analysis I	4
ME 5110	Fundamental Fuel Cell Systems	4

ME 5215	Fundamentals of Battery Systems for Electric and Hybrid Vehicles	4
ME 5300	Intermediate Fluid Mechanics	4
ME 5700	Fundamentals of Mechanics	4
ME 5800	Combustion Engines	4
ME 5810	Combustion and Emissions	4
ME 5820	Thermal Environmental Engineering	4
ME 5990	Directed Study	1-4
ME 5995	Special Topics in Mechanical Engineering I	1-4
ME 7260	Heat and Mass Transfer	4
ME 7290	Advanced Combustion and Emissions I	4
ME 7300	Advanced Fluid Mechanics	4
ME 7310	Computational Fluid Mechanics and Heat Transfer	4
ME 8290	Advanced Combustion and Emissions II	4
ME 8999	Master's Thesis Research and Direction	1-8

Cross-listed courses with **Biomedical Engineering** are:

Code	Title	Credits
ME 5100	Quantitative Physiology	4
ME 5160	Musculoskeletal Biomechanics	4
ME 5170	Design of Human Rehabilitation Systems	4
ME 5180	Introduction to Biomaterials	4
ME 6180	Biomedical Instrumentation	4
ME 7100	Mathematical Modeling in Impact Biomechanics	4
ME 7160	Impact Biomechanics	4
ME 7180	Advanced Topics in Biomaterials and Tissue Biomechanics	4

Student Performance Requirements

- A grade of B or better must be earned for the core course ME 5000 – *Engineering Analysis I*.
- The Graduate GPA will be calculated using all graduate courses taken at Wayne State University. It must always be maintained at 3.0/4.0 or better; otherwise, the student will be placed under academic probation.
- Students on academic probation have one semester to raise their GPA to at least 3.0/4.0. Failure to do so will result in the student being excluded from the ME graduate program.

The overall GPA for completing MSME Degree is 3.0/4.0 or higher (i.e., "B" grade or better) with no more than two courses with grades less than C and no more than two courses can be repeated throughout the MSME program. A passing grade for any course is "B-" or better with the exception of the core course (ME 5000, which must be passed with a grade of "B"). Thesis credit requirements are met by satisfactory completion of ME 8999. Note that three "C+" or lower grades will result in termination of the student from the ME graduate program. All course work must be completed in accordance with the regulations of the Graduate School and the College governing graduate scholarship and degrees.

Graduate students may register for a maximum of 8 credits per semester unless they have permission from the ME Director of Graduate Studies.

All course work must be completed in accordance with the regulations of the Graduate School (p. 12) and the College of Engineering (p. 125).

MS Thesis

The Master's Thesis Committee will consist of three graduate faculty members from the Department of Mechanical Engineering, including

the advisor. Upon approval by the ME Director of Graduate Studies, one graduate faculty member of the Department of Mechanical Engineering may be replaced by a member from another department.

The Master's Thesis Committee will administer the final oral examination.

A public final oral examination based on the MS thesis is required. The examination will be administered by the advisor and two other graduate faculty members from the Department of Mechanical Engineering. One ME member of the thesis committee may be replaced by a non-ME graduate faculty, if the thesis topic is multi-disciplinary, with the approval of the ME Director of Graduate Studies. Passing of the examination requires a majority vote of the committee.

Time Limitations

Students have a six-year time limit to complete all requirements for the Master's degree. The six-year period starts at the beginning of the semester during which the student has taken work that applies toward meeting the requirements of the degree. The College of Engineering reserves the right of re-validation of over-age credits. In re-validation cases the advisor and the student must set a terminal date for completion of all degree requirements, including such additional requirements as may be prescribed to re-validate the over-age credits. Time extensions beyond these conditions are authorized only for conditions clearly beyond the student's control.

In work counted toward a Master's degree, no credit may be more than six years old at the time all requirements are completed. A time extension may be authorized by the Associate Dean for Academic Affairs of the College of Engineering with the approval of the ME Department Chairman, but only for conditions which are clearly beyond the control of the student. Upon recommendation of the advisor and approval of the Associate Dean for Academic Affairs of the College of Engineering, a student may arrange for re-validation of over-age credits which are between six and ten years old and which represent courses completed at Wayne State University. Credits from other institutions may not be re-validated. A special examination fee is charged for course re-validations.

Graduation

Each degree candidate must file an Application for Degree at the beginning of the semester in which he/she plans to complete degree requirements at <https://reg.wayne.edu/students/degrees>. The candidate should consult the academic calendar of the Graduate Division Bulletin. If an application for a degree was filed for a previous semester in which the student did not graduate, a new application is necessary.

Mechanical Engineering (Ph.D.)

Admission Requirements

Applicants must apply for admission to the Ph.D. program online at: <https://wayne.edu/apply#fndtn-graduate>. Along with the application, the applicant must upload an official transcript from every college and/or university attended. All students who have earned degrees from a country where English is not the native language must have a minimum score of 79 on the internet-based TOEFL (iBT) or 550 from a paper-based TOEFL (pBT) or IELTS score of 6.5. Deadline dates for filing an Application for Admission are published by the Office of Graduate Admission at <http://www.gradschool.wayne.edu/>.

Doctoral applicants must present higher entrance qualifications than those required of Master's degree applicants. To be admitted into the ME Ph.D. program, an applicant must satisfy all Graduate School requirements that are listed at <https://wayne.edu/admissions/graduate/admission-requirements/>. The applicant must have a grade point average

(GPA) of at least 3.5/4.0 in a master's degree program in mechanical engineering (MSME) and must have completed a bachelor's degree from an ABET accredited institution in the United States or a comparable degree from an officially recognized institution outside the United States. The applicant must have adequate preparation and discernable ability to pursue graduate study in the major field he/she elects.

Applications to the Ph.D. program can also be submitted by students who have completed a bachelor's degree from an ABET accredited institution in the United States or a comparable degree from an officially recognized institution outside the United States with a GPA of at least 3.6/4.0. Students with an undergraduate GPA less than 3.6/4.0 must complete a master's degree in mechanical engineering prior to consideration for admission to the Ph.D. program.

Admission to the Ph.D. program is contingent upon satisfying the following requirements:

- All students must have an MS in Mechanical Engineering or a very similar field. Applicants without an MS degree in Mechanical Engineering are considered on a case-by-case basis.
- All applicants must submit Graduate Record Examination (GRE (<https://www.ets.org/gre>)) scores.
- International applicants are required to submit a WES Evaluation (<https://wayne.edu/admissions/graduate/international>) for their transcripts. Note that the official transcript evaluation must be transmitted directly from WES to the Office of Graduate Admissions.
- The admission to the Ph.D. program is contingent upon the approval of an ME graduate faculty to serve as the permanent Ph.D. advisor for the applicant.

All applicants must pay the \$50 Application Fee (<https://wayne.edu/admissions/graduate/admission-requirements>). Note that your application will not be assessed until all necessary items are submitted via our online application at <https://wayne.edu/apply#fndtn-graduate>. For questions about your application or requirements, please contact the Graduate Program Coordinator Ms. Ellen Cope at (313) 577-0409 or escape@wayne.edu and include your Access ID or Application ID. For additional questions, please contact Professor and Chair Dr. Nabil Chalhoub at a (nchalhoub@eng.wayne.edu)b9714@wayne.edu (ab9714@wayne.edu).

Course Requirements

A minimum of ninety credits beyond the baccalaureate degree must be earned in the Ph.D. program. These credits are distributed in the following way:

1. Thirty credits dissertation requirements are fulfilled by successfully completing ME 9991, ME 9992, ME 9993, and ME 9994 (*Doctoral Candidate Status: Dissertation Research and Direction I, II, III, and IV, respectively*). All Ph.D. students must have achieved the status of doctoral candidate before they will be allowed to register for dissertation credits. They are required to register for thesis or dissertation credits in 4 consecutive academic year semesters without any interruption (7.5 credits per semester). If a student has registered for all Doctoral Dissertation Research credits but has not completed dissertation requirements then he/she may register in ME 9995 - *Candidate Maintenance Status* until the requirements are completed, the time limit for degree is reached, or the student withdraws from the program.
2. A minimum of 30 credits must be earned in formal lecture credits.

3. At least 30 credits of course work beyond the Bachelor's degree must be in courses open only to graduate students (i.e., courses at 7000-level or higher).
4. At least half of all course work exclusive of dissertation credits must be earned in the Mechanical Engineering Department
5. All Ph.D. students are required to take the following two core courses:
 - ME 5000 – *Engineering Analysis I*
 - ME 5700 – *Fundamentals of Mechanics*
6. All Ph.D. students are required to select a minor field and complete at least 8 credit hours in courses numbered 5000 or above in the selected field.
7. A maximum of 30 credits may be earned in Special Topics courses.
8. A maximum of 8 credits may be earned in ME 7990 - *Directed Study*.
9. A maximum of 8 credits may be earned in ME 7996 - *Research*.
10. All course work must be completed in accordance with the regulations of the Graduate School and the College governing graduate scholarship and degrees.

Note:

- A grade of B or better must be earned in all ME courses.
- A grade of B- or better must be earned in all non-ME courses (Minor).
- The Graduate GPA will be calculated using all graduate courses taken at Wayne State University.

The Mechanical Engineering Department has three research thrust areas, namely the "*Noise and Vibration Control*", the "*Advanced Materials and Manufacturing*", and the "*Advanced Propulsion and Energy Systems*". In addition, many *Biomedical Engineering* courses are cross listed with ME courses and are available for ME Graduate students to take and be considered towards their degree. Graduate students must select a field of study in one of the three thrust areas of the ME Department.

Courses offered in the **Noise and Vibration Control** Thrust area are:

Code	Title	Credits
ME 5000	Engineering Analysis I	4
ME 5115	Fundamentals of Electric-drive Vehicle Modeling	4
ME 5400	Dynamics II	4
ME 5410	Vibrations II	4
ME 5425	Analysis of Vibration Movements and Instrumentation	4
ME 5440	Industrial Noise Control	4
ME 5460	Fundamentals in Acoustics and Noise Control	4
ME 5990	Directed Study	1-4
ME 5995	Special Topics in Mechanical Engineering I	1-4
ME 6550	Modeling and Control of Dynamic Systems	4
ME 7315	Electric-drive Vehicle Simulation and Control	4
ME 7400	Advanced Dynamics	4
ME 7420	Random Vibrations	4
ME 7440	Signal Processing Technologies and Their Applications	4
ME 7460	Advanced Acoustics and Noise Control	4
ME 7480	Nonlinear Vibration	4
ME 7550	Control of Dynamic Systems	4
ME 7590	Nonlinear Control Systems	4
ME 7990	Directed Study	1-4
ME 7995	Special Topics in Mechanical Engineering II	1-8
ME 7996	Research	1-4
ME 9990	Pre-Doctoral Candidacy Research	1-8

ME 9991	Doctoral Candidate Status I: Dissertation Research and Direction	7.5
ME 9992	Doctoral Candidate Status II: Dissertation Research and Direction	7.5
ME 9993	Doctoral Candidate Status III: Dissertation Research and Direction	7.5
ME 9994	Doctoral Candidate Status IV: Dissertation Research and Direction	7.5
ME 9995	Candidate Maintenance Status: Doctoral Dissertation Research and Direction	0

Courses offered in the **Advanced Materials and Manufacturing** Thrust area are:

Code	Title	Credits
ME 5000	Engineering Analysis I	4
ME 5040	Finite Element Methods I	4
ME 5453	Automotive Manufacturing Systems and Processes	4
ME 5580	Computer-Aided Mechanical Design	4
ME 5620	Fracture Mechanics in Engineering Design	4
ME 5700	Fundamentals of Mechanics	4
ME 5720	Mechanics of Composite Materials	4
ME 5730	Tribology and Lubrication Technology	4
ME 5990	Directed Study	1-4
ME 5995	Special Topics in Mechanical Engineering I	1-4
ME 7020	Finite Element Methods II	4
ME 7451	Advanced Manufacturing II: Material Forming	4
ME 7610	Theory of Elasticity	4
ME 7680	Manufacturing Processing Mechanics	4
ME 7720	Advanced Mechanics of Composite Materials	4
ME 7820	Engineering Non-Destructive Evaluation (NDE) Methods and Industrial Applications	4
ME 7990	Directed Study	1-4
ME 7995	Special Topics in Mechanical Engineering II	1-8
ME 7996	Research	1-4
ME 8020	Crashworthiness and Occupant Protection in Transportation Systems I	4
ME 8030	Crashworthiness and Occupant Protection in Transportation Systems II	4
ME 9990	Pre-Doctoral Candidacy Research	1-8
ME 9991	Doctoral Candidate Status I: Dissertation Research and Direction	7.5
ME 9992	Doctoral Candidate Status II: Dissertation Research and Direction	7.5
ME 9993	Doctoral Candidate Status III: Dissertation Research and Direction	7.5
ME 9994	Doctoral Candidate Status IV: Dissertation Research and Direction	7.5
ME 9995	Candidate Maintenance Status: Doctoral Dissertation Research and Direction	0

Courses offered in the **Advanced Propulsion and Energy Systems** Thrust area are:

Code	Title	Credits
ME 5000	Engineering Analysis I	4
ME 5110	Fundamental Fuel Cell Systems	4

ME 5215	Fundamentals of Battery Systems for Electric and Hybrid Vehicles	4
ME 5300	Intermediate Fluid Mechanics	4
ME 5700	Fundamentals of Mechanics	4
ME 5800	Combustion Engines	4
ME 5810	Combustion and Emissions	4
ME 5820	Thermal Environmental Engineering	4
ME 5990	Directed Study	1-4
ME 5995	Special Topics in Mechanical Engineering I	1-4
ME 7260	Heat and Mass Transfer	4
ME 7290	Advanced Combustion and Emissions I	4
ME 7300	Advanced Fluid Mechanics	4
ME 7310	Computational Fluid Mechanics and Heat Transfer	4
ME 7990	Directed Study	1-4
ME 7995	Special Topics in Mechanical Engineering II	1-8
ME 7996	Research	1-4
ME 8290	Advanced Combustion and Emissions II	4
ME 9990	Pre-Doctoral Candidacy Research	1-8
ME 9991	Doctoral Candidate Status I: Dissertation Research and Direction	7.5
ME 9992	Doctoral Candidate Status II: Dissertation Research and Direction	7.5
ME 9993	Doctoral Candidate Status III: Dissertation Research and Direction	7.5
ME 9994	Doctoral Candidate Status IV: Dissertation Research and Direction	7.5
ME 9995	Candidate Maintenance Status: Doctoral Dissertation Research and Direction	0

Cross-listed courses with **Biomedical Engineering** are:

Code	Title	Credits
ME 5160	Musculoskeletal Biomechanics	4
ME 5170	Design of Human Rehabilitation Systems	4
ME 5180	Introduction to Biomaterials	4
ME 6180	Biomedical Instrumentation	4
ME 7100	Mathematical Modeling in Impact Biomechanics	4
ME 7160	Impact Biomechanics	4
ME 7180	Advanced Topics in Biomaterials and Tissue Biomechanics	4

Dissertation Committee:

At the time the doctoral plan of work is being prepared, the Doctoral Committee which serves as both the Final Qualifying Examination Committee and the Dissertation Committee for each Ph.D. student should be formed. The permanent advisor of the student will serve as chairman of the Doctoral Committee. The Committee will be made up of at least three graduate faculty members from Mechanical Engineering and one graduate faculty member from outside the department. The other members will be selected by the student's permanent advisor subject to approval by the ME Director of Graduate Studies and the Office for Graduate Studies. The Doctoral Committee will administer the Final Written and Oral Qualifying Examinations and the Dissertation Public Lecture Presentation-Defense. Upon approval by the ME Director of Graduate Studies and the Graduate School Ph.D. Office, a graduate faculty member of the Department of Mechanical Engineering may be replaced by a member from another department as long as the committee meets the minimum Graduate School requirement.

A "Doctoral Dissertation Outline" form, approved by all members of the Doctoral Committee and the Director of Graduate Studies, should be

filed with the Graduate School PhD office at or near the beginning of the student's dissertation work.

Ph.D. Candidacy Requirements:

An approved Ph.D. Plan of Work must be filed with the Office for Graduate Studies within one semester after passing the preliminary qualifying examination (PQE). A student must have completed 50 graduate credits that count toward the Ph.D. program, formed a Ph.D. committee and submitted a "Recommendation for Candidacy" form to the Graduate School. Changes in the Plan of Work must be approved by the advisor and the ME Director of Graduate Studies.

Requirements For All Ph.D. Students

- **Preliminary Qualifying Examination:** This is a three-part written examination administered twice per year by the ME Graduate Program Committee during the third week of the months of September and January. All Ph.D. applicants must pass this examination within their first year after joining the Ph.D. program at WSU. Students must fill out the "PQE Registration Form" that can be downloaded from the ME web site and submit it to the ME Graduate Program Director or at the ME front desk no later than one week prior to the exam date.
- **Final Qualifying Examination:** This examination consists of written and oral parts covering the student's major and minor areas and other related fields. The oral part of the examination shall include a presentation of the proposal for the dissertation research. The Final Qualifying Examination is administered by the student's Doctoral Committee.
 - Under ordinary circumstances, the committee members may not be changed before the Qualifying Examination (written and oral) have been passed. Under extraordinary circumstances the Office for Graduate Studies may approve a committee change, but such change shall require written justification and approval in advance of the examination.
 - If the student fails the final qualifying examination, he/she must be re-examined before the end of the semester that follows the one in which the failure occurred. The student is allowed only one re-examination. Successive failure of the examination will result in dismissal.
 - The student passes the final qualifying examination upon the recommendation of his/her Ph.D. Committee with no more than one dissenting vote.
- **An approved Plan of Work** should be filed with the Office for Graduate Studies. The Plan of Work form can be downloaded from the Graduate School web site at <https://gradschool.wayne.edu/phd/forms>.
- **A Doctoral Dissertation Outline**, approved by all members of the Doctoral Committee and the Departmental Graduate Program Committee, should be filed by the student immediately after completing the oral part of the Final Qualifying Examination.
- **The Conflict of Interest Form** must be turned in twice, once with the Prospectus and again with the pre-defense paperwork (Final Report Form). The Conflict of Interest Form can be downloaded from the Graduate School web site at <https://gradschool.wayne.edu/phd/forms>.
- **The Safe Assign form** must be turned in three weeks prior to the Dissertation Defense.
- **Pre-Defense Presentation:** At least four weeks before the planned Dissertation Public Lecture Presentation-Defense, the student will present a preliminary dissertation defense lecture to the members of his/her Ph.D. Committee, who will provide a feedback to the student within two weeks for the purpose of incorporating any changes/corrections in the thesis.

- Before graduation, each Ph.D. student is expected to have one journal paper accepted.
- **Dissertation Public Lecture Presentation-Defense:** The dissertation format and appearance must be approved by the Office for Graduate Studies before the Dissertation Public Lecture Presentation-Defense is to be arranged. Additionally, each committee member must have certified, in writing (using the Dissertation Public Lecture Presentation-Defense form), that the dissertation has been read and approved for a Public Lecture Presentation-Defense.
 - The final lecture is to be publicized by public notice to the academic community. This responsibility rests with the student's advisor. At this final lecture, the candidate will outline his/her methodology, research and the results of the investigation. Members of the committee will lead the discussion following the presentation.
 - At the conclusion of the oral defense of the dissertation, the Graduate Examiner shall poll the Dissertation Committee and report in writing to the Office for Graduate Studies. The Graduate Examiner is the presiding officer at the Defense and is responsible for its conduct. The role of the Graduate Examiner may be assumed by the dissertation advisor or an external member of the committee.

Time Limitations

Students have a seven-year time limit to complete all requirements of the Ph.D. degree. The seven-year period starts at the beginning of the semester during which the student was admitted to doctoral study and was taking work toward meeting the requirements for the degree.

Up to thirty-two graduate credit hours with a grade B or better earned prior to the student's admission as a doctoral applicant may be applied toward the degree without regard to lapse of time. Credits earned beyond these thirty-two semester hours will not be counted towards the Ph.D. degree at the time of admission to the Ph.D. program. Credits earned after acceptance as a Ph.D. applicant may not be over seven years old at the time the degree is conferred, except when, on the recommendation of the advisor, up to ten semester hours of credit previously earned at Wayne State University may be specified for revalidation by examination. In the event that any courses have been previously revalidated in connection with the earning of the Master's degree, these shall be counted as a part of the total ten. Time extensions beyond these limitations can only be approved by the Graduate School on a yearly basis. The extension requests should reflect conditions that are clearly beyond the student's control.

Graduation

Each degree candidate must file an Application for Degree at the beginning of the semester in which he/she plans to complete degree requirements at <https://reg.wayne.edu/students/degrees>. The candidate should consult the academic calendar of the Graduate Division Bulletin. If an application for a degree was filed for a previous semester in which the student did not graduate, a new application is necessary. The student must be registered in the semester he/she plans to graduate.

For additional information, students should consult the Graduate School's regulations (p.) governing doctoral study.

Programs Offered by the College of Engineering

Alternative Energy Technology Programs

The Alternative Energy Technology (AET) programs are interdisciplinary, involving faculty from the Departments of Chemical Engineering and Materials Science, Civil and Environmental Engineering, Electrical

and Computer Engineering, Industrial and Systems Engineering, and Mechanical Engineering. These programs were established in 2005, and developed in close cooperation with governmental agencies, industry, and Next-Energy. The mission of the AET program is to educate and prepare the technical and scientific workforce for emerging alternative energy technologies; to promote and mobilize/align available resources to develop interdisciplinary research programs; and to disseminate technical information and raise public awareness on emerging AETs.

Cyber-Physical Systems

As the world gets "smarter" and more connected, Wayne State is demonstrating a commitment to innovation in connectivity and influence in transforming how people interact with and manipulate the physical world. This certificate program is the first of its kind in Michigan, focusing on mechanisms known as CPS, which are designed as a seamless network of physical components (also known as the Internet of Things) and computational algorithms instead of as standalone devices.

Electric-drive Vehicle Engineering Programs

The Electric-drive Vehicle Engineering (EVE) programs are interdisciplinary, involving faculty from the Departments of Chemical Engineering and Materials Science, Electrical and Computer Engineering, Industrial and Systems Engineering, and Mechanical Engineering. These programs were established in 2009, and developed in close cooperation with governmental agencies, industry, and the U.S. Department of Energy. The mission of the EVE program is to educate and prepare the technical and scientific workforce for the emerging electric-drive vehicle industry; to promote and mobilize/align available resources to develop interdisciplinary research programs; and to disseminate technical information and raise public awareness on the emerging electric-drive vehicle technology.

Sustainable Engineering Program

Students will learn the fundamentals of sustainable engineering, extend their knowledge in the application of sustainable engineering principles, and maintain their technical competitiveness by broadening their sustainability expertise.

- Alternative Energy Technology (Graduate Certificate) (p. 149)
- Alternative Energy Technology (M.S.) (p. 149)
- Cyber-Physical Systems (Graduate Certificate) (p. 149)
- Electric-drive Vehicle Engineering (Graduate Certificate) (p. 151)
- Electric-drive Vehicle Engineering (M.S.) (p. 151)
- Sustainable Engineering (Graduate Certificate) (p. 151)

Alternative Energy Technology (Graduate Certificate)

This program is designed to prepare the scientific and technological workforce for the emerging alternative energy technologies. It offers an efficient way to obtain a certified level of training, especially for working engineers and researchers. It may be taken as a free-standing program or concurrently with a master's degree program.

Admission Requirements

Admission to this program is contingent upon admission to the Graduate School (p. 19). The program will be open to students with a Bachelor's degree in engineering, chemistry, and physics, and in other mathematics-based sciences in exceptional cases.

The Alternative Energy Technology Graduate Certificate requires a minimum of twelve credits. The core course, AET 5120, is required, and a maximum of four credits is allowed in Research or Directed Studies. Certification procedures in place in WSU's Graduate School will be followed and students must earn a cumulative g.p.a. of at least a 3.0. Should a student become interested later in pursuing the master's degree after completing the graduate certificate, up to nine of the twelve certificate credits can be transferred toward the master's degree. All course work must be completed in accordance with the regulations of the Graduate School (p. 12) and the College of Engineering (p. 125).

The Alternative Energy Technology Graduate Certificate is designed to be completed in 1 year.

This program will cost \$11,649.82 for in-state tuition and fees and \$20,849.86 for out-of-state tuition and fees if completed within normal time. There may be additional costs for living expenses. These costs were accurate at the time of posting, but may have changed.

Fewer than 10 students completed this program within normal time. Typical student debt has been withheld to preserve the confidentiality of the students.

This program does not meet any licensure requirements.

For more information about graduation rates, loan repayment rates, and post-enrollment earnings about this institution and other postsecondary institutions please click here: <https://collegescorecard.ed.gov/>.

Alternative Energy Technology (M.S.) Admission Requirements

The Master of Science program is open to students with a bachelor's degree in engineering, and in other mathematics-based sciences in exceptional cases. Admission to this program is contingent upon admission to the Graduate School (p. 19). Grade Point Average for regular admission to M.S. Degree Program is 3.0 or above. Qualified admission is possible for applicants with a grade point average of 2.5 - 3.0 if the applicant has significant professional experience. No other specific admission requirements are needed, however, letters of recommendation, statement of objectives, and Graduate Record Examination (GRE) scores are encouraged to aid the admission evaluation process.

This Master of Science degree is offered under the following options:

Plan A: Thirty-two credits, including an eight-credit thesis.

Plan C: Thirty-two credits of course work in an approved AET Plan of Work.

Requirements for both options include at least twenty-four credits in Alternative Energy Technology courses and at least eight credits of 7000-level course work. The 7000-level course requirements can be satisfied through directed study, directed research, or thesis credits or approved classes from other engineering departments. Both options require two core courses: AET 5110 and AET 5120. Students pursuing Plan A are excluded from Research (AET 8996) and Directed Study (AET 7990) credits. All course work must be completed in accordance with the regulations of the Graduate School (p. 12) and the College of Engineering (p. 125).

Cyber-Physical Systems (Graduate Certificate)

As the world gets "smarter" and more connected, Wayne State is demonstrating a commitment to innovation in connectivity and influence

in transforming how people interact with and manipulate the physical world. This certificate program is the first of its kind in Michigan, focusing on mechanisms known as CPS, which are designed as a seamless network of physical components (also known as the Internet of Things) and computational algorithms instead of as standalone devices.

Admission Requirements

Admission to this program is contingent upon admission to the Graduate School (<http://bulletins.wayne.edu/graduate/general-information/admission>). A student needs to hold a bachelor's degree in a discipline of engineering from an accredited institution. The program is also open to students who are currently enrolled in a graduate degree program in the College of Engineering at Wayne State University.

Students must complete CSC 5280/ECE 5280: Introduction to Cyber-Physical Systems (CPS) as well as two-intermediate-level courses and one advanced course in one of the CPS tracks: Sensing (p. 150), Computer and Networking (p. 150), Control and Robotics (p. 150), Smart Transportation (p. 150), Smart Grid (p. 150), or Smart Health (p. 151).

A maximum of nine credits taken in the CPS Graduate Certificate Program may be applied toward a graduate degree subject to approval of the relevant academic unit and Graduate Office. All requirements must be completed within three years with a minimum 3.0 GPA required in the certificate coursework. All course work must be completed in accordance with the regulations of the Graduate School (<http://bulletins.wayne.edu/graduate/general-information/academic-regulations>) and the College of Engineering (<http://bulletins.wayne.edu/graduate/college-engineering/academic-regulations>).

Sensing Track

Code	Title	Credits
Introductory course: 3

Electric-drive Vehicle Engineering (Graduate Certificate)

This program is designed to prepare the scientific and technological workforce for the emerging electric-drive vehicle engineering field. It offers an efficient way to obtain a certified level of training, especially for working engineers and researchers. It may be taken as a freestanding program or concurrently with a master's degree program.

Admission Requirements

Admission to this program is contingent upon admission to the Graduate School (p. 19). The program will be open to students with a Bachelor's degree in engineering, chemistry, and physics, and in other mathematics-based sciences in exceptional cases.

The Electric-drive Vehicle Engineering Graduate Certificate will require a minimum of twelve credits. The core course EVE 5110 is required, and a maximum of four credits is allowed in Research or Directed Studied. All course work must be completed in accordance with the regulations of the Graduate School (p. 12) and the College of Engineering (p. 125). Should a student become interested later in pursuing the proposed master's degree after completing the graduate certificate, eight of the twelve certificate credits can be transferred toward the master's degree.

Electric-drive Vehicle Engineering (M.S.)

Admission Requirements

Admission to this program is contingent upon admission to the Graduate School (p. 19) for requirements. Additionally, the Grade Point Average required for regular admission to M.S. degree program is 3.0 or above. Qualified admission (2.5 - 3.0) is possible if an applicant has significant

relevant professional experience. The program will admit students with Bachelor's degrees or the equivalent in engineering from an accredited college or university. Students with mathematics-based science degrees will be considered for admission on a case-by-case basis. No other specific admission requirements are needed, however, letters of recommendation, a statement of objectives, and Graduate Record Examination (GRE) scores are encouraged to aid the admission evaluation process.

This Master of Science degree is offered under the following options:

Plan A: Thirty-two credits, including an eight-credit thesis.

Plan C: Thirty-two credits of course work in an approved EVE Plan of Work.

Requirements for both options include at least twenty-four credits in Electric-drive Vehicle Engineering courses and at least eight credits of 7000-level or higher course work. The 7000-level or higher course requirements can be satisfied through EVE courses, directed studies (EVE 7990), or thesis credits (EVE 8999) of EVE-related projects, or approved 7000-level or higher classes from other departments. Both options require two core courses: EVE 5110 and EVE 5120. All course work must be completed in accordance with the regulations of the Graduate School (p. 12) and the College of Engineering (p. 125).

Sustainable Engineering (Graduate Certificate)

Admission Requirements

Admission to this program is contingent upon admission to the Graduate School (p. 19). Students currently enrolled in a graduate program in the College of Engineering, or students who have already completed a Bachelor's degree in engineering can be admitted to the program. Admission into the graduate program requires a minimum grade point average of 3.0.

Students must complete a minimum of twelve credits of sustainable engineering courses. A maximum of eight credits may be counted towards both this certificate program and a related M.S. or Ph.D. program. All requirements must be completed within three years with a minimum 3.0 g.p.a. required in the certificate coursework. All course work must be completed in accordance with the regulations of the Graduate School (p. 12) and the College of Engineering (p. 125).

Code	Title	Credits

COLLEGE OF FINE, PERFORMING AND COMMUNICATION ARTS

Dean: Matthew Seeger

The College of Fine, Performing and Communication Arts at Wayne State University provides the highest quality education for practitioners, scholars and consumers in art, art history, communication, dance, music and theatre. This education leads to careers, uses for the arts in other disciplines, enhanced critical abilities, the enrichment of everyday life and the building of new generations of artists, professionals and scholars. Programs of study focus on the integration of theory and practice through the creation, discovery, preservation and transmission of knowledge in fine, performing and communication arts.

The College serves the University and the larger community by creating partnerships that emphasize its own rich, diverse curriculum, interdisciplinary studies, reciprocal professional interaction and outreach activities appropriate to each area of work. Special emphasis is placed on forging alliances with local, state and national constituencies such that the College is both a leader and a resource providing expertise, information and guidance.

Within an appropriate and attractive academic environment the College promotes an atmosphere conducive to intellectual and artistic growth, risk-taking and personal and professional development at all levels in both individual and collaborative endeavors. This environment also assists the College in its role as a national center for creative, research and teaching excellence.

As the cultural gateway of the University, the College provides public events and curricular offerings that nurture creative development, enrich aesthetic values and sensitivity, heighten awareness of the arts experience and reflect the disciplinary diversity of its areas of study. Cultural, racial, ethnic and gender diversity is an important commitment in public events and educational efforts.

Ultimately, the mission of the College is the integration of theory and practice through the creation, discovery, preservation and transmission of knowledge in the fine, performing and communication arts.

Campus Resources: Traditional courses of study are augmented by a variety of performance and presentation resources considered integral to many of the creative programs. Included in these are the Hilberry Repertory Theatre, the Symphonic Band and University Orchestra, plus exhibitions in the Elaine L. Jacob Galler, which features national and international artists and designers, and the Art Department Gallery, all of which usually features work created by students, faculty, and alumni. These are only a few of the campus resources that are especially important for majors in the College. A more comprehensive listing can be found under each of the specific departments.

Detroit Resources: The proximity of the Wayne campus to institutions of the Detroit Cultural Center (which includes the Detroit Institute of Arts, the Museum of Contemporary Art Detroit, the Detroit Public Library, the Charles Wright Museum of African American History, Michigan Opera Theatre and Orchestra Hall, among other institutions) provides further unique and enriching benefits for students; professional staff members of these institutions often serve as adjunct faculty in College programs. Nearby, too, are major print and electronic communications resources that similarly provide both adjunct faculty and professional assistance to other programs in the College.

Accrediting Agencies: Programs in the Music Department are accredited by the National Association of Schools of Music. Programs offered by the Maggie Allesee Department of Theatre and Dance are accredited by the National Association of Schools of Theatre and the National Association of Schools of Dance. The Public Relations program offered by the Department of Communication is accredited by the Public Relations Society of America.

Academic Regulations for the College of Fine, Performing, and Communication Arts

For complete information regarding the academic rules and regulations of the University, students should consult the Graduate School (p. 12). The following additions and amendments pertain to the College of Fine, Performing and Communication Arts.

Admission

Admission to these program in the College of Fine, Performing and Communication Arts is contingent upon admission to the Graduate School (p. 19).

In the selective admission of graduate students, preference is given to those students who have achieved superior undergraduate scholastic records and who evidence superior artistic abilities. If a student's undergraduate preparation is considered deficient for advanced work in his/her major field, additional work may be required at the undergraduate level. All prerequisite credits must be earned prior to or concurrent with the first graduate credits. Certain degrees have additional requirements as stated in the following pages.

Graduate Scholarship

Graduate degrees are conferred not merely upon the completion of a prescribed number of courses nor necessarily after a given period of residence, but rather in recognition of each candidate's outstanding ability and high attainments as evidenced in all course work, research, scholarly writing, examinations, personal fitness for a chosen profession, and promise of professional competence.

Graduate Degree Requirements

The Graduate School sets the general requirements for graduate degrees. In addition to these and to the information below, other requirements are specified by the individual graduate departments. Students should consult the program and requirements of the departments in which they plan to major.

Candidacy is an advanced status that is recommended by the student's advisor and authorized by the Graduate School upon evidence of the applicant's superior scholarship, appropriate personal qualities and promise of professional competence. Admission as an applicant does not assure acceptance as candidate for a degree. Also, candidacy is a necessary but not sufficient requirement for graduation.

To be eligible for candidacy, the student must file an official, approved Plan of Work. The Plan of Work should provide for effective concentration in a major field, with proper supporting courses in related fields. All master's applicants should file the Plan of Work with their respective department's Graduate Officer. In preparing a Plan, students should evaluate with care their personal and professional objectives as well as all degree and departmental requirements. Normally, students enrolled in master's degree programs are expected to file a Plan of Work by the time the equivalent of eight to twelve graduate credits have been earned. In the Master of Fine Arts program, however, the Plan of Work should be

filed by the time the equivalent of fourteen to eighteen credits have been earned. Candidacy must be authorized by the time twelve to eighteen graduate credits have been earned (dependent upon the applicant's degree program) or subsequent registration may be denied. Plans are filed with the department's Graduate Officer. Once the Plan of Work has been approved, the form to change the student's classification from 'applicant' to 'candidate' will be processed by the department Graduate Officer.

Ph.D. applicants should file the Plan of Work with the Graduate School, when approximately forty credits beyond the baccalaureate degree have been earned. In addition to filing the Plan, the student must have satisfied the foreign language requirements, must have passed the Final Qualifying Examination (written and oral), and must have submitted and received the Graduate Dean's approval on the Dissertation Outline before the doctoral committee will recommend candidacy.

Commencement: Students are required to file an Application for Graduation online through Academica no later than the end of the fourth week of classes in the intended term of graduation. Information concerning commencement announcements, caps and gowns, invitations, tickets, time and place, assembling and other relevant items will be sent via email to graduates prior to the event. Candidates for advanced degrees are requested and expected to attend the commencement at which the University confers upon them the honor of the degree earned.

Master's Degree Requirements

In the Master of Arts and Master of Music programs, the minimum requirement for the degree is thirty-two credits under one of the following plans:

Plan A: Twenty-four credits in course work plus an eight-credit thesis.

Plan B: Twenty-nine credits in course work plus a three-credit essay.

Plan C: Thirty-two credits in course work. This plan is authorized only in selected areas. The essay or thesis is not required for this plan; however, most departments require a final comprehensive examination. Students should consult an advisor for details.

These requirements vary slightly depending on the department and major curriculum; students should see the degree programs outlined in the following pages for specific information.

COURSE REQUIREMENTS: At least twenty-four credits must be taken in residence. At least six credits in the major field, in addition to the essay or thesis, must be in courses open only to graduate students (7000 and above).

Master of Fine Arts Degree Requirements

In the Master of Fine Arts degree programs, the minimum requirement includes fifty-four to sixty graduate credits plus a final project completed under Plans B or C as follows:

Plan B: Sixty credits including a three-credit essay. This plan is open only to studio art majors.

Plan C: Sixty credits, depending on the student's major, including a final project. For specific requirements, students should consult the Art and Art History or Theatre departmental sections of this bulletin.

All M.F.A. degree requirements must be completed within three years.

Doctoral Degree Requirements

Candidates for the doctoral degree must complete ninety credits beyond the baccalaureate degree including thirty credits of dissertation direction. The thirty credit dissertation registration requirement is fulfilled through registration in the courses 9991, 9992, 9993, and 9994 (Doctoral Dissertation Research and Direction I, II, III, and IV, respectively), in consecutive academic year semesters.

Examinations (Ph.D.)

Preliminary Qualifying Examinations: Responsibility for the requirement of a preliminary qualifying examination is vested in the graduate faculty of each department and specifically its committee on doctoral study. Accordingly, each committee may require this examination of all of its candidates or of any candidate at any time it may determine prior to the final qualifying examination.

Final Qualifying Examination: The final qualifying examination is required of each applicant. The applicant may request his/her doctoral committee to authorize the final qualifying examination after an approved Plan of Work has been filed with the Graduate School, AND after the Dean of the Graduate School has approved the Dissertation Outline. The examination will be in part written and in part oral. When this examination has been passed, the applicant will be advanced to the status of 'doctoral candidate'.

The Written Qualifying Examination will cover the applicant's major and minor areas and may include such other related matters as the doctoral examining committee may prescribe. Within thirty days after the written examination has been passed, the oral qualifying examination will be conducted by the doctoral examining committee, in the presence of the chairperson of the departmental committee on doctoral study or his/her designee. This examination will relate to the subject matter of the written examination, the applicant's major and minor areas and other pertinent matters.

If an examining committee does not certify that the applicant has been passed in either the written or oral examination, it must make specific recommendations with reference to admitting the applicant to a second examination and specify any additional work that should be completed prior to such an examination. If a second examination is held, it must be scheduled within one calendar year and shall be considered final.

The student's doctoral committee is selected at the time the doctoral Plan of Work is prepared. At this time, and upon consultation with the chairperson of the student's doctoral committee, a member outside of the student's major department is appointed to the committee and is expected to meet as a member of the student's committee while the research and preparation of the dissertation are in process. He/ she, along with all members of the committee, will also be present at the final oral presentation. The chairperson of the student's committee files a brief report to the Graduate School detailing the conduct of the oral presentation.

Essays, Theses, and Dissertations

There is no prescribed form for the essay. Title page format as given in the Graduate School's Guide for Preparing Theses and Dissertations may be used for essays. Standard style manuals may be consulted for form, as desired by the student or department.

One copy of the essay should be approved and signed by the advisor. This copy will reside with the department.

The thesis or dissertation *must be an original work, either in or definitely related to the student's major area of specialization.* If proper standards or quality, objectivity, originality, and independence are maintained,

the candidate may use data, which he/she has derived from his/her University research. Neither the results of the research nor the publication of findings can be restricted by any non-university agency nor can they be published prior to acceptance by the Graduate School, unless prior approval of such publication has been secured from both the advisor and the Graduate School. Advisors have primary responsibility for approval of the essay or thesis, but every member of a doctoral committee must read, approve and sign the dissertation.

A thesis student may not begin work on a manuscript until he/she has submitted an approved Plan of Work and outline form. He/she may then register for the thesis or dissertation and pay regular fees in the same manner as for all other course work.

Master's degree candidates under the essay plan register for the course numbered 7999, Master's Essay Direction, in the department of their major; a total of three credits must be elected.

Master's candidates under the thesis plan register for the course numbered 8999 in the department of their major. This course is entitled *Master's Thesis Research and Direction* and must be elected for a total of eight credits. Ph.D. candidates register for thirty credits in their major field in the courses numbered 9991-9994, as outlined above, under 'Doctoral Degree Requirements.' All credit used toward meeting dissertation requirements must be earned in this course.

The publication and dissemination of research findings will not be restricted by the University after the manuscript has been received and accepted by the Graduate School.

Art and Art History

Office: 150 Art Building, 450 Reuther Mall; 313-577-2980

Interim Chairperson: Brian Kritzman

<http://www.art.wayne.edu>

- Art (M.A.) (p. 155)
- Art (M.F.A.) (p. 155)
- Art History (M.A.) (p. 155)

Art (M.A.)

Admission Requirements

Admission to this program is contingent upon admission to the Graduate School (p. 19). The applicant must hold a Bachelor of Fine Arts degree or another degree and equivalent course work. Admission by the Graduate School of the University means only that the applicant has satisfied the academic standards required for general admission. Final admission is determined by the Department based on the following ranked criteria: portfolio, personal interview, academic record, reference letters, and statement of intent.

A minimum of thirty-three credits in art, including at least eighteen credits in the studio major, six credits in electives, three credits in art history, three credits in the Master of Arts Seminar in art, and three credits in Master's Essay. All course work must be completed in accordance with the regulations of the Graduate School (p. 12) and the College of Fine, Performing, and Communication Arts (p. 153).

This program is offered under the following option:

Plan B: Thirty-three credits in course work, including three credits for an essay.

Candidacy: All graduate students begin their work as Master's Applicants. After twelve credits have been completed, a Plan of Work must be signed

by the faculty advisor and submitted to the Department Graduate Officer. If the student has maintained a 3.0 grade point average and the Plan is accepted, his/her status is changed to Master's Candidate.

Art (M.F.A.)

Admission Requirements

Admission to this program is contingent upon admission to the Graduate School (p. 19). Applicants who present a superior portfolio and hold a Bachelor of Fine Arts degree or a Master of Arts degree in art may apply for direct admission. Final admission is determined by the Department based on the following ranked criteria: portfolio, personal interview, academic record, reference letters, and statement of intent.

During the semester in which an applicant in the Master of Arts in Art program will complete the fifteenth credit toward their degree, the student may be invited by the graduate review committee to apply for admission to the Master of Fine Arts program. If accepted, the applicant's fifteen credits in graduate study may apply toward the Master of Fine Arts degree.

In either case, the M.F.A. degree program demands superior qualification, potential, and commitment as an artist.

The Master of Fine Arts degree is offered under the following option:

Plan C: Sixty credits in art, including a thesis exhibition held as close to the final semester as possible.

Plan C must be completed within three years. A minimum of sixty credits in art should include at least thirty-six credits in the studio major, twelve credits in electives, six credits in art history (one of which is to be a 20th century survey of art or a course on contemporary art), and six credits in the M.F.A. Seminar (ACS 8997). All course work must be completed in accordance with the regulations of the Graduate School (p. 12) and the College of Fine, Performing, and Communication Arts (p. 153).

Candidacy: After twelve credits have been completed, a Plan of Work must be signed by the faculty advisor and submitted to the Department Graduate Officer. An applicant becomes a degree candidate only upon recommendation by the graduate review committee.

Full-time attendance is required in the program which requires a minimum of four semesters of study, excluding the summer term. All M.F.A. candidates must also meet the following requirements:

1. A satisfactory final review of the candidate's work.
2. An exhibition of the work produced for M.F.A. credit.
3. Submission for departmental files of 5-10 images of the work.
4. The completion and submission of an artist's statement. The statement will accompany the thesis exhibition.

This program provides the student with the opportunity for intensive work toward personal artistic goals. The entire graduate staff is available to the student for consultation and instruction.

Art History (M.A.)

Admission Requirements

Admission to this program is contingent upon admission to the Graduate School (p. 19). The applicant must have an undergraduate or equivalent degree in art history, a minimum 'B' average in undergraduate art history, and three semester of college-level work in one approved foreign language, appropriate to scholarly study in this field, with a 'B' (3.0) average or better.

This master's degree is offered under the following options:

Plan A: Thirty-two credits in course work, including at least six credits at the 7000-level and eight credits in thesis.

Plan B: Thirty-three credits in course work, including at least six credits at the 7000-level and three credits in essay.

Students may concentrate in one of the following specialties of art history, but must take at least one course in four out of the five core areas: African, Classical, Medieval, Renaissance/Baroque, and Modern.

Students must pass a comprehensive examination after fifteen graduate credits towards the master's degree have been earned and before the essay or thesis topic can be approved by the advisor. All course work must be completed in accordance with the regulations of the Graduate School and the College of Fine, Performing, and Communication Arts governing graduate scholarship and degrees; see the sections beginning under Academic Regulations (p. 12) and Academic Regulations for the College of Fine, Performing, and Communication Arts (p. 153), respectively.

Candidacy: All graduate students begin their work as Master's Applicants. After twelve credits have been completed, a Plan of Work must be signed by the faculty advisor and submitted to the Department Graduate Officer. If the student has maintained a 3.0 grade point average and the Plan is accepted, his/her status is changed to Master's Candidate.

Communication

Office: 585 Manoogian Hall; 313-577-2943

Chairperson: Katheryn Maguire
<http://comm.wayne.edu>

The Department of Communication, in the College of Fine, Performing, and Communication Arts, offers graduate study leading to a doctoral degree, master's degree, and graduate certificate. The Department includes about thirty full-time faculty members with strong backgrounds in scholarly and professional approaches to the study and practice of communication. The Department has about 650 undergraduate majors and 150 graduate students. Approximately twenty-five graduate assistantships are offered each year to doctoral students.

The Department and faculty offices are in Manoogian Hall, located near the intersection of the John C. Lodge Freeway and Warren Avenue, in the heart of Detroit's Cultural Center. There are two television production facilities associated with the Department: the Midtown Studio (developed in partnership with Detroit Public Television, Channel 56) on the main floor of 5057 Woodward and the Old Main studio in the Old Main building, at the intersection of Warren and Cass Avenues. Most graduate courses are offered in the evening in Manoogian Hall.

Departmental Philosophy

Communication is a human activity in which ideas, information, and perceptions are shared. The study of human communication involves the theory, research, and practice of human interaction among individuals, groups, institutions, and cultures, using quantitative, qualitative, rhetorical, and critical approaches.

The graduate program in communication is designed to establish and maintain high standards of scholarly research and creative/professional activity, while providing excellence in academic instruction at both the theoretical and applied levels. The graduate program encompasses the full range of empirical, rhetorical, and creative approaches, in which each student is focused through a personal Plan of Work.

Alumni of the program are skilled researchers, practitioners, critical consumers, and thoughtful observers of communication processes. While many serve as recognized scholars and educators throughout the country and world, others occupy responsible positions as communication professionals in business, government, and industry.

The research interests and methodological approaches of the faculty are diverse. Faculty members and graduate students have written extensively on computer-mediated communication, critical and cultural studies, dispute resolution, health and risk communication, interpersonal communication, journalism studies, media effects, media studies, organizational communication, public relations, and rhetorical theory and criticism. Faculty members also have diverse professional backgrounds and experiences and have won numerous state, regional, national, and international creative/professional awards. The graduate program is deeply committed to research and scholarship on the interrelations of theory, practice, research, experience, strategy, and ethics.

- Communication (Ph.D.) (p. 156)
- Communication and Urban Sustainability (Ph.D. Dual-Title) (p. 157)
- Communication (M.A.) (<http://bulletins.wayne.edu/graduate/college-fine-performing-communication-arts/communication/communication-ma>)
- Dispute Resolution (M.A.D.R.) (p. 158)
- Dispute Resolution (M.A./J.D. Joint Degree) (p. 158)
- Dispute Resolution (Graduate Certificate) (p. 158)
- Communication and New Media (Graduate Certificate) (<http://bulletins.wayne.edu/graduate/college-fine-performing-communication-arts/communication/communication-new-media-graduate-certificate>)
- Health Communication (Graduate Certificate) (p. 159)
- Risk and Crisis Communication (Graduate Certificate) (p. 160)

Communication (Ph.D.)

At the Ph.D. level the primary aim of the Department is to help students develop the theoretical basis and the analytical and research skills necessary for scholarly inquiry into various communication acts, processes, and contexts. Courses in the Department are designed to serve several specific purposes:

1. To promote research and study into all aspects of communication process and effects.
2. To provide intensive inquiry into communication areas such as computer-mediated communication, critical and cultural studies, dispute resolution, health and risk communication, interpersonal communication, journalism studies, media effects, media studies, organizational communication, public relations, and rhetorical theory and criticism.
3. To prepare students for communication related careers in public service organizations and private business.
4. To prepare communication educators.

Admission Requirements

Admission to this program is contingent upon admission to the Graduate School (p. 19). Admission to the Department's Ph.D. program is competitive and is based on an applicant's entire academic record; requirements stated below are minimum standards for consideration and do not guarantee admission. The Department requires an M.A. degree in communication or a related field, with a minimum 3.5 grade point average on a 4.0 scale. In those instances where an applicant's M.A. is not communication-related, or there are fewer than fifteen semester credits in communication, the applicant may be admitted to the department's

master's degree program until such time as sufficient background for doctoral study is demonstrated.

Application: There are six parts to the Ph.D. application process including submission of the following:

1. The Application for Graduate Admission (<http://wayne.edu/admissions/graduate>)
2. Three letters of recommendation from persons qualified to assess the applicant's scholarly potential
3. A two- to three-page statement of the applicant's academic interests and professional goals identifying faculty with whom the applicant would like to work
4. A sample of written scholarship, such as a research paper or a master's thesis
5. Graduate Record Examination (GRE) scores (minimum 50th percentile required). International students are also required to submit scores from Test of English as a Foreign Language (TOEFL) (minimum 100 on Internet-based Test required) or equivalent tests
6. Official transcripts from each college and university attended

Doctoral students are admitted for the fall semester only. The deadline for the first round of admissions is January 15. Application materials are submitted online through Graduate Admissions, except for current Wayne State University graduate students, who should submit all application materials directly to the department.

Doctoral degree requirements consist of a minimum of ninety credits beyond the baccalaureate degree, thirty of which must be earned as dissertation credit. The thirty credit dissertation registration requirement is fulfilled by registering for the courses COM 9991, COM 9992, COM 9993, and COM 9994 (Doctoral Dissertation Research and Direction I, II, III, and IV, respectively), in consecutive academic year semesters. All course work must be completed in accordance with the regulations of the Graduate School (p. 12) and the College of Fine, Performing, and Communication Arts (p. 153).

All students must complete COM 8000: Introduction to Ph.D. Studies in Communication in the first semester of coursework with a grade of B or better. Students must also complete COM 7810: Seminar in Communication Education in their first semester of coursework, but this can be waived. The student's Coursework Worksheet and Plan of Work must be developed in consultation with the advisor; the Worksheet must be filed within the first eighteen credits and the Plan of Work within the first twenty-seven credits of study.

Requirements

Code	Title	Credits
COM 8000	Introduction to PhD Studies	3
COM 7810	Seminar in Communication Education (can be waived)	3

- Minimum five Tool/Methods courses. Up to two graduate-level transfer courses may be applied, but these will not count toward the required minimum sixty credits of coursework. Foreign language reading and writing proficiency as determined by appropriate tests can count as one Tool course, if the adviser judges the language directly relevant to the dissertation project.
- Minimum four Content courses in the Department of Communication that together constitute a research area specialization
- Additional Elective Content courses as needed to achieve minimum sixty credits of coursework (includes up to thirty credits transferred from prior graduate-level coursework, if applicable).

- Content courses (minimum nine credits) outside the Department of Communication that together constitute a Minor/Cognate.
- Minimum thirty dissertation credits (COM 9991, COM 9992, COM 9993, COM 9994, each seven and half credits, to be taken in consecutive semesters).
- Successful completion of the written and oral parts of the Qualifying Examination.
- Successful presentation and defense of the Dissertation Prospectus.
- Successful presentation and defense of the Doctoral Dissertation.

Communication and Urban Sustainability (Ph.D. Dual-Title)

Students admitted to the Ph.D. program in Communication can apply to earn a Ph.D. in Communication with a dual title in Urban Sustainability. This dual title degree is designed to prepare researchers and professionals to solve challenging urban problems that require working across disciplines. Students enrolled in this dual title program take courses that help develop knowledge and skills relating to urban sustainability. Students in the program also undertake activities such as community service, participate in colloquiums, and prepare a funding proposal related to urban sustainability. The dual title coursework follows competencies outlined by the Transformative Research in Urban Sustainability Training program.

Admission Requirements

Applicants must meet the admissions standards of the Graduate School (p. 19) and the Department of Communication and be first offered admission to the Communication doctoral program.

The coursework listed below must be completed in concurrence with the requirements for the Ph.D. in Communication (p. 156). Students are required to take the following core courses plus elective credits of Urban Sustainability coursework. A minimum number of elective credits must be from coursework outside of the student's home department. Contact your advisor or the Director of Graduate Studies for more information.

¹ In order to satisfy the elective requirement, the topic area must be relevant to the program. Students should consult with their advisor for details.

Dispute Resolution (M.A.D.R.)

The M.A. in Dispute Resolution is an interdisciplinary master's degree program housed in the Department of Communication.

The Master of Arts in Dispute Resolution (MADR) offers a challenging program, informed by a multicultural perspective, in the growing and recognized field of dispute resolution. As an interdisciplinary field, grounded in the fundamental idea that dispute resolution techniques are inherently democratic in giving voice to disputants, the program provides practical and academic experience that constitutes the range of dispute resolution activities: community, civil and school mediation, organizational and family dispute intervention, legal or business negotiation, and international peacemaking and diplomacy.

Admission Requirements

Applicants must meet the admission standards of the Graduate School (p. 19). In addition, at least a 3.0 grade point average in the upper division of undergraduate coursework is required. Applicants must submit a personal statement of one-two pages outlining their interest in the program and three letters of recommendation.

This master's degree is offered as a Plan C program only. It requires the completion of the core curriculum (twenty-four credits) plus a minimum of two approved elective courses (minimum of six credits). All course work must be completed in accordance with the regulations of the Graduate School (p. 12) and the College of Fine, Performing, and Communication Arts (p. 153). A 3.0 grade point average is required; if a grade below 'B' is received in any core course, the course must be repeated promptly and a grade of 'B' or above obtained. A grade of 'B' or below in any two graduate courses will constitute a sufficient basis for dismissal from the program. Students are expected to file a Plan of Work upon successful completion of nine graduate credits. Upon approval of the Plan, the student's rank will be changed from 'applicant' to 'candidate,' provided the grade point average is at least 3.0

Degree Requirements

DR 7220	Concepts and Processes of Dispute Resolution II: Neutral Intervention Theory and Practice	
DR 7310/ LEX 7660	Practicum in Dispute Resolution	
DR 7890	Final Seminar in Dispute Resolution	
Electives (minimum 2 courses)¹		6
Total Credits		30

¹ In addition to the core courses, students are required to take a minimum of two electives, adding up to six credits minimum, from courses offered within the Department of Communication or by other Departments across campus. A list of *some* possible electives, organized by theme, is available at <http://madr.comm.wayne.edu/madreelectives.html>. Electives should be selected in consultation with the academic director of the dispute resolution program.

Dispute Resolution (M.A./J.D.)

The Department of Communication Dispute Resolution Program in cooperation with the Law School offers a joint degree program leading to a Master of Arts degree in dispute resolution and a Juris Doctor (J.D.) degree. Students in this program must be admitted to both the Law School and the M.A. program in dispute resolution.

Admission Requirements

Students in this program must first be admitted to the Law School and then apply to the M.A. program in Dispute Resolution (M.A.D.R.). During their first year of Law School, joint degree seeking students should apply to the M.A.D.R. program using the online Application for Graduate Admission form (see admission requirements for M.A.D.R. listed above).

This degree requires the completion of a minimum 102 credits with the master's degree part of the program offered only under Plan C. The first year of study is spent in the Law School. Following completion of the first year and after consultation with the Academic Director of M.A.D.R., students may elect one course per semester, up to a total of four courses, in the graduate M.A.D.R. program, credit for which is applicable toward the J.D. degree. In addition, Law School courses LEX 7016 (Alternative Dispute Resolution), and LEX 7616 (Negotiation) are considered equivalent to the M.A.D.R. core courses DR 7220 (Neutral Intervention) and DR 7210 (Negotiation), respectively, and their credit may be applied toward the M.A.D.R. Finally, students in this program may apply one Law School course (three credits) toward the satisfaction of the M.A.D.R. elective requirement.

For further information, contact the Academic Director of M.A.D.R. or the Law School Admissions Office.

NOTE: The Law School has an academic calendar and registration process separate from those in the Graduate School. Students must ensure they meet all appropriate application requirements and deadlines.

Dispute Resolution (Graduate Certificate)

The Graduate Certificate program in Dispute Resolution is designed to provide professional study in the interdisciplinary field of dispute resolution for individuals holding or pursuing advanced degrees in other disciplines. The certificate is administered by the Academic Director.

Admission Requirements

Applicants must meet the admission standards of the Graduate School (p. 19). In addition, at least a 3.0 grade point average in the upper division of undergraduate coursework is required. Applicants must submit a personal statement of one-two pages outlining their interest in the program and two letters of recommendation.

Students in the certificate program must complete a minimum of fifteen credits as outlined below and maintain a grade point average of at least 3.0. The certificate allows maximum six credits to count toward both the certificate and a relevant M.A. offered by this Department only when there is concurrent enrollment in the certificate and the M.A. programs. Transfer of credit from other institutions may NOT be applied toward the credits required for the certificate. All course work must be completed in accordance with the regulations of the Graduate School (p. 12) and the College of Fine, Performing, and Communication Arts (p. 153). The following courses are required:

Code	Title	Credits
Required core courses		
PCS 6100	Introduction to Graduate Peace and Security Studies	3
DR 7210	Concepts and Processes of Dispute Resolution I: Negotiating Theory and Practice	3
DR 7220	Concepts and Processes of Dispute Resolution II: Neutral Intervention Theory and Practice	3
DR 7890	Final Seminar in Dispute Resolution	3
Select one of the following:		3
DR 6120	Human Diversity and Human Conflict	
COM 6350	Communication, Culture, and Conflict	
DR 7100	Roots of Social Conflict	
Total Credits		15

The Dispute Resolution Graduate Certificate is designed to be completed in 1 years.

This program will cost \$13,006.57 for in-state tuition and fees and \$24,506.62 for out-of-state tuition and fees if completed within normal time. There may be additional costs for living expenses. These costs were accurate at the time of posting, but may have changed.

Fewer than 10 students completed this program within normal time. Typical student debt has been withheld to preserve the confidentiality of the students.

This program does not meet any licensure requirements.

For more information about graduation rates, loan repayment rates, and post-enrollment earnings about this institution and other postsecondary institutions please click here: <https://collegescorecard.ed.gov/>.

Communication

Office: 585 Manoogian Hall; 313-577-2943

Chairperson: Kathryn Maguire

<http://comm.wayne.edu>

The Department of Communication, in the College of Fine, Performing, and Communication Arts, offers graduate study leading to a doctoral degree, master's degree, and graduate certificate. The Department includes about thirty full-time faculty members with strong backgrounds in scholarly and professional approaches to the study and practice of communication. The Department has about 650 undergraduate

majors and 150 graduate students. Approximately twenty-five graduate assistantships are offered each year to doctoral students.

The Department and faculty offices are in Manoogian Hall, located near the intersection of the John C. Lodge Freeway and Warren Avenue, in the heart of Detroit's Cultural Center. There are two television production facilities associated with the Department: the Midtown Studio (developed in partnership with Detroit Public Television, Channel 56) on the main floor of 5057 Woodward and the Old Main studio in the Old Main building, at the intersection of Warren and Cass Avenues. Most graduate courses are offered in the evening in Manoogian Hall.

Departmental Philosophy

Communication is a human activity in which ideas, information, and perceptions are shared. The study of human communication involves the theory, research, and practice of human interaction among individuals, groups, institutions, and cultures, using quantitative, qualitative, rhetorical, and critical approaches.

The graduate program in communication is designed to establish and maintain high standards of scholarly research and creative/professional activity, while providing excellence in academic instruction at both the theoretical and applied levels. The graduate program encompasses the full range of empirical, rhetorical, and creative approaches, in which each student is focused through a personal Plan of Work.

Alumni of the program are skilled researchers, practitioners, critical consumers, and thoughtful observers of communication processes. While many serve as recognized scholars and educators throughout the country and world, others occupy responsible positions as communication professionals in business, government, and industry.

The research interests and methodological approaches of the faculty are diverse. Faculty members and graduate students have written extensively on computer-mediated communication, critical and cultural studies, dispute resolution, health and risk communication, interpersonal communication, journalism studies, media effects, media studies, organizational communication, public relations, and rhetorical theory and criticism. Faculty members also have diverse professional backgrounds and experiences and have won numerous state, regional, national, and international creative/professional awards. The graduate program is deeply committed to research and scholarship on the interrelations of theory, practice, research, experience, strategy, and ethics.

- Health Communication (Graduate Certificate) (p. 159)
- Risk and Crisis Communication (Graduate Certificate) (p. 160)

Health Communication (Graduate Certificate)

The Graduate Certificate program in Health Communication is designed to provide research-based, professional study for graduate students

interested in the role of communication in the health professions. The twelve-credit certificate focuses on components of health communication and their influence on individuals and communities as well as on knowledge creation and research translation and publication. The program emphasizes the role of theory, methods, and strategies in developing messages designed to improve health outcomes for individuals and communities. The Certificate provides both depth in the study of health communication and breadth through the inclusion of a set of elective health-related courses in Anthropology, Family Medicine and Nursing. The program is sufficiently flexible to accommodate students with broad interests and diverse backgrounds.

Admission Requirements

Admission to this program is contingent upon admission to the Graduate School (p. 19). In addition, at least a 3.0 grade point average in the upper division of undergraduate coursework and a personal statement of one-two pages regarding interest in the program and career goals are required.

Twelve credits in the program as outlined below including a required three-credit communication course, six credits of electives and a three-credit elective health-related course. The Certificate allows maximum six credits to count toward both the Certificate and a relevant M.A. offered by the Department only when there is concurrent enrollment in the Certificate and the M.A. programs. Courses must be completed with a minimum grade point average of 3.0 or better, and must be completed within three years of the enrollment. Transfer of credit from other institutions may NOT be applied toward the credits required for the certificate. All course work must be completed in accordance with the regulations of the Graduate School (p. 12) and the College of Fine, Performing, and Communication Arts (p. 153).

Risk and Crisis Communication (Graduate Certificate)

The graduate certificate provides professionals and graduate students research-based knowledge and best practices of risk and crisis communication especially in the context of public health emergency events.

Admission Requirements

Applicants must meet the admission standards of the Graduate School (p. 19). A bachelor's degree from a US institution or its equivalent from international colleges and universities. Students with a master's degree or its international equivalent also may enroll. Applicants must have a minimum of a 3.0 grade point average in upper division undergraduate coursework. In addition, preference will be given to students who have worked for a minimum of two years in government, non-governmental organizations, or private firms that focus on emergency management and response, health communication, and risk management.

The Risk and Crisis Communication certificate requires 12 credits of coursework.

Code	Title	Credits

COM 7162	Risk Communication: Theoretical and Practical Approaches	3
COM 7170	Health and Risk Communication	3
COM 7172	Risk Communication: Disasters, Hazards, and the Media	3
Total Credits		12

All course work must be completed in accordance with the regulations of the Graduate School (p. 12) and the College of Fine, Performing, and Communication Arts (p. 153). A course substitution may be allowed with a strong rationale for the change and consultation with a faculty advisor. Students in the department enrolled in the M.A. and the graduate certificate program concurrently may have a maximum of 6 credits double-count toward both the M.A. and graduate certificate.

Music

Office: 1321 Old Main; 313-577-1795; e-mail: music@wayne.edu

Chairperson: Norah Duncan IV

Interim Associate Chairperson: Douglas Bianchi

<http://www.music.wayne.edu>

Mission Statement

The Department of Music cultivates music as a contemporary and global art, grounded in a long historical tradition, by combining higher education with professional training and experience for its undergraduate and graduate/professional students.

The Department offers serious students of music opportunities to learn, grow, and develop their skills and disciplines in an urban cultural setting. With close proximity to Detroit's cultural center, students have access to the resources of such premiere institutions as the Detroit Institute of Arts, the Detroit Public Library, the Detroit Opera House, and Orchestra Hall. The long historical relationship between the Detroit Symphony Orchestra and the Department allows students to study and coach with exceptional guest artists and resident artist-faculty who are specialists in all musical styles and media.

Building on the strengths of its geographic and cultural setting, the Department maintains public access to its performances and degree programs, offers high-level professional and academic standards, as well as unique creative and scholarly opportunities appropriate to a large research university. The Department also cultivates a deep aesthetic understanding of music in our students and the larger urban arts community.

- Music (M.A.) (p. 161)
- Music (M.Mus.) (p. 161)
- Orchestral Studies (Graduate Certificate) (p. 163)

Music (M.A.)

The Master of Arts degree is designed for students who wish to pursue an academic career in music through a broad liberal arts curriculum. The Master of Music degree provides a program for talented students pursuing a professional concentration in:

- Composition/Theory
- Conducting
- Performance
- Jazz Performance

Admission Requirements

Admission to these programs is contingent upon admission to the Graduate School (p. 19). In addition, all master's degree applicants in music must:

1. apply to the Graduate School as a Music Major;
2. possess an undergraduate degree in the same field for which he or she wishes to pursue graduate study, or its equivalent in course work, private study, or experience;
3. complete pre-admission auditions or interviews. Audition and interview requirements are available from the Department of Music (<http://www.music.wayne.edu/auditions.php>).

All students admitted to Master's degrees are required to pass departmental diagnostic examinations (http://www.music.wayne.edu/graduate_curr.php) in theory and history.

The master's degree is offered under the following options:

Plan A: Twenty-four credits in course work, plus an eight-credit thesis, available to students enrolled in the M.A. or the M.Mus. with a concentration in Composition/Theory or Music Education. An original composition approved by the Composition/Theory Area Coordinator substitutes for the thesis in the M.Mus. degree with a concentration in Composition/Theory.

Plan B: Twenty-nine credits in course work, plus a three-credit essay, available to students enrolled in the M.Mus. with a concentration in Music Education only.

Plan C (Conducting, Performance, and Jazz Performance): Thirty-two credits in course work, plus a graduate recital with program notes (http://music.wayne.edu/graduate_curr.php).

Plan C (Music Education only): Thirty-two credits in course work, plus an oral presentation and written examination. (Music Education students may elect Plan A, B, or C – consult the Degree Requirements section, below).

Oral Examination: An oral examination is required of all students in the M.A. or the M.Mus. program concentrating in Composition/Theory, Conducting, Jazz Performance, or Performance. Music Education

students who choose *Plan C* must complete an oral presentation and undertake a written examination in the area of concentration.

Candidacy must be established by the time twelve credits have been earned toward the master's degree. Applicants become degree candidates only upon recommendation of the Departmental Graduate Officer and submission of an approved *Plan of Work*. Before a student can be admitted to candidacy in the Master of Arts curriculum, satisfactory completion of a reading examination in a foreign language (preferably German or French) is required.

Academic Scholarship: The University requires that each student achieve a minimum grade point average of 3.0, in order to be eligible for a graduate degree. All courses in the student's major must be completed with a grade of 'B-minus' or higher to be counted towards program credit. Grades below 'B-minus' are unsatisfactory and constitute valid cause for dismissing a student from a graduate program. The Department of Music permits a student to accumulate a maximum of six credits of 'B-minus' grades (in courses other than the area of concentration) as long as they are offset by higher grades so that a 3.0 grade point average is maintained at all times. Additionally, credits of B-minus and below in excess of six credits may result in dismissal from the program, regardless of whether the courses are included on the student's Plan of Work. All course work must be completed in accordance with the regulations of the Graduate School (p. 12) and the College of Fine, Performing, and Communication Arts (p. 153).

Music (M.A.)

Prerequisite: Prospective students should present a minimum of forty-five acceptable undergraduate credits in music distributed according to the requirements for the Bachelor of Arts degree with a major in music or its equivalent in course work, study, and experience. All students applying to the M.A. must complete a pre-admission interview or audition.

Music Education (M.Mus.)

Note: The M. Mus. degree in music education is currently under revision with plans for updating the curriculum to accommodate recent reforms in education while addressing the needs of practicing teachers. Consequently there is new student admissions moratorium in effect for this program. For current information, please contact the Department of Music, 313-577-1795.

Orchestral Studies (Graduate Certificate)

The Graduate Certificate Program in Orchestral Studies is intended for instrumentalists with an interest in pursuing advanced and intense training in the art of orchestral playing. Even though it is primarily intended for musicians with an undergraduate or graduate degree in music, candidates with degrees in other fields will be considered if they can demonstrate extensive musical experience, including highly advanced performance skills on an orchestral principal instrument.

Admission Requirements

The Orchestral Studies Graduate Certificate Program is currently under revision with plans for updating the curriculum. Consequently, there is a new student admissions moratorium in effect for this program. For current information, please contact the Department of Music 313-577-1775.

Admission to this program is contingent upon admission to the Graduate School (p. 19). Candidates should possess either an undergraduate degree in music or its equivalent in course work, private study, and experience.

Prerequisite: Bachelor of Music with a concentration in instrumental performance or its equivalent as described above. All applicants must successfully complete a pre-admission audition.

Code	Title	Credits

Theatre and Dance

Office: 3226 Old Main; 313-577-3508
Chairperson: John Wolf
<http://www.theatreanddance.wayne.edu>

- Arts Administration (M.A.) (p. 164)
- Theatre (M.F.A.) (p. 164)
- Theatre and Dance (M.A.) (p. 166)

Arts Administration (M.A.)

The Master of Arts in Arts Administration program offers a broad arts administration education as well as focus within specific areas of practice. The program fosters leadership and management skills, explores processes of innovation and creativity, examines networks and sources of support, while drawing on sound business and administrative training. The program also makes use of local dynamic arts institutions and the smaller entrepreneurial arts and cultural organizations. Students will receive the background to lead arts and cultural organizations such as theaters, galleries, museums, arts and culture festivals, arts centers, arts councils, local and regional arts boards, dance companies, community arts and cultural organizations, and musical ensembles including symphonies, orchestras, jazz and choral groups.

Admission Requirements

Admission to this program is contingent upon admission to the Graduate School (p. 19).

The program requires a minimum total of 30 credits. The curriculum may be fulfilled with a minimum of 28 credits of coursework and 2 credits of Master's Essay Direction or an approved Directed Study.

Degree Requirements

Code	Title	Credits

Theatre (M.F.A.)

The Master of Fine Arts curriculum in theatre is a three-year program of intensive professional training in the student's area of specialization and is offered in acting, theatre stage design, stage costume design, stage lighting design, theatre management or stage management.

Admission Requirements

Admission to this program is contingent upon admission to the Graduate School (p. 19). Students with a bachelor's degree are eligible to enroll in the M.F.A. program if they have successfully completed an audition or personal interview with the theatre arts faculty. Students must declare their area of specialization upon entry into the program.

The Master of Fine Arts with a Major in Theatre is offered only as a Plan C master's program, requiring sixty credits in the area of specialization. All programs require a final project and a final oral examination relevant to the degree specialization. All course work must be completed in accordance with the regulations of the Graduate School (p. 12) and the College of Fine, Performing, and Communication Arts (p. 153).

Theatre and Dance (M.A.)

The Master of Arts degree includes a three-year part-time program of advanced studies in theatre and dance, designed to provide specialized training in research methods and assessment, pedagogical foundations of teaching artistry, artistic practice and inquiry, and community engagement.

Admission Requirements

Admission to this program is contingent upon admission to the Graduate School (p. 19).

The program requires a total of thirty two (32) credits, and can be completed in one of two options:

- Plan A (Thesis): Includes 24 credits of coursework and 8 credits of Master's Thesis Research and Direction
- Plan B (Essay): Includes 28 credits of coursework and 4 credits of Master's Essay Direction

Plan A: Thesis

Three-Year Part-Time Plan

Code	Title	Credits
THR 7951	Foundations of Theatre and Dance Pedagogy	3
THR 7901	Research Methods in Theatre and Dance	3
THR 8875	Seminar: Research Topics in Theatre and Drama	3

SCHOOL OF INFORMATION SCIENCES

Dean: Jon Cawthorne

The Information Profession

The School of Information Sciences (SIS) prepares information professionals to assume leadership roles in libraries and information organizations. By emphasizing the practical application of knowledge and skills, students are trained in the core principles of information management - information access, organization, services, and management - as well as emerging competencies such as digitization, competitive intelligence, information architecture, and website development. SIS faculty research issues that improve library and information services as an essential component to cultural enrichment, knowledge dissemination, economic development, and the overall quality of life.

Qualified information professionals work in varied settings all over the globe. SIS graduates work in libraries as well as diverse information careers in the public, private, and nonprofit sectors. As organizations continue to view their information as a critical resource and place greater importance on its cultivation, SIS graduates can be found enjoying engaging and exciting careers throughout business, law, health sciences, publishing, government, archives and museums, communications and media, engineering, academia, pre-K-12 education, information organizations and industries.

Graduate Degrees

The School of Information Sciences offers two master's level degree options. The Master of Library and Information Science (MLIS) degree is recognized by the American Library Association (ALA) as the first professional degree in this field and serves as the credential for entry-level professional employment. The Master of Science in Information Management (MSIM) expands the school's current Graduate Certificate in Information Management (GCIM) into a degree that complements the school's Master of Library and Information Science (MLIS) degree. The MSIM will appeal to prospective graduate students with an interest in working as information professionals in organizations and industries outside the typical venues for MLIS degree holders (e.g., libraries, archives, or school media centers) where a foundational core of library science coursework is not required.

Accreditation

The School of Information Sciences' MLIS degree has been accredited continuously by the American Library Association since 1967. The School's most recent continuing accreditation was granted by the ALA Committee on Accreditation in 2017. The School's next comprehensive accreditation review occurs in the Fall of 2023.

Mission and Goals of the School

Mission Statement

We combine theories with practices to educate leaders who advance the importance of information in society. We deliver accessible, high quality education incorporating professional scholarship and best practices. We focus on three pillars:

Library Users and Services
Information Management
Archives and Digital Content Management

Goals and Objectives

TEACHING EXCELLENCE: SIS will encourage and teach professional approaches and a service philosophy.

- SIS will educate students in the history, philosophies, theories, principles, policies, and ethics of library and information science.
- SIS will expose students to the historical, social, cultural, educational, political, and economic dimensions of information and information agencies.
- SIS will provide the skills and dispositions for excellence in information service delivery.
- SIS will continuously evaluate and apply evolving technologies to its teaching, learning, research, and service programs.

STUDENT SUCCESS: SIS will cultivate a culture of student success.

- SIS will incorporate career enhancement skills development into all courses.
- SIS will promote relationships between students and other members of the campus community who support student learning and success.
- SIS will deliver a "Distinctively Wayne State" experience that leverages our Detroit location, diversity, and academic and research excellence to better prepare students for success.
- SIS will stress the importance of lifelong learning and will promote opportunities to sustain professional growth and achievement, including career mentoring.

RESEARCH: SIS will foster, facilitate, and support research by faculty and students.

- SIS will support faculty research and scholarly communication.
- SIS will cultivate faculty engagement with student research experiences and skill development.
- SIS will encourage and support students in presenting their research in courses, at conferences, and through publication.

DIVERSITY AND INCLUSION: SIS will be engaged within the diverse communities and world of which we are a part.

- SIS will seek diversity among the faculty.
- SIS will seek diversity and facilitate inclusion among the student body.
- SIS will address the roles of library and information services in a diverse global society, paying particular attention to the underserved.
- SIS will facilitate student experience in multicultural and multiethnic information environments.

COMMUNITY ENGAGEMENT: SIS will practice and foster engagement in traditional as well as interdisciplinary research, scholarship, and practices that address important societal as well as information and library issues.

- SIS will engage the library community, alumni, and employers.
- SIS will promote commitment and involvement in professional associations and organizations.
- SIS will encourage involvement in the community and community organizations.
- SIS will support service activities and participation in leadership roles at the School, University, local, state, national, and international levels.

Technology Support

The School of Information Sciences provides SIS students, faculty, and staff with a variety of computing resources that support the School's

on-campus and online programs. The School offers students a variety of software products at no cost, including major productivity suites, powerful database software, diagramming tools, and current operating systems. The School provides free technical support to all of its students through several mediums, including email and over the phone. The School maintains a web server for student use, as well as provides access to synchronous online meeting tools for classes and student groups. SIS students have full access to the resources provided by University Computing and the University Library System, including public access computing labs, email and calendaring services, learning management systems, library databases, and full-text e-journals and other resources.

Graduate Certificate Programs

- Archival Administration (Graduate Certificate) (p. 168)
- Information Management (Graduate Certificate) (p. 169)
- Library and Information Science (Graduate Certificate) (p. 170)
- Library and Information Science (Specialist Certificate) (p. 170)
- Public Library Services to Children and Young Adults (Graduate Certificate) (p. 171)

Archival Administration (Graduate Certificate)

The Graduate Certificate in Archival Administration was established both for individuals entering the archival profession and for those with experience in the field. The certificate program provides a professional education to individuals wishing to identify, preserve, and make archival records accessible for use.

The Archival Administration certificate includes courses which teach students basic archival theory, methods and practice of appraisal, arrangement, description, preservation, reference, and the legal and ethical concerns regarding traditional, visual, and electronic records. In addition, other courses include records management, historical institutions and an archival practicum.

This program is open to students with baccalaureate degrees from accredited universities, students with advanced degrees, and students enrolled in other Wayne State University graduate programs.

Admission Requirements

Admission to the School is contingent upon admission to the Graduate School (p. 19). In addition, Graduate Certificate in Archival Administration applicants must satisfy the following criteria:

1. Possess an undergraduate degree from an accredited college or university.
2. Have an undergraduate grade point average of 3.00 or better or possess another degree beyond the bachelor's degree. Applicants with an undergraduate grade point average between 2.50 and 2.99 can satisfy this requirement by one of the Alternative Admissions methods (<http://sis.wayne.edu/admissions/alternative-admissions.php>).
3. Meet the technology requirements (<http://sis.wayne.edu/admissions/technology.php>).
4. Submit a personal statement (http://sis.wayne.edu/forms/personal_statement.pdf) reflecting relevant personal and academic background and experience. The statement should be a minimum of 250 words and a maximum of 500 words (1-2 pages).
5. Submit a current resume or curriculum vitae.

Application:

1. Complete and submit the online Graduate Admission Application form (<http://gradadmissions.wayne.edu/apply.php>).
2. Compose a personal statement (http://sis.wayne.edu/forms/personal_statement.pdf) and upload it to your application.
3. Upload a current resume or curriculum vitae with your application.
4. Pay \$50 application fee (<https://wayne.edu/admissions/graduate/admission-requirements>).
5. Request official transcripts from each university you have attended and have them sent directly to Graduate Admissions (<https://gradschool.wayne.edu/contact>), Wayne State University, Detroit, MI, 48202.

Student Learning Outcomes - GCAA

Students who successfully complete the Graduate Certificate in Archival Administration at the Wayne State University School of Information Sciences will be able to:

1. Describe the history, intent, challenges, and issues of archival management as a profession.
2. Develop the ability to preserve, organize and create access for the historic record.
3. Recognize professional processes to identify, conserve, store, and re-format various informational forms from historic to current.
4. Analyze the intellectual content of archival material to create optimal access (i.e., archival description) and designate long-term historic importance (i.e., archival appraisal).
5. Translate archival theory into professional engagement to better their communities.
6. Determine the best uses of technology for archives and their communities.
7. Support and respect a diverse user base through research, communication skills, and collections.
8. Recognize the importance of advocacy, outreach, education, ethics, and professional values for an archive.
9. Apply leadership and best practices to manage, budget, and implement projects.

Students in graduate certificate programs at Wayne State must maintain a minimum grade point average of 3.0. The fifteen-credit Archival Administration Certificate includes nine credits of required coursework and six credits of elective coursework. Students working concurrently on the M.L.I.S. degree and the Certificate in Archival Administration are required to complete an additional six credits beyond the thirty-six required for the M.L.I.S. degree.

Students must complete fifteen credits selected from the following:

Code	Title	Credits
Required Courses		
INF 7710	Archival Administration	3
INF 7780	Description and Access for Archives	3
INF 7970	Practicum: Archives	3
Electives		
Select two of the following:		6
INF 6780	Introduction to Records and Information Management	3
INF 7730	Administration of Audio Visual Collections	3
INF 7740	Archives and Libraries in the Digital World	3
INF 7750	Introduction to Archival and Library Conservation	3

INF 7770	Oral History: A Methodology for Research	3
INF 7885	Administration of Historical Agencies	3

The Archival Administration Graduate Certificate is designed to be completed in 1 years.

This program will cost \$14,097.82 for in-state tuition and fees and \$25,597.87 for out-of-state tuition and fees if completed within normal time. There may be additional costs for living expenses. These costs were accurate at the time of posting, but may have changed.

Fewer than 10 students completed this program within normal time. Typical student debt has been withheld to preserve the confidentiality of the students.

This program does not meet any licensure requirements.

For more information about graduation rates, loan repayment rates, and post-enrollment earnings about this institution and other postsecondary institutions please click here: <https://collegescorecard.ed.gov/>.

Information Management (Graduate Certificate)

The Graduate Certificate in Information Management (IM) serves the needs of those who wish to enter the rapidly expanding information field. This certificate program seeks to provide students, librarians, and information professionals with the tools needed to use technology efficiently and effectively in gathering, storing, and disseminating information. Computers and productivity tools are helping knowledge workers in accessing information, generating insights, structuring results into a useful format, and producing knowledge simultaneously. The use of these productivity tools by knowledge workers requires that information professionals alter their perceived traditional professional role so that they can provide expanded services and support to these knowledge workers as well as to continue to perform their traditional professional responsibilities.

The program is open to students with advanced degrees in related fields, students enrolled in the School of Information Sciences MLIS program or other Wayne State University graduate programs, and, on a case by case basis, students with baccalaureate degrees from accredited universities who possess the appropriate background experience.

Admission Requirements

Admission to the School is contingent upon admission to the Graduate School (p. 19). In addition, Graduate Certificate in Information Management applicants must satisfy the following criteria:

1. Possess an undergraduate degree from an accredited college or university.
2. Have an undergraduate grade point average of 3.00 or better or possess another degree beyond the bachelor's degree. Applicants with an undergraduate grade point average between 2.50 and 2.99 can satisfy this requirement by one of the Alternative Admissions methods (<http://sis.wayne.edu/admissions/alternative-admissions.php>).
3. Meet the Technology Requirements (<http://sis.wayne.edu/admissions/technology.php>). Entering students with strong technology skills are encouraged to consider submitting a request to waive the prerequisite (<http://sis.wayne.edu/students/policies/waiver.php>), LIS 6080, Information Technology.
4. Submit a personal statement (http://sis.wayne.edu/forms/personal_statement.pdf) reflecting relevant personal and academic

background and experience. The statement should be a minimum of 250 words and a maximum of 500 words (1-2 pages).

5. Submit a current resume or curriculum vitae.

Application:

1. Complete and submit the online Graduate Admission Application form (<http://gradadmissions.wayne.edu/apply.php>).
2. Compose a personal statement (http://sis.wayne.edu/forms/personal_statement.pdf) and upload it to your application.
3. Upload a current resume or curriculum vitae with your application.
4. Pay \$50 application fee (<https://wayne.edu/admissions/graduate/admission-requirements>).
5. Request official transcripts from each university you have attended and have them sent directly to Graduate Admissions (<https://gradschool.wayne.edu/contact>), Wayne State University, Detroit, MI, 48202.

Student Learning Outcomes - GCIM

Students who successfully complete the Graduate Certificate in Information Management at the Wayne State University School of Information Sciences will be able to:

1. Utilize and assess technologies for the creation, production, manipulation, modeling, mining, analysis, control, distribution, access, and use of information.
2. Leverage databases and large datasets to uncover and present insights that drive decision-making.
3. Collaborate with organizations to present their products and services to their users and customers in the most accessible and useful manner.
4. Apply usability principles and methods in assessing and designing information services and products for better user experiences.
5. Analyze how information policies affect information creation, production, control, protection, distribution, access, use and evaluation in different socio-technical contexts.
6. Develop independent learning skills and appreciate the need for lifelong learning of information technologies.

Students admitted to the Information Management Graduate Certificate Program will be required to complete a minimum of 15 graduate credits. If this certificate is combined with the Master of Library and Information Science degree, 18 hours in the professional core, 15 hours in the Information Management specialization and 9 hours of elective courses will be required.

Students in graduate certificate programs at Wayne State must maintain a minimum grade point average of 3.0. Students working concurrently on the M.L.I.S. degree and the Certificate in Information Management are required to complete an additional six credits beyond the thirty-six required for the M.L.I.S. degree:

Code	Title	Credits

Library and Information Science (Graduate Certificate)

The mission of the Graduate Certificate in Library and Information Science (GCLIS) is to equip pre or post-master's students with specialized competencies and problem solving abilities in a particular area of librarianship or information studies chosen from the wealth of courses offered by the School. For instance, if a GCLIS student would like to update his or her skills in a particular area, he or she may select courses that offer training in recent technologies, techniques, or skills that either were not obtained previously or have since become outdated. Additionally, a student might obtain the GCLIS in order to acquire the requisite training for new employment opportunities. Students may mix and match from the entire catalog of courses offered by the School.

Admission Requirements

Admission to the School is contingent upon admission to the Graduate School (p. 19). In addition, Graduate Certificate in Library and Information Science applicants must satisfy the following criteria:

1. Possess an undergraduate degree from an accredited college or university.
2. Have an undergraduate grade point average of 3.00 or better or possess another degree beyond the bachelor's degree. Applicants with an undergraduate grade point average between 2.50 and 2.99 can satisfy this requirement by one of the Alternative Admissions methods (<http://sis.wayne.edu/admissions/alternative-admissions.php>).
3. Meet the technology requirements (<http://sis.wayne.edu/admissions/technology.php>).
4. Submit a personal statement (http://sis.wayne.edu/forms/personal_statement.pdf) reflecting relevant personal and academic

background and experience. The statement should be a minimum of 250 words and a maximum of 500 words (1-2 pages).

5. Submit a current resume or curriculum vitae.

Application:

1. Complete and submit the online Graduate Admission Application form (<http://gradadmissions.wayne.edu/apply.php>).
2. Compose a personal statement (http://sis.wayne.edu/forms/personal_statement.pdf) and upload it to your application.
3. Upload a current resume or curriculum vitae with your application.
4. Pay \$50 application fee (<https://wayne.edu/admissions/graduate/admission-requirements>).
5. Request official transcripts from each university you have attended and have them sent directly to Graduate Admissions (<https://gradschool.wayne.edu/contact>), Wayne State University, Detroit, MI, 48202.

Learning Outcomes - GCLIS

Students who successfully complete the Graduate Certificate in Library and Information Science at the Wayne State University School of Information Sciences will be able to:

1. Demonstrate competence in a specialized area of librarianship or information studies.
2. Demonstrate up-to-date knowledge in the rapidly-changing field of librarianship and information studies: chiefly the organization, storage, retrieval, and dissemination of the human record.
3. Use problem-solving and decision-making skills to plan, implement, and evaluate specialized library or information services.
4. Develop a specialized competence responsive to the changing economic, technological, or social climate.

Academic Requirements

The 15-credit GCLIS program includes 15 hours of coursework. For students completing the certificate only, INF 6080 –Information Technology or equivalent knowledge and skills are required as a pre-requisite. Students must maintain a 3.0 average and meet all School requirements for ongoing enrollment including a completed Plan of Work.

Library and Information Science (Specialist Certificate)

The Specialist Program in Library and Information Science is a postmaster's certificate curriculum designed for the practicing professional who requires specialized competence in an area of librarianship or information management, such as public services, technical services, reference, or information technology. This program enables librarians to:

1. update knowledge in the rapidly changing field of librarianship and information management—the organization, storage, retrieval, and dissemination of the human record;
2. use investigative methods and research findings in problem-solving and in the planning and evaluation of library and information services;
3. advance and extend competencies in areas of specialization beyond during the first professional degree program (M.L.I.S.). Specializations may be in a particular library function (such as organization of materials, retrieval of information, information technology, collection development, management, public relations, and adult education), or in a type of information center (such as public, school, academic, and special), or in a service to a specific

target group (such as business and industry, early childhood, the elderly, the handicapped, the institutionalized);

4. develop a new specialization responsive to the changing economic, technological, or social climate or to changing conditions in the life of the individual information professional; and/or
5. achieve other professional goals, as needed.

Admission Requirements

Admission to this program is contingent upon admission to the Graduate School (p. 19). In addition, applicants to the Specialist program in Library and Information Science must satisfy the following criteria:

1. Possess a master's degree in library and information science.
2. Have professional employment experience as a librarian or information specialist.
3. Submit a goals statement reflecting relevant personal and academic background and experience.
4. Submit a current resume or curriculum vitae.
5. Demonstrate professional competence, leadership, and potential for further growth.
6. Meet the SLIS Technology Requirements (<http://www.slis.wayne.edu/technology-requirements.php>).

Candidates for the Specialist Certificate in Library and Information Science must complete thirty credits of 6000-8000 level course work providing the appropriate degree of concentration relevant to the student's career goals. Students in specialist certificate programs at Wayne State must maintain a minimum grade point average of 3.0. A Plan of Work and prescribed courses will be developed in consultation with a faculty advisor.

The Library and Information Science Graduate Specialist Certificate is designed to be completed in 2 years.

This program will cost \$28,195.64 for in-state tuition and fees and \$51,195.74 for out-of-state tuition and fees if completed within normal time. There may be additional costs for living expenses. These costs were accurate at the time of posting, but may have changed.

Fewer than 10 students completed this program within normal time. Typical student debt has been withheld to preserve the confidentiality of the students.

This program does not meet any licensure requirements.

For more information about graduation rates, loan repayment rates, and post-enrollment earnings about this institution and other postsecondary institutions please click here: <https://collegescorecard.ed.gov/>.

Public Library Services to Children and Young Adults (Graduate Certificate)

The Graduate Certificate in Public Library Services to Children and Young Adults is intended for: practicing library professionals who need to advance their competency in the field of children and youth services; SIS graduate students wishing to pursue a professional career in children and youth services; and graduate students from other disciplines and professions who wish to obtain public library and youth services skills to aid their organizations in meeting community needs.

Children and young adults comprise a high proportion of the patrons of public libraries - from large urban library systems to suburban library districts to small rural independent libraries. Services to children

and young adults requires specialized training in the development of programs, the creation of effective collections, and the skills necessary to collaborate with community organizations who serve children and young adults. Students completing the certificate will be able to: develop effective programs and outreach services for children and young adults in public libraries; create appropriate collections, both print and electronic, for children and young adults in public libraries; and collaborate with community agencies, such as schools, social services, health organizations, to provide needed instruction and support for children and young adults.

Admission Requirements

Admission to the School is contingent upon admission to the Graduate School (p. 19). In addition, Graduate Certificate in Public Library Services to Children and Young Adults applicants must satisfy the following criteria:

1. Possess an undergraduate degree from an accredited college or university. Possess a Masters in Library and Information Science degree or equivalent, or be currently enrolled in a Masters in Library and Information Science degree program.
2. Have an undergraduate grade point average of 3.00 or better or possess another degree beyond the bachelor's degree. Applicants with an undergraduate grade point average between 2.50 and 2.99 can satisfy this requirement by one of the Alternative Admissions methods (<http://sis.wayne.edu/admissions/alternative-admissions.php>).
3. Meet the technology requirements (<http://sis.wayne.edu/admissions/technology.php>).
4. Submit a personal statement (http://sis.wayne.edu/forms/personal_statement.pdf) reflecting relevant personal and academic background and experience. The statement should be a minimum of 250 words and a maximum of 500 words (1-2 pages).
5. Submit a current resume or curriculum vitae.

Application:

1. Complete and submit the online Graduate Admission Application form (<http://gradadmissions.wayne.edu/apply.php>).
2. Compose a personal statement (http://sis.wayne.edu/forms/personal_statement.pdf) and upload it to your application.
3. Upload a current resume or curriculum vitae with your application.
4. Pay \$50 application fee (<https://wayne.edu/admissions/graduate/admission-requirements>).
5. Request official transcripts from each university you have attended and have them sent directly to Graduate Admissions (<https://gradschool.wayne.edu/contact>), Wayne State University, Detroit, MI, 48202.

Student Learning Outcomes - GCPLSC

Students who successfully complete the Graduate Certificate in Public Library Services to Children and Young Adults at the Wayne State University School of Information Sciences will be able to:

1. Develop effective programs and outreach services for children and young adults in public libraries.
2. Create appropriate collections, both print and electronic, for children and young adults in public libraries.
3. Collaborate with community agencies, such as schools, social services and health organizations, to provide needed instruction and support for children and young adults.

4. Apply leadership principles to creating environments for children and young adults that respond to diversity and cultural needs of the community.

The certificate may be completed in conjunction with the MLIS degree or as a post-MLIS certificate. The fifteen-credit Public Library Services to Children and Young Adults Certificate program includes nine credits of required coursework and six credits of electives. The nine credits of required courses cover the development of effective services for children and young adults (LIS 7250), outreach and marketing to communities and families (LIS 7250 and LIS 7420) and creating appropriate collections for children and young adults (LIS 7340). Students choose from among a wide range of elective courses related to children's literature, bibliographic instruction and practical experiences for six hours to complete the certificate.

As with other certificates, nine credits of this certificate may be used toward completion of the Master's degree requirements.

Master's Programs

- Information Management (M.S.I.M.) (p. 172)
- Library and Information Science (M.L.I.S.) (p. 173)
- Library and Information Science and History (M.A./M.L.I.S. Joint Degree) (p. 174)
- Library and Information Science and Public History (M.A.P.H./M.L.I.S. Joint Degree) (p. 175)

Information Management (M.S.I.M.)

For complete information regarding the academic rules and regulations of the University, students should consult the Academic Regulations (p. 12) section of this bulletin. The following additions and amendments pertain to the School of Information Sciences.

The MS in Information Management (MSIM) uniquely prepares students to be successful in data-intensive and user-centric environments. This degree prepares students to support data-driven problem-solving and decision-making in diverse fields. With this degree, students will develop skills necessary to assess, adopt, and utilize information technologies to design positive user experiences and obtain useful insights.

Today, information is a crucial resource – be it social, mobile, cloud or big data. Information professionals with the expertise to find, capture, master, and deliver information are in higher demand than ever before. The MS

in Information Management provides the core analytical and problem-solving skills necessary to stay competitive and excel in today's data-intensive, information-rich environments.

Admission Requirements

Admission to the School is contingent upon admission to the Graduate School (p. 19). In addition, Master of Library and Information Science applicants must satisfy the following criteria:

1. Possess an undergraduate degree from an accredited college or university.
2. Have an undergraduate grade point average of 3.00 or better or possess another degree beyond the bachelor's degree. Applicants with an undergraduate grade point average between 2.50 and 2.99 can satisfy this requirement by one of the Alternative Admissions methods (<http://sis.wayne.edu/admissions/alternative-admissions.php>).
3. Meet the MSIM Technology Requirements (http://sis.wayne.edu/admissions/msim_technology.php) and MSIM Technical Competencies (http://sis.wayne.edu/admissions/msim_tech_competencies.php).
4. Submit a personal statement (http://sis.wayne.edu/forms/personal_statement.pdf) addressing your experience and familiarity with the required technical competencies needed for admission to the Master of Science in Information Management (MSIM) degree. The statement should be a minimum of 250 words and a maximum of 500 words (1-2 pages).
5. Submit a current resume or curriculum vitae.
6. MSIM students are expected to complete an online New Student Orientation (<http://sis.wayne.edu/admissions/onlineorientationdetails.php>) prior to starting classes.

Application:

1. Complete and submit the online Graduate Admission Application form (<http://gradadmissions.wayne.edu/apply.php>).
2. Compose a personal statement (http://sis.wayne.edu/forms/personal_statement.pdf) and upload it to your application.
3. Upload a current resume or curriculum vitae with your application.
4. Pay \$50 application fee (<https://wayne.edu/admissions/graduate/admission-requirements>).
5. Request official transcripts from each university you have attended and have them sent directly to Graduate Admissions (<https://gradschool.wayne.edu/contact>), Wayne State University, Detroit, MI, 48202.

Learning Outcomes - MSIM

Students who successfully complete the MS in Information Management at the Wayne State University School of Information Sciences will be able to:

1. Utilize and assess technologies for the creation, production, manipulation, modeling, mining, analysis, control, distribution, access, and use of information.
2. Leverage databases and datasets to uncover and present insights that drive decision-making.
3. Apply principles and methods towards assessing and designing information services and products for better user experiences.
4. Analyze how information policies affect information creation, production, control, protection, distribution, access, use and evaluation in different socio-technical contexts.

5. Develop independent learning skills and appreciate the need for lifelong learning of information technologies.

The Master of Science in Information Management is offered only as a Plan C master's program. A maximum of six credits in courses outside of library and information science may be accepted as cognates. Students must maintain a minimum grade point average of 3.0.

The 30-credit MSIM degree includes 5 required courses (4 courses plus a capstone practicum) and 5 elective courses, organized into a variety of specializations. Students are free to combine elective courses from the various specializations to craft a customized Plan of Work that satisfies the student's particular needs.

Library and Information Science (M.L.I.S.)

For complete information regarding the academic rules and regulations of the University, students should consult the Academic Regulations (p. 12) section of this bulletin. The following additions and amendments pertain to the School of Information Sciences.

The accredited Master of Library and Information Science (MLIS) degree prepares professionals for leadership roles in libraries and other information organizations. By emphasizing the practical application of knowledge and skills, we educate students in the core principles of information management access, organization, services and support as well as emerging fields such as digital collections, competitive intelligence, information architecture and data analytics. The MLIS degree is available online with selected classes also offered on-campus.

Admission Requirements

Admission to the School is contingent upon admission to the Graduate School (p. 19). In addition, Master of Library and Information Science applicants must satisfy the following criteria:

1. Possess an undergraduate degree from an accredited college or university.
2. Have an undergraduate grade point average of 3.00 or better or possess another degree beyond the bachelor's degree. Applicants with an undergraduate grade point average between 2.50 and 2.99 can satisfy this requirement by one of the Alternative Admissions methods (<http://sis.wayne.edu/admissions/alternative-admissions.php>).
3. Meet the MLIS Technology Requirements (<http://sis.wayne.edu/admissions/technology.php>). Entering students with strong technology skills are encouraged to consider submitting a request to waive the core course (<http://sis.wayne.edu/students/policies/waiver.php>), LIS 6080, Information Technology.
4. Submit a personal statement (http://sis.wayne.edu/forms/personal_statement.pdf) reflecting relevant personal and academic background and experience. The statement should be a minimum of 250 words and a maximum of 500 words (1-2 pages).
5. Submit a current resume or curriculum vitae.
6. MLIS students are expected to complete an online New Student Orientation (<http://sis.wayne.edu/admissions/onlineorientationdetails.php>) prior to starting classes.

Application:

1. Complete and submit the online Graduate Admission Application form (<http://gradadmissions.wayne.edu/apply.php>).
2. Compose a personal statement (http://sis.wayne.edu/forms/personal_statement.pdf) and upload it to your application.
3. Upload a current resume or curriculum vitae with your application.
4. Pay \$50 application fee (<https://wayne.edu/admissions/graduate/admission-requirements>).
5. Request official transcripts from each university you have attended and have them sent directly to Graduate Admissions (<https://gradschool.wayne.edu/contact>), Wayne State University, Detroit, MI, 48202.

