Drug and Alcohol Prevention Program

2018-2020 Review

Submitted by:

Jeffrey Kuentzel, Director, Counseling & Psychological Services (CAPS)

Brett Green, Senior Director, Compensation and Benefits

January, 2021
We are pleased to present the 2018-2020 Wayne State University Drug and Alcohol Abuse Prevention Program review in the pages that follow.

As a summary, we would like to highlight the following program enhancements and recommendations since the 2018 review:

**Program Enhancements:**

1. The Coordinator of Student Life Wellness and the Dean of Students continued to meet with each student who received a minor in possession citation on-campus, as well as each student who had a hospital transport from campus due to precarious health after alcohol consumption.

2. Residence hall students also met with their building community director and received disciplinary sanctions to be carried out in the residence hall.

3. Wayne State University purchased a subscription to eCHECKUP TO GO which is an online alcohol education program that each student who receives an alcohol related conduct violation must complete.

4. Since the fall of 2017, Wayne State has presented a National Collegiate Alcohol Awareness Week each fall. The week is coordinated by the Dean of Students Office in collaboration with Greek life, Campus Health Center, the Office of Counseling and Psychological Services and the Office of Housing and Residential Life.

5. Wayne State has made great strides in identifying methods for collecting information about student substance use, much of which is detailed in this report. As one example, WSU’s JED Campus project has continued, a four year strategic planning program focused on comprehensive mental health services, including drug and alcohol abuse prevention programming. The Healthy Minds Study, completed by approximately 450 WSU students in April of 2017, found that 1% of students had been previously diagnosed with a substance use disorder. Seventy-seven percent of respondents had not used any drugs in the last month (not including alcohol). Twenty percent had used marijuana in the last month. The Healthy Minds Study will be conducted again in the Winter of 2021.

6. The Office of Housing and Residential Life began utilizing the Maxient platform for its conduct management at the conclusion of the last biennial review period. Record keeping has been designed to identify drug and alcohol violations which will lead to accurate and expedient access to related data.

7. Wayne State’s Suicide Prevention Initiative continued and expanded, funded by a three year Garrett Lee Smith grant from the Substance Abuse and Mental Health Services Administration. The association between substance abuse and suicide is well recognized.

8. The Department of Athletics participates in several NCAA wellness program initiatives, including bringing speakers to campus to educate all student-athletes (mandatory attendance) in alcohol abuse prevention, substance abuse prevention, sexual misconduct prevention education, and bystander intervention training. Specifically, Athletics offers Warrior 360, an on-line platform that includes a number of learning modules (including alcohol and drug education) in addition to monthly topics and education sessions. Every student athlete is enrolled and participation is
monitored. The “NCAA Playbook” is an NCAA education program in which all first year student athletes (transfer and freshmen) are enrolled. It includes a number of education topics and monitoring on issues such as substance abuse and alcohol awareness. Noted alcohol education speaker Mike Green remains an on-going consultant and reference for teams and student-athletes throughout the calendar year.

9. The Office of Counseling and Psychological Services (CAPS) has implemented clinical documentation changes in order to better collect information related to substance use. In 2018, of 1,075 students screened, 7.2% had engaged in binge drinking 3 times or more in the last 2 weeks, and 17.3% had used marijuana 3 times or more in the last 2 weeks. Twenty percent (20%) needed to reduce their past drug and alcohol use at least twice, and 2.8% had previous drug or alcohol treatment. In 2019, of 1,165 students screened, 9.6% had engaged in binge drinking 3 times or more in the last 2 weeks, and 18.8% had used marijuana 3 times or more in the last 2 weeks. Nearly 22% needed to reduce their past drug and alcohol use at least twice, and 1.8% had previous drug or alcohol treatment. In 2018, 32 students completed substance use evaluations at CAPS, while in 2019 there were 12 substance use evaluations completed. At the intake evaluation, which starts a course of counseling, in 2018, 22 students (5.2%) had reducing drug and alcohol use as a treatment target. In 2019, 16 students (3.1%) had a treatment target of reducing drug and alcohol use.