Learning Outcomes - Master of Library and Information Science

Students who successfully complete the Master of Library and Information Science degree at the Wayne State University School of Library and Information Science will be able to:

1. Critically evaluate, synthesize, and disseminate information.
2. Understand how complex interactions between diverse users, societal factors, and information environments affect professional situations.
3. Facilitate access to, and use of, information resources between users and communities.
4. Apply multiple and emerging approaches to the organization of knowledge for varied literatures, records, and historical documents.
5. Articulate and advocate for the foundations of the profession and its basic values and ethics such as intellectual freedom, information access and dissemination, and apply these principles to the advancement of the profession.
6. Determine the significance of intellectual property, security, and privacy issues.
7. Assess, adopt, and utilize the most relevant information technologies.
8. Utilize current management and leadership theories and practices in the workplace.
9. Evaluate and apply library and information science research to problems of professional practice by employing theories, best practices, and assessment strategies to the range of information functions.
10. Practice professional engagement through leadership, service work, lifelong learning and community involvement.

The Master of Library and Information Science is offered only as a Plan C master's program, requiring a minimum of thirty-six credits to be distributed as follows: Eighteen credits in the library and information science professional core, and eighteen credits in elective professional courses.

Code	Title	Credits
Professional Core		18
INF 6010	Introduction to the Information Profession	
INF 6080	Information Technology	
INF 6120	Access to Information	
INF 6210	Organization of Knowledge	
INF 7040	Library Administration and Management

Professional Specialization		18
Total Credits		36

A maximum of six credits in courses outside of library and information science may be accepted as cognates. Students must maintain a minimum grade point average of 3.0.

A Plan of Work is a formal statement of the goals and prescribed courses of a student's academic program. SIS requires that a Plan of Work be submitted after completion of nine credits of graduate course work. The Plan is prepared in consultation with the faculty advisor and may be organized around one or more areas of specialization. The emphasis may relate to the type of environment in which the student intends to work or to specialized job activities or functions. Faculty advisors will assist the student in devising an optimal Plan of Work that meets the student's academic goals. Please visit <http://sis.wayne.edu/mlis/index.php> for more information on the selection of elective courses.

Library and Information Science and History (M.A./M.L.I.S. Joint Degree)

Joint-degree programs allow students to earn two degrees with fewer credits than if the degrees are earned separately. Students who enroll in the joint program will earn both the M.L.I.S. and M.A. in History degree. Graduates will increase their job market potential and be prepared to enter a new workforce that is capable of appraising and describing historical records, creating websites, and preserving electronic documents. Candidates must complete the required courses as outlined for both programs in order to graduate. Core courses in one program may not be used as elective courses in the other; fourteen credits of electives may be double-counted.

Applicants to this fifty-seven credit program must be admitted to both the Department of History and the School of Information Sciences master's degree programs.

Requirements: Library and Information Science

Students will complete twenty-nine credits in core and elective Information Science courses and seven credits in History elective courses.

Code	Title	Credits

A minimum of two History courses in minor field		
Four History courses must be at the 7000 level		
At least one 8000 level History seminar		
INF Elective Courses		
Select seven credits		7
Total Credits		35

Total for both degrees: fifty-seven credits (no more than fourteen credits may be double-counted).

Library and Information Science and Public History (M.A.P.H./M.L.I.S. Joint Degree)

Students in this joint program will earn both the MAPH and an MLIS degree. Graduates of the program benefit from the joint preparation in public history and library and information science and increase their potential for finding employment in either field. Students are prepared to enter a new workforce with the skills to appraise and describe historical records, create and maintain websites, preserve electronic documents, and communicate with a public audience. Upon successful completion of this program students will be prepared for employment in a wide range of settings, including libraries, archives, museums, state and federal agencies, and the private sector.

Public history is applied history, and the MAPH leads to employment in occupations as diverse as museum work, library and archival research, public policy analysis, documentary filmmaking, state and national parks, and tourism. Public historians provide an essential service by making historical scholarship accessible to a broad public audience. Libraries, archives, and other institutions that hire information management professionals increasingly seek employees who can communicate with broad public audiences about their collections and holdings, and who can create exhibits and public programming. The MAPH/MLIS joint degree program responds to the changing professional expectations for librarians and archivists.

Applicants to this program must be admitted to both the School of Information Sciences and Department of History MAPH program.

Students complete a minimum of 55 credits total for both degrees (14 hours are double-counted). For the MAPH degree, students complete 33 hours of MAPH credits, inclusive of 8 hours of INF credits that will also count toward the student's MLIS degree. In SIS, students complete 30 hours of LIS credits and 6 hours of History credits, for a total of 36 credits. The History credits would also count toward the student's MAPH electives.

Requirements: Library and Information Science

The MLIS degree requires 36 credits (including 6 credits of HIS courses).

LAW SCHOOL

Dean: Richard Bierschbach

Wayne State University Law School, founded in 1927, is located in the heart of Detroit's historic cultural center, offering a unique urban experience. Detroit's vibrant legal market including government offices, state and federal courts, multinational corporations, unions and major law firms provides students with a wide range of opportunities for employment and externships. Our students are bright, mature, conscientious and altruistic. They come from unique backgrounds and professions, some having previously served as doctors, musicians, actors, engineers and law enforcement officers before pursuing the law. Wayne Law also offers a network of more than 11,000 living alumni, including established leaders of the legal community, practicing throughout the nation and in more than a dozen foreign countries. Our expert faculty's nationally and internationally recognized scholarship adds depth to our students' understanding of legal theory, doctrine and practice. Wayne Law students, faculty and alumni are deeply engaged in the community and profession.

Accreditation & National Recognition

Wayne State University Law School is accredited by the American Bar Association and is a member of the Association of American Law Schools. The Law School has a chapter of the Order of the Coif, the national honorary society dedicated to the highest standards of legal scholarship.

Setting & Facilities

The Law School is a flagship unit of Wayne State University, a major metropolitan research university located in the heart of Midtown, about four miles from downtown Detroit. Within blocks of the Law School are the Detroit Public Library, Detroit Institute of Arts, Charles H. Wright Museum of African American History, Detroit Science Center and other cultural attractions. The city of Detroit shares an international border with Canada and offers access to Michigan's largest concentration of law firms and state and federal courts.

The Law School complex includes four buildings - Classroom Building, Damon J. Keith Center for Civil Rights, Law Building and Arthur Neef Law Library with lounges, gathering areas and meeting rooms. The three-floor Arthur Neef Law Library offers print and digital resources, a computer lab, 14 study rooms and wireless access. Special collections cover antitrust law, international law, Jewish law and Michigan law.

Degrees

The Law School offers academic programs leading to the degrees of Juris Doctor (J.D.) and Master of Laws (LL.M.). The J.D. is a graduate degree requiring a baccalaureate degree as a prerequisite. The LL.M. is a graduate degree offered by the Law School in the fields of and corporate and finance law, labor and employment law, and taxation which requires the J.D. or its equivalent as a prerequisite. The Law School also participates in joint degree programs with other Schools and Colleges within the University.

Damon J. Keith Center for Civil Rights

The Damon J. Keith Center for Civil Rights at Wayne Law is a regional hub for civil rights teaching, research and advocacy, training and inspiring the next generation of civil rights leaders in honor of the legacy of Judge Damon J. Keith. At the center, stakeholders gather to analyze policy, law students teach a civil rights curriculum to high school students and leaders dive into the issues of the day, such as tax foreclosures, water shutoffs and police-community relations. The center welcomes

the public for lectures by civil rights icons, supports community-based organizations and publishes scholarship about how the law and social justice impact one another. The center offers the nation's first and only repository dedicated to African-American legal history, along with a traveling exhibit about the 14th Amendment's guarantee of equal protection under the law.

In summer 2014, WSU was awarded a three-year, \$1.3 million grant from the W.K. Kellogg Foundation to launch the Detroit Equity Action Lab at the Keith Center. Through this initiative, 60 leaders working in the many dimensions of racial equity, including arts and media, community development, education, environment, food security, health care and housing, will address issues of structural racism in Detroit.

For more information about the Keith Center, visit [law.wayne.edu/keithcenter](http://www.law.wayne.edu/keithcenter) (<http://www.law.wayne.edu/keithcenter>).

Arthur Neef Law Library

The Arthur Neef Law Library provides a major legal research center for Wayne Law students and faculty. Its special collections include the Alwyn V. Freeman International Law Collection, Driker Antitrust Law Collection, Jewish Law Collection and a comprehensive collection of current and historical Michigan law materials that include the Michigan Supreme Court Records and Briefs, Michigan probate court opinions and Michigan Superfund site documents. The law library is a selective depository for U.S. government publications. The law library's extensive print and digital resources are accessible at [library.wayne.edu/neef](http://www.library.wayne.edu/neef) (<http://www.library.wayne.edu/neef>).

Databases and other e-resources are easily discoverable and remotely accessible.

The law library building was designed to make optimal use of natural light in reading and study areas. Tables, carrels and soft-seating areas are available throughout the law library and offer wired and wireless access to networked resources. Our students may reserve any of the 14 study rooms through an online reservation system. A computer lab featuring desktop computers, printers and scanners is reserved for the exclusive use of Wayne Law students.

Admissions Policies and Procedures (J.D. Program)

Preparation for law study

The Law School has no requirements with respect to the content of an applicant's undergraduate education, but the Admissions Committee will take into account the nature of college work completed as well as the grades achieved. Proficiency in the English language, both written and spoken, and in analytical skills is essential to the study of law. The suggestions for pre-law preparation in the ABA-LSAC Official Guide to ABA-Approved Law Schools are excellent. The book may be ordered from the Law School Admission Council (<http://lsac.org>) and is available in most bookstores and libraries.

Admissions Policy

The Law School enrolls one class per year. Each class begins in August. Applications are accepted from Oct. 1 through July 1. Admission to Wayne Law is selective, and there is a great deal of competition to be a member of an entering class.

The Admissions Office uses rolling admissions. As applications become complete they are evaluated for a decision. Applicants are strongly encouraged to apply early as the class fills rapidly as the deadline approaches.

An applicant for admission to the J.D. program must have a bachelor's degree from an accredited college or university or apply pursuant to an articulation agreement with an undergraduate institution that grants the degree upon successful completion of all required first year courses in the Law School. A final official transcript must be sent to the Law School before enrolling.

Each applicant also must take the Law School Admission Test (LSAT) and register with the Law School Data Assembly Service (LSDAS). The Law School requires that students educated in a foreign country submit their transcripts through the Law School Admission Council J.D. Credential Assembly Service. Applicants who completed any post-secondary work outside of the United States, its territories or Canada must use this service for the evaluation of foreign transcripts. The one exception to this requirement is any foreign work completed through a study abroad, consortium or exchange program sponsored by a U.S. or Canadian institution where the work is clearly indicated as such on the home campus transcript.

Applicants must take the LSAT no later than June of the year in which they intend to enroll. The Admissions Office will accept LSAT test scores that are up to five years old.

Admissions decisions

At Wayne Law, we use a holistic approach in evaluating applicants. Every application is thoroughly read by an admissions professional and members of the Faculty Admissions Committee. The Admissions Committee considers positively the following factors in reaching admissions decisions:

1. an applicant's academic achievement and potential, as shown by his/her LSAT score and Grade Point Average;
2. an applicant's demonstrated capacity to overcome or persevere against:
 - a. socioeconomic disadvantage, whether the applicant would be the first generation of his/her family to attend or graduate from college or professional program and whether he/she was employed or raising a family while attending school; or
 - b. substantial obstacles such as family or personal adversity, attendance at an under-performing school (elementary, middle or high school), and prejudice or discrimination;
3. any special circumstances suggesting that the applicant's LSAT score or academic record doesn't accurately reflect his/her current academic potential, such as the age of the applicant's GPA; a marked improvement in grades shown in the later years of college; or other special circumstances the candidate conveys in his or her personal statement or elsewhere in the application; and
4. other factors that foster a diverse and engaged law school environment, such as geographic residence (including in the city of Detroit), work and volunteer experience, leadership qualities, commitment to community and public service, communication skills, multilingual proficiency, and experience of life in a foreign country or on a Native American tribal reservation.

Deferred admissions

The Law School does not defer admissions except for persons called to military service. Any admittee who withdraws from the class must submit a new application and fee for the next year for which he or she seeks admission.

Reduced program

The first-year day program curriculum is mandatory, but, under special circumstances including child-care responsibilities, significant health

care concerns, or as part of an ADA accommodation; students may be permitted to take a slightly reduced course load. The applicant must submit a written request to the assistant dean of admissions prior to registration setting forth the personal circumstance justifying the request for admission as a reduced load student.

Reconsideration

An applicant may request reconsideration of an adverse admissions decision by writing a letter to the assistant dean of admissions stating the specific reason(s) why reconsideration is merited. The application then will be reviewed by the Admissions Committee. Applicants who have successfully petitioned for reconsideration are those who have submitted updated information, such as improved test scores or additional grades.

Application procedures (J.D. applicants)

Admission to the J.D. program at Wayne Law is highly competitive. Wayne Law receives a large number of applications. Every application receives careful, individualized attention by the Wayne Law Admissions Office and our faculty Admissions Committee. A variety of factors are taken into consideration. Typically, only about 40 percent of applicants are offered admission.

Note: Wayne Law will accept the June 2019 LSAT score for the class entering in fall 2019.

First-year applicants

Application requirements for those seeking admission as first-year students are as follows:

1. Complete the online application form (<https://os.lsac.org/Release/Logon/Access.aspx>) with an electronic signature. The deadline for application is July 1. To receive priority consideration for scholarships, your application must be complete by March 15.
2. Include with your application a brief personal statement, written by you in your own words. You can use this statement to convey to the Admissions Committee any experiences, interests, unusual circumstances or other information you believe may help the committee evaluate your potential for success at the Law School. Because we don't conduct individual interviews, your personal statement is the best way for you to tell us what you would most like us to know about you.
3. Have the Law School Admission Council submit a copy of your JD-CAS report (which includes copies of transcripts from all U.S. undergraduate schools) to the Law School. If you earned your bachelor's (or equivalent) degree from a college or university outside the United States, its territories or Canada, you must use a credential evaluation service. We prefer use of the JD-CAS, but we also will accept evaluations from organizations that are members of the National Association of Credential Evaluation Services or Association of International Credentials Evaluators.
4. Arrange for the submission of two letters of recommendation. The letters should be from individuals such as college professors or others who can comment on your intellectual abilities and academic performance. If you have been out of school for a number of years, you may submit letters of recommendation from an employer. Letters of recommendation should be sent directly to the Law School Admission Council. Additionally, two Law School Admission Council evaluations are recommended but not required.

Transfer applicants

A transfer applicant must have completed all of the first-year day or evening courses required by his or her ABA-accredited law school.

Transfer students are admitted to the fall term only. The application deadline for transfer applicants is July 1.

A transfer applicant's file will be ready for review when the Admissions Office has received all of the following:

1. The Law School online application with an electronic signature.
2. An official transcript sent directly from the applicant's law school with all grades posted for the academic year.
3. A letter of good standing from the applicant's law school.
4. A JD-CAS report.

Guest student applicants for fall and/or winter terms

The transfer applicant requirements and procedures outlined above apply to a law student who wishes to enroll at Wayne Law for one or two terms as a guest student. Application deadline is July 1 for fall term and Nov. 1 for winter term.

In the case of a guest student, the letter of good standing also should include a statement granting permission for the applicant to attend Wayne Law for the semester(s) indicated and an agreement to accept credits earned at the Law School and any other requirements or limitations from the "home" law school.

The application deadline for fall is July 1. The application deadline for winter is Nov. 1.

Guest student for summer term

A student from another ABA-accredited law school may take one or two summer courses at Wayne Law provided the student is in good standing and receives permission from his or her "home" law school. Application should be made by submitting the Law School summer guest application form. Application deadline is May 15 for summer term.

Law (J.D. /LL.M. Joint Degree)

Applicants must meet requirements for admission to the Graduate School (p. 19). Applicants must also have at least a 3.0 cumulative G.P.A. in their J.D. courses at the time of application to the joint degree program, as well as a B or better in any J.D. courses to be credited towards the LL.M. degree. Students will be formally admitted to the LL.M. program upon completion of the J.D. degree requirements, assuming that they continue to satisfy the requirements for admission.

Students interested in the J.D. degree program should apply to the joint degree program after completing their 1L year but before entering their 3L year (or upon completion of equivalent credits, if part-time students). Students would work with Wayne Law's Graduate Studies director to plan their courses for the 2L and 3L years, as applicable, to include appropriate courses that are creditable towards the LL.M. major they elect to pursue.

The J.D. degree requires a 1L curriculum consisting of civil procedure (parts A and B), constitutional law, contracts (parts A and B), criminal law, legal research and writing, property, and torts. J.D. students must also take an upper-level course in professional responsibility and satisfy an experiential learning requirement through clinic, externship or professional skills/simulation courses as well as an upper-level writing requirement. J.D. students must complete a total of 86 credit hours at a 2.00 G.P.A. or higher to receive the degree.

The LL.M. majors each have certain required courses and a list of approved courses, as set out in the Master of Laws Academic Regulations. LL.M. majors also have a small number of elective credits that may be taken outside the list of approved and required courses. A maximum of 12 credits may be double-counted towards both degrees. The credits that will count towards the LL.M. degree from the J.D.

courses include the LL.M. required courses and additional specified courses from the list of approved courses for that major, as set out below. Courses taken in the J.D. program that are neither required for the LL.M. major nor on the approved list for that major cannot be credited to both the J.D. and LL.M. degrees.

Law (J.D.) Academic Regulations

For complete information regarding the academic rules and regulations of the University, students should consult the Academic Regulations (p. 12) section in the Graduate Bulletin. The following additions and amendments are a brief overview of the specific additional and other Academic Regulations that pertain to the Law School.

The faculty of the Law School has adopted Academic Regulations which cover degree requirements, examinations and other academic matters. From time to time throughout the year, the Academic Regulations are updated, so the regulations shown here may not be those currently in force. The most current and complete Academic Regulations are available in the Law School Records Office or on the Law School (<https://law.wayne.edu>) website. Compliance with the regulations is required of all law students.

First-year program

Wayne Law offers three program options for the first year of study to meet the various needs of a diverse student body. They include a full-time day program, a combined day and evening program, and a part-time evening program.

- **Full-time day program** – students take all courses during the day, completing 30 credits in their first year, 15 credits each semester
- **Combined day/evening program** – students take three courses at night, as well as one or two day courses each semester, completing 22 to 30 credits in their first year, 11 to 15 credits each semester
- **Part-time evening program** – students take three courses all at night, completing 16 credits in their first year, eight credits each semester

First-year students learn fundamental legal theory, as well as how to identify and analyze legal issues, through introductory courses including: civil procedure, constitutional law, contracts, criminal law, legal research and writing, property, and torts.

Upper-class program

Wayne Law offers a wide range of courses that prepare graduates for an evolving legal environment. Our faculty's extensive knowledge and experience allow the Law School the flexibility to adapt courses and programming to shifting legal trends. From health law, public interest law and international law to corporate law, environmental law and more, you'll find what you're looking for at Wayne Law.

Clinics

Wayne Law's client clinics are directed by full-time expert faculty members and help bridge the gap between theory and practice. Located on or close to campus and offered for credit, our clinics provide hands-on casework to law students while simultaneously assisting residents of the Detroit metropolitan community.

The Law School offers eight clinics:

- Asylum and Immigration Law Clinic
- Business and Community Law Clinic
- Civil Rights and Civil Liberties Clinic

- Criminal Appellate Practice Clinic
- Disability Law Clinic
- Legal Advocacy for People with Cancer Clinic
- Patent Procurement Clinic
- Transnational Environmental Law Clinic

Externships

Externships are an integral part of the experiential learning program at Wayne Law. Students who elect to complete an externship earn academic credit while gaining practical experience outside the Law School walls. Externships develop students' professional skills, values and judgment as they learn about professionalism, the practice of law and the legal system, while becoming reflective practitioners with the capacity for self-directed professional growth.

Wayne Law offers four externship programs:

- Corporate Counsel Externship
- Criminal Justice Externship
- Judicial Externship
- Public Interest Externship

Co-curricular programs

Wayne Law students gain an edge through a number of co-curricular programs designed to sharpen minds and heighten capabilities. Students gain hands-on experience through a number of organizations dedicated to promoting a friendly yet competitive atmosphere and shaping legal minds.

Co-curricular programs are:

- Free Legal Aid Clinic
- The Journal of Law in Society
- Mock Trial
- Moot Court
- Wayne Law Review

Joint Degree Programs

The Law School offers, in conjunction with other colleges of the university, six joint degree programs that allow students to earn both degree and a master's degree in one of the following disciplines:

- Business administration (M.B.A.)
- Criminal justice (M.S.)
- Dispute resolution (M.A.D.R.)
- Economics (M.A.)
- History (M.A.)
- Political science (M.A.)

Intellectual Property Law Institute

Since several Wayne State University Law School faculty members are experts in areas of intellectual property law, the Law School is able to offer a remarkable variety of courses in such areas as patent, copyright and trademark law.

In addition to these courses, Law School students have the opportunity to take courses at another Detroit law school and at a law school across the border in Canada through the Intellectual Property Law Institute. The Institute was created in 1987 as a cooperative effort of the law faculties of Wayne State University, University of Detroit Mercy and University of Windsor in Ontario. The institute offers an exceptional, rich curriculum for law students with courses and seminars in patents, copyrights,

trademarks, trade secrets and know-how, computers and related technology, communications and media, entertainment, technology transfer, trade regulation and the arts. Full-time students at each of the three law schools may register for any institute course and will pay the tuition required at their home institution. The course will be credited toward their law degree.

Levin Center at Wayne Law

Established in 2015, the Levin Center at Wayne Law educates future attorneys, business leaders, legislators and public servants on their role overseeing public and private institutions and using oversight as an instrument of change. Through academic programming, training and research, the Center will equip future lawyers, legislators and leaders with an understanding of how effective legislative oversight can lead to significant and meaningful changes in public policy.

The Center hopes to inspire and train a new generation to embrace their responsibility to ensure public and private institutions operate with integrity, transparency and accountability to the general public in honor of former U.S. Sen. Carl Levin's distinguished career in public service.

Program for Entrepreneurship and Business Law

The Program for Entrepreneurship and Business Law coordinates Wayne Law's broad array of business law courses, clinics, externships, and extracurricular/co-curricular and community engagement activities.

The breadth of the field of business and corporate law is reflected in Wayne Law's extensive business curriculum, taught by widely recognized full-time faculty.

Wayne Law also offers numerous experiential learning and extracurricular and co-curricular activities designed to prepare students to represent entrepreneurs or to become entrepreneurs themselves while supporting entrepreneurship and business development in metro Detroit. In addition, the Law School offers students the chance to represent real clients on real legal matters through the Business and Community Law Clinic and Patent Procurement Clinic.

The Program for Entrepreneurship and Business Law helps aspiring business owners in underserved communities participate in the economic revival of Detroit. The program offers early-stage legal assistance to participating local startups and creates forums for entrepreneurs to receive general legal guidance, access community resources and share their own business experience.

Program for International Legal Studies

International law cuts across all aspects of a Wayne Law legal education. One-third of the faculty teaches and writes on international subjects, and faculty members enjoy world-wide reputations as innovative and prolific scholars. Classes are available on a remarkable range of global topics. Wayne Law's Jessup International Law Moot Court Team has won the Midwest championship two of the past three years.

The Program for International Legal Studies offers students the opportunity to explore international law through classes, summer internships abroad and co-curricular activities. It hosts an annual lecture series that brings renowned international law experts to campus. The program also hosts conferences on critical issues in international law. In addition, the program sponsors opportunities for students to work on international legal issues first hand.

Bar Admission

Wayne Law is committed to helping our students succeed in law school and pass the bar examination. We believe this journey starts in your first year of law school, as students begin to master the first-year law courses, and continues through the middle and final years at Wayne Law. Our programs are designed to provide additional bar support, using diagnostic exams to predict areas that students should focus on as well as free programs to enhance essay writing skills.

In addition to our programs, we provide expert individual advice and guidance. Wayne Law students graduate with the tools and support to start bar examination preparation and ultimately to be successful in the bar exam.

Student Affairs encourages students to begin preliminary bar preparation in their first year. Our director of academic success and bar preparation can help students create a bar exam plan for each of their years at Wayne Law.

Students should consult Section I of the Law School Academic Regulations (<http://bulletins.wayne.edu/graduate/law-school/law-jd/law.wayne.edu/academicregs>) for a complete list of the requirements for the J.D. degree. Following are some of the most important requirements:

- **Total credits required.** You must complete 86 credits with a cumulative grade point average of 2.0 or better.
- **Required courses.** You must successfully complete Civil Procedure A & B, Constitutional Law I, Contracts A & B, Criminal Law, Legal Research and Writing, Property and Torts in the first year of law school and Professional Responsibility and the Legal Profession as an upper level student.
- **Upper-class writing requirement.** To satisfy the upper-class writing requirement you must participate in a class or activity offering a rigorous writing experience after your first year. Qualifying activities include Criminal Appellate Practice Clinic, Appellate Advocacy, a directed study paper, and participation on Wayne Law Review, The Journal of Law in Society or Moot Court. You also may satisfy the requirement by taking any other course, clinic, workshop or seminar with a substantial writing requirement but only if you submit to the Records Office a signed certificate by the appropriate deadline.
 - **Professional skills and experiential learning requirement.** If you started at the Law School between the fall 2005 semester and the summer 2013 semester, you must complete the professional skills requirement by taking a curricular offering of two or more credits that provides substantial instruction in professional skills beyond traditional legal research, writing and analysis. If you started at the Law School in the fall 2013 or thereafter, you must complete the professional skills and experiential learning requirement by taking at least six credits of curricular offerings that provide substantial instruction in professional skills beyond traditional legal research, writing and analysis. At least three of these required credits must be a clinic, externship practicum or externship colloquium offering three or more credits that provides substantial instruction in professional skills beyond traditional legal research, writing and analysis.

The courses that meet this requirement are:

- Clinics – Asylum and Immigration Law Clinic, Business and Community Law Clinic, Civil Rights and Civil Liberties Clinic, Criminal Appellate Practice Clinic, Legal Advocacy for People with Cancer Clinic, Patent Procurement Clinic, Practicum in Dispute Resolution and Transnational Environmental Law Clinic.
- Externships – Criminal Justice Externship: Practicum, Criminal Justice Externship: Colloquium, Corporate Counsel Externship: Practicum, Corporate Counsel Externship:

Colloquium, Judicial Externship: Practicum, Judicial Externship: Colloquium, Public Interest Externship: Practicum and Public Interest Externship: Colloquium.

- Courses and seminars – Alternative Dispute Resolution, Business Planning: A Transactional Approach, Contract Drafting Seminar, Criminal Pretrial Advocacy, Effective Oral Communication for Lawyers Seminar, Negotiation, Patent Application Preparation, Pretrial Advocacy and Trial Advocacy.

You may not use the same course, seminar or clinic to satisfy both the upper-class writing requirement and the professional skills requirement.

- **Residence credit requirement.** You must complete three years in residence. A student who completes 10 credits or more in a given semester will receive one-half year of residence credit. A student who completes fewer than 10 credits in a semester will receive residence credit based on the ratio of the number of credits completed and 10 credits. You may not earn more than one-half year of residence credit during one semester, and credits earned in one semester cannot be applied to residence credit in any other semester.
- **Time limit for completing graduation requirements.** While transfer between programs is possible, a J.D. student who enters the Law School as a full-time student must complete the requirement for the J.D. degree within five years of starting the program, and a student who enters as a part-time student must complete the requirements within six years.
- **Limitation on clinical and externship courses.** Students may take not more than 14 credits of clinical and externship courses toward completion of degree requirements.
- **Transfer credits.** The Law School will transfer credits from all American Bar Association-approved law schools for courses in which the student received a grade of "C" or better. If a course is graded on a Pass/Fail or No Credit scale, the Law School only will transfer credits with a certification from the institution that a Pass is equal to a grade of "C" or better. The Law School will transfer the credits upon receipt of an official transcript sent directly from the credit-granting institution. Transfer credits are reviewed by the assistant dean of student affairs in conjunction with the registrar. The student's Law School transcript will show credit, but not grades, for courses carried and completed at other law schools. A transfer student only may receive credit for a course taken at the Law School that substantially overlaps with coursework taken at another school with the advance permission of the assistant dean of student affairs.

The above represents only a summary of the requirements for graduation. To be sure you understand all of the requirements you should carefully consult the Law School Academic Regulations.

Law (LL.M.)

Lawyers who already have received a J.D. degree from an accredited U.S. law school or an equivalent degree in another country and satisfy Wayne Law's LL.M. admissions criteria are eligible to undertake advanced legal studies for a master of laws (LL.M.) degree at Wayne Law.

Majors

Domestic and international students seeking specialized legal knowledge and skills may undertake an LL.M. degree with a major in one of the following substantive law areas:

- Corporate and finance law
- Labor and employment law
- Taxation

- U.S. law (open to international students who seek a general understanding of the U.S. legal system to enhance their home country practice)

- Nov. 1 - winter term
- March 15 - spring/summer term
- July 1 - fall term

Admission requirements

The basic requirement for admission to the LL.M. program is a demonstration of sufficient ability to be a successful student. This ability may be demonstrated by a record that includes the following:

1. A J.D. (or LL.B.) degree from a law school that is approved by the American Bar Association and is a member of the Association of American Law Schools.
2. A J.D. (or LL.B.) degree from a law school that is approved by the American Bar Association but is not a member of the Association of American Law Schools, but only if the applicant has compiled a distinguished academic record at that law school.
3. The equivalent of a J.D. or LL.B. degree from a law school outside the United States at which the applicant compiled a distinguished academic record. Applicants must receive a score of 600 or above on the Test of English as a Foreign Language (TOEFL), or 250 or above on the computer-based TOEFL, or 100 or above on the internet-based TOEFL, or 7.0 or above on the International English Language Testing System (IELTS) exam, although a waiver of this requirement may be granted based on other evidence of English language competency. Individuals are ineligible for admission to the United States Law LL.M. Program if they have received a J.D. degree from a U.S. law school.
4. In extraordinary cases, the Graduate Committee, on the recommendation of the director of graduate studies, may admit to the LL.M. degree program an applicant who has graduated from a United States law school that is not approved by the American Bar Association if the applicant has been admitted to practice without limitation in one of the states of the United States and has clearly demonstrated by experience, academic performance and other qualifications the ability to perform well in the LL.M. program. The director of graduate studies shall sign and place in the student's file a statement of the considerations that led to the decision to admit the applicant.

Each state applies its own criteria for allowing applicants to take the bar examination and for admitting attorneys to practice law. Completion of the LL.M. degree does not qualify a student to apply for permission to take the bar exam in every state. Lawyers from other countries seeking to practice law in the United States should obtain information regarding the requirements for admission to the bar in the state(s) in which they wish to practice.

How to apply

Admission to this program is contingent upon admission to the Graduate School (p. 19).

Among the required documents are "official transcripts." Official transcripts are those issued directly by your previous institution. They usually include a school imprint, seal, or original signature and stamp of the registrar or senior school official. Transcripts cannot be transmitted via the applicant and must be sent by the institution to Wayne State University and cannot read "issued to student." Electronic transcripts will be accepted if they are delivered securely from the registrar of the issuing institution directly to the Office of Graduate Admissions.

Specific questions about the program may be directed to the director of graduate studies (llmprogram@wayne.edu).

LL.M. application deadlines are:

Applicants from abroad are encouraged to apply substantially earlier to allow sufficient time to obtain the necessary visa and other documents.

The requirements and expectations for the LL.M. degree are set forth in the Master of Laws Academic Regulations ([law.wayne.edu/llmregs](http://www.law.wayne.edu/llmregs) (<http://www.law.wayne.edu/llmregs>)), which should be read in conjunction with the Wayne Law Academic Regulations ([law.wayne.edu/academicregs](http://www.law.wayne.edu/academicregs) (<http://www.law.wayne.edu/academicregs>)).

The LL.M. curriculum includes day and evening courses taught by nationally recognized faculty and expert practitioners. Each LL.M. major requires that a student take specified core courses and allows a student to select electives from a large list of law courses approved for credit toward that particular major. In addition, LL.M. students majoring in one of the substantive law areas may select electives from among approved courses for their majors in other university departments or schools, such as business, finance and industrial relations. (Certain restrictions apply if equivalent courses are offered in the Law School in the same academic year.) LL.M. students other than those majoring in U.S. law also must complete a master's thesis, written and researched in collaboration with a faculty adviser, as the capstone of their studies.

Courses are offered during three terms with the broadest offerings in the fall semester (beginning in late August) and winter semester (beginning in January). Additional courses are offered in the summer/ spring term (beginning in mid-May). Course scheduling changes from year to year depending on faculty teaching commitments, but tentative schedules for two-year cycles are available on the website so that students can plan their pathways to the degree. Students should consult with the LL.M. program director and faculty in their major areas to determine reasonable schedules of courses.

Although students may initiate their LL.M. degree studies in the winter semester, students are encouraged to enroll in the fall semester so they can participate in the fall orientation program for new students (generally offered in the week prior to the commencement of the fall semester) and register for core courses (such as Taxation for tax majors, Corporations for corporate and finance law majors or Survey of U.S. Law for U.S. law majors) that may not be offered in the winter semester and are often prerequisites for more advanced study.

LL.M. students are permitted to take up to six years to complete their degree. Full-time students usually can complete their LL.M. coursework in one year (often including work on the master's thesis over the summer), while part-time study generally requires two or more years.

Law Courses

LEX 6100 Civil Procedure A Cr. 3

Structure of the judicial system in the United States and the process of civil litigation from the commencement of an action through appeal. Subjects considered include jurisdiction, the relationship between state and federal courts, pleading, discovery and other pre-trial devices, trial and appellate review. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 6101 Civil Procedure B Cr. 3

Structure of the judicial system in the United States and the process of civil litigation from the commencement of an action through appeal. Continuation of LEX 6100. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 6200 Contracts A Cr. 3

General principles of the law of contracts; definitions of contract; illegality, mistake, frustration, impossibility; statute of frauds, interpretation, the parol evidence rule; performance and breach; rescission; repudiation and discharge. Remedies, including damages, specific performance, injunction and restitution. All topics considered from viewpoints of both common law and statute. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 6201 Contracts B Cr. 3

General principles of the law of contracts; definitions of contract; illegality, mistake, frustration, the parol evidence rule; performance and breach; rescission; repudiation and discharge. Remedies, including damages, specific performance, injunction and restitution. All topics considered from viewpoints of both common law and statute. Continuation of LEX 6200. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 6300 Criminal Law Cr. 3

General doctrines of criminal liability as they relate to the moral and social problems of crime; definitions of principal crimes and defenses to criminal prosecution, both common law and statutory; limitations on the use of criminal sanctions. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 6400 Legal Research and Writing Cr. 2

Analysis of legal problems and the use of legal materials, through discussion, written assignments, and personal conferences. Preparation of a trial brief and oral argument on a selected civil or criminal case before a court composed of faculty or members of the local bench and Bar. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 6500 Property Cr. 4

Basic course in real property, which will include selected materials from some of the following areas: historical introduction to real property; personal property transfers by gift, finding, adverse possession; modern law of possessory estates, including non-freehold estates, and landlord and tenant relationships; concurrent estates; restraints upon the use of land; conveyancing and effects of the Recording Acts. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 6600 Torts Cr. 4

Legal principles underlying wrongs not based on contract, arising from intentional or negligent conduct and including strict liability; the nature of particular wrongs, including injuries to the person, to reputation, to real or personal property, and to interference with business or family relations. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 6700 Constitutional Law I Cr. 3

Problems arising under the Constitution of the United States, with particular attention to the nature of judicial review in constitutional cases and to the role of the judiciary in umpiring the federal system. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 6800 Professional Responsibility and the Legal Profession Cr. 2

Conflicts of interest; the attorney's standard of care, fiduciary duty, the organization of bar associations, the attorney's duty to the court and the community; the attorney's responsibilities in trial, and in unilateral actions and negotiations. The duty of disclosure of adverse data, the development of group legal services, and of legal services to the poor, and the responsibility of the bar in these areas. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 6900 The Regulatory State Cr. 3

Introduction to statutes and agency decisions and the central role they play in modern government. Nature of statutes and agency regulations, how they are generated, and how they are interpreted and applied. Justifications for modern regulation, the modern administrative state, the incentives that influence the behavior of the various actors, and the legal rules that help structure the relationships among legislatures, agencies and courts. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 7001 Accounting for Lawyers Cr. 2

Basic concepts of bookkeeping and generally-accepted accounting principles; background to help read and interpret financial statements; auditor's role and accounting issues that arise in business planning, in litigation, and in managing financial investments. May not be taken for credit by those who completed more than two undergraduate accounting courses or a graduate course in financial accounting. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 7006 Administrative Law Cr. 3-4

Functions and behavior of administrative agencies; constitutional and statutory constraints on agency operation. Government role in formulating and enforcing policy, administering of public benefit programs, and awarding of licenses. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 7009 Advanced Bankruptcy Cr. 3

Students will become familiar with the chapter 11 business reorganization process. By reviewing mock bankruptcy schedules, and cash collateral, relief from stay, and chapter 11 plan and disclosure statement proceedings, the students will develop the necessary substantive knowledge and hone their negotiation and trial advocacy skills. A problem-oriented approach will be used, with students and instructors participating in resolving situations commonly encountered in a business bankruptcy. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 7014 Taxation of Corporations: Acquisitions and Restructuring Cr. 4

Satisfies the professional skills requirement. Explores the tax rules for corporate stock or asset acquisitions and restructurings (including reorgs, spins and loss carryovers), and S corporations or consolidated returns through the lens of a simulated firm tax group working on a series of client projects (using an actor as client). Each student will work on at least two team projects during the semester, preparing written and oral presentations for, and briefing the client on, issues related to the team project topic. Team projects include: prepping a client for and negotiating an acquisition, drafting a private letter ruling request, preparing an internal memorandum outlining the pros and cons of restructuring choices, researching and writing a tax opinion letter, and outlining advantages of various entity choices for future transactions. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 7015 Advanced Torts Cr. 2

This course will focus on torts not involving physical injury, such as misrepresentation, defamation, invasion of privacy, interference with business relations, and misuse of legal procedure. These causes of action, which provide remedies for economic, reputational, or emotional harm, are not ordinarily covered in the four-hour Torts course required in the first year. They have become burgeoning areas of potential liability due to the emergence of electronic communications. An effort will be made to integrate substantive doctrine and practice implications with legal, economic, political and social theory. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 7016 Alternative Dispute Resolution Cr. 2

Forms of non-trial dispute resolution: arbitration, mediation, and negotiation—their various permutations and substantive applications. Factors affecting choice between dispute resolution processes, differences in design and structure, relative costs, quality of participant performance, accountability for results, privacy of proceedings, role of legal norms and lawyers, due process considerations, availability of judicial review; tactics and strategies employed in arbitration, mediation and negotiation. Offered Every Other Year.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 7021 American Indian Law Cr. 3

This course explores the foundational principles and doctrines governing the legal and political relationship between the United States and Indian tribes. Major topics in the course include the history of federal Indian law and policy, congressional plenary power, principles of interpretation of laws and treaties regarding Indians, the nature of tribal sovereignty, and jurisdiction in Indian country. In examining these topics, we will discuss laws and policies concerning tribal justice and legal systems, gambling and taxation in Indian country, and the Indian Child Welfare Act. Offered Intermittently.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 7023 Animal Law Cr. 3

Animal law encompasses human-animal interactions and evaluation of competing interests within the context of traditional areas of law (e.g., veterinary malpractice, expansion of anti-cruelty statutes to include farm animals, damage for death of / injury to companion animals, disputes over custody of companion animals in divorce or separation, landlord-tenant housing disputes, the inclusion of animals in wills and trusts, and constitutional issues such as standing). It also encompasses the current legal status of animals as living property and explores whether this status is antiquated and needs re-evaluation to reflect societal beliefs and values. Course will consider these traditional areas of law, groundbreaking laws enacted by other countries, as well as theories for the expansion of consideration and rights.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 7026 Antitrust Cr. 2-4

Government control of trade practices and industrial market structures which inhibit the competitive process; monopoly, oligopoly, mergers, cartel practices, distribution arrangements, resale price control, franchising patent licensing, foreign commerce and price discrimination under the Sherman, Clayton, Federal Trade Commission, and Robinson-Patman Acts. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 7045 Banking Law Cr. 2

Legal environment of the banking industry. Topics include: history and scope of banking in the United States, statutory requirements for chartering and operating banks, regulatory oversight at the Federal and State level, commercial and consumer lending, deposit insurance, lender liability, bank failures, and recent developments in banking regulation and legislation. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 7051 Bankruptcy and Creditors' Rights Cr. 3

Problems arising when debtors are in financial difficulty, including the principal state remedies of unsecured creditors such as attachment, garnishment, and enforcement of judgments; Chapter 7 bankruptcy liquidations; Chapter 13 wage-earner plans; and Chapter 11 reorganizations. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 7058 Bioethics and the Law Cr. 3

Role of law in shaping, analyzing and resolving conflicts that arise in the interplay between medicine, biotechnology, ethics, social history, and cultural evolution. Topics include reproductive rights and genetic technologies, maternal fetal decision making, medical decision making, definitions of death, death and dying decisions, regulation of research on humans, interdisciplinary decision making, and access to health care. Offered Intermittently.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 7060 Business Planning Cr. 4

Problems involving common business transactions, including choice of entity to conduct business; organization, financing, and operation of a corporation; restructuring of business enterprises. Corporate, tax, securities law, and financial matters; role of business lawyer in counseling and planning business transactions. Relationship between the corporation and its shareholders. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 7061 Business Planning: A Transactional Approach Cr. 4-8

Organizational problems for the closely-held and the public corporation; operational problems such as stock distributions, issuance of new securities, constructive dividend problems, and stock redemptions; corporate acquisitions, other reorganizations, contested take-overs, and liquidation and termination problems. Credit only on completion of two terms. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 7070 Child Abuse and Neglect Cr. 2

Introduces students to state and federal laws governing the child protection and child welfare systems. Topics addressed will include: defining abuse and neglect; mandatory reporting; child protection investigations and limitations thereon; emergency removal and less burdensome alternatives; adjudicatory hearings and proof of abuse and neglect; dispositional hearings and powers; permanency planning and long-term placements; termination of parental rights; right to counsel; and the duties of lawyers for children in abuse and neglect cases. Offered Intermittently.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 7075 Child, Family, and State Cr. 3

Aspects of children in legal system. Legal relationship between children, their parents, and government (federal, state, local, and tribal); rights of these parties and relationships between them. Education, medical care, children's rights, concept of legal parenthood, parental rights (and termination thereof), adoption, juvenile justice process. Concentration on constitutional and policy analysis as opposed to examination of rules and regulations in the different areas. Students graded on class participation, several short written assignments, and take-home final examination. Offered Intermittently.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 7121 Conflict of Laws Cr. 3

Principles, rules and methods thought to underlie the resolution of multi-state problems. Jurisdiction and enforcement of judgments of other states. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 7126 Constitutional Law II Cr. 4

Individual rights under the Constitution of the United States. Freedom of speech, religious freedom and equal protection. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

Equivalent: LEX 7829

LEX 7127 Constitutional Litigation Cr. 3

This course will track the jurisdictional and constitutional basis and the history of claims by individuals against government officials for constitutional violations. It will explore the limits and constraints on the actions of officials and the policies of governments. How must the plaintiffs plead and prove such cases and how can defendants defend their actions and policies. Since 1961, victims of official misconduct – ordinary private persons – have had the ability and opportunity to enforce the United States Constitution in federal courts. This has for decades provided American lawyers, courts and litigants with important power, the power to directly shape American democracy in unique ways. The study of this system of constitutional enforcement is essential to an understanding of American constitutional jurisprudence. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 7128 Consumer Law Cr. 2-3

An introduction to law specially directed at the rights and obligations of consumers. The consumer marketplace is regulated by a series of discrete statutes and regulations, such as the Federal Trade Commission Act (and accompanying regulations), Truth-in-Lending Act, Fair Credit Reporting Act, Equal Credit Opportunity Act, Fair Debt Collection Practices Act, and lemon laws. This course provides an overview of these special rules and their interpretation and enforcement. As such the course provides an introduction to the role of administrative agencies and the interpretation of statutes and regulations. Offered Intermittently.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 7136 Copyright Law Cr. 3

Law of copyright and related doctrines protecting literary, musical and artistic works. Nature of rights and kinds of works protected, doctrine of fair use, pre-emption problems, and problems posed by new technologies. Emphasis on 1976 Copyright Act and its relation to issues such as home videotaping, photocopying and non-profit performance of protected works. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 7141 Corporate Finance Cr. 3

Economic and legal problems arising in connection with financing decisions of publicly-held corporations, including valuation of the enterprise and its securities, determination of securities structure and dividend policy, capital structure (including problems relating to debt), and acquisition strategies. Federal securities regulations and selected topics. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 7156 Corporations Cr. 2-4

Relationships between owners and directors of a corporate enterprise; different types of stock ownership and the corresponding rights in profits and control; consolidation and merger; distinctive features of the closed corporation. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 7160 Criminal Pretrial Advocacy Cr. 3

The court rules, statutes and Constitutional principles implicated in pre-trial criminal advocacy. Topics include arraignment, discovery, pre-preliminary examination, preliminary examination, motion practice, and pleas. Structural rules and principles of the process; the practical application of those rules and principles. Students participate in mock arguments, client meetings, and witness interviews, and draft the documents that would be filed in a criminal case. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 7161 Criminal Procedure: Investigation Cr. 3

Constitutional requirements for arrests, searches, seizures, electronic surveillance, and interrogations. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 7166 Criminal Procedure: Adjudication Cr. 3

Operation of the criminal justice system from the defendant's first appearance in the court through the trial, and to post-conviction remedies, including a study of bail, the preliminary hearing, the grand jury, voir dire, discovery, double jeopardy, joinder, and habeas corpus. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 7172 Developing the Commercial Real Estate Project Cr. 3

Real estate development: laws and requirements affecting the development of commercial properties, including the law of contracts; real estate interests, such as mortgages, easements and encumbrances, zoning laws, environmental laws, building codes and requirements and other regulatory laws. Topics include: purchase and sale contracts, title and survey matters, due diligence investigations, closing processes, construction, financing, and leasing. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 7201 Education Law Cr. 3

Survey of education law with emphasis on public education. Historical development of education law in the U.S. as well as topics of current interest: tenure, academic freedom, school discipline, school financing, home-based schooling, state regulation of private schools, church-state relationships, and desegregation in public education. Offered Intermittently.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 7205 Employee Benefits Law Cr. 3

Survey course provides students with a strong grounding in the major laws affecting employment-based benefits plans, including the Employee Retirement Income Security Act (ERISA) and the Internal Revenue Code. Retirement plans (including traditional defined benefit plans and common types of defined contribution plans such as 401 (k) plans). and welfare benefit plans (including health and life insurances and disability plans). Offered Yearly.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 7216 Employment Discrimination Cr. 2-3

Federal constitutional and statutory guarantees of freedom from invidious discrimination in employment. Thirteenth and Fourteenth Amendments, Title VII of the Civil Rights Act of 1964, the Reconstruction Civil Rights Acts, 42 U.S.C. 1881, et seq., the Equal Pay Act of 1963, and the Age Discrimination in Employment Act of 1967. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 7221 Employment Law Cr. 2-3

Legal rights and responsibilities of employees (excluding rights provided by anti-discrimination laws and the NLRA); statutory and common-law limitations on the employer's right to discharge; protection of employee privacy and reputation; laws governing wages and hours, occupational safety, unemployment compensation, workers' compensation, and employee benefits. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 7226 Entertainment Law Cr. 2-3

Legal and business issues in the entertainment industries, including those related to sound recordings, music publishing, literary publishing, films, television, the Internet and other new media. Readings and discussions: representing talent, drafting and negotiating contracts, remedies for breaches, and rights of publicity. How the entertainment industries and their economics work. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 7228 Energy Law Cr. 3

Introduction to energy law and regulation in the United States. Principles of rate regulation of public utilities and the division of jurisdiction between federal and state governments. Emerging trends such as promotion of energy efficiency and renewable energy. (This course does not cover traditional oil and gas law.) Offered Yearly.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 7231 Environmental Law Cr. 2-3

Environmental law in common-law, statutes, constitutional issues, administrative and international law. Coherent legal analysis of environmental problems and active legal remedies, rather than specialized instruction in pollution controls and the like. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 7236 Equitable Remedies Cr. 2-3

Survey of the equitable remedies available for the vindication of substantive rights, which includes injunctive and restitutionary relief as well as the general treatment of equitable relief in contract, tort and criminal actions. Offered Intermittently.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 7241 Estate, Gift and Inheritance Taxation Cr. 2

Federal and state transfer taxes and income taxation of fiduciaries and beneficiaries. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 7266 Evidence Cr. 2-4

General principles relating to the proof of questions of fact in civil and criminal trials, including competency, relevancy, and materiality of evidence; judicial notice, presumptions; burden of proof; competency of witnesses, rules relating to examination and cross-examination of witnesses; weight and sufficiency of evidence. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 7301 Family Law Cr. 2-3

Entry into marriage; legal treatment of couples in marital and non-marital relationships; divorce, including custody, alimony and property distribution, and the role of the attorney; procreation; illegitimacy; rights and responsibilities of children and parents with respect to each other and to the state; child abuse and neglect; and adoption. When offered for two credits, considerably less time is devoted to children's issues. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 7306 Federal Courts and the Federal System Cr. 2-3

Interrelationship of state and federal law in our legal system from the point of view of the federal courts and the Congress. Emphasis on the politics, history, and philosophy of federalism, rather than on procedures. Offered Every Other Year.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 7311 Taxation of Partnerships Cr. 2-3

This course covers the federal income taxation of partnerships and partners, with significant focus on the governing statutory provisions and regulations and the mechanics of partnership tax accounting. Topics will typically include the transfer of property to a partnership; determination of partners' distributive shares of items of income, gain, loss and deduction; partnership recourse and non-recourse debt; partnership cash or property distributions; and transfers of interests in partnerships. The course will also cover more general policy issues, including such topics as the concepts motivating the aggregate or entity approach, concepts of tax avoidance and the ethical issues arising in connection with the use of partnerships in tax shelter transactions, and the advantages and disadvantages of partnerships compared to alternative forms of business taxation such as C corporations and pass-through S corporations. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 7331 Franchise Law Cr. 2

Provides a survey of franchise and product distribution law, taking into account federal and state legislation and case law. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 7353 Health Care Organizations and Finance Cr. 3

Legal responses to problems of health care costs, access and financing from both public and private perspectives. Registration of insurance and managed care, developments in federal ERISA preemption, changing business structures, and antitrust enforcement. Medicare and Medicaid financing, rules prohibiting self-referrals, and standards policing fraud and abuse. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 7354 Health Care Quality, Licensing and Liability Cr. 3

Legal responses to problems of health care quality and medical errors. State licensing of health care professionals and institutions, self-regulation, and tort liability for physicians, hospitals and managed care organizations. Basic introduction to health care institutions, the particulars of malpractice litigation, and proposals for tort reform. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 7371 Immigration and Nationality Law Cr. 2-3

Immigration, its history and development; entry into the United States, and alien status and adjustment to status; deportation and relief from deportation; exclusion and relief from exclusion; nationality and citizenship. Offered Every Other Year.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 7381 Insurance Law Cr. 2

General principles, including indemnity, subrogation, reinsurance, insurable interest and classification of risks such as personal business and legal liability. Michigan insurance law and "no fault" legislation examined; contractual rights and liabilities of the insurer, insured, and third party beneficiaries. Offered Intermittently.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 7384 International Commercial Arbitration Cr. 3

Course follows the life cycle of an international commercial arbitration, including: drafting and enforcing arbitration agreements; appointment and challenge of arbitrators; conduct of the proceedings; drafting of awards; review and enforcement of awards by courts at the seat of arbitration and beyond. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 7404 International Business Transactions Cr. 3

This course introduces a wide range of problems and issues that private business entities may encounter in doing business across national borders. Topics include international sales, import and export regulations, cross-border IP protection and technology transfer, foreign direct investment, business ethics, and dispute settlement. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 7406 International Finance: Transactions, Regulation, and Policy Cr. 3

Legal problems associated with flow of capital across national borders. Topics include international financial transactions, regulation of international capital markets, regulation of international banking and financial services, emerging market debt crisis, role of International Monetary Fund, reform of international financial system. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 7407 International Intellectual Property Law Cr. 3

Addresses the legal issues surrounding the protection of intellectual property rights in a globalized commercial environment. The course centers on the study of the principal multilateral treaties that protect intellectual property rights: the Berne Convention on copyrights, the Paris Convention on trademarks and patents, and the Agreement on Trade-Related Aspects of Intellectual Property Rights ("TRIPS"). The course also looks at the intellectual property component of the North American Free Trade Agreement, and a variety of legislative materials from the European Union. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 7408 International Law Cr. 3

Basic legal concepts applied by international tribunals and courts of the United States to the relations between independent nations. The nature and sources of international law; the use of treaties; international organizations; and practices respecting recognition, territory, nationality and jurisdiction. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 7409 International Litigation Cr. 3

Issues arising in civil cases in American courts in which international parties, evidence, and issues are present. Subjects include personal jurisdiction, service of process abroad, conducting discovery abroad, suing foreign sovereigns and governmental officials, forum non conveniens and international arbitration. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 7410 International Organizations and Public Health Cr. 3

Course has two objectives: first, to give students a working understanding of the structure, function, and mission of the international organizations that increasingly impact modern life: the WTO, EHO, World Bank, IMF, and UN; second, to explore the effects of globalization on public health. Topics include: WHO control of infectious diseases such as SARS, impact of the WTO on pharmaceutical pricing of AIDS drugs and genetically-modified foods, international conventions for tobacco control, and influence of World Bank and IMF privatization requirements on health sector reform in developing countries. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate, Law or Medical level students; enrollment limited to students in the Law School or School of Medicine.

LEX 7411 International Protection of Human Rights Cr. 2-3

The main international and regional legal instruments and procedures for the protection of human rights. Offered Intermittently.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 7413 International Prosecution of State Actors Cr. 3

Legal and political aspects of new processes by which one-time state officials (such as former Yugoslav President Slobodan Milosevic, former Chilean dictator Augusto Pinochet, and former East German leader Egon Krenz) and their followers have been subjected to prosecution in international and foreign legal systems. Basic elements of transnational criminal law; controversial questions of principle and policy such as United States opposition to the new International Criminal Court; concerns about retroactive punishment; respect for amnesties that have contributed to ending civil conflicts. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 7414 International Legal Research Cr. 1

Fundamentals of research in public international law. In connection with Jessup International Law Moot Court Competition, students review structure of international legal institutions, nature of the materials they produce, and the unique way these materials are indexed and cataloged. Focus on how these materials can best be used in legal advocacy; emphasis on effective writing and oral argument. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

Repeatable for 4 Credits

LEX 7418 International Trade Law Cr. 3

Regulation of international trade relations. Focus on Law of the World Trade Organization (WTO) and its interaction with domestic regulation of international commerce. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 7419 Interviewing and Counseling Cr. 2-3

This course introduces students to interviewing and counseling theory, and helps students develop skills needed to effectively and efficiently interview and counsel clients in both litigation and transactional matters. Topics addressed and skills developed include active listening, phrasing and sequencing questions, eliciting timelines, probing for details, clarifying objectives, identifying options and discussing their consequences, and helping clients make final decisions. The course makes extensive use of role-playing exercises. Each student conducts a full-length simulated interview at mid-semester, and a full-length simulated counseling session towards the end of the semester. When offered for three credits, the course will include a forty-hour fieldwork component in which each student will interview and counsel actual clients who are seeking free legal help from one of the Law School's clinics or from a faculty-approved public interest externship field placement. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 7422 Islamic Law Cr. 3

This course will survey the universe of Islamic law from the vantage point of a beginner to the field. The readings and class discussions will broadly cover the following: (1) classical Islamic jurisprudential theory, (2) substantive aspects of family and criminal law, (3) the intersection of Islamic law and the American legal system, and (4) the place of American-Muslims in the framework of American constitutionalism. Because law - of any variety - does not operate in a vacuum, discussions will proceed with reflection on prevailing sociopolitical realities such as global terrorism, jihadist movements, Islamophobia, misogyny, and racism. The student will also be asked to draw from the offerings of philosophy, critical race theory, postcolonial studies, security studies, and feminism. The aim is for course participants to develop a more textured understanding of Islamic law and to be better positioned to understand the debates surrounding its relevance and practice. Offered Every Other Year.

Restriction(s): Enrollment is limited to Graduate or Law level students.

LEX 7424 Introduction to the Legal System of the United States Cr. 2-3

General introduction to the institutions and processes involved in lawmaking and legal interpretation in the United States, with a focus on lawmaking at the federal level. Topics include: federal legislative process, precedent and the common-law method, federal administrative rule-making, separation of powers, and judicial review. Sources of law produced by these processes and the development of research strategies with respect to these sources. Course is also designed to provide foreign LL.M students (all of whom write a Master's Essay to complete the LL.M. program) with an overview of the principal forms of legal scholarship in the American academy. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 7426 Jurisprudence Cr. 2-3

Analysis of important legal notions such as law, sanction, rule, and sovereignty; relations between law and morals as seen particularly in the development of natural law and legal positivism and in the development of the notion of legal responsibility. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 7435 Juvenile Delinquency Cr. 2

Introduction to the juvenile justice system. Topics include: juvenile court jurisdiction over delinquents and status offenders; pretrial criminal procedure in the juvenile justice context; screening and diversion; pretrial detention; waiver of juvenile court jurisdiction; procedural rights at trial; dispositional decisions. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 7501 Labor Law Cr. 2-4

Legislative, administrative and judicial regulation of labor relations. The scope of national labor legislation; the protection of the rights of self-organization and the designation of bargaining agents; the negotiation and administration of the collective agreement; the legality of strikes, picketing and boycotts; employer interference with concerted activities; and the relations between unions and their members. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 7506 Labor Law in the Public Sector Cr. 2

State (and some federal) regulation of labor relations in the public sector. Establishment of representative status, negotiation and administration of the collective agreement, strikes and impasse resolutions. Offered Every Other Year.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 7511 Land Use Cr. 2-3

Allocation of land use in the urban environment by both private agreement and governmental order. Problems involved in the development and effectuation of community planning; goals by means of conservation, clearance, and renewal; zoning, variances and exceptions; housing code enforcement, subdivision control, eminent domain; relocation. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 7514 Law, Authority, and Resistance Cr. 3

This course addresses, in both theoretical and practical terms, the relationship between legal and political obligation: When, if ever, do individuals have a moral obligation to obey the law because it is the law? What count as valid justifications of civil disobedience, conscientious refusal, or insurrection? When can governmental authority justifiably depart from "the rule of law"? When can individuals be held criminally accountable for egregious acts committed under unjust prior regimes? The course combines classics of the history of political thought with contemporary theoretical writings and contemporary discussions of topical questions (e.g., jury nullification, emergency measures, transitional justice). Particular attention will be paid to the special obligations of lawyers who are asked to validate immoral practices (e.g., "enhanced interrogation methods" in the Global War on Terrorism). Offered Every Other Year.

Restriction(s): Enrollment is limited to Graduate or Law level students.

LEX 7517 Law, Policy and International Development Cr. 3

Explores various law-based strategies for achieving economic and political development in poor countries. One influential school of thought claims that capitalism will not flourish in developing nations until there is a long-term, national commitment to reform property laws. Other scholars and development specialists insist that instituting the rule of law is the linchpin to attaining international development. Yet others insist that all law reform efforts are pointless unless access-to-justice issues are first addressed. This course is designed to investigate these claims and allow each student to come to her or his own conclusions about how law is most effectively used as a strategy for promoting political and economic development. Offered Intermittently.

Restriction(s): Enrollment is limited to Graduate or Law level students.

LEX 7518 Law of Armed Conflict Cr. 3

History and current state of the law governing recourse to force (jus ad bellum) and the law governing the application of force (jus in bello). Contemporary jus ad bellum topics include: prohibition of the use of force in international relations, self-defense, unilateral intervention in internal conflicts and humanitarian crises, as well as collective action relating to security and humanitarian crises. Contemporary jus in bello topics include: legal obligations relating to targeting, selection of weapons, status and treatment of prisoners, and protection of civilians during hostilities and occupation. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 7520 Advanced Legal Writing: Legal Drafting Cr. 3

Legal Drafting provides students with an opportunity to develop transactional drafting skills. It focuses on writing techniques involved in drafting transactional documents most often assigned to summer interns and first and second year associates. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 7536 Appellate Advocacy Cr. 3

Research and analysis of complex legal problems involving legislative history and administrative regulations. Class discussion on advanced research, development of strategy, and organization and writing as an advocate. Students write an appellate brief. May not be taken on pass/no credit basis. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 7541 Legislation Cr. 3

The legislative process and its use as an instrument of change; legislative drafting revision, interpretation and implementation. The appropriations process; role of and control of lobbying; operation of the legislative process and its effect on policy formulation; conduct of Congressional investigations, and effects of separation of powers doctrines. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 7581 Local Government Law Cr. 2

Law as an instrument for governing urban areas. Distribution of decision-making power between private and public persons, between state and local governments and among various local governments. Local finance, decentralization, annexation and municipal incorporation. Exploration of possible reform by means of metropolitan government or federal assistance. The lawyer's role in formulating governmental policy in major urban complexes. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 7590 Maastricht Exchange Program Cr. 1-4

Students take courses offered in the Maastricht Exchange Program. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate or Law level students.
Repeatable for 4 Credits

LEX 7595 Law Exchange Program Cr. 1-6

Intended for students participating in approved study abroad programs of study. Offered Every Term.

LEX 7603 Mergers and Acquisitions Cr. 2-3

Mechanics of an acquisition, including: (1) state corporate codes relevant to acquisitions, dissenting shareholder remedies, listing requirements, and federal security law affecting the mechanics (proxy, tender offers, public offerings); (2) successor liability, transfers of assets; (3) acquisition documents (confidentiality agreements, letters of intent, basic agreements, closing); (4) legal duties of board of directors and dominant shareholders (decision to sell or acquire, conflicts of interest, attempts to block takeovers, shareholder value); (5) disclosure requirements of federal and state securities law; (6) accounting and tax issues (definition of tax-free reorganization, accounting for mergers and acquisitions). Offered Yearly.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 7604 Mock Trial Workshop Cr. 2

Introduces students to basic evidence concepts (e.g. relevance, competency, impeachment, hearsay, authentication) and helps student develop basic trial advocacy skills (e.g. how to develop persuasive case theories and themes, how to deliver opening statements and closing arguments, how to examine and cross-examine witnesses, how to lay a proper evidentiary foundation for testimony, how to introduce and use demonstrative evidence, how to refresh a witness's recollection, how to impeach a witness by using the witness's prior statements, how to make and respond to objections). The course is graded on an Honors-Pass-Low Pass-No Credit basis. Students who have taken Trial Advocacy (LEX 7836) are not eligible to take this course, and vice versa. Offered Every Other Year.

Restriction(s): Enrollment is limited to Graduate or Law level students.
Equivalent: LEX 7836

LEX 7605 Multistate Taxation in the Digital Age Cr. 3

Sale and use taxes and corporate and personal income taxes imposed by state and other sub-national governments, including Indian tribes. Constitutional limits on cross-border taxation under the Due Process Clause and the Commerce Clause. Methods for apportioning income among jurisdictions, from theoretical and practical perspectives. Special income tax and sales tax issues arising from electronic commerce. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 7616 Negotiation Cr. 2,3

The 2 credit course is a comprehensive examination of various legal principles that affect negotiations, such as rights assessments, custom and practice, rule of contract construction, concepts of condonation, proper and improper conditions, as well as the effective use of evidence in the negotiation process. The course also explores strategic methods and techniques in which attorneys are frequently involved that affect the outcome of negotiations. Students will participate in mock negotiations. The 3 credit course will cover the material described above and will additionally address (1) the reintroduction of several topics (e.g., contract drafting, collaborative lawyering, use of mediation in negotiation), (2) the expansion of other topics (e.g., multicultural negotiation, the law of settlement), (3) enhanced processing of simulations, and (4) one or more contract drafting exercises. Offered Every Term.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 7631 No-Fault Insurance Law Cr. 2

Comprehensive review of Michigan's No-Fault Automobile Insurance Law, which governs all motor vehicle accidents in the State. Topics include: questions of coverage, medical and work loss benefits, coordination of benefits, exclusions, priorities, subrogation, and claims procedures. Negligence claims under the No-Fault Law also reviewed. Offered Every Other Year.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 7651 Patent Enforcement Cr. 3

Unique aspects of patent litigation. Policy issues; practice considerations in enforcing patents. Issues in approaching a patent infringement suit (who can file; when and where to file). Offered Yearly.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 7656 Patent Law Cr. 3

Substantive patent and related trade secret law. Emphasis on nature of patent right; scope of coverage of patent system; issues of validity, infringements, inequitable conduct, patent-antitrust. Special issues relating to software, living organisms, and chemistry. Technical background not required. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 7657 Patent Prosecution Cr. 2-3

Art of writing patent applications; aspects of practicing before the Patent and Trademark Office (PTO). Rules and techniques for investigating what is legally considered the background of the invention (prior art). Introduction to basic claim drafting concepts, techniques for writing a written description (or specification) of an invention. Effective response to PTO actions as defined by the Manual of Patent Examining Procedure (MPEP) and by the relevant case law. Inter partes post-grant proceedings and derivation proceedings available under the new America Invents Act. Ethics and licensing will be briefly covered. Course provides a good foundation for students who wish to take and pass the patent bar exam to become registered to practice before the PTO. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 7659 Political Theory of Public Law Cr. 3

Legal restraints on exercise of public power as conceived in works of early modern theorists (e.g., Machiavelli, Locke, Montesquieu, and Madison), and as applied in constitutional arrangements that have emerged in a range of historical settings. Topics include: role of law in totalitarian political systems; emergency rule; comparative approaches to judicial review. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

Equivalent: PS 7580

LEX 7660 Practicum in Dispute Resolution Cr. 3

Training in facilitative mediation with opportunity to practice skills in a variety of settings. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate or Law level students.

Course Material Fees: \$225

Equivalent: DR 7310

LEX 7666 Pretrial Advocacy Cr. 3

Adversary strategy and practice skills in the pretrial stages of litigation. Preparation of pleadings, interrogatories, requests for admission and document production requests. Students negotiate settlement of disputes, draft and argue motions, and take and defend depositions. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 7669 Privacy Law Cr. 2-3

Covers the law of information privacy. Addresses the law and policy applying to the collection, use and disclosure of personal information. Relevant law includes state laws founded in tort and property, federal laws addressing specific privacy issues and constitutional limitations on government. Topics may include use of personal information by the media, government surveillance aimed at combating terrorism, the privacy of health care information, the collection and use of personal information by businesses, privacy in schools and at the workplace and international privacy issues. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 7676 Public Finance Law Cr. 2

Legal principles involved in public finance transactions: municipal borrowing and debt; state law considerations: sources of authority for borrowing and repayment; effect of ultra vires borrowing, of procedural defects, municipal debt limitations, and other factors relating to power to incur municipal debt; traditional financing techniques; federal tax and securities law considerations; default and municipal bankruptcy; municipal bond market. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 7680 Public Health Law Cr. 3

Legal foundations of American public health system; struggle between individual liberties and governmental interest in providing for collective health and well-being of citizens. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 7686 Race and the Law Cr. 3

Impact of law on race relations and vice versa. Topics include: history and legal history, civil rights and equal protection, criminal law, affirmative action, employment, hate speech, education, interracial marriage and adoption, housing discrimination, emergence of Critical Race Theory in contemporary jurisprudence. Contemporary issues and solutions illuminated by historical problems and developments. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 7689 Race, the Law and Social Change in Southeast Michigan Cr. 2-3

Detroit is the most segregated metropolitan area in the country. Course examines role and limits of law in addressing issues of race, discrimination and equality in southeastern Michigan. From a legal and anthropological perspective, students study the efforts attorneys have made over the past century to create a region more consistent with American values of inclusiveness. Individual and class action lawsuits and other forms of policy advocacy, all addressing legal problems in southeast Michigan, examining litigation tactics and the role of expert testimony. History and social problems of the region examined from the perspective of the courtroom. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 7701 Real Estate Financing Cr. 2-3

Methods of financing the acquisition and improvement of residential and commercial real estate through the use of private sources of funds. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 7725 Religious Liberty in the United States Cr. 3

Relationship between church and state in the United States. First Amendment Free Exercise and Establishment Clauses; related state and federal statutes; matters of history, legal doctrine, and public policy. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 7751 Advanced Sales and Leases under the UCC Cr. 2-3

Advanced study in sales areas beyond first-year contracts course. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 7756 Secured Transactions Cr. 3

Basic study of Article 9 of the Uniform Commercial Code with particular attention to the law governing the creation and perfection of security interests in personal property and the relative priorities of interested parties; also attention to some of the following: goods-oriented remedies in Article 2, financing leases in Article 2a, bulk sales, effects of the Bankruptcy Code on secured transactions, and documents of title Article 7. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 7761 Securities Regulation Cr. 2-3

Analysis of current problems in federal and state regulation of transactions in securities. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 7766 Sports and the Law Cr. 2-3

Survey of legal issues presented by sports in America. Application of basic principles of antitrust and labor law, constitutional law, administrative law, contract law and tort law to sports. Regulation of professional sports labor markets, regulation of agent representation, sports franchises, leagues and the powers of commissioner's offices, and the regulation of intercollegiate sports. Offered Intermittently.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 7771 State and Local Taxation Cr. 2,3

Introduces the constitutional and statutory framework of state and local taxation, with a concentration on the current topical issues involved in the taxation of multinational taxpayers and taxation of remote sellers. Corporate and income, sales and use, gross receipts and other excise taxes will be covered, as well as local income and property taxes. Coverage of investment incentives, legislative matters and policy will also be included. Offered Intermittently.

Prerequisite: LEX 7816

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 7800 State Constitutionalism Cr. 3

This course will address some of the distinguishing features of state constitutions not shared with the parallel federal document. Among these features are elected judiciaries, part-time legislatures of plenary power, non-unitary executive branches, frequently employed amendment and revision procedures, and state powers over political subdivisions. Significant attention will be devoted to state judiciaries as the interpreters of state constitutions, including state courts' inherent powers, advisory powers, and relationships with federal and sister-state courts. State constitutions also protect civil liberties differently from the U.S. Constitution, both in kind and degree; these differences will be reviewed through readings in constitutional litigation. The course is not a survey of fifty different constitutions. Instead, it is designed to illuminate the common areas of inquiry in a theoretical field remarkably distinct from the study of the federal Constitution. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 7806 Tax-Exempt Organizations Cr. 2

Examines tax problems arising from activities of non-profit associations of a type usually subject to taxation. Offered Every Other Year.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 7816 Taxation Cr. 1-4

Interrelation between income tax policy and basic governmental and social institutions. Introduction to law of federal income taxation; the taxation of individuals. Basic application of these taxes; problems involved in transactions and situations which confront the lawyer in general practice; analysis and use of materials which permit their solution. Underlying problems of policy which have led to the tax law of today and which may be expected to require change in the tax law of tomorrow. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 7821 Taxation of Corporations Cr. 4

A detailed exploration of the federal income tax problems of corporations and their investors; an analysis of the statutory rules governing transactions between corporations and their shareholders, including tax-free incorporations, property and stock distributions, constructive dividend problems, stock redemptions; corporate reorganizations with a focus on corporate recapitalizations, dispositions of the assets of a corporation or of investor's interests in a corporation; liquidation problems; and the impact of judicial doctrines on corporate tax planning. Offered Every Other Year.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 7826 Teaching Law in High School Cr. 3

Students teach 20-25 sessions to a class of high school students, using a widely recognized high school text, Street Law. Students attend a weekly seminar which deals with teaching methods. Students will participate in and present model lessons in the seminar, prepare lesson plans and have field supervision of their teaching in the high school. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 7827 Topics in Advanced Legal Research Cr. 2

Covers complex research topics essential to successful legal practice and scholarship and builds upon the basic research skills and techniques learned in the required Legal Research and Writing course (LEX 6400). Its problem-solving approach gives students practical research experience that will enhance their ability to use legal, archival and social science information persuasively and cost-effectively. The scope is primarily limited to researching United States federal and state law. Offered Spring/Summer.

Prerequisite: LEX 6400

LEX 7828 Law of Electronic Commerce Cr. 3

New legal and policy issues that arise when businesses and consumers use the Internet to conduct their commercial transactions. Broad range of subject matters, such as history and technology of the Internet, regulatory paradigms, trademarks, copyright, jurisdiction over online disputes, spam and other online intrusions, clickwrap and browsewrap contracting, liability of online intermediaries, privacy, taxation of Internet commerce, and consumer protection. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 7829 Law of the First Amendment: Freedom of Speech Cr. 2

In-depth coverage of the First Amendment guarantee of freedom of speech, press, association and petition. Emphasis on the "law of the First Amendment" as it has developed through the decisions of the Supreme Court; how the "law of the First Amendment" operates in the context of actual litigation. First Amendment issues likely to arise in the United States today and tomorrow. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

Equivalent: LEX 7126

LEX 7831 Trademarks and Unfair Competition Cr. 2-3

Federal trademark statute, 15 U.S.C. section 1051 et. seq., state statutory and common law unfair competition, and the federal law of unfair competition and false advertising under 15 U.S.C. section 1125 (a). Offered Intermittently.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 7836 Trial Advocacy Cr. 3

Basic trial techniques taught through student performances of role-play exercises followed by critique. Mastering major trial skills in isolation: direct and cross examination, introduction of exhibits, impeachment, expert witnesses, opening and closing statements. Application of skills in simulated full criminal or civil jury trial. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

Equivalent: LEX 7604

LEX 7841 Trusts and Decedents' Estates Cr. 4

Intestate succession, wills and trusts, requisite elements of wills and express trusts, and procedural requirements for their creation; administration of decedents' estates and trusts; special rules relating to charitable and spendthrift trusts; trust forms as equitable remedial devices under resulting and constructive trust rules. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 7888 United States Foreign Relations Law Cr. 4

Constitutional and statutory doctrines that regulate the conduct of U.S. foreign relations. Topics include: distribution of foreign affairs powers between the three branches of government, status of international law in U.S. courts, scope of the treaty power, validity of executive agreements, preemption of state foreign affairs activities, and the political question and other doctrines regulating judicial review in foreign affairs cases; political influences on and policy effects of legal doctrines in this field. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

Equivalent: PS 6870

LEX 7931 Water Law Cr. 2-3

Categories of water bodies and public and private rights therein under the riparian and the prior appropriation systems. Consumptive and non-consumptive uses, management, and protection of the resource. Intergovernmental relations with respect to water resource allocation and management. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 7941 White Collar Crime Cr. 3

Substantive and investigative issues related to federal prosecution of business crimes. Balance between government powers to investigate white collar crime and the rights of corporate and individual investigatory targets in connection with criminal prosecutions of federal economic crimes. Problems related to parallel civil enforcement actions involving the same underlying conduct. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 7951 Workers' Compensation Law I Cr. 2

Overview of Michigan statute; discussion of "arising out of" and "in the course of employment," including the going to and from work doctrine. Analysis of the occupational disease provisions of the statute as compared to single event personal injury provisions. Study of specific loss. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 7990 Directed Study Cr. 1-2

A directed study may involve writing a paper, participating in a regularly-scheduled course for reduced credit, or other work of an academic nature. Subject matter and procedure are to be arranged prior to registration. Directed studies may not be elected on a pass-no credit basis. Offered Every Term.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 7995 Law Practicum Research Cr. 1

Students enrolled in the Law Practicum Research participate in an employment experience directly related to their academic studies and concurrently consult with a supervising member of the full-time Law School faculty. An enrolled student must submit written work to the supervising faculty member that relates the employment experience to the student's academic studies and that includes consideration of the roles and responsibilities of practicing attorneys and strategic and ethical issues in the applicable field of law. Offered Every Term.

LEX 7999 Special Topics Cr. 2-4

Areas of current interest in the law. Offered Every Term.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 8001 Antitrust and Trade Regulation: Current Issues Seminar Cr. 3

Addresses current topics in antitrust and trade regulation, providing a mix of substantive knowledge and professional skills instruction. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 8002 Access to Justice Seminar Cr. 3

History, policies, practices and laws that demonstrate how our legal system addresses access to justice for people with economic needs or other restrictions that prevent them from using the system effectively. Seminar examines issues in both the criminal and civil areas. How lawyers are uniquely suited to improve access to justice. Career options to enhance access to justice, such as: following a public interest career, performing pro bono legal service for the poor, and exercising leadership in government and elsewhere to bring changes that enhance access to justice for all. Lectures, readings, research, site visits, and guest speakers. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 8003 Reimagining Development in Detroit: Institutions, Law and Society Cr. 3

Seminar course. Examination of contemporary problems of community development from a perspective of institutional economics; how tools and theories of institutional economics are applied to problems relevant to the City of Detroit. Students write research papers applying these tools to issues such as race and regionalism, role of faith-based organizations in community development, abandoned land and community gardens, structure of local governance, charter schools and the fate of public schools, opportunity-based housing, and state of health-care safety net providers. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 8010 Ancient Greek and Roman Law Cr. 3

Legal systems of ancient Greece and Rome. The law of Athens during its classical period in fifth and fourth centuries B.C.E.; development of Roman law during Republican period and the Empire, as transmitted through the compilations of Justinian in the sixth century C.E. Students write a paper on a subject related to the course material (this paper will satisfy the Law School writing requirement). Offered Yearly.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 8015 Asian Pacific American History and the Law : Perspectives on APA Civil Rights and Civil Wrongs Cr. 3

This seminar explores the Asian Pacific American civil rights movement with an overview of how federal and state laws have affected the Asian Pacific American (APA) experience and presence in the United States, covering a variety of civil rights cases and civil wrongs against APAs. The seminar will cover the APA historical timeline, exclusion laws, alien land laws, World War II internment of Japanese Americans, affirmative action as it applies to APAs, civil rights and racial hate crime violence, APAs in the marriage equality movement, bilingual issues in education and in the workplace, post-9/11 issues, immigration law reform, the Hawaiian sovereignty movement, and the effort to change birthright citizenship and immigration laws, among other topics. Offered Fall.

Restriction(s): Enrollment is limited to Graduate or Law level students.

LEX 8029 Citizenship Seminar Cr. 3

Legal understanding of citizenship. How has the concept of citizenship evolved over time? How do we (or should we) decide who is and is not a citizen in the U.S. and in other nations? If one is a citizen, what rights flow from that status? Completion of this seminar satisfies the Law School writing requirement. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate or Law level students.

LEX 8031 Commercial Law Seminar Cr. 3

Advanced study of an area of commercial law; assigned readings. Final grade based on paper and seminar discussion leadership, on topic selected by student from instructor's list. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 8037 Consumerism&Democrcy Cr. 3

Offered Yearly.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 8039 Contract Drafting Seminar Cr. 3

Knowledge and skills necessary for sound drafting of agreements. Substantive issues of contract law and important drafting issues. Students draft several contracts for review and critique; final grade based on drafting and editing as well as participation in seminar meetings. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 8044 Advanced Topics in Criminal Law and Procedure Cr. 3

Focuses on the law governing, practice of, and debate about plea bargaining. Among the questions to be considered: Does plea bargaining serve society well? Is it on firm constitutional footing? What are the constitutional prerequisites for a valid guilty plea? Does plea bargaining work differently in state court and in federal court? In white collar cases and street crime cases? In high-level cases and low-level cases? What legal or extra-legal factors determine the outcome of a plea bargain? And finally, how does pervasive plea bargaining affect the role of the prosecutor, the defense lawyer, and the trial judge? This seminar can be used to complete the upper-level writing requirement. Offered Intermittently.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 8048 Current Topics in International Law Cr. 3

Focus on new and controversial issues; topics change with each offering. Readings, class discussions, and paper. How international institutions function, justification for the norms they seek to enforce, and coherence of those norms with respect to theories of international society. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 8049 Civil Rights Trip Seminar Cr. 2

introduction to the Civil Rights Movement of the 1950s and 1960s, as well as how lawyers at preeminent civil rights organizations continue the work today. Enrolled students travel to Atlanta, Selma, Montgomery, and Birmingham over spring break; meet with prominent civil rights attorneys; visit the legal, spiritual, and political landmarks of the Civil Rights Movement; meet survivors and activists from the movement, who provide them with first-hand accounts of the Selma to Montgomery March, the maneuverings of segregationist and progressive political figures in Montgomery, and daily life during the Jim Crow and civil rights eras. Offered Every Other Year.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 8051 Detroit Equity Action Lab: A Collaborative Study of Structural Racism Seminar Cr. 3

This Seminar introduces students to notions of structural racism as it impacts the city of Detroit. Students will work collaboratively with members of the Detroit Equity Action Lab (DEAL) addressing racial equity in a wide range of sectors, such as civil rights, transportation, community development, health, education and housing. Students will develop awareness of the role and limits of law in addressing structural racism. In addition to examining the work of individual organizations, students will consider broader issues impacting racial equity and will explore interventions that might change public policy and public awareness as it relates to structural racism. Offered Every Other Year.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 8067 Effective Oral Communication for Lawyers Cr. 3

Exercise-based seminar to help students become more familiar with, and more skillful at, oral communication in the various settings familiar to a lawyer. Topics include: physiology of speech and sources of speech pathology; aspects of non-verbal communication; use of humor; stage fright; making communication interesting. Offered Every Other Year.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 8068 Energy Law: Current Topics Cr. 3

In-depth exploration of a particular topic regarding regulation of energy production or consumption. Topics may include: regulation of fuel sources and emissions in the U.S. transportation sector, incentives and regulations in financing clean energy investments, and the impact of regulation on adoption of electric vehicles. Students are responsible for a research paper and presentation to the class. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 8075 Ethics of the Lawyering Experience Seminar Cr. 3

Psychological and ethical dimensions of law and legal practice, explored through engagement with works of fiction and selected legal scholarship. Student writes weekly reaction paper. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 8081 Evidence Law: Advanced Topics Cr. 3

Seminar course; students write papers and give presentations on current topics of evidence law. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 8101 Family Violence: Seminar Cr. 3

Analysis of the utilization of the legal system to address issues of abuse within the family. Topics include: the response of the criminal justice system to various forms of family violence, such as marital rape, spouse abuse, and child abuse; use of tort and injunctive remedies; examination of new and proposed legislation relevant to these issues. Offered Every Other Year.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 8141 International Environmental Law Seminar Cr. 3

Students explore use of bilateral and multilateral treaties and other international mechanisms for dealing with international environmental problems; emphasis on United States - Canada international environmental law. In-class presentations, paper required. Offered Intermittently.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 8161 International and Comparative Business Law: Doing Business in China Seminar Cr. 3

This seminar is designed as an introduction to the legal aspects of doing business with Chinese entities. After a brief overview of the historical context and the basic structure of the Chinese legal system, we will explore political, economic, legal and cultural issues U.S. companies typically encounter in conducting business with the Chinese. Specific topics include foreign direct investment, company law, intellectual property rights, labor law, banking and foreign exchange, anti-monopoly law, cyber and national security issues, and dispute settlement. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 8171 Health Law: Advanced Topics Cr. 3

Examines current legal issues related to health, such as applications of the law within and outside the health care system; contemporary debates on role of government and private sector in health; innovative proposals to use law, ethics and policy to improve health; and the role of law during public health emergencies. Offered Intermittently.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 8190 International Women's Human Rights Seminar Cr. 3

Evolution of women's rights as human rights. Students will examine women's human rights in the context of legal instruments such as the UN Convention to Eliminate Discrimination Against Women (CEDAW) and other international treaties, and in the jurisprudence of women's human rights in international tribunals. This course will also explore the role of global and regional human rights organizations in securing women's legal rights and analyze the current legal discourse on women's human rights and explore key issues in the light of specific world regions, cultures and religious traditions. Offered Fall.

LEX 8241 Advanced Topics in Work Law Cr. 3

Examines current and developing issues in labor and employment law. Offered Intermittently.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 8248 Law and Literature Seminar Cr. 3

Connection between law and literature. Topics include: role of narrative in legal arguments and legal decision-making; role of narrative and law, respectively, in constructing identity; literary criticisms of the law and legal profession. Focus on stories of adoption, including: shifting definitions of parenthood; nature vs. nurture debate; issues of class, race, gender, and national identity. Novels, short stories, films, memoirs, and legal cases; authors include Charles Dickens, George Eliot, P.D. James, and Louise Erdrich. In-class presentations; paper required. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 8256 Law in Cyberspace: Seminar Cr. 3

Topics may include online speech (including regulation of harmful and sexually explicit speech); filtering and intermediary liability; virtual property; online contracts; trademarks and domain names; copyright; the problems that flow from asserting national laws in a medium with no national borders. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 8260 Law of the City: Detroit: Seminar Cr. 3

Exploration of legal, economic, and policy issues regarding the contemporary American city, using Detroit as the case study. Themes covered include race, class, positive rights, community organization and identity, economics, public education, environmental justice and legal pluralism. Students read in constitutional and statutory provisions, case law, administrative determinations, academic writing, and current popular media. Discussion of a different aspect of urban law each week; students explore a broad array of legal issues and opportunities in the urban environment around them; current law and policy reforms; research paper and presentation. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate or Law level students.

LEX 8263 Legal Change Seminar Cr. 3

What is the relationship between law and social change? How effective are changes in legal doctrine in changing social practices? Under what conditions can we effectively use the law to promote social change? This course investigates these questions by studying the relationships among social movements, courts, legislatures, and other international and domestic institutions. Students will examine materials from actual legal reform movements, including equality in education and women's rights, and evaluate strategies for legal reform and their impact on statutory and decisional law as well as social practices. Offered Every Other Year.

LEX 8271 National Labor Relations Act: Current Problems Cr. 3

Legal issues pending before the National Labor Relations Board and in the courts. Students act in place of NLRB and render opinions on critical labor law issues; read actual briefs in pending cases, discuss the cases, and vote on disposition and draft majority and dissenting opinions. Each student writes one majority and one concurring or dissenting opinion. Class discussions focus on NLRB decision-making process and judicial review of Board decisions; and on draft opinions of student Board panels. Grade is based on class participation as well as written work; students may elect to write papers based on legal issues discussed in class. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 8280 National Security Law Seminar Cr. 3

National security as area of specialization within government law practice, private law practice, and academia. Aspects of international law, constitutional law, criminal law, administrative law, and other fields as they apply to issues such as: Who formulates and implements the national security policies of the United States? When do the nation's security interests trump competing values (civil liberties, transparency, fulfillment of the nation's international legal obligations)? In what respects is America's approach to these issues similar to or different from that of other countries? Readings include statutes, treaties, regulations, case law, and extensive secondary literature, which serve as a basis for a substantial research paper or law journal note. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 8300 Race and the Law: Advanced Topics Cr. 3

This seminar will examine the role of the law in creating as well as maintaining race, racial hierarchies, and racial inequality. Contrary to the traditional view of racial subordination as solely a deviation from the liberal legal ideal, this course recasts the role of law as historically central to and complicit in upholding racial hierarchy as well as other hierarchies of gender, class and sexual orientation. The course will investigate these issues over the span of centuries, from the founding of the Americas to the present day. This course will explore oft-discussed issues at the intersection of race and law such as slavery, colonization, immigration, citizenship, nation building, national security, and affirmative action as well as less examined issues, such as sexual exploitation and unarmed police shootings. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 8335 Regulation of Vice Cr. 3

Seminar exploring legal, economic, and policy issues regarding federal, state, and local regulation of vice, including: alcohol nicotine, drugs, gambling, and commercial sex. The current legal landscape; potential policy reforms. Students prepare a research paper on a mutually agreed upon topic, which may include a specific regulation or vice law, proposed policy reform, comparative analysis from another jurisdiction, and state/local issues. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 8345 Sex, Sexuality and the Law in the Contemporary United States Cr. 3

The ways the law constructs people as sexual beings and regulates that being and her/his sexuality. Seminar course has four main objectives: 1) to deepen understanding of contemporary U.S. laws that address sex and sexuality; 2) to understand the ways in which individuals and groups are impacted by those laws; 3) to learn and apply aspects of critical legal theories in legal analysis; and 4) to strengthen written and oral legal analysis and communication. Workshop format; class contribution makes up a significant portion of the grade. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 8351 Sports and Inequality Cr. 3

This seminar will examine the legal and social implications of various forms of discrimination in both the professional and amateur sports contexts. Coverage will include a discussion of legal efforts to address discrimination in sports based on race, gender, disability, and sexual orientation. Topics include racial inequalities on the playing fields and in the front offices of amateur and professional sports, the impact of NCAA eligibility criteria, the effects and future of Title IX, gender segregation and exclusion in professional sports and sexual violence, sexual orientation discrimination in sports, and sports opportunities for people with disabilities. The final paper for this class may be used to satisfy the upper-level writing requirement. Offered Intermittently.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 8361 Tax Policy: Crnt Issus Cr. 3

Offered Every Other Year.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 8363 Tax Policy Seminar: Role and Impact of Congressional Oversight on Abusive Tax Strategies Cr. 3

This seminar will examine the international tax rules, the abusive strategies, and the responses by Congress and foreign governments. We will use excerpts from Congressional hearings to explore the role of Congressional oversight in identifying the noncompliance with existing laws, the role of foreign governments in facilitating abuses and illegal behavior, and the need for legislative or administrative action to address some of the abuses. We will consider policy options to reduce the incentives for businesses to pursue these strategies. We will examine professional ethics and the role of lawyers and other professionals in structuring these abusive transactions. Offered Fall.

Restriction(s): Enrollment is limited to Graduate or Law level students.

LEX 8401 Urban Housing and Community Development: Seminar Cr. 3

Legal, social, and economic aspects of urban housing and community development, including local, state and national programs and policies. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 8505 Criminal Justice Externship Practicum Cr. 2

Students perform 150 hours of unpaid work in a criminal prosecutor or defender's office. Students are assigned tasks similar to those performed by entry-level prosecutors and defenders. Students develop advocacy skills, legal drafting skills, law practice management skills, the ability to recognize and resolve strategic and ethical dilemmas, and the ability to learn from experience. Offered Every Term.

Restriction(s): Enrollment is limited to Graduate or Law level students.

LEX 8506 Criminal Justice Externship: Colloquium Cr. 2

Roles and responsibilities of criminal prosecutors and defenders, the judicial process in criminal cases, and strategic and ethical issues in criminal prosecution and defense. Substantial class time is devoted to professional skills instruction and to facilitated discussion and analysis of students' fieldwork observations and experiences. Offered Every Term.
Restriction(s): Enrollment is limited to Graduate or Law level students.

LEX 8507 Judicial Externship: Practicum Cr. 2

Students perform 150 hours of unpaid work in judicial chambers. Students are assigned tasks similar to those performed by judicial clerks. Students develop research, writing, and analysis skills, legal drafting skills, oral communication skills, law practice management skills, and the ability to learn from experience. Offered Every Term.
Restriction(s): Enrollment is limited to Graduate or Law level students.

LEX 8508 Judicial Externship: Colloquium Cr. 2

Students learn about the roles and responsibilities of judges and judicial clerks, judicial decision-making, and effective advocacy. Substantial class time is devoted to professional skills instruction and to facilitated discussion and analysis of students' fieldwork observations and experiences. Offered Every Term.
Restriction(s): Enrollment is limited to Graduate or Law level students.

LEX 8515 Corporate Counsel Externship: Practicum Cr. 2

Students perform 150 hours of unpaid work in corporate counsel offices of non-profit and for-profit entities for two credits. Students are assigned tasks similar to those performed by attorneys in corporate counsel or general counsel offices. The Practicum is an opportunity for students to develop professional skills, including legal analysis and reasoning, contract drafting, problem solving, communication, teamwork, negotiation, and fact-finding. Students will also learn about important workplace issues such as time management, corporate culture, professionalism, and giving and receiving feedback. Grading will be on an Honors, Pass, Low Pass, No Credit basis. Offered Every Term.
Restriction(s): Enrollment is limited to Graduate or Law level students.

LEX 8516 Corporate Counsel Externship: Colloquium Cr. 2

Students will learn about substantive issues encountered in an in-house legal department and the ethical responsibilities of in-house counsel. Substantial class time is devoted to professional skills instruction on topics such as working with outside counsel, conflicts management, contract drafting, and conducting internal investigations. Students will also participate in facilitated discussion and analysis of their fieldwork observations and experiences. Chief legal officers, general counsel, and senior managing attorneys will guest lecture in some classes. Offered Every Term.
Restriction(s): Enrollment is limited to Graduate or Law level students.

LEX 8595 Advanced Externship Cr. 2

A two-credit, letter-graded course for students who will complete a second externship at a different field placement in the same substantive area or at a different division of the same location of their prior placement. Students will complete 150 hours of work at an approved field placement, submit reflective memoranda as assigned, and meet with the Director of Clinical Education, or other designated Faculty Supervisor, at least three times during the semester. Approval will only be granted in the rare circumstances where a student's learning objectives differ significantly from those for the first externship and these learning objectives cannot be met by existing clinical or experiential learning course opportunities. Application process required. Offered Every Term.
Prerequisites: LEX 8506 or LEX 8508 or LEX 8516 or LEX 8599
Restriction(s): Enrollment is limited to Law level students.

LEX 8598 Public Service Externship: Practicum Cr. 2

Students perform 150 hours of unpaid work in public service settings. Students are assigned tasks similar to those performed by entry-level public service lawyers. Students develop interviewing and counseling skills, legal drafting skills, oral communication skills, law practice management skills, and the ability to learn from experience. Offered Every Term.
Restriction(s): Enrollment is limited to Graduate or Law level students.

LEX 8599 Public Service Externship: Colloquium Cr. 2

Students learn about the roles and responsibilities of public service lawyers, strategic, practical, and ethical dimensions of public interest practice, and effective advocacy. Offered Every Term.
Restriction(s): Enrollment is limited to Graduate or Law level students.

LEX 8601 Appeal and Post-Conviction Advocacy Clinic Cr. 4

Clinical legal writing experience. Students will work with indigent clients who are challenging their felony convictions or sentences in state or federal court, in cooperation with the Michigan State Appellate Defender Office (SADO). Students will meet with the instructor in individual sessions and class sessions to discuss writing, investigation, client communication, research and the appellate and correctional processes. Students have client contact and may participate in an actual circuit court argument. Regardless of the court filing in each case, every student must prepare an appellate document (motion and brief, application for leave to appeal, or a memorandum of law) on behalf of his or her client. Offered Yearly.
Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 8604 Asylum and Immigration Law Clinic Cr. 6

Lawyering skills and values needed to effectively represent clients, and the legal skills and knowledge needed to represent clients seeking asylum or other immigration benefits, including an Immigration Court hearing. Asylum case simulation. Professional responsibility issues. In clinical component, students represent clients on a variety of immigration matters. Offered Yearly.
Restriction(s): Enrollment is limited to Graduate or Law level students.

LEX 8606 Asylum and Immigration Law Clinic (Advanced) Cr. 2

Students continue to gain increased experience in different settings and issues, and may also organize and participate in community outreach projects. Offered Yearly.
Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 8607 Civil Rights and Civil Liberties Clinic Cr. 4

Collaborative venture with American Civil Liberties Union (ACLU) of Michigan; opportunity to litigate civil rights and civil liberties impact cases before state and federal courts. Classroom component includes a semester-long simulation of a civil rights case that gives students opportunity to develop professional skills such as interviewing, counseling, drafting pleadings and discovery requests, taking depositions, preparing and arguing motions, and negotiating with opposing counsel. Offered Winter.
Prerequisites: May be taken concurrently: LEX 6800 with a minimum grade of C and May be taken concurrently: LEX 7266 with a minimum grade of C
Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.
Repeatable for 8 Credits

LEX 8610 Transnational Environmental Law Clinic (Advanced) Cr. 2

Students continue their work with the Environmental Law Clinic, gaining increased experience in different settings and issues; students work with Great Lakes Environmental Law Center and may be involved in formally representing other community organizations and public interest groups. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 8611 Transnational Environmental Law Clinic Cr. 6

Skills and strategies needed to affect environmental policy in the three branches of state and federal government. Classroom sessions include current environmental policy challenges and opportunities; guest speakers. Clinical component includes preparation of policy papers and formal legislative testimony, commenting on rulemaking and permit decisions, and engaging in judicial review and enforcement litigation; students work with Great Lakes Environmental Law Center. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 8615 Patent Procurement Clinic Cr. 4

Students represent clients in patent procurement matters before the U.S. Patent and Trademark Office, Detroit satellite office. Student work includes interviewing and counseling clients, fact investigation, performing legal research, conducting prior art searches, and drafting and prosecuting patent applications. Skills and values necessary to effectively represent clients in patent procurement matters; exploration of substantive areas of patent law that arise in these matters. Professional responsibility issues commonly faced by patent attorneys, such as conflicts, competence, and confidentiality. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 8616 Patent Procurement Clinic (Advanced) Cr. 2

Students in this clinic represent clients in patent procurement matters before the United States Patent and Trademark Office's Detroit, Michigan, Satellite Office. There is no classroom component in the Advanced Patent Procurement Clinic. Students will be expected to spend between five to ten hours per week continuing work on ongoing cases that have significant deadlines during the semester, gaining increased experience in different settings and addressing more complex issues. Advanced Clinic students will also work with PPC faculty to provide direction and guidance to those enrolled in the PPC Clinic for the first time, in areas in which Advanced Clinic students have already acquired some expertise. Time spent in the Advanced Clinic will include a one-hour weekly meeting with the Clinic's faculty to discuss the status of client matters. Offered Fall, Winter.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 8621 Free Legal Aid Cr. 4

The Free Legal Aid Clinic, Inc. (FLAC) is a student-run, non-profit organization with a board of directors composed entirely of current Wayne Law students. FLAC partners with legal services organizations to provide free legal services to low-income people in Wayne County. FLAC students practice under the supervision of legal aid attorneys and law school faculty pursuant to the Michigan Student Practice Rule. Students, who work an average of 12-14 hours per week, are responsible for all aspects of the cases assigned to them, including interviewing clients, drafting pleadings and other court filings, arguing motions, conducting trials and evidentiary hearings, negotiating with opposing counsel, researching legal issues, and drafting legal documents. Students participate in a twice-weekly seminar class for this letter-graded course. Credits earned meet the experiential learning and clinical education requirements. Offered Every Term.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 8622 Free Legal Aid: Advanced Cr. 2

Students continue to work 12-14 hours per week at FLAC, taking on more complex cases and leadership roles within the organization. Students will meet with faculty on a weekly basis to discuss topics such as law practice management and non-profit management, as well as advanced substantive law topics and skills training. Students may also mentor new students and act as teaching assistants for the basic Free Legal Aid course. Limited enrollment, prior faculty approval required. Offered Every Term.

Restriction(s): Enrollment is limited to Law level students.

LEX 8625 Govt Agency Internship Cr. 1-3

Offered Every Term.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

Repeatable for 3 Credits

LEX 8627 In-House Counsel Internship Cr. 1-3

Offered Every Term.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

Repeatable for 3 Credits

LEX 8631 Business and Community Law Clinic Cr. 6

Course component: basic provisions of nonprofit corporate law, tax law, and legal ethics that affect community economic development groups. Clinical component: students assist a community group at or near the stage of incorporating itself and/or applying for tax-exempt status, in services such as drafting and filing articles of incorporation, bylaws, and IRS forms. Students complete term paper on topic of interest to community economic development organizations. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 8633 Business and Community Law Clinic (Advanced) Cr. 2

Participation requires demonstrated commitment to business law, community economic development, or nonprofit law. No classroom component; enrollment limited to two students per semester; students spend between five and ten hours a week continuing their work on ongoing cases and meeting significant deadlines during the semester. Advanced Clinic students also work with BCL faculty to provide direction and guidance to those in the BCL Clinic for the first time, in areas in which Advanced Clinic students have already acquired some expertise; as well as coordinate community outreach and informational programs. Includes one hour per week meeting with BCL faculty to discuss the status of client matters. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 8641 Disability Law Clinic Cr. 6

Cooperative venture with Wayne County Legal Services. Hands-on experience while helping individuals with disabilities and their families obtain services and support to avoid out-of-home placement at public expense. Students perform 15-20 hours fieldwork per week. Student responsible for 3 to 5 cases: investigating facts, researching law, counseling client, representing client in administrative or judicial proceedings, drafting and arguing appeals, engaging in settlement negotiations. Intake, case acceptance, individual client representation, community education and law reform efforts. Includes two-hour weekly seminar; graded on honors pass-low pass-no credit basis. Credits count toward 14-credit maximum in applied and skills courses. No credit after LEX 8621. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 8642 Disability Law Clinic (Advanced) Cr. 2

Students continue their work on cases or projects begun in the Disability Law Clinic that could not be completed in a single term, work on new cases or projects that involve more complex issues or give students opportunities to develop additional skills, or serve as teaching assistants for the Clinic. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 8661 Legal Advocacy for People With Cancer (Clinic) Cr. 4-6

Students work with healthcare professionals at the Karmanos Cancer Center to identify and resolve legal issues that present barriers to patient care and wellbeing. Students advise and assist people with cancer in matters pertaining to health insurance, housing, employee rights and benefits, estate and healthcare planning, and public benefits. They develop skills used in a broad range of practice settings: interviewing and counseling, case-management, problem-solving, persuasive fact analysis, legal drafting, negotiation, effective oral communication, and interdisciplinary collaboration. Offered for Law School grading: Honors pass, pass, low pass, no credit. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate or Law level students.

LEX 8662 Legal Advocacy for People with Cancer Clinic (Advanced) Cr. 2

Continuation of work begun in LEX 8661 which could not be completed in a single term; work on new cases or projects that involve more complex issues or give students opportunities to develop additional skills or serve as teaching assistants for the LAPC Clinic. Students are expected to perform at least 100 hours of clinical work, including regular, frequent meetings with the course instructors. Course does not have a classroom component, but students who serve as teaching assistants are expected to participate in some LAPC classes. Students are required to document their clinical work through detailed, contemporaneous time logs. Offered Fall, Spring/Summer.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

LEX 8701 Law Review Cr. 1-2

Offered Yearly.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

Repeatable for 4 Credits

LEX 8711 Moot Court Cr. 1-2

Members conduct, under general faculty supervision, the program in the preparation of briefs and the hearings on oral arguments. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

Repeatable for 4 Credits

LEX 8721 Mock Trial Cr. 1-2

Members participate in skills training; intraschool, regional, and national trial advocacy competitions. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

Repeatable for 4 Credits

LEX 8725 Journal of Business Law Cr. 1

The Wayne State Journal of Business Law provides the opportunity for law students the opportunity to edit legal scholarship, to prepare a student note or commentary on a relevant legal topic under the supervision of a Wayne Law professor. Offered Fall, Winter.

Repeatable for 4 Credits

LEX 8731 The Journal of Law in Society Cr. 1

Members contribute to publication of this law journal and the annual symposium. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School.

Repeatable for 4 Credits

LEX 8741 Transactional Law Competition Cr. 1

Practical skills course focused on improving transactional lawyering skills, including drafting agreements, revising agreements, advising clients, and negotiating with transactional attorneys, while exploring important legal/business issues relevant to mergers and acquisitions. During the fall semester, students will participate in an in-house transactional law competition, and during the winter semester, students will participate in the National Transactional LawMeet Competition. Offered Yearly.

Repeatable for 4 Credits

LEX 8815 Fundamentals of US Legal Research Cr. 1

Introduction to U.S. legal research skills for students from foreign jurisdictions, with a focus on the use of electronic resources for legal research. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School; enrollment is limited to students with a major, minor, or concentration in United States Law.

LEX 8875 Survey of United States Law Cr. 3,4

Concise survey of several substantive fields of United States Law (principally in the area of private law) with focus on several core legal topics integral to understanding the U.S. legal system as a whole, and to working with U.S.-trained lawyers. Material drawn from a variety of areas, such as: law of contracts, property, torts, criminal law, and constitutional law. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School; enrollment is limited to students with a major, minor, or concentration in United States Law.

LEX 8890 US Legal Skills for Foreign Law Students Cr. 2

This course will provide foreign-trained lawyers with a working knowledge of the memo-drafting, transactional, and other skills utilized by U.S. Lawyers. Students will draft a legal memorandum, a client letter, and a contract. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students in the Law School; enrollment is limited to students with a major, minor, or concentration in United States Law.

LEX 8999 Master's Essay Direction Cr. 1-2

Offered Every Term.

Restriction(s): Enrollment is limited to Graduate or Law level students; enrollment limited to students with a class of Candidate Masters; enrollment limited to students in the Law School.

Repeatable for 2 Credits

WHITE, KATHERINE: LL.M., George Washington University; J.D., University of Washington; B.S.E., Princeton University; Professor

WINTER, STEVEN : J.D., Columbia University; B.A., Yeshiva University; Distinguished Professor

ZACKS, ERIC A.: J.D., Harvard University; B.A., University of Michigan; Associate Professor

COLLEGE OF LIBERAL ARTS AND SCIENCES

Dean: Stephanie Hartwell

The College of Liberal Arts and Sciences comprises the traditional academic disciplines and may be considered the academic core of the University. Composed of nineteen departments, a variety of programs, and over 400 faculty members, the college is able to offer a rich and broad-based education in the liberal arts and sciences. Curricula leading to master's and doctoral degrees are offered in the physical and natural sciences, mathematics, the social sciences and the humanities. Some programs provide practical training and lead to professional certification. Most doctoral programs acquaint students with methods used in scholarly inquiry and require students to complete an independent research study. Students thus contribute to the University's mission to increase fundamental knowledge and apply that knowledge to the betterment of the human condition. Faculty in the College of Liberal Arts and Sciences have been recognized nationally and internationally for their important contributions to research and for their scholarly publications. Working with these faculty mentors, graduate students acquire an education that leads to the joy of intellectual discovery and its application in the real world.

Academic Regulations for the College of Liberal Arts and Sciences

For complete information regarding the academic rules and regulations of the University, students should consult the Academic Regulations (p. 12) section of this bulletin. The following additions and amendments pertain to the College of Liberal Arts and Sciences.

Graduate Programs Admission Requirements

Admission to any graduate degree program is contingent upon meeting the admission requirements of the Graduate School (p. 19).

Preference is given to those students who have achieved superior undergraduate scholastic records and who evidence superior abilities.

All credits prerequisite to a degree or certificate program must be earned prior to or concurrent with the initial graduate credits applicable to the program. If undergraduate preparation for the major field is considered deficient, additional coursework may be required at the undergraduate level. Many programs have additional individual admission requirements. Students should consult the subsequent departmental sections in this bulletin for specific requirements in each field of study.

Graduate Record Examinations

The Graduate Record Examination (GRE) is used to assist advisors in evaluating educational preparation and to serve as a basis for planning future study. There is no uniform policy concerning GREs. Some departments require GRE scores from all applicants for admission, while others require scores only from students in specified classifications. Students should consult the department in which they wish to major to determine which examinations must be taken.

Students required to take these examinations must apply at the Testing and Evaluation Office, 698 Student Center, either prior to or at the time

of admission. Students who previously have taken the examination may have transcripts of these scores submitted. After the initial registration, no subsequent enrollment will be permitted nor will candidacy be authorized until examination requirements have been fulfilled.

AGRADE – Accelerated Graduate Enrollment

The College of Liberal Arts and Sciences has established an accelerated combined undergraduate and graduate program ('AGRADE') whereby qualified seniors in the College of Liberal Arts and Sciences may enroll simultaneously in some undergraduate and graduate programs of the College. A maximum of sixteen credits may be applied towards both undergraduate and graduate degrees in a student's major field if the major department is an 'AGRADE' participant. (Students should contact the chairperson of their major department to ascertain its 'AGRADE' status.) Those who elect the 'AGRADE' program may expect to complete the Bachelor's and Master's degrees in five years of full-time study.

Eligibility: 'AGRADE' applicants must have an overall g.p.a. of 3.5. Applicants are also expected to have performed at a superior level in their major, as determined by the major department and reflected in a g.p.a. in the major of at least 3.6 at the time of application.

Application: A student seeking 'AGRADE' status should present to the Graduate Admissions Committee of his/her major department all of the materials which that department requires for normal admission, EXCEPT for the Graduate Record Examination (GRE) required by some departments. For departments in which the GRE is required, it is expected that this examination will be taken at the normal time and scores forwarded to the major department. Specific departmental admission requirements can be found in this bulletin or obtained from the Graduate Office of the College of Liberal Arts and Sciences (313-577-5188).

The earliest date by which a student may apply for the 'AGRADE' program is during the semester in which he/she completes ninety credits toward the undergraduate degree.

AGRADE Credits: Students may elect a minimum of three and a maximum of sixteen 'AGRADE' credits. These credits will be used to complete the baccalaureate degree as well as to serve as the beginning of graduate study. Upon formal admission to a master's program, 'AGRADE' credits are transferred as if they were graduate credits transferred from a graduate program at another university. The remaining graduate credits required for the master's degree will be earned in the conventional manner following formal admission to the graduate program. Formal admission to the graduate program occurs as AGRADE students complete their baccalaureate degree.

For more details about the 'AGRADE' program, contact the chairperson of the department in which 'AGRADE' enrollment is sought or the Graduate Office of the College of Liberal Arts and Sciences (313-577-5188).

Degree Requirements

Graduate degrees are conferred not merely upon the completion of a prescribed number of courses nor necessarily after a given period of residence, but rather in recognition of each candidate's outstanding ability and high achievement as evidenced in all course work, research, scholarly writing, examinations and personal fitness for a chosen profession. All course work must be completed in accordance with the academic procedures of the Graduate School and College of Liberal Arts and Sciences. In addition to the general Graduate School requirements for degrees (p. 35) and to the information provided below, other requirements are specified by the individual graduate

departments. Students should consult the programs and requirements of the departments in which they plan to major.

Candidacy

Candidacy is an advanced status recommended by student advisors and authorized by the Graduate School or Liberal Arts and Sciences Graduate Office upon evidence of superior scholarship, appropriate personal qualities and promise of professional competence. Students should note that admission as an applicant does not assure acceptance as a candidate for a degree, and that candidacy is a necessary but not sufficient requirement for graduation.

To be eligible for candidacy, students must file officially approved Plans of Work. The Plan should provide for effective concentration in a major field, with proper supporting courses in related fields. Ph.D. applicants should file their Plan with the Graduate School; master's applicants should file with the graduate officer of the College of Liberal Arts and Sciences. In preparing a Plan, students should evaluate with care their personal and professional objectives as well as all degree and departmental requirements. Normally, a student enrolled in a master's degree program is expected to file a Plan of Work by the time twelve graduate credits or their equivalent have been earned.

It is recommended that an approved Plan be filed by applicants for the Ph.D. degree before approximately forty credits beyond the baccalaureate degree have been earned. In addition to filing the Plan, students must satisfy any foreign language requirements.

Candidacy is reached after the Plan of Work has been approved, the final Qualifying Examination has been passed, approximately fifty credits have been completed, and the dissertation committee has been named.

Commencement

Information concerning commencement announcements, caps and gowns, invitations, tickets, time and place, assembling and other relevant items will be mailed to graduates by the Alumni Office prior to the event. Candidates for advanced degrees are requested and expected to attend the commencement at which the University confers upon them the honor of the degree earned.

Master's Degree Requirements

In most master's degree programs, the minimum requirement for the degree is thirty-two credits under either Plans A, B, or C as cited below. At least twenty-four credits must be taken in residence. At least six credits of coursework in the major field, in addition to the essay or thesis, must be in courses open only to graduate students (courses numbered 7000 and above).

Plan A requires at least twenty-four credits of course work plus a six to eight credit thesis.

Plan B requires at least twenty-seven credits of course work plus a three credit essay.

Plan C requires at least thirty credits of course work; an essay or thesis is not required. Most departments require a final comprehensive examination as part of Plan C

Students should consult a departmental advisor for details on the availability of Plan A, B or C in their major field.

Requirements vary by department; see listings under the individual departments for exact information. In accordance with the time limitation of the Graduate School, all requirements for the master's degree must be completed within a six-year period.

Doctoral Degree Requirements Preliminary Qualifying Ph.D. Examination

Responsibility for preliminary qualifying examinations is vested in the graduate faculty of each department, specifically in its committee on doctoral study. Accordingly, committees may require this examination of all candidates or of any candidate prior to the final qualifying examination.

Final Qualifying Ph.D. Examination for Candidacy

The final qualifying examination is required of all applicants and will be a written examination. It may also contain an oral portion if the department requires one. Consult the specific department for requirements.

The written qualifying examination will cover the applicant's major and minor areas and may include such other related matters as the doctoral examining committee may prescribe. If an oral qualifying examination is required, it will be conducted by the departmental qualifying examination committee within sixty days after the written qualifying examination has been passed. This examination will relate to the subject matter of the written examination, the applicant's major and minor areas and other pertinent matters.

If an examining committee does NOT certify that the applicant has passed either the written or oral examinations, it must make specific recommendations with reference to admitting the applicant to a second examination and specify any additional work that should be completed prior to such an examination. If a second examination is held, it must be scheduled within one calendar year and shall be considered final.

Selection of the student's doctoral committee, including one member from outside the student's department, is a requirement for candidacy. Substitutions in the membership of this committee may be made prior to submission of the Outline and Record Form to the Graduate School. After this form is approved, any change in committee membership requires written approval from the Graduate School. This committee conducts the final dissertation defense.

Essays, Theses, and Dissertations

There is no prescribed format for the master's essay. Essay guidelines, indicating standard style manuals for each department and title-page samples, are available in the Liberal Arts and Sciences Graduate Office, 2155 Old Main.

Master's degree candidates under the essay plan register for the course numbered 7999, Master's Essay Direction, in the department of their major; a total of three credits must be elected.

The original copy of the essay should be submitted to the Liberal Arts and Sciences Graduate Office after it is approved and signed by the advisor. This copy will be returned to the department.

The thesis or dissertation *must be an original work, either in or definitely related to the student's major area of specialization.* If proper standards of quality, objectivity, originality, and independence are maintained, candidates may use data that they have derived from their University research. Neither the results of the research nor the publication of findings can be restricted by any non-University agency nor can they be published prior to acceptance of the dissertation by the Graduate School unless prior approval of such publication has been obtained from the advisor. Advisors have primary responsibility for approval of the essay or thesis, but every member of a doctoral committee must read, approve and sign the dissertation.

Students may not begin work on a manuscript until they have submitted an approved Plan of Work and outline form. They may then register for

the thesis or dissertation credits and pay regular fees in the same manner as for all other course work.

Master's candidates under the thesis plan register for the course numbered 8999 in the department of their major. This course is entitled *Master's Thesis Research and Direction* and must be elected for a total of eight credits. Ph.D. candidates must enroll in thirty credits of doctoral dissertation direction. The thirty credit dissertation registration requirement is fulfilled by registering for the courses 9991, 9992, 9993, and 9994 (Doctoral Dissertation Research and Direction I, II, III, and IV, respectively) offered under various subject area codes, in consecutive academic year semesters.

Theses/Dissertation Outline and Record Form

Before students begin working on theses or dissertations, they must file outlines and record forms. Master's candidates must prepare three copies which, after receiving departmental approval, will be forwarded to the Liberal Arts and Sciences Graduate Office. Doctoral candidates must prepare four copies which, after receiving departmental approval, will be forwarded to the Graduate School.

Anthropology

Office: 3054 Faculty Administration Building; 313-577-2935

Chairperson: Andrea Sankar

Graduate Director: Stephen Chrisomalis

<http://clas.wayne.edu/anthropology>

Anthropology is a comparative social science that seeks to uncover principles that govern human behavior. Anthropology includes the four fields of cultural, biological, archaeological, and linguistic anthropology. Departmental strengths include applied anthropology, medical anthropology, historical archaeology, museum studies, cultural resource management / public archaeology, business / organizational anthropology, language and cognition, urban anthropology, paleo-diet, foodways, environmental anthropology, land-use studies, global health, and social entrepreneurship.

The Anthropology Department offers five different graduate degree options: Master of Arts (MA), Doctor of Philosophy in Anthropology (Ph.D.), and two joint PhD programs in Social Work & Anthropology (SWAN), Anthropology and Urban Sustainability (TRUST) and MD-PhD.

Alumni from Wayne State's Anthropology graduate programs are readily employed in a wide range of areas. Some work in traditional institutions such as colleges, universities, and museums, but many are employed in public and private settings. These include health, governmental, international, and social agencies, business and organizational settings, public policy, research and development, design, as well as in positions within government, non-profit, and cultural institutions that require environmental management, historic preservation, archaeology, cultural heritage, and museum-based skills. A master's degree in Anthropology can prepare students for advanced study in professions such as medicine or law. Accordingly, graduate programs in Anthropology are designed to accommodate a variety of specific student interests and objectives.

Individuals who hold degrees in fields other than anthropology and desire admission to graduate degree programs will be individually reviewed. Admission will be granted at the discretion of the Graduate Committee after review of the applicant's background, training, and academic standing; supplementary work may also be individually prescribed.

Academic Scholarship: All course work completed to satisfy the following degree requirements must be done in accordance with the regulations of the Graduate School (p. 12) and the College of Liberal Arts and Sciences (p. 201). All students are required to obtain a grade of 'B' in each course that counts toward the degree. A grade of 'B-minus' or below

in two courses will be sufficient reason to dismiss a student from a graduate program. For the purposes of evaluating this condition, a grade of 'WF' is considered to be a failing grade.

To repeat a course, a student will need to submit a "Petition to Repeat a Graduate Course" form to the Graduate Committee for consideration. Students may not repeat a class without prior approval.

The Department only allows two course repeats for a class where a student receives an insufficient grade.

- Anthropology (M.A.) (p. 203)
- Anthropology (Ph.D.) (p. 204)
- Anthropology and Urban Sustainability (Ph.D. Dual-Title) (p. 205)
- Social Work and Anthropology SWAN (Ph.D.) (p. 206)

Anthropology (M.A.)

Admission Requirements

Admission to this program is contingent upon admission to the Graduate School (p. 19). Additionally, applicants must satisfy the following:

1. The student must have completed ANT 2100 (Introduction to Anthropology) or its equivalent. Admission may be granted while this deficiency is remedied.
2. The student must submit three letters of recommendation.
3. The student must submit a letter of intent outlining his/her research interests and intentions in the field of anthropology, so that the Department may determine if the student's goals are compatible with its available expertise. The student may also mention any life history experience which may be helpful in the decision to admit.
4. A writing sample such as a research paper for a previous course.
5. The student may arrange for his/her Graduate Record Examination (GRE) scores to be sent to the department if he or she wishes.
6. The student must have an undergraduate grade point average (g.p.a.) of at least 3.2. Admission may be granted in exceptional cases where the grade point average is less than 3.2. Admission is contingent upon g.p.a., GRE scores (if applicable), recommendations, the compatibility of research and educational goals with Departmental resources, and the availability of openings in programs with high demand.
7. All applications and admissions material must be submitted to the Office of Graduate Admissions by the following deadlines: October 1 for admittance to the Winter Semester, and January 15 for admittance in the following Fall Semester.

AGRADE Program (B.A to M.A)

The Department of Anthropology offers the Accelerated Graduate Enrollment (**AGRADE**) Program provides the opportunity for top students to enroll simultaneously in an undergraduate and graduate program. The AGRADE allows qualified full-time students to complete the Master's degree in Anthropology usually within one year of their undergraduate degree.

Students can apply a maximum of 16 credits towards both an undergraduate and a graduate degree in the student's major field. Students electing **AGRADE** programs may expect to complete the bachelor's and master's degrees in five years of full-time study.

Students must apply for an **AGRADE** program during the semester that they earn 90 credits toward an undergraduate degree – typically during junior year. Applicants must have a cumulative GPA at the cum laude

level (20th percentile, or a minimum of 3.5) and not less than a 3.6 GPA in the major courses already completed.

For more details about the **AGRADE** program, students should contact Anthropology Advisor Harman Singh at HarmanSingh@wayne.edu or the Graduate Office of the College of Liberal Arts and Sciences at clasgrad@wayne.edu or 313-577-2516.

For more info- clas.wayne.edu/students/agrade

Students pursuing the M.A. in anthropology have three options, referred to as Plans A, B, and C, below.

ANT 7005 is required for all first-year graduate students. Students who have not completed ANT 1100 or the equivalent as an undergraduate must complete this course with a grade of at least 'A-minus' within their first year of graduate studies (credits for this course do not apply toward the M.A.).

Students must file a plan of work prior to the completion of twelve credits and must petition the Graduate Committee for any exceptions to the M.A. requirements.

The following courses, or their equivalents, must be completed either as an undergraduate (see note below) or graduate student.

Code	Title	Credits
Core ¹		18
ANT 5140	Biology and Culture	
ANT 5270	Concepts and Techniques in Archaeology	
ANT 5320	Language and Societies	
ANT 5700	Applied Anthropology	
ANT 7005	Proseminar in Anthropology I	
ANT 7010	Proseminar in Anthropology II	
Methods Options		
Select one of the following (in consultation with advisor):		4
ANT 5210	Anthropological Methods	
ANT 5280	Field Work in Archaeology of the Americas	
Electives 9		
ANT 7xxx - Seminar		
ANT 7xxx - Seminar		
Elective		
Graduation Requirements		
Select one of the following:		3-8
ANT 7900	Synthesis (Plan C) ²	
ANT 7999	Master's Essay Direction (Plan B) ³	
ANT 8999	Master's Thesis Research and Direction (Plan A) ⁴	
Total Credits		32-34

¹ Students entering the M.A. program with a B.A. from WSU who have completed any of the core courses for undergraduate credit (with a grade of 'B' or better) do not need to repeat them, however, they must replace the credits with any other ANT 5000 or higher level course chosen in consultation with their advisor.

² ANT 7900 is an integrative, holistic and comparative course that synthesizes diverse analytical perspectives and methodologies.

³ The M.A. essay, ANT 7999, is a shorter piece of independent work (often 30-60 pages double-spaced) and intended to be written within a single term.

⁴ Students opting for Plan A (thesis) take ANT 8999 in lieu of the nine credits of electives. The M.A. thesis is an independent research project taking multiple terms and culminating in an oral defense.

Students intending to apply for the Ph.D. program are strongly encouraged to take the second semester of theory, ANT 7020 (Anthropological Theory II), as an elective or seminar. For the student who does not intend to pursue a Ph.D., this course is also recommended for a comprehensive understanding of contemporary anthropological thought today.

Students wishing to specialize their degree in specific applied subfields may substitute the nine elective credits with one of the following course sets:

Code	Title	Credits
Medical Anthropology Concentration		
ANT 5400	Anthropology of Health and Illness	3
ANT 7420	Anthropology Practicum	3
One additional medical anthropology course		3
Museum Studies Concentration		
ANT 5600	Museum Studies	3
ANT 7420	Anthropology Practicum	3
ANT 7625	Material Culture and the Social Meaning of Things	3
Business Anthropology Concentration		
ANT 5800	Anthropological Perspectives on Business	3
ANT 7420	Anthropology Practicum	3
One additional business anthropology course		3
Applied Archaeology Concentration		
ANT 6555	Cultural Resource Management and Public Archaeology	3
ANT 6570	Archaeological Laboratory Analysis	3
ANT 7420	Anthropology Practicum	3

Academic Scholarship: All course work must be completed in accordance with the regulations of the Graduate School (p. 12) and the College of Liberal Arts and Sciences (p. 201).

Additional information regarding this program is available from the department upon request.

Anthropology (Ph.D.) Admission Requirements

Admission to this program is contingent upon admission to the Graduate School (p. 19). Only a limited number of applicants who have demonstrated superior ability can be accepted in this program.

In addition to the transcripts and other materials required by the Graduate School, the Department requires all materials cited above for admission to the Master of Arts program; curriculum vitae; writing sample, three letters of recommendation, and letter of intent. An applicant's admissibility into the doctoral program will not be reviewed until all these materials have been received.

All application and admissions materials must be submitted to the Office of Graduate Admissions by January 15 to begin in the Fall semester.

The *Plan of Work* must be submitted before forty credits have been completed and before the qualifying examination is scheduled.

The Doctor of Philosophy requires ninety credits beyond the baccalaureate degree, thirty of which must be earned as dissertation credit.

A minimum of thirty credits of graduate work must be at the 7000-level or above (excluding dissertation credits). Students must petition

the Graduate Committee for course equivalents, substitutes, or any other exceptions to the Ph.D. requirements. The student is expected to command in detail theories, concepts, methodology, and research techniques in common usage in the student's subfield of concentration (cultural anthropology, linguistics, archaeology, or biological anthropology).

In the Qualifying Examinations, the student must demonstrate, by written examination, competence in depth in at least three areas of specialization relating to the dissertation topic, including mastery of a broad range of theoretical materials and an ability to think and write analytically. After passing the Qualifying Examinations and prior to beginning fieldwork, the student must submit the following documents:

1. an oral defense of the dissertation prospectus and an approved doctoral dissertation outline and record of approval form;
2. a prospectus; and
3. a Human Investigations Committee Behavioral Protocol Summary Form, when applicable.

Once the student has attained candidate status, he/she is required to register for doctoral dissertation credits. Students must register for 9000-level credits (ANT 9991, ANT 9992, ANT 9993, and ANT 9994) through the Graduate Office and must fulfill 7.5 credits in these courses each semester for four consecutive semesters (excluding spring-summer). All course work completed to satisfy the following degree requirements must be done in accordance with the regulations of the Graduate School (p. 12) and the College of Liberal Arts and Sciences (p. 201).

Additionally, the student is expected to:

1. complete substantial field research, which will ordinarily be of sufficient duration and scope to provide materials for the student's dissertation (in the case of biological anthropology and some other specializations, the dissertation may be based on laboratory research); and
2. submit an acceptable dissertation and present a final lecture.

Coursework: The following courses, or their equivalents, must be completed:

Code	Title	Credits
Core		
ANT 5140	Biology and Culture	3
ANT 5210	Anthropological Methods	4
ANT 5270	Concepts and Techniques in Archaeology	3
ANT 5320	Language and Societies	3
ANT 7005	Proseminar in Anthropology I	3
ANT 7010	Proseminar in Anthropology II	3
ANT 7020	Anthropological Theory II	3
ANT 7030	Debates in Anthropology	3
ANT 7780	Conceptualizing the Dissertation	3
ANT 7777	Teaching Anthropology	1
Methods Options		
Select one of the following:		6
ANT 7200 & ANT 7210	Qualitative Research I and Qualitative Research II	
OR		
ANT 5280 & ANT 6570	Field Work in Archaeology of the Americas and Archaeological Laboratory Analysis	
7000-level coursework within Anthropology		9
Graduate work in a discipline other than Anthropology		3
Graduate level electives		13

ANT 9991	Doctoral Candidate Status I: Dissertation Research and Direction	7.5
ANT 9992	Doctoral Candidate Status II: Dissertation Research and Direction	7.5
ANT 9993	Doctoral Candidate Status III: Dissertation Research and Direction	7.5
ANT 9994	Doctoral Candidate Status IV: Dissertation Research and Direction	7.5
Total Credits		90

Foreign Language Requirement: Doctoral students must demonstrate a proficiency in an approved scholarly language. In conjunction with your faculty advisor you will identify the language other than English most relevant to your scholarly work. This should be a language that has a substantial scholarly literature, such as a relevant academic journal. Your advisor, or another faculty member in the department, will select a scholarly passage in that language, roughly 300 words in length, on a subject related to your dissertation research. You have 90 minutes to complete the examination with the aid of a printed bilingual dictionary, but no electronic aids.

Additional Information: A more detailed discussion of the doctoral program is available from the department (<http://clas.wayne.edu/anthropology>). Students should also consult the Graduate School's general requirements for doctoral degrees (p.).

Anthropology and Urban Sustainability (Ph.D. Dual-Title)

Students admitted to the Ph.D. program in Anthropology can apply to earn a Ph.D. in Anthropology with a dual-title in Urban Sustainability. This dual-title degree is designed to prepare professionals to solve challenging urban problems that require working across disciplines. Students enrolled in this dual title program take courses in topics and develop specific skills relating to urban sustainability. Students in Anthropology will also conduct an internship or science exchange in Urban Sustainability, help develop and participate in colloquia and seminars, perform community service, and write funding proposals. The dual-title coursework follows competencies outlined by the Transformative Research in Urban Sustainability Training program.

Admission Requirements

Applicants must meet the admissions standards of the Graduate School (<http://bulletins.wayne.edu/graduate/general-information/admission>) and the Department of Anthropology and be first offered admission to the Anthropology doctoral program.

Students are required to take six core courses plus 12 elective credits of Urban Sustainability coursework. A minimum of 7 of the 12 elective credits must be from coursework outside of the student's home department.

Code	Title	Credits
Core Courses		
ANT 5060	Urban Anthropology	
BIO 7310	Sustainability of Urban Environmental Systems	
CE 5410	Energy, Emissions, Environment (E3) Design	
COM 7170	Health and Risk Communication	
GS 0900	Essential Research Practices: Responsible Conduct of Research	
UP 6470	Environmental Planning	
Elective Courses		

ANT 5565	Urban Archaeology
ANT 6570	Archaeological Laboratory Analysis
BIO 5040	Biometry
BIO 5180	Field Investigations in Biological Sciences
BIO 6420	Ecotoxicology and Risk Assessment
BIO 7011/ PHC 7410	Principles of Toxicology
BIO 7540	Landscape Ecology
CE 6270	Sustainability Assessment and Management
CE/PSC 6910	Pharmaceutical Waste: Environmental Impact and Management
CE 7280	Applied Environmental Microbiology
CE 7995	Special Topics in Civil Engineering II ¹
COM 7160	Crisis Communication
ECO 6200	Advanced Regulation and Regulated Industries
ECO 6520	Advanced State and Local Public Finance
ECO 6800	Advanced Urban and Regional Economics
FPH 7420	Principles of Environmental Health
GEL 5000	Geological Site Assessment
GEL 5510	Environmental Fate and Transport of Pollutants
GEL 5610	Special Topics in Geology
LEX 7231	Environmental Law
UP 5110	Urban Planning Process
UP 5430	Cities and Food
UP 6120	Planning Studies and Methods
UP 6260	Land Use Policy and Planning
UP 6700	Geographic Information Systems

¹ In order to satisfy the elective requirement, the topic area must be relevant to the program. Students should consult with their advisor for details.

Social Work and Anthropology SWAN (Ph.D.)

The Social Work/Anthropology (SWAN) program draws on the strengths of both fields in theory, social history, research, policy and practice. The SWAN program combines the approaches of each discipline to make use of the program's urban location to foster scholarship focusing on global issues of the 21st century, such as the re-invention of post-industrial cities. Students receive a thorough grounding in the theoretical and applied aspects of both Social Work and Anthropology and apply this knowledge to pursue scholarship in such areas of interest as urbanism, globalization, and social/cultural organization. SWAN students follow a curriculum that draws from existing courses in each discipline, including a core course that focuses on the integration of the two fields. Content combining the perspectives of both disciplines is included in the qualifying exam and dissertation research requirements for the degree.

This program prepares scholars for work in several different occupations, including faculty positions in social work and anthropology as well as work in governmental, non-profit, and international settings.

Academic Scholarship: All course work completed to satisfy the following degree requirements must be done in accordance with the academic regulations (p. 12) of the Graduate School. All students are required to maintain a 'B' average. A grade of 'B-minus' or below in two courses will be sufficient reason to dismiss a student from the program. For the purposes of evaluating this condition, a grade of 'WF' is considered a failing grade.

Admission Requirements

Admission to this program is contingent upon admission to the Graduate School (p. 19). Only a limited number of applicants who have demonstrated superior ability and potential will be accepted in this program.

Prospective students should apply for admission to either the Social Work or Anthropology Ph.D. programs and specify, using a pull-down menu, their request for admission to the SWAN program. They must meet the admissions standards of both the Graduate School and the SWAN program. Students who do not possess an MSW should apply separately to the MSW program and notify the SW doctoral director of their application to both the MSW and SWAN programs. All application and admission materials must be submitted to the Office of Graduate Admissions by January 10 to begin in the following fall semester.

The Plan of Work must be submitted before forty credits have been completed and before the qualifying examination is scheduled.

The Doctor of Philosophy requires ninety credits beyond the baccalaureate degree, thirty of which must be earned as dissertation credits.

A minimum of thirty credits of graduate work must be at the 7000-level or above (excluding dissertation credits). Students must petition the SWAN Steering Committee for course equivalents, substitutes, or any other exceptions to the SWAN requirements.

Once the student has attained candidate status, he/she is required to register for doctoral dissertation credits. Students must register for 9000-level credits (SW 9991, SW 9992, ANT 9993, and ANT 9994) through the Graduate Office and must fulfill 7.5 credits in these courses each semester for four consecutive semesters (excluding spring-summer). All course work completed to satisfy the following degree requirements must be done in accordance with the regulations of the Graduate School (p. 12), the College of Liberal Arts and Sciences (p. 201), and the School of Social Work (p. 314).

Coursework:

Student who have not attained the MSW degree are required to obtain this degree prior to graduating with a SWAN PhD. See the MSW Graduate Bulletin entry for details. Students are required to meet with their MSW adviser to develop an MSW plan of work that meets MSW program requirements. With the approval of the SWAN committee and the MSW coordinator, a limited number of SWAN courses may be counted towards MSW requirements.

The following courses, or their equivalents, must be completed by ALL students:

Code	Title	Credits
Social Work - Research/Theory		
SW 9100	Social Statistics and Data Analysis	3
SW 9210	Theories for Practice and Research with Individuals	3
SW 9220	Theories for Practice and Research with Groups and Families	3
SW 9230	Theories for Practice and Research with Communities and Organizations	3
SW 9300	Applied Regression Analysis and Generalized Linear Models	3
SW 9410	Quantitative Research Methods in Social Work	3
Anthropology - Research/Theory		
ANT 5060	Urban Anthropology	3

ANT 5140	Biology and Culture	3
ANT 5320	Language and Societies	3
ANT 5700	Applied Anthropology	3
ANT 7010	Proseminar in Anthropology II	3
ANT 7020	Anthropological Theory II	3
ANT 7200	Qualitative Research I	3
ANT 7210	Qualitative Research II	3
ANT 7780	Conceptualizing the Dissertation	3
Two ANT electives in the student's research area		
SWAN - Theory		
SW 9697	Integrative Seminar in Social Work and Anthropology	3
Total Credits		48

Qualifying Exams: The SWAN steering committee will design and administer the SWAN qualifying examinations so that students can demonstrate the breadth, depth and mastery of their theoretical and empirical knowledge related to social work and anthropology theory, research methods and data analysis approaches as well as their substantive domain of knowledge. Students will demonstrate this knowledge through a written examination consisting of four sections:

1. statistics,
2. culture area,
3. research methods, and
4. a substantive paper demonstrating students' application of social science theory and SWAN knowledge to their intended research domain.

The statistics exam will be an in-school, open book exam developed by faculty teaching the required statistics courses. For the take home theory, topic area and substantive paper components, students will, in consultation with their academic advisers, select a three-person examination committee consisting of social work and anthropology faculty. These examination committee members will meet with students to develop reading lists and questions that students will then address in written take-home exams.

Students who fail one or more sections of the qualifying examination will be expected to retake only those sections that they failed. Students who fail one or more sections of the examination for a second time will be dismissed from the program.

Foreign Language Requirement: Students doing SWAN research fieldwork in non-English speaking settings will be expected to have 3 semesters of a foreign language or demonstrate fluency in their field language. These students need to take classes to complete the Anthropology Foreign Language requirement (3 semesters of the same foreign language at the undergraduate level; language credits do not count towards the 90 credits needed for a Ph.D.).

1. a grade of 'C' or better in one and one-half years of work in the language offered to meet the requirement (three semesters or five quarters of coursework at any accredited college or university);
2. satisfactory performance on a standardized (Educational Testing Services) examination; or
3. certification of competence to carry out research in the relevant language by a member of the graduate faculty of Wayne State or an equivalent university. The nature of the tools of research and requirements for satisfactory proficiency will be determined by each student's doctoral committee. Additionally mandated tools of research may include additional statistics, mathematics, computer science and/or a field language.

Additional Information: A more detailed discussion of this doctoral program is available on the SWAN (<http://clas.wayne.edu/swan>) website. Students should also consult the Graduate School's general requirements for doctoral degrees (p.).

Biological Sciences

Office: 1360 Biological Sciences; 313-577-2873

Chairperson: David L. Njus

Associate Chairperson: Edward M. Golenberg

- Biological Sciences (M.A.) (p. 207)
- Biological Sciences (M.S.) (p. 207)
- Molecular Biotechnology (M.S.) (p. 208)
- Biological Sciences (Ph.D.) (p. 208)
- Biological Sciences and Urban Sustainability (Ph.D. Dual-Title) (p. 209)

Biological Sciences (M.A.)

Admission Requirements

Admission to this program is contingent upon admission to the Graduate School (p. 19). In addition, applicants are expected to have attained a level of scholarship in the baccalaureate program equal to a grade point average of 3.0 or better, including adequate preparation in biological sciences and supporting courses in chemistry, physics and mathematics. Normally, the entering student will be expected to have fulfilled the equivalent of the requirements for the Bachelor of Arts (or Bachelor of Science) degree at Wayne State University and to satisfy any deficiencies by course work before becoming a candidate for the advanced degree.

The Department offers the Master of Arts degree under the *Plan C* option requiring thirty-two credits of coursework. Course requirements include the following:

Plan C: *Thirty-two credits in course work are required, with a minimum of seven graduate level courses completed in the Department of Biological Sciences.* Cognate credits may be taken in other College of Liberal Arts and Sciences departments, the College of Education, or the School of Medicine with approval from the Departmental Graduate Officer. All students must meet with the Departmental Graduate Officer, Dr. Edward Golenberg, once each semester for approval of course selections.

Students must elect courses according to Departmental requirements (<http://clas.wayne.edu/Biology/UndergraduatePrograms>).

Candidacy: Applicants become degree candidates after completing twelve credit hours of course work and filing a Plan of Work which must be approved and signed by the Departmental Graduate Officer.

Academic Scholarship: All course work must be completed in accordance with the regulations of the Graduate School (p. 12) and the College of Liberal Arts and Sciences (p. 201).

Biological Sciences (M.S.)

Admission Requirements

Admission to this program is contingent upon admission to the Graduate School (p. 19). In addition, applicants are expected to have attained a level of scholarship in the baccalaureate program equal to a grade point average of 3.0 or better, including adequate preparation in biological sciences and supporting courses in chemistry, physics and mathematics. Normally, the entering student will be expected to have fulfilled the

equivalent of the requirements for the Bachelor of Science degree at Wayne State University and to satisfy any deficiencies by course work before becoming a candidate for the advanced degree. The general portion of the Graduate Record Examination (GRE) is required for admission to the Master of Science program. Admission is granted for the Fall Semester only.

The Department offers the Master of Science degree under the *Plan A* option.

Requirements include the following:

Plan A: *Twenty-three credits in course work, plus a thesis (eight credits) based on completion of a research program.*

Under *Plan A*, the eight credits of thesis work must be in original laboratory or field research under the direction of the student's major advisor. At least twenty-four of the total credits must be from the Department of Biological Sciences. A final oral examination is required, based on the candidate's course work and research.

Students must complete one semester of two laboratory rotations before choosing an advisor. Students must elect courses according to departmental requirements, including a core curriculum and electives determined by the student's graduate advisor with review and approval by the Graduate Committee Chairperson and the Department Graduate Officer, Dr. Edward Golenberg.

Candidacy: Applicants become degree candidates after completing twelve credit hours of course work and filing a Plan of Work which must be approved and signed by the Departmental Graduate Officer.

Academic Scholarship: All course work must be completed in accordance with the regulations of the Graduate School (p. 12) and the College of Liberal Arts and Sciences (p. 201).

Molecular Biotechnology (M.S.)

The Molecular Biotechnology Program is a career-oriented program specifically designed to educate and train technically-oriented people in both the theory and practice of modern biotechnology. The program's main emphasis is on the application of these skills through integration of classroom, laboratory, and research experiences.

Admission Requirements

Admission to this program is contingent upon admission to the Graduate School (p. 19). In addition, applicants are expected to have attained a level of scholarship in the baccalaureate program equal to a grade point average of 3.0 or better, including adequate preparation in biological sciences and supporting courses in chemistry, physics and mathematics. The general portion of the Graduate Record Examination (GRE) is required. An introductory genetics course and a microbiology course passed with grades of 'B' or better are required, and completion of an introductory biochemistry course is strongly recommended. Deficiencies in course work must be completed before beginning the program. Students may enter in the Fall semester only.

This program is offered as a specially approved Plan C master's program only, requiring thirty-nine credits. Course work will be completed in accordance with the schedule set by the Program's Director, Dr. Athar Ansari. Students must consult with Dr. Ansari, each semester prior to registration. All course work must be completed in accordance with the regulations of the Graduate School (p. 12) and the College of Liberal Arts and Sciences (p. 201).

Candidacy: Applicants become degree candidates after completing twelve credit hours of course work and filing a Plan of Work which must be approved and signed by the Program's Director, Dr. Ansari.

Biological Sciences (Ph.D.)

Admission Requirements

In addition to the requirements of the Graduate School (p. 19) the applicant should have completed a bachelor's or master's degree with a major in a biological or other science. Applicants who have completed degrees in other disciplines will be considered on an individual basis.

Applicants must submit scores for the general portion of the Graduate Record Exam (GRE). The approval of the Department of Biological Sciences Graduate Admissions Committee is required for admission of applicants. Three letters of reference must be submitted, along with a statement of the Candidate's goals and career objectives. Admission is granted for the Fall Semester only.

The Doctor of Philosophy degree requires ninety credits beyond the baccalaureate degree. Sixty credits must include the following:

Code	Title	Credits
Select at least twelve credits in Biological Sciences from a core curriculum		
Select no more than thirty-two credits in BIO 7996, Research Problems		
BIO 8995	Graduate Seminar in Biology (minimum 4 credits)	2
BIO 9996	Lab Rotation (minimum 2 credits)	2

Select thirty credits in course work at the 7000-level or higher, exclusive of doctoral dissertation research. Six of those credits must be in courses exclusive of BIO 7996, BIO 8995, and BIO 8999.

The remaining thirty credits must be earned as dissertation credit, taken in consecutive academic year semesters.

Code	Title	Credits
BIO 9991	Doctoral Candidate Status I: Dissertation Research and Direction	7.5
BIO 9992	Doctoral Candidate Status II: Dissertation Research and Direction	7.5
BIO 9993	Doctoral Candidate Status III: Dissertation Research and Direction	7.5
BIO 9994	Doctoral Candidate Status IV: Dissertation Research and Direction	7.5

Academic Scholarship: All course work must be completed in accordance with the regulations of the Graduate School (p. 12) and the College of Liberal Arts and Sciences (p. 201).

Qualifying examinations are administered in two parts. The first part is a written test which is taken during one of three testing periods, July at the end of the first two semesters, November in the second year, or April in the second year. A list of examination topics will be generated by the student's dissertation advisory committee at least two months before the scheduled exam.

Students who pass the written qualifying examination take the oral examination within one year of the written test. Students are required to complete a written prospectus of their dissertation research, in the form of a grant proposal. The oral examination will include, but not be limited to, a defense of the prospectus. The examiners will be members of the student's dissertation advisory committee. The oral examination is graded on a pass/fail basis.

Candidacy status is reached after the Plan of Work has been approved, the written and oral portions of the qualifying examination have been passed, approximately fifty credits have been completed, and the student's dissertation advisory committee has been named.

Teaching/Research Requirement: Every doctoral student is required to teach at least two semesters or have equivalent teaching experience.

Continuance in the doctoral program depends upon satisfactory progress as determined by the student's Dissertation Committee with the Departmental Chairperson as an *ex officio* member.

Biological Sciences and Urban Sustainability (Ph.D. Dual-Title)

Students admitted to the Ph.D. program in Biology can apply to earn a Ph.D. in Biology with a dual-title in Urban Sustainability. This dual title degree is designed to prepare professionals to solve challenging urban problems that require working across disciplines. Students enrolled in this dual-title program take courses in topics and develop specific skills relating to urban sustainability. Students in Biology will also conduct an internship or science exchange in Urban Sustainability, help develop and participate in colloquia and seminars, perform community service, and write funding proposals. The dual-title coursework follows competencies outlined by the Transformative Research in Urban Sustainability Training program.

Admission Requirements

Applicants must meet the admissions standards of the Graduate School (p. 19) and the Department of Biological Sciences and be first offered admission to the Biology doctoral program.

Students are required to take six core courses plus 12 elective credits of Urban Sustainability coursework. A minimum of 7 of the 12 elective credits must be from coursework outside of the student's home department.

Code	Title	Credits
Core Courses		
ANT 5060	Urban Anthropology	
BIO 7310	Sustainability of Urban Environmental Systems

UP 5430	Cities and Food
UP 6120	Planning Studies and Methods
UP 6260	Land Use Policy and Planning
UP 6700	Geographic Information Systems

¹ In order to satisfy the elective requirement, the topic area must be relevant to the program. Students should consult with their advisor for details.

Chemistry

Office: 169 Chemistry Building; 313-577-7784

Chairperson: Matthew J. Allen; e-mail: mallen@chem.wayne.edu

Associate Chairperson: Jeremy Kodanko

Academic Services Officers: Erin Bachert, Melissa Rochon

<http://www.chem.wayne.edu>

General Requirements for Graduate Study in Chemistry

Every student entering the graduate program in chemistry will be required to take a series of entrance (proficiency) examinations covering the major disciplines of chemistry. These examinations, which cover standard undergraduate-level material, will be administered on announced dates in August, January, and May (prior to the start of each term). The examination in each area must be taken every time it is offered until a satisfactory level of proficiency is demonstrated in three of the five major fields.

Demonstration of proficiency in each area may be achieved:

1. by receiving a grade of 'pass' on the proficiency examination; or
2. by completing a 7000-level course in the area with a grade of 'B' or higher.

Full-time graduate students must establish proficiency in three areas within twelve months of commencing graduate study. Part-time graduate students must meet this requirement by the time they have completed twelve hours of graduate credit.

A final oral examination is required of all graduate degree candidates.

- Chemistry (M.A.) (p. 209)
- Chemistry (M.S.) (p. 210)
- Chemistry (Ph.D.) (p. 210)

Chemistry (M.A. Program)

This degree is designed for those who wish advanced training in chemistry but intend to pursue careers in cognate fields, such as education or business.

Admission Requirements

Admission to this program is contingent upon admission to the Graduate School (p. 19).

Admission may be granted to applicants who have completed one year of college physics, mathematics through calculus, and the equivalent of undergraduate semester credits in chemistry as follows: general chemistry (eight credits), organic chemistry (eight credits), physical chemistry (six credits), quantitative analysis (four credits), and advanced chemistry (three credits). Applicants specializing in biochemistry may substitute advanced biology for advanced chemistry.

A minimum undergraduate grade point average of 2.75 in chemistry and cognate science is required. Students who do not meet the requirements may petition the departmental committee on graduate study for qualified admission. Admissions under this program may include special requirements specified on the basis of the student's previous experience and training.

This degree is offered only as a Plan C master's program. (Chemistry courses below the 6000 level may not be applied toward this degree.) A total of thirty-two credits in course work which must include:

Code	Title	Credits
CHM 8850	Frontiers in Chemistry	1
Select two or three credits in graduate seminar.		2-3
CHM 8800	Seminar in Analytical Chemistry	
CHM 8810	Seminar in Organic Chemistry	
CHM 8820	Seminar in Inorganic Chemistry	
CHM 8830	Seminar in Physical Chemistry	
CHM 8840	Seminar in Biochemistry	
CHM 6740	Laboratory Safety	1
Select at least eighteen credits in chemistry courses open to graduate chemistry students (excluding research, seminar, CHM 6740 and CHM 8850) of which at least nine credits must be at the 7000 level ¹		18

¹ Courses must be elected in at least four of the following fields: analytical, biological, inorganic, organic and physical chemistry.

Academic Scholarship: All course work must be completed in accordance with the regulations of the Graduate School (p. 12) and the College of Liberal Arts and Sciences (p. 201).

Candidacy must be established by the time twelve credits have been earned. The applicant must file a copy of the Plan of Work with the Graduate Officer.

Chemistry (M.S. Program)

This is a professional degree for those planning to enter the chemical profession.

Admission Requirements

Admission to this program is contingent upon admission to the Graduate School (p. 19).

Admission may be granted to applicants who have completed one year of college physics, mathematics through calculus, and the equivalent of undergraduate semester credits in chemistry as follows: general chemistry (eight credits), organic chemistry (eight credits), physical chemistry (six credits), quantitative analysis (four credits), and advanced

chemistry (three credits). Applicants specializing in biochemistry may substitute advanced biology for advanced chemistry.

A minimum undergraduate grade point average of 2.75 in chemistry and cognate science is required. Students who do not meet the requirements may petition the departmental committee on graduate study for qualified admission. Admissions under this program may include special requirements specified on the basis of the student's previous experience and training.

This degree is offered only as a Plan A (thesis) master's program. (Chemistry courses below the 6000 level may not be applied toward this degree.)

Code	Title	Credits
CHM 8850	Frontiers in Chemistry	1
Select two to three credits in seminar:		2-3
CHM 8800	Seminar in Analytical Chemistry	
CHM 8810	Seminar in Organic Chemistry	
CHM 8820	Seminar in Inorganic Chemistry	
CHM 8830	Seminar in Physical Chemistry	
CHM 8840	Seminar in Biochemistry	
CHM 6740	Laboratory Safety	1
Select at least twelve credits in chemistry courses open to graduate chemistry students (excluding research, seminar, CHM 6740, and CHM 8850) of which at least nine credits must be at the 7000 level		12
Select six credits in chemistry and/or cognate courses		6
CHM 8999	Master's Thesis Research and Direction ¹	8
Submission of a satisfactory research thesis		
Total Credits		30-31

Academic Scholarship: All course work must be completed in accordance with the regulations of the Graduate School (p. 12) and the College of Liberal Arts and Sciences (p. 201).

Candidacy must be established by the time twelve credits have been earned. The applicant must file a copy of the Plan of Work with the Graduate Officer.

Chemistry (Ph.D. Program)

Admission Requirements

Admission to this program is contingent upon admission to the Graduate School (p. 19). All applications for admission to the doctoral program in chemistry and all adjustments in the program subsequent to admission must have the approval of the Graduate Officer of the Department of Chemistry.

A minimum undergraduate grade point average of 3.0 in chemistry and cognate science is required except by special permission of the Departmental Committee on Graduate Study. An applicant having a master's degree from another institution must show a grade point average of at least 3.0 ('B').

Transfer from the Master's Program to the Ph.D. Program: In order to transfer to the Ph.D. program, a student must accumulate a minimum of nine credits in chemistry course work numbered 6040-8690 with a grade point average of at least 3.25. An applicant having a lower average must earn the master's degree with a superior academic record before acceptance as a doctoral applicant.

Questions regarding requirements should be addressed to the Academic Services Officer. The Doctor of Philosophy degree requires ninety credits beyond the baccalaureate degree, thirty of which must be earned

as dissertation credit, and the remainder of which must include the following:

1. A minimum of six courses (eighteen credits) in graduate course work of which at least nine credits must be in chemistry courses at the 7000 level or above; not less than six credits shall be from outside the major division of specialization. A student who does not pass any proficiency examinations upon entrance to the program will be required to pass an additional graduate course, for a total of seven courses (twenty-one credits). Additional courses beyond the required six or seven, may be specified by the student's Ph.D. advisor or committee to address deficiencies or to develop expertise in one or more specific research areas.

2. *Credit by Examination:* Well-prepared students may receive up to nine credits by passing the final examinations in 6000- or 7000-level courses. These may be in either the major or minor fields.

3. Four credits of graduate seminar:

Code	Title	Credits
CHM 8800	Seminar in Analytical Chemistry	1
CHM 8810	Seminar in Organic Chemistry	1
CHM 8820	Seminar in Inorganic Chemistry	1
CHM 8830	Seminar in Physical Chemistry	1
CHM 8840	Seminar in Biochemistry	1

4. One credit in CHM 8850 Frontiers in Chemistry.
5. One credit in CHM 6740 Laboratory Safety.
6. Zero credit in GS 0900 Essential Research Practices: Responsible Conduct of Research.
7. Two credits in CHM 7770 Proposals in Chemical Research.
8. Thirty credits in Ph.D. research involving independent research under the direction of a faculty member in the Department. The thirty credit dissertation registration requirement is fulfilled by registering for the courses:

Code	Title	Credits
CHM 9991	Doctoral Candidate Status I: Dissertation Research and Direction	7.5
CHM 9992	Doctoral Candidate Status II: Dissertation Research and Direction	7.5
CHM 9993	Doctoral Candidate Status III: Dissertation Research and Direction	7.5
CHM 9994	Doctoral Candidate Status IV: Dissertation Research and Direction	7.5

(Doctoral Dissertation Research and Direction I, II, III, and IV, respectively), in consecutive academic year semesters.

9. Submission of a satisfactory research dissertation.

Academic Scholarship: All course work must be completed in accordance with the regulations of the Graduate School (p. 12) and the College of Liberal Arts and Sciences (p. 201).

Candidacy: In order to become a candidate for the Ph.D. degree, an applicant must successfully complete both a written and oral qualifying examination. The written examination consists of an independent research proposal. The oral examination includes the major field and covers minor and cognate fields as well. Any additional requirements set by the Graduate School or the department must be completed. Copies of such requirements may be obtained from the Chairperson of the Departmental Committee on Graduate Study.

Classical and Modern Languages, Literatures, and Cultures

Office: 485 Manoogian Hall; 313-577-3002

Chairperson: Vanessa DeGifis

Academic Services Officer: Terrie Pickering
<http://www.clas.wayne.edu/languages>

- Classics (M.A.) (p. 211)
- German (M.A.) (p. 212)
- Language Learning (M.A.) (p. 212)
- Near Eastern Languages (M.A.) (p. 213)
- Romance Languages (M.A.) (p. 213)
- Modern Languages (Ph.D.) (p. 213)

Classics (M.A.)

Admission Requirements

Admission to this program is contingent upon admission to the Graduate School (p. 19). Additionally, the applicant must present an undergraduate major in Latin, Greek, or Classics, or receive the consent of the graduate advisor for graduate work. Evidence of having passed the Graduate Record Exam is required.

The master's degree in Classics is offered under the following options:

Plan A: Twenty-four credits in course work, plus an eight-credit thesis.

Plan B: Twenty-eight credits in course work, plus a four-credit essay.

Plan C: Thirty-two credits in course work.

Candidacy must be established by the time twelve credits have been earned.

Academic Scholarship: All course work must be completed in accordance with the regulations of the Graduate School (<http://bulletins.wayne.edu/graduate/general-information/academic-regulations>) and the College of Liberal Arts and Sciences (<http://bulletins.wayne.edu/graduate/college-liberal-arts-sciences/academic-regulations>).

Concentrations available under *Plan A* or *Plan B* are: Latin, or ancient Greek and Latin. Concentrations available under *Plan C* are: Latin, Ancient Greek and Latin, or Ancient Studies.

Latin (M.A. Concentration)

Under *Plan A*, course work must include at least twenty-four credits in Latin, exclusive of LAT 8999, and at least eight of these twenty-four credits must be in courses numbered 7000 or higher. LAT 5000 does not satisfy these requirements; a final written and/or oral examination is required.

Under *Plan B*, course work must include at least twenty-eight credits in Latin, exclusive of LAT 7999, and at least eight of these twenty-eight credits must be in courses numbered 7000 or higher. A maximum of four credits in cognate or related *fields* may be applied under this Plan; LAT 5000 does not satisfy these requirements; a final written and/or oral examination is required.

Under *Plan C*, course work must include at least thirty-two credits in Latin, and at least eight of these thirty-two credits must be in courses numbered 7000 or higher. A maximum of four credits in cognate or related fields may be applied under this Plan; LAT 5000 does not satisfy these requirements; a final written and/or oral examination is required.

Greek (Ancient) and Latin (M.A. Concentration)

Under *Plan A*, a minimum of twelve credits in course work is required in each language (Ancient Greek and Latin) exclusive of GKA 8999 or LAT 8999. A minimum of two courses (exclusive of thesis courses) in one language must be in courses numbered 7000 or higher. GKA 5000 or LAT 5000 does not satisfy these requirements; a final written and/or oral examination is required.

Under *Plan B*, a minimum of twelve credits in course work is required in each language (Ancient Greek and Latin) exclusive of GKA 7999 or LAT 7999. A minimum of two courses (exclusive of the essay course) in one language must be in courses numbered 7000 or higher. The remaining four credits may be in Latin or Ancient Greek; alternatively, a maximum of four credits in cognate or related fields may be applied. GKA 5000 or LAT 5000 does not satisfy these requirements; a final written and/or oral examination is required.

Under *Plan C*, a minimum of sixteen credits in course work must be taken in one language, and a minimum of twelve credits in the other. To complete the thirty-two credit requirement, four credits in either language may be added; alternatively, a maximum of four credits in cognate or related fields may be applied. GKA 5000 or LAT 5000 does not satisfy these requirements; a final written and/or oral examination is required.

Ancient Studies (M.A. Concentration)

This concentration is available only under *Plan C*. A minimum of twenty credits is required in either Ancient Greek or Latin, exclusive of GKA 5000 or LAT 5000, plus three credits of CLA 5300, three additional credits in Classics (CLA) courses at the 5000 level or above and at least six additional credits in courses selected from the following list. At least two courses elected in this plan must be in courses numbered 7000 or above.

Code	Title	Credits

German (M.A.)

Admission Requirements

Admission to this program is contingent upon admission to the Graduate School (p. 19).

The master's degree in German is offered by this department under the following options:

Plan A: Twenty-four credits in course work, plus an eight credit thesis and oral examination

Plan B: Twenty-nine credits in course work, plus a three credit essay and oral examination

Plan C: A minimum of thirty-two credits in course work depending on the Plan of Work. Course work is followed by three written examinations and an oral examination covering graduate studies.

Students planning a teaching career on the college level or intending to continue to the doctoral degree should elect either Plan A or Plan B. Plan C, Language and Culture, is intended primarily for those interested in teaching on the elementary and secondary school levels, or for those with a more general interest in German language and culture.

All students studying for the M.A. in German who have graduate teaching assistantships are required to complete LGL 7850.

Under all Plans, the Graduate School requires a minimum of six credits at the 7000 level or above.

Academic Scholarship: All course work must be completed in accordance with the regulations of the Graduate School (p. 12) and the College of Liberal Arts and Sciences (p. 201).

Master's Option in Germany: Students accepted into the German graduate program have the opportunity to earn graduate credit towards a Master of Arts in German while spending two semesters studying at the University of Munich. The opportunity is made possible by the cooperation of the Junior Year in Munich Program, which facilitates the student's matriculation, registration, and housing in Munich.

All students must first be admitted to the German graduate program before they will be considered eligible to participate in this option. Students already enrolled are eligible to participate upon successful completion of sixteen graduate credits within the department with a grade of 'B' or better, approval of the M.A. Plan of Work, and/or the approval of the graduate advisor. Students who wish to spend their first year of graduate study in Munich must complete their studies on the WSU campus in order to receive the M.A. degree. While in Germany the student will complete a minimum of eight credits per semester. WSU credit will be granted only for those classes approved in advance by the graduate advisor and for which the student has earned *benotete Scheine* (graded certificate).

For further details and requirements, see the German M.A. advisor.

Language Learning (M.A.)

This program is targeted at in-service elementary, secondary, and college-level foreign language teachers interested in ongoing professional development. Students should be advised that it does not provide provisional state licensure (teacher certification), and does not include a practice teaching component. The program can be completed with concentrations in: Arabic, Classics, French, German, Italian, and Spanish.

Admission Requirements

An admissions moratorium is in effect for this program.

Admission to this program is contingent upon:

1. admission to the Graduate School (p. 19), and
2. approval of the Master of Arts in Language Learning (MALL) Advisory Committee (based on the applicant's academic record, target language proficiency, statement of purpose, and three letters of recommendation).

The Master of Arts in Language Learning degree is offered under the Plan B (essay) option only. It requires a minimum of thirty-three credits in course work, plus a three-credit essay. Course work is divided into three core areas.

Code	Title	Credits
First Core		
Language, linguistics, literature or culture courses		12
Second Core		
LGL 5750	Theories of Second Language Acquisition	3
LGL 5850/7850	Foreign Language Instruction	3
LGL 5860/7860	Assessment in the Foreign Language Classroom	3
Select two of the following:		6
LGL 5810/7810	Teaching Foreign Languages: Receptive Skills	
LGL 5820/7820	Teaching Foreign Languages: Productive Skills	
LGL 5830/7830	Technology in the Foreign Language Classroom	
Third Core		
Cognate area (chosen in consultation with advisor)		6
LGL 7999	Master's Essay Direction	3
Total Credits		36

The Graduate School requires that a minimum of six credits be completed at the 7000-level or above. The three-credit essay will be written in conjunction with materials learned in the three cores under the direction of a MALL faculty member.

Academic Scholarship: Grades of 'B-minus' or lower in any course in the language and culture core or in the methodology core will represent unacceptable work. Students receiving such grades must repeat the course in order to have it count toward the degree. Students must maintain a 3.0 g.p.a. overall. All course work must be completed in accordance with the regulations of the Graduate School (p. 12) and the College of Liberal Arts and Sciences (p. 201).

Candidacy must be established by the time twelve credits have been earned.

Near Eastern Languages (M.A.)

Admission Requirements

Admission to this program is contingent upon admission to the Graduate School (p. 19). Additionally, applicants must supply the program with a letter of intent, a 5-7 page sample of academic writing in English, and three confidential letters of recommendation. GRE scores are encouraged, but not required. International applicants must satisfy English proficiency requirements as established by the Graduate School, which may require submission of TOEFL scores.

Admission Requirements consist of: Minimum undergraduate g.p.a. of 2.75 ('C+'); and a minimum of two years of prior study in Arabic language, with a minimum g.p.a. in Arabic language courses of 3.5 ('B'+). Prior coursework in Islamic and/or Near Eastern Studies is preferred. Candidates for the master's degree with concentration in either Hebrew or Arabic must have an adequate knowledge of at least one Semitic language and some knowledge of the culture of the Near East.

Romance Languages (M.A.)

Admission Requirements

Admission to this program is contingent upon admission to the Graduate School (p. 19). In addition, the Graduate Record Examination is strongly recommended, and three letters of recommendation are required of all applicants to the M.A. and Ph.D. programs.

Modern Languages (Ph.D.)

The Doctor of Philosophy with a major in Modern Languages allows students to combine a major and a minor that best meet their interests and career goals. Students must consult with the Ph.D. advisor to consolidate a coherent plan of work that emphasizes disciplinary knowledge, critical thinking, research skills, and interdisciplinary work. Several options are available:

Major Concentration: Doctoral students may concentrate their studies in French, German, or Spanish. Between forty-five to forty-eight graduate credits must be completed in one of these major areas.

Minor Concentration: Doctoral students broaden their course of study through the choice of a minor concentration, which requires nine to twelve credits. Minors are available in literary and cultural criticism, in a second language (French, German, Italian, or Spanish), or in another area which will complement work undertaken in the major. The choice of the minor will be determined in consultation with both the graduate adviser and the potential dissertation advisor, if determined, or a subject-matter specialist in the area of the minor.

Admission Requirements

Admission to this program is contingent upon admission to the Graduate School (p. 19). The application for admission and transcripts of all previous college work should be filed in the Graduate School at least three months in advance of the time the applicant plans to register. A letter giving information on the applicant's educational background, experience, objectives, oral fluency in the language, or proposed major concentration and other data of interest to an evaluating committee should be sent by the applicant as soon as possible to the Chairperson of the Department of Classical and Modern Languages, Literatures, and Cultures.

Course Requirements: The Doctor of Philosophy requires ninety credits beyond the baccalaureate degree, thirty of which must be earned as dissertation credits. A minimum of between forty-five to forty-eight credits on the graduate level in the field of major concentration, and nine to twelve credits in one minor field. The total program must include thirty credits (excluding dissertation direction) at the 7000 level or above. All students are required to take a 7010 course (Introduction to Literary Theory) and all students with a graduate teaching assistantship must take LGL 5850: Foreign Language Instruction.

Language Requirements: The doctoral candidate must pass a Ph.D. reading examination in one language other than those of his/ her major and minor fields. The choice of the language will be determined in

consultation with the graduate advisor and subject to the approval of the Graduate Committee.

Qualifying Examinations: Within a reasonable time after the completion of all course work, students are required to pass extensive examinations, both written and oral, in the major and minor fields. Candidacy is achieved after passing the qualifying examinations and the dissertation committee is named. Later, after the dissertation has been completed, a final oral presentation and defense of it is required.

Academic Scholarship: All course work must be completed in accordance with the regulations of the Graduate School (p. 12) and the College of Liberal Arts and Sciences (p. 201).

Communication Sciences and Disorders

Office: 207 Rackham Memorial Building; 313-577-3339

Chairperson: Margaret Greenwald

Graduate Officer: Derek Daniels

Undergraduate Advisors: Faith Williams

Coordinator of SLP Clinical Programs: Karen S. O'Leary

<http://www.clas.wayne.edu/CSD>

Audiology is the study of the normal and impaired auditory system. Speech-language pathology focuses on impaired speech, language, fluency, and voice function of children and adults. The Doctor of Audiology (Au.D.) and Master of Arts with a major in Speech-Language Pathology degree programs offer students intensive and diverse academic and clinical experiences.

The course of study should be developed as early as possible with the student's major advisor, and candidacy must be established by filing an approved Plan of Work after twelve credits have been earned.

Academic Scholarship: All course work must be completed in accordance with the regulations of the Graduate School (p. 12) and the College of Liberal Arts and Sciences (p. 201).

APPLICATION REQUIREMENTS for all departmental graduate programs are:

1. a minimum undergraduate grade point average of 3.0
2. completion of the Graduate Record Examination
3. submission of three letters of recommendation
4. submission of a written Statement of Intent
5. submission of official transcripts

International applicants must provide, in addition, official results of the TOEFL, TWE, and SPEAK/TSE. Please access the department's website (<http://www.clas.wayne.edu/csd>) for additional information. Admission to all programs is contingent upon admission to the Graduate School (p. 19).

Accreditation

The Master of Arts in Speech-Language Pathology and the Doctor of Audiology programs are accredited by the Council on Academic Accreditation of the American Speech-Language-Hearing Association, 2200 Research Blvd, Rockville, MD 20850, Telephone: 800-498-2071.

- Speech-Language Pathology (M.A.) (p. 214)
- Audiology (Au.D.) (p. 214)
- Communication Sciences and Disorders (Ph.D.) (p. 215)

Speech-Language Pathology (M.A.)

Admission Requirements

Admission (p. 214) to this program is contingent upon admission to the Graduate School (p. 19). Applications must be made using the university's online application (<http://www.gradadmissions.wayne.edu/apply.php>) and the CSDCAS Centralized Application Service (<https://portal.csdcas.org>). Deadline for receipt of all application materials for fall admission is January 15.

It is essential that prospective graduate students in this area confer with an advisor in the area of Speech-Language Pathology concerning academic, clinical and professional programs to meet certification requirements as set forth by the American Speech-Language-Hearing Association.

The Master of Arts degree is offered by the Department of Communication Sciences and Disorders (<http://www.clas.wayne.edu/CSD>) under the following options:

Plan A: 54 - 60 credits, including an eight-credit thesis.

Plan B: 54 - 60 credits, including a three-credit essay.

Plan C: 54 - 60 credits in course work, plus written and/or oral comprehensive examinations in the major (total credits determined by major area of study).

Audiology (Au.D.)

The Doctor of Audiology (Au.D.) program, offered by the Department of Communication Sciences and Disorders (<http://www.clas.wayne.edu/CSD>), is designed to prepare audiology professionals to meet requirements for licensure (and certification, if desired) and is consistent with the standards of the Council on Academic Accreditation of the American Speech-Language-Hearing Association.

The program is specifically designed for individuals who have completed an undergraduate degree program in an accredited college or university and who have met the prerequisite requirements for admission to the Au.D. program. This is a four-year (eleven semester) full-time academic and clinical program. Most applicants who have completed an undergraduate degree in communication disorders meet our course work requirements for admission. Applicants with undergraduate degrees in other fields may need to complete prerequisite course requirements prior to admission to the graduate program.

Admission (p. 214) to this program is contingent upon admission to the Graduate School (p. 19). Applications must be made using the university's online application (<http://www.gradadmissions.wayne.edu/apply.php>) and the CSDCAS Centralized Application Service (<https://portal.csdcas.org>). Deadline for receipt of all application materials for fall admission is January 15.

Prerequisite courses for admission to the Au.D. program include coursework in behavioral and social sciences, mathematics, natural science, human communication, language acquisition, phonetics or acoustics, and an introductory course in human communication disorders. Most applicants will have also completed introductory coursework in speech-language pathology and audiology.

The Au.D. requires successful completion of 121-125 graduate credits in the major plus written and/or oral comprehensive examinations.

Communication Sciences and Disorders (Ph.D.)

Admission Requirements

Admission to this program is contingent upon admission to the Graduate School (p. 19) and satisfaction of departmental application requirements (p. 214).

A minimum of ninety graduate credits beyond the baccalaureate is required for completion of the Ph.D. program. Most students exceed this requirement in the course of completing the degree. The student and his/her advisor work cooperatively to plan a program of study designed to establish the necessary skills and knowledge for successful completion of the degree and in preparation for careers in research, higher education, and advanced clinical practice. As part of the program of study, the student will complete thirty credits in Doctoral Dissertation Research and Direction. The thirty credit dissertation registration requirement is fulfilled by registering for the courses SLP 9991, SLP 9992, SLP 9993, and SLP 9994 (Doctoral Dissertation Research and Direction I, II, III, and IV, respectively), in consecutive academic year semesters.

Candidacy: In order to become a candidate for the Ph.D. degree, an applicant must successfully complete both a written and an oral qualifying examination.

Criminal Justice

Office: 3054 Faculty/Administration Building; 313-577-2705

Chairperson: Shanhe Jiang

Graduate Director: Yuning Wu

Academic Services Officer/Advisor: Marianka Holloway

<http://www.clas.wayne.edu/CRJ>

The Master of Science degree in Criminal Justice is designed to prepare students for positions in criminal justice and related agencies as well as prepare students who wish to pursue a Ph.D. in Criminal Justice or related fields. Students are provided with a broad educational foundation in criminal justice grounded in law and the social sciences. Study begins with an analysis of crime and the entire justice system. Advanced study inquires into the political, organizational, social, and behavioral aspects of various components of the system of criminal justice. Research courses give students the tools with which to independently analyze issues of crime and justice as well as the requisite skills for career development. Courses are offered in the following core areas: contemporary criminal justice, causes of crime, research methodology and data management analysis, and a specialization of the student's choice.

Students in the Criminal Justice Graduate Program take core classes in Criminal Justice and are eligible to take elective courses in other Liberal Arts and Sciences departments and in departments in other colleges. This allows substantial flexibility in arranging a program of study that meets the student's goals.

- Criminal Justice (M.S.) (p. 215)
- Criminal Justice (J.D./M.S. Joint Degree) (p. 216)

Criminal Justice (M.S.)

Admission Requirements

Admission to this program is contingent upon admission to the Graduate School (p. 19). Strong undergraduate social science preparation is recommended, and additional undergraduate course work may be

specified in criminal justice or related areas where such preparation is inadequate.

Admission to the graduate program in Criminal Justice is based on:

1. evidence of a completed baccalaureate degree from an accredited college or university,
2. the quality of the applicant's undergraduate record,
3. two letters of recommendation, and
4. a personal statement.

In determining admission for the individual applicant, the Graduate Committee evaluates the student's undergraduate record (with special emphasis on upper division courses: junior/senior year), the level of difficulty of course work, as well as grade point average (g.p.a.) in the student's major, the strength of the recommendations, and the quality of the personal statement. The minimum standard for admission as a regular Master's student is a cumulative weighted undergraduate g.p.a. of 3.0 or better. Applicants with an undergraduate g.p.a. between 2.75 and 2.99 may be considered for admission, but are required to take the Graduate Record Examination (GRE) and provide a written exception statement justifying why they are capable of graduate work and explaining why their undergraduate g.p.a. is below 3.0.

Applicants to the Master of Science program in Criminal Justice must:

1. complete and submit the Graduate School's online application (<http://wayne.edu/admissions/graduate>);
2. have their official transcripts mailed directly from the applicant's undergraduate school/college (transcripts from all schools attended must be submitted) to the Office of Graduate Admissions, Wayne State University, 5057 Woodward, Suite 6000, Detroit, MI 48202 (student transcripts may not be transmitted via the applicant);
3. have two (2) letters of recommendation, preferably from former professors or instructors, submitted online; and
4. submit a personal statement.

Personal statements should answer the question why you wish to pursue a Master of Science degree in Criminal Justice and be no longer than one single-spaced page. Statements must be submitted as part of the online application process.

Questions concerning the admission process should be directed to the Criminal Justice Department at 313-577-0772.

The Master of Science degree is awarded upon successful completion of thirty credits in selected course work, including required core courses (see below) and electives, as described in the student's Plan of Work and the satisfactory completion of a master's thesis, a master's essay, or the master's capstone seminar. All course work must be completed in accordance with the regulations of the Graduate School (p. 12) and the College of Liberal Arts and Sciences (p. 201). The degree is offered as Plan A (Thesis), Plan B (Master's Essay), or Plan C (Master's Capstone Seminar) option, as follows:

Plan A: Thirty credits in course work including a six-credit thesis (CRJ 8999).

This plan is designed for students who intend to pursue doctoral work in the social sciences and who demonstrate exceptional ability in research methods. Consult the Graduate Director for further details.

Plan B: Thirty credits in course work, including a three credit essay demonstrating substantial research and mastery of a selected topic (CRJ 7999).

Plan C: Thirty credits in course work, including the three credit capstone course (CRJ 7870).

Code	Title	Credits
Core Courses		
CRJ 7010	Contemporary Criminal Justice	3
CRJ 7020	The Nature of Crime	3
CRJ 7860	Research Methods in Criminal Justice	3
Select one of the following:		3-4
CRJ 7400	Data Management and Analysis for Criminal Justice	
PS 5630	Statistics and Data Analysis in Political Science I	
SOC 6280	Social Statistics	

Area A

Select at least two of the following:		6
CRJ 7200	Public Policy and Criminal Justice	
CRJ 7220	Delinquency and Justice	
CRJ 7230	Policing and Society	
CRJ 7240	Corrections	

Area B

Select 5 to 9 credits in electives. At least 3 elective credits in CRJ courses:	5-9
Students electing a master's thesis (Plan A) take approved electives totaling at least 5 to 6 credits	
Students electing a master's essay (Plan B) take approved electives totaling at least 8 to 9 credits	
Students electing a master's capstone class (Plan C) take approved electives totaling at least 8 to 9 credits	

Area C

Select one of the following:	3-6
CRJ 7870	Master's Capstone Seminar in Criminal Justice
CRJ 7999	Master's Essay Direction
CRJ 8999	Master's Thesis Research and Direction

Elective Courses: The elective courses are to be chosen after a conference with the Graduate Director to determine the plan which is most consistent with the student's educational and career goals. These courses will be specified in the student Plan of Work. Some elective credit may have to be used to satisfy the College of Liberal Arts and Sciences requirement that at least six credits in course work be at the 7000 level or higher, and that at least six credits (excluding core courses) be taken in the major area. With the exception of one 5000-level elective course, all remaining courses toward the degree must be taken at the 6000 level or higher.

Transfer Credits: The maximum number of credits that may be transferred in from other accredited colleges and universities is between six and eight semester credits for two courses. Transfer courses must be taken at the graduate level with a passing grade of 'B' or higher; the student must have had graduate status at the time the courses were taken.

Online M.S. in Criminal Justice Program

Beginning Fall 2014, students may complete the Master of Science in Criminal Justice online. Online sections of the core courses and various electives will be consistently offered. In the application for graduate admission, students must indicate whether they will be completing the M.S. in Criminal Justice in

1. the traditional/hybrid program, or
2. the completely online program.

While students admitted to the online program will be expected to complete almost all of their courses online, they can seek permission from the Graduate Director to take selected classes on campus.

The online program is identical to the traditional classroom-based program and focuses on a broad range of criminal justice issues, emphasizing both the problem of crime and the criminal justice system's response to it. Students learn the latest evidence-based practices for crime control, how to understand and interpret data and how to find resources to implement innovative methods.

Criminal Justice (J.D./M.S. Joint Degree)

The Law School and the Department of Criminal Justice offer a joint degree program in law and criminal justice (J.D./M.S. in Criminal Justice). Students must be separately admitted to both the Law School and the Master of Science in Criminal Justice Program.

Students must complete all the requirements for both degrees. Law School courses count for up to nine elective credits toward the Master of Science in Criminal Justice degree. A maximum of four Criminal Justice courses may be applied to the requirements for the J.D. degree. A student must complete the first year of law school before any Criminal Justice courses may be taken toward the joint degree. Criminal Justice courses may be taken concurrently with law school courses during the second and subsequent years. The first step for the joint degree is to be admitted into the law program at Wayne State University. The second step is to contact the Law School advising office and the Department of Criminal Justice Graduate Advisor to inquire on how to apply for the joint degree program.

Economics

Office: 2074 Faculty/Administration Building; 313-577-3345
Interim Chairperson: Kevin Cotter
Administrative Assistant: Geraldine White
<http://www.clas.wayne.edu/Economics/>

The Department encourages applications from students with broad intellectual interests as well as strong quantitative skills, regardless of their undergraduate majors.

The M.A. in Economics can be a terminal degree leading to careers in business, government and non-governmental organizations, or junior college teaching. Because many master's students study part-time, the Department schedules as many core courses in the evening as possible.

The Ph.D. curriculum provides thorough training for professional economists through course work, tutorials and research workshops. It gives students a solid foundation in economic theory and econometrics and offers several carefully selected fields of specialization. The Department's Ph.D. graduates choose careers in academia, research, and business.

- Economics (M.A.) (p. 216)
- Economics (Ph.D.) (p. 217)
- Economics and Law (M.A./J.D. Joint Degree) (p. 218)

Economics (M.A.)

Admission Requirements

Admission to this program is contingent on admission to the Graduate School (p. 19). Applicants to this program must hold a bachelor's degree, with an undergraduate grade point average of at least 3.0 for regular

admission. Exceptions may be authorized only by the Department's Admissions Committee. Consistent with Graduate School requirements, international applicants must demonstrate English proficiency by obtaining a satisfactory score on the Test of English as a Foreign Language (TOEFL) or other test acceptable to the Graduate School.

Applicants are expected to have completed the following courses or their equivalents as undergraduate or post-bachelor students:

Code	Title	Credits
ECO 5000	Intermediate Microeconomics	4
ECO 5050	Intermediate Macroeconomics	4
ECO 5100	Introductory Statistics and Econometrics	4

MAT 2010 or a similar introductory course in differential and integral calculus provides minimal mathematics requirements. Additional courses in calculus and linear algebra are desirable although not required.

Regular admission may be granted to an applicant who has not completed these courses, but in this case they must be completed before taking 6000 or 7000-level courses.

Thirty-two graduate credits are required. Although the University offers various plans for M.A. degrees, the Department of Economics offers the Master of Arts degree under Plan C only, as described below.

For the M.A. Program, students must take:

Code	Title	Credits
Theory Core		
Take as early in the program as possible		
ECO 6000	Price and Allocation Theory	4
ECO 6050	Macroeconomics	4
ECO 6100	Introduction to Econometrics	4
Sequence Courses		
Select one of the following:		
ECO 7050 & ECO 7060	Macroeconomic Theory I and Macroeconomic Theory II	8
ECO 7000 & ECO 7010	Microeconomic Theory I and Microeconomic Theory II	
ECO 7100 & ECO 7110	Econometrics I and Econometrics II	
ECO 7200 & ECO 7210	Industrial Organization I and Industrial Organization II	
ECO 7300 & ECO 7310	International Trade Theory and International Monetary Theory	
ECO 7400 & ECO 7410	Labor Economics and Human Resources and Economics of Human Resources	
ECO 7550 & ECO 7560	Economics of Health Care I and Economics of Health Care II	
Elective Courses		
Three 6000- or 7000-level courses		12
Total Credits		32

Students who concentrate in fields other than Health Economics or Industrial Organization must have taken a full year of calculus, at a minimum. In addition, the permission of the M.A. Director and the instructor is required. Neither a thesis nor an essay is required. Three written examinations are required. Students must pass written exams covering the microeconomics and macroeconomics core courses and a written exam covering their 7000 level concentration.

Students should file a Plan of Work with the M.A. Director as soon as possible after being admitted to the M.A. Program. A Plan of Work developed early helps students make sure that they take courses in the right order and complete their program quickly and efficiently.

Candidacy: The Graduate School does not authorize candidacy unless the applicant's grade point average is 3.0 or better. To be eligible for candidacy, the student must also file a Plan of Work, approved by the master's program advisor, with the graduate officer of the College of Liberal Arts and Sciences. The M.A. Director requires all M.A. students to file a Plan of Work by the end of the first semester in the Economics M.A. program. The Graduate School does not allow M.A. students to register if a Plan of Work has not been filed by the time twelve graduate credits have been earned.

Academic Scholarship: All course work must be completed in accordance with the regulations of the Graduate School (p. 12) and the College of Liberal Arts and Sciences (p. 201).

Economics (Ph.D.) Admission Requirements

Admission to this program is contingent upon admission to the Graduate School (p. 19). Applicants to this program must hold a bachelor's degree and have a grade point average of at least 3.0. Applicants must include verbal, quantitative and analytical Graduate Record Examination scores and three letters of recommendation from officials or teaching staff of the institution(s) most recently attended. Applicants from other countries must demonstrate English proficiency by obtaining a satisfactory score on the Test of English as a Foreign Language (TOEFL). All candidates must submit a Statement of Purpose as part of their applications.

Applicants are expected to arrive with the following preparation:

Code	Title	Credits
ECO 5000	Intermediate Microeconomics	4
ECO 5050	Intermediate Macroeconomics	4
ECO 5100	Introductory Statistics and Econometrics	4

MAT 2010 and MAT 2020 or similar introductory courses in differential and integral calculus providing minimal mathematics requirements. Additional courses in calculus and linear algebra are highly desirable.

Ph.D. students in economics must successfully complete ninety credits in graduate study, consisting of sixty credits in course work and thirty credits in dissertation research. Advancement to candidacy will require about three years of full-time study beyond the bachelor's degree and is granted upon completion of the following requirements:

Code	Title	Credits
Completion of a Plan of Work ¹		
Completion of coursework in economic theory: ²		
ECO 7020	Fundamentals of Economic Analysis I	4
ECO 7021	Fundamentals of Economic Analysis II	4
ECO 7000	Microeconomic Theory I	4
ECO 7010	Microeconomic Theory II	4
ECO 7050	Macroeconomic Theory I	4
ECO 7060	Macroeconomic Theory II	4
Completion of coursework in two of the following five fields: advanced macroeconomics, health economics, industrial organization, international economics, and labor economics.		
Completion of coursework in quantitative methods:		
ECO 7100	Econometrics I	4

ECO 7110	Econometrics II	4
ECO 7120	Econometrics III	4
An oral examination on research		

¹ Must be approved by the Director of Graduate Studies in Economics and by the Dean of the Graduate School. The Plan of Work must be filed by the completion of the first year of doctoral study.

² Proficiency must be demonstrated by passing qualifying examinations in microeconomic theory, macroeconomic theory, and two selected fields.

The thirty credit dissertation registration requirement is fulfilled by registering for the courses ECO 9991, ECO 9992, ECO 9993, and ECO 9994 (Doctoral Dissertation Research and Direction I, II, III, and IV, respectively), in consecutive academic year semesters.

Academic Scholarship: All course work must be completed in accordance with the regulations of the Graduate School (p. 12) and the College of Liberal Arts and Sciences (p. 201).

Minor Requirements: Students must complete at least eight credits in a minor field, subject to the approval of the Director of Graduate Studies in Economics. These courses may include other economics courses not specified in the major requirements.

Doctoral Dissertation Outline and Record of Approval: This form must be approved by the student's dissertation advisory committee, the Director of Graduate Studies in Economics, and the Dean of the Graduate School.

The Doctoral Dissertation: The doctoral candidate is required to submit a doctoral dissertation on a topic satisfactory to his/her Faculty Dissertation Committee.

Public Lecture: Upon acceptance of the dissertation, the student will deliver a final lecture in accordance with Graduate School procedures.

Economics and Law (M.A./J.D. Joint Degree)

This department in cooperation with the Law School offers a joint degree program leading to a Master of Arts degree with a major in Economics and a Juris Doctor degree in law. Students in this program must be admitted to both the Law School and the Department of Economics and must complete all requirements for the Economics M.A. degree and all requirements for the J.D. degree. After admission to the Law School, the student must complete the first year of the J.D. program before electing additional economics courses.

Employment and Labor Relations

Employment and Labor Relations (M.A. Program)

Office: 5401 Cass (255 Walter P. Reuther Library); 313-577-0175

Director: Marick Masters

<http://www.clas.wayne.edu/maelr/>

- Employment and Labor Relations (M.A.) (p. 218)

Employment and Labor Relations (M.A.)

The Master of Arts in Employment and Labor Relations (MAELR) is an inter-college as well as an interdisciplinary graduate degree program jointly sponsored by the Departments of Economics and Psychology

in the College of Liberal Arts and Sciences, and Management and Information Systems in the School of Business Administration. Policy direction is provided by the Academic Policy Committee composed of one representative of each sponsoring department

MAELR is designed to provide professional preparation for a career in human resource management and labor-management relations. Students will be prepared in this discipline for positions in government, business and union organizations, and the program staff will assist in the appropriate job placement of its graduates. This program will also provide knowledge and skills for persons who contemplate entering or who are already engaged in self-employment involving labor relations, such as labor arbitration.

Admission Requirements

Admission to this program is contingent upon admission to the Graduate School (p. 19). Admission is limited to holders of baccalaureate degrees from accredited institutions and is granted only to those applicants who evidence promise of success in industrial relations study.

Admission to the program requires three letters of recommendation and completion of the program application form, in addition to the transcripts and the application form required by Graduate Enrollment Services. The letters of recommendation must be written by college or university professors under which the applicant has studied, and/ or current or former employers. The Graduate Record Examination (GRE) or the Graduate Management Admissions Test (GMAT) is required of all applicants. Applications will be evaluated on the basis of the following:

1. the overall or upper-division grade point average;
2. GRE and GMAT scores;
3. applicant's performance in previous graduate courses, if any;
4. quality of the applicant's employment experience at increasing levels of responsibility; and,
5. other appropriate indicators of successful performance as a graduate student, including the content of reference appraisals.

Students applying to the program who have completed a graduate degree, may be exempt from submitting GRE and GMAT scores.

Prerequisites

Students who have been admitted but who do not possess all of the following prerequisites must remedy any deficiency, without graduate credit, before graduate courses are taken in the degree program: statistics (equivalent to ECO 5100, BA 2300, or EER 7630); introductory microeconomics (such as ECO 2010) and an equivalent of PSY 2100, Psychology in the Work Place. A grade of 'C' or better is required of all prerequisite courses.

Advising: All academic advising will be done by the Academic Services Officer. Students should call the MAELR Office (313-577-0175) for information on advising hours.

MAELR is offered only as a Plan C master's program requiring the satisfactory completion of at least thirty-six credits in graduate course work, including a core curriculum of twenty-four credits and twelve electives:

The Core Curriculum is as follows:

Code	Title	Credits
ECO 6480	Advanced Economics of Work	3
ELR 7000	Introduction to Labor and Employment Relations	3
ELR 7450	Employment Relations Law in North America	3

ELR 8500	Strategic Analysis of North American Labor and Human Resources Issues (Capstone course: prerequisites include all other Core Courses)	3
MGT 7640	Management of Human Resources	3
MGT 7750	Labor Relations and Collective Bargaining	3
MGT 7780/ DR 7210	Concepts and Processes of Dispute Resolution I: Negotiating Theory and Practice	3
PSY 6570	Research Methods in Industrial/Organizational Psychology	3
Total Credits		24

Selection of electives will be guided by the student's prior preparation and career objectives and will require the approval of the Program Director. Electives are not limited to courses offered by the sponsoring departments.

ELR 8500 should be taken in the last nine credits of the program and only after the completion of the six other Core Courses.

The topic and methodology of a Directed Study must have the prior approval of the Director, who must also approve the appointment of the faculty member who will supervise the project. For courses specifically associated with this program see Employment and Labor Relations Courses (ELR).

A Core Course may be waived only if the student demonstrates, to the satisfaction of the Academic Policy Committee, that he/she has completed an equivalent graduate-level course with a grade of 'B' or better and elects an additional approved elective course in its place.

Academic Scholarship: Graduate students in the MAELR program will be required to earn a 'B' (3.0) average to satisfy degree requirements. *If a grade below 'B' is received in a core course, that course must be repeated promptly and a grade of 'B' or better obtained. A grade of 'C' in two graduate courses will constitute a sufficient basis for dismissal from the program.* All course work must be completed in accordance with the regulations of the Graduate School (p. 12) and the College of Liberal Arts and Sciences (p. 201).

Candidacy: Students are expected to file a Plan of Work when nine graduate credits in the MAELR curriculum have been earned. Upon approval of the Plan of Work the student's rank will be changed from 'applicant' to 'candidate' provided the applicant's grade point average is at least 3.0.

English

Office: Room 9408, 5057 Woodward; 313-577-2450

Interim Chairperson: Caroline Maun

Associate Chairperson and Director of Undergraduate Studies: Simone Chess

Director of Composition: Jeff Pruchnic

Interim Director of Graduate Studies: Richard Marback

Academic Services Officer: Anglesia Brown

<http://clas.wayne.edu/english>

The English Department is engaged in researching and re-conceptualizing what it means to read and write English in the twenty-first century and invites energetic, intellectually adventurous students to join in this pursuit. The graduate program is designed for students who show promise in the formal study and teaching of language, literature, film, rhetoric, composition, and culture, and seek to pursue the Master of Arts and/or Doctor of Philosophy in these areas. The M.A. program can be used to prepare for doctoral work and/or as a terminal degree used to develop expertise in particular areas of study (e.g., professional writing, creative writing). The doctoral program provides focus for all graduate

studies in English and ensures that students receive an education at the highest possible level.

- English (M.A.) (p. 219)
- English (Ph.D.) (p. 219)

English (M.A.)

Admission Requirements

Admission to this program is contingent upon admission to the Graduate School (p. 19). Application deadlines are October 15 (for Winter admission) and February 15 (for Fall admission). The English Department requires that all applicants provide a statement of purpose, two academic letters of reference, and sample essay from a previous English course. M.A. applicants who wish to emphasize creative writing also must submit a creative writing sample.

Program Requirements

The Master of Arts degree is offered as a Plan A, B, or C option.

Plan A: Thirty-three credits, including a three-or six-credit thesis.

Plan B: Thirty-three credits, including a three-credit essay. Demonstration of proficiency in at least one foreign language if directed to do so by an academic advisor based on the research topic of the Master's Essay (for further details, consult the Director of Graduate Studies).

Plan C: Thirty-three credits, including a portfolio of representative work approved by the Director of Graduate Studies.

The M.A. program in English is designed to prepare students to go on to doctoral work or to train students with specific interests (e.g., professional writing, creative writing) that may not lead to further advanced study in English. The M.A. program requires thirty-three credits of course work, which must include:

Code	Title	Credits
Select five 7000-level courses in English at Wayne State University		
Select one of the following:		
ENG 7999	Master's Essay Direction	
ENG 8999	Master's Thesis Research and Direction	
The submission of a zero-credit portfolio		

The thesis option is generally available only to students pursuing an interest in creative writing and working under the supervision of a creative writing faculty member. These options correspond to the Graduate School's Plans A, B, or C described above.

Academic Scholarship: All course work must be completed in accordance with the regulations of the Graduate School (p. 12) and the College of Liberal Arts and Sciences (p. 201).

Graduate Teaching Assistants: Each Graduate Teaching Assistant must take ENG 6001, Pedagogical Practicum I, in the first semester in which she or he holds the assistantship. M.A. Graduate Teaching Assistants may elect to take ENG 6004, Pedagogical Practicum II, in their third semester of their assistantship, but are not required to do so.

English (Ph.D.)

Admission Requirements

Admission to this program is contingent upon admission to the Graduate School (p. 19). Students may apply to the Ph.D. program with either a B.A. or M.A. degree. Students that apply with a B.A. will have the

opportunity to receive an M.A. degree before the completion of their Ph.D. The application deadline is December 15, but every Ph.D. student must begin the program in the fall semester. The English Department requires that all applicants provide a statement of purpose indicating areas of research interest, at least two academic letters of reference, a sample of the student's scholarly or critical writing, and GRE General Test Scores.

The Ph.D. program requires ninety credits of course work beyond the B.A. degree, which must include:

1. Sixty credits of course work (for students entering the program with an M.A., up to thirty credits may be transferred from another institution)
2. Completion of distribution requirements within and outside concentration areas listed below
3. Thirty credits of dissertation courses (ENG 9991, ENG 9992, ENG 9993, ENG 9994) taken in consecutive academic year semesters following the completion of regular course work and the Qualifying Exam
4. All courses must be at the 7000- or 8000-level; permission from the Director of Graduate Studies is required to take courses at lower levels unless such courses are required by the English Department (e.g., ENG 6001, Pedagogical Practicum I, or ENG 6004, Pedagogical Practicum II, for graduate teaching assistants)

The Ph.D. program has three concentrations: Literary and Cultural Studies, Rhetoric and Composition Studies, and Film and Media Studies. Each doctoral student must select a concentration early enough in her or his program to fulfill the course distribution requirements, which include:

Code	Title	Credits
All new Ph.D. students are required to take the following introductory course:		
ENG 7001	Issues in Critical Theory (offered every fall term)	
Select at least two courses in concentration ¹		
Select at least two courses outside concentration ²		
Select at least two 8000-level seminars in concentration ³		
Select at least one course focused on contemporary pedagogical theory and best practices in teaching ⁴		
ENG 6002	Teaching of Literary and Cultural Studies	
ENG 7064	The Teaching of Writing	
ENG 7065	Writing Technologies	

- ¹ These courses provide students with a broad coverage of representative texts and issues.
- ² Courses taken outside the concentration are usually at the 7000-level and may be selected from the other two English Department concentrations or from other areas of English Department graduate study (linguistics, creative writing, etc.).
- ³ 8000-level seminars are more specialized explorations of a research problem within a professor's area of expertise.
- ⁴ Consult the Director of Graduate Studies for a list of approved classes. Students who are Graduate Teaching Assistants may substitute ENG 6001, Pedagogical Practicum I, or ENG 6004, Pedagogical Practicum II, for this requirement.

Academic Scholarship: All course work must be completed in accordance with the regulations of the Graduate School (p. 12) and the College of Liberal Arts and Sciences (p. 201).

Graduate Teaching Assistants: Each Graduate Teaching Assistant must take ENG 6001, Pedagogical Practicum I, in the first semester in which

she or he holds the assistantship, and ENG 6004, Pedagogical Practicum II, in the third semester in which she or he holds the assistantship.

Foreign Language Requirement: Demonstration of reading proficiency in at least one foreign language if directed to do so by an academic advisor based on the research topic of the dissertation. The preferred method for demonstrating proficiency is to pass a translation examination (for further details, consult the Director of Graduate Studies).

Final Qualifying Examination: One year before she or he plans to take the Qualifying Examination (QE), each student meets with her or his advisor to declare the field and emphasis in which she or he plans to be examined. Designated fields reflect the current division of the discipline as published by the Modern Language Association. Emphases are designed to underscore the necessity of embedding doctoral work in ongoing critical debates among the various disciplines and sub-disciplines that make up English studies. An emphasis should identify a topical or thematic category and/or articulate a theoretical or methodological approach. Students will also need to list two (or more) courses that support the declared emphasis. The student writes a brief description of her or his field and emphasis and the dissertation director presents this to the Department Graduate Committee. The Graduate Committee selects the other two members of the QE Committee. The QE Committee then works with the student to construct a list of texts on which she or he is to be examined (roughly 100-120 texts). The exam itself should be scheduled no later than the semester following the completion of course work. The QE Committee composes questions for a six-hour written examination. Within one week after taking the written exam, the student then takes a ninety-minute oral examination. The student passes or fails the exam in its entirety. No later than one month after successful completion of the Qualifying Examination, the student selects a dissertation committee consisting of three members of the English Department graduate faculty and one appropriately qualified individual who is not a member of the English Department. Members of this committee may or may not have been members of the student's QE Committee.

Dissertation Defense: A final Public Lecture Presentation-Defense, after the dissertation has been completed, is also required.

Geology

Office: 0224 Old Main; 313-577-2506
Chairperson: Mark Baskaran
<http://www.clas.wayne.edu/Geology/>

- Geology (M.S.) (p. 220)

Geology (M.S.)

The Master of Science with a major in Geology consists of advanced studies that are designed to prepare the student to assume a position of responsibility as a professional geologist; or to enter a program leading to the doctor of philosophy in geology or a related discipline at another university. The Master of Science in geology is designed to provide the students with special training in the environmental aspects of this discipline in keeping with the urban setting of Wayne State University. Students receiving the degree of Master of Science in geology will be especially prepared to work in a capacity that deals with or provides solutions to environmental problems in which an intimate relationship between the environment and earth science is an important factor.

The master's degree program involves the rigorous, in-depth study of major concepts pertaining to the earth, and the techniques used to study them. Entrance into the program assumes a firm foundation in the basic and elemental concepts of geology.

Admission Requirements

Admission to this program is contingent upon admission to the Graduate School (p. 19). Additionally, candidates are required to have an undergraduate major in geology, or a strong background in geology supported by courses in related sciences, and a grade point average of at least 3.0 in the major. Prerequisite study should include many of the following courses: mineralogy, petrology, sedimentation, geomorphology, environmental geochemistry, structural geology; plus a course in any two of the following fields: paleontology, stratigraphy, geological site assessment, geostatistics, and geophysics.

Two semesters of calculus, a year of chemistry and a year of physics are also necessary. Deficiencies in prerequisites may be made up concurrently with graduate work.

The verbal and quantitative parts of the Graduate Record Examination are required for admission to the graduate program, and the applicant must file three personal letters of recommendation and a personal statement describing goals and motivations for pursuing an M.S. Geology degree before acceptance.

Students transferring from other fields should make an appointment with the Graduate Officer or the Department Chairperson who will review the applicant's background and make recommendations regarding the graduate program.

The master's degree is offered by this department only under the following option:

Plan A: *Thirty-two credits including an eight credit thesis.*

Students must complete twenty-four credits in graduate course work from the following courses:

Code	Title	Credits
Students must select six following courses:		24
GEL 5000	Geological Site Assessment	
GEL 5120	Environmental Geochemistry	
GEL 5150	Soils and Soil Pollution	
GEL 5210	Applied Geophysics	
GEL 5450	Hydrogeology	
GEL 5510	Environmental Fate and Transport of Pollutants	
GEL 5600	Special Topics in Geology	
GEL 6400	Nuclear Geology	
GEL 6500	Earth Resources and the Environment	
GEL 8999	Master's Thesis Research and Direction	8
Total Credits		32

If additional credits are required, then, courses may be selected from other graduate courses in chemical and/or civil engineering, or graduate courses in chemistry or physics. Graduate courses in disciplines other than geology require the approval of the thesis advisor and the graduate committee. All course work must be completed in accordance with the regulations of the Graduate School (p. 12) and the College of Liberal Arts and Sciences (p. 201).

The graduate program may be modified by the Geology Department to conform to the needs of individual candidates.

Candidacy for the Master's degree is established by submitting an acceptable Plan of Work to the Graduate Officer of the College of Liberal Arts and Sciences. This plan must be submitted and approved by the College by the time twelve graduate credits have been earned. Once

candidacy is established, the student, in consultation with his/her advisor and the Geology Department graduate officer, will select the thesis committee. The committee will be comprised of a minimum of three members of the graduate faculty with the student's advisor serving as one member and committee chairperson. Two of the three members of the committee (including the advisor) must be from the Department of Geology. The third member may be from another department if this third member will be making a significant contribution to the applicant's course work and/ or thesis study.

Cognate Requirements: Although there are no cognate courses required for the Master of Science degree, geology majors should consult their advisor regarding cognate courses which will be of value to their particular program. Depending on interests and future goals, courses in mathematics, physics, chemistry, and computer science, and especially those in chemical and civil engineering may be of particular value.

History

Office: 3094 Faculty/Administration Building; 313-577-2525

Chairperson: Elizabeth V. Faue

<http://www.clas.wayne.edu/History/>

The graduate program in history offers advanced education for qualified students who wish to develop the analytical and research skills appropriate to the study of history. Basic to all graduate programs in this discipline is an emphasis upon the location and classification of historical evidence, the interpretation of this evidence, and its synthesis in written and oral forms. The purpose of historical research and writing is to advance understanding of the past, to place the problems of the contemporary world in historical perspective, and to furnish insight about the future.

Advanced degrees in history serve several audiences, chief among them being those intent upon a teaching career at the secondary, junior college or university level; those interested in employment in government research, as foreign service officers, or in the management of archival resources and public and private historical agencies; and those who wish to study history as a means of understanding contemporary society and social issues. Private sector businesses and institutions consider a history graduate degree, because of its emphasis on reading, writing, and analytical thinking, to be one of considerable general value.