10. CAPS offers anonymous screening provided by Mindwise Innovations via a link on the CAPS website. CAPS markets this service widely. When a screening indicates the likelihood of problematic use, resources are provided so students can access professional help. About a third of individuals screened would not have been WSU students, according to demographic questions in the screening. This is because the screenings are available to anyone. In 2018, 25 individuals were screened for alcohol misuse, and 80% were indicated to have problematic alcohol use. Seventeen individuals in 2018 completed a similar screening offered in the same package of screening tools, and 82% were suggested to have problematic substance use. In 2019, 24 individuals completed the alcohol misuse screening and 75% were suggested to have problematic alcohol use. Thirty-four completed the other screening tool, and 97% were indicated to be at moderate or high risk for substance misuse.

11. The Wayne State University police department maintains a log reflecting drug and alcohol violations addressed by the police on campus and at university sponsored events. In 2018, there were 36 alcohol violations and all were referred to the housing disciplinary system. There were 41 drug violation referrals, of which 37 were referred to the housing disciplinary system and 4 were referred to the student conduct officer. In 2019 there were 233 alcohol violations. Two hundred twenty-five of these violations were referred to the housing disciplinary system and 8 were referred to the student conduct officer. There were 158 drug violation referrals. One hundred fifty-one of these violations were referred to the housing disciplinary system and 7 were referred to the student conduct officer. The increases in cases from 2018 to 2019 are due to a change in housing leadership and increased involvement between resident advisors, community directors, and residents, allowing better identification of students with problematic substance use.

12. As recommended by the 2016-2018 report, the university Registrar’s office now compiles the number of students seeking and receiving medical withdrawals due to drug and alcohol abuse issues. In the 2018-19 academic year, 9 of 238 medical withdrawal applications (3.8%) were based on substance use diagnoses. In the 2019-20 academic year there were 5 out of 250 applications (2%). All such applications were approved both years.
13. The Campus Health Center (CHC) routinely identifies patients who have alcohol abuse and/or substance abuse histories and/or current alcohol abuse and/or substance abuse problems. New patients are screened as appropriate and health education is provided on an individual basis. CHC records indicate that in 2018, 9 students were diagnosed with substance use problems, all related to use of nicotine. In 2019, 13 students were diagnosed with either nicotine use or alcohol use. Additionally, CHC provides treatment referrals as appropriate.

**Recommendations for 2020-2022:**

**Education and Training**

1. The University distributed to all students the “Get Inclusive” online module educating students in topics of sexual violence prevention education, substance abuse prevention education, and hazing awareness education. Students were informed that this module was required. It is recommended that this module continue to be required, with the possibility of required completion before registering for classes.

**DAAPP Oversight**

2. It is recommended that the newly formed Warrior Life Student Life Wellness Committee be designated as the campus committee responsible for producing the Drug and Alcohol Prevention Program (DAAPP). This committee should be appointed by the President or his/her designee. Additionally, this committee should develop a yearly calendar that includes all drug and alcohol abuse prevention programming for students and employees.

3. It is recommended that formal appointment of a DAAPP committee be established. This committee should be appointed by the President or his/her designee and will be responsible for reviewing, on a semi-annual basis, the work of the Warrior Life Student Life Wellness Committee as well as compiling and producing the biennial DAAPP report. The campus biennial review committee should consist of, at a minimum, the following members or their designees: the Dean of Students, the Director of Housing and Residential Life, the President of the Nursing Practice Corporation (Campus Health Center), the Director of CAPS, the Associate Vice President and Chief Audit Executive, the Athletics Director, the Registrar, and the Director of Benefits.

**Student Conduct Case Management**

4. Through the Maxient student conduct case management platform, a repository has been established whereby each drug and alcohol violation addressed by the police on campus and at university sponsored events is recorded and available for data access. This should continue and expand if appropriate.