The M.A., M.A.P.H., and the Ph.D. programs provide sufficient flexibility to meet the professional needs of these various interests at differing levels of achievement. All M.A. and M.A.P.H. students must show mastery of their subject matter and demonstrate an ability to do basic historical research. Attainment of the Ph.D. requires the ability to use such research tools as statistics and foreign languages, as well as extensive mastery of a series of historical fields and a demonstrated capacity for original research. The doctoral dissertation is the culmination of the historian's training and constitutes an enlargement of our knowledge and understanding of history. Normally two years of study will be required for the completion of the M.A. and M.A.P.H.; fulfillment of all requirements for the Ph.D. will usually involve four years of full-time study beyond the Master of Arts degree.

- History (M.A.) (p. 222)
- History (M.A.P.H.) (p. 222)
- History (Ph.D.) (p. 222)
- History and Law (M.A./J.D. Joint Degree) (p. 223)
- History and Library and Information Sciences (M.A./M.L.I.S. Joint Degree) (p. 224)

- Public History and Library and Information Science (M.A.P.H./M.L.I.S. Joint Degree) (p. 224)
- World History (Bridge Graduate Certificate) (p. 225)

History (M.A.)

Admission Requirements

Admission to this program is contingent upon admission to the Graduate School (p. 19). Earning a graduate degree is an undertaking which requires a considerable commitment of time and financial resources. The Department of History expects applicants to its graduate program to arrive well-prepared to undertake this rigorous course of study. Accordingly, the following application deadlines posted by the University are strictly adhered to.

Admission to the Fall Term: February 1 (early admission), May 1
Admission to the Winter Term: November 1

The Department normally considers only applicants whose undergraduate grade point is at least 3.00 overall and at least 3.25 in a minimum of eighteen semester credits in history and related subjects at the advanced undergraduate level. Applicants should have or be in the process of acquiring relevant foreign language preparation to enter the area in which they wish to study. The Department requires that all applicants submit a letter of intent, a research paper as evidence of writing skills, a copy of scores from the Graduate Record Exam general test, at least two letters of recommendation from former instructors, and provide copies of transcripts from each college or university previously attended.

Candidates for the master's degree in history must complete a total of thirty-five credits under Plans A or B as outlined below. All students must take HIS 7830 (Methods and Research in History) during the first year in the program and, regardless of which Plan they pursue, all students must complete at least two 8000-level seminars.

Plan A: Twenty-seven credits in graduate course work, of which at least twenty-two must be taken in history, plus an eight credit thesis.

Plan B: Thirty-two credits in graduate course work, including at least twenty-seven credits in history, plus a three credit essay.

Under *Plans A and B*, the student must:

1. complete course work in two fields of history;
2. complete a minimum of five courses numbered 7000 or above, exclusive of the thesis (HIS 8999) or essay (HIS 7999) (HIS 7990, Directed Study, will count toward the four-course requirement only if taken for more than two credits);
3. complete two graduate seminars numbered 8000 or above; and
4. pass a final oral examination on the thesis or essay and graduate course work.

Candidacy must be established by filing an official Plan of Work with the Department when twelve credits have been earned.

Academic Scholarship: All course work must be completed in accordance with the regulations of the Graduate School (p. 12) and the College of Liberal Arts and Sciences (p. 201).

History (M.A.P.H.)

Admission Requirements

Admission to this program is contingent upon admission to the Graduate School (p. 19). Earning a graduate degree is an undertaking that requires

a considerable commitment of time and financial resources. The Department of History expects applicants to its graduate program to arrive well-prepared to undertake this rigorous course of study. Accordingly, the following application deadlines posted by the University are strictly adhered to.

Admission to the Fall Term: February 1 (early admission), May 1
Admission to the Winter Term: November 1

The Department normally considers only applicants whose undergraduate grade point is at least 3.00 overall and at least 3.25 in a minimum of eighteen semester credits in history and related subjects at the advanced undergraduate level. The Department requires that all applicants submit a letter of intent, a research paper as evidence of writing skills, a copy of scores from the Graduate Record Exam general test, at least two letters of recommendation, at least one from former instructor-the other may be from a supervised internship or employment in a historical agency or library/archive, and provide copies of transcripts from each college or university previously attended.

For the Master's in Public History degree at least 33 credits are required. 15 credits will be completed in core courses that include an internship and master's project. 18 credits will be completed in a public history track. Students are required to take at least three courses at the 7000-level or above. Candidates must petition the Graduate Committee for any exceptions to the M.A.P.H. requirements.

Code	Title	Credits
HIS 7835	Public History: Theory and Method	3
HIS 7855	Memory and History	3
One methodology course relevant to selected track and professional goals		3
One additional core course		3
Six courses required for the track selected		18
HIS 7998	Internship in Public History	3
Total Credits		33

Students will select a track no later than the end of their first semester of coursework. MAPH students can select a track in one of the following areas:

- Museum Studies
- Cultural Resource Management
- Public Policy
- African American History and Culture
- Labor and Urban History
- Gender, Sexuality, and Women's Studies

Candidacy must be established by filing an official Plan of Work with the Department when twelve credits have been earned.

Academic Scholarship: All course work must be completed in accordance with the regulations of the Graduate School (p. 12) and the College of Liberal Arts and Sciences (p. 201).

History (Ph.D.)

Admission Requirements

Admission to this program is contingent upon admission to the Graduate School (p. 19). Earning an advanced graduate degree requires considerable commitment of time and financial resources. The Department of History expects applicants to its graduate program to commence study well-prepared to undertake this rigorous coursework

sequence. Accordingly, the application deadline of February 1 is strictly followed.

The Department normally considers only applicants whose prior g.p.a. is at least 3.00 overall and at least 3.25 in a minimum of eighteen semester credits in history and related subjects. While attainment of an M.A. in History is not required of the doctoral applicant, the Graduate Committee will be looking for a strong background in history comparable to those holding the M.A. in the discipline in all doctoral applicants.

Required Admissions Documents

1. Formal Application
2. Application fee
3. All transcripts from all colleges and universities previously attended
4. GRE scores from the general exam
5. A letter of intent that outlines career goals and the area of study the applicant wishes to pursue
6. A research paper as evidence of writing and research skills
7. At least three letters of recommendation from former professors

The Department of History coordinates all materials for the doctoral admissions application process. Any items that are not submitted online should be sent directly to the Department's Director of Graduate Studies.

The Doctor of Philosophy degree requires ninety credits beyond the baccalaureate degree. The M.A. in History earned at WSU may count for thirty-five of these; but only thirty credits in post-bachelor's programs may be transferred from another institution. The total ninety credits must include:

1. HIS 7830, Methods and Research in History, or its equivalent.
2. A minimum of four 8000-level research seminars, including one advanced readings course in the dissertation field.
3. A minimum of thirty credits in coursework numbered 7000 or above.
4. A minimum of forty credits of coursework in History.
5. Eight credits of coursework in a cognate area chosen by the candidate and their advisor.
6. Additional coursework for a total of sixty credits.
7. Thirty credits of dissertation registration fulfilled by the courses HIS 9991, HIS 9992, HIS 9993, and HIS 9994.

Academic Scholarship: All course work must be completed in accordance with the regulations of the Graduate School (p. 12) and the College of Liberal Arts and Sciences (p. 201).

Foreign Language Requirement: Upon entering the program, students will be expected to offer a plan for satisfying the language requirement. They will be expected to demonstrate a reading knowledge of two languages (or one language, if specialization is in American history) to the appropriate University language department. With permission of the graduate director, a student may substitute certain specific auxiliary skills, such as statistics or oral history for one language.

Advisor: Upon entering the program, students will also be expected to select, in consultation with the Department's director of graduate studies, a faculty member who will serve as the student's advisor, both in general study and with respect to his or her dissertation. In consultation with the advisor, the student will then prepare a Plan of Work listing the courses that will prepare him or her in three fields of history (including a field in which the dissertation will be written), and a related cognate field outside the Department.

Curricula: The Department of History offers doctoral level course work includes geographical-chronological fields and topical fields. Students

must choose at least two geographical-chronological fields, one of which must be a geographic-chronological field outside American history.

Geographical-chronological fields

- ancient (not for dissertation topic)
- medieval
- early modern Europe
- modern Europe
- France
- Germany
- Great Britain
- Russia
- Africa
- America to 1877
- America since 1865

Topical fields

- African-American
- constitutional and legal
- economic
- gender and women's history
- immigration/ethnic
- labor
- urban history and the history of United States foreign relations
- archival administration

Admission to Candidacy requires completion of the following requirements:

1. Filing of an approved Plan of Work with the Graduate School;
2. Satisfactory completion of written and oral qualifying examinations in two major and one minor history fields. Cognate requirements will be met through satisfactory completion of course work in the cognate.

Dissertation: The dissertation is a work of original historical research and presentation on a topic selected by the student with the approval of the student's advisor and accepted as successfully completed by both the advisor and a dissertation committee. Upon completion of the dissertation, the student will be required to make a public lecture presentation-defense and to submit the dissertation for certification to the Graduate School.

History and Law (M.A./J.D. Joint Degree)

A joint degree is one in which some courses may be taken for credit applicable to both degrees. The joint degree program in law and history leads to the receipt of a J.D. from the Law School and an M.A. from the History Department of the College of Liberal Arts and Sciences. Law students may apply to the History Department for admission to the M.A. program, and upon admission may enroll in history courses after successful completion of their first year of legal studies. In the M.A. program, students may focus their studies on chronological history, including Roman, Western European and American backgrounds of law; on subjects related to specific areas of law practice such as labor, business or political history; or on the historical context of the lawyer's role in public policy making in domestic and international affairs. The joint degree program can be completed in three-and-one-half to four years of full-time study.

History and Library and Information Science (M.A./M.L.I.S. Joint Degree)

Joint-degree programs allow students to earn two degrees with fewer credits than if the degrees are earned separately. Students who enroll in the joint program will earn both the M.L.I.S. and M.A. in History degree. Graduates will increase their job market potential and be prepared to enter a new workforce that is capable of appraising and describing historical records, creating websites, and preserving electronic documents. Candidates must complete the required courses as outlined for both programs in order to graduate. Core courses in one program may not be used as elective courses in the other; fourteen credits of electives may be double-counted.

Applicants to this fifty-seven credit program must be admitted to both the Department of History and the School of Information Sciences master's degree programs.

Requirements: Library and Information Science

Students will complete twenty-nine credits in core and elective Information Science courses and seven credits in History elective courses.

Code	Title	Credits
Required INF Courses		
INF 6010	Introduction to the Information Profession	3
INF 6080	Information Technology	3
INF 6120	Access to Information	3
INF 6210	Organization of Knowledge	3
INF 7040	Library Administration and Management	3
INF 7996	Research for the Information Profession	3
Elective Courses		
INF Elective Courses		11
HIS Elective Courses		7
Total Credits		36

Requirements: History

Students will complete twenty-eight credits of History core and elective courses (p. 222) and seven credits of Information Science elective courses.

Code	Title	Credits
Required History Courses		
HIS 7999	Master's Essay Direction	3
HIS 7830	Methods and Research in History	3
History Elective Courses		
Select twenty-two credits, including the following:		22
A minimum of three History courses in major field		
A minimum of two History courses in minor field		
Four History courses must be at the 7000 level		
At least one 8000 level History seminar		
INF Elective Courses		
Select seven credits		7
Total Credits		35

Total for both degrees: fifty-seven credits (no more than fourteen credits may be double-counted).

Public History and Library and Information Science (M.A.P.H./M.L.I.S. Joint Degree)

Students in this joint program will earn both the MAPH and an MLIS degree. Graduates of the program benefit from the joint preparation in public history and library and information science and increase their potential for finding employment in either field. Students are prepared to enter a new workforce with the skills to appraise and describe historical records, create and maintain websites, preserve electronic documents, and communicate with a public audience. Upon successful completion of this program students will be prepared for employment in a wide range of settings, including libraries, archives, museums, state and federal agencies, and the private sector.

Public history is applied history, and the MAPH leads to employment in occupations as diverse as museum work, library and archival research, public policy analysis, documentary filmmaking, state and national parks, and tourism. Public historians provide an essential service by making historical scholarship accessible to a broad public audience. Libraries, archives, and other institutions that hire information management professionals increasingly seek employees who can communicate with broad public audiences about their collections and holdings, and who can create exhibits and public programming. The MAPH/MLIS joint degree program responds to the changing professional expectations for librarians and archivists.

Applicants to this program must be admitted to both the School of Information Sciences and Department of History MAPH program.

Students complete a minimum of 55 credits total for both degrees (14 hours are double-counted). For the MAPH degree, students complete 33 hours of MAPH credits, inclusive of 8 hours of INF credits that will also count toward the student's MLIS degree. In SIS, students complete 30 hours of LIS credits and 6 hours of History credits, for a total of 36 credits. The History credits would also count toward the student's MAPH electives.

Requirements: Library and Information Science

The MLIS degree requires 36 credits (including 6 credits of HIS courses).

INF 7440	Scripting Languages	
INF 7710	Archival Administration	
INF 7730	Administration of Audio Visual Collections	
INF 7740	Archives and Libraries in the Digital World	
INF 7770	Oral History: A Methodology for Research	
INF 7780	Description and Access for Archives	
INF 7885	Administration of Historical Agencies	
Total Credits		18

World History (Bridge Graduate Certificate)

This Certificate is oriented to the interests of history teachers and those training to become history teachers who wish to learn world historiography and gain the ability to survey regional histories and transnational themes crucial to teaching world history successfully. It provides graduate-level credentials in an area of growing demand at both the secondary and post-secondary levels.

As a bridge program this Graduate Certificate allows students to apply all of their coursework for the Certificate to the Master of Arts with a Major in History if they decide to pursue that degree after completing the Certificate.

Admission Requirements

Admission to this program is contingent upon admission to the Graduate School (p. 19). Students must hold a baccalaureate degree from an accredited college or university, possess a grade point average of 3.0 or higher, and demonstrate at least a 3.25 grade point average in a minimum of eighteen semester credits in history and related subjects at the advanced undergraduate level.

The certificate requires fifteen credits of graduate-level course work including:

Code	Title	Credits
HIS 8310	Seminar in World History	3
Select twelve credits of courses including three continental areas chosen from:		12
Africa		

Asia	
Latin America	
Middle East	
Europe	
Total Credits	15

One transnational course (i.e. citizenship, constitutional and legal history, gender, migration and ethnic, international relations, labor, and urban) may be taken in lieu of one in the continental distribution selections. A list of courses available to Certificate students is available from the Department. Students must maintain a minimum 3.0 grade point average and complete the Certificate within three years.

Academic Scholarship: All course work must be completed in accordance with the regulations of the Graduate School (p. 12) and the College of Liberal Arts and Sciences (p. 201).

The World History Bridge Graduate Certificate is designed to be completed in 1 year.

This program will cost \$12,513.52 for in-state tuition and fees and \$24,013.57 for out-of-state tuition and fees if completed within normal time. There may be additional costs for living expenses. These costs were accurate at the time of posting, but may have changed.

Fewer than 10 students completed this program within normal time. Typical student debt has been withheld to preserve the confidentiality of the students.

This program does not meet any licensure requirements.

For more information about graduation rates, loan repayment rates, and post-enrollment earnings about this institution and other postsecondary institutions please click here: <https://collegescorecard.ed.gov/>.

Linguistics

Office: Room 10303, 5057 Woodward; 313-577-8642

Director: Ljiljana Progovac

<http://www.clas.wayne.edu/linguistics>

Linguistics is devoted to the scientific study of language structure and use. The Linguistics Program at Wayne State offers an interdisciplinary approach to this field, permitting students to explore a wide range of topics and issues in language research. The program is administered by a director and an advisory committee of participating faculty who regularly teach courses for the program. The core linguistics courses are offered on a regular basis. Elective courses are offered in the following areas: (a) linguistics and a language; (b) language structure; (c) language variation and change; (d) language acquisition and processing; and (e) sociolinguistics and discourse/pragmatics.

Training in linguistics prepares students for advanced work in linguistic research, as well as for employment in teaching English and foreign languages; computer systems (especially natural language processing); broadcasting, mass media and journalism; publishing and editing; translation; international business; intercultural communication and negotiation; law; and generally any profession requiring the precise use or analysis of speech or writing.

- Linguistics (M.A.) (p. 226)

Linguistics (M.A.)

Admission Requirements

Admission to this program is contingent upon admission to the Graduate School (p. 19). In addition, applicants to the linguistics program must have taken at least one year of a foreign language.

The master's degree is offered by the College of Liberal Arts and Sciences as a Plan B master's option requiring a minimum of thirty credits in course work plus a three-credit essay. All course work must be completed in accordance with the regulations of the Graduate School (p. 12) and the College of Liberal Arts and Sciences (p. 201).

Elective Courses		15
The remaining courses are electives chosen in consultation with an advisor. Courses may be chosen from any one or more of the areas listed on the next tab. (A maximum of twelve credits may be earned in LIN 6720).		
LIN 7999	Master's Essay Direction	3
Total Credits		33

¹ The language-use and seminar course requirements may not be satisfied by the same course.

² The language use course involves either the analysis of speech data acquired in fieldwork or theories that address language use.

Programs are planned in consultation with the linguistics program advisor. To be admitted to candidacy, a coherent Plan of Work, listing both completed and proposed courses, must be submitted to the College by the time twelve credits have been earned.

Elective Courses

Selected in consultation with an advisor, courses may be chosen from any one or more of the areas listed below. (A maximum of twelve credits may be earned in LIN 6720).

(a) Linguistics and a Language

Students may complete up to nine credits in advanced language skills or in the linguistics of the chosen language as part of their electives. These credits are to be selected in consultation with an advisor.

(b) Language Structure

Code	Title	Credits
LIN 5050	Advanced Symbolic Logic	4

Mathematics

Office: 1150 Faculty/Administration Building; 313-577-2479

Chairperson: Hengguang Li

Associate Chairperson: Daniel Drucker

<http://www.math.wayne.edu>

The courses offered by the Department of Mathematics serve several purposes: they supply the mathematical preparation necessary for students specializing in the physical, biological or social sciences, in business administration, in engineering, and in education; they provide a route by which students may arrive at the level of research competency in any of several special mathematical areas; they allow students to prepare themselves for work as mathematicians and statisticians in industry and government; and they give an opportunity to all inquisitive students to learn something about modern mathematical ideas.

- Mathematics (M.S.) (p. 230)
- Mathematics (M.A.) (p. 229)
- Mathematical Statistics (M.A.) (p. 228)
- Applied Mathematics (M.A.) (p. 227)
- Mathematics (Ph.D.) (p. 231)

Applied Mathematics (M.A.)

This degree is designed for students who are interested in applied mathematics or are interested in applying mathematics to areas outside of mathematics (e.g., biology, chemistry, computer science, economics, engineering, geology, medical science, physics, psychology, social science). The program is flexible in that it does not represent the teaching of any fixed body of knowledge. It does require two areas of concentration, one of these being the major in mathematics (pure and applied) with emphasis on the applicable subjects. The minor area is to be either in applied mathematics or in an area outside of mathematics

(such as the above) to which the student is interested in applying mathematics. Mathematical methods are emphasized.

Admission Requirements

Admission to this program is contingent upon admission to the Graduate School (p. 19). Applicants for the Master of Arts in Applied Mathematics should have a good background in the area in which they are planning to apply mathematics, but a bachelor's degree in mathematics is not required. Applicants must also have attained twelve credits beyond the calculus sequence or knowledge equivalent to the following:

Code	Title	Credits
MAT 2010 & MAT 2020 & MAT 2030	Calculus I and Calculus II and Calculus III	12
MAT 2250	Elementary Linear Algebra	3
MAT 2350	Elementary Differential Equations	3
MAT 5070	Elementary Analysis	4
MAT 5420	Algebra I	4
CSC 2110	Computer Science I	3

This program is usually offered as a Plan B master's degree option requiring twenty-nine credits of course work plus a three credit essay. However, Plan A (master's thesis) and Plan C (course work only) options are available with the approval of the Departmental Graduate Committee.

1. A minimum of thirty-two credits.
2. A minimum of twenty credits in mathematics courses not previously completed from the following list (additional courses may be approved on an individual basis):

Code	Title	Credits
MAT 5100	Numerical Methods I	3
MAT 5110	Numerical Methods II	3
MAT 5210	Advanced Calculus	4
MAT 5220	Partial Differential Equations	4
MAT 5230	Complex Variables and Applications	4
MAT 5280	Methods of Differential Equations	3
MAT 5350	Logical Systems I	4
MAT 5400	Elementary Theory of Numbers	3
MAT 5410	Applied Linear Algebra	4
MAT 5420	Algebra I	4
MAT 5430	Algebra II	4
MAT 5520	Introduction to Topology	3
MAT 5530	Elementary Differential Geometry and its Applications	3
MAT 5600	Introduction to Analysis I	4
MAT 5610	Introduction to Analysis II	3
MAT 5700	Introduction to Probability Theory	4
MAT 5710	Introduction to Stochastic Processes	3
MAT 5740	The Theory of Interest	3
MAT 5770	Mathematical Models in Operations Research	3
STA 5800	Introduction to Mathematical Statistics	4
MAT 5870	Methods of Optimization	3
MAT 6420	Advanced Linear Algebra	3
MAT 6500	Topology I	3
MAT 6600	Complex Analysis	2-4
STA 6830	Design of Experiments	3
MAT 7200	Ordinary Differential Equations	3
MAT 7210	Partial Differential Equations	3

MAT 7220	Advanced Numerical Analysis	3
MAT 7230	Finite Element Methods	3
MAT 7240	Advanced Partial Differential Equations	3
MAT 7400	Advanced Algebra I	4
MAT 7410	Advanced Algebra II	3
MAT 7500	Topology II	3
MAT 7510	Algebraic Topology I	3
MAT 7520	Algebraic Topology II	3
MAT 7600	Real Analysis I	3
MAT 7610	Real Analysis II	3
MAT 7700	Advanced Probability Theory I	3
MAT 7710	Advanced Probability Theory II	3
STA 7810	Advanced Statistics Theory I	3
STA 5030	Statistical Computing and Data Analysis	3
STA 5830	Applied Time Series	3
STA 6840	Linear Statistical Models	3
STA 7820	Advanced Statistics Theory II	3

MAT 6200	Teaching Arithmetic, Algebra and Functions from an Advanced Perspective	3
MAT 6210	Teaching Geometry, Probability and Statistics, and Discrete Mathematics from an Advanced Perspective	3

Academic Scholarship: All course work must be completed in accordance with the regulations of the Graduate School (p. 12) and the College of Liberal Arts and Sciences (p. 201).

Mathematical Statistics (M.A.)

Admission Requirements

Admission to this program is contingent upon admission to the Graduate School (p. 19).

Except for the program leading to the degree of Master of Arts in Applied Mathematics, the entrance requirements for the master's programs in mathematics and statistics include successful completion of twelve semester credits in mathematics beyond sophomore calculus (equivalent to MAT 2010, MAT 2020, MAT 2030, MAT 2250, and MAT 2350); this course work should include advanced calculus and linear or modern algebra. Credit accrued in courses such as the history of mathematics or the teaching of mathematics, in which the study of mathematics itself is not the primary purpose will not be counted toward this requirement. As preparation for graduate study, the Department of Mathematics strongly recommends undergraduate course work along the line of option A, described under Bachelor's Degrees in the undergraduate bulletin.

The Master of Arts in Mathematical Statistics is offered under the following options:

Plan A: *Twenty-four credits in course work plus an eight credit thesis in the area of mathematical statistics.*

Plan B: *Twenty-seven credits in course work plus a three credit essay in the area of mathematical statistics.*

Plan C: *Thirty credits in course work.*

Degree Requirements

Code **Title** **Credits**
At least twenty-four credits in course work from the Department of Mathematics, including credits earned toward a thesis or essay under Plan A or Plan B options.

Select one of the following (if not previously taken):

MAT 5420 Algebra I
& MAT 5430 and Algebra II

MAT 7400 Advanced Algebra I

Select one of the following (if not previously taken):

MAT 5600 Introduction to Analysis I
& MAT 5610 and Introduction to Analysis II

MAT 7600 Real Analysis I

Select one of the following (if not previously taken):

MAT 5700 Introduction to Probability Theory
& MAT 5710 and Introduction to Stochastic Processes

MAT 7700 Advanced Probability Theory I

Select one of the following (if not previously taken):

STA 5800 Introduction to Mathematical Statistics
STA 7810 Advanced Statistics Theory I

Select at least two additional courses of the following:¹

STA 5030 Statistical Computing and Data Analysis

- A minimum of eight additional credits in the student's declared minor area.
- A final oral examination. All students in Plan C are required to take this examination. Students in Plan A or Plan B may, upon recommendation of the thesis or essay advisor, be excused from the final oral examination by the Departmental Graduate Committee.
- A public lecture on the thesis or essay for each student in Plan A or Plan B.
- By the time twelve credits have been earned, each student must submit a Plan of Work, approved by a departmental advisor, to the director of the program. In the Plan of Work, the student must choose Plan A, Plan B, or Plan C. The Plan of Work must be approved by the Departmental Graduate Committee, at which time the student will be advanced to candidacy. Students are not allowed to take more than twelve credits in the program unless candidacy has been established.

Each student in this program is ordinarily required to write a project-type essay for three credits under the direction of a supervisor in the Department of Mathematics and an essay advisor from some department related to the minor area, both of whom must approve the essay. (If the chosen minor area is in applied mathematics, the adviser in the major area can be the same as the adviser in the minor area.) The selection of advisors and topics must be approved by the Departmental Graduate Committee.

NOTE: The following courses cannot be applied towards this degree:

Code	Title	Credits
MAT 5000	Fundamental Concepts of Mathematics and Proof Writing	3
MAT 5070	Elementary Analysis	4

The following courses can only be applied towards requirement three for the minor in education:

Code	Title	Credits
MAT 6130	Discrete Mathematics	3
MAT 6140	Geometry: An Axiomatic Approach	3
MAT 6150	Probability and Statistics for Teachers	4
MAT 6170	Algebra: Ring Theory Through Exploration, Conjecture, and Proof	4
MAT 6180	Algebra: Group Theory Through Exploration, Conjecture, and Proof	3

MAT 5770	Mathematical Models in Operations Research
STA 5830	Applied Time Series
MAT 5870	Methods of Optimization
MAT 6420	Advanced Linear Algebra
MAT 6600	Complex Analysis
STA 6830	Design of Experiments
STA 6840	Linear Statistical Models
MAT 7700	Advanced Probability Theory I
MAT 7710	Advanced Probability Theory II
STA 7810	Advanced Statistics Theory I
STA 7820	Advanced Statistics Theory II

¹ MAT 7700 is recommended. Other courses may be approved by the Departmental Graduate Committee on an individual basis.

A final oral examination. All students in Plan C are required to take this examination. Students in Plan A or B may, upon recommendation of the thesis or essay adviser, be excused from the final oral examination by the Departmental Graduate Committee.

A public lecture on the thesis or essay for each student in Plan A or Plan B.

By the time twelve credits have been earned, each student must submit a Plan of Work, approved by a departmental adviser, to the director of the program. In the Plan of Work, the student must choose Plan A, Plan B, or Plan C. The Plan of Work must be approved by the Departmental Graduate Committee, at which time the student will be advanced to candidacy. Students are not allowed to take more than twelve credits in the program unless candidacy has been established.

NOTE: Candidates for the Master of Arts in Mathematical Statistics are exempt from the Graduate School requirement that six credits in the major field must be in courses numbered 7000 and above.

NOTE: The following courses cannot be applied towards this degree:

Code	Title	Credits
MAT 5000	Fundamental Concepts of Mathematics and Proof Writing	3
MAT 5070	Elementary Analysis	4
MAT 6130	Discrete Mathematics	3
MAT 6140	Geometry: An Axiomatic Approach	3
MAT 6150	Probability and Statistics for Teachers	4
MAT 6170	Algebra: Ring Theory Through Exploration, Conjecture, and Proof	4
MAT 6180	Algebra: Group Theory Through Exploration, Conjecture, and Proof	3
MAT 6200	Teaching Arithmetic, Algebra and Functions from an Advanced Perspective	3
MAT 6210	Teaching Geometry, Probability and Statistics, and Discrete Mathematics from an Advanced Perspective	3

Academic Scholarship: All course work must be completed in accordance with the regulations of the Graduate School (p. 12) and the College of Liberal Arts and Sciences (p. 201).

Mathematics (M.A.)

(An admissions moratorium is currently in effect for this program.)

The Master of Arts with a Major in Mathematics is offered under the following options:

Plan A: Twenty-four credits in course work plus an eight credit thesis.

Plan B: Twenty-seven credits in course work plus a three credit essay.

Plan C: Thirty credits in course work.

Completion of these plans must satisfy the following criteria:

Code	Title	Credits
At least twenty-four credits of course work from the Department of Mathematics. Credits earned toward a thesis or essay in accordance with Plan A or Plan B may be included among these twenty-four credits.		
MAT 5420	Algebra I (if not previously taken)	4
MAT 5430	Algebra II (if not previously taken)	4
MAT 5600 & MAT 5610	Introduction to Analysis I and Introduction to Analysis II (if not previously taken)	7
MAT 6500 or MAT 6600	Topology I (if not previously taken) or Complex Analysis	3
Select at least two of the following (if not previously completed): ¹		6-8
MAT 5100	Numerical Methods I	
MAT 5220	Partial Differential Equations	
MAT 5230	Complex Variables and Applications	
MAT 5410	Applied Linear Algebra	
MAT 5530	Elementary Differential Geometry and its Applications	
MAT 5700	Introduction to Probability Theory	
MAT 5770	Mathematical Models in Operations Research	
STA 5800	Introduction to Mathematical Statistics	
MAT 5870	Methods of Optimization	
Election of at least one additional mathematics course numbered 6000, or higher, with the exception of MAT 7999, MAT 8999 and teacher preparation courses.		2-4
Total Credits		26-30

¹ These courses represent several areas of applied mathematics.

By the time twelve credits have been earned a Plan of Work, approved by a departmental advisor, should be submitted to the director of the master's program in mathematics. At this time, the Graduate Committee will act on the application for candidacy. The student will not be allowed to take more than twelve credits in the master's program unless candidacy has been established.

In the Plan of Work the student will state his or her choice of one of the plans A, B, or C. The choice of plan must be approved by the Graduate Committee.

There is a final oral examination for the master's degree. All students in Plan C are required to take this examination. Students in Plan A or B may, upon recommendation of the thesis or essay advisor, be excused from the final oral examination by the Graduate Committee.

It is required that the thesis or essay of each student in Plans A or B be presented in a public lecture.

NOTE: Candidates for the Master of Arts degree with a major in mathematics or in mathematical statistics are exempt from the

requirement of the Graduate School that six credits in the major field must be in courses numbered 7000 and above.

Academic Scholarship: All course work must be completed in accordance with the regulations of the Graduate School (p. 12) and the College of Liberal Arts and Sciences (p. 201).

Mathematics (M.S.)

The M.S. in Mathematics is the most rigorous program at the Master's level and is designed for students who intend to study at the Ph.D. level in mathematical sciences, as well as for other students who are looking for a challenge.

Admission Requirements

Admission to this program is contingent upon admission to the Graduate School (p. 19).

Except for the program leading to the degree of Master of Arts in Applied Mathematics, the entrance requirements for the master's programs in mathematics and statistics include successful completion of twelve semester credits in mathematics beyond sophomore calculus (equivalent to MAT 2010, MAT 2020, MAT 2030, MAT 2250, and MAT 2350); this course work should include advanced calculus and linear or modern algebra. Credit accrued in courses such as the history of mathematics or the teaching of mathematics, in which the study of mathematics itself is not the primary purpose will not be counted toward this requirement. As preparation for graduate study, the Department of Mathematics strongly recommends undergraduate course work along the line of option A, described under Bachelor's Degrees in the undergraduate bulletin.

The Master of Science in Mathematics is offered under the following options:

Plan A: *Twenty-six credits in course work plus an eight credit thesis.*

Plan B: *Twenty-nine credits in course work plus a three credit essay.*

Plan C: *Thirty-two credits in course work.*

Degree Requirements

Code **Title** **Credits**

At least twenty-four credits in course work from the Department of Mathematics, including credits earned toward a thesis or essay under Plan A or Plan B options.

Select one of the following (if not previously completed):

MAT 5420 Algebra I
& MAT 5430 and Algebra II
& MAT 6420 and Advanced Linear Algebra

MAT 6420 Advanced Linear Algebra
& MAT 7400 and Advanced Algebra I

Select one of the following (if not previously taken):

MAT 5600 Introduction to Analysis I
& MAT 5610 and Introduction to Analysis II
& MAT 6600 and Complex Analysis

MAT 6600 Complex Analysis
& MAT 7600 and Real Analysis I

Select one of the following:

MAT 6500 Topology I (if not previously taken)
MAT 7500 Topology II

Select at least two of the following (other courses may be approved by the Departmental Graduate Committee on an individual basis):

STA 5030 Statistical Computing and Data Analysis

MAT 5100	Numerical Methods I
MAT 5110	Numerical Methods II
MAT 5210	Advanced Calculus
MAT 5220	Partial Differential Equations
MAT 5230	Complex Variables and Applications
MAT 5280	Methods of Differential Equations
MAT 5400	Elementary Theory of Numbers
MAT 5410	Applied Linear Algebra
MAT 5520	Introduction to Topology
MAT 5530	Elementary Differential Geometry and its Applications
MAT 5700	Introduction to Probability Theory
MAT 5710	Introduction to Stochastic Processes
MAT 5770	Mathematical Models in Operations Research
STA 5800	Introduction to Mathematical Statistics
MAT 5870	Methods of Optimization
STA 6840	Linear Statistical Models
MAT 7200	Ordinary Differential Equations
MAT 7210	Partial Differential Equations
MAT 7220	Advanced Numerical Analysis
MAT 7230	Finite Element Methods
MAT 7240	Advanced Partial Differential Equations
MAT 7400	Advanced Algebra I
MAT 7410	Advanced Algebra II
MAT 7500	Topology II
MAT 7510	Algebraic Topology I
MAT 7520	Algebraic Topology II
MAT 7600	Real Analysis I
MAT 7610	Real Analysis II
MAT 7700	Advanced Probability Theory I
MAT 7710	Advanced Probability Theory II
STA 7810	Advanced Statistics Theory I
STA 7820	Advanced Statistics Theory II

A final oral examination. All students in Plan C are required to take this examination. Students in Plan A or B may, upon recommendation of the thesis or essay adviser, be excused from the final oral examination by the Departmental Graduate Committee.

A public lecture on the thesis or essay for each student in Plan A or Plan B.

By the time twelve credits have been earned, each student must submit a Plan of Work, approved by a departmental adviser, to the director of the program. In the Plan of Work, the student must choose Plan A, Plan B, or Plan C. The Plan of Work must be approved by the Departmental Graduate Committee, at which time the student will be advanced to candidacy. Students are not allowed to take more than twelve credits in the program unless candidacy has been established.

NOTE: Candidates for the Master of Science in Mathematics are exempt from the requirement of the Graduate School that six credits in the major field must be in courses numbered 7000 and above.

NOTE: The following courses cannot be applied towards this degree:

Code	Title	Credits
MAT 5000	Fundamental Concepts of Mathematics and Proof Writing	3
MAT 5070	Elementary Analysis	4

MAT 6130	Discrete Mathematics	3
MAT 6140	Geometry: An Axiomatic Approach	3
MAT 6150	Probability and Statistics for Teachers	4
MAT 6170	Algebra: Ring Theory Through Exploration, Conjecture, and Proof	4
MAT 6180	Algebra: Group Theory Through Exploration, Conjecture, and Proof	3
MAT 6200	Teaching Arithmetic, Algebra and Functions from an Advanced Perspective	3
MAT 6210	Teaching Geometry, Probability and Statistics, and Discrete Mathematics from an Advanced Perspective	3

Code	Title	Credits

MAT 7600	Real Analysis I	3
MAT 7200	Ordinary Differential Equations	3
or MAT 7210	Partial Differential Equations	
MAT 7700	Advanced Probability Theory I	3
or STA 7810	Advanced Statistics Theory I	
MAT 7500	Topology II	3
or MAT 7510	Algebraic Topology I	

As a general rule, students are expected to take at least one required course each semester until they fulfill their course requirements. Under special circumstances, the Departmental Graduate Committee may approve petitions on an individual basis for exceptions to these rules.

QUALIFYING EXAMINATIONS consist of two sections, a written and an oral examination. A student must begin the written qualifying examination by the end of the third year in the Ph.D. program, and must pass all parts of the examination by the end of the fourth year in the Ph.D. program. All parts of the examination must be passed before a student can advance to Candidacy Status.

Written Qualifying Examinations consist of two three-hour parts, a *major* and a *minor* area exam. The examination committee will give the student a list of topics in the student's area of specialization. These topics should both reflect the student's particular research interest and be of sufficient breadth to cover the entire area. The committee will also designate a minor area on which the student will be examined. The minor area is to be supportive of the major area but sufficiently different to avoid compromising the diversity of the total two-part exam.

Oral Qualifying Examinations: By University regulations, after passing the written Qualifying Examinations, a student must take an oral Qualifying Examination; Departmental policy mandates that the exam must be taken within thirty days after certification of passing the written exam. The oral examination committee consists of the written examination committee, and a representative of the Graduate Committee. The oral examination will normally cover material similar to that of the written examinations, but may also include material outside the written examination areas which is deemed relevant to the student's research work.

Dissertation: The thirty credit dissertation registration requirement is fulfilled by registering for the courses MAT 9991, MAT 9992, MAT 9993, and MAT 9994 (Doctoral Dissertation Research and Direction I, II, III, and IV, respectively), in consecutive academic year semesters.

Defense of Dissertation: Candidates must pass a final oral examination covering their research after the candidate's advisor has approved the completed dissertation.

Academic Scholarship: All course work must be completed in accordance with the regulations of the Graduate School (p. 12) and the College of Liberal Arts and Sciences (p. 201).

Nutrition and Food Science

Office: 3009 Science Hall; 313-577-2500

Chairperson: Ahmad R. Heydari

Graduate Officer: Diane Cress

<http://www.clas.wayne.edu/NFS/>

- Nutrition and Food Science (M.A.) (p. 232)
- Nutrition and Food Science (M.S.) (p. 232)

Mathematics (Ph.D.)

Admission Requirements

Admission to this program is contingent upon admission to the Graduate School (p. 19). Doctoral applicants must have completed a master's degree in mathematics or reached an equivalent level of advancement. The Department Graduate Committee may make exceptions to this rule in cases where unusual ability has been demonstrated. Admission to the doctoral program will be granted only to those whose records indicate an ability to succeed in advanced study and research.

All applicants for the degree of Doctor of Philosophy with a major in mathematics are urged first to study the general doctoral degree requirements (p.) and to plan their programs so that all those requirements are fulfilled in the proper order and at the proper times. On the next tab are the major steps in earning this degree. Specific requirements of the Mathematics Department are included.

Candidates for the doctoral degree must complete ninety credits in course work beyond the bachelor's degree, including thirty credits of dissertation direction. Specific requirements for this degree in mathematics are as follows:

Preliminary Examinations: These are two-hour written examinations covering undergraduate level material from a sophisticated point of view. Students are required to pass a preliminary exam in Algebra or Analysis, as well as one additional exam from the following four choices:

- Algebra
- Analysis
- Applied Mathematics
- Probability and Statistics

Students may choose to take exams in their first semester in the Ph.D. program, in which case they must satisfy the requirements by the end of their second semester; or they may choose to take exams in their second semester, in which case they must satisfy the requirements by the end of their third semester. Students must select exams at the beginning of each semester, to be taken later in that semester.

Under special circumstances, the Departmental Graduate Committee may approve petitions on an individual basis for exceptions to these rules.

Course Requirements: In addition to the examinations described above, before advancement to candidacy every student in the Ph.D. program must earn a grade of 'B' or better in one course in each of the three subject areas in which they do not pass a Preliminary Examination. The courses may be selected from the following choices:

- Nutrition and Food Science and Public Health (M.A./M.P.H. Joint Degree) (p. 232)
- Nutrition and Food Science (Ph.D.) (p. 233)

Nutrition and Food Science (M.A.)

Admission Requirements

Admission to this program is contingent upon admission to the Graduate School (p. 19). Successful applicants shall have a minimum grade point average of 3.0. Undergraduate preparation should include basic courses in nutrition and food science. Persons lacking a limited number of prerequisites may be admitted conditionally, contingent upon completion of certain courses specified by the graduate committee. The Graduate Record Exam is recommended.

This degree is offered only as a Plan B master's program requiring thirty-two credits, including a three-credit essay. The concentration in food service management includes courses in the School of Business Administration. Contact the Department for information on applicable courses.

Academic Scholarship: All course work must be completed in accordance with the regulations of the Graduate School (p. 12) and the College of Liberal Arts and Sciences (p. 201).

Nutrition and Food Science (M.S.)

Admission Requirements

Admission to this program is contingent upon admission to the Graduate School (p. 19). Successful applicants shall have a minimum grade point average of 3.0. Undergraduate preparation should include basic courses in nutrition and food science. One year of introductory chemistry, and at least one semester each of organic chemistry, anatomy and physiology are required; biochemistry and statistics are recommended. Persons lacking a limited number of prerequisites may be admitted conditionally, contingent upon completion of certain courses specified by the graduate committee. The Graduate Record Examination is recommended.

This degree is offered only as a Plan A master's program requiring thirty-two credits, including an eight-credit thesis based on completion of research study, and eight credits of laboratory course work.

Academic Scholarship: All course work must be completed in accordance with the regulations of the Graduate School (p. 12) and the College of Liberal Arts and Sciences (p. 201).

Nutrition and Food Science and Public Health (M.A./M.P.H. Joint Degree)

The M.A. in Nutrition and Food Science/M.P.H. is a joint degree program offered by the Department of Nutrition and Food Science, College of Liberal Arts and Sciences, and Department of Family Medicine and Public Health Sciences, School of Medicine.

Students must meet the admission and graduation requirements of both programs and enroll concurrently in the two programs during most of the period in which they are earning the degrees. If they complete requirements for only one degree, one degree will be awarded.

Admission Requirements

Admission to this program is contingent upon admission to the Graduate School (p. 19). Admission criteria for the MA-MPH Joint Degree will meet the requirements of both MA and MPH Degrees by requiring:

1. A minimum undergraduate Grade Point Average of 3.0 and all requirements for admission to the WSU Graduate School that include satisfying the English proficiency requirements. If applicants have not completed a baccalaureate degree from an accredited institution in the US or in a country where English is the native language, satisfactory attainment of scores in the Michigan English Language Assessment Battery (MELAB) (85), the Test of English as a Foreign Language (TOEFL) (79 internet-/550 paper-based), or the International English Language Testing System (IELTS) (6.5) will be required. Tests should not be more than 2 years old.
2. The completion of the Graduate Record Examination (GRE) with the expectation that scores will be at or above the 60th percentile for verbal reasoning (510/154: new/old), at or above the 55th percentile for quantitative reasoning (675/153: new/old), and a score of at least 4.0 in analytical writing.
3. Completion of college-based courses in mathematics and the social sciences, and completion of the following undergraduate courses or equivalent:

Code	Title	Credits
NFS 2130 & NFS 2140	Introductory Food Science and Introductory Food Science Laboratory	4
NFS 2220	Nutrition Laboratory	1
NFS 3230	Human Nutrition	3
BIO 2200	Introductory Microbiology	5
BIO 2870	Anatomy and Physiology	5

One semester of Organic Chemistry
 Courses in biochemistry and statistics are recommended

- The submission of a professional curriculum vitae together with a satisfactory personal statement indicating the applicant's background, research and/or work experience, interests, and career goals as they relate to attainment of the MA-MPH degree. Three letters of recommendation will also be required. An interview will also be conducted (when possible).

A minimum of 59 graduate credits beyond the baccalaureate degree is required for completion of the MA-MPH program.

Students enrolled in the MA-MPH Joint Degree Program will be required to take specific NFS (p.) and FPH (p.) listed public health-related courses. The culminating master's essay (NFS 7999) requirement of the MA degree will be substituted by completion of the 3-credit hour MPH project course (FPH 8990). A total of 12 credits can be double-counted towards completion of this joint degree program.

Graduation requirements for the MA-MPH Joint Degree are consistent with the MA and MPH Degrees and will:

- Require completion of all required courses for both the MA and MPH degree segments, the public-health related courses specific to the MA-MPH Program, the culminating MPH project course, and elective courses for a minimum total of 59 credit hours within a 6 year period. A total of 15 credits may be double-counted.
- Require students to maintain a minimum grade point average of 3.0 in the entire program. A minimum of a B grade in all required courses in both the MA and MPH segments will also be required. Students obtaining less than a B grade in any core or required course will be allowed to retake it only once. Departmental policies will allow for only one C grade over the course of the entire program (and only in an elective course).

Nutrition and Food Science (Ph.D.)

Admission Requirements

Admission to this program is contingent upon admission to the Graduate School (p. 19). A completed Master's degree in a health/science related field is recommended. A minimum grade point average of 3.0 and the Graduate Record Examination is option, but recommended. Three letters of reference must be submitted, along with a statement of the applicant's goals and career objectives, and an interview will be conducted with applicants, whenever feasible. Students with a master's degree in nutrition, food science, or related disciplines will have their transcripts evaluated to determine which courses meet the Ph.D. course requirements.

A minimum of ninety graduate credits beyond the baccalaureate is required for completion of the Ph.D. program, distributed as follows:

- At least thirty credits in Nutrition and Food Science. Twenty-two of these credits are required for all students, and eight credits are selected to fill student needs and interests.
- Additional courses from other basic science departments including at least one 7000-level course in biochemistry and one graduate course in statistics.

3. Eight credits must be completed outside the Department to form a minor. A list of required and elective courses for doctoral studies is available from the Department Office.
4. Thirty credits in dissertation research, involving independent research under the direction of a faculty member in the Department. The thirty credit dissertation registration requirement is fulfilled by registering for the courses NFS 9991, NFS 9992, NFS 9993, and NFS 9994 (Doctoral Dissertation Research and Direction I, II, III, and IV, respectively), in consecutive academic year semesters.
5. Submission of a satisfactory research dissertation.

Academic Scholarship: All course work must be completed in accordance with the regulations of the Graduate School (p. 12) and the College of Liberal Arts and Sciences (p. 201).

Peace and Conflict Studies

Office: 2320 Faculty/Administration Building; 313-577-3453

Director: Frederic S. Pearson

<http://www.clas.wayne.edu/pcs/>

- Peace and Security Studies (Graduate Certificate) (p. 234)

Peace and Security Studies (Graduate Certificate)

The surge of violent disputes, civil disruption, military campaigns, human rights controversies and security concerns worldwide has led to new emphasis on constructive intervention and positive solutions to violent human confrontations. Concern about ethnic tensions, terrorism, border conflict, immigration, weapons flows, alternate security perspectives and violence at home and abroad create a great need for understanding the circumstances and means by which peace is threatened, reinforced, and preserved. On the inter-personal level, issues of abuse, violence and incivility also must be addressed.

Many of these topics now characterize job and career opportunities in a variety of fields. The Graduate Certificate in Peace and Security Studies (GCPSS), offered by the WSU Center for Peace and Conflict Studies, represents a unique added credential, with emphasis on prevention of violence, peaceful borders and social boundaries, for students undertaking Master's level study or who have completed an accredited graduate degree and are looking forward to work in such areas as social service, diplomacy, education, public service, theology, security management and law enforcement.

Admission Requirements

Admission to this program is contingent upon admission to the Graduate School (p. 19). The GCPSS program is open to students who have been admitted to or completed an accredited Master's degree program in an appropriate discipline at Wayne State University or at another university in this region or Canada. Applicants who have completed a Master's at a non-North American university will be required to submit two letters of academic recommendation, a writing sample, a personal statement indicating the reasons for pursuing the GCPSS, along with evidence, as appropriate, of English proficiency (e.g., TOEFL score). The Director of the Center for Peace and Conflict Studies is the program advisor.

The GCPSS requires a minimum completion of fifteen credits in peace and security related courses. Up to nine Certificate credits may be applied toward the requirements of a graduate degree.

Two core courses in Peace and Security Studies are required, along with completion for credit of a community based practicum (applied research) or internship (professional training) experience. An additional six elective

credits are to be selected from existing courses in a variety of disciplines; one of these courses may come from the student's home Master's major. Students in the program will be required to maintain at least a 3.0 g.p.a. in Peace and Security studies core and elective courses. Graduate School time limitations on completion of degree or certificate requirements and regulations on the transfer of credits from other programs will apply. The GCPSS is awarded upon completion of the student's M.A./M.S./M.S.W./M.B.A. (or equivalent degree) requirements along with certificate requirements.

¹ Students in PCS 7800 may undertake fieldwork either in the form of an original applied research project or internship placement in a relevant international or community agency in the Windsor-Detroit areas or abroad, dealing with issues of political or group violence or reconciliation, immigration or with border management. Internship placement may not be paid or be in the student's own place of employment and may not coincide directly with any other internship or practicum in the student's graduate program. The experience must result in a supervisor evaluation and substantial written analysis by the student. PCS 7800 is offered each semester (supervised by members of the PCS Faculty Committee) and should be taken after completing PCS 6100 and PCS 7100.

² Additional graduate courses related specifically to peace and/or security areas that could satisfy the elective sequence requirement are listed below. Students may petition for acceptance of alternate relevant electives.

Academic Scholarship: All course work must be completed in accordance with the regulations of the Graduate School (p. 12) and the College of Liberal Arts and Sciences (p. 201).

Assessment: Upon completion of their certificate requirements each student is required to submit a small portfolio of what they consider to be their best work in the program, which will be reviewed as a way of evaluating the program itself. Core course instructors in the program also report on the extent to which assessment goals were reached and will survey the students to determine ways in which course material was or was not utilized in career and everyday life experiences.

Philosophy

Office: 5057 Woodward, 12th floor; 313-577-2475

Interim Chairperson: Eric Hiddleston

<http://www.clas.wayne.edu/Philosophy/>

- Philosophy (M.A.) (p. 235)
- Philosophy (Ph.D.) (p. 235)

Philosophy (M.A.)

Admission Requirements

Admission to this program is contingent upon admission to the Graduate School (p. 19). Admission requires approval by the admissions officer of the Department. Prerequisites should include courses in logic, value theory, and the history of philosophy. The Graduate Record Examination is required if the student's undergraduate grade point average is below 2.75 for a degree awarded by an accredited institution, or below 3.0 for a degree awarded by a non-accredited institution.

The master's degree is offered by this department under the following options:

Plan A: Twenty-four credits in course work, including at least two graduate seminars at the 7000-level in philosophy, plus an eight-credit master's thesis.

Plan B: Twenty-eight credits in course work, including at least two graduate seminars at the 7000-level in philosophy, plus a four-credit master's essay.

Plan C: (open only to prospective doctoral candidates registered in the Ph.D. program) Thirty-two credits of course work, including at least two graduate seminars at the 7000-level in philosophy, plus satisfaction of all Ph.D. logic and preliminary essay requirements.

Candidacy must be established by the time twelve credits have been earned. All students in the master's program must pass the Departmental examinations in elementary logic before the second year of study.

Academic Scholarship: All course work must be completed in accordance with the regulations of the Graduate School (p. 12) and the College of Liberal Arts and Sciences (p. 201).

Philosophy (Ph.D.)

Admission Requirements

Admission to this program is contingent upon admission to the Graduate School (p. 19).

Candidates for the doctoral degree must complete ninety credits beyond the baccalaureate degree, including thirty credits of dissertation directed study. In order to continue in the program and gain admission to candidacy, a student must satisfy the following:

1. Pass PHI 5050 or the Departmental Examination in elementary logic before the second year in the doctoral program;
2. Complete the Departmental Advanced Logic Requirements by the end of the fourth year;
3. Satisfy the course requirements in metaphysics/epistemology, value theory, and history of philosophy by the end of the fourth year;
4. Complete the two preliminary essays by the beginning of the fourth year; and
5. Pass an oral examination on the dissertation prospectus, by the fifth year;

The thirty credit dissertation registration requirement is fulfilled by registering for PHI 9991, PHI 9992, PHI 9993, and PHI 9994 (Doctoral Dissertation Research and Direction I, II, III, and IV, respectively), in consecutive academic year semesters. The candidate's doctoral committee must approve the doctoral dissertation prior to an oral presentation open to all interested faculty and students.

Before receiving a Ph.D., the student must give some classroom lectures under the supervision of the faculty of the Philosophy Department.

Academic Scholarship: All course work must be completed in accordance with the regulations of the Graduate School (p. 12) and the College of Liberal Arts and Sciences (p. 201).

Physics and Astronomy

Office: 135 Physics Research Building; 313-577-2721

Chairperson: David Cinabro

Associate Chairperson: Jogindra M. Wadehra

Academic Services Officer: J. Scott Payson

<http://www.clas.wayne.edu/physics/>

Physics is the science that describes the behavior of the physical world. It is the most basic of all sciences and as such is responsible for the interpretation of fundamental physical processes which support many other scientific disciplines.

The degree programs of this department are designed to provide students with the broad-based knowledge and problem-solving skills that are needed in order to be productive physicists in an academic, government, or industrial environment. The programs can accommodate students with varying undergraduate backgrounds and are designed to provide maximum flexibility for individual students. At the doctoral level, specializations are offered in the areas of: elementary

particle physics, nuclear physics, condensed matter physics, atomic physics, materials science, optics, biophysics, and quantum field theory.

Faculty members are committed to excellence in research and teaching, and work in an open and informal atmosphere which allows effective communication between students and advisors. The faculty hold national and international reputations in their areas of specialization. They organize and participate in conferences, publish extensively, and receive numerous outside grants, contracts and fellowships. In addition, they engage in many collaborations with scientists in both foreign and American universities and national laboratories. The department is housed in a modern physics building containing well-equipped research laboratories.

- Physics (M.A.) (p. 236)
- Physics (M.S.) (p. 236)
- Physics (Ph.D.) (p. 237)

Physics (M.A.)

For some students, the master's degree will be used as part of a continuing Ph.D. program; for others, it will be a terminal degree leading to employment in government laboratories, industrial programs, hospitals, teaching positions, and other occupations. The Master of Arts with a major in Physics is offered under Plan B, as described on the next tab.

Admission Requirements

Admission to this program is contingent upon admission to the Graduate School (p. 19). In addition, applicants must satisfy the following criteria.

Prerequisite preparation should include:

Code	Title	Credits
------	-------	---------

A minimum of general college physics with laboratory equivalent to:

PHY 2170	University Physics for Scientists I	
PHY 2180	University Physics for Scientists II	
PHY 3300	Introductory Modern Physics	

Fifteen credits in intermediate physics courses, for example, those equivalent to the following:

PHY 5100	Methods of Theoretical Physics I	
PHY 5200	Classical Mechanics I	
PHY 5210	Classical Mechanics II	
PHY 5340	Optics	
PHY 6400	Quantum Physics I	
PHY 6410	Quantum Physics II	
PHY 6500	Thermodynamics and Statistical Physics	
PHY 6600	Electromagnetic Fields I	
PHY 6610	Electromagnetic Fields II	
PHY 6850	Modern Physics Laboratory	

Mathematics equivalent to mathematics prerequisites required in those physics courses

A minimum of general college chemistry with laboratory equivalent to:

CHM 1220 & CHM 1230	General Chemistry I and General Chemistry I Laboratory (or equivalent courses)	
------------------------	---	--

The Graduate Record Examination, both the General section and the Physics subject test, is strongly recommended as a counseling aid in preparing the student's plan of study.

Academic Scholarship: All course work must be completed in accordance with the regulations of the Graduate School (p. 12) and the College of Liberal Arts and Sciences (p. 201).

The Master of Arts degree is offered by this Department only under the following option:

Plan B: *Twenty-nine credits in course work plus a three-credit essay.*

1. The following physics courses or their equivalents must be completed or must have been completed previously at the undergraduate level.

Code	Title	Credits
PHY 5100	Methods of Theoretical Physics I	3
PHY 5210	Classical Mechanics II	3
PHY 6400	Quantum Physics I	3
PHY 6410	Quantum Physics II	3
PHY 6500	Thermodynamics and Statistical Physics	4
PHY 6600	Electromagnetic Fields I	3
PHY 6610	Electromagnetic Fields II	3

2. Mathematics equivalent to mathematics prerequisites required for the course work listed above.
3. At least nine credits of coursework in physics at the 7000-level or above (exclusive of PHY 7990, PHY 7996, PHY 7999, PHY 8995, PHY 8999).
4. PHY 7999 Master's Essay Direction.
5. A departmental final oral examination is required of all candidates.

Physics (M.S.)

For some students, the master's degree will be used as part of a continuing Ph.D. program; for others, it will be a terminal degree leading to employment in government laboratories, industrial programs, hospitals, teaching positions, and other occupations. The Master of Science with a Major in Physics is offered under Plan A or Plan C.

Admission Requirements

Admission to this program is contingent upon admission to the Graduate School (p. 19). In addition, applicants must satisfy the following criteria.

Prerequisite preparation should include:

Code	Title	Credits
------	-------	---------

A minimum of general college physics with laboratory equivalent to:

PHY 2170	University Physics for Scientists I	
PHY 2180	University Physics for Scientists II	
PHY 3300	Introductory Modern Physics

------------------------	---

The Graduate Record Examination, both the General section and the Physics subject test, is strongly recommended as a counseling aid in preparing the student's plan of study.

Academic Scholarship: All course work must be completed in accordance with the regulations of the Graduate School (p. 12) and the College of Liberal Arts and Sciences (p. 201).

The Master of Science degree is offered by this Department only under the following two options:

Plan A

Twenty-four credits in course work plus an eight-credit thesis.

Specific requirements include the following:

1. The following physics courses or their equivalents must be completed or must have been completed previously at the undergraduate level.

Code	Title	Credits
PHY 5100	Methods of Theoretical Physics I	3
PHY 5210	Classical Mechanics II	3
PHY 6400	Quantum Physics I	3
PHY 6410	Quantum Physics II	3
PHY 6500	Thermodynamics and Statistical Physics	4
PHY 6600	Electromagnetic Fields I	3
PHY 6610	Electromagnetic Fields II	3

2. Mathematics equivalent to mathematics prerequisites required for the course work listed above.
3. At least nine credits of coursework in physics at the 7000 level or above (exclusive of PHY 7990, PHY 7996, PHY 7999, PHY 8995, PHY 8999).
4. PHY 8999 Master's Thesis Research and Direction.
5. A departmental final oral examination is required of all candidates.

Plan C

Graduate students who have successfully presented their Ph.D. prospectus can obtain a Master of Science degree under Plan C by virtue of having earned the required 32 credits in course work. (The M.S. in physics may be earned as a Plan C option ONLY as conjoint to the Ph.D program.) Interested students should contact the Graduate advisor in the Department for more information.

Physics (Ph.D.)

Admission Requirements

Admission to this program is contingent upon admission to the Graduate School (p. 19). In addition, applicants must satisfy the following criteria.

Prerequisite preparation should include:

Code	Title	Credits
A minimum of general college physics with laboratory equivalent to:		
PHY 2170	University Physics for Scientists I	
PHY 2180	University Physics for Scientists II	
PHY 3300	Introductory Modern Physics	

Fifteen credits in intermediate physics courses, for example, those equivalent to the following:

PHY 5100	Methods of Theoretical Physics I
PHY 5200	Classical Mechanics I
PHY 5210	Classical Mechanics II
PHY 5340	Optics
PHY 6400	Quantum Physics I
PHY 6410	Quantum Physics II
PHY 6500	Thermodynamics and Statistical Physics
PHY 6600	Electromagnetic Fields I
PHY 6610	Electromagnetic Fields II
PHY 6850	Modern Physics Laboratory

Mathematics equivalent to mathematics prerequisites required in those physics courses

A minimum of general college chemistry with laboratory equivalent to:

CHM 1220 & CHM 1230	General Chemistry I and General Chemistry I Laboratory (or equivalent courses)
------------------------	---

The Graduate Record Examination, both the General section and the Physics subject test, is strongly recommended as a counseling aid in preparing the student's plan of study.

Academic Scholarship: All course work must be completed in accordance with the regulations of the Graduate School (p. 12) and the College of Liberal Arts and Sciences (p. 201).

Candidates for the doctoral degree must complete ninety credits beyond the baccalaureate, including thirty credits of dissertation research. Students must demonstrate proficiency in the fields of: mechanics, electromagnetic theory, quantum physics, and thermodynamics and statistical mechanics.

Course work:

Code	Title	Credits
The following courses or their equivalent will be required of all candidates:		
PHY 7110	Methods of Theoretical Physics II	
PHY 7400	Quantum Mechanics I	
PHY 7500	Statistical Mechanics	

One of the following: 3

PHY 7050	Survey of Condensed Matter Physics
PHY 7060	Survey of Elementary Particle Physics
PHY 7070	Survey of Nuclear Physics

Two of the following:

PHY 7200	Advanced Mechanics
PHY 7410	Quantum Mechanics II
PHY 7600	Electromagnetic Theory I
PHY 7610	Electromagnetic Theory II

In general, it is recommended that students take all the advanced courses in their specialty. Students specializing in any branch of theoretical physics are encouraged to take the quantum theory of fields, or a related directed study. On petition of the student and his/her dissertation advisor,

the Departmental Graduate Committee may waive any of the above course requirements.

Ph.D. Qualifying Examination: This will normally be taken after the student has completed approximately one year of graduate course work. Its purpose is to investigate the student's knowledge of physics and capacity for creative thought. This is a written examination. The student must submit a Plan of Work prior to taking this examination.

Physics Colloquium (PHY 8995): It is required that all full-time graduate students register for and attend the Departmental Physics Colloquium each semester they are in residence.

Dissertation: An approved dissertation is required. The thirty credit dissertation registration requirement is fulfilled by registering for the courses PHY 9991, PHY 9992, PHY 9993, and PHY 9994 (Doctoral Dissertation Research and Direction I, II, III, and IV, respectively), in consecutive academic year semesters.

Academic Scholarship: All course work must be completed in accordance with the regulations of the Graduate School (p. 12) and the College of Liberal Arts and Sciences (p. 201).

Political Science

Office: 2040 Faculty/Administration Building; 313-577-2630

Chairperson: Daniel S. Geller

<http://www.clas.wayne.edu/politicalscience/>

The study of political science is aimed at understanding and illuminating the nature and problems of government and the role of politics in the modern world. This is accomplished through systematic exploration of the structure and processes of government at different levels and across nations, through the study of individual and collective political behavior, and through analyses of policy problems and the processes through which public policies are formulated and administered. The field of political science is of special importance to students whose career goals include:

1. Professions likely to involve participation in public affairs, including law, engineering, criminal justice, public health, social welfare and education.
2. Administrative or executive positions in government – local, state or federal, and in non-profit organizations dealing with the public sector.
3. Teaching of political and social science at the secondary, community college and university levels.
4. Positions in the diplomatic, foreign and overseas programs of the U.S. Government and of large private concerns doing business abroad.
5. Leadership, research and staff roles in citizen organizations, political parties, economic and social interest groups, municipal research bureaus and nonprofit organizations.
6. Positions associated with mass communications, such as radio, television and newspapers, where understanding of public affairs and governmental policies and organization is required for accurate reporting and analysis.
7. Positions in private enterprise where knowledge of governmental processes is essential, such as in industrial relations, legislative liaison and public relations.

- Political Science (M.A.) (p. 238)
- Political Science and Law (M.A./J.D. Joint Degree) (p. 238)
- Public Administration (M.P.A.) (p. 239)
- Political Science (Ph.D.) (p. 240)

Political Science (M.A.)

Admission Requirements

Admission to this program is contingent upon admission to the Graduate School (p. 19). A strong undergraduate performance is a prerequisite and substantial undergraduate preparation in the social sciences is recommended. Applicants must take the Graduate Record Examination and have the results submitted to the university.

The Master of Arts with a Major in Political Science is offered under the following options:

Plan A: Thirty-three or thirty-four credits including an eight-credit thesis.

Plan B: Thirty-three or thirty-four credits including a three-credit essay.

Depending on the student's program, thirty-three or thirty-four credits, including a minimum of twenty-four credits in political science, are required. All students must satisfy a general Departmental requirement aimed at the development of basic analytic and methodological skills by successfully completing PS 5630 (statistics) and PS 7660 (research methodology). These courses should be taken early in the student's program of study. Students select a major area of study from among the following six fields: American government and politics, comparative politics, political theory, public policy, urban politics, and world politics.

If the thesis option is elected, an oral examination on the thesis is required.

A student's program is finalized in a Plan of Work that must be filed by the time the student has earned twelve credits. The student should consult the Department's Director of Graduate Studies for guidance in the development of his/her Plan of Work and for the specific requirements of the major concentration.

No credit will be granted without authorization of the Department's Graduate Committee for courses in Political Science taken at Wayne State University prior to formal admission to the M.A. program.

Academic Scholarship: All course work must be completed in accordance with the regulations of the Graduate School (p. 12) and the College of Liberal Arts and Sciences (p. 201).

AGRADE – Accelerated Graduate Enrollment

The Department of Political Science permits undergraduate majors with superior academic records to petition for accelerated graduate enrollment under the 'AGRADE' program of the College of Liberal Arts and Sciences. This program allows qualified seniors to apply credits earned in specifically approved courses to both a bachelor's and a master's degree. Acceptance in the program is governed by the rules and procedures set forth by the College. Students in the program must also satisfy the Department's normal admission requirements for the master's degree, including the Graduate Record Examination if required, in order to be admitted to the Graduate School. For further details, students should contact the Department's Director of Graduate Studies.

Political Science and Law (M.A./J.D. Joint Degree)

This department in cooperation with the School of Law offers a joint degree program leading to a Master of Arts degree in Political Science and a Juris Doctor degree.

Admission Requirements

Students must first be admitted to the Law School before applying for this joint degree program. Having entered the Law School, students may then apply for admission to the Master of Arts program in Political Science. Applicants must satisfy all admissions requirements for the Master of Arts in Political Science (see above), except for the Graduate Record Examination which is satisfied by Law School admission. Students should have some undergraduate background in the social sciences, including course work in American politics. Students lacking such preparation may be required to take course work in addition to the minimum required for the degree.

This degree is offered only as a *Plan B* master's program requiring thirty-three credits including a three credit essay. Credit distribution must consist of twenty-one credits of political science including PS 5630, PS 7660, and the essay credit; and twelve credits in law courses. Programs integrating course selections from the two principal areas are developed on an individual basis.

Upon completion of these M.A. requirements and the Law School requirements for the J.D., students are awarded both degrees. Students should begin course work in the Law School and complete the required first year curriculum before taking any Political Science courses. Subsequently, a combination of political science and law courses may be taken. For further information regarding the joint program, students should consult the Department's Director of Graduate Studies.

Academic Scholarship: All course work must be completed in accordance with the regulations of the Graduate School (p. 12) and the College of Liberal Arts and Sciences (p. 201).

Public Administration (M.P.A.)

This program is designed to prepare students for careers in public service in government, nonprofit organizations, and private organizations. The curriculum emphasizes study of the environment of public service, management techniques, organizational dynamics, the policy process, and the analysis of public policies.

Accreditation

The program is accredited by the Network of Schools of Public Policy, Affairs, and Administration.

Admission Requirements

Admission to this program is contingent upon admission to the Graduate School (p. 19). Undergraduate preparation in the social sciences, although recommended, is not required. Applicants must have a 3.0 grade point average in the last sixty credits of undergraduate work to be considered for regular admission. In addition, scores from the Graduate Record Examination (GRE) must be submitted, with the following exceptions:

1. Applicants with an undergraduate grade point average exceeding 3.29 need not submit GRE scores.
2. Applicants holding master's degrees in other fields and having graduate grade point averages of 3.30 or higher in their graduate degree work, need not submit GRE scores. Letters of Recommendation from previous instructors are welcome but not required.

A personal statement citing career goals and objectives is also required.

The Master of Public Administration is offered under the following option:

Plan C: Thirty-nine credits (minimum) in course work.

Of the thirty-nine credits required for the degree, thirty credits are earned in a required set of core courses within the Department. Students without significant administrative background must meet an additional requirement of at least three credits of supervised internship over and above the minimum of thirty-nine credits otherwise required. All students must complete thirty credits of core requirements including:

Code	Title	Credits
PS 5630	Statistics and Data Analysis in Political Science I	4
PS 7300	Public Administration and its Environment	3
PS 7320	Organization Theory and Behavior	3
PS 7330	Public Budgeting and Finance	3
PS 7340	Public Personnel Management	3
PS 7350	Managing Public Organizations and Programs	3
PS 7375	Professional Development Seminar	1-2
PS 7410	Policy Formation and Implementation	3
PS 7460	Program Evaluation	3
or PS 7660	Research Methods in Policy and Politics	
PS 7480	Policy Analysis for Administration	3

As part of the thirty-nine credits, students are also required to complete an area of concentration consisting of at least nine credits, which may require course work outside of political science. Passage of a written comprehensive examination based on the core curriculum is also required to earn this degree.

A student's program is finalized in a Plan of Work that must be filed by the time the student has earned twelve credits. The student should consult the department's M.P.A. program director for guidance in preparing this Plan of Work.

Academic Scholarship: All course work must be completed in accordance with the regulations of the Graduate School (p. 12) and the College of Liberal Arts and Sciences (p. 201).

No credit will be granted for courses taken at Wayne State prior to formal admission to the M.P.A. program without prior authorization of the M.P.A. Program Committee.

Areas of Concentration: Students in the M.P.A. program are required to select an area of concentration consisting of a minimum of nine credits of interrelated course work. Students must consult with, and secure the approval of, the M.P.A. program director prior to undertaking this part of the program, but students pursuing a specific career goal may use the Elective Option to design their own specialization. Areas of concentration include:

- Economic Development Policy and Management
- Health and Human Services Policy and Management
- Human and Fiscal Resource Management
- Non-Profit Policy and Management
- Organizational Behavior and Management
- Urban and Metropolitan Policy and Management
- Elective Option (individually tailored)

Graduate Certificate in Gerontology (p. 323): In conjunction with their degree work, M.P.A. students may also pursue a certificate in gerontology administered by the School of Social Work. Students interested in this program should refer to the Graduate School General Information section of this bulletin, beginning under Graduate School (p. 19).

Graduate Certificate in Economic Development (p. 245): In conjunction with their degree work, M.P.A. students may also pursue a certificate in economic development, administered by the Department Urban Studies and Planning.

Political Science (Ph.D.)

Admission Requirements

Admission to this program is contingent upon admission to the Graduate School (p. 19). All students are required to take the Graduate Record Examination. All applications for admission to the doctoral program in political science must have the approval of the Department's Graduate Committee. Applicants may apply for admission at any time, but all application materials must be received at least six weeks prior to the start of the semester for which admission is sought. Applicants seeking financial aid should apply for Fall semester admission and submit all application materials by January 15.

The doctoral degree in political science indicates not merely superior knowledge of this discipline but also intellectual initiative and the ability to design and carry out independent research and evaluation. Students in their pre-candidacy stage will be judged on the basis of these attributes as well as on their grade-point performance. Possession of a master's degree does not automatically warrant admission to doctoral study.

A Ph.D. student is required to complete a minimum of ninety graduate credits, thirty of which are earned through the dissertation.

Doctoral students structure their course work in terms of a single major field and two minor fields of political science. Major field concentrations may be elected in American government, comparative politics, political theory, public administration, public policy, urban politics, or world politics. Minor concentrations may be in the above seven fields. Other concentrations may be allowed upon approval of the Department's Graduate Studies Committee. Students should consult the Director of Graduate Studies regarding the specific requirements of these concentrations. Satisfactory completion of written and oral final qualifying examinations are a condition for candidacy.

All Ph.D. students are required to teach at least one semester course during their course of study for the degree, unless this requirement is specifically waived by the Director of Graduate Studies.

Admission to candidacy for the doctor's degree will usually require at least two years of full-time graduate study beyond the bachelor's degree. It is granted upon fulfillment of the following requirements:

1. Completion of Department and Graduate School residence and course requirements, including PS 7660 and PS 8600.
2. Filing an approved Plan of Work with the Graduate School.
3. Completion of the general statistics requirement (PS 5630 and PS 6640, or their equivalents);
4. Completion of a preliminary oral examination after the second year of course work for the degree;
5. Completion of the final written qualifying examination.

Approval of Dissertation Prospectus: The candidate is required to prepare and defend a Dissertation prospectus to present following the qualifying examination. The prospectus must be approved by the Dissertation advisory Committee before beginning work on the Dissertation.

Dissertation: The thirty credit dissertation registration requirement is fulfilled by registering for the courses PS 9991, PS 9992, PS 9993, and PS 9994 (Doctoral Dissertation Research and Direction I, II, III, and IV, respectively), in consecutive academic year semesters.

Submission of Dissertation: The candidate is required to submit a doctoral Dissertation on a topic satisfactory to his/her Dissertation Committee, designed to demonstrate proficiency in political science analysis, a capacity for independent and creative research, and the ability to perfect and follow through on an appropriate research or evaluation design.

Academic Scholarship: All course work must be completed in accordance with the regulations of the Graduate School (p. 12) and the College of Liberal Arts and Sciences (p. 201).

Psychology

Office: 7th floor, 5057 Woodward; 313-577-2800

Interim Chairperson: Scott Bowen

Associate Chairperson: Emily Grekin

<http://www.clas.wayne.edu/psychology/>

- Industrial and Organizational Psychology (M.A.) (p. 240)
- Psychology (M.A.) (p. 241)
- Psychology (Ph.D.) (p. 241)
- Infant Mental Health (Ph.D. dual-title program) (p. 242)

Industrial and Organizational Psychology (M.A.)

This program is designed for students interested in pursuing advanced training in applied workplace psychology. This includes:

1. job analysis and the development and validation of personnel selection and performance appraisal systems,
2. the implementation and evaluation of employee and management training and development programs,
3. enhancing employee motivation and morale, and
4. related activities that employ psychological principles and practices to increase organizational effectiveness.

Unlike the Master of Arts with a major in Psychology, this program is NOT a transitional program leading to doctoral degree candidacy.

Admission Requirements

Admission to this program is contingent upon admission to the Graduate School (p. 19). Admission is offered for the fall semester only. The application deadline is June 1 for domestic students, and May 1 for international students. To be considered for admission, an applicant's background should include a minimum undergraduate upper division cumulative grade point average of 3.00, a course in introductory psychology, and a course in statistics (grade of 'B' or better), and they must present their scores from the general portion of the GRE test taken within five years of application. To obtain more information about this program, contact the Department of Psychology (<http://www.clas.wayne.edu/psychology/>).

The Master of Arts in Industrial/Organizational Psychology is offered only as a Plan C option: thirty credits of coursework with no thesis or essay.

Required Courses

Code	Title	Credits
PSY 6500	Advanced Psychological Statistics	3
PSY 6510	Organization Theory	3
PSY 6520	Organizational Behavior	3
PSY 6535	Psychometric Theory	3

PSY 6550	Training and Employee Development	3
PSY 6570	Research Methods in Industrial/Organizational Psychology	3
PSY 7745	Job Analysis and Performance Criteria	3
PSY 7750	Organizational Staffing	3
PSY 7770	Testing in the Workplace	3
PSY 7790	Capstone Course	3
Total Credits		30

Psychology (M.A.)

Admission Requirements

Admission to this program is contingent upon admission to the Graduate School (p. 19).

Only students who have been admitted to the doctoral program in psychology may elect to earn this master's degree; hence all candidates are considered as doctoral applicants.

Applicants holding bachelor's degrees, master's degrees, and/or other advanced degrees will be considered for admission. At the undergraduate level, applicants must have earned a 3.0 or better average in psychology courses and in total course work. A minimum of twelve semester credits in psychology is required and must include a laboratory course and a statistical methods course in psychology. Courses in college mathematics and biology and familiarity with computers are highly recommended. The general Graduate Record Examination (GRE) is required.

The Master of Arts with a major in psychology is offered only as a Plan A master's program requiring thirty-two credits including an eight-credit thesis (PSY 8999). In addition to the thesis, a minimum of twenty-four credits in psychology is required and must include:

Code	Title	Credits
PSY 7150	Quantitative Methods in Psychology I	4
PSY 8150	Multivariate Analysis in Psychology	4

One of the following outside the student's major area:

PSY 7010	History and Systems of Psychology	
PSY 7080	Human Cognition	
PSY 7090	Theories of Learning	
PSY 7120	Biological Basis of Behavior	
PSY 7250	Theory of Personality	
PSY 7400	Introduction to Life-Span Developmental Psychology	
PSY 7590	Industrial and Organizational Psychology	
PSY 7620	Social Psychology: Research and Theory	

Emphasis is placed on factual knowledge, theory, and research methods in general psychology. The thesis involves the use of laboratory or field data and must be approved by the advisor and two other committee members approved by the Departmental Graduate Committee. A final oral examination pertaining to the thesis is required.

All course work must be completed in accordance with the regulations of the Graduate School (p. 12) and the College of Liberal Arts and Sciences (p. 201).

Psychology (Ph.D.)

Admission Requirements

Applicants must complete a Psychology Department application form and provide general GRE test scores, at least three letters of recommendation, and a statement of purpose in addition to the transcripts and application form required by the Graduate School. Application policies and procedures are available on the Department of Psychology (<http://clas.wayne.edu/psychology>) website. Students will not be considered for admission until all documents have been received and evaluated. All forms are due by December 1, and applicants will be notified of the admission committee's decision around March 1.

Because the doctoral degree offered by this department is viewed as a continuation of the Master of Arts degree program in psychology, students are expected to earn the M.A. degree or complete a master's-equivalent project as a preliminary stage in doctoral study. The work of students who hold advanced degrees when they enter this program will be evaluated to determine the extent to which it satisfies the requirements of the M.A. degree in psychology.

The Doctor of Philosophy requires ninety credits beyond the baccalaureate degree, thirty of which must be earned as dissertation credits. Additionally, in order that students may acquire a broad background in the factual and theoretical content of psychology, three substantive courses are required of all doctoral candidates:

Code	Title	Credits
PSY 7150	Quantitative Methods in Psychology I	4
PSY 8150	Multivariate Analysis in Psychology	4
One of the following outside the student's major area:		
PSY 7010	History and Systems of Psychology	
PSY 7080	Human Cognition	
PSY 7090	Theories of Learning	
PSY 7120	Biological Basis of Behavior	
PSY 7250	Theory of Personality	
PSY 7400	Introduction to Life-Span Developmental Psychology	
PSY 7590	Industrial and Organizational Psychology	
PSY 7620	Social Psychology: Research and Theory	

Each student is expected to select a major and minor area of specialization from among the following list. (Alternate minor areas may be developed in consultation with relevant faculty, subject to the approval of the Department Graduate Committee.)

BEHAVIORAL AND COGNITIVE NEUROSCIENCE: This interdisciplinary research and training program prepares students for positions in research and teaching in many areas of neuroscience, including functional cognitive neural imaging, neural physiology, behavioral pharmacology, neurobehavioral teratology, and affective neuroscience. Academic training is provided through foundation courses, specialized seminars, and intensive participation in mentored research based on one-to-one working relationships with faculty members.

CLINICAL PSYCHOLOGY: This training program is accredited by the American Psychological Association and educates students as scientist-practitioners. Students are prepared for a wide range of careers, including research, teaching, clinical practice, and administration. In addition to the basic departmental course requirements for a doctoral degree, students also take courses in professional ethics, psychopathology, psychological assessment,

psychological interventions, and other coursework consistent with APA accreditation. Requirements also include an empirical master's thesis and doctoral dissertation, as well as supervised clinical training in assessment and treatment of clients in our training clinic, external placements, and an internship. Special opportunities for training and research in neuropsychology, child psychology, health psychology, and community psychology are available in the clinical program, with faculty in other areas of the department, and in the community.

The DEVELOPMENTAL SCIENCE area takes a life-span perspective to human development (prenatal to late adulthood), providing students with a strong foundation in dynamic modern developmental theories and models. Current studies focus on many aspects of human development. These include risk and resilience, longitudinal modeling, developmental contexts (e.g., poverty, child care, schooling, culture/ethnicity), parent-child relationships, child maltreatment, stress reactivity/temperament, emotion regulation, joint attention, school readiness, language development, autobiographical memory, ethology, and marital relations. Graduates of our program can work in quite varied positions related to human development, including research, education, human services, and public policy.

The SOCIAL-PERSONALITY sub-area focuses on theory-based basic and applied research. Students can be trained in a variety of experimental, survey research, and intervention methods and techniques, including experimental designs, in person and online survey administration, daily diaries, hormone assays, implicit/automatic processing, and alcohol administration. These research methods are used to address basic research questions in the areas of social cognition, close relationship processes, interpersonal violence, and personality processes.

INDUSTRIAL/ORGANIZATIONAL PSYCHOLOGY offers coursework in Personnel Psychology (including such topics as criterion development, performance evaluation, and personnel selection) and Organizational Psychology (including such topics as employee training and development, motivation and morale, and leadership and executive development). Opportunities exist for field experience in a variety of local and national corporations.

Academic Scholarship: All course work must be completed in accordance with the regulations of the Graduate School (p. 12) and the College of Liberal Arts and Sciences (p. 201).

Residence: All new doctoral students must enroll for their *first academic year* on a full-time basis. Students must complete at least six three-credit courses, exclusive of research and thesis credits, during the first year. Any incompletes in these six courses must be removed prior to the fall semester of the second year.

Examinations: The qualifying examination, a written examination covering the student's major area, is required. It is normally taken after completion of the master's thesis.

Training, Teaching, and Research: Doctoral students are required to participate in a training assignment each academic year they are in residence. This is required of all full-time students, irrespective of whether the training assignment includes a stipend. The student's area committee is responsible for seeing that this requirement is met each year. The training assignment involves appropriate teaching, research (other than thesis or dissertation research) or professional activities.

Dissertation Research: The thirty credit dissertation registration requirement is fulfilled by registering for the courses PSY 9991, PSY 9992,

PSY 9993, and PSY 9994 (Doctoral Dissertation Research and Direction I, II, III, and IV, respectively), in consecutive academic year semesters.

Infant Mental Health (Ph.D. dual-title program)

Students admitted to the Ph.D. program in either the clinical or developmental areas of psychology can apply to earn a Ph.D. in Psychology with a dual-title in Infant Mental Health. This dual-title degree is designed to prepare psychologists to conduct research, advocate for, and intervene to improve early behavioral, cognitive, social, and emotional development in contexts in which parents or children may suffer from developmental disabilities, health problems, or mental health problems. Students enrolled in this dual title program take courses in infant development and assessment and develop specific skills related to infant mental health assessment and treatment. Students in clinical psychology also conduct a clinical practicum in infant mental health. The dual-title course work follows competencies outlined by the Michigan Association for Infant Mental Health that are required for endorsement as an infant mental health specialist or an infant mental health mentor.

Admission Requirements

Applicants must meet the admissions standards of the Graduate School and the Department of Psychology and be offered admission to the psychology doctoral program in either the clinical or developmental areas of psychology. Students may indicate on their application to the psychology program their desire to earn an infant mental health dual-title, or they can request this after an offer of admission has been made. Students already enrolled in the Ph.D. program in psychology during their first three years may also contact the infant mental health program director, Ann Stacks to enroll in the program.

Students are required to take 13 credits of infant mental health coursework. All students must complete and earn at least a grade of B in the following courses:

Code	Title	Credits
SW 7025	Infant Mental Health: Theory to Practice across Early Childhood Settings	2
ELE 7035	Infant and Toddler Developmental Assessment for Intervention Planning	3
PSY 7425	Psychology of Infant Behavior and Development	3
SW 7880	Infant/Family Mental Health Assessment	2
SW 8880	Infant Mental Health Practice	3
Total Credits		13

In addition, dual-title students who are in the clinical psychology doctoral training program are required to complete at least one semester of a supervised field placement / external practicum at an infant mental health agency. Students in both the clinical and developmental doctoral training programs will have their knowledge of infant mental health assessed during their doctoral qualifying examination. In addition, dual-title students must write a dissertation on a topic related to infant mental health.

Sociology

Office: 2228 Faculty/Administration Building; 313-577-2930
Chairperson: Jeffrey D. Kentor
<http://www.clas.wayne.edu/Sociology/>

The graduate programs offered by the Department of Sociology are designed to prepare students for professional careers in a variety of settings. These programs require substantial course work in the general

areas of sociological theory and sociological research methods. In addition to this core required of all students, individual students have considerable flexibility in pursuing course work designed to concentrate on specific areas of substantive specialization in sociology which reflect the current interests and work of the departmental faculty.

- Sociology (M.A.) (p. 243)
- Sociology (Ph.D.) (p. 243)

Sociology (M.A.)

Admission Requirements

Admission to this program is contingent upon admission to the Graduate School (p. 19). In addition, new applicants to the sociology program must satisfy the criteria below. Applications are considered for admission to fall term only; all stages and materials in the application process must be completed by January 15. Materials required for admission include:

1. Graduate Application (demographic and educational profile).
2. Official transcripts from past universities attended.
3. Three (3) letters of recommendation (at least two should be from university or college faculty members).
4. Statement of Interest (this should describe applicants' reasons for graduate study in Sociology, proposed areas of study, and career goals).
5. Writing sample.
6. G.R.E. scores.¹
7. TOEFL scores.²

¹ G.R.E. scores will be considered, but will not be a binding criterion for admission. The Department realizes that scores on standardized tests are greatly influenced by social and cultural factors, and may not be accurate indicators of performance ability. A combined assessment of students' GPA, G.R.E. scores, transcripts, letters of recommendation, writing sample, and statements of interest will be used to make admissions decisions.

² We are currently asking for paper-based TOEFL scores of 600 or above (or internet-based TOEFL scores of 100 or above) for entry into our Ph.D. program. Nonetheless, we will consider students who have a score of 550 or better on the paper version of the TOEFL (or 80 or better on the internet-based version of the TOEFL). The Department realizes that scores on standardized tests are greatly influenced by social and cultural factors, and may not be accurate indicators of performance ability.

A grade point average of at least 3.3 in upper division courses, and in sociology courses, is required for admission consideration to the Master's program.

The Master of Arts degree with a major in Sociology requires a minimum of 30 credits. All course work must be completed in accordance with the regulations of the Graduate School (p. 12) and the College of Liberal Arts and Sciences (p. 201).

The program is offered as Plan A (thesis) or Plan B (essay). Students seeking the Ph.D. degree should select Plan A. Students selecting Plan B have the option of following the curriculum for a concentration in Applied Sociological Research Methodology (see requirements below).

Plan A: Thesis

Code	Title	Credits
SOC 6050	Sociological Theory I	3
SOC 6280	Social Statistics	3

SOC 7200	Advanced Survey of Approaches and Techniques of Social Research	3
SOC 7260	Qualitative Sociology	3

SOC 7500	Advanced Qualitative Methods	3
SOC 7999	Master's Essay	3
Elective		3
Total Credits		30

Sociology (Ph.D.)

Admission Requirements

Admission to this program is contingent upon admission to the Graduate School (p. 19). In addition, applicants must satisfy the criteria listed below. Applications are considered for new admissions to the fall term only; all stages and materials in the application process must be completed by January 15.

Materials required for Ph.D. admission include:

1. Graduate Application (demographic and educational profile).
2. Official transcripts from past universities attended.
3. Three (3) letters of recommendation (at least two should be from university or college faculty members). Preferably, one recommendation letter should come from the student's Master's-level advisor. Students filing "change of status" forms are also required to submit three letters of recommendation.
4. Statement of Interest (describing applicants' reasons for graduate study in sociology, proposed areas of study, and career goals).
5. Writing sample (e.g. a term paper or report).

6. G.R.E. scores.¹
7. TOEFL scores.²

¹ G.R.E. scores will be considered, but will not be a binding criterion for admission. The Department realizes that scores on standardized tests are greatly influenced by social and cultural factors, and may not be accurate indicators of performance ability. A combined assessment of students' GPA, G.R.E. scores, transcripts, letters of recommendation, writing sample, and statements of interest will be used to make admissions decisions.

² We are currently asking for paper-based TOEFL scores of 600 or above (or internet-based TOEFL scores of 100 or above) for entry into our Ph.D. program. Nonetheless, we will consider students who have a score of 550 or better on the paper version of the TOEFL (or 80 or better on the internet-based version of the TOEFL). The Department realizes that scores on standardized tests are greatly influenced by social and cultural factors, and may not be accurate indicators of performance ability.

Applicants should have a 3.5 grade point average (G.P.A.) in their master's degree work and/or previous graduate work. In particular, we will be looking at applicants' grades in any previous methods and theory courses.

Students must complete the following courses prior to taking any other Ph.D. level courses (or their equivalents): SOC 6050, SOC 6280, and SOC 7200. A minimum of a B or better (but preferably a grade of A) is required in all of these master's-level courses before enrolling in Ph.D.-level courses. If students are missing this master's-level coursework when they apply to the Ph.D. program, they may be placed in the M.A. program until they complete these courses

PLEASE NOTE: Students who lack a master's degree in sociology, or have not yet completed the master's requirements in sociology at the time of application, may not be admitted directly into the Ph.D. program. They may be granted admission to the master's program, possibly on a "qualified" basis, in order to take courses in preparation for the Ph.D. program. If students are placed in the master's program to complete preliminary coursework, they will need to apply for a change of status into the Ph.D. program once they have completed this coursework. This change of status is not automatic, and the Graduate Admissions committee will be evaluating students' grades in master's-level courses when considering change of status applications. Any questions about this policy should be directed to the Graduate Director.

1. Students must earn at least ninety credits beyond the B.A. degree, which includes thirty credits in an M.A. degree (which can be transferred from another university in many cases), at least thirty Ph.D. credits in our doctoral program, and thirty dissertation credits. After finishing their required coursework, students working on dissertations must complete four consecutive semesters of Doctoral Dissertation Research (SOC 9991-SOC 9994). If a student has completed all dissertation credits, but still needs to work on the dissertation, then he or she may register for SOC 9995 (doctoral maintenance credits in sociology). SOC 9995 is zero credits and students pay a set fee to be registered; the student will be considered full-time if registered in this course number. A total of six to nine credits of the thirty Ph.D. credits may be earned outside the Department of Sociology (see item 5 below). Students with an M.A. degree from another university must file a transfer of credit form with their plan of work (see note about plan of work below), in order to get credit for up to thirty credits from another master's degree program outside of Wayne State.
2. Advanced Methods Coursework: Other required courses for the Ph.D. program in sociology include SOC 7260 (qualitative methods,

4 credits). Students will then choose either a qualitative track or quantitative track and take one additional methods course in their track. If students choose a qualitative track, they will take SOC 7500 (advanced qualitative methods). If students choose a quantitative track, they will take SOC 6290 (advanced statistics).

3. Specialization Coursework: The Department of Sociology offer Ph.D. specializations in 3 areas: Medical Sociology/Health, Race/ Gender Inequality, and Urban/Labor Studies. Students will take at least 12 credits in one of these areas within our Ph.D. program. Students will also complete Ph.D. preliminary examinations in their chosen specialization (see description of the preliminary exam process below).

Cognate Coursework: Students also will take 6-9 credits in a minor or cognate area (either in a department outside of sociology at Wayne State or in a second specialization area within our department), as part of their Ph.D. program. These cognate credits also can be transferred in from an M.A. degree that is not in sociology, pending approval of advisor and Graduate Director.

Plan of Work: All Ph.D. students must submit a Ph.D. Plan of Work to the Graduate School before 40 credits of coursework have been completed (typically at the end of the student's first full year in the Ph.D. program). This Plan of Work reviews all courses/credits that students will use towards their Ph.D. degrees. Students transferring in Master's credits from another university will need to attach a Transfer of Credit form to their Plan of Work. Students should work with their advisors to complete this plan of work.

Ph.D. Preliminary Exams: The written Ph.D. preliminary examination ("prelim") is taken after students complete their Ph.D. coursework, and before they begin the dissertation process. The Ph.D. prelim is given in January and August of each year, typically the week or two before classes resume (students should pay special attention to announcements about prelim dates for each semester). The Ph.D. prelim corresponds to students' areas of specialization; thus, students will elect to take one of the following prelims: medical/ health, race/ethnicity, gender, labor, or urban.

All Ph.D. prelims consist of 3 parts, taken over a 2 day period. The format is as follows:

1. Day One, Morning: Examination on sociological theory as applied to the student's area of specialization.
2. Day One, Afternoon: Examination on research methods, as applied to the student's area of specialization.
3. Day Two, Morning: Examination on the content of the individual student's research interest as related to the dissertation.

Students should take their prelim soon after they have completed their required Ph.D. coursework in sociological theory, research methods, and their area of specialization. To apply to take the prelim, students should fill out the Prelim Application Form (<http://www.clas.wayne.edu/Sociology>) found on our website. Students should consult the chair of their specialization area for specific information about the specialization (i.e., courses that satisfy the Ph.D. specialization requirement, reading lists for the prelims, upcoming dates for the prelim, grading committee members, etc.)

Students must pass prelims in full before they can file for Ph.D. candidacy and begin their dissertations. Students receive two chances to pass Ph.D. prelims, but they should attempt to pass prelims on the first try (see guidelines for satisfactory academic progress below). If student fail their prelims a second time, they are dismissed from the Ph.D. program. Only in extremely rare circumstances are students granted a third chance at the prelim. Students should consult their advisors, the chair of their

specialization area, and the Graduate Director before taking the prelim to ensure that they are ready to take the prelim. Students can also contact the Graduate Director to find out more about prelim policies.

If students are done with their required Ph.D. coursework but have not passed their prelims, they can enroll in SOC 9990 (pre-dissertation credits) in order to maintain active student status. Students are sometimes allowed to enroll early in SOC 9991 (the first set of dissertation credits) if they are taking those credits during the semester that they are taking prelims. Students can contact the Graduate Director to talk further about this possibility.

Ph.D. Candidacy Status: following successful completion of their Ph.D. coursework and Ph.D. prelims, the student should select a 4-person dissertation committee and fill out a "Recommendation for Ph.D. Candidacy" form (available on the Graduate School's website). A dissertation committee includes three members of the sociology faculty (of which one is the student's advisor) and one outside member (typically a faculty member from another department at Wayne State who has expertise in the student's dissertation topic, but sometimes a student can find a faculty member from outside Wayne State who is willing to serve). All four committee members must sign onto a student's dissertation committee and sign the candidacy form before students are allowed to become a Ph.D. candidate and begin their dissertation credits

Dissertation Proposal: The dissertation proposal represents the oral qualifying exam for the purposes of the Graduate School. Examiners will be the student's dissertation committee (as outlined above). The student will submit a dissertation proposal to his/her dissertation committee, after that proposal has been approved in full by the student's advisor. Dissertation proposals include a short introductory chapter, a chapter of literature review, a chapter detailing students' theoretical or conceptual framework (although sometimes this is combined with the literature review), and a methods chapter that proposes how they will engage in their dissertation research. The student will work with their dissertation advisor to finalize the proposal. Once the advisor approves the draft, the student will submit the proposal draft to the entire dissertation committee for review. Committee members will receive at least 3 weeks (preferably one month) to review the proposal draft and decide whether it is defensible. If all committee members agree that the proposal is defensible, an oral defense of the dissertation proposal will be scheduled. Students should consult with their advisors to prepare for this oral defense. If students pass the oral defense of their proposal, their committee members will sign the "Prospectus and Record of Approval" form (available on the Graduate School's website). Once the student defends the dissertation proposal successfully, the student will work with their advisor to gain IRB approval (if necessary) for the dissertation research project and begin data collection. Dissertation proposals range in length, depending on the project. On average, students work on their dissertation proposals for two semesters before they defend them successfully.

Doctoral applicants are required to have two successive semesters in residence as full-time students as defined by the Graduate School.

Doctoral students are encouraged to engage in teaching and research as a condition for qualifying for a degree.

Satisfactory Academic Progress Guidelines have been developed by the graduate committee in sociology in order to guide students towards successful completion of their master's and Ph.D. degrees.

Academic Scholarship: All course work must be completed in accordance with the regulations of the Graduate School (p. 12) and the College of Liberal Arts and Sciences (p. 201).

Urban Studies and Planning

Office: 3198 Faculty Administration Building; 313-577-2701

Chairperson: Rayman Mohamed

<http://www.CLAS.wayne.edu/DUSP/>

The planning profession offers a systematic, creative way to influence the future of neighborhoods, cities, rural and metropolitan areas, even the country and the world. Urban and regional planners use their professional skills to serve communities facing social, economic, environmental and cultural challenges by helping residents to:

- Develop ways to preserve and enhance their quality of life
- Find methods to protect the natural and built environment
- Identify policies to promote equity and equality
- Structure programs to improve services to disadvantaged communities, and
- Determine methods to deal effectively with growth and development of all kinds.

The majority of planners work in traditional planning areas such as community development, land use, housing, transportation planning, environmental/natural resource planning, economic development, urban design, historic preservation and community activism. Other planners work in emerging fields such as healthy communities, food systems, energy development, or place-making.

The program seeks to prepare individuals to work with local and state public agencies, nonprofit organizations and for consultants and others in the private sector.

Accreditation: The Master of Urban Planning program is accredited by the Planning Accreditation Board.

- Urban Planning (M.U.P.) (p. 246)
- Economic Development (Graduate Certificate) (p. 245)

Economic Development (Graduate Certificate)

The Graduate Certificate Program in Economic Development equips students with conceptual and methodological tools with which to pursue economic development activities in state, regional and local governments; non-profit and community organizations; private associations such as chambers of commerce; or private businesses and civic institutions engaged in economic development. It is administered in conjunction with the following graduate programs:

- Sociology
- Business Administration
- Economics
- Employment and Labor Relations
- Public Administration
- Urban Planning.

The Certificate is designed for students who wish to combine a graduate degree (master's or doctoral) with a specialty in urban, regional and state economic development. It will be awarded only in conjunction with the completion of a graduate degree or to those already holding such a degree.

Admission Requirements

Applicants must meet the admission standards of the Graduate School. (p. 19) Eligibility for this program is limited to persons holding a graduate degree from an accredited educational institution or those actively

pursuing a graduate degree at Wayne State University. Applicants must submit a completed application form, personal statement of interest in the program, and Plan of Work.

Students must complete twelve credits in designated courses, including Core Area I, and courses (at least three credits each) from two of the Core Areas II, III, and IV. At least one course at the 7000 level must be elected, and at least one course (in addition to the Area I course) must be elected from outside the student's graduate program.

Students in the certificate program must maintain a grade point average of at least 3.0. Transfer of credit from other institutions may not be applied toward the credits required for the certificate. If a student is concurrently enrolled in a graduate degree program at the University, no more than nine credits from the certificate program may be applied toward that degree.

Academic Scholarship: All course work must be completed in accordance with the regulations of the Graduate School (p. 12) and the College of Liberal Arts and Sciences (p. 201).

Urban Planning	
UP 6650	Planning and Development Law

For further information about this certificate program, contact the graduate advisor of the program in which you are enrolled or wish to enroll. Students who are not in a graduate program in applied sociology, business administration, economics, industrial relations, public administration, or urban planning, or who do not already possess a graduate degree in one of these areas, should contact the Department.

The Economic Development Graduate Certificate is designed to be completed in 1 years.

This program will cost \$10,382.38 for in-state tuition and fees and \$19,582.42 for out-of-state tuition and fees if completed within normal time. There may be additional costs for living expenses. These costs were accurate at the time of posting, but may have changed.

Fewer than 10 students completed this program within normal time. Typical student debt has been withheld to preserve the confidentiality of the students.

This program does not meet any licensure requirements.

For more information about graduation rates, loan repayment rates, and post-enrollment earnings about this institution and other postsecondary institutions please click here: <https://collegescorecard.ed.gov/>.

Urban Planning (M.U.P.)

Admission Requirements

Admission to this program is contingent upon admission to the Graduate School (p. 19).

The Master of Urban Planning is offered by this department under the following options:

Plan A: Forty-eight credits including an eight credit thesis.

Plan B: Forty-eight credits including a three credit essay.

The distribution of the forty-eight credits is as follows: twenty-three credits in required courses (listed below), which build the core of the program; selection of elective courses (between thirteen and seventeen credits) to form a topic concentration; and the completion of a capstone component that includes an integrative project (UP 7700, four credits), and a master's essay (UP 7999, three credits) or master's thesis (UP 8999, eight credits). Students are strongly advised to pursue Plan B, but may petition to pursue Plan A.

Required (Core) Courses

Code	Title	Credits
UP 5010	Resources and Communication in Planning	3
UP 5110	Urban Planning Process	3
UP 6120	Planning Studies and Methods	4
UP 6320	Quantitative Techniques I	4
UP 6510	Urban and Regional Systems	3
UP 6650	Planning and Development Law	3
UP 7010	Planning and Decision Theory	3

Electives: Following completion of at least twelve credits in required courses, students will, in consultation with their assigned faculty advisor, devise a Plan of Work, selecting elective courses that constitute one of three concentrations:

- Housing and Community Development
- Urban Economic Development
- Managing Metropolitan Growth.

With the approval of the Director of the Urban Planning Program, a student may design his/her own topic of concentration.

Prior completion of courses equivalent to the program requirements may form a basis for reducing credits in any individual Plan of Work. Possession of a master's degree in an area of study determined to be related to urban planning by the Graduate Program Committee may allow an applicant to elect a program of thirty-two credits, inclusive of capstone requirements.

Academic Scholarship: All course work must be completed in accordance with the regulations of the Graduate School (p. 12) and the College of Liberal Arts and Sciences (p. 201).

SCHOOL OF MEDICINE

Dean: Jack D. Sobel, M.D.

The Wayne State University School of Medicine faculty and staff will graduate a diverse group of physicians and biomedical scientists who will transform the promise of equal health into a reality for all. We will educate a diverse student body in an urban setting and within a culture of inclusion, through high-quality education, clinical excellence, pioneering research, local investment in our community and innovative technology, to prepare physician and biomedical scientific leaders to achieve health and wellness for our society. We are privileged to serve our community, state, nation, and the world as innovators in medicine, health, prevention and wellness.

The school offers educational programs leading to the Doctor of Medicine, Doctor of Philosophy, Master of Science and Master of Public Health degrees. Graduate education in clinical fields, postdoctoral study and continuing medical education programs, as well as a joint M.D.-Ph.D. degree, also are offered. About 300 students are admitted annually to the medical degree program and approximately 400 students are enrolled in doctoral or master's degree study in 19 program areas, including the medical degree/doctoral combined-degree program. More than 900 students are post-graduate trainees as medical residents, post-doctoral fellows, or fellows in 29 clinical research programs. Continuing education programs, seminars and colloquiums serve the faculty and students, as well as professionals throughout the community as a resource for current and ongoing developments in the health sciences. In addition to degree programs, the school offers courses in many basic medical science disciplines appropriate for students in other colleges and schools of Wayne State University. Non-degree enrollment in basic science courses at the graduate level is permitted on a limited basis for qualified students.

Research focusing on human health is the foundation of activities in the School of Medicine. Fundamental and applied research in biomedical sciences, clinical specialties and health care systems is directed by the faculty. Research programs are supported by more than \$120 million annually in research grants, contracts and gifts. Members of the faculty serve on scientific boards, panels, study groups and in professional leadership roles in health care regionally, nationally and internationally.

Clinical services provided by the faculty, post-graduates and students are rendered throughout Detroit's hospitals. The school also is affiliated with these hospitals for the purpose of conducting undergraduate and graduate medical education.

History of the School

In 1868, five physicians who witnessed the crude medical treatment on Civil War battlefields dedicated themselves to advancing health education and care, and founded the Detroit Medical College in Detroit. Originally named the Detroit Medical College, it was founded by five physicians who served in the U.S. Civil War, and upon their return determined that the city of Detroit deserved a medical school.

Today, nearly 150 years after its establishment, the Wayne State University School of Medicine is still fueled by the passion for its community and dedication to urban clinical excellence. Through social responsiveness and a continuous focus on innovation in education, research and clinical care, the School of Medicine continues to graduate a diverse group of health care leaders and advocates who go on to transform the promise of equal health care for all into a reality.

Accreditation

Programs in the Wayne State University School of Medicine are accredited by the Liaison Committee on Medical Education, representing the American Medical Association and the Association of American

Medical Colleges (the medical doctor program); the Liaison Committee of Graduate Medical Education of the Accrediting Council for Graduate Medical Education and various Residency Review Committees (residency programs); and the Accreditation Council of Continuing Medical Education (Continuing Medical Education).

Graduate Degrees and Certificates

There are two major types of academic programs in the School of Medicine, those leading to the M.D. degree and postgraduate medical education; and those programs in the basic medical sciences which offer Master of Science or Doctor of Philosophy degrees.

Shiffman Medical Library and Learning Resources Centers

Director: Sandra I. Martin

Librarians: Katherine Akers, LaVentra Ellis-Danquah, Qian Hu, Wendy Gang Wu.

Library resources are made available to graduate students through a variety of services from the Shiffman Medical Library in the Richard J. Mazurek Medical Education Commons. They include reference and research support, document delivery / interlibrary loan, and instruction. Orientation programs, small group workshops and individualized instruction featuring the latest information resources are available to graduate students throughout their program. Key services in support of graduate education include: reference service, remote and on-site electronic access to the major biomedical databases including PubMed, Scopus, Science Citation Index, various clinical decision support tools such as ClinicalKey, and UpToDate, and an array of electronic tools for effective information management. Materials not available in the WSU Libraries are obtained for graduate students free of charge. Access to library collections from research institution across the country including the National Library of Medicine, University of Michigan, Michigan State University and various specialized collections is also available to graduate students.

The library's goal is to support each graduate student's individualized needs through graduation and for self-directed, life-long learning. Librarians are available for consultation, for help in identifying useful literature and using the latest file management programs to organize the references at any point during their program. Librarians can also provide students with time-saving tips to prepare manuscripts. Shiffman Library offers access to a number of databases to assist students in acquiring external funding. The library staff is committed to acquiring the materials needed to support the array of graduate programs offered by the affiliated colleges. A computer lab is available in the library for graduate students use. The lab contains five desktop workstations, one adaptive workstation, a standalone scanner, and a fully wired teacher's lectern.

Please contact the library for more information about current and planned services. The staff of the Shiffman Library is committed to enabling transparent discovery and access to the best possible resources that expeditiously and effectively meet student and faculty needs.

Office of Student Affairs

Associate Dean for Student Affairs and Career Development: Margit Chadwell, M.D.

The Office of Student Affairs is under the supervision of an associate dean. Services include: career and supportive counseling; crisis intervention; liaison for referrals; academic advising; guidance for residency application; support for student government and organization activities as well as oversight of Special Events, the Health and Wellness Program and the Medical Student Faculty Mentoring Program. The staff is committed to assisting students in every way possible as the students work toward M.D. degrees. These programs are part of the School's

commitment to provide each matriculant with support services so that the rigorous educational program can be presented within as comfortable an environment as possible.

Counseling: Appointments for confidential supportive and career counseling can be arranged through the Office of Student Affairs.

Mentoring: Faculty mentors are provided through the Office of Student Affairs for the purpose of giving guidance and support to the medical students throughout their medical school careers.

Health and Wellness: The Health and Wellness Program was developed so that each student optimizes healthy coping strategies, finds good balance and achieves academic success throughout medical school.

Office of Development and Alumni Affairs

Office: 540 E. Canfield, 1369 Scott Hall; Detroit, MI 48201

Associate Vice President: Stephen Henrie, CFRE

The Wayne State University School of Medicine Office of Development and Alumni Affairs and the Medical Alumni Association exist to support the advancement of the School of Medicine by establishing and cultivating mutually beneficial, lifelong relationships between alumni, students and the School of Medicine. The Office of Development and Alumni Affairs and the Medical Alumni Association work collaboratively to develop services, benefits, programs and communications designed to foster awareness, generate pride, encourage involvement and increase engagement and financial support.

We are proud to serve and represent the broad array of more than 22,000 alumni who were educated and trained at the WSUSOM – Physicians, Researchers, Residents and Fellows.

Office of Marketing and Communications

Office: 540 E. Canfield, 1320 Scott Hall, Detroit, MI 48201

This office is responsible for the marketing, communications and public relations programs for the Wayne State University School of Medicine. The office leads strategy on a wide array of communications initiatives aimed at raising the stature of the Wayne State University School of Medicine and its prominence in medical education, research, care and community engagement. The office takes an integrated approach, leveraging resources and collaborating across our campus and community to enhance the School of Medicine brand in Detroit and beyond. Some areas of focus include media relations, digital communications, advertising and outreach, collateral publications and editorial services.

Doctor of Medicine Educational Goals

The Wayne State University School of Medicine has established a comprehensive set of competencies and institutional learning objectives for the Doctor of Medicine program. This list formalizes the goals of a WSU medical education, and defines what a graduating physician should know to practice medicine in the 21st century. There are six general competencies, including:

1. integration of the basic sciences in medicine;
2. integration of clinical knowledge and skills to patient care;
3. interpersonal and communication skills;
4. professionalism;

5. organizational and systems-based approaches to medicine, and;
6. life-long learning and self-improvement.

Each of these competencies is further refined into specific educational objectives which are taught and measured through the medical school curriculum.

Continuing Medical Education

Assistant Dean: David R. Pieper, Ph.D.

The Division of Continuing Medical Education (CME) was established to provide medical education activities to physicians who have completed their training, as well as support in graduate medical education programs. The CME Division is concerned with addressing the continuing medical education needs of physicians residing in the tri-county area of metropolitan Detroit, as well as the needs of the other physicians in the state and country.

Various special conferences, symposia and workshops, lasting one to five days, are offered under the academic sponsorship of the departments in the Medical School. Physicians from Michigan and many other states and countries attend meetings which reflect new discoveries and changes in needs and interests in medicine. Every effort is made to assist physicians in their continuing efforts to increase their competence and to improve their skills on behalf of the patients they serve.

In addition to these special programs, 'continuing' activities of one- to two-hour duration are scheduled at regular intervals during the year. Physicians are encouraged to participate in the departmental workshops, teaching rounds and grand rounds that meet their interests or needs; they are conducted in the clinical settings of Wayne State University and the Detroit Medical Center.

Other types of CME activities offered by the Wayne State University School of Medicine include journal based CME, web based CME and CME associated with Learning from Teaching.

There are increasing pressures on practicing physicians to maintain and update their professional competence and skills. Wayne State University School of Medicine is striving to respond to these needs through continuing medical education. Inquiries may be directed to the Division for information about programs on specific subjects or programs for specific medical specialties.

Accreditation (CME)

Wayne State University School of Medicine is accredited by the Accreditation Council of Continuing Medical Education (ACCME) to sponsor continuing medical education (CME) for physicians. As an accredited sponsor of CME, the School designates certain of its continuing medical education offerings as meeting the criteria for Category 1 of the Physician's Recognition Award of the American Medical Association, and for the requirements for license renewal by the Michigan Medical Practice Board. Other certifications from various medical specialty societies and boards are secured for individual offerings as may be required.

Graduate Medical Education Program (GME)

Associate Dean and Designated Institutional Official: Tsveti Markova, MD, FAAFP

Graduate Medical Education (GME) at Wayne State University (WSU) is an essential element of a diverse and rich academic environment encompassing many specialties and sub-specialties in the practice of

medicine. The residency programs directly impact the lives of thousands through patient care, but most importantly through the educational mission that reaches beyond hospitals to the community. Graduate Medical Education at WSU produces exceptional physicians who are committed to provide outstanding care to the communities we serve including not only the city of Detroit and the surrounding metropolitan area, but the state of Michigan and beyond. GME provides service to our communities, support to our peers, and training to our residents, and extends our medical knowledge, compassion and skills toward our mission of patient safety and quality healthcare for today and tomorrow. Wayne State University as a sponsoring institution has achieved the maximum Accreditation Council for Graduate Medical Education (ACGME) accreditation status with no citations and a commendation. The next site visit is scheduled in 2024.

WSU is the sole sponsoring institution of ten Graduate Medical Education programs for 150 residents and fellows in the following areas:

- Anesthesiology
- Brain Imaging Medicine
- Dermatology
- Family Medicine
- Internal Medicine
- Ophthalmic Plastic and Reconstructive Surgery
- Otolaryngology
- Physical Medicine and Rehabilitation
- Urology
- Transitional Year.

These programs are based mainly with our hospital partners to assure an optimal learning environment: Ascension Crittenton Hospital, Beaumont Health Hospitals – Taylor and Dearborn, St. Joseph Mercy Oakland Hospital, Barbara Ann Karmanos Cancer Institute, and John Dingell Veterans Administration Medical Center.

The School of Medicine, through its Graduate Medical Education Committee (GMEC) and the Office of Graduate Medical Education, holds the ultimate responsibility for all GME programs sponsored by the university. The Office of GME tracks program outcome measures, conducts extensive internal reviews of each GME program, and ensures that each program teaches and assesses the ACGME general competencies and associated milestones in the areas of: patient care, medical knowledge, practice-based learning and Improvement, interpersonal and communication skills, professionalism, and systems-based practice. Other GME office responsibilities include:

- Demonstrating an overall commitment to GME;
- Maintaining affiliation agreements with other institutions participating in GME;
- Monitoring the Joint Commission status of participating institutions;
- Ensuring that formal quality assurance programs are conducted at participating institutions;
- Monitoring eligibility and selection of residents;
- Monitoring all aspects of resident appointment;
- Ensuring resident participation in:
 - educational and professional activities,
 - patient safety and quality of care education,
- Overseeing the residents' work environment; and adhering to the ACGME Duty Hour standards.
- Development and implementation of residency and faculty educational programs,
- Oversight of Graduate Medical Education Committee,

- Designing curricula and oversee the development of scholarship and research,
- Organizing an annual GME orientation and
- Overall design and implementation of policies and procedures adhering to the ACGME requirements.

All program participants are involved in a system of graduate teaching responsibilities within the realm of clinical diagnosis and patient care, including contribution to the teaching of medical students who rotate through the clinical department. Orientation programs, teaching conferences and seminars, bedside teaching, and a wide variety of supervised surgical and technical training are a systematic part of the graduate medical education of the physicians in the various specialty programs.

In addition to the WSU-sole sponsored programs, the SOM has affiliated GME programs with two major regional health care systems: Detroit Medical Center and Henry Ford Health System.

Medicine (M.D. Program)

Academic Recommendations for Admission

Although the Wayne State University School of Medicine prefers that applicants for admission have earned a bachelor's degree, it will occasionally consider students of unusual academic attainment and maturity who have completed three years of college.

Required subjects for baccalaureate preparation are:

- general physics with laboratory, one year;
- inorganic and organic chemistry with laboratory, one year each;
- general biology or zoology with laboratory.

Additionally, starting with students admitted for the 2014-2015 academic year, it is strongly recommended that students take a course in statistics, ethics, and biochemistry. The student is urged to select additional subjects which will contribute substantially to a broad cultural background.

It is to be noted that when students are accepted before completion of their premedical requirements, they must maintain a satisfactory scholastic average in their continued premedical work to warrant enrollment in the School of Medicine.

The *Medical College Admission Test* is required of all applicants for admission into the first year class. Students seeking admission into the August freshman class should take this test no later than September of the previous year. After a preliminary review of application credentials, interviews are held with those applicants who warrant further consideration.

Admission to the First-Year Class

The School of Medicine adheres to the acceptance procedures of the Association of American Medical Colleges, including the 'Early Decision Plan.' Admission procedures of the School are:

1. No place in the first-year class shall be offered to an applicant more than one year before the actual start of instruction for that class.
2. Following the receipt of an offer of a place in the first-year class, a student shall be allowed three weeks in which to make a written reply.
3. No student who has at any time been requested to withdraw for any reason from a medical school in which he/she has been registered will be accepted by the WSU School of Medicine. Students who have been dropped for poor scholarship by the School of Medicine should not expect favorable consideration for readmission.

4. Any applicant accepted by the School of Medicine who does not complete enrollment must apply for readmission and meet all requirements in force at the time of such new application.

Admission with Advanced Standing

Students from approved L.C.M.E. American medical schools may be admitted with advanced standing to the third year only, subject to the number of vacancies which may exist in the second and third years.

Application for advanced standing should be made not later than July 15. The following requirements must be met:

1. An applicant must have matriculated as a student in an approved United States or Canadian medical school for a period of time equal to that spent by the class in which he/she seeks entrance and must have completed courses equivalent to those required of that class.
2. The applicant must file a completed application form and must present official transcripts from each school attended showing that he/she meets, in full, the entrance requirements for admission to this school.
3. The applicant must be a student in good standing at the medical school from which he/she is withdrawing. A letter of support from the dean of that school is required.
4. The applicant must take such examinations in the courses for which he/she seeks credit as may be required by the faculty of the School of Medicine, such as the USMLE Step 1 examination.

Diversity and Integrated Student Services

Director: DeAndrea Wiggins

This unit supports the medical school to maintain its representation of diversity across economic, personal and social dimensions. This is accomplished through pipeline outreach programs and special projects that present a combination of academic and extracurricular activities designed to inform high school, undergraduate and post-baccalaureate students about career opportunities in medicine and other health professions, and prepare them to gain admission.

A special program feature of the unit is the Post Baccalaureate Program. This medical school preparatory program offers an opportunity to a small number of applicants who are Michigan residents, and whose undergraduate academic achievement has been compromised by certain disadvantaging factors to gain admission into medical school. Successful completion of this special one year program facilitates entry into medical school for those selected applicants from disadvantaged backgrounds.

Registration Requirements

Physical Examination

Freshman medical students are sent a physical form with registration materials. Each student must present proof of a physical examination at or before registration for the freshman year. Students are also required to be annually tested for TB (skin test or chest x-ray).

Health Insurance

Health insurance is mandatory and students must demonstrate proof of insurance at registration. Students have the option of purchasing the group plan offered by the Medical School, which can be purchased at registration.

Disability Insurance is mandatory and can be purchased at registration.

Criminal Background Check: All accepted applicants to the medical school will be required to complete a criminal background check through AMCAS and Certiphi, the selected vendor for criminal background checks.

Transcripts

Transcripts of all university-level work must be on file in the Registrar's Office for each medical student, including the degree statement from the university from which the student obtained his/her degree.

Financial Aid

The primary responsibility for financing a medical education rests with the student and his or her family. However, assistance is available to students who demonstrate financial need and meet all other eligibility criteria. Students anticipating the need for financial assistance during their medical education should begin researching their options as early as possible.

Students wishing to be considered for financial assistance must begin by completing a Free Application for Federal Student Aid (FAFSA). Although medical students are automatically considered independent for the purposes of completing the FAFSA, parental data is required if a student wishes to be considered for institutional aid programs. The School of Medicine's priority filing deadline is March 1st of each year. Students interested in attending the WSU School of Medicine should complete the application process by the priority date even if their admission has not yet been confirmed.

For students who qualify, financial aid is available in the form of loans, grants, scholarships and/or work-study, from federal, state, institutional and/or private sources. Offers of assistance are made to students after they have fulfilled all financial aid requirements and have been admitted to the School of Medicine.

The Admissions Office awards renewable full and partial tuition scholarships to a number of incoming freshmen per year in the amount of resident tuition. Partial tuition Board of Governors grants are awarded each year based on family financial need. Restricted private donor and private organization funds are awarded to students who demonstrate financial and merit-based criteria and meet the guidelines specified by the donor. Student loans are available through U.S. and Canadian government loan programs and credit-based private educational loan programs. Credit-based private educational loan programs generally require that non-U.S. students provide a credit worthy U.S. co-signer.

Service obligation programs are available to students who are willing to fulfill a commitment of 'service' to the organization providing the funding. Most programs require one year of service for each year of funding. The Health Professions Scholarship Program offered by the Army, Navy and Air Force requires payback as a military medical officer. The U.S. Public Health Service offers the National Health Service Corps scholarship to medical students who commit to practicing primary care medicine in federally designated physician shortage areas for their service payback.

Students may wish to pursue outside sources of aid through community foundations, clubs, churches, employers, hospitals, or other nonprofit agencies. Web-based scholarship searches are available at no cost to the user. Students should avoid using fee-based scholarship search services and be wary of scholarship scams.

Academic Program

The Office of Undergraduate Medical Education is responsible for the overall management, administration, and supervision of the undergraduate medical curriculum. The undergraduate program in medicine consists of a core curriculum in normal and abnormal human biology followed by clerkships in clinical medicine and a year of required and elective experiences.

In the first year, through concentrated study of anatomy, histology, embryology, physiology, biochemistry, and genetics, students learn about

the normal structure and function of the human body. In addition, there are units of study devoted to the neurosciences, translational medicine and to an introduction to clinical medicine.

In the second year, through concentrated study of pathology, immunology and microbiology, pharmacology, and psychiatry, students learn the basics of the effects of disease processes on structure and function, and the principles of drug action and therapy. This is followed by interdisciplinary organ system units of study devoted primarily to pathophysiology. Clinicians as well as basic scientists serve as lecturers. Additionally, students take a translational medicine course and through the clinical medicine II course, students receive training in preventive medicine, human values and ethics, physical diagnosis, clinical interviewing, human sexuality, laboratory medicine, and public health.

The third year curriculum consists of clerkships providing inpatient and outpatient clinical education and training in internal medicine, surgery, gynecology/obstetrics, pediatrics, psychiatry, neurology, and family medicine, and an office-based continuity clerkship.

The fourth year is devoted to required and elective study and all students are required to take a subinternship in medicine, and a month of emergency medicine. Within certain guidelines (for example, five of the eight elective periods must be spent in hospitals with a major Wayne State University affiliation), students can select from over 150 electives in 23 disciplines. In addition to the many programs offered by Wayne University, students can take advantage of approved elective programs offered by other institutions.

Students must pass Step 1 of the USMLE (United States Medical Licensing Examination) in order to be promoted from Year II to Year III. Students must also pass Step 2 (both clinical knowledge and clinical skills) examinations in order to graduate.

Matriculation and Promotion

Primary evaluation of students is the responsibility of the faculty of the appropriate departments or courses for Year I-III students, and the Elective Course Coordinators for Year IV students.

Students are evaluated promptly by the primary evaluators, who make recommendations to the Promotions Committee which may include: promotion, re-examination, repetition of all or part of the year, interruption or suspension or probation of a student's program, or dismissal. Questions of suitability for the study and practice of medicine on other than academic grounds are handled according to the University's 'Guidelines for Assisting Persons with Behavioral Problems.'

The Promotions Committee is chaired by the Vice Dean for Medical Education or his/her designee and consists of twelve members: four nominated from the faculty by the President of the Faculty Senate, with the advice and consent of the Executive Committee; four nominated from the Council of Departmental Chairpersons; and four selected by and from the student body. Faculty members serve three-year terms. Student members serve for one year and have full discussion privileges. Their votes are advisory to the Committee.

At appropriate intervals, the Promotions Committee meets to make promotional decisions based upon the student's academic performance. The Committee has the obligation to assure that the rules of the School and the rights of the individuals involved have been fairly met. Decisions are transmitted for the Committee by the Associate Dean for Academic and Student Programs. Students have the right to appeal such decisions by direct petition to the Promotions Committee. In the event of such an appeal, the Committee may gather evidence and hear witnesses. The student involved has the right to be heard by the Committee and may call a reasonable number of witnesses to testify in his/her behalf. The

Promotions Committee is the final decision-making body with regard to the promotion process. The student has the right to request the Office of the Provost to review any determinations made by the Promotions Committee of the School of Medicine relative to academic performance on his/her part.

Leaves of Absence may be granted to students with documented health problems (medical leave of absence), or to those with appropriate educational opportunities outside the School (educational leave of absence), for personal reasons (personal leave of absence); or the medical school can put students on an administrative leave of absence.

Any students whose enrollment is continued by the Promotions Committee, or, in the case of Leaves of Absence, by the Vice Dean for Medical Education or his/her designee, is considered to be making academic progress toward the M.D. degree.

Grading

The grading system throughout all years of the School's curriculum is:

- 'H' (Honors)
- 'S' (Satisfactory)
- 'U' (Unsatisfactory)
- 'I' (Incomplete)

The exception to this rule is Year 3 where an S+ (Satisfactory with commendations) can be achieved in all clerkships except the Continuity Clinic Clerkship. The minimum passing grade is 'S.' In order to be promoted from year to year, students must obtain 'S' on all course work and complete all requirements established by course directors.

Graduation Requirements

Students regularly registered in the School of Medicine may receive the degree Doctor of Medicine upon the fulfillment of the following requirements:

1. They must be at least 21 years of age, must exhibit good moral character, and must be suitable for the practice of medicine.
2. They must have satisfactorily completed all the academic requirements established by the School.
3. They must have paid all fees in full, and have all holds released.
4. They must pass Step 1 and pass Step 2 (clinical knowledge) and Step 2 (clinical skills) of National Board examinations.

M.D. Curriculum

Year 1

Code	Title	Credits
Courses include:		
MD1 5050	Advanced Learning Strategies for Physicians in Training	2
MD1 5051	Foundations of Normal Structure and Function	4
MD1 5053	Block 3 Lab	2
MD1 5054	Normal Structure and Function of the Gastrointestinal and Urinary Systems	3
MD1 5055	Block 4 Lab	1
MD1 5056	Normal Structure and Function of the Reproductive, Endocrine, Blood, and Lymphatic Systems	3
MD1 5057	Block 5 Lab	1
MD1 5058	Normal Structure and Function of the Central Nervous System	3

MD1 5059	Block 6 Lab	2
MD1 5060	Clinical Skills Course I	5
MD1 5061	Clinical Skills Course II	3
MD1 5062	Population, Patient, Physician and Professionalism (P4) Part I	9
MD1 5063	Normal Structure and Function of the Musculoskeletal, Skin and Peripheral Nervous Systems	2
MD1 5065	Normal Structure and Function of the Cardiopulmonary Systems	3
MD1 5066	Block 3.5 Lab	3
MD1 5150	Community Engagement Part I	5
MD1 5151	Leadership and External Affairs Development (LEAD) / Medical Political Action (MPAC)	5

Year 2

Code	Title	Credits
Courses include:		
MD2 6700	Foundations Course: Fundamentals of Human Disease	7
MD2 6701	Population, Patient, Physician and Professionalism (P4) Part II	5
MD2 6702	Musculoskeletal, Skin and Peripheral Nervous Systems: Fundamentals of Human Disease	3
MD2 6703	Cardiopulmonary Systems: Fundamentals of Human Disease	5
MD2 6704	Gasointestinal Systems: Fundamentals of Human Disease	3
MD2 6705	Renal and Urinary Systems: Fundamentals of Human Disease	2
MD2 6706	Endocrine and Reproductive Systems: Fundamentals of Human Disease	3
MD2 6707	Hematopoietic and Lymphoid Systems: Fundamentals of Human Disease	2
MD2 6708	Central Nervous System: Fundamentals of Human Disease	3
MD2 6709	Clinical Skills Course III	3
MD2 6710	Clinical Experiential Clerkship	4
MD2 6711	Medical Political Action and Public Health Leadership (MPAC) Part II	5
MD2 6712	Community Engagement Part II	5
MD2 6713	Medical Research Elective Part II	5
MD2 6714	Medical Political Action & Public Health Leadership (MPAC) Part III	1
MD2 6715	Community Engagement Part III	1
MD2 6716	Medical Research Elective Part III	1

Year 3

Code	Title	Credits
Students must take eight required courses and one elective or vacation month. Students not taking the elective in Year 3 must complete an additional elective in Year 4.		
MD3 7000	Continuity Clinical Clerkship	3
MD3 7100	Family Medicine Clerkship	4
MD3 7200	Internal Medicine Clerkship	8
MD3 7300	Pediatrics Clerkship	8
MD3 7400	Surgery Clerkship	8
MD3 7500	Psychiatry Clerkship	4

MD3 7600	Obstetrics and Gynecology Clerkship	8
MD3 7700	Neurology Clerkship	4

Year 4

Code	Title	Credits
Required Course:		
MD4 8160	Emergency Medicine Subinternship	
Required Sub-internship (choose 1 of 4 sub-internships below to fulfill the requirement):		
MD4 8210	Family Medicine Subinternship	
MD4 8470	Internal Medicine Subinternship	
MD4 9210	Pediatric Subinternship	
MD4 9490	Surgery Subinternship	
Required MD4 Electives: six courses to be chosen from MD4 courses not taken to satisfy any of the above requirements.		

Cooperative Electives Exchange Program

The Deans of the four Michigan medical schools, acting as the Michigan Medical Schools Liaison Committee, have signed cooperative agreements allowing students full credit for courses taken as electives at any one of the participating medical schools:

- Wayne State University
- University of Michigan
- Michigan State University
- Michigan State University College of Osteopathic Medicine.

The Deans intend the program 'to make the best use of one another's resources to the greater advantage of the student and the Michigan community. By allowing medical students full academic credit for elective courses taken at any one of our respective medical schools, our students will be able to share productively in the learning and training opportunities of the entire State.'

Under the course exchange program, election of an 'away course' at one of the cooperating schools requires approval of both the parent and host institutions. Enrollment, matriculation and fee payments continue without alteration at the parent institution; however, students are responsible for all travel and living expenses incurred during the 'away' elective. Additional information can be obtained from Records and Registration, School of Medicine. Under the course exchange program, election of an 'away course' at one of the cooperating schools requires approval of both the parent and host institutions. Enrollment, matriculation and fee payments continue without alteration at the parent institution; however, students are responsible for all travel and living expenses incurred during the 'away' elective. Additional information can be obtained from Records and Registration in the School of Medicine.

Clinical Sciences

The Wayne State University School of Medicine has a distinguished history of producing the nation's finest physicians and researchers. That reputation continues to be built upon today, making the university not only a center for medical education, but the source of groundbreaking clinical research put into practice around the world.

The clinical science departments in the School of Medicine provide medical students with opportunities for clinical learning and research in over fifteen academic disciplines.

Anesthesiology

Office: St. Joseph Mercy Oakland, Medical Office Building, 44555 Woodward Avenue, Suite 306, Pontiac, MI 48341 248-858-2259
Chairperson: Terry A. Ellis, II

This department offers medical students a program in anesthesiology comprised of individual instruction in the operating room and a series of regularly scheduled seminars. The major objectives of study in this field include the acquisition of skills and knowledge related to: airway management, including endotracheal intubation; lumbar puncture and spinal anesthesia; monitoring of anesthetized patients; pharmacology of anesthetic agents and other drugs related to anesthesia; preoperative evaluation and preparation of a patient for anesthesia and surgery; physiology of the perioperative period; respiratory therapy including management of patients who require prolonged ventilator care; management of acute drug intoxication; and the management of pain. A one-month elective in anesthesiology is offered to medical students during their junior or senior year.

Dermatology

Office: 18100 Oakwood Blvd., Suite 300; Dearborn; MI 313-429-7843
Chairperson: Darius R. Mehregan
Associate Chairperson: David A. Mehregan
<http://www.dermatology.med.wayne.edu/>

The instructional and research activities of this department focus on the skin as a distinct organ of the body. Specific diagnostic procedures developed in recent years such as immunopathology, and various modalities of treatment such as PUVA, UVA, Narrow band UVB, lasers and Mohs micrographic surgery, are taught in the department.

A comprehensive clinical dermatology elective is offered to third and fourth year medical students. A research elective is also available to qualified students, offering both basic and clinical research in the fields of immunobiology, molecular biology, ultrastructural analysis, photobiology and dermatopathology. The laboratory of molecular dermatology specializes in the molecular biology of malignant melanoma. The department offers a three-year, fully accredited residency training program to candidates at the second postgraduate year level.

Emergency Medicine

Office:
4201 Saint Antoine Street
University Health Center, 6G
Detroit, MI 48201
313-993-2530

Chairperson: Brian J. O'Neil, M.D., F.A.C.E.P., F.A.H.A.
<http://em.med.wayne.edu/>

The Department of Emergency Medicine provides basic life support training and physical diagnosis instruction to M.D. Year 2 students. M.D. Year 3 students receive advanced cardiac life support training and participate in a suture laboratory to learn suture techniques. A mandatory rotation in emergency medicine for all senior students takes place at Detroit Medical Center hospitals or other affiliated hospitals. The fourth year rotation is designed to familiarize the student with:

1. the evaluation, assessment and stabilization of patients with urgent medical problems;

2. invasive and noninvasive procedures routinely used in the emergency department;
3. and management of acutely-ill patients in a timely manner.

Graduate medical education includes two three-year emergency medicine residency programs, based at the Detroit Medical Center (Detroit Receiving Hospital and Sinai-Grace Hospital). Both programs are fully accredited.

Family Medicine and Public Health Sciences

Office: 3939 Woodward Avenue, 313-577-1421
Chairperson: Tsveti Markova, M.D., F.A.A.F.P.

The Department of Family Medicine and Public Health Science has a strong community and public health focus with an emphasis on research and applications of socio-behavioral and medical sciences to health problems in the community. Public health is the academic discipline that deals with the identification and solution of health problems of communities and human populations. Public health is a population-based approach that addresses health promotion, disease prevention, restoration and maintenance of health. The range and scope of the sciences and skills required in public health include epidemiology, biostatistics, research methodology, health services research, and behavioral sciences. Central to the approach of public health is a focus on community-level influences on health including social, economic, cultural, ethnic, and environmental factors. Public health research methods involve defining selected community problems, proposing studies and solutions, surveillance, evaluating progress, and monitoring the use of resources.

The MPH Program (p. 275) at WSU is accredited by the Council on Education for Public Health (CEPH). The CEPH is an independent agency recognized by the US Department of Education to accredit public health educational programs. The interdisciplinary nature of public health is reinforced in required and elective courses.

M.D. Medical Education

The Department of Family Medicine and Public Health Sciences is well integrated into the didactic and clinical education of students throughout all levels of medical school. Family Medicine faculty actively participate in the curriculum development of the "Population, Patient, Physician, Professionalism (P4)" Course; which emphasizes clinical skill development and runs concurrently with first and second year basic science training. Family Medicine faculty, including adjunct faculty, serve as instructors, and small group leaders for case-based activities and clinical skills assessments. In addition, faculty also supervise some of the service learning projects throughout the first 2 years.

Third year medical students matriculate through the required Family Medicine clerkship, in which they are actively engaged in ambulatory patient care with community physicians. The curriculum is designed to emphasize evidence based medicine, primary care excellence, and continuity of care. Faculty members and community physicians throughout the region actively participate in hosting students for this course.

In addition to the required third year clerkship, the department also administers a six-month longitudinal ambulatory experience for all medical students. The Continuity Clinic Clerkship is designed to facilitate best practices in continuity of care and navigation of the hospital system. Students spend one half day per week working directly with a community preceptor in patient care and clinical learning exercises.

A number of electives are offered in the fourth year, including additional preceptorship experiences with practicing family physicians, specially-designed experiences with family practice residency programs, geriatrics, occupational health, community medicine, and research.

Students can fulfill a required four-week sub-internship in Family Medicine. During the sub-internship, students function as first year residents, taking night calls and assisting in the care of hospitalized patients while under the supervision of attending physicians.

Graduate Medical Education

Graduate medical education includes 4 residency programs, 2 of which were recently developed and approved for the entering class of 2019. The WSU Categorical Family Medicine Residency Program and the WSU Transitional Year Residency Program are located on the Ascension Providence Rochester Hospital campus. These programs integrate academic resources, competency-based curricula, a web-based evaluation system and state of the art technology. Education is focused on patient-centered care and integration of biological, clinical, and behavioral sciences. The scope of practice includes outpatient and inpatient care and encompasses all ages, both sexes, and every organ system and disease. A new 3 year Urban-Track Family Medicine Residency Program has been developed with matriculation scheduled for July 1, 2019. This program will recruit 2 new residents per year and as a focus, assist our department in addressing healthcare disparities in the greater Detroit area. This program will be based at CHASS, a Federally Qualified Health Center in Detroit, with Henry Ford Hospital as the sponsoring institution. We have developed a new 3 year Preventative Health Residency Program, which received ACGME accreditation approval in December, 2018. The first class is anticipated to enter the program on July 1, 2019. This program will consist of 3 additional residents who will complete their PGY-1 year of training within our current Transitional Year Residency Program. Following their first year of residency training, these residents will spend their PGY-2 and PGY-3 years completing rotations and educational experiences at a variety of public health medical facilities throughout Southeast Michigan.

All of our Family Medicine and Preventive Health residents will be trained to provide comprehensive medical care throughout all stages of life, from birth to geriatric care. During their training, these residents master a variety of clinical procedures and develop expertise managing both hospitalized and ambulatory patient cases.

Transitional Year residents complete one year of intensive clinical training prior to entering their categorical specialty program such as Dermatology, Ophthalmology, Anesthesiology, and Radiation Oncology.

Our Transitional Year program provides residents with a strong fundamental foundation upon which to build their medical knowledge, in preparation for their chosen specialty.

COMMUNITY SERVICE: In order to carry out clinical and public health education, faculty and residents of the Department offer services to the community through the Family Medicine Centers and related institutions. Patient care functions are performed in collaboration with other health professionals such as clinical nurse specialists, clinical pharmacists, and social workers and their students. Public health students are required to complete a public health practicum, which is often service oriented and involves working with underserved populations through organizations like the local public health department or other public service agencies.

RESEARCH: Departmental research interests include population health sciences, behavioral health, and health equity. Work in these areas encompass a number of disciplines, including psychology, epidemiology, primary care clinical science, and health policy. Primary care clinical research in the department includes studies designed to improve delivery of primary care health services at the individual, family, and community

levels and to provide health promotion services which recognize the important role of the family and community in maintaining health and coping with illness. Examples of specific research projects include prostate cancer decision making processes of patients and providers and identifying predictors of postdischarge adverse events in adults and children. National funding sources include the American Cancer Society, the National Institutes of Health, the Agency for Health Care Research and Quality, and the Patient Center Outcomes Research Institute. Our faculty also have substantial research interests in public health, including studies of the health equity and disparities across the life course and behavioral interventions to address chronic conditions in children and adults. Examples of specific research projects include message framing in colorectal screening, improving asthma management in adolescents and emerging adults, prevention of HIV in adolescents, risk factors for preterm birth in Black women, and prevention of obesity in preschool children. The Department also has strong research ties with the Institute for Environmental Health Sciences, Center for Urban Responses to Environmental Stressors, the Center for Molecular Medicine and Genetics, the Karmanos Cancer Institute, the Institute of Gerontology, and the Merrill-Palmer Skillman Institute.

Internal Medicine

Office: 2E University Health Center; 745-8244

Interim Chairperson: Basim Dubaybo

The major objective of the educational program in internal medicine is to establish a firm conceptual basis for clinical diagnosis and treatment of disease. The exposure to clinical disciplines is graduated throughout each M.D. four year curriculum. During the early years in the M.D. program emphasis is placed on the application of knowledge gained in the basic science courses to an understanding of the biological disorders which accompany human disease. In M.D. Year I, students work with the Department of Internal Medicine through participation in several clinical conferences. During M.D. Year II, the student's attention is directed toward the study of pathophysiologic mechanisms of disease, the principles of clinical diagnosis and the scientific basis of therapeutics. An internal medicine forum is available for students interested in internal medicine as a career. In M.D. Year III and IV emphasis is placed on the student's direct participation in patient care as a member of the health-care team. In Year III the student gains clinical experience through assignment to Wayne State University teaching hospitals; this insures acquaintance with several members of the faculty and to a wide spectrum of medical problems. During Year IV, the student spends a month as an acting intern and a month in an outpatient clinic to gain experience with ambulatory medicine. Elective courses in subspecialties are offered. Students may also choose to pursue laboratory investigative programs under the tutelage of members of the faculty. In addition to formal course work, the student may elect more intensive study as a student-fellow in either clinical or laboratory medicine during the summer recesses. With the expansion of the Internal Medicine faculty, a number of research experiences supported by a variety of national funding agencies are available.

Neurological Surgery

Office: 6E University Health Center; 313-745-4523

Chairperson: Sandeep Mittal

<http://neurosurgery.med.wayne.edu>

The goal of the Department of Neurological Surgery is to acquaint the undergraduate medical student with the problems, both diagnostic and therapeutic, in the field of neurological surgery. This is accomplished by close affiliation with and participation in the neurosciences core curriculum of the freshman and sophomore years. Lectures, conferences and ward rounds are included in this teaching program. In the third year

neurosurgical teaching program, the Department curriculum emphasizes the surgical aspects of cerebral and spinal disease and problems. Third year students are made aware of problems best handled by neurosurgical techniques during their trauma and emergency surgery rotation. Fourth year students seeking further study of neurosurgical techniques may elect programs in clinical neurological surgery and neuroscience research. Detroit Receiving Hospital, Harper University Hospital, Sinai-Grace Hospital, and Children's Hospital of Michigan are the primary clinical facilities for undergraduate instruction by this department.

A seven-year residency training program, (includes one year of research in the laboratory or an enrolled clinical fellowship) in neurological surgery is conducted by the Department and based at the following University-affiliated hospitals: Detroit Receiving, Harper University, Sinai-Grace, and Children's. The research interests of the department are concentrated primarily in the neurological mechanisms involved in ischemic stroke, brain tumors, stereotactic and computer-assisted surgery, neuro-oncology, skull base surgery, aneurysms and AVM clinical studies, traumatic brain injury, and hydrocephalus. The Department of Neurological Surgery operates a microsurgical laboratory for residents and participates in ongoing research projects requiring training in microsurgical techniques and microsurgical anatomy. The residents also participate actively in tumor research at Karmanos Cancer Institute.

Neurology

Office: 8D University Health Center; 313-577-1242

Chairperson: Jun Li, MD, PhD

M.D. Program Education

The Department of Neurology provides instruction in the first, second, third and fourth years of the medical curriculum. Members participate in the first year basic neuroscience course. In the second year the department is responsible for the clinical neuroscience-neurology course, which emphasizes pathophysiology. During the third year, all students rotate for four weeks through the neurology unit at one of the University-affiliated hospitals, at which time the students receive bedside and outpatient teaching and are given responsibilities in patient management. Clinical electives for students who have completed the required courses are available for interested students.

Post-Graduate Education

The Wayne State University Neurology Residency Training Program is a fully-accredited program located at the Detroit Medical Center and the Veterans Administration Hospital. The department offers a three-year training program for candidates applying for second year post-graduate level of training. Post-residency fellowships are also available in neuromuscular diseases/EMG, epilepsy/EEG, neurocritical care, multiple sclerosis/neuroimmunology, stroke, clinical neurophysiology, and movement disorders.

Research Electives

Research electives for medical students are available, either in brief summer rotations or for longer periods taken during elective time. Interested students are encouraged to contact the Department of Neurology.

Obstetrics and Gynecology

Office: 3750 Woodward, Suite 200; 313-993-4514

Chairperson: Chaur-Dong Hsu

<http://obgyn.med.wayne.edu/>

The discipline of obstetrics and gynecology is concerned with the reproductive health of women. This concept implies knowledge that extends from embryology through gerontology. A prime objective of the Department of Obstetrics and Gynecology is to present, and to add to, the current knowledge of the normal physiology and pathology of reproduction.

Major teaching and research efforts in the Department focus on several sub-specialty areas including maternal-fetal medicine, gynecologic oncology, reproductive endocrinology/infertility, and reproductive genetics. In addition, emphasis is placed on family planning and contraceptive technology, sonographic imaging, psychosexual issues, and computer applications in treatment, diagnosis, and research. The faculty integrates basic science and clinical research into clinical practice.

Medical students gain clinical experience in obstetrics and gynecology in Detroit Medical Center Hospitals: Hutzel Women's Hospital and Sinai-Grace in addition to other affiliated hospitals: William Beaumont, Oakwood, Providence, St. John's, and Henry Ford. The third year clerkship includes an extensive didactic course, as well as in-depth clinical experience. Further, clinical and research opportunities are available in all sub-specialty areas during senior elective periods. Summer student research fellowships are available, both in clinical research within the Department, and in basic research at the C.S. Mott Center for Human Growth and Development, where the Department's basic science laboratories are located.

The graduate program concentrating in the reproductive sciences is included with the Doctor of Philosophy in Physiology (p. 272).

Ophthalmology

Office: K-220 Kresge Eye Institute; 313-577-1355

Chairperson: Mark S. Juzych, M.D., M.H.S.A.

The Ophthalmology Department is committed to education, research, and patient care. These activities are conducted primarily in the central campus of the Detroit Medical Center, in the Kresge Eye Institute, under the direction of the Department Chairperson. The close association of medical practice, research and teaching makes the Kresge Eye Institute an ideal teaching facility. Whether correcting common eye disorders such as cataracts, glaucoma and strabismus, or performing highly technical operations such as vitrectomy, corneal transplants or lens implantations, the medical staff uses the most advanced diagnostic treatment, and surgical methods. The Institute is ideally suited for clinical instruction because it attracts a large number of patients with rare eye diseases, engages in advanced diagnostic techniques, performs a wide range of delicate eye operations and is a center for eye research. Through its affiliation with the University and the Detroit Medical Center, the Institute provides a stimulating learning environment for graduate physicians and medical students.

Each year the Institute selects seven outstanding medical graduates for a three-year residency training program in eye diseases and surgery. The residency program is structured to provide appropriate didactic and clinical teaching and resident support services to exceed all ACGME requirements for resident education. Clinical and research fellowships in vitreoretinal diseases and surgery, glaucoma and ocular trauma are available on a selective basis upon completion of the residency program. The Institute's faculty also provides lectures and clinical training for third and fourth year medical students. The teaching encompasses courses in ophthalmology for residents in family practice and emergency medicine through an elective rotation.

Orthopaedic Surgery

Office: 18100 Oakwood Blvd, Suite 300, Dearborn, MI 48124;
313-429-7970, Fax: 313-429-7975
Chairperson: Lawrence G. Morawa

The M.D. program in orthopaedic instruction is integrated and designed to introduce the medical student to the entire field of musculoskeletal diseases and injuries. By means of demonstrations, lectures, conferences, clinics and clerkships, the student learns the important specifics of the orthopaedic examination and is exposed to many groups of musculoskeletal problems related to trauma in adults and children. By study of the factual content of common problems in each field, the student's attention is directed to general principles of diagnosis and treatment.

Otolaryngology, Head and Neck Surgery

Office: 5E University Health Center, 4201 St. Antoine; 313-577-0804
Chairperson: Ho-Sheng Lin

The M.D. program instruction of the Department of Otolaryngology, Head and Neck Surgery is designed to acquaint students with all diseases treated by the modern otolaryngologist. Instruction is given in the methods of examining the ear, nose and throat in the outpatient department. Audiology is included so that the student may properly classify deafness in prescribing appropriate therapy.

Head and neck, and plastic and reconstructive surgery as related to otolaryngology are included in the instructional program. Observation and, at times, assistance at surgical operations offer additional learning opportunities to students. In general, the program stresses the correlation of ear, nose and throat problems to the entire curriculum in medicine and surgery.

Pediatrics

Office: 1K40 Children's Hospital; 313-745-5870
Chairperson: Herman Gray

Formal teaching by the Department of Pediatrics takes place in the patient units and clinics at Children's Hospital of Michigan during the third year of the medical school program. The aim of the student clerkship is to acquaint the student with the course of normal development, the common variations from normal patterns, and the reaction of the immature to illness. An effort is made to incorporate all aspects of childhood in the allotted time of study in order to have full participation by members of the surgical, orthopedic, and psychiatric staff. An inpatient and outpatient experience is offered that affords the student an opportunity to be exposed to a broad array of pediatric illness. The Department of Pediatrics maintains contact with the student before the clerkship through contribution to the curriculum of basic science courses. The Department also provides an optional program of study during the fourth year.

The Fourth Year Elective Program offers the senior student an opportunity to gain experience in general pediatrics at a greater level of responsibility in patient care. The student assumes an increasing role as a primary caretaker under the supervision of the resident staff in advanced years of pediatric training. Experience in the pediatric subspecialties is also available to senior students. Thus, they are able to improve the level of their clinical skills and to obtain familiarity with the application of clinical and laboratory research techniques to the investigation of pathophysiology in a wide variety of children. Further

information regarding programs may be obtained by writing to the office of the Chairperson of the Department.

Physical Medicine and Rehabilitation - DMC

RIM Office: 840 Rehabilitation Institute of Michigan;
Tel: 313-745-1218; Fax: 313-745-1063
Chairperson: Lawrence Horn, MD

Rehabilitation Sciences Administration (Graduate Certificate)

An admissions moratorium is currently in effect for this program.

The Department of Physical Medicine and Rehabilitation encourages students to acquire knowledge of the patient as a person, not merely of his/her disease. The student is taught to assess the neuromuscular and musculoskeletal systems and to manage the disorders of these systems. In addition, a concept of rehabilitation is presented which considers not only the disease or injury that leads to chronic disability, but emphasizes the coordination of effective therapies and forces which will ameliorate the social, psychological and vocational problems created by the impairment. Teaching is conducted through lectures, demonstrations, staff conferences and seminars, with the major emphasis upon office practice instruction. Clinical instruction is provided at the Rehabilitation Institute of Michigan, the principal teaching facility of the Department for the PM&R DMC program and at the following institutions: DMC Children's Hospital, Detroit Receiving Hospital, Harper Hospital, Karmanos Cancer Hospital, and Veterans' Administration Hospital.

Psychiatry and Behavioral Neurosciences

Office: Tolan Park Medical Building, Suite 5-A, 3901 Chrysler Service Drive;
313-577-1808
Chairperson: David R. Rosenberg, M.D.
<http://psychiatry.med.wayne.edu/>

M.D. Program Education

The Department of Psychiatry and Behavioral Neurosciences provides M.D. students with an awareness of psychiatric problems as they are experienced in the practice of medicine. The educational mission of the Department is to teach the knowledge base, skills, and professional attributes in psychiatry and behavioral neurosciences for future physicians to practice competently in any medical specialty.

This Department is active in the teaching of the medical student throughout all four years of training. The core curriculum in psychiatry is taught in the second and third year of medical school and includes:

- Year II: Normal development and psychopathology
- Year III: Clinical clerkship and didactic learning

Clinical psychiatry rotations are conducted at Detroit Receiving Hospital, Harper University Hospital, Henry Ford Health System, Providence Hospital, Sinai-Grace Hospital, University Psychiatric Centers, William Beaumont Hospital, and Veterans' Administration Medical Center. These rotation sites provide the student with experiences in a variety of clinical settings, including inpatient, partial hospitalization programs, consultation services, emergency room, and outpatient services. Faculty members also serve as course directors and participate in the teaching of interdisciplinary courses that span the four years of medical school, including clinical medicine (history and communication skills), human

sexuality, and behavioral health longitudinal curricula (interpersonal violence, substance use disorders, preventative health and health maintenance).

Radiology

Office: 3L-8, Detroit Receiving Hospital; (132)5-3430
<http://www.radiology.med.wayne.edu/>

M.D. program instruction by this department is directed toward a total integration of the fundamentals of radiology with the basic sciences, particularly anatomy, physiology, chemistry and pathology. Radiologic instruction is correlated at the M.D. Year I and II levels with other departments. Year III-level instruction is clinically oriented and numerous radiologic electives are offered in Year IV. Various diagnostic imaging techniques such as conventional radiographic procedures; radionuclide imaging, both static and dynamic; ultrasonography; computerized tomography, MR; and digital subtraction radiography are included in both the undergraduate and graduate level of instruction. The pre-clinical program has been designed to orient the anatomy student to normal roentgen anatomy and also to relate this to aspects of physical diagnosis. There is further coordination in anatomy and physiology to emphasize function and in turn relate this to aspects of history taking. In the fields of physiology and physiologic chemistry, radioactive isotope techniques are presented relating particularly to endocrine functions, renal functions and blood formation. Correlated teaching is also carried in gross pathology.

In the clinical years, teaching of diagnostic radiology, radiation therapy, nuclear radiology, computerized tomography, MRI, and ultrasonography is related to total patient care and such teaching is, therefore, predominantly correlated with other clinical departments. The clinical aspects of diagnostic radiology, radiation therapy and radionuclide procedures and techniques are taught during clerkship and in the clinics and various inter-departmental and intra-departmental conferences.

Surgery

Office: 6th Floor, University Health Center; 313-577-5013
Chairperson: Donald Weaver
www.wsusurgery.com (<http://www.wsusurgery.com>)

The main objectives of the Department of Surgery are to relate the principles of the basic sciences to clinical practice and to impart the details of patient care in light of modern physiological and pharmacological knowledge. Emphasis is on understanding of the deranged metabolic processes occasioned by surgically treatable disease and physical trauma, the translation of these into recognizable symptoms and signs and the rational correlation of therapy with these basic disturbances. Surgery is taught as only one aspect of patient care and emphasis is placed on the relationship of the surgeon to other personnel who form part of the health care team. As part of their education, students are part of the resident care team and are assigned patients for study.

With the unusually broad spectrum of diseases treatable by surgical methods present in the Wayne State University affiliated hospitals, students have contact with oncological, vascular and gastrointestinal problems. Students obtain a wide clinical experience at Detroit Receiving and Harper University Hospitals. During their third year, they may also select to rotate to one of the other affiliated hospitals such as Henry Ford Hospital, Oakwood Hospital, St. Joseph Mercy Hospital, St. John's Hospital and Medical Center, VA Administration Hospital and William Beaumont Hospital.

Students are encouraged to participate in experimental and clinical research programs with staff supervision during their senior elective periods and summer vacations. The program is designed to provide the student with the opportunity to develop career interests in surgery at an early stage in their education.

Urology

Office: 4201 St. Antoine, UHC-7C Detroit, Michigan 48201; 313-577-5222
Chairperson: Michael L. Cher

M.D. program instruction in the field of urology begins in the M.D. Year I with the physical diagnosis course. Students receive lecture and laboratory instruction on the male genitourinary physical examination. Instruction continues in Year III with a series of lectures. Students receive these lectures as part of their general surgery curriculum. These lectures incorporate the fundamental concepts of the disease processes which affect the genito-urinary system. The lectures attempt to integrate the physiologic and anatomic mechanisms of urological disorders, their clinical presentations, and contemporary treatment strategies and outcomes. Clinical electives in urology are offered to students in their third/junior and fourth/senior years of medical school training. The electives are arranged in four week blocks. Rotations on the urology service can be tailored to the individual student. Students may also spend time in the various office clinics within the Department of Urology to broaden their experience.

Graduate Programs of the School of Medicine

Academic Regulations Governing Master's and Doctoral Degrees

Advanced study programs leading to the Doctor of Philosophy and Master of Science degrees are available in the School of Medicine. Their primary purpose is to provide an opportunity for graduate training in preparation for careers in biomedical research including those in academia, industry, biotechnology, and government. In addition, the programs are designed to provide an educational springboard into a wide variety of related careers including those in medicine, intellectual property (patent) law, regulatory affairs, compliance, healthcare management, science advocacy/policy, teaching, scientific writing, clinical and translational sciences, forensics, and environmental affairs, among others.

Graduate students enter a community of team-oriented scholars and are expected to become acquainted with the development of a main area of study and its relationship to other pursuits. Students should develop into independent and self-directed learners and researchers, acquire useful perspectives on the meaning and limitations of exact science, and maintain a balance between practical and abstract intellectual activity. They are expected to draw from and add to the wealth of accumulated knowledge in their chosen discipline. Graduate students work closely with faculty advisors who help plan course schedules and research programs, supervise laboratory training, and help navigate career options.

For complete information regarding the academic rules and regulations of the University, students should consult Academic Regulations (p. 12) of this bulletin. The following additions and amendments pertain to the School of Medicine.

Admission

Admission to these graduate programs is contingent upon admission to the Graduate School (p. 19). Requests for program-specific information

and requirements should be made directly to the program of interest. Mailing address and individuals to contact are cited below.

Application

Applicants must complete/submit:

1. University Graduate School application;
2. Official transcripts of all undergraduate (and graduate) academic work;
3. Graduate Record Examination scores, verbal, quantitative and analytical writing components.

Individual programs may have additional application requirements, including higher standards for G.P.A. and English proficiency than the Graduate School. Students for whom English is not their native language will be required to demonstrate competency in verbal and written English within the first year of study.

Most study programs are planned for students who begin in the fall semester; however, matriculation may be possible at other times during the year in individual cases.

The recommended procedure for application is:

1. Consult departmental websites and/or contact the appropriate Graduate Officer for additional information and forms relevant to that program;
2. Submit ALL application materials by February 1 for admission to begin study in the fall semester;
3. Earlier applications will be accepted in most cases. Late applications will be evaluated; however, the graduate programs have limited enrollment, and thus late applicants may encounter programs already filled. Most graduate assistantships and fellowships are awarded in the months of February and March; late applicants may have very limited opportunities for this type of financial assistance. Additional financial aid may be available through the Office of Student Financial Aid.

Master of Science Degrees

Descriptions of individual programs may be found in the departmental sections which follow. Two interdisciplinary programs are offered in addition to the discipline-based courses of study: a master's degree program in basic medical sciences and a master's degree program in medical research. These are described below. General requirements for the Master of Science degree may be found under Master's Degrees (p. 35).

Doctor of Philosophy Degrees

Programs leading to the Doctor of Philosophy degree in the basic medical sciences are under the jurisdiction of the Graduate School of the University. Ph.D. students, admitted to one of the listed graduate programs, typically enroll in the School of Medicine's Interdisciplinary Biomedical Sciences (IBS) core curriculum during their first year. The IBS is a broad-based curriculum involving courses in Interdisciplinary Molecular and Cellular Biology and selected courses in the systems curriculum. Department and program-specific course requirements and additional information may be found in the individual descriptions of each Ph.D. program.

The thirty credit dissertation registration requirement is fulfilled by registering for the courses 9991, 9992, 9993, and 9994 (Doctoral Dissertation Research and Direction I, II, III, and IV, respectively) offered under various subject area codes, in consecutive academic year semesters.

Interdisciplinary Biomedical Sciences (Ph.D.)

The School of Medicine's Interdisciplinary Biomedical Sciences (IBS) curriculum is open only to doctoral students in the School of Medicine. Completion of the Core Curriculum is recommended during the first year of Ph.D. study; it must be completed by the end of the second year. The IBS curriculum includes:

Code	Title	Credits
Foundational Course		
IBS 7015	Interdisciplinary Cell and Molecular Biology	
Two additional courses chosen from the following:		
IBS 7030	Functional Genomics and Systems Biology	
IBS 7050	Biomedical Neurobiology	
IBS 7090	Biomedical Immunology	
IBS 7100	Biomedical Neuropharmacology	
IBS 7110	Introduction to the Business of Biotechnology	
IBS 7115	Special Topics in Biotechnology Commercialization	
IBS 7130	Systems Neuroscience: Structure and Function of the Nervous System	
IBS 7140	Foundations of Data Science	

Admission of other students requires the consent of the curriculum director.

Joint M.D. and Ph.D. Program

A joint M.D. and Ph.D. program of study may be designed to provide an opportunity for exceptionally talented students to acquire knowledge and expertise in both research and clinical medicine. By combining and interrelating the Doctor of Medicine and Doctor of Philosophy programs, the dual degree objectives may be accomplished effectively and often in a shorter time than is possible by two separate degree programs completed in sequence. Such a program will prepare the student to assume investigative leadership in medical schools and in institutes for medical research. This program is flexible so that it can be adapted to best suit the student's discipline, needs and objectives.

Admission: Students will apply to the joint degree program at the time that they apply to the School of Medicine via the American Medical College Application Service (AMCAS). However, failure to be admitted to the joint degree program will not alter the student's opportunity to be considered for medical admission. In some instances, medical students may be admitted during their first or second year of undergraduate medical school, but this will involve other means of financial support than when he/she has been admitted by a joint process to the M.D-Ph.D. program in the School of Medicine. At the time of acceptance to the joint degree program, students will be required to submit a graduate application. Students interested in a joint degree program may contact the Graduate Programs Office in the School for further information and counseling.

Degree Requirements

The requirements for the joint M.D./Ph.D. degrees conform to those established for the separate degrees by the School of Medicine, the Graduate School (p. 35), and the individual departments involved.

- Anatomy and Cell Biology (p. 260)
- Basic Medical Sciences (M.S.) (p. 261)
- Biochemistry, Microbiology and Immunology (p. 262)

- Clinical and Translational Science (Bridge Graduate Certificate) (p. 264)
- Genetic Counseling (M.S.) (p. 265)
- Medical Research (M.S.) (p. 266)
- Molecular Genetics and Genomics (p. 267)
- Oncology (p. 268)
- Pathology (p. 270)
- Pharmacology (p. 271)
- Physiology (p. 272)
- Public Health Programs (p. 273)
- Translational Neuroscience (Ph.D.) (p. 276)

Anatomy and Cell Biology

Office: 8374 Scott Hall; 313-577-1061

Chairperson: Linda D. Hazlett

<http://www.anatomy.med.wayne.edu/>

The Anatomy and Cell Biology Program (<https://anatomy.med.wayne.edu/graduate-program>) provides training in the study of dynamic biological processes using cellular, molecular, behavioral, and imaging approaches. Faculty members (<https://anatomy.med.wayne.edu/research/faculty?group=2508>) are active in an extensive array of research areas, including the visual sciences, neuroscience, cell and developmental biology, immunology and infectious disease. The department offers two graduate degrees, both of which require the successful completion of courses. For the Ph.D. degree, dissertation research is performed in the laboratory of a faculty member with all requirements generally completed in four to five years. The M.S. degree offers two tracks: Research (Neuroscience or Visual Sciences) and Teaching, either of which can be completed within two years. In addition, students admitted to the School of Medicine (<https://www.med.wayne.edu>) can pursue M.D./M.S. or M.D./Ph.D. degree, typically completed in five or seven years, respectively. While acceptance to the Ph.D. and M.S. programs is contingent upon admission to the Graduate School (p. 19), applications are submitted directly to the Department of Ophthalmology, Visual and Anatomical Sciences (OVAS (<https://anatomy.med.wayne.edu/>)).

- Anatomy and Cell Biology (M.S. and Ph.D.) (p. 260)

Anatomy and Cell Biology (M.S. and Ph.D.)

The Department of Anatomy and Cell Biology offers training for the investigation of biological and biomedical problems using molecular, cellular, and morphological approaches. Faculty members are active in a diversity of research areas, including cell and developmental biology, neuroscience, vision research, and immunology. Study for the Ph.D. degree includes dissertation research in the laboratory of a faculty member and can generally be completed in four to five years. Students who have also been admitted as medical students can typically complete both M.D. and Ph.D. degrees in six to seven years. Admission to the master's degree program is very limited and based on special circumstances.

Admission Requirements

Admission to these programs is contingent upon admission to the Graduate School (p. 19) and the graduate programs of the School of Medicine (p. 258), respectively. Applicants must have an undergraduate degree. A minimum grade point average of 3.0 is required for admission to the Ph.D. program. An interview with the Graduate Committee

Chairperson or designated representative is desirable. The Graduate Record Examination is required for admission. Foreign students must be proficient in English as determined by satisfactory performance on the standardized TOEFL English proficiency examination.

Academic Scholarship

All course work must be completed in accordance with the regulations of the Graduate School (p. 12) and the School of Medicine (p. 258) governing graduate scholarship and degrees.

Assistantships and Research

The Department has graduate research assistantships available for a number of qualified students. All students accepted into the doctoral degree program are considered for financial assistance, and no application forms are necessary for this purpose. Students on assistantships are advised to elect no more than ten credits in a given semester. Two credits are covered during spring/summer semester. All students, whether or not they hold a fellowship or assistantship, are required to assist the graduate faculty in research activities as a component of their educational experience.

The general requirements for the Master of Science and Doctor of Philosophy degrees may be found in the Graduate School section of this bulletin. The master's degree is offered as Plan A only, which includes a manuscript based on original research.

During their first year, Ph.D. students typically enroll in the School of Medicine's Interdisciplinary Biomedical Sciences (IBS) curriculum.

IBS Systems Curriculum

Code	Title	Credits
IBS 7015	Interdisciplinary Cell and Molecular Biology	6
IBS 7030	Functional Genomics and Systems Biology	2
IBS 7050	Molecular Neuropsychopharmacology	2
IBS 7090	Biomedical Immunology	2
IBS 7100	Biomedical Neuropharmacology	2
IBS 7110	Introduction to the Business of Biotechnology	3
IBS 7115	Special Topics in Biotechnology Commercialization	1
IBS 7130	Systems Neuroscience: Structure and Function of the Nervous System	2
IBS 7140	Foundations of Data Science	3

Opportunities are provided for the student to become acquainted with the diverse research interests of the faculty and to obtain hands-on experience in selected techniques. Seminars and elective courses broaden the exposure to clinically-relevant areas of research. In the second year, students may select advanced courses in several areas of Anatomy and Cell Biology and choose an advisor to assist in development and implementation of a dissertation research project. The graduate program is flexible and allows for continuing interdisciplinary training; emphasis is placed on designing a program which is tailored to the student's particular goals. In addition to developing research competence, individuals interested in pursuing teaching as part of a career will be able to achieve competence in neuroscience, embryology, and microscopic or gross anatomy.

The graduate students interested in neurobiology subdiscipline should take one of the three courses:

Code	Title	Credits
ANA 7010	Human Gross Anatomy	8
ANA 7030	Human Microscopic Anatomy	4
ANA 7130	Neuroanatomy	4

Graduate Students admitted in the program undergo lab rotation (ANA 7270) prior to selecting a dissertation advisor. Graduate students in the program area also required to register for ANA 7890 seminar course.

They also complete written and oral qualifying examinations. The major component of the Ph.D. program is preparation of a dissertation which details the results of original research.

After the completion of PhD candidacy, the thirty credit dissertation registration requirement is fulfilled by registering for the courses ANA 9991, ANA 9992, ANA 9993, and ANA 9994 (Doctoral Dissertation Research and Direction I, II, III, and IV, respectively), in consecutive academic year semesters.

Vision Science Program

Students interested in developing independent careers in the area of vision science may obtain specialty training in this research field. Through course work and clinical interactions, students receive broad based training which integrates basic science and clinical approaches to the understanding of eye function and ocular disease. Three courses (ANA 7055, ANA 7065, and ANA 7075) provide the background for individually directed research projects. Faculty from both the Department of Anatomy and Cell Biology and the Department of Ophthalmology participate as mentors in this unique program.

Basic Medical Sciences (M.S.)

Office: 1128 Scott Hall

Program Director: George S. Brush, Ph.D.

The Basic Medical Sciences (BMS) program offers a didactic, multidisciplinary (broadly-based), and human biology-oriented curriculum. The BMS program can enhance the academic preparation of individuals holding a bachelor's, master's or professional degree who are seeking to subsequently matriculate into human or veterinary medical, dental, or pharmacological professional degree programs. The curriculum can facilitate career advancement of individuals employed in the areas of biomedical research and science education. The curriculum is NOT for individuals holding M.D., D.D.S., Pharm.D. or equivalent degrees; such individuals interested in medical or biomedical research are referred to the M.S. in Medical Research program (see below).

The curriculum involves courses from several basic science departments and programs, each one representing a unique discipline within the Wayne State University School of Medicine. At least one BMS CORE course from each of at least four different disciplines is required. The curriculum also has advanced basic medical science electives. The Master of Science in Basic Medical Sciences degree is a Plan B master's essay curriculum that requires an original critical evaluation of a specific topic in current biomedical science commonly based on analysis of current biomedical literature; original experimental research is not required.

Admission Requirements

Admission to the BMS program is contingent upon admission to the Graduate School (p. 19). A minimum of a bachelor's degree or equivalent is required. A major in a biological or chemical science is preferred; applicants with other majors will be considered. Applicants must have completed at least one year of general biology, two years of chemistry (inorganic and organic), and one year of physics at the

undergraduate level or above. An earned cumulative Grade Point Average of 3.0 together with strong science grades are required for regular admission. Applications must be submitted online (see url at the end of this paragraph). A complete application requires submission of the basic application form, a statement of purpose, three letters of recommendation, transcripts from all prior academic institutions in which the applicant is/was enrolled, and a recent standardized test score (original or copy): either MCAT, DAT, GRE or PCAT. Copies of transcripts may be submitted for application review; however, the Graduate School will require submission of an official transcript showing degree awarded prior to enrollment.

The Master of Science in Basic Medical Sciences is offered only as a Plan B master's degree that requires completion of thirty-four credits in the BMS curriculum and must include a graded Master's essay (BMS 7999). All course work must be completed in accordance with the regulations of the Graduate School (p. 12) and the School of Medicine (p. 258) governing graduate scholarship and degrees.

Required Core Courses

A minimum of four CORE courses, each one from a different basic science discipline/subject area (as reflected in the different two- or three-letter course prefixes), must be chosen from the following (a few alternative Core courses are available with Program Director approval):

Code	Title	Credits
BMB 7010	General Biochemistry Lecture	4
CB 7210	Fundamentals of Cancer Biology	3
IM 7010	Fundamentals of Immunology	2
IM 7020	Fundamentals of Microbiology	2
IM 7030	Molecular Biology of Viruses	2
IM 7520	Molecular Mechanisms of Bacterial Pathogenesis	2
MGG 7010	Molecular Biology and Genetics	4
PHC 6500	Drugs and the Addictive Process	3
PHC 7010	Pharmacology Lecture	4
PHC 7410	Principles of Toxicology	3
PSL 7010	Basic Graduate Physiology Lecture I	4
PSL 7030	Basic Graduate Physiology Lecture II	4
PTH 7500	Systemic Pathophysiology	3
PYC 7010	Neurobiology I	3

Elective Courses

Elective credits, from selected BMS elective courses, sufficient to complete the thirty-four earned cumulative credit degree requirement must be approved by written consent of the Program Director.

Plan of Work Requirement

The Plan of Work is developed and filed in association with the Program Director or his/her designee. The deadline is specified by the Graduate School and enforced by the Registrar.

Essay Requirement

BMS 7999 – Essays in Basic Medical Science: Cr. 3

The Essay Advisor, Committee, and *essay topic* are selected with the advice and approval of the BMS Program Director. The committee must be composed of three graduate faculty members, including the Essay Advisor who may also be appointed as the student's academic advisor. The Essay Outline must be approved by the BMS Program Director. The Essay document must be presented to all Committee members for evaluation, approval and final grading. At the discretion of the Essay

Advisor and Committee the evaluation may require an oral presentation and defense of the essay.

Biochemistry, Microbiology and Immunology

Office: 7374 Scott Hall; 313-577-1511

Chairperson: Philip Pellett, Ph.D.

Associate Chair: Ladislau Kovari Ph.D.

Graduate Director: Jeffrey Withey Ph.D.

<http://www.biochemmicroimmuno.med.wayne.edu>

The **Department of Biochemistry, Microbiology & Immunology** serves our community, state, nation, and the world by applying the tools of our disciplines to improving health and wellness for all members of our society, including historically underserved populations.

We are home to students and faculty engaged in the study of areas of modern biomedical science that are fundamental to understanding biological systems relevant to human health. The department was formed in January 2017 by a merger of the long-standing Departments of Biochemistry & Molecular Biology and Immunology & Microbiology.

We provide high quality biomedical science education and opportunities to perform pioneering research. This enables our diverse student body of college undergraduates, medical students, graduate students, and post-doctoral scholars to develop into scientific leaders in the international biomedical arena.

Our current areas of research include:

Biochemistry and Molecular Biology have played major roles in the biological revolution that has transformed our understanding of the fundamental processes of life, and have paved the way for the development of solutions to medical problems that vexed us for centuries. Our biochemical research programs involve the study of molecular mechanisms that underlie biological processes, with an emphasis on the relationship between macromolecular structure and function.

Immunology involves the study of defense systems that revolve around discrimination of self from non-self. Recognition of pathogens (non-self) triggers mechanisms that can lead to an elimination of the pathogen. Over-enthusiastic recognition of self can lead to autoimmune diseases such as rheumatoid arthritis. Research in immunology is directed at learning how immune responses are regulated, to enhance protections against pathogens, dampen autoimmunity, and direct the immune system to eliminate cancers.

Microbiology revolves around the study bacteria and viruses, classes of microorganisms that cause a wide range of diseases internationally. Microorganisms are important constituents of our environment, from our personal microbiomes to the complex array of microbial interactions that define nearly all aspects of life on earth. Our microbiology research programs involve investigation of pathogen-host interactions from the levels of populations and individuals, down to the intracellular level.

Our department is home to M.S., Ph.D., and M.D/Ph.D. programs in Biochemistry & Molecular Biology (<https://biochemmicroimmuno.med.wayne.edu/phd-program>) and Immunology & Microbiology (<https://biochemmicroimmuno.med.wayne.edu/immunologyandmicrobiologyms/phdprograms>). Our objective is to prepare students for active and successful careers in these exciting and important areas of modern biomedical science. Our students learn how to work independently and collaboratively on complex multidisciplinary biomedical problems, in the context of high standards for research and

scholarship. Our educational programs facilitate the development of critical skills such as hypothesis development, experimental design, robust application of classical and modern methods, data analysis, performing research by high ethical standards, and preparation of data for written and oral presentation in high-quality venues. For decades, our graduate programs have provided excellent foundations for many significant careers in biological research.

- Biochemistry and Molecular Biology (M.S.) (p. 262)
- Biochemistry and Molecular Biology (Ph.D.) (p. 263)
- Immunology and Microbiology (M.S.) (p. 264)
- Immunology and Microbiology (Ph.D.) (p. 264)

Biochemistry and Molecular Biology (M.S.)

The M.S. degree in Biochemistry and Molecular Biology provides strong research training for students who are interested in a research career in academia, medicine, or industry, in related careers in which first-hand research experience is an asset, or as a prelude to more advanced degrees.

Research interests in the Department of Biochemistry, Microbiology & Immunology are diverse, allowing graduate students to choose from a broad spectrum of topics when picking a research lab. Regular interactions between students and faculty are facilitated with weekly departmental and student seminars, formal collaborations between research groups and a cooperative work environment that promotes discussion of research projects between students of different labs.

The master's degree in Biochemistry and Molecular Biology is offered under WSU's Plan A only. Plan A is defined as a minimum of 30 credits, eight of which must be from thesis research, and requires the completion of an approved research thesis. Full-time thesis research can begin in the second semester with advisor approval. Click **here** for a full description of the coursework associated with the program.

M.S. candidates with less than 16 credit hours of course credits in BMB may transfer to the PhD program with the approval of the Graduate Committee. Such candidates must then take and pass the PhD written qualifying exam. M.S. candidates with more than 16 hours must complete the M.S. degree and reapply to the Ph.D. program if they wish.

All coursework must be completed in accordance with the regulations of the Graduate School and the College. A minimum G.P.A. of 3.0 must be maintained throughout the program, 3.5 is required to maintain the scholarship. Students should strive to be 1st or 2nd author on one peer reviewed publication to validate the quality of their research and to compete effectively in their post-graduate careers.

Successful completion of an original research project is an essential part of the M.S. program and requires a full-time commitment in the summer following Year 1 formal coursework and in Year 2. The applicant for this degree should therefore select an advisor and project as early as possible in the second semester of the program. Option 2 students need this and a Research Plan form before registering for Winter semester. "Plan of Work" and "Petition for Candidacy Degree" forms should be filed by the end of the second semester with the Office of Graduate Studies. Master's students will hear oral presentations by Faculty who are accepting Master's students in the early portion of BMB 7890. They should select an adviser and committee to initiate research in BMB7996 Winter and Summer of Year 1, during which time they define their thesis projects.

Applicants for the Master of Science degree must complete the following coursework, including at least eight credits of master's research. Required coursework includes the following:

Code	Title	Credits
BIO 6000	Molecular Cell Biology I	3
BMB 7010	General Biochemistry Lecture	4
BMB 7030	Core Concepts in Technologies in Biochemistry and Molecular Biology	4
BMB 7320	Protein Structure and Function	3
BMB 7330	Advanced Molecular Biology	2
or BMB 7360	Advanced Structural Biology	
BMB 7890	Journal Club (First Year)	1
BMB 7890	Journal Club (Second Year)	1
BMB 7996	Research (First Year)	2
BMB 7996	Research (Second Year)	6
BMB 8999	Master's Thesis Research and Direction	8
Total Credits		34

The completion of an original research project and the preparation and presentation of a thesis are the primary activities of the second year.

Academic Scholarship: All course work must be completed in accordance with the regulations of the Graduate School (p. 12) and the School of Medicine (p. 258) governing graduate scholarship and degrees.

Biochemistry and Molecular Biology (Ph.D.)

The Department of Biochemistry, Microbiology & Immunology offers a program of coursework and experimental research leading to a doctoral degree in Biochemistry & Molecular Biology. Areas of strength within the department include the molecular biology of gene structure and function, bioenergetics, enzymology, and macromolecular structural biology.

In their first year, all Ph.D. graduate students in the School of Medicine's Interdisciplinary Biomedical Sciences (IBS) program (of which we are a part) participate in a combined First Year curriculum, which provides broad-based knowledge in important areas of fundamental biomedical research. Faculty from all departments participate in the teaching, which emphasizes critical discussion of primary and secondary literature. The fall semester covers Molecular and Cell Biology. During the winter semester of the first year, coursework includes two two-credit IBS course offerings chosen by the student, together with two departmental courses that are required for our Ph.D. students: Protein Structure and Function (BMB 7320) and Molecular Biology (BMB 7330).

In addition to these courses, first-year students undertake a series of ten-week laboratory rotations designed as in-depth introductions to the laboratories of their greatest interest. During the first weeks of the fall semester, faculty with slots available in their laboratories participate in a briefing session for incoming students to describe their research work. Further one-on-one discussion with individual faculty members is also encouraged. Students are urged to gather as much background information as possible before making these choices as they are likely to be a major factor in determining the direction of their entire professional career. Generally, each student does three rotations during the fall and winter semesters, and on the basis of this experience, chooses the laboratory in which they will carry out their doctoral research.

After the first year in the program, students choose courses from anywhere in the University, to focus on their particular interests. Six credit hours in an appropriate minor are required, which need not be confined

to coursework offered in the School of Medicine. Favorite choices for the minor include courses in computer science or chemistry. In addition, all students in year 2 and beyond are required to register for Journal Club (BMB 7890) each year. It is expected that most course work will be completed by the end of the second years. A minimum G.P.A. of 3.0 must be maintained throughout the program.

A written comprehensive qualifying exam is administered near the end of the first year, followed by an oral examination by the student's dissertation committee in the area of the proposed thesis research. The dissertation committee should ideally be selected in the Fall semester of Year 2. The committee is composed of the Advisor to the candidate and three other members, including two faculty from the Department of Biochemistry, Microbiology & Immunology whose primary affiliation is with the Biochemistry & Molecular Biology program. Subsequent years are primarily devoted to dissertation research. Each student in the third year and beyond is required to meet with their dissertation committee once a year (twice if the committee calls for it), to discuss progress in their research projects.

Applicants for the Doctor of Philosophy degree must complete ninety credits, including at least thirty credits in research and dissertation, at least six credits in a minor and the remaining credits distributed between the major and required cognate courses and electives. During their first year, students undertake rotations, each of ten weeks duration, in two laboratories of their choice. The intention of rotations is to allow the student to make an informed decision about his or her ultimate area of research specialization. Coursework requirements include one course in the School of Medicine's Interdisciplinary Biomedical Sciences (IBS) curriculum and one course offered by the department or a research elective:

Code	Title	Credits
IBS 7015	Interdisciplinary Cell and Molecular Biology	6
In addition three credit hours of research (BMB 7996) or an elective should be taken for a total of 10 credit hours during the first semester.		3
Select four credits of additional courses of the following:		4
IBS 7030	Functional Genomics and Systems Biology	
IBS 7050	Molecular Neuropsychopharmacology	
IBS 7090	Biomedical Immunology	
IBS 7100	Biomedical Neuropharmacology	
IBS 7110	Introduction to the Business of Biotechnology	
IBS 7115	Special Topics in Biotechnology Commercialization	
IBS 7130	Systems Neuroscience: Structure and Function of the Nervous System	
IBS 7140	Foundations of Data Science	

Required Departmental courses include:

BMB 7320	Protein Structure and Function	3
BMB 7330	Advanced Molecular Biology	2
BMB 7890	Journal Club (Max. 6, one credit per academic year. Students participate in Journal Club every semester while in the BMB program.)	1

Each student must arrange a program in an area of minor concentration with a representative of the department in which he/she plans to minor and preferably with the representative on the doctoral committee. Areas of minor concentration include organic chemistry, physical chemistry, physical-organic chemistry, microbiology or immunology, pharmacology, physiology, biology, and computer science.

The thirty credit dissertation registration requirement is fulfilled by registering for the courses BMB 9991, BMB 9992, BMB 9993, and BMB 9994 (Doctoral Dissertation Research and Direction I, II, III, and IV, respectively), in consecutive academic year semesters.

Academic Scholarship: All course work must be completed in accordance with the regulations of the Graduate School (p. 12) and the School of Medicine (p. 258) governing graduate scholarship and degrees.

Immunology and Microbiology (M.S.)

The M.S. program in Immunology & Microbiology provides education, training and research experience for students interested in research careers in academia, medicine and industry. The program requires completion of a research project and thesis. The program does not provide formal preparation for careers in medical technology or clinical laboratory science that require professional accreditation.

The M.S. in Immunology and Microbiology program is designed to be a full-time educational experience requiring the completion of 33 credits over a two-year period. The first year is comprised of a mixture of coursework and research. The second year is focused primarily on research.

Candidates must complete a minimum of thirty-three credits in course work and research in accordance with Plan A (p.), including the courses listed below.

Code	Title	Credits
BMB 7010 or MGG 7010	General Biochemistry Lecture Molecular Biology and Genetics	4
IM 7040	Fundamentals of Research	2
IM 7010	Fundamentals of Immunology	2
IM 7030	Molecular Biology of Viruses	2
IM 7520	Molecular Mechanisms of Bacterial Pathogenesis	2
IM 7850	Research Conferences in Immunology and Microbiology	1-5
IM 7890	Seminar	1

Immunology and Microbiology (Ph.D.)

The Ph.D. program in Immunology & Microbiology educates and trains students for research careers in immunology, microbiology or virology. During the first year of the program, students take courses in cellular and molecular biology as part of the interdisciplinary biomedical sciences curriculum, as well as courses in immunology, microbiology, and virology. Participation in journal clubs, seminars and research rotations in faculty laboratories provide opportunities to become familiar with the faculty and other students. An oral preliminary examination is administered during the summer of the first year. Selection of a dissertation advisor typically occurs after the preliminary examination. Dissertation research begins at this time and continues through the remainder of the program. A dissertation advisory committee is formed by the end of the second year and thereafter meets regularly (at least once every 6 months) with the student to review research progress and course work related to the student's doctoral program. Students typically defend their dissertation near the end of their fifth year. The program also requires submission of a first author publication to a peer-reviewed journal.

Students in the Immunology and Microbiology Department enroll in the School of Medicine's Interdisciplinary Biomedical Sciences (IBS) curriculum during their first year. The curriculum includes:

Code	Title	Credits
IBS 7015	Interdisciplinary Cell and Molecular Biology	6
It also includes selection by the student in conjunction with the Departmental Graduate Officer of courses within the IBS Systems curriculum, including IBS 7090, Fundamentals of Immunology (two credits) and selections from other IBS Systems courses		
IM 7040	Fundamentals of Research	2
IM 7030	Molecular Biology of Viruses	2
IM 7520	Molecular Mechanisms of Bacterial Pathogenesis	2
IM 7996	Research	1-8

Candidates for the doctoral degree must complete ninety credits beyond the bachelor's degree, including thirty credits in doctoral dissertation direction. The thirty-credit dissertation requirement is fulfilled by registering for IM 9991, IM 9992, IM 9993 and IM 9994 (Doctoral Dissertation Research and Direction I, II, III, and IV, respectively), in consecutive academic year semesters. For information regarding distribution of credits among major and minor requirements, consult the department.

Clinical and Translational Science (Bridge Graduate Certificate)

Certificate Director: Daniel A. Walz, Ph.D.

Office: School of Medicine Biomedical Graduate Programs, 1128 Scott Hall

The Graduate Certificate in Clinical and Translational Science (Bridge Program) trains M.D./Ph.D. students in the key elements of clinical and translational science. Thus, the curriculum for this certificate includes courses in biostatistics; epidemiology; development of novel clinical and translational methodologies; designing and implementing clinical trials and clinical research; understanding the clinical presentation, diagnosis, management and treatment of patients in the context of cutting-edge research methodologies; adhering to federal regulatory and ethical requirements in conducting clinical and scientific research; and preparing, writing and submitting competitive fellowship and grant applications to national and federal peer-reviewed funding agencies as well as performing research.

Admission Requirements

Admission to these programs is contingent upon admission to the Graduate School (p. 19) and the graduate programs of the School of Medicine (p. 258), respectively. Admission is limited to students in the M.D./Ph.D. program. Applicants should file a Change of Graduate Status with the School of Medicine Graduate Program Office and include a very brief statement of purpose for enrolling in this curriculum.

This Graduate Certificate in Clinical and Translational Science requires fifteen credits of course work. Under this Bridge Program, all of the certificate credits may be applied toward the requirements of the M.S. in Medical Research (p. 266). The program is designed for seven to eight years, over the duration of the M.D./Ph.D. program. All course work must be completed in accordance with the regulations of the Graduate School (p. 12) and the School of Medicine (p. 258) governing graduate scholarship and degrees, including a cumulative earned 3.0 g.p.a. in the courses offered for credit, and Satisfactory ('S') grades in the courses graded Satisfactory/Unsatisfactory (S/U).

Required Courses

The Graduate Certificate in Clinical and Translational Science requires fifteen credits of courses including:

Code	Title	Credits
BMS 6010	Responsible Conduct in Biomedical Research	1
FPH 7010	Urban Community Assessment and Planning	1
FPH 7240	Epidemiology	3
MDR 7090	Fellowship Writing	2
MDR 7100	Clinical Research Design	2
MDR 7110	Clinical Field Experience	2
PSL 7710	Disease States and Reproductive Processes (or equivalent course)	1
Total Credits		12

Genetic Counseling (M.S.)

Office: 2375 Scott Hall; 313-577-6298

Program Director: Angela M. Trepanier, M.S., C.G.C.

Associate Director: Erin Carmany, M.S., CGC

The graduate program in Genetic Counseling is located in the Center for Molecular Medicine and Genetics (CMMG) on the School of Medicine campus. Genetic counselors are medical professionals who help people understand and adapt to the medical, psychological and familial implications of genetic contributions to disease. This is achieved through the following: procuring and interpreting family and medical histories to assess the chance of disease occurrence or recurrence; educating about inheritance, testing, management, resources, and research; and providing counseling to promote informed decision-making and adaptation to genetic disease or risk. The practice of genetic counseling requires comprehensive knowledge of human and medical genetics in combination with an appreciation for the psychological, ethical, and social issues associated with genetic disorders. It also requires strong critical thinking, psychosocial assessment, and interpersonal communication skills. Genetic counselors generally work as part of a health care team in a variety of clinical settings such as pediatric genetics, reproductive genetics, cancer genetics, inherited metabolic disorders/newborn screening, cardiovascular genetics, and neurogenetics. Genetic counselors also work in many other settings including clinical laboratories, public health departments, universities, advocacy organizations, and public policy organizations. In addition to providing genetic counseling services to patients, genetic counselors may have roles in research, genetic testing, sales and marketing, leadership, advocacy, public policy, and/or education.

The graduate program in genetic counseling is designed to prepare students with the appropriate knowledge base and practical experience to function as genetic counselors in a wide array of settings. The curriculum consists of course work in molecular biology, human and medical genetics, embryology, epidemiology, research methods, biostatistics, the principles, theory, and practice of genetic counseling, ethics, cultural competency, counseling, and interpersonal communication. In addition, students gain practical experience by doing supervised clinical internships in a broad range of genetics and specialty clinics as well as clinical genetics laboratories. Students are also required to conduct a research project on a relevant clinical or professional topic (modified Plan B). This program is accredited by the Accreditation Council of Genetic Counseling.

Admission Requirements

Admission to the genetic counseling program is contingent upon admission to the Graduate School (p. 19) and the graduate programs of the School of Medicine (p. 258), respectively. Applicants must have a 4-year baccalaureate degree with a grade point average of at least 3.0 or equivalent. Undergraduate course work in biology, biochemistry, chemistry, genetics, organic chemistry, statistics and psychology is

required. Also required are three letters of recommendation, a written essay, and Graduate Record Examination scores. Prospective students are strongly encouraged to shadow and/or speak with a genetic counselor, attend a genetic counseling program open house, and/or do other activities that will familiarize them with the field before applying. The genetic counseling program holds open houses 2-3 times per year where potential applicants can learn about the profession by interacting with and hearing presentations from practicing genetic counselors. Advocacy experience is also a prerequisite to admission. Counseling advocacy, which includes but is not limited to crisis counseling (including crisis text hotline), sexual assault or domestic violence counseling, serving as a resident assistant, or facilitating a grief and loss support group, is required. For questions about the suitability of an advocacy experience, please contact the program directors.

The genetic counseling program participates in the Association of Genetic Counseling Program Directors' Genetic Counseling Admissions Match, administrated by National Matching Services, Inc. Only applicants that register to take part in the admissions match are considered for admission.

The Master of Science in Genetic Counseling program is offered as a Master's Degree Plan B (p.), requiring a research project. The curriculum includes approximately forty-seven credits: thirty-five credits in core course work, six credits in clinical internships, and six credits for the research project (coursework and independent study). Students should contact the Program Director (geneticcounseling@med.wayne.edu) for more details about required courses

First Year		
Fall Semester		Credits
MGG 7010	Molecular Biology and Genetics	4
MGG 7640	Principles of Genetic Counseling	4
MGG 7830	Human Development and Teratology Seminar	1
MGG 7999	Master's Research Project and Direction (Seminar course)	1
FPH 7015	Biostatistics I	3
FPH 7240	Epidemiology	3
		Credits 16
Winter Semester		
MGG 7660	Practical Applications of Genetic Counseling	3
MGG 7740	Theory and Practice of Genetic Counseling	3
MGG 7860	Evaluating the Health Care Literature	1
MGG 7880	Genetic Counseling Seminar	1

MGG 7600	Advanced Human Genetics	4
MGG 8998	Genetic Counseling Internship	1
MGG 7710	Introduction to Medical Genetics	2
Credits		15
Spring/Summer Semester		
MGG 8998	Genetic Counseling Internship (2 internships, 7 weeks each)	1
Credits		1
Second Year		
Fall Semester		
MGG 7741	Advanced Genetic Counseling Theory and Practice	3
MGG 7800	Advanced Medical Genetics	3
MGG 7999	Master's Research Project and Direction (Independent study)	1
MGG 8998	Genetic Counseling Internship (Two 7-week internships)	2
Credits		9
Winter Semester		
MGG 7880	Genetic Counseling Seminar	1
MGG 7881	Senior Seminar in Genetic Counseling	2
MGG 7999	Master's Research Project and Direction	1
MGG 8998	Genetic Counseling Internship (Two 7-week internships)	2
Credits		6
Total Credits		47

Medical Research (M.S.)

Office: 1128 Scott Hall; 313-577-1455

Program Director: George S. Brush, Ph.D.

The Master of Science in Medical Research (M.S.M.D.R) program provides a broadly based, multi-disciplinary, human biology-oriented master's level education and requires basic and/or clinical biomedical research training. Admission to the program is available to individuals

who have a professional medical (M.D., D.O.), dental (D.D.S.), pharmaceutical (Pharm.D.), or equivalent degree in human health care and who are actively participating in Wayne State University School of Medicine affiliated post-graduate clinical medicine training, or are affiliated faculty members. The M.S.M.D.R program enables individuals to obtain research credentials for entry into an academic medical, dental, or pharmacologic research career, or for individuals already in an academic medical, dental, or pharmacologic career to change their research emphasis.

An additional MSMDR program has been developed for students enrolled in the M.D. program at Wayne State University School of Medicine. The master's portion of this joint M.S.-M.D. program is designed to provide a multi-disciplinary, human biology-oriented education with basic and/or clinical research training. The program will be of value to medical students who wish to include research in their future careers, and will prepare them to understand how concepts, therapies, and technologies are translated from the laboratory to the clinic. Inquiries should be sent to the Program Director.

Admission Requirements

Admission to this program is contingent upon admission to the Graduate School (p. 19). Applications must be submitted online which allows submission of the applicant's information, statement of purpose, and the three required references. One of the references must be from the prospective thesis advisor who must be a WSU School of Medicine Graduate Faculty member. For application review, a professional applicant must provide the M.S.M.D.R Program transcripts with proof of a degree from a professional degree-granting institution, either medical (M.D., D.O.), dental (D.D.S.), pharmaceutical (Pharm.D.) or equivalent. Copies of transcripts may be submitted for application review; however, the Graduate School will require submission of an official transcript showing degree awarded prior to enrollment. International medical graduates must provide a valid certificate from the Educational Commission for Foreign Medical Graduates. A medical school applicant must be in good standing in the second or third year of the M.D. program at Wayne State University School of Medicine. Students who have completed the Medical Student Summer Research Fellowship are encouraged to apply.

The Master of Science in Medical Research is offered only as a Plan A master's program requiring completion of thirty credits, including an eight-credit thesis.

Courses

For students with professional degrees, a minimum of two courses, each one reflecting a different discipline/subject area (as reflected in the different two or three-letter course prefixes) must be chosen from the following:

Code	Title	Credits
BMB 7010	General Biochemistry Lecture	4
BMS 6010	Responsible Conduct in Biomedical Research	1
CB 7210	Fundamentals of Cancer Biology	3
FPH 7015	Biostatistics I	3
FPH 7210	Research Methods for Public Health Professionals	3
IM 7010	Fundamentals of Immunology	2
IM 7030	Molecular Biology of Viruses	2
IM 7520	Molecular Mechanisms of Bacterial Pathogenesis	2
MGG 7010	Molecular Biology and Genetics	4
MGG 7091	Scientific Communication	2
PHC 6500	Drugs and the Addictive Process	3

PHC 7010	Pharmacology Lecture	4
PHC 7410	Principles of Toxicology	3
PSL 7010	Basic Graduate Physiology Lecture I	4
PSL 7030	Basic Graduate Physiology Lecture II	4
PTH 7500	Systemic Pathophysiology	3
PYC 7010	Neurobiology I	3

The following courses are required:

Code	Title	Credits
BMS 6010	Responsible Conduct in Biomedical Research	1
MGG 7091 or MDR 7090	Scientific Communication Fellowship Writing	2

In addition, a minimum of two courses must be chosen, upon consultation with the thesis advisor and program director, that complement the research activities.

Elective Courses

Elective credits sufficient to complete the degree requirements must be approved by written consent of the Program Director.

The Plan of Work is developed by the student in consultation with the prospective thesis advisor and filed with the Program Director. The deadline is specified by the Graduate School and enforced by the Registrar. With the Program Director's approval the student is advanced to candidacy status.

Thesis Requirement: Completion of MDR 8999, Master's Thesis Research and Direction, Cr. 8; prereq: M.S. in Medical Research candidacy status, approved thesis outline, consent of advisor, and authorization by M.S.M.D.R Program Director.

Thesis Advisor: The advisor is selected with the advice and consent of the Program Director. The Thesis Committee, selected with the advice and consent of the Thesis advisor, must be composed of three graduate faculty members, including the thesis advisor who also serves as the student's academic advisor for the remainder of his/her program. The candidate must prepare an outline of the thesis, obtain signatures of approval from all Committee members, and file with Program Director for approval.

Thesis and Defense: The thesis document must be provided to the Thesis Committee for review prior to the oral defense. The Committee evaluates the thesis document and following the subsequent oral defense determines the MDR 8999 final grade.

Molecular Genetics and Genomics

Office: 3127 Scott Hall; 313-577-5323

Director: Lawrence I. Grossman
<http://www.genetics.wayne.edu>

Graduate programs in Molecular Genetics and Genomics are administered by faculty in the Center for Molecular Medicine and Genetics (CMMG). Degree programs include the Master of Science, Doctor of Philosophy, and a joint M.D.-Ph.D. program. Molecular Genetics and Genomics graduate students receive broad training in genetics, molecular and cellular biology, genomics, functional genomics, systems biology, bioinformatics, and computational and statistical methods. A major component of their training involves conducting dissertation or thesis research in one of the focus areas of Center faculty. Students receive intensive laboratory training, working closely with faculty on projects at the forefront of biomedical genetics and genomics research.

- Molecular Genetics and Genomics (M.S.) (p. 267)
- Molecular Genetics and Genomics (Ph.D.) (p. 267)

Molecular Genetics and Genomics (M.S.)

Admission Requirements

Admission to the Molecular Genetics and Genomics graduate programs is contingent upon admission to the Graduate School (<http://bulletins.wayne.edu/graduate/general-information/admission>) and the graduate programs of the School of Medicine (<http://bulletins.wayne.edu/graduate/school-medicine/programs>). Applicants for the M.S. program must have an undergraduate degree with a major in biology or related science. Students with backgrounds in mathematics or computer science are also encouraged to apply, as are students with significant research experience. Applicants should submit a personal statement and Graduate Record Examination scores and have three letters of recommendation sent directly to the Program. International students must be proficient in English and demonstrate a satisfactory performance on the TOEFL English proficiency examination. Members of the admissions committee will interview select applicants.

The Plan A MS degree requires completion of Master's Thesis Research and Direction (MGG 8999 (<http://bulletins.wayne.edu/search/?P=MGG%208999>), Cr. 8), which includes original research and writing and defense of a thesis. The Plan B MS degree requires completion of Master's Essay in Molecular Genetics and Genomics. The MS degree requires 34 credit hours to graduate. Students in the MS program enroll in the following courses.

Code	Title	Credits
MGG 7010	Molecular Biology and Genetics	4
GS 0900	Essential Research Practices: Responsible Conduct of Research	0
FPH 7015	Biostatistics I	3
MGG 7015	Introduction to Genetics	2
MGG 7030	Functional Genomics and Systems Biology	2
MGG 7050	Bioinformatics: theory and practice	3
MGG 7091	Scientific Communication	2

Elective courses in Molecular Genetics and Genomics

Code	Title	Credits
MGG 7020	Metabolism and Disease	2
MGG 7400	Molecular Biology of Cellular Signalling	2
MGG 8010	Quantitative Data Analysis for Biological and Medical Sciences	2
MGG 8680	Advanced Topics in Molecular Genetics and Genomics	1-3
MGG 8770	Molecular Biology of Mitochondrial Disease	2

All course work must be completed in accordance with the regulations of the Graduate School (p. 12) and the School of Medicine (p. 258) governing graduate scholarship and degrees.

Molecular Genetics and Genomics (Ph.D.)

Admission Requirements

Admission to the Molecular Genetics and Genomics graduate programs is contingent upon admission to the Graduate School (<http://bulletins.wayne.edu/graduate/general-information/admission>) and the graduate programs of the School of Medicine (<http://bulletins.wayne.edu/graduate/school-medicine/programs>). Applicants must have an undergraduate degree with a major in biology or related science. Students with backgrounds in mathematics or computer science are also encouraged to apply, as are students with a Master's degree and significant research experience. A minimum grade point average of 3.0 from the most recent degree is required. Applicants should submit a personal statement and Graduate Record Examination scores and have three letters of recommendation sent directly to the Program. International students must be proficient in English and demonstrate a satisfactory performance on the TOEFL English proficiency examination. Members of the admissions committee will interview select applicants.

Assistantships and Research

Competitively awarded assistantships or fellowships are available to fund students during their studies. All students accepted into the doctoral degree program are considered for financial assistance, and no application forms are necessary for this purpose. All students, whether or not they hold a fellowship or an assistantship, are required to assist the graduate faculty in research and teaching activities as a component of their educational experience.

Ph.D. students in the graduate program in molecular genetics and genomics enroll in the School of Medicine's Interdisciplinary Biomedical Sciences (IBS) curriculum during their first year. The IBS curriculum includes:

Code	Title	Credits
Required IBS courses		
IBS 7015	Interdisciplinary Cell and Molecular Biology	6
GS 0900	Essential Research Practices: Responsible Conduct of Research	0
Required courses in Molecular Genetics and Genomics		
FPH 7015	Biostatistics I	3
MGG 7015	Introduction to Genetics	2
MGG/IBS 7030	Functional Genomics and Systems Biology	2
MGG 7050	Bioinformatics: theory and practice	3
MGG 7091	Scientific Communication	2
MGG 7460	Research Training in Molecular Biology and Genetics	1-8
MGG 7600	Advanced Human Genetics	4
Elective courses in Molecular Genetics and Genomics		
MGG 7020	Metabolism and Disease	2
MGG 7400	Molecular Biology of Cellular Signalling	2
MGG 8010	Quantitative Data Analysis for Biological and Medical Sciences	2
MGG 8680	Advanced Topics in Molecular Genetics and Genomics	1-3
MGG 8770	Molecular Biology of Mitochondrial Disease	2

Elective and advanced topics courses will be selected to meet student needs. The program will enable the student to demonstrate a basic understanding of molecular genetics and genomics, in order to pass a general examination for candidacy for the Ph.D. degree.

Dissertation: Thirty credits in dissertation research are required in the Ph.D. program. This requirement is fulfilled by registering for the courses MGG 9991, MGG 9992, MGG 9993, and MGG 9994 (Doctoral Dissertation Research and Direction I, II, III, and IV, respectively), in consecutive

academic year semesters. Students must write an original research dissertation, have it approved by a dissertation committee, and present it in a public defense.

Academic Scholarship: All course work must be completed in accordance with the regulations of the Graduate School (p. 12) and the School of Medicine (p. 258) governing graduate scholarship and degrees.

Cancer Biology (M.S.)