**Campus Health Center Behavioral Health Integration**

5. The Campus Health Center (CHC) has taken important steps in the direction of Behavioral Health Integration (BHI), which will allow more students with substance use problems to be identified and connected with treatment. We strongly encourage these efforts, as students are more likely to visit a primary care center than a mental health treatment center due to stigma. A 3-year federal grant awarded to Dr. Cynthera McNeill (College of Nursing) will allow a full-time CAPS University Counselor II to be embedded at CHC. This individual, a Licensed Social Worker, will
serve as a primary care case manager, adding a strong clinical focus on mental health including substance abuse. The BHI program will make possible regular trainings on mental health topics for CHC primary care staff, and the new case manager will also supervise social work interns who will further expand the mental health (including substance use) screening and treatment capacity of CHC. We recommend that sustainability beyond the grant period for this project is aggressively pursued.
## DoE Requirements

### Information to be included in materials for students and employees

<tr>
<td></td>
<td>include affordable copays ranging from $5 for generic drugs to up to $45 for non-preferred brand name drugs. In addition, the Employee Assistance Program provided by Ulliance provides referrals for substance abuse situations and events, a flexible number of counseling sessions for employees and family members, referral services to longer term counseling resources, as well as management consultations and supervisory training for substance abuse situations. For students, the Office of Counseling and Psychological Services provides the following resources and services: Individual counseling for substance use issues. Substance abuse group therapy sessions. Bystander training which includes alcohol prevention. Free screenings for substance and alcohol abuse. For students, the Campus Health Center provides alcohol and drug use and abuse screenings and provides to all students, via email, the Student Health 101 online newsletter which provides custom pages specifically for Wayne State University where information on resources and services are included.</td>
</tr>
</tbody>
</table>

6. A description of the health risks associated with the use of illicit drugs and alcohol | This information is included in regularly distributed materials, including emails to all students, faculty, and staff, digital signage on-campus, table tent displays in all dining establishments, building displays in the lobbies of all campus buildings, and all new student and employee orientations. It is also noted in [http://police.wayne.edu/handbook.php](http://police.wayne.edu/handbook.php) And on the main university webpage, wayne.edu, at: [https://wayne.edu/campus-safety-resources/](https://wayne.edu/campus-safety-resources/) |

7. A clear statement that the school will impose disciplinary sanctions on students and employees for violations of the standards of conduct (consistent with local, state, and federal law) and a description of these sanctions, up to and including expulsion, termination of employment, and referral for prosecution. | This information is noted below, as it relates to all members of the campus community: [https://bog.wayne.edu/code/2-20-04](https://bog.wayne.edu/code/2-20-04) [http://police.wayne.edu/handbook.php](http://police.wayne.edu/handbook.php) As it relates to students: [https://doso.wayne.edu/pdf/student-code-of-conduct.pdf](https://doso.wayne.edu/pdf/student-code-of-conduct.pdf) As it relates to students living on-campus: [https://housing.wayne.edu/pdf/community-living-guide.pdf](https://housing.wayne.edu/pdf/community-living-guide.pdf) |
### Distribution of materials to all students and employees

<tbody>
<tr>
<td>10.</td>
<td>The school must certify that, on the date it signs the Program Participation Agreement (PPA), it has a drug and alcohol abuse prevention program <strong>in operation</strong> that is accessible to every officer, employee, or student.</td>
<td>Confirmed.</td>
</tr>
</tbody>
</table>
| 11.     | The school must review its program once **every 2 years** to determine its effectiveness and to ensure sanctions are being enforced. | As detailed in the summary above, Wayne State University has reviewed our DAAPP program to determine its effectiveness and ensure sanctions are being enforced. A key finding is that detection and reporting of student housing violations has dramatically improved. Great strides have also occurred in identifying sources of data about student substance use, ranging from surveys such as the Healthy Minds Study, to clinical data from the Campus Health Center and Counseling and Psychological Services (CAPS), to online screenings offered by CAPS.  
Other efforts that pertain to the prevention of drug and alcohol abuse have been underway. In 2017, the university was selected to be a member of the JED Campus Project. The JED Campus Project is a |