The M.S. program in Cancer Biology offers a strong didactic and laboratory curriculum in cancer biology with a major focus on molecular oncology. Our goal is to provide intensive research training for students who are interested in a career in academia, medicine, industry, or related careers in which first-hand research experience is an asset. Research interests in the Department of Oncology are diverse and dynamic, allowing students to choose from a broad spectrum of topics for their research thesis. Students are encouraged to attend weekly departmental, student seminars, journal club, and annual symposiums. These regular interactions between students and faculty help our students develop oral communication and collaboration skills for future success.

Admission Requirements

Admission to the M.S. program is contingent upon admission to the Graduate School (p. 19) and the graduate programs of the School of Medicine (p. 258). Qualified applicants must have a B.S. or B.A. degree from an accredited college or university, preferably with a major in biology, chemistry, physics, or a closely related discipline. A complete application includes the basic application form, personal statement, official transcripts from previous institutions, three letters of reference, and Graduate Record Examination (GRE) test scores. International students must be proficient in English as determined by satisfactory performance on the Test of English as a Foreign Language (TOEFL) examination. GRE and TOEFL scores should be reported to Wayne State University using institution code 1898. Applications must be submitted online by April 1st.

Contact Information

Administrative Office for the M.S. Program in Cancer Biology
Department of Oncology
Wayne State University School of Medicine
421 E Canfield Street

Detroit, MI 48201

Tel: 313-578-4302

Email: danieln@karmanos.org

The master's degree in Cancer Biology is offered under Plan A only. A minimum of 30 credits, eight of which must be from thesis research, and the completion of an original research project are required to receive a M.S. degree. A minimum g.p.a of 3.0 must be maintained throughout the program. Students should select an advisor and committee as early as possible in the second semester of year 1 to begin full time thesis research. Students should strive to publish one peer-reviewed paper as first or second author to demonstrate the quality of their research.

Code	Title	Credits
Required Courses		12
MGG 7010	Molecular Biology and Genetics	
BMB 7010	General Biochemistry Lecture	
CB 7210	Fundamentals of Cancer Biology	
CB 7800	Rigor and Reproducibility in Cancer Biology	
Elective Courses (select 10 credits from the following)		10
CB 7220	Molecular Biology of Cancer Development	
CB 7240	Principles of Cancer Therapy	
CB 7460	Mechanisms of Neoplasia: Alterations to Cellular Signaling	
CB 7300	Special Topics in Cancer Biology ((1 credit each))	
CB 7600	Applied Cancer Biostatistics	
CB 7430	Cancer Epidemiology	
BMS 7115	Special Topics in Biotechnology Commercialization	
Thesis course		8
CB 8999	Master's Thesis Research and Direction	
Total Credits		30

Medical Physics (D.M.P.)

Medical Physics is an applied branch of physics concerned with the application of the concepts and methods of physics to the diagnosis and treatment of human disease. Medical Physicists participate in clinical service and consultation, research and development, and education in the areas of radiation oncology, diagnostic radiology, nuclear medicine, and health physics. The Department of Oncology offers courses of study leading to a Master of Science degree, a Doctor of Philosophy degree, a Professional Doctorate degree, or a Graduate Certificate in Medical Physics. Through courses, seminars, laboratories, research experiences, and clinical internships, the Medical Physics programs provide education and clinical training in the physics of Diagnostic Radiology, Nuclear Medicine, and Radiation Oncology.

Admission Requirements

Admission to this program is contingent upon admission to the Graduate School (p. 19) and the graduate programs in the School of Medicine (p. 258). A bachelor's degree in physics or a physical science is the preferred background for students entering these programs, although candidates with degrees in other scientific or technological specialties may be accepted provided they have an adequate education in physics and mathematics. Applicants with incomplete physics and/or mathematics backgrounds will be required to complete their preparation in these areas before acceptance into a program. Applicants for the Graduate Certificate are required to have a Ph.D. in physics or related discipline prior to admission.

Academic Scholarship

All course work must be completed in accordance with the regulations of the Graduate School (p. 12) and the School of Medicine (p. 258) governing graduate scholarship and degrees.

The Professional Doctorate (DMP) program requires ninety credits beyond the baccalaureate including thirty credits of clinical residency in Radiation Oncology Physics. The thirty credit clinical requirement is fulfilled by registering for the courses ROC 9996, ROC 9997, ROC 9998, and ROC 9999 (Radiation Oncology Physics Clinical Rotation I, II, III, and IV, respectively), in consecutive academic year semesters.

Assistantships and Research: The Department has graduate assistantships and graduate research positions available for a number of qualified full-time students. All students accepted into the graduate degree program are considered for financial assistance and no application forms are necessary for that purpose. Students on assistantships are advised to elect no more than twelve credits in a given semester. All students, whether or not they hold a fellowship or an assistantship, are required to assist the graduate faculty in teaching and research activities as a component of their educational experience.

Medical Physics (Graduate Certificate)

Medical Physics is an applied branch of physics concerned with the application of the concepts and methods of physics to the diagnosis and treatment of human disease. Medical Physicists participate in clinical service and consultation, research and development, and education in the areas of radiation oncology, diagnostic radiology, nuclear medicine, and health physics. The Department of Oncology offers courses of study leading to a Master of Science degree, a Doctor of Philosophy degree, a Professional Doctorate degree, or a Graduate Certificate in Medical Physics. Through courses, seminars, laboratories, research experiences, and clinical internships, the Medical Physics programs provide education and clinical training in the physics of Diagnostic Radiology, Nuclear Medicine, and Radiation Oncology.

Admission Requirements

Admission to this program is contingent upon admission to the Graduate School (p. 19) and the graduate programs in the School of Medicine (p. 258). A bachelor's degree in physics or a physical science is the preferred background for students entering these programs, although candidates with degrees in other scientific or technological specialties may be accepted provided they have an adequate education in physics and mathematics. Applicants with incomplete physics and/or mathematics backgrounds will be required to complete their preparation in these areas before acceptance into a program. Applicants for the Graduate Certificate are required to have a Ph.D. in physics or related discipline prior to admission.

Academic Scholarship

All course work must be completed in accordance with the regulations of the Graduate School (p. 12) and the School of Medicine (p. 258) governing graduate scholarship and degrees.

The Graduate Certificate requires a PhD in Physics or related science to be eligible for application and requires completion of 19 graduate credits of didactic coursework.

Assistantships and Research: The Department has graduate assistantships and graduate research positions available for a number of qualified full-time students. All students accepted into the graduate degree program are considered for financial assistance and

no application forms are necessary for that purpose. Students on assistantships are advised to elect no more than twelve credits in a given semester. All students, whether or not they hold a fellowship or an assistantship, are required to assist the graduate faculty in teaching and research activities as a component of their educational experience.

Medical Physics (M.S.)

Medical Physics is an applied branch of physics concerned with the application of the concepts and methods of physics to the diagnosis and treatment of human disease. Medical Physicists participate in clinical service and consultation, research and development, and education in the areas of radiation oncology, diagnostic radiology, nuclear medicine, and health physics. The Department of Oncology offers courses of study leading to a Master of Science degree, a Doctor of Philosophy degree, a Professional Doctorate degree, or a Graduate Certificate in Medical Physics. Through courses, seminars, laboratories, research experiences, and clinical internships, the Medical Physics programs provide education and clinical training in the physics of Diagnostic Radiology, Nuclear Medicine, and Radiation Oncology.

Admission Requirements

Admission to this program is contingent upon admission to the Graduate School (p. 19) and the graduate programs in the School of Medicine (p. 258). A bachelor's degree in physics or a physical science is the preferred background for students entering these programs, although candidates with degrees in other scientific or technological specialties may be accepted provided they have an adequate education in physics and mathematics. Applicants with incomplete physics and/or mathematics backgrounds will be required to complete their preparation in these areas before acceptance into a program. Applicants for the Graduate Certificate are required to have a Ph.D. in physics or related discipline prior to admission.

Academic Scholarship

All course work must be completed in accordance with the regulations of the Graduate School (p. 12) and the School of Medicine (p. 258) governing graduate scholarship and degrees.

The Master of Science with a major in Medical Physics is offered under Plan B as defined by the Graduate School under Master's Degrees.

Assistantships and Research: The Department has graduate assistantships and graduate research positions available for a number of qualified full-time students. All students accepted into the graduate degree program are considered for financial assistance and no application forms are necessary for that purpose. Students on assistantships are advised to elect no more than twelve credits in a given semester. All students, whether or not they hold a fellowship or an assistantship, are required to assist the graduate faculty in teaching and research activities as a component of their educational experience.

Medical Physics (Ph.D.)

Medical Physics is an applied branch of physics concerned with the application of the concepts and methods of physics to the diagnosis and treatment of human disease. Medical Physicists participate in clinical service and consultation, research and development, and education in the areas of radiation oncology, diagnostic radiology, nuclear medicine, and health physics. The Department of Oncology offers courses of study leading to a Master of Science degree, a Doctor of Philosophy degree, a Professional Doctorate degree, or a Graduate Certificate in Medical Physics. Through courses, seminars, laboratories, research experiences, and clinical internships, the Medical Physics programs provide education

and clinical training in the physics of Diagnostic Radiology, Nuclear Medicine, and Radiation Oncology.

Admission Requirements

Admission to this program is contingent upon admission to the Graduate School (p. 19) and the graduate programs in the School of Medicine (p. 258). A bachelor's degree in physics or a physical science is the preferred background for students entering these programs, although candidates with degrees in other scientific or technological specialties may be accepted provided they have an adequate education in physics and mathematics. Applicants with incomplete physics and/or mathematics backgrounds will be required to complete their preparation in these areas before acceptance into a program. Applicants for the Graduate Certificate are required to have a Ph.D. in physics or related discipline prior to admission.

Academic Scholarship

All course work must be completed in accordance with the regulations of the Graduate School (p. 12) and the School of Medicine (p. 258) governing graduate scholarship and degrees.

The Ph.D. requires ninety credits beyond the baccalaureate including thirty credits of dissertation direction. The thirty credit dissertation registration requirement is fulfilled by registering for the courses ROC 9991, ROC 9992, ROC 9993, and ROC 9994 (Doctoral Dissertation Research and Direction I, II, III, and IV, respectively), in consecutive academic year semesters. The dissertation must be based on original research under the direction of a graduate faculty advisor.

Assistantships and Research: The Department has graduate assistantships and graduate research positions available for a number of qualified full-time students. All students accepted into the graduate degree program are considered for financial assistance and no application forms are necessary for that purpose. Students on assistantships are advised to elect no more than twelve credits in a given semester. All students, whether or not they hold a fellowship or an assistantship, are required to assist the graduate faculty in teaching and research activities as a component of their educational experience.

Pathology

Office: 9374 Scott Hall; 313-577-1102

Chairperson: Wael Sakr

<http://www.pathology.med.wayne.edu>

The discipline of pathology is a broadly based investigation of all aspects of the diseases that affect living systems. This includes the study of the underlying causes of disease, as well as the molecular and cellular mechanisms of the disease process. The goal of our Ph.D. program is to train students to be creative and successful scientists with a solid understanding of clinically relevant disease processes. Although broadly based, our Ph.D. program has a particular focus on the molecular and cellular mechanisms of cancer and metabolic diseases.

In the first semester, Pathology Ph.D. students join the first year Ph.D. students from all the Ph.D. programs at the medical school to take IBS 7015 during the first semester. In the subsequent semesters, each student follows a unique individualized plan of study designed to take into account previous educational experience, individual interests, and the student's thesis project research area. The program consists of a selected electives, small number of required courses, several research rotation projects, a qualifying examination, and a doctoral dissertation based on new and significant research findings.

- Pathology (Ph.D.) (p. 271)

Pathology (Ph.D.)

Admission Requirements

Admission to these programs is contingent upon admission to the Graduate School (p. 19) and the graduate programs of the School of Medicine (p. 258), respectively. The Department admits students with superior records of academic achievement holding either a bachelor's or master's degree. Applicants must have an undergraduate g.p.a. above a 3.0 and international students must show proficiency in English with a minimum TOEFL score of 100. Although there are no specific requirements, significant consideration will also be given to an applicant's area of undergraduate study, the amount of research experience, and Graduate Record Examination (GRE) scores.

Academic Scholarship

All course work must be completed in accordance with the regulations of the Graduate School (p. 12) and the School of Medicine (p. 258) governing graduate scholarship and degrees.

The Doctor of Philosophy degree requires the completion of ninety credits, including at least thirty credits in research and dissertation. Students must follow the general doctoral degree requirements of the Graduate School (p.) and the School of Medicine (p. 258). The thirty credits of doctoral dissertation research are fulfilled by registering for PTH 9991, PTH 9992, PTH 9993, and PTH 9994 in consecutive academic year semesters. Other courses are arranged to meet the specific needs and interests of each student. At the end of the second year of study, students are required to take a qualifying exam to demonstrate a basic understanding of basic molecular and cellular biology, pathology, and their chosen specific area of research. Doctoral thesis research is conducted in the laboratory of one of the Pathology faculty members.

Pharmacology

Office: 6374 Scott Hall; 313-577-1580

Chairperson: Ray Mattingly

Associate Chairperson: Lawrence H. Lash

<http://www.pharmacology.med.wayne.edu/>

The discipline of pharmacology is concerned with all aspects of the effects of drugs and chemicals on living systems. The field ranges from investigations at the molecular level to population studies on a global level. Drug development and evaluation make up an important part of pharmacology, but the field also includes the use of drugs as tools to probe the functions of macromolecules, cells, organs and even whole animals, and investigation of the harmful effects of chemicals on cells, organs and animals (toxicology). The breadth of interests encompassed by pharmacology provides excellent opportunities for individuals with strong interests and training in biology or chemistry to apply their knowledge to the understanding of fundamental biological processes.

- Pharmacology (M.S. and Ph.D.) (p. 271)

Pharmacology (M.S. and Ph.D.)

The Department of Pharmacology offers programs leading to the Master of Science degree and to the Doctor of Philosophy degree. In general, it is not recommended that students elect to register for a master's degree program, except under unusual circumstances. A joint Ph.D.-M.D. program is also available.

Admission Requirements

Admission to these programs is contingent upon admission to the Graduate School (p. 19) and the graduate programs of the School of Medicine (p. 258), respectively. Applicants to the graduate program of the Department of Pharmacology should have a background in one of the chemical or biological sciences. Students with diverse backgrounds will be considered individually if they have special competence related to one of the departmental areas of interest. Applicants are expected to provide scores from the Graduate Record Examination. A subject test is not required, but is helpful in making the admission decision. Personal interviews are recommended. Letters of inquiry should be directed to the Chair, Graduate Admissions Committee of the Department.

Academic Scholarship

All course work must be completed in accordance with the regulations of the Graduate School (p. 12) and the School of Medicine (p. 258) governing graduate scholarship and degrees.

Ph.D. students in the graduate program in pharmacology enroll in the School of Medicine's Interdisciplinary Biomedical Sciences (IBS) curriculum during their first year. The IBS curriculum includes:

Code	Title	Credits
IBS 7015	Interdisciplinary Cell and Molecular Biology	6
Selection by the student in conjunction with the departmental Graduate Officer of courses within the IBS Systems curriculum:		
IBS 7030	Functional Genomics and Systems Biology	2
IBS 7050	Molecular Neuropsychopharmacology	2
IBS 7090	Biomedical Immunology	2
IBS 7100	Biomedical Neuropharmacology	2
IBS 7110	Introduction to the Business of Biotechnology	3
IBS 7115	Special Topics in Biotechnology Commercialization	1
IBS 7130	Systems Neuroscience: Structure and Function of the Nervous System	2
IBS 7140	Foundations of Data Science	3
Total Credits		23

Pharmacology course requirements include: Pharmacology lecture (PHC 7010) (successful completion of this course will provide a waiver of two credits of Systems Biology coursework), participation in the journal club (PHC 7700) and seminar series (PHC 7890), and the selection of six advanced pharmacology minicourses (PHC 7650).

For each student in the program a unique plan is constructed to allow utilization of previous educational experience and individual interests, permitting the student to progress as rapidly as possible. The program consists of a small number of required courses, several research rotation projects, a qualifying examination, and a doctoral dissertation based on new and significant research findings. The research opportunities available for graduate students include the areas of biochemical, cellular, and renal pharmacology; neuropharmacology; cancer biology, including therapeutic approaches; drug metabolism; and environmental toxicology. Major expertise is available in cell biology of protein trafficking and signal transduction, in protein chemistry, proteases and molecular biology, cellular aging, and in functional imaging technology. A concentration in molecular neuropharmacology is available for specialized training in pharmacology as applied to neuroscience. The master's degree requires successful completion of a thesis based on original laboratory research. The thirty-credit Ph.D. dissertation registration requirement is fulfilled by registration in the courses PHC 9991, PHC 9992, PHC 9993, and

PHC 9994 (Doctoral Dissertation Research and Direction I, II, III, and IV, respectively), in consecutive academic year semesters.

Molecular and Environmental Toxicology (Ph.D. Concentration)

The MET concentration fulfills the basic requirements for a Ph.D. in Pharmacology but also entails additional toxicology-related classroom and research experience. The disciplines of pharmacology and toxicology are highly intertwined. They require the same basic knowledge set; involve the study of the same biochemical, molecular and genetic processes; and use a similar vocabulary. However, the focus of the two disciplines is different, with pharmacology being concerned with the therapeutic effects of drugs and toxicology being concerned with the detrimental effects of chemicals and agents on biological processes. The term "environmental" is used in the concentration's title to convey the concentration's attention to the effects of environmental exposure on human health, as opposed to ecological/terrestrial effects. The overall goals of the MET concentration are to provide comprehensive instruction in modern-era molecular and cellular toxicology, and an appreciation of how such expertise can be used not only to study the mechanism of an agent's toxic effects, but also in an inter-disciplinary fashion to study environmentally-linked disease. To achieve this goal, the MET concentration will offer interdisciplinary research opportunities and access to mentors who are dedicated to understanding the toxic effects of specific toxicants (environmental and therapeutic), as well as probing the complex effects of exposure to environmental stressors. Available research projects in the MET concentration will feature investigations examining the effects of environmental agents (e.g., urban air pollution, cigarette smoke, PCBs, lead, dioxin, and phthalates) on cellular and molecular processes involved in disease susceptibility, and initiation and progression. MET scientists are studying intracellular signaling pathways, transcriptional regulation of gene expression, apoptosis, oxidative stress, DNA repair, epigenetic and genetic perturbations, and complex mechanisms in cell growth and differentiation that determine the environmental contribution to diseases with a rising incidence in the urban setting such as metabolic disease, cancer, immune system disturbances and mental health disorders.

The MET concentration in the Department of Pharmacology Graduate Program emphasizes the use of contemporary approaches, such as advanced techniques in biochemistry, cell biology, molecular biology, molecular genomics, epigenetics, bioinformatics, proteomics, and epidemiology, in problems aimed at dissecting the mechanisms of environmentally-induced disease. In order to prepare for challenging careers in academics, industry and government, students in the MET concentration are expected to seek access to research laboratories that conform to standards of excellence and are recognized by peers to be competitive in the environmental health sciences/molecular and cellular toxicology field. It is the goal of the MET concentration to prepare our students of today to serve as the leaders of tomorrow.

Molecular Neuropharmacology (Ph.D. Concentration)

The doctoral program in Pharmacology includes a concentration in molecular neuropharmacology. The focus of this concentration is to provide training in the molecular aspects of neuropharmacology, with an emphasis in molecular signaling and functional genomics. The Department recruits competitive, highly motivated graduate students for training in this unique and topical discipline.

Pharmacologists, by the very nature of their discipline, determine the response of individual cells, tissues and/or organisms to changes in the internal and external environment (including therapeutic

agents) and are thus in increasing demand in the 'post-genomic' era. Neuropharmacologists are especially in demand, given both the need for current therapeutic drugs for CNS disorders and the rapid pace of discovery about basic neural mechanisms that shows much promise for therapeutic purposes. Biomedical scientists are now acutely aware that there is, in fact, not a single human genome but myriad genomes comprised of countless DNA deletions, insertions, and single nucleotide polymorphisms which change the substrate upon which environmental factors act and also modify human response to therapeutic drugs. Neuropharmacology, in the post-genome era, thus encompasses both the effects of drugs on neural cell function as well as the influence of genetic variations (from SNPs to gene knockouts) on drug responses at the cellular and organismic level. In this context, application of molecular and genetic tools provides critical insights into brain function and facilitate the development of novel therapeutics for brain dysfunction and tumors.

Physiology

Office: 5374 Scott Hall; 313-577-1520

Chairperson: Jian-Ping Jin

<http://physiology.med.wayne.edu>

Physiologists study the functions of living organisms, tissues and/or isolated cells. The emphasis in physiology is on the functional interrelationships between healthy, as opposed to diseased tissues, cells and sub-cellular components. Increasingly, the discipline focuses on the properties of single cells and their sub-cellular components with the availability and application of molecular biology techniques. However, whether at the level of the single cell or the whole organism, the aim of the physiologist is to understand complex functional interrelationships between body tissues.

- Physiology (M.S. and Ph.D.) (p. 272)

Physiology (M.S. and Ph.D.)

The Department of Physiology offers programs leading to the Master of Science and Doctor of Philosophy degrees. The degree of Master of Science is frequently the first step toward a Ph.D. Students planning a career in teaching or research in physiology are advised to complete the requirements for the Doctor of Philosophy degree. A Reproductive Sciences Concentration is an option in the Doctor of Philosophy program. It incorporates the teaching, research and physical resources of both the Physiology and the Obstetrics and Gynecology Departments, offering interdisciplinary doctoral training in the reproductive sciences with the degree earned through the Department of Physiology.

Mission Statements

Masters Program: The mission of the M.S. program in the Department of Physiology is to provide an introduction to advanced training in physiology. Our goal is to train students to carry out advanced research in physiology and to develop problem solving and presentation skills in a wide variety of professional venues and to develop the necessary background to work in research, enter our Ph.D. program, or other professional program.

Doctoral Program: The mission of the Ph.D. program in the Department of Physiology is to provide an outstanding educational experience for future scientists, researchers, and academicians in one or more areas of cellular and organ system physiology or developmental biology and reproductive systems. By combining a contemporary curriculum with innovative research, our goal is to develop skilled investigators in the physiological sciences who, by utilizing their advanced problem solving and presentation skills, are

qualified to succeed as educators, independent researchers, and as scientists in a wide variety of professional venues.

Reproductive Sciences Concentration: This is a unique program, regionally and nationally, that exposes the trainee to both basic science and clinical research, and emphasizes major topics within the reproductive field including fertilization, developmental biology, genetics, molecular biology, endocrinology, toxicology, teratology, pregnancy and infectious disease. The goal of this concentration within the Physiology Ph.D. program is to educate students to become well-qualified, knowledgeable reproductive physiologists who will make substantial contributions to strengthen and advance the field of reproductive medicine and health.

Admission Requirements

Admission to these programs is contingent upon admission to the Graduate School (p. 19) and the graduate programs of the School of Medicine (p. 258), respectively. In addition, applicants for the Doctor of Philosophy degree are normally expected to have a personal interview with one or more members of the Departmental Graduate Committee.

Academic Scholarship

All course work must be completed in accordance with the regulations of the Graduate School (p. 12) and the School of Medicine (p. 258) governing graduate scholarship and degrees.

The overall requirements for the Master of Science (p.) and Doctor of Philosophy (p.) degrees are set forth in the Graduate School section of this bulletin. The master's degree is offered under Plan A only, for which the student must submit a thesis based on original research. Ph.D. students holding School of Medicine Interdisciplinary Biomedical Sciences (IBS) Fellowships typically complete the required IBS course requirements (<http://bulletins.wayne.edu/courses/ibs>) during their first two years of graduate study.

Candidates for the Ph.D. are expected to conduct original research and prepare a dissertation commensurate with thirty credits of dissertation direction. The research supporting the dissertation generally is suitable for publication in one of the current scientific journals.

The thirty credit dissertation registration requirement is fulfilled by registering for the courses PSL 9991, PSL 9992, PSL 9993, and PSL 9994 (Doctoral Dissertation Research and Direction I, II, III, and IV, respectively), in consecutive academic year semesters. (Spring/summer semester registration is optional).

Masters Program

Applicants for the Masters of Science degree must complete a minimum of 30 credits beyond a bachelor's degree, of which eight credits must be thesis research credits. For the remaining twenty-three credits, four must be from multidisciplinary courses other than Physiology (minor).

Doctoral Program

Applicants for the Doctor of Philosophy degree must complete a minimum of ninety credits beyond the bachelor's degree, of which at least thirty credits must be in doctoral research and dissertation direction. For the remaining sixty credits, ten must be from courses within the Reproductive Sciences concentration and six from multidisciplinary courses other than Physiology (minor). Ph.D. students holding IBS Fellowships are required to take fourteen of these credits from courses in the IBS curriculum (<http://bulletins.wayne.edu/courses/ibs>). Remaining credits to obtain the required total are taken as electives in subjects

pertinent to the student's chosen field of research. Requirements of the Department of Physiology Graduate Program must also be satisfied.

Reproductive Sciences Concentration

Students pursuing this concentration are expected to follow the requirements of the Physiology Ph.D. Program but their curriculum is oriented around courses in the reproductive sciences taught primarily by Obstetrics and Gynecology graduate teaching faculty. Students taking the Reproductive Sciences concentration will select dissertation mentors from the Obstetrics and Gynecology graduate teaching faculty and perform their dissertation research in the basic science facilities of the Department of Obstetrics and Gynecology.

Public Health Programs

The graduate-level public health programs at Wayne State University are offered by the Department of Family Medicine and Public Health Sciences (p. 254) in the School of Medicine (p. 258).

Public health is the academic discipline that identifies, prevents and reduces health problems of communities and human populations. Public health is a population-based approach that addresses health promotion, disease prevention, restoration and maintenance of health. The range and scope of the sciences and skills required in public health include epidemiology, biostatistics, research methodology, health services research, and behavioral sciences. Central to the approach of public health is a focus on community-level influences on health including social, economic, cultural, ethnic, and environmental factors. Public health research methods involve defining selected community problems, proposing studies and solutions, surveillance, evaluating progress, and monitoring the use of resources.

- Master of Public Health (M.P.H.) (p. 275)
- Medicine and Public Health (M.D./M.P.H. Joint Degree)
- Nutrition and Food Science and Public Health (M.A./M.P.H. Joint Degree) (p. 273)
- Social Work and Public Health (M.S.W./M.P.H. Joint Degree)
- Public Health AGRADE (p. 275)
- Public Health Practice (Bridge Graduate Certificate) (p. 276)

Nutrition and Food Science and Public Health (M.A./M.P.H. Joint Degree)

The M.A. in Nutrition and Food Science/M.P.H. is a joint degree program offered by the Department of Nutrition and Food Science, College of Liberal Arts and Sciences, and Department of Family Medicine and Public Health Sciences, School of Medicine.

Students must meet the admission and graduation requirements of both programs and enroll concurrently in the two programs during most of the period in which they are earning the degrees. If they complete requirements for only one degree, one degree will be awarded.

Admission Requirements

Admission to this program is contingent upon admission to the Graduate School (p. 19). Admission criteria for the MA-MPH Joint Degree will meet the requirements of both MA and MPH Degrees by requiring:

1. A minimum undergraduate Grade Point Average of 3.0 and all requirements for admission to the WSU Graduate School that include satisfying the English proficiency requirements. If applicants have not completed a baccalaureate degree from an accredited institution

in the US or in a country where English is the native language, satisfactory attainment of scores in the Michigan English Language Assessment Battery (MELAB) (85), the Test of English as a Foreign Language (TOEFL) (79 internet-/550 paper-based), or the International English Language Testing System (IELTS) (6.5) will be required. Tests should not be more than 2 years old.

- The completion of the Graduate Record Examination (GRE) with the expectation that scores will be at or above the 60th percentile for verbal reasoning (510/154: new/old), at or above the 55th percentile for quantitative reasoning (675/153: new/old), and a score of at least 4.0 in analytical writing.
- Completion of college-based courses in mathematics and the social sciences, and completion of the following undergraduate courses or equivalent:

Code	Title	Credits
NFS 2130 & NFS 2140	Introductory Food Science and Introductory Food Science Laboratory	4
NFS 2220	Nutrition Laboratory	1
NFS 3230	Human Nutrition	3
BIO 2200	Introductory Microbiology	5
BIO 2870	Anatomy and Physiology	5
One semester of Organic Chemistry		
Courses in biochemistry and statistics are recommended		

- The submission of a professional curriculum vitae together with a satisfactory personal statement indicating the applicant's background, research and/or work experience, interests, and career goals as they relate to attainment of the MA-MPH degree. Three letters of recommendation will also be required. An interview will also be conducted (when possible).

A minimum of 59 graduate credits beyond the baccalaureate degree is required for completion of the MA-MPH program.

Students enrolled in the MA-MPH Joint Degree Program will be required to take specific NFS (p.) and FPH (p.) listed public health-related courses. The culminating master's essay (NFS 7999) requirement of the MA degree will be substituted by completion of the 3-credit hour MPH project course (FPH 8990). A total of 12 credits can be double-counted towards completion of this joint degree program.

Graduation requirements for the MA-MPH Joint Degree are consistent with the MA and MPH Degrees and will:

- Require completion of all required courses for both the MA and MPH degree segments, the public-health related courses specific to the MA-MPH Program, the culminating MPH project course, and elective courses for a minimum total of 59 credit hours within a 6 year period. A total of 15 credits may be double-counted.
- Require students to maintain a minimum grade point average of 3.0 in the entire program. A minimum of a B grade in all required courses in both the MA and MPH segments will also be required. Students obtaining less than a B grade in any core or required course will be allowed to retake it only once. Departmental policies will allow for only one C grade over the course of the entire program (and only in an elective course).

M.A. in Nutrition and Food Science

Code	Title	Credits
Core Courses		
NFS 7850	Graduate Seminar	1
NFS 6000	Nutritional Biochemistry	3
NFS 6030	Microbiological Safety of Foods ¹	3

Public Health (M.P.H.)

The Master of Public Health (MPH) Program is located in the Department of Family Medicine & Public Health Sciences. The MPH degree is a graduate-level professional degree that prepares students for public health practice in communities, organizations, work sites, and in governmental, public, and non-profit settings. MPH graduates are prepared with leadership abilities to promote population health and safety, prevent chronic and infectious disease, and to develop policy and practice-based evidence through clinical and applied research. The interdisciplinary and community-engaged nature of public health practice is reinforced throughout education, research, and service activities.

Admission Requirements

Admission to the MPH Program is contingent upon admission to the Graduate School (p. 19). (See also School of Medicine Graduate Program policies (p. 258).) Contact the MPH Program (<http://www.familymedicine.med.wayne.edu/mph>) for specific admission requirements. Applications for the MPH program are only considered for fall semester admission. Completed applications are reviewed through June.

MPH students select a concentration, either the MPH in Public Health Practice (MPH-PHP) or the MPH in Public Health Methods in Urban Health (MPH-PHM). Candidates for the MPH degree must complete 42 credits in graduate course work. As shown below, both concentrations require the foundation courses, a practicum, and a Master's project. Additionally, all MPH students must complete concentration-specific courses. Finally, students select approved electives to complete the 42 credit requirement. All course work must be completed within six years in accordance with the regulations of the Graduate School (<http://bulletins.wayne.edu/graduate/general-information/academic-regulations>) and the School of Medicine (<http://bulletins.wayne.edu/graduate/school-medicine/programs>) governing graduate scholarship and degrees.

Academic Progression Policies

MPH Grade Policies

Required Courses: Students must earn a B grade or better in all required courses. Grades of B- or lower are considered unacceptable. Students who receive a B- or lower grade in any required course must repeat the course and receive a B or better grade. Students are not eligible to take courses requiring the failed course as a prerequisite, or earn hours towards the Master's Project or Thesis until the course deficiency is satisfied.

Elective Courses: Students who receive a B- or lower grade in an elective course will be allowed to balance the grade with subsequent grades to maintain a cumulative GPA of 3.0.

Grade Point Average Requirement: Students must maintain an overall minimum 3.00 GPA to remain in good standing. Grades below a B are not considered adequate at the graduate level. Students who receive a B- or lower in a course will be asked to meet with their advisor to ensure that they are aware of Graduate School requirements and to determine if any remedial action is required.

Course Repeat Policy: Only two attempts to complete a required course will be permitted. Two unsuccessful attempts to complete a required course will result in termination from the program. The most recent grade for a repeated course is used in computing the grade point average and awarding credit hours for a degree. All attempts to take a course are recorded on a student's transcript.

Public Health AGRADE

The goal of this proposal is to provide qualifying students in the Bachelor of Science in Public Health (B.S.P.H.) program in the College of Liberal Arts and Sciences with an opportunity to pursue an accelerated pathway to the Master of Public Health (M.P.H.) program in the School of Medicine, which prepares them for professional practice career at the intersection of public, clinical and/or other allied health sciences.

Application

Undergraduate students enrolled in the B.S.P.H. major or minor would be eligible to apply for AGRADE status in the semester in which they expect to complete 90 credits and in which they have completed the following four undergraduate courses:

Code	Title	Credits
PH 2100	Introduction to Public Health	3
PH 3100	Social and Behavioral Aspects of Public Health	3
PH 3200	Introduction to Biostatistics	4
PH 3300	Epidemiology	4

Applicants must have a 3.6 g.p.a or better in B.S.P.H. major coursework, and a cumulative g.p.a. of 3.5 or better. Students with a GPA of 3.3-3.49 will be considered on an individual basis.

Applications will be reviewed in both fall and winter semesters. Applicants will be required to submit a personal statement indicating their interest in the MPH program, their career goals, and the reasons

why they are especially suited to join this accelerated track. Applicants will also be required to submit two recommendation letters from faculty referees able to address the student's capacity for graduate study. The GRE may be waived based on satisfactory performance in the AGRADE courses (at least a B grade in each AGRADE class). Acceptance to the B.S.P.H.-M.P.H. AGRADE program will be competitive. The admissions committee in the M.P.H. program will review all AGRADE applicants' applications and make decisions about admission to this accelerated track.

Upon admission, students may elect 3-16 credits in approved graduate M.P.H. courses. These graduate level courses will complete elective bachelor's degree requirements as well as fulfill the beginning of study toward the master's degree.

Code	Title	Credits
FPH 7015	Biostatistics I	3
FPH 7100	Health Care Organization and Administration	3
FPH 7240	Epidemiology	3
FPH 7320	The Social Basis of Health and Health Care	3
FPH 7420	Principles of Environmental Health	3

The bachelor's degree will be awarded following the completion of the undergraduate degree requirements. Graduate course work taken in this program must be completed within eight years (from the time that the first graduate course is taken that is counted toward degree requirements) or within six years from the awarding of the bachelor's degree, whichever comes first.

For more information on individual degree requirements, please visit the respective sections of this bulletin for the Bachelor of Science in Public Health (<http://bulletins.wayne.edu/undergraduate/college-liberal-arts-sciences/public-health/public-health-bs>) and the Master of Public Health (<http://bulletins.wayne.edu/graduate/school-medicine/programs/public-health>).

Public Health Practice (Bridge Graduate Certificate)

The Bridge Graduate Certificate in Public Health Practice (BGC-PHP) provides specialized training for individuals of varying backgrounds and experience who are committed to working in a public health related field. The BGC-PHP provides a valuable foundation of core public health knowledge in epidemiology, biostatistics, environmental health, and the social basis of health.

Admission Requirements

Admission to the BGC-PHP is contingent upon admission to the Graduate School (p. 19). (See also School of Medicine Graduate Program policies (p. 258).) Contact the MPH Program (<http://www.familymedicine.med.wayne.edu/mph>) for specific admission requirements. Applications are only considered for fall semester admission. Completed applications are reviewed through June. Students may enroll in the certificate program concurrently with a regular graduate degree program (M.S., M.A., or Ph.D.).

BGC-PHP candidates must complete a minimum of 15 credits of course work. All course work must be completed within three years in accordance with the regulations of the Graduate School (<http://bulletins.wayne.edu/graduate/general-information/academic-regulations>) and the School of Medicine (<http://bulletins.wayne.edu/>)

graduate/school-medicine/programs) governing graduate scholarship and degrees.

Translational Neuroscience (Ph.D.)

Program Director: Jeffrey A. Stanley, Ph.D.

Office: Tolan Park Medical Building, Suite 5-B,
3901 Chrysler Service Drive

The primary mission of the Translational Neuroscience Program (TNP) is to foster a new generation of neuroscientists trained in interdisciplinary science that focuses on improving the health and care of individuals affected by psychiatric or neurological disorders, or injuries to the nervous system through an understanding of disease mechanisms. The didactic curriculum encompasses an integrated syllabus of basic science, pre-clinical research, and clinical neurobiology, including cutting-edge neuroimaging technologies. The strength of the program is its interdisciplinary training faculty, which includes leading experts in brain disorders, diseases and injuries, pre-clinical animal research, transgenic and knockout models, substance abuse, neuropharmacological treatments, brain network and computational modeling, and brain development and aging.

The TNP is housed in the Department of Psychiatry & Behavioral Neurosciences (p. 257), but is comprised of over 40 faculty members from 18 different departments spanning 4 colleges and schools within Wayne State University (WSU). The collaborative and interdisciplinary nature of the TNP program aligns well with the University's mission

and strategic plan. Moreover, applications for graduate training in the neurosciences has quadrupled in the past 25 years making neuroscience research one of the most rapidly developing branches of medical research. The TNP program is fully committed in training basic and clinical neuroscientists who will be driving innovations that impact public health.

Admission Requirements

Admission to this program is contingent upon admission to the Graduate School (p. 19) and satisfaction of the admission requirements the School of Medicine (p. 258). Applicants must have an undergraduate degree including several courses in basic sciences such as biology and chemistry. Three letters of recommendation are required from individuals able to judge the applicant's scientific potential. A one-page statement of purpose for applying in the translational neuroscience program, a Curriculum Vitae (CV) that summarizes academic and research experiences, minimum grade point average of 3.0 (on a 4.0 scale), the Graduate Record Examination (GRE), and an interview with a Graduate Officer or designated representative from the Steering Committee are required. Writing samples including conference abstracts and presentations, or publications, are optional. Foreign students must be proficient in English as determined by satisfactory performance on the standardized TOEFL English proficiency examination. An interview with potential graduate faculty mentor(s) is also desirable.

Students in the doctoral program are required to complete a minimum of ninety credits beyond the baccalaureate degree. Required courses include the following:

Code	Title	Credits
Required Courses		
ANA 7130	Neuroanatomy	4
GS 0900	Essential Research Practices: Responsible Conduct of Research	0
IBS 7015	Interdisciplinary Cell and Molecular Biology	6
IBS Courses (Select one of the following):		2
IBS 7030	Functional Genomics and Systems Biology	
IBS 7050	Molecular Neuropsychopharmacology	
IBS 7090	Biomedical Immunology	
IBS 7100	Biomedical Neuropharmacology	
IBS 7130	Systems Neuroscience: Structure and Function of the Nervous System	
Statistics (select one of the following):		3-4
FPH 7015	Biostatistics I	
PSY 7150	Quantitative Methods in Psychology I	
FPH 7020	Biostatistics II	
PSY 7160	Psychometrics and Factor Analysis	
Additional Coursework		
PYC 7010	Neurobiology I	3
PYC 7140	Fundamentals of Neuroimaging	3
PYC 7150	Fundamentals of Neuropsychiatric Disorders	3
PYC 7890	Research Seminar (6-8 credits required)	1
PYC 7990	Directed Study (Max. 10)	1-6
PYC 7996	Research Problems (9 credits required)	3
PYC 7998	Clinical Neuroscience Rotation (Max. 9)	3,6
PYC 9990	Pre-Doctoral Candidacy Research (Max. 10)	1-8
PYC 9991	Doctoral Candidate Status I: Dissertation Research and Direction	7.5
PYC 9992	Doctoral Candidate Status II: Dissertation Research and Direction	7.5

PYC 9993	Doctoral Candidate Status III: Dissertation Research and Direction	7.5
PYC 9994	Doctoral Candidate Status IV: Dissertation Research and Direction	7.5
PYC 9995	Candidate Maintenance Status: Doctoral Dissertation Research and Direction	0

Advanced Topic Courses

12 credits minimum and 24 credits maximum encompassing neuroscience principles and methods, and the applications to nervous system disorders (starts in year 2) 12-24

Students are required to seek advice from a graduate advisor on his/ her course selection. All course work must be completed in accordance with the regulations of the Graduate School (p. 12) and the School of Medicine (p. 258) governing graduate scholarship and degrees.

COLLEGE OF NURSING

Dean: Laurie Lauzon Clabo

The Wayne State University College of Nursing is regionally, nationally, and internationally recognized for educating graduate and undergraduate students as practitioners and scholars in the nursing profession. The College is committed to research and scholarly activity that contributes to the discipline of nursing and excels in the development, application, and dissemination of such knowledge to promote human health and well-being.

Nursing is an academic discipline and a profession. As a discipline, nursing develops knowledge concerning human beings, their care, health, and the environment. Concepts derived from such research order the discipline and profession of nursing as well as give identity to nursing practice and direct inquiry and theory development. As a profession, nursing creatively uses knowledge in response to the health care needs of the local and global society. Both of these functions are enhanced by the scholarly environment of the University and its multicultural urban setting as a context for professional nursing practice.

Consistent with this view of the nursing profession, the College supports the importance of liberal arts, humanities, and the sciences in nursing education. The faculty believes that programs designed for the preparation of nurses must be composed of the intellectual, social, cultural, and technical components of liberal and professional education that are available to students within an institution of higher learning. The faculty also affirms the necessity and value of clinical practice within a professional nursing program. Experience within a variety of clinical and vulnerable populations is one of the primary modes for the development of nursing practice competencies.

Learners from diverse backgrounds enter the College to begin or continue their education and thereby add to the richness of this learning environment. The faculty supports the right of students to question, challenge and debate within the context of inquiry as an essential ingredient to their development. Continuing evaluation on the part of the students and the faculty is essential to advancing nursing knowledge and sustaining the integrity of the program.

The faculty of the College of Nursing, as members of the academic community, recognizes that its professional functions extend beyond contributions to formal teaching. Research, practice, and community service are important expectations of the faculty. The faculty views as essential, academic freedom, shared governance, opportunity to develop knowledge, and responsibility to incorporate new knowledge into teaching and nursing practice. The faculty assumes responsibility for enhancing the image of the College of Nursing and the University locally, nationally, and internationally through various avenues including research, scholarship, practice, consultation, and participatory decision-making.

Accreditation

The baccalaureate program is approved by the Michigan State Board of Nursing, and graduates are admitted to the licensing examination for professional nurses in the State of Michigan. The baccalaureate, master's, and Doctor of Nursing Practice (DNP) programs of the College are accredited by the Commission on Collegiate Nursing Education (CCNE). The graduate nurse-midwife major is also accredited by the Accreditation Commission for Midwifery Education (ACME), (formerly ACNM Division of Accreditation).

Academic Regulations for the College of Nursing

For complete information regarding the academic rules and regulations of the University, students should consult the Academic Regulations (p. 12) section of this bulletin. The following additions and amendments pertain to the College of Nursing.

Registration

Each student is required at the beginning of each semester of attendance to register according to the procedure and schedule published in the official University Schedule of Classes (<http://classschedule.wayne.edu>). Registration must be completed before the student may attend classes. For registration dates, the student should consult the schedule of classes. A minimum of eight credits in graduate courses constitutes a full-time load for graduate students. Some courses require approval of the faculty of record and the College Graduate Officer.

Professional Licensure and Liability Insurance

Graduate students must be registered to practice nursing in Michigan and have professional liability and malpractice insurance before registering for clinical and practicum courses. Students must submit a valid Michigan RN license by the end of the second semester of the program or they will not progress. The College offers a blanket school malpractice policy with a minimum amount of liability insurance of \$1,000,000/\$3,000,000. Each student is expected to pay \$13.38 per academic year for the malpractice insurance policy coverage by the posted semester deadline dates prior to the start of clinical and practicum course work. Students in the Nurse-Midwifery major must secure individual malpractice insurance, consult with the Office of Student Affairs for information. A valid Michigan RN license and Liability insurance are required for a valid clinical permit.

Health Requirements for a Clinical Permit

A valid clinical permit must be on file in the Office of Student Affairs by the semester deadline dates prior to clinical and practicum courses. All students must have an admission physical examination and history and must comply with requirements for a Basic Cardiac Life Support (BCLS) course and present a standard immunization profile with a Tuberculin Skin (TB) test or quantiferon testing, proof of Rubella, Mumps, Rubeola, and Chicken Pox immunity, and the complete series of inoculations against Hepatitis B virus, and TDAP. A Urine Drug Screen Testing and a criminal background investigation are also required. Some majors require Advanced Cardiac Life Support Certification (ACLS).

Students who have met all of the Health Clearance Requirements will be issued a Clinical Permit. Students who do not have a Clinical Permit issued by the College of Nursing Office of Student Affairs will not be allowed into the clinical or practicum setting. Clinical Permits will be issued once each semester prior to the start of the semester. The deadline dates are August 15 (Fall), December 15 (Winter), and April 15 (Spring/Summer).

Master's Degree Scholarship Standards

The graduate grading system is intended to reflect high standards of scholarship. The policies for academic progression for graduate students are listed below.

1. A student must earn an overall grade point average of 3.0 or better to be awarded the M.S.N. degree.

2. A student achieving less than a 3.0 g.p.a. at any point in the program must achieve a g.p.a. of 3.0 or better within one semester. If there is evidence that the goal of a 3.0 g.p.a. is not achievable, the student will be excluded from the program.
3. A student may petition to repeat a graduate course once in which a grade lower than 3.0 is received. No more than two courses may be repeated.
4. A student may be excluded from the College of Nursing for unsafe and/or unethical conduct in the program without having been previously warned.
5. Students have a six-year time limit to complete all requirements for the master's degree. The six-year period begins with the end of the semester during which the student has taken work which applies toward meeting the requirements of the degree.

Doctoral Degree Scholarship and Academic Progression Policies

See the section beginning under Graduate Grades (p. 52).

1. A minimum overall grade point average of at least 3.0 is required for a student to be awarded a D.N.P. degree.
2. Students must maintain at least a 3.0 g.p.a. to progress.
3. Students with a g.p.a. below 3.0 are placed on probation and will automatically have a hold placed on their registration. Such students are required to confer with their advisor to develop a plan and timetable for elevating their g.p.a. If the advisor approves the plan, s/ he should notify the school/college to release the g.p.a. registration hold so the student can register for the agreed upon course(s).
4. A student may petition to repeat a graduate course once in which a grade lower than 3.0 has been earned. No more than two courses may be repeated.
5. Students must be enrolled each academic year while in the doctoral program.
 - a. Doctoral students who fail to enroll in either Fall or Winter semester of a given academic year will be considered not in good standing.
 - b. Doctoral students who fail to enroll in two (2) consecutive semesters (i.e. Winter/Fall) will be subject to exclusion from the program.

Student Rights and Responsibilities

Continuance in the College is contingent upon compliance with official rules, regulations, requirements, and procedures of the University and the College of Nursing. *The student is responsible for reading the contents of this bulletin pertinent to the College of Nursing and otherwise becoming informed of and fulfilling all course and degree requirements in proper sequence with satisfactory scholarship.* In case of doubt regarding any matter affecting his or her standing as a student, the student should consult with an academic advisor. The faculty reserves the right to amend or revise the policies and requirements set forth in the College of Nursing section of this bulletin.

Graduate Programs

- Nursing (M.S.N.) (p. 279)
- Nursing (D.N.P.) (p. 283)
- Nursing (Ph.D.) (p. 285)
- Nursing & Infant Mental Health (D.N.P. or Ph.D. dual-title) (p. 287)

Nursing (M.S.N.)

Admission Requirements

Admission to this program is contingent upon admission to the Graduate School (p. 19). Additionally, students must satisfy the following criteria mandated by the College:

1. The applicant must have completed a National League for Nursing (NLN) or Commission on Collegiate Nursing Education (CCNE) accredited baccalaureate program in nursing with a grade point average (g.p.a.) of 3.0.
2. Possession of a current Michigan Registered Nurse Licensure. All applicants educated outside the U.S. must be certified by the Commission on Graduates of Foreign Nursing Schools (CGFNS). Contact CGFNS (<http://www.cgfns.org>), 3600 Market St., Philadelphia PA 19104-2651 to request a certification application, or call: 215-222-8454. Verification of a student's CGFNS certification must be forwarded to the State of Michigan Board of Nursing by the CGFNS in order to take the RN licensure examination.
3. A personal statement of goals for graduate study.
4. An interview with a faculty member may be requested.

There may be additional requirements in each of the specialty clinical major areas. Please refer to the major program and consult with a clinical specialty coordinator for specific requirements.

Application: All new applicants must submit an application for graduate admission. Applications, including all supporting documentation, must be received in the appropriate offices by the posted deadline dates. Deadline dates for submission of application materials vary by semester (please refer to the College of Nursing website (<https://nursing.wayne.edu>) for more information).

Readmission

The master's student who withdraws from the program in good standing should contact their academic advisor and the Office of Student Affairs one semester prior to the semester for which re-enrollment is desired. Following a review by the Director of Advanced Practice and Graduate Certificate Programs, the M.S.N. Committee and the Office for Academic and Clinical Affairs, the student will be informed of the steps required for readmission.

Revalidation of Credit: The College of Nursing reserves the right to revalidate all credits in the clinical nursing sequence which are over six years old or any other credits earned at Wayne State University which are between six and ten years old. Additional credits for degree completion may be required. Such authority rests with the Director of Advanced Practice and Graduate Certificate Programs, M.S.N. Committee, and the Associate Dean of Academic and Clinical Affairs.

Program Overview

Candidates for the Master of Science in Nursing (M.S.N.) must complete thirty-eight to fifty-three credits of study. All course work must be completed in accordance with the academic procedures of the [College of Nursing](#) (p. 278) and the Graduate School (p. 12) governing graduate scholarship and degrees. Credits must be normally distributed as follows:

Clinical or Practicum Nursing Sequence: Cr. 18-24
 Supporting Courses: Cr. 7-11
 Master's Core and Research Courses: Cr. 13

All M.S.N. programs require the election of a particular major. Majors currently available to satisfy these requirements are detailed below. Supporting courses or cognates, which are clinically specific, are predetermined by selection of the clinical (or non-clinical) nursing

sequence and will be found as part of the major areas of study. Students should inquire about possible additional offerings. All programs are subject to periodic revision.

All M.S.N. students must elect a series of courses that will prepare him/her to be competent in the utilization of research findings in practice. To develop these skills, the student completes courses in evidence-based nursing and/or biostatistics and epidemiology.

Plan of Work: With the approval of the advisor, the student and advisor develop and file a *Plan of Work* prior to completion of twelve graduate credits at Wayne State University. A student must have a minimum 3.0 grade point average in order to have a *Plan of Work* accepted by the Graduate Officer. Each *Plan* must include the course requirements for the clinical (and non-clinical) nursing sequence and intended degree. It is the responsibility of the student to meet with his/her advisor to file any changes in the *Plan of Work*.

Time Limitations: Students have six years to complete requirements. The six-year limit begins from the end of the semester during which the student has taken course work applicable toward meeting the requirements of the degree; this may occur before the student is regularly admitted to the major.

M.S.N. Major: Adult-Gerontology Nurse Practitioner Acute Care

(Minimum of forty-two credits required)

An admissions moratorium is currently in effect for this program.

The Master of Science in Nursing degree with a major in Adult-Gerontology Nurse Practitioner Acute Care (AGNP-AC) prepares the nurse for advanced practice in the care of physically ill adults. Emphasis is on adults with existing and/or potential physiological alterations and their concomitant developmental and psychosocial needs. Clinical practicum sites are individualized based on the student's identified goals and area of clinical interest. The curriculum develops the advanced practice nurse's roles of practitioner, educator, and clinical scholar through education in rigorous and consistent diagnostic reasoning and theory-based practice. The analysis, critique, and utilization of nursing and biopsychosocial theory and constructs are also reviewed. Graduates are eligible to take the American Nurses Credentialing Center (ANCC) Acute Care Nurse Practitioner certification examination.

Code	Title	Credits
Master's Core Courses		
NUR 6510	Health Economics, Policy, and Professional Issues for APNs	3

M.S.N. Major: Adult-Gerontology Nurse Practitioner Primary Care

(Minimum of forty-eight credits required)

An admissions moratorium is currently in effect for this program.

The Master of Science in Nursing degree with a major in Adult-Gerontology Nurse Practitioner Primary Care (AGNP-PC) prepares the nurse for advanced practice in a primary care setting. The focus of the clinical sequence is on the adult and adolescent client and his/her response to actual or potential health care needs. Primary care includes the assumption of accessible, accountable, comprehensive, coordinated first-contact care, as well as longitudinal management. Opportunity is provided to study the theoretical foundation of nursing practice with the development of practice models of primary care. Advanced assessment and diagnostic reasoning are taught as the basis for nursing management. The study and practice of gerontological nursing are integrated in the clinical sequence. Emphasis is placed on the development of clinical judgment in health promotion as well as in the nursing management of acute and chronic health problems. Clinical practicum is implemented in a variety of settings, including an autonomous primary care nursing center. Graduates are eligible to sit for the Adult Primary Care Nurse Practitioner exam through the American Nurses Credentialing Center (ANCC) or the American Academy of Nurse Practitioners (AANP).

M.S.N. Major: Advanced Public Health Nursing

(Minimum of thirty-eight credits required)

The Master of Science in Nursing degree in Advanced Public Health Nursing (APHN) prepares nurses for advanced care of populations and communities. The APHN promotes the health and well-being of populations and communities. Improving the health of populations and communities is addressed through community assessment, program planning and implementation, leadership strategies, health policy development, and program evaluation. Community partnerships and collaborations are emphasized throughout the curriculum. The goal of this program is to prepare nurses who meet the APHN core competencies

in education, practice, leadership, and research. The program sees the APHN as the voice for public health nursing. Graduates are eligible to seek American Nurses Credentialing Center (ANCC) Advanced Public Health Nursing board certification through portfolio assessment. Certification through portfolio is a new assessment methodology; No exam is required.

M.S.N. Major: Neonatal Nurse Practitioner

(Minimum of forty-eight credits required)

The Master of Science in Nursing degree with a major in Neonatal Nurse Practitioner (NNP) prepares nurses for advanced practice in the care of high risk neonates. The curriculum combines both broad foundational knowledge essential for the care of neonates as a vulnerable population, as well as specialty knowledge in high-risk neonatal care. Attention is given to health promotion, prevention of disease and disability, disease process, clinical management, and family-centered care. The goal of this innovative program is to prepare advanced practice nurses who will promote the health and development of neonates as individuals and as population groups encountering changing healthcare systems within urban and global environments. Two years of Level III NICU experience is required prior to start of clinical courses. Upon program completion, students are eligible to take a certification examination through the National Certification Corporation (NCC).

M.S.N. Major: Nurse-Midwifery

(Minimum of forty-eight credits required)

The Master of Science in Nursing degree with a major in Nurse-Midwifery (NM) prepares nurses for advanced practice in the care of women and newborns. The CNM specialty curriculum combines both broad foundational knowledge essential for the care of women and newborns as vulnerable populations and specialty knowledge in women's health, newborn care and nurse-midwifery. Attention is given to health promotion, prevention of disease, and disability. The goal of this innovative program is to prepare advanced practice nurse midwives who will promote the health and development of women and newborns as individuals and as population groups encountering changing healthcare systems within urban and global environments. Upon program completion, nurse-midwifery students take the American Midwifery Certification Board (AMCB) examination. The WSU College of Nursing program is accredited by the Accreditation Commission for Midwifery Education (ACME).

M.S.N. Major: Pediatric Nurse Practitioner-Acute Care

(Minimum of forty-eight credits required)

The Master of Science in Nursing with a Pediatric Nurse Practitioner-Acute Care specialty prepares nurses for advanced practice in the care of acutely and critically ill children and adolescents. The goal of this innovative program is to prepare advanced practice nurses who will promote the health and development of children and adolescents as individuals and as population groups encountering changing healthcare systems within urban and global environments. Graduates of the PNP-AC program are prepared to provide expert clinical care to meet the specialized physiological and psychological needs of children and adolescents with complex acute, critical, and chronic health conditions and/or urgent, emergent, and life-threatening conditions. The curriculum combines both broad foundational knowledge essential for the care of children as a vulnerable population, as well as specialty knowledge in pediatrics. Attention is given to health promotion, prevention of disease and disability, disease process, treatment, clinical management, and family-centered care provided in a variety of acute and critical care settings including hospitals, intensive care units, emergency

departments, and clinics. Upon program completion, students are eligible to take a certification examination through the Pediatric Nursing Certification Board (PNCB).

M.S.N. Major: Pediatric Nurse Practitioner-Primary Care

(Minimum of forty-eight credits required)

The Master of Science in Nursing with a Pediatric Nurse Practitioner-Primary Care specialty prepares nurses for advanced practice in the care of children and adolescents. The goal of this innovative program is to prepare advanced practice nurses who will promote the health and development of children and adolescents as individuals and as population groups encountering changing healthcare systems within urban and global environments. Graduates of the PNP-PC program are prepared to provide pediatric primary healthcare including health maintenance, anticipatory guidance, well-child examinations, developmental screening, and diagnosing and managing common and complex health/illness conditions. The curriculum combines both broad foundational knowledge essential for the care of children as a vulnerable population, as well as specialty knowledge in pediatrics. Attention is given to health promotion, prevention of disease and disability, treatment, clinical management, and family-centered care in a variety of settings including primary care clinics, specialty clinics, and community environments. Upon program completion, students are eligible to take a certification examination through the Pediatric Nursing Certification Board (PNCB).

M.S.N. Major: Psychiatric Mental Health Nurse Practitioner

(Minimum of fifty-three credits required)

All students in the Psychiatric and Mental Health Nurse Practitioner (PMHNP) major gain knowledge in biological, neurological, pharmacological, and physiological domains that prepare them to conduct comprehensive assessments and utilize a range of psychobiological interventions. The PMHNP clinical nursing course sequence focuses on: Psychiatric assessment, triage, and crisis intervention; Biopsychological models of mental health and illness; theory and practice with individual interest (e.g., addictions, eating and sleep disorders, gender issues, HIV/AIDS, major psychiatric illnesses, violence) and with clinical populations of interest. Upon program completion, graduates are eligible to take the American Nurse Credentialing Center (ANCC) Psychiatric-Mental Health Nurse Practitioner certification exam.

M.S.N. Major: Women's Health Nurse Practitioner

(Minimum of forty-eight credits required)

An admission moratorium is currently in effect for this major.

The Master of Science in Nursing degree with a major in Women's Health Nurse Practitioner (WHNP) prepares nurses for advanced practice in the care of women. The WHNP curriculum combines both broad foundational knowledge essential for the care of women as a vulnerable population and specialty knowledge in women's health. Attention is given to health promotion, prevention of disease, and disability. The goal of this innovative program is to prepare advanced practice nurses

who will promote the health and development of women as individuals and as population groups encountering changing healthcare systems within urban and global environments. Upon program completion, WHNP students are eligible to take a certification examination through the National Certification Corporation (NCC).

Nursing (D.N.P.)

The Doctor of Nursing Practice (D.N.P.) program was established in 2008 for registered nurses seeking advanced education for leadership in clinical positions, health policy development, evaluation and application of patient care research, and systemic efforts in health promotion and risk reduction. Through this program, students are prepared to use clinical research to improve and transform health care.

Admission Requirements

Admission to this program is contingent upon admission to the [Graduate School](#) (p. 19). In addition, applicants must comply with the following:

Applicants must have earned a bachelor's or master's degree in nursing from a National League for Nursing (NLN) or Commission on Collegiate Nursing Education (CCNE) accredited institution. They must have a minimal grade point average of 3.0 in the most recent nursing program. International students must meet University and College English language requirements and satisfy all WSU and State Board of Nursing requirements for nurses practicing in Michigan. Two letters of recommendation (one reference from a doctoral-prepared individual is preferred), a professional goals statement, and a resume are also required. All qualified applicants will be interviewed.

Post-Masters Applicants are required to have completed courses in the following content areas prior to admission: Advanced Physical Assessment, Pharmacology, Pathophysiology, and Introductory Statistics.

Nurse Practitioner Applicants who are certified in a practitioner specialty are exempt from the Advanced Physical Assessment, Pharmacology and Pathophysiology requirements cited above.

Registered Nurse Licensure: Applicants must obtain current Michigan Registered Nurse Licensure by the end of the second semester of the program. All applicants educated outside the U.S. must be certified by the Commission on Graduates of Foreign Nursing Schools (CGFNS). Verification of a student's CGFNS certification must be forwarded to the State of Michigan Board of Nursing by the CGFNS in order to take the RN

licensure examination, NCLEX. Post-masters nursing students must be certified by a nationally recognized body in their area of specialization.

Application: The final deadline is January 31st. Informational meetings are held monthly and applicants are encouraged to attend before completing the application. The schedule is listed on the College of Nursing [website](http://www.nursing.wayne.edu) (http://www.nursing.wayne.edu) under the Programs tab, D.N.P., then Information Meetings.

Admission decisions are based upon all materials submitted and reflect careful consideration of the applicant's professional goals, DNP Project interests, interview and the resources of the College of Nursing. Even if an applicant meets all minimum requirements, admission may not be granted because of

1. unavailable program space and/or
2. inadequate College resources relevant to the applicant's specific interest.

All course work must be completed in accordance with the academic procedures of the College of Nursing and the Graduate School governing graduate scholarship and degrees.

The D.N.P. program must include a minimum of thirty credits of graduate coursework completed in residence at Wayne State University. Neither courses numbered in the 9000s nor classes elected as "visitor" may be used to fulfill this requirement. Early in the program the student, in consultation with the academic advisor, plans a sequence of courses. This Plan of Work is approved by the academic advisor and the Director of Advanced Practice and Graduate Certificate Programs. It is the responsibility of the student to file any changes in the Plan of Work. Preliminary Examination must be applied for and approved following completion of the coursework requirements. Students will be expected to take preliminary examinations to demonstrate their knowledge of each primary field and all supporting fields. Students must pass these examinations.

Students in all paths have a seven year time limit to complete all requirements for the D.N.P. degree. The seven-year period begins with the end of the semester during which the student was admitted to doctoral study and was taking work toward meeting the requirements for degree. Students whose seven-year time limit has expired may be considered for an extension, provided that the Preliminary Examinations have been successfully completed. Subsequent extensions will not be considered in the absence of substantial progress during the previous year.

There are three curricular paths for students to complete the requirements for the Doctor of Nursing Practice. These options are oriented to the applicant's educational level at the time of admission and professional career goal. One path is for students entering the program post-B.S.N., and two paths for those entering post-M.S.N. Full-time and part-time study options are available. Students in path I and path III have several clinical specialty options. The options are described below under each of these paths.

Path I: Post-B.S.N. Clinical Leading to the A.P.R.N. Specialty and the D.N.P. (Total Credits: 78-83)

Nursing (Ph.D.)

Established in 1975, the Doctor of Philosophy (Ph.D.) in Nursing program is designed to prepare researchers and scholars to provide leadership to the profession and discipline of nursing. The program emphasizes the development of the student's capacity to make significant, original contributions to nursing knowledge. The understanding that nursing provides services that help individuals, families, and communities achieve health drives the Ph.D. program. These services are based on systematic knowledge about human health and human-environment relationships. Particular attention is given to the kinds of human-environment relationships that are optimal for health. This systematic knowledge base is the foundation of nursing science.

Admission Requirements

Informational meetings are held monthly and prospective students are encouraged to attend prior to application. The schedule is posted on the College's web site under Program, Ph.D., and Information Meetings.

- Admission** to this program is contingent upon admission to the Graduate School (p. 19). In addition, applicants must comply with the following:
- Application:** All new applicants must submit two application forms:
 - the University or International Application for Doctoral Admission and
 - the College of Nursing Application for Admission to the Doctor of Philosophy Program in Nursing.

Applications are available through the Graduate School online (<http://wayne.edu/admissions/graduate>) and at the College Doctoral Programs website (<http://nursing.wayne.edu/phd>). Admission decisions are based upon all materials submitted and a personal interview with potential faculty mentors. Decisions reflect careful consideration of the applicant's professional goals, research interests, and the resources of the College of Nursing. Although an applicant may meet all minimum requirements, admission may not be granted because of 1) unavailable program space, and/or 2) inadequate College resources relevant to the applicant's specific area of research interest. Admission decisions will be made after all required materials have been received.

- Nursing Degree:** Applicants must have earned a bachelor's or master's degree in nursing or the equivalent from a National League

for Nursing (NLN) or Commission on Collegiate Nursing Education (CCNE) accredited institution. International applicants must have earned an equivalent degree.

- Grade Point Average:** It is recommended that applicants who have a master's degree have a 3.3 (on a 4.0 scale) graduate g.p.a., based on at least twelve credits of graduate level course work; and applicants who have a bachelor's degree have a minimum 3.0 g.p.a. in upper division undergraduate course work (the last sixty credits).
- Graduate Record Examination (GRE):** The GRE is not required.
- References:** Submit two references (College of Nursing forms are available) from nurse faculty, nurse researchers, and/or other professional colleagues (preferably at the doctoral-prepared level) who can evaluate the applicant's scholarship and aptitude for research.
- Statement of Professional Goals:** Write a brief statement (College of Nursing forms are available) that describes motivation for doctoral study, career goals, potential focus of research and how that research interest may fit with one or more of the research orientations of the faculty in the College of Nursing. To determine a potential fit of research interests with faculty research programs, applicants are encouraged to view faculty interests in the Faculty Programs of Research <https://nursing.wayne.edu/research/faculty.php>. One or two faculty whose research is aligned with the students should be included in the Goals Statement.
- Interviews:** Applicant interviews are required and will be scheduled after receipt of the College of Nursing application, goals statement and curriculum vita.

Admission Deadline: January 31st.

Readmission: Students who are inactive and desire readmission must submit a written request to the Director of the Ph.D. Program of the College of Nursing, four months prior to the semester in which they wish to register. The readmission decision is based on recommendation of the Ph.D. Program Committee and the Graduate School.

Candidates for the Doctor of Philosophy in Nursing must complete a minimum of ninety graduate credits beyond the baccalaureate degree including a thirty-credit dissertation. The thirty-credit dissertation registration requirement is fulfilled by registering in the courses NUR 9991, NUR 9992, NUR 9993, and NUR 9994 (Doctoral Dissertation Research and Direction I, II, III, and IV, respectively), in consecutive academic year semesters. Students are also expected to attend a minimum of two semesters of dissertation colloquia during the dissertation credits. All course work must be completed in accordance with the academic procedures of the College and the Graduate School governing graduate scholarship and degrees.

7000-Level Courses: The Ph.D. program must include thirty credits, excluding dissertation direction, in courses numbered 7000 or above.

Plan of Work: Early in his/her program the doctoral student, with the assistance of his/her academic advisor plans a sequence of studies, the Interim Plan of Work. The Final Plan of Work, approved by the academic advisor and the Graduate Officer, College of Nursing, should be filed before the student has completed forty graduate credits (including transfer credits). Petition for Transfer of Credits and annual reviews should be attached to the Plan of Work. It is the responsibility of the student to file any changes in the Plan of Work.

Residency: The Ph.D. requirement of one year of residence is met by completion of six graduate credits in course work (not dissertation) over two successive semesters (Spring/Summer Semester may be excluded).

Qualifying Examinations must be applied for following completion of at least 50 credits of graduate level courses, including domain and methods as stated on the student's approved Plan of Work.

Candidacy: The final Qualifying examination must be passed, and the Dissertation Committee approved to establish candidacy. Students must complete both semesters of the Research Residency before defending their proposal and complete the Teaching Residency prior to graduation.

Time Limitations: Students in all paths have a seven year time limit to complete all requirements for the Ph.D. degree. The seven-year period begins with the end of the semester during which the student was admitted to doctoral study and was taking work toward meeting the requirements for the degree. Students whose seven-year time limit has expired may be considered for an extension, provided that the Qualifying Examinations have been successfully completed. Subsequent extensions will not be considered in the absence of substantial progress during the previous year.

Postdoctoral Study

The purpose of postdoctoral study is to develop scientists capable of sustaining independent research within the theoretical perspective of nursing science. Opportunities are available for postdoctoral study on an individual basis in relation to the specific interest of the applicant, and to the availability of expert faculty mentorship. Interested students should contact the Director of the Doctoral and Postdoctoral Programs, College of Nursing, 313-577-0359.

Ph.D. Curricular Options

The faculty of the College of Nursing has developed two curricular paths for students to accomplish the requirements for the Ph.D. in Nursing. These paths offer options to applicants based on their present educational level and professional career goal: one path for students entering the program post-B.S.N., and one for those entering post-M.S.N. Full-time and part-time study options are available, fall, winter, spring and summer.

Students are advised to keep themselves informed of these requirements so that scheduling their courses will be consistent with prerequisite sequencing.

Post-M.S.N/D.N.P., Leading to the Ph.D.

NUR 9992	Doctoral Candidate Status II: Dissertation Research and Direction	7.5
NUR 9993	Doctoral Candidate Status III: Dissertation Research and Direction	7.5

¹ These courses have prerequisites that are listed under the Courses section and in the Class Schedule.

Nursing & Infant Mental Health (D.N.P. or Ph.D. Dual-Title)

Students in the Ph.D. or D.N.P. programs in Nursing can apply to earn a Ph.D. in Nursing or a D.N.P. with a dual-title in Infant Mental Health (IMH). This dual-title degree is designed to prepare nurses to support early social and emotional development in a variety of contexts in which parents or children suffer from developmental disabilities, health problems, or mental health problems. The program also prepares nurses to conduct research related to infant mental health. Students take courses in infant development and assessment, and develop specific skills related to infant mental health assessment and treatment. The dual-title coursework follows competencies outlined by the Michigan Association for Infant Mental Health that are required for endorsement as an infant mental health specialist or an infant mental health mentor.

Admission Requirements

Admission to this program is contingent upon admission to the Graduate School. Students should indicate on their application to the Nursing program their desire to earn an infant mental health dual-title. Students may also contact the IMH program director, Ann Stacks, any time prior to the completion of their qualifying/preliminary examination to enroll in the program.

In addition to D.N.P. (p. 283) or Ph.D. requirements (p. 285), students are required to complete 13 credits of infant mental health coursework including the following courses with at least a 3.0 g.p.a. All course work must be completed in accordance with the academic procedures of the College of Nursing (p. 278) and the Graduate School (p. 12) governing graduate scholarship and degrees.

Code	Title	Credits
SW 7880	Infant/Family Mental Health Assessment	2
SW 8880	Infant Mental Health Practice	3
PSY 7425	Psychology of Infant Behavior and Development	3
PSY 7430	Developmental Assessment of Infants and Toddlers	3
SW 7025	Infant Mental Health: Theory to Practice across Early Childhood Settings	2
Total Credits		13

D.N.P. students must also complete a qualifying examination and a Clinical Inquiry Project related to infant mental health.

Ph.D. students must also complete a qualifying examination and a Doctoral Dissertation related to infant mental health.

Nursing Graduate Certificates

- Adult Gerontology Nurse Practitioner Acute Care (Graduate Certificate) (p. 287)
- Complementary Therapies in Healthcare (Graduate Certificate) (p. 288) (admissions moratorium in effect)

- Nurse-Midwifery (Graduate Certificate) (p. 288)
- Nursing Education (Graduate Certificate) (p. 288)
- Pediatric Nurse Practitioner Acute Care (Graduate Certificate) (p. 289)
- Pediatric Nurse Practitioner Primary Care (Graduate Certificate) (p. 289)
- Psychiatric Mental Health Nurse Practitioner (Graduate Certificate) (p. 289) (admissions moratorium in effect)
- Transcultural Nursing (Graduate Certificate) (p. 290) (admissions moratorium in effect)
- Women's Health Nurse Practitioner (Graduate Certificate) (p. 290) (admissions moratorium in effect)

Adult Gerontology Nurse Practitioner Acute Care (Graduate Certificate)

This Graduate Certificate Program will allow advanced practice nurses, who have graduated with a clinical MSN or DNP to acquire the nationally-specified adult-gerontology acute care content and clinical skills needed to take the national adult-gerontology acute care certification exam and then to function competently within the adult-gerontology acute care scope of practice. It will require satisfactory completion of 18 credits of didactic content and clinical practice. The certificate provides nurses with essential knowledge and skills to assume adult-gerontology acute care roles in a myriad of settings. Courses focus on integrating advanced health assessment, pathophysiology, and acute clinical care and management. Students will be expected to acquire a minimum of 500 hours of acute care experience as required to meet the specialty competencies and the requirements to take the Adult-Gerontology Nurse Practitioner Acute Care national certification exam.

Admission Requirements

Admission to this program is contingent upon admission to the [Graduate School](#) (p. 19) and availability of College of Nursing resources. Students must also meet the following criteria for admission:

1. Completion of a graduate (Master's or Doctoral) degree in Nursing from a nationally accredited institution;
2. Current Michigan Registered Nurse licensure;
3. Three letters of reference; and
4. A personal goal statement.

This certificate requires courses which must be taken in sequence over one calendar year with no transfer credit accepted. This certificate requires a minimum of 18 credits which must be earned within three years. A grade point average of 3.0 must be maintained. All course work must be completed in accordance with the academic procedures of the College of Nursing (p. 278) and the Graduate School (p. 12) governing graduate scholarship and degrees.

Required Courses

Code	Title	Credits
NUR 7370	APN: Management of Neurological, Endocrine, and Musculoskeletal Problems	6
NUR 7140	APN: Management of Cardiopulmonary and Renal Problems	6

Complementary Therapies in Healthcare (Graduate Certificate)

An admissions moratorium is currently in effect for this program.

This graduate certificate program includes three required graduate courses that are designed to provide education and clinical experience related to complementary, alternative therapies that are often used to complement conventional health care treatments in the United States. This graduate program provides information for individuals who provide services for patients/clients, families and communities and is open to registered nurses who have a B.S.N. degree, graduate nursing students and other healthcare providers and students.

The certificate program courses focus on concepts of complementary and alternative medicine and whole systems of care for individuals throughout the lifespan from a health promotion and illness treatment perspective; evidenced-based therapies included in hospital-based integrative medicine centers are explored and research strategies are examined. Students will learn CAM assessment strategies as well as population trends related to use and integration in conventional health settings. Clinical practice components are included in all program courses and the certificate provides essential knowledge and skills regarding complementary therapies in today's healthcare world.

Admission Requirements

Admission to this program is contingent upon admission to the Graduate School. (p. 19) Additional requirements include: graduation from an accredited baccalaureate nursing program, or other baccalaureate program with a focus on healthcare needs in society with a clinical concentration. Applicants who are graduates of other accredited baccalaureate programs will be considered on a case-by-case basis.

This certificate requires courses which must be taken in sequence over one calendar year with no transfer credit accepted. A grade point average of 3.0 must be maintained. All course work must be completed in accordance with the academic procedures of the College of Nursing (p. 278) and the Graduate School (p. 12) governing graduate scholarship and degrees.

Required Courses

Code	Title	Credits
NUR 7865	Foundations of Complementary and Alternative Medicine (CAM)	3
NUR 7870	Complementary Therapy Research: Understanding the Evidence	4
NUR 7875	Complementary Alternative Medicine Therapies: Clinical Intervention II	5

Total Credits

12

Nurse-Midwifery (Graduate Certificate)

This Graduate Certificate program is designed to prepare advanced practice nurses to practice as nurse-midwives (NM) in the primary care of women and newborns. The certificate provides nurses with essential knowledge and skills in nurse-midwifery care. The courses focus on concepts of nurse-midwifery clinical practice such as well-woman, primary, intrapartum, postpartum, newborn care and professional role

transition. Upon completion, NM students take the American Midwifery Certification Board (AMCB) examination. The graduate nurse-midwifery major is accredited by the Accreditation Commission for Midwifery Education (ACME).

Admission Requirements

Admission to this program is contingent upon admission to the [Graduate School](#) (p. 19) and availability of College of Nursing resources. Students must also meet the following criteria for admission:

1. Completion of a graduate (Master's or Doctoral) degree in Nursing from a nationally accredited institution;
2. Current Michigan Registered Nurse licensure;
3. Three letters of reference; and
4. A personal goal statement.

This certificate requires courses which must be taken in sequence over one calendar year with no transfer credit accepted. This certificate requires a minimum of sixteen credits which must be earned within three years. A minimum grade point average of 3.0 must be achieved. Any additional requirements are determined by a GAP analysis. All course work must be completed in accordance with the academic procedures of the College and the Graduate School governing graduate scholarship and degrees; see sections beginning under Graduate Academic Regulations (p. 12) and Academic Regulations for the College of Nursing (p. 278), respectively. Please contact Department for requirements.

NUR 7226	Pathophysiology, Clinical Care and Management II	8
NUR 7227	Pathophysiology, Clinical Care and Management III	8
Total Credits		16

Nursing Education (Graduate Certificate)

This Graduate Certificate Program in Nursing Education is designed to prepare nurses for teaching positions in educational and service settings. The certificate provides nurses with essential knowledge and skills in teaching, program development, evaluation, clinical instruction, and other aspects of the educational process in nursing. Courses focus on concepts of learning; teaching methods and concepts of teaching in nursing; multimedia and computer-assisted instruction and distance education; development of educational programs in nursing; evaluation; testing; and clinical teaching from a theoretical and research perspective. The program provides learners with a theoretical framework for teaching in nursing and related competencies.

Admission Requirements

Admission to this program is contingent upon admission to the [Graduate School](#) (p. 19) and the availability of College of Nursing resources. Students must also meet the following criteria for admission:

1. Completion of a Master's degree in Nursing or concurrent enrollment in the MSN, DNP, or PhD program in the College of Nursing at Wayne State University. (If the student is currently enrolled in one of the graduate programs, the certificate will not be awarded until the degree is posted to the transcript),
2. Current Michigan Registered Nurse licensure,

3. A statement of purpose for seeking the Nursing Education certificate, and
4. Three letters of reference.

This Certificate requires twelve credits which must be earned within three years with no transfer credit accepted. A minimum grade point average of 3.0 must be achieved. All course work must be completed in accordance with the academic procedures of the College of Nursing (p. 278) and the Graduate School (p. 12) governing graduate scholarship and degrees.

Pediatric Nurse Practitioner Acute Care (Graduate Certificate)

This Graduate Certificate Program will allow primary care-certified pediatric nurse practitioners to acquire the nationally-specified pediatric acute and critical care content and clinical skills needed to take the national pediatric acute care certification exam and then to function competently within the acute care scope of practice. It will require satisfactory completion of sixteen credits of didactic content and clinical practice. The certificate provides nurses with essential knowledge and skills to assume acute care roles in a myriad of settings using a patient and family-centered care model. Courses focus on integrating advanced health assessment, pathophysiology, and acute clinical care and management. Specific clinical experiences in two of the courses will be tailored to meet needs of individual graduate certificate students. Students will be expected to acquire a minimum of 600 hours of acute care experience as required to meet the specialty competencies and the requirements to take the Pediatric Nurse Practitioner-Acute Care national certification examination from the Pediatric Nursing Certifying Board (PNCB).

Admission Requirements

Admission to this program is contingent upon admission to the [Graduate School](#) (p. 19) and availability of College of Nursing Resources. Students must also meet the following criteria for admission:

1. Completion of a graduate (Master's or doctoral) degree in Nursing from a nationally accredited institution;
2. Current Michigan Registered Nurse licensure;
3. Three letters of reference; and
4. A personal goal statement.
5. PNP-PC certification

This certificate requires courses which must be taken in sequence over one calendar year with no transfer credit accepted. This certificate requires a minimum of sixteen credits which must be earned within three years with no transfer credit accepted. A minimum grade point average of 3.0 must be achieved. Any additional requirements are determined by a GAP analysis. All course work must be completed in accordance with the academic procedures of the College of Nursing (p. 278) and the Graduate School (p. 12) governing graduate scholarship and degrees.

Pediatric Nurse Practitioner Primary Care (Graduate Certificate)

This Graduate Certificate Program will allow acute care-certified pediatric nurse practitioners to acquire essential knowledge and skills in pediatric primary care with a particular focus on care of children with complex chronic conditions. It will require satisfactory completion of sixteen credits of didactic content and clinical practice. The certificate provides nurses with essential knowledge and skills to assume primary care roles in a myriad of settings using a patient and family-centered care model. Courses focus on integrating advanced health assessment, pathophysiology, primary care clinical care and management. Specific clinical experiences in two of the courses will be tailored to meet needs of individual graduate certificate students. Students will be expected to acquire a minimum of 500 hours of primary care experience as required to meet the specialty competencies and the requirements to take the Pediatric Nurse Practitioner-Primary Care national certification examination from the Pediatric Nursing Certifying Board (PNCB).

Admission Requirements

Admission to this program is contingent upon admission to the [Graduate School](#) (p. 19) and availability of College of Nursing resources. Students must also meet the following criteria for admission:

1. Completion of a graduate (Master's or doctoral) degree in Nursing from a nationally accredited institution;
2. Current Michigan Registered Nurse licensure;
3. Three letters of reference; and
4. A personal goal statement.
5. PNP-AC Certification

This certificate requires courses which must be taken in sequence over one calendar year with no transfer credit accepted. This certificate requires a minimum of sixteen credits which must be earned within three years with no transfer credit accepted. Any additional requirements are determined by a GAP analysis. A minimum grade point average of 3.0 must be achieved. All course work must be completed in accordance with the academic procedures of the College of Nursing (p. 278) and the Graduate School (p. 12) governing graduate scholarship and degrees.

NUR 7227	Pathophysiology, Clinical Care and Management III	8
Total Credits		16

Psychiatric Mental Health Nurse Practitioner (Graduate Certificate)

An admissions moratorium is currently in effect for this program.

This Graduate Certificate Program is designed to prepare nurses to assume primary care roles as a Psychiatric Mental Health Nurse Practitioner. The certificate provides nurses with essential knowledge and skills to assume psychotherapy, consultation, and liaison roles. Courses focus on systematic pathophysiology, pharmacotherapeutics

interventions, advanced health assessment, and health policy and issues for advanced practice nurses.

Admission Requirements

Admission to this program is contingent upon admission to the Graduate School (p. 19). Students must also meet the following criteria for admission:

1. completion of a Master's degree in Psychiatric Mental Health Nursing or the completion of a Master's Degree in another specialty area or concurrent enrollment in the Master's program in the College of Nursing at Wayne State University. (If the student is currently enrolled in the M.S.N. program, the certificate will not be awarded until the M.S.N. is posted on the transcript.);
2. current Michigan Registered Nurse licensure;
3. three letters of recommendation; and
4. a personal goal statement. Individualized programs will be determined for students with a Master's degree in Nursing in another specialty following evaluation of previous course syllabi and transcripts.

This certificate requires sixteen credits which must be earned within three years with no transfer credit accepted. A minimum grade point average of 3.0 must be achieved. All course work must be completed in accordance with the academic procedures of the College of Nursing (p. 278) and the Graduate School (p. 12) governing graduate scholarship and degrees.

Transcultural Nursing (Graduate Certificate)

An admissions moratorium is currently in effect for this program.

This certificate is designed to provide students with knowledge and skills for working with individuals, families and groups of various cultures, and with cultural institutions exhibiting diverse values, beliefs and lifeways. The courses are especially designed to contrast and compare different cultures throughout the world and offer students the opportunity to understand how culture influences health care. Classroom and field experiences enable students to become competent practitioners, consultants, cultural care facilitators, and teachers in transcultural nursing.

Admission Requirements

Admission to this program is contingent upon admission to the Graduate School (p. 19). Eligibility for this program is extended to students enrolled in the M.S.N. or Ph.D. programs at Wayne State University and to graduates of an accredited M.S.N. program.

An admissions moratorium is currently in effect for this program.

This certificate requires a minimum of twelve credits which must be earned within three years with no transfer credit accepted. A minimum grade point average of 3.0 must be achieved. All course work must be completed in accordance with the academic procedures of the College of Nursing (p. 278) and the Graduate School (p. 12) governing graduate scholarship and degrees.

Women's Health Nurse Practitioner (Graduate Certificate)

An admissions moratorium is currently in effect for this program.

The Women's Health Nurse Practitioner graduate certificate program is designed to prepare nurse practitioners or certified nurse-midwives

to additionally practice as women's health nurse practitioners in the primary care of women throughout the life span. This certificate program provides nurses with essential knowledge and skills in women's health care. Courses focus on integrating advanced health assessment, pathophysiology, pharmacotherapeutics, women's health primary care clinical care and management as well as concepts of complicated obstetric and gynecologic care and acute and chronic care. Specific clinical experiences in these courses are tailored to meet the needs of individual graduate certificate students. Students will be expected to acquire a minimum of 600 hours of women's health care clinical experience as required to meet the specialty competencies and the requirements to take the Women's Health Nurse Practitioner national certification examination from the National Certification Corporation (NCC).

Admission Requirements

Admission to this program is contingent upon admission to the [Graduate School](#) (p. 19). Students must also meet the following criteria for admission:

1. Completion of a graduate (Master's or doctoral) degree in Nursing;
2. Current Michigan Registered Nurse licensure;
3. Three letters of reference; and
4. A personal goal statement.

An admissions moratorium is currently in effect for this program.

This certificate requires a minimum of eighteen credits which must be earned within three years with no transfer credit accepted. A minimum grade point average of 3.0 must be achieved. All course work must be completed in accordance with the academic procedures of the College of Nursing (p. 278) and the Graduate School (p. 12) governing graduate scholarship and degrees.

College of Nursing Faculty

ABERLE, BELINDA: M.S.N., University of Michigan; B.S.N., Boston University; Instructor (Clinical)

ALBDOUR, MAHA: Ph.D., M.S.N., Wayne State University; B.S.N., University of Jordan; Assistant Professor

ALHASANAT-KHALIL, DALIA: Ph.D., Wayne State University; B.S.N., University of Jordan; Assistant Professor

ARTINIAN, NANCY: Ph.D., M.S.N., Wayne State University; B.S.N., Mercy College of Detroit; Professor Emerita

ASHARE, JOANN: M.S.N., B.S.N., Wayne State University; Instructor (Clinical)

BALINT, KATHERINE: D.N.P., Wayne State University; M.S.N., Madonna University; B.S.N., Nazareth College; Assistant Professor (Clinical)

BELL, CYNTHIA: Ph.D., M.S.N., Indiana University; B.S.N., Indiana Wesleyan University; Assistant Professor

BENKERT, RAMONA: Ph.D., University of Michigan; M.S.N., Wayne State University; B.S.N., Mercy College of Detroit; Associate Professor

BICKES, JOAN: D.N.P., M.S.N., Wayne State University; B.S.N., University of Detroit Mercy; Clinical Assistant Professor

BILLINGSLEY, SUZANNE: D.N.P., M.S.N., B.S.N., Wayne State University; Instructor (Clinical)

CAMPBELL, MARGARET: Ph.D., University of Michigan; M.S.N, B.S.N., Wayne State University; Professor (Research)

CARROLL, LYNETTE: M.S.N, B.S.N., Wayne State University; Instructor (Clinical)

CARTER, ERIK: Ph.D., M.S.N., University of California - San Francisco; B.S.N., University of Phoenix; Assistant Professor (Clinical)

CLABO, LAURIE LAUZON: Ph.D., University of Rhode Island; MN, Dalhousie University; B.S.N., University of Windsor; Professor

DARAMOLA, OLUBUNMI: Ph.D., University of Michigan; M.S.N., Wayne State University; B.N.Sc., University of Ife; Assistant Professor (Clinical)

DIVER-SPRUIT, JESSICA: D.N.P., Case Western University; M.S.N., Rush University; B.S.N., Michigan State University; Instructor (Clinical)

EDWARDS, WANDA: D.N.P., M.S.N., B.S.N., Wayne State University; Instructor (Clinical)

EKWESE, GORJI: D.N.P., B.S.N., Wayne State University; Instructor (Clinical)

FALAHEE, MARGARET: D.N.P., Wayne State University; M.S.N., University of Michigan; B.S.N., Northern Michigan University; Clinical Assistant Professor

FARNER, JULIA: D.N.P., Wayne State University; B.S.N., Michigan State University; Instructor (Clinical)

FRY-MCCOMISH, JUDITH: Ph.D., M.S.N., Wayne State University; B.S.N., Indiana University; Associate Professor Emerita

GEIGER, CAROL: D.N.P., Wayne State University; B.S.N., University of Detroit-Mercy; Instructor (Clinical)

GEORGE, NANCY: Ph.D., M.S.N., University of Michigan; B.S., Michigan Tech University; Associate Professor (Clinical)

GIBSON-SCIPIO, WANDA: Ph.D., Michigan State University; M.S.N., B.S.N., Wayne State University; Clinical Assistant Professor

HAMEISTER, DAWN: Ph.D., University of Michigan; M.S.N, B.S.N., Wayne State University; B.A., Albion College; Associate Professor Emeritus

HARRIS, ANTHONY: M.S.N, B.S.N., University of Phoenix; Instructor (Clinical)

HARTWELL-KING, KATHLEEN: D.N.P., Wayne State University; B.S.N., Eastern Michigan University; Instructor (Clinical)

HAUFF, NANCY: Ph.D., M.S.N, B.S.N., Wayne State University; Instructor (Clinical)

HAZARD VALLERAND, APRIL: Ph.D., University of Pennsylvania; M.S.N., California State University, Los Angeles; B.S.N., Mt. St. Mary's College; Professor

HERRINGTON, CAROLYN: Ph.D., M.S.N, Wayne State University; B.S.N., Michigan State University; Assistant Professor

KOLLER-DITTO, NOEL: M.S.N., University of Detroit-Mercy; B.S.N., Sienna Heights University; Instructor (Clinical)

KOWALEWSKI, KATHLEEN: M.S.N, University of Pennsylvania; B.S.N., Mercy College of Detroit; Instructor (Clinical)

LEROY, SARAH: D.N.P., M.S.N., Wayne State University; B.S.N., Michigan State University; Instructor (Clinical)

LEWIN, LINDA: Ph.D., University of Toledo; M.S.N., The Ohio State University; B.S.N., Capital University; Assistant Professor

MALINOWSKI, CHRISTINE: D.N.P., B.S.N., Wayne State University; Instructor (Clinical)

MCCOY, MARY ANNE: Ph.D., Michigan State University; M.S.N., Oakland University; B.S.N., Mercy College of Detroit; Clinical Assistant Professor

MCNEILL, CYNThERA: D.N.P., Wayne State University; B.S., Coppin State University; Instructor (Clinical)

MILLER, MARGIE: M.S.N., B.S.N., Wayne State University; Clinical Instructor

MOOD, DARLENE: Ph.D., M.A., Wayne State University; B.M.Ed., Roosevelt University; Professor Emeritus

MOONEY, MICHAEL: D.N.P., Wayne State University; B.S.N., University of Detroit-Mercy; Instructor (Clinical)

MURN, NICOLE: D.N.P., Wayne State University; B.S.N., Madonna University; Instructor (Clinical)

NANTAIS-SMITH, LEANNE: Ph.D., M.S.N., Wayne State University; M.A., B.S.N., B.A., Michigan State University; Clinical Assistant Professor

NATAVIO, TEOFANES: M.S.N., Eastern Michigan University; B.S.N., Oakland University; Clinical Instructor

OLIVER-MCNEIL, SANDRA: D.N.P., M.S.N., Wayne State University; B.S.N., Michigan State University; Clinical Assistant Professor

OLSEN, KAREN: M.S.N., Wayne State University; B.S.N., University of Michigan; Instructor (Clinical)

PARKER, JESSICA: M.S.N., Wayne State University; B.S.N., University of Michigan; Clinical Instructor

PASTOR, JESSICA: M.S.N., B.S., Wayne State University; B.S.N., University of Detroit Mercy; Clinical Instructor

PETERS, ROSALIND: Ph.D., M.S.N., Wayne State University; B.S.N., Madonna College; Associate Professor

PIEPER, BARBARA: Ph.D., M.S.N., Wayne State University; B.S.N., Michigan State University; Professor

RICE, VIRGINIA: Ph.D., M.A., University of Michigan; M.S.N., Wayne State University; B.S., Boston University; Professor Emeritus

SCHUTTE, DEBRA: Ph.D., M.S.N., B.S.N., The University of Iowa; Associate Professor

SMOLENSKI, STEFAN: D.N.P., B.S.N., Wayne State University; Instructor (Clinical)

STANLEY, CHANTA: D.N.P., B.S.N., Wayne State University; Clinical Instructor

TEMPLIN, THOMAS: Ph.D., M.A., B.A., Wayne State University; Professor (Research)

VILLASENOR, SALLY: D.N.P., M.S.N., B.S.N., Wayne State University; B.A., Albion College; Clinical Assistant Professor

VISGER, JOAN: M.S.N., University of Phoenix; B.S., Wayne State University; Clinical Assistant Professor

WALKER, DEBORAH: Ph.D., University of California, Los Angeles; M.S.N., University of Minnesota; B.S.N., Sonoma State University; Associate Professor

WALKER, TARA: D.N.P., Wayne State University; B.S.N., University of Rochester; Clinical Instructor

WASHINGTON, OLIVIA: Ph.D., Wayne State University; M.S.N., B.S.N., State University of New York at Buffalo; Associate Professor Emeritus

WILLIAMS, BARBARA: M.A., Central Michigan University; B.S.N., Mercy College of Detroit; Clinical Instructor

WILSON, FELETA: Ph.D., Wayne State University; M.P.H., University of Michigan; B.S.N., North Carolina Agricultural and Technical State University; Associate Professor

YARANDI, HOSSEIN: Ph.D., M.A., Indiana University; B.S., Tehran University; Professor

ZIMNICKI, KATHERINE: D.N.P., M.S.N., Wayne State University; B.S.N., Mercy College of Detroit; Clinical Assistant Professor

ZUGCIC, MARY: M.S., B.S.N., University of Michigan; Clinical Instructor

EUGENE APPLEBAUM COLLEGE OF PHARMACY AND HEALTH SCIENCES

Interim Dean: Catherine Lysack

The Eugene Applebaum College of Pharmacy and Health Sciences (EACPHS) is a unit of the University formed by the collaboration of health science professions represented by the academic departments of:

- **Applied Health Sciences:** comprised of Clinical Laboratory Science, Mortuary Science, Pathologists' Assistant Studies, and Forensic Investigation
- **Health Care Sciences:** comprised of Occupational Therapy, Nurse Anesthesia, Physical Therapy, Physician Assistant Studies, Radiation Therapy Technology, Radiologic Technology, and Radiologist Assistant Studies
- **Pharmaceutical Sciences**
- **Pharmacy Practice**

The College offers seventeen degrees and certificates. The academic programs of the College maintain autonomous admission requirements, curricula, degree requirements and academic procedures.

History

The College of Pharmacy was founded in 1924. In 1974, the pharmacy unit merged with the Division of Health to form a College dedicated to educating the health care professionals in these fields. In 1985, the College of Pharmacy and Allied Health Professions became home to the Mortuary Science department, which had originated as a unit of the School of Business Administration in 1943.

In 1998, the State of Michigan set aside \$48.2 million for a new facility, based on the University's commitment to raise \$16.1 million from private sources. Eugene Applebaum, a 1960 alumnus of the College's pharmacy program and founder of Arbor Drug Stores, made a lead gift of \$5 million and agreed to chair the College's capital campaign. The new building, which opened in 2002 on the Detroit Medical center campus, features 270,000 square feet of learning and research space. The facility brings all departments of the College under one roof, except Mortuary Science and Clinical Laboratory Science, which have separate facilities.

Location

The Eugene Applebaum College of Pharmacy and Health Sciences is a state-of-the-art teaching and research facility at the southwest gateway to the Detroit Medical Center, located at 259 Mack Avenue at John R Street, near the School of Medicine and Shiffman Medical Library. This facility provides notable clinical and research settings where students participate as part of their professional development.

Mission

The mission of this college is to advance the health and well-being of society through the preparation of highly-skilled health care practitioners, and through research to discover, evaluate, and implement new knowledge to improve models of practice and methods of treatment in pharmacy and health sciences. It is the intent of this college to serve as a preeminent model of learning, scholarship, and engagement, impacting health, safety, and well-being worldwide through leadership, innovation, and the interconnectedness of its disciplines. To this end the College offers a variety of graduate-professional and graduate programs. They

are designed to provide advanced-level professional training, basic research and scholarly activities in the various health science fields.

Accreditation

The Higher Learning Commission accredits Wayne State University and professional programs in this College are accredited by their respective agencies:

CLINICAL LABORATORY SCIENCE:

National Accrediting Agency for Clinical Laboratory Science (NAACLS), 5600 N. River Rd., Suite 720 Rosemont, IL 60018-5119 (<http://www.naacls.org/>)

PATHOLOGIST'S ASSISTANT PROGRAM:

National Accrediting Agency for Clinical Laboratory Science (NAACLS), 5600 N. River Rd., Suite 720, Rosemont, IL 60018-5119 (<http://www.naacls.org/>)

NURSE ANESTHESIA:

Council on Accreditation of Nurse Anesthesia Education Programs (COA), 222 S. Prospect Ave., Suite 304, Park Ridge IL 60068-4010 (<http://www.aana.com/>)

OCCUPATIONAL THERAPY:

Accreditation Council for Occupational Therapy Education (ACOTE), 4720 Montgomery Lane, Suite 200, Bethesda MD 20814-3449 (www.acoteonline.org (<http://www.acoteonline.org/>))

PHARMACY:

Academic Regulations

For complete information regarding the academic rules and regulations of the University, students should consult the Academic Regulations

(p. 12) section of this bulletin. The following additions and amendments pertain to the College of Pharmacy and Health Sciences.

1. Professional course: any course required in the Pharm.D., D.P.T. or M.O.T curriculum and any course approved for professional elective credit and elected by the student for that purpose.
2. Satisfactory grade: a grade of 'C' or above, or a grade of 'S.'
3. Unsatisfactory grade: a grade of 'C-minus' or below 2.0 grade points, or a mark of 'X' or unauthorized 'W'. Marks of 'X' or marks of 'W' which have not been authorized will be treated as an 'E.'
4. Probation: a restricted status in a program (see below).
5. Dismissal from a program means that the student may no longer register in the program, or elect professional course work. Continued registration in the University requires that a Change of Status to another program be made.

Academic and Professional Progress

The College expects its students to develop professional competence and to satisfy the same high standards of exemplary character, appearance, and ethical conduct expected of other health care professionals.

To merit confidence and esteem, both personally and in the health care professions, appropriate dress and demeanor are expected of each student in their respective academic and professional program. Each program has a process or committee in place to review student performance regularly and makes decisions concerning probationary status. A student may be dismissed from the College at any time for an unsatisfactory academic or professional record, for irresponsible attendance, or other failures to diligently pursue the academic and professional program.

Outside Employment

The curriculum has been arranged with the presumption that students will devote full time and energy to their academic program. Internships, fieldwork and other pharmaceutical employment is recognized as an integral part of the academic and professional growth of a pharmacy or health science student. However, students are responsible for maintaining the appropriate balance between such activity and satisfactory achievement in the classroom.

Attendance

Regularity in attendance and performance is necessary for success in college work. At the beginning of each course the instructor will announce and/or include in the syllabus the specific attendance required of students as part of the successful completion of the course.

Course Elections

The program must be elected on a full-time basis, following the curriculum as outlined in this bulletin, unless specifically directed otherwise by the Committee on Academic and Professional Progress and/ or the faculty.

No course may be elected unless a satisfactory grade has been earned in each of the course prerequisites. Registration to audit a course or for courses elected on a Satisfactory or Unsatisfactory (S or U) is permitted only for elective credits, in certain designated courses such as field work, practicum and internships, in excess of the minimum degree requirements, or by guest or post-degree students.

Leaves of Absence

A leave of absence may, and should, be requested by a student when personal circumstances interfere with his/her ability to devote sufficient time to academic pursuits to assure reasonable expectations of

success. A leave of absence is requested from and granted by the Dean in consultation with the departmental committee or faculty advisor. If a student requests and is granted an immediate leave of absence during a term, it is the student's responsibility to follow the Academic procedures to withdraw from all courses enrolled in for that term as outlined by instructions found online (<http://reg.wayne.edu/students/information.php>).

A leave of absence must be requested no later than the end of the tenth week of the term, or in the case of courses not offered over a traditional semester, prior to completion of seventy-five per cent of the course, and requires a prior consultation with the student's faculty advisor, program director, department chair and/or the Assistant Dean for Student Affairs.

A student who takes an unauthorized leave of absence will be considered to have voluntarily withdrawn from the program and may be permitted to return only upon the recommendation of the Admissions Committee in consultation with the appropriate departmental committee or faculty advisor.

Time Limitations

The program must be completed within six calendar years of admission unless an extension is granted by the appropriate departmental academic progress committee or faculty advisor (extensions are appropriate in circumstances such as a delay required to repeat a course preceding or following an authorized leave of absence or an authorized leave of absence that extends beyond one year).

Students who are delayed in their progress for reasons of academic failure and/or leaves of absence beyond the six-year limit may be required to repeat and/or take additional courses in order to assure their graduation with appropriate preparation for contemporary professional practice; such determination will be made by the appropriate departmental academic progress committee in consultation with appropriate faculty.

Minimum Grade Requirement

No professional course in which an unsatisfactory grade is earned will be counted for degree credit in this program unless repeated for a satisfactory grade. Please refer to the specific program/department Student Handbook for information regarding minimum grade requirements.

Grade Appeals

Official Policies and Procedures
College Policy No. 89.01 FINAL COURSE GRADE APPEALS

Approved 4/30/2013, Correction 3/26/15, UPDATED August 14, 2015,
Adopted September 16, 2015

Modifications April 26, 2016, Approved September 28, 2016, **Provost Office addendum September 13, 2017. Provost Office updates July 12, 2018 and November 13, 2018.**

THIS VERSION REPLACES AND SUPERSEDES ALL PRIOR VERSIONS OF FINAL COURSE GRADE APPEALS POLICY. This policy is effective immediately for final course grades received for Fall 2016 and all terms going forward.

The following is the policy implemented for Final Course Grade Appeals in the Eugene Applebaum College of Pharmacy and Health Sciences. At the beginning of each term, the instructor is to inform students in writing of the criteria used in arriving at grades for the class including the relative importance of prepared papers, quizzes and examinations, class participation and attendance. Where student performance in other

practical and structured activities is relevant in evaluating professional competency, criteria used in such evaluations should be stated. Written materials should be graded in a timely manner and such materials, together with comments and an explanation of grading criteria, are to be made available to students. Students should be encouraged to discuss any class related problems with the instructor.

Instructors are expected to evaluate student work according to sound academic standards.

Equal expectations should be required of all students in a class (although more work is expected from graduate students than from undergraduates) and grades should be assigned without departing from announced procedures.

It is the instructor's prerogative to assign grades in accordance with his or her academic and professional judgment and the student assumes the burden of proof in the appeals process. Grounds for appeals are:

1. the application of non-academic criteria in the grading process, as listed in the university's non-discrimination/affirmative action statute: race, color, sex (including gender identity), national origin, religion, age, sexual orientation, familial status, marital status, height, weight, disability, or veteran status;
2. sexual harassment or discrimination; or
3. evaluation of student work by criteria not directly reflective of performance relative to course requirements.

This final course grade appeal policy does not apply to allegations of academic misbehavior. Academic misbehavior matters are addressed by Section 10.1 of the WSU Student Code of Conduct (<https://doso.wayne.edu/pdf/student-code-of-conduct.pdf>).

Definition: Instructor - Instructor applies to full-time, fractional-time, part-time faculty as well as Graduate Teaching Assistants, Adjuncts, and Academic Staff with teaching duties.

Final Course Grade Appeals Policy and Procedure

Informal Final Course Grade Review

1. Prior to an appeal of a course final grade all issues must first be directed to the instructor of the course for consideration of resolution.
2. The initial request of a grade review should be made directly to the instructor in an informal discussion during office hours or by a requested scheduled appointment.
3. If a student has documented efforts to obtain an informal meeting with the instructor and is unable to schedule this meeting within ten calendar days the student will then have the right to proceed to a formal grade appeal within thirty calendar days following posting of the final course grade. The instructor should make every reasonable effort to meet with the student during this time period prior to a formal appeal.

Formal Final Course Grade Appeal Policy and Procedure

If the final grade in question remains unchanged after the informal final course grade review, any formal Course Grade Appeal to change the grade in question must be initiated in writing by the student within thirty calendar days following the posting of the final course grade. The Student must submit a formal written appeal to the appropriate Department Chair. This formal appeal must include a copy of the current course syllabus and a student appeal letter including detailed justification for the appeal. This documentation must explicitly state which of the three criteria of allowable rationales is applicable and how the alleged violation occurred.

Formal Final Course Grade Appeal

1. The Department Chair shall provide a time-stamped and dated copy of the formal student course grade appeal to the instructor, program director or program/department grade appeal committee. The Department Chair will then request input and/or response from the instructor, program director or the program/department grade appeal committee.
2. Student or Faculty involved in a grade appeal process may contact the University Ombudsperson at any time for assistance with any questions associated with a grade decision or the grade appeal process.
3. The Department Chair may convene an ad hoc special review committee (or charge an existing committee) to advise on any dispute.
4. The Department Chair shall review all documentation and respond in writing to the student within thirty calendar days of receiving the formal course grade appeal. The Department Chair will place, in writing, the final decision to the student, instructor, program director, program/department grade appeal committee or the reason for any delay in decision. The decision of the Department Chair can be appealed to the Office of the Dean.
5. Appeals to the Office of the Dean must be submitted in writing within ten calendar days of the postmarked response from the Department Chair. The Dean or his/her designee must respond to the student appeal within thirty calendar days. The decision of the Dean or his/her designee is the final decision at the College level.
6. If the appeal is denied at the Dean (or designee) of the College level, and the College appeal path is exhausted, if the student wishes to continue with the grade appeal process, per the University Academic policy (<https://provost.wayne.edu/academic-policy>), the student may request a Provost Review within 30 days of this decision. The request should be addressed to Dr. R. Darin Ellis, Associate Provost for Academic Programs. **The request should be submitted via the online form** (<https://provost.wayne.edu/academic-policy>). For assistance with the appeal process, the student may contact the Ombudsperson (<https://wayne.edu/ombuds>). The student's formal appeal for Provost Review must include a copy of the current course syllabus, the initial student appeal letter including detailed justification for the appeal, the Department Chair's (or designee's) response letter, and the Dean's (or designee's) written response. The decision of the Provost or his/her designee is final. No further appeal is possible.

Dismissal Policy

College Policy No. 89.06

Established and Approved September 28, 2016

The following is the policy implemented when a student has been dismissed from a program or department in the Eugene Applebaum College of Pharmacy and Health Sciences. Specific guidelines for dismissal are available (by programs and departments) in student handbooks and in other electronic formats on program, department, and College web pages.

Combined Grade Appeal/Dismissal Policy

If the final course grade leads to dismissal, the dismissal will be considered simultaneously in the final course grade appeal process. There is no separate or additional appeal process for a dismissal based on a final course grade. This would be referred to as a "combined" appeal. In the event the combined final grade/dismissal appeal is denied by the Dean (or designee) a final appeal can be made by the student to the Provost as part of the combined grade appeal/dismissal process.

If dismissal results from an unprofessional behavior violation or other non-academic reason (<https://doso.wayne.edu/conduct/nonacademic>)

misconduct) not addressed within the program or department student handbook, the **WSU Student Code of Conduct** will be applied. Academic misbehavior matters are addressed by Section 10.1 of the **WSU Student Code of Conduct** (<https://doso.wayne.edu/pdf/student-code-of-conduct.pdf>).

Definition: Instructor - Instructor applies to full-time, fractional-time, part-time faculty as well as Graduate Teaching Assistants, Adjuncts, and Academic Staff with teaching duties.

Combined Grade Appeal/Dismissal Policy and Procedure

Informal Grade Appeal/Dismissal Review

1. Prior to a combined appeal of a grade/dismissal all issues must first be directed to the instructor of the course for consideration of resolution.
2. The initial request should be made directly to the instructor in an informal discussion during office hours or by a requested scheduled appointment.
3. If a student has documented efforts to obtain an informal meeting with the instructor and is unable to schedule this meeting within ten calendar days the student will then have the right to proceed to a formal combined grade appeal/dismissal process. The instructor should make every reasonable effort to meet with the student during this time period prior to a formal appeal.

Formal Combined Grade Appeal/Dismissal Appeal Policy and Procedure

If the dismissal status remains unchanged after the informal meeting with the instructor, the formal Grade Appeal/Dismissal process must be initiated in writing by the student within thirty calendar days following the notification of the final course grade that precipitated the dismissal. The student must submit a formal written appeal to the appropriate Department Chair (or designee). This formal appeal must include a copy of the current course syllabus and a student appeal letter including detailed justification for the appeal of the dismissal.

Formal Combined Grade Appeal/Dismissal Process

1. The Department Chair (or designee) shall provide a time-stamped and dated copy of the formal student dismissal appeal to the instructor, program director or program/department appeal committee. The Department Chair (or designee) will then request input and/or response from the instructor, program director or the program/department appeal committee.
2. Student or Faculty involved in a dismissal appeal process may contact the University Ombudsperson at any time for assistance with any questions associated with a grade decision or the grade appeal/dismissal process.
3. The Department Chair (or designee) may convene an ad hoc special review committee (or charge an existing committee) to advise on any dismissal.
4. The Department Chair (or designee) shall review all documentation and respond in writing to the student within thirty calendar days of receiving the formal dismissal appeal. The Department Chair (or designee) will place, in writing, the final decision to the student, instructor, program director, program/department appeal committee or the reason for any delay in decision. The decision of the Department Chair (or designee) can be appealed to the Dean.
5. Appeals to the Dean must be submitted in writing within ten calendar days of the postmarked response from the Department Chair (or designee). The Dean or his/her designee must respond to the student appeal within thirty calendar days. The decision of the Dean or his/her designee is the final decision at the College level.
6. If the appeal is denied at the Dean (or designee) of the College level and the College appeal path is exhausted, if the student wishes

to continue with the final grade/dismissal appeal process, per the University Academic policy (<https://provost.wayne.edu/academic-policy>), the student may request a Provost Review within 30 days of this decision. The request should be addressed to Dr. R. Darin Ellis, Associate Provost for Academic Programs. **The request should be submitted via the online form** (<https://provost.wayne.edu/academic-policy>). For assistance with the appeal process, the student may contact the Ombudsperson (<https://wayne.edu/ombuds>). The student's combined grade appeal/dismissal for Provost Review must include a copy of the current course syllabus, the initial student appeal letter including detailed justification for the appeal, the Department Chair's (or designee's) response letter, and the Dean's (or designee's) written response. The decision of the Provost or his/her designee is final. No further appeal is possible.

The student may also file with the Provost's Office a Request for a Postponement of the effect of the College's final decision. Such a request must be postmarked within seven calendar days of the postmark of the College's final decision, and a copy must be sent to the Dean of the College. Upon receiving a Request for Postponement, the Provost will immediately contact the Dean. Unless the College demonstrates clearly and convincingly that the injury to the College or to third persons that would result from such a postponement would outweigh the injury to the student from denying the postponement, the effect of the decision rendered by the College must be postponed until the date that the Provost issues a decision regarding the underlying Request for Provost Review. The Provost will inform the student and the Dean of her/his decision regarding the Request for Postponement within three school days after receiving the request. Exceptions to this procedure may be granted by the Provost upon a showing of good and sufficient cause.

Dismissal Policy and Procedure

This applies to appeals of any and all dismissals that occurred because of academic, non-academic, or professional behavior violations.

Informal Dismissal Review

1. Prior to a dismissal all issues must first be directed to the instructor of the course for consideration of resolution.
2. The initial request should be made directly to the instructor in an informal discussion during office hours or by a requested scheduled appointment.
3. If a student has documented efforts to obtain an informal meeting with the instructor and is unable to schedule this meeting within ten calendar days the student will then have the right to proceed to a formal dismissal appeal process. The instructor should make every reasonable effort to meet with the student during this time period prior to a formal appeal.

Formal Dismissal Appeal Policy and Procedure

If the dismissal status remains unchanged after the informal meeting with the instructor, the formal dismissal process must be initiated in writing by the student within thirty calendar days following the notification of the action that precipitated the dismissal. The student must submit a formal written appeal to the appropriate Department Chair (or designee). This formal appeal must include a letter including detailed justification for the appeal of the dismissal.

Formal Dismissal Process

1. The Department Chair (or designee) shall provide a time-stamped and dated copy of the formal student dismissal appeal to the instructor, program director or program/department appeal committee. The Department Chair (or designee) will then request input and/or response from the instructor, program director or the program/department appeal committee.

2. Student or Faculty involved in a dismissal appeal process may contact the University Ombudsperson at any time for assistance with any questions associated with the dismissal process.
3. The Department Chair (or designee) may convene an ad hoc special review committee (or charge an existing committee) to advise on any dismissal.
4. The Department Chair (or designee) shall review all documentation and respond in writing to the student within thirty calendar days of receiving the formal dismissal appeal. The Department Chair (or designee) will place, in writing, the final decision to the student, instructor, program director, program/department appeal committee or the reason for any delay in decision. The decision of the Department Chair (or designee) can be appealed to the Dean.
5. Appeals to the Dean must be submitted in writing within ten calendar days of the postmarked response from the Department Chair (or designee). The Dean or his/her designee must respond to the student dismissal appeal within thirty calendar days. The decision of the Dean or his/her designee is the final decision at the College level.
6. If the appeal is denied at the Dean (or designee) of the College level and the College appeal path is exhausted, if the student wishes to continue with the final grade/dismissal appeal process, per the University Academic policy (<https://provost.wayne.edu/academic-policy>), the student may request a Provost Review within 30 days of this decision. The request should be addressed to Dr. R. Darin Ellis, Associate Provost for Academic Programs. **The request should be submitted via the online form** (<https://provost.wayne.edu/academic-policy>). For assistance with the appeal process, the student may contact the Ombudsperson (<https://wayne.edu/ombuds>). The student's combined grade appeal/dismissal for Provost Review must include a copy of the current course syllabus, the initial student appeal letter including detailed justification for the appeal, the Department Chair's (or designee's) response letter, and the Dean's (or designee's) written response. The decision of the Provost or his/her designee is final. No further appeal is possible.

Suspension

In extenuating circumstances, a suspension may be recommended during the appeal process. Suspension is a temporary removal of a student from participation in educational activities. While suspended, the student is placed on an administrative leave of absence.

Suspension may occur for failure to meet program/department, College or University requirements, because of a serious allegation of unprofessional behavior, or when a student is deemed to be a danger to others or him/herself. A recommendation for suspension can be made in writing to the student by the Assistant Dean for Student Affairs, the Associate Deans for Pharmacy or Health Sciences in consultation with the Dean of Students or the Office of the Provost.

Dismissal Policies Listed by Program/Department

Students should refer to their program or department for the applicable dismissal policy.

Student Conduct

Every student is subject to all regulations set forth by the University and the College governing student activities and student behavior in the use of University facilities. The University and the College have responsibility for making these regulations available and it is the student's responsibility to become thoroughly familiar with all regulations and to seek any necessary clarification. Questions and concerns regarding regulations should be brought to the attention of the appropriate faculty member and/or the Dean's office.

There are obligations inherent in registration as a student in the College. Students entering the health science and pharmacy professions are

expected to have the highest standards of personal conduct. When there are reasonable grounds to believe a student has acted in a manner contrary to ethical standards, the law, or mores of the community, such student may be disciplined. This discipline may include suspension or dismissal from the program after due process in accord with published policies and the Student Code of Conduct.

Applied Health Sciences

The mission of the Department of Applied Health Sciences is to provide students with highly effective and quality educational experiences that address contemporary challenges directly impacting public health, health care, environmental and workplace issues.

- Pathologists' Assistant (M.S.) (p. 297)

Pathologists' Assistant (M.S.)

Office: 338 Mort Sci; 313-577-2050

Program Director: Veralucia Mendes-Kramer

<http://cphs.wayne.edu/pathologists-assistant/>

The Pathologists' Assistant is academically and clinically prepared to assist pathologists in anatomic, surgical, autopsy and forensic pathology as well as ancillary services defined by the American Association of Pathologists' Assistants. The Wayne State University Pathologists' Assistant program trains individuals who will assist pathologists in the performance of postmortem examination and in the dissection, dictation, and evaluation of surgical specimens for microscopic diagnosis. The program also provides individuals with budgetary, supervisory, and teaching skills. Lastly, the program trains individuals to function as competent entry-level pathologists' assistants capable of performing, under the supervision of a pathologist, those professional responsibilities as defined by the American Association of Pathologists' Assistants (AAPA). The Pathologists' Assistant program is accredited by the National Accrediting Agency of Clinical Laboratory Sciences (NAACLS), 5600 N. River Road, Suite 720, Rosemont, IL 60018-5119, 847-939-3597, 773-714-8880, Fax: 773-714-8886, <http://www.naacls.org>.

Admission Requirements

Admission to this program is contingent upon admission to the Graduate School (p. 19). Applicants must have a bachelor's degree (BA or BS) from an accredited college or university. In addition, students must:

1. have a minimum cumulative and prerequisite undergraduate grade point average of 3.0;
2. complete all prerequisite coursework with a minimum of a C or higher;
3. submit two letters of recommendation;
4. complete the TOEFL exam if English is not the first language;
5. submit a WES course-by-course evaluation of foreign transcripts;
6. provide documentation of 8 hours of shadowing experience in a surgical lab setting and 5 hours (or one autopsy) in a medical examiner setting;
7. attend one information meeting in the year of application.

Admission Interview

Interview is by invitation only to those candidates who have satisfied all requirements for admission. Interviews are extended only to the most competitive candidates owing to the limited number of seats in the program. Meeting the minimum requirements to the program does not ensure an offer for an interview.

General Information Meetings

The Eugene Applebaum College of Pharmacy and Health Sciences hosts general information meetings (<http://cphs.wayne.edu/meetings.php>) on the first Tuesday of each month at 6:00 p.m. Out-of state prospective applicants should contact the Admissions' Office for an audio presentation and associated documentation to submit with application.

Prerequisite Study

In addition, the following course work must have been successfully completed with a grade of C or higher in order to be considered for admission. Prerequisites listed below must be completed within the six years prior to the date of applying to this degree program.

- Two Biology courses (higher than BIO 1050)
- Microbiology with lab
- Anatomy and Physiology with lab
- General Chemistry with lab
- Organic Chemistry and/or Biochemistry
- Mathematics (MAT 1000 or higher) or Statistics
- English Composition

Program Deadlines: All prerequisite coursework must be completed by May 1st for fall admission consideration.

The Master of Science in Pathologists' Assistant is offered under a Plan C option and requires completion of the following course work. All course work must be completed in accordance with the academic procedures of the Graduate School (p. 12) governing graduate scholarship and degrees and the College of Pharmacy and Health Sciences (p. 293). A grade of 'C' in any graduate course is unacceptable.

First Year		Credits
Fall Semester		
PAA 5020	Applied General Pathology	3
PAA 6560	Human Histology and Clinical Correlations	4
PAA 7060	Human Anatomy and Physiology for Pathologists' Assistants	3
PAA 7250	Clinical Academic Pathology I	3
	Credits	13
Winter Semester

	Credits	

Code	Title	Credits
Additional Year II courses (enrollment based on students' clinical rotations)		
PAA 7500	Clinical Autopsy Pathology	1
PAA 7550	Clinical Histopathologic Technique	2
PAA 7600	Clinical Pediatric Pathology	3

PAA 7700	Forensic Pathology and Techniques	5
PAA 7750	Clinical Laboratory Management in Anatomic Pathology	2
PAA 7800	Clinical and Forensic Photography	2

Physical Examination

Prior to clinical rotations, all applicants are required to submit a complete physical examination form to the program, which must include a complete immunization record, evidence of HBV antibody titre, TB status, and flu vaccination record.

Liability Insurance

Clinical Education is provided during both year I and II of the program, along with didactic and laboratory courses. Year II of the program is spent in clinical rotations through various selected clinical facilities throughout the metropolitan Detroit area, Michigan and other parts of the country, handling patients specimens and decedent remains. Therefore, all students are required to maintain liability insurance, which will be purchased during both years of the program as a separate fee from those courses the student enrolls in. In addition, the student is responsible for the cost of health insurance and all other costs (such as travel, meals, and living expenses) associated with the clinical education of the program.

Health Care Sciences

The Department of Health Care Sciences consists of six programs that share a common theme of excellence in the education and training of those involved in patient care. The department is housed in the Eugene Applebaum College of Pharmacy and Health Sciences (EACPHS) building which is near main, large health care institutions and close to the Wayne State University Medical School. Many of the department's faculty, who are involved in health care related research, offer students opportunities to assist in research. This has enabled greater appreciation for health care management and clinical decision-making.

- Anesthesia (M.S.) (p. 299)
- Occupational Therapy (M.O.T.) (p. 300)
- Pediatric Anesthesia (Graduate Certificate) (p. 300)
- Physical Therapy (D.P.T.) (p. 301)
- Physician Assistant Studies (M.S.) (p. 303)

Nurse Anesthesia

Offices: 4601-4606 CPHS

Program Director: Prudentia A. Worth; 313-993-7168; aa1635@wayne.edu

Assistant Program Director

Mary Walczyk; 4601 CPHS; 313-577-7689; mary.walczyk@wayne.edu

The practice of anesthesia is the process used to render a patient insensible to pain and emotional stress during surgical, obstetrical, or some diagnostic procedures. Nurse anesthesia is an expanded role which implements both nursing and medical functions to a wide patient population for surgical and procedural interventions. The required education builds upon previous nursing experiences by incorporating rigorous scientific knowledge, and applied clinical practices which include general, regional, and local anesthetics, and advanced technology in the delivery of quality and safe anesthesia. The practice of nurse anesthesia includes but is not limited to: pre- and post-operative assessment, planning, implementing, and managing total and safe anesthesia care to all patients regardless of age level and/or the acuity of circumstance. The nurse anesthetist works with a team of health care providers and in collaboration with anesthesiologist or other fully-

privileged physicians or dentists. Nurse anesthetists are also members on the trauma and cardiopulmonary resuscitation teams as airway experts to secure and manage difficult airway related problems which may occur in various clinical settings.

Accreditation: The program is fully accredited by the Council on Accreditation (COA) of Nurse Anesthesia Educational Programs. Projected future for the program is to transition to a Doctor of Nurse Anesthesia Practice.

- Pediatric Anesthesia (Graduate Certificate) (p. 300)

Anesthesia (M.S.)

Admission Requirements

This curriculum is designed for the registered professional nurse (RN) with a baccalaureate-degree in nursing (B.S.N.) or related sciences. The program consists of twenty-four months of full-time didactic study with continuous clinical integration that involves many hospital affiliates: the Detroit Medical Center hospitals (DMC), the Veteran's Administration hospital, and many urban, community, and rural hospitals. The program also has a long-term partnership with the Toledo hospital and St Vincent hospital in Toledo, Ohio, that serve as primary clinical sites for students from the Toledo area. Upon completion of the program, graduates are eligible to take the National Certification Examination (NCE) to practice as a Certified Registered Nurse Anesthetist (CRNA).

Admission to this program is contingent upon admission to the Graduate School (p. 19) and satisfactory completion of the undergraduate and graduate prerequisites, and a personal interview with the Nurse Anesthesia Admission Committee. Applicants will be eligible for an interview only if all the nursing prerequisites are on file. Deadlines for submitting applications are outlined on the program's website (<http://www.cphs.wayne.edu/anesth>). Admission requirements include:

1. Current licensure as a registered nurse.
2. Baccalaureate degree in nursing or related science.
3. Cumulative undergraduate grade point average (g.p.a.) of 3.0 or higher on a scale of 4.0 and in all science courses.
4. Six semester credits in organic and Inorganic chemistry, taken within ten years prior to application.
5. Three credits of biology: microbiology, or anatomy taken within ten years prior to application.
6. Completion CCRN.
7. A minimum of ONE YEAR of full-time experience in an adult intensive care (SICU, MICU, CCU) unit within the past two years.
8. Current Advanced Cardiac Life Support (ACLS) certification.
9. A minimum of one in-hospital "shadow" experience by July 1. This can be arranged at your place of work by contacting the chief CRNA in the anesthesia department to schedule a shadow experience.

Students in the Baccalaureate Nurse Anesthesia degree program complete sixty-four credits in professional anesthesia core courses and ten credits in electives, for a total of 74 credits to earn a Master of Science Degree in Anesthesia.

Core Course Requirements

Code	Title	Credits
AN 7010	Advanced Health Assessment and Clinical Diagnosis	3
AN 7020	Clinical Anesthesia Practicum II	2
AN 7030	Clinical Anesthesia Practicum III	2
AN 7040	Clinical Anesthesia Practicum IV	3
AN 7050	Clinical Anesthesia Practicum V	3
AN 7060	Clinical Anesthesia Practicum VI	2
AN 7100	Advanced Pharmacology I	3
AN 7110	Advanced Pharmacology II	3
AN 7120	Advanced Pharmacology of Anesthesia	2
AN 7150	Principles of Anesthesia I	4
AN 7160	Principles of Anesthesia II	3
AN 7170	Principles of Anesthesia III	2
AN 7180	Electrocardiography in Anesthesia Practice	1
AN 7190	Advanced Cardiovascular Patho-physiology and EKG	1
AN 7240	Advanced Physiology and Pathophysiology I	3
AN 7500	Chemistry and Physics for the Anesthetist	2
AN 7600	Regional Anesthesia and Pain Management	3
AN 7620	Pulmonary Mechanics and Anesthesia Implications	2
AN 7690	Advanced Clinical Anesthesia Practice Review I	1
AN 7700	Advanced Clinical Anesthesia Practice and Review II	1
AN 7730	Process of Teaching	2
AN 7780	Professional Dimensions	3
AN 7800	Pain Management for Nurse Anesthetists	1
AN 7880	Anesthesia Seminar (Max. 5)	1
AN 7885	Research Design for Anesthesia	1
AN 7890	DNAP Preparation	2
PSL 7010	Basic Graduate Physiology Lecture I	4
PSL 7030	Basic Graduate Physiology Lecture II	4

Requirements

To qualify for the Master of Science degree in anesthesia, all students must complete the required courses and maintain satisfactory cumulative grade point average of 3.0 or above in all courses. The curriculum courses are the same for all students and are offered annually in the same sequence.

Advisors: Students are assigned a uniform Plan of Work, and the faculty serve as advisors throughout the program including the terminal project or research assignment.

Candidacy: Students will be advanced to candidacy upon completion of the first semester courses.

Academic Progress: Continuing in the master's program requires satisfactory progress as determined by the individual advisor and program director.

Pediatric Anesthesia (Graduate Certificate)

Developed in collaboration with Children's Hospital of Michigan (CHM), the Graduate Certificate in Pediatric Anesthesia is offered to graduates with a Master of Science in Anesthesia from an accredited program

who wish to specialize in pediatric anesthesia. Students completing the Master of Science in Anesthesia may apply to the program during their last semester of the curriculum.

Admission Requirements

Applicants must meet the admission requirements of the Graduate School (p. 19). Applicants must meet with the course coordinators from Children's Hospital to assess availability and applicant eligibility to enter the program. Admission application and registration for classes are all completed on line. Upon completion of the program, the graduate must apply on line for a Post-masters Certificate in Pediatric Anesthesia.

Students in the certificate program must maintain a grade point average of at least 3.0. All course work must be completed in accordance with the academic procedures of the Graduate School (p. 12) governing graduate scholarship and degrees and the College of Pharmacy and Health Sciences (p. 293). For additional information, contact the Nurse Anesthesia Program and the coordinator for Children's Hospital Anesthesia Department.

Courses and Clinical requirements:

Occupational Therapy (M.O.T.)

Office: Room 2226 CPHS: 313-577-5884
 Program Director: Doreen Head
 Admissions Coordinator: Regina Parnell
 Fieldwork Education Level I and II: Kim Banfill
 Department Secretary III: Ashley Willis-Bradley
 Administrative Assistant III: Delores Tennille
<http://cphs.wayne.edu/ot/>

The Master of Occupational Therapy (M.O.T.) program is the entry-level program for occupational therapy, and is endorsed by the American Occupational Therapy Association (AOTA) and the Accreditation Council for Occupational Therapy Education (ACOTE).

The goal of this entry-level program is to educate individuals to become occupational therapy health care professionals. It is designed as a five-year program. During the first two (undergraduate) years, students complete seventy-one to seventy-three liberal arts and science pre-professional credits. In the following (first professional) year, an additional fifty-six credits are completed, after which the student is awarded a Bachelor of Science in Health Sciences degree. In the final two professional years, students complete thirty-six credits, inclusive of fieldwork requirements (ACOTE Standards). Upon completion of the M.O.T. degree, students are eligible to sit for the national certification and examination procedures of the National Board of Certification in Occupational Therapy. A state License to practice is required after successful completion of the NBCOT certification examination.

Accreditation

The M.O.T. program at Wayne State University is accredited by the Accreditation Council for Occupational Therapy Education (ACOTE), the accrediting body of the American Occupational Therapy Association (AOTA). The address for ACOTE is:

ACOTE, C/O Accreditation Department
 American Occupational Therapy Association (AOTA)
 4720 Montgomery Lane, Suite 200
 Bethesda, MD 20814-3449.

The courses prepare students to take the National Certification Examination (National Board for Certification in Occupational Therapy (<http://www.nbcot.org>)).

American Occupational Therapy Association, Inc. (<http://www.aota.org>)
 4720 Montgomery Lane, Suite 200
 Bethesda MD 20814-3449
 telephone: 301-652-6611; Fax: 301-652-7711

Admission Requirements

Admission: Applicants must meet the admission standards of the Graduate School (p. 19). Please contact the Occupational Therapy Program for further information.

Professional Program Admission: Applicants must apply for admission to the professional program and be formally admitted at the undergraduate level and transition to the Graduate level while in the program. All applicants must hold a minimum grade point average of 3.0 or above for the pre-professional program. All prerequisite courses must be completed with grades of 'C' or better. No more than two professional core prerequisite courses may be repeated to improve grades. In addition, the applicant must:

1. complete twenty hours of contact with a registered occupational therapist and provide documentation of this;
2. complete a Program Personal/Professional Statement;
3. submit a letter of recommendation from a current or former supervisor.

Students who have no work experience may seek a recommendation from an instructor of one of the Occupational Therapy Core Courses. For a checklist of application requirements, visit the program website. All applicants must apply through the Occupational Therapy Centralized Application Service (OTCAS) Application (<https://portal.otcas.org>).

Each student is assigned a faculty advisor upon admission to the M.O.T. program. After completion of the undergraduate and graduate coursework, each student will be assigned a Level II Fieldwork Coordinator faculty advisor, to counsel the student for the remainder of the program.

Undergraduate Preparation: For pre-professional and undergraduate-level professional requirements, applicants should consult the departmental website, or the current Undergraduate Bulletin (<http://bulletins.wayne.edu/undergraduate/college-pharmacy-health-sciences/health-care-sciences/occupational-therapy-concentration-bhs>).

The M.O.T. program consists of a minimum of 162-164 credits in course work including the pre-professional program, professional courses and fieldwork. All course work must be completed in accordance with the academic procedures of the Graduate School (p. 12) governing graduate scholarship and degrees and the College of Pharmacy and Health Sciences (p. 293).

M.O.T. Professional Graduate Program

The first three years of the M.O.T. program, including the first year of this Professional Program, are taken at the undergraduate level. For information, consult the Undergraduate Bulletin (<http://bulletins.wayne.edu/undergraduate/college-pharmacy-health-sciences/>

health-care-sciences/occupational-therapy-concentration-bhs) or contact the the College's Student Affairs Office.

Physical Therapy (D.P.T.)

Office: 2248 CPHS; 313-577-1432
 Program Director: Kristina Reid
 Director of Clinical Education: Martha Schiller
<http://www.pt.cphs.wayne.edu/>

Physical therapy is a dynamic health profession that develops, coordinates, and utilizes selected knowledge, skills, and techniques in planning, organizing, and directing programs for the care of individuals whose ability to function is impaired or threatened by disease or injury. This therapy includes examination, evaluation, diagnosis, prognosis, intervention, and analysis of outcomes. It provides services to patients/clients who have impairments of body function and structure, activity limitations, participation restrictions, disabilities, or changes in physical function and health status resulting from injury, disease, or other causes. Physical therapists also must be able to collaborate with a variety of professionals, address risk factors to health, be leaders and providers in the areas of prevention and promoting health, wellness and fitness, serve as educators, consultants, administrators and advocates, utilize critical inquiry skills and direct and supervise the provision of therapy services.

Some examples of diagnoses of individuals who might be seen by a physical therapist include stroke, low back pain, neck pain, ACL knee injury, Parkinson's Disease, spinal cord injury, amputation, heart attack, athletic injury, arthritis, cerebral palsy, rotator cuff (shoulder) injury, total or partial joint replacement, spina bifida, general health and personal training, congestive heart failure, emphysema, cancer, head injury, multiple sclerosis, learning disabilities, speed and agility training, and many more.

The American Physical Therapy Association (APTA) is the organization which represents the physical therapy profession. The mission of the APTA is to further the profession's role in the prevention, diagnosis, and treatment of movement dysfunctions and the enhancement of the physical health and functional abilities of members of the public. Students interested in the physical therapy profession should also visit the APTA (<http://www.apta.org>) website.

Accreditation: The Physical Therapy Program at Wayne State University is accredited by the Commission on Accreditation in Physical Therapy Education (<http://www.capteline.org/Home.aspx>) (CAPTE). Graduates who receive a Doctor of Physical Therapy degree are eligible to take the national physical therapy licensure examination, the Canadian licensure examination, and for active membership in the American Physical Therapy Association.

General Admission

Admission to this program is contingent upon admission to the Graduate School (p. 19) and completion of the pre-professional course component.

The Doctor of Physical Therapy (D.P.T.) is offered by this department at two levels of admission: entry level D.P.T. and transitional D.P.T. The entry level degree program is for individuals who are not now practicing physical therapists but are interested in becoming physical therapists. The transitional Doctor of Physical Therapy program is for individuals who are already licensed as a physical therapist in the United States or Canada and who wish to expand their knowledge and skills to be better prepared to work as a primary care provider and expert practitioner. These programs lead to the same degree but require different admissions criteria and the completion of different sets of core courses.

Entry-Level Program

Admission - Entry Level: A baccalaureate degree is not required for admission to the Doctor of Physical Therapy program. The requirements for consideration for admission vary, depending on whether the applicant will have an earned baccalaureate degree prior to enrollment but all applicants must meet requirements for admission to the Graduate School (p. 19). Starting in 2015, the Graduate Record Examination will be required.

Applicants who will not have a baccalaureate degree upon enrollment in the physical therapy program must successfully complete

1. a minimum of ninety credits,
2. all University General Education Requirements,
3. all physical therapy science prerequisite courses,
4. all physical therapy non-science prerequisite courses, and
5. an upper-level concentration to be considered for admission.

Applicants who will have completed a baccalaureate degree prior to enrollment in the physical therapy program must complete all physical therapy science prerequisite courses and all physical therapy non-science prerequisite courses. Additional information on program-specific prerequisites can be found in the Physical Therapy section of the Undergraduate Bulletin.

Admission to the entry-level Doctor of Physical Therapy (D.P.T.) professional program occurs on an annual basis with Physical Therapy courses beginning in the Fall Term. There are a limited number of spaces in the Physical Therapy program and admission is competitive. Completion of the admission requirements does not guarantee admission.

Transitional Program

An admissions moratorium has been approved this program, effective Winter 2019.

Admission to the transitional program requires that the applicant be a physical therapist who has graduated from an accredited Baccalaureate or Master's Physical Therapy Program and is currently licensed in the United States or Canada. Letters of recommendation and a personal statement are also required.

Degree Requirements - Entry-Level Program

The Doctor of Physical Therapy degree requires a minimum of 124 credits, including all courses in the core curriculum listed below.

Consistent with Graduate School policy, the grading system for graduate students is 'intended to reflect a higher standard of critical and creative scholarship than those applied at the undergraduate level.' Continuing students are required to earn a minimum of a 3.00 g.p.a. to satisfy degree requirements. A graduate student who receives a 'C' grade in any course is expected to complete remedial work to demonstrate competency in the course requirements that may include repetition of the course the next time it is offered. Receiving more than two 'C' grades, or five grades below a B (3.0), in the curriculum is considered unsatisfactory progress and achievement, and will result in dismissal from the professional program. Students may also be dismissed from the program for unsatisfactory clinical performance or for unsatisfactory professional behavior.

All course work must be completed in accordance with the academic procedures of the Graduate School (p. 12) governing graduate scholarship and degrees and the College of Pharmacy and Health Sciences (p. 293). In addition, the criteria for academic performance given in the Physical Therapy Student Handbook should be followed. The Physical Therapy Student Handbook, provided by this program, also contains policy statements that may pertain to admission, candidacy, and degree requirements which students should consult.

The core curriculum is subject to change without prior notice in response to the changing health care environment and accreditation standards.

Core Curriculum (Entry-Level Program)

Code	Title	Credits
PT 5010	Clinical Applications I	1
PT 5020	Foundations of Physical Therapy	2
PT 5030	Basic Patient Care in Physical Therapy	2
PT 5070	Clinical Applications II	2
PT 5100	Therapeutic Exercise I	3

PT 8300	Differential Diagnosis for Health Sciences	3
PT 8400	Diagnostic Procedures for Health Sciences	2
PT 8500	Clinical Decision Making	3
PT 8600	Health Promotion and Wellness	2
PT 8800	Clinical Education III	4
PT 8820	Clinical Education IV	8
Total Credits		124

PT 8850	Clinical Practicum	3
Total Credits		23

Health and Liability Insurance

Clinical Education is provided throughout the professional program along with didactic courses. The final twenty-eight weeks of the program are spent in two assignments in selected clinical facilities throughout the metropolitan Detroit area, Michigan and other parts of the country. Patient care involves inherent risk of exposure to potential diseases, particularly blood borne pathogens, and the risk of possible mishaps in patient care. Therefore, all students are required to maintain health insurance coverage and this must be in effect prior to and during the professional program. Liability insurance is rolled into course fees associated with clinical education. The student is responsible for the cost of health insurance and all other costs (such as travel, meals, living expenses) associated with the clinical education portion of the program.

Physician Assistant Studies (M.S.)

Office: 2590 CPHS; 313-577-1368
Program Director: John McGinnity

<http://www.pa.cphs.wayne.edu/>

A physician assistant (PA) is a health care provider who is nationally certified and is found in every medical specialty and setting. PAs manage the full scope of patient care, often handling patients with complex medical problems. PAs conduct physical exams, assist in surgery, diagnose and treat illness, order and interpret tests, counsel on preventative health care, and prescribe medications. The role may also include educational, research, and administrative activities as well as clinical responsibilities. PAs are critical members of the health care team, collaborating with physicians and all team members to improve patient outcomes.

Admission Requirements

Admission to this program is conducted through applications submitted to the Centralized Application Service for PAs (CASPA) (<http://www.caspaonline.org>) and is contingent upon admission to the Graduate School (p. 19). Applicants must have a bachelor's degree from an accredited college or university. In addition, students must:

1. have a minimum cumulative and prerequisite undergraduate grade point average of 3.0;
2. complete the general test of the Graduate Record Examination by July 31;
3. submit three letters of recommendation, one from a work supervisor and preferably one from a physician assistant;
4. submit an essay expressing your motivation to become a PA;
5. have a minimum of 500 hours (within last two years) of direct, "hands-on" patient care experience in a health-service environment by September 1 of application deadline;
6. non-native English speakers must complete the TOEFL.

Please consult the WSU PAS program (<http://www.pa.cphs.wayne.edu>) for a complete list of admission criteria.

Admission Interview: Admission to the program is competitive. All those admitted to the WSU PAS program have satisfied all requirements listed above and have successfully completed a personal interview. Interviews are offered to the most competitive candidates however not all candidates that meet the minimum requirements are offered an interview.

Degree Requirements - Transitional Program

An admissions moratorium has been approved this program, effective Winter 2019.

Students in this program are required to complete eight core courses if the student already possesses a Master of Physical Therapy degree. For individuals not possessing a Master of Physical Therapy degree, the applicant's educational and professional qualifications will be reviewed and an individual plan of work will be designed to provide sufficient preparation for the transitional D.P.T. curriculum.

The Physical Therapy Student Handbook, provided by this department, also contains policy statements that may pertain to admission, candidacy, and degree requirements. Students pursuing the D.P.T. should consult this handbook for the current statements on these policies.

The core curriculum is subject to change without prior notice in response to the changing health care and education environment.

Core Curriculum (Transitional Program)

Code	Title	Credits
PT 6300	Research I: Critical Thinking	2
PT 6400	Teaching and Learning in Health Care	3
PT 6700	Motor Learning and Motor Control	3
PT 7990	Directed Study	3
PT 8170	Professional Development and Reflective Practice	3
PT 8300	Differential Diagnosis for Health Sciences	3
PT 8400	Diagnostic Procedures for Health Sciences	3

Program Deadlines: All prerequisite coursework must be completed by September 1 of the year prior to the start of the program. Applicants must submit two separate applications:

1. one to the WSU Graduate School and
2. one through the CASPA website.

General Information Meetings are held at the Eugene Applebaum College of Pharmacy and Health Sciences the first Tuesday of each month at 6:00 p.m. at the College. Visit the program website (<http://cphs.wayne.edu/meetings.php>) for details.

Prerequisite Study

In addition, the following coursework must have been successfully completed with a grade of "B" (3.0) or higher in order to be considered for admission:

- Anatomy¹: one course
- Human Physiology¹: one course
- Upper Level Physiology¹: one course (must be human based & at 3000 level or above)
- Microbiology¹: with laboratory, one course
- Nutrition: one course, general human/clinical nutrition
- Chemistry¹: two courses required (one course must be inorganic/general and second course must be organic chemistry or biochemistry)
- Developmental psychology: one course
- Basic statistics: one course
- English composition: two courses
- Medical terminology, one course

¹ Must be completed within the six years prior to the date of application to this degree program:

The Master of Science in Physician Assistant Studies is offered under a Plan C option, requiring successful completion of fifty-four credits in course work over two years or six semesters. All course work must be completed in accordance with the academic procedures of the Graduate School (p. 12) governing graduate scholarship and degrees and the College of Pharmacy and Health Sciences (p. 293), respectively, and in accordance with the Physician Assistant Studies Program Student Policy and Information Manual. A grade of 'C' in any graduate course is unacceptable.

First Year		Credits
Spring/Summer Semester		
PAS 7000	Anatomy for Physician Assistants I	2
PAS 7001	Anatomy for Physician Assistants II	1
PAS 7010	Clinical Medicine I	3

PAS 8070	Preceptorship	2
Credits		8
Total		54
Credits		

Note: The sequencing of clinical year two rotation is illustrative of a typical student schedule but may vary in individual cases.

Pharmaceutical Sciences

Office: 3610 CPHS; 313-577-1047
Chairperson: George B. Corcoran

<http://www.cphs.wayne.edu/psc/index.php>

The pharmaceutical sciences encompass the traditional disciplines of medicinal or pharmaceutical chemistry, pharmaceuticals and pharmacology/toxicology. Medicinal chemistry is primarily devoted to the discovery and development of new compounds which may be of value in the diagnosis and treatment of disease. Included are applications of organic chemistry, natural product chemistry, biochemistry, pharmacology and the relationships among chemical structure, physical properties and biological activity. Pharmaceutics is concerned with the conception, design, production, characterization, and evaluation of drug delivery systems *in vitro* and *in vivo*. Pharmaceutics includes physical, chemical, biological, microbiological and engineering studies related to the design of drug delivery systems. Pharmacology/toxicology deals with the principles and mechanisms of drug action on biological systems and the toxicological aspects of drugs and other substances.

Applicants with a strong background in the behavioral, biological, pharmacy and/or the physical sciences are excellent candidates for graduate work in this department. Study within this department is heavy focused on an interdisciplinary approach and the curriculum involves a single major with specializations rather than separate majors. This leads to greater flexibility in designing individualized programs geared to the applicant's preparation and interests.

- Pharmaceutical Sciences (M.S.) (p. 305)
- Pharmaceutical Sciences (Ph.D.) (p. 306)

Pharmaceutical Sciences (M.S.) Admission Requirements

Admission to this program is contingent upon admission to the Graduate School (p. 19). For the master's degree program, with a major in pharmaceutical sciences, the following criteria must also be satisfied:

The General portion of the Graduate Record Examination is required of all applicants. There are no minimum GRE scores required for admissions; however, applicants scoring below 150 on the quantitative portion of the exam are generally not admitted.

Applicants whose native language is other than English must demonstrate proficiency in English (p. 19) prior to beginning the program.

In addition to the regular University application, the applicant must also submit the following:

1. A general statement (300-400 words, typewritten) of reasons for selecting the program, including a resume, career objectives, possible research interests, and a list of faculty members that the applicant is interested in working with for their thesis.
2. Three letters of recommendation.

If an applicant's undergraduate preparation is considered deficient for advanced work in the pharmaceutical sciences, additional work may be required at the undergraduate level. All prerequisite credits must be earned prior to or concurrent with the first graduate credits.

The Master of Science with a major in Pharmaceutical Sciences is offered only as a Plan A master's program requiring thirty credits, including an eight-credit thesis.

Courses required will vary with the student's previous preparation and the area of specialization. These courses will be determined by the student's graduate advisor, with review and approval by the College Graduate Officer as formalized by the Plan of Work. In addition to individualized

courses, all Master of Science students are required to complete four core interdisciplinary courses:

Code	Title	Credits
PSC 6800	Introduction to Research	2
PSC 7010	Advanced Drug Action and Safety I	3
PSC 7020	Advanced Drug Discovery I	3
PSC 7040	Advanced Drug Formulation and Delivery I	3

All students in the Graduate Program are required to attend Departmental Seminars (PSC 7850, each semester). Each Master's degree student must present one regular Departmental seminar on their final research project. In addition, all Master's students will register for one credit of Introduction to Seminar, PSC 7860, in the Spring/Summer semester of their first year and provide a seminar of thirty minutes in length describing a research experience during their first year. To qualify for the degree, all courses specified on the Plan of Work must be satisfactorily completed with a cumulative grade point average of at least 3.0. In addition, a final oral examination of the thesis is required of all candidates.

Selection of Advisor: The Graduate Officer will serve as temporary advisor to the applicant during the first semester. During this semester, the applicant will conduct three research rotations in the laboratory of selected Faculty. Students are encouraged to meet with all graduate faculty in the specialty and discuss their research interests. At the end of the first semester, all Master's students must choose an advisor and obtain his/her consent to direct the student's research. This advisor will then sign the student's program requests, Plan of Work and other necessary forms. If a student fails to find an advisor, the Graduate Officer may provide the student with an additional research rotation. Failure to find a research advisor could result in removal from the program.

Candidacy: Applicants apply to the College Graduate Officer to become degree candidates by filing a Plan of Work, approved by their advisor, prior to the completion of twelve graduate credits in the program. To qualify, applicants must exhibit satisfactory scholarship (graduate grade point average of 3.0 or above), have completed any prerequisite and/or corequisite courses specified at the time of admission and have regular admission status. Applicants who have not been advanced to candidacy by the time twelve graduate credits have been completed may be denied further registration in the program.

Academic Progress: All students are required to complete a comprehensive Capstone exam after the successful completion of all required courses. In addition, at the conclusion of the Fall and Winter semesters, progress of every student in the program will be reviewed by the departmental Graduate Program Committee. Each student is evaluated in terms of performance in course work, research progress, fulfillment of University requirements for filing a Plan of Work, and overall professional development. The evaluation at the conclusion of the winter semester includes a written assessment by the faculty advisor of the student's strengths and weaknesses, as well as an indication of how any deficiencies will be addressed. All course work must be completed in accordance with the academic procedures of the Graduate School (p. 12) governing graduate scholarship and degrees and the College of Pharmacy and Health Sciences (p. 293).

A student will be placed on probation for any of the following reasons;

1. Qualified admission status at the time of matriculation;
2. Receipt of a grade lower than 'B' in any departmental course;
3. Notification from the advisor and/or thesis committee that the student is not making adequate progress in his/her research.

- Inappropriate, unprofessional and unsafe conduct as determined by the Graduate Program Committee.

(Doctoral Dissertation Research and Direction I, II, III, and IV, respectively), in consecutive academic year semesters.

The student will be informed in writing, at the time of being placed on probation, of the requirements for removal from probationary status. The decision to place a student on probation rests with the Graduate Program Committee.

Selection of Advisor: Doctoral students either select an advisor after rotating in three labs or are directly placed under the supervision of an advisor.

A student may be dismissed from the program for the following reasons:

- Failure to comply with requirements set by the Graduate Program committee;
- Receipt of two or more grades below 'B' in any single semester;
- Unauthorized leave of absence;
- Inability to find a research advisor;
- Receipt of a grade less than B while on probation.

Seminar Presentation: All Ph.D. students will register for PSC 7850 each semester they are in the program. In total, all PhD students must present three seminars not including their defense seminar. Students register for one credit of Introduction to Seminar, PSC 7860, in the Spring/Summer semester of their first year and provide a seminar of thirty minutes in length describing a research experience during their first year. After the first academic year, all Ph.D. students will register for one credit of PSC 7870, Second Year Seminar (Winter semester) and PSC 7880, Third Year Seminar (Fall). For PSC 7870, the seminar shall be on a topic not directly related to the student's dissertation work. The topic will be selected by the student in concert with his/her research advisor and must be approved by that semester's seminar coordinator not less than two weeks prior to the scheduled seminar. Furthermore, the student must make available to the Department a two-page outline or summary of the seminar, including pertinent references. The outline/summary must be approved by the semester's seminar coordinator, who will deliver it to the Department faculty, students, and staff by email not less than one week prior to the seminar. Failure to comply with this requirement shall result in a lowering of the student's seminar grade by one full mark. PSC 7880 will take place after the student has obtained Candidacy and will be on their dissertation research.

Leave of Absence: A leave of absence is defined as an absence from the graduate program for one or more semesters and is only permitted for extenuating personal or medical reasons. Students who are granted a leave of absence may be required to do remedial work, depending on the length of absence from the program.

Students who have not registered for two or more consecutive semesters will be placed on inactive status and must obtain the permission of the Department Graduate Program Committee and the College Graduate Officer before registering again.

Academic Progress: All students are required to complete a comprehensive Capstone exam after the successful completion of all required courses. In addition, at the conclusion of the Fall and Winter semesters, progress of every student in the program will be reviewed by the departmental Graduate Program Committee. Each student is evaluated in terms of performance in course work, research progress, fulfillment of University requirements for filing a Plan of Work, and overall professional development. The evaluation at the conclusion of the winter semester includes a written assessment by the faculty advisor of the student's strengths and weaknesses, as well as an indication of how any deficiencies will be addressed. All course work must be completed in accordance with the academic procedures of the Graduate School (p. 12) governing graduate scholarship and degrees and the College of Pharmacy and Health Sciences (p. 293).

Pharmaceutical Sciences (Ph.D.)

Admission Requirements

Admission: In addition to the requirements of the Graduate School (p. 19), the applicant should present a bachelor's or master's degree with a major in the behavioral, biological, pharmaceutical or physical sciences.

The General portion of the Graduate Record Examination is required of all applicants. There are no minimum GRE scores required for admissions; however, applicants scoring below 150 on the quantitative portion of the exam are generally not admitted.

Applicants whose native language is other than English must demonstrate proficiency in English (p. 19) prior to beginning the program.

In addition to the regular University application, the applicant must also submit the following.

- A general statement (300-400 words, typewritten) of reasons for selecting the program, including a resume, career objectives, possible research interests and a list of faculty members that the applicant is interested in working with for their dissertation.
- Three letters of recommendation.

Candidates for the doctoral degree must complete ninety credits beyond the baccalaureate degree, in compliance with the academic procedures of the Graduate School's requirements for doctoral degrees (p.). All PhD students are required to complete four core interdisciplinary courses:

Code	Title	Credits
PSC 6800	Introduction to Research	2
PSC 7010	Advanced Drug Action and Safety I	3
PSC 7020	Advanced Drug Discovery I	3
PSC 7040	Advanced Drug Formulation and Delivery I	3

The thirty-credit dissertation registration requirement is fulfilled by registering for the courses PSC 9991, PSC 9992, PSC 9993, and PSC 9994

A student will be placed on probation for any of the following reasons;

- Qualified admission status at the time of matriculation;
- Receipt of a grade lower than 'B' in any departmental course;
- Notification from the advisor and/or thesis committee that the student is not making adequate progress in his/her research.
- Inappropriate, unprofessional and unsafe conduct as determined by the Graduate Program Committee.

The student will be informed in writing, at the time of being placed on probation, of the requirements for removal from probationary status. The decision to place a student on probation rests with the Graduate Program Committee.

A student may be dismissed from the program for the following reasons:

- Failure to comply with requirements set by the Graduate Program committee;
- Receipt of two or more grades below 'B' in any single semester;
- Unauthorized leave of absence;

4. Inability to find a research advisor;
5. Receipt of a grade less than B while on probation.

Leave of Absence: A leave of absence is defined as an absence from the graduate program for one or more semesters and is only permitted for extenuating personal or medical reasons. Students who are granted a leave of absence may be required to do remedial work, depending on the length of absence from the program.

Students who have not registered for two or more consecutive semesters will be placed on inactive status and must obtain the permission of the Department Graduate Program Committee and the College Graduate Officer before registering again.

Pharmacy Practice

Office: 2152 CPHS; 313-577-0115
 Chairperson: Lynette R. Moser, Interim
<http://www.cphs.wayne.edu/practice/index.php>

The Profession of Pharmacy

Expanded opportunities for pharmacists in patient care roles and therapeutic decision-making have evolved during the past three decades. The traditional role in drug distribution has increasingly expanded to incorporate the concept of comprehensive medication management, a philosophy which gives pharmacists the responsibility for assuring drug therapy that achieves defined outcomes and improves a patient's quality of life. Pharmacists in contemporary practice are trained and expected to work collaboratively with the patient and the patient's other health care providers to assure that drug therapy is safe and effective.

The ability of the pharmacist to play an active role in drug therapy is recognized at both the state and national levels. In recent years, several states have passed legislation that allows pharmacists to initiate or modify drug therapy, through collaboration with a physician or through independent authority. In Michigan, pharmacists may prescribe under the delegated authority of a licensed physician.

Pharmacist Licensure

The graduate of the four-year Pharm.D. curriculum earns the degree Doctor of Pharmacy and is eligible for the NAPLEX examination to obtain licensure as a pharmacist. Licensure, either by examination or reciprocity, is available in all states and the District of Columbia.

Internship is a professional and practical experience under the supervision of a preceptor in a pharmacy approved by the Michigan State Board of Pharmacy, beginning after the student has been licensed by the Board of Pharmacy as an intern. Students must obtain a Michigan Internship License when they begin the professional curriculum of the College.

For additional information regarding internship, examination, or licensure in Michigan, write:

Michigan Department of Licensing and Regulatory Affairs
 Ottawa Building
 611 W. Ottawa
 P.O. Box 30004
 Lansing, MI 48909

- Pharmacy (Pharm.D. Research Scholars) (p. 310)

Pharmacy (Pharm.D.)

The College offers to qualified applicants a professional program leading to the Doctor of Pharmacy (Pharm.D.). The Doctor of Pharmacy program develops a highly qualified expert in pharmacotherapy who is prepared to provide professional leadership in the practice of pharmacy.

Admission: Students are admitted to the Doctor of Pharmacy program for the fall semester only. Enrollment is limited to applicants who have met the general requirements for admission to the University by the stipulated deadline and present evidence of professional admissibility and promise of academic and professional competence in pharmacy.

The applicant must have completed (or be pursuing completion of) pre-professional core courses at the undergraduate level, with a grade point average of 3.00 or better, and demonstrated competency in computer literacy, critical thinking, and oral communication.

For complete information on admission, and pre-professional and professional undergraduate program requirements, consult the Wayne State University Undergraduate Bulletin.

Application: Deadline for submission of all application materials is November 1 each year. The Doctor of Pharmacy Program participates in the Early Decision program. Applications are available through the Pharmacy College Application Service (<http://www.pharmCAS.org>). A competitive score on the Pharmacy College Admissions Test (PCAT) is also required. Only candidates who have completed all prerequisites by the end of the winter term preceding the fall term of prospective admission, are considered for admission.

Admission Requirements

Admission to the Doctor of Pharmacy program is competitive and the following criteria are used to evaluate applications from prospective students. Admissions decisions are made by the Admissions Committee. The committee evaluates all factors, including interview evaluation. Admission granted to students while they are in the pre-professional program will be contingent upon their completion of that program with grade point averages as indicated below.

1. Minimum core grade point average of 3.00 (on a four-point system), calculated on the final grades earned in the required pre-professional courses. Completion of prerequisites with minimum grades does not guarantee admission.
2. Minimum undergraduate grade point average of 2.75 (on a four point system).
3. Promise of success in a professional curriculum. Transcripts are evaluated for evidence of continued success in a full-time, science-based curriculum. Patterns of course repetition and excessive withdrawals are considered. It is recommended that applicants repeat not more than two mathematics and science courses in order to improve grades.
4. All applicants must take the Pharmacy College Admissions Test (PCAT). The PCAT must be taken no later than the year prior to admission. Applicants are preferred to have a minimum composite PCAT percentile score of 50. Applicants with a score lower than 50th percentile will be considered for admission only if their prerequisite GPA is greater than or equal to 3.2. Scores on the individual components of the PCAT examination will be reviewed by the Admissions Committee.
5. All applicants must complete the Wayne State University English Proficiency Requirement during the winter semester prior to fall

admission. Applicants not enrolled at Wayne State University may arrange for out-state testing to satisfy this requirement at their present educational institution; for information, call the Testing and Evaluation Office: 313-577-3400.

6. A personal interview is required.
7. Nonacademic factors including work experience, community service and leadership abilities will be evaluated.
8. A criminal background check is performed on all accepted applicants and is evaluated prior to an applicant matriculating into the program.

The Doctor of Pharmacy requires a minimum of 124 credits in the professional program. All course work must be completed in accordance with the academic procedures of the Graduate School (p. 12) governing graduate scholarship and degrees and the College of Pharmacy and Health Sciences (p. 293).

A student must complete all curriculum and program requirements, remove any marks of 'I' or 'Y', and be recommended for the degree. The student must complete the required minimum number of credits, elect courses in the proper sequence in the curriculum shown below, and meet all course prerequisites and corequisites, unless excused from doing so by the Dean.

A graduate of the following four-year professional curriculum earns a Doctor of Pharmacy (Pharm.D.) and is eligible for the NAPLEX exam leading to licensure as a pharmacist. Students should also note that they may apply for a Bachelor of Health Sciences with a concentration in Pharmaceutical Sciences after completion of their first year of the Pharm.D. program. Students are eligible once they have completed a minimum of 120 credits, including all university general education requirements, professional courses in the P1 year, and any electives needed to reach that 120 credit minimum. The B.H.S. degree will allow students the opportunity to enter other fields of advanced study which require a baccalaureate degree, but granting of the B.H.S. degree does not qualify for licensure; application for licensure will occur after completion of the Pharm.D. degree.

Pharm.D. Professional Curriculum - Without Concentration

First Year		Credits
Fall Semester		
PHA 4105	Pathophysiology 1	3
PHA 4125	Drug Literature Evaluation and Foundations of Research	3
PSC 4115	Pharmaceutics I	3
PSC 4125	Introduction to Pharmaceut Sciences: Medicinal Chemistry / Pharmacology Immunology	3
PPR 4115	Social Administrative Sciences and Professional Development I	2
Credits		14

Winter Semester		
PHA 4205	Pathophysiology II	2
PHA 4225	Principles of Pharmacoth I: Respiratory, Gastroenter, Allergy, Ophthalmolc	4
PHA 4235	Pharmacotherapeutic Problem Solving I: Respiratory, Gastroenterology, Allergy, Ophthalmology	2
PSC 4215	Pharmaceut II	2
PSC 4225	Autonomic Pharmacology	2
PPR 4245	Patient Care Lab 1	1
PPR 4255	Social Administrative Sciences and Professional Development II	2
Credits		15
Spring Semester		
PPR 4315	Pharmacy Jurisprudence	2
PPR 4365	Introductory Pharmacy Practice Experience I	1
Credits		3

Second Year		
Fall Semester		
PHA 5115	Principles of Pharmacoth II: Cardiology, Nephrology	5
PHA 5125	Principles of Pharmacotherapy III: Endocrinology, Gynecology, Urology	4
PHA 5135	Pharmacoth Problem Solving II :Nephrolog Cardiology, Endocrinolo Gynecology, Urology	2
PSC 5115	Pharmacokinetics	2

PPR 6235	Social Administrative Sciences and Professional Development V	2
PPR 6245	Pharmacy Ethics and Professional Responsibility	2
Professional Electives ¹		2-4
Credits		13-15

Fourth Year

Students are required to complete seven advanced practice rotations during the P-4 year.		
Spring/Summer, Fall, and Winter Semesters		
PPR 7410	Advanced Pharmacy Practice Inpatient/Acute Care	4

PPR 7420	Advanced Pharmacy Practice Ambulatory Care	4
PPR 7430	Advanced Pharmacy Practice Patient Care Core	4
PPR 7550	Advanced Pharmacy Practice Hospital	4
PPR 7560	Advanced Pharmacy Practice Community	4
Elective Adv. Pharm. Pract Patient Care or Non-Patient Care		4
Elective Adv. Pharm. Pract Patient Care or Non-Patient Care		4
	Credits	28
	Total Credits	126-130

¹ A total of 6 credits of professional electives must be taken between the start of the Second Year Winter Semester and completion of the Third Year Winter Semester; only Directed Study electives may be taken prior to the Spring/Summer of the Second Year. Students in the Research Scholars Track will fulfill the professional elective requirement with 4 credits of PHA 5195 (Research Scholars Elective) in addition to PHA 4395 Research Scholars: Research Development, subject to the provisions outlined in the Research Scholars Concentration.

² PPR 6165 and PPR 6175 are offered in both Fall and Winter terms; students will be assigned to one of these courses in the Fall and the other in the Winter.

Pharm.D. Practice Experiences

To provide the pharmacy student with education in the application of knowledge he/she has gained in courses in the curriculum, pharmacy practice experiences are scheduled throughout the Pharm.D. program. Pharmacy practice experiences give the student the opportunity to apply his/her pharmaceutical education directly to patients in a variety of pharmacy settings: community, ambulatory, and institutional locations. Practice experiences are required of all students.

During the fourth professional year (P-4), required pharmacy practice experiences include General Community Practice, General Hospital Practice, Ambulatory Care, and Inpatient/Acute Care General Medicine. An additional experience involving patient care is also required. Students have two elective experiences which may be in patient care or non-patient care settings, such as pharmaceutical sciences or pharmacy practice research, managed care, pharmacy organizations, institutional or community management, or pharmaceutical management.

Requirements: Before students are scheduled to visit practice environments, they must provide health clearance documentation, proof of professional liability insurance, personal medical insurance, and Basic Cardiac Life Support certification; and sign a travel waiver. Students provide their own transportation to practice sites. A criminal background check may also be required by a practice site before a student can visit that site. Additional information on practice experience requirements and when they are required may be obtained from the College. These change regularly. The most recent requirements can be found on the website (<http://www.cphs.wayne.edu/pharmd/resources.php>).

Pharmacy (Pharm.D. Research Scholars)

The College offers to qualified applicants a professional program leading to the Doctor of Pharmacy (Pharm.D.). The Doctor of Pharmacy program develops a highly qualified expert in pharmacotherapy who is prepared to provide professional leadership in the practice of pharmacy.

Admission: Students are admitted to the Doctor of Pharmacy program for the fall semester only. Enrollment is limited to applicants who have met the general requirements for admission to the University by the stipulated deadline and present evidence of professional admissibility and promise of academic and professional competence in pharmacy.

The applicant must have completed (or be pursuing completion of) pre-professional core courses at the undergraduate level, with a grade point average of 3.00 or better, and demonstrated competency in computer literacy, critical thinking, and oral communication.

For complete information on admission, and pre-professional and professional undergraduate program requirements, consult the Wayne State University Undergraduate Bulletin.

Application: Deadline for submission of all application materials is November 1 each year. The Doctor of Pharmacy Program participates in the Early Decision program. Applications are available through the Pharmacy College Application Service (<http://www.pharmCAS.org>) (PharmCAS). A competitive score on the Pharmacy College Admissions Test (PCAT) is also required. Only candidates who have completed all prerequisites by the end of the winter term preceding the fall term of prospective admission, are considered for admission.

Admission Requirements

Admission to the Doctor of Pharmacy program is competitive and the following criteria are used to evaluate applications from prospective students. Admissions decisions are made by the Admissions Committee. The committee evaluates all factors, including interview evaluation. Admission granted to students while they are in the pre-professional program will be contingent upon their completion of that program with grade point averages as indicated below.

1. Minimum core grade point average of 3.00 (on a four-point system), calculated on the final grades earned in the required pre-professional courses. Completion of prerequisites with minimum grades does not guarantee admission.
2. Minimum undergraduate grade point average of 2.75 (on a four point system).
3. Promise of success in a professional curriculum. Transcripts are evaluated for evidence of continued success in a full-time, science-based curriculum. Patterns of course repetition and excessive withdrawals are considered. It is recommended that applicants repeat not more than two mathematics and science courses in order to improve grades.
4. All applicants must take the Pharmacy College Admissions Test (PCAT). The PCAT must be taken no later than the year prior to admission. Applicants are preferred to have a minimum composite PCAT percentile score of 50. Applicants with a score lower than 50th percentile will be considered for admission only if their prerequisite GPA is greater than or equal to 3.2. Scores on the individual components of the PCAT examination will be reviewed by the Admissions Committee.
5. All applicants must complete the Wayne State University English Proficiency Requirement during the winter semester prior to fall admission. Applicants not enrolled at Wayne State University may

arrange for out-state testing to satisfy this requirement at their present educational institution; for information, call the Testing and Evaluation Office: 313-577-3400.

6. A personal interview is required.
7. Nonacademic factors including work experience, community service and leadership abilities will be evaluated.
8. A criminal background check is performed on all accepted applicants and is evaluated prior to an applicant matriculating into the program.

Admissions Requirements to the Research and Scholars Concentration

Pharm.D. students admitted to the WSU Doctor of Pharmacy program are eligible to apply to the Research Scholars Program by January 15th of their P1 year only. Application requirements include:

1. A grade of "B" or better in PHA 4125 Drug Literature and Foundations of Research Course.
2. A cumulative undergraduate G.P.A. of 3.0 or higher at end of fall semester in the P1 year.
3. A minimum composite score at the 75th percentile on the PCAT, with minimum PCAT component scores at the 75th percentile in the chemistry, quantitative and biology sections. The PCAT requirement can be waived by the Research Scholars admissions committee. (As an exception for the 2016 entering class, the PCAT requirement is waived for HealthProStart students who were not required to take PCAT for admission to the PharmD program.)
4. Submission of an essay describing interests, career goals, and any past research experiences. Additionally, a resume or curriculum vitae should be included with the application.

Pharm.D. Professional Curriculum with Research Scholars Concentration

The Research Scholars concentration is offered to students who desire to complete a focus aimed at the development of research related knowledge and skills. There are a limited number of seats available and interested students must apply and be accepted to take this Concentration. Students are selectively offered a position in the Research Scholars Concentration and complete a longitudinal research project as part of that concentration. This program requires completion of PHA 4395 Research Scholars: Research and Development. In subsequent semesters, 4 credit hours of Research Scholars elective (PHA 5195) must be taken between Winter P2 and Winter P3 year, as agreed upon by the faculty research mentor and Research Scholars Program Director. Students in the Research Scholars Concentration will take a special section of the Pharmacy Seminar (PSC 6285) Students electing to and being accepted into this concentration must also complete 1 additional mandatory research focused Advanced Pharmacy Practice Experience (PPR 7195) for 4 credit hours in the place of an elective Advanced Pharmacy Practice Experience offering.

SCHOOL OF SOCIAL WORK

Dean: Sheryl Kubiak

The mission of the School of Social Work at Wayne State University is to transmit, develop, critically examine, and apply knowledge to advance social work practice and social welfare policy for the promotion of social, cultural and economic justice for poor, vulnerable, and oppressed population groups and for society as a whole. This mission is accomplished in a learning environment designed to prepare ethical and competent social work practitioners, in primarily urban settings, for social work practice, for conducting research with particular relevance to urban populations; and for innovative leadership and service to the urban community and the social work profession. Both faculty and students serve the community by participating in professional organizations, civic and community groups, and human service organizations.

The School of Social Work is an integral part of Wayne State University, an urban university in a culturally diverse, industrialized, metropolitan area. The School demonstrates its commitment to addressing the problems of people living in this environment through its teaching, research, and service activities. Through applied research, work in the classroom and placements in human service organizations that are the sites for field education, students learn how to provide effective social services and to influence social policies.

The School prepares professionals to help alleviate the conditions of those affected by poverty, racism, sexism, ageism, homophobia, unemployment, or mental health challenges and physical and/or developmental impairments. Students learn evidence-based methods of intervention with individuals, families, groups, communities, and organizations. Doctoral students learn the advanced research competencies required to engage in applied research for social work practice and social welfare policy. In synchrony with its emphasis on serving people in the Detroit metropolitan area, the School shares with the University a commitment to recruit students of minority ethnic backgrounds.

Accreditation

The undergraduate program leading to the Bachelor of Social Work and the graduate program leading to the Master of Social Work are accredited by the Council on Social Work Education, the authorized national accrediting body for social work education. There is no accreditation process for doctoral programs in social work. However, the School is a member of the Group for the Advancement of Doctoral Education in Social Work, the professional body that provides guidelines and oversight for doctoral degree programs in this field.

Programs

The School of Social Work prepares students at the undergraduate and graduate levels for entry level generalist practice or advanced practice in the profession. Its principal programs lead to the Bachelor of Social Work, the Master of Social Work, and the Doctor of Philosophy degrees. The Bachelor of Social Work program prepares students for entry level generalist professional practice. The Master of Social Work degree program prepares graduates for advanced professional practice. This program includes concentrations in interpersonal practice and innovation in community, policy and leadership. The Doctor of Philosophy in Social Work prepares social work educators and scholars whose research on pressing urban problems will advance social work practice and social welfare policy. The Doctor of Philosophy degree program includes rigorous training in qualitative and quantitative research methods, advanced course work in social work as well as completion of a cognate

area in another discipline and mastery of specialized social work content areas.

Post-degree courses are available to graduates who have completed bachelor's and/or master's degrees. The School offers Dual Title and Graduate Certificate Programs, as well as special institutes and workshops for individuals employed in the field of social welfare and school social work. Continuing education in social work is also offered through the School's Continuing Education Program.

School Social Work Approval Program

Students enrolled in the program leading to the Master of Social Work degree may qualify concurrently for Department of Education temporary approval for social work positions in Michigan school districts. Specific information on approval requirements for students and M.S.W. graduates may be obtained from the Office of Admissions and Student Services, School of Social Work.

Information Meetings: The School holds informational meetings every two weeks to introduce its undergraduate and graduate programs. Informational meetings for the Ph.D. Program are held monthly during the fall semester of each academic year. Potential applicants are encouraged to attend one of these meetings prior to applying. Meeting schedules for the B.S.W. and M.S.W. programs may be obtained by calling the School's Office of Admissions and Student Services (313-577-4409). Meeting schedules for the Ph.D. Program may be obtained by calling the Ph.D. Program Office (313-577-4419). Meeting schedules for all programs are also posted on our website (<http://www.socialwork.wayne.edu>).

Graduate Degree Programs

- Social Work (M.S.W.) (p. 314)
- Social Work (Ph.D.) (p. 317)
- Social Work and Anthropology (SWAN Ph.D.) (p. 319)
- Social Work and Gerontology (Ph.D. Dual-Title) (p. 320)
- Social Work and Infant Mental Health (M.S.W. or Ph.D. Dual-Title) (p. 321)

Social Work (M.S.W.)

The School offers full-time and planned part-time study programs leading to the Master of Social Work. This program prepares graduates for advanced professional practice in social work. The full-time degree program consists of four semesters of study in which field work is concurrent with class work. Students spend two full days a week in the field and two days in classes for two consecutive years. With approval of the graduate officer, students in the second year may elect to have three full days a week in the field. Required classes in the full-time program may be offered in day, evening, and Saturday sessions. Web-based online courses are also offered.

The planned part-time program permits students to complete degree requirements over a three-year or a four-year period. Part-time study is open only to students who have been formally admitted to the program by the Admissions Director. Details of the several phases of class and field work involved in this program, as well as specific information on admissions requirements, may be obtained from the Office of Admissions and Student Services, School of Social Work.

Admission Requirements

Eligibility for admission requires a bachelor's degree from an accredited undergraduate program and an earned minimum G.P.A. of 3.0 or above. A G.P.A. of 2.75 to 2.9 may be considered based on program capacity and strength of application. Admissions applications are reviewed when

all required supporting materials have been received by the program. New students admitted into the foundation (core) year of the Master of Social Work program begin in the Fall term of each academic year. Applicants admitted into the advanced standing program begin in the summer semester of the academic year. All applicants are encouraged to submit applications as soon as possible as admissions will close once program capacity has been reached. Applications to the program may be submitted up to one year prior to the start of the beginning term of the selected program. Applicants are encouraged to apply and submit all application materials to the program by the priority processing date of October 1st. All application materials must be submitted by the admissions deadline of April 1st.

Applicants to the full-time or part-time program leading to the Master of Social Work must complete the online application (<http://www.gradadmissions.wayne.edu/apply.php>) and submit payment of the application fee. All application documents are submitted online. Official transcripts are to be submitted to the Office of Graduate Admissions, Wayne State University, directly from all previous college(s) or universities where college credits have been earned. A resume, personal interest statement, and three references are included in the online application documents to WSU. Applicants must

1. hold a four year baccalaureate degree from an accredited institution;
2. have completed thirty semester credits in academic work distributed in the social, behavioral, and biological sciences, and in English and the humanities;
3. show evidence of suitability and fitness for the profession and the ability to successfully undertake graduate professional education in social work.

Applications for admission to the School of Social Work for the Master of Social Work degree are given careful review in order to select those students best able to fulfill the requirements for professional social work education. The School reserves the right to make the final determination about all admissions decisions.

Admission to the Advanced Standing Program

An applicant for admission to the Master of Social Work program who holds a baccalaureate degree from an undergraduate social work program accredited by the Council on Social Work Education (or accredited by the Canadian Association of Schools of Social Work (CASSW)) may be admitted with advanced standing. The School reserves the right to make the final determination about all Advanced Standing Program admissions decisions.

Students admitted with advanced standing status are required to complete eight graduate credits toward the M.S.W. degree during the summer term following admission. In order to complete the degree program, thirty additional credits are required in the advanced year of the curriculum as prescribed within the student's selected concentration area. Students must complete the summer curriculum courses (see below) before enrolling in the advanced concentration area curriculum courses.

Code	Title	Credits
SW 7070	Bridge: Micro & Mezzo Practice and Theory	4
SW 7620	Bridge: Social Welfare Policy, Research and Macro Practice	4
Total Credits		8

Students may waive one or more of these summer courses by successfully completing a waiver exam. Successful completion of a

waiver exam will signify the course is waived without graduate credit thus freeing the student to take other courses to meet degree requirements. Contact the Office of Admissions and Student Services for information.

Students admitted with advanced standing may be permitted to complete the requirements for the Master of Social Work on a part-time basis. Students admitted to such a planned part-time program are required to complete eight graduate credits toward the M.S.W. during the summer term immediately following admission. The additional thirty credits may be completed in subsequent semesters. The School does not grant credit for life experience or previous work experience.

Transfer of Graduate Credits

Credits for professional social work courses earned at other graduate programs accredited by the Council on Social Work Education may be accepted toward the Master of Social Work degree. Students, however, must meet all of the specific course requirements or equivalencies in the program leading to the Master of Social Work at this school. A maximum of thirty credits may have been completed in another accredited school of social work. Transfer students must be in good standing in the school from which they transfer, must meet all other requirements of this school, earn a minimum of thirty credits at this school, and must be in residence during the final semester prior to graduation.

A maximum of nine graduate credits from the social work curriculum or from curricula closely related to social work earned in an accredited graduate program may be accepted toward the Master of Social Work if, in the judgment of the faculty, the credits are appropriate as elective credits in the social work curriculum.

Transfer credit must be of a 'B' grade or better and certified as graduate level credit on an official transcript. Courses approved for transfer from outside or within the University cannot have been applied as credit toward a prior degree. Extension credits earned at institutions outside the State of Michigan cannot be applied toward a graduate degree.

Transfer credits do not alter the residency policy and time limitations governing School of Social Work degrees. Students may petition for the transfer of graduate credit only after they have been admitted to the M.S.W. degree program.

Nondiscrimination Policies

The School is bound by and actively endorses University policies of nondiscrimination respecting all persons regardless of race, color, sex, national origin, religion, age, sexual orientation, marital status, or physical or mental disability, and which expressly forbid sexual harassment or discrimination in hiring. The School prohibits discrimination against individuals because of political orientation. Copies of School and University nondiscrimination policies (p. 63) may be obtained in the Office of the Dean.

Withdrawal from the M.S.W. Program

A student who has been admitted to the Master of Social Work program shall be considered to have withdrawn from the program if the student is not enrolled in a course and/or field work during any semester of a planned program of study within the framework of the plan which has been approved. In order to withdraw in good standing, either permanently or temporarily, students must formalize their withdrawal with the School of Social Work Office of Admissions and Student Services. Under certain circumstances, with approval from the M.S.W. Coordinator, a student may be granted a leave of absence from the school for up to one calendar year. Copies of procedures for withdrawal or leaves of absence may be obtained from the SSW Office of Admissions and Student Services.

Readmission

Students who had been enrolled in a planned program leading to the Master of Social Work, who have withdrawn from the program and who wish to be considered for readmission to complete degree requirements, must follow regular procedures for admission to the School. Generally, students are required to complete two continuous terms of field work; readmitted students who had previously completed one term of field work will be required to repeat this term, and may be required to enroll concurrently in a course or courses in social work practice methods. Students who have withdrawn and wish to be readmitted may be required to obtain an assessment of their physical or mental health (or both) from a health professional approved and/or selected by the School.

Admission to Non-Degree Study

Students may enroll in certain classes as pre-master's registrants and will be permitted to accumulate a maximum of nine credits in this status. Pre-master's students may not enroll in the field work courses and certain other courses in which specific prerequisites and/or corequisites preclude their registration. If the student is subsequently admitted to a program leading to the Master of Social Work, credits earned in a pre-master's classification may be applied toward the degree.

Applicants for pre-master's, non-degree study must hold a baccalaureate degree from a college or university of recognized standing and have completed a minimum of thirty semester credits of academic work distributed in the social and biological sciences and in the humanities.

Applicants must complete the online application (<http://www.gradadmissions.wayne.edu/apply.php>) indicating non-degree status in the School of Social Work and payment of application fee.

Students applying for pre-master's study in the School of Social Work who have already been admitted and registered in the Graduate School of Wayne State University should consult the School of Social Work Office of Admissions and Student Services regarding the procedure for a change of college and/or status.

Academic Regulations (M.S.W.)

For complete information regarding the academic rules and regulations of the University, students should consult the Academic Regulations (p. 12) section of this bulletin. The following additions and amendments pertain to the School of Social Work.

Students in the School of Social Work are responsible for informing themselves of all rules, regulations, and requirements, complying with all official policies and procedures, and fulfilling all course and degree requirements in proper sequence with satisfactory scholarship. The student should consult the Academic Services Officer or the M.S.W. Academic Advisor concerning any academic matter. Students should consult the Academic Services Officer or the M.S.W. Academic Advisor when developing a Plan of Work or selecting electives. The primary responsibility for counseling with the Academic Services Officer or Academic Advisor and for seeking information on policies, procedures, degree requirements, and all academic matters rests with the student.

The faculty of the School of Social Work has the responsibility to require a student to withdraw at any time prior to receipt of the degree when, in its judgment, the student fails to do satisfactory work. Such decisions may be based on deficiencies in performance in class or field or in personal fitness for the profession. The faculty has adopted a set of criteria and procedures for academic termination. Every effort is made to assist students whose work suffers as a result of conditions beyond their control such as personal illness, serious illness in the immediate family, or similar emergencies. The School's Policies and Procedures related to Academic Performance (Termination, Grade Appeals, and Reinstatement)

and Student Professional Performance Standards are available in the Office of the Dean and the Office of Admissions and Student Services.

Degree Application

Application for the degree must be filed no later than the end of the fourth week of classes in the semester in which student expects to complete the requirements for the degree.

Time Limitation

Students have a six-year time limit to complete requirements for the Master of Social Work.

Attendance

Students are expected to attend all sessions of courses for which they are registered and to notify the instructor or the instructor's secretary prior to the class session, if possible, when the student may be absent due to illness or similar emergency. Each instructor may specify an attendance policy in the course syllabus, and announce it at the beginning of a course. Consistent or extended absences may jeopardize the student's grade in the course and, possibly, the student's enrollment in the School.

Field Education

All students enrolled in SW 7998 and SW 8998, Field Work for Social Workers I and II, are required to carry professional liability insurance (now provided by the school) as a condition of field placement. The Field Education Manual contains a description of the field education program, and the policies and procedures related to the program. Students are responsible for observing the procedures governing field work practice which are detailed in the manual. The Field Education Manual is posted on the School's website (<http://www.socialwork.wayne.edu>) and may be downloaded and saved.

Field Education Health Clearance Policy

The School may require students in field placement to obtain assessments of their physical or mental health from health or mental health professionals approved by the School. The School of Social Work reserves the right to refuse to place or direct a student in field education if the physical or mental health status of the student indicates such action is warranted in order to safeguard clients, agencies, the student, other students, or the School.

MSW Curriculum

The Master of Social Work degree requires a minimum of sixty credits of graduate course work, completed in accordance with the regulations of the Graduate School (p. 12) and the School of Social Work. The program includes a foundation (core) curriculum at the first level, and at the second level, one of two concentrations: Interpersonal Practice or Innovation in Community, Policy and Leadership. The core curriculum provides the foundation for the advanced curriculum.

Foundation (Core) Curriculum

The foundation (core) curriculum provides a knowledge base for later study of advanced practice in the concentration. The core curriculum has content in the five major curricular areas: social work practice, human behavior and the social environment, social welfare policy and services, research, and field education. The core curriculum stresses fundamentals and knowledge of social work practice as they relate to individuals, families, small groups, organizations, and communities. In field education, theory is translated into practice and includes micro, mezzo and macro practice experiences.

Code	Title	Credits
SW 7040	Methods of Social Work Practice	3
SW 7055	Foundation Group Theory and Practice	3
SW 7065	Foundation Macro Theory and Practice	3
SW 7560	Human Behavior in the Social Environment I: Micro Theory	3
SW 7660	Human Behavior in the Social Environment II: Diversity in a Multicultural Society	3
SW 7720	Introduction to Social Welfare Policy in the United States	3
SW 7820	Research Methods in Social Work I	3
SW 7830	Research Methods in Social Work II	3
SW 7998	Concentration Field Work for Social Workers I	8
Total Credits		32

During the foundation (core) year, students declare their interest in an advanced curriculum concentration. Students must complete the core curriculum before enrolling in advanced curriculum courses. Students may waive one or more of these core courses by successfully completing a waiver exam. Successful completion of a waiver exam will signify the course is waived without graduate credit thus freeing the student to take other courses to meet degree requirements.

Advanced Curriculum

The advanced curriculum builds on the knowledge, values, and skills gained in the foundation (core) curriculum, with the objective of increasing the student's competence for dealing with greater complexities of social work practice by focusing on areas of social concern. This advanced portion of the M.S.W. program is designed to provide specific advanced knowledge and practice skills. Students choose one of two concentrations in the advanced year.

Students must meet the requirements for a concentration:

1. satisfactory completion of specific concentration courses in HBSE/Practice Methods;
2. satisfactory completion of a field education placement in the concentration for each of the semesters of the advanced curriculum.

OPTION I: Interpersonal Practice (IP):

This concentration offers students a particular theoretical orientation and clinical method from among three theory "tracks": Family Systems, Cognitive-Behavioral, and Psychodynamic. Each track has a corresponding integrative practice methods and human behavior course incorporating content on clinical method and technique, developmental issues, and psychosocial pathology, and each is offered over two consecutive terms. Students select field placements in areas of their special interest: among these choices: families at risk, child welfare, substance abuse services, schools, mental health, health care, and gerontology.

Code	Title	Credits
Integrative HBSE/Practice Methods courses (see advisor)		8
SW 8115	DSM in Clinical Social Work Practice	3
SW 8770	Advanced Policy Analysis	3
SW 8998	Concentration Field Work for Social Workers II	8-12
Additional Electives		6-8
Total Credits		28-34

OPTION II: Innovation in Community, Policy and Leadership (I-CPL):

This concentration contextualizes student learning into three streams of practice including developing and sustaining effective communities,

developing and sustaining effective policies and developing and sustaining effective organizations through leadership. I-CPL students will deepen their understanding of settings where this practice can take place through field placements which relate to urban social planning, community development, policy analysis and advocacy, program development and system coordination.

A full range of electives is offered to supplement the required sequence of courses in both advanced year concentrations, thus permitting students an opportunity to deepen and enrich their knowledge of particular areas of theory and practice.

Code	Title	Credits
Integrative HBSE/Practice Methods courses (see advisor)		4
Research Courses		3
SW 8998	Concentration Field Work for Social Workers II	8-12
Additional Electives		13-15
Total Credits		28-34

Social Work (Ph.D.)

The School offers full-time and part-time study programs leading to the Doctor of Philosophy (Ph.D.) degree. The doctoral curriculum is intended to provide social work educators with rigorous training in social work theory and research methodology to address contemporary issues associated with social work practice or social welfare policy at all levels. In addition, the doctoral program offers students the option of enrolling in a clinical scholarship concentration. The clinical scholarship concentration is designed to prepare graduates for important careers in clinical social work teaching, scholarship and research, as well as for leadership positions in the greater clinical social work community. A minimum of ninety credits beyond the foundation year of the M.S.W. are required for graduation.

Admission Requirements

All applicants must meet the admissions standards of the Graduate School (p. 19) and the School of Social Work. The doctoral degree in social work indicates not merely superior knowledge of the discipline but also intellectual initiative and the ability to design and conduct independent research and evaluation of social work practice and/or social welfare policy. Students in pre-candidacy will be evaluated on the basis of these attributes as well as on their grade-point performance. The doctoral program is open only to highly qualified students and all applications for admission to the program must have the approval of the School's Doctoral Steering Committee.

Doctoral Program Admission Requirements

In addition to the requirements for admission to the Graduate School, it is strongly preferred that candidates have:

1. **Grade Point Average:** A minimum undergraduate and graduate grade point average of 3.5 (on a 4.0 scale)
2. **Prior Degree:** An M.S.W. degree from a CSWE accredited institution. Applicants not having an M.S.W. must complete established requirements for the M.S.W. degree while working towards the Ph.D.
3. **Practice Experience:** Two years post B.S.W. or post M.S.W. social work practice experience
4. **Graduate Record Examination:** GRE scores (verbal, quantitative, and writing) taken within the three years prior to the application should be included in the application. Scores at or above the 50th percentile on the verbal, quantitative, and writing components of the GRE are preferred.

5. **English Proficiency:** International students must meet the English Proficiency requirements for Wayne State University. For more information, see <https://wayne.edu/admissions/international/english-proficiency/>.
6. **References:** Applicants should submit three professional references from former supervisors or instructors. At least two of these should be academic references from social work faculty, researchers and/or practitioners holding the Ph.D., J.D., or medical degree who can evaluate the applicant's scholarship and aptitude for research.
7. **Statement of Professional Goals:** Applicants should write a brief statement describing their motivation for doctoral study, career goals, research interests, and interest in research mentorship by specific doctoral program faculty. In order to determine a potential fit of research interests with faculty research programs, applicants are encouraged to view faculty interests on the School's website (<http://www.socialwork.wayne.edu>).
8. **Academic Scholarship:** Applicants should submit one example of scholarly writing (published or unpublished). The writing example should be first-authored or sole authored work that demonstrates the applicant's ability to critique, synthesize, and make conclusions about social work relevant issues or problems.
9. **Interviews:** Promising candidates for admission will be invited to complete an in-person interview with program faculty for final consideration after the above requirements have been completed.
10. **Applications:** Applicants must submit the School of Social Work Application for Admission to the online Graduate Application, specifying that they are applying for fall admission to the Social Work Ph.D. Program. Students are also required to specify a Ph.D. concentration (policy and practice or clinical scholarship)

Application Deadline: Completed application packets must be received by **December 18** prior to the fall term of desired admission.

Admission decisions are based upon all materials submitted and reflect careful consideration of the applicant's professional goals, research interests, and the resources of the School of Social Work.

Candidates for the Doctor of Philosophy must complete a minimum of ninety graduate credits beyond the core year of the M.S.W., thirty of which are earned through the dissertation. The thirty-credit dissertation registration requirement is fulfilled by registering for SW 9991, SW 9992, SW 9993 and SW 9994 (Doctoral Dissertation Research and Direction I, II, III, and IV, respectively) in consecutive academic year semesters upon attaining doctoral candidate status (see below). All course work must be completed in accordance with the academic procedures of the School of Social Work and the Graduate School (p. 12) governing graduate scholarship and degrees.

Plan of Work: Doctoral students structure their course work in terms of an area of specialization within the discipline of social work. Doctoral students, with the assistance of their academic advisor, plan a sequence of studies. A preliminary plan of work, approved by the academic advisor and the Ph.D. Program Director, should be filed by the end of the first month in the program. Petitions for the Transfer of Credits should be attached to the Plan of Work. The Plan of Work should be finalized with the Graduate School before the student earns 40 credits in the doctoral program. Students are responsible for discussing program requirements and course changes with the Director of the Doctoral Program prior to registration for each semester. Students who have not yet attained the MSW degree should also regularly communicate with their MSW advisors to ensure that they are meeting MSW program requirements. Students are required to notify the doctoral director and advisor(s) in writing of any requests for changes in their Plan of Work.

Annual Review: Student progress toward degree completion will be monitored annually by the Steering Committee and Director of the Doctoral Program.

Residency: The Ph.D. requirement of one year of residence is met by completion of six graduate credits in course work (not dissertation) over two successive semesters.

Candidacy: Admission to candidacy for the doctoral degree will usually require two years of full-time graduate study beyond the M.S.W. It is granted upon fulfillment of the following requirements:

1. Completion of School and Graduate School residence and course requirements.
2. Filing of an approved Plan of Work with the Graduate School.
3. Completion of all theory, research methods, and statistics requirements.
4. Completion of the qualifying examination.
5. Selection of the dissertation advisor and committee

Qualifying Examinations must be applied for following completion of all of the required social work courses in the doctoral curriculum. The Qualifying Examination requires of students to engage in critical analysis of the state of research, practice, and knowledge in their substantive and cognate areas, and for the reflective presentation of innovations in perspectives, theory, knowledge, and research design, methods and strategies that will advance social work practice and/or policy. By the end of the qualifying examination process students should be well grounded in their substantive areas of research and demonstrate an ethically sound, independent and original perspective regarding inquiry into social work practice. The subject of the Qualifying Examination is selected in consultation with the Doctoral Program Steering Committee.

Approval of Dissertation Prospectus: The candidate is required to prepare a Dissertation Prospectus and have it approved by their dissertation committee prior to beginning work on the dissertation. The Prospectus and Committee form must be submitted to and approved by the Graduate School.

Submission of Dissertation: The candidate is required to submit a doctoral dissertation on a topic satisfactory to his/her Dissertation Committee, designed to demonstrate proficiency in social work relevant research and scholarship, a capacity for ethical, independent, and creative research, and the ability to perfect and follow through on an appropriate research or evaluation design.

Dissertation Defense: Upon completion of the dissertation, the candidate is required to make a public presentation of his/her research. The Dissertation Public Lecture-Defense form must be completed by the candidate and the Dissertation Committee indicating readiness for public presentation of the candidate's research and dissertation. This form must be submitted to the Graduate School at least two weeks prior to the date of the defense. The Dissertation Public Lecture-Defense includes the public lecture and defense where the candidate presents the results of the dissertation research with the audience and the dissertation committee, a private meeting between the dissertation candidate and the committee, and the evaluation by the dissertation committee whereby it is determined whether the candidate has passed the dissertation defense. Upon completion of this process, the Dissertation Public Lecture-Defense form is returned to the Graduate School with the recommendations of the Dissertation Committee.

Time Limitations: Students have a seven year time limit to complete all requirements for the Ph.D. The seven-year period begins with the end of the semester during which the student is admitted to doctoral study and commences working toward meeting requirements for the degree.

Doctoral Program Curriculum

Social Work Transfer Courses: (up to twenty-three advanced year M.S.W. or post-M.S.W. certificate credits relevant to the student's proposed area of research) approved by the Director of the Doctoral Program.

Total Credits		49

Full-Time Program

Full-time students typically complete the degree requirements in four years. During the first two years of the program, students receive advanced training in social work theory, statistics and research methodology. Students in the research track also complete at least nine credits of coursework in a cognate discipline (e.g., psychology, sociology, education, health, gerontology) associated with their area of research. Students will complete their Comprehensive Qualifying Examination after they complete the relevant coursework. During the third and fourth years of the program, students will complete a one-credit Dissertation Seminar, any remaining elective courses and all of their dissertation credits.

Part-Time Program

The part-time study program is designed to permit students to complete degree requirements over an extended period of time. The part-time option makes it possible for students to work or engage in other activities during much of the time they are enrolled, and complete all degree requirements within a five-year period.

All required courses in social work and the student's cognate area are completed within the first three years of the program. In Year

three, students will take the Research Practicum (SW 9420) in the Fall Semester. Students will complete their Comprehensive Qualifying Examination after completing the relevant coursework. During the fourth and fifth years of the program, students will complete a one-credit Dissertation Seminar, any remaining elective courses and all of their dissertation credits.

Elective Coursework

In addition to the required coursework identified above, all students will be required to complete twenty-three credits in elective courses. Students may be eligible to transfer up to twenty-three M.S.W./post-M.S.W. credits of coursework. Courses that may be eligible for transfer include those taken during the Advanced Year of the M.S.W. program and/or post-master's certificate program that are relevant to the student's proposed area of research. Transfer credit must be approved by the Director of the Doctoral Program.

Social Work and Anthropology (SWAN Ph.D.)

The Social Work/Anthropology (SWAN) program draws on the strengths of both fields in theory, social history, research, policy and practice. The SWAN program combines the approaches of each discipline to make use of the program's urban location to foster scholarship focusing on global issues of the 21st century, such as the re-invention of post-industrial cities. Students receive a thorough grounding in the theoretical and applied aspects of both Social Work and Anthropology and apply this knowledge to pursue scholarship in such areas of interest as urbanism, globalization, and social/cultural organization. SWAN students follow a curriculum that draws from existing courses in each discipline, including a core course that focuses on the integration of the two fields. Content combining the perspectives of both disciplines is included in the qualifying exam and dissertation research requirements for the degree.

This program prepares scholars for work in several different occupations, including faculty positions in social work and anthropology as well as work in governmental, non-profit, and international settings.

Academic Scholarship: All course work completed to satisfy the following degree requirements must be done in accordance with the academic regulations (p. 12) of the Graduate School. All students are required to maintain a 'B' average. A grade of 'B-minus' or below in two courses will be sufficient reason to dismiss a student from the program. For the purposes of evaluating this condition, a grade of 'WF' is considered a failing grade.

Admission Requirements

Admission to this program is contingent upon admission to the Graduate School (p. 19). Only a limited number of applicants who have demonstrated superior ability and potential will be accepted in this program.

Prospective students should apply for admission to either the Social Work or Anthropology Ph.D. programs and specify, using a pull-down menu, their request for admission to the SWAN program. They must meet the admissions standards of both the Graduate School and the SWAN program. Students who do not possess an MSW should apply separately to the MSW program and notify the SW doctoral director of their application to both the MSW and SWAN programs. All application and admission materials must be submitted to the Office of Graduate Admissions by January 10 to begin in the following fall semester.

The Plan of Work must be submitted before forty credits have been completed and before the qualifying examination is scheduled.

The Doctor of Philosophy requires ninety credits beyond the baccalaureate degree, thirty of which must be earned as dissertation credits.

A minimum of thirty credits of graduate work must be at the 7000-level or above (excluding dissertation credits). Students must petition the SWAN Steering Committee for course equivalents, substitutes, or any other exceptions to the SWAN requirements.

Once the student has attained candidate status, he/she is required to register for doctoral dissertation credits. Students must register for 9000-level credits (SW 9991, SW 9992, ANT 9993, and ANT 9994) through the Graduate Office and must fulfill 7.5 credits in these courses each semester for four consecutive semesters (excluding spring-summer). All course work completed to satisfy the following degree requirements must be done in accordance with the regulations of the Graduate School (p. 12), the College of Liberal Arts and Sciences (p. 201), and the School of Social Work (p. 314).

Coursework:

Student who have not attained the MSW degree are required to obtain this degree prior to graduating with a SWAN PhD. See the MSW Graduate Bulletin entry for details. Students are required to meet with their MSW adviser to develop an MSW plan of work that meets MSW program requirements. With the approval of the SWAN committee and the MSW coordinator, a limited number of SWAN courses may be counted towards MSW requirements.

The following courses, or their equivalents, must be completed by ALL students:

Code	Title	Credits
Social Work - Research/Theory		
SW 9100	Social Statistics and Data Analysis	3
SW 9210	Theories for Practice and Research with Individuals	3

SWAN - Theory		
SW 9697	Integrative Seminar in Social Work and Anthropology	3
Total Credits		48

Qualifying Exams: The SWAN steering committee will design and administer the SWAN qualifying examinations so that students can demonstrate the breadth, depth and mastery of their theoretical and

empirical knowledge related to social work and anthropology theory, research methods and data analysis approaches as well as their substantive domain of knowledge. Students will demonstrate this knowledge through a written examination consisting of four sections:

1. statistics,
2. culture area,
3. research methods, and
4. a substantive paper demonstrating students' application of social science theory and SWAN knowledge to their intended research domain.

The statistics exam will be an in-school, open book exam developed by faculty teaching the required statistics courses. For the take home theory, topic area and substantive paper components, students will, in consultation with their academic advisers, select a three-person examination committee consisting of social work and anthropology faculty. These examination committee members will meet with students to develop reading lists and questions that students will then address in written take-home exams.

Students who fail one or more sections of the qualifying examination will be expected to retake only those sections that they failed. Students who fail one or more sections of the examination for a second time will be dismissed from the program.

Foreign Language Requirement: Students doing SWAN research fieldwork in non-English speaking settings will be expected to have 3 semesters of a foreign language or demonstrate fluency in their field language. These students need to take classes to complete the Anthropology Foreign Language requirement (3 semesters of the same foreign language at the undergraduate level; language credits do not count towards the 90 credits needed for a Ph.D.).

1. a grade of 'C' or better in one and one-half years of work in the language offered to meet the requirement (three semesters or five quarters of coursework at any accredited college or university);
2. satisfactory performance on a standardized (Educational Testing Services) examination; or
3. certification of competence to carry out research in the relevant language by a member of the graduate faculty of Wayne State or an equivalent university. The nature of the tools of research and requirements for satisfactory proficiency will be determined by each student's doctoral committee. Additionally mandated tools of research may include additional statistics, mathematics, computer science and/or a field language.

Additional Information: A more detailed discussion of this doctoral program is available on the SWAN (<http://clas.wayne.edu/swan>) website. Students should also consult the Graduate School's general requirements for doctoral degrees (p.).

Social Work and Gerontology (Ph.D. Dual-Title)

The school offers a Dual-Title Degree in Gerontology. Gerontology is a multi-disciplinary field that integrates theory, practice knowledge, and research methodology to benefit older adults. Gerontologists trained at the Ph.D. level have the opportunity to play a key role in developing gerontological practices and in training new generations of practitioners and researchers in the field. The dual-title degree requires coursework in addition to the conventional social work doctoral program. Twelve credits are required for the dual-title that focuses on gerontological content in lieu of a cognate.

Code	Title	Credits
Required coursework		
SW 7995	Introduction to Gerontology	3
SW 9420	Research Practicum	3
Additional courses		
Select two of the following:		6
FPH 7370	Health, Disease, and Aging	
NUR 7415	Physical and Psychosocial Issues in Aging	
SOC 7020	End-of-Life Issues	
Total Credits		12

Faculty with gerontological expertise from the School of Social Work and other university schools and colleges will serve as mentors for students in the program. Students are also required to incorporate gerontological content into the research practicum and the substantive comprehensive exam. They are also expected to make gerontological content a substantial component of their dissertation and to include a gerontology faculty member on their dissertation committee.

Social Work and Infant Mental Health (M.S.W. or Ph.D. Dual-Title)

Students in the master's or Ph.D. program in Social Work can apply to earn a Dual-Title Master's Degree in Social Work and Infant Mental Health (IMH). This dual-title degree is designed to prepare Social Workers to support early social and emotional development especially in contexts in which parents or children suffer from developmental disabilities, physical health or mental health concerns. The dual-title program offers many advantages to students whose goal is to work with very young children and their families. Students who earn an IMH dual-title degree and become practitioners are well positioned to be competitive in the job market, are prepared to work in cross-disciplinary teams, understand evidence-based treatments and their importance, and have a solid understanding of both research and clinical work with infants and families.