</table>
| 12. The school must determine during its biennial review:  
  - The number of drug and alcohol-related violations and fatalities that occur on campus or as part of any of the school's activities and that are reported to campus officials  
  - The number and type of sanctions imposed by the school as a result of drug and alcohol-related violations and fatalities on campus or as a part of any of the school’s activities | Student Conduct Office reports of violations and sanctions can be found at:  
https://bog.wayne.edu/meetings/335/31_January_2020_SAC_Item_Y.pdf  
https://bog.wayne.edu/meetings/326/07_Dec_2018_SAC_Item_Q.pdf  
Employee report of services rendered is included in this report on pages 10-12.  
Wayne State University police report related data is included in this report.  
From 2018 – 2020, four students were found responsible for violating the Student Code of Conduct (SCC) policy related to drugs (4.8 Illegal use, possession, manufacture or distribution of drugs.) All four students received a disciplinary probation as their sanction. |
| 13. The school must make available, upon request, the results of the review as well as the data and methods supporting its conclusions. | Student Conduct Office report of violations and sanctions is presented to the Wayne State University Board of Governors every fall.  
Healthy Minds Survey and American College Health Association-National College Health Assessment survey are reviewed by JED Campus Committee, campus student wellness committee, and campus Behavioral Intervention Team. All materials are available upon request. |

**Additional Information Regarding Employee Resources and Programming**

**Drug and Alcohol Free Workplace Policy**
Wayne State University is committed to providing a drug-free environment for its faculty, staff, and students. The Board of Governors has made this commitment a formal policy of the University. All faculty, staff and students must abide by the terms of the Board policy as a condition of employment or enrollment at the University. The unlawful possession, use, distribution, sale or manufacture of drugs or alcohol is prohibited on University premises, at University activities, and at University work sites. The policy can be found at the following links:
Pursuant to that policy, the unlawful possession, use, distribution, dispensation, sale or manufacture of any illicit drugs, and the unlawful possession, use or distribution of alcohol on University property, or at any University work site, or as part of any University activity, is prohibited.

Any employee or student employee who is convicted of a criminal drug offense occurring at the workplace is subject to appropriate employee discipline in accordance with established University policies and collective bargaining agreements, and may be required to participate satisfactorily in a drug abuse or rehabilitation program as a condition of further employment or enrollment.

Any student or employee who, while on University premises or at any University activity, engages in the unlawful possession, sale, manufacture, distribution, or use of drugs or alcohol shall be subject to appropriate sanctions, in accordance with established University policies, the Student Code of Conduct, and collective bargaining agreements, and in conformity with local, State and federal law, up to and including expulsion or termination. A student or employee who is found to have violated this policy may be required to participate in a drug or alcohol treatment program as a condition of further employment or enrollment.

The University encourages employees who may have a problem with the use of illicit drugs or with the abuse of alcohol to seek professional advice and treatment. Individuals who seek assistance with such problems may obtain additional information on a confidential basis by telephoning the Employee Assistance Program (EAP) at 1-800-448-8326. Students may also seek referral assistance by contacting University Counseling and Psychological Services (CAPS), at 313-577-3398.

The WSU Employee Wellness Program promotes healthy living and includes a biometric screening and Health Risk Assessment (HRA). The HRA indicates high risk factors with regards to drug / alcohol / nicotine use. Through the use of the Ulliance Wellness Coaches and the WSU Wellness Program, any employee at high risk for substance use could be provided telephonic wellness coaching.

Below are the service reports referenced above in section 12 for employees for the last two years, 2018 and 2019. These reports give a quantifiable measure of the number of cases seen for substance use, as well as the number of services provided. Please see the chart below for a summary of services specifically related to substance use for 2018 and 2019:
Service reports are presented to Wayne State on a quarterly basis. It is the role of the Account Manager to highlight any trends or concerns that may be present in the data. Any program modifications the Account Manager would suggest, would be the result of a change in data or due to reported concerns from the university. Recommendations may include changing the content or the frequency of delivery of promotional materials and events, specifically highlighting substance use awareness or use of the EAP for concerns with the same. As part of the engagement with Ulliance, the following resources are available and can be used by eligible employees and managers/leaders. In addition, Ulliance meets regularly with WSU leaders and labor relations for continued promotion of the EAP services to all staff.