Admission Requirements

Applicants must meet the admissions standards of the Graduate School and the School of Social Work. Applicants can indicate interest in the dual-title option on their initial online application. Current students can discuss their interest in the dual-title option with their faculty advisor prior to spring semester of their core year.

Social Work and Infant Mental Health (M.S.W. Dual-Title)

Students are required to complete the following IMH coursework in addition to the M.S.W. (p. 316) All students must complete and earn a 'B' or above in the following courses:

Code	Title	Credits
PSY 7425	Psychology of Infant Behavior and Development	3
SW 7025	Infant Mental Health: Theory to Practice across Early Childhood Settings	2
SW 7880	Infant/Family Mental Health Assessment	2
SW 8880	Infant Mental Health Practice	3
SW 8883	Infant Mental Health Seminar I	2
SW 8884	Infant Mental Health Seminar II	2
Total Credits		14

Master's students must also complete an IMH-related field placement in their second year. Advanced standing students must focus their year of fieldwork on an IMH-related placement.

Social Work and Infant Mental Health (Ph.D. Dual-Title)

The dual-title degree requires coursework additional to the conventional social work doctoral program (p. 318): twelve credits that focus on the social emotional capacities of young children birth to five years and in the primary relationships that support these capacities. IMH expertise thereby gained should be reflected in a substantive research paper and a dissertation that addresses IMH issues and concepts. Students' studies and scholarly productions will be mentored by Social Work faculty members as well as IMH faculty members from other University schools and colleges.

Graduate Certificate Programs

- Alcohol and Drug Abuse Studies (Graduate Certificate) (p. 321)
- Child Welfare (Graduate Certificate) (p. 322)
- Disabilities (Graduate Certificate) (p. 322)
- Gerontology (Graduate Certificate) (p. 323)
- Social Welfare Research and Evaluation (Graduate Certificate) (p. 323)

Alcohol and Drug Abuse Studies (Graduate Certificate)

The Wayne State University Certificate in Addiction, Alcohol and Drug Abuse Studies (CADAS) is designed to provide advanced students in education, health and human services with an integrated learning experience that includes biological, psychological, social, cultural, and public health perspectives. The breadth and scope of the program allows students to accomplish their own specific objectives within a multidisciplinary context. The program attracts professionals currently working in social services, mental health, nursing, public health, education, and criminal justice who realize the need for the additional training and credentials. Adding the CADAS certificate to existing educational and /or work experience is likely to enhance an individual's career opportunities and options.

Admission Requirements

Applicants must meet the admissions standards of the Graduate School (p. 19) and the School of Social Work. Eligibility for admission to the Graduate Certificate is limited to those holding a graduate degree from an accredited educational institution or actively pursuing a graduate degree at Wayne State University. There is a three-year time limit in which to meet certificate program requirements.

Applications are accepted throughout the year and students may begin the program during any semester. Application forms may be obtained by sending an email to the CADAS program advisor at cadass_cert@lists.wayne.edu or by calling 313-577-4409.

The coursework consists of a total of 12 credits, including from a selection of introductory (one required), advanced (2 required) and biopsychosocial (1 required) courses in the order specified and two required courses in the order specified.

During the personal interview the student and the advisor for the certificate program will develop the Plan of Work for coursework based on the student's background, areas of concentration, and career goals. Most students enroll in one or two courses per term. Courses are offered

by departments throughout the University and most are offered at least once per year. Up to nine of the twelve credits may be applied to both the certificate and a graduate degree, subject to approval of the relevant academic department and the certificate program coordinator.

If the student has already completed a master's degree, the certificate is awarded when the student has met all the certificate requirements. If the student is earning the certificate concurrently with a master's degree, the certificate is awarded when all the requirements of the certificate and the degree have been met.

Code	Title	Credits
Foundation Courses (Select One)		3
HE 5440	Mental Health and Substance Abuse (Offered Winter and Spring)	
SW 6540	Effects of Drugs and Alcohol on Physical and Social Functioning (Offered all three terms)	
Advanced Courses (Select Two)		6
SW 7150	Health Disparities and Substance Use (Offered Spring/Summer)	
SW 8690	Interpersonal Practice in Substance Abuse (Offered Fall, Winter)	
SW 7990	Directed Study (Arranged)	
Biopsychosocial Courses (Select One)		3
PSC 5600	Drugs of Abuse (Offered Winter)	
PHC 6500	Drugs and the Addictive Process (Offered Fall)	
SW 7140	Biomedical Components of Substance Use and Addiction (Offered Winter)	
Total Credits		12

The Alcohol and Drug Abuse Studies Graduate Certificate is designed to be completed in 1 year.

This program will cost \$10,382.38 for in-state tuition and fees and \$19,582.42 for out-of-state tuition and fees if completed within normal time. There may be additional costs for living expenses. These costs were accurate at the time of posting, but may have changed.

Fewer than 10 students completed this program within normal time. Typical student debt has been withheld to preserve the confidentiality of the students.

This program does not meet any licensure requirements.

For more information about graduation rates, loan repayment rates, and post-enrollment earnings about this institution and other postsecondary institutions please click here: <https://collegescorecard.ed.gov/>.

Child Welfare (Graduate Certificate)

The Child Welfare Graduate Certificate is designed to provide current specialized knowledge and best practices for child welfare social work practice in the Detroit metropolitan and state of Michigan practice arenas. Historically, professional social workers have worked with families and children impacted by social injustice and adverse economic situations. The curriculum is designed to provide best and competent practices in situations where families and children encounter child maltreatment, often with compounding issues of poverty, racism, substance abuse, domestic violence and other experiences of trauma.

Admission Requirements

Child Welfare Graduate Certificate follows the admissions procedures and policies for the Graduate School (p. 19) and the School of Social Work (p. 314).

The Child Welfare Graduate Certificate requires 12 credits.

Code	Title	Credits
SW 5755	Introduction to Child Welfare	3
SW 6100	Child Welfare and Social Systems: Context for Case Management Practice	3
SW 7700	Trauma-Informed Child Welfare Practice	3
Select one of the following:		3
SW 6535	Youth, Delinquency, and Juvenile Justice	
SW 6540	Effects of Drugs and Alcohol on Physical and Social Functioning	
SW 6575	Violence Prevention and Intervention	
SW 8570	Dynamics and Intervention in Family Violence	

All coursework must be completed in accordance with the academic procedures of the School of Social Work and the Graduate School (p. 12) governing graduate scholarship and degrees, respectively.

Disabilities (Graduate Certificate)

The Graduate Certificate in Disabilities prepares students to assume leadership positions as service providers, policy makers, administrators or educators. Students learn to plan creatively and to implement activities that positively affect the lives of persons with disabilities. The program provides a useful educational experience to those committed to the full community inclusion of persons with disabilities. Course work reflects disability issues throughout the life-span and focuses specifically on disability issues in urban settings. The program is a collaborative effort of the Developmental Disabilities Institute (p. 25) and the following academic units:

- the Department of Audiology and Speech-Language Pathology and Department of Psychology, the College of Liberal Arts and Sciences;
- the College of Nursing;
- the Department of Occupational Therapy, Eugene Applebaum College of Pharmacy and Health Services;
- the vocational rehabilitation counseling program in the Theoretical and Behavioral Foundation division, and the special education program in the Teacher Education division, College of Education;
- and the School of Social Work.

Admission Requirements

Applicants must meet the admissions standards of the Graduate School (p. 19) and the School of Social Work. Eligibility for the certificate is limited to persons possessing a master's degree from an accredited educational institution or persons actively enrolled in a graduate degree program at Wayne State University.

The graduate certificate in Disabilities program includes at least fifteen graduate credits taken in association with, or subsequent to, obtaining a master's degree. Ten credits are earned through completion of the three required courses and a minimum of five credits of electives. At least five credits must differ from the course requirements of the graduate degree being pursued concurrently. A master's degree within the student's discipline must be completed before the certificate is awarded. All course work must be completed in accordance with the academic procedures of the School of Social Work and the Graduate School (p. 12) governing graduate scholarship and degrees.

Required Certificate Curriculum

Code	Title	Credits
SW 6700	Disabilities in Urban Society: Special Topics	3
SW 6740	Seminar in Disability Studies: Directed Study	3

SW 6750	Practicum in Disabilities: Research Topics	4
Additional electives		5
Total Credits		15

Courses include ten credits in core courses and a minimum of five elective credits. The electives allow students to specialize in a particular area of practice or research, as well as in a particular age range of people with disabilities. At least five credits must differ from the course requirements of the graduate degree being pursued concurrently.

The Disabilities Graduate Certificate is designed to be completed in 1 years.

This program will cost \$12,513.52 for in-state tuition and fees and \$24,013.57 for out-of-state tuition and fees if completed within normal time. There may be additional costs for living expenses. These costs were accurate at the time of posting, but may have changed.

Fewer than 10 students completed this program within normal time. Typical student debt has been withheld to preserve the confidentiality of the students.

This program does not meet any licensure requirements.

For more information about graduation rates, loan repayment rates, and post-enrollment earnings about this institution and other postsecondary institutions please click here: <https://collegescorecard.ed.gov/>.

Gerontology (Graduate Certificate)

The Graduate Certificate Program in Gerontology is designed to prepare graduate students and professional practitioners with graduate degrees to work in a variety of aging-related settings. The field of gerontology is multi-disciplinary, drawing on the best science and practice applications from a number of areas including biology, psychology, sociology, social work, health, and economics. The field of gerontology applies this knowledge to increase the understanding of aging and older adults and to meet the needs of the rapidly growing aging population. The gerontology field focuses on the needs and challenges of community dwelling older adults as well as on elders living in long-term care settings. Adding the gerontology certificate to existing educational and work experiences is likely to enhance an individual's career opportunities and options.

Admission Requirements

Applicants must meet the admissions standards of the Graduate School (p. 19) and the School of Social Work. Eligibility for admission to the Graduate Certificate is limited to those holding a graduate degree from an accredited educational institution or actively pursuing a graduate degree at Wayne State University. There is a three-year time limit in which to meet certificate program requirements.

Candidates must successfully complete twelve credits of approved courses for the gerontology graduate certificate. Coursework consists of one core course, the Introduction to Gerontology (SW 7995), and nine additional credits chosen from three other categories. During the personal interview the student and the advisor for the certificate program will develop the *Plan of Work* for coursework based on the student's background, areas of concentration, and career goals. Most students enroll in one or two courses per term. Courses are offered by departments throughout the University and most are offered once per year. Up to nine of the twelve credits may be applied to both the certificate and a graduate degree, subject to approval of the relevant academic department and the certificate program coordinator. All coursework must be completed in accordance with the academic procedures of the School of Social Work

and the Graduate School (p. 12) governing graduate scholarship and degrees, respectively.

If the student has already completed a master's degree, the certificate is awarded when the student has met all the certificate requirements. If the student is earning the certificate concurrently with a master's degree, the certificate is awarded when all the requirements of the certificate and the degree have been met.

Code	Title	Credits
Required Courses		
All students MUST take SW 7995 (Category I) and choose three additional courses from any of the other three categories.		12
Category I: Seminar in Gerontology (Required)		
SW 7995	Introduction to Gerontology (ONLINE COURSE)	
Category II: The Aging Individual: Psychological Aspects, Human Development and Expression		
SOC 7020/5020/ NUR 7515/ ANT 7430	End-of-Life Issues	
SW 7770	Palliative Care and Elder Law	
Category III: Aging in the Social, Political and Economic Context		
SW 5720	Social Services for Older Adults	
SOC 5760	Health and Life Course	
SW 8860	Grief and Loss Issues in Social Work Practice	
Category IV: Aging Health, Biology, and Physiology		
BIO 7750	Biology of Aging	
NUR 7415	Physical and Psychosocial Issues in Aging	
Total Credits		12

The Gerontology Graduate Certificate is designed to be completed in 1 year.

This program will cost \$10,382.38 for in-state tuition and fees and \$19,582.42 for out-of-state tuition and fees if completed within normal time. There may be additional costs for living expenses. These costs were accurate at the time of posting, but may have changed.

Fewer than 10 students completed this program within normal time. Typical student debt has been withheld to preserve the confidentiality of the students.

This program does not meet any licensure requirements.

Social Welfare Research and Evaluation (Graduate Certificate)

The certificate program in Social Welfare Research and Evaluation is designed to provide students with advanced research and evaluation skills necessary to assess the outcomes and efficacy of programs, services and interventions offered by social service organizations. In an era of increasing accountability, students will be equipped with the tools to engage in evidence-based practice and evaluation research at the micro, mezzo, and macro levels of practice.

Admission Requirements

Applicants must meet the admissions standards of the Graduate School (p. 19) and the School of Social Work. Eligibility for this certificate is

limited to persons currently pursuing a masters's degree in social work (MSW) or who hold a master's degree in social work, counseling or a related human services field. Prospective Research Certificate students are strongly encouraged to attend a social work doctoral program information session (<https://socialwork.wayne.edu/phd/info-meetings>) prior to completing an application.

Candidates for the certificate must achieve a minimum grade point average of 3.0 and complete eighteen credits as outlined below in designated advanced graduate courses. These courses include offerings in social work theory, advanced statistics and research methods. Further, students will complete an applied research practicum. The certificate must be completed within three years of entering the program. All course work must be completed in accordance with the academic procedures of the School of Social Work and the Graduate School (p. 12) governing graduate scholarship and degrees, respectively.

Code	Title	Credits
Required Courses		
Three credits of theory for practice and research:		3
SW 9230	Theories for Practice and Research with Communities and Organizations	
Six credits of statistics:		6
SW 9100	Social Statistics and Data Analysis	
SW 9300	Applied Regression Analysis and Generalized Linear Models	
Six credits of research methods in social work, with specific content and training related to evidence-based practice research:		6
SW 9400	Qualitative Research Methods in Social Work	
SW 9410	Quantitative Research Methods in Social Work	
Three credits of a social work applied research practicum with specific content and training related to evidence-based practice research		3
SW 9420	Research Practicum	
Total Credits		18

Graduation from the certificate program will require a minimum G.P.A. of 3.0. In consonance with the grading policy of the Graduate School, a grade of 'B' minus or below is considered unsatisfactory. The School will place a limitation on the number of 'B' minus grades that students may receive, even if they maintain an overall G.P.A. of 3.0. Students receiving two grades of 'B' minus will be terminated from the program. Students should plan regular contact with the Director of the Doctoral Program to ensure that they are meeting the course requirements for the certificate.

Basic terms and concepts used in managerial accounting: cost behavior; cost-volume profit analysis; business planning and accounting controls; and how accounting information in managerial decision making. Offered Every Term.

Prerequisites: ACC 3010 with a minimum grade of C and ECO 2010 with a minimum grade of C and BA 2300 with a minimum grade of C

ACC 4500 Business Co-op Assignment Cr. 0

Must be elected by Professional Development Co-operative Program students during work semester. Offered for S and U grades only. No credit toward degree. Opportunity to put theory into practice on the job. Students will normally be assigned to cooperating business organizations for internship periods of one semester. Offered Every Term.

Restriction(s): Enrollment limited to students in the School of Business.

Equivalent: FIN 4500, MGT 4500, MKT 4500

ACC 5100 Intermediate Financial Accounting I Cr. 3

Accounting principles for preparing complete set of financial statements; how accounting meets the needs of various external users. Theories and practices of external financing of external financial reporting for organizations. Valuation and accounting for assets: cash, receivables, and inventory. Offered for undergraduate credit only. Offered Every Term.

Prerequisites: ACC 3010 with a minimum grade of C and ACC 3020 with a minimum grade of C

Restriction(s): Enrollment is limited to Undergraduate level students; enrollment limited to students in the School of Business.

ACC 5110 Intermediate Financial Accounting II Cr. 3

Continuation of ACC 5100. Theories and practices underlying external financial reporting for organizations. Valuation of and accounting for specific items on the balance sheet, including property, plant and equipment, intangible assets, current and long-term liabilities, stockholders' equity, investments, income measurement concepts and issues. Offered for undergraduate credit only. Offered Every Term.

Prerequisites: ACC 5100 with a minimum grade of C

Restriction(s): Enrollment is limited to Undergraduate level students; enrollment limited to students in the School of Business.

ACC 5115 Intermediate Financial Accounting III Cr. 3

Continuation of ACC 5110. Complex financial reporting topics, such as securities, earnings per share, income taxes, pensions, leases, changes and errors, disclosure issues. Cases used to integrate concepts studied in managerial, systems, and tax accounting courses in this capstone course. Offered for undergraduate credit only. Offered Every Term.

Prerequisites: ACC 5110 with a minimum grade of C

Restriction(s): Enrollment is limited to Undergraduate level students; enrollment limited to students in the School of Business.

ACC 5120 Advanced Accounting Cr. 3

Theories and practical applications of financial accounting: as learned in intermediate accounting courses; focus on accounting of consolidation and combination of business entities; accounting for foreign currency transactions; and interim and segment reporting. Offered for undergraduate credit only. Offered Winter.

Prerequisites: ACC 5110 with a minimum grade of C

Restriction(s): Enrollment is limited to Undergraduate level students; enrollment limited to students in the School of Business.

ACC 5130 Accounting Systems Design and Control Cr. 3

Implementation of accounting systems in a computer-intensive business environment; methods for developing and documenting Accounting Information Systems (AIS); hands-on use of enterprise resource planning software package for accounting functions. Offered for undergraduate credit only. Offered Every Term.

Prerequisites: ACC 5100 with a minimum grade of C and ISM 3630 with a minimum grade of C

Restriction(s): Enrollment is limited to Undergraduate level students; enrollment limited to students in the School of Business.

ACC 5160 Managerial Accounting Cr. 3

Focus on management accountant as integral part of the management team. Analyzing, managing, and accounting for costs; relevance of cost management in manufacturing firms and other types of organization; solving homework problems by application of concepts covered in textbook and lectures. Offered for undergraduate credit only. Offered Every Term.

Prerequisites: ACC 3020 with a minimum grade of C

Restriction(s): Enrollment is limited to Undergraduate level students; enrollment limited to students in the School of Business.

ACC 5170 Introduction to Taxation: Individuals Cr. 3

Introduction to taxation, tax research, and tax planning. Fundamental elements of individual taxation; how individuals and business owners benefit from an understanding of tax law. Offered for undergraduate credit only. Offered Every Term.

Prerequisites: ACC 3010 with a minimum grade of C and ACC 3020 with a minimum grade of C

Restriction(s): Enrollment is limited to Undergraduate level students; enrollment limited to students in the School of Business.

ACC 5180 Governmental and Not-for-Profit Accounting Cr. 3

Theory and practical applications of accounting for governmental and not-for-profit organizations, and how they differ from for-profit entities. Technical accounting issues and management and regulatory issues for both state and local governments and for other governmental and non-governmental not-for-profit entities. Course is preparation for governmental and not-for-profit portion of the CPA examination. Offered for undergraduate credit only. Offered Every Term.

Prerequisites: ACC 5110 with a minimum grade of C

Restriction(s): Enrollment is limited to Undergraduate level students; enrollment limited to students in the School of Business.

ACC 5200 ERP Systems: Concepts and Practice Cr. 3

Enterprise Planning (ERP) systems comprise the primary software packages for the accounting, operational, and managerial activities of an organization. Role and function of ERP systems within organizations; analysis of major business processes and their implementation in ERP software; hands-on use of ERP packages for transaction processing and decision support; use of ERP for customer relationship management, supply chain management, and electronic commerce. Offered for undergraduate credit only. Offered Winter.

Prerequisites: ACC 3010 with a minimum grade of C and ACC 3020 with a minimum grade of C and ISM 3630 with a minimum grade of C

Restriction(s): Enrollment is limited to Undergraduate level students; enrollment limited to students in the School of Business.

Course Material Fees: \$117

Equivalent: ISM 5200

ACC 5210 Blockchain Fundamentals for Accounting and Business Cr. 3

Introduces blockchain, which is a public, transparent, secure, immutable and distributed ledger. Blockchains can be used to record and transfer any digital asset, not just currency. Progressing from a detailed study of how blockchain works in Bitcoin; this course also discusses alternative blockchain platforms; potential uses of blockchain in accounting, other areas of business, and society; and this technology's potential impact on accounting systems, business transactions, financial services, government, and banking management. This course is taught completely online. Offered Spring/Summer.

Prerequisite: ACC 3010 with a minimum grade of C and ACC 3020 with a minimum grade of C

Equivalent: ISM 5210

ACC 5250 Introduction to Internal Auditing Cr. 3

Theory of internal auditing and how it relates to the CPA audit and the audit committee. Offered for undergraduate credit only. Offered Winter.

Prerequisites: ACC 3010 with a minimum grade of C and ACC 3020 with a minimum grade of C

Restriction(s): Enrollment is limited to Undergraduate level students.

ACC 5270 Introduction to Taxation: Business Entities Cr. 3

Builds on basic U.S. tax concepts learned in ACC 5170. Taxation of corporations, S corporations, partnerships, estates and trusts. Accounting for income taxes on financial statements, taxation of corporate reorganizations and liquidations, basic multi-state and multi-national taxation principles, and transfer taxes and wealth planning. Offered for undergraduate credit only. Offered Fall, Winter.

Prerequisites: ACC 5170 with a minimum grade of C

Restriction(s): Enrollment is limited to Undergraduate level students; enrollment limited to students in the School of Business.

ACC 5890 Internship in Accounting or Tax Practice Cr. 3

Student performs assigned tasks and responsibilities in a professional manner under supervision of host-employer for minimum 160 hours during the semester, abiding by the rules and regulations established by the employer and expected of all employees; student must satisfactorily complete all course requirements outlined in the internship program for the School of Business Administration. Offered for undergraduate credit only. Offered Every Term.

Restriction(s): Enrollment is limited to Undergraduate level students; enrollment limited to students in the School of Business.

ACC 5990 Directed Study in Accounting Cr. 1-3

Research conducted under supervision of full-time faculty member in an area of special interest to student and faculty member. Offered for undergraduate credit only. Offered Every Term.

Restriction(s): Enrollment is limited to Undergraduate level students; enrollment limited to students in the School of Business.

Repeatable for 6 Credits

ACC 5996 Auditing, Assurance and Attestation Cr. 3

Principles and procedures used by public accountants in examination of financial statements of companies and other organizations; issuing an independent opinion; professional standards and responsibilities of the certified public accountant. Offered Every Term.

Prerequisites: May be taken concurrently. ACC 5115 with a minimum grade of C and BA 3400 with a minimum grade of C

Restriction(s): Enrollment is limited to Undergraduate level students; enrollment limited to students in the School of Business.

ACC 7040 Intermediate Financial Accounting I Cr. 3

Study of accounting theory and financial statement presentation, underlying assets and income determination at an intermediate level of analysis. Topics include cash and receivables, marketable securities, inventories, property and intangibles. No credit after ACC 5100 and ACC 5110. Offered Fall, Spring/Summer.

Prerequisites: BA 6000 with a minimum grade of C and BA 7000 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

ACC 7050 Intermediate Financial Accounting II Cr. 3

Continuation of accounting theory and financial statement presentation, underlying liabilities, and shareholder equity at an intermediate level of analysis. Topics include investments, accounting for leases, pensions, income taxes, disclosures and cash flow. Offered Fall, Winter.

Prerequisites: ACC 7040 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

ACC 7115 Financial Statement Analysis Cr. 3

Development of ability to extract and interpret information reported in financial statements in order to evaluate the operating performance and financial status of a firm. Offered Winter.

Prerequisites: ACC 7050 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students in the School of Business.

ACC 7120 Introduction to Taxation: Individuals Cr. 3

Introduction to taxation, tax research, and tax planning. Fundamental elements of individual taxation; how individuals and business owners benefit from an understanding of tax law. No credit after ACC 5170 or undergrad. equiv. Offered Fall, Spring/Summer.

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students in the School of Business.

ACC 7122 Advanced Accounting I Cr. 3

Theory and practical applications of accounting for consolidation and combination of business entities and accounting for foreign currency transactions and interim and segment reporting. No credit after ACC 5120 or other undergrad. equiv. course. Offered Fall.

Prerequisites: ACC 7050 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

ACC 7130 Intermediate Managerial Accounting Cr. 3

Building on managerial accounting skills mastered in B A 7000, this course examines accounting and control issues and the use of information in the decision-making process from a managerial perspective, through the study of cases. No credit after ACC 5160 or undergrad. equiv. Offered Fall, Winter.

Prerequisites: BA 7000 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

ACC 7145 Accounting Systems: Design and Controls Cr. 3

Implementation of accounting systems in the computer-intensive business environment; methods for developing and documenting Accounting Information Systems (AIS); evaluation of controls; work with accounting software package. No credit after ACC 5130 or equiv. Offered Fall.

Prerequisites: ACC 7040 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

ACC 7148 ERP Systems and Business Integration Cr. 3

Enterprise Planning (ERP) systems are the primary software packages for accounting, operational, and managerial activities of organizations. How ERP systems integrate and coordinate business processes and the management of the organization. Extensive hands-on use of popular software packages for key business activities such as sales, procurement, and production. Offered Yearly.

Prerequisites: BA 7000 with a minimum grade of C and ISM 7500 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

Course Material Fees: \$117

ACC 7155 Forensic Accounting Cr. 3

Accounting and legal fundamentals of forensic accounting. Topics include tax and financial statement fraud, information security, and forensic accounting applications in such cases as bankruptcy, identity theft, and organized crime and terrorism investigations. Offered Spring/Summer.

Prerequisites: BA 7000 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

ACC 7165 Internal Audit I Cr. 3

Theory of internal audit; the context within which internal auditing functions; its relation to the external audit and the audit committee. Offered Fall, Winter.

Prerequisites: BA 7000 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

ACC 7170 International Accounting Cr. 3

Issues in international business environment: currency translations; consolidated statements for multinational corporations, inflation accounting; other issues. Offered Fall.

Prerequisites: ACC 7050 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

ACC 7180 Auditing Cr. 3

Principles and procedures of internal and external auditing; statistical sampling and other modern auditing techniques; professional standards and responsibilities of the auditor. Offered Fall, Winter.

Prerequisites: ACC 7050 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

ACC 7188 Governmental and Not-for-Profit Accounting Cr. 3

Theory and practical applications of accounting for governmental and not-for-profit organizations, and how they differ from for-profit entities. Technical accounting issues and management and regulatory issues for both state and local governments and for other governmental and non-governmental not-for-profit entities. No credit after ACC 5180 or undergrad equiv. Offered Every Term.

Prerequisites: ACC 7050 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

ACC 7190 Advanced Auditing Cr. 3

Advanced principles and procedures to perform financial audits; case studies of emerging auditing techniques and methods to detect fraud; application of advanced statistical sampling techniques; analysis of auditor's role in society. Offered Winter.

Prerequisites: ACC 7180 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

ACC 7280 Accounting Data Analytics Cr. 3

Introduces concepts, techniques, and software applications used to analyze accounting and related data to support financial decision-making and planning. These data are generated both within and outside the organization. Offered Fall, Winter.

Prerequisites: BA 7000 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

ACC 7290 Blockchain: An Accounting and Business Perspective Cr. 3

Introduces blockchain: a public, transparent, secure, immutable, and distributed ledger. Blockchains can be used to record and transfer any digital asset, not just currency. The course covers the workings, applications, and potential impact of this revolutionary technology. Offered Fall.

Prerequisites: BA 7000 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

ACC 7300 Accounting and Tax Research and Professional Communications Cr. 3

Methodology of accounting and tax research, including computer-assisted research and the communication of argument and conclusions. Sources and roles of legislative, executive, judicial and professional bodies in creating, interpreting and enforcing policies and practices. Commonly-used research databases studied through cases. Offered Every Term.

Prerequisites: May be taken concurrently: ACC 7120 with a minimum grade of C and BA 7000 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

ACC 7310 Business and Professional Ethics for Managers and Accountants Cr. 3

Laws, regulations and professional codes of conduct as reflection of expectations of corporate stakeholders regarding the ethics of accountants and managers. Significance of integrity, independence, and reputation in light of these rules. Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students.

ACC 7320 Introduction to Taxation: Business Entities Cr. 3

Builds on basic U.S. tax concepts learned in ACC 5170/ACC 7120. Taxation of corporations, S corporations, partnerships, estates and trusts. Accounting for income taxes on financial statements, taxation of corporate reorganizations and liquidations, basic multi-state and multi-national taxation principles, and transfer taxes and wealth planning. Offered Fall, Spring/Summer.

Prerequisites: ACC 7120 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students in the School of Business.

ACC 7325 Advanced Tax Research and IRS Procedures Cr. 3

Builds on research skills developed in ACC 7300 focusing on tax research methodology, writing and citation; role of legal authorities in taxation; IRS practices and procedures. Offered Winter.

Prerequisites: ACC 7300 with a minimum grade of C and ACC 7320 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

ACC 7335 Taxation of Corporations and Shareholders Cr. 3

Advanced taxation issues related to consolidated tax returns; corporate acquisitions, mergers, divestitures, and reorganizations; survival of tax attributes; accounting for uncertainty in income taxes; other advanced tax topics. Offered Fall.

Prerequisites: ACC 7300 with a minimum grade of C and ACC 7320 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

ACC 7340 Taxation of Pass-Through Entities Cr. 3

Tax rules governing formation, operation, and dissolution of partnerships, S corporations, and limited liability companies; aggregate and entity theories; distributions, basis adjustments, dispositions, and other related tax issues. Offered Fall.

Prerequisites: ACC 7320 with a minimum grade of C and ACC 7335 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

ACC 7400 Taxation of International Business and Multinational Transactions Cr. 3

Taxation of U.S. persons investing or doing business outside the United States. Foreign tax credit, sourcing rules, controlled foreign corporation and related tax issues, transfer pricing issues, and overview of tax issues related to non-U.S. persons doing business in the United States. Offered Fall.

Prerequisites: ACC 7300 with a minimum grade of C and ACC 7320 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

ACC 7410 Tax Accounting Methods and Accounting for Income Taxes Cr. 3

Tax accounting issues faced by business entities and their tax advisers, including tax accounting methods and periods, inventory methods, tax accrual workpapers, tax uncertainties and deferred taxes. Offered Yearly.

Prerequisites: ACC 7050 with a minimum grade of C and ACC 7120 with a minimum grade of C and ACC 7150 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

ACC 7420 Taxation by State and Local Jurisdictions Cr. 3

Survey and examination of state, local, and some international income, franchise, property, sales, and use taxes and their impact on entrepreneurs. Emphasis on North American jurisdictions. Offered Intermittently.

Prerequisites: ACC 7120 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

ACC 7450 Taxes and Business Strategy Cr. 3

Effect of taxation on business decisions such as choice of form of organization, international operations, employee and executive compensation strategies, business mergers, acquisitions and divestitures. Business decisions examined by studying tax, accounting, and non-tax considerations from a management perspective. Offered Winter.

Prerequisites: ACC 7300 with a minimum grade of C and ACC 7320 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

ACC 7990 Internship in Accounting or Tax Practice Cr. 1-3

Application and assessment of concepts developed in studies through meaningful real-world experience. Student must obtain internship position and complete internship application form before registering. Student performs assigned tasks in professional manner under supervision of host-employer for minimum 160 hours during semester; abides by rules and regulations established by employer and expected of all employees; and must complete all course requirements outlined by the School for the internship program. Offered Every Term.

Prerequisites: ACC 7040 with a minimum grade of C and ACC 7050 with a minimum grade of C and BA 7000 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students in the MS in Accounting or MS in Taxation programs.

Repeatable for 3 Credits

ACC 7995 Directed Study in Accounting Cr. 1-3

Opportunity to conduct research under the supervision of a member of the graduate faculty in areas of special interest to student and faculty member. Offered Every Term.

Prerequisites: ACC 7040 with a minimum grade of C and ACC 7050 with a minimum grade of C and BA 7000 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students.

Repeatable for 3 Credits

ACC 7998 Seminar in Tax and Accounting Policy Cr. 3

Seminar topics include history of accounting and tax policy in the U.S., establishment of accounting and tax rules and standards, professional responsibilities of accounting and tax professionals; relationship and application to recent and current events. Offered Every Term.

Prerequisites: ACC 7050 with a minimum grade of C and ACC 7120 with a minimum grade of C and May be taken concurrently: ACC 7300 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students in the Law School or School of Business; enrollment limited to students in a MS in Accounting or MS in Taxation degrees.

ACO - ART: CORE

ACO 1200 Surface Studio Cr. 3

Core studio for visual communication in a spectrum of two-dimensional media and color theory. Explorations include elements and principles of design, basic digital technique, basic traditional material handling, creative thinking, critical discussion and problem solving. Offered Every Term.

Restriction(s): Enrollment is limited to Undergraduate level students.

Course Material Fees: \$105

ACO 1230 Space Studio Cr. 3

Core studio for visual communication in a spectrum of three-dimensional media and composition in the built environment. Explorations include elements and principles of design, basic digital techniques, material handling, shop experience, and creative problem solving. Offered Every Term.

Restriction(s): Enrollment is limited to Undergraduate level students.

Course Material Fees: \$140

ACO 1270 Time Studio Cr. 3

Core studio for visual communication in time-based media composition including elements and principles of design, basic time-based methods for audio/video production, performance, social practice, creative thinking, and critical discussion and problem solving. Offered Every Term.

Restriction(s): Enrollment is limited to Undergraduate level students.

Course Material Fees: \$150

ACR - ART: CERAMICS

ACR 2550 Ceramics and Pottery Design I Cr. 3

Introduction to beginning clay forming, glazing and firing. Primarily for non-art and beginning art majors. Offered Every Term.

Course Material Fees: \$75

ACR 2560 Ceramics and Pottery Design II Cr. 3

Continuation of ACR 2550. Development of personal approach is encouraged. Offered Every Term.

Prerequisites: ACR 2550 with a minimum grade of C

Course Material Fees: \$75

ACR 3550 Beginning Ceramics Cr. 3

Basic techniques of wheel throwing, hand building, glazing and firing. Lectures, demonstrations, critiques. Offered Every Term.

Prerequisites: ACO 1200 and ADR 1060

Restriction(s): Enrollment is limited to students in the Department of Art and Art History; enrollment limited to students in a Bachelor of Arts, Bachelor of Fine Arts, Master of Arts or Master of Fine Arts degrees.

Course Material Fees: \$75

ACR 4000 Ceramics: Wheel Throwing Cr. 3

Development of personal, technical and aesthetic skills in using potter's wheel as tool to create utilitarian and non-utilitarian objects. Group and individual critiques. Offered Yearly.

Prerequisites: ACR 2550 and ACR 3550

Restriction(s): Enrollment is limited to students in the Department of Art and Art History; enrollment limited to students in a Bachelor of Arts, Bachelor of Fine Arts, Master of Arts or Master of Fine Arts degrees.

Course Material Fees: \$90

Repeatable for 12 Credits

ACR 4001 Handbuilding Cr. 3

Intermediate and advanced handbuilding techniques including coiling, extrusions, mold and slab construction. Surfacing, glazing and firing processes as they apply to completing the objects. Offered Yearly.

Prerequisites: ACR 2550 and ACR 3550

Restriction(s): Enrollment is limited to students in the Department of Art and Art History; enrollment limited to students in a Bachelor of Arts, Bachelor of Fine Arts, Master of Arts or Master of Fine Arts degrees.

Course Material Fees: \$90

Repeatable for 12 Credits

ACR 4550 Intermediate Ceramics Cr. 3

Advanced building techniques; glaze and clay body calculation, mold-making and aesthetic evaluation. Offered Every Term.

Prerequisites: ACR 3550

Restriction(s): Enrollment is limited to students in the Department of Art and Art History; enrollment limited to students in a Bachelor of Arts, Bachelor of Fine Arts, Master of Arts or Master of Fine Arts degrees.

Course Material Fees: \$90

ACR 5550 Advanced Ceramics Cr. 3

Advanced hand building and wheel throwing demonstrations. Lectures on historical and contemporary issues. Emphasis on personal growth and development. Offered Every Term.

Prerequisites: ACR 4550 with a minimum grade of D-

Restriction(s): Enrollment is limited to students in the Department of Art and Art History; enrollment limited to students in a Bachelor of Fine Arts or Master of Fine Arts degrees.

Course Material Fees: \$90

Repeatable for 12 Credits

ACR 5880 Directed Projects: Ceramics Cr. 3-6

Independent projects and study in consultation with faculty. Offered Fall, Winter.

Restriction(s): Enrollment is limited to students in the Department of Art and Art History; enrollment limited to students in a Bachelor of Fine Arts or Master of Fine Arts degrees.

Course Material Fees: \$90

ACR 7550 Graduate Problems in Ceramics Cr. 3

Individual problems in advanced ceramics. Offered Every Term.

Prerequisites: ACR 5550

Restriction(s): Enrollment is limited to Graduate level students; enrollment is limited to students in the Department of Art and Art History; enrollment limited to students in a Master of Arts or Master of Fine Arts degrees.

Course Material Fees: \$100

Repeatable for 24 Credits

ACR 8880 MFA Studio: Ceramics Cr. 3-9

Extended problems in ceramics; individual research with eighteen to twenty-seven hours of laboratory per week. Offered Fall, Winter.

Restriction(s): Enrollment is limited to Graduate level students; enrollment is limited to students in the Department of Art and Art History; enrollment limited to students in a Master of Fine Arts degree.

Course Material Fees: \$150

Repeatable for 36 Credits

ACS - ART: SPECIAL SEMINARS

ACS 3997 Sophomore Seminar in the Visual Arts Cr. 3

Introduction to a variety of art and design disciplines: developing basic critiquing skills, learning how to document and present art design projects, and gaining a general knowledge of the contemporary art world. Offered for undergraduate credit only. Offered Every Other Year.

Prerequisites: ACO 1200 and ADR 1060

Restriction(s): Enrollment is limited to Undergraduate level students.

ACS 5200 Art Gallery Management Cr. 3

Offers a larger sense of the profession gained through readings, opportunities to network within and outside Wayne State University's art galleries, and hands-on experience. The following operational fundamentals are thoroughly examined: exhibition and season design, marketing, budgeting, and standard facility requirements. Offered Winter.

Repeatable for 6 Credits

ACS 5210 Art Gallery Internship Cr. 1-3

Provides students with opportunities to serve as interns at galleries and museums internal and external to the department. Students update the instructor with documentation of significant projects on which they have worked. Offered Every Term.

Repeatable for 6 Credits

ACS 5550 Special Topics Cr. 3

Students examine specific issues related to one or more of the studio disciplines. Offered for undergraduate credit only. Offered Intermittently.

Restriction(s): Enrollment is limited to Undergraduate level students.

Course Material Fees: \$30

Repeatable for 6 Credits

ACS 5650 Museum Culture: Histories, Critiques, Practices Cr. 3

The art museum as a subject of cultural history and criticism, social policy, and art. Includes panel discussions among museum professionals and opinion leaders, designed to explore current issues. Offered Yearly.

ACS 5996 Honors Project Cr. 3

Students complete a substantial creative project reflecting conceptual issues, determined by the student in collaboration with his/her professor. Offered for undergraduate credit only. Offered Every Term.

Restriction(s): Enrollment is limited to Undergraduate level students.

ACS 5997 Senior Seminar in the Visual Arts Cr. 3

Satisfies General Education Requirement: Writing Intensive Competency Interdisciplinary seminar on contemporary issues in the visual arts including studio practices, history, and criticism. Satisfies the General Education Writing Intensive Course in the Major requirement. Offered for undergraduate credit only. Offered Fall, Winter.

Restriction(s): Enrollment is limited to Undergraduate level students; enrollment limited to students with a class of Senior; enrollment is limited to students with a major in Art or Art Honors; enrollment limited to students in a Bachelor of Fine Arts degree.

ACS 7998 Master of Arts Seminar Cr. 2-3

Directed reading, research, bibliography. Offered fall semester only. Offered Fall.

Restriction(s): Enrollment is limited to Graduate level students; enrollment is limited to students with a major in Art or Art Honors; enrollment limited to students in a Master of Arts degree.

ACS 7999 Master's Essay Direction Cr. 1-3

Offered Fall, Winter.

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students with a class of Candidate Masters; enrollment is limited to students with a major in Art or Art Honors.

ACS 8997 Master of Fine Arts Seminar Cr. 3

Concepts of art; contemporary art problems. Offered Fall.

Restriction(s): Enrollment is limited to Graduate level students; enrollment is limited to students with a major in Art; enrollment limited to students in a Master of Fine Arts degree.

Repeatable for 6 Credits

ACS 8999 Master's Thesis Research and Direction Cr. 1-8

Offered Fall, Winter.

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students with a class of Candidate Masters; enrollment is limited to students with a major in Art History.

Repeatable for 8 Credits

ADA - ART: DIGITAL ART

ADA 2210 Introduction to Digital Practices Cr. 3

Introductory survey of digital methods of art production; digital painting and drawing, 3D modeling, and photo manipulation. Offered Fall, Winter.

Prerequisites: ACO 1200 with a minimum grade of D- or ACO 1230 with a minimum grade of D- or ACO 1270 with a minimum grade of D- or APH 2400 with a minimum grade of D-

Course Material Fees: \$95

ADA 2220 Time-Based Media I: Video Art Cr. 3

Experimental digital video production techniques: complete workflow from camera to post production and DVD authoring. Technical tuition supplemented by readings, critiques, discussions and screenings of key examples of video art. Offered Winter.

Prerequisites: ACO 1200 with a minimum grade of D- or ACO 1230 with a minimum grade of D- or ACO 1270 with a minimum grade of D- or APH 2400 with a minimum grade of D-

Course Material Fees: \$150

ADA 3220 Introduction to Interactivity in Graphic Arts Cr. 3

Exploration of a variety of art-making strategies that utilize digital technologies and interactive media; emphasis on computer-based and online art practices and web-oriented programming languages. Offered Yearly.

Prerequisites: ACO 1200 with a minimum grade of D- or ACO 1230 with a minimum grade of D- or ACO 1270 with a minimum grade of D- or APH 2400 with a minimum grade of D-

Course Material Fees: \$145

Equivalent: AGD 3260

ADA 4220 Time-Based Media II: Experimental Animation Cr. 3

Strategies for creating animation-based artworks by combining traditional techniques with digital technologies. Technical tuition supplemented by readings, critiques, discussions and screenings of key examples of animation art. Offered Yearly.

Prerequisites: ACO 1200 with a minimum grade of D- or ACO 1230 with a minimum grade of D- or ACO 1270 with a minimum grade of D- or APH 2400 with a minimum grade of D-

Course Material Fees: \$125

ADA 4230 Time-Based Media III: Experimental 3D Animation Cr. 3

3D modeling and animation techniques. Technical tuition supplemented by readings, critiques, discussions and screenings featuring various mainstream and experimental examples of 3D animation. Offered Winter.

Prerequisites: ACO 1200 with a minimum grade of D- or ACO 1230 with a minimum grade of D- or ACO 1270 with a minimum grade of D- or APH 2400 with a minimum grade of D-

Course Material Fees: \$165

Repeatable for 6 Credits

ADA 4240 Advanced Interactivity: Experimental Video Games Cr. 3

Studio course focusing on video game creation from a fine arts perspective; emphasizing 2D and 3D experimental and unconventional approaches. Offered Winter.

Prerequisites: ADA 3220 or AGD 3260

Repeatable for 6 Credits

ADA 5830 Directed Projects in Digital Arts Cr. 1-3

Individual problems in electronic arts. Offered Fall, Winter.

Course Material Fees: \$165

Repeatable for 6 Credits

ADA 6230 Advanced Projects in Digital Arts Cr. 3

Research- and project-oriented studio class for intermediate students. Discussion, critique, development and refinement of technical and conceptual approaches to the application of digital technologies within the fine arts. Offered Winter.

Course Material Fees: \$165

Repeatable for 15 Credits

ADA 6250 Advanced Time-Based Media Cr. 3

Advanced projects in time-based media surveying the intersections of 3D Animation, 2D Animation, and video art. Offered Yearly.

Course Material Fees: \$165

Repeatable for 9 Credits

ADA 6830 Special Topics in Digital Arts Cr. 3

In-depth specializations supplementing and building on digital arts courses. Topics may include: programming for artists; sound design and sonic arts. Offered Fall, Winter.

Repeatable for 12 Credits

ADN - ART: DESIGN

ADN 3100 Design Process Cr. 3

Intended for the student who is entering the design field and requires an understanding of brand identity development, design thinking, and product line development. Offered Every Term.

Repeatable for 6 Credits

ADN 6320 History of Modern Design I Cr. 3

Major design trends in America and Europe from mid-nineteenth century to World War I. Covers a broad spectrum of the applied arts. Offered Fall.

Restriction(s): Enrollment limited to students in the Fine, Performing & Comm. Arts; enrollment limited to students in a Bachelor of Arts, Bachelor of Fine Arts or Master of Arts degrees.

ADN 6330 History of Modern Design II Cr. 3

Major design trends in America and Europe from end of World War I through 1950s. Covers a broad spectrum of the applied arts. Offered Winter.

Restriction(s): Enrollment limited to students in the Fine, Performing & Comm. Arts; enrollment limited to students in a Bachelor of Arts, Bachelor of Fine Arts or Master of Arts degrees.

ADR - ART: DRAWING

ADR 1050 Drawing I Cr. 3

Introduction to basic drawing skills such as linear perspective, light and shadow, use of dry and wet media; emphasis on composition. Drawing primarily still life subjects. Offered Fall, Winter.

Course Material Fees: \$30

ADR 1060 Drawing II Cr. 3

Further development of basic drawing skills and concepts. Continued exploration of media. Drawing based on observation and imagination. Offered Fall, Winter.

Prerequisites: ADR 1050

Course Material Fees: \$30

ADR 2070 Beginning Life Drawing Cr. 3

Initial exploration of human figure using limited drawing media; essential aspects of the figure: proportion, gesture, composition. Offered Fall, Winter.

Prerequisites: ADR 1050

Course Material Fees: \$90

ADR 2130 Introduction to Alternative Drawing Methods and Materials Cr. 3

Survey of contemporary and traditional materials and methods of paper making, paper casting, paper cutting and paper folding, as well as an introduction to book binding and altered books. Compositions based on observation and imagination. Offered Yearly.

Prerequisites: ACO 1200

Course Material Fees: \$80

Repeatable for 6 Credits

ADR 3070 Intermediate Life Drawing Cr. 3

Continued systematic study of human figure using broad range of media. Offered Fall, Winter.

Prerequisites: ADR 2070

Course Material Fees: \$90

ADR 5060 Advanced Concepts in Drawing and Painting Cr. 3-6

Emphasis on individual projects using any appropriate medium. Work is created independently (out of class) with scheduled critiques for faculty guidance; may include lectures, demonstrations, off-campus visits. Offered Yearly.

Prerequisites: ADR 3070 and APA 4000

Restriction(s): Enrollment is limited to students in the Department of Art and Art History; enrollment limited to students in a Bachelor of Arts, Bachelor of Fine Arts, Master of Arts or Master of Fine Arts degrees.

Course Material Fees: \$30

Repeatable for 6 Credits

ADR 5070 Advanced Life Drawing Cr. 3

Continued study of human figure based on observation. Composition. Expressive interpretation of the figure through broad range of media. Offered Fall, Winter.

Prerequisites: ADR 3070

Restriction(s): Enrollment is limited to students in the Department of Art and Art History; enrollment limited to students in a Bachelor of Arts, Bachelor of Fine Arts, Master of Arts or Master of Fine Arts degrees.

Course Material Fees: \$90

Repeatable for 6 Credits

ADR 5080 Landscape Drawing Cr. 3

Drawing or painting, as appropriate, outdoors at a variety of urban, suburban, and rural sites in the metropolitan Detroit area; students are expected to drive or carpool to locations within an hour of Detroit. Interpretation of landscape subjects through observation and imagination. Offered Spring/Summer.

Prerequisites: ADR 1050

Restriction(s): Enrollment is limited to students in the Department of Art and Art History.

Course Material Fees: \$30

Equivalent: ADR 7080

Repeatable for 6 Credits

ADR 5090 Anatomy Cr. 3

Superficial human anatomy including effects of muscular and skeletal systems. Drawing from both models and skeletons, lectures, demonstrations. Offered Yearly.

Prerequisites: ADR 2070

Course Material Fees: \$90

ADR 5100 Contexts of Studio Practice Cr. 3

Critical inquiry into art issues, past and present, and contemporary studio practices related to painting. Seminar based on visits to museums, galleries, private collections, artists' studios, and optional trips to major art centers such as New York and Chicago. Offered Yearly.

Restriction(s): Enrollment is limited to students in the Department of Art and Art History.

Equivalent: APA 5100

Repeatable for 6 Credits

ADR 5160 Advanced Alternative Drawing Methods and Materials Cr. 3

Survey of contemporary and traditional materials and methods of paper making, paper casting, paper cutting and paper folding, as well as an introduction to book binding and altered books. New techniques will be incorporated into a personal body of work. Offered Yearly.

Prerequisites: ACO 1200, ADR 1050, and ADR 1060

Course Material Fees: \$80

Repeatable for 6 Credits

ADR 5800 Directed Projects: Drawing Cr. 3-6

Individual work supervised by faculty on arranged basis. Offered Fall, Winter.

Restriction(s): Enrollment is limited to students in the Department of Art and Art History; enrollment limited to students in a Bachelor of Arts, Bachelor of Fine Arts, Master of Arts or Master of Fine Arts degrees.

Repeatable for 998.99 Credits

ADR 7060 Graduate Problems in Drawing and Painting Cr. 3-9

Emphasis on self-directed projects with advice from faculty. May include lectures, demonstrations, and visits to off-campus sites. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate level students; enrollment is limited to students in the Department of Art and Art History.

Course Material Fees: \$30

Equivalent: ADR 5060

Repeatable for 24 Credits

ADR 7070 Graduate Life Drawing Cr. 3

Individual projects based upon study of the human figure. Broad range of media encouraged. Offered Fall, Winter.

Prerequisites: ADR 5070

Restriction(s): Enrollment is limited to Graduate level students; enrollment is limited to students in the Department of Art and Art History.

Course Material Fees: \$90

Repeatable for 9 Credits

ADR 7080 Landscape Drawing Cr. 3

Drawing or painting, as appropriate, outdoors at a variety of urban, suburban and rural sites in the metropolitan Detroit area; students are expected to drive or carpool to locations within an hour of Detroit. Interpretation of landscape subjects through observation and imagination. Offered Spring/Summer.

Restriction(s): Enrollment is limited to Graduate level students; enrollment is limited to students in the Department of Art and Art History.

Course Material Fees: \$30

Equivalent: ADR 5080

Repeatable for 15 Credits

ADR 8800 MFA Studio: Drawing Cr. 3-9

Extended self-directed work in drawing (eighteen to twenty-seven hours per week). Consultation with appropriate graduate faculty on an arranged basis. Offered Fall, Winter.

Restriction(s): Enrollment is limited to Graduate level students; enrollment is limited to students in the Department of Art and Art History; enrollment limited to students in a Master of Fine Arts degree.

Repeatable for 36 Credits

ADX - ART AND DESIGN EXPOSURE

ADX 1420 Digital Imaging and Video for Non-Art/Design Majors Cr. 3
Introductory survey of methods for the production of digital images and video editing and compositing techniques students, who are not majoring in a program within the Department of Art and Art History. Offered Every Term.

ADX 1020 Web Design and Interactive Art for Non-Art/Design Majors Cr. 3
Introductory survey of methods for the production of web-based art and interactive web content for students, who are not majoring in a program within the Department of Art and Art History. Offered Every Term.

Restriction(s): Enrollment is limited to students in the Department of Art and Art History.

ADX 1030 3D Modeling for Non-Art/Design Majors Cr. 3
Introductory survey of methods in 3D Modeling and digital manufacturing techniques for students, who are not majoring in a program within the Department of Art and Art History. Offered Every Term.

Restriction(s): Enrollment is limited to students in the Department of Art and Art History.

ADX 1060 Introduction to Jewelry and Metalsmithing for Non-majors Cr. 3

Introduces jewelry and metalsmithing skills and techniques as well as the history of jewelry and metalsmithing, and contemporary practices. The course is intended for those interested in learning how to create jewelry-metal works but are not majoring in a program within the Department of Art and Art History. Offered Every Other Year.

Restriction(s): Enrollment is limited to students in the Department of Art and Art History.

Course Material Fees: \$75

Repeatable for 6 Credits

ADX 1100 Creative Inquiry Cr. 3

Focuses on creative ideation processes that can be applied to the research and development of innovative projects across disciplines. Through readings, writings, analysis of prominent creative thinkers and artists, hands-on exercises, and critique students will critically analyze the creative process and the works it generates. Intended for students who are not majoring in a program within the Department of Art and Art History. Offered Fall, Winter.

Restriction(s): Enrollment is limited to students in the Department of Art and Art History.

ADX 1210 Introduction to Studio Art and Design for Non-majors Cr. 3
Students will explore, through lecture and hands-on manipulation, the principles elements of visual communication, and introduce techniques and materials that are used to produce two-dimensional (Surface), three-dimensional (Space), and time-based (Time) works of art. The course is intended for students who are not majoring in a program within the Department of Art and Art History. Offered Fall, Winter.

Restriction(s): Enrollment is limited to students in the Department of Art and Art History.

Course Material Fees: \$35

ADX 1400 Photography for Non-Art/Design Majors Cr. 3

Introduces technical, artistic, and theoretical problems associated with photography. Through this class, students will learn how to use their camera as a tool for personal expression as well as analyze and critique photography's use in visual culture. The course will encompass lectures, demonstrations, readings and projects involving basic photographic techniques and image construction using a digital camera. It is intended for those interested in learning how to make and discuss photographs, but are not majoring in a program within the Department of Art and Art History. Offered Every Term.

Restriction(s): Enrollment is limited to students in the Department of Art and Art History.

AED - ART EDUCATION

AED 5000 Introduction to Art Education Cr. 3

Design of developmentally appropriate and comprehensive art experiences, teaching strategies, and authentic assessment of student learning in art. History, theories and philosophies of visual arts education; contemporary trends and issues. Offered Fall.

Restriction(s): Enrollment limited to students in the College of Education.

Course Material Fees: \$15

AED 5020 Painting: Methods and Materials Cr. 3

Methods, materials and processes suitable for teaching painting in the schools. Subject selection, composition, surface selection and preparation, mixing and application of paint, finishing, and presentation. Students develop basic skills in painting for personal artistic expression. Offered Fall.

Restriction(s): Enrollment limited to students in the College of Education.

Course Material Fees: \$15

Repeatable for 9 Credits

AED 5050 Integrating the Arts into the Elementary Classroom Cr. 3

Satisfies General Education Requirement: Cultural Inquiry, Visual Performing Arts

Introductory course: integration of visual arts, music, dance, and theatre into the teaching, learning and curriculum of the elementary classroom. Offered Fall, Winter.

Prerequisites: 2 of ELE 3300, ELE 3400, ELE 3500, ELE 3600, ELE 6290, ELE 6390, ELE 6500, ELE 6600 and 1 of ELE 3320, ELE 6310 and TED 5150

Course Material Fees: \$30

AED 5070 Methods and Materials of Sculptural Expression Cr. 3

Exploration of three-dimensional forms using various media; emphasis on sculptural concepts, materials, tools and techniques related to teaching sculpture on the elementary and secondary level. Offered Fall.

Restriction(s): Enrollment limited to students in the College of Education.

Course Material Fees: \$15

AED 5100 Topics in Art Education Cr. 1-3

Art experiences designed for the specific needs of special groups. Topics to be announced in Schedule of Classes. Offered Winter.

Restriction(s): Enrollment limited to students in the College of Education.

Course Material Fees: \$15

AED 5150 Computer Graphics in the Classroom Cr. 3

Introduction to digital media and the production of computer graphics by using drawing, painting, graphic design, animation, video and web techniques. Offered Spring/Summer.

Restriction(s): Enrollment limited to students in the College of Education.

AED 5160 Theory and Practice in Art Education Cr. 3

Development and analysis of instructional objectives in art education; organization and management of art classrooms; teaching strategies and assessment practices. Offered Spring/Summer.

Restriction(s): Enrollment limited to students in the College of Education.

AED 5230 Ceramics Education I Cr. 3

An overview of handbuilding processes, various firing procedures including blackware and raku, decorating, glazing and equipment maintenance. Emphasis placed on the educational benefits and procedures for working with people of various ages and the management of materials for teaching. Offered Spring/Summer.

Restriction(s): Enrollment limited to students in the College of Education.

Course Material Fees: \$25

AED 5280 Printmaking: Methods and Materials Cr. 3

Studio exploration of relief, planographic, intaglio, and stencil processes as methods of reproduction for artistic expression. Examination of tools, methods and processes suitable for the classroom. Includes study in lithography, dry point, etching, calligraphy, woodcut, linocut, and photo screen processes. Offered Spring/Summer.

Restriction(s): Enrollment limited to students in the College of Education.

Course Material Fees: \$15

Repeatable for 9 Credits

AED 5650 Art Teaching Laboratory Cr. 3

Laboratory experience in teaching art to elementary, middle, and high school students. Pre-student teaching experiences under close supervision of an experienced Visual Arts teacher. Offered Fall.

Prerequisites: May be taken concurrently: AED 5100 with a minimum grade of D- and AED 5160 with a minimum grade of D-

Restriction(s): Enrollment limited to students in the College of Education.

AED 5690 Collage, Assemblage, and Multi-Media: Methods and Materials Cr. 3

History and methods of creating collage, assemblage, and multi-media art works. Integration of developmental issues, use of personal meaning and experience for lesson planning, unit planning, and work assessment strategies. Offered Winter.

Prerequisites: ADR 1050, ADR 1060, AH 1110, and AH 1120 or ADR 2070, APA 2100, and ASL 2150

Course Material Fees: \$40

AED 5890 The Art of Indigenous Cultures: Inclusion in the K-12 Curriculum Cr. 3

Focus on non-Western, indigenous art forms, such as Balinese architecture, ceramics of Papua New Guinea, Aboriginal painting, Precolumbian culture, and Japanese gardens; means of integrating this content into the K-12 Curriculum. Offered Winter, Spring/Summer.

Prerequisites: AH 1110 and AH 1120

AED 6230 Ceramics Education II Cr. 3

Emphasis is placed on throwing procedures, the use of various clay bodies, firing at various temperatures, making and using tools, ceramic history and its use and benefits in a school curriculum. Offered Spring/Summer.

Restriction(s): Enrollment limited to students in the College of Education.

Course Material Fees: \$35

Repeatable for 9 Credits

AED 6300 Explorations in Art Therapy Cr. 3

Provides non-majors with introduction to art therapy, its history and development, and major approaches. Offered Yearly.

AED 6320 Art Therapy: Introduction and Ethics Cr. 3

Introduction to and ethics of art therapy practice. Offered Yearly.

Course Material Fees: \$25

AED 6340 Theory of Art Therapy Cr. 3

Slide lectures, studio experiences, assigned readings, discussions, and critical evaluations in the history and literature of art therapy and closely-related fields. Offered Yearly.

AED 6360 Aspects of Art Therapy Cr. 1-12

Aspects of the use of art therapy chosen to develop students' breadth or depth in art therapy practice with various groups and settings. Offered Yearly.

Repeatable for 12 Credits

AED 6910 Multicultural Issues in Visual Arts Education and Art Therapy Cr. 2-3

Provides all visual arts education and art therapy students with discipline-specific experiences, current theoretical perspectives, and best practices to enhance the effectiveness of their work in diverse and multicultural learning or therapeutic environments. Requires 40 hours of Service Learning in the community. Offered Winter.

Restriction(s): Enrollment limited to students in the College of Education.

AED 7300 Studio Art Therapy Cr. 3

Students focus on studio art in the development of art experientials to address various client needs. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate level students.

Course Material Fees: \$25

AED 7310 Art Therapy with Groups Cr. 4

Therapeutic factors of groups; facilitation of art therapy groups. Offered Winter.

Prerequisites: AED 6320 and AED 6340 and AED 7300

Restriction(s): Enrollment is limited to Graduate level students.

Course Material Fees: \$25

AED 7330 Art Therapy in the Schools Cr. 3

Slides, lectures and studio experiences relating to the research, theory and practices of art therapy with children. Offered Every Other Year.

Restriction(s): Enrollment is limited to Graduate level students.

Course Material Fees: \$25

AED 7340 Art Therapy with Adults: Assessment and Practice Cr. 3

In-depth presentation of theory, practice and research in art therapy with older adults. Slides, lectures, studio experiences. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate level students.

Course Material Fees: \$25

AED 7380 Art Therapy Practicum Cr. 2-3

Laboratory experience and lecture in art therapy with children and/or adults. Includes assessment, planning goals and objectives, implementing the session, evaluating the session, case supervision, and the assessment of and development of therapeutic skills. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate level students.

Course Material Fees: \$25

Equivalent: CED 7150, RCI 7430

AED 7700 Advanced Graduate Problems Cr. 3-12

Pursuit of specific problems in depth. Laboratory hours coordinated with regularly scheduled classes in the selected area. Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students.

Course Material Fees: \$15

Repeatable for 12 Credits

AED 7890 Art Therapy Internship Cr. 1-6

Supervised advanced internship of 600 hours in the practice of art therapy with individuals, groups and/or families; includes regular seminar in which art therapy methods in various fields are explored. Offered Every Other Year.

Restriction(s): Enrollment is limited to Graduate level students.

Equivalent: CED 7020, RCI 7460

Repeatable for 6 Credits

AET - ALTERNATIVE ENERGY TECHNOLOGY

AET 5110 Fundamental Fuel Cell Systems Cr. 4

Introduce various types of fuel cells, materials properties of electrodes and polymeric membranes, and electrochemical mechanisms. Reforming of various types of hydrocarbon fuel to hydrogen, and reforming technology. Offered Fall.

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students in the College of Engineering.

Equivalent: CHE 5110, EVE 5130, ME 5110

AET 5120 Fundamentals of Alternative Energy Technology Cr. 4

Provide an overview/review of thermodynamics. Cover advanced thermodynamics topics of energy and chemical reacting systems. Introduce general areas of alternative energy technology, engineering analysis and design of solar angle/time/radiation, solar heating, solar photovoltaic, and wind power. Offered Winter.

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students in the College of Engineering.

Equivalent: ME 5120

AET 5250 Alternative Energy Technology System and Design Cr. 4

Topics such as: batteries, flywheels, capacitors, motors, controllers, power management, heat dissipation, systems containment, manufacturing processes, systems dynamics. Lectures and design projects. Offered Fall.

Prerequisites: AET 5120

Restriction(s): Enrollment is limited to Graduate or Undergraduate level students; enrollment limited to students in the College of Engineering.

AET 5310 Fundamentals of Battery Systems for Electric and Hybrid Vehicles Cr. 4

Covers fundamental electrochemistry and engineering aspects for electric propulsion batteries including lead acid, nickel metal hydride, lithium ion and capacitor technologies. Offered Winter.

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students in the College of Engineering.

Equivalent: CHE 5120, EVE 5120, ME 5215

AET 5330 Modeling and Control of Power Electronics and Electric Vehicle Powertrains Cr. 4

Basic methodologies for modeling, control system design of renewable power sources and power electronics systems. Offered Fall.

Restriction(s): Enrollment is limited to Graduate or Undergraduate level students; enrollment limited to students in the College of Engineering.

Equivalent: ECE 5330, EVE 5430

AET 5410 Energy, Emissions, Environment (E3) Design Cr. 3

Provides students the tools to uncover the relation between energy consumption and energy generation and optimize processes to take most advantage of low emitting energy options. Exposes students to design tools and methodologies from a diverse group of sources including US EPA, DOE, EIA, and the latest in emerging research. Offered Fall.

Equivalent: CE 5410, STE 5410

AET 5600 Integrated Product Development Cr. 3

Product development process: product architectures, concurrent engineering. Integration of marketing, design, and manufacturing functions for product development. How such processes are designed to account for various manufacturing and other business constraints to ensure that customer needs are met. Offered Fall.

Restriction(s): Enrollment limited to students in the College of Engineering.

Equivalent: EVE 5600, IE 6405

AET 5810 Power Management for Advanced Energy Storage Systems and its Applications Cr. 4

Operating principles and modeling of energy storage techniques; control and power management, power electronic converters, electric machines, and power systems; power management strategies of hybrid energy systems including HEV and alternative energy systems. Offered Fall, Winter.

Prerequisites: ECE 4470

Restriction(s): Enrollment limited to students in the College of Engineering.

Equivalent: EVE 5810

AET 7990 Directed Study Cr. 1-4

Independent projects on subjects of interest in advanced energy technology. Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students.

Repeatable for 4 Credits

AET 7991 Internship in Industry Cr. 1-4

Industrial internship in alternative energy technology. Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students.

AET 8996 Directed Research Cr. 1-4

Independent research projects. Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students.

AET 8999 Master's Thesis Research and Direction Cr. 1-8

Offered Every Term.

Restriction(s): Enrollment is limited to Graduate level students.

Repeatable for 8 Credits

AFA - ART: DESIGN AND MERCHANDISING

AFA 2410 Textiles Cr. 3

Introduction to fibers, yarns, fabric construction, design and finishes and how they relate to selection, use and care of textile products. Offered Fall, Winter.

Course Material Fees: \$35

AFA 2420 Fashion Design: Basic Construction Cr. 3

Application of color and design principles in construction of structured and unstructured garments. Offered Fall, Winter.

Course Material Fees: \$65

AFA 3400 Clothing and Culture Cr. 3

Functions and meanings of dress in diverse cultures and contemporary society with an interdisciplinary approach. Offered Fall.

AFA 3410 Textile Performance Analysis Cr. 3

Recent technological developments; introduction to textile testing, product analysis and industry specifications. Offered Winter.

Prerequisites: AFA 2410

Restriction(s): Enrollment is limited to students in the Department of Art and Art History.

Course Material Fees: \$40

AFA 3420 Fashion Design: Advanced Construction Cr. 3

Advanced methods of garment construction and fitting techniques. Development of skills in garment fit, shape and finish techniques. Introduction to flat pattern manipulation to create custom bespoke garments. Offered Fall.

Prerequisites: AFA 2410 with a minimum grade of D- and AFA 2420 with a minimum grade of D-

Course Material Fees: \$65

AFA 3460 Introduction to Merchandising Cr. 3

Psychological, economic considerations. Terminology and structure of the fashion industry and career opportunities. Offered Fall, Winter.

AFA 3470 Merchandise Information Cr. 3

Quality and value in merchandising. Manufacturing processes, government regulations and selling points in hard and soft lines. Offered Winter.

AFA 4430 Fashion Illustration Cr. 3

Basic fashion rendering techniques using a variety of media. Offered Every Other Year.

Prerequisites: ADR 1050

Restriction(s): Enrollment is limited to students in the Department of Art and Art History; enrollment limited to students in a Bachelor of Arts, Bachelor of Science or Master of Arts degrees.

Course Material Fees: \$40

Repeatable for 6 Credits

AFA 4990 Directed Study Cr. 2-4

Offered Every Term.

Restriction(s): Enrollment is limited to students in the Department of Art and Art History; enrollment limited to students in a Bachelor of Arts, Bachelor of Science or Master of Arts degrees.

Repeatable for 4 Credits

AFA 5422 Fashion Design: Flat Pattern Cr. 3

Original designs from a basic sloper. Offered Yearly.

Prerequisites: AFA 2410 with a minimum grade of D-

Course Material Fees: \$25

Repeatable for 9 Credits

AFA 5430 History of Costume Cr. 3

Survey of historic costumes from prehistoric to present. Emphasis on influence of social factors. Offered Fall.

AFA 5442 Fashion Design: Draping Cr. 3

Creation of original garments by draping on half-scale and standard-size dress forms. Offered Intermittently.

Course Material Fees: \$65

Repeatable for 9 Credits

AFA 5452 Fashion Design: Tailoring Cr. 3

Tailoring techniques applied to coats and suits. Offered Fall.

Prerequisites: AFA 2420 with a minimum grade of D- and AFA 5422 with a minimum grade of D- and AFA 5442 with a minimum grade of D-

Course Material Fees: \$65

Repeatable for 6 Credits

AFA 5460 Merchandising II Cr. 3

Current trends in merchandising. Emphasis on global aspects. Offered Fall.

Prerequisites: AFA 3460

Restriction(s): Enrollment is limited to students in the Department of Art and Art History; enrollment limited to students in a Bachelor of Arts, Bachelor of Science or Master of Arts degrees.

AFA 5470 Visual Merchandising: Display Cr. 3

Visual merchandising concepts and trends. Relationship of design elements and principles to the tools and structures used in display. Creative experimentation in the various media. Offered Fall, Winter.

Prerequisites: ACO 1200 and ACO 1230

Restriction(s): Enrollment is limited to students in the Department of Art and Art History; enrollment limited to students in a Bachelor of Arts, Bachelor of Science or Master of Arts degrees.

Course Material Fees: \$65

AFA 5472 Special Topics in Fashion Cr. 1-6

Application of unique printed and dyed fabrics to garment design.

Surface design processes and motif development relating directly to clothing design are stressed, along with advanced garment construction techniques. Offered Spring/Summer.

Prerequisites: AFA 2420 with a minimum grade of D- and AFI 2660 with a minimum grade of D-

Course Material Fees: \$60

Repeatable for 12 Credits

AFA 5490 Economics of Merchandising Cr. 3

Application of merchandising principles and systematic planning to achieve profit goals. Offered Winter.

Prerequisites: AFA 3460

Restriction(s): Enrollment is limited to students in the Department of Art and Art History; enrollment limited to students in a Bachelor of Arts, Bachelor of Science or Master of Arts degrees.

AFA 5992 Supervised Field Experience Cr. 3

Supervised field experience designed to correlate classroom theory with practical work. Offered Fall.

Restriction(s): Enrollment limited to students with a class of Senior; enrollment is limited to students in the Department of Art and Art History; enrollment limited to students in a Bachelor of Arts, Bachelor of Science or Master of Arts degrees.

Repeatable for 6 Credits

AFA 5997 Seminar Cr. 3

Satisfies General Education Requirement: Writing Intensive Competency
Topics to be announced in Schedule of Classes. Course satisfies the General Education Writing Intensive Course in the Major requirement. Offered for undergraduate credit only. Offered Winter.

Prerequisites: AFS 2390 with a minimum grade of C or ENG 2390 with a minimum grade of C or ENG 3010 with a minimum grade of C or ENG 3020 with a minimum grade of C or ENG 3050 with a minimum grade of C

Restriction(s): Enrollment is limited to Undergraduate level students; enrollment is limited to students with a major in Design and Merchandising; enrollment limited to students in a Bachelor of Arts, Bachelor of Science or Master of Arts degrees.

AFA 6440 Computer-Aided Design for Apparel Design Cr. 3

Use of computer-aided design software applied to apparel design concepts; garment designing, grading, and marker-making. Offered Winter.

Prerequisites: AFA 5440

Restriction(s): Enrollment is limited to students in the Department of Art and Art History; enrollment limited to students in a Bachelor of Arts, Bachelor of Science or Master of Arts degrees.

Course Material Fees: \$40

AFA 6993 Study Tour Cr. 3

Group tour to major market sources; observation and analysis of products and marketing procedures. Topics to be announced in Schedule of Classes. Offered Every Other Spr/Sum.

Restriction(s): Enrollment is limited to students in the Department of Art and Art History; enrollment limited to students in a Bachelor of Arts, Bachelor of Fine Arts, Bachelor of Science, Master of Arts or Master of Fine Arts degrees.

AFA 7410 Practicum in Textile Testing Cr. 3

Recent developments in textiles and quality assurance practices. Standardized testing methods to determine textile properties and performance. No credit after AFA 3410. Offered Winter.

Restriction(s): Enrollment is limited to Graduate level students; enrollment is limited to students in the Department of Art and Art History; enrollment limited to students in a Bachelor of Arts, Bachelor of Science or Master of Arts degrees.

Course Material Fees: \$25

AFA 7850 Seminar Cr. 3

Development and practice of the research process and effective writing skills. Offered Winter.

Restriction(s): Enrollment is limited to Graduate level students; enrollment is limited to students in the Department of Art and Art History; enrollment limited to students in a Bachelor of Arts, Bachelor of Science or Master of Arts degrees.

AFA 7990 Directed Study Cr. 1-4

Individual projects. Offered Fall, Winter.

Restriction(s): Enrollment is limited to Graduate level students; enrollment is limited to students in the Department of Art and Art History; enrollment limited to students in a Bachelor of Arts, Bachelor of Science or Master of Arts degrees.

Repeatable for 8 Credits

AFI - ART: FIBERS

AFI 2650 Beginning Weaving Cr. 3

Weaving techniques on a frame loom. Design concepts through application of tapestry, flossa, sumac, inlay and wrapping process. Exploring fabric weaving by using simple weave patterns. Offered Every Term.

Course Material Fees: \$135

AFI 2660 Introduction to Fabric Printing and Dyeing Cr. 3

Emphasis on color, design, composition. Printing with found objects, stencil, silk screen resist method working with pigment and reactive dye. Offered Every Term.

Course Material Fees: \$110

AFI 3640 Digital Textile Design Cr. 3

Explore textile design by researching current print and pattern trends in the apparel industry, gaining knowledge and inspiration. Develop innovative pattern collections using original artwork in Adobe Photoshop and Illustrator. Access to the most recent version of Adobe Photoshop and Illustrator is required for this class. Offered Winter.

Prerequisites: ACO 1200 with a minimum grade of C and ADR 1050 with a minimum grade of C

Course Material Fees: \$92

AFI 3650 Intermediate Weaving and Fiber Arts Cr. 3

Design on four- and eight-harness looms, off loom construction techniques, and pattern development. Traditional and computerized pattern drafting/development, layer weaving, woven shibori, ikat, crochet, sprang, felting, and other fiber art techniques will be offered on a rotating basis. Offered Every Term.

Restriction(s): Enrollment limited to students in the Fine, Performing & Comm. Arts; enrollment limited to students in a Bachelor of Arts, Bachelor of Fine Arts, Bachelor of Science, Master of Arts or Master of Fine Arts degrees.

Course Material Fees: \$135

AFI 3660 Intermediate Fibers: Printing and Dyeing Cr. 3

Continuation of AFI 2660. Deeper study of fiber reactive dye; beginning of development of personal style. Offered Every Term.

Restriction(s): Enrollment limited to students in the Fine, Performing & Comm. Arts; enrollment limited to students in a Bachelor of Arts, Bachelor of Fine Arts, Bachelor of Science, Master of Arts or Master of Fine Arts degrees.

Course Material Fees: \$110

Repeatable for 6 Credits

AFI 5650 Weaving: Senior Project Cr. 3

Directed project in weaving. Research and written evaluative statement required. Offered Every Term.

Prerequisites: AFI 3650

Restriction(s): Enrollment limited to students in the Fine, Performing & Comm. Arts; enrollment limited to students in a Bachelor of Arts, Bachelor of Fine Arts, Bachelor of Science, Master of Arts or Master of Fine Arts degrees.

Course Material Fees: \$135

Equivalent: AFI 3650, AFI 7650

Repeatable for 6 Credits

AFI 5660 Fabric Printing and Dyeing: Senior Project Cr. 3

Extensive project or series of works determined by student; research and written statement. Offered Every Term.

Prerequisites: AFI 3660

Restriction(s): Enrollment limited to students in the Fine, Performing & Comm. Arts; enrollment limited to students in a Bachelor of Arts, Bachelor of Fine Arts, Bachelor of Science, Master of Arts or Master of Fine Arts degrees.

Course Material Fees: \$110

Repeatable for 6 Credits

AFI 5870 Directed Projects: Fibers Cr. 3-6

Individual problems. Offered Fall, Winter.

Restriction(s): Enrollment limited to students in the Fine, Performing & Comm. Arts; enrollment limited to students in a Bachelor of Arts, Bachelor of Fine Arts, Bachelor of Science, Master of Arts or Master of Fine Arts degrees.

Repeatable for 998.99 Credits

AFI 7650 Graduate Problems in Weaving Cr. 3

Advanced problems in weaving. Offered Every Term.

Prerequisites: AFI 5650

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students in a Master of Arts or Master of Fine Arts degrees.

Course Material Fees: \$40

Repeatable for 9 Credits

AFI 7660 Graduate Problems: Fabric Printing and Dyeing Cr. 3

Individual problems in fibers. Offered Every Term.

Prerequisites: AFI 5660

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students in a Master of Arts or Master of Fine Arts degrees.

Course Material Fees: \$40

Repeatable for 9 Credits

AFI 8860 MFA Studio: Fibers Cr. 3-9

Supervised creative work done in the major concentration. Offered Fall, Winter.

Restriction(s): Enrollment is limited to Graduate level students; enrollment is limited to students with a major in Art; enrollment limited to students in a Master of Fine Arts degree.

Course Material Fees: \$40

Repeatable for 36 Credits

AFS - AFRICAN AMERICAN STUDIES

AFS 1010 Introduction to African American Studies Cr. 3

Satisfies General Education Requirement: Diversity Equity Incl Inquiry, Social Inquiry

An interdisciplinary approach to exploring several broad issues, topics, theories, concepts and perspectives which describe and explain the experiences of persons of African descent in America, the Continent, and the diaspora. Offered Every Term.

AFS 2010 African American Culture: Historical and Aesthetic Roots Cr. 4

Satisfies General Education Requirement: Cultural Inquiry, Civ and Societies (CLAS only), Diversity Equity Incl Inquiry

Examination of the historical, traditional and aesthetic bases of a variety of cultural forms – language, literature, music – of the Black experience. Offered Every Term.

AFS 2210 Black Social and Political Thought Cr. 4

Satisfies General Education Requirement: Civic Literacy, Diversity Equity Incl Inquiry, Social Inquiry, Social Sciences

Survey of the Black intellectual and political tradition from the United States, the Caribbean and Africa. Offered Every Term.

AFS 2245 Blacks and Sport in the United States Cr. 3

The intersection between race and sport in the United States, examined to better understand the role of sports in our socialization and cultural construction. Offered Every Other Year.

Restriction(s): Enrollment is limited to Undergraduate level students.

Equivalent: SOC 2245

AFS 2250 AfroLatino/a History and Culture Cr. 3

Satisfies General Education Requirement: Cultural Inquiry

Interdisciplinary introduction to the history and culture of AfroLatinos/as in the U.S. from the perspective of the African Diaspora in the Americas. Offered Winter.

Equivalent: LAS 2250

AFS 2350 Black Detroit Cr. 3

Satisfies General Education Requirement: Diversity Equity Incl Inquiry
Explores the historical, cultural and structural aspects of the Black urban experience in Detroit from the late 19th Century to the present, including the role that racism, urbanization and suburbanization have played in shaping racial, spatial and economic inequality in the Detroit Metropolitan area. Utilizes an interdisciplinary approach: to interrogate the social and cultural history of Black Detroit, to examine the various forms of Black social movement activism used by Black Detroiters in the 20th Century, and to analyze ways the shifting economic and political currents shaped, and reshaped racism, class, space, and resistance in the Detroit metropolitan area. Offered Fall, Winter.

Equivalent: HIS 2350, US 2350

AFS 2390 Introduction to African-American Literature: Literature and Writing Cr. 3

Satisfies General Education Requirement: Diversity Equity Incl Inquiry, Intermediate Comp Pre-2018, Intermediate Comp Post-2018

Introduction to major themes and some major writers of African-American literature, emphasizing modern works. Reading and writing about representative poetry, fiction, essays, and plays. Offered Every Term.

Prerequisites: ENG 1020 with a minimum grade of C or ENG 1050 with a minimum grade of C or College Level Exam Program with a test score minimum of BC-BD or AA Exempt from Gen Ed MACRAO with a test score minimum of 100 or Michigan Transfer Agreement with a test score minimum of 100 or BA Competencies Waiver with a test score minimum of 100

Equivalent: ENG 2390

AFS 2600 Race and Racism in America Cr. 3

Satisfies General Education Requirement: Diversity Equity Incl Inquiry
Examination of the nature and practice of racism in American society from its historical foundations to its contemporary institutional forms. Offered Every Other Year.

Equivalent: SOC 2600

AFS 3140 African American History I: 1400-1865 Cr. 3-4

Satisfies General Education Requirement: Diversity Equity Incl Inquiry
African origins of African Americans; transition from freedom to slavery; status of African Americans under slavery. Offered Yearly.

Equivalent: HIS 3140

AFS 3150 African American History II: 1865-1968 Cr. 3-4

Satisfies General Education Requirement: Diversity Equity Incl Inquiry
African American history from Reconstruction through the Civil Rights Movement. Offered Yearly.

Equivalent: HIS 3150

AFS 3155 African American History III: 1968 - Present Cr. 3-4

Satisfies General Education Requirement: Diversity Equity Incl Inquiry
History of African Americans' struggle against persistent and stubborn racism, efforts to achieve full citizenship, and legal and economic justice after 1968. Offered Intermittently.

Restriction(s): Enrollment is limited to Undergraduate level students.

Equivalent: HIS 3155

AFS 3160 Black Urban History Cr. 4

Satisfies General Education Requirement: Diversity Equity Incl Inquiry
Historical experience of African Americans in urban areas; impact of their communities on urban development from 1860 to contemporary times. Offered Fall, Winter.

Equivalent: HIS 3160

AFS 3170 Ethnicity and Race in American Life Cr. 3-4

Satisfies General Education Requirement: Diversity Equity Incl Inquiry
Exploration of complicated relationship between ethnic and racial diversity and the making of America. Using historical, literary, and cultural readings and sources to examine key themes: Who was the "Other"? What is an "American"? Offered Yearly.

Equivalent: HIS 3170

AFS 3180 Black Social Movements Cr. 4

Satisfies General Education Requirement: Diversity Equity Incl Inquiry
Survey of mass or popular Black movements with emphasis on their political and cultural impact, historical continuity and organization. Offered Yearly.

Equivalent: HIS 3180

AFS 3200 The African-American Film Experience Cr. 4

Historical and contemporary portrayals of African American people in narrative and documentary film. Emphasis on filmic approaches to race relations, cinematic elaboration of racial stereotypes, and legitimation functions of film. Offered Yearly.

Restriction(s): Enrollment is limited to Undergraduate level students.

Equivalent: COM 3230

AFS 3230 The Civil Rights Movement Cr. 3

Historically-driven survey of the Civil Rights Movement; focus on African Americans' efforts to enjoy the full benefits of American citizenship. Offered Yearly.

Restriction(s): Enrollment is limited to Undergraduate level students.

Equivalent: HIS 3230

AFS 3250 Politics and Culture in Anglophone Caribbean Cr. 3

Satisfies General Education Requirement: Civic Literacy, Foreign Culture, Global Learning Inquiry

Survey of political, economic and cultural life of the Caribbean.

Relationship of the Caribbean to U.S. and world political and cultural developments. Interdisciplinary approach: historical, comparative, thematic issues. Offered Yearly.

AFS 3360 Black Workers in American History Cr. 4

Satisfies General Education Requirement: Social Inquiry

Survey course. Slave and free workers during antebellum period; skill trades, sharecropping, menial labor, and coal mining during Reconstruction; labor struggles and job discrimination in the twentieth century. Offered Fall, Winter.

Equivalent: HIS 3360

AFS 3420 Pan Africanism: Politics of the Black Diaspora Cr. 4

Satisfies General Education Requirement: Global Learning Inquiry

Interplay of Pan Africanism as a cultural and socio-political movement in world politics from its origins as a concept to organizing practice worldwide. Offered Yearly.

Equivalent: PS 3820

AFS 3500 Special Topics Cr. 3

Specialized and topical studies in historical events, personalities and themes. Topics to be announced in the schedule of classes. Offered Every Term.

Repeatable for 9 Credits

AFS 3610 Interdisciplinary Perspectives on Foreign Culture: The Africans Cr. 4

Satisfies General Education Requirement: Foreign Culture, Global Learning Inquiry

Humanistic aspects, history, socio-cultural institutions of African cultures; theory and methods, comparativist perspectives. Offered Yearly.

AFS 3750 African American Art Cr. 3

Historical inquiry of African American art from the eighteenth century to today. Offered Yearly.

Equivalent: AH 3750

AFS 3760 Art of the African Diaspora Cr. 3

Examines art of the African Diaspora and how this history of dissemination affected art making in various geographical, cultural, and sociopolitical paradigms. Offered Fall.

Equivalent: AH 3760

AFS 4240 African Americans in Television Cr. 4

Historical overview of African Americans in radio and television with emphasis on three areas of study: news and documentary; entertainment and advertising; and ownership, employment and access. Offered Yearly.

Equivalent: COM 4240

AFS 5030 African American Politics Cr. 4

Nature and texture of black politics; various perspectives on politics by blacks; the impact of blacks on American politics. Offered Every Other Year.

Equivalent: PS 5030

AFS 5110 Black Women in America Cr. 3

Satisfies General Education Requirement: Writing Intensive Competency
Social, cultural, artistic and economic development of Black women in America; topics include: racism, sexism, marriage, motherhood, feminism, and the welfare system. Offered Yearly.

Equivalent: GSW 5110

AFS 5220 Black Dramatic Literature and Performance Cr. 3

Satisfies General Education Requirement: Diversity Equity Incl Inquiry
Critical study of significant Black dramatists of the American stage: Willis Richardson, Marita Bonner, Randolph Edmonds, Langston Hughes, Alice Childress, Lorraine Hansberry, Ed Bullins, Amiri Baraka, Ntozake Shange, and August Wilson. Offered Yearly.

Course Material Fees: \$10

Equivalent: THR 5821

AFS 5230 The Civil Rights Movement Cr. 3

Historically-driven survey of the Civil Rights Movement; focus on African Americans' efforts to enjoy the full benefits of American citizenship. Offered Yearly.

Equivalent: HIS 5235

AFS 5241 American Slavery Cr. 4

Rise, expansion, and demise of slavery in the United States. Study of the five generations of Americans who lived with this institution; the unique imprint of slavery on American history and collective memory. Offered Yearly.

AFS 5261 African Americans, History and Memory Cr. 3

An examination of the ways different groups and institutions remember and forget African American history. Each term the course will have a specific focus that will be advertised in advance. Offered Fall.

Equivalent: HIS 5261

Repeatable for 6 Credits

AFS 5310 Special Topics in African American Studies Cr. 3-4

Topics to be announced in Schedule of Classes; topics may include: Caribbean politics, African development, male-female relationships, Negritude. Offered Every Term.

Repeatable for 12 Credits

AFS 5570 Race Relations in Urban Society Cr. 3

Theoretical orientations applied analytically to enhance an understanding of the patterned structures of privilege in society which are based on race. Inequality, segregation-desegregation, pluralism; social structural frameworks; some attention to social-psychological aspects of topics such as prejudice and racism. Offered Intermittently.

Equivalent: SOC 5570

AFS 5580 Law and the African American Experience Cr. 4

In-depth examination of the African American experience with law in the U.S.; historical development of the U.S. Constitution; legal barriers to equality and the influence of race on the law; use of law as a political instrument; participation of Blacks in the legal process; comparisons with other countries. Offered Every Other Year.

Equivalent: SOC 5580

AFS 5700 The Psychology of African Americans Cr. 4

Methodological approaches to and theories of Black behavior and personality development. Topics include: race and pathology, life-span and psycho-sexual development, personality formation, social and environmental stress and adaptation. Offered Every Term.

Equivalent: PSY 5700

AFS 5740 Ethnicity: The Politics of Conflict and Cooperation Cr. 4

Current ethnic (racial, linguistic, religious, and cultural) conflicts regionally, nationally and internationally. Introduction to concepts and analytic perspectives for understanding ethnicity as a factor in nation building and maintenance. Offered Yearly.

Equivalent: PCS 5500, PS 5740

AFS 5991 Field Work in the Black Community Cr. 3-8

Field placement in community-based, human services, and civic organizations and governmental agencies. Offered for undergraduate credit only. Offered Yearly.

Restriction(s): Enrollment is limited to Undergraduate level students; enrollment is limited to students with a major in Africana Studies; enrollment limited to students in a Bachelor of Arts degree.

AFS 5993 Writing Intensive Course in African American Studies Cr. 0

Satisfies General Education Requirement: Writing Intensive Competency Disciplined writing assignments under the direction of a faculty member. Must be selected in conjunction with a designated corequisite; see section listing in Schedule of Classes for corequisites available each term. Satisfies the University General Education Writing Intensive Course in the Major requirement. Required for African American Studies majors. Offered Every Term.

Prerequisite: AFS 3160 (may be taken concurrently) with a minimum grade of C- or AFS 3180 (may be taken concurrently) with a minimum grade of C- or AFS 3200 (may be taken concurrently) with a minimum grade of C- or AFS 3250 (may be taken concurrently) with a minimum grade of C- or AFS 3420 (may be taken concurrently) with a minimum grade of C- or AFS 3610 (may be taken concurrently) with a minimum grade of C- or AFS 5110 (may be taken concurrently) with a minimum grade of C-

Restriction(s): Enrollment is limited to Undergraduate level students; enrollment is limited to students with a major in African American Studies.

AFS 6100 Class, Race, and Politics in America Cr. 3

Historical and analytic investigation into the role of class and race in American politics. Offered Intermittently.

Equivalent: HIS 5110, PS 6050, SOC 7330, UP 7030

AFS 6170 Studies in Ethnicity and Race in American Life Cr. 3-4

Exploration of complicated relationship between ethnic and racial diversity and the making of America. Using historical, literary, and cultural readings and sources to examine key themes: Who was the "Other"? What is an "American"? Offered Every Other Year.

Equivalent: HIS 6170

AFS 6455 Discrimination and Fair Housing Cr. 3

Multidisciplinary investigation into the nature, motivations, consequences, and legal/public policy implications of racial/ethnic discrimination in housing and related markets in U.S. metropolitan areas. Offered Every Other Year.

Equivalent: ECO 6455, PS 6455, SOC 6455, UP 6455, US 6455

AFS 6600 Urban Poverty and Racial Segregation Cr. 3

Review of theories of poverty from various economic/political perspectives; historical intervention policies; current literature on interplay of racial, economic, and spatial factors on growing economic inequality among urban whites and African-Americans. Political rationale and meaning of the underclass debate. Offered Every Other Year.

Restriction(s): Enrollment is limited to Graduate level students.

Equivalent: ANT 7260, PS 7260, SOC 7350, UP 7260

AFS 6990 Directed Study Cr. 3-8

Reading and research projects. Offered Yearly.

AFS 7241 Readings in American Slavery Cr. 4

Rise, expansion, and demise of slavery in the United States. Study of the five generations of Americans who lived with this institution; the unique imprint of slavery on American history and collective memory. Offered Yearly.

Restriction(s): Enrollment is limited to Graduate level students.

AGD - ART: GRAPHIC DESIGN

AGD 2230 Introduction to Typography: Skills and Concepts Cr. 3

Introduction to typography through the use of digital and hand craft skills and conceptual framing for working with letter forms and the layout of text. Assignments and demonstrations to develop thinking and making abilities. Offered Fall, Winter.

Course Material Fees: \$90

AGD 2240 Introduction to Graphic Design: Skills and Concepts Cr. 3

Introduction to graphic design skills (digital and analog) and concepts necessary for working with images and type. Assignments and demonstrations will develop design thinking and creative abilities. Offered Fall, Winter.

Course Material Fees: \$90

AGD 2250 Typography Cr. 3

Fundamental understanding of structure, history, technology and application of typography, the visualization of language. Functional and experimental aspects of typography; typographic syntax and hierarchies. Offered Fall, Winter.

Prerequisites: ACO 1200 or ACO 1230 or ACO 1270 and AGD 2230 and May be taken concurrently: AGD 2240

Course Material Fees: \$90

AGD 3250 Graphic Design I: Principles and Problem Solving Cr. 3

Visual communication issues and applications: design methodology, problem-solving, relation of form to meaning, type/image relationships. Offered Fall, Winter.

Prerequisites: May be taken concurrently: AGD 2230 and AGD 2240 and ACO 1200 or ACO 1230 or ACO 1270

Restriction(s): Enrollment limited to students in a Bachelor of Arts or Bachelor of Fine Arts degrees.

Course Material Fees: \$90

AGD 3260 Introduction to Interactivity in Graphic Arts Cr. 3

Exploration of a variety of art-making strategies that utilize digital technologies and interactive media; emphasis on computer-based and online art practices and web-oriented programming languages. Offered Yearly.

Prerequisites: ACO 1200 with a minimum grade of D- or ACO 1230 with a minimum grade of D- or ACO 1270 with a minimum grade of D- or APH 2400 with a minimum grade of D-

Course Material Fees: \$145

Equivalent: ADA 3220

AGD 3270 Introduction to Illustration Cr. 3

Introduction to the role that illustration plays within graphic design; students will use both traditional and digital media to create illustrations and hand lettering to communicate messages intended for reproduction. Offered Yearly.

Course Material Fees: \$90

AGD 3700 History of Graphic Design Cr. 3

History of the discipline of graphic design from its early practices to the present, with an emphasis on technological and theoretical advances that took place during the twentieth century. Offered Winter.

Prerequisite: AGD 2230 with a minimum grade of D- and AGD 2240 with a minimum grade of D-

AGD 4250 Graphic Design II: Word, Image, and Visual Organization Cr. 3
Students apply knowledge of typography and visual design principles to specific design situations; emphasis on use of grid systems. Offered Yearly.

Prerequisites: 2 of ACO 1200, ACO 1230, ACO 1270 and AGD 2230 and AGD 2240 and AGD 2250 and AGD 3250

Restriction(s): Enrollment limited to students with a class of Junior or Senior; enrollment limited to students in a Bachelor of Arts or Bachelor of Fine Arts degrees.

Course Material Fees: \$90

AGD 4260 Professional Practice Cr. 3

Preparation for working professionally as a graphic designer including portfolio and resume development, working with clients, budgets, and schedules. Offered Yearly.

Prerequisites: AGD 2240 with a minimum grade of D- and AGD 3250 with a minimum grade of D- and AGD 4250 with a minimum grade of D-

Course Material Fees: \$55

AGD 4270 Intermediate Illustration Cr. 3

Development of illustration skills; students will learn to effectively use both traditional and digital media to create illustrations and hand lettering to communicate messages intended for reproduction. Students engage in problems that demand research, creation and management of numerous visual and informational elements within a given visual product. Offered Yearly.

Prerequisite: AGD 3270

Course Material Fees: \$90

AGD 5250 Graphic Design III: Complexity and Variety in Design Cr. 3

Complex design situations. Research and methodology. Project may include package design, instruction manuals, book and brochure design, publication design. Offered Fall, Winter.

Prerequisites: AGD 2240 with a minimum grade of D- and AGD 2250 with a minimum grade of D- and AGD 3250 with a minimum grade of D- and AGD 4250 with a minimum grade of D-

Restriction(s): Enrollment is limited to students in the Department of Art and Art History; enrollment limited to students in a Bachelor of Arts, Bachelor of Fine Arts or Master of Arts degrees.

Course Material Fees: \$90

AGD 5260 Senior Seminar Cr. 3

Satisfies General Education Requirement: Writing Intensive Competency Issues affecting the theory, history, and practice of design; impact of design on society and impact of society on design. Required readings, student presentations, class discussion, slide lectures, guest speakers. Satisfies the General Education Writing Intensive Course in the Major requirement. Offered Winter.

Restriction(s): Enrollment is limited to students in the Department of Art and Art History; enrollment limited to students in a Bachelor of Arts, Bachelor of Fine Arts or Master of Arts degrees.

Course Material Fees: \$50

AGD 5700 Special Topics Cr. 3

Examination of specific issue in design theory, history or practice. Topics may include: corporate identity, globalization of design, exhibition design, design history. Offered Spring/Summer.

Prerequisites: AGD 3250 with a minimum grade of D-

Restriction(s): Enrollment is limited to students in the Department of Art and Art History; enrollment limited to students in a Bachelor of Arts, Bachelor of Fine Arts or Master of Arts degrees.

Course Material Fees: \$90

Repeatable for 15 Credits

AGD 5740 Interactivity Cr. 3

Theory and practice of digital user experience design. Includes prototyping and some programming for the design of websites, apps, and digital media. Builds on foundational interactive, typography and graphic design skills. Offered Yearly.

Prerequisites: AGD 2230 or AGD 2240 or AGD 2250 or AGD 3250 or AGD 3260 or AGD 4250

Course Material Fees: \$90

AGD 5750 Information Design Cr. 3

Theory and practice of user-centered design to help people find, understand, and use information. Includes the visualization of information for such things as instructions, maps, forms, diagrams, and digital media. Offered Yearly.

Prerequisites: AGD 2230 or AGD 2240 or AGD 2250 or AGD 3250 or AGD 4250

Course Material Fees: \$90

AGD 5890 Directed Projects: Graphic Design Cr. 3-6

Individual problems. Offered Fall, Winter.

Restriction(s): Enrollment is limited to students in the Department of Art and Art History; enrollment limited to students in a Bachelor of Arts, Bachelor of Fine Arts or Master of Arts degrees.

Course Material Fees: \$90

Repeatable for 12 Credits

AGD 5990 Field Study: Internship Cr. 3

Supervised field experience designated to correlate classroom theory with practical work. Offered Every Term.

Prerequisites: AGD 3250 with a minimum grade of D-

Restriction(s): Enrollment limited to students with a class of Senior; enrollment is limited to students in the Department of Art and Art History; enrollment limited to students in a Bachelor of Arts or Bachelor of Fine Arts degrees.

Course Material Fees: \$30

Repeatable for 6 Credits

AGD 5997 Senior Studio Cr. 3

Extended student projects such as identity systems with various applications, families of package design, series of form design, or poster series. Possible collaborative projects; extensive research. Offered Fall, Winter.

Prerequisites: 2 of ACO 1200, ACO 1230, ACO 1270 and 2 of AGD 3000-6999 and AGD 2230 and AGD 2240 and AGD 2250 and AGD 3250 and AGD 4250

Restriction(s): Enrollment is limited to students in the Department of Art and Art History; enrollment limited to students in a Bachelor of Arts, Bachelor of Fine Arts or Master of Arts degrees.

Course Material Fees: \$90

AGD 6260 Advanced Typography Cr. 3

Advanced and experimental typography; typography as an expressive language in 2-D and 3-D; projects in information design. Offered Intermittently.

Prerequisites: AGD 4250 with a minimum grade of D-

Restriction(s): Enrollment is limited to students in the Department of Art and Art History; enrollment limited to students in a Bachelor of Arts, Bachelor of Fine Arts or Master of Arts degrees.

Course Material Fees: \$90

AGD 7250 Graduate Problems in Graphic Design Cr. 3-9

Individual problems in advanced advertising design. Offered Fall, Winter.

Prerequisites: AGD 5250 with a minimum grade of C

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students in a Master of Arts degree.

Course Material Fees: \$90

Repeatable for 24 Credits

AGD 8850 MFA Studio: Graphic Design Cr. 3-9

Extended problems in graphic design; individual research with 18 to 27 hours of laboratory per week. Offered Fall, Winter.

Restriction(s): Enrollment is limited to Graduate level students; enrollment limited to students in a Master of Fine Arts degree.

Course Material Fees: \$200

Repeatable for 36 Credits

AH - ART HISTORY

AH 1000 Introduction to Art Cr. 3

Satisfies General Education Requirement: Cultural Inquiry, Visual Performing Arts

An introductory survey of art and culture designed to equip students to look purposefully, critically, and contextually at images and events, mindful of the ways that meaning is produced and perceived. Offered Every Term.

AH 1110 Survey of Art History: Ancient through Medieval Cr. 3-4

Satisfies General Education Requirement: Cultural Inquiry, Visual Performing Arts

Survey of traditions and major developments in visual expression in the West, prehistory through Medieval period. Art studied in context of its cultures; techniques of visual analysis. Offered for four credits only to Honors students. Offered Every Term.

AH 1120 Survey of Art History: Renaissance through Modern Cr. 3-4

Satisfies General Education Requirement: Cultural Inquiry, Visual Performing Arts

Traditions and developments in visual expression in the West, Renaissance through twentieth century. Art in context of its cultures; techniques of visual analysis. Offered for four credits only to Honors students. Offered Every Term.

AH 1130 Encounters with the Arts of Global Africa Cr. 3

Satisfies General Education Requirement: Cultural Inquiry, Global Learning Inquiry, Visual Performing Arts

Introductory survey of the arts of Africa and the African Diaspora, focusing on the visual culture of cross-cultural contact within Africa and beyond. Offered Fall, Winter.

Restriction(s): Enrollment is limited to Undergraduate level students.

AH 3070 Art and Archeology of Ancient Egypt Cr. 3

An introduction to the history and development of Egyptian artistic style in architecture, sculpture, painting and the applied arts; historical, social and religious background. Offered Intermittently.

AH 3150 The Arts of Africa: Local and Global Visions Cr. 3