**Substance Abuse Awareness Training (for Employees or Managers/Supervisors):**

This 1-hour course (2 hours for Managers/Supervisors) focuses on warning signs of substance abuse and how to seek treatment and services. WSU has a bank of training hours included in its EAP contract and these hours could be used to deliver training (live or web-based) at no cost, provided the bank was not exceeded. In 2018 and 2019, this training was delivered for employees on three occasions and to Supervisors/Managers on two occasions.

In 2018 Ulliance Life Advisor EAP also provided the following trainings on substance use:

**Trainings**  Substance Use Awareness for Employees: 4/26/18 and 10/16/18  
Substance Use Awareness for Supervisors: 9/12/18 and 11/13/18

In 2019 Ulliance Life Advisor EAP also provided the following trainings and webinars on substance use:

**Trainings**  Substance Use Awareness for Employees: 1/8/19

**Smart Manager Webinars:** Our Smart Manager webinars are 30 minutes and are offered on a variety of topics, including medical marijuana and substance abusing employees. We offer live webinars monthly, and our Life Advisor EAP website offers on-demand versions for the employee’s convenience if participation in the live version is not possible. Smart Manager Webinars offered – Substance Abuse in the Workplace (4/19/2018) and Marijuana in the Workplace (2019).

**Manager/Supervisor Orientations:** These 1-hour orientations (live or web-based) educate leaders on the management services available through the Life Advisor EAP, including management consultations, formal referrals, addressing employee performance concerns, and informally referring employees to the EAP, as well as a general overview of EAP service. The orientation can include role plays and scenarios, which could be tailored to focus on substance abuse (or any other concerns) should WSU decide that would be beneficial. In 2018, there were seven events for Employee Orientations. In 2019, there were five Employee Orientation events and one Manager Orientation.

**Management Consultations and Formal Referrals:** The Account Management team is available 24/7 and routinely provides HR and management consultation on a wide range of issues related to difficult
employee situations. Guidance on what approach to take to address and resolve such issues, such as substance use, are confidential and available to HR/Manager/Supervisor professionals. The Formal Referral is a process in which HR professionals can formally refer an individual to the EAP if that individual is experiencing work performance issues, or has violated a workplace policy. The individual will be given an opportunity to develop skills and tools to remedy workplace performance issues. This can also be specifically related to substance use, or a variety of other issues.

**Promotion of EAP:** Promotion of EAP services and specific topics, including substance use, can be in the form of monthly Life Advisor EAP newsletters for employees and quarterly Manager Bulletins. In addition, the Dedicated Account Manager can provide regularly updated information for posting on the WSU employee website. Web-based promotion information is available from Ulliance to include on the staff and faculty intranet regarding services and resources available through the EAP for employees and eligible family members.

**WSU Programs that Support DAAP (Drug and Alcohol Abuse Prevention) For Employees**

WSU provides rich mental health coverage through employee medical plans:

1. Counseling services
2. Rehabilitation services
3. Nicotine Replacement therapy patches coverage through medical plans

WSU health care providers monitor Opioid usage within self-funded medical benefits

WSU’s EAP provided by Ulliance includes following services to the benefit eligible workforce:

1. Referral for substance abuse situations/events
2. Unlimited number of counselling sessions for employees and family members
3. Referral services to longer-term counselling resources
4. Supervisory training for substance abuse situations

WSU Wellness Plan provides supports DAAP with following related activities:

1. University Pharmacy access to Naloxone (narcotic blocker) for overdose.
2. Physical fitness programs for employees to support smoking cessation efforts
3. Smoking cessation behavior modification packages

WSU Human Resources and Labor Relations provide training and review of EAP services to following organization to remind managers of EAP substance abuse prevention services:

1. Labor Relations department (April 11, 2018)
2. HR Client Services Directors (April 18, 2018)
3. HR Consultants (July meeting)
